Welcome to the ITC

The Instructional Technology Center (ITC) is designed for faculty, students, and Pre-K-12 educators to encourage and support technology confidence and expertise in the areas of teaching, collaboration, and consultation. One of several centers operated by the College of Education at Georgia State, the ITC offers a wide variety of services.

The ITC serves as a resource center providing learning spaces, technology workshops, student computer access, and specialized educational technology resources. Our resources include equipment, software and over 100 years of combined educational technology expertise from our experienced staff.
