Goal 1
Become a national model for undergraduate education by demonstrating that students from all backgrounds can achieve academic and career success at high rates.

GSU Welcomes New 2CI Faculty and Enters Fourth Round of Awarded Proposals
Eleven distinguished researchers will join the faculty of Georgia State this fall as part of the university’s Second Century Initiative (2CI) which supports emerging fields of study from bioinformatics to the future of cities.

The Second Century Initiative is expected to bring in more than 100 new professors by 2015, enhancing Georgia State’s strategic efforts to increase the university’s level of competitive, federally funded studies and its overall recognition for excellence in research.

A New Launch: Cooperative Education at Georgia State University
We are excited to announce the approval of GSU’s Cooperative Education Program (Co-Op) which will kick off this fall with students from the Computer Science and Computer Information Systems degree programs.

Cooperative education is a full-time, paid, rotational, field-based experience that is a critical component of a student’s academic program for which they receive credit. Students will have the opportunity to apply skills learned in the classroom to related work experiences, giving them a competitive edge once they enter the workforce on a full-time basis.

Planning Atlanta: A New City in the Making, 1930s-1990s
Planning Atlanta: A New City in the Making, 1930s-1990s consists of city planning maps, documents and publications primarily from the City of Atlanta and the Atlanta Regional Commission. The collection includes digital items such as land use and urban renewal maps, comprehensive City of Atlanta plans and statistical publications such as Atlanta Regional Commission’s Housing and Population from 1955 to 1999.
