The mission of the Master of Education (MED) in English is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MED English program is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities. The M.Ed. major in English Education provides for master's level study in English Education and English content and leads to T-5 certification in secondary English (grades 6-12). The program ensures that candidates gain increased subject matter knowledge and pedagogical knowledge, demonstrate success in bringing middle and high school students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content. The program's underlying framework is constructivism, which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban English education.

**Goals**

**G 1:** Are informed educators who have expert knowledge of the content needed to teach English Language Arts in Grades 6-12

Candidates are informed educators who have expert knowledge of the content needed to teach English Language Arts in Grades 6-12.

**G 2:** Are professional educators with knowledge, skills, and dispositions necessary to teach English Lang. Arts in grades 6-12

Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching English Language Arts in Grades 6-12.

**G 3:** Are highly effective educators whose teaching practices have a measurable impact on the English Language Arts learnin

Candidates are highly effective educators whose teaching practices have a measurable impact on the English Language Arts learning of their students.

**Outcomes/Objectives**

**O/O 1: Demonstrates Content Knowledge (G: 1) (M: 1, 2, 3, 4)**

Candidates have knowledge and understanding of English grammars, the history and evolution of the English language, the foundations of reading and writing processes, an extensive range of literature, and a wide range of literary theories. (Key
### Measures, Targets, and Findings

#### M 1: Content Knowledge: Portfolio Standard 1 (O: 1)
A portfolio rating for Standard 1 will be derived from each student’s written and oral responses explaining how their portfolio artifacts and essays demonstrate his or her competency in content knowledge of English grammars and the history and evolution of the English language.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrates Content Knowledge**

100% of program completers will demonstrate a basic level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action (Score 3 or higher) and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2010-2011 - Target: Met**

In 2010-2011, one student completed the MEd English (advanced) program. Thus, all findings for this year’s report will reflect a population of n=1. 100% of program completers demonstrated a proficient level of knowledge and skill in content knowledge of English grammars and the history and evolution of the English language.

#### M 2: Content Knowledge: Portfolio Standard 2 (O: 1)
A portfolio rating for Standard 2 will be derived from each student’s written and oral responses explaining how their portfolio artifacts and essays demonstrate his or her competency in content knowledge of the foundations of reading and writing processes.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrates Content Knowledge**

100% of program completers will demonstrate a basic level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action (Score 3 or higher) and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2010-2011 - Target: Met**

In 2010-2011, one student completed the MEd English (advanced) program. Thus, all findings for this year’s report will reflect a population of n=1. 100% of program completers demonstrated a proficient level of knowledge and skill in content knowledge of the foundations of reading and writing processes.

#### M 3: Content Knowledge: Portfolio Standard 3 (O: 1)
A portfolio rating for Standard 3 will be derived from each student’s written and oral responses explaining how their portfolio artifacts and essays demonstrate his or her competency in content knowledge of an extensive range of literature, including US literature, British literature, world literature, and multicultural literature as well as literature written specifically for children and young adults.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrates Content Knowledge**

100% of program completers will demonstrate a basic level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action (Score 3 or higher) and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2010-2011 - Target: Met**

In 2010-2011, one student completed the MEd English (advanced) program. Thus, all findings for this year’s report will reflect a population of n=1. 100% of program completers demonstrated a proficient level of knowledge and skill in content knowledge of an extensive range of literature, including US literature, British literature, world literature, and multicultural literature as well as literature written specifically for children and young adults.

#### M 4: Content Knowledge: Portfolio Standard 4 (O: 1)
A portfolio rating for Standard 4 will be derived from each student’s written and oral responses explaining how their portfolio artifacts and essays demonstrate his or her competency in content knowledge of a wide range of literary theories and how these theories inform instructional planning and pedagogy.

Source of Evidence: Portfolio, showing skill development or best work
**Target for O1: Demonstrates Content Knowledge**

100% of program completers will demonstrate a basic level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action (Score 3 or higher) and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2010-2011 - Target: Partially Met**

In 2010-2011, one student completed the MEd English (advanced) program. Thus, all findings for this year’s report will reflect a population of n=1. 100% of program completers demonstrated a proficient level of knowledge and skill in the teaching of literature. 0% of program completers demonstrated a proficient level of knowledge and skill in this area.

**M 5: Professional & Pedagogical Skills: Portfolio Standard 5 (O: 2)**

A portfolio rating for Standard 5 will be derived from each student’s written and oral responses explaining how their portfolio artifacts and essays demonstrate his or her competency in a wide range of instructional practices, approaches, methods, and curriculum materials (including non-print media and technological tools) to support writing instruction and the teaching of literature.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Demonstrates Professional and Pedagogical Skills**

100% of program completers will demonstrate a basic level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action (Score 3 or higher) and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Continued innovation in teaching for urban sites and technological savvy**

All of the target measures for the 2009-2010 group of English education MEd students were met. We, the English education faculty, are interested in fostering innovation in our students' work as teachers. To that end, we are committed to including a focus on urban education sites and the students and communities served by those sites. We are also committed to infusing our courses with technology so that our students can bring technological savvy to their teaching practices in their own urban and metropolitan schools. Our action plan, then, is to continue to find ways to bring issues specific to urban education into coursework and portfolio reflections, while also weaving thoughtful uses of technologies into both course and portfolio requirements. Our digital portfolio and all of its embedded standards will continue to support this action plan. As we consider the long term view of our courses in the program, we are aware that the MEd in English Education is a program that may dissolve with the creation of the MEd in Urban Teacher Leadership. Our commitment, however, will remain focused on urban education and embedding technological savvy into our courses in English education at the graduate level.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: Medium
- Projected Completion Date: 05/2012
- Responsible Person/Group: English Education Faculty

**Content Knowledge of Literary Theories Action Plan**

While the number of graduates in the program for 2010-2011 was quite small (N=1), our action plan is based on not achieving a goal for at least 40% of our graduates to achieve a proficient level of content knowledge of a wide range of literary theories and how these theories inform instructional planning and pedagogy. We plan to continue our emphasis in the EDLA 7550 course to teach students the theories so that secondary English language arts students might also understand these theories.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: Medium
- Projected Completion Date: 06/2012
- Responsible Person/Group: The English Education Faculty
- Additional Resources: N/A

**Professional and Pedagogical Skills with Teacher Research and Collaboration**

While the number of graduates in the program for 2010-2011 was quite small (N=1), our action plan is based on not achieving a goal for at least 40% of our graduates to achieve a proficient level of competency in viewing teacher-researcher models of inquiry, professional development, and collaboration with colleagues as career-long efforts and responsibilities. We plan to continue our emphasis throughout all of the courses specific to English Education (EDLA 7150, 7440, 7460, 7480) that include components of research and inquiry within the activities assigned to students. The requirements in all of these courses provide opportunities for students to collaborate with their colleagues as means for developing their thinking, writing, and teaching philosophies. Likewise, we also advise our students in both the spring and fall terms during our Professional Advising Week about opportunities to attend...
conferences, courses for further development of their professional goals, as well as discussions about their programs of study. The program of study for the MEd degree includes a research methods course that comes with two options: an introduction to research methods (EPRS 7900) and action research (EPRS 7910), a course that specifically engages in understanding teacher inquiry. Given the performance on this measure, we will advise students to consider taking the EPRS 7910 option when possible, and continue to foster communities of inquiry and scholarship within our courses so that students can have opportunities to use research methods throughout their coursework.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 06/2012

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
This year we set different targets for our assessments. That is, we developed targets that seek to show a higher level of proficiency, knowledge, and development among our students. To this end, rather than looking only to see if 100% of our students passed each objective at the basic level, we now seek to see if, in addition to 100% showing performance at the basic level, that at least 40% of the students also show that they can achieve levels at a proficient, or more expert level, than we have in the past. Our shift in looking for a higher level of performance yielded two objectives not being met: content knowledge of literary theories, and pedagogical and professional skills with teacher inquiry, collaboration, and professional development. As we move into the coming academic year, we plan to continue to maintain the expectation that students will perform at a higher level.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
We carefully review the assessment data each year. Since our students do so well on the majority of our objectives, we only need to fine tune our courses to ensure that students are achieving strong understandings of literary theories and professional skills related to inquiry, development, and collaboration. We will use this data to further support students’ learning in the English Education courses (EDLA 7150, 7440, 7460, 7480) so that they may continue to achieve the objectives not only at the basic level, but beyond that to show that they are becoming experts in their field. This support will come in the explicit inclusion of activities for students to use literary theories, collaborate with their colleagues, conduct inquiry projects in areas of language, literature, reading, and composing; as well as in specific advising from the faculty to students about the methods of research courses to help them understand their teaching experiences a spaces for further reflection, research, and scholarship.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A

2010-2011 English Education--TEEMS MAT
As of: 12/12/2016 04:11 PM EST
**Mission / Purpose**

The M.A.T. major in English Education provides initial teacher preparation for individuals holding bachelor's degrees in English. It leads to both a master's degree and certification for teaching secondary English language arts (grades 6-12). The program’s underlying framework is constructivism, which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program is a cohort program that encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban English education. The program ensures that candidates gain sufficient subject matter knowledge and pedagogical knowledge, demonstrate success in bringing middle and high school students from diverse backgrounds to high levels of learning, use technology skillfully as a tool for teaching and learning content, and manage classrooms effectively.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development.

In our department, MSIT, our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta, the nation, and around the world. We are committed to innovation and creativity to push the boundaries of knowledge and practice.

We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

**Goals**

**G 1: Content knowledge for teaching English Language Arts**
Candidates are informed educators who have knowledge of the content needed to teach English Language Arts in Grades 6-12.

**G 2: Knowledge, skills, & dispositions to teach English Language Arts**
Candidates are professional educators with knowledge, skills, and dispositions needed to succeed in teaching English Language Arts in Grades 6-12.

**G 3: Impact on student learning in English Language Arts**
Candidates are effective educators whose teaching practices have a measurable impact on the English Language Arts learning of their students.

**Outcomes/Objectives**

**O/O 1: Content knowledge (G: 1) (M: 1, 2)**
Candidates have knowledge and understanding of the content needed to teach English language arts. (Key Assessments - GACE performance and Content Knowledge section of Final Teaching Evaluation rubric Overall Assessment Score for Content & Curriculum)

**O/O 2: Planning (Pedagogical Knowledge and Skills) (G: 2) (M: 3)**
Candidates demonstrate their knowledge and skills through planning and implementation of a wide range of instructional methods and curriculum materials for teaching English language arts. (Key Assessment - Planning: Pedagogical Knowledge and Skills: Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction)

**O/O 3: Effects on P-12 Student Learning (G: 3) (M: 4)**
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Key Assessment - Effects on P-12 Student Learning: Teacher Work Sample rubric (Section on Analysis of Student Learning)

**O/O 4: Clinical Practice (Pedagogical Knowledge) (G: 2) (M: 5, 6)**
Candidates create learning environments which promote respect for and support of individual differences of ethnicity, race, language, culture, gender, and ability through planning and implementation of a wide range of instructional methods, and curriculum materials. (Key Assessment - Clinical Practice (Pedagogical Knowledge): Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric)

**O/O 5: Dispositions (G: 2) (M: 7)**
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. (Key Assessment - Dispositions: Unit-wide Dispositions Rubric)

These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met
Among the five categories assessed for dispositions (Empathy, Positive View of Others, Positive View of Self, Authenticity, and Meaningful and Purposeful Vision), candidates scored 99% of candidates demonstrated an acceptable level of performance (Score 3) or higher levels and a minimum of 68% of candidates demonstrated an exceptional level (Score 4).

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assessment Action Plan
Update (Fall 2010): We are changing our key assessments for 2010-11 and beyond to reflect students' knowledge, learning, and practices as they work in their practicum/field experience in urban schools. In other words, we are aligning our key assessments with program curriculum so that students can explicitly see the connections between the theory in methods courses and practices in field placements. The domains of our key assessments include the following: Content Knowledge, Planning Effects on P-12 Learners Pedagogical Knowledge. Dispositions Clinical Practice, The STARS tool helped the TEEMS faculty to determine areas needing improvement; however, we want to identify assessment opportunities within our coursework that will help our students to understand and use a variety of instructional strategies to encourage student development of critical thinking, problem solving, and performance skills.

Mid-point teaching evaluation
In order to raise scores on the two lowest levels of this assessment: classroom management and learning environments, we are devoting more attention to these topics in our first methodology course, EDCI 6600, offered in the summer semester. Presently, students create classroom management plans including designing an effective learning environment. We will include more classroom management strategies and practice scenarios. We will also invite classroom management experts, special education professors and practicing teachers, to visit our methodology classes to offer advice and practical solutions to the students during the other methodology courses. A classroom management module during the students' practicum experience is being developed.

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We have made two major changes. First, we have adapted four department-wide assessments to measure our students' learning and...
dispositions: The GACE content knowledge examination; Planning: Pedagogical Knowledge and Skills Teacher Work Samples; Clinical Practice (Pedagogical Knowledge): Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric); and the Dispostions Survey.

Secondly, we have embedded the Standards into our four methodology courses with accompanying assignments. As a result, our portfolio has become more of a capstone assignment synthesizing students' theoretical and pedagogical knowledge and skills in a teaching philosophy narrative and a listing and a description of artifacts reflecting these beliefs. Based on our assessment results, we are implementing the inclusion of more classroom management and learning environment strategies into our methodology classes. In addition, we will provide more information on the English GACE Content Examination.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We carefully review the assessment data each year. Since our students did so well on the four key assessments, we only had to finetune our work with the GACE Content Examination and the results from the mid-point teacher evaluation. We are increasing our attention to classroom management in our graduate classes and student practicum experiences. The Office of Student Achievement is preparing classroom management modules for the students to complete. Also, we will include more information about the GACE Content Examination in our methodology courses.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

NA

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?

NA

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

NA

Georgia State University
Assessment Data by Section
2010-2011 English MA: Literature
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, global and multi-ethnic literary and cultural studies, pedagogy, and secondary education. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs.

Goals
G 1: Assure Mastery in Content Knowledge
In addition to knowledge of major figures, genres, periods, movements, and critical approaches in American, British, and world literatures, students in the M.A program in literary studies will be able to discuss these as a constellation of interconnected fields rather than unrelated categories of information. For example, students will be able to discuss major authors' works in the context of their historical periods and cultural movements.

G 2: Scholarly Engagement with Theoretical Frameworks
The department will strive to produce M.A. students in Literary Studies who demonstrate a scholarly engagement with critical approaches, theoretical frameworks, and/or historical contexts in masters work, in particular in the thesis writing.

G 3: Foster Effective Communications
The department will strive to produce M.A. students in Literary Studies who can demonstrate effective written communication skills.

Student Learning Outcomes/Objectives
SLO 1: Content Knowledge (M: 1, 2)
In addition to knowledge of major figures, genres, periods, movements, and critical approaches in American, British, and world literatures, students will be able to discuss these as a constellation of interconnected fields rather than unrelated categories of information. For example, students will be able to discuss major authors' works in the context of their historical periods and cultural movements.

SLO 2: Knowledge of Language (M: 1, 2)
Students will demonstrate an understanding of the history, structure, and social implications of language as a means of discourse; further, they will be able to relate their understanding of the possibilities and limitations of language to their understanding of major
figures, genres, periods, movements, and critical approaches.

**SLO 3: Scholarly vocabulary (M: 1, 2)**

Students will bring to their analysis of literary works an appropriate scholarly vocabulary that demonstrates an understanding of concepts important to the study of literature. Examples might include critical terms such as postmodern, deconstruction, and semiotic and technical terms drawn from formal study, such as Rime Riche, ballad, and quarto.

**SLO 4: Knowledge and application of theoretical approaches to reading literature (M: 1, 2)**

Students will demonstrate knowledge of major theoretical approaches to reading literature and be able to apply them in their own assessment and interpretation of texts.

**SLO 5: Skills of inquiry (M: 1)**

Students will be able to formulate effective questions for master's level research.

**SLO 6: Effective Communications Skills (M: 1, 2)**

Students will be able to communicate effectively in a wide range of written and spoken contexts.

**SLO 7: Researching Skills (M: 1, 2)**

Students will conduct graduate-level research on topics related to English studies and will demonstrate mastery in using traditional methods of research as well as non-traditional information technology.

### Measures, Targets, and Findings

**M 1: Assessment of work in the Pro-Seminar (O: 1, 2, 3, 4, 5, 6, 7)**

Since the spring of 2008, the English department has required M.A. students in literature to take the Pro-Seminar in the second semester of their program. This course is intended to teach students about the professional elements of literary studies and to prepare them to write the thesis that will serve as the culmination of their masters program. Accordingly, students are expected to complete a draft of their prospectus by the end of the course. Beginning in the spring of 2009, instructors of the literature Pro-Seminar were requested to assess student work in this course, using an assessment form with criteria that are aligned to the graduate learning outcomes (see attached assessment form). In previous years, students were instructed to take the Pro-Seminar during their second semester. Now, they are allowed to choose between their second semester and their third semester. Because of that, only a small number (4 students) took the Pro-Seminar in the spring of 2011, and we anticipate a large group will consequently be enrolled in the fall 2011 class or classes.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Content Knowledge**

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Met**

The four students in this year's pro-seminar class averaged a 5.0 (out of 5) in this outcome related to knowledge of major figures, genres, periods, movements, and critical approaches, meaning that the target was met. This represents an improvement over scores for this outcome from the previous 2009-2010 and 2008-2009 (4.6 and 4.8 respectively).

**Target for O2: Knowledge of Language**

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Met**

The average score for the students in this year's Pro-Seminar was a 4.5 (out of 5) for this outcome related to the understanding of the history, structure, and/or social implications of language. This score met the target but it represented a slight deduction when compared with the scores of 2009-2010 and 2008-2009, which were 4.7 and 4.9 respectively.

**Target for O3: Scholarly vocabulary**

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Met**

The average score for the students in the Pro-Seminar this year was a 5.0 for this outcome related to the use of scholarly vocabulary. This met the standard and was an improvement over the score for this outcome from the past two years' of 4.9.

**Target for O4: Knowledge and application of theoretical approaches to reading literature**

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Met**

The average for the students in the Pro-Seminar this year was a 4.5 for this outcome related to the knowledge and application of theoretical approaches to reading literature. This meets the target. It also is an improvement over the 2009-2010 score of 4.4 but a decrease from the 2008-2009 score of 4.8.
### Target for O5: Skills of inquiry
In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Met**

The average score for the students in this year's Pro-Seminar was a 5.0 for this outcome related to the ability to formulate effective questions, which exceeds the target and represents an improvement over the last two years where the scores for this outcome were a 4.8 and 4.4 respectively.

### Target for O6: Effective Communications Skills
In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Not Met**

The average score for the students in this year's Pro-Seminar was a 4.0 for the ability to communicate effectively in written and spoken communications. The instructor indicated that this score was lower because one of the four students had to take a medical withdrawal and was not able to turn in the final products. This score does not meet the target; it is also lower than the 4.8 and 4.4 earned by students in the Pro-Seminar over the past two years.

### Target for O7: Researching Skills
In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2010-2011 - Target: Not Met**

The average score for students in the Pro-Seminar this year was a 4.0. According to the instructor, this was because one student had to take a medical withdrawal and was not able to complete the final products for the course. This score does not meet the target and it is lower than the scores of the past two years, 4.8 and 4.6 respectively.

### M 2: M.A. Thesis in Literary Studies (O: 1, 2, 3, 4, 6, 7)
The literature theses have been assessed since 2009-2010. During that first year, only 5 theses were assessed because the department did not yet have a fully working system in place. During 2010-2011, that problem was sorted out and 21 theses were assessed. According to the system, students who finish their thesis are assessed collectively by their thesis committee members who fill out a form (with a 5-point scale) that is aligned to the graduate learning outcomes (see attached assessment form). It their are dissenting opinions about the scores, those different scores can be indicated on the assessment form. The committee chair is responsible for making sure that the assessment form is completed and turned into the assitant to the Graduate Director after the thesis work has been submitted. A student cannot be advanced for graduation if this assessment step has not been done.

**Source of Evidence:** Senior thesis or culminating major project

### Target for O1: Content Knowledge
Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year's results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2010-2011 - Target: Not Met**

The average score for the 21 theses assessed was a 4.45 for this learning outcome related to knowledge of figures, genres, periods, and movements. This score is a bit below the target, and therefore the target was not met. In the 2009-2010 assessment cycle, this outcome earned a 4.6 instead.

### Target for O2: Knowledge of Language
Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year's results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2010-2011 - Target: Met**

The average for the 21 theses assessed this year was a 4.55 for this outcome related to knowledge of language, meaning that it did meet the target. This score was also a slight improvement over last year's average score of 4.4.

### Target for O3: Scholarly vocabulary
Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year's results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2010-2011 - Target: Not Met**

The average for the 21 theses assessed this year was a 4.38 for the use of scholarly vocabulary, which was below the intended target. In 2009-2010, this outcome earned a 4.6 instead.

### Target for O4: Knowledge and application of theoretical approaches to reading literature
Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year's results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2010-2011 - Target: Not Met**
The average for the 21 theses assessed this year was a 4.35 for the outcome related to critical approaches, theoretical frameworks, and cultural contexts. This is the lowest score for all six outcomes. Similarly, in the 2009-2010 assessment, it was on the lower end of the results with a 4.4 score.

**Target for O6: Effective Communications Skills**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2010-2011 - Target: Met**

The average of the 21 theses assessed this year was a 4.9 for this outcome related to effective written communications. This exceeds the target. It is also an improvement over the 2009-2010 score for this outcome which was a 4.4.

**Target for O7: Researching Skills**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2010-2011 - Target: Met**

The average score for the 21 theses assessed this year was a 4.69, which exceeds the target and represents a slight improvement over the 2009-2010 score which was a 4.6.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Create a document that explains the rankings on the MA thesis assessment**

The Graduate Director will create a document to explain what the rankings on the MA in Literary Studies assessment form (outstanding, excellent, good, fair, poor, and inadequate) mean in terms of the specific work of this concentration. This intention of this action step is that the explanation of the rankings can help in the norming process to better ensure accurate and useful results.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Projected Completion Date:** 01/2011
- **Responsible Person/Group:** Graduate Director
- **Budget Amount Requested:** $0.00 (no request)

**Former Pro-Seminar instructors will offer suggestions for writing the prospectus and the thesis**

In order to assist students in writing the prospectus and in preparing for the challenges of completing a thesis, previous instructors of Pro-Seminar will create a document that provides recommendations and cautions about the work that goes into this long-term project. This document will emphasize the need for a conceptual framework (critical approaches, theoretical frameworks, and/or historical contexts) in thesis writing. Current Pro-Seminar instructors will distribute and review this document with their students.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Terminated
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Assessment of work in the Pro-Seminar | **Outcome/Objective:** Knowledge and application of theoretical approaches to reading literature
- **Implementation Description:** The Graduate Director will ask former instructors of this course to work collectively on a document concerning the prospectus and the thesis that can be given to current Pro-Seminar instructors for distribution and review.
- **Projected Completion Date:** 01/2011
- **Responsible Person/Group:** Graduate Director, Calvin Thomas, and former Pro-Seminar instructors (Pearl McHaney, Chris Kocela, Michael Galchinsky, LeeAnne Richardson, and Murray Brown)
- **Budget Amount Requested:** $0.00 (no request)

**Move the target for outcomes on the Literary Studies thesis to 4.7**

Since student theses submitted in 2009-2010 scored well on the assessments in all learning outcomes, the department will raise the target for these areas from a 4.5 to a 4.7.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Medium
- **Responsible Person/Group:** Assessment Coordinator
- **Budget Amount Requested:** $0.00 (no request)

**Offer the pro-seminar during the fall and the spring semester**

While there has been general satisfaction with the success of the Pro-Seminar since it was initiated two years ago, there has been concern that the second semester of a student’s M.A. program may be too early for this course. Some students have a clear sense of their thesis project by this time, but others could use the additional semester of coursework before taking this course that requires them to pin down their intended topic of interest. The fact that some students are not ideally prepared for the course may be contributing to the fact that assessment targets in three areas of the Pro-Seminar were not met (knowledge and application of theory, skills of inquiry, and effective communication skills). Consequently, the department has determined to offer this course in the fall and spring semesters so that students can choose whether to take it in their second or their third semester.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
Relationships (Measure | Outcome/Objective):

Measure: Assessment of work in the Pro-Seminar | Outcome/Objective: Skills of inquiry

Implementation Description: The Scheduling Committee will make sure that the Pro-Seminar is offered each fall and spring semester. Faculty assignments will need to allow for this adjustment.

Projected Completion Date: 01/2011

Responsible Person/Group: Chair of the Scheduling Committee, Randy Malamud, in coordination with the Graduate Director, Calvin Thomas

Budget Amount Requested: $0.00 (no request)

Reach 100% compliance on the thesis assessment process

During 2009-2010, almost half of the thesis assessment forms were submitted with the signature sheets for completed theses (five out of nine). To guarantee that the thesis assessment sheet is completed by the thesis committee it will be attached to signature sheets and distributed to a thesis committee chair by the Assistant to the Graduate Director. In the future, a signature sheet will not be accepted for graduation unless the assessment form is included.

Established in Cycle: 2009-2010

Implementation Status: Finished

Priority: High

Projected Completion Date: 09/2010

Responsible Person/Group: Assessment Coordinator in conjunction to the Assistant to the Graduate Director

Budget Amount Requested: $0.00 (no request)

Maintain the target of 4.5 out of 5 for criteria on thesis and Pro-seminar

The targets used for the criteria on the MA thesis and Pro-Seminar will be repeated in next year's assessment cycle.

Established in Cycle: 2010-2011

Implementation Status: Planned

Priority: Medium

Projected Completion Date: 08/2011

Responsible Person/Group: Assessment Coordinator

Revise the mission statement and goals

Faculty associated with the Literature M.A. program will revise the mission statement and goals so that they reflect the particular concern of the M.A. in this concentration.

Established in Cycle: 2010-2011

Implementation Status: Planned

Priority: Medium

Projected Completion Date: 12/2011

Responsible Person/Group: Director of the Graduate Program

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The Literature M.A. program has not changed its procedures since last year's assessment cycle. It will make two changes this year: creating an explanation sheet for the ranking used to assessment the thesis and writing a new mission statement and goals for this M.A. concentration.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Students in the MA Pro-seminar generally did well on the criteria used to assess their performance in this class. Their scores on five of the seven learning outcomes exceeded the target of 4.5 out of 5.0. Two areas--effective communications skills and researching skills--fell below the target, but the instructor for this class reasoned that this low score was due to the fact that one of the four students in the class had to take a medical withdrawal and was not able to turn in the final product. Given these circumstances, the department is going to continue tracking the success rate in the Pro-Seminar rather than creating any action plans right now in response to these missed targets. Scores in the Pro-Seminar over the past three years have been quite high, so the assumption is that this set of scores represents an exception rather than a norm. In the assessment of the MA thesis, scores on the three learning outcomes related to skills (use of language, effective communication skills, and researching skills) met the target of 4.5 out of 5.0 while the scores on the three outcomes related to knowledge (content knowledge, scholarly vocabulary, and theoretical approaches) did not quite meet the target of 4.5 out of 5.0 (4.45, 4.38, and 4.35 respectively). Since the thesis is still a relatively new assessment tool, the department would like to continue tracking these scores for right now to see if programmatic changes need to be made in the future. The explanation sheet for the rankings on the thesis which will be created and implemented this year may help to bring about greater accuracy in this assessment process.
Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, rhetoric and composition, and professional and technical writing. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs.

Goals

G 1: Encourage a scholarly engagement with theoretical frameworks
The department will strive to produce M.A. students who demonstrate a scholarly engagement with critical approaches, theoretical frameworks, and/or historical contexts in masters work, in particular in the thesis writing.

G 2: Assure mastery in content knowledge
The department strives to graduate MA students in this concentration who have a well-rounded knowledge in the content of Rhetoric and Composition studies as well as advanced knowledge in the content associated with their particular specialty.

G 3: Effective Written Communications
The department will strive to produce M.A. students who can demonstrate effective written communication skills.

Student Learning Outcomes/Objectives

SLO 1: Knowledge of Rhetorical Practices (M: 1)
Students will have mastery of typical genres of academic writing (e.g., research paper, research proposal, abstracts, presentations, book reviews, websites for teaching). Students focusing on Professional and Technical Writing will also have mastery of professional writing genres and electronic media (e.g., technical article, documentation, websites for multiple purposes).

SLO 2: Knowledge of the History of Rhetoric (M: 1)
Students will be familiar with the history of rhetoric from pre-classical Greece to the modern era, although students may focus more on one time frame and area of the discipline than another (emphasizing, for example, classical rhetorical history or the history of composition pedagogy or professional writing history).

SLO 3: Knowledge of the Theories of Rhetoric (M: 1)
Students will have read the work of rhetorical theorists from a wide range of periods, covering a diverse set of perspectives. Theories of writing practices and pedagogy should be included in this work.

SLO 4: Effective Written Communications (M: 1)
Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in journals and publications devoted to Rhetoric and Composition.

SLO 5: Researching skills (M: 1)
M.A. students in Rhetoric and Composition will be able to isolate a fruitful question for in-depth investigation and to carry out research, using both traditional and non-traditional research methods.

Measures, Targets, and Findings

M 1: M.A. Thesis in Rhetoric and Composition (O: 1, 2, 3, 4, 5)
Starting in the fall of 2007, students who entered the M.A. Program were required to complete a thesis by the end of their program. While we had hoped to develop and begin using the thesis assessment tool by the spring of 2008, more time was needed to create a system for this assessment process that will guarantee that each thesis is evaluated in this manner. Starting in the spring of 2010, students who finish their thesis will be assessed by their thesis committee, using a form (with a 6-point scale) that is aligned to the graduate learning outcomes. The committee chair will be responsible for calling an assessment meeting after the thesis work has been submitted, and the assistant to the Graduate Director will be responsible for checking to see that the assessment forms are completed. A student will not be advanced for graduation if this assessment step has not been done.

Target for O1: Knowledge of Rhetorical Practices
In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

Findings 2010-2011 - Target: Met
Two M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to knowledge of rhetorical practices (in particular the thesis genre) was a 4.5, meaning that it met the target.

Target for O2: Knowledge of the History of Rhetoric
In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

Findings 2010-2011 - Target: Met
Two M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to knowledge of the history of rhetoric was a 5.0, meaning that it met the target.
### Target for O3: Knowledge of the Theories of Rhetoric

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2010-2011 - Target: Met**

Two M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to knowledge of the theories of rhetoric was a 5.0, meaning that it met the target.

### Target for O4: Effective Written Communications

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2010-2011 - Target: Met**

Two M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to effective written communications was a 5.0, meaning that it met the target.

### Target for O5: Researching skills

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2010-2011 - Target: Met**

Two M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to researching skills was a 5.0, meaning that it met the target.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Revise the mission and goals to suit the particulars of the Rhetoric and Composition M.A. program**

Now that the graduate assessment has been broken down into the three graduate concentrations, the Rhetoric and Composition faculty will work to revise the mission and goals of their assessment report to more specifically match the particulars of their program.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 01/2011

**Consider making English 8120 (Writing for Academic Publication) into this concentration’s Pro-Seminar class**

The English 8120 class (Writing for Academic Publication) essentially functions as a pro-seminar for the Rhetoric and Composition M.A. students. The faculty members will consider making this class the Pro-Seminar for students in this concentration.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Rhetoric and Composition Faculty

**Create an explanation sheet for the rankings on the MA Thesis**

Faculty members in Rhetoric and Composition will create an explanation sheet for the five possible rankings on the MA thesis.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 10/2011
- **Responsible Person/Group:** Rhetoric and Composition Faculty

### Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes in process were made since the last assessment cycle. This year, the Rhetoric and Composition faculty will do the following process changes: create a new mission statement and goals, create an explanation sheet for the rankings of the thesis, and consider turning the English 8120 class into a Pro-Seminar class for their concentration.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The targets were all met for the M.A. thesis in Rhetoric and Composition, so there will be no changes to the curriculum or courses this year. If the faculty decide to turn the English 8120 class into a Pro-Seminar, that change will go into effect at the beginning of next year.
Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies and creative writing. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs.

Goals
G 1: Assure Mastery in Content Knowledge
The department strives to graduate PhD students in Creative Writing who have a well-rounded knowledge in the content of literary studies (including major figures, periods and movements, and vocabulary) as well as advanced knowledge in the content associated with their particular specialty.

G 2: Scholarly Engagement in Theoretical Frameworks
The department strives to graduate PhD students in this concentration who are able to successfully apply critical approaches, theoretical frameworks, and/or historical contexts in the study of literary texts.

G 3: Foster Effective Written Communications
The department strives to graduate students who have effective written communication skills that they can use successfully for any specific purpose and any particular audience.

Student Learning Outcomes/Objectives
SLO 1: Content Knowledge (M: 1, 2)
Ph.D. students will demonstrate a familiarity with representative examples of writing by major figures, English and American literary history, and form and theory in both fiction and poetry.

SLO 2: Applying Literary Studies to Creative Writing (M: 1)
Students will be able to draw upon the knowledge of composition and aesthetics gained in their English studies to compose meaningful literary works that are deemed worthy of being published in national literary journals. Students will also be able to develop vocabularies for studying and discussing poetry and fiction.

SLO 3: Craftsmanship (M: 1)
Ph.D. students will be able to produce writing of a sufficient quality to be deemed publishable in national literary journals.

SLO 4: Revising Skills
Students will be able to evaluate the strengths and weaknesses of both published and student writing and to offer specific and constructive criticism. Students will also be able to evaluate the range of critical responses from fellow students and the instructor and to revise their creative writing to create work of a sufficient quality to be deemed publishable in national literary journals.

SLO 5: Researching Skills
Using and building upon the knowledge and skills acquired during master's level study, doctoral graduates will be able to isolate a fruitful question for extended, in-depth investigation and to carry out focused, productive, and thorough research, using both traditional and non-traditional research methods.

SLO 6: Effective Communications (M: 2)
Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in English studies.

Measures, Targets, and Findings
M 1: PhD dissertation (O: 1, 2, 3)
Graduating Ph.D. students in Creative Writing are assessed on the work of their dissertation. This assessment is facilitated by the Graduate Director at the student's dissertation defense, and the form is completed by faculty members on the student’s committee. The dissertation assessment form, which uses a 6-point scale, rates how effectively the student work demonstrates the graduate learning outcomes. (See the attached assessment form for the Creative Writing dissertation.) In the summer, the Graduate Director meets with the Assessment Coordinator to analyze the resulting data in order to make suggestions for procedural and programmatic change. Those suggestions are brought to the Graduate Studies Committee in early fall for review, and an action plan is formulated and presented to the entire faculty at an early fall department meeting.

Target for O1: Content Knowledge
In the 2009-2010 assessment report, a 4.7 target out of 6.0 was set for this outcome related to content knowledge.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Adjust the target for the low pass/failure rate on Creative Writing PhD exams

The Creative Writing department is changing the target for the low pass/failure rate on the PhD exams in their concentration to 20% or less.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: PhD Exams | Outcome/Objective: Effective Communications
Adjust the target for the low pass/failure rate on PhD exam to 20% or less
The Creative Writing department is changing the target for the low pass/failure rate on the PhD exams in their concentration to 20% or less.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Relationships (Measure | Outcome/Objective):
    Measure: PhD Exams | Outcome/Objective: Content Knowledge

Projected Completion Date: 09/2010
Responsible Person/Group: Assessment Coordinator
Budget Amount Requested: $0.00 (no request)

Faculty in Creative Writing will revise the mission statement and the goals
By spring of 2011, faculty in the Creative Writing concentration will revise the mission statement and their goals on the assessment report. Presently, these items reflect the mission and goals for the whole of the PhD program. Now that we have broken up the assessment reporting in terms of concentration, Creative Writing can rewrite these items to more specifically match their program.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Director of the Creative Writing program in collaboration with the Creative Writing faculty.
Budget Amount Requested: $0.00 (no request)

Set a target of 4.7 for learning outcomes included in the dissertation assessment
The Creative Writing PhD program is setting a target of 4.7 out of 6.0 for the three learning outcomes included in the dissertation assessment process. These outcomes include Content Knowledge, Applying Literary Studies to Creative Writing, and Craftsmanship.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: Medium
Implementation Description: The Assessment Coordinator will track results of the Creative Writing dissertation assessment to see if students achieve the target of 4.7 in all three learning outcomes.
Projected Completion Date: 09/2010
Responsible Person/Group: Assessment Coordinator
Budget Amount Requested: $0.00 (no request)

Distinguish between scores on primary exams and secondary exams
To get a better understanding of the Creative Writing PhD exam results, the department will distinguish between scores earned for primary and secondary exams.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective):
    Measure: PhD Exams | Outcome/Objective: Content Knowledge

Projected Completion Date: 08/2011
Responsible Person/Group: Assistant to the Graduate Director

Maintain the same targets and outcomes in next assessment cycle
The Creative Writing PhD program will use the same outcomes and targets on the assessment tools as were used in the previous assessment cycle.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Poetry will faculty who write secondary exams will hold regular meetings with examinees
Since fiction students often have difficulty with the poetry secondary exam, poetry faculty who writes these exams will be asked to schedule regular meetings with examinees to better prepare them for the exams.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective):
    Measure: PhD Exams | Outcome/Objective: Content Knowledge

Projected Completion Date: 08/2011
Responsible Person/Group: Director of Creative Writing and poetry faculty

Provide fiction PhD students with examples of successful poetry exams
The Director of Creative Writing will ask the poetry faculty to keep examples of successful poetry secondary exams that can be used as models for students who are taking the exam.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: PhD Exams | Outcome/Objective: Content Knowledge

Projected Completion Date: 08/2011
Responsible Person/Group: Director of Creative Writing and poetry faculty

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

There were no changes made to the assessment process last year, but the Creative Writing faculty will make three procedural changes for the coming academic year: dissertation committees will take into consideration the explanation of the rankings (what outstanding, excellent, good, fair, poor, and inadequate mean in specific terms) when making their assessment decisions; the Creative Writing faculty will revise their mission statement and goals; and the report on the PhD exams will distinguish between primary and secondary exams.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The dissertation results for the Creative Writing dissertations in the last cycle were very encouraging as all three dissertations earned the highest possible score of 6.0 for all categories. The exam results were less encouraging as the poetry exams fell below the target while the fiction exams met the target. Upon further examination, it was revealed that the two of the three failures/low passes on the exams were fiction students who were taking their secondary exam in poetry. Creative Writing faculty think that fiction students can have difficulty with this exam because they are not well versed in terminology and concepts related to poetry. To help fiction students prepare for this exam, the poetry faculty who prepare the exams will hold regular meetings with these students in advance of the test and will provide these students with examples of successful secondary exams written by former fiction examinees.

Georgia State University
Assessment Data by Section
2010-2011 English PhD in Literature
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, global and multi-ethnic literary and cultural studies, pedagogy, critical theory, and secondary education. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs.

Goals

G 1: Assure mastery in content knowledge
The department strives to graduate PhD students in this concentration who have a well-rounded knowledge in the content of literary studies (including major figures, periods and movements, and vocabulary) as well as advanced knowledge in the content associated with their particular specialty.

G 2: Encourage a scholarly engagement with critical approaches, theoretical frameworks, and/or historical contexts
The department strives to graduate PhD students in this concentration who are able to successfully apply critical approaches, theoretical frameworks, and/or historical contexts in the study of literary texts.

G 3: Foster effective written communications
The department strives to graduate students who have effective written communication skills that they can use successfully for any specific purpose and any particular audience.

Student Learning Outcomes/Objectives

SLO 1: Content Knowledge of Literary Studies (M: 1, 2)
This learning outcome for the English Ph.D. in Literary Studies is comparable to that for the M.A. in literary studies with crucial differences in terms of specificity. Generally speaking, the goal of the master’s program is broad-based knowledge of the aspects of literary study and an ability to evaluate a work of literature with an understanding of its various contents. Doctoral study aims for graduates to have greater mastery of content than masters level work.

SLO 2: Knowledge and Application of Literary Theory (M: 1, 2)
Students will demonstrate knowledge of major theoretical approaches to reading literature and will be able to apply this knowledge in their own assessment and interpretation of texts. This learning outcome for the English Ph.D. in literary studies is comparable to that
for the M.A. in literary studies with crucial differences in terms of specificity. Doctoral study aims for graduates to demonstrate a higher degree of critical sophistication than master's level work.

**SLO 3: Effective Communication Skills (M: 1, 2)**

Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in literary studies.

**SLO 4: Effective Researching Skills (M: 1)**

Using and building upon the knowledge and skills acquired during master's level study, doctoral graduates in Literary Studies will be able to isolate a fruitful question for extended, in-depth investigation and to carry out focused, productive, and thorough research, using both traditional and non-traditional research methods.

### Measures, Targets, and Findings

**M 1: PhD dissertation (O: 1, 2, 3, 4)**

Graduating Ph.D. students in literary studies are assessed on the work of their dissertation. This assessment is facilitated by the Graduate Director at the student's dissertation defense, and the form is completed by faculty members on the student's committee. The dissertation assessment form, which uses a 6-point scale, rates how effectively the student work demonstrates the graduate learning outcomes. (See the assessment form for the literature dissertation as well as the description of the ratings found in the document repository.) In the summer, the Graduate Director meets with the Assessment Coordinator to analyze the resulting data in order to make suggestions for procedural and programmatic change. Those suggestions are brought to the Graduate Studies Committee in early fall for review and an action plan is formulated and presented to the entire faculty at an early fall department meeting.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Content Knowledge of Literary Studies**

A target of 4.7 was set for this learning outcome related to content knowledge.

**Findings 2010-2011 - Target: Met**

Seven literature dissertations were completed in 2010-2011, and they received three scores related to content knowledge: the first concerning the knowledge of literary figures, genres, periods, and movements as relevant to the chosen topic of the dissertation (with an average score of 5.57), the second concerning the knowledge of appropriate scholarly vocabulary that demonstrates an understanding of critical concepts and technical concepts important to the study of literature (with an average score of 5.29), and the third with the knowledge of the history, structure, and/or social implications of language as a means of discourse/system of representation (with an average score of 5.29). These averages for the three areas of content knowledge average out to a 5.38, and therefore the target was very successfully met.

**Target for O2: Knowledge and Application of Literary Theory**

In the 2009-2010 assessment report, a target of 4.5 (on a six-point scale) was set for this outcome (which is now listed on the literature dissertation assessment form as "the knowledge and application of critical approaches, theoretical frameworks, and/or historical contexts in the dissertation work"). This is the third of three years during which the department has set this outcome as a rolling target.

**Findings 2010-2011 - Target: Met**

Seven students completed a literature dissertation during 2009-20010, and the average score they received for this outcome was a 5.1, which is considerably above the intended target. During the previous four years of dissertation assessment, this outcome always was ranked with a 4.3 for this criteria. This year, the averages for all the other outcomes included on the assessment form were all between the range of 5.29--5.71, so while there has been considerable improvement on this outcome related to critical approaches, theoretical frameworks, and/or historical contexts, this outcomes continues to score with the lowest average of all the assessed outcomes.

**Target for O3: Effective Communication Skills**

A target of 4.7 out of 6.0 was set for this outcome related to effective communications skills.

**Findings 2010-2011 - Target: Met**

Seven literature dissertations were defended in 2010-2011, and their scores related to the two criteria used to evaluate effective communications skills on the dissertation were very successful. The two criteria are "the dissertation effectively communicates the argument and results of the research" (which received a 5.29 average) and "the oral defense demonstrates mastery of the topics researched and sound defense of the project" (which received a 5.71 average). The combined average of these two criteria related to effective communications was a 5.5, which again was considerably higher than the 4.7 target.

**Target for O4: Effective Researching Skills**

A target of 4.7 was set for this outcome related to effective research skills.

**Findings 2010-2011 - Target: Met**

The average score for this outcome on the seven literature dissertations defended in 2010-2011 was a 5.71. This score clearly met the target; in addition, it represented the highest average achieved for this outcome for the past five years of dissertation results.

**M 2: PhD exams (O: 1, 2, 3)**

The Ph.D. examinations are conducted in the fall and the spring each year. Each student writes two exams (one in a primary area of
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Target for O1: Content Knowledge of Literary Studies**

In the 2009-2010 assessment plan, the department decided to continue with a target for all Ph.D. exams which would allow for only 15% or fewer of the examinees to earn a low pass or a fail on their exams. This target was set to build upon the progress shown in last year’s results where only 14% of literature exams were given a score of a low pass or a failure.

| Findings 2010-2011 - Target: Met |
| Exam results in 2010-2011 show that only 9.4% of the 32 exams earned a low pass or fail rate. This score is an improvement over the 2009-2010 scores where 14% of literature exams earned such scores, but it is also not as encouraging as the low pass/fail rate earned in 2008-2009 which was only 7%. In addition, the pass/high pass rate for this year were 90.6%, which also is higher than the same rates gained in 09-10 year (81%) but not as high as those from 08-09 (93%). |

**Target for O2: Knowledge and Application of Literary Theory**

In the 2009-2010 assessment plan, the department decided to continue with a target for all Ph.D. exams which would allow for only 15% or fewer of the examinees to earn a low pass or a fail on their exams. This target was set to build upon the progress shown in last year’s results where only 14% of literature exams were given a score of a low pass or a failure.

| Findings 2010-2011 - Target: Met |
| Exam results in 2010-2011 show that only 9.4% of the 32 exams earned a low pass or fail rate. This score is an improvement over the 2009-2010 scores where 14% of literature exams earned such scores, but it is also not as encouraging as the low pass/fail rate earned in 2008-2009 which was only 7%. In addition, the pass/high pass rate for this year were 90.6%, which also is higher than the same rates gained in 09-10 year (81%) but not as high as those from 08-09 (93%). |

**Target for O3: Effective Communication Skills**

In the 2009-2010 assessment plan, the department decided to continue with a target for all Ph.D. exams which would allow for only 15% or fewer of the examinees to earn a low pass or a fail on their exams. This target was set to build upon the progress shown in last year’s results where only 14% of literature exams were given a score of a low pass or a failure.

| Findings 2010-2011 - Target: Met |
| Exam results in 2010-2011 show that only 9.4% of the 32 exams earned a low pass or fail rate. This score is an improvement over the 2009-2010 scores where 14% of literature exams earned such scores, but it is also not as encouraging as the low pass/fail rate earned in 2008-2009 which was only 7%. In addition, the pass/high pass rate for this year were 90.6%, which also is higher than the same rates gained in 09-10 year (81%) but not as high as those from 08-09 (93%). |

**Findings 2010-2011 - Target: Met**

Exam results in 2010-2011 show that only 9.4% of the 32 exams earned a low pass or fail rate. This score is an improvement over the 2009-2010 scores where 14% of literature exams earned such scores, but it is also not as encouraging as the low pass/fail rate earned in 2008-2009 which was only 7%. In addition, the pass/high pass rate for this year were 90.6%, which also is higher than the same rates gained in 09-10 year (81%) but not as high as those from 08-09 (93%).

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continue a target of 15% or less low pass/fail rate on exams**

For the second year running, the department will set a target of a low pass/fail rate of 15% or less on PhD exams in Literary Studies.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Medium
- **Responsible Person/Group:** Assessment Coordinator

**Continue a target of 4.5 for the learning outcome related to applying theory**

For the third year in a row, the department will set a target of 4.5 out of 6.0 for the learning outcome related to the skill of applying critical approaches, theoretical frameworks, and/or historical contexts to the study of literature.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**

- **Measure:** PhD dissertation | **Outcome/Objective:** Knowledge and Application of Literary Theory

**Implementation Description:** The Assessment Coordinator will track whether or not the target for this learning outcomes on literature dissertations has been met.

- **Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Assessment Coordinator, Renee Schatteman
- **Budget Amount Requested:** $0.00 (no request)

**Continue a target of 4.7 out of 6.0 for outcomes on dissertation**

We department will continue to use the target of 4.7 out of 6.0 for all learning outcomes on the dissertation in Literary Studies other than the outcome related to the application of theory (which is a target of 4.5).

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**

- **Measure:** PhD dissertation | **Outcome/Objective:** Content Knowledge of Literary Studies

**Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Assessment Coordinator
- **Budget Amount Requested:** $0.00 (no request)
Create a colloquium for students writing a Literary Studies dissertation
In the spring of 2011, the Graduate Studies Committee will meet to discuss the possibility of creating a colloquium in prospectus writing for students working on a dissertation in literary studies. The college will consider the scope of this initiative, whether they want the colloquium to be a single event that occurs each semester, a series of workshops in the course of the semester, or a mini-semester type of course. Ideally, one of the major emphasizes of the colloquium would be the importance of identifying and developing a conceptual framework for the dissertation, involving an engagement with critical approaches, theoretical frameworks, or cultural contexts appropriate to the work. This is intended to better ensure student success in the two learning outcomes that did not meet their targets this year: the outcome related to the application of theory and the outcome related to effective written communications. The colloquium will also serve as a chance to encourage graduate students to form dissertation support groups. The Graduate Studies Committee will offer a recommendation on the colloquium by the end of the spring 2011 semester with the intention of starting the program in the spring of 2012.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium
Relationships (Measure | Outcome/Objective):
Measure: PhD dissertation | Outcome/Objective: Effective Communication Skills
Projected Completion Date: 08/2011
Responsible Person/Group: Graduate Studies Committee

Continue with targets set for previous assessment cycle
The previous targets for the outcomes that are assessed on the PhD exams and the dissertation will remain the same.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Create a prospectus writing seminar for PhD students
The graduate faculty will put together a prospectus writing seminar which will be required of all incoming PhD students in the Literature concentration. This course will be run as a workshop, where students will get feedback on one another’s initial drafts of a prospectus. This course will be taken in the last semester of coursework and before the PhD exams. It is not meant to result in a definitive prospectus; rather, it is intended to teach critical elements of doctoral writing and to emphasize the importance of establishing a clear and convincing critical, historical, or theoretical framework for the dissertation topic. The present plan is to pilot this course in the summer of 2012 and to offer it every spring semester after that.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: PhD dissertation | Outcome/Objective: Knowledge and Application of Literary Theory
Implementation Description: The Director of the Graduate Program will meet with the Graduate Studies committee to work out the details for this course.
Projected Completion Date: 05/2012
Responsible Person/Group: The Director of the Graduate Program

Distinguish between primary and secondary PhD exams
The reporting on Literature PhD exams in the past has not distinguished between primary and secondary exams. Starting this year, the scores will be broken out based on these two categories so that the department can see if students fare differently on these two exams.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assistant to the Graduate Director

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No procedural changes were made last year. This year, the department will make one change in the Literature PhD assessment by breaking down the exam scores in terms of primary and secondary exams. This distinction will help to students’ competence in the two areas of study that they have selected.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The scores on the Literature PhD dissertations and the PhD exams were very strong as all the targets were met, many of them quite easily. It was especially encouraging that the dissertation target for the knowledge and application of literary theory was finally met, for this has been a rolling target for the past three years. It is still notable, however, that this outcome scored the lowest of all the outcomes (5.1 as compared to 5.38-5.71). Since it is still an area of relative weakness, the department would like to go ahead with the plan to create a Prospectus Writing Seminar for all PhD students in this concentration. The main goal of that course, which will be piloted in the summer of 2012, will be to teach critical skills of doctoral writing, in particular the importance of establishing a theoretical
Georgia State University
Assessment Data by Section
2010-2011 English PhD in Rhetoric/Composition
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, rhetoric and composition, and professional and technical writing. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs.

Goals

G 1: Assure mastery in content knowledge
The department strives to graduate PhD students in this concentration who have a well-rounded knowledge in the content of Rhetoric and Composition studies as well as advanced knowledge in the content associated with their particular specialty.

G 2: Apply critical approaches, theoretical frameworks, and/or historical contexts
The department strives to graduate PhD students in this concentration who are able to successfully apply critical approaches, theoretical frameworks, and/or historical contexts in their examination of topics related to rhetoric and composition.

G 3: Foster effective written communications
The department strives to graduate students who have effective written communication skills that they can use successfully for any specific purpose and any particular audience.

Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: Knowledge of the History of Rhetoric (M: 1, 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will demonstrate knowledge of the history of rhetoric from pre-classical Greece to the modern era. Students will also specialize in one time frame and area of the discipline (emphasizing, for example, classical rhetorical history or the history of composition pedagogy or professional writing history).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 2: Knowledge of Rhetorical Practices (M: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will have mastery of typical genres of academic writing (e.g., research paper, research proposal, abstracts, presentations, book reviews, websites for teaching). Students focusing on Professional and Technical Writing will also have mastery of professional writing genres and electronic media (e.g., technical article, documentation, websites for multiple purposes).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 3: Knowledge of the Theories of Rhetoric (M: 1, 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will have read the work of rhetorical theorists from a wide range of periods, covering a diverse set of perspectives. Theories of writing practices and pedagogy should be included in the dissertation.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 4: Effective Written Communications (M: 1, 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in journals and publications devoted to Rhetoric and Composition.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 5: Researching Skills (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using and building upon the knowledge and skills acquired during master's level study, doctoral graduates will be able to isolate a fruitful question for extended, in-depth investigation and to carry out focused, productive, and thorough research, using both traditional and non-traditional research methods.</td>
</tr>
</tbody>
</table>

Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: PhD dissertation (O: 1, 3, 4, 5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Graduating Ph.D. students in Rhetoric and Composition are assessed on the work of their dissertation. This assessment is facilitated by the Graduate Director at the student's dissertation defense, and the form is completed by faculty members on the student's committee. The dissertation assessment form, which uses a 6-point scale, rates how effectively the student work demonstrates the graduate learning outcomes. (See the attached assessment form for the Rhetoric and Composition dissertation.) In the summer, the Graduate Director meets with the Assessment Coordinator to analyze the resulting data in order to make suggestions for procedural and programmatic change. Those suggestions are brought to the Graduate Studies Committee in early fall for review, and an action plan is formulated and presented to the entire faculty at an early fall department meeting.</td>
</tr>
</tbody>
</table>

Source of Evidence: Senior thesis or culminating major project

Target for O1: Knowledge of the History of Rhetoric
In the 2009-2010 action plan, a target of 4.7 was set for all outcomes related to the Rhetoric and Composition dissertation.
Findings 2010-2011 - Target: Met

Five Rhetoric and Composition PhD students defended their dissertations this year. The average score they earned for this learning outcome related to the knowledge of the history of rhetoric was a 5.8 which met the target. This score was a minor decrease from the average earned in the previous cycle, a 6.0.

Target for O3: Knowledge of the Theories of Rhetoric

Findings 2010-2011 - Target: Met

Five Rhetoric and Composition PhD students defended their dissertations this year. The average score they earned for this learning outcome related to the knowledge of the theories of rhetoric was a 5.8 which met the target. This score was a minor decrease from the average earned in the previous cycle, a 6.0.

Target for O4: Effective Written Communications

Findings 2010-2011 - Target: Met

The five Rhetoric and Composition dissertations defended this year received an average score of 5.8 for the mastery of academic writing (in particular that of the dissertation genre) and 5.8 for the ability to effectively communicate an argument and results of research. The average of these two scores is a 5.8 for this learning outcome related to effective written communications. This met the target, and represents a slight increase over last year’s score, a 5.7.

Target for O5: Researching Skills

Findings 2010-2011 - Target: Met

Five Rhetoric and Composition PhD students defended their dissertations this year. The average score they earned for this learning outcome related to the researching skills was a 5.8 which met the target. This score was a minor decrease from the average earned in the previous cycle, a 6.0.

M 2: PhD Exams (O: 1, 2, 3, 4)

The Ph.D. examinations are conducted in the fall and the spring each year. Each student writes two exams (one in a primary area of study and a second in a secondary area). The candidate works with a primary advisor to create a reading list for each exam. The exams serve to demonstrate detailed and thorough knowledge of all facets related to the candidate’s study and dissertation area. Each exam is read by three faculty members and is assessed on a scale of four possible grades: high pass, pass, low pass, fail. The readers provide written commentary that explains the assigned grades to the Director of Graduate Studies.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Knowledge of the History of Rhetoric

Findings 2010-2011 - Target: Met

Ten Rhetoric and Composition Ph.D. exams were taken in 2010-2011, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This represents a significant improvement over the last two assessment cycles when the rates were 21% in 2008-2009 and 23% in 2009-2010. On the other end of the scale, the high pass rate for Rhetoric and Composition students was 40%, which was also an increase over the 2009-2010 31% high pass rate and in close proximity to the 2008-2009 43% high pass rate.

Target for O2: Knowledge of Rhetorical Practices

Findings 2010-2011 - Target: Met

Ten Rhetoric and Composition Ph.D. exams were taken in 2010-2011, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This represents a significant improvement over the last two assessment cycles when the rates were 21% in 2008-2009 and 23% in 2009-2010. On the other end of the scale, the high pass rate for Rhetoric and Composition students was 40%, which was also an increase over the 2009-2010 31% high pass rate and in close proximity to the 2008-2009 43% high pass rate.

Target for O3: Knowledge of the Theories of Rhetoric

Findings 2010-2011 - Target: Met

Ten Rhetoric and Composition Ph.D. exams were taken in 2010-2011, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This represents a significant improvement over the last two assessment cycles when the rates were 21% in 2008-2009 and 23% in 2009-2010. On the other end of the scale, the high pass rate for Rhetoric and Composition students was 40%, which was also an increase over the 2009-2010 31% high pass rate and in close proximity to the 2008-2009 43% high pass rate.
Target for O4: Effective Written Communications

In the 2009-2010 assessment plan, a target for Rhetoric and Composition Ph.D. exams was set that 15% or fewer of the examinees would earn a low pass of a fail on their exams.

Findings 2010-2011 - Target: Met

Ten Rhetoric and Composition Ph.D. exams were taken in 2010-2011, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This represents a significant improvement over the last two assessment cycles when the rates were 21% in 2008-2009 and 23% in 2009-2010. On the other end of the scale, the high pass rate for Rhetoric and Composition students was 40%, which was also an increase over the 2009-2010 31% high pass rate and in close proximity to the 2008-2009 43% high pass rate.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Create a document that explains the rankings of the dissertation assessment form

Faculty in the Rhetoric and Composition Concentration will discuss what the various rankings on the dissertation assessment form mean in terms of student achievement. The faculty in that concentration will then create a document that explains each ranking, and this form will be attached to the Assessment form that is completed at each dissertation defense. The intention of this document is to help with the norming of the assessment.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Rhetoric and Composition faculty

Faculty in Rhetoric and Composition will revise the mission and goals

By spring of 2011, faculty in the Rhetoric and Composition concentration will revise the mission statement and their goals on the assessment report. Presently, these items reflect the mission and goals for the whole of the PhD program. Now that we have broken up the assessment reporting in terms of concentration, this concentration can rewrite these items to more specifically match their program.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: faculty in Rhetoric and Composition

Revisit PhD exam scores in next year’s assessment

Since this concentration has only begun to examine the assessment results for the PhD program separate from the Literature PhD, it needs another year to track exam results before making specific programmatic changes or before they change the target set for this measure.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):

Measure: PhD Exams | Outcome/Objective: Knowledge of Rhetorical Practices

Responsible Person/Group: faculty in Rhetoric and Composition

Set a target for outcomes in dissertation assessment

The Rhetoric and Composition PhD program is setting a target of 4.7 out of 6.0 for the four learning outcomes included in the dissertation assessment process. These outcomes include Knowledge of the History of Rhetoric, Knowledge of the Theories of Rhetoric, Effective Written Communications, and Researching Skills.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Assessment Coordinator

Revise the dissertation assessment form so that it offers 6 possible rankings

The Rhetoric and Composition PhD program has previously used an assessment form with only five possible rankings. To make this form comparable to the Literary Studies form, it will be changed to six points to allow for the "outstanding" category.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes were made in the assessment process since the last assessment report, but this year three changes will be made: the dissertation form will have six possible rankings instead of five; the mission and goals will be revised to reflect the particulars of this
concentration, and the exam results will be broken down in terms of primary and secondary exams.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The PhD students in the Rhetoric and Composition concentration met all the targets for the dissertation and the exams; consequently, no changes will be to the program this year.

---

### Georgia State University

**Assessment Data by Section**

**2010-2011 Executive Doctorate in Business**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

### Mission / Purpose

The Executive Doctorate in Business program offered by the J. Mack Robinson College of Business of Georgia State University helps executives develop these capabilities by teaching them how to apply relevant knowledge and research skills to contemporary business problems. It also addresses the lifelong learning needs of intellectually active professional adults who already possess advanced degrees in their fields but wish to continue their education to the highest level.

### Goals

**G 1: Executive Doctorate in Business Goals**

The Ph.D. program of J. Mack Robinson College of Business will develop in graduates a high level of competence in conducting research and in teaching business disciplines by requiring: (1) education in theory; (2) education in general research techniques as well as research techniques specific to a discipline; (3) research experience with faculty members on contemporary research problems and issues; and (4) training on teaching methodology reinforced with active classroom teaching experience.

### Outcomes/Objectives

**O/O 1: Seeing the big picture (G: 1) (M: 1, 2, 3)**

The Executive Doctorate in Business will advance the knowledge and expertise required to identify, understand, and successfully tackle the interdisciplinary, big picture issues that characterize global business management today.

**O/O 2: Honing the skills (M: 1, 2, 3)**

The Executive Doctorate in Business will develop in the student the skills in formal social inquiry required to define and address complex issues and to disseminate knowledge related to their profession in a variety of professional and public outlets “to influence professional activity and public policy.”

**O/O 3: Giving the global perspective (M: 1, 2, 3)**

The Executive Doctorate in Business will give an interdisciplinary, globally oriented perspective that is unavailable in traditional advanced degree programs.

### Measures, Targets, and Findings

**M 1: Performance in coursework (O: 1, 2, 3)**

The program will have six content courses to provide students with knowledge about global business leadership and five courses on research practices, design and analysis to equip the students with the understanding required to undertake formal research. Students are expected to maintain a 3.0 average in coursework. Students must earn a C or better in all courses. Students who do not meet these requirements or who are struggling to meet them are counseled out of the program.

Source of Evidence: Performance (recital, exhibit, science project)

**M 2: Group projects (O: 1, 2, 3)**

During the second and third semesters, students participate in research projects in groups of two to three people, under the supervision of a senior researcher. Each project will address a contemporary business issue and be conducted with the objective of publishing the results.

Source of Evidence: Senior thesis or culminating major project

**M 3: Independent research (O: 1, 2, 3)**

During the fourth, fifth and sixth semesters, each student engages in an independent research project under the supervision of a senior researcher. This project addresses a business issue affecting the student's firm. Each student will produce and defend a doctoral thesis with the expectation of publishing it.

Source of Evidence: Senior thesis or culminating major project
### Mission / Purpose

The Department of Kinesiology and Health in accord with the College of Education and the other colleges and departments of the university seeks an ever increasing degree of excellence in a wide variety of programs. The Department's mission includes instruction, research and scholarly activity, and community service in the areas of exercise science, sports administration, sports medicine, health and physical education, and recreation. The department provides professional preparation and continuing education in each of these fields, generates and communicates knowledge, and serves the community with particular emphasis on the urban setting of which it is a part. The Department recognizes the necessity of cross cultural competence and actively supports international development activities in research, teaching and service. Although the department is diverse in the disciplines it embraces, the members of the faculty are united in their interdisciplinary commitment to the highest quality in all of these pursuits.

### Goals

**G 1: Problem Solving**  
Exercise science students will become better problem-solvers.

**G 2: Critical Thinking**  
Exercise science students will demonstrate clearer critical-thinking skills.

**G 3: Content Knowledge**  
Exercise science students will gain broad knowledge of the discipline.

**G 4: Preparation for relevant positions**  
Students will be prepared for positions in the discipline including corporate, community, commercial, and clinical centers.

### Student Learning Outcomes/Objectives

**SLO 1: Safety, Injury Prevention, Emergency Procedures (G: 1, 2, 3, 4) (M: 1, 2, 3, 4)**

1. Students will be able to identify, describe and demonstrate proper safety techniques, injury prevention, and emergency procedures for those who engage in physical activity and exercise programs.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 2: Program Administration (G: 1, 2, 3, 4) (M: 5, 6)**

1. Students will be able to identify the components of effective exercise program administration including quality assurance and outcome assessment procedures.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 3: Case Study (G: 1, 2, 3, 4) (M: 7, 8, 9)**

Students will be able to identify critical information from a health history/case study and use this information to determine risk classification, proper exercise test selection and testing supervision

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience,
meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

SLO 4: Exercise Physiology and Related Exercise Science (G: 1, 2, 3, 4) (M: 10, 11, 12, 13)
Students will be able to identify, discuss, and apply the concepts of anatomy, physiology, exercise physiology, biomechanics as they apply to the proper conduct of physical activity and exercise programs.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 5: Pathophysiology and Risk Factors (G: 1, 2, 3, 4) (M: 14, 15, 16, 17)
1. Students will be able to identify and discuss the risk factors that underlie the major chronic diseases.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression

Standard Associations
3 Timely graduation

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 6: Health Appraisal, Fitness and Clinical Exercise Testing (G: 1, 2, 3, 4) (M: 18, 19, 20, 21, 22, 23, 24, 25)
1. Students will be able to properly assess the current fitness levels of apparently healthy individuals as well as those who have controlled metabolic, pulmonary, or cardiovascular disease.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or
understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 7: ECG and Diagnostic Techniques (G: 1, 2, 3, 4) (M: 26, 27, 28)**

1. Students will be able to identify and discuss normal and abnormal cardiac rhythms and other ECG abnormalities that may present at rest and/or during exercise.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms. 
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2. Student promotion and progression

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 8: Patient Management and Medications (G: 1, 2, 3, 4) (M: 29, 30)**

Students will be able to identify and discuss the effects major cardiovascular, pulmonary, and metabolic medications and how these are used to manage patients with these diseases.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms. 
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Institutional Priority Associations**
2. Student promotion and progression

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 9: Exercise Prescription and Programming (G: 1, 2, 3, 4) (M: 31, 32, 33, 34)**

Students will be able to use assessment data to design scientifically sound exercise programs for apparently healthy individuals as well as for those with controlled cardiovascular, pulmonary, or metabolic disease.

**General Education/Core Curriculum Associations**
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms. 
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2. Student promotion and progression

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 10: Nutrition and Weight Management (G: 1, 2, 3, 4) (M: 35, 36)**

1. Students will be able to identify and discuss basic nutrition and weight management concepts as they apply to those who will engage in exercise programs.
General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 11: Human Behavior and Counseling (G: 1, 2, 3, 4) (M: 37, 38)

1. Students will be able to identify and discuss the application of basic human behavior and counseling strategies as they apply to physical activity and exercise programs.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

Measures, Targets, and Findings

M 1: First Aid Cpr Certification (O: 1)
CPR and First Aid certification pass rates in KH 3390 Advanced First Aid and Emergency Care
Source of Evidence: Standardized test of subject matter knowledge

M 2: ACSM Domain Score (O: 1)
Domain score on ACSM Exam
Source of Evidence: Certification or licensure exam, national or state

M 3: Practical Exam score KH 3500 (O: 1)
Practical Exam Score in KH 3500 Athletic Training
Source of Evidence: Performance (recital, exhibit, science project)

M 4: Practical Exam KH 4630 (O: 1)

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**
ACSM Examination Procedures

Students will begin taking the required ACSM examination during the Fall of 2009. Meetings will be held with all students registered for KH 4750 Practicum in Exercise Science to inform students of the examination requirements and to conduct a review session. Practice examinations have been posted on ULearn that allow students to check their readiness for the examination.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 09/2009
Responsible Person/Group: Jeff Rupp, Program Coordinator Other exercise science faculty
Budget Amount Requested: $0.00 (no request)

Implementation of new Objectives

During the past academic year (2010-2011) faculty in the exercise science program identified and adopted all new program objectives for the B.S. in Exercise Science program. These new objectives better reflect the knowledge skills and abilities that students must exhibit in order to successfully pass the American College of Sports Medicine professional certification program. Because this was an extensive revision of the current objectives, the process was very time consuming and performance data was not collected during this time period.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: During the 2011-2012 academic year faculty will be determining achievement targets and measures as well as collecting performance data on each objective. This data will be coomplied and reported during the next evaluation cycle.
Projected Completion Date: 04/2012
Responsible Person/Group: KH Exercise Science faculty. Dr. Andy Doyle, program coordinator.

Georgia State University
Assessment Data by Section
2010-2011 Exercise Science MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The MS degree program in Exercise Science seeks to contribute to the KH Department's mission, which seeks to discover new knowledge and advance the understanding of the role of physical activity in attaining optimal health and well-being, educate members of society and prepare future professionals, and promote healthy lifestyles through life-long activity and learning. This mission includes research and scholarly activity, instruction, and community service in the areas of exercise science, sports administration, sports medicine, and health and physical education. The M.S. program in Exercise Science provides academic preparation and continuing education in exercise science while its faculty generate and communicate knowledge and serve the community with particular emphasis on the urban setting of which it is a part. The Department recognizes the necessity of cross cultural competence and actively supports international development activities in research, teaching and service. Although the department is diverse in the disciplines it embraces, the members of the faculty are united in their interdisciplinary commitment to the highest quality in all of these pursuits.

Goals

G 1: Knowledge
Students will gain knowledge of Exercise Science.

G 2: Skills
Students will gain skills necessary to be successful in their chosen Exercise Science field.

Outcomes/Objectives

O/O 1: Demonstrates content knowledge in Exercise Science (G: 1) (M: 1, 5, 6)
Students should have a basic understanding of the scientific principles of exercise physiology and related exercise science, including pathophysiology and risk factors and exercise prescription and programming.
Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities content matter areas 1, 2, and 7. In addition, Program is accredited by the Commission on Accreditation of Allied Health Education Programs.

O/O 2: Apply knowledge to practical situations (G: 1, 2) (M: 2, 5)
Students should demonstrate practical skills related to the knowledge base of the program, including health appraisal, fitness and clinical exercise testing, electrocardiography, and diagnostic techniques.
Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities content matter areas 3 and 4. In addition, Program is accredited by the Commission on Accreditation of Allied Health Education Programs.

O/O 3: Demonstrates knowledge of exercise testing (G: 1, 2) (M: 3, 5)
Students should demonstrate knowledge of basic equipment, facility requirements, absolute and relative contraindications, procedures, and protocols for the exercise test.
Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities Learning
### Measures, Targets, and Findings

#### M 1: Basic Content Knowledge examinations and quizzes (O: 1)

**Target for O1: Demonstrates content knowledge in Exercise Science**

75% scoring at or above 80% on exam

**Findings 2010-2011 - Target: Met**

Students demonstrated success in this measure, with 100% of students scoring at or above 80% on exams/quizzes in the following classes: KH 6280, KH7500, KH7550, and KH8390. 89% and 83% of students demonstrated the necessary content knowledge in KH8830 and KH8870, respectively. Overall, target achievement was exceeded.

#### M 2: Practical Exams (O: 2)

**Target for O2: Apply knowledge to practical situations**

90% of students will demonstrate a proficient level of knowledge and understanding.

**Findings 2010-2011 - Target: Met**

100% of students demonstrated proficiency on this measure based on the following courses: KH 7550 and KH 8390.

#### M 3: GXT practical exam (O: 3)

**Target for O3: Demonstrates knowledge of exercise testing**

90% of students will demonstrate proficiency.

**Findings 2010-2011 - Target: Met**

100% of the students demonstrated proficiency in this measure based on results from the following courses: KH 7550 and KH 8390.

#### M 4: Case Studies and Labs (O: 4)

**Target for O4: Understands research and human subjects issues**

90% of the students will demonstrate a proficient level of knowledge and understanding

**Findings 2010-2011 - Target: Met**

100% of the students demonstrated success in this measure in the following courses: KH7500, KH7550, KH7620, and KH8830. 95% of the students demonstrated success in this measure for KH280.

#### M 5: ACSM EXAM (O: 1, 2, 3, 4)

**Target for O1: Demonstrates content knowledge in Exercise Science**

80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2010-2011 - Target: Partially Met**

70% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam.
80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2010-2011 - Target: Partially Met**

70% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam.

**Target for O3: Demonstrates knowledge of exercise testing**

80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2010-2011 - Target: Partially Met**

70% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam.

**Target for O4: Understands research and human subjects issues**

80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2010-2011 - Target: Partially Met**

70% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam.

**M 6: ACSM Exam (O: 1)**

80% of students will pass the ACSM HFS or CES exam.

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Demonstrates content knowledge in Exercise Science**

80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) exam.

**Findings 2010-2011 - Target: Partially Met**

70% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Monitor and maintain current strengths**

We will continue to monitor future achievement in order to maintain standards due to the finding that all achievement levels were met.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Basic Content Knowledge examinations and quizzes | **Outcome/Objective:** Demonstrates content knowledge in Exercise Science

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Two years ago we added to the academic program and assessment measurement the requirement of a standardized national exam developed by the American College of Sports Medicine (ACSM) for all students in the Fitness and Health Promotion Concentration. These changes were made, in part, of the accreditation requirements for the field. Therefore, this test was added as one of the assessment measures. The Exercise Science faculty have met, and will continue to meet, to discuss the pass rates of the exam due to not meeting our goal of 80% pass rate on the the HFS exam.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have documented a disconnect between our internal academic assessment findings and that of the ACSM exam performance. The Exercise Science faculty is working on identifying courses and course objectives that will remedy these deficiencies.

Annual Report Section Responses

Most Important Accomplishments for Year
Implementation of the ACSM exam via the practicum course.

Challenges for Next Year
Tracking ACSM exam sub-category results with specific course outcomes and assessment.
collaborating with and enhancing the local, state, regional, national and global communities related to communication.

**Goals**

**G 1: understand and interpret**
Students will be able to understand and interpret ideas presented in media involving moving images.

**G 2: identify structures**
Students will be able to identify narrative structures in stories using moving images.

**G 3: fundamental concepts**
Students will understand fundamental visual production and post-production concepts.

**G 4: spectator/textual pleasure**
Students will be able to recognize a relationship between spectatorship and textual pleasure in media involving moving images.

### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: understand and interpret (G: 1) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Understand and interpret ideas presented in media and can deploy such understanding to formulate unique ideas.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 2: narrative structures (G: 2) (M: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to identify and discuss various narrative structures in media using moving images employed for story delivery.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 3: prod/post-prod concepts (G: 3) (M: 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will understand the fundamental concepts of mise-en-scene, editing and cinematography relating to the generation of meaning.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 4: spectator/textual pleasure (G: 4) (M: 4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to recognize and articulate a relationship between spectatorship and textual pleasure.</td>
</tr>
</tbody>
</table>

### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: writing assignment (O: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students in the senior capstone courses, Film 4750 and Film 4910, will write analytical papers and will be assessed using the following rubric: 1. Can understand basic filmic ideas expressed by others. 2. Can fully understand, comment on, and discuss the ideas and theories of others. 3. Has the ability not only to understand and interpret the ideas of others but to use that as the groundwork to begin establishing unique ideas. 4. Can fully establish, develop, and communicate logical, coherent, and engaging ideas on specific topics. Source of Evidence: Written assignment(s), usually scored by a rubric</td>
</tr>
</tbody>
</table>

**Target for O1: understand and interpret**

70% of students will score 3 or above on the writing rubric.

<table>
<thead>
<tr>
<th>M 2: descriptive writing assignment (O: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students in the senior capstone courses will write a paper that identifies and discusses key narrative features of visual media, and it will be assessed with the following rubric: 1. Has minimal to basic understanding of narrative structures. 2. Can identify various narrative structures. 3. Is able to identify, understand, and discuss various narrative structures as well as the complications within. 4. Has a full understanding of narrative structure, as well as how to interpret, identify, and dissect it and discuss its meanings and implications. Source of Evidence: Written assignment(s), usually scored by a rubric</td>
</tr>
</tbody>
</table>

**Target for O2: narrative structures**

70% of the students will score a 3 or above on the rubric.

<table>
<thead>
<tr>
<th>M 3: mise-en-scene (O: 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students in the capstone courses, Film 4750 and Film 4910, will identify in a written assignment mise-en-scene and the consequences that it has in media using moving images. Source of Evidence: Written assignment(s), usually scored by a rubric</td>
</tr>
</tbody>
</table>

**Target for O3: prod/post-prod concepts**

70% of students will score 3 or above on the written assignment about mise-en-scene using the following rubric: 1. Has a basic understanding of mise-en-scene and its implications. 2. Can have limited discussions about mise-en-scene. 3. Understands the broad concepts of mise-en-scene and can comprehensively discuss its ideas and theories. 4. Fully grasps the idea of mise-en-scene and can discuss the placement of images on screen and well as its implications that relates to and supports the story and characters. |

<table>
<thead>
<tr>
<th>M 4: spectator/textual relationship (O: 4)</th>
</tr>
</thead>
</table>
| Students in the senior capstone courses, Film 4750 and Film 4910, will be able to write a paper describing the relationship between
spectatorship and textual pleasure involving media using moving images.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: spectator/textual pleasure**

70% of the student papers about the relationship between spectatorship and textual pleasure will score at least 3 or above on the following rubric: Has an introductory sense of how cinematic pleasure occurs. Has a basic understanding of the mechanisms of spectator positioning and identification. Articulates the basic theoretical underpinnings of spectatorship. Discusses complications in identification (art cinema, multiple identifications, etc.)

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Curriculum Revision**

It is anticipated that a significant revision of the Film/Video curriculum will be approved for implementation in the Fall 2011. The new curriculum will provide an opportunity for the faculty to articulate in more precise language the desired learning outcomes of the new curriculum. Greater participation by the faculty will facilitate the adoption of the goals, learning outcomes and other details of the assessment process, especially in regard to collecting data.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Meetings to discuss the revised curriculum and its assessment
- **Projected Completion Date:** 11/2010
- **Responsible Person/Group:** Film/video faculty
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Fundamental Concepts**

Determine system by which students' understanding of the fundamental concepts of mise-en-scene, editing, and cinematography relating to the generation of meaning can be measured.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Faculty need to find ways that a conversation about media aesthetics can be linked to other program discussions about other learning outcomes.
- **Projected Completion Date:** 10/2010
- **Responsible Person/Group:** Film/Video faculty
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Improve Student Performance**

Only one of the goals/learning outcomes, production/post-production, met its assessment target. The faculty should discuss how the instruction of mise-en-scene and fundamental media aesthetics can be used to teach students about spectatorship, textual pleasure, narrative structures, and interpreting ideas and meaning from moving images. A few questions to be considered for the new curriculum: - Are class discussions preparing students for the writing assignments and are the goals of the assignments clearly detailed in class? - Do class discussions emphasize aspects of media that are not associated with curricular goals, e.g. arguments within moving image media, developing meaning through moving images, etc. - Can instructors be encouraged to foster a better class conversation about the generation of spectatorial pleasure? A challenging aspect of media culture is the ways in which it discourages introspection or reflexivity in its audience.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Faculty meetings to discuss the new curriculum and its assessment.
- **Projected Completion Date:** 11/2010
- **Responsible Person/Group:** Film/video faculty
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Narrative Structure Assessment**

Develop system to determine if students can identify and discuss various narrative structures media employ for story delivery.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Conduct program-wide discussion of differences between story and narrative, a challenging differentiation given current media ability to paint over such distinctions.
- **Projected Completion Date:** 10/2010
- **Responsible Person/Group:** Film/Video faculty
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Spectatorial Pleasure**

How to create system to assess students' understanding of the generation of spectatorial pleasure. Recognize and articulate a relationship between spectatorship and textual pleasure.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** A challenging aspect of media culture is the ways in which it discourages introspection or reflexivity in its audience. Film/Video faculty will examine ways to assess students' understanding.
- **Projected Completion Date:** 10/2010
Student Understanding Measures

Establish a system to measure students' understanding and interpretation of ideas presented in media and if they can deploy such understanding to formulate unique ideas.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Faculty will meet to examine these results and then assess our target and specific means of achieving goal. In class, do we talk in one direction then expect student papers to meet goals taken from another direction? Do we talk about media but not about arguments?

**Responsible Person/Group:** Film/Video Faculty
**Additional Resources:** None
**Budget Amount Requested:** $0.00 (no request)

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Finance BBA**

*(As of: 12/12/2016 04:11 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

Description: The mission of the undergraduate BBA finance program is to prepare graduates to succeed in entry-level positions in finance and business in general. To achieve this goal, our graduates should have proficiency in three general areas: (1) Communication skills. Students should be able to write and present financial business reports and presentations that are concise, to identify and evaluate key issues, and to reach supported conclusions. (2) Critical thinking skills. Students should be able to think critically. (3) Technical knowledge. Students should possess a strong technical knowledge of finance.

**Goals**

- **G 2:** Students will develop quantitative skills used in financial analysis
- **G 3:** Students will gain very broad knowledge of finance
- **G 4:** Students will be prepared for financial practice
- **G 5:** Students will use critical thinking in financial decision-making

**Student Learning Outcomes/Objectives**

**SLO 1: The development and application of foundation knowledge (M: 1, 3)**

BBA-Finance students will be able to: (i) Apply principles of macroeconomic theory and policy. (ii) Apply principles of microeconomic theory of the firm. (iii) Acquire a general knowledge of business and business practices outside of the area of finance.

**SLO 2: The development and application of technical skills (M: 1, 3, 4)**

These technical skills that we would like BBA-Finance students to develop and apply include: (i) Be proficient in capabilities in information technology as they relate to finance. (ii) Possess technical capabilities for analyzing the financial condition and performance of a corporation, investment portfolio or other financial entity. (iii) Possess the necessary conceptual and technical skills to be proficient in financial model building. (iv) Possess computer and technology skills, including (but not limited to) spreadsheet capabilities, familiarity with those software packages employed in analyzing financial issues, and general operating procedure capabilities.

**SLO 3: The development and application of analytical, conceptual, and integrative finance skills (M: 1, 2, 3, 4)**

(i) Possess knowledge and capability in their chosen specialization from corporate finance, investments, or financial institutions and markets. (ii) Be proficient in assessing the impact of financial transactions on a corporation, investment portfolio or other financial entity. (iii) Be able to identify and assess the valuation and risk of real and financial assets. (iv) Be capable of applying models for analyzing financial strategies and alternatives for purposes of solving real world financial problems. (v) Be exposed to educational and career development opportunities resulting from the globalization of finance.

**Measures, Targets, and Findings**

**M 1: Representative questions from courses (O: 1, 2, 3)**

To examine student performance in select courses (FI 4000, FI 4040 and FI 4300), the course-instructors selectively chose five representative questions [from the assignments, quizzes, cases, mid-term and final exams] for their courses that together represent core learning in these courses. The questions are briefly described indicating how the questions fulfill learning objectives of the course. Each instructor has also indicated student performance on these five selected, representative questions using the median.
and maximum score attainable. In the Document Repository see "Exhibit 1a-Fall2010: Direct Assessment of Course Performance" for findings from Fall 2010 and "Exhibit 1b-Spring2011: Direct Assessment of Course Performance" for findings from Spring 2011. This measure has 3 related learning outcome objectives as indicated in "Exhibit 2-2011:BBA Assessment Plan and Alignment" (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes), also included in the Document Repository.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: The development and application of foundation knowledge**

Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2010-2011 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that students are continuing to learn at the expected level of performance and that their foundation knowledge meets our targets.

**Target for O2: The development and application of technical skills**

Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2010-2011 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that students are continuing to learn at the expected level of performance and that their foundation knowledge meets our targets.

**Target for O3: The development and application of analytical, conceptual, and integrative finance skills**

Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2010-2011 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that students are continuing to learn at the expected level of performance and that their foundation knowledge meets our targets.

**M 2: National performance indicator: ETS (O: 3)**

All BBA students take the Educational Testing Service (“ETS”) Major Field Test that evaluates performance of each student across all major areas in the BBA program. Performance of our finance majors are tracked relative to national performance of undergraduate BBA students. For current and historic results, please see "Exhibit 3-2011:Educational Testing Service (ETS) Results", which can be found in the Document Repository.

Source of Evidence: Standardized test of subject matter knowledge

**Target for O3: The development and application of analytical, conceptual, and integrative finance skills**

Students should achieve at the 90th percentile in Finance, Accounting, International, and Quantitative.

**Findings 2010-2011 - Target: Partially Met**

Analyzing recent and long-term performance, finance majors are achieving this target fairly consistently in the areas of Finance and Accounting. Performance in International and Quantitative have fallen below desired target levels.

**M 3: Alignment of student learning outcomes (O: 1, 2, 3)**

This measure relates course level student outcomes to program level learning outcomes. In the Document Repository, please see "Exhibit 2-2011:BBA Assessment Plan and Alignment" (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes) for details showing how student learning outcomes of representative courses (FI 4000, FI 4040, and FI 4300) align and map well onto program learning outcomes.

Source of Evidence: Academic direct measure of learning - other

**M 4: Enhance student practical training (O: 2, 3)**

To enable students to engage in the practicum of finance, we partner with Atlanta area corporations to offer field study experiences to students. These field study assignments, offered in conjunction with FI 4391 “Field studies in finance”, allow students to gain course credit, to see how classroom knowledge can be effectively applied in the real world, and to have the opportunity to work with senior managers on practical projects that are of implementable interest to these organizations. Feedback over the last several years indicates high levels of satisfaction of employers and high levels of applied learning on the part of student participants.

Source of Evidence: Project, either individual or group

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Careers and professionalism in Finance**

We seek to expand student awareness and knowledge of career development and alternative career paths in finance. We have recently created for student viewing several video recordings of leading Atlanta-based financial executives discussing their careers and job functions as well as identifying student pathways for similar success.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** Medium  
**Relationships (Measure | Outcome/Objective):**  
- Measure: Representative questions from courses  
- Outcome/Objective: The development and application of technical skills  
**Implementation Description:** continuous
Critical thinking through writing

We seek to improve the critical thinking and written communication skills of students through the implementation of the University's Critical Thinking through Writing Initiative. With the finance major, this program continues to be integrated within our FI 4020 course, which is a required course for all finance majors in the BBA program.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Alignment of student learning outcomes | Outcome/Objective: The development and application of analytical, conceptual, and integrative finance skills

Implementation Description: continuous
Responsible Person/Group: Professors Jonathan Godbey and Pete Eisemann
Additional Resources: student assistants

Practical training

The field study in finance course "FI4391" has been found useful for providing BBA-Finance majors with real-world experience in independent project management (in both financial services firms and non-financial global business organizations). This has become increasingly important given the global recession and the decline in employment in the financial and non-financial sectors of the economy. We will continue to seek and partner with participating corporations to provide students the opportunity to acquire worthwhile and relevant practical experience.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Enhance student practical training | Outcome/Objective: The development and application of analytical, conceptual, and integrative finance skills

Implementation Description: continuous
Responsible Person/Group: Professors Rich Fendler and Pete Eisemann

Action Plan re ETS Findings

Initiatives have been put in place to raise math requirements of all BBA students and to increase emphasis on the development of quantitative skills in FI 4000, which all finance majors must take. Increased offerings of our international finance course FI 4040 should increase the exposure of finance majors to international issues.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: National performance indicator: ETS | Outcome/Objective: The development and application of analytical, conceptual, and integrative finance skills

Implementation Description: Immediate
Projected Completion Date: 04/2012

Analysis Questions and Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

During the 2010-2011 academic year, there were no significant changes made in the assessment process since last year's assessment report. Still, with each academic year, there is the likelihood that new and/or different faculty will instruct those undergraduate courses in which much of the assessment of student learning is embedded. While the courses remain relatively the same from semester to semester, the instructors may change from one year to the next. As a result, these new faculty are trained to enable their participation in the assessment process. Finally, the Department recently completed its Academic Program Review and the development of the Action Plan for it may yield potential changes in our assessment process.

ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

A) The Department recently completed its Academic Program Review (APR) and is in the process of preparing the associated Action Plan. It is anticipated that one item will be to conduct a curriculum review of our BBA program. B) Despite the economic downturn, employers continue to seek those students who are well-trained in finance and have a strong appreciation for working with and understanding real world financial data. In 2010 we obtained a substantial university student technology fee grant to purchase financial market data for incorporation into undergraduate classroom assignments and projects. C) We have improved and expanded opportunities for students to participate in the finance society student association as well as on the student portfolio management team. D) Three faculty members (Professors Richard Fendler, Craig Ruff, and Milind Shrikhande) have conducted a detailed study of student learning styles and instructor teaching styles based on undergraduate business students taking the required core class FI 3300. The purpose of the study was to better understand which teaching styles or methods match best with the students' varied learning styles. The results of this study indicate that if student learning is improved as a result of more effective teaching methods it will lead to a lower rate of attrition out of the finance discipline. These findings have been shared with the course coordinator (Professor Jonathan Godbey) as well as the instructors teaching this course who are predominantly GTAs.
ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
The Department has in place several faculty overseeing each critical action plan component: Professor Rasha Ashraf and Genna Brown for the careers component in FI 4000; Professor Richard Fendler and Peter Eisemann for the critical thinking through writing initiative in FI 4020; and Professor Milind Shrikhande and Richard Fendler for the enhancement of practical training through FI 4391. The changes have resulted in 1) furthering student knowledge of career paths and post-degree opportunities in the field of finance; 2) improved their critical thinking skills; and 3) expanded the number of field study opportunities for our finance majors. Of note, for the careers component in FI 4000, we have begun to build a library of video interviews with CFOs and other high level executives of leading Atlanta based corporations. These executives discuss the finance function within a corporate organization and discuss various career paths for students interested in finance. Also in FI 4000, the Department has reduced the maximum class size from approximately 60 to 40 students. The course coordinator is working with all instructors in this important required class to increase the focus on building finance quantitative skills. To increase the effectiveness of our critical thinking through writing initiative in FI 4020, during the recent academic year, the Department has reduced the maximum class size from 45 to 30 students.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
As a whole our overall targets continue to be met indicating that the Department continues to be a college leader in terms of the quality of students produced. We will continue to be diligent in ensuring a high quality program for students. As a result of this year’s review, we will try to find out why finance student performance on the ETS exam fell in some of the non-finance subject areas. Since much of the instruction in these areas is outside the direct control of the Department of Finance, we will pursue this with the RCB’s Undergraduate Program Committee.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
We will continue to pursue similar strategies that have been successful in the past including faculty review committees along with input from advisory committee members. Our main strategy for improvement during the coming year will be to use the findings of the recently conducted Academic Program Review (APR) to develop an action plan for improving the effectiveness of our BBA program.

Georgia State University
Assessment Data by Section
2010-2011 Finance MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
Description: The Master of Science degree program with a major in Finance is designed for individuals with an undergraduate business degree seeking an advanced knowledge of Masters level finance, including particular expertise in a chosen area of specialization (one of Corporate Finance, Investments, or Financial Institutions and Markets). The goal of the program is to provide students with the skills necessary to understand the context for issues encountered in the rapidly evolving financial environment, to analyze alternative financial scenarios and to develop effective policy initiatives. The program provides graduates with the technical skills needed to support a complete understanding of advanced issues in finance as well as with the analytical, conceptual and integrative skills needed to achieve a high degree of success in their careers in finance. The Fast-Track Master of Science in Finance provides participants the opportunity to gain these skills in a cohort format for preparing for careers in senior level financial management.

Goals
G 1: Knowledge of finance and related fields
Students will develop knowledge of the discipline of finance and related business practices.

G 2: Conceptual and technical skills development
Students will develop conceptual and technical skills necessary for financial model building and analysis.

G 3: Problem-solving skills for real world application
Students will developing problem-solving skills used in the analysis of commonly encountered issues in the practice of finance.

G 4: The development of critical thinking skills
Students will develop critical thinking skills for analyzing complex financial issues

G 5: Professional leadership skills
Students will be prepared to join senior management levels in financial and non-financial organizations.

Student Learning Outcomes/Objectives
SLO 1: The development and application of foundation knowledge (M: 1, 2, 3)
MS-Finance students will be able to: (i) Apply principles of macroeconomic theory and policy. (ii) Apply principles of microeconomic theory of the firm. (iii) Acquire a general knowledge of business and business practices outside of the area of finance.
### Measures, Targets, and Findings

#### M 1: Representative questions from courses (O: 1, 2, 3)

To examine student performance in select courses from each specialization (FI 8020, FI 8200, and FI 8310), the course instructors selectively chose five representative questions from the assignments, quizzes, cases, mid-term and final exams for their courses that together represent core learning in these courses. The questions are briefly described indicating how the questions fulfill learning objectives of the course. Each instructor has also indicated student performance on these five selected, representative questions using the median and maximum score attainable. In the Document Repository see "Exhibit 2-2011: Direct Assessment of Course Performance I (Fall 2010)" for findings from Fall 2010 and "Exhibit 1b-2011: Direct Assessment of Course Performance II (Spring 2011)" for findings from Spring 2011. This measure has 3 related learning outcome objectives as indicated in "Exhibit 2-2011: MS Assessment Plan and Alignment" (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes), also included in the Document Repository.

</tbody>
</table>

#### M 2: MS-Finance Exit Survey Responses (O: 1, 2, 3)

To provide student feedback on the MS-Finance Program, we conducted exit surveys at the end of each Fall semester. These exit surveys provide a perspective from graduating students that will be used by the MS-Finance Program Committee and the Department of Finance to make any necessary refinements to program design and curricular offerings. Over the last six years, survey responses have indicated fairly high satisfaction levels with curricula and teaching and learning processes within the MS-Finance program. In the Document Repository, see "Exhibit 3-2011: MS Exit Survey". In addition, we have conducted a course satisfaction survey for the Spring 2011 Fast Track MS-Finance courses. These results are presented in "Exhibit 4-2011: Fast Track MS Course Survey (Spring 2011)" and indicate an encouraging response from students.

Source of Evidence: Academic direct measure of learning - other

#### M 3: Alignment of student learning outcomes (O: 1, 2, 3)

In the Document Repository, see "Exhibit 2-2011: MS Assessment Plan and Alignment" for details showing how learning outcomes of representative courses (FI 8020, FI 8200, and FI 8310) align with program learning outcomes. This alignment indicates that the representative questions testing student learning outcomes are well aligned with overall program learning outcomes.

#### M 4: Enhance student practical training (O: 2, 3)

### Other Outcomes/Objectives

#### Other Outcomes/Objectives

- **O/O 2: The development and application of technical skills (M: 1, 2, 3, 4)**
  - Technical skills that MS-Finance students will develop and apply include: (i) Proficiency in capabilities in information technology as they relate to finance, (ii) Technical capabilities for analyzing the financial condition and performance of a corporation, investment portfolio or other financial entity. (iii) The necessary conceptual and technical skills to be proficient in financial model building. (iv) Computer and technology skills, including (but not limited to) spreadsheet capabilities, familiarity with those software packages employed in analyzing financial issues, and general operating procedure capabilities.

- **O/O 3: Analytical, conceptual, integrative finance skills (M: 1, 2, 3, 4)**
  - MS-Finance students will: (i) Possess knowledge and capability in their chosen specialization from corporate finance, investments, or financial institutions and markets. (ii) Be proficient in assessing the impact of financial transactions on a corporation, investment portfolio or other financial entity. (iii) Be able to identify and assess the valuation and risk of real and financial assets. (iv) Be capable of applying models for analyzing financial strategies and alternatives for purposes of solving real world financial problems. (v) Be exposed to educational and career development opportunities resulting from the globalization of finance.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Curriculum

The quality of students entering the MS-Finance Program has maintained its improvement over the 2003-04 baseline year with average GMAT scores during 2010-11 at approximately 635, based on a sample-study of students admitted to the program. To maintain and improve upon these gains in student quality, there is need to refine certain aspects of the program based on formal and informal student feedback. The technical background courses in Management Science can overlap with a student’s prior coursework. These courses could be replaced with higher level courses tailored to each student’s career goals and prior preparation. These substitutions have now been permitted during the past few years. The Department continues to review its curriculum to identify new courses that will help better prepare students to succeed in the changing marketplace. In response, we have most recently added two courses: FI 8350 "Corporate restructuring and workouts" and FI 8260 "Hedge funds and their trading strategies." These two courses have been successfully taught now for 2 cycles and are among our most popular courses. Looking forward to the 2011-2012 academic year, we will continue to review the curriculum and identify potential new courses that will provide students with important skill sets relevant to their professional development.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** MS-Finance Exit Survey Responses
- **Outcome/Objective:** The development and application of technical skills

**Implementation Description:** continuous

**Responsible Person/Group:** Professors Milind Shrikhande and Gerry Gay

#### Practical training

Our experience in developing and offering the field-study in finance course FI 8391 continues to prove highly useful for providing MS-Finance students with real-world experience in independent project management (in both financial services firms and non-financial global business organizations). We will continue to identify additional corporate partners for purposes of expanding opportunities for students to participate. Our goal is to eventually have the field study course become an integral part and distinguishing aspect of the program.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- **Measure:** MS-Finance Exit Survey Responses
- **Outcome/Objective:** Analytical, conceptual, integrative finance skills

**Implementation Description:** continuous

**Responsible Person/Group:** Professors Milind Shrikhande and Richard Fendler

#### Program marketing and innovation

In 2009 we believed that there was a potential executive audience for the Fast Track MS-Finance program who desires a strong cohort formal with an emphasis on academic training in corporation finance. In response, we initiated plans to launch such a program beginning in January 2010 and after a successful offering began a second cohort in January 2011. In addition, we will continue to bring to the attention of students pursuing an MBA degree, whether in finance, accounting, risk management, or another related concentration, the benefit to their skill set that an MS-Finance program offers. Along these lines, we have developed a template that guides students in selecting and scheduling courses in such a way to most efficiently earn joint MBA and MS degrees in finance. We are furthering efforts to attract students in the PMBA program to similarly complete the MS-Finance degree requirements in an efficient manner.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

**Implementation Description:** In January 2010 we successfully launched a one-year Executive MS in Finance program at the Robinson College’s Buckhead Executive Center. In January 2011 we changed the name of the program to Fast Track MS in Finance.

**Responsible Person/Group:** Professors Milind Shrikhande and Alfred Mettler

### Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

During the 2010-2011 academic year, there were no significant changes made in the assessment process of the flex MS-Finance program since last year's assessment report. Still, with each academic year, there is the likelihood that new and/or different faculty will instruct those graduate courses in which much of the assessment of student learning is embedded. While the courses remain relatively the same from semester to semester, the instructors may change from one year to the next. As a result, these new faculty are trained to enable their participation in the assessment process. Beginning in Spring 2011 we added a new assessment tool for the Fast Track MS-Finance program wherein course effectiveness surveys of students were conducted for Spring courses. We anticipate that such surveys will be implemented each semester going forward. Finally, the Department recently completed is Academic Program Review and the development of the Action Plan for it may yield potential changes in our assessment process.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on
Students shall demonstrate the following abilities:

1. to understand French when spoken by a proficient speaker on general and non-technical topics at normal conversational speed;
2. to speak French with a varied vocabulary, good pronunciation, and grammatical accuracy;
3. to read and comprehend general and non-technical materials written in French;
4. to equip them to function as global citizens;
5. to prepare them, through the various majors in modern languages, for future careers as teachers, translators and interpreters, as well as for important positions in international business;
6. Students shall demonstrate the ability to critically interpret the literary, cultural and historical content of literatures written in French.

### Goals

**G 4: Knowledge of French and French Literature**

Student shall demonstrate the following abilities:

1. to understand French when spoken by a proficient speaker on general and non-technical topics at normal conversational speed;
2. to speak French with a varied vocabulary, good pronunciation, and grammatical accuracy;
3. to read and comprehend general and non-technical materials written in French;
4. to equip them to function as global citizens;
5. to prepare them, through the various majors in modern languages, for future careers as teachers, translators and interpreters, as well as for important positions in international business.

**G 5: Outcomes for the current period**

The previous assessments was completed successfully, but due to several factors including personnel changes in the Department, the complexity and inflexibility of the program and the unsatisfactory design of the original rubrics, it was decided at that time to limit the focus on general goal 6. For the current period, the French section of the Department decided to focus on more goals important to the degree program and add Goals 3, 4, 5 to the previous assessment restricted to Goal 6. This assessment was made in the Introduction to the Analysis of Literary Texts, an introductory course required for all French majors before they take more advanced literature courses. It includes 4 weighted criteria of a literary text: Focus on Topic (35%), Literary Lens Use (35%), Organization (15%) and Accuracy of Grammar and Spelling (15%).

**G 6: Target**

Students shall demonstrate the ability to understand French when spoken by a proficient speaker on general and non-technical topics at normal conversational speed; to speak French with a varied vocabulary, good pronunciation, and grammatical accuracy; to...
read and comprehend general and non-technical materials in this language and to write in French with clarity and grammatical accuracy. Students shall also demonstrate a general acquaintance with French cultures and the ability to critically analyse and interpret the literary, cultural and historical content of literary texts.

### Student Learning Outcomes/Objectives

<tbody>
<tr>
<td>In French 3033 (Introduction to the Analysis of Literary Texts), students wrote an end-of-course paper whose purpose was to demonstrate their ability to critically analyse and interpret the literary, cultural and historical content of a literary text. They were evaluated for their appropriate focus on the topic (35%), their literary lens use (35%), the clear and succinct organization of their paper (15%), and the correctness of their grammar and spelling (15%).</td>
</tr>
</tbody>
</table>

Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O4: Knowledge of French Literature</th>
</tr>
</thead>
<tbody>
<tr>
<td>We hope that students will be able to achieve a score of 8.0-8.4 in their assessment for literature. However, because Goals 3-6 assessment is relatively new, it has not been possible to identify accurately at this time important trends and localize areas of weakness and strength. For this reason and to get more precise and relevant information, the Department will continue with this single focus for the Academic Year 2011-2012. The results of these 3 years will then be compared and analyzed, areas of weakness and strength identified, and corrective actions taken for each criteria, and a decision will be made whether to assess a larger number of goals.</td>
</tr>
</tbody>
</table>

**Findings 2010-2011 - Target: Met**

2 courses of French 3033 (Introduction to the Analysis of Literary Texts) were taught during this period. Students majoring in French achieved a result of 8.4 and 8.3.

---

### Georgia State University Assessment Data by Section

**2010-2011 French MA**

*As of: 12/12/2016 04:11 PM EST*  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

The mission of the Department is to give students preparing for the M.A. in French the opportunity to develop appropriate proficiencies in the French language, to acquaint them with the literary and cultural productions of France and French speaking countries, and to provide them with the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching and research, translation and interpretation, international business, and other areas. The Department's mission, with regard to students preparing for the M.A. in French, is to encourage them to contribute to the development, organization and dissemination of research and criticism in the focus areas of French and Francophone literatures and cultures, linguistics and language pedagogy. As a core element in the University's mission of internationalization, the Department encourages their interest and involvement in international exchanges.

### Goals

**G 1: Goals for 2010-11**

In Fall 2010, I began as Director of Graduate Studies for MCL. Previous to my tenure as DGS, no work had been done on establishing rubrics or developing measures for direct and indirect assessment of graduate student learning in our department. MCL had already established a series of outcomes dating back to 2004-05. According to those outcomes, I began to develop a means for directly assessing student work; seminar papers, theses, non-thesis papers, written exit exams, and oral exit exams. I have accumulated this data into excel sheets which I have placed in the document repository. I have also included there the Milestone Evaluation used to assess this work. In Spring 2011, I began to develop indirect assessment measures including a survey for our MA students, a similar survey for our faculty (to gauge the difference in perception between faculty and students), and an annual report for students to inform me of their professional and academic activities relevant to our MA program (All of these documents are available in the Document Repository). These indirect assessment were put online via Google Docs to make it easier for individuals to do the survey and easier for me to track the results that were loaded directly into an Excel format. All of my focus toward assessment in 2010-11 was dedicated to the development of clear rubrics that were easy to follow and easy to use for the faculty of MCL, but that also created concrete data that would lead to clear conclusions about the ability of MCL to meet our stated goals and desired outcomes with regard to student learning. Now that I have begun to accumulate data and faculty are on board with the measures I have devised, I will be focused this year on tracking the data, assessing it, and developing an action plan through WEAVE.
Student Learning Outcomes/Objectives

SLO 1: Effective writing, communication and editing (M: 1)
Students develop effective written communication and editing skills and show appropriate writing conventions and formats.

SLO 2: Research and Data Collection Skills (M: 1)
Students are able to read and understand research, acquire skills to collect data and utilize key data sources that provide literary and linguistic information and research findings.

SLO 3: Critical Thinking Skills (M: 1)
Students demonstrate competence in the analysis of literary texts and the evaluation of critical thinking in literature.

SLO 4: Acquisition of Knowledge (M: 1)
Students articulate key literary and philosophical concepts and theories, apply the most up-to-date facts and information in resolving literary and linguistic issues and demonstrate appropriate literary, linguistic, historical and cultural knowledge.

Measures, Targets, and Findings

M 1: Thesis, Pedagogical project or research paper (O: 1, 2, 3, 4)
A committee of French professors will use the thesis, pedagogical research project, and/or research paper to evaluate mastery of the skills and learning outcomes of the M.A. candidate in French. The written exam consists of three questions based on three areas from French literature and/or civilization reading list as well as on students' coursework.
Source of Evidence: Senior thesis or culminating major project

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Adding Courses
The French section has added one new course for the new concentration in French Studies, and more are under consideration

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Planned
Responsible Person/Group: French Faculty

Mission / Purpose
The Geography BA in the Department of Geosciences presents an integrative perspective on the relations among social, political, economic, and physical phenomena occurring across space. The program is committed to teaching the concepts and research methods of the discipline in order to prepare geography majors for professional careers or advanced study or both. Students acquire geographic knowledge and thinking skills in order to understand the complex nature of the human and environmental patterns found in the world around them. Therefore, the program is committed to excellence in both the theoretical and applied arenas.

Goals

G 1: Concepts
Students will learn concepts and methods of geographical research

G 2: Thinking Skills
Students acquire thinking skills to understand and apply knowledge of environmental patterns found in the world around them

Student Learning Outcomes/Objectives

SLO 4: Foundation Knowledge (G: 1, 2) (M: 1)
Student demonstrates knowledge of key geographical concepts, theories, methods, and facts

SLO 5: Communication-Written (M: 1)
Student communicates effectively using appropriate writing conventions and formats.
### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: Senior Seminar Portfolio (O: 4, 5, 6, 7, 8)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student assembles a portfolio comprised of writing assignments, practica exercises (mapping), book reviews, research papers and presentations.</td>

**Target for O4: Foundation Knowledge**

We assess on scale of 1-5: 1 (strongly disagree), 2 (disagree), 3 (neutral), 4 (agree), and 5 (strongly agree).

<table>
<thead>
<tr>
<th>Findings 2010-2011 - Target: Partially Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>This year, average finding was 3.9 out of 5.0.</td>
</tr>
</tbody>
</table>

**Target for O5: Communication-Written**

We assess on a 1-5 scale: 1 (strongly disagree); 2 (disagree); 3 (neutral); 4 (agree); and 5 (strongly agree). Target is 4 or greater.

<table>
<thead>
<tr>
<th>Findings 2010-2011 - Target: Partially Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>The finding was an average of 3.9. This is close to target of 4.0. No actions necessary.</td>
</tr>
</tbody>
</table>

**Target for O6: Critical Thinking Question formulation #1.**

Assess on a 1 to 5 scale: 1 (strongly disagree); 2 (disagree); 3 (neutral); 4 (agree); and 5 (strongly agree). Target is 4 or greater.

<table>
<thead>
<tr>
<th>Findings 2010-2011 - Target: Partially Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>Finding is 3.9 which is close to target. No actions recommended.</td>
</tr>
</tbody>
</table>

**Target for O7: Critical Thinking - Information Evaluation**

We assess on a scale of 1 - 5: 1 (strongly disagree); 2 (disagree); 3 (neutral); 4 (agree); and 5 (strongly agree). Target is 4 or greater.

<table>
<thead>
<tr>
<th>Findings 2010-2011 - Target: Partially Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>Score is 3.9.</td>
</tr>
</tbody>
</table>

**Target for O8: Contemporary Issues - Diverse Disciplines**

Students assessed on a five point scale (1-5): 1 (strongly disagree); 2 (disagree); 3 (neutral); 4 (agree); and 5 (strongly agree). Target is 4 or better.

<table>
<thead>
<tr>
<th>Findings 2010-2011 - Target: Partially Met</th>

<tbody>
<tr>
<td>Finding is a 3.9. Target partially met. No actions warranted.</td>
</tr>
</tbody>
</table>

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Improve critical-thinking skills of Geography majors**

Critical-thinking learning outcomes had the lowest scores among all the outcomes; therefore, critical-thinking skills of Geography majors need to be improved.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 12/2009

**Improve scores on Outcome 10 in GEOG 4764**

Normal 0 false false false MicrosoftInternetExplorer4 In order to improve scores on Outcome 10 (Critical Thinking – Information Evaluation) in Geography 4764 (Urban Geography), the instructor will provide students with solid examples of appropriate evaluations of claims, arguments, evidence, and hypotheses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 07/2009
Increase the number of measures for certain outcomes

It has been determined that the program needs at least six measures per learning outcome. There were 82 outcome/measure combinations for the 2008-2009 assessment, thereby yielding a mean value of six measures per outcome. To reach the minimum number of six measures per outcome, the following is needed: at least five additional measures for Outcome 4 (Communication – Visual) and Outcome 5 (Quantitative Skills – Arithmetic Operations); at least three additional measures for Outcome 6 (Quantitative Skills – Problem Solving), at least two additional measures for Outcome 8 (Critical Thinking – Quantitative Thinking – Question Formulation (2)), Outcome 9 (Critical Thinking – Evidence Collection), and Outcome 11 (Technology); and one additional measure for Outcome 3 (Communication – Oral), Outcome 12 (Collaboration), and Outcome 13 (Contemporary Issues – Diverse Disciplines). Therefore, a high-priority area is increasing the number of measures for outcomes linked to quantitative skills, visual communication, and critical thinking.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 12/2009

Actions

Geosciences is proposing to combining B.A (GEOG) and B.S. (GEOL) degree programs. All new assessment will be developed reflecting goals and outcome of a new combined degree B.S. degree program. The 3.9 is lower than we want for this particular measure but is close to target; no change in approaches are warranted for this outcome.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Senior Seminar Portfolio | Outcome/Objective: Foundation Knowledge

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The Department of Geosciences is now merging all of its programs and is in the process of updating its assessment procedures. The faculty will be tasked with revising reevaluating and revising our learning outcomes, measures, and targets. We expect to derive a new action plan to be implemented for 2012.

Mission / Purpose

The geography program of the Department of Geosciences presents an integrative perspective on the relations among social, political, economic, and physical phenomena occurring across space. The program is committed to teaching the concepts and research methods of the discipline in order to prepare geography majors for professional careers or advanced study or both. Students acquire geographic knowledge and thinking skills in order to understand the complex nature of the human and environmental patterns found in the world around them. Therefore, the program is committed to excellence in both the theoretical and applied arenas. Through scholarship, teaching, and service, the geography program of the Department of Geosciences is dedicated to improving our community, nation, and world.

Goals

G 1: Overall Goals

Overall goals reflect university emphasis on retention and graduation in a timely manner (two years for full-time students). Geosciences also wishes to increase the quality of graduate students, as measured through GPA and application scores (GRE) although we recognize that “quality” is measurable in a number of ways.

Mission / Purpose

Our mission is to provide our students the opportunity to go beyond the memorization of geological facts in order to critically evaluate the major concepts related to Earth Science.
**Goals**

**G 1: Broadening the scope of thinking**
One goal of geosciences in the Core is help students to think more broadly.

**G 2: Understand impacts of Geology in our world**
Student will better appreciate how Geology impacts the world they live in.

**Outcomes/Objectives**

**O/O 1: Critical Thinking (G: 1, 2) (M: 1)**
Students will demonstrate that they can use knowledge not explicitly stated in a question to answer the question at hand. The knowledge is designed to come from an earlier taught concept in either of the two introductory courses (GEOL 1121 and GEOL 1122). In other words the students were asked to “piece concepts together” somewhat or think critically.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Measures, Targets, and Findings**

**M 1: Test Questions (O: 1)**
Every semester faculty members teaching GEOL 1121 and/or GEOL 1122 devise specific test questions (either multiple choice or short essay) that require students to analyze course material in a broader manner than that which was explicitly taught covered during the lecture. The student responses to these specific "Critical Thinking" questions are then monitored by the faculty member when the tests are graded.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Critical Thinking**
Students will answer at least 70% of questions correctly.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The Department of Geosciences is now merging all of its programs and is in the process of updating its assessment procedures. The faculty will be tasked with revising reevaluating and revising our learning outcomes, measures, and targets. We expect to derive a new action plan to be implemented for 2012.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Geology BS**

As of: 12/13/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

Mission/Purpose The Department of Geosciences at Georgia State University is committed to excellence in instruction and research in the Earth Sciences. We expect all our graduates to develop a thorough knowledge base in geology which will place them in a good position for moving on to graduate school or to employment in geology. We expect each graduate to have a strong understanding of the constitution of the earth; earth processes, both internal and external; and earth history.

**Goals**

**G 1: Geological Knowledge**
Like all sciences, Geology includes a body of knowledge built up over hundreds of years. Whereas some knowledge is site-specific and may not be of immediate importance, much of the knowledge is general, applying to all parts of the earth. Upon graduation, students will have a general understanding of the earth, both in terms of its current constitution, the processes that drive terrestrial events and processes, and its history. Students will understand how the earth is differentiated internally and will know the general make-up of the core, mantle, and crust. They will understand the processes that produced the differentiation and that continue to modify the earth's interior. Students will understand how the earth has evolved and continues to evolve due to plate tectonics. Students will have a general knowledge of the distribution and characteristics of lithospheric plates and plate margins. They will understand the role of plate tectonics in formation and evolution of both oceanic crust and continental crust, and the role of plate tectonics in mountain building. Students will understand the origin and evolution of the three rock types, igneous, sedimentary, and metamorphic, and how they can be used to decipher earth history. Students will have a general understanding of the origin and distribution of geologic resources, including metallic and nonmetallic ore deposits, and energy resources. They will understand the role of water on earth, including the hydrologic cycle. They will understand the surficial processes of weathering and erosion and how landscapes develop and evolve. Students will have a general knowledge of how life on earth has evolved and how fossils can be used to help decipher earth history. Students will be proficient in the use of basic geologic tools such as the hand lens, Brunton
Student Learning Outcomes/Objectives

SLO 1: Constitution of the Earth (G: 1) (M: 1)
Each graduate will know what the earth is made of and how the various earth materials are distributed within the earth and on its surface.

SLO 2: Earth Processes (G: 1) (M: 1)
Each graduate will understand the processes driving changes inside the earth and on the earth's surface.

SLO 3: Earth History (G: 1) (M: 1)
Each graduate will have an understanding of the historical development of the earth.

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 4: Foundation knowledge Acquisition (G: 1) (M: 2)
Student demonstrate knowledge of key geological concepts.

SLO 5: Communication-Written (G: 1) (M: 2)
Student communicates using appropriate writing conventions.

SLO 6: Critical Thinking - Evidence Collectino (G: 1) (M: 2)
Student collects appropriate evidence.

SLO 7: Critical Thinking - Information Evaluation (G: 1) (M: 2)
Student evaluates claims, arguments, evidence, and hypotheses.

Measures, Targets, and Findings

M 1: “LOESS” Exit Survey (O: 1, 2, 3)
The Learning Outcomes Exit Survey for Seniors (LOESS) was given to six graduating seniors. The test consisted of 90 questions, 10 questions from each of nine geology courses. The courses are Geol 1121 (Introductory Geosciences I), Geol 1122 (Introductory Geosciences II), Geol 3002 (Introduction to Earth Materials), Geol 4006 (Sedimentary Environments and Stratigraphy), Geol 4013 (Structural Geology), Geol 4015 (Crystallography and Optical Mineralogy), Geol 4016 (Igneous and Metamorphic Petrology), Geol 4017 (Environmental Geology), and Geol 4007 (Hydrogeology). Geol 1121, 1122, 3002, 4006, 4013, 4015, and 4016 are required for the BS degree; Geol 4017 and 4007 are not required but are taken by almost every graduating student.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target for O1: Constitution of the Earth
Normal 0 false false false MicrosoftInternetExplorer4

Findings 2010-2011 - Target: Not Reported This Cycle
LOESS not administered.

Target for O2: Earth Processes
The overall performance on the LOESS exit survey by the student group will be at least 80%.

Findings 2010-2011 - Target: Not Reported This Cycle
LOESS not administered.

Target for O3: Earth History
The overall performance on the LOESS exit survey by the student group will be at least 80%.

Findings 2010-2011 - Target: Not Reported This Cycle
LOESS not administered this cycle.

M 2: Environmental Geology writing assignment (term paper) (O: 4, 5, 6, 7)
Students write a professional paper (8-10 page). Paper is graded equally on content, structure, sources, and grammar. Students submit paper end of March for revisions. Revisions are due mid April. If corrections are made satisfactorily, then an increase of grade is given.

Source of Evidence: Portfolio, showing skill development or best work

Target for O4: Foundation knowledge Acquisition
Students rated on a 1-5 scale where 1 (strongly disagree), 2 (disagree), 3 (neutral), 4(agree) and 5 (strongly agree).
Findings 2010-2011 - Target: Met
Twenty one papers were graded. Overall grade is 4. Several paper (6 were graded in the 90+ and are given a 5). Only one paper was considered neutral.

Target for O5: Communication-Written
Students rated on a 1-5 scale where 1 (strongly disagree), 2 (disagree), 3 (neutral), 4 (agree) and 5 (strongly agree).

Findings 2010-2011 - Target: Met
Twenty one papers were graded. Overall grade is 4. Several paper (6 were graded in the 90+ and are given a 5). Only one paper was considered neutral.

Target for O6: Critical Thinking - Evidence Collectino
Students rated on a 1-5 scale where 1 (strongly disagree), 2 (disagree), 3 (neutral), 4 (agree) and 5 (strongly agree).

Findings 2010-2011 - Target: Met
Twenty one papers were graded. Overall grade is 4. Several paper (6 were graded in the 90+ and are given a 5). Only one paper was considered neutral.

Target for O7: Critical Thinking - Information Evaluation
Students rated on a 1-5 scale where 1 (strongly disagree), 2 (disagree), 3 (neutral), 4 (agree) and 5 (strongly agree).

Findings 2010-2011 - Target: Met
Twenty one papers were graded. Overall grade is 4. Several paper (6 were graded in the 90+ and are given a 5). Only one paper was considered neutral.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Revise Assessment Plan
Geosciences department has recently reorganized and has agreed to establish one set of assessment goals for the entire department. The new departmental assessor will be working with faculty across the department to establish new goals and discuss forms of assessment.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 05/2012
Responsible Person/Group: Seth Rose and Department as a whole

Georgia State University
Assessment Data by Section
2010-2011 Geology MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The primary mission and goal is to produce a well-educated student at the MS degree level in Geology. That mission includes: delivering courses at the MS level relevant to what a MS student in Geology needs to know; and providing stimulating research opportunities at the MS level.

Student Learning Outcomes/Objectives

SLO 1: Quality of Non-thesis Project
Non-thesis projects should be well conceived (good research idea) and executed satisfactorily.

SLO 2: Quality of Thesis Research
Thesis research (for students enrolled in the thesis option) should be of high quality (i.e., well written, sound data, and sound interpretation, discussion and conclusions).

Other Outcomes/Objectives

O/O 3: MS Degree in Geology (quality of thesis)
Quality of thesis project is assessed on a 1-5 scale (5 = excellent, 4 = very good, etc) by the thesis director, graduate director or department chair. Basis of evaluation includes: depth and coverage of topic, quality of data, quality of interpretations, discussion and conclusions).
Measures, Targets, and Findings

M 4: MS degree in Geology (non thesis project)
Non-thesis project is assessed in terms of quality of the work (topic, data collected, interpretation and discussion) by either the faculty member directing this non-thesis project, the graduate director, or department chair.
Source of Evidence: Project, either individual or group

M 5: MS Degree in Geology (Quality of Thesis)
Quality of thesis project is assessed on a 1-5 scale (5 = excellent, 4 = very good, etc) by the thesis director, graduate director or department chair. Basis of evaluation includes: depth and coverage of topic, quality of data, quality of interpretations, discussion and conclusions).
Source of Evidence: Senior thesis or culminating major project

Georgia State University
Assessment Data by Section
2010-2011 German BA
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Department is to give students majoring in German the opportunity to develop appropriate proficiencies in the German language, to acquaint them with the literature and culture of German speakers, to promote their interest and involvement in international exchanges through study abroad programs, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching, business, translation and interpretation and other areas.

Goals
G 4: Knowledge of German Literature
Student will understand the particularities of German literature.

G 5: Outcomes for the current period
Previous assessments could not be completed successfully due to several factors including personnel changes in the Department, the complexity of the program and the unsatisfactory design of the original rubrics. After consultation with GSU's Director of Academic Assessment, it was decided to focus on a single goal, General Goal 6, for the current period. The assessment was made in the Introduction to Literature course, a requirement for all majors in French, German and Spanish. The new rubric for this goal was redesigned by departmental faculty skilled in the science of assessment. It includes 4 weighted criteria of a literary text: Focus on Topic (35%), Literary Lens Use (35%), Organization (15%) and Accuracy of Grammar and Spelling (15%).

Outcomes/Objectives
O/O 6: Knowledge of German Literature (M: 1)
The student shall demonstrate a general acquaintance with German literatures and the ability to critically analyze and interpret the literary, cultural and historical content of literary texts.

Measures, Targets, and Findings

M 1: Paper (O: 6)
In German 3312 (Introduction to Reading German Literary Texts), students wrote a paper whose purpose was to demonstrate their ability to critically analyse and interpret the literary, cultural and historical content of a literary text. They were evaluated for their appropriate focus on the topic (35%), their literary lens use (35%), the clear and succinct organization of their paper (15%), and the correctness of their grammar and spelling (15%).
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O6: Knowledge of German Literature
We hope that students will be able to achieve a score of 8.0-8.4 in their assessment for literature. However, because Goal 6 assessment is new and in its first phase, it will not be possible to identify accurately important trends and localize areas of weakness and strength at this time. For this reason and to get more precise and relevant information, the Department will continue with this single focus for the Academic Year 2010-2011. The results of both years will then be compared and analyzed, areas of weakness and strength identified, and corrective actions taken for each criteria and in each major, and a decision will be made whether to assess a larger number of goals.

Findings 2010-2011 - Target: Met
One Course of German 3311 (Reading German Literature) was taught during this period. Students majoring in German achieved a result of 8.5.
Georgia State University
Assessment Data by Section
2010-2011 German MA
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Department is to give students preparing for the M.A. in German the opportunity to develop appropriate proficiencies in the German language, to acquaint them with the literary and cultural productions of Germany and German speaking countries, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching and research, translation and interpretation, international business, and other areas. The Department's mission, with regard to students preparing for the M.A. in German, is to encourage them to contribute to the development, organization and dissemination of research and criticism in the focus areas of German literature and culture, linguistics and language pedagogy. As a core element in the University's mission of internationalization, the Department encourages their interest and involvement in international exchanges.

Goals
G 1: Goals for 2010-11
In Fall 2010, I began as Director of Graduate Studies for MCL. Previous to my tenure as DGS, no work had been done on establishing rubrics or developing measures for direct and indirect assessment of graduate student learning in our department. MCL had already established a series of outcomes dating back to 2004-05. According to those outcomes, I began to develop a means for directly assessing student work: seminar papers, theses, non-thesis papers, written exit exams, and oral exit exams. I have accumulated this data into excel sheets which I have placed in the document repository. I have also included there the Milestone Evaluation used to assess this work. In Spring 2011, I began to develop indirect assessment measures including a survey for our MA students, a similar survey for our faculty (to gauge the difference in perception between faculty and students), and an annual report for students to inform me of their professional and academic activities relevant to our MA program (All of these documents are available in the Document Repository). These indirect assessment were put online via Google Docs to make it easier for individuals to do the survey and easier for me to track the results that were loaded directly into an Excel format. All of my focus toward assessment in 2010-11 was dedicated to the development of clear rubrics that were easy to follow and easy to use for the faculty of MCL, but that also created concrete data that would lead to clear conclusions about the ability of MCL to meet our stated goals and desired outcomes with regard to student learning. Now that I have begun to accumulate data and faculty are on board with the measures I have devised, I will be focused this year on tracking the data, assessing it, and developing an action plan through WEAVE.

Student Learning Outcomes/Objectives
SLO 1: Effective writing, communicating and editing (M: 1)
Students develop effective written communication and editing skills and follows appropriate writing conventions and formats.

SLO 2: Research and data collecting skills (M: 1)
Students are able to read and understand research, acquire skills to collect data and utilize key data sources that provide literary and linguistic information and research findings.

SLO 3: Critical thinking skills (M: 1)
Students demonstrate competence in the analysis of literary texts and the evaluation of critical thinking in literature.

SLO 4: Acquisition of knowledge (M: 1)
Students articulate key literary and philosophical concepts and theories, apply the most up-to-date facts and information in resolving literary and linguistic issues and demonstrate appropriate literary, linguistic, historical and cultural knowledge.

Measures, Targets, and Findings
M 1: Pedagogical project or research paper (O: 1, 2, 3, 4)
A committee of German professors will use the pedagogical research project, and/or research paper to evaluate mastery of the skills and learning outcomes of the M.A. candidate in German.
Source of Evidence: Senior thesis or culminating major project

Georgia State University
Assessment Data by Section
2010-2011 Health & Physical Education BSED
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
Mission / Purpose
The purpose of the Bachelor of Science Program in Health and Physical Education at Georgia State University is to develop competent leaders who provide and promote health and physical activity in P-12 schools. The theme of this program is to develop teachers as facilitators of learning. The program emphasizes broad pedagogical knowledge in health and physical education. Coursework, extensive field experience and collaboration among school and university faculty combine to develop a program that supports the professional growth of the novice educator.

Goals
G 1: Goal 1: Professional Knowledge and Skills
HPE students will understand how individuals learn and develop and can provide developmentally appropriate instructional strategies and opportunities to develop physically educated individuals based on state and national standards.

G 2: Goal 2: Planning
HPE students will plan a variety of developmentally appropriate instructional strategies to develop physically educated individuals based on state and national standards.

G 3: Goal 3: Effects on P-12 Student Learning
HPE students will understand and use assessment to foster physical, cognitive, social and emotional development of students in physical activity.

G 4: Goal 4: Clinical Practice
HPE students will demonstrate reflective practices by evaluating the effects of their actions on others and seek opportunities to grow professionally.

Student Learning Outcomes/Objectives
SLO 1: Goal 1: Professional Knowledge and Skills (G: 1) (M: 1)
Objective #1: Candidates will demonstrate effective task presentation as determined by the following criteria: a. Teacher uses refinement and extension tasks throughout the lesson to build student skill. b. Teacher uses application tasks after students have developed adequate knowledge, skill and performance. c. Teacher addresses safety concerns or potential problems. d. Teacher uses multiple teaching strategies for delivering the unit. e. Teacher generalizes important concepts for the unit to other activities.

SLO 3: Goal 3: Effects on P-12 Student learning (M: 3)
Objective #1: Candidates will demonstrate the ability to develop appropriate assessments for each domain (cognitive, affective, psychomotor) of learning. Objective #2: Candidates will demonstrate the ability to develop assessments consistent with the corresponding instructional model. Objective #3: Candidates will demonstrate the ability to use assessment data from each domain to alter lesson emphasis and/or unit plans.

Other Outcomes/Objectives
O/O 2: Goal 2: Planning (M: 2)
Objective #1: Students will demonstrate ability to develop a contextual analysis and rationale for their physical education and health units as determined by the following criteria: a. Teachers will select instructional models based on in-depth understanding and thoughtful reflection. b. Teachers will demonstrate a thorough understanding of the model, its strengths and limitations. c. Teacher will select activities that are developmentally appropriate and lead to student success and learning. Objective #2: Candidates will demonstrate ability to plan block and individual lesson plans as determined by the following criteria: a. Teacher shows relationships of activity to those areas with related concepts. b. Teacher develops a lesson that someone unfamiliar with the lesson could use the plan and know the exact expectations for the students. c. Teacher bases lesson modifications on personal research of teaching effectiveness. d. Teacher develops models based plans consistent with associated benchmarks.

O/O 4: Goal 4: Clinical Practice (M: 4)
Objective #1: Candidates will demonstrate the ability to write reflections based on data obtained from assessments used during the lesson. Objective #2: Candidate reflections will center on the impact their performance had on student learning. Objective #3: Candidate reflections will provide suggestions for improving the delivery of lesson content to enhance student learning.

Measures, Targets, and Findings
M 1: Goal 1: Professional Knowledge and Skills (O: 1)
The key assessment for this goal and corresponding objective is the student's task presentation. This assessment is evaluated in KH 4520 and again in KH 4710. In KH 4520 task presentation is evaluated by the course instructor. In KH 4710, task presentation is evaluated by the student's cooperating teacher as well as their University Supervisor responsible for observing the student teacher during their student teaching placement. A rubric is used by all faculty to evaluate the effectiveness of the student's task presentation. This evaluation is ongoing throughout both Kh 4520 and 4710. During KH 4710, task presentation is evaluated at a minimum of once every two weeks by the University Supervisor and more frequently by the student's cooperating teacher. An average is calculated across all evaluations and is reported for this key assessment.

Source of Evidence: Written assignment(s), usually scored by a rubric
**Target for O1: Goal 1: Professional Knowledge and Skills**

80% of HPE students should achieve a rating of 4 or above on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

**Findings 2010-2011 - Target: Met**

Explanation of How Task Presentation is Used in the HPE Program Task presentation is used as a measure of competence in the ability to demonstrate pedagogical content knowledge (PCK) in teaching. PCK is the ability to combine content knowledge with pedagogical knowledge to effectively instruct specific groups of learners in schools. This assessment is broad covering pedagogical skills in the teaching of content that is developmentally and functionally appropriate. Rubric for Scoring Task Presentation Unsatisfactory 1 point Needs Improvement 2 points Satisfactory 3 points Very Good 4 points Outstanding 5 points Lesson progressions use no refinement and extension activities to develop skill. Lesson consists mostly of informing and application tasks. Lesson progresses use few refinement and extension activities to develop skill. Lesson consists mostly of informing and application tasks. Care is taken to present information sequentially so that students can build on prior knowledge when asked to complete more complex tasks. Teachers check for understanding to make sure students are ready to move into more difficult content. Assessments in the lesson measure student learning to determine if students are ready to attempt more difficult skills. Identify important concepts for the unit selected. Activities selected for the unit emphasize the content knowledge related to these concepts. Use refinement, extension and application tasks throughout the lesson to build student skill. Application task are used only after students have developed adequate skill and performance will not be compromised. Safety concerns are addressed on the lesson plan. Multiple teaching strategies proposed for delivering the unit to the majority of students. Generalizes important concepts for the unit to other activity areas. Teacher shows relationships of activity to those areas with related concepts. Use meaningful refinement, extension and application tasks throughout the lesson to build student skill. Application task are used only after students have developed adequate skill and performance will not be compromised. Safety concerns are addressed on the lesson plan and potential problems are noted. Multiple teaching strategies proposed for delivering the unit to accommodate all types of learners. Generalizes important concepts for the unit to other activity areas. Teacher shows relationships of activity to those areas with related concepts. Analysis of Task Presentation A total of 78% of candidates demonstrated very good or outstanding performance in task presentation in KH 4520 (see Table 2F). In the equivalent graduate Non-T4 class (KH 7250) 60% of candidates were very good or outstanding in task presentation. This may reflect differences in both the quality and quantity of practice teaching received between these two groups of students, with undergraduate HPE candidates receiving more practice teaching than non-T4 candidates. However, task presentation scores improved after student teaching by 3% for undergraduate candidates and by 12% for graduate candidates. A total of 81% of candidates following student teaching were very good or outstanding in their task presentation skills. These findings emphasize (a) the importance of the opportunity to work with an experienced teacher in the field of physical education, (b) the increased knowledge of learners’ characteristics (e.g., emotional, physical, mental, cultural and ethnic), their needs, abilities and interests obtained by candidates through student teaching, which enabled them to improve their pedagogical content knowledge, and (c) the improved ability to relate and/or apply the task presentation to the instructional model being used.

**M 2: Goal 2: Planning (O: 2)**

Key assessments for this Program Goal and respective Objectives include: Contextual Analysis and Rationale, Block and Lesson Plans and Learning Goals and Objectives. These key assessments are incorporated into a written project completed by all HPE students during two classes (KH4520 and KH4710). Students are required to select an instructional model by which to teach HPE content to a P-12 class. As part of their models assignment, students have to write a contextual analysis describing the model they chose, which another model as well as analyze those features and characteristics of the model that impact the instructional model selected. Students then have to write learning goals and objectives for their P-12 students based on pre-assessment of student’s present level performance and develop block and lesson plans to guide the teaching of HPE content in accordance with the model selected. Models projects in KH4520 are evaluated by the course instructor. Models projects for KH 4710 are evaluated by a pair of HPE faculty. A rubric is used by all faculty across both courses to guide the grading of the model's projects.

Source of Evidence: Video or audio tape (music, counseling, art)

**Target for O2: Goal 2: Planning**

80% of HPE students should achieve a rating of 4 or above on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

**Findings 2010-2011 - Target: Met**

Explanation of How Planning Assessments are Used in the HPE Program A meaningful contextual analysis, quality block and lesson plans and developmentally appropriate and challenging goals and objectives enable the HPE faculty to determine the degree to which candidates: Have a readiness to teach and a confidence and clarity to meet their teaching goals. Are successful in stimulating their students. They do so because their lesson plans move carefully and thoughtfully from one idea –step-by-step to another idea and in good sequence of content development. Invite student participation. Limit managerial (non-learning) time. Use a variety of procedures. Ensure continuity of learning from lesson to lesson. Provide for individual differences. Strive to adapt learning material to the needs of the students. Can summarize and check outcomes Rubric for Scoring Planning Pedagogical Knowledge and Skills Unsatisfactory 1 point Needs Improvement 2 points Satisfactory 3 points Very Good 4 points Outstanding 5 points Content of unit (activity) may not match instructional model selected. Students then have to write learning goals and objectives for their P-12 students based on pre-assessment of student's present level performance and develop block and lesson plans to guide the teaching of HPE content in accordance with the model selected. Models projects in KH4520 are evaluated by the course instructor. Models projects for KH 4710 are evaluated by a pair of HPE faculty. A rubric is used by all faculty across both courses to guide the grading of the model's projects. Content of unit (activity) may not match instructional model selected. Teaching model selected is appropriate for the context in which it will be delivered. Takes into account the number, age, and skill level of students. Instructional model was selected based on understanding and reflection. Teacher candidate demonstrates an understanding of the model, its strengths and limitations. Activities are developmentally appropriate and lead to student success and learning. Instructional model was selected based on in depth understanding and thoughtful reflection. Teacher candidate demonstrates a thorough understanding of the model, its strengths and limitations. Activities are developmentally appropriate and lead to student success and learning. Block & Lesson Plans Goal for the unit are superficial and/or target extraneous topics. Unit is focused on keeping students busy rather than meaningful learning concepts. Lesson content is the same for all students, regardless of skill levels. Goal for the unit are superficial and/or target extraneous topics. Unit is focused on keeping students busy rather than meaningful learning concepts. Lesson content is the same for all students, regardless of skill levels identifies important concepts for the unit selected. Activities selected for the unit emphasize content knowledge related to these concepts. Lesson modifications are developed for students with special needs. Makes references to important concepts for the unit to other activity areas. Teacher candidate shows relationship of activity to those areas with related concepts. Identifies important concepts for the unit selected. Activities selected for the unit emphasize content knowledge related to these concepts. Lesson modifications are based on research done by the teacher candidate. Modifications for special needs students are based on research done by the teacher candidate.
M 3: Goal 3: Effects on P-12 Student Learning

Key assessment for this goal and corresponding objective is the analysis of student learning. As part of their models project in KH 4520 and KH 4710 students are required to use multiple types of assessments to determine P-12 student’s learning of HPE material. GHU students are required to retrieve, analyze their assessments and describe the changes they will and/or did make to their teaching to address the findings of their assessments. HPE candidates do very well on these assessments due to the design of the overall program (see Table 2D and 2E). The design is integrative in nature: HPE candidates start early in their curriculum in planning from unit plans to lesson plans and daily lesson plans. This is due in large part to the heavy field based series of courses that combine theory and practice starting in the junior year and are completely field based in the senior year. Thus, HPE candidates have multiple opportunities throughout the program to develop their skills in writing effective curriculum plans, unit plans, daily lesson plans, and IEP (Individual Education Plans). These plans are broad in scope across the P-12 curriculum in health, physical education, and adapted physical education. Each of the three assessments comprising planning is addressed below: Contextual Analysis and Rationale. Data from this key assessment show that 84% and 88% of the BSED and Non-T4 candidates, respectively, were very good or outstanding in writing a contextual analysis and rationale prior to student teaching. After the completion of the first half of student teaching HPE candidates had a 7% increase in the number of students obtaining a rating of very good and/or outstanding on the quality of their contextual analysis and rational for their teaching model selected. Over 91% of HPE candidates are proficient in writing a contextual analysis by the end of their course related experience in Block and Lesson Plans. Data from this key assessment show that 92% and 77% of the BSED and Non-T4 candidates, respectively, were very good or outstanding in writing block and lesson plans. The difference between these two groups reflects, in part the difference in the number of lesson plans developed, with the BSED candidates preparing a greater number of lesson plans than Non-T4 candidates in the respective classes. Consideration needs to be given to ways to increase opportunities for Non-T4 candidates to gain additional experience developing block and lesson plans. There was a 7% increase in the number of candidates obtaining very good and outstanding ratings in their block and lesson plans prior to student teaching and after student teaching. The extensive experience planning lessons full time for full classes of students has had a positive impact on the preparation of candidates in this area. Learning Goals and Objectives. Data from this key assessment show that 85% and 54% of BSED and Non-T4 candidates rate very good or outstanding in the writing of learning goals and objectives prior to student teaching. Examination by the HPE faculty needs to be given to the lower rating in this assessment by MEd Non-T4 candidates prior to student teaching. Performance in the very good and outstanding categories fell 11% after student teaching to 75%. The difference in the numbers of candidates obtaining ratings of very good and outstanding is reflective of three possible issues (a) failure to address goals and objectives in the affective domain, (b) failure to adjust the learning goals and objectives to match the lesson content and/or (c) failure to write objectives that were observable and measurable. The HPE faculty will address these issues by (a) examining how effectively we are teaching candidates to write observable and measurable goals and objectives to address all domains of learning and (b), making adjustments to the student teaching lesson plan assignment to better articulate the expectations for writing lesson plan goals and objectives.

Target for O3: Goal 3: Effects on P-12 Student learning

80% of HPE students should achieve a rating of 4 on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

Findings 2010-2011 - Target: Not Met

Explanation of How Analysis of Student Learning is Used in the HPE Program Prior to student teaching, candidates complete a field-based course (KH 4520 for BSE, KH 7250 for Non-T4) that requires them to analyze their ability to positively impact P-12 students’ learning. All candidates in the program complete one (Non-T4) or two (BSE) instructional models project/s during student teaching. The models project is a comprehensive instructional unit that includes pre- and post- assessments of major learning outcomes for P-12 students. By comparing learning gains across the span of the unit, candidates determine and analyze how they impact the student learning. It is important to recognize the impact to the novice level of understanding and using assessments. In addition, the types, and amount of assessments chosen and used are linked to and differ for by the type of instructional mode selected and the anticipated outcomes for that model. Rubric for Scoring Analysis of Student Learning Unsuccessful 1 point Needs Improvement 2 points Satisfactory 3 points Very Good 4 points Outstanding 5 points Instruction is based on personal agenda or interests of the teacher. Instruction is based on a preset agenda rather than by sampling student learning Teaching candidate can correctly interpret whether students were successful in meeting learning goals in the unit. Interests of post assessment correctly Alters block plan based on results from selected assessments. Changes in lesson emphasis are based on assessment results. Alters block plan based on results from daily assessments. Changes in lesson emphasis are based on assessment results. Analysis of Findings of Key Assessment #5

Effects on P-12 Student Learning KH 4520 was the first class students were required to conduct an analysis of student learning. A total of 64% of candidates scored very good or outstanding on their ability to demonstrate their impact on student learning (see Table 2G). KH 7250 serves as the first class in which graduate HPE non-T4 candidates completed this same assignment. Here to, 65% of candidates received a score of very good or outstanding (see Table 2G). HPE candidates completed an analysis of student learning in KH 4710 as part of their student teaching requirements. At this time, 41% of candidates received a score of very good or outstanding. This is down 23% from KH 4520 and KH7250. After analyzing the scores for students in KH 4710 it was determined that the decrease on scores could be due to several factors: KH 4520 had one evaluator, the course instructor, while KH 4710 had 4-6 evaluators (all faculty involved in student teacher supervision). The faculty has begun to take efforts to ensure reliability among raters by working in pairs to collaboratively discuss and score candidate’s projects prior to scoring projects independently. While the content of the assignments between KH 4520 and KH
4710 is similar, it is not the exact same assignment. Similarly, the expectations for the two courses may have differed as students are expected to have had previous experience with the assignment by the time they get to KH 4710. KH 4520 tends to be the only course students are enrolled in during the 4 weeks of this block. Thus, students can dedicate full time effort to the workload for this course. While students also complete KH 4710 as the only class that semester, it is 7-8 weeks long and the assignments completed as part of this course are done in conjunction with the responsibilities required of full time teaching. It is possible that this assignment, along with many other requirements of full time student teaching, may have lessened the candidate's attention on the evaluation of student learning thereby reducing the amount of effort and importance placed on this component of the project. It is also likely that candidates found themselves with limited time and other resources to gather high quality data on student learning, due to the many constraints found in physical education school settings (e.g. large classes, shortage of time, inadequate equipment, school system's schedule for standardized testing).

M 4: Goal 4: Clinical Practice (O: 4)
The key assessment for this goal and objective include lesson reflections. As part of their requirement in KH 4710 (student teaching), GSU students are required to complete several different types of reflection assignments. These assignments are both incorporated into the models project and extend beyond the models project. Students have to complete a written reflection for each lesson plan they complete during student teaching, including the lessons taught as part of their models project. GSU students also have to write a final reflection paper summarizing what they learned about themselves as teachers and what they would do differently. The HPE key assessment rubric is used by all faculty to evaluate student's reflection papers.

Source of Evidence: Portfolio, showing skill development or best work

Target for O4: Goal 4: Clinical Practice

80% of HPE students should achieve a rating of 4 on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

Findings 2010-2011 - Target: Met

Explanation of How Lesson Reflections are Used in the HPE Program Lesson reflections are used to determine the degree to which candidates: (a) develop an ability to engage in self-evaluation in assessing strengths as well as areas of need; (b) provide reexamination of personal goals and values in view of the complex demands of teaching and (c) analyze and assess personal characteristics related to teaching (e.g., perception of self and others, classroom behaviors, attitudes about children/teens and teaching, knowledge and skills), which are deemed prerequisite for becoming a successful teacher. Rubric for Scoring Lesson Reflections Unsatisfactory 1 point Needs Improvement 2 points Satisfactory 3 points Very Good 4 points Outstanding 5 points.
these assessments e.g., goals and objectives, has been used, where appropriate and relevant to adjust assignment directions and the grading rubric for the models project conducted during the second half of student teaching this Spring 2011. Changes planned for the preparation program. The current plan is to maintain the assignment selection and to review the expectations and directions for each assignment to ensure candidates are given clear guidelines. The HPE faculty will continue to work on a content matrix for the MEd program including the non-T4 candidates to ensure candidates across the two programs are gaining similar quality and quantity experiences. The content matrix will help ensure improvements of both HPE candidate performance and the preparation program in general. To this end, efforts are currently underway to revise the MEd non-T4 program to include a full 16 weeks of full time student teaching in place of the current 8 weeks of student teaching. Non-T4 candidates, who are not currently employed by a school district, will do two student teaching placements at the elementary and middle or high school, similar to that done by BSEd candidates. Several changes for the BSEd program go in effect Fall 2011 which are anticipated to improve candidate performance in the areas of pedagogical knowledge and skills. These changes include: (a) moving KH 3420 to the fall semester to be taught with KH 3200, (b) having KH 3020, 3030, and 3040 taught by full time HPE faculty, and (c) having teacher education requirements completed prior to taking courses in area G. Lastly, the HPE faculty plan to maintain and monitor the disposition data yearly to maintain current levels and will implement PDP’s where necessary to help candidates improve their performance in this area. Impact on Student Learning Summary of principal findings. Data for this assessment are taken from an instructional models project, a major unit involving planning, teaching and assessing student learning. HPE candidates scored well on this assessment with 91% of candidates obtaining a rating of satisfactory, very good or outstanding at the end of student teaching suggesting that candidates are able to alter their plans based on results from daily assessments. Steps taken to use information from assessments. Any immediate action with regard to this assessment would have had negative and detrimental effects on the performance of candidates currently in their second half of student teaching. Steps to use this information going forward are outlined below. Changes planned for the preparation program. While the assignment itself is a meaningful exercise in combining planning, teaching and assessment, the HPE faculty will have to revisit the expectations for this assignment as well as the explanations for project completion to ensure that candidates demonstrate their best and most thorough work and to better evaluate the impact on student learning. Additionally, the expectations for assessing P-12 student learning must be reviewed to better reflect the real constraints of teaching physical education in schools.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Responsible Person/Group: The HPE faculty as a group are responsible for ensuring the goals and objectives are met and the recommended changes are put in place.

Use of Assessment Results to Improve Performance
See description of the Use of Assessment Results to Improve Performance discussed in the Planned section.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since last years assessment reports, the HPE program has made the following changes: 1. We created a document revising goals and specific measurable objectives for HPE initial teacher education certification students 2. We linked key assessments from two courses to each of the goals and objectives (these two courses were in large part dictated by NCATE. Faculty had to choose a course prior to student teaching and then at the end of the program). 3. We developed a rubric to evaluate each key assessment (the 5 point scale was a requirement of the COE). These changes were made to better link and illustrate what we do in the HPE program to the NCATE report requirements for the College of Education. In the coming year, the HPE faculty will continue to revise the instructions and expectations for the respective key assessment assignments and adjust the criteria in the rubric to best reflect the expectations of the faculty.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data obtained illustrate the strength of the HPE program in terms of both its faculty and its content (see analysis reports provided). Changes and improvements are also outlined in the Use of Assessment Results report included and focus on both improving areas that are currently strong and strengthening areas that are weaker such as assessment of P-12 student learning.

ADMINISTRATIVE DEPT QUESTION 1:
What have you learned from your assessment this year? What actions did you take? What changes did you make as a result?

Changes made from last years assessments include: 1. Revision of Goals and Objectives for the HPE program 2. Clearer identification of Key assessments to document student learning 3. Development of a rubric to assess student competence on key assessments Other curriculum type changes included: 1. Requiring HPE faculty to teach classes designed for HPE students 2. Better identification of content to be taught in selected HPE classes 3. Developed a cohort to better guide students through the HPE curriculum 4. Resequecing the order in which classes are required/offered

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

Based on this years assessments, the HPE faculty have learned the following: 1. The assignment selection is meaningful and appropriate reflection of student learning and performance 2. We need to continue to monitor the order in which content classes are offered to ensure the best sequence and application of HPE material 3. We need to revisit the assignments and/or assignment requirements relating to Assessments of P-12 student learning to better ensure students understand not only how to assess but also how to report their findings and use the data to improve teaching.

ADMINISTRATIVE DEPT QUESTION 3:
The HPE faculty will work together as a group over the summer to revise selected assignments for implementation in Fall 2011 and Spring 2012. Small improvements are expected in Fall 2011 and Spring 2012. We would expect to see larger improvements within 2 years. This time lag is due to the fact that students entering Fall 2011 will have already completed an assessment class in which changes may be necessary to better prepare students for the requirements of student teaching assignments. The small changes in Fall 2011 and Spring 2012 will be anticipated due to changes in the assignment instructions and expectations rather than in curricular knowledge.

Georgia State University
Assessment Data by Section
2010-2011 Health & Physical Education MEd
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose
The Health and Physical Education Program seeks to develop competent leaders who provide and promote Health and Physical Education in P-12 schools.

### Goals

**G 1: should be committed to increasing student learning and development**
Candidates that graduate from this program should be committed to increasing student learning and development.

**G 2: should be able to use their content knowledge and expertise to help their students learn and grow**
Candidates that graduate from this program should be able to use their content knowledge and expertise to help their students learn and grow.

**G 3: should be able to work with colleagues in order to increase their content knowledge and appreciate the professional association**
Candidates that graduate from this program should be able to work with colleagues in order to increase their content knowledge and appreciate the professional associations as beneficial to their learning.

**G 4: should be able to manage and assess student learning**
Candidates that graduate from this program should be able to manage and assess student learning. Using assessment results, candidates should be able to make appropriate adjustments to their teaching to enhance student learning.

**G 5: should be able to reflects on & learns from professional experience**
After teaching, candidates should be able to reflect on their lessons, seeking ways to improve teaching effectiveness. Drawing from content and pedagogical knowledge, candidates should be able to continually seek to increase their knowledge and teaching effectiveness.

### Student Learning Outcomes/Objectives

**SLO 1: Should be able to demonstrate the ability to plan (G: 2, 4) (M: 1)**
Candidates graduating from this program should be able to demonstrate the ability to plan effective teaching units of study for K-12 students.

**General Education/Core Curriculum Associations**
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional PriorityAssociations**
2 Student promotion and progression

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

**SLO 4: should be able to plan and teach using a variety of HPE instructional models (G: 1, 2) (M: 4)**
Candidates that graduate from this program should be able to plan and teach using a variety of physical education and health instructional models.

**General Education/Core Curriculum Associations**
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2 Student promotion and progression
Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

SLO 5: should be able to conduct research & synthesize the findings in a written document (G: 3) (M: 5)

Candidates that graduate from this program should be able to conduct research on a topic of interest and synthesize the findings in a written document.

General Education/Core Curriculum Associations

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

4 Outcomes of research (3.3.1.4)

Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

Other Outcomes/Objectives

O/O 2: should be able to demonstrate the ability to teach, reflect, and make appropriate modifications for improving teaching (G: 1, 2, 4, 5) (M: 2)

Candidates that graduate from this program should be able to demonstrate the ability to teach K-12 students, reflect on their teaching effectiveness, and make appropriate modification for improving their teaching practice.

General Education/Core Curriculum Associations

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

O/O 3: should be able to systematically supervise other teachers (G: 3, 5) (M: 3)

Candidates that graduate from this program should be able to supervise other teachers (preservice or inservice) and use systematic observation data to guide their supervision feedback.

General Education/Core Curriculum Associations

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

Measures, Targets, and Findings

M 1: KH 7240 Unit plan (O: 1)

Students are required to plan a unit of instruction. The plan should contain the teaching settings, the necessary content (skills to be taught and teaching progressions), assessments used to measure student learning, provisions for feedback, and a management plan for executing/delivering the unit to their students.

Source of Evidence: Project, either individual or group

Target for O1: Should be able to demonstrate the ability to plan

Target is 75% of program completers with at least 6 of the 9 indicators in the Unit Plan Project scored as Acceptable or Target.

Findings 2010-2011 - Target: Met

75% of our students met the achievement target on the original KH 7240 indicator.
### M 2: Teaching experience (O: 2)
Teacher candidates are required to teach a unit of instruction. The unit will last approximately 6 days (elementary) or 10 days (secondary). Candidates are required to reflect on the experience, submit videos of them teaching the classes, and a summary of the experience.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O2: should be able to demonstrate the ability to teach, reflect, and make appropriate modifications for improving teaching**

Target is 75% of program completers reaching a score of at least 25 (out of 30) on the instructional portion of the KH 7250 Models Project.

**Findings 2010-2011 - Target: Met**
In Sp 2011 the model project portion of the course was 40 points. Student needed to score at least 30 points in order to be placed within the established target of 75% on this particular item. All 10 students enrolled in this class in Sp 2010 scored higher than 30 points on this assignment. Therefore, target was met.

### M 3: Project to demonstrate supervision competence (O: 3)
This project is a final project for the EDUC 8360 class. Following several exercises designed to teach them how to supervise others, teacher candidates are required to submit a final project where they actually do a live supervision with another teacher and then provide feedback to this teacher with the intent of improving teaching performance. Following the supervision experience, candidates are required to summarize the experience using data from the observation and a re-cap of the feedback provided to the person observed.

Source of Evidence: Project, either individual or group

**Target for O3: should be able to systematically supervise other teachers**
Target is 75% of program completers scoring at least 25 (out of 30) on both the digital and peer supervision projects.

**Findings 2010-2011 - Target: Partially Met**
In summer 2011 we had 9 students enrolled in EDUC 8360. The major supervision project was the live supervision project (worth 30 points). I had 5 students that earned 25 points and higher on this assignment and 4 others that earned anywhere between 20 and 24 points. Making this semester as 5 out of 9 students that met the 75% target that was set.

### M 4: KH 7250 Instructional models project (O: 4)
This project can be completed in either the health or physical education content area. Candidates are required to develop a unit of instruction using an instructional model that is most appropriate for the context in which the model will be taught. Candidates are then expected to teach the model to K-12 students and then reflect on the experience (successes, areas that could be improved, next steps to help them grow).

Source of Evidence: Project, either individual or group

**Target for O4: should be able to plan and teach using a variety of HPE instructional models**
Target is 75% of program completers scoring at least 30 (out of 40) points on the KH 7250 models project assignment.

**Findings 2010-2011 - Target: Met**
80% of our MED program completers scored at least 30 out of the 40 available points on the KH 7250 models project assignment.

### M 5: Research synthesis (O: 5)
The purpose of this assignment is to develop teacher candidate ability to develop a research question and then conduct a complete review of the extant literature on that topic. The teacher candidate writes the research synthesis and then presents it to other students in KH 7820.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O5: should be able to conduct research & synthesize the findings in a written document**
Target is 75% of program completers scoring at least 37 (out of 45) on the major paper in KH 7820.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Assessing planning skills and knowledge**
Five areas have been identified in which at least one student was assessed as "Not Met": Needs assessment, Instructional analysis, Arrangement of resources, Monitoring system, and Evaluation system. However, in most areas, only 1 or 2 students did not meet the stated criterion, so the deficiencies are not deemed to be severe. The course instructor will provide added emphasis on these areas in the future, and monitor students with formative assessments during each course.

**Established in Cycle:** 2008-2009
**Implementation Status:** Finished
**Priority:** Low

**Relationships (Measure | Outcome/Objective):**
- Measure: KH 7240 Unit plan | Outcome/Objective: Should be able to demonstrate the ability to plan

**Implementation Description:** This plan will go into effect in the fall of 2009, and remain in effect for all subsequent offerings of this course

**Projected Completion Date:** 08/2009
Assessing Unit planning
While this standard was “Met” by all but one student, there was a scattering of “Not met” by a few students on some parts of this major project. The action plan is to conduct additional guidance as students plan this project, and to use formative assessments as they develop this project—rather than use summative assessments only. Starting in the spring of 2010 (next time this course is offered), the instructor will have developed rubrics for “progress reports” and assessments on this major project.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Low

Relationships (Measure | Outcome/Objective):
  Measure: KH 7250 Instructional models project | Outcome/Objective: should be able to plan and teach using a variety of HPE instructional models

Implementation Description: This plan will go into effect with the next time this course is offered, in spring of 2009

Projected Completion Date: 12/2009
Responsible Person/Group: Dr. Gurvitch (Course instructor)
Additional Resources: none

Assessment of supervision knowledge and skills
Students are performing well in this area. The action plan is to maintain this level of performance while monitoring students in subsequent course sections

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Low

Relationships (Measure | Outcome/Objective):
  Measure: Project to demonstrate supervision competence | Outcome/Objective: should be able to systematically supervise other teachers

Implementation Description: Ongoing.

Projected Completion Date: 08/2009
Responsible Person/Group: Dr. Gurvitch (course instructor)
Additional Resources: none

Assessment of teaching
In several assessed areas at least one student was rated as "Not met": Knowledge of growth and development, Communicative skills, Use of class time, Instruction, Evaluation of students, Self evaluation, Planning/preparation, Teacher/Student interaction in class, and Class climate. While the number of areas is substantial, in most areas it was only one student who did not meet the standard; and it was almost always the same student. In the future the course instructor will conduct more formative assessments during the course, to identify students who are not meeting this standard at those times. Additional monitoring and interaction with the instructor will be planned for those students, as needed.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Teaching experience | Outcome/Objective: should be able to demonstrate the ability to teach, reflect, and make appropriate modifications for improving teaching

Implementation Description: This plan will start with the next offering of this course and continue indefinitely.

Projected Completion Date: 08/2009
Responsible Person/Group: Dr. Gurvitch (course instructor)
Additional Resources: none

Summary of 2008-2009 Assessment data
Using the selected assessments in 2008-2009, it was determined from the Faculty end-of-program ratings that 100% of all students were meeting each of the five NBPTS Standards. The data were essentially the same for the 2007-2008 program completers, indicating consistency over time. Nonetheless, the HPE graduate faculty have begun discussions to revise the major research project in the program, away from the Collaborative Action Research (CAR) Project, to participation in ongoing faculty research efforts. Those discussions will proceed through the 2009-2010 academic year.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High

Projected Completion Date: 07/2011
Responsible Person/Group: HPE Graduate faculty members, led by Mike Metzler, HPE graduate program coordinator.

Maintain and monitor
The assessment used to measure this outcome appears to be appropriate, and all completers met the stated objective. There is no need for change at this time.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: KH 7250 Instructional models project | Outcome/Objective: should be able to plan and teach using a variety of HPE instructional models

Implementation Description: maintain and monitor
Responsible Person/Group: Dr. Metzler (course instructor)
Maintain and monitor
The assessment used to measure this outcome appears to be appropriate, and all three completers scored above the stated criterion, demonstrating their ability to conduct a research literature synthesis. There is no need to change at this time.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Research synthesis | Outcome/Objective: should be able to conduct research & synthesize the findings in a written document

Implementation Description: Maintain and monitor
Responsible Person/Group: Dr. Metzler (course instructor)
Additional Resources: none

Maintain and monitor
These assessments appear to be appropriate for this outcome, and the program completers in this cohort all met the objective. There is no need for any changes at this time.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Project to demonstrate supervision competence | Outcome/Objective: should be able to systematically supervise other teachers

Implementation Description: Maintain and monitor
Responsible Person/Group: Dr. Gurvitch (course instructor)

Re-calibrate the rubric used in this assessment
The rubric currently used in this assessment appears to be too stringent, as many more of the indicators should have been scored as "Target" but going by the definitions in the rubric had to be scored as "Acceptable."

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: KH 7240 Unit plan | Outcome/Objective: Should be able to demonstrate the ability to plan

Implementation Description: Revise the scoring rubric for this assessment in KH 7240
Responsible Person/Group: Dr. Gurvitch
Additional Resources: none

Refine supervision project
I will go back to the course assignment and refine the supervision assignment to reflect a better supervision project that allows more students to be successful in completing it.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Project to demonstrate supervision competence | Outcome/Objective: should be able to systematically supervise other teachers

Projected Completion Date: 11/2012
Responsible Person/Group: Dr. Lund
Additional Resources: none

Georgia State University

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
Normal 0 false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 The vision of the Institute of Health Administration (IHA) within the J. Mack Robinson College of Business at Georgia State University is to be a premier master's level educator of future healthcare/business leaders. The program is accredited by the AACSB and CAHME (The Commission on Accreditation of Healthcare Management Education) and is ranked 34th nationally (USNEWSWR, 2009). The mission is to prepare graduates to assume managerial and leadership positions in health sector organizations through 1) A leading-edge curriculum that integrates business and health care knowledge, 2) The engagement in scholarly inquiry related to the improvement of the effectiveness, efficiency, and quality of health care services and the health care system, and 3) Providing and promoting professional service to the academic and health care communities.

Goals
**G 1: Provide CAHME specified competency areas**
Identify, analyze, and interpret economic, social, political, environmental, ethical and medical issues affecting health care organizations.

**G 3: Knowledge of the Healthcare Environment**
This relates to the 1st domain of the HLA competency model

**G 2: Business skills and knowledge**
This relates to the 2nd domain of the HLA competency model

**G 5: Develop professionalism knowledge/skills**
This is the 3rd domain of our hybrid HLA competency model

**G 4: Develop leadership knowledge and skills**
This is the 4th domain of our hybrid HLA competency model

---

**Student Learning Outcomes/Objectives**

**SLO 1: Provide CAHME specified competencies areas (M: 1, 2, 9)**
Normal 0 false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Identify, analyze, and interpret economic, social, political, environmental, ethical and medical issues affecting health care organizations.

**SLO 2: Competency in Business skills and knowledge (G: 2) (M: 2)**
Normal 0 false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Apply basic and complex business analyses to the healthcare sector. Seven subcompetency areas are identified.

**SLO 3: Competency in Knowledge of the healthcare environment (M: 2)**
Normal 0 false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 The ability to describe components of the healthcare sector and their relationships, and the ability to explain the implications of those relationships for leadership and management. | Source of Evidence: Capstone course assignments measuring mastery |

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Administrative residency and field study

The two semester health care management residency facilitates the transition from the classroom to the workplace by providing students with an entry point and extensive exposure to a health care management career. The full-time, off-campus residency assures that all graduates have an integrated experience that applies didactic knowledge in a real world health care setting.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High

#### Relationships (Measure | Outcome/Objective):

- **Measure:** % CAHME educational content areas provided | **Outcome/Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field | **Outcome/Objective:** Competency in professionalism knowledge/skills
- **Measure:** Preceptor evaluation of student knowledge areas | **Outcome/Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field | **Outcome/Objective:** Competency in professionalism knowledge/skills

- **Measure:** Student evaluation of H.A. program | **Outcome/Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field | **Outcome/Objective:** Competency in professionalism knowledge/skills

**Projected Completion Date:** 05/2014  
**Responsible Person/Group:** Dr. Andrew Sumner and Dr. Pat Ketsche

### Curriculum improvements and competencies

CAHME accreditation is requiring that all HA programs be competency based. The Institute is in the process of selecting a base competency model, modifying where appropriate, mapping the curriculum content areas to the competencies, and evaluating the measures to assess attainment of the competencies. HA has further refined our competency model for our CAHME accreditation. It consists of 4 domains, 26 competencies, and about 80 benchmarks for these competencies. AY 11-12 is our self-study year. A capstone case course HA 8680 is being implemented MayMester 2012

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High

#### Relationships (Measure | Outcome/Objective):

- **Measure:** % CAHME educational content areas provided | **Outcome/Objective:** Competency in Business skills and knowledge
- **Measure:** Competency in Knowledge of the healthcare environment | **Outcome/Objective:** Competency in Leadership knowledge and skills
- **Measure:** Competency in Leadership knowledge and skills | **Outcome/Objective:** Develop real world experience in the HA field

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
NA

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
NA

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
NA

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

HA has further refined our competency model for our CAHME accreditation. It consists of 4 domains, 26 competencies, and about 80 benchmarks for these competencies. AY 11-12 is our self-study year.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on our assessment findings, particularly our HA Advisory Board and preceptors, we have planned for our curriculum a 3 semester hour capstone case course - HA 8680. Concomitantly, we have reduced the residency requirement by 3 semester hours.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

Based on our assessment findings, particularly our HA Advisory Board and preceptors, we have planned for our curriculum a 3 semester hour capstone case course - HA 8680. Concomitantly, we have reduced the residency requirement by 3 semester hours.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?

Based on our assessment findings, particularly our HA Advisory Board and preceptors, we have planned for our curriculum a 3 semester hour capstone case course - HA 8680. Concomitantly, we have reduced the residency requirement by 3 semester hours.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

HA has further refined our competency model for our CAHME accreditation. It consists of 4 domains, 26 competencies, and about 80 benchmarks for these competencies. AY 11-12 is our self-study year. Based on our assessment findings, particularly our HA Advisory Board and preceptors, we have planned for our curriculum a 3 semester hour capstone case course - HA 8680. Concomitantly, we have reduced the residency requirement by 3 semester hours.

Georgia State University
### Mission / Purpose
To prepare professionals who enhance individual and community health through dietetics practice and to contribute to professional and scholarly knowledge in the fields of nutrition and dietetics.

### Goals

**G 1: Knowledge of Research Techniques**
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are entry-level researchers who have knowledge of research techniques needed to interpret and conduct nutrition research.

**G 2: Effective Communication Skills**
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are highly effective educators whose communication skills are appropriate for advanced practitioners in the field of nutrition/dietetics.

**G 3: Advanced Knowledge of Nutrition**
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are informed practitioners who have advanced knowledge of nutrition needed to meet the needs of clients and patients.

### Student Learning Outcomes/Objectives

**SLO 1: Design, Interpretation and Conduct of Research (G: 1) (M: 1)**
Candidates demonstrate entry-level competence in the design, interpretation, and ethical conduct of nutrition research.

**SLO 2: Demonstrate Effective Oral and Written Communication Skills Appropriate to Field of Nutrition/Dietetics (M: 8)**
Discipline-specific writing is required in all core courses. Examples of writing assignments include case studies, position papers, practice philosophies, and business plans. Students make presentations in over half of their required courses. These presentations are based on major papers and projects.

**SLO 2: Use of Current and Emergent Technologies to Enhance Nutrition Care (G: 2) (M: 2)**
Candidates demonstrate technical and scientific oral and written communication skills through the use of current and emerging technologies to enhance the practice and delivery of nutrition care in a professional and ethical manner.

**SLO 3: Comprehend Interrelationships between Macro- and Micronutrient Intakes (G: 3) (M: 3, 4)**
Candidates will comprehend the interrelationships between macro- and micronutrient intakes as they impact human health in normal and disease states.

**SLO 4: Design, Interpret, and Conduct Ethical Research (M: 6)**
Students complete a course sequence on research methods: HHS 6000, NUTR 6101. Professional courses are modeled on evidence-based practice and require students to find, evaluate, and interpret research articles.

### Other Outcomes/Objectives

**O/O 10: Graduates Develop Competencies for More Advanced Study (M: 12)**
Graduates of the program will show evidence of developing competencies and knowledge required for more advanced study (e.g., PhD, MD, or Clinical Doctorate.) in nutrition or related fields in the health professions.

### Measures, Targets, and Findings

**M 1: Research Proposal Assignment (O: 1)**
SNHP 6000 (Research Methods for Health Professionals) – Research Proposal Assignment
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Design, Interpretation and Conduct of Research**
Of the total points available, 25% of students will receive a score of >90% and 75% of students will receive a score of >80%

**Findings 2010-2011 - Target: Met**
22 of 22 students (100%) scored >90%

**M 2: Research Presentation (O: 2)**
NUTR 6012 (Orientation to Practice) – Research Presentation
### Target for O2: Use of Current and Emergent Technologies to Enhance Nutrition Care

Eighty percent of student groups will receive an evaluation of “exceeds expectations” or “meets/exceeds expectations” on all presentation evaluation criteria by the majority of the evaluators.

**Findings 2010-2011 - Target: Not Met**

3 of 5 groups (60%) received an evaluation of exceeds or meets/exceeds expectations on all presentation criteria by the majority of evaluators.

### M 3: Macronutrients Final Exam (O: 3)

NUTR 6104 (Advanced Normal Nutrition – Macronutrients) – Final Exam

**Source of Evidence:** Writing exam to assure certain proficiency level

**Target for O3: Comprehend Interrelationships between Macro- and Micronutrient Intakes**

Of the total points available on the exam, 25% of students will score >90% and 75% will score >80%.

**Findings 2010-2011 - Target: Not Met**

3 of 5 groups (60%) received an evaluation of exceeds or meets/exceeds expectations on all presentation criteria by the majority of evaluators.

### M 4: Macronutrients Quizzes (O: 3)

NUTR 6106 (Advanced Normal Nutrition – Macronutrients) – Five quizzes are given during the semester

**Source of Evidence:** Writing exam to assure certain proficiency level

**Target for O3: Comprehend Interrelationships between Macro- and Micronutrient Intakes**

Of the total points available on the quizzes, 10% of students will score >90% and 50% will score >80%.

**Findings 2010-2011 - Target: Not Met**

4 of 13 students (30%) scored >90%; 19 of 13 students (23%) scored >80%.

### M 6: Thesis Proposal Evaluation (O: 4)

Approximately one-third of students complete a thesis. Submitted thesis proposals are reviewed by a division committee using a rubric. The rubric evaluates the following areas on a scale of 0 (unacceptable) to 5 (exemplary): Research hypothesis and objectives clearly stated in the proposal, Introduction provides a historical context and literature review of the thesis topic, Materials and methods clearly stated, well-conceived, and scientifically accurate, Compliance issues, if applicable, Writing mechanics.

**Source of Evidence:** Senior thesis or culminating major project

**Target for O4: Design, Interpret, and Conduct Ethical Research**

The achievement target is a minimum score of 3 (proficient) for each area and an overall mean score of 4 (between proficient and exemplary) across all areas.

**Findings 2010-2011 - Target: Met**

All students involved in thesis research must successfully complete the CITI Training including the Social and Behavioral Responsible Conduct of Research Course 1., Basic Course module.

### M 8: Portfolio Evaluation (O: 2)

Two-thirds of students prepare and present a pre-professional electronic portfolio that contains examples of field-specific writing. These are evaluated by faculty using a rubric with a scale of 0 (unacceptable) to 3 (exemplary) on the following areas: layout, reflections, selection of artifacts, writing mechanics, and following portfolio guidelines. The achievement target is a minimum of 2 (proficient) for each area, with an overall mean score of 2.5 (proficient-exemplary) across all areas.

**Source of Evidence:** Portfolio, showing skill development or best work

**Target for O2: Demonstrate Effective Oral and Written Communication Skills Appropriate to Field of Nutrition/Dietetics**

The achievement target is 2 (proficient) for each area, with an overall mean score of 2.5 (proficient-exemplary) across all areas.

**Findings 2010-2011 - Target: Met**

Students are evaluated by a minimum of 2 faculty members to ensure competence in the areas of written communication skills appropriate to the field of nutrition and dietetics. Students in the portfolio in the past year have all met the proficiency goal.

### M 12: Successful Admission into Advanced Study Degree Program (O: 10)

Students will successfully apply and be accepted to an advanced degree program and will be successful in completing that degree. Of students who apply to an advanced program, we expect that 75% will be accepted.

**Source of Evidence:** Graduate/professional school acceptance rate

**Target for O10: Graduates Develop Competencies for More Advanced Study**

75% .......

**Findings 2010-2011 - Target: Met**

Indeed 85%
**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Additional Reviewers and Criteria**

Only 3 faculty reviewers were available to evaluate the students’ presentations. A greater number of reviewers will be recruited in the future. An additional criteria (response to audience questions) will be added to the evaluation form to evaluate understanding of the project and ability to provide a response.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Research Presentation | **Outcome/Objective:** Use of Current and Emergent Technologies to Enhance Nutrition Care
- **Projected Completion Date:** 01/2012

**Assignment Change**

The Research Proposal Assignment will be changed from a group project to an individual project to ensure that all students gain experience with all components of the research proposal process.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Research Proposal Assignment | **Outcome/Objective:** Design, Interpretation and Conduct of Research
- **Projected Completion Date:** 07/2011

**Continue to Monitor**

This is a new measure. NUTR 6106 (Advanced Normal Nutrition - Micronutrients) is a required and very challenging course.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Macronutrients Final Exam | **Outcome/Objective:** Comprehend Interrelationships between Macro- and Micronutrient Intakes

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The volume of new scientific information being created in the field of nutrition and dietetics is constantly expanding. It is impossible in the context of a masters degree program to provide students with all of the information currently in the field. Therefore, we have accepted the idea that it is important to help students understand how to access, evaluate, and use this constantly evolving new information in nutrition practice settings.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

All faculty teaching graduate courses have incorporated writing assignments into the required curriculum. All double listed courses (undergraduate/graduate) have been evaluated to assure that the graduate students in the class have higher level writing expectations than the undergraduate students. These activities all support the goal of improving writing skills in our graduate students.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

At least 2 faculty members, including our graduate program director (Dr. Anita Nucci), attended workshops offered by the Center for Teaching and Learning. The information that they acquired at these workshops have been shared with the nutrition faculty as a whole.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**

We continue to emphasize the importance of writing skills throughout our graduate curriculum, and continue to look for ways to help graduate students achieve ever higher levels of writing competence. Students, particularly those from foreign countries, who have poor writing skills are increasingly being referred to the English as a Second Language (ESL) program to help assure graduate level writing competence prior to graduation.

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report?
Annual Report Section Responses

Most Important Accomplishments for Year

Students have written business plans with the Sweet Auburn Market to improve their marketing strategy and with the Student Center to expand the lactation facilities on campus. The Division of Nutrition is now working with the GSU Child Development Center (CDC) to assist with meeting the national nutrition benchmarks for child care facilities. Nurse Practitioners from the Emory Children’s Center (ECC) Developmental Progress Clinic approached the Division of Nutrition to request assistance with nutrition assessment strategies for their population. Students began supervised practice experience at the ECC in May 2011 and a student will begin thesis work with the ECC in fall 2011.

Challenges for Next Year

Three new faculty will be joining the Division of Nutrition in fall 2011, as replacements for existing faculty lines. An additional (4th) faculty position will also be added with 2CI funding in the area of obesity research. These faculty will need to be oriented to the policies and procedures related to the division and students as well as to courses related to their areas of interest.

Modifications in Intended Outcomes

None.

Modifications in Measurement Methods

We continue to incorporate new standards of professional practice from the American Dietetic Association into the supervised practice syllabi (e.g. long-term care), which is an integral part of our graduate coordinated program in dietetics.

University-wide Committee Participation

Graduate faculty are active on the Senate and on other university committees including Administrator Evaluation, Search committees, Radiation Safety, and Biological Safety.

Publications and Presentations

Both faculty and students have had numerous refereed journal publications and presentations at scientific meetings.

International Activities

Several faculty (Dr. Vijay Ganji, Dr. Dan Benardot, Dr. Anita Nucci) have given presentations at international conferences. Two students completed a supervised practice rotation in India. The students observed traditional medicine practices for 2 weeks and then worked with a physician assisting with nutrition assessments for an additional 2 weeks. Dr. Murugi Ndirangu continues to conduct research on HIV and food security in Kenya.

Contributions to Student Retention

We have a remarkably high rate of student retention in the graduate program. Coordinated Program graduate students have the opportunity to have supervised practice experiences in one or more areas of personal interest.

Service to the External Community

Faculty hold numerous committee positions in professional organizations including The American Dietetic Association, The Georgia Dietetic Association, The American College of Sports Medicine, The United States Olympic Committee, U.S. Figure Skating, The national Center for Human Performance and The American Society of Parenteral and Enteral Nutrition. Dr. Jana Kicklighter served as a leader for the 2011 Future Connections Summit on Dietetic Practice, Credentialing, and Education. Barbara Hopkins is now a site reviewer for the Commission on Accreditation for Dietetics Education (CADE) and is working with the Commission on Dietetic Registration (CDR) as a test writer. Barbara Hopkins is also the incoming President Elect of the Georgia Dietetic Association (GADA).
Cathy McCarroll was awarded the Outstanding Dietitian of the Year and is the Chair of the nominating committee for GADA. Dan Benardot serves on the Sports Medicine and Sports Science Committee of US Figure Skating.

### Mission / Purpose
The Department of History at Georgia State University is committed to excellence in the advancement of knowledge through the study of various aspects of humanity's recorded past. Some members of the department explore the rise and fall of empires, while others describe the everyday lives of men and women. The department is interested in every period of the past and all parts of the world. The department also seeks to advance knowledge by examining the principles and theories that influence the writing of history, seeking to understand the forces that have structured human life and the ideas that have shaped the way people perceive and experience their worlds. The department is concerned with change and continuity within societies, and interactions among cultures. The department pays particular attention to the effect of perspectives and values because the discipline of history involves the interpretation of findings, not just the collection of facts. Through dedicated research, teaching, and service, the department's work benefits students, colleagues, policy makers, and the public.

### Goals
**G 1: Content and Skills**
The department expects students to develop a scaffolding of knowledge about the past and an aptitude for the critical thinking, research and writing skills of a historian. They should be able to read primary sources and scholarly writing, engage competing interpretations of the past, marshal evidence to support reasoned arguments, and develop the empathy needed to understand the past. They should also be able to compare national histories and understand transnational developments, cultivating the habits needed to think critically in a global age.

### Student Learning Outcomes/Objectives

**SLO 1: Contemporary Issues in Historical Perspective**
Students will demonstrate an understanding of contemporary issues posed as questions in final exams or other assignments in the survey course that require analysis of the origins and meaning of contemporary multicultural, global, and international questions.

Relevant Associations: This is an expression of the department's ongoing commitment to transnational analysis of U.S. and World History, as well as our collective emphasis on race, gender, religion, ethnicity, class, sexuality, and other constructed categories of identity that shape political, economic, social, cultural, legal, diplomatic, and religious history.

**SLO 2: Historiography**
Students, knowing that History entails the critical interpretation of data, demonstrate awareness of conflicting interpretations of the same data.

**SLO 3: Interdisciplinary Awareness**
The student knows how to appreciate, critique, and use material from other fields such as geography, economics, history of art, literature, psychology, statistics, dependent upon their area of specialization

**SLO 4: Comparative/Global/Transnational Perspective**
The student is able to compare historical developments/problems across cultural/geographic boundaries, appreciating how temporal, cultural, and spatial dimensions affect historical responses

**SLO 5: Professional Values**
Student is able to employ methods of historical research and modes of historical discourse that emphasize high standards of fidelity to evidence, approaches to obtaining, interpreting, and applying historical knowledge, and an appreciation and articulation of the indebtedness historians have to the work of others.

**SLO 6: Professional Skills**
Student is able to use effectively such resources as the library, archives, and oral interviews. He/she demonstrates computer skills appropriate to the discipline. Student is able to evaluate the relative worth of different types of evidence - (textual, material, media, oral, quantitative, and statistical, and visual); to exchange information and ideas and present arguments persuasively; to evaluate and critique different historical perspectives and explanations within a conversational setting; to listen and learn from others; and to write clearly, economically, imaginatively and persuasively about facts, issues, and interpretations. The student is able to document sources properly.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
**Designate new specific skills for assessment**
Identify more precisely the discipline-relevant student critical thinking skills that can be measured in assessments and can provide data for ongoing tracking of student progress.
### Establish new measurements to assess student learning

Develop an assessment rubric for the specific critical thinking skills identified in Action 1 that can measure student progress across assignments over the course of the semester.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** Finished
- **Priority:** Medium
- **Implementation Description:** October 08
- **Responsible Person/Group:** Freshmen Studies Committee

### Establish pilot program for new assessments.

Upon completion of the new rubric during the fall semester, conduct a pilot assessment, gathering select results for fall courses to ensure the suitability of the new standards for a more thorough investigation in Spring 2009.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** Finished
- **Priority:** Medium
- **Implementation Description:** October 08
- **Responsible Person/Group:** Freshmen Studies Committee

### Adopt pilot assessment

Upon completion and analysis of fall pilot assessment, make adaptations needed to the rubric. With the adapted rubric gather a full range of data on student critical thinking skills in History for the spring semester 2010.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Early Fall semester meeting
- **Projected Completion Date:** 08/2009
- **Responsible Person/Group:** Freshmen Studies Committee (supervises core survey courses)

### Designate new skills to measure for assessment

Identify more precisely the discipline-relevant student critical thinking skills that can be measured in assessments and can provide data for ongoing tracking of student progress.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 08/2009
- **Responsible Person/Group:** Freshmen Studies Committee

### Establish a rubric

Develop an assessment rubric for the specific critical thinking skills identified in Action 1 that can measure student progress across assignments over the course of the semester.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 08/2009
- **Responsible Person/Group:** Freshmen Studies Committee

### Establish pilot program for new assessments

Upon completion of the new rubric during the fall semester, conduct a pilot assessment, gathering select results for fall courses to ensure the suitability of the new standards for a more thorough investigation in Spring 2009.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 08/2009

**Mission / Purpose**

Description: The Department of History at Georgia State University is committed to excellence in the advancement of knowledge through the study of various aspects of humanity’s recorded past. Some members of the department explore the rise and fall of empires, while others describe the everyday lives of men and women. The department is interested in every period of the past and all parts of the world. The department also seeks to advance knowledge by examining the principles and theories that influence the...
writing of history, seeking to understand the forces that have structured human life and the ideas that have shaped the way people perceive and experience their worlds. The department is concerned with change and continuity within societies, and interactions among cultures. The department pays particular attention to the effect of perspectives and values because the discipline of history involves the interpretation of findings, not just the collection of facts. Through dedicated research, teaching, and service, the department's work benefits students, colleagues, policy makers, and the public. Established in Cycle: 2005-2006 Active Through: 2009-2009 Entry Status: Final Last Updated By: Migration Tool on 10/13/2008 Established By: Migration Tool on 10/13/2008

### Goals

**G 1: Professional skills and values**
The history department works to ensure that its majors know how to access, use, and evaluate various kinds of historical evidence to determine relative worth, while teaching students professional values regarding fidelity to sources and how to build upon the scholarship of others.

**G 2: Interdisciplinary and Comparative Perspectives**
The history department is committed to helping students develop an awareness of historiography -- that is differing interpretations or debates over particular historical questions -- while encouraging interdisciplinary and comparative approaches to the past.

### Student Learning Outcomes/Objectives

**SLO 1: Professional Skills (G: 1) (M: 1)**
The history student is able to evaluate the relative worth of different types of evidence (textual, material, media, oral, visual, quantitative and statistical); to listen to and learn from others while exchanging information and ideas; to evaluate and critique different historical perspectives and explanations; to present arguments persuasively within a conversational setting as well as a written format; and to write clearly, economically, imaginatively and persuasively about historical facts, issues, and interpretations. The history student is able to use effectively sources that come from libraries, archives, and oral interviews, and to document sources properly while demonstrating computer skills appropriate to the discipline.

**SLO 2: Historiography (G: 2) (M: 1)**
The history student, knowing that history asks questions of evidence, can demonstrate an awareness of how differing questions result in conflicting interpretations of the same evidence over time.

**SLO 3: Interdisciplinary Awareness (G: 2) (M: 1)**
The history student understands the benefits of interdisciplinary approaches to studying the past by recognizing contributions from such fields as anthropology, archaeology, art history, economics, geography, literature, philosophy, political science, psychology, sociology and statistics.

**SLO 4: Comparative/Global/Transnational Perspective (G: 2) (M: 1)**
The history student is able to compare historical developments and problems across cultural and geographical boundaries, while appreciating how temporal, cultural, and spatial dimensions affect historical responses.

**SLO 5: Professional Values (G: 1) (M: 1)**
Aware of the debt all historians have to the scholarship of others, the history student engages in historical research and discourse that maintains fidelity to evidence while being tolerant of alternative approaches to obtaining, interpreting, and applying historical knowledge.

### Measures, Targets, and Findings

**M 1: capstone course seminar paper (O: 1, 2, 3, 4, 5)**

During 2011, the Department of History Undergraduate Studies Committee evaluated 18 final research papers written for the Department of History Capstone Course Hist 4990 taken from classes offered in Spring 2010, Fall 2010, and Spring 2011. The papers were evaluated on a 1-4 scale with 1 meaning no evidence of outcome, 2 meaning some evidence of outcome, 3 meaning met expectations, and 4 meaning exceeded expectations. Five Standard Learning Outcomes were assessed with 1LO being professional skills, 2LO being historiography, 3LO being interdisciplinary awareness, 4LO being comparative/global/transnational perspective, and 5LO being professional values. The results are listed under 2010-2011. For 2010, the history department undergraduate studies committee read a sample of sixteen student research papers written for Hist 4990 in Spring, Summer, and Fall 2009. We assessed the extent to which these students seemed to have mastered our stated outcomes. Each paper was evaluated on a one to four scale for the five outcomes/objectives, with one meaning no evidence of this outcome, two meaning some evidence of the outcome but below expectations, three meaning met expectations, and four meaning exceeded expectations.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Professional Skills**
The department's target is for 70% of our graduating students to score three (met expectations) or four (exceeded expectations) in this area.

**Findings 2010-2011 - Target: Met**

In the assessment of 1LO (professional skills), 13 out of 18 papers either met or exceeded expectations. The remaining 5 all showed some evidence. Therefore for 1LO, the department set a target of 70 percent of students either having met (#3) or exceeded (#4) this goal and with 13 out of 18 papers doing so (7 at #4 exceeded and 6 at #3 met), we've hit the target.

**Target for O2: Historiography**
The department's target for 60% of our graduating students to score three or four in this area.
Findings 2010-2011 - Target: Met
In the assessment of 2LO (historiography), 10 out of 18 papers either met or exceeded expectations. The remaining 8 all showed some evidence. Therefore the department set a target of 60 percent of students either having met (#3) or exceeded (#4) this goal and with 10 out of 18 papers doing so (3 at #4 exceeded and 7 at #3 met), we've just barely hit the target.

Target for O3: Interdisciplinary Awareness
The department's target is for 60% of our graduating students to score three or four in this area.

Findings 2010-2011 - Target: Met
In the assessment of 3LO (interdisciplinary), 10 out of 18 papers either met or exceeded expectations. Of the remaining 8, 7 showed some evidence but 1 showed none. Therefore for 3LO, the department set a target of 60 percent of students either having met (#3) or exceeded (#4) this goal and with 10 out of 18 papers doing so (6 at #4 exceeded and 4 at #3 met), we've just barely hit the target.

Findings 2010-2011 - Target: Not Met
In the assessment of 4LO (comparative/global/transnational), 9 out of 18 papers either met or exceeded expectations. Of the remaining 9, 7 showed some evidence but 2 showed none. Therefore for 4LO, the department set a target of 70 percent of students either having met (#3) or exceeded (#4) this goal and with 9 out of 18 papers doing so (4 at #4 exceeded and 5 at #3 met), we've fallen short of our target.

Findings 2010-2011 - Target: Met
In the assessment of 5LO (professional values), 16 out of 18 papers met or exceeded expectations with the remaining 2 showing some evidence of doing so. Therefore for 5LO, the department set a target of 70 percent of students either having met (#3) or exceeded (#4) this goal and with 16 out of 18 papers doing so (4 at #4 exceeded and 12 at #3 met), we've hit the target in the bull's eye.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

comparative/global/transnational
The majority of our student papers performed well in this area. Those that did not treated topics that made comparison difficult. We plan to circulate our department's standards to remind students and faculty that this is one of our defined goals.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Comparative/Global/Transnational Perspective

Projected Completion Date: 03/2010
Responsible Person/Group: Denise Davidson

Historiography
We plan to do more to emphasize historiographical debates in our upper-division courses. Students learn about historiography in HIST 3000, Introduction to Historical Studies. Many of the intervening courses drop the issue of historiography to a large extent. We hope that by assigning more short research-type assignments in our upper-division courses, our students will become more comfortable with talking about historiographical debates in their seminar papers. We have also changed to pre-requisites for HIST 4990, our capstone course, to require at least two 4000-level classes prior to enrolling in the class. By ensuring that all our majors get some experience doing research and writing about historiography in our 4000-level classes, we hope that their performance will improve in 4990.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Historiography

Implementation Description: We have already submitted the proposal to change the prerequisites for 4990 in the course catalog, and the department agreed with the idea of working on emphasizing research skills and historiography in our upper-division courses.

Projected Completion Date: 09/2010
Responsible Person/Group: Denise Davidson

Interdisciplinary Awareness
We seem to be doing quite well in terms of interdisciplinary awareness as all but two of our sample group satisfied the criteria. We continue to emphasize different disciplines and their impact on history in HIST 3000.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Professional Skills
To improve our students' level of preparedness for the capstone seminar paper, we have agreed as a department to do more to emphasize research skills in our upper-division courses. We will be organizing a pedagogy workshop on research and writing assignments for these classes later this semester.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: capstone course seminar paper | Outcome/Objective: Professional Skills

- **Projected Completion Date:** 03/2010
- **Responsible Person/Group:** Denise Davidson

Professional Values
We hope that the changes described under in action plan for the "historiography" outcome will have a similar effect in this area. We are going to emphasize more research-type assignments in our 4000-level classes so as to give students more research and writing experience in the classes that lead up to 4990. This experience should help them to develop the skills and values described here.

The faculty have agreed to attend a workshop on research assignments during the upcoming semester.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: capstone course seminar paper | Outcome/Objective: Professional Values

- **Projected Completion Date:** 03/2010
- **Responsible Person/Group:** Denise Davidson

Revision of outcomes
The history department's undergraduate studies committee plans to revise our outcomes in the upcoming year. Currently, we have a total of ten, five for the core courses and five for the upper division courses. However, our majors need to demonstrate mastery of both the lower-division and upper-division outcomes. We also noticed some redundancy in our current five upper-division outcomes.

Our plan is to combine the ten outcomes for both levels and then collapse some to create eight for the upper-division courses. We believe that these revisions will allow us to track better our students' level of mastery of the desired outcomes. Once we have revised the outcomes, we will create a new, more detailed rubric for the assessment process.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: capstone course seminar paper | Outcome/Objective: Comparative/Global/Transnational Perspective

- **Implementation Description:** The history department's undergraduate studies committee will work on revising the outcomes in Fall 2010 and present them to the department as a whole in early Spring 2011. They should be finalized in time for the 2011 assessment cycle.
- **Responsible Person/Group:** Denise Davidson, soon to be replaced by Glenn Eskew.

Re-evaluate assessment tool as appropriate measurement for desired outcome

While Hist 4900 is designed as the department's capstone course, it is set up as a research class whose subject is determined by the individual faculty member assigned to teach it each semester. The rough parameters of the course require the student to do work in primary sources and then write a research paper arguing an original thesis about a subject chosen through conversations between the student and the professor. The course and the paper's subject might or might not include a Comparative/Global/Transnational Perspective. Given the need to use archival sources in the Atlanta area, some professors design their Hist 4900 classes around American topics that do not engage Comparative/Global/Transnational themes, thereby making the subjects of the student papers from these classes poor products for assessing student understanding of a Comparative/Global/Transnational Perspective. Consequently some other method of measurement needs to be developed or this Learning Outcome changed.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Mission / Purpose

The mission of the program of graduate education in History of Georgia State University is to prepare students at the MA level for professional activities in History and related fields. This involves not only the mechanics of research but abetting such personal qualities as accuracy, honesty, thoroughness, and evenhandedness. The Department demands active learning, involving the students in reading and participation in seminars, in research and analysis of primary sources, and in the presentation of the resulting finding in written and verbal formats that adhere to recognized professional standards. Graduates of GSU's graduate History program will be able to analyze conflicting information and viewpoints, write clearly and communicate ideas, find reliable evidence for judgments about human actions and motives, and place particular events in a wider context or historical pattern. Graduates are prepared not only to be competent historians and teachers but to function successfully in the larger community, both within and outside the academy. The Department thus seeks to prepare students for future careers, for the responsibilities of citizenship in a
democratic society, and for the uncertainties that one encounters in relations to others.

Goals

G 1: Prepare student to research, write and teach history

G 2: Assist students in becoming active, interdisciplinary learners

G 3: Academic Honesty
Nurture in students the qualities of honesty and accuracy.

G 4: Global Perspective
Help students understand the links between history and the larger world

Student Learning Outcomes/Objectives

SLO 1: Professional Skills (M: 1)
The student demonstrates skills essential to conducting and presenting historical research, including techniques and methods of archival/primary material research, synthesis and analysis of secondary material, as well as organization and historical argumentation. All students should show outcomes at the high-competent level (rank of 4 on assessment instrument) or sophisticated level (rank of 5 on assessment instrument).

Other Outcomes/Objectives

O/O 2: Histiography
The student shows awareness of existing arguments and historical literature – empirical, methodological, and theoretical – pertaining to a specific project or problem of historical research.

O/O 3: Interdisciplinary Awareness
The student is aware of the relations between historical research/writing and work in the other disciplines, especially those in the humanities and social sciences, and is able to employ theories and methods from these disciplines where appropriate to enrich historical research/writing.

O/O 4: Comparative/Global/Transnational Perspectives
The student can situate historical developments/problems across cultural/geographical boundaries, appreciating how temporal, cultural, and spatial dimensions affect historical responses.

O/O 5: Professional Values
Students must become aware of and internalize professional standards for research, argumentation, and use of secondary works. This involves, among other questions, defining and recognizing plagiarism and the unattributed use of the work of colleagues and students.

Measures, Targets, and Findings

M 1: Assessment Instrument (O: 1)
Source of Evidence: Evaluations

Details of Action Plans for This Cycle (by Established cycle, then alpha)

General Examinations
During academic year 2010-2011 elements of the rubric/instrument will be applied to all general examination at the completion of MA coursework.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: End of Spring 2010 semester
Projected Completion Date: 04/2010

Rubric Testing
The graduate assessment instrument is now in use in all graduate courses. It will be modified with a broader range of numerical ranking and two additional questions in 2010-2011 to enhance accuracy and encourage instructors to better evaluate their progress in teaching students to meet outcomes and objectives.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: The end of Spring semester 2010
Mission / Purpose
The mission of the program of graduate education in History of Georgia State University is to prepare students at the PhD level for professional activities in History and related fields. This involves not only the mechanics of research, teaching, and writing but developing such personal qualities as accuracy, honesty, thoroughness, and evenhandedness. The Department demands active learning, involving the student in reading and participation in seminars, in research and analysis of primary sources, and in the presentation of the resulting findings in written and verbal formats that adhere to recognized professional standards. Graduates of GSU graduate History program are prepared not only to be competent historians and teachers but also to function successfully in the larger community, both within and outside the academy.

### Mission / Purpose

What do students need to learn to prepare for careers in the hospitality field? Students are expected to understand the business processes essential to profitable, sustainable operations. Every hospitality course incorporates quality service principles including service to internal and external stakeholders and continuous improvement principles. Because this is a labor-intensive industry, there is a dedicated Hospitality Human Resources course and HR processes are covered in most hospitality courses (Hospitality Law - employment law; Cost Control and Financial Analysis - employee productivity; for example). Every hospitality course incorporates ethical decision-making and business practices. Technology is also a fundamental in the courses in terms of understanding how technology is used in any industry segment from hotels to restaurants to venues and event management. Technology applications that support the delivery of quality service are the focus. Marketing in the hospitality curriculum focuses on marketing principles for services rather than tangible goods. Industry specific courses (hotel management, restaurant management, event management, private club management, tradeshows and meetings management, for example) cover the trends and issues of that segment as well or organizational structure, functional areas, metrics used and service standards. The hospitality curriculum consists of seven required major courses and a variety of elective courses from which majors can select three (9 hours.) Hospitality majors are required to work at least 570 hours in industry-related positions. To certify that these hours have been worked, students are required to take “Hospitality Work Study” (HADM 4900) for which there is no fee and no credit hours. Students complete a work portfolio as part of this process.

Prior feedback on assessment reports has stated that the reports try to cover too much and are difficult to understand. The focus of the 2010-2011 report will relate to three overall, general programmatic goals and the outcomes that are directly connected to these goals. These outcomes are linked to the School of Hospitality’s senior-level courses, HADM 4100 (Cost Control and Financial Analysis) and HADM 4800 (Hospitality Strategic Management.) Since the lower-level courses are pre-requisites to HADM 4100 and HADM 4800, it is logical to expect the lower-level outcomes will have been achieved and will be built upon in HADM 4100 and HADM 4800. HADM 4100 and HADM 4800 require a composite of knowledge and skills reflecting the other five hospitality courses.

**PLEASE NOTE:** I have tried repeatedly to delete the measures of 4, 5 and 6 and have not been successful.

### Goals

**G 2: Students will be prepared with business knowledge and service skills.**

Students will be prepared for the hospitality industry with business knowledge and service skills to optimize the success of companies and corporations.

**G 3: Students will develop the analytical skills to evaluate the business environment of today and the future.**

Students will be prepared with analytical skills in all functional areas to evaluate the business environment of today and of the future.

**G 1: Students will be prepared for management and leadership positions in the hospitality industry.**

Hospitality students will have the knowledge and skills in all major functional areas to be effective managers and leaders in hospitality businesses.

### Student Learning Outcomes/Objectives

**SLO 1: Apply strategic management principles in hospitality operations (G: 1, 2, 3) (M: 1)**

Students will be able to apply strategic principles to hospitality business operations in maximizing the accomplishment of the organization’s goals and objectives and ultimately the organization’s mission and vision. Strategic principles will include the degree to which the company or corporation is including sustainable practices into their operational mission and goals.

**SLO 2: Apply principles of financial analysis in the evaluation of business results (G: 1, 2, 3) (M: 1, 3)**

Students will be able to apply concepts and principles of financial analysis including cost control techniques and evaluate their
Measures, Targets, and Findings

M 1: Projects (O: 1, 2)

Students are assigned an industry-based project in "Hospitality Strategic Management" (HADM 4800). This project is designed to integrate key competencies across the major functional business areas including human resources, law, marketing, finance and operations. HADM 4800 has a prerequisite of completing 12 hours in hospitality courses so the expectation is that students have the foundation to strategically think and plan in a real-world business environment. The project for fall 2010, which will be what is included in this assessment, involved an analysis of the vacating Commerce Club space. Student groups did several walk-throughs of the space, analyzed the room dimensions and set-up capacities, reviewed financial records and did a competitive analysis of the area. The groups did a formal presentation at the end of the semester including a SWOT analysis of the space, environmental scanning, recommendations for short-term and long-term use. The expectation was that the feasibility pre-work was clearly tied to the resulting SWOT and environmental analysis and the recommendations including cost analysis.

Source of Evidence: Project, either individual or group

Target for O1: Apply strategic management principles in hospitality operations

80% of the class will demonstrate understanding of the components of strategic planning including a comprehensive analysis of current business performance and projections for the future based on factual data.

Findings 2010-2011 - Target: Met

Approximately 88% of the students in the course demonstrated the application of business analysis skills in evaluating the current performance of the operation (the Commerce Club), the changing operating environment (appeal of a club/restaurant/event venue in this section of downtown), competition, demographic changes of target customers/guests. This information was effectively used in formulating a strategic plan, including designated components, that was incorporated into presentations to the University on possible uses for the space.

Target for O2: Apply principles of financial analysis in the evaluation of business results

At least 80% of the students will incorporate financial analysis components into the strategic planning process including present and future data.

Findings 2010-2011 - Target: Met

Approximately 85% of the students demonstrated the ability to analyze the financial performance of the involved operation and make sound fiscal recommendations for future uses of the space.

M 3: Business Computerized Simulation (O: 2)

HADM 4100 (Hospitality Cost Control and Financial Analysis) utilizes a simulated business experience involving operating a foodservice operation. The simulation incorporates knowledge from all major functional areas - finance, law, human resources, marketing, operations.

Source of Evidence: Capstone course assignments measuring mastery

Target for O2: Apply principles of financial analysis in the evaluation of business results

75% of the class will demonstrate application of the material on financial analysis and cost control in effectively operating the simulated restaurant and achieving profitability or demonstrating analytical skills of how to turn their unprofitable restaurant into a profitable operation. The simulation allows the tracking of student groups who achieved profitability and those who operated restaurants who were not profitable. The corresponding written analyses of what improvements/corrections to make are equally as important.

Findings 2010-2011 - Target: Met

In Spring 2011, the semester targeted for assessment for this course 80% of the class demonstrated the application of analytical skills in finance and cost control with the simulated restaurant project. This included the groups who achieved profitable results as well as those who identified what needed to change to turn their operation into a profitable one.

M 4: Work Experience Portfolio

Hospitality majors are required to work a minimum of 750 hours in the industry prior to graduation. The Work Experience Portfolio is an in-depth analysis of this work experience. It requires for the student to evaluate key business components (service levels - internal and external; human resource approaches - dealing with diversity, optimizing employee satisfaction and effective teamwork; financial results - potential areas for growth, areas of waste, pricing structure; strategic principles - clear mission, goals and objectives and responding to the environmental changes.) In addition to evaluating the work experience, students are asked to make recommendations for improvement (analysis and application of knowledge). For 2008-2009, the topic of sustainability was added to the work portfolio in order to address green operational practices and what the business could be doing.

Source of Evidence: Portfolio, showing skill development or best work

M 5: Employer Evaluation of Work Experience

All hospitality majors are required to have a minimum of 750 hours of industry experience. Employers submit a written structured evaluation for each student under their supervision. These evaluations are regularly grouped and analyzed in terms of positive and negative feedback. The evaluation form (which is provided to employers) includes 12 factors: 1. Knowledge of areas involved in job position 2. Technical skills 3. Interpersonal and service skills with customers 4. Interpersonal and service skills with co-workers 5. Interaction with supervisors/managers 6. Written communication abilities 7. Oral communication abilities 8. Ability to accept feedback; Willingness to learn 9. Work habits (attendance, punctuality, accuracy) 10. Demonstration of potential leadership abilities 11. Credibility/ethical behavior 12. Work performance was reflective of what would be expected of a major in hospitality

Source of Evidence: Employer survey, incl. perceptions of the program
M 6: Food Safety/Sanitation Certification

HADM 3401/3402 (Food Production Lab) requires that all students complete a standardized food safety/sanitation exam during the semester of that course.

Source of Evidence: Standardized test of subject matter knowledge

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Approval of ACPHA Annual Report
The School of Hospitality is also accredited by ACPHA (Accreditation Commission for Programs in Hospitality Administration.) The annual report will be submitted for 2011 which includes a submission of updates on learning objectives and assessment progress. The action step is to submit a comprehensive, up-to-date report to feedback for continual improvement. The deadline for the submission of this report is January 2012.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: Medium
- Projected Completion Date: 12/2011
- Responsible Person/Group: Debby Cannon

Coordination among faculty
Through enhanced faculty communication and coordination, the department will focus on achieving more consistency between sections of the same course taught by different faculty.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: Medium
- Projected Completion Date: 05/2012
- Responsible Person/Group: Debby Cannon

Curriculum Review Process
During the 2011/2012 academic year, the hospitality faculty will conduct, at minimum, a one-day meeting to comprehensively review all course content, methods of assessing student learning and a review of specific teaching techniques. These topics were discussed at the annual hospitality faculty retreat on 8/19/11 but a more in-depth and longer session is needed.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Projected Completion Date: 04/2012
- Responsible Person/Group: Debby Cannon to facilitate but all faculty would be involved.

Hospitality Business Simulation
The business simulation exercise used in HADM 4100 will be evaluated and most likely replaced with a newer, more industry-based version. The professor currently teaching HADM 4100 will retire in June 2012 so the new faculty member will be involved in this decision.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Business Computerized Simulation
  - Outcome/Objective: Apply principles of financial analysis in the evaluation of business results
- Projected Completion Date: 07/2012
- Responsible Person/Group: Dr. Dave Pavesic

Utilization of Smith Travel Research Data
Smith Travel Research data has been purchased to be incorporated into specific hospitality courses including HADM 3010, HADM 3310 and HADM 4100. Faculty will be trained in how to use these data and integration into courses will start fall 2011 and will expand in spring 2012.

- Established in Cycle: 2010-2011
- Implementation Status: In-Progress
- Priority: Medium
- Projected Completion Date: 01/2012
- Responsible Person/Group: Diana Barber, Paul Breslin, Soon-Ho Kim

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

There have been no significant changes in the assessment process from last year’s report. We did hold more meetings and had more discussions between faculty teaching different sections of the same course to build more consistency in course content.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The data indicate that our majors do not perform as well in quantitative courses. This was reflected in HADM 4100 - Cost Control and Financial Analysis. The School purchased an excellent learning resource this past spring from Smith Travel Research (STR). It provides extensive hotel quantitative data (average rates, occupancies, RevPar, etc.) that can be incorporated into a variety of hospitality courses. The faculty have discussed using the STR data in courses that are taken prior to HADM 4100 in order to start building the quantitative knowledge base. STR data will be used in HADM 3010 (Perspectives of the Hospitality Industry - a required course) as well as HADM 3310 (Hotel Management, an elective) as well as HADM 4100.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?
1) More meetings between faculty teaching different sections of the same course to develop more consistent learning objectives and course content.
2) Review of syllabi to determine necessary course content overlap, unnecessary overlaps and gaps in content.
3) Identification of teaching resources such as the data-based Smith Travel Research tools to use in classes. Determination that overlap is needed for quantitative knowledge base between HADM 3010, HADM 3310 and HADM 4100.

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment this year (2010-2011)?
1. Similar to the previous year in terms of quantitative courses.
2. Still issues with writing skills and great variance between written assignments within and between different courses.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
1) Revamping some of the quantitative-based course content to introduce in earlier courses, i.e. HADM 3010.
2) Purchase and initiation of data-based teaching tools from Smith Travel Research.
3) Introducing multi-step writing processes for projects and lengthy assignments including submitting the title and having it approved, submitting topic outline, submitting annotated outline, submitting draft of paper, submitting final paper. This will help structure written projects and will also eliminate any possible cheating or purchasing of papers.
The MS-HRM graduate will understand and effectively apply employment law. The student will be able to identify relevant case issues and laws, draw reasonable conclusions, and recommend policies to address the situation.

SLO 4: Employee Relations (G: 4) (M: 7, 8)
The MS-HRM graduate will be able to understand and effectively choose and design performance management techniques that enhance employer productivity and minimize bias.

Measures, Targets, and Findings

M 1: Alternatives and Rationale in Compensation (O: 1)
Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Inclusion of and appropriateness in MGS 8390 project of strategic alternatives and rationale for various recommended strategies.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Compensation System Design
80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 1 Rubric to randomly selected project reports. Learning Outcome 1: Understand and apply job analysis, description, evaluation, and performance appraisal. Fails to Meet Standard (1) Meets Standard (2) Exceeds Standard (3) Measure 1: Accurate description and usage guides for job analysis, descriptions, evaluation, and performance appraisal. Student cannot accurately describe and explain usage of job analysis, description, evaluation, and performance appraisal. Student can accurately describe and explain usage of job analysis, description, evaluation, and performance appraisal. Student can accurately describe and explain usage in detail of job analysis, description, evaluation, and performance appraisal.

Findings 2010-2011 - Target: Not Met
62% of HR/MS students met or exceeded 2.0 on all criteria.

M 2: Intergration of All Compensation Components (O: 1)
Inclusion, integration, and proper usage in MGS 8390 project of all components of compensation systems, including job evaluation, market wage analysis, pay structures, and compensation budgets.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Compensation System Design
At least 80% of the students scoring higher than 2.0 on the criteria in the Measure 2 Rubric. To be scored from randomly selected project reports. Learning Outcome 1: Understand and apply job analysis, description, evaluation, and performance appraisal. Fails to Meet Standard (1) Meets Standard (2) Exceeds Standard (3) Measure 2: Accurate description and usage guides for dispute resolution and HR policy formulation techniques. Student cannot accurately describe and explain usage of dispute resolution and HR policy formulation techniques. Student can accurately describe and explain usage of dispute resolution and HR policy formulation techniques. Student can accurately and in detail describe and explain usage of dispute resolution and HR policy formulation techniques.

Findings 2010-2011 - Target: Not Met
66% of MS/HR students met or exceeded 2.0 on all criteria.

M 3: Job Analysis and Description (O: 2)
In the final project in MGS 8360 students will Normal 0 false false false EN-US X-NONE X-NONE include a clear explanation of job analysis procedure and resulting job description and job specification.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Comprehensive Employee Recruitment
Learning Outcome 2: Understand and apply all components of recruitment and selection system Below Standard (1) Meets Standard (2) Exceeds Standard (3) Measure 3: Inclusion and proper usage of job analysis, job descriptions, and job specifications Student uses 2 of 3 bases for selection system (job analysis, description, and specification) in inadequate detail Student uses 3 of 3 bases for selection system (job analysis, job description, and specification) in good detail Student uses 3 of 3 bases for selection system in extensive detail

Findings 2010-2011 - Target: Not Met
62% of MS/HR students met or exceeded 2.0 on all criteria.

M 4: Behavioral Interview Questions (O: 2)
Normal 0 false false false EN-US X-NONE X-NONE Inclusion of detailed behavioral interview questions, and related scoring system and administrative guidelines, and work sample and other tests for an employee recruitment and selection system.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Comprehensive Employee Recruitment
80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 4 Rubric to randomly selected project reports. Learning Outcome 2: Understand and apply all components of recruitment and selection system Does not meet Standard (1) Meets the Standard (2) Exceeds the Standard (3) Measures 4: Inclusion and proper usage of behavioral interviews, work sample, and other selection tests Student designs behavioral interviews or work samples, but not more than 2 selection tests with no validation. Student designs behavioral interviews and work samples, and validation for both. Student designs behavioral interviews, work samples, and additional selection tests with validation for all methods.

Findings 2010-2011 - Target: Not Met
66% of HR students met or exceeded 2.0 on all criteria.

**M 5: Law Issue Identification (O: 3)**

Normal 0 false false false EN-US X-NONE X-NONE Identification of relevant case issues and laws and expression of reasonable conclusions.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Employment Law**

80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 5 Rubric to randomly selected case analyses. Learning Outcome 3: Understand and effectively apply employment law Standard Not Met (1) Standard Met (2) Standard Exceeded (3) Measure 5: Identification of relevant issues, laws, and reasonable conclusions Incomplete or incorrect identification of issues, laws, or conclusions Complete and correct identification of most issues, laws, and conclusions Complete and correct identification of all issues, laws, and conclusions

**Findings 2010-2011 - Target: Not Met**

71% of MS/HR students met or exceeded 2.0 on all criteria.

**M 6: Clarity of HR Policies - Legal Requirements (O: 3)**

Students will be able to produce appropriate and clearly-written HR policies in response to situations and laws.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Employment Law**

80% of HR students will meet or exceed a 2.0 average on all criteria. Measurement will be done by applying Measure 6 Rubric to randomly selected project reports. Rubric for Measuring Learning Outcomes – MS in HRM Criterion 3: Understand and effectively apply employment law Falls to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 6. Appropriate and clearly-written HR policies A few ambiguous or inappropriate HR policies Most appropriate and clearly-written HR policies All appropriate and clearly-written HR policies

**Findings 2010-2011 - Target: Not Met**

64% of HR/MS students met or exceeded 2.0 on all criteria.

**M 7: Performance Management Concepts (O: 4)**

Student will be able to discuss appropriate use of performance management tools and the advantages and disadvantages of each as exhibited in answers to exam questions in MGS 8300.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Employee Relations**

80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 7 Rubric to randomly selected project reports. Learning Outcome 4: Understand and effectively apply performance management and employee relations techniques Does not meet standard (1) Meets the standard (2) Exceeds the standard (3) Measure 7. Discuss performance management and employee relations techniques and advantages and disadvantages of each Can discuss some performance management and employee relations techniques and some advantages and disadvantages of each Can discuss most performance management and employee relations techniques and most advantages and disadvantages of each Can discuss almost all performance management and employee relations techniques and most advantages and disadvantages of each

**Findings 2010-2011 - Target: Not Met**

52% of MS/HR students met or exceeded 2.0 on all criteria.

**M 8: Employee Relations and Productivity (O: 4)**

Normal 0 false false false EN-US X-NONE X-NONE Students will be able to effectively and accurately discuss how usage of performance management and employee relations techniques will enhance employer productivity.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Employee Relations**

80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 8 Rubric to randomly selected project reports. Learning Outcome 4: Understand and effectively apply performance management and employee relations techniques Does not meet the standard (1) Meets the standard (2) Exceeds the standard (3) Measure 8. Discuss how performance management and employee relations techniques enhance employer productivity Cannot discuss how performance management and employee relations techniques enhance employer productivity Can discuss in some detail how performance management and employee relations techniques enhance employer productivity Cannot discuss in extensive detail how performance management and employee relations techniques enhance employer productivity

**Findings 2010-2011 - Target: Not Met**

Faculty rating of 1.6/3.0 51% of HR students met or exceeded 2.0 on all criteria.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Compensation System Design**

With respect to the first learning outcome, the student's ability to design comprehensive compensation system, two actions will be taken: 1. In MGS 8390 add a homework assignment to teach linkages among competitive conditions, strategies, and compensation strategies. Evaluate after next offering. 2. In MGS 8390 provide a written check sheet of items to be included for project to students. Evaluate after next offering.
Employee Recruitment and Selection
With respect to the second learning outcome, the student's ability to understand and effectively apply all major components into a comprehensive employee recruitment and selection system, two actions will be taken:
- In MGS 8360 offer students the opportunity to use instructor feedback to revise job analysis, job description, and job specification. Evaluate after next offering.
- In MGS 8360 offer students the opportunity to use instructor feedback to revise questions, scoring system, work sample, and other tests. Evaluate after next offering.

Performance Management
With respect to the fourth learning outcome, the student's ability to understand and effectively apply performance management and employee relations techniques, two actions will be taken:
- Add a 30-minute lecture in MGS 8300 and provide additional supplemental handouts on performance management. Evaluate after next offering.
- Add a homework assignment in MGS 8300 on linking performance management to specific employer productivity measures. Require students to find research results for performance management techniques. Evaluate after next offering.

Added Case Example
Provide sample of case analysis with issues, laws, and conclusions. Evaluate after next offering.

Added Exercises in Legal Policy
Add an additional in-class exercise to requiring students to write policy responses. Discuss and critique in class. Evaluate after next offering.

Compensation Class Content Change
Add one hour class time to review competitive conditions, strategies, and compensation strategies. Evaluate after next offering.
Compensation Review Checklist
One week prior to due date, review in class written check sheet of items to be included for project to students. Evaluate after next offering.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

- Measure: Integration of All Compensation Components | Outcome/Objective: Compensation System Design

Projected Completion Date: 12/2010
Responsible Person/Group: Lucy McClurg
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Add language skills for international students
Continue with action plan items from last year, but in addition refer international students with language problems to the University assistance office for additional training. Revisit and reevaluate to see if training affects student performance in compensation.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Alternatives and Rationale in Compensation | Outcome/Objective: Compensation System Design

Implementation Description: Refer students who need additional language skills to University Center for help.
Projected Completion Date: 12/2012
Responsible Person/Group: All HR instructors
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Check coverage of topics in all HR core classes
Ensure job analysis and job description are taught in all HR core classes and covered at a minimum of one hour in each class. Give students more practice in all classes.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Job Analysis and Description | Outcome/Objective: Comprehensive Employee Recruitment

Implementation Description: Check coverage of topics in all HR core classes.
Projected Completion Date: 12/2012
Responsible Person/Group: All core course instructors.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Continue emphasis on topic in MGS 8360
Continue emphasis on topic in MGS 8360. Since several different instructors have taught the course recently, not all are including the topic. Check syllabi to ensure coverage.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Behavioral Interview Questions | Outcome/Objective: Comprehensive Employee Recruitment

Implementation Description: Check coverage of topic across instructors to be sure it is being emphasized in all classes.
Projected Completion Date: 12/2012
Responsible Person/Group: Instructors of MGS 8360
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Continue in-class exercises
Continue to use in-class exercises and critiques of policy statements written in class. Give immediate feedback and opportunity for correction and additions.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Clarity of HR Policies - Legal Requirements | Outcome/Objective: Employment Law

Implementation Description: Continue to use in-class rewrite exercise on policy statement formulation.
Projected Completion Date: 12/2012
Responsible Person/Group: Instructors in all core HR classes.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Expand use of components to all core HR classes
Reinforce performance measurement processes by including in all HR core classes and emphasizing usage and linkages to all aspects of HR in each class. Not all instructors are covering this topic in detail.

Established in Cycle: 2010-2011
Help international students with language skills
Continue to apply CTW practices to the MGS 8320 course and work with international students and others who need basic language help. Refer students to University Center for help on basics. Continue to require rewriting in MGS 8320.

Increase class time on topic
Add 30 minutes to lecture on integrating components, including addition of short in-class activity.

Increase lecture time in MGS 8300 on performance management
Instructors in MGS 8300 will increase class lecture time by 30 minutes on performance management tools and techniques. The class time will be taken away from lecture materials that are adequately covered in the text.

Performance Management Improvement
Add 15 minutes to lecture in MGS 8300, evaluate results in the next cycle.

Provide individual feedback about behavioral interviewing
Students in MGS 8360 will be provided examples and in-class activities concerning selection measures, including behavioral interviews. Class time will be spent giving feedback to them about the quality and legality of their behavioral interview questions and related scoring system.
**Relationships (Measure | Outcome/Objective):**

**Measure:** Behavioral Interview Questions | **Outcome/Objective:** Comprehensive Employee Recruitment

**Implementation Description:** Instructor of MGS 8360 will prepare an in-class activity requiring students to design behavioral interview questions and a scoring system. Student work will be compared and class time used to critique student products.

**Projected Completion Date:** 06/2012

**Responsible Person/Group:** Instructor of MGS 8360.

**Additional Resources:** None

**Budget Amount Requested:** $0.00 (no request)

---

**Work from check sheet for Compensation projects**

Instructor of MGS 8390 will provide to students three weeks before due date a check sheet for compensation term projects (design of a compensation system). Class time will be spent reviewing the components and requirements.

**Established in Cycle:** 2010-2011

**Implementation Status:** Planned

**Priority:** High

**Relationships (Measure | Outcome/Objective):**

**Measure:** Integration of All Compensation Components | **Outcome/Objective:** Compensation System Design

**Implementation Description:** Instructor of MGS 8390 will prepare a check sheet for all items to be included and discussed in the term project (design of a compensation system). Students will work from this check list and items will be discussed in class.

**Projected Completion Date:** 01/2012

**Responsible Person/Group:** Instructor of MGS 8390

**Additional Resources:** None

**Budget Amount Requested:** $0.00 (no request)

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We included more PTI’s in our assessment processes. We adjusted class times and activities to better focus on our objectives rather than just trying to cover all the topics in class. We discussed at greater length how we might use some of the techniques used in CTW courses in our courses to help us achieve our objectives.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We tried to steer students into elective courses that would help us reach our objectives instead of allowing them to take courses that are somewhat removed from the degree program (e.g., Personal Financial Planning). We adjusted class times and assignments to be sure that repetition and overlap was constructive and appropriate rather than wasteful. We set out plans to offer HR Field Study in the fall and discussed how we could best prepare students for that class in our other HR classes.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Instructional Technology MS**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The mission for the Master of Science degree in Instructional Technology is to provide students with the basic knowledge, skills, and attitudes required to perform as an instructional technologist. An instructional technologist is a professional educator who can combine knowledge of the learning process, knowledge of instructional systems theory, and knowledge of various forms of media and learning environments to create the most effective and efficient learning experiences. The program is designed for individuals interested in working with adults in a wide variety of training and development areas such as those found in education, business and industry. We seek to further this mission by enhancing and facilitating learning and problem solving through the systemic and systematic application of creative thought.

---

**Goals**

**G 1: Produce Educators in Learning Technologies in P-16**

The MS program aims to increase the number and improve the skills of practitioners in the Learning Technologies in the P-16 education sector.

**G 2: Produce Educators in Learning Technologies in Corp**

The MS program aims to increase the number and improve the skills of practitioners in the Learning Technologies in the corporate, government and military sectors.

---

**Student Learning Outcomes/Objectives**
SLO 1: Has knowledge of Instructional Development (G: 1, 2) (M: 1, 2, 3, 4, 5)
Candidates demonstrate the knowledge, skills, and dispositions to develop instructional materials and experiences by applying principles, theories, and research related to print, audiovisual, computer-based, and integrated technologies.

SLO 2: Has knowledge of Instructional Systems Design (G: 1, 2) (M: 1, 2, 3, 4, 5)
Candidates demonstrate the knowledge, skills, and dispositions to design conditions for learning by applying principles, theories, and research associated with instructional systems design, message design, instructional strategies, and learner characteristics.

SLO 3: Has knowledge of Instructional Systems Management (G: 1, 2) (M: 1, 2, 3, 4, 5)
Candidates demonstrate knowledge, skills, and dispositions to plan, organize, coordinate, and supervise instructional technology by applying principles, theories and research related to project, resource, delivery system, and information management.

SLO 4: Utilizes Processes & Resources for Learning (G: 1, 2) (M: 1, 2, 3, 4, 5)
Candidates demonstrate the knowledge, skills, and dispositions to use processes and resources for learning by applying principles, theories, and research related to media utilization, diffusion, implementations, and policy-making.

SLO 5: Has knowledge of Instructional Systems Evaluation (G: 1, 2) (M: 1, 2, 3, 4, 5)
Candidates demonstrate knowledge, skills, and dispositions to evaluate the adequacy of instruction and learning by applying principles, theories, and research related to problem analysis, criterion-referenced measurement, formative and summative evaluation, and long-range planning.

Measures, Targets, and Findings

M 1: Portfolio (O: 1, 2, 3, 4, 5)
All majors create an electronic portfolio of their work and present it to the faculty at the end of their program. The portfolio should provide evidence of accomplishment in all program areas. Faculty will compile a summary rating of all relevant standards based on the portfolio.

Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Has knowledge of Instructional Development
95% of completers will demonstrate target knowledge.

Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through portfolio development and presentation.

Target for O2: Has knowledge of Instructional Systems Design
95% of completers will demonstrate target knowledge.

Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through portfolio development and presentation.

Target for O3: Has knowledge of Instructional Systems Management
95% of completers will demonstrate target knowledge.

Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through portfolio development and presentation.

Target for O4: Utilizes Processes & Resources for Learning
95% of completers will demonstrate target knowledge.

Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through portfolio development and presentation.

Target for O5: Has knowledge of Instructional Systems Evaluation
95% of completers will demonstrate target knowledge.

Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through portfolio development and presentation.

M 2: Internship Report (O: 1, 2, 3, 4, 5)
All students complete an internship and prepare a written report of their activities, particularly noting how the activities relate to their program of study. Faculty will compile a summary rating of all relevant standards based on the report and on input provided by the internship supervisor.

Source of Evidence: Field work, internship, or teaching evaluation

Target for O1: Has knowledge of Instructional Development
95% of completers will demonstrate target knowledge.
### Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through internship reports.

### Target for O2: Has knowledge of Instructional Systems Design
95% of completers will demonstrate target knowledge.

### Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through internship reports.

### Target for O3: Has knowledge of Instructional Systems Management
95% of completers will demonstrate target knowledge.

### Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through internship reports.

### Target for O4: Utilizes Processes & Resources for Learning
95% of completers will demonstrate target knowledge.

### Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through internship reports.

### Target for O5: Has knowledge of Instructional Systems Evaluation
95% of completers will demonstrate target knowledge.

### Findings 2010-2011 - Target: Met
100% of completers demonstrated target knowledge through internship reports.

### M 3: End of Course Assessments (O: 1, 2, 3, 4, 5)
Students complete tests and other written assessments for each course in their program of study.

Source of Evidence: Capstone course assignments measuring mastery.

### Target for O1: Has knowledge of Instructional Development
95% of completers will achieve at least 80% in every course.

### Findings 2010-2011 - Target: Met
100% of completers achieved at least 80% in every course.

### Target for O2: Has knowledge of Instructional Systems Design
95% of completers will achieve at least 80% in every course.

### Findings 2010-2011 - Target: Met
100% of completers achieved at least 80% in every course.

### Target for O3: Has knowledge of Instructional Systems Management
95% of completers will achieve at least 80% in every course.

### Findings 2010-2011 - Target: Met
100% of completers achieved at least 80% in every course.

### Target for O4: Utilizes Processes & Resources for Learning
95% of completers will achieve at least 80% in every course.

### Findings 2010-2011 - Target: Met
100% of completers achieved at least 80% in every course.

### Target for O5: Has knowledge of Instructional Systems Evaluation
95% of completers will achieve at least 80% in every course.

### M 4: Comprehensive Exam (O: 1, 2, 3, 4, 5)
All students in this program complete a written comprehensive exam. The exam is prepared for each student individually, based upon his or her course work and career goals. Faculty will compile a summary rating of all relevant standards based on the exam.

Source of Evidence: Comprehensive/end-of-program subject matter exam.

### Target for O1: Has knowledge of Instructional Development
95% of completers will achieve "meets" or "exceeds" on all standards.
Findings 2010-2011 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

**Target for O2: Has knowledge of Instructional Systems Design**
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

**Target for O3: Has knowledge of Instructional Systems Management**
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

**Target for O4: Utilizes Processes & Resources for Learning**
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

**Target for O5: Has knowledge of Instructional Systems Evaluation**
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

**M 5: Analysis of Curriculum and Syllabi (O: 1, 2, 3, 4, 5)**
Faculty will review syllabi and other curricular materials for currency and depth.
Source of Evidence: Curriculum/syllabus analysis of course to program

Findings 2010-2011 - Target: Met
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

**Target for O1: Has knowledge of Instructional Development**
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2010-2011 - Target: Met
100% of syllabi and curriculum materials adequately reflected current practice in the field, minor revisions were made to syllabi in order to achieve this objective.

**Target for O2: Has knowledge of Instructional Systems Design**
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2010-2011 - Target: Met
100% of syllabi and curriculum materials adequately reflected current practice in the field, minor revisions were made to syllabi in order to achieve this objective.

**Target for O3: Has knowledge of Instructional Systems Management**
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2010-2011 - Target: Met
100% of syllabi and curriculum materials adequately reflected current practice in the field, minor revisions were made to syllabi in order to achieve this objective.

**Target for O4: Utilizes Processes & Resources for Learning**
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2010-2011 - Target: Met
100% of syllabi and curriculum materials adequately reflected current practice in the field, minor revisions were made to syllabi in order to achieve this objective.

**Target for O5: Has knowledge of Instructional Systems Evaluation**
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2010-2011 - Target: Met
100% of syllabi and curriculum materials adequately reflected current practice in the field, minor revisions were made to syllabi in order to achieve this objective.

| **Focus Online Degree Program On Corporate Settings** |
| Focus the online MS degree on students interested in business and corporate sectors. |
| Established in Cycle: 2009-2010 |
| Implementation Status: Planned |
| Priority: High |
| Relationships (Measure | Outcome/Objective): |
| Measure: Analysis of Curriculum and Syllabi | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
| Measure: Comprehensive Exam | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
| Measure: End of Course Assessments | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
| Measure: Internship Report | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
| Measure: Portfolio | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
| Projected Completion Date: 08/2011 |
| Responsible Person/Group: All faculty |
| Additional Resources: none |
| Budget Amount Requested: $0.00 (no request) |

| **Implement Certificate in Online Education Program** |
| We implement our add-on certificate program in online education. |
| Established in Cycle: 2009-2010 |
| Implementation Status: Planned |
| Priority: High |
| Projected Completion Date: 08/2010 |
| Responsible Person/Group: All faculty |

| **Increase Recruitment Efforts** |
| We will actively recruit new students and maintain our high admission standards. |
| Established in Cycle: 2009-2010 |
| Implementation Status: In-Progress |
| Priority: High |
| Implementation Description: Ongoing |
| Responsible Person/Group: All faculty |

| **Investigate Certificate Program for P-12** |
| In order to recruit more students and better serve those students in the region, we begin continue exploring the possibility of a certificate program in expectation that the state will approve a teaching certificate in instructional technology. |
| Established in Cycle: 2009-2010 |
| Implementation Status: Planned |
| Priority: High |
| Projected Completion Date: 08/2012 |
| Responsible Person/Group: All Faculty |
| Additional Resources: One clinical Faculty line to start. |
| Budget Amount Requested: $65,000.00 (recurring) |

| **Online Degree Program** |
| In order to increase enrollment and better serve students in the region, we offer our MS degree online. We continue to grow this degree program. |
| Established in Cycle: 2009-2010 |
| Implementation Status: Planned |
| Priority: High |
| Relationships (Measure | Outcome/Objective): |
| Measure: Analysis of Curriculum and Syllabi | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
| Measure: Comprehensive Exam | Outcome/Objective: Has knowledge of Instructional Development |
| Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning |
Virtual Presentation of Exit Portfolio
Students create their exit portfolio and virtually present it to the instructional technology faculty and their peers

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective): Measure: Portfolio | Outcome/Objective: Utilizes Processes & Resources for Learning
Implementation Description: Use of learning and communication resources such as Elluminate and uLearn.
Projected Completion Date: 08/2012
Responsible Person/Group: All faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Our students consistently demonstrate a high level of competency across all standards. In addition, the masters students exhibited a high proficiency in their coursework, portfolios, and comprehensive exams. These related to the action plans, i.e Revise Curriculum to Include Current Content and Continue to Monitor Curriculum.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
By the time students take the comprehensive exam and portfolio, as well as complete their internship, they have demonstrated that they are able to fuse together concepts gathered in the classes taken. They have also demonstrated that they have knowledge on how these concepts can be practically applied in a professional setting.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
N/A

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
N/A

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A
# Georgia State University

## Assessment Data by Section

**2010-2011 Instructional Technology PhD**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

### Mission / Purpose

The mission for the doctoral program in instructional technology is to provide specialization for instructional technologists in all aspects of the field, including instructional design, alternative instructional delivery systems, research, management, evaluation, and consulting for the betterment of education and human development. We seek to bring about this mission by enhancing and facilitating learning and problem solving through the systemic and systematic application of creative thought.

### Goals

**G 1: Produce Researchers in Learning Technologies**
The IT Ph.D. program will produce graduates capable of conducting world-class research in Learning Technologies.

**G 2: Produce Educators in Learning Technologies**
The IT Ph.D. program will produce graduates capable of world-class teaching in Learning Technologies.

### Student Learning Outcomes/Objectives

**SLO 1: Understands and uses technology (M: 1, 2, 3, 4)**
The Ph.D. student understands and uses technology as a tool of inquiry for teaching and learning.

**SLO 3: Demonstrates research expertise (M: 1, 2, 3, 4, 5, 6)**
The Ph.D. student demonstrates a general research competence including expertise in at least one research paradigm.

**SLO 4: Engages in scholarship (M: 1, 2, 3, 4, 5, 6)**
The Ph.D. student engages in scholarship and creates new knowledge about teaching and learning in his/her major discipline of inquiry.

**SLO 5: Understands foundations of education (M: 1, 2, 3, 4, 5, 6)**
The Ph.D. student develops an in-depth understanding of forces such as historical, social, political, psychological, and economic influences that affect education today.

**SLO 6: Develops a professional identity (M: 1, 2, 3, 4)**
The Ph.D. student develops an identity as a professional and contributes to a professional community of scholars and educators.

**SLO 7: Develops an extended knowledge base (M: 1, 2, 3, 4, 5, 6)**
The Ph.D. student develops an extended knowledge base that is associated with or that supports the major discipline of inquiry.

### Other Outcomes/Objectives

**O/O 2: Develops leadership for the profession (M: 1, 2, 3, 4)**
The Ph.D. student provides leadership through teaching and professional development within his/her major discipline of inquiry.

### Measures, Targets, and Findings

**M 1: Dissertation (O: 1, 2, 3, 4, 5, 6, 7)**
Each student will write and successfully defend a dissertation based on a study which he or she conducts. The dissertation must be approved by the dissertation committee members, the department chair, and the college dean. Faculty will compile a summary rating of the relevant standards based on the dissertation.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Understands and uses technology**

95% of program completers will meet or exceed all standards.

### Findings 2010-2011 - Target: Met

100% of program completers met or exceeded all standards.

M 4: Ph.D. candidacy review (O: 1, 2, 3, 4, 5, 6, 7)
A summary rating derived from residency report, comps, internship and dissertation performance will be determined for each standard. This rating will occur at the time the student is admitted into candidacy.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Understands and uses technology
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

Target for O2: Develops leadership for the profession
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

Target for O3: Demonstrates research expertise
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

Target for O4: Engages in scholarship
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

Target for O5: Understands foundations of education
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

Target for O6: Develops a professional identity
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

Target for O7: Develops an extended knowledge base
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

Findings 2010-2011 - Target: Met
100% of students admitted into candidacy met or exceeded all standards.

M 5: Written Comprehensive Examination (O: 3, 4, 5, 7)
Each student will complete a written comprehensive examination, prepared specifically for him or her by the members of his or her committee. The examination will take place over three days and will not exceed four hours per day in length. Faculty will compile a summary rating of the relevant standards based on the written exam.
Source of Evidence: Comprehensive/end-of-program subject matter exam

Target for O3: Demonstrates research expertise
95% of students will achieve meets or exceeds on all standards.

Findings 2010-2011 - Target: Met
100% of program completers achieved "meets" or "exceeds" on all standards on the first attempt.

Target for O4: Engages in scholarship
95% of students will achieve meets or exceeds on all standards.

Findings 2010-2011 - Target: Met
100% of program completers achieved “meets” or “exceeds” on all standards on the first attempt.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Improve Post Completion Jobs

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Monitor student completers and mentor them through the job search process.
- **Responsible Person/Group:** All IT Faculty
- **Additional Resources:** none
- **Budget Amount Requested:** $0.00 (no request)

#### Increase Number of Program Completers

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Increase student monitoring in order to improve graduation rates.
- **Projected Completion Date:** 09/2012
- **Responsible Person/Group:** All IT Faculty.
- **Additional Resources:** none
- **Budget Amount Requested:** $0.00 (no request)

#### Increase Research Opportunities
We will seek to engage all Ph.D. students more actively in ongoing faculty research projects prior to their dissertation research.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Curriculum and Syllabi Analysis | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Engages in scholarship
- Measure: Dissertation | Outcome/Objective: Demonstrates research expertise
- Develops an extended knowledge base | Engages in scholarship
- Measure: Oral Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
- Engages in scholarship
- Measure: Ph.D. candidacy review | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Engages in scholarship
- Measure: Residency Report | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Engages in scholarship
- Measure: Written Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
- Engages in scholarship

Implementation Description: Ongoing
Responsible Person/Group: All faculty

Monitor Standards
Program faculty will maintain the current design and implementation of the program, and continue to monitor the stated student learning outcomes during the 2010-2011 academic year. Due to the increasingly rapid pace of technology evolution and the core function of technology in this program, it may be necessary to shorten the syllabus review cycle to bi-annually. Additionally, faculty may need additional resources in the future to fund professional development in order to stay current with technological change.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Curriculum and Syllabi Analysis | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Engages in scholarship
- Measure: Dissertation | Outcome/Objective: Demonstrates research expertise
- Develops an extended knowledge base | Develops leadership for the profession | Engages in scholarship
- Measure: Oral Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
- Understands and uses technology | Understands foundations of education

Implementation Description: Ongoing
Responsible Person/Group: IT Unit
Additional Resources: Funding for Professional Development
Budget Amount Requested: $3,000.00 (recurring)

Recruit Full-time Students
As we transition to becoming a more research oriented institution we need to recruit more full-time Ph.D. students to assist in that effort. We have added a couple of additional full-time Ph.D. students and we will continue to pursue additional students.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium
Implementation Description: Ongoing
Responsible Person/Group: All faculty

Seek External Funding
In order to support more full-time Ph.D. students we will seek more external funding for faculty research.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Curriculum and Syllabi Analysis | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Develops leadership for the profession | Engages in scholarship
- Measure: Dissertation | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Develops leadership for the profession | Engages in scholarship
- Measure: Oral Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
- Engages in scholarship
- Measure: Ph.D. candidacy review | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Develops leadership for the profession | Engages in scholarship
- Measure: Residency Report | Outcome/Objective: Demonstrates research expertise
- Develops a professional identity | Engages in scholarship
- Measure: Written Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
- Engages in scholarship

Implementation Description: Ongoing
Responsible Person/Group: All faculty

Review Program Length
In order to improve time to completion rates and enhance the research skills and marketability of our graduates, we will review the entire Ph.D program with an eye to shortening it overall and including more research experience. Such a change is now possible thanks to recent revisions in college policy.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: In-process.
Responsible Person/Group: All Faculty
Additional Resources: none
### Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements -** What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

N/A

**CTW Reflection 2: Assessment -** What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

N/A

**CTW Reflection 3: Needs -** What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

N/A

**CTW Reflection 4: Overall Reflection -** What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

N/A

### ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

At this time we have not made changes to the assessment process. Based on last years' findings our process is working efficiently. We will continue to assess in the same manner, but are considering program changes designed to enhance research competency and promote higher matriculation rates.

### ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We increased the number of students graduating with their Ph.D. This was directly attributable to our plan for moving students more rapidly through the program and reducing attrition. We are on track to continue this pace for next year. Additionally we began transitioning to a cohort model for the Ph.D. program through once a year admission. This has the effect of 1.) making sure Ph.D. only classes are large enough to make given the university's current standards for class size, and 2), providing a more stable support group for students once they are in the program. We anticipate further revising the Ph.D. program to increase the emphasis on practical research experience and to continue to encourage students to make real and consistent progress toward degree completion.

### ADMINISTRATIVE DEPT QUESTION 1:

Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

### ADMINISTRATIVE DEPT QUESTION 2:

What have you learned from your assessment this year (2010-2011)?

N/A

### ADMINISTRATIVE DEPARTMENT QUESTION 3:

What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

**Georgia State University**  
**Assessment Data by Section**  
**2010-2011 International Business MS**  
*As of 12/13/2010 04:11 PM EST*  
*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

### Mission / Purpose

The MIB program is designed for individuals who aspire to organizational or entrepreneurial leadership and/or managerial positions across functional areas in firms with significant presence or activity in international markets. The primary objectives of the MIB program are to: develop an in-depth understanding of the international business environment, build capabilities to deal effectively in international markets, extend functional skills to deal with managerial issues in the global marketplace, demonstrate proficiency in a foreign language, develop intercultural awareness and sensitivity, develop team skills to be contributing members of an effective global team, and complete an extended work experience outside of the student's native country.

### Goals

**G 1: Goal 1: Understanding of International Business Environment**

Full Description: Students will have the ability to identify and analyze strategic and operational opportunities or problems in a specific
international setting. The measurements may incorporate case histories, analytical papers, market studies, etc.

G 2: Goal 2: Country Market Analysis
Full Description: Students will be able to conduct systematic country market analysis from the perspective of potential exporters, investors, global procurers, and other firms. Students will identify the factors that contribute to global market opportunity, identify diverse sources of data, and systematically analyze it in order to generate practical recommendations for managers.

G 3: Goal 3: Extend Functional Skills in International Operations
Full Description: Students will be able to demonstrate their functional knowledge to analyze a case in the international context. They will be able to delineate the impact on business practice of international and cross-cultural issues. Students will demonstrate expertise in such areas as: Cross-Cultural and Collaborative Skills; Global Supply Chain Management; Global CSR; International Marketing and Positioning; Global Financial System Analysis; Global Legal Environment; International Entrepreneurship.

G 4: Goal 4: Second Language Proficiency
Full Description: The students need to be proficient in a second language in order to conduct business. If the students do not have proficiency in a second language before they are admitted to the MIB program, they must take language courses while they are in the program before they are granted the degree.

G 5: Goal 5: Team Skills
Full Description: Students will engage in a team based project in the Capstone Course that will be self-assessed, team-assessed, and faculty assessed.

G 6: Goal 6: Extended Work Experience
Full Description: Students will complete an internship providing foreign business experience, cultural awareness and functional expertise. Students will file monthly internship reports that consist of three parts: a) examples of foreign business experience, b) examples of comparisons for cultural differences, and c) particular examples of tasks and responsibilities undertaken.

Student Learning Outcomes/Objectives

SLO 1: Complete analyses Goal 1 (M: 1, 2, 3, 4)
Related Measures: M.1: Critical Success Factor Situation Analysis I M.2: Identification of Viable Strategic Alternatives I M.3: Impact of Competitor Action and Reaction to Analyze the Success of Viable Alternatives Measure 1 Understanding of International Business Environment – Critical Success Factor Analysis Fails to meet standards = 1: The student cannot sufficiently distinguish critical success factors, align major resources with these factors, and construct logical cause-effect relationships. Meets standards = 2. The student can identify most critical success factors, and generally align most factors with firm's major resources. Exceeds standards = 3. The student captures almost all critical success factors, tightly aligns resources with these factors, and effectively compares the firm's position in a thorough manner. Measure 2 Understanding of International Business Environment – Identification of Viable Alternatives Fails to meet standards = 1. The student cannot set out clear, viable alternatives for action based on critical success factors in the environment. Meets standards = 2. The student can generate some viable alternatives that are aligned with the critical success factors in the environment. Exceeds standards = 3. The student generates clear and well-supported viable alternatives of action that is grounded in the critical success factors of the environment. Measure 3 Understanding of International Business Environment – Impact on Competitor Actions and Reactions Under the Alternatives Fails to meet standards = 1. The student cannot clearly illustrate of explain how a competitive action will be responded to by rival firms in the environment. Meets standards = 2. The student can generally set out the likely competitive responses to strategic moves in the environment. Exceeds standards = 3. The student clearly sets out the impact of the alternatives on the competitors in the environment and incorporates it into the overall analysis and decision.

SLO 5: Complete Analyses Goal 3
Case analysis or a final paper that shows how business decisions are subject to international dynamics by demonstrating functional area knowledge in the context of international environment Measure 7 Extend Functional Skills in International Operations Fails to meet standards = 1. The student cannot sufficiently distinguish between domestic and international contexts. Meets standards = 2. The student is able to recognize at least two functional areas and integrate them. Exceeds standards = 3. The student can fully capture the implications of four or more functional area decisions.

SLO 7: Complete Analyses Goal 4
I M.8: There are three assessment methods, either one should be met. Completion of foreign language requirement at a foreign institution Or Passing an examination approved by the GSU IIB Department Or Sit for an examiner as determined by IIB Measure 8 Second Language Proficiency Fails to meet standards = 1. The student does not a) complete the second language requirement at an institution other than GSU, or b) pass an exam prepared and approved by the GSU IIB department, or c) successfully sit for an examiner approved by the GSU IIB department. Meets standards = 2. The student does a) complete the second language requirement at an institution other than GSU, or b) pass an exam prepared and approved by the GSU IIB department, or c) successfully sit for an examiner approved by the GSU IIB department. Exceeds standards = 3. The student does a) complete the second language requirement at an institution other than GSU, or b) pass an exam prepared and approved by the GSU IIB department, or c) successfully sit for an examiner approved by the GSU IIB department on their skill level is distinctly higher than that needed for a pass.

SLO 9: Complete Analyses Goal 5
90% of students should pass each outcome/objective with “Meets Standards” criteria. 30% of students should pass each outcome/objective with “Exceeds Standards” criteria. Measure 9 * Team Skills Team Assessment Fails to meet standards = 1. In peer evaluation forms it shows that: Student cannot work effectively with others, cannot incorporate functional knowledge, and problem solving. Meets standards = 2. In peer evaluation forms it shows that: Student can apply multiple views and perspectives to create consensus. Exceeds standards = 3. In peer evaluation forms it shows that: Student can bring multiple views and perspectives to problem solving and create synergies from diverse perspectives. Measure 10 * Team Skills Faculty Assessment Fails to meet standards = 1. In team evaluation forms by the faculty of the team members: The student has not been an effective member of the team in incorporating knowledge and problem solving. Meets standards = 2. In team evaluation forms by the faculty of the team members: The student has effectively worked with his/her teammates, incorporated functional knowledge and problem solving. Exceeds standards = 3. In team evaluation forms by the faculty of the team members: The student has integrated multiple views and perspectives to problem solving, can create synergies from diverse perspectives and demonstrate critical thinking. * Kaufman,
Felder, and Fuller (2000); May and Gueldenzoph (2003)

SLO 10: Target Levels Goal 5 (M: 10, 11)
90% of students should pass each outcome/objective with “Meets Standards” criteria. 30% of students should pass each outcome/objective with “Exceeds Standards” criteria.

SLO 11: Complete Analyses Goal 6
M.11: Faculty assessment of monthly internship report
M.12: Faculty assessment of cumulative supervisor/company report
Non Pass: The student fails to file his/her monthly internship report, or files incomplete reports with missing sections. Pass: The student files his/her monthly internship report and provides details on a) foreign business experience, b) detailed observations of the foreign culture, c) description of the tasks and responsibilities undertaken. Exceed: The student files his/her monthly internship report and provides details on and comparison of a) foreign business experience, b) cultural differences, c) how he/she integrated concepts learned in class to real-life cases. Measure 12 Extended work Experience
Cumulative internship report
Non Pass: The company/supervisor fails to file a cumulative internship report, or files an incomplete report with missing sections. Pass: The company/supervisor files a cumulative internship report and provides brief description of the student's responsibilities and adequate execution of these tasks. Exceed: The company files a cumulative internship report and provides a commendation for outstanding work ethic and accomplishment of tasks and responsibilities assigned.

Other Outcomes/Objectives

O/O 2: Target Levels Goal 1
90% of students will get 2.0 on Measures 1, 2 and 3 30% of students will get 3.0 on Measures 1, 2 and 3

O/O 3: Complete Analyses Goal 2
Related Measures: I M.4: Explicit identification of criteria, by which the students will conduct this analysis, the dataset they will use. I M.5: Interpreting the data in order to arrive at recommendations I M.6: Delineation of country level, industry level, and from firm level variable to conduct the analysis Measure 4 Country Market Analysis - Explicit Identification of criteria. Fails to meet standards=1. The student fails to consult reliable data sources and considers trends in less than three macro variables. Meets standards=2. The student identifies and consults two sources for data and analyzes the trends in three macro variables. Exceeds standards=3. The student consults three or more reliable sources for data and analyzes trends in four or more macro variables. Measure 5 Country Market Analysis – Data Interpretation, Fails to meet standards=1. The student does not apply the techniques developed in IB for country market analysis in data interpretation. Meets standards=2. The student generally accesses tools developed in IB in interpreting the data collected for a country market analysis. Exceeds standards=3. The student uses tools developed in IB to develop rich and insightful interpretations of the data collected in a country market analysis. Measure 6 Country Market Analysis – Delineation of different Levels in Analysis Fails to meet standards=1. The student does not effectively distinguish between the different levels of analysis in the country market analysis. Meets standards=2. The student shows an understanding of the different levels of analysis and conducts the country market analysis in that way. Exceeds standards=3. The student can effectively distinguish the different levels of analysis and integrate the different perspectives from each in the country market analysis.

O/O 4: Target Levels Goal 2 (M: 5, 6, 7)
. 90% of students will get 2.0 on Measures 4, 5 and 6. 30% of students will get 3.0 on Measures 4, 5 and 6

O/O 6: Target Levels Goal 3 (M: 8)
. 90% of students will get 2.0 on Measure 7. 30% of students will get 3.0 on Measure 7

O/O 8: Target Levels Goal 4 (M: 9)
80% of MIB students pass one of the three measures on their first attempt. 90% of MIB students pass one of the three measures on their second attempt.

O/O 12: Target Levels Goal 6 (M: 12, 13)
90% of students should pass each outcome/objective with “Pass” criteria. 10% of students should pass each outcome/objective with “Exceed” criteria.

Measures, Targets, and Findings

M 1: Measures (O: 1)
I M.1: Critical Success Factor Situation Analysis I M.2: Identification of Viable Strategic Alternatives I M.3: Impact of Competitor Action and Reaction to Analyze the Success of Viable Alternatives
Source of Evidence: Written assignment(s), usually scored by a rubric

M 2: Measure 1 (O: 1)
I M.1: Critical Success Factor Situation Analysis
Source of Evidence: Written assignment(s), usually scored by a rubric

M 3: Measure 2 (O: 1)
I M.2: Identification of Viable Strategic Alternatives
Source of Evidence: Written assignment(s), usually scored by a rubric
Mission / Purpose
The Department of Communication is firmly committed to the goals of academic excellence, strong research programs and international relevance set forth in the Georgia State University’s Strategic Plan. The Department encompasses multiple professional, creative and research traditions, all of which are organized around the idea that central to the human experience is the use of symbols for the purpose of making and understanding meaning. As an academic unit, the Department is committed to cultivating a deeper appreciation of the creative and intellectual traditions of communication by providing students with critical thinking and media literacy skills, enhancing students’ oral, written and visual communication processes through participation in cutting edge scholarly and artistic programs and collaborating with and enhancing the local, state, regional, national and global communities related to communication. Note: The Department has about 1,400 undergraduate majors, about 840 are Journalism majors.

Goals
G 1: evaluate information
Students will be able to find and evaluate credible sources of information.
**G 2: objective analysis**
Students will be able to analyze and interpret information for bias and objectivity.

**G 3: apply standards when originating content**
Students will be able to apply ethical standards and conventions of journalism and related mass communication industries when creating original content, e.g., news stories, press releases, newsletters, etc.

### Student Learning Outcomes/Objectives

#### SLO 3: Understand diversity relating to communications (G: 1, 2, 3)
Normal 0 false false false MicrosoftInternetExplorer4 Demonstrate an understanding of the diversity of groups in a global society in relationship to communications

#### SLO 5: Ethically pursuing truth, accuracy, fairness (G: 2, 3)
Normal 0 false false false MicrosoftInternetExplorer4 Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity

#### SLO 7: Research and evaluate info. (G: 1, 2) (M: 1, 3)
Normal 0 false false false MicrosoftInternetExplorer4 Conduct research and evaluate information by methods appropriate to the communication professions in which they work

#### SLO 8: Write correctly and clearly (G: 3) (M: 1)
Normal 0 false false false MicrosoftInternetExplorer4 Write correctly and clearly in forms and styles appropriate for the communication professions, audiences and purposes they serve

#### SLO 9: Critical Thinking Competency (M: 2)
Competency is assessed using standardized rubric. See document repository

#### SLO 9: Critically evaluate own/others’ work (G: 2, 3)
Normal 0 false false false MicrosoftInternetExplorer4 Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatically correctness

#### SLO 10: Apply numerical/statistical concepts (G: 3)
Apply basic numerical and statistical concepts

### Measures, Targets, and Findings

#### M 1: Writing Competency (O: 7, 8)
Used a rubric to measure students’ writing competence.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O8: Write correctly and clearly**

students will achieve 75% as calculated from the rubric.... they will score a minimum of 15 out of a 20 point rubric.

**Findings 2010-2011 - Target: Met**
A total of 18 students in an upper-division writing course responded to the prompt “What is the biggest hurdle for writers trying to learn to write professionally?” Students averaged 79.7% based on rubric (15.94/20)

#### M 2: Critical Thinking Competency (O: 9)
Assessment based on Critical Thinking Rubric. See document repository
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O9: Critical Thinking Competency**

students will achieve 75% as calculated from the rubric.... they will score a minimum of 15 out of a 20 point rubric.

**Findings 2010-2011 - Target: Met**
Major papers by nine students in an upper-division media and society were assessed using the Critical Thinking Rubric. The average score was 15.11/20 or 75.5%

#### M 3: Research Competency (O: 7)
Assessment based on Research rubric. See document repository
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O7: Research and evaluate info.**
Students will achieve 75% as calculated from the rubric.... they will score a minimum of 15 out of a 20 point rubric.

**Findings 2010-2011 - Target: Met**
Assessment based on assignment in an upper-division research class. For the 15 students, the average score was 15.53. That is a 77.6% rate of success (15.53/20)

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**CTW**

Adding the CTW course as a capstone to the Journalism curriculum will allow for additional assessment measures of students' research abilities.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Beginning fall semester
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Journalism faculty

**CTW**

With the addition of the CTW courses to the Journalism curriculum, the assessment of the critical thinking learning outcome will be emphasized and standardized in the junior-level and capstone courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Beginning fall semester
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Journalism faculty

**CTW**

With the addition of the CTW courses--specifically the capstone course options-- to the Journalism curriculum, the assessment of the research learning outcome will be emphasized and standardized.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Beginning of Fall semester
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Journalism faculty

**CTW**

With the addition of the CTW courses--specifically the capstone Media, Ethics & Society course--to the Journalism curriculum, the assessment of the ethics learning outcome will be emphasized and standardized.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Beginning fall semester
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Journalism faculty

**CTW**

With the addition of two CTW courses in the Journalism curriculum next year, additional measures will be easily included, e.g. embedded assignments in the junior-level CTW course.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Beginning fall semester
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Journalism faculty

**multiple measures**

At least one more measure is needed to assess the theories learning outcome. A rubric to score a sample of student papers written about theory in Jour 3070 was abandoned this year but perhaps should be reconsidered. An assessment exam about theories was abandoned several years ago, but perhaps embedded questions in existing Jour 3070 exams should be considered.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Midpoint of fall semester
- **Projected Completion Date:** 09/2009
- **Responsible Person/Group:** Journalism faculty

**multiple measures**

At least one more measure should be added to assess the diversity learning outcome. Perhaps a specific assignment requiring multiple viewpoints to be included should be required in at least one of the core Journalism courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Midpoint of fall semester
- **Projected Completion Date:** 09/2009
- **Responsible Person/Group:** Journalism faculty
multiple measures
At least one more measure should be added to assess the evaluation learning outcome. Perhaps a writing style/editing assignment or an embedded exercise about editing on an exam could be used.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

multiple measures
At least one more measure should be considered to assess students' ability to critically evaluate others' work. Perhaps an embedded assignment in at least one of the Journalism core courses or an exercise on an exam should be considered.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

revised curriculum
The revised Journalism curriculum has more technology in more courses earlier in the major map than the existing curriculum. The assessment of the use of tools/technology will be much easier as embedded assignments in at least two of the new Journalism core courses will be measured. The curriculum revision will not be fully implemented until AY 2011 so next year will be a transition year, allowing for a pilot study of measures to be tried.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

align outcomes with goals
Revise/increase number of goals to align all eleven learning outcomes with a goal.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Faculty will assess each outcome to ensure that it flows from specific goal. This assessment will also identify goals not yet captured
Projected Completion Date: 10/2010
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Data Collection Protocol
Improve collection of data and develop multiple measures for each goal/learning outcome.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Faculty will determine most efficient and effective process by which data can be collected for assessment.
In addition, faculty will determine assessment tools that best measure learning outcomes.
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Rotate Assessment
Determine rotation of learning outcomes to be assessed in each cycle. Not all goals/learning outcomes have to be assessed every year, but each one has to be assessed regularly.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Faculty will determine system by which all learning outcomes will be assessed at least once over a three-year rotation.
Projected Completion Date: 10/2010
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Student Work Selection
Random selection of student work rather than selection based on cross-section of student work by performance.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Instructors will randomly select student work from several assignments for assessment
Projected Completion Date: 10/2010
**Student Learning Outcomes/Objectives**

**Goals**

**G 1: Basic proficiency in legal writing**
Any accredited law school graduate, whether she practices law in a traditional sense or not, needs to be an effective communicator. While oral communication skills often get the most attention in modern American society, the reality is that written communication is more common, more permanent, and more important. For this reason, we seek to produce law graduates who can communicate in clear written form with clients, the courts and the public. Generally, their written communications are intended to perform three distinct functions: (i) identify relevant legal issues; (ii) identify, explain and analyse the existing law dealing with such issues; (iii) predict resolution of the issues by applying the existing facts to the existing law, or propose legal solutions to deal with them in the future.

**G 2: Basic proficiency in legal research**
All students must learn how to find the existing law, whether it be in the form of statutes, regulations or caselaw. Students must also learn the proper format for using and citing the law in memos, briefs, and other relevant forums.

**G 3: Basic proficiency in fundamental legal principles**
All students must learn the fundamentals of the American legal system. Once they learn these fundamentals, they may choose to "specialize" and take courses in specific areas of the law.

**SLO 1: Basic proficiency in objective legal writing (M: 2, 2)**
The primary vehicle via which all students must demonstrate writing proficiency occurs in the required RWA I and II courses. All law students must take and pass these courses in order to graduate; indeed, they must do so in order to take any elective courses. In the Fall (RWA I), the objective is to have the students master the art of "objective writing." Students are first provided with a hypothetical legal scenario and "canned" research, already developed by the entire RWA faculty. Students must first produce a "closed memo," in which they objectively describe the issue, the relevant existing law, and their assessment of how a court would resolve the issues by applying the existing facts to the existing law, or propose legal solutions to deal with them in the future.
resolve the issue. The hypothetical is a "balanced" one, meaning that there are generally equally good arguments to be made that the relevant law supports one result or the other. The student must learn to identify and effectively present the different possible interpretations of the law, and the varying results at which courts might arrive. The memo is written as if a new law associate is presenting the memo to a senior law firm partner who needs to know whether or not to take on a client's case. In the course of writing their memos, students receive constant feedback, both written and oral, from their RWA instructors. The final product is graded using a highly specific grading rubric.

**SLO 2: Basic proficiency in advocacy legal writing (M: 2)**

In the Spring (RWA II), the objective is to have the students master the art of "advocacy writing." This differs from RWA II in two primary respects. First, the students are no longer able to rely upon any "canned research." For this semester, they rely almost entirely upon research they develop on their own. The research skills are those learned in both RWA I and II, as well as in Legal Bibliography, a course taught by law librarians. Second, the product the students must produce for RWA II is a legal brief. A brief is a document presented to a court for the benefit of one party to a lawsuit. Thus, unlike the memos which are intended to present objective descriptions of the law, the brief uses the current law to argue for the position of the client the lawyer represents in a lawsuit. Students are assigned to represent one side or the other.

**SLO 3: Basic proficiency in oral advocacy**

In the final weeks of RWA II, the objective is to have the students orally present their "advocacy writing" product in a Moot Court competition. This competition, in which all first year students in all sections of RWA II participate against one another, utilizes upper class students, professors, and practicing lawyers to sit as appellate judges and hear the students' presentations. The key to an effective presentation is being able to answer the judges' questions about the problem. Some questions are based solely on the students' written products, but more often they are the judges' original questions intended to probe the depths of students' understanding of the law and gauge the students' appreciation of the consequences of a court ruling for or against their clients.

---

**Other Outcomes/Objectives**

**O/O 4: xxx (M: 2)**

xxx

---

**Measures, Targets, and Findings**

**M 2: Production of satisfactory written product (O: 1)**

Using the grading rubric in attached scoring sheets, students' memos are objectively evaluated. They are given multiple opportunities to meet with instructors and write and re-write their papers.

Source of Evidence: Evaluations

**Target for O1: Basic proficiency in objective legal writing**

Our target is to ensure that every single student at the College of Law acquire the proficiency described herein. While that is not possible, our more modest goal is simply to say that students who do not achieve this proficiency will not pass RWA. In fact, there is a significant correlation between those students who do not pass RWA the first time (or at least make a C) and those who do not end up graduating from the College of Law. A significant number of students who are excluded for academic reasons at the end of their first year have either failed or done very poorly in RWA.

**M 2: Writing intervention exercises (O: 1, 2, 4)**

In addition to RWA, all students must also take Civil Procedure I in the Fall and Civil Procedure II in the Spring. Traditionally, these courses have both been tested and graded using one exam at the end of each semester. Especially in Civil Procedure I, the exams have been almost exclusively essay exams. Since Civil Procedure is both required and rather esoteric (especially Civil Procedure I), it seems like a good course to attempt to assess and measure the degree to which students' writing skills are up to par. Picking up on that idea, two Civil Procedure professors first started using a "writing intervention" program throughout the course of the semester to see if such interventions would improve upon the skills already first learned in RWA I. In its first iteration, one professor used the intervention program, while the other did not. So as to make fair comparisons of the results in the two classes, each professor otherwise used the same syllabus and the same final exam. The intervention used in the first (experimental) year and beyond consisted of giving students five three-page, take-home papers, in addition to the final exam. The papers were designed to help students learn how to break a legal rule into its component parts, analyze and apply facts to each of the rule's elements, and make arguments on both sides. Two weeks into the semester, the intervention professor gave her students an initial single issue "practice" paper. After the students turned the paper in, the intervention professor read approximately ten papers to get a sense of the common errors and issues. Before assigning the next paper, she reviewed the IRAC formula (issue, rule, analysis, and conclusion) with the class. She also gave students general feedback on common problems she saw in the papers she read and discussed how to avoid these problems in the future. Since that first experimental year, these methods have been incorporated into that professor's class, and they are being copied by other professors, as well.

Source of Evidence: Evaluations

**Target for O1: Basic proficiency in objective legal writing**

The goals of these writing intervention exercises are threefold. First, we want all students to become comfortable with practicing writing exercises. While the point of this practice is to succeed on examinations, such practice is good preparation for work as a practicing lawyer. Second, we want students to become comfortable with self-editing, so that they are capable of both writing good quality papers, but also improving upon them the second or later time around. Third, we want all students to write better final exams (just as they will later write better letters, memos, briefs, and all manner of legal documents) than they would write without the intervention.

**Target for O2: Basic proficiency in advocacy legal writing**

The goals of these writing intervention exercises are threefold. First, we want all students to become comfortable with practicing writing exercises. While the point of this practice is to succeed on examinations, such practice is good preparation for work as a
Georgia State University

Assessment Data by Section

2010-2011 Library Media Technology MLM

(As of 12/12/2016 04:11 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organization in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good. The Library Media Technology Program prepares students to serve as school library media specialists and information technologists in the Pre-K – 12 school environment. The focus is on administering media centers in modern school settings.

Goals

G 1: Goals for Candidates in Library Media Technology

The goals for candidates enrolled in the Library Media Technology Program include development of the following: The role of the school library media specialist as a teacher. The media specialist collaborates with students and other members of the learning community to analyze learning and information needs, to locate and use resources that will meet those needs, and to understand and communicate the information the resources provide. The role of the school library media specialist as an instructional partner. The media specialist joins with teachers and others to identify links across student information needs, curricular content, learning outcomes, and a wide variety of print, nonprint, and electronic information resources. The role of the school library media specialist as an information specialist. The media specialist provides leadership and expertise in acquiring and evaluating information resources in all formats. The role of the school library media specialist as a teacher.

Outcomes/Objectives

O/O 1: Demonstrates Content Pedagogical Knowledge (M: 1)

Candidates demonstrate knowledge of the foundations of professional responsibilities of a school library media specialist. Strategic Plans: President, Georgia State University 1.3 Graduate Experience

O/O 2: Demonstrates Effective Teaching Performance (M: 2)

Candidates demonstrate knowledge and understanding of a wide range of instructional practices, approaches, methods and curriculum materials (including print/nonprint materials and technological tools) to support the professional responsibilities of a school library media specialist. The candidate locates, comprehends, and builds rationale from curriculum guides, other applicable documents, and experienced practitioners; plans and carries out instruction based on state standards; selects and varies instructional strategies, assessing their impact on student engagement and learning; observes students closely and acknowledges how adjustments in teaching can impact learning; exploring teaching roles to discover appropriate approaches for students; learns to work and plan productively as part of teams within the school environment. Strategic Plans: President, Georgia State University 1.3 Graduate Experience

O/O 3: Demonstrates Use of Technology in Instruction (M: 3)

Candidates demonstrate use of technology in learning and instruction in the course materials they complete for the degree or certification and in materials they create for the LiveText portfolio and for their media centers. Strategic Plans: President, Georgia State University 1.3 Graduate Experience

O/O 4: Demonstrates Professional Behaviors and Activities (M: 4)

Candidates demonstrate practices that indicate their commitment to teacher-librarian models of inquiry, professional development, and collaboration with colleagues as career-long efforts and responsibilities. Strategic Plans: President, Georgia State University 1.3 Graduate Experience
### Measures, Targets, and Findings

#### M 1: Portfolio Rating Standard 2: Teaching and Learning (O: 1)

A portfolio rating for Standard 2 from the ALA-AASL Standards for Initial Programs for School Library Media Specialist Preparation (2007). Standard 2 addresses the following: 1.) Knowledge of Learners and Learning, 2.) Effective and Knowledgeable Teacher, and 3.) Information Literacy Curriculum. This rating will be derived from each student's written rationale explaining how portfolio artifacts demonstrate student competency. Source of Evidence: LiveText portfolio synthesis piece.

**Target for O1: Demonstrates Content Pedagogical Knowledge**

95% of program completers will demonstrate an intermediate level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action. (Level 3 of LiveText assessment rubric.)

**Findings 2010-2011 - Target: Not Reported This Cycle**

The Library Media Technology MLM program is currently being deactivated.

#### M 2: Internship Evaluation (O: 2)

All supervising media specialists are required to submit evaluation forms for all students completing ELMT 7660 (Internship in Library Media Technology). Source of Evidence: Supervising library media specialists’ ratings on the final evaluation forms.

**Target for O2: Demonstrates Effective Teaching Performance**

95% of students completing ELMT 7660 (Internship in Library Media Technology) will receive scores of 4 out of 5 on the final evaluation form submitted by supervising school library media specialists.

**Findings 2010-2011 - Target: Not Reported This Cycle**

The Library Media Technology MLM program is currently being deactivated.

#### M 3: Use of Technology to Complete LMT Portfolio (O: 3)

Passing the LiveText portfolio requirement for the MLM degree or for add-on certification requires the use of multiple technologies integrated into student reflection, artifacts, and writing. Source of Evidence: Successful completion of all portfolio requirements.

**Target for O3: Demonstrates Use of Technology in Instruction**

95% of program completers will demonstrate an intermediate level of knowledge and skill needed to achieve this standard through independent and autonomous planning and action. (Level 3 of LiveText assessment rubric.)

**Findings 2010-2011 - Target: Not Reported This Cycle**

The Library Media Technology MLM program is currently being deactivated.

#### M 4: Faculty Ratings (O: 4)

Faculty ratings of teacher-librarian candidates who have completed the program. Source of Evidence: STARS evaluation system.

**Target for O4: Demonstrates Professional Behaviors and Activities**

95% of program completers will demonstrate a proficient level of knowledge and understanding of the domain. The candidate can reflect upon, assess, and take appropriate action regarding effectiveness of his/her professional performance and decisions.

**Findings 2010-2011 - Target: Not Reported This Cycle**

The Library Media Technology MLM program is currently being deactivated.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Action Plan**

Maintain and monitor.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Strengthening planning and instruction knowledge**

Based upon the faculty ratings (STARS) of teacher (media specialist) candidates’ knowledge and performance in planning and instruction we have partially met our achievement target. We will strengthen our students’ knowledge of planning and instruction via additional coursework (readings and assignments, specifically in lesson plan writing/alignment and actual teaching experiences). A teacher work sample will be required as part of the portfolio which contains several components of lesson planning and differentiation in instruction. Finally, we will devote one (or more as needed) special topics seminars to the issue of planning and instruction.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Portfolio Rating Standard 2: Teaching and Learning
- **Outcome/Objective:** Demonstrates Content Pedagogical
Knowledge

Implementation Description: Implementation of the proposed action plan will begin immediately in all fall semester, 2010 LMT classes.
Projected Completion Date: 05/2011
Responsible Person/Group: Dr. Nancy J. Brown and Dr. Edward Lomax
Additional Resources: 0
Budget Amount Requested: $0.00 (no request)

LMT Deactivation In-Progress
The Library Media Technology MLM program is currently be deactivated, and students are no longer being accepted into the program. Department faculty are ensuring that all current students matriculate through the completion of their program. See attachments.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: In-Progress
Projected Completion Date: 05/2012
Responsible Person/Group: Department Chair and Department Faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
NA

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
NA

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
NA

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
The Library Media Technology MLM program is currently being deactivated. Faculty are currently working to ensure that all current students matriculate through the completion of their program.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The Library Media Technology MLM program is currently being deactivated. Faculty are currently working to ensure that all current students matriculate through the completion of their program.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
The Library Media Technology MLM program is currently being deactivated. Faculty are currently working to ensure that all current students matriculate through the completion of their program.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
The Library Media Technology MLM program is currently being deactivated. Faculty are currently working to ensure that all current students matriculate through the completion of their program.

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
The Library Media Technology MLM program is currently being deactivated. Faculty are currently working to ensure that all current students matriculate through the completion of their program.
**Mission / Purpose**

The Management Department seeks to provide its undergraduate majors with fundamental principals in general management principles, human resource management, operations management, entrepreneurship, and the concepts that underlie the social, psychological, and cultural aspects of organizations.

This was set as the Department’s Mission in the 2005-2006 cycle. It failed to migrate forward in the WEAVE update for the 2008-2009 cycle.

**Goals**

**G 1: Functional Expertise**

All BBA graduates in the Managerial Sciences Department will show a breadth and depth of functional expertise that is reflective of the successful mastery of a multi-course program in their area of study.

**G 2: Decision Making Skills**

All BBA graduates in Managerial Sciences will show a high level of competence in making decisions in their respective areas.

**Student Learning Outcomes/Objectives**

**SLO 1: Student Performance (M: 1, 2)**

Students majoring in Managerial Sciences will master a range of capabilities in human, group, and organizational behavior. On one level these capabilities include those that are associated with the motivation, direction and coordination of people, individually and in groups, for the accomplishment of goals. On another level they include the process of setting goals, negotiating their development and change over time and dealing with both the success and failure of achieving those goals. Managerial Sciences is actually a collection of disciples, each with its own disciplinary track. Each track, organizational behavior, human resource management, entrepreneurship, strategic management, operations management and business analysis addresses a different aspect of the general managerial challenges stated above. Because of the diversity of students in the department and the range of disciples they are studying, "Performance" for the Department's undergraduates as a whole is measured using standardized questions across the field of management as administered in the ETS Major Field Exam, which is given to all graduating seniors in the Robinson College in the Fall Semester of 2009. Due to budgetary constraints the exam was not administered to graduates in the Spring Semester for the first time since it was begun in the mid1990s. Still, this measure was applied to 384 students College-wide and 57 management majors.

**SLO 2: Student Performance in their Functional Concentration (G: 1)**

This objective focuses on the student's functional tracks within Managerial Sciences: Human Resource Management, Operations Management, and Entrepreneurship. At the time of their completion of the degree students in their chosen functional track will show their ability to recognize problems, select and use decision tools, and present recommendations that reflect the successful completion of a multi-course program of study in that functional track.

**SLO 3: Critical Thinking in Decision Making (G: 2)**

All students in any MGS undergraduate track need to develop critical thinking skills for problem solving in their track. At the time of their completion of the degree, students in their chosen functional track will show their ability to apply critical thinking techniques in addressing issues and problems that they are likely to confront as managers.

**Measures, Targets, and Findings**

**M 1: Performance Relative to Other Schools (O: 1)**

As a group students majoring in Managerial Sciences will outperform on an outstanding level compared other student bodies in other business programs on standardized questions relating to management.

Source of Evidence: Standardized test of subject matter knowledge

**M 2: Student Performance Relative to other RCB Students (O: 1)**

Students will perform in high percentiles on the ETS standardized assessment exam that greatly exceed the percentiles of students in other majors and the RCB student body as a whole.

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Student Performance**

Managerial Sciences students should significantly exceed the college-wide percentile in answering Management questions on the ETS field exam. MGS students should score in a higher percentile than students in all other majors in the RCB on Management questions on the ETS field exam.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Revision of MGS**
Managerial Sciences needs to expand and improve its measurements. New measures have to be able to better detect the sources of the disappointing performance that MGS is experiencing relative to other students who are not Management majors. The first step in this will be having the department assessment team attend the daylong assessment workshop that the College is sponsoring on Sept 19th. Subsequently, members of the department assessment team need to apply lessons from that session and quickly develop new measures and ways of measuring. Those measures will then be implemented in the department in the 2008-09 cycle.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:**
  - Oct 15, 2008
  - Projected Completion Date: 09/2013
  - Responsible Person/Group: William C. Bogner

**Challenging Courses**
Evaluate the rigor and challenge of the Department's threshold course for majors, MGS 4000.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Terminated
- **Priority:** High

- **Relationships (Measure | Outcome/Objective):**
  - Measure: Performance Relative to Other Schools | Outcome/Objective: Student Performance
  - Measure: Student Performance Relative to other RCB Students | Outcome/Objective: Student Performance

- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** MGS Teaching Innovation Committee
- **Budget Amount Requested:** $100.00 (recurring)

**Emphasis on Management Skills**
Identify and communicate the value of a Managerial Sciences (MGS) Degree Program, in the context of linking academia to practical application. Gather data for the past 10 years on positions and starting salaries for students graduating with a MGS degree, segmented by career tracks. Track the understanding of the students of the importance of these courses by testing them pre- and post an informational workshop/seminar on MGS career tracks.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Terminated
- **Priority:** High

- **Relationships (Measure | Outcome/Objective):**
  - Measure: Performance Relative to Other Schools | Outcome/Objective: Student Performance
  - Measure: Student Performance Relative to other RCB Students | Outcome/Objective: Student Performance

- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** The MGS Teaching Innovation Committee
- **Budget Amount Requested:** $100.00 (recurring)

**Improved Instructor Excellence**
The MGS Teaching Innovation Committee will conduct future workshops for full-time, part-time faculty, as well as Ph.D. students to facilitate, cultivate, and enable teaching excellence in the classroom. The goal is to engender a rich skill set that fosters a broad stakeholder perspective.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

- **Relationships (Measure | Outcome/Objective):**
  - Measure: Performance Relative to Other Schools | Outcome/Objective: Student Performance
  - Measure: Student Performance Relative to other RCB Students | Outcome/Objective: Student Performance

- **Projected Completion Date:** 12/2009
- **Responsible Person/Group:** MGS Teaching Innovation Committee
- **Budget Amount Requested:** $100.00 (recurring)

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Marketing BBA**

*As of: 12/12/2016 04:11 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
The mission of the Department of Marketing at Georgia State University at the BBA level is to effectively prepare students for entry level positions in marketing, sales and related fields by helping them acquire the skills they need to: Analyze marketing problems and situations. Develop effective marketing strategies and tactics Clearly communicate their analyses and recommendations.

**Goals**

**G 1: Analysis of Marketing Situations/Problems**
Students will be able to accurately describe and analyze marketplace situations, key issues, problems and decisions facing marketing
Students will be able to accurately describe and analyze marketplace situations, key issues, problems and decisions facing marketing organizations.

**G 2: Applying Quantitative Tools**
Students will be proficient in the use of standard marketing metric tools employed by marketing organizations for situation analyses and development of marketing strategy and tactics.

**G 3: Critical Thinking and Problem Solving**
Students will exhibit critical thinking skills in the process of solving marketing problems and in arriving at logical and feasible solutions/recommendations for marketing organizations.

**G 4: Formulate Marketing Strategy and Tactics**
Students will be able to develop useful and feasible strategies and tactics to address specific marketing situations/problems using the marketing mix.

**G 5: Communication Skills**
Students will be able to communicate clearly and effectively in written and oral form.

### Student Learning Outcomes/Objectives

**SLO 1: Identify key marketing problems (G: 1) (M: 1)**
Students will be able to identify key problems facing a marketing organization.

**SLO 2: Accurately Employ Marketing Metric Tools (G: 2) (M: 1)**
Students will be proficient at the use of standard metrics tools employed in marketing analysis and strategy.

### Other Outcomes/Objectives

**O/O 3: Logical and feasible recommendations/solutions (G: 3, 4) (M: 1)**
Students will be proficient in developing logical and feasible solutions and recommendations to marketing organizations.

**O/O 4: Clear concise writing (G: 5) (M: 1)**
Students will demonstrate proficiency at clear, logical, business-like writing.

**O/O 5: Oral communication (G: 5) (M: 2)**
Students will be able to engage in clear, meaningful discussion of marketing problems and issues.

### Measures, Targets, and Findings

**M 1: Case Analysis Write Up (O: 1, 2, 3, 4)**
Assessment in the Marketing Department focuses on our capstone course, MK 4900 (Marketing Problems). Our assessments of student performance are based on case analyses, class discussion and group projects. Because group projects are no longer acceptable as measurements of performance, case analysis is used for assessing content-based performance and class discussion grades are used to assess communication skills performance. For the 2009-2010 assessment, we used scores on students’ analyses of a case entitled “Zenith Pet Foods.” The case requires students to assess the marketplace conditions for a new product entry, develop pricing strategy, conduct a break even required share analysis, critique a proposal for product introduction, recommend a go/no go decision, justify their recommendation and offer alternative courses of action (if deemed necessary). Cases are graded via a rubric comprised of several items. Student performance on each item is scored on a 100 point scale.

**Target for O1: Identify key marketing problems**
An average score of 85% for relevant scoring items on case analysis rubric. Thorough and accurate analysis of marketplace conditions and potential fit for product/brand in question. For the 2010-2011 Reporting Period Total possible points for this item = 15. Target score average = 12.75

**Findings 2010-2011 - Target: Met**
The average score on this measure was 12.75 out of 15 possible points. This was 85%, of total possible points. Out of 28 usable case studies: 9 students were below target 4 students were at target 15 were above target

**Target for O2: Accurately Employ Marketing Metric Tools**
An average score of 85% or higher on items relevant to marketing metrics in case analysis. Specific tasks can include: Accurate break-even analysis and assessment of required break-even share of market. Appropriate product pricing given competitive set. Assessment of market size potential. Production of appropriate P&L or Pro Forma statement. Competent computation of contribution, margin and profit. Total possible score for this assessment item = 20 Target average score = 17

**Findings 2010-2011 - Target: Not Met**
Average score on this measure was 14 out of 20 points. 3 scores were above the target 0 scores were at the target 25 scores were below target
Target for O3: Logical and feasible recommendations/solutions

An average score of 85/100 on items relevant to feasible recommendations for marketing strategy and tactics. Lays out a realistic recommendation based on Qualitative and quantitative data Assessment of pertinent marketplace forces Assessment of marketing organization/brand strengths and weaknesses, opportunities and threats

Findings 2010-2011 - Target: Not Met

The average on this item was 78% 9 scores (32%) were above target 5 scores (17.8%) were at target. 14 scores (50%) were below target.

Target for O4: Clear concise writing

A score of 85/100 on items that assess clear, concise writing. Total possible points = 20. Target score is 17.5/20 Logical, coherent structure Concise and accurate language Minimum of spelling and usage errors Well composed tables and graphs (if applicable)

Findings 2010-2011 - Target: Partially Met

The average on this item was 84% 14 scores (50%) were above target. 7 scores (25%) were below target. 7 scores (25%) were below target.

M 2: Case Discussion (O: 5)

Students are given a numerical score (e.g. 40 out of 50 total points) for their contribution to case discussions in class over the course of the semester. Typically, there are 7 or more such discussions. The instructor assigns scores to each student after each discussion and posts them within one week on ULearn. In order to account for lapses in memory on the part of the instructor, students may dispute a contribution grade within 24 hours after they are posted. At the end of the semester, the instructor tallies up the total possible points and then develops a percentage score for each student. This percentage is then multiplied by the total possible semester points (in this case 300). This becomes the contribution grade for the student for that semester. Percent of total contribution points is the measure we are using for this assessment.

Source of Evidence: Presentation, either individual or group

Target for O5: Oral communication

Average of 85/100 total points for in class case discussion.

Findings 2010-2011 - Target: Partially Met

On this measure, students, as a group, fell below target with an average score of 79.7. The distribution on this measure was almost perfectly bimodal with 14 students scoring above the target of 85% and 14 students scoring below the target, and 2 students exactly at target. Thus, while the mean score fell below the target, the median score of 84.5 was at target. However, since our original criterion was the arithmetic average of 85% we must conclude that this objective was only partially met.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Increase Usage of Written Assignments

We will recommend to undergraduate instructors that they develop more assignments that require writing in their classes. This can be as simple as short, one-page reaction papers. We will also encourage them to require students to employ specific writing frameworks (e.g. memorandum) that force them to develop their thoughts logically and clearly. We must also note, here, that we are not writing instructors, and our students are required to take only one business communication course.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Case Analysis Write Up | Outcome/Objective: Clear concise writing
Implementation Description: Spring 2010
Projected Completion Date: 12/2009
Responsible Person/Group: Undergraduate Curriculum Committee.
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Increased Class Discussion

We will recommend to undergraduate instructors that they increase their use of class discussion through posing problem solving questions and the use of mini-cases.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Case Discussion | Outcome/Objective: Oral communication
Implementation Description: Fall Semester
Projected Completion Date: 07/2009
Responsible Person/Group: Undergraduate Curriculum Committee
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Increased problem solving assignments

The undergraduate curriculum committee will issue a formal recommendation to all undergraduate instructors asking them to include at least 3 problem solving assignments in their syllabus, with provision made for in-class discussion and feedback. We will also recommend that these assignments can be in the form of mini-case analyses. These are often present as end-of-chapter activities in
most textbooks and should be fairly easy to implement. These could be either individual or group assignments. They could be take-home or entirely in class. What matters is that they provide students with opportunities to develop their logical and critical thinking abilities. We hope that the cumulative effect will be an improvement in our students' ability to articulate clear, feasible recommendations on major assignments. We will issue a recommendation along with a copy of this report to all undergraduate instructors.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Case Analysis Write Up | Outcome/Objective: Logical and feasible recommendations/solutions

Implementation Description: Fall Semester, 2009
Projected Completion Date: 07/2009
Responsible Person/Group: Undergraduate Curriculum Committee
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Introduce Required Course in Marketing Metrics
In the 2008-2009 academic year, we introduced a new course entitled "Marketing Metrics". Our purpose was to better prepare our students for performing the kinds of quantitative analyses employed in marketing management. This is not a marketing research or statistics course but rather it covers such tools as break-even, margin analysis, pro forma development, etc. The course becomes a requirement of all majors in the 2009-2010 academic year. In addition, it will be a pre-requisite for MK 4900, in which these techniques must be applied. Our goal is to improve the ability of our students to perform these types of analyses and to apply the learning from them. We expect that this will be reflected in improved scores on assignments pertinent to this objective.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Case Analysis Write Up | Outcome/Objective: Accurately Employ Marketing Metric Tools

Implementation Description: Fall Semester 2009
Projected Completion Date: 07/2009
Responsible Person/Group: Department Undergraduate Curriculum Committee
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Recommend Case Analysis/Discussion in All Required Courses
Current departmental policy does not require that instructors use case analysis and discussion in all required courses. Therefore, many, if not most, marketing majors have no experience in this learning format prior to taking our capstone class. One of the recommendations that will be forthcoming from our Undergraduate Curriculum Task Force is to incorporate at least one case analysis/discussion in each required course. We believe that this should make students more comfortable and experienced at this format.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Case Discussion | Outcome/Objective: Oral communication

Implementation Description: We have no authority to force the adoption of this plan on department faculty. We will strongly recommend that it be implemented and included in syllabuses and seek as wide cooperation as possible.
Projected Completion Date: 12/2010
Responsible Person/Group: Undergraduate Curriculum Committee
Additional Resources: none

Require Marketing Metrics Course
As of Fall Semester 2009, all students entering the Marketing Major have been required to take Marketing Metrics as part of their plan of study, and prior to enrolling in the capstone course (MK 4900). The 2010-2011 Academic Term will be the first in which the majority of majors should have taken this course at the time of assessment via the instruments employed in MK 4900. We also will be recommending that marketing metrics be included in all required courses for the department.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Case Analysis Write Up | Outcome/Objective: Accurately Employ Marketing Metric Tools

Implementation Description: Requirement for Marketing Metrics has been implemented.
Projected Completion Date: 08/2010
Responsible Person/Group: Undergraduate Curriculum Committee
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Continued Focus on Marketing Metrics
Our department is continuing its plans to place more emphasis on marketing metrics throughout the undergraduate curriculum. All courses are to include at least one case analysis that includes metrics. At this point, nearly all students in our capstone classes have taken Marketing Metrics prior to the capstone class.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
**Measure:** Case Analysis Write Up | **Outcome/Objective:** Accurately Employ Marketing Metric Tools

**Implementation Description:** Ongoing.
**Responsible Person/Group:** Undergraduate Curriculum Committee
**Additional Resources:** None

**Improve Case Discussion participation**
It is not clear what can be done to improve this measure. It is possible that this year's findings are an anomaly, since case discussion is a required part of the course. One of the instructors of our capstone class will be taking the Harvard Business School seminar on case discussion leadership this (fall) semester. We are hoping that this will lead to new ideas and improved techniques for encouraging case discussion.

**Established in Cycle:** 2010-2011
**Implementation Status:** On-Hold
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Case Discussion | **Outcome/Objective:** Oral communication

**Projected Completion Date:** 12/2011
**Responsible Person/Group:** David Nasser
**Additional Resources:** None

**Increased Case Analysis in Curriculum**
We are implementing a plan to increase the use of case analysis throughout our undergraduate curriculum.

**Established in Cycle:** 2010-2011
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Case Analysis Write Up | **Outcome/Objective:** Logical and feasible recommendations/solutions

**Implementation Description:** Ongoing
**Responsible Person/Group:** Undergraduate Curriculum Committee

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We made no substantive changes for 2010-2011. For 2011-2012 we are planning to include more sections in the assessment process in order to obtain more data and essentially represent all students who have taken the capstone class. We are also beginning the process of developing a list of learning objectives and mapping all undergraduate courses to those objectives. We are hoping that, over the long term, as this plan gets implemented, students will arrive in the capstone class with a common learning set that covers the key concepts and theories in our field.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This year’s data has spurred the action described in our response to ADQ 1.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?

We used the results to support the recommendations of our Undergraduate Curriculum Task Force. These included (1) The need to prepare our students more thoroughly for analysis of marketing problems by using at least some case analysis in all courses and (2) require all students to take a course in Marketing Metrics as a pre-requisite to the capstone class where the bulk of our annual assessment takes place.

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment this year (2010-2011)?

1. We need to assess more sections of the capstone class. Two sections has been the norm. We will now use our measures on as many sections as is feasible, all if possible. We say this because it is not clear if the decline in targets met is an artifact of data collection or a genuine event demonstrating an actual decline in student skills. We are hoping that a larger number of data points will help us to answer that question.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

Other than what has been provided in previous answers, none. We expect that the actions we take will bring us to a point where all targets are met.
Mission / Purpose
The MS in Marketing Program is designed to provide the in-depth theoretical and applied training needed to excel in a leadership position in Marketing. The MS in Marketing Program extends the students' previously acquired basic business and marketing skills by developing advanced technical and analytical competency in a selected area. The MS Program, therefore, allows students to distinguish themselves as marketing specialists capable of making decisions in an increasingly complex marketing environment.

Student Learning Outcomes/Objectives

SLO 1: Identify Marketing Problems and Opportunities (M: 1, 2, 3)
MS-MKT graduate will be able to identify marketing opportunities and problems.

SLO 2: Ability to Fashion Marketing Solutions (M: 4, 5)
The MS-MKT graduate will be able to fashion appropriate and effective marketing solutions.

SLO 3: Demonstrate a Customer/Client Orientation (M: 6, 7)
The MS-MKT graduate will demonstrate a customer/client orientation.

SLO 4: Analyze and Interpret Relevant Information (M: 8, 9)
The MS-MKT graduate will demonstrate the ability to analyze and interpret appropriate information for solving marketing problems.

Measures, Targets, and Findings

M 1: Application of Segmentation Analysis (O: 1)
Application of segmentation analysis
Source of Evidence: Academic direct measure of learning - other

Target for O1: Identify Marketing Problems and Opportunities
A 2.0 average on all criteria. Measurement will be done by applying the Measure 1 Rubric to the common case assignment.

M 2: Viable Target Markets/Positioning (O: 1)
Development of viable target market(s) and positioning.
Source of Evidence: Academic direct measure of learning - other

Target for O1: Identify Marketing Problems and Opportunities
A 2.0 average on all criteria. Measurement will be done by applying the Measure 2 Rubric to the common case assignment.

M 3: Impact of Competition (O: 1)
Assessment of impact of competition on the firm's actions.
Source of Evidence: Academic direct measure of learning - other

Target for O1: Identify Marketing Problems and Opportunities
A 2.0 average on all criteria. Measurement will be done by applying the Measure 3 Rubric to the common case assignment.

M 4: Solution Consistent with analysis. (O: 2)
Solution Consistent with analysis.
Source of Evidence: Academic direct measure of learning - other

Target for O2: Ability to Fashion Marketing Solutions
A 2.0 average on all criteria. Measurement will be done by applying the Measure 4 Rubric to the common case assignment.

M 5: Realistic implementation plan. (O: 2)
Realistic implementation plan.
Source of Evidence: Academic direct measure of learning - other

Target for O2: Ability to Fashion Marketing Solutions
A 2.0 average on all criteria. Measurement will be done by applying the Measure 5 Rubric to the common case assignment.

M 6: Attention to customer satisfaction. (O: 3)
Attention to customer satisfaction.
Source of Evidence: Academic direct measure of learning - other

Target for O3: Demonstrate a Customer/Client Orientation
A 2.0 average on all criteria. Measurement will be done by applying the Measure 6 Rubric to the common case assignment.

**M 7: Attention to customer loyalty (O: 3)**
Attention to customer loyalty.
Source of Evidence: Academic direct measure of learning - other

**Target for O3: Demonstrate a Customer/Client Orientation**
A 2.0 average on all criteria. Measurement will be done by applying the Measure 7 Rubric to the common case assignment.

**M 8: Student defines the necessary information (O: 4)**
Student defines the information necessary to address question.
Source of Evidence: Academic direct measure of learning - other

**Target for O4: Analyze and Interpret Relevant Information**
A 2.0 average on all criteria. Measurement will be done by applying the Measure 8 Rubric to the common case assignment.

**M 9: Student correctly interprets information collected (O: 4)**
Student correctly interprets information collected.
Source of Evidence: Academic direct measure of learning - other

**Target for O4: Analyze and Interpret Relevant Information**
A 2.0 average on all criteria. Measurement will be done by applying the Measure 9 Rubric to the common case assignment.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Communication of Assessment Results**
Provide each faculty member who teaches classes to our MS students with the results of the assessment. These results, including the outcomes/objectives, measures and grading rubrics for each criterion, will communicate to the faculty what the program is striving to achieve. This information in combination with the assessment results will guide faculty in knowing what areas need or would benefit from additional emphasis.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Application of Segmentation Analysis | Outcome/Objective: Identify Marketing Problems and Opportunities
- Measure: Attention to customer loyalty | Outcome/Objective: Demonstrate a Customer/Client Orientation
- Measure: Attention to customer satisfaction | Outcome/Objective: Demonstrate a Customer/Client Orientation
- Measure: Impact of Competition | Outcome/Objective: Identify Marketing Problems and Opportunities
- Measure: Realistic implementation plan | Outcome/Objective: Ability to Fashion Marketing Solutions
- Measure: Student correctly interprets information collected | Outcome/Objective: Analyze and Interpret Relevant Information
- Measure: Student defines the necessary information | Outcome/Objective: Analyze and Interpret Relevant Information
- Measure: Viable Target Markets/Positioning | Outcome/Objective: Identify Marketing Problems and Opportunities

- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** MS Coordinator (Bruce Pilling)

**Evaluate current assessment case.**
Evaluation of the current case being used to generate the assessment material. Specifically, we need to gauge whether or not this case provides sufficient emphasis on customer loyalty and customer satisfaction.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Attention to customer satisfaction | Outcome/Objective: Demonstrate a Customer/Client Orientation
- Measure: Realistic implementation plan | Outcome/Objective: Ability to Fashion Marketing Solutions

- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** MS Coordinator (Bruce Pilling)

**Georgia State University**
**Assessment Data by Section**
**2010-2011 Mathematics & Statistics Assessment of Core**
*As of 12/12/2016 04:11 PM EST*
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
"Basic quantitative literacy depends on students being introduced to the foundations of quantitative reasoning and then given
reinforcement experiences which develop and deepen in the student the habits of thinking which the student has been encouraged to develop. Taking one course is not enough to endow a student with a habit of mind, but completing a carefully devised program can provide sufficient practice to make a pattern of thought part of the student's intellectual tools. The construction of such a program requires leadership from the mathematics faculty and other faculty as well as commitment to the three other major points of this report: 1) The Department of Mathematics and Statistics is fully committed to providing all of the students of Georgia State University with these foundations in the core courses and providing the university with baseline data for its students' abilities to perform quantitative reasoning. In particular, the department will use placement testing to help determine appropriate entry into the quantitative literacy program; and, provide foundational experience(s) within (usually) the first year of the student's college work.

1 From the Preface of Quantitative Reasoning for College Graduates: A Complement to the Standards, Committee on the Undergraduate Program in Mathematics (CUPM), MAA. http://www.maa.org/past/ql/ql_toc.html

### Goals

**G 1: Quantitative Literacy**

Quantitative literacy is knowledge of and confidence with basic mathematical/analytical concepts and operations required for problem-solving, decision-making, and real-world applications.

**G 2: Translation**

Students effectively translate problem situations into their symbolic representations and use those representations to solve problems.

### Student Learning Outcomes/Objectives

**SLO 1: Computation (G: 1) (M: 1, 2, 3)**

Students effectively perform arithmetic operations, as well as reason and draw appropriate conclusions from numerical information.

**SLO 2: Translation (G: 1) (M: 1, 2, 3)**

Students effectively translate problem situations into their symbolic representations and use those representations to solve problems.

### Measures, Targets, and Findings

**M 1: PreQL Success Rates (O: 1, 2)**

Pre/Post testing of student abilities basic quantitative literacy. Our idea was to test during the first week, middle of the semester as well as at the end. This would tell us the length of time associated with their learning. We have currently implemented the first two weeks and end of the semester quizzing. Regular course embedded assessments are used for the "middle of the semester" time. We intend on studying how to improve this by tracking those students that progress through lower level sequences.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Computation**

Targets for the QL quizzes:

- 50% response rate
- 70% success rate

**Findings 2010-2011 - Target: Partially Met**

Quantitative Literacy quizzes were made available to all Math1070, 1101, 1111, 1113, and 2211 students this past academic year (both at the beginning of the semester and at the end of the semester). Completing the quizzes was voluntary with bonus points to tests awarded for each correct response. It was thought that this would encourage students to engage the assessment with an honest effort. Our goal of response rates of 50% were met by Math1070, Math 1111 and 2211 in the fall and spring, partly by Math1113. Many Math1101 (fall 2010) instructors reported the inability to access the quiz result report receiving the following error: An unexpected system exception has occurred. Most instructors were unwilling to pull the data by hand as this is an extremely time consuming.

**Target for O2: Translation**

Targets for the QL quizzes:

- 50% response rate
- 70% success rate

**M 2: PostQL Success Rates (O: 1, 2)**

As can be readily seen from the tables above, the “Betty and Wilma” problem (on the Post QL) is found to be more difficult by students than the “Ducks and Cows” problem (on the Pre QL). After reviewing some students' solutions, the error most common is assessment with an honest effort. Our goal of response rates of 50% were met by Math1070, Math 1111 and 2211 in the fall and spring, partly by Math1113. Many Math1101 (fall 2010) instructors reported the inability to access the quiz result report receiving the following error: An unexpected system exception has occurred. Most instructors were unwilling to pull the data by hand as this is an extremely time consuming.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Computation**

Targets for the QL quizzes:

- 50% response rate
- 70% success rate
**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Improve Response and Success Rates
Better communicate with all instructors (especially GTAs) the importance of providing the students with these QL Quizzes. Instructors should emphasize that students will receive bonus points if they take QL Quizzes. Track students to see how many are progressing from Math1070, Math 1111, 1113 to 2211 to see if “seeing” the quizzes more than once is inflating the success rates of later classes.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium

#### Relationships (Measure | Outcome/Objective):
- **Measure:** PreQL Success Rates
- **Outcome/Objective:** Computation

#### Implementation Description:
Course coordinators will implement their strategies for increasing student participation in the fall semester.

- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Yichuan Zhao

### Improve Response and Success Rates
Better communicate with all instructors (especially GTAs) the importance of providing the students with these QL Quizzes. Instructors should emphasize that students will receive bonus points if they take QL Quizzes. Check the improvement for increasing the participation after using the strategies.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium

#### Implementation Description:
Course coordinators currently implement their strategies for increasing student participation.

- **Responsible Person/Group:** Yichuan Zhao

---

**Analysis Questions and Analysis Answers**

#### ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In Fall 2010, the Math1070 has been changed to new teaching model. The assessment of pre/post QL is much easy to access compared to previous year. The response rate and success rate increased much. But, we continue to be challenged by ULearn itself – there are often problems exporting the data if more students get a problem wrong than right in Math2211 and Math1101 (Fall, 2010). In Spring 2011 Math1101 is changed to MyMathLab for online homework, quizzes, pre/post QL, etc. It makes a little better response results. We continue to adopt the new teaching and assessment methods in the coming academic year.

#### ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Math1070 adopts new teaching model in Fall 2010. The success rates and response rates of pre/post QL have improvement. Moreover, Math1111 and math1113 have been successful based on the new teaching model. It is helpful for Math1101 and Math2211 to adopt this new model. Also, students are finding it extremely difficult to "blend" different areas of mathematics as is exhibited by the two geometry problems (find the area of an inscribed square or circle). Instructors of these courses will try to incorporate more "blended" types of problems in the coming year.

#### ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

MATH 1070 adopts new teaching model with 50 minute lecture and at least 3 hour lab work. The response rate and success rate of QL quizzes improved a little with mixed success. We expect that the new MyMathLab will be more successful in the coming year.

#### ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
Since Math 1070, 1111 and 1113 have shown the greatest positive changes in success which of the particular pedagogical elements of those classes is contributing to these changes needs to be identified. The obvious differences are the overall redesign of the classes and the use of problem solving activities.

#### ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Closer coordination between the Director of Undergraduate Studies, the course coordinators and the instructors of the all courses will be put in place to try to find good ways to increase the response rates and success rates of QL quizzes, in particular for the Math1101 course.

<thead>
<tr>
<th>Mission / Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics is one of the great unifying themes in our modern culture. It is a language, a science, an art form, and a tool of tremendous power. The Department of Mathematics and Statistics, in its courses for both majors and non-majors, seeks to introduce students to this vast area of knowledge and to show them how mathematics can be used to solve problems. The overarching goals of any program in mathematics are that mathematics instruction should (from MAA's Source Book for College Mathematics Teaching, Schoenfeld, 1990): Provide students with a sense of the discipline of mathematics. Develop student's understanding of important concepts in core areas of mathematics. Develop student's ability to explore problem situations in a range of settings, at several levels of difficulty, and with a variety of methods. Help students to develop a mathematical point of view – perceive and represent structure and structural relationships. Help student's to develop the ability to read and use mathematical literature and reference material.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Goals</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>G 1: Problem-solving</strong> Students will learn to solve practically important problems</td>
</tr>
<tr>
<td><strong>G 2: Knowledge of the discipline</strong> Students will gain broad knowledge of the discipline</td>
</tr>
<tr>
<td><strong>G 3: Positions in the discipline</strong> Students will be prepared for positions in the discipline</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Student Learning Outcomes/Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SLO 3: Technology (G: 1) (M: 4)</strong> The ability to use technology to either solve concrete mathematical problems or present their results.</td>
</tr>
<tr>
<td><strong>SLO 5: Ability to consult and understand the specialized literature in their major (G: 2) (M: 1)</strong> The ability of the students to consult a mathematical journal and identify a scientific work that addresses their needs; the ability to summarize the main points of the work consulted.</td>
</tr>
<tr>
<td><strong>SLO 7: Mathematical proofs (G: 3) (M: 2)</strong> The ability to read, analyze, write and present mathematical proofs, which represent the foundation of mathematics.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Measures, Targets, and Findings</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>M 1: Review project (O: 5)</strong> Review project designed to measure the student ability to professionally evaluate an article published in a mathematical journal in their field. Source of Evidence: Project, either individual or group</td>
</tr>
<tr>
<td><strong>Target for O5: Ability to consult and understand the specialized literature in their major</strong> ALL students in the capstone course, Math 4991 (Senior Seminar), were asked to consult a reputable undergraduate mathematical journal and select an article based on their overall mathematical interests. Then they were asked to write a detailed mathematical review of that article.</td>
</tr>
</tbody>
</table>

**Findings 2010-2011 - Target: Partially Met**

The students in Math 4991 were given access via the GSU Library to a reputable undergraduate journal which they browsed based upon their interests. The students selected an article of their choice for review. The students were taught how to write a mathematical review and then were asked to write one for the article they chose. Before the final submission, they were allowed to submit a preliminary version of their work to get feedback. Out of 17 students, all but one completed this task successfully.

**M 2: In-class presentations (O: 7)**

In-class presentations designed to measure critical thinking, oral, and writing skills necessary for reading, analyzing and presenting mathematical proofs.

Source of Evidence: Presentation, either individual or group
Target for O7: Mathematical proofs

ALL students in the capstone course, Math 4991 (Senior Seminar), were asked to give two in-class presentations on a topic from the textbook involving mathematical proofs, and the other on a research topic.

Findings 2010-2011 - Target: Partially Met

In Math 4991 (Senior Seminar), the first presentation, done in a classroom setting, was 30 minute long. It was on a chapter form a mathematical textbook containing a multistep analytical proof. The second, research, presentation was on a topic individually chosen by each student. It was 20 minute long. All students completed successfully these requirements, with the majority of students scoring B or better on these two assignments. Out of 17 students, only one student did not score C or better, and this was on the research presentation.

M 4: Technology Projects (O: 3)

Technology Projects designed to measure the student ability to use Mathematica, Matlab, or Maple for solving mathematical problems of general interest, as well as their ability to use LATEX in preparing mathematical presentations.

Source of Evidence: Project, either individual or group

Target for O3: Technology

In Spring 2011, all students in the capstone course, Math 4991 (Senior Seminar), were required to learn how to use Mathematica to solve practically oriented problems. All students were required to learn how to use LATEX and use it, together with BEAMER, in a research presentations.

Findings 2010-2011 - Target: Met

Math 4991 (Senior Seminar) was taught in a classroom with computers and projectors. The computers had the most recent version of Mathematica and also Latex. All students completed successfully a Mathematica project that required them to show understanding on the most common applications of the program. The Latex project was to prepare in BEAMER a research presentation on a top of their choice and present their work in front of the class.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Engagement of the Undergraduate Mathematics Commit

Undergraduate Mathematics Committee will play an active role in the development of the assessment program for Math BS in AY 2011-2012. Members of the committee will discuss effective ways to perform assessment.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium
Projected Completion Date: AY11-12
Responsible Person/Group: Dr. Enescu (the chair of the Undergraduate Mathematics Committee)

Improvement of student proof writing skills

We continue to make the prerequisite courses, Math 3435 (Introductory Linear Algebra) and Math 3000 (Bridge to Higher Mathematics), significantly more effective in order to give our students a better opportunity to master their proof writing skills and to integrate their knowledge in the subsequent coursework. That will help our students to succeed in the capstone Senior Seminar (4991) course as well as in their future research and teaching work. In particular, students will be much better prepared to comprehend and perform mathematical proofs.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: In-class presentations | Outcome/Objective: Mathematical proofs
Implementation Description: AY11-12
Projected Completion Date: 05/2012
Responsible Person/Group: Dr. Guantao Chen (chair of the Department)

Introduction to the software

Students should be introduced to various types of mathematics software, which is needed 1. to solve mathematical problems numerically and display the results (Maple, Matlab, Geometry Pad); 2. to typeset a project report, a paper, or any other math text (LaTeX); 3. to make a quality presentation on a topic in undergraduate math (LaTeX-Beamer, LaTeX-Proseminar). The Department now has all the necessary resources. Students learn various types of software in Math 4991 as well as in some elective courses. Also the department will continue to actively support Mathematics and Statistics club and an undergraduate research program (RIMMES). Both of these have become a focus of interest among math majors. During the RIMMES final conference students make presentations using LaTeX-Beamer, LaTeX-Proseminar. They perform numerical simulations for their research projects with Matlab and other software.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Technology Projects | Outcome/Objective: Technology
Implementation Description: AY11-12
Projected Completion Date: 05/2012
Responsible Person/Group: Dr. Guantao Chen, the Department chair
Additional Resources: Math 4991 (Senior Seminar) should always be taught in a computer lab. Maple, Matlab and LaTeX must be installed on every machine.

2010-2011 Mathematics Education MEd
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Master of Education (MED) in Mathematics Education (MTE) is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MED-MTE program is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge, and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities. The MED-MTE provides for master’s level study in mathematics education pedagogy and mathematics content and leads to T-5 certification in secondary Mathematics Education (grades 6-12). The program ensures that candidates gain increased subject matter knowledge and pedagogical knowledge, demonstrate success in bringing middle and high school students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content. The program's underlying framework is constructivism (and aligned with the NCTM Standards), which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban mathematics education.

Goals
G 1: Informed and Knowledgeable to Teach
Candidates are informed educators who have expert knowledge of the content needed to teach Mathematics in Grades 6-12.

G 2: Knowledge, Skills, and Dispositions
Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching Mathematics in Grades 6-12.

G 3: Highly Effective Educators
Candidates are highly effective educators whose teaching practices have a measurable impact on the Mathematics learning of their students.

Student Learning Outcomes/Objectives
SLO 1: Knowledge of Mathematics and NCTM Standards (G: 1) (M: 1, 2)
Candidates have knowledge and understanding of mathematics content and process skills (NCTM Standards), the history and evolution of the mathematics, the philosophical foundations, an extensive range of advance mathematics content. (Goal 1) (Key Assessment - Content Knowledge: Portfolio Standards 1-4)

SLO 2: Diverse Learning Environments (G: 2) (M: 2, 4)
Candidates create learning environments which promote respect for and support of individual differences of ethnicity, race, language, culture, gender, and ability through planning and implementation of a wide range of instructional methods, and curriculum materials and view teacher-researcher models of inquiry, professional development, and collaboration with colleagues as career-long efforts and responsibilities. (Goal 2) (Key Assessment - Professional and Pedagogical Knowledge and Skills: Portfolio Standards 5-8)

SLO 3: Dispositions (G: 2) (M: 2, 4)
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. (Goal 2) (Key Assessment - Dispositions: Portfolio)

SLO 4: Student Learning and Assessment (G: 3) (M: 3)
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Goal 3) (Key Assessment - Impact on Student Learning: Portfolio Standard 9)

Measures, Targets, and Findings
M 1: Portfolio Standard 3 and 8 (O: 1)
Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Knowledge of Mathematics and NCTM Standards
Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

Findings 2010-2011 - Target: Met
100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2010-2011 academic
cycle marks the fourth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

**M 2: Portfolio Standard 5, 6, and 7 (O: 1, 2, 3)**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Knowledge of Mathematics and NCTM Standards**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

**Findings 2010-2011 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

**Target for O2: Diverse Learning Environments**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

**Findings 2010-2011 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

**Target for O3: Dispositions**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

**Findings 2010-2011 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

**M 3: Portfolio 9 (O: 4)**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Student Learning and Assessment**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

**Findings 2010-2011 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

**M 4: Portfolio Standard 2, 4, 11 (O: 2, 3)**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Diverse Learning Environments**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

**Findings 2010-2011 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

**Target for O3: Dispositions**

Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

To continue monitoring student/program outcomes

The MED-MTE is a new program design that went into full implementation during 2007-2008; the 2008-2009 AY marks the second AY in which all students completed the program redesign. Currently, all students who completed the MED-MTE redesign program either met or exceeded the goals/objectives of the new program redesign. The MED-MTE faculty will continue to monitor the impact of the redesigned program. At this time, given that all MED-MTE program completers/graduates are meeting or exceeding the program goals/objectives, there are no new Action Plans required at this time, except for continued monitoring of student/program outcomes.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: To continue to monitor student/program outcomes
Projected Completion Date: 09/2009
Responsible Person/Group: All MED-MTE faculty, specifically the MED-MTE coordinator (currently, Dr. David W. Stinson)
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Currently, all students who completed the MED-MTE redesign program either met or exceeded the goals/objectives of the new program redesign. The MED-MTE faculty will continue to monitor the impact of the redesigned program. At this time, given that all MED-MTE program completers/graduates are meeting or exceeding the program goals/objectives, there are no new Action Plans required at this time, except for continued monitoring of student/program outcomes.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: To continue to monitor student/program outcomes
Projected Completion Date: 09/2009
Responsible Person/Group: All MED-MTE faculty, specifically the MED-MTE coordinator (currently, Dr. David W. Stinson)
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

To continue monitoring student/program outcomes
The MED-MTE is a new program design that went into full implementation during 2007-2008; the 2009-2010 AY marks the third AY in which all students completed the program redesign. Currently, all students who completed the MED-MTE redesign program either met or exceeded the goals/objectives of the new program redesign. The MED-MTE faculty will continue to monitor the impact of the redesigned program. At this time, given that all MED-MTE program completers/graduates are meeting or exceeding the program goals/objectives, there are no new Action Plans required at this time, except for continued monitoring of student/program outcomes.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
100% of students met target, scoring either Intermediate or Advanced on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education—Mathematics Education (MED-MTE) degree program. The program will continue to be monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target. There were no changes and/or modifications made or planned with assessment procedures. Moreover, program is being deactivated fall semester 2011.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
100% of students met target, scoring either Intermediate or Advanced on Learning Outcome/Objective. The 2010-2011 academic cycle marks the fourth year of the program redesign in the Master of Education—Mathematics Education (MED-MTE) degree program. The program will continue to be monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target. There were no changes and/or modifications made or planned with assessment procedures. Moreover, program is being deactivated fall semester 2011.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A
The mission of the Master of Education (MED) in Mathematics is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools.

The M.Ed major in Mathematics Education provides for master's level study in Mathematics Education and Mathematics content and leads to T-5 certification in secondary Mathematics (grades 6-12). The program ensures that candidates gain increased subject matter knowledge and pedagogical knowledge, demonstrate success in bringing middle and high school students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content.

The program's underlying framework is constructivism, which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban Mathematics education.

Goals

G 1: Content Knowledge
The goal of the M.Ed Online Mathematics Education program is to help candidates to be informed educators who have expert knowledge of the content needed to teach Mathematics in Grades 6-12.

G 2: Pedagogical Content Knowledge and Dispositions
Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching Mathematics in Grades 6-12.

G 3: Effects on P-12 Student Learning
Candidates are highly effective educators whose teaching practices have a measurable impact on the Mathematics learning of their students.

Student Learning Outcomes/Objectives

SLO 1: Demonstrates strong content knowledge (G: 1) (M: 1)
Students in MEd. Online Program in Mathematics Education are expected have strong knowledge and understanding of Algebra, geometry, statistics, problem solving and, history and evolution of mathematics.

SLO 2: Demonstrates pedagogical content knowledge (G: 2) (M: 2, 3, 4)
Students in MEd. Online Program in Mathematics Education are expected implement successful techniques to promote higher order thinking and effective problem solving skills with using student centered, technology-intensive and differentiated instruction in diverse classroom settings.

SLO 3: Understands and uses effective assessment techniques (G: 3) (M: 2)
Students in the MEd. Online Mathematics Education Program are expected to use a variety of assessment techniques to evaluate students' academic, social and personal development in all aspects of mathematics.

SLO 4: Demonstrates effective dispositions (G: 2) (M: 3, 5)
Students in the MEd. Online Mathematics Education Program are expected to demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision.

Measures, Targets, and Findings

M 1: Portfolio section "Mathematical Preparation" (O: 1)
Students are expected to complete a portfolio which will include a narrative and artifacts to demonstrate their mastery of the National Mathematics Standards. These sections of portfolio will provide documentation that students have met the majority of standards in the areas of content knowledge.

Source of Evidence: Capstone course assignments measuring mastery

Target for O1: Demonstrates strong content knowledge
Each student is required to pass the portfolio requirement in order to meet the requirements of the program. That is, each student must achieve a rating of at least "2" out of a possible "3" for each standard.

Findings 2010-2011 - Target: Met
100 percent of the students meet the expectations of this objective by getting at least 2 out of 3.

M 2: Portfolio section "Impact on Student Learning" (O: 2, 3)
Students are expected to complete a portfolio which will include a narrative and artifacts to demonstrate their mastery of the National Mathematics Standards. This section of portfolio will provide documentation that students have met the majority of standards in the areas of impact on student learning and assessment.

Source of Evidence: Project, either individual or group

Target for O2: Demonstrates pedagogical content knowledge
Each student is required to pass the portfolio requirement in order to meet the requirements of the program. That is, each student must achieve a rating of at least "2" out of a possible "3" for each standard.
Findings 2010-2011 - Target: Met

100 percent of the students meet the expectations of this objective. 17% of the students exceed the expectations by getting 3 out of 3.

M 3: Microteaching Video (O: 2, 4)

Students are expected to videotape themselves while teaching and write a reflection about their teaching.

Source of Evidence: Video or audio tape (music, counseling, art)

Target for O2: Demonstrates pedagogical content knowledge

Students are expected to get 7 out of 10 to achieve this goal.

Findings 2010-2011 - Target: Met

100 percent of the students meet the expectations of this objective.

M 4: Portfolio Section "Teacher Preparation and Connections" (O: 2)

Students are expected to complete a portfolio which will include a narrative and artifacts to demonstrate their mastery of the National Mathematics Standards. These sections of portfolio will provide documentation that students have met the majority of standards in the areas of pedagogical knowledge which will include planning, instructional skills, and content knowledge.

Source of Evidence: Portfolio, showing skill development or best work

Target for O2: Demonstrates pedagogical content knowledge

Each student is required to pass the portfolio requirement in order to meet the requirements of the program. That is, each student must achieve a rating of at least "2" out of a possible "3" for each standard.

Findings 2010-2011 - Target: Met

100 percent of the students meet the expectations of this objective. 50% of the students exceed the expectations by getting 3 out of 3.

M 5: Unit-wide Dispositions Rubric (O: 4)

Unit-wide Dispositions Rubric

Source of Evidence: Academic direct measure of learning - other

Target for O4: Demonstrates effective dispositions

Students are expected to get at least 7 out of 10.

Findings 2010-2011 - Target: Met

100 percent of the students meet the expectations of this objective.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action Plan: Clinical Practice

Data show that all students met the expectation after one or more resubmissions of the assignment. Students will be provided a sample video to make sure that they have a clear understanding of the expectations.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: Plan should be fully implemented by the end of the fall semester 2011.
Projected Completion Date: 12/2011
Responsible Person/Group: All faculty teaching in the MEd. Online Program in Mathematics Education.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Action Plan: Dispositions

All students met this requirement. We will continue working closely with students to make sure they understand the standard well and work accordingly.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Unit-wide Dispositions Rubric | Outcome/Objective: Demonstrates effective dispositions
Implementation Description: During regular advisement sessions, students will be informed about the requirement and encouraged to work accordingly.
Projected Completion Date: 12/2012

Action Plan: Effects on P-12 Learning

Data show that 83% of the students met the expectation and 17% of the students exceed the expectations after one or more resubmissions of the portfolio. Although the portfolio standards were assigned as a part of the course EDMT 7560-Theory and Pedagogy of Mathematics Instruction students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. In order to make sure that students have a clear understanding of the standards, more emphasis will be given to the portfolio standards during the advisement sessions that we hold once every semester.
Action Plan: Impact on Student Learning
Data show that 83% of the students met the expectation and 17% of the students exceed the expectations after one or more resubmissions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content of EDMT 7560-Theory and Pedagogy of Mathematics Instruction and EDMT 7360-Integration of Technology in Mathematics Instruction.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Portfolio section "Impact on Student Learning" | Outcome/Objective: Demonstrates pedagogical content knowledge

Projected Completion Date: 12/2012

Action Plan: Mathematical Preparation
All students met this requirement after one or more revisions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content of MATH 6301-College Geometry, MATH 6435-Linear Algebra and MATH 6547-Mathematical Statistics I.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Portfolio section "Mathematical Preparation" | Outcome/Objective: Demonstrates strong content knowledge

Projected Completion Date: 12/2012

Action Plan: Microteaching Video
All students met this requirement. Clear instructions were helpful for students to meet this expectation. However, sample teaching video will be provided to help students to have a better understanding of the expectation.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Microteaching Video | Outcome/Objective: Demonstrates pedagogical content knowledge

Projected Completion Date: 12/2012

Action Plan: Planning (Pedagogical Knowledge and Skills)
Data show that 50% of the students met the expectation and 50% of the students exceed the expectations after one or more resubmissions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. More emphasis will be given to the portfolio standards during the advisement sessions that we hold each semester to make sure that students have a clear understanding of them.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Implementation Description: Plan should be fully implemented by the end of the fall semester 2011.

Projected Completion Date: 12/2011
Responsible Person/Group: All faculty teaching for M.Ed in Mathematics Education (Online)
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Action Plan: Teaching Preparation and Connections
Data show that all of the students met the expectation after one or more resubmissions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content of EDMT 7560-Theory and Pedagogy of Mathematics Instruction

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Portfolio Section "Teacher Preparation and Connections" | Outcome/Objective: Demonstrates pedagogical content knowledge

Projected Completion Date: 12/2012
**Analysis Questions and Analysis Answers**

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?  
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?  
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?  
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?  
N/A

**ACADEMIC PROGRAM QUESTION 1:**  
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?  
The goals, outcomes and measures for the program were modified to align with key assessments for the program.

**ACADEMIC PROGRAM QUESTION 2:**  
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.  
Based on the data, we will do a curriculum change to provide more opportunities to extent their knowledge on curriculum and assessment techniques in mathematics education. The curriculum change will require to develop a new mathematics education methods course to address those issues.

**ADMINISTRATIVE DEPT QUESTION 1:**  
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?  
N/A

**ADMINISTRATIVE DEPT QUESTION 2:**  
What have you learned from your assessment this year (2010-2011)?  
N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**  
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?  
N/A

---

**Georgia State University**  
**Assessment Data by Section**  
**2010-2011 Mathematics Education--TEEMS MAT**  
*As of: 12/12/2016 04:11 PM EST*  
*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**  
The mission of the Master of Arts in Teaching program for Mathematics is aligned with the mission of the GSU PEF, which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the TEEMS program in Mathematics is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

**Goals**  
**G 2: Commit to Achievement of Urban Students**  
The teacher candidate in MAT Mathematics Education program will be committed to the achievement of the unique social and academic needs of diverse adolescent/secondary level students in urban environments.

**G 4: Commit to the Learning Community**  
The teacher candidate will believe that all students can learn and being community-oriented educators, they will continue to pursue professional development.

**G 1: Become Content & Pedagogical Knowledge Experts**  
The teacher candidate will be knowledgeable in mathematics content areas, have the pedagogical knowledge to create effective
teaching environments, and to include the use of innovative technology as a part of their instruction, curriculum, and reflective practices.

**G 3: Facilitate Learning in Urban Environments**
The teacher candidate will be knowledgeable about learning environments for diverse learners and be able to facilitate learning in such settings.

### Outcomes/Objectives

<table>
<thead>
<tr>
<th>O/O 1: Demonstrate pedagogical content knowledge (G: 1) (M: 1, 7, 8, 11, 12, 14)</th>
</tr>
</thead>
</table>
The teacher candidate demonstrates pedagogical content knowledge in Mathematics with technology integration to create and assess rigorous, relevant, and engaging student-centered lessons. |

<table>
<thead>
<tr>
<th>O/O 2: Demonstrate Sensitivity to Diverse Learners' Needs (G: 2) (M: 2, 6, 7, 8, 13, 14, 15)</th>
</tr>
</thead>
</table>
The teacher candidate possesses a strong knowledge base about and demonstrate sensitivity to the social and academic needs of diverse adolescent/secondary level students |

<table>
<thead>
<tr>
<th>O/O 3: Can Effectively Create Productive Learning Environments for Diverse Learners (G: 3) (M: 3, 6, 7, 8, 10, 13, 14, 15)</th>
</tr>
</thead>
</table>
The teacher candidate creates a productive and responsive learning environment for diverse learners while providing for students with exceptionalities. |

<table>
<thead>
<tr>
<th>O/O 4: Demonstrates that All Learners can Learn (G: 2, 3) (M: 4, 7, 8, 10, 14, 15)</th>
</tr>
</thead>
</table>
The teacher candidate understands and demonstrates the belief that all students can learn. |

<table>
<thead>
<tr>
<th>O/O 5: Demonstrate the Attitude of a Reflective Educator (G: 2, 4) (M: 5, 9, 10, 16)</th>
</tr>
</thead>
</table>
The teacher candidate demonstrates an efficacious attitude as a community-oriented educator who continues reflection and individual professional development throughout their career. |

### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: INTASC Standard 1 Rating from program portfolio (O: 1)</th>
</tr>
</thead>
</table>
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in livetext for Standard 1. |
Source of Evidence: Portfolio, showing skill development or best work |
**Target for** O1: Demonstrate pedagogical content knowledge |
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification. |
**Findings 2010-2011 - Target:** Met |
90% of the student population is at or above target. Plan to maintain procedures. |

<table>
<thead>
<tr>
<th>M 2: INTASC Standard 2 Rating from program portfolio (O: 2)</th>
</tr>
</thead>
</table>
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in livetext for Standard 2. |
Source of Evidence: Portfolio, showing skill development or best work |
**Target for** O2: Demonstrate Sensitivity to Diverse Learners' Needs |
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification. |
**Findings 2010-2011 - Target:** Met |
95% met target. |

<table>
<thead>
<tr>
<th>M 3: INTASC Standard 3 Rating from program portfolio (O: 3)</th>
</tr>
</thead>
</table>
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in livetext for Standard 3. |
Source of Evidence: Portfolio, showing skill development or best work |
**Target for** O3: Can Effectively Create Productive Learning Environments for Diverse Learners |
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification. |
Findings 2010-2011 - Target: Met
90% met target.

M 4: INTASC Standard 4 Rating from program portfolio (O: 4)
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 4.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O4: Demonstrates that All Learners can Learn**
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met
95% met target.

M 5: INTASC Standard 5 Rating from program portfolio (O: 5)
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 5.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O5: Demonstrate the Attitude of a Reflective Educator**
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met
95% met target.

M 6: INTASC Standard 6 Rating from program portfolio (O: 2, 3)
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 6.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Demonstrate Sensitivity to Diverse Learners' Needs**
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met
95% met target.

**Target for O3: Can Effectively Create Productive Learning Environments for Diverse Learners**
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met
90% met target.

M 7: INTASC Standard 7 Rating from program portfolio (O: 1, 2, 3, 4)
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 7.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrate pedagogical content knowledge**
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met
100% met target.

**Target for O2: Demonstrate Sensitivity to Diverse Learners' Needs**
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.
setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met
95% met target.

**Target for O3: Can Effectively Create Productive Learning Environments for Diverse Learners**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met
90% met target.

**Target for O4: Demonstrates that All Learners can Learn**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met
95% met target.

**M 9: INTASC Standard 9 Rating from program portfolio (O: 1, 2, 3, 4)**

A portfolio rating for standard 9 will be derived from each teacher candidate's written and oral rationales, explaining how portfolio artifacts demonstrate student competencies.

### Target for O5: Demonstrate the Attitude of a Reflective Educator

90% met target.
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met

95% met target.

**M 10: INTASC Standard 10 Rating from program portfolio (O: 3, 4, 5)**

Supervisors’ final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in livetext for Standard 10.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O3: Can Effectively Create Productive Learning Environments for Diverse Learners**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met

90% met target.

**Target for O4: Demonstrates that All Learners can Learn**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met

95% met target.

**Target for O5: Demonstrate the Attitude of a Reflective Educator**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

### Findings 2010-2011 - Target: Met

95% met target.

**M 11: KA#1: Georgia Content Test (O: 1)**

The GACE content tests is a requirement for certification and completing the master’s degree.

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Demonstrate pedagogical content knowledge**

90% of candidates will pass the GACE content Tests [#022 & #023]

### Findings 2010-2011 - Target: Met

100% met target

**M 12: KA#2 Content Knowledge (O: 1)**

The content knowledge of the candidates is enhanced when they complete 5 or more content courses for the master's degree.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrate pedagogical content knowledge**

90% of candidates will meet the target of successfully completing 5 content courses.

### Findings 2010-2011 - Target: Met

100% met target.

**M 13: KA#3 Planning (O: 2, 3)**

Evidence of planning will be demonstrated in the livetext portfolio.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Demonstrate Sensitivity to Diverse Learners’ Needs**

90% of the candidates are expected to meet the target.

### Findings 2010-2011 - Target: Met

95% met target.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Increasing mathematics proficiency for teaching
Faculty members will focus on developing and enhancing teachers proficiency for teaching mathematics. Two courses are being developed to address this national and local concern in light of student learning. In the meanwhile the program is being maintained and monitored.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Two courses are being developed and must be sent for approval before implementation.
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Mathematics Education Faculty
- **Additional Resources:** NA
- **Budget Amount Requested:** $0.00 (no request)

### Maintain and Modify Syllabi
Program faculty will maintain the modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2010-2011 academic year and beyond.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** INTASC Standard 1 Rating from program portfolio
  - **Outcome/Objective:** Demonstrate pedagogical content knowledge
- **Implementation Description:** Continuous until changes are required.
- **Responsible Person/Group:** MSIT Mathematics Education Faculty

### Maintain and Monitor Sequence of Activities
Program faculty will maintain and monitor the sequence of modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2009-2010 academic year and beyond.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** INTASC Standard 3 Rating from program portfolio
  - **Outcome/Objective:** Can Effectively Create Productive Learning Environments for Diverse Learners
- **Implementation Description:** Continuous until changes are required.
- **Responsible Person/Group:** MSIT Mathematics Education Faculty

### Maintain and Monitor Sequence of Activities
Program faculty will maintain and monitor the sequence of modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2009-2010 academic year and beyond.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** INTASC Standard 2 Rating from program portfolio
  - **Outcome/Objective:** Demonstrate Sensitivity to Diverse Learners’ Needs
  - **Measure:** KA#1: Georgia Content Test
  - **Outcome/Objective:** Demonstrate pedagogical content knowledge
  - **Measure:** KA#2 Content Knowledge
  - **Outcome/Objective:** Demonstrate pedagogical content knowledge
- **Implementation Description:** Continuous until changes are required.
- **Responsible Person/Group:** MSIT Mathematics Education Faculty

---

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

Major accomplishment is that we maintained the students’ achievement of passing the GACE II exams (100%) and completing all content requirements for certification as previous years.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

Students came into the program with several misconceptions of how to teach, classroom management skills, and within content knowledge. Towards the end of student teaching students have cleared up most, if not all, of their misconceived ideas.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

While there is still room for improvement in all areas, two areas are of immediate concerns: (1) Creating Productive Learning Environments for Diverse Learners and (2) demonstrating pedagogical content knowledge. Assistance needed would be efforts to reconstruct the program to include a course that facilitates pre-service and in-service teachers’ creativity for producing better learning environments for diverse learners and demonstration of effective pedagogical content knowledge.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**

Within the pedagogical methods courses, faculty has initiated and integrated efforts of facilitating pedagogical content knowledge. However, those efforts need to be more elaborate to be more effective.

---

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Several assessments are in livetext to gather data from our courses. These assessments are working effectively. The targets were revised to demand reaching higher levels in the courses and program.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The impact of the data obtained from assessment findings has been positive. The pedagogy courses in the program will be revised for greater impact.

**ADMINISTRATIVE DEPT QUESTION 1:**

Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:**

What have you learned from your assessment this year (2010-2011)?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**

What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A
as creative, scientifically literate citizens.

### Goals

**G 1: Assess graduate curriculum and learning outcomes**

Develop and assess learning outcomes for the program using specific outcomes for courses and thesis work.

### Student Learning Outcomes/Objectives

**SLO 1: Demonstrate advanced critical thinking skills. (M: 5, 8, 11)**

Graduates should demonstrate advanced critical thinking skills. This includes the ability to see connections across fields within mathematics and statistics as well as the ability to see applications of mathematics and statistics to other disciplines. Students should develop a mathematical intuition about “how things work” in one or more field within the discipline. This also includes the ability to draw conclusions from data, and to develop an appropriate approach to solving problems. Students should be able to extend solution methods to problems not exactly like in the book, both in a theoretical and applied setting.

**SLO 2: Demonstrate communication skills, oral and written (M: 6, 15)**

Graduates should demonstrate communication skills, both oral and written. This includes the ability to explain ideas to nonspecialists.

**SLO 4: Demonstrate Analytical Skills (M: 1, 5, 8)**

The analytical skills in Statistics include skills to collect data, computer skills, and understanding research reports/articles.

**SLO 5: Demonstrate knowledge of the discipline. (M: 2, 3, 4, 6, 7, 13)**

Graduates should demonstrate knowledge of the discipline. This includes the ability to understand research problems in one or more areas of mathematics and statistics. Students should have an appreciation for the history of the subject, and the sequence of results that has led to the current state of development of one or more areas of mathematics and statistics.

### Other Outcomes/Objectives

**O/O 3: Demonstrate quant reasoning and prob solving. (M: 1, 5, 8, 9, 11)**

Graduates should demonstrate advanced quantitative reasoning and problem solving ability. This includes numerical, combinatorial and statistical competency.

### Measures, Targets, and Findings

**M 1: Demonstrate numerical competency. (O: 3, 4)**

Students demonstrate numerical, combinatorial and statistical competency.

Source of Evidence: Academic direct measure of learning - other

**M 2: See connections across fields. (O: 5)**

Students the ability to see connections across fields within mathematics and statistics as well as the ability to see applications of mathematics and statistics to other disciplines.

Source of Evidence: Senior thesis or culminating major project

**M 3: Understand research problems. (O: 5)**

Students show the ability to understand research problems in one or more areas of mathematics and statistics.

Source of Evidence: Senior thesis or culminating major project

**M 4: Show an appreciation for history of mathematics. (O: 5)**

Students should have an appreciation for the history of the subject, and the sequence of results that has led to the current state of development of one or more areas of mathematics and statistics.

Source of Evidence: Academic direct measure of learning - other

**M 5: Extend solution methods. (O: 1, 3, 4)**

Students should be able to extend solution methods to problems not exactly like in the book, both in a theoretical and applied setting.

Source of Evidence: Academic direct measure of learning - other

**M 6: Expain ideas to nonspecialists. (O: 2, 5)**

Students show the ability to explain ideas to nonspecialists.

Source of Evidence: Senior thesis or culminating major project

**M 7: Develop a mathematical intuition. (O: 5)**

Students should develop a mathematical intuition about “how things work” in one or more field within the discipline.

Source of Evidence: Academic direct measure of learning - other

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Evaluation at thesis defense.**
For each thesis student, the thesis committee will evaluate all seven measures of achieved student program outcomes on a 5 point scale.

- **Established in Cycle:** 2005-2006
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** End of final exams for each semester.
- **Responsible Person/Group:** Thesis advisor for each student.

**Evaluate learning Outcomes Math 8110**
At the end of each semester, the instructor of Math 8110 shall evaluate the extent to which each student has fulfilled each learning outcome for the course.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Responsible Person/Group:** Instructor of Math 8110

**Evaluate learning outcomes: Math 8120**
At the end of each semester, the instructor of Math 8120 shall evaluate the extent to which each student has fulfilled each learning outcome for the course.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Responsible Person/Group:** Instructor of Math 812-

**Evaluate learning outcomes: Math 8200**
At the end of each semester, the instructor of Math 8200 shall evaluate the extent to which each student has fulfilled each learning outcome for the course.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Instructor of Math 8200

**Evaluate learning outcomes: Math 8220**
At the end of each semester, the instructor of Math 8220 shall evaluate the extent to which each student has fulfilled each learning outcome for the course.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Responsible Person/Group:** Instructor of Math 8220

**Evaluate learning outcomes: Math 8610**
At the end of each semester, the instructor of Math 8610 shall evaluate the extent to which each student has fulfilled each learning outcome for the course.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
Evaluate learning outcomes: Math 8620
At the end of each semester, the instructor of Math 8620 shall evaluate the extent to which each student has fulfilled each learning outcome for the course.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Responsible Person/Group: Instructor of Math 8620

Evaluation at thesis defense.
An evaluation form should be used to evaluate each student’s thesis.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Analysis Questions and Analysis Answers

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
Fair
Good
Very Good
Excellent
Outstanding
1. Is the thesis/dissertation clearly written and well organized? 9 3 Comments: Most of the theses/dissertations are clearly written and well organized. But some of them still need improvement 75% 25% What is the main contribution of the thesis/dissertation research? 1 8 3 Comments: 25% of the theses proposed novel mathematical/statistical methods. But most of the theses were based on simulation and data analysis results 8% 67% 25%. Does the candidate have comprehensive knowledge on the thesis/dissertation research? 2 5 5 Comments: Majority (84%) of the students have comprehensive knowledge on the thesis/dissertation research 16% 42% 42% 4. Is the thesis/dissertation technically sound and the main result justified? 3 4 5 Comments: Majority (75%) of the theses had sound results. But some of the theses results still need simulation/theoretical justifications. 25% 33% 42% 5. Are the results in the thesis/dissertation published or publishable in a research journal? 5 3 4 Comments: 58% of the results in the thesis/dissertation are publishable in research journals after some revisions. 42% 25% 33%. What is the overall quality of the thesis/dissertation? 3 3 8 Comments: The overall quality of the theses/dissertations is very good to excellent. 25% 25% 50% 7. Thesis/dissertation committee’s recommendation: [ Pass / Fail ] 12 passes Comments: This assessment is based on 12 observations of thesis/dissertation defense results in 2011 Spring semester and Fall semester. The observed data indicate that the overall quality of the theses/dissertations is very good to excellent. But some improvements like the publication rate are still needed.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
We are going to continue to measure students’ achievements by assessing their theses/dissertations, research papers and publications. We expect that students will be more productive in publications We are going to use Math 8200 (Advanced Matrix Analysis) to assess (1) students' command of basic mathematical skills needed for advanced math studies and research, (2) the students’ ability to present mathematical ideas in logical, well organized fashion, (3) the students’ ability to apply matrix theory to solve concrete problems.

Georgia State University
Assessment Data by Section
2010-2011 MBA/MHA and Concentration in Health Administration MBA
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The vision of the Institute of Health Administration (IHA) within the J. Mack Robinson College of Business at Georgia State University is to be a premier master's level educator of future healthcare/business leaders. The flagship double degree MBA/MHA program is accredited by the AACS and CAHME (The Commision on Accreditation of Healthcare Management Education), the MBA is ranked 7th and MHA is ranked 34th nationally (USNEWSWR, 2009). The mission is to prepare graduates to assume managerial and leadership positions in health sector organizations through • A leading-edge curriculum that integrates business and health care knowledge, • The engagement in scholarly inquiry related to the improvement of the effectiveness, efficiency, and quality of health care services and the health care system, and • Providing and promoting professional service to the academic and health care communities.

Goals
G 1: Provide CAHME specified competency areas
Identify, analyze, and interpret economic, social, political, environmental, ethical, and medical issues affecting health care organizations.

G 2: Business skills and knowledge
This relate to the second domain of the HLA competency model.

G 3: Knowledge of the Healthcare Environment
This related to the first domain of the HLA competency model.

G 4: Develop leadership knowledge and skills
This is the fourth domain of our hybrid HLA competency model.
### G 5: Develop professionalism knowledge/skills
This is the third domain of our hybrid HLA competency model.

<table>

| **SLO 4:** Provide CAHME specified competency areas  
  This consists of the 4 domains, 26 competencies for CAHME. |
| **SLO 5:** Competency in Business skills and knowledge  
  This is the business competency in the MBA/MHA |
| **SLO 6:** Competency and Knowledge of the healthcare environment  
  This competency deals with the healthcare sector. |
| **SLO 7:** Competency in Leadership knowledge and skills  
  This competency is in the area of communication, motivation, empowerment, group participation and leadership, change management, and physician and other clinical relationships. |
| **SLO 8:** Competency in professionalism knowledge/skills  
  Competency in the areas of self-awareness and confidence; self-regulation and personal responsibility, honesty and integrity, public service, and life-long learning. |
| **SLO 9:** Develop real world experience in the HA field  
  This competency is to ensure that MBA/MHA students have real world experience. |

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assurance of competencies**
During AY 2010 the HA faculty will be mapping competencies based on the HLA model to specific course content of MHA and MBA courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** By the start of next academic year, a comprehensive mapping of all HLA-based competencies will be mapped to all MHA and MBA courses
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Dr. Pat Ketsche, Dr. Andy Summer, and all other HA faculty/staff

**Faculty referred to Center for Teaching and Learning**

Faculty member was referred to Center for Teaching and Learning for improvement. The faculty totally revised the course, changed texts and course format

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Chair

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

HA has further refined our competency model for CAHME accreditation. It consists of 4 domains, 26 competencies, and about 80 benchmarks for these competencies. AY11-12 is our self-study year.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on our assessment findings, particularly our HA Advisory Board and preceptors, we have planned for our curriculum a 3 semester hour capstone case course - HA 8680. Concomitantly, we have reduced the residency requirement by 3 semester hours.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Mental Health Counseling MS**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Goals**

**G 1: Overall Program Objective**

Reflect current knowledge and projected needs concerning counseling practice in a multicultural and pluralistic society. Students who are preparing to work as clinical mental health counselors will demonstrate the professional knowledge, skills, and practices necessary to address a wide variety of circumstances within the clinical mental health counseling context.

**Student Learning Outcomes/Objectives**

**SLO 1: Ethical and legal issues applied to mental health counseling (M: 1, 2, 3)**

Students in the Mental Health program will gain an understanding of ethical and legal considerations specifically related to the practice of clinical mental health counseling.

**SLO 2: Characteristic and behaviors that influence the counseling process (M: 4)**

Students will gain an understanding of the counseling process in a multicultural society, including counselor characteristics and behaviors that influence helping processes.

**SLO 3: Diversity and competence multicultural counseling (M: 5)**

Students will gain an understanding of the cultural context of relationships, issues, and trends in a multicultural society, including theories of multicultural counseling, identity development, and social justice

**SLO 4: Effects of crises, disasters and other trauma-causing events (M: 6)**

Students will gain an understanding of the nature and needs of persons at all developmental levels and in multicultural contexts, including effects of crises, disasters, and other trauma-causing events on persons of all ages.

**SLO 5: Group Work in Mental Health Counseling (M: 7)**

Students will be provided both theoretical and experiential understandings of group purpose, development, dynamics, theories,
methods, skills, and other group approaches in a multicultural society, including group leadership or facilitation styles and approaches, including characteristics of various types of group leaders and leadership styles.

**SLO 6: Principles of Mental Health Counseling including Advocacy in a Multicultural Diverse Society (M: 8)**

Students will gain knowledge of the principles of mental health, including prevention, intervention, consultation, education, and advocacy, as well as the operation of programs and networks that promote mental health in a multicultural society.

**SLO 7: Human Growth and Development (M: 9)**

Students will gain an understanding of the nature and needs of persons at all developmental levels and in multicultural contexts, including theories of individual and family development and transitions across the life span.

**SLO 8: Addiction and Addictive Behaviors (M: 10)**

Students will gain knowledge of theories and etiology of addictions and addictive behaviors, including strategies for prevention, intervention, and treatment.

**SLO 9: Diagnosis (M: 11)**

Students will gain knowledge of human behavior, including an understanding of developmental crises, disability, psychopathology, and situational and environmental factors that affect both normal and abnormal behavior.

**SLO 10: Crisis Intervention and Assessment (M: 12, 13)**

Students will gain knowledge of crisis intervention and suicide prevention models, including the use of psychological first aid strategies.

---

**Measures, Targets, and Findings**

**M 1: Four 3R Assignments (O: 1)**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Ethical and legal issues applied to mental health counseling**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

Findings 2010-2011 - Target: Met

100% of students enrolled in the Mental Health Counseling Program and who were taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) earned a minimum cumulative score of 80% on four 3R assignments.

**M 2: Four 3R Assignments (O: 1)**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Ethical and legal issues applied to mental health counseling**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

Findings 2010-2011 - Target: Met

100% of students enrolled in the Mental Health Counseling Program and who completed CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) earned a minimum cumulative score of 80% on four 3R assignments.

**M 3: Four 3R Assignments (O: 1)**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Ethical and legal issues applied to mental health counseling**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

Findings 2010-2011 - Target: Met

100% of students enrolled in the Mental Health Counseling Program and who completed CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) earned a minimum cumulative score of 80% on four 3R assignments.
Identity in Mental Health Counseling] earned a minimum cumulative score of 80% on four 3R assignments.

**M 4: Performance Video (O: 2)**

100% of all Mental Health Counseling Students enrolled in CPS 6410 (Basic Counseling Skills) will achieve a minimum score of 25 on the final performance video.

*Source of Evidence: Video or audio tape (music, counseling, art)*

**Target for O2: Characteristic and behaviors that influence the counseling process**

All students (100%) in the Mental Health Counseling program who enroll in CPS 6410 (Basic Counseling Skills) will achieve a minimum score of 25 on the final performance video.

**Findings 2010-2011 - Target: Met**

100% of all Mental Health Counseling Students enrolled in CPS 6410 (Basic Counseling Skills) achieved a minimum score of 25 on the final performance video.

**M 5: Group Cultural Presentation (O: 3)**

Students who are enrolled in CPS 7340 (SocioCultural Issues in Counseling and Psychological Services) must earn a minimum of 80% on the group presentation. This assignment requires a synthesis of multicultural models and developmental theories specific to a diverse community.

*Source of Evidence: Presentation, either individual or group*

**Target for O3: Diversity and competence multicultural counseling**

Students who are enrolled in CPS 7340 (SocioCultural Issues in Counseling and Psychological Services) must earn a minimum of 80% on the group presentation. This assignment requires a synthesis of multicultural models and developmental theories specific to a diverse community.

**Findings 2010-2011 - Target: Met**

All Students enrolled in CPS 7340 (SocioCultural Issues in Counseling and Psychological Services) earned a minimum of 80% on the group presentation.

**M 6: Midterm and Final Examination Multiple Choice Questions (O: 4)**

90% of all Mental Health Students enrolled in CPS 8470 (Crisis Intervention) will earn a minimum score of 80% on the midterm AND final examination.

*Source of Evidence: Writing exam to assure certain proficiency level*

**Target for O4: Effects of crises, disasters and other trauma-causing events**

90% of all Mental Health Students enrolled in CPS 8470 (Crisis Intervention) will earn a minimum score of 80% on the midterm AND final examination.

**Findings 2010-2011 - Target: Met**

More than 90% of all Mental Health Students enrolled in CPS 8470 (Crisis Intervention) earned a minimum score of 80% on the midterm AND final examination.

**M 7: Participation in 9 75-minute Experiential Groups (O: 5)**

All Mental Health Counseling students enrolled in CPS 6450 (Group Counseling Systems) will complete a group assignment by attending ALL 9 75-minute experiential-based, personal growth groups.

*Source of Evidence: Capstone course assignments measuring mastery*

**Target for O5: Group Work in Mental Health Counseling**

All Mental Health Counseling students enrolled in CPS 6450 (Group Counseling Systems) will complete a group assignment by attending ALL 9 75-minute experiential-based, personal growth groups.

**Findings 2010-2011 - Target: Met**

All Mental Health Counseling students enrolled in CPS 6450 (Group Counseling Systems) completed a group assignment by attending ALL 9 75-minute experiential-based, personal growth groups.

**M 8: Research Project and Presentation (O: 6)**

All Mental Health Counseling students in CPS 7000 (Consulting, Advocacy, and Leadership in Mental Health Counseling) will earn a minimum of 85% of the research project and presentation. These assignments will be related to a specific aspect of the Mental Health Profession.

*Source of Evidence: Project, either individual or group*

**Target for O6: Principles of Mental Health Counseling including Advocacy in a Multicultural Diverse Society**

All Mental Health Counseling students in CPS 7000 (Consulting, Advocacy, and Leadership in Mental Health Counseling) will earn a minimum of 85% of the research project and presentation. These assignments will be related to a specific aspect of the Mental Health Profession.

**Findings 2010-2011 - Target: Met**

All Mental Health Counseling students in CPS 7000 (Consulting, Advocacy, and Leadership in Mental Health Counseling) earned a minimum of 85% of the research project and presentation.
M 9: Midterm and Final Examination CPS 7500: Individual and Family Over the Lifespan (O: 7)
90% of all students who take CPS 7500: Individual and Family Over the Lifespan will earn a minimum score of 80% on both the midterm and final examination.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O7: Human Growth and Development
90% of all students who take CPS 7500: Individual and Family Over the Lifespan will earn a minimum score of 80% on both the midterm and final examination.

Findings 2010-2011 - Target: Met
90% of all students who take CPS 7500: Individual and Family Over the Lifespan earned a minimum score of 80% on both the midterm and final examination.

M 10: Midterm and Final Examination (CPS 8460 (Biopsychosocial Aspects of Addiction) (O: 8)
90% of all students taking CPS 8460 (Biopsychosocial Aspects of Addiction) must earn a minimum of 80% on the midterm and final examination.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O8: Addiction and Addictive Behaviors
90% of all students taking CPS 8460 (Biopsychosocial Aspects of Addiction) must earn a minimum of 80% on the midterm and final examination.

Findings 2010-2011 - Target: Met
More than 90% of all students taking CPS 8460 (Biopsychosocial Aspects of Addiction) earned a minimum of 80% on the midterm and final examination.

M 11: Midterm and Final Examination (CPS 8100: Psychobehavioral Diagnosis) (O: 9)
90% of all Mental Health Counseling students enrolled in CPS 8100 will earn a minimum of 80% on the midterm and final examination.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O9: Diagnosis
90% of all Mental Health Counseling students enrolled in CPS 8100 will earn a minimum of 80% on the midterm and final examination.

Findings 2010-2011 - Target: Met
Greater than 90% of all Mental Health Counseling students enrolled in CPS 8100 earned a minimum of 80% on the midterm and final examination.

M 12: Suicide Assessment (O: 10)
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.
Source of Evidence: Project, either individual or group

Target for O10: Crisis Intervention and Assessment
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.

Findings 2010-2011 - Target: Met
All Mental Health Counseling students successfully completed a suicide assessment exercise in CPS 8470: Crisis Intervention

M 13: Suicide Assessment (O: 10)
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.
Source of Evidence: Project, either individual or group

Target for O10: Crisis Intervention and Assessment
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.

Findings 2010-2011 - Target: Met
All Mental Health Counseling students successfully completed a suicide assessment exercise in CPS 8470: Crisis Intervention

Findings 2010-2011 - Target: Met
All Mental Health Counseling students successfully completed a suicide assessment exercise in CPS 8470: Crisis Intervention

Georgia State University
Assessment Data by Section
2010-2011 Middle Grades Education (LA and SS) TEEMS MAT
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
### Mission / Purpose

The mission of the Master of Arts in Teaching program for Middle Level Language Arts and Social Studies is aligned with the mission of the GSU PEF, which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the TEEMS program in Middle Level Language Arts and Social Studies is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledgeable, and reflective practitioners; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

### Goals

**G 1: Goals for teacher candidates enrolled in MCE LA/SS**

The goals for teacher candidates enrolled in the Middle Level Education Language Arts/Social Studies program include the development of students who are aware of the unique social and academic needs of diverse adolescent/middle level students; knowledgeable in Language Arts and Social Studies content areas, including the use of innovative technology; are knowledgeable about learning environments for diverse learners; believe that all students can learn and are community-oriented educators who will continue to pursue professional development.

### Student Learning Outcomes/Objectives

**SLO 1: The Diverse Adolescent Learner (M: 3, 4, 5)**

Possess a strong knowledge base about and demonstrate sensitivity to the social and academic needs of diverse adolescent/middle level students.

**SLO 2: Pedagogical Content Knowledge (M: 1, 2, 3, 4, 5)**

Demonstrate pedagogical content knowledge in Language Arts and Social Studies with technology integration to create and assess rigorous, relevant, and engaging student-centered lessons.

**SLO 3: Learning Environment (M: 3, 4, 5)**

Create a productive and responsive learning environment for diverse learners while providing for students with exceptionalities.

**SLO 4: Professional Community Oriented Educator (M: 3, 4, 5, 6)**

Demonstrate the belief that a) all students can learn and b) an efficacious attitude as a global and community-oriented educator who continues reflection and individual professional development throughout their career.

### Measures, Targets, and Findings

**M 1: GACE II Content Area Exam Language Arts and Social Studies (O: 2)**

Students must have a minimum of 12 credit hours in English coursework and 12 credit hours in Social Studies coursework and must pass the GACE II content test in Middle Level Language Arts and Middle Level Social Studies before being recommended for certification.

Source of Evidence: Certification or licensure exam, national or state

**Target for O2: Pedagogical Content Knowledge**

All students enrolled in the Middle Level Language Arts/Social Studies program will pass the GACE II content exams.

**M 2: Content Knowledge Demonstrated in Teaching (O: 2)**

Content Knowledge rubrics in the Midpoint (Practicum) Teaching Evaluation Instrument and the Final Teaching Evaluation Instrument: Data for the key assessment of Content Knowledge are taken from the Midpoint (Practicum) Teaching Evaluation Instrument and the Final Student Teaching Evaluation Instrument. The midpoint evaluation takes place prior to clinical practice, at or near the end of the Practicum I (field experience). The final evaluation takes place at or near the end of Practicum III (student teaching). For each assessment, students are evaluated on their command of Content Knowledge by their university supervisor, who observes and confers with students and considers feedback from the student's mentor teacher. Candidates are not given specific instructions for this assessment; rather, they demonstrate their content knowledge through their teaching performance and ongoing conversations with mentor teachers and university supervisors. The Teaching Evaluation rubrics are used twice during each student's program - at the midpoint of the program (before clinical practice) and at the end of the program (at the end of clinical practice). The rubric is aligned with the PEF Conceptual Framework, and the portion of the rubric that is used to assess Content Knowledge addresses the following Conceptual Framework standard: CF 1.2. Data generated from reports of student performance in the area of Content Knowledge are used to evaluate the effectiveness of the program in preparing students who have a strong background in the areas of Middle Level Language Arts and Social Studies.

Source of Evidence: Performance in subsequent schooling feedback

**Target for O2: Pedagogical Content Knowledge**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong content knowledge by obtaining a rating of "Effectively" or "Adequately" on the observation instrument used to assess their pedagogical content knowledge via teaching.

**Findings 2010-2011 - Target: Met**

The achievement target was met with students attaining 81% at the "Effectively Demonstrated" level and 18% at the "Adequately Demonstrated" level in the overall assessment of content knowledge. The second assessment of the year
showed a slight decrease in success thus prompting analysis of students' opportunities to demonstrate/practice their content knowledge in the first semester of student teaching. Content Knowledge Assessment Midpoint: Subject Specific Content/Concepts GA-GSTEP-1 22 (100%) Pedagogical (Instructional Methods) GA-GSTEP-1 22 (100%) Content Connections GA-GSTEP-1 22 (100%) Overall Assessment of Content Knowledge GA-GSTEP-1, GA-GSU-COE-CF-1.2 21 (100%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not demonstrated Not Observed or Not Able to Rate (NATR) Content Knowledge Final Assessment: Subject Specific Content/Concepts GA-GSTEP-1 18 (81%) 4 (18%) Pedagogical (Instructional Methods) GA-GSTEP-1 18 (81%) 4 (18%) Content Connections GA-GSTEP-1 19 (86%) 3 (13%) Overall Assessment of Content Knowledge GA-GSTEP-1, GA-GSU-COE-CF-1.2 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not demonstrated Not Observed or Not Able to Rate (NATR)

### M3: Teacher Work Sample: Planning (O: 1, 2, 3, 4)

The key assessment for planning is contained in the rubrics for the Teacher Work Sample (TWS). Students are evaluated on their ability to plan a four-week unit based on contextual factors of the school setting, appropriate learning goals that they establish based on their knowledge of the context, an assessment plan that addresses the learning goals, and a design for instruction that includes at least four weeks of lesson plans. The instructions relevant to the assessment for planning are provided for the candidates in the students' course template in the sections for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction. (See PDF file for Teacher Work Sample below) Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate's TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Planning with the rubrics for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Project, either individual or group

### Target for O1: The Diverse Adolescent Learner

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

#### Findings 2010-2011 - Target: Partially Met

The achievement target was partially met with students attaining the following percentages the assessment of the Teacher Work Sample. A few students earned only an acceptable or unacceptable rating in the following areas. An action plan will be developed to address these weaknesses. Assessment: Alignment with Learning Goals and Instruction 2 (8%) 3 (13%) 18 (78%) Clarity of Criteria and Standards for Performance 3 (13%) 6 (26%) 14 (60%) Multiple Modes and Approaches 1 (4%) 7 (30%) 15 (65%) Technical Soundness 5 (21%) 18 (78%) Adaptations Based of Individuals Needs of Student 2 (9%) 6 (27%) 14 (63%) Unacceptable Developing Acceptable Proficient Exemplary Contextual Factors: Knowledge of Community, School and Classroom Factors 1 (4%) 4 (18%) 17 (77%) Knowledge of Characteristics of Students 1 (4%) 3 (13%) 18 (81%) Knowledge of Students' Varied Approaches to Learning 1 (4%) 6 (27%) 15 (68%) Knowledge of Students' Skills and Prior Learning 1 (4%) 6 (27%) 15 (68%) Implications for Instructional Planning and Assessment 1 (4%) 6 (27%) 15 (68%) Unacceptable Developing Acceptable Proficient Exemplary Design for Instruction: Alignment With Learning Goals 1 (4%) 3 (13%) 19 (82%) Accurate Respresentation of Content 10 (43%) 13 (56%) Lesson and Unit Structure 5 (22%) 17 (77%) Use of a Variety of Instruction, Activities, Assignments and Resources 1 (4%) 5 (22%) 16 (72%) Use of Contextual Information and Data to Select Appropriate and Relevant Activities, Assignments and Resources 6 (27%) 16 (72%) Use of TechnologyElement 6 (27%) 16 (72%) 17 (77%) Unacceptable Developing Acceptable Proficient Exemplary Developing Acceptable Proficient Exemplary Learning Goals: Significance, Challenge and Variety 1 (4%) 17 (77%) 18 (81%) Clarity 1 (4%) 5 (21%) 17 (73%) Appropriateness for Students 1 (4%) 5 (21%) 17 (73%) Alignment with Local, State and National Standards 2 (8%) 5 (21%) 16 (69%) Unacceptable Developing Acceptable Proficient Exemplary

### Target for O2: Pedagogical Content Knowledge

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

#### Findings 2010-2011 - Target: Partially Met

The achievement target was partially met with students attaining the following percentages the assessment of the Teacher Work Sample. A few students earned only an acceptable or unacceptable rating in the following areas. An action plan will be developed to address these weaknesses. Assessment: Alignment with Learning Goals and Instruction 2 (8%) 3 (13%) 18 (78%) Clarity of Criteria and Standards for Performance 3 (13%) 6 (26%) 14 (60%) Multiple Modes and Approaches 1 (4%) 7 (30%) 15 (65%) Technical Soundness 5 (21%) 18 (78%) Adaptations Based of Individuals Needs of Student 2 (9%) 6 (27%) 14 (63%) Unacceptable Developing Acceptable Proficient Exemplary Contextual Factors: Knowledge of Community, School and Classroom Factors 1 (4%) 4 (18%) 17 (77%) Knowledge of Characteristics of Students 1 (4%) 3 (13%) 18 (81%) Knowledge of Students' Varied Approaches to Learning 1 (4%) 6 (27%) 15 (68%) Knowledge of Students' Skills and Prior Learning 1 (4%) 6 (27%) 15 (68%) Implications for Instructional Planning and Assessment 1 (4%) 6 (27%) 15 (68%) Unacceptable Developing Acceptable Proficient Exemplary Design for Instruction: Alignment With Learning Goals 1 (4%) 3 (13%) 19 (82%) Accurate Respresentation of Content 10 (43%) 13 (56%) Lesson and Unit Structure 5 (22%) 17 (77%) Use of a Variety of Instruction, Activities, Assignments and Resources 1 (4%) 5 (22%) 16 (72%) Use of Contextual Information and Data to Select Appropriate and Relevant Activities, Assignments and Resources 6 (27%) 16 (72%) Use of TechnologyElement 6 (27%) 16 (72%) 17 (77%) Unacceptable Developing Acceptable Proficient Exemplary Developing Acceptable Proficient Exemplary Learning Goals: Significance, Challenge and Variety 1 (4%) 17 (77%) 18 (81%) Clarity 1 (4%) 5 (21%) 17 (73%) Appropriateness for Students 1 (4%) 5 (21%) 17 (73%) Alignment with Local, State and National Standards 2 (8%) 5 (21%) 16 (69%) Unacceptable Developing Acceptable Proficient Exemplary

### Target for O3: Learning Environment

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

#### Findings 2010-2011 - Target: Partially Met

The achievement target was partially met with students attaining the following percentages the assessment of the Teacher Work Sample. A few students earned only an acceptable or unacceptable rating in the following areas. An action plan will be developed to address these weaknesses. Assessment: Alignment with Learning Goals and Instruction 2 (8%) 3 (13%) 18 (78%) Clarity of Criteria and Standards for Performance 3 (13%) 6 (26%) 14 (60%) Multiple Modes and Approaches 1 (4%) 7 (30%) 15 (65%) Technical Soundness 5 (21%) 18 (78%) Adaptations Based of Individuals Needs of Student 2 (9%) 6 (27%) 14 (63%) Unacceptable Developing Acceptable Proficient Exemplary Contextual Factors: Knowledge of Community, School and Classroom Factors 1 (4%) 4 (18%) 17 (77%) Knowledge of Characteristics of Students 1 (4%) 3 (13%) 18 (81%) Knowledge of Students' Varied Approaches to Learning 1 (4%) 6 (27%) 15 (68%) Knowledge of Students' Skills and Prior Learning 1 (4%) 6 (27%) 15 (68%) Implications for Instructional Planning and Assessment 1 (4%) 6 (27%) 15 (68%) Unacceptable Developing Acceptable Proficient Exemplary Design for Instruction: Alignment With Learning Goals 1 (4%) 3 (13%) 19 (82%) Accurate Respresentation of Content 10 (43%) 13 (56%) Lesson and Unit Structure 5 (22%) 17 (77%) Use of a Variety of Instruction, Activities, Assignments and Resources 1 (4%) 5 (22%) 16 (72%) Use of Contextual Information and Data to Select Appropriate and Relevant Activities, Assignments and Resources 6 (27%) 16 (72%) Use of TechnologyElement 6 (27%) 16 (72%) 17 (77%) Unacceptable Developing Acceptable Proficient Exemplary Developing Acceptable Proficient Exemplary Learning Goals: Significance, Challenge and Variety 1 (4%) 17 (77%) 18 (81%) Clarity 1 (4%) 5 (21%) 17 (73%) Appropriateness for Students 1 (4%) 5 (21%) 17 (73%) Alignment with Local, State and National Standards 2 (8%) 5 (21%) 16 (69%) Unacceptable Developing Acceptable Proficient Exemplary
Candidates are assessed for Clinical Practice with the use of rubrics contained in the Midpoint Teaching Evaluation Instrument (taken prior to students' clinical practice) and the Final Teaching Evaluation Instrument (taken near the end of students' clinical practice). Rubrics are instruments based on the Georgia Standards and are used to assess students' performance on the Georgia Standards. The instrument is used in the Georgia Framework for Teaching. The university supervisor provides immediate feedback to the candidate after the lesson. Near the end of the Practicum semester, the university supervisor completes the Midpoint (Practicum) Teaching Evaluation Instrument, using knowledge of the candidate's teaching performance gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate. The second assessment for Clinical Practice is done at or near the end of the students' semester. During this semester, which is typically spent on the same middle school campus, the teacher candidates gradually take on an increasing amount of responsibility until they eventually assume the full role of the classroom teacher. During this semester, the candidates are required to teach a minimum of four weeks of lessons during which they plan, teach, reflect upon, and evaluate their praxis. The university supervisor conducts a minimum of three formal observations, providing feedback and support to the teacher candidate. Near the end of the student teaching semester, the university supervisor completes the Final Student Teaching Evaluation Instrument, using knowledge of the student gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate.

Source of Evidence: Performance (rectal, exhibit, science project)

Target for O4: Professional Community Oriented Educator

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

Findings 2010-2011 - Target: Partially Met

The achievement target was partially met with students attaining the following percentages the assessment of the Teacher Work Sample. A few students earned only an acceptable or unacceptable rating in the following areas. An action plan will be developed to address these weaknesses. Assessment: Alignment with Learning Goals and Instruction 2 (8%) 3 (13%) 18 (78%) Clarity of Criteria and Standards for Performance 3 (13%) 6 (26%) 14 (60%) Multiple Modes and Approaches 1 (4%) 7 (30%) 15 (65%) Technical Soundness 5 (21%) 18 (78%) Adaptations Based of Individuals Needs of Student 2 (9%) 6 (27%) 14 (60%) Knowledge of Students' Varied Approaches to Learning 1 (4%) 4 (18%) 17 (77%) Knowledge of Characteristics of Students 1 (4%) 3 (13%) 18 (81%) Knowledge of Students' Varied Approaches to Learning 1 (4%) 6 (27%) 15 (68%) Knowledge of Students' Skills and Prior Learning 1 (4%) 6 (27%) 15 (68%) Implications for Instructional Planning and Assessment 1 (4%) 6 (27%) 15 (68%) Unacceptable Developing Acceptable Proficient Exemplary Design for Instruction: Alignment With Learning Goals 1 (4%) 3 (13%) 19 (82%) Accurate Representation of Content 10 (43%) 13 (66%) Lesson and Unit Structure 5 (22%) 17 (77%) Use of a Variety of Instruction, Activities, Assignments and Resources 1 (4%) 5 (22%) 16 (72%) Use of Contextual Information and Data to Select Appropriate and Relevant Activities, Assignments and Resources 6 (27%) 16 (72%) Use of Technology Element 6 (4%) 4 (18%) 17 (77%) Unacceptable Developing Acceptable Proficient Exemplary Learning Goals: Significance, Challenge and Variety 1 (4%) 4 (17%) 18 (78%) Clarity 1 (4%) 5 (21%) 17 (73%) Appropriateness for Students 1 (4%) 5 (21%) 17 (73%) Alignment with Local, State and National Standards 2 (8%) 5 (21%) 16 (69%) Unacceptable Developing Acceptable Proficient Exemplary

Target for O1: The Diverse Adolescent Learner

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate excellent clinical practice skills by obtaining a rating of "Effectively" or "Adequately" on the observation instrument associated with the students' field work.

Findings 2010-2011 - Target: Met

Final Assessment of Clinical Practice, the following data demonstrate that the achievement target has been met. Knowledge of Students and Learning: Students' Development GA-GSTEP-2, GA-GSU-COE-CF-1, GA-GSU-COE-CF-3.1, 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Learning Environments: Classroom Environment GA-GSTEP-3 16 (72%) 6 (27%) Classroom Management GA-GSTEP-3 16 (72%) 6 (27%) Communication GA-GSTEP-3 21 (95%) 1 (4%) Overall Assessment Score for Learning Environments GA-GSTEP-3, GA-GSU-COE-CF-2, GA-GSU-COE-CF-3.2, GA-GSU-COE-CF-3.3 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate Assessment: Assessment GA-GSTEP-4, GA-GSU-COE-CF-2.1 17 (77%) 5 (22%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Planning and Instruction: Lesson Plan & Instruction GA-GSTEP-5 16 (76%) 5 (23%) Instructional Strategies GA-GSTEP-5 19 (90%) 2 (9%) Monitoring and Adjustments GA-GSTEP-5 20 (95%) 1 (4%) Resources & Technology GA-GSTEP-5 20 (95%) 1 (4%) Overall Assessment of Planning and Instruction GA-GSTEP-5, GA-GSU-COE-CF-1, 3 19 (90%) 2 (9%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Professionalism: Reflection and Growth GA-GSTEP-6 19 (90%) 2 (9%) Analysis of educational policies and/or practices that affect learners in metropolitan contexts. 17 (80%) 4 (19%) Overall Assessment of Professionalism GA-
Target for **O2**: Pedagogical Content Knowledge

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate excellent clinical practice skills by obtaining a rating of "Effectively" or "Adequately" on the observation instrument associated with the students' field work.

**Findings 2010-2011 - Target: Met**

Final Assessment of Clinical Practice, the following data demonstrate that the achievement target has been met. Target for **O3**: Learning Environment

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate excellent clinical practice skills by obtaining a rating of "Effectively" or "Adequately" on the observation instrument associated with the students' field work.

**Findings 2010-2011 - Target: Met**

Final Assessment of Clinical Practice, the following data demonstrate that the achievement target has been met. Knowledge of Students and Learning: Students’ Development GA-GSTEP-2, GA-GSU-COE-CF-1.1, GA-GSU-COE-CF-3.1 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Learning Environments: Classroom Environment GA-GSTEP-3 16 (72%) 6 (27%) Classroom Management GA-GSTEP-3 16 (72%) 6 (27%) Communication GA-GSTEP-3 21 (95%) 1 (4%) Overall Assessment Score for Learning Environments GA-GSTEP-3, GA-GSU-COE-CF-2.2, GA-GSU-COE-CF-3.2, GA-GSU-COE-CF-3.3 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate Assessment: Assessment GA-GSTEP-4, GA-GSU-COE-CF-2.1 17 (77%) 5 (22%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Planning and Instruction: Lesson Plan & Instruction GA-GSTEP-5 16 (76%) 5 (23%) Instructional Strategies GA-GSTEP-5 19 (90%) 2 (9%) Monitoring and Adjustments GA-GSTEP-5 20 (95%) 1 (4%) Resources & Technology GA-GSTEP-5 20 (95%) 1 (4%) Overall Assessment of Planning and Instruction GA-GSTEP-5, GA-GSU-COE-CF-1.3 19 (90%) 2 (9%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Professionalism: Reflection and Growth GA-GSTEP-6 19 (90%) 2 (9%) Analysis of educational policies and/or practices that affect learners in metropolitan contexts. 17 (80%) 4 (19%) Overall Assessment of Professionalism GA-GSTEP-6, GA-GSU-COE-CF-1.4, GA-GSU-COE-CF-2.3 19 (90%) 2 (9%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR)

Target for **O4**: Professional Community Oriented Educator

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate excellent clinical practice skills by obtaining a rating of "Effectively" or "Adequately" on the observation instrument associated with the students’ field work.

**Findings 2010-2011 - Target: Met**

Final Assessment of Clinical Practice, the following data demonstrate that the achievement target has been met. Knowledge of Students and Learning: Students’ Development GA-GSTEP-2, GA-GSU-COE-CF-1.1, GA-GSU-COE-CF-3.1 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Learning Environments: Classroom Environment GA-GSTEP-3 16 (72%) 6 (27%) Classroom Management GA-GSTEP-3 16 (72%) 6 (27%) Communication GA-GSTEP-3 21 (95%) 1 (4%) Overall Assessment Score for Learning Environments GA-GSTEP-3, GA-GSU-COE-CF-2.2, GA-GSU-COE-CF-3.2, GA-GSU-COE-CF-3.3 18 (81%) 4 (18%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate Assessment: Assessment GA-GSTEP-4, GA-GSU-COE-CF-2.1 17 (77%) 5 (22%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Planning and Instruction: Lesson Plan & Instruction GA-GSTEP-5 16 (76%) 5 (23%) Instructional Strategies GA-GSTEP-5 19 (90%) 2 (9%) Monitoring and Adjustments GA-GSTEP-5 20 (95%) 1 (4%) Resources & Technology GA-GSTEP-5 20 (95%) 1 (4%) Overall Assessment of Planning and Instruction GA-GSTEP-5, GA-GSU-COE-CF-1.3 19 (90%) 2 (9%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR) Professionalism: Reflection and Growth GA-GSTEP-6 19 (90%) 2 (9%) Analysis of educational policies and/or practices that affect learners in metropolitan contexts. 17 (80%) 4 (19%) Overall Assessment of Professionalism GA-GSTEP-6, GA-GSU-COE-CF-1.4, GA-GSU-COE-CF-2.3 19 (90%) 2 (9%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not Demonstrated Not Able to Rate (NATR)
the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Effects on Student Learning with the rubrics for Analysis of Student Learning and Reflection and Self-Evaluation in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Project, either individual or group

**Target for O1: The Diverse Adolescent Learner**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate significant and impactful effects on student learning by obtaining a rating of "Exemplary" or "Proficient" on the rubric associated with the Teacher Work Sample.

**Findings 2010-2011 - Target: Partially Met**

As demonstrated by the below data, our target has not been achieved - an appropriate action plan will be developed. Analysis of Student Learning: Clarity and Accuracy of Presentation 1 (4%) 1 (4%) 5 (23%) 14 (66%) Alignment with Learning Goals 2 (9%) 3 (14%) 16 (76%) Interpretation of Data 2 (9%) 3 (14%) 16 (76%) Evidence of Impact on Students' Learning 1 (4%) 1 (4%) 2 (9%) 17 (80%) Unacceptable Developing Acceptable Proficient Exemplary

**Target for O2: Pedagogical Content Knowledge**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate significant and impactful effects on student learning by obtaining a rating of "Exemplary" or "Proficient" on the rubric associated with the Teacher Work Sample.

**Findings 2010-2011 - Target: Partially Met**

As demonstrated by the below data, our target has not been achieved - an appropriate action plan will be developed. Analysis of Student Learning: Clarity and Accuracy of Presentation 1 (4%) 1 (4%) 5 (23%) 14 (66%) Alignment with Learning Goals 2 (9%) 3 (14%) 16 (76%) Interpretation of Data 2 (9%) 3 (14%) 16 (76%) Evidence of Impact on Students' Learning 1 (4%) 1 (4%) 2 (9%) 17 (80%) Unacceptable Developing Acceptable Proficient Exemplary

**Target for O3: Learning Environment**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate significant and impactful effects on student learning by obtaining a rating of "Exemplary" or "Proficient" on the rubric associated with the Teacher Work Sample.

**Findings 2010-2011 - Target: Partially Met**

As demonstrated by the below data, our target has not been achieved - an appropriate action plan will be developed. Analysis of Student Learning: Clarity and Accuracy of Presentation 1 (4%) 1 (4%) 5 (23%) 14 (66%) Alignment with Learning Goals 2 (9%) 3 (14%) 16 (76%) Interpretation of Data 2 (9%) 3 (14%) 16 (76%) Evidence of Impact on Students' Learning 1 (4%) 1 (4%) 2 (9%) 17 (80%) Unacceptable Developing Acceptable Proficient Exemplary

**Target for O4: Professional Community Oriented Educator**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate significant and impactful effects on student learning by obtaining a rating of "Exemplary" or "Proficient" on the rubric associated with the Teacher Work Sample.

**Findings 2010-2011 - Target: Partially Met**

As demonstrated by the below data, our target has not been achieved - an appropriate action plan will be developed. Analysis of Student Learning: Clarity and Accuracy of Presentation 1 (4%) 1 (4%) 5 (23%) 14 (66%) Alignment with Learning Goals 2 (9%) 3 (14%) 16 (76%) Interpretation of Data 2 (9%) 3 (14%) 16 (76%) Evidence of Impact on Students' Learning 1 (4%) 1 (4%) 2 (9%) 17 (80%) Unacceptable Developing Acceptable Proficient Exemplary

**M 6: Professional Dispositions (O: 4)**

The assessment for Dispositions is entitled "Dispositions of Effective Education Professionals" and is used in all programs in the Professional Education Unit. Students are not required to submit specific assignments for this assessment. Prior to Fall 2010, a different rubric was used. The older rubric, which was linked directly to the 10 INTASC standards, was replaced by an instrument that could be more clearly linked to the PEF unit's rearticulated conceptual framework outcomes. Each program in the unit administers the assessment at approximately midpoint and end of program. For Middle Level Language Arts and Social Studies TEEMS programs, the Dispositions assessment is completed by the university supervisor at the end of Practicum I and at the end of student teaching.

Source of Evidence: Academic indirect indicator of learning - other

**Target for O4: Professional Community Oriented Educator**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate high levels of professionalism by obtaining a rating of "Exceptional" or "Acceptable" on the rubric used to assess students' professional dispositions.

**Findings 2010-2011 - Target: Met**

Professional Dispositions data demonstrates achievement goal has been met. EMPATHY: Sees and accepts others' points of view; bases communication on learner's point of view; believes in establishing rapport with learner; respects perspective of the learner GA-GSU-COE-CF-2.1 18 (81%) 4 (18%) POSITIVE VIEW OF OTHERS: Believes in the worth, ability and potential of others; trusts learner's capacity for change; believes others can and will rather than can't or won't GA-GSU-COE-CF-2.2 19 (86%) 3 (13%) POSITIVE VIEW OF SELF: Believes in the worth, ability and potential of self; possesses a fundamentally positive sense of self-adequacy, capability and dependability; has positive expectations of self GA-GSU-COE-CF-2.3 18 (81%) 4 (18%) AUTHENTICITY: Able to be open and genuine; self-discloses and melds personal uniqueness with culturally responsive interactions; does not feel one must play a role to be effective GA-GSU-COE-CF-3.1 17 (77%) 5 (22%) MEANINGFUL PURPOSE AND VISION: Focused on the long range; is visionary and reflective as a professional; commits to growth for all learners; cares about what is really important GA-GSU-COE-CF-1.4 19 (86%) 3 (13%) Exceptional Acceptable Marginal Unacceptable
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Support Teacher Work Sample Efforts
Faculty will provide additional opportunities for support of students’ work with the Teacher Work Sample. A practice TWS is being introduced in the Fall semester of student teaching - Practica I and will be supported both in a methods course and in Practica I. The methods course that houses the content “Planning” has been moved to the long semester when the students are conducting their field work and should provide for better support/practice in developing their skill as effective and impactful lesson designers.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 05/2012
Responsible Person/Group: MLE TEEMS LA/SS Faculty
Additional Resources: None.
Budget Amount Requested: $0.00 (no request)

Support Teacher Work Sample Efforts - Effect on Student Learning
Faculty will provide additional opportunities for support of students’ work with the Teacher Work Sample. A practice TWS is being introduced in the Fall semester of student teaching - Practica I and will be supported both in a methods course and in Practica I. The methods course that houses the content “Analysis of Student Learning” has been moved to the long semester when the students are conducting their field work and should provide for better support/practice in developing their skill as effective and impactful educators.

CTW Reflection Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Program faculty have refined the use of the Teacher Work Sample, lesson planning, and assessment to better support our students in these efforts. These changes were made based on prior year’s data and while some progress has been made, data this year demonstrate there is still some progress to be made. A few low assessments from a couple of students indicate that we still have work to do in clarifying the lesson design / implementation / assessment process. Our goal is for all students to master this process.
Program faculty have realigned coursework to better match with field work and continue to improve work with lesson design (using Wiggins & McTighe as well as the Teacher Work Sample) as well as improvement with assessment processes and systems for the classroom.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Program faculty use the assessment of student strengths and weaknesses to pinpoint areas of improvement in coursework. We have realigned courses for this year to better match methods and fieldwork. We continue to revise and improve curriculum with regards to the lesson design / implementation / assessment cycle.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment this year (2010-2011)?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

### Georgia State University

**Assessment Data by Section**

**2010-2011 Middle Grades Education (Math and Science) TEEMS MAT**

*As of 12/12/2016 04:11 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

### Mission / Purpose

The mission of the Master of Art in Teaching (MAT) in Middle-level Math-Science is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MAT Middle-level Math-Science program is to prepare educators who are: informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and local and global communities.

### Goals

**G 1: Content Knowledge**
1. Candidates will be seen as more knowledgeable others in their classrooms, in their schools, and in their communities with regard to their understandings of the content and ways of knowing within the disciplines of math and science.

**G 2: Professional and pedagogical knowledge, skills, and dispositions**
2. Candidates will be skilled craftspeople with the appropriate dispositions for translating their content knowledge into meaningful learning experiences for a diverse set of learners in grades 4 - 8 math and science classrooms.

**G 3: Impact on student learning**
3. Candidates will be reflective professionals with the capacity to analyze the effect that their teaching practices have on the learning of the students in their grades 4 - 8 math and science classes.

### Student Learning Outcomes/Objectives

**SLO 1: Content Knowledge (G: 1) (M: 1)**
Candidates will possess and use research-based, discipline-specific knowledge and pedagogy to facilitate learning for all.

**SLO 2: Professional and Pedagogical Knowledge (G: 2) (M: 2)**
Candidates will be able use their knowledge of child, adolescent, and adult development and theories of learning to design meaningful educational opportunities for all learners.

**SLO 3: Pedagogical Skills and Learning Experiences (G: 2) (M: 3)**
Candidates will be able to coordinate time, space, activities, technology and other resources to provide active and equitable engagement of diverse learners in real world experiences.

**SLO 4: Pedagogical Skills and Learning Environments (G: 2) (M: 4)**
Candidates will be able to create engaging learning environments where the diverse perspectives, opinions, and beliefs of others are
Measures, Targets, and Findings

Other Outcomes/Objectives

O/O 6: Impact on Student Learning and Assessment (G: 3) (M: 6)
Candidates will be able to design and utilize a range of formal and informal assessment strategies to evaluate and ensure the continuous development of all learners and support learners in engaging in the process of self-assessment.

SLO 5: Professional Dispositions (G: 2) (M: 5)
Candidates will be able to exhibit ethically-appropriate behavior towards students, colleagues, administrators, and community members and will be able to commit to continuing personal and professional development.

SLO 7: Impact on Student Learning and Reflection (G: 3) (M: 7)
Candidates will be able to reflect critically upon data as part of a recursive process when planning, implementing and assessing teaching, learning, and development.

Other Outcomes/Objectives

O/O 6: Impact on Student Learning and Assessment (G: 3) (M: 6)
Candidates will be able to design and utilize a range of formal and informal assessment strategies to evaluate and ensure the continuous development of all learners and support learners in engaging in the process of self-assessment.

Measures, Targets, and Findings

M 1: Objective 1 - Content Knowledge (O: 1)
There will be three sources of data for determining the extent to which a candidate has met this objective: 1. The candidates' performance on the GACE Middle-level Mathematics and Middle-level Science tests. 2. Supervisor ratings on the Standard 1: Content Knowledge components of the Mid-term and Final Evaluation Key Assessments. 3. Reviewer ratings on the content and curriculum standard in the final e-portfolio.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Content Knowledge
1. For the GACE tests, the target is for 100% of the candidates to pass both the Middle-level Math and Middle-level Science exams. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 2.5 rating, with no more than 15% of the candidates receiving ratings of Unsatisfactory.

Findings 2010-2011 - Target: Partially Met
1. The GACE scores had not been compiled at the time of the initial findings report. 2. With regards to the mid-term and final evaluation rubrics, the target was met for the overall rating of students in the area of content knowledge. However, the overall score on the Content Connections element was a 3.35, with 3 of the students receiving a score of partially demonstrated. This is clearly below the target set for the individual participants. 3. The Electronic Portfolio data had not been compiled at the time of the initial findings report.

M 2: Objective 2 - Professional and Pedagogical Knowledge (O: 2)
There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Learning Goals and Design for Instruction assignments in the Teacher Work Sample 2. Ratings by supervisors on the Mid-term and Final Evaluation related to this area 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.
Source of Evidence: Portfolio, showing skill development or best work

Target for O2: Professional and Pedagogical Knowledge
1. For the Learning Goals assignment, the target is for the candidates to average a score of 17 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 2.5 rating, with no more than 15% of the candidates receiving ratings of Unsatisfactory.

Findings 2010-2011 - Target: Met
1. For the Learning Goals assignment, the target was met, with all but one student achieving a 17 or better and less than 25% of the students receiving a rating of 2 or below. 2. For the Design for Instructions assignment, the target was met (26.7 average overall), although there were 5 students with scores below 26. 2. For the Mid-term and Final Evaluation Rubrics, the target was met as the average was 3.55 for all students and no student received a rating of 2 or 1.

M 3: Objective 3 - Pedagogical Skills and Learning Experiences (O: 3)
There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Design for Instruction and Instructional Decision Making assignments in the Teacher Work Sample 2. Ratings by the supervisor on this element in the Mid-term and Final Evaluation Key Assessment 3. Evaluation by the reviewer of the section of the e-portfolio.
Source of Evidence: Portfolio, showing skill development or best work

Target for O3: Pedagogical Skills and Learning Experiences
1. For the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Instructional Decision Making assignment, the target is for the candidates to average a score of 13 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a
For the Design for Instructions assignment, the target was met (26.7 average overall), although there were 5 students with scores below 26. For the Instructional Decision Making assignment, the target was met with only two students scoring below the desired average of 13.2. For the Mid-term and Final Evaluation Rubrics, the target was met as the average was 3.55 for all students and no student received a rating of 2 or 1. The Electronic Portfolio data had not been compiled at the time of the initial findings report.

**M 4: Objective 4 - Pedagogical Skills and Learning Environments (O: 4)**

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluations of the Contextual Factors assignment within the Teacher Work Sample 2. Ratings by the supervisor on this element in the Mid-term and Final Evaluation Key Assessments 3. Evaluations by the reviewer of this section of the electronic portfolio

Source of Evidence: Portfolio, showing skill development or best work

**Target for O4: Pedagogical Skills and Learning Environments**

1. For the Contextual Factors assignment, the target is for the candidates to average a score of 21 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 2.5 rating, with no more than 15% of the candidates receiving ratings of Unsatisfactory.

**Findings 2010-2011 - Target: Met**

1. For the Contextual Factors assignment, the target was met as the overall average was well over 21; however, there were 6 (out of 29 students) who scored at or below that average. 2. For the Mid-term and Final Evaluation rubrics, the overall assessment on the Learning Environments section was a 3.57, meeting the specified target; however, it needs to be noted that the average score on the Classroom Environment element was 3.42 and on the Classroom Management element was 3.39. 3. The Electronic Portfolio data had not been compiled at the time of the initial findings report.

**M 5: Objective 5 - Professional Dispositions (O: 5)**

There will be two sources of data for determining the extent to which a candidate has met this objective: 1. Ratings by the supervisor on the Dispositions Key Assessment 2. Evaluation by the reviewer of the corresponding section of the electronic portfolio

Source of Evidence: Portfolio, showing skill development or best work

**Target for O5: Professional Dispositions**

1. For the Disposition Key Assessment rubric, the target is for the candidates to average a of 18 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 2.5 rating, with no more than 15% of the candidates receiving ratings of Unsatisfactory.

**Findings 2010-2011 - Target: Partially Met**

1. For the Dispositions Key Assessment, the candidates achieved an average well over the target of 18 overall, with only 2 students receiving a score below the average. Further, the average per element was 3.57 indicating that most ratings were either Exceptional or Acceptable (only 6 ratings of Marginal were assigned and no ratings of Unacceptable were assigned). 2. For the corresponding section of the Electronic Portfolio, the target data had not been compiled at the time of the initial findings report.

**M 6: Objective 6 - Impact on Student Learning and Assessment (O: 6)**

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Assessment Plan and Impact on Student Learning assignments within the Teacher Work Sample 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments 3. Evaluation by the reviewer of the corresponding section of the electronic portfolio

Source of Evidence: Portfolio, showing skill development or best work

**Target for O6: Impact on Student Learning and Assessment**

1. For the Assessment Plan assignment, the target is for the candidates to average a score of 22 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 2.5 rating, with no more than 15% of the candidates receiving ratings of Unsatisfactory.

**Findings 2010-2011 - Target: Met**

1. For the Assessment Plan assignment, the target was met with the overall average for the set of candidates being a 22.66 on this assignment. Nonetheless, 9 of the 29 candidates did score below this average, some considerably so. 2. For the Mid-term and Final Evaluation rubrics, the set of candidates scored just below the target mark of 3.5 (with the average for all students being 3.48). However, it should be noted that all students received a rating of Adequately or Effectively Demonstrated this proficiency, with no students receiving a rating of Partially Demonstrated or below (indicating that the target may have been too high). 3. The Electronic Portfolio data had not been compiled at the time of the initial findings report.

**M 7: Objective 7 - Impact on Student Learning and Reflection (O: 7)**

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Reflection and Self-Evaluation assignment within the Teacher Work Sample 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments 3. Evaluation by the reviewer of the corresponding section of the electronic portfolio

Source of Evidence: Written assignment(s), usually scored by a rubric
**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Additional support in professionalism

Faculty will provide additional support to students through focused assignments. Student handbook will clearly describe expectations for professionalism.

<table>

### Strengthening knowledge of professionalism

While faculty ratings on professionalism of teacher candidates (via the STARS system) have met our achievement target, our assessment results based on portfolio evaluation have indicated we have partially met our achievement target. To strengthen our teacher candidates’ knowledge of professionalism, we will provide a revised coursework (added learning modules on legal and ethical issues) which will guide our teacher candidates to develop basic knowledge of professionalism. Also teacher candidates will be required to submit weekly reflections as part of their coursework which will offer continued communication and guidance between university supervisors and teacher candidates, thus will foster our teacher candidates’ understanding and reflective practices of professionalism.

### Provide more support for students related to classroom management

The MAT MCE Math and Science students take two methods courses: One with a math focus and one with a science focus. It is difficult as it is for the instructors to prepare students in the methodologies specific to those two disciplines in single courses. And without a third course which could introduce general features of pedagogy such as notions of lesson planning, classroom management, etc., it falls on the instructors of the two methods courses to try to add that content in as well. As a result, it is likely that insufficient attention is being paid to those areas, because students have provided feedback to that effect. The preferred solution would be to find a way to add a third methods course such as exists in the MAT SCE Science program. However, until a way to do that with a schedule which is already over-crowded is determined, some kind of patchwork solutions will be required. One is to require students to read a book related to classroom management to go along with the discipline-specific methods books they are now required to read. Another is something that will be tried this semester: Bringing in a guest speaker (in this case a teacher trained in behavior management techniques). We will continue to look for other options.

### Content Knowledge Action Plan

In the mathematics and science methods courses, there needs to be a stronger connection to other disciplines. While the mathematics and science connections are made fairly easy, there needs to be more integration of other academic disciplines. All candidates take EDRD 7630, so it might be prudent for students to further utilize some of the strategies introduced in that course. Additionally, there needs to be more integration of other subjects that are also aligned to the standards. Further, pre-service teachers need to explore multiple ways to bridge “school” content knowledge with the world outside of school.

Methods Courses
In the mathematics and science methods courses, there is a need to have assignments that speak to the issue of classroom learning environments. These issues should be inclusive of classroom management issues. Scholarly readings from practitioner and research journals will be shared with cohort members for discussion and practice in their practicum placements. In addition, guest speakers (preferably those teaching in urban spaces) will be invited to a classroom management/learning environments session to help pre-service teachers develop action plans for their developing their own plans as it pertains to learning environments.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Objective 4 - Pedagogical Skills and Learning Environments | Outcome/Objective: Pedagogical Skills and Learning Environments

Refined TWS/Rubrics
The implementation of the TWS is a means to create a cohesive, interrelated set of assessments that also impact student learning. As it stands, there are refined rubrics for assessments to provide better structure to the TWS for pre-service teachers and university supervisors alike. These refined rubrics also make the expectations clear for students as it pertains to impacting student learning and assessment.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Objective 6 - Impact on Student Learning and Assessment | Outcome/Objective: Impact on Student Learning and Assessment

Revised TWS/Rubrics
Our degree program had some changes institutionalized made based off of last year’s action plan. We implemented a revised version of TWS as a means to create a cohesive, interrelated set of assessments. During the practicum I, students chart their goals with specificity. During practicum II and III, students delve deeper into these goals and use their stated goals to meet the needs of learners. We also refined the rubrics for assessments to provide better reliability among the supervisors performing the ratings of students’ learning outcomes.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Objective 7 - Impact on Student Learning and Reflection | Outcome/Objective: Impact on Student Learning and Reflection

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Our degree program had some changes institutionalized made based off of last year’s action plan. We implemented a revised version of TWS as a means to create a cohesive, interrelated set of assessments. During the practicum I, students chart their goals with specificity. During practicum II and III, students delve deeper into these goals and use their stated goals to meet the needs of learners. We also refined the rubrics for assessments to provide better reliability among the supervisors performing the ratings of students’ learning outcomes.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

During this academic year, we will make several improvements to the degree program. First, we will ensure that there is a better
integration between assignments in the methods courses and the TWS assignments. This will allow students to understand more fully
the objectives of the assignment and will allow students to develop deeper insights about the assignments. Next, we will ensure that
students understand mathematics and science curricula. We will do a better job of connection state and national standards. This will
result in better instructional strategies that address learning goals and objectives in curriculum planning. This will also result in better
lessons that build on students’ experiences and that are simultaneously linked to the standards. Finally, there will be more of a focus
on different forms of assessment as a means of creating a more holistic picture of individual and group learning. Moreover, there
were no course changes made in the program during this academic year.

**Administrative Dept Question 1:**
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you
take? What changes did you make as a result?
N/A

**Administrative Dept Question 2:**
What have you learned from your assessment this year (2010-2011)?
N/A

**Administrative Department Question 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you
anticipate?
N/A

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Middle Level Education BSE**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The mission of the B.S.E. Middle Level Education program is aligned with the mission of the GSU PEF, which represents a joint
enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in
collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the B.S.E. Middle
Level Education program is to prepare educators who are: • informed by research, knowledge and reflective practice; • empowered to
serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local
and global communities. The B.S.E. teacher education program in Middle Level Education is one of eight teacher certification
programs offered through the Department of Middle-Secondary Education and Instructional Technology (MSIT). The program is
based on current research in teacher education and support planning, teaching, and reflection with colleagues who are committed to
excellence in education. The program also includes major, in-depth practicum / teaching experience at the middle grades level.
Graduates have a well developed content knowledge in two fields (language arts, mathematics, reading, science, or social studies).
Successful completion of this program and the appropriate GACE Content Assessment tests leads to a recommendation for licensure
for grades four through eight in the two areas of concentration. This program leads a Bachelor of Science in Education (B.S.E.)
degree and a level T-4 Georgia teaching certification.

**Goals**

G 1: Candidates are Informed Educators with Expert Content Knowledge
Candidates are informed educators who have expert knowledge in two content fields in middle level education.

G 2: Candidates are Inform Educators with Necessary Knowledge, Skills, and Dispositions for teaching Middle
Level Students
Candidates are informed educators with knowledge, skills, and dispositions needed to succeed in teaching middle level students.

G 3: Candidates are Effective Educators who Impact Student Learning
Candidates are effective educators whose teaching practices have a measurable impact on the learning of their students.

**Student Learning Outcomes/Objectives**

SLO 1: Candidates Demonstrates Knowledge in their Content Field (G: 1) (M: 1)
Candidates demonstrate knowledge and understanding of the central concepts, tools of inquiry, standards, and structures of content
in their chosen teaching fields.

SLO 2: Candidates Plan, Implement, and Reflect on Instruction Methods (G: 2) (M: 2)
Candidates plan, implement, and reflect upon a wide range of instructional methods through teacher inquiry.

SLO 3: Candidates Create Meaningful Learning Experiences (G: 2) (M: 3)
Candidates create meaningful learning experiences that develop all young adolescents’ competence in subject matter and skills.

SLO 4: Candidates Demonstrate Positive Dispositions (G: 2) (M: 4)
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and
meaningful purpose and vision for working with middle level students.
Candidates use a variety of formal and informal assessment tools and reflection practices to plan effective instruction, evaluate processes and products, to monitor student learning.

**Measures, Targets, and Findings**

**M 1: Student Teaching Evaluation (O: 1)**
Students are knowledge and understanding of the central concepts, tools of inquiry, standards, and structures of content in their chosen teaching fields is evaluated by their university supervisors via the Student Teaching Evaluation Rubric.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Candidates Demonstrates Knowledge in their Content Field**
100% of students will receive a score of "3" (adequately demonstrated) or higher on all rubric components related to content knowledge.

**Findings 2010-2011 - Target: Partially Met**
All but one student scored a level "3" or higher in all content area rubric measurements. See report here: https://c1.livetext.com/misk5/xcreports/view_report/sid/73762?key=9f4d5f10388c5cc64bedf8bc8e2a6cb

**M 2: Action Research Paper 1 Rubric (O: 2)**
Candidates demonstrate their ability to plan, implement, and reflect upon a wide range of instructional methods through teacher action research. They are evaluated via the Action Research Project rubric.

Source of Evidence: Senior thesis or culminating major project

**Target for O2: Candidates Plan, Implement, and Reflect on Instruction Methods**
100% of students will receive a score of "2" (proficient) or higher on all rubric components related to action research.

**Findings 2010-2011 - Target: Partially Met**
9% of our students did not score at the "proficient" level or higher for portions of the action research component. More specifically, students struggled with the literature review, research methods, and results sections.

**M 3: Teaching Evaluation Rubrics (O: 3)**
Candidates create meaningful learning experiences that develop all young adolescents' competence in subject matter and skills. During student teaching, they are evaluated via the following rubrics: Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Candidates Create Meaningful Learning Experiences**
100% of students will score a level "3" or "adequately demonstrated" in the following areas 2-5 of the teaching evaluation rubric: (2) knowledge of students and learning, (3) learning environments, (4) assessments, and (5) planning and instruction.

**Findings 2010-2011 - Target: Met**
100% of students scored at a level "3" or "adequately demonstrated" in the all areas 2-5 of the teaching evaluation rubric: (2) knowledge of students and learning, (3) learning environments, (4) assessments, and (5) planning and instruction.

**M 4: Dispositions Assessment Rubric (O: 4)**
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. Candidates dispositions will be evaluated via the Dispositions Assessment Rubric

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O4: Candidates Demonstrate Positive Dispositions**
100% of students will score a level "3: acceptable" or higher, while 50% of students will score at a level of "4: exceptional."

**Findings 2010-2011 - Target: Met**
100% of students received a score of "3: acceptable" or higher in all sections of the disposition rubric. Between 74% and 94% of students received a score of "4: exceptional" on all components of the dispositions rubric.

**M 5: Action Research Paper 2 Rubric (O: 5)**
Through an action research project, candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, evaluate processes and products, and monitor student learning. Candidates are evaluated via the Action Research Project rubric - 4700

Source of Evidence: Senior thesis or culminating major project

**Target for O5: Candidates Use Effective Assessment and Reflection to Plan and Evaluate Instruction**
100% of students will score at the "2: proficient" level or higher.

**Findings 2010-2011 - Target: Partially Met**
All but one student scored "proficient" or higher in all aspects of the action research report. However, one student (out of 12) scored only "partially proficient" in three areas: literature review, research methods, and results. 100% of the students scored...
at the highest level of “exemplary” in the focus and rationale section of the paper. This is exciting, given that they were able to carefully articulate the reason behind their action research project. 11 out of 12 students also scored exemplary on the conclusions and recommendations portion of the paper, which is also very exciting. This part of the paper exemplifies students’ ability to critically analyze data through written reflection.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Focus on action research as a continual process of thinking/being in the classroom
Although most of our students did well on the action research project, not everyone was at the proficient or partially proficient level. We plan to add more instruction related to action research in EDCI 4640, and talk specifically about how this action research process is a way of thinking/being in the classroom, not just a formal research plan to use once in teacher education courses.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Action Research Paper 2 Rubric | Outcome/Objective: Candidates Use Effective Assessment and Reflection to Plan and Evaluate Instruction

Implementation Description: Work more carefully with preservice teachers to help them understand action research as a way of thinking/being in the classroom. This instruction/discussion will take place in EDCI 4640.
Projected Completion Date: 04/2012
Responsible Person/Group: Instructor of EDCI 4640.

Improved instruction related to action research
Although most of our students did well on the action research project, not everyone was at the proficient or partially proficient level. We plan to add more instruction related to action research to EDRD 4600 and EDCI 4640 in order to help students better understand the importance of each required component of action research.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Action Research Paper 1 Rubric | Outcome/Objective: Candidates Plan, Implement, and Reflect on Instruction Methods

Implementation Description: The instructor of EDRD 4600 will devote one full class session and two partial class sessions to action research methods.
Projected Completion Date: 08/2011
Responsible Person/Group: EDRD 4600 instructor.

Increased content in methods courses
Although almost all of our preservice teachers were rated at a score of "3" or "adequately demonstrated" or higher in their content knowledge, not 100% of the students were rated at this level. In fact, approximately 26% of our preservice teachers received a "3" instead of a "4" or "effectively demonstrated" on pedagogical content knowledge as it relates to instructional methods and planning. Given this, our plan in the coming year is to increase content learning experiences in our methods courses within the BSE MLE program.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Student Teaching Evaluation | Outcome/Objective: Candidates Demonstrates Knowledge in their Content Field

Implementation Description: The BSE MLE program coordinator will work with methods course instructors to add more content into the course syllabi.
Projected Completion Date: 04/2012
Responsible Person/Group: BSE MLE program coordinator and BSE MLE methods course instructors.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A (see CTW report for BSE MLE)

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A (see CTW report for BSE MLE)

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A (see CTW report for BSE MLE)

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A (see CTW report for BSE MLE)

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report?
We have decided to add to our assessment related to "Impact on Student Learning." Students will not only complete an action research project to measure their impact on student learning, but they will also submit a teacher work sample. This new teacher work sample measure, which includes analyzing pre and post assessments, writing unit plans, and reflecting on teaching, will more specifically focus on their impact on student learning.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on this year's assessment data, we will focus on two course changes. First, we will spend more time providing instruction related to teacher action research. We believe this is an important aspect of undergraduate education, but our students were struggling with literature reviews and data analysis. We will include more readings and instruction related to inquiry in several of our courses. Second, we will increase our focus on content in our preservice teacher methods courses. We anticipate that this will increase student first-time pass rates on GACE II exams.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment this year (2010-2011)?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Middle Level Education MEd**

*As of: 12/12/2016 04:11 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

The M.Ed. major in Middle Childhood Education provides for master's level study in Middle Childhood Education and advanced content knowledge in English, Mathematics, Science, or Social Studies, and leads to T-5 certification in Middle Childhood Education (Grades 4-8). The program ensures that candidates gain increased subject matter knowledge as well as pedagogical knowledge, demonstrate success in bringing middle school students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content. The program's underlying framework is constructivism, which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban Middle Childhood education. The mission of the Professional Education Faculty (PEF) is to prepare educators (i.e., teachers and other professional school personnel) who are: informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and local and global communities. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

**Goals**

**G 1:** Candidates are experts in their knowledge of the content they teach.

1. Candidates are informed educators who have expert knowledge of the content needed to teach their subject to students in grades 4-8.

**G 2:** Candidates have the knowledge, skills, and dispositions necessary to be successful middle school teachers.

Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching students in grades 4-8.

**G 3:** Candidates are effective educators whose teaching practices have a measurable impact on student learning.

Candidates are highly effective educators whose teaching practices have a measurable impact on the learning of their students in middle level classrooms.
### Student Learning Outcomes/Objectives

#### SLO 1: Candidates demonstrate superior content knowledge of the subjects they teach. (G: 1) (M: 1)

1. Candidates have depth and breadth of their content knowledge. They are able to provide an in-depth explanation of the importance for teaching each content area (the two areas in which the teacher is certified), including current thinking and research in the content areas. They give detailed explanations with examples cited to support contentions. (2) Candidates can clearly articulate and provides examples demonstrating how to plan and implement an interdisciplinary lesson and/or unit of study. In their portfolio, they provide a clear explanation with examples cited to support contentions.

#### SLO 2: Candidates demonstrate knowledge and skills necessary for teaching middle school students. (G: 2) (M: 2)

- (1) Candidates demonstrate knowledge of the principles guiding assessment and instruction at the middle grades level and can clearly articulate the theoretical connections between using well planned assessments to guide instruction. Students provide artifacts that demonstrate how they have applied these principles in the classroom. (2) Candidates demonstrate knowledge of a wide variety of teaching, learning, and assessment strategies that are developmentally responsive, culturally sensitive, and technologically sound. Students provide artifacts that demonstrate how they have applied this understanding in the classroom. (3) Candidates clearly articulate the need for teaching higher order thinking skills and can demonstrate through their artifacts that they have implemented lessons at the classroom level which address this standard.

#### SLO 3: Candidates demonstrate the dispositions necessary to be successful middle school teachers. (G: 2) (M: 3)

Candidates demonstrate the five dispositions necessary to work successfully with middle level students, colleagues, and other education professionals. (1) EMPATHY: Sees and accepts others' points of view; bases communication on learner's point of view; believes in establishing rapport with learner; respects perspective of the learner. (2) POSITIVE VIEW OF OTHERS: Believes in the worth, ability and potential of others; trusts learner's capacity for change; believes others can and will rather than can't or won't. (3) POSITIVE VIEW OF SELF: Believes in the worth, ability and potential of self; possesses a fundamentally positive sense of self-adequacy, capability and dependability; has positive expectations of self. (4) AUTHENTICITY: Able to be open and genuine; self-discloses and melds personal uniqueness with culturally responsive interactions; does not feel one must play a role to be effective. (5) MEANINGFUL PURPOSE AND VISION: Focused on the long range; is visionary and reflective as a professional; commits to growth for all learners; cares about what is really important.

#### SLO 4: Candidates demonstrate the ability to make a positive impact on student learning. (G: 3) (M: 4)

Candidates can illustrate how assessment results are compared, contrasted, and analyzed to plan and revise effective instruction for the student within an assessment/instruction cycle. Meaningful interpretations and appropriate conclusions are determined based on a range of data collected. Analysis of student learning includes clear, consistent, and convincing evidence of the literacy achievement of the target student.

### Measures, Targets, and Findings

#### M 1: Content Knowledge Rubric (O: 1)

MCE Advanced Masters Content Knowledge Rubric in MED MLE portfolio assessment: https://c1.livetext.com/doc/4879240#4879240

**Source of Evidence:** Portfolio, showing skill development or best work

**Target for O1:** Candidates demonstrate superior content knowledge of the subjects they teach.

100% of candidates will score at a level of 4 (out of a possible score of 5) on this measure. At least 50% will score at a level 5.

**Findings 2010-2011 - Target: Met**

Of the 3 completers, two (2) scored at a level 5 and one (1) scored at a level four. Thus, the target was fully met on this measure.

#### M 2: Teaching Performance Rubric (O: 2)

MCE Advanced Masters Teaching Performance Rubric in student portfolio for MED Middle Level Education. Link to Rubric: Source of Evidence: Portfolio, showing skill development or best work

**Target for O2:** Candidates demonstrate knowledge and skills necessary for teaching middle school students.

100% of candidates will score at a level of 4 (out of a possible score of 5) on this measure. At least 50% will score at a level 5.

**Findings 2010-2011 - Target: Partially Met**

This measure is divided into three domains: Principles of Instruction and Assessment: On this domain, two students scored at a level 5 and 1 student scored at a level 1. Teaching, Learning, and Assessment Strategies: On this domain, one student scored at a level 5 and two students scored at a level 4. Integrated Higher Order Thinking Skills: On this domain, three students scored at a level 5. Overall, the target was met. However, on the domain of Teaching, Learning, and Assessment Strategies, the target was partially met.

#### M 3: Dispositions Rubric (O: 3)

Five Dispositions of Highly Effective Educators - Endpoint of program: Link to Rubric This rubric is used to assess all students in the College of Education/College of Arts and Sciences Professional Education Unit.

**Source of Evidence:** Academic direct measure of learning - other
Target for O3: Candidates demonstrate the dispositions necessary to be successful middle school teachers.

100% of candidates will score at a level of 3 (Acceptable) out of a possible score of 4 on all five elements for this measure. At least 50% will score at a level 4 (Exceptional) on at least 3 out of 5 elements.

Findings 2010-2011 - Target: Met

The target was met. 100% of completers scored at a level 3 or higher on all elements (see attached data table), meeting the first part of the target. For the domains of Positive View of Others, Positive View of Self, and Meaningful Purpose and Vision, at least 50% scored exceptional (67%, 100%, and 100%, respectively).

M 4: Impact on Student Learning Rubric (O: 4)

Rubric to evaluate student's impact on student learning - in MED Middle Level Education Portfolio Assessment: Link to rubric
Source of Evidence: Portfolio, showing skill development or best work

Target for O4: Candidates demonstrate the ability to make a positive impact on student learning.

100% of candidates will score at a level of 4 (out of a possible score of 5) on this measure. At least 50% will score at a level 5.

Findings 2010-2011 - Target: Met

For the measure of Impact on Student Learning, two students scored at a level 5 and one student scored at a level 4.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Recommend Deactivation of Program

The MED for Middle Childhood Education has been an underenrolled program for several years. Enrollment dropped even more when the Bachelor of Science in Middle Childhood Education, from which some of the MED students came, was phased out in December 2006. Currently, there are only five students who are actively enrolled. In order to use faculty resources in programs that serve a larger population of students, the program faculty are recommending that the MED program in Middle Childhood Education be deactivated. Faculty will fully support the remaining five students until completion of their degree requirements or until the program is deactivated in December 2011.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High
Implementation Description: The faculty will recommend that the program be deactivated by December 2011. This should give current students ample time to complete their degree requirements.
Projected Completion Date: 11/2011
Responsible Person/Group: Program Coordinator: Dr. Stephanie Behm Cross Department Associate Chair: Dr. Mary Ariail
Additional Resources: N/A
Budget Amount Requested: $0.00 (no request)

Program Deactivation

The MED for Middle Childhood Education has been an underenrolled program for several years. Enrollment dropped even more when the Bachelor of Science in Middle Childhood Education, from which some of the MED students came, was phased out in December 2006. Currently, there are only five students who are actively enrolled. In order to use faculty resources in programs that serve a larger population of students, the program faculty are recommending that the MED program in Middle Childhood Education be deactivated. Faculty will fully support the remaining five students until completion of their degree requirements or until the program is deactivated in December 2011.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Focus on teaching strategies

Given that the target for "Teaching, Learning, and Assessment Strategies" was only partially met, we will focus our efforts on increasing students' abilities in this area. We will make sure to include more readings and discussions focused on teaching and assessment strategies in the required course EDCI 7400: Curriculum Issues in Middle Level Education. In class discussions and readings will be purposefully connected with reflections on current teaching practices.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):

Measure: Teaching Performance Rubric | Outcome/Objective: Candidates demonstrate knowledge and skills necessary for teaching middle school students.

Implementation Description: Course will be redesigned to include more focus on teaching, learning, and assessment strategies.
Projected Completion Date: 04/2012
Responsible Person/Group: Stephanie Behm Cross
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

N/A
CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No changes were made in the assessment process. This is because this program will be deactivated in Fall 2011.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
This program will be deactivated in Fall 2011. Despite this, we are still devoted to offering courses in this program until all students graduate. Based on the assessment results, we have decided to focus on adding more readings and discussions related to assessment and teaching/learning strategies into our required course, EDCI 7400.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A

Georgia State University
Assessment Data by Section
2010-2011 Modern & Classical Languages Assessment of Core
As of 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Department of Modern and Classical Languages is committed to the advancement of knowledge about contemporary and ancient languages and, in particular, about the ways in which they impact civilization by molding numerous cultures and shaping their literatures. The Department's excellence in research, teaching and service benefits students and colleagues by broadening their understanding of the world community and strengthening their ability to function in a cross-cultural and multicultural environment, and as a result, contributes to the general betterment of society.

Goals
G 1: Oral communication
The student shall demonstrate the ability to speak the target language with a varied vocabulary, good pronunciation, and grammatical accuracy.

Student Learning Outcomes/Objectives
SLO 1: ORAL COMMUNICATION (G: 1) (M: 1)
Interpersonal communication: task-based activities that require interaction with classmates. This mode will be used to assess comprehension and comprehensibility.

Presentational communication: tasks in which students create spoken language. This mode will be used to assess vocabulary use and fluency.
Measures, Targets, and Findings

M 1: 2001 Level Oral Interview in MCL core French, German, and Spanish courses (O: 1)

In the 2009-2010 cycle, an oral interview was introduced to assess the core French, German, and Spanish courses. In the previous cycle, students had to speak (the most developed language skill) the target language with a varied vocabulary (albeit limited to the situations and language domains covered up to the 2001 level), good pronunciation, and grammatical accuracy (also limited to the situations and language domains covered up to the 2001 level). The 2001 (third semester) level was chosen for the interview assessment since at this time students will have already completed two semesters of language training—since the interviews were held at the end of the 2001 semester, students had in fact completed three semesters of language training. Also, 2001 would still allow the faculty to repeat the assessment in 2002 (fourth semester), the last course in the Lower Division language sequence and an ideal time to introduce an exit assessment tool, such as an oral interview. The interviews were started in Spring 2010 and then, for the purpose of data and semester comparison, were repeated in Spring 2011 in all three most-commonly taught languages--Spanish, French, and German. In Spring 2011, Spanish, the largest of the three programs, also conducted interviews in Span 2002, fourth semester of Spanish. In Spring 2010, it had been determined that 2002 interviews would be a convenient source of exit data, as the fourth semester of Spanish is indeed the last course in Lower Division Spanish. Span 2002 interview results could also provide information on how the program evolves from semester to semester.

BRIEF DESCRIPTION OF RESULTS AND FINDINGS

The oral interview rubric consists of seven categories (or factors) being measured (see the assessment summaries attached for each language). For illustration purposes, these categories were finally converted into a four-range scale: 10 range = Optimal performance 9 range = Good performance 8 range = Middle point performance 7 range = Needs improvement

Optimal and Good performance mean ideal progress toward developing skills in the target language and acquiring knowledge about the language and its related culture(s). A student in a Middle point range shows achievement that is fair, needs to continue to work on some areas (see the seven-factor summaries attached), but his/her performance meets expectation for a student who is in the process of acquiring the target language. A range of Needs improvement, nonetheless, shows more significant difficulties and challenge to acquiring the target language and knowledge of its related culture(s). Importantly, a student in this range does not meet expectation for the level. RESULTS Table 1. Results by language for Spring 2010 (Language Number of students interviewed in Gosolar for Spring 2010) Percentage of interviewed students Average Four-range average number and percentage that needs improvement French 16/91 17.6% 8.1 Middle (GOOD) 4/91 (4.4%) German 7/28 25.0% 8.5 Middle (GOOD) 2/28 (7.1%) Spanish 13/180 7.2% 9.4 OPTIMAL 0/180 (0%) Table 2. Results by language and by Spanish level for Spring 2011 Language Number of students interviewed Percentage of students interviewed Average Four-range average number and percentage that needs improvement French 2001 16/51 31.4% 8.1 Middle (GOOD) 4/51 (7.8%) Germ 2001 7/29 24.1% 8.5 Middle (GOOD) 2/29 (6.9%) Span 2001 39/168 23.2% 8.7 Middle (GOOD) 10/168 (6.8%) Span 2002 23/116 19.9% 8.9 Middle (GOOD) 3/116 (2.6%) In general, in the two semesters, Spring 2010 and Spring 2011, the results appear as highly positive. No particular skill is identified as in need of more attention (see, for instance, Table 3 below for Spring 2011 results) by the faculty: in every category, the figures are within the Middle (=GOOD) range of the four-range scale. Rather, these figures show (see Tables 1 and 2) that a small but particular number of students are in need of improvement. In Spring 2010, this was the case especially in French (with 4 out of 16 students in the range of 7), who either needed to continue to work (harder) on all the language areas. In Spring 2011, however, the percentages are a lot better balanced at the 2001 level across the three languages (7.8% in French, 6.9% in German, and 6.8% in Spanish), and significantly reduced in Span 2002 (2.6%). Table 3. Results by Categories (Criteria) Spring 2011 Level 1 2 3 4 5 6 7 Total French 8.1 8.1 8.0 8.1 8.3 8.2 8.1 Germ 8.3 8.7 8.4 8.6 8.4 8.4 8.4 8.4 Span 2001 8.7 8.9 8.6 8.5 8.7 8.7 8.9 Span 2002 8.7 9.1 9.0 8.9 8.9 8.9 8.9 However, there are three areas of concern about the validity of these figures, especially those for Spring 2010. First, though a figure that was representative of the target population was still to be determined for the MCL core course assessment, the low number of interviewed students—perhaps with the exception of German—suggests that the number of students who were interviewed, especially in Spanish and French, may have not been representative of the number of students in 2001. Secondly, these figures appeared to indicate that the core courses in French, German, and especially in such a large program as Spanish, were highly effective, which thus suggested, contrary to the perception of some faculty members, that no improvement or change was needed. Third, the students who were interviewed were volunteers, and the sample was thus limited to those who were willing to, or could, be available for the interview at a time when students in general were busy and preparing and/or taking their final exams. A large number of students who worked also made it notoriously hard to find students who could be available at times other than class time. Thus, the Spring 2010 sample may include, especially in Spanish (notice the zero percentage of students in need of improvement in Table 1), only those highly motivated students who routinely scored high in the core courses and who most probably were, or were likely, to become majors and minors. This, unfortunately, would leave out a significant number of non-major, non-minor students who might indeed need to be served more adequately and whose feedback is essential to improve the MCL core curriculum. In Spring 2011, an effort was made to obtain more even numbers and, ideally, as close to 25% of the target population as possible in every level. Still, however, the interviewees were largely students who accepted, on a voluntary basis, to be interviewed. Finally, it is clear that the the students in Span 2002, in Spring 2011, performed a lot better than those in Span 2001 in the same semester, probably a result of a sort of a natural filtering of students, increasingly better prepared, as they progress through the Spanish curriculum. The efforts to interview more students, and obtain a better balance sample of students, in Spring 2011, may be responsible for the increasing number of students in need of improvement in Spring 2011 and for a more accurate assessment of the program.

Source of Evidence: Exit interviews with grads/program completers

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Develop fluency

These results will be used to identify the best tasks for the classroom to increase fluency, an aspect often overlooked in first-year classes. It is expected that the information will help develop lessons on formulaic sequences, paraphrasing, and other real language strategies that are usually neglected in the lower-level language classes.

Established in Cycle: 2007-2008
Implementation Status: In-Progress
Priority: Medium
Implementation Description: Fall 2008
Responsible Person/Group: Lower Division Spanish instructors

Oral Communication

The Department of Modern and Classical Languages (MCL henceforth) has been implementing some sort of oral communication assessment among students taking first-year Spanish. The assessment requires special considerations since the enrollment limits for elementary Spanish classes is 30-32 students. In a regular fall or spring semester there are 35 sections of first-year Spanish.
An informal survey of oral assessment conducted among colleagues, shows that the most common form used is face-to-face interviews during office hours. Given the special make up of Georgia State students, there are many students who could not meet office hours because they have previous engagements (academic and otherwise) at those times. The second form is to take the last week of classes and conduct interviews during that time. Experience shows that the second modality always presents circumstances that throw off the schedule, aside from the fact that one has to sacrifice class time. Also, the assessment needs to be recorded in order to verify scores, and as evidence in case of grade disputes.

The MCL faculty has agreed to meet during FA09 to discuss possible venues of assessing oral communication on the core. The French and German sections are going to conduct face-to-face interviews, while the Spanish section has yet to determine how oral communication will be assessed. The three sections have decided to use the same type of assessment but due to the number of students (and sections) in Spanish there will be different instruments.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were those changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In the 2009-2010 cycle, an oral interview was introduced to assess the core French, German, and Spanish courses. In the previous cycle it was established that students would demonstrate their ability to speak (the most comprehensive language skill) the target language with a varied vocabulary (albeit limited to the situations and language domains covered up to the 2001 level), good pronunciation, and grammatical accuracy (also limited to the situations and language domains covered up to the 2001 level). The 2001 (third semester) level was chosen for the interview assessment since at this time students will have already completed two semesters of language training—since the interviews were held at the end of the 2001 semester, students had in fact completed three semesters of language training. Also, 2001 would still allow the faculty to repeat the assessment in 2002 (fourth semester), the last course in the Lower Division language sequence and an ideal time to introduce an exit assessment tool, such as an oral interview. In the previous cycles, each language (i.e. French, German, and Spanish) would submit separate reports to the Learning Outcomes Assessment (LOA) coordinator, which in turn were also reported on separately. These reports were also based on different assessment tools. Importantly, and this should be considered relevant achievement toward improving the quality of instruction in the Lower Division language programs at MCL, one and only one report is now produced. This report is based on a common effort and assessment tool—i.e. an oral interview at the end of the 2001 level—that is largely a result of team work by the MCL language faculty. This work has also become a sort of gateway to relevant discussion of University and departmental goals—such as a concern about how languages are learned and scientifically taught—and has resulted in new initiatives, such as LAFL Group/Task Force that was just created by the many MCL faculty with expertise and research background in the several aspects of the teaching and learning/acquisition of the several taught at MCL. Today MCL has ten faculty members who are experts in several aspects of this field, with research interests that range from study abroad to heritage language teaching and teaching foreign languages to students in other fields. On the basis of the results obtained in Spring 2010, the LOA coordinator will suggest that the foreign language faculty now focus on the following areas: 1. Ways to ensure a sample population of at least 25% of the students in every language level. 2. To include the 2002 level for French and German starting in Spring 2012. 3. To minimize, and if possible eliminate, the need for the interviews to be done on a purely voluntary basis. For a more reliable assessment of the program, there should be a mechanism that can guarantee a random but reliable sample population. 4. Importantly, to identify innovations and changes to the MCL language program(s) that can reduce the number of students in need of improvement.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

In Spring 2010 it was found that the following needed improvement in the assessment procedure and tool: 1. Ways to ensure a sample population of at least 25% of the students in every language. 2. To include the 2002 level for French and German starting in Spring 2012. 3. To minimize, and if possible eliminate, the need for the interviews to be done on a purely voluntary basis. For a more reliable assessment of the program, there should be a mechanism that can guarantee a random but reliable sample population. 4. Importantly, to identify innovations and changes to the MCL language program(s) that can reduce the number of students in need of improvement. Of all these areas, 4 is particularly important. There are a number of students who are in need of improvement. According to the figures obtained for Spring 2010 and 2011, about 7% of the student population is in this category in the 2001 level. The MCL faculty now has to determine who these students are—for instance, real beginners, heritage speakers, transfer students,
etc.--, why they are not being served well enough to be in a better position (for instance, should placement test be implemented), and what innovations should be introduced to serve them better (for instance, provide more frequent and close advice to students, provide more basic learning tools [such as study guides before exams], reinstate more in-class direct instruction, etc.). As said, somewhere else on this report, the MCL language faculty will focus on these issues during Fall 2011.

**Mission / Purpose**
The mission of the five concentrations in Multiple and Severe Disabilities (Autism, Deaf/Hard of Hearing, Early Childhood Special Education, Moderate, Severe, and Profound Mental Retardation, and Physical and Health Disabilities), is to prepare graduate level teachers who are grounded in research-based curriculum development, instructional technology, data collection and interpretation, and the ethical foundations of the profession. The program prepares teachers to be responsive to the learning needs of students, the concerns and questions of parents, and the collaborative needs of related professionals. The program provides students with recommendations for certification in Special Education: General Curriculum or Special Education: Adapted Curriculum. New program plans were developed and approved during 05-06 for this program. During 06-07, the program had approximately 130 students; 37 students completed the program. During 07-08, the program had approximately 80 students; 35 students graduated with master’s degrees in MSD from Summer 07 through Spring 08. During the current 08-09 year, the program had approximately 114 students; 40 completed the master’s program from Summer 08 through Spring 09. During the current 09-10 year, the program had approximately 114 students; 40 completed the master’s program from Summer 09 through Spring 10.

**Goals**

| G 1: Demonstrates content pedagogical knowledge. |
| Demonstrates content pedagogical knowledge. |

| G 2: Understands student development regarding learning. |
| Understands student development regarding learning. |

| G 3: Can effectively teach diverse groups of learners. |
| Can effectively teach diverse groups of learners. |

| G 4: Can effectively plan for and assess instruction. |
| Can effectively plan for and assess instruction. |

**Student Learning Outcomes/Objectives**

| SLO 1: Teacher demonstrates content pedagogy. (G: 1) (M: 1) |
| The teacher demonstrates understanding of the central concepts, tools of inquiry, and structures of the discipline he or she teaches by creating learning experiences that make these aspects of subject matter meaningful for students. |
| Relevant Associations: Council for Exceptional Children standards. |

| SLO 2: Demonstrates understanding of how children learn (G: 2) (M: 2) |
| The student demonstrates understanding of how children learn and develop over a period of time, by providing learning opportunities that demonstrate a child’s intellectual, social, and/or behavioral development/growth. |
| Relevant Associations: Council for Exceptional Children Standards. |

**Other Outcomes/Objectives**

| O/O 3: Effectively teaches diverse learners. (G: 3) (M: 3) |
| The teacher demonstrates understanding of how students differ in their approaches to learning and uses effective communication and professional behavior while differentiating instruction based on student need. |
| Relevant Associations: Council for Exceptional Children Standards. |

| O/O 4: Effectively plans for instruction. (G: 4) (M: 4) |
| The teacher plans for and uses assessment in instruction based upon knowledge of subject matter, student needs, the community and curriculum goals. |
| Relevant Associations: Council for Exceptional Children Standards. |

**Measures, Targets, and Findings**

| M 1: Teaching Sequence (O: 1) |

EXC 7190 Teaching Sequence using a rubric of 1-4 with 4 being the strongest to include: Rationale and design, lesson plans and continuous assessments and post-assessments and discussion of findings.

Source of Evidence: Project, either individual or group

Target for O1: Teacher demonstrates content pedagogy.

90% of more of students will score at or above a 3 out of 4 on the teaching sequence rubric.

**Findings 2010-2011 - Target: Met**

With an N of 31 students, 100% scored at or above a 3 out of 4 on the teaching sequence rubric. The range was 3-4. The mean score was 3.77.

M 2: Pupil Change Project (O: 2)

P-12 change project using a rubric of 1-4 with 4 being the strongest to include a description of the behavior to be changed, a treatment for change, baseline and treatment data or pre and post instructional data, and analysis and discussion of the results.

Source of Evidence: Project, either individual or group

Target for O2: Demonstrates understanding of how children learn

90% or more of students will score at or above a 3 out of 4 on the pupil change project rubric.

**Findings 2010-2011 - Target: Met**

With an N of 31 students, 96% scored at or above a 3 out of 4 on the pupil change project rubric. The range was 2.9-4. The mean score was 3.73.

M 3: Performance Evaluation (O: 3)

Performance Evaluation Rubric of 1-4 with 4 being the strongest to include indicators based on the Georgia Framework.

Source of Evidence: Performance (recital, exhibit, science project)

Target for O3: Effectively teaches diverse learners.

90% or more of students will score at or above a 3 out of 4 on the performance rubric.

**Findings 2010-2011 - Target: Met**

With an N of 31 students, 100% scored at or above a 3 out of 4 on the performance rubric. The range was 3-4. The mean score was 3.76.

M 4: Lesson Plan (O: 4)

Lesson Plan Rubric of 1-4 with 4 being the strongest to include lesson title and description, primary learning outcomes, procedures, technology, assessment, modifications, extension, and reflection.

Source of Evidence: Project, either individual or group

Target for O4: Effectively plans for instruction.

90% or more of students will score at or above a 3 out of 4 on the lesson plan rubric.

**Findings 2010-2011 - Target: Met**

With an N of 31 students, 96% scored at or above a 3 out of 4 on the lesson plan rubric. The range was 2.52-4. The mean score was 3.67.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Action Plan for All Indicators**

Data for the MSD program continued to be collected on the new indicators from 08-09 as recommended in our APR plan. The data indicate that student performance is above the 90% target mark for all 4 measures. The faculty have indicated that student performance on these measures is adequate and a representative reflection of student abilities and skills. The faculty will continue to use the new indicators and the target rate of 90% for the upcoming year. Also, the faculty are using the new rubric for performance that aligns with the Georgia Framework for Teaching in order to better establish alignment with state standards.

Established in Cycle: 2009-2010

Implementation Status: Finished

Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Pupil Change Project | Outcome/Objective: Demonstrates understanding of how children learn

Implementation Description: This has been met. Will continue with data collection.

Projected Completion Date: 05/2012

Responsible Person/Group: Alberto, MSD Coordinator, and MSD faculty

**No plans indicated**

No plans are indicated for this measure as it came in at 90%. We will continue to monitor the rubric.

Established in Cycle: 2009-2010

Implementation Status: Finished

Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Lesson Plan | Outcome/Objective: Effectively plans for instruction.
**Provide sample projects so that students can better understand expectations**
Faculty will continue to provide sample plans to the students as they review their expectations for the student assignments with the students.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Low

**Relationships (Measure | Outcome/Objective):**
- Measure: Pupil Change Project | Outcome/Objective: Demonstrates understanding of how children learn

**Implementation Description:** Instructor will provide several confidential graded projects with attached rubrics so that the students can better understand what is expected of them in completing their P-12 change project. This is in place and going well.

**Responsible Person/Group:** Program coordinator and course instructor

**Revise rubric**
MSD faculty discussed aligning the P-12 change project rubric with the other P-12 rubrics in EPSE. (See implementation description below).

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Low

**Relationships (Measure | Outcome/Objective):**
- Measure: Pupil Change Project | Outcome/Objective: Demonstrates understanding of how children learn

**Implementation Description:** The MSD faculty aligned the P-12 change project rubric with the other P-12 rubrics in EPSE. This resulted in consistent information across key assessments tagged to the conceptual framework and state rules

**Projected Completion Date:** 12/2011

**Responsible Person/Group:** Susan Easterbrooks and MSD faculty

**Comprehensive exam rubric**
Faculty decided to revise the assessment rubric for the comprehensive exams to provide better information.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Teaching Sequence | Outcome/Objective: Teacher demonstrates content pedagogy.

**Projected Completion Date:** 12/2012

**Responsible Person/Group:** MSD and BLD faculty

**Performance observation rubric**
MSD faculty discussed the complexity of the performance observation rubric and it was decided that it needed to be streamlined to generate data in a manner that is useful across the department.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Performance Evaluation | Outcome/Objective: Effectively teaches diverse learners.

**Implementation Description:** Some changes have occurred, but discussion is ongoing

**Projected Completion Date:** 05/2013

**Responsible Person/Group:** MSD and BLD faculty

### Academic Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The WEAVE data continue to be helpful in examining student progress. Collection of Lesson Plan Rubric data was decided to be increased to twice a year to more closely monitor student progress in this area. This year, students met the goal of 90% or above for all 4 goals. For the 11-12 cycle, MSD faculty members will continue to monitor progress and keep the target level of achievement at 90%.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

For MSD programs, with a target of 90% of student scoring at or above a 3 on a rubric of 1-4, students met the goal of 90% or above for 4 of the 4 goals. This is an improvement from the previous year and the data supports that the educational degree programs are on track. The faculty will continue to discuss the data to determine if any future changes are needed.
Mission / Purpose
The mission of the School of Music is to provide a comprehensive, rigorous, and innovative academic program that serves the pursuit of artistic, professional, and scholarly excellence for all students.

Goals
G 1: Use of Music to Assist Reading, Writing and Speaking Skills
Students enrolled in MUA courses will learn reading, writing and speaking skills that will assist in their general education.

Student Learning Outcomes/Objectives
SLO 1: Critical Thinking Through Music (G: 1) (M: 1)
Assessment was determined by how well students obtained reading, writing and thinking skills in MUA 1930/3930 (Music in Society and Culture).

Measures, Targets, and Findings
M 1: Music Society and Culture (O: 1)
All students enrolled in Music, Society and Culture were required to write a report on a large ensemble concert they had attended. Eligible ensembles were limited to School of Music groups only giving the students seven ensembles from which to choose. The report is graded on grammar and sentence structure, accuracy of musical terminology, and overall insight.

Source of Evidence: Academic direct measure of learning - other

Target for O1: Critical Thinking Through Music
The target is for 95% of students to receive a grade of A or B on this essay.

Findings 2010-2011 - Target: Not Met
For the reporting period 117 students were enrolled in Music, Society and Culture. The grade distribution for the given essay were as follows: A - 78 (66%) B - 27 (23%) C - 5 (4%) D - 0 (0%) F - 3 (2%) Of the 117 students, 89% received a grade of A or B. Therefore the target was not met. It is possible that the achievement target of 95% is unrealistically high.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Learning Outcomes
Develop learning outcomes and a rubric for assessment to offer more particular data for ongoing tracking of student progress

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Music Society and Culture | Outcome/Objective: Critical Thinking Through Music

Projected Completion Date: 04/2011
Responsible Person/Group: Faculty who teach core
SLO 1: Places Music In Historical and Cultural Context (G: 1) (M: 2)
Places Western and non-Western music in historical and cultural context

SLO 2: Performs at Advanced Level (G: 1) (M: 3)
Performs diverse repertoire with advanced levels of musicianship in large ensembles, small ensembles, and as a soloist

SLO 3: Conducting Skills (G: 1) (M: 1)
The student will demonstrate functional conducting skills so that he/she is able to do so when called upon in the profession. This outcome applies to all music concentrations, not just those in the education concentration.

SLO 4: Improvising Skills (G: 1) (M: 4)
Students will be able to improvise at a basic level and have the ability to teach basic improvisation if called upon to do so.

Measures, Targets, and Findings

M 1: Conducting Proficiency (O: 3)
Student possesses conducting knowledge and proficiency as evidenced by results of final examination in Basic Conducting Class (MUS 2490).
Source of Evidence: Academic direct measure of learning - other

Target for O3: Conducting Skills
At least 95% of students enrolled in Basic Conducting (MUS 2490) will receive a grade of B or higher on the final conducting performance.

Findings 2010-2011 - Target: Not Met
Of the 41 students enrolled in Basic Conducting (MUS 2490) 35 (85%) received a grade of B or higher on the Final Conducting Exam. The grade breakdown for this single evaluation was as follows: A+ --> 4 A --> 6 A- --> 4 B+ --> 3 B --> 18 B- --> 5 C+ --> 1 While the target was not met this year, it is likely due to a more rigorous grading system which was implemented in the class. This included a grading rubric for the final conducting exam. It may be that the target of having 95% attain a grade of B or better on the final conducting exam is not a realistic goal. This will be considered.

M 2: Repertoire Analysis (O: 1)
Programs are reviewed for diversity of genres, eras, composers, and styles.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Places Music In Historical and Cultural Context
Through large ensemble, small ensemble, and solo performance, students perform music representing at least 12 or more composers, genres, styles, and eras.

Findings 2010-2011 - Target: Partially Met
Through examination of programs from all of the large ensembles (Orchestra, Wind Ensemble, Wind Orchestra, Jazz Band, Jazz Band II), small ensembles (Percussion Ensemble, Brass Ensemble, chamber ensembles) and solo recitals the following data was gleaned: 1. Those students who are involved in a large ensemble, small ensemble, and applied lessons usually greatly exceeded the required number. 2. Those students who were involved in a large ensemble, small ensemble or applied lessons generally exceeded the required number but always at least met it. 3. Those students enrolled in large ensemble generally met the required number. 4. Those students registered for small ensemble or lessons only, typically did not meet the required number. It is possible that the measurement target should be modified to state that students enrolled in large ensemble AND either small ensemble or applied lessons will meet the number.

M 3: Piano Proficiency (O: 2)
Students demonstrate piano proficiency through the rigorous piano proficiency examination given at the end of the piano sequence
Source of Evidence: Performance (recital, exhibit, science project)

Target for O2: Performs at Advanced Level
This measure is still being modified but at present we are setting as an achievement target that 95% of the students enrolled in the capstone Piano IV course pass the proficiency.

Findings 2010-2011 - Target: Not Reported This Cycle
Not reported this cycle

M 4: Basic Improvisation Performance (O: 4)
Basic Improvisation is a required course for all Bachelor of Music students. The course is taught by a single professor and is offered in every semester (spring, summer, fall). Each student is required to give a final improvisatory performance at the conclusion of the semester. This performance is being used as the measure with the goal being 95% of the students receiving a passing grade. For the past year 41 out of the 43 registered students received an A on this examination and 43 of 43 received a B or higher. The measure has been met (and exceeded).
Source of Evidence: Performance (recital, exhibit, science project)

Target for O4: Improvising Skills
The student's final performance is being used as the measure with the goal being 95% of the students receiving a passing grade.
Findings 2010-2011 - Target: Met

For the reporting year (2010-2011) 27 students were enrolled in Basic Improvisation. 26 of them (96%) received an A on the final improvisation project. The measure has been met.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action Plan for History II
The following action plan will be implemented: 1. Give students more frequent feedback throughout the semester about grades 2. Attempt to have more cohesion between History I and II courses

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Projected Completion Date: 07/2009
- Responsible Person/Group: Dr. Lee Orr, Division Head, Foundation Studies

Critical Thinking Assessment
Periodic meetings will be held of the humanities (core) music faculty during the fall semester of 2010 in order to finalize the critical thinking course content and assessment methodology. Implementation of any curricular or instructional changes will take place during the spring semester of 2011.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Projected Completion Date: 12/2010
- Responsible Person/Group: Marva Carter

Improve learning outcomes and rubrics
Increase faculty use of measurable student learning outcomes and rubrics in courses and for non-course requirements, e.g., juries, recitals, exit projects, etc. An excellent rubric has already been developed by the Voice Area. It is our hope that this will serve as the jumping off point for other areas as well.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Conducting Proficiency | Outcome/Objective: Conducting Skills
  - Measure: Repertoire Analysis | Outcome/Objective: Places Music In Historical and Cultural Context
- Projected Completion Date: 07/2011
- Responsible Person/Group: Faculty, Ad Hoc Assessment committee

Learning Outcomes and Rubrics
Learning outcomes and rubrics for assessment must exist across all areas and programs and offer richer data for ongoing tracking of student progress

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Conducting Proficiency | Outcome/Objective: Conducting Skills
  - Measure: Repertoire Analysis | Outcome/Objective: Places Music In Historical and Cultural Context
- Implementation Description: This would set the target date after our NASM (National Association of Schools of Music) Accreditation Review and campus visit
- Projected Completion Date: 07/2011
- Responsible Person/Group: Entire Faculty

Repertoire Meetings
In order to meet this measure for all students we are planning to have ensemble conductor, area coordinator, and applied teacher meetings to discuss repertoire choices at the beginning of each semester. During these meetings, repertoire choices will be discussed and modified in order to make sure that each student is being exposed to a diverse cross section of works. In addition, it is hoped that programming "themes" will emerge that can be utilized to help students synthesize knowledge from their various courses.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Repertoire Analysis | Outcome/Objective: Places Music In Historical and Cultural Context
- Projected Completion Date: 06/2012
- Responsible Person/Group: Ensemble conductors, area coordinators, applied instructors
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and
improvements in the assessment process will you make in the coming academic year?

The large ensemble directors are aware of the need for more rigorous assessment in ensembles. To that end the band program has initiated performance evaluations as part of their ensemble requirements in which each student prepares a portion of his/her music, records it and gives to the conductor for assessment. In this coming year we will attempt to make this type of assessment a comprehensive one with all large ensembles.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We will continue to revise the basic conducting curriculum so that more assessments are given throughout the semester. We are considering an increase in contact hours (and credit hours) in order to accomplish this. The ensemble directors/area coordinators/private instructors will meet regularly to discuss repertoire in order to ensure a diverse and comprehensive musical experience for all students.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

We made assessment in the Basic Conducting course more rigorous. We planned repertoire meetings in order to ensure a comprehensive musical experience for our students.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment this year (2010-2011)?

Perhaps our goals and our measures/findings should be reconsidered.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

Other than the improvements that we are making in the area of repertoire and the Basic Conducting class, we believe that it may be time to reassess our goals and measures. We anticipate an improvement in the assessment of the Basic Conducting class and continued improvement in offering a diverse repertoire of music to our students. Other improvements will likely not happen as we reassess.
The mission of the neuroscience doctoral program in the Neuroscience Institute at Georgia State University is to promote research and education in the set of disciplines that have a common interest in understanding the structure and function of the nervous systems of animals, including humans. The objective of the degree program is to provide comprehensive training in the neurosciences and professional development. This training is meant to prepare students for a variety of career paths involving research, teaching, and/or science advocacy.

### Goals

**G 1: Neuroscience Theory and Content**
Develop expertise with major concepts, theoretical perspectives, and empirical findings in neuroscience and in their research specialty area.

**G 2: Critical Thinking Skills**
Use critical and creative thinking, skeptical inquiry, and the scientific approach.

**G 3: Communication and Collaboration**
Be able to communicate scientific information and work effectively with peers.

### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: Neuroscience Theory and Content (G: 1) (M: 1, 2, 3, 4)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Apply knowledge from other scientific disciplines to the understanding of fundamental neuroscience principles. Use concepts in neuroscience to describe, explain, and evaluate phenomena and to generate new ideas.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 2: Critical Thinking Skills (G: 2) (M: 1, 2, 3, 4)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Ask scientific questions and construct reasonable hypotheses. Establish a research focus that identifies and builds on primary interests in neuroscience. Practice scientific method and understand its limitations. Perform laboratory skills consistent with the requirements of their field. Use statistical reasoning routinely for evaluating research and develop appropriate applications of statistics and other analytical methods. Seek the most precise and parsimonious explanation. Use skepticism consistently as an evaluative tool. Formulate and test alternative explanations and models on the basis of evidence. Evaluate relevant content from a broader range of available resources; show refined and flexible use of published research. Create compelling arguments with attention to subtle meaning of content; anticipate and defend against criticism, adapt arguments for wide range of audiences.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 3: Communication and Collaboration (G: 3) (M: 1, 2, 3, 4)</th>
<th></th>

<td></td>
</tr>
</tbody>
</table>
Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Neuroscience Theory and Content**
Greater than 95% of students have their dissertation proposal approved the first time they propose it.

**Findings 2010-2011 - Target: Met**
Two students proposed a dissertation for the first time and both were approved. Therefore, 100% of students had their proposals approved the first time.

**Target for O2: Critical Thinking Skills**
Greater than 95% of students have their dissertation proposal approved the first time they propose it.

**Findings 2010-2011 - Target: Met**
Two students proposed a dissertation for the first time and both were approved. Therefore, 100% of students had their proposals approved the first time.

**Target for O3: Communication and Collaboration**
Greater than 95% of students have their dissertation proposal approved the first time they propose it.

**Findings 2010-2011 - Target: Met**
Two students proposed a dissertation for the first time and both were approved. Therefore, 100% of students had their proposals approved the first time.

**M 3: Dissertation Defense (O: 1, 2, 3)**
Students write a dissertation and defend it orally. Students are evaluated by the dissertation committee members using a form designed for that purpose (Milestone Evaluation Form- see Document Repository).
Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Neuroscience Theory and Content**
The annual review indicates that there are serious concerns with less than 5% of the students.

**Findings 2010-2011 - Target: Met**
There were serious concerns with one out of 31 students. Therefore, there were concerns with only 3.2% of the students.

**Target for O2: Critical Thinking Skills**
The annual review indicates that there are serious concerns with less than 5% of the students.

**Findings 2010-2011 - Target: Met**
There were serious concerns with one out of 31 students. Therefore, there were concerns with only 3.2% of the students.

**M 4: Annual Review (O: 1, 2, 3)**
Each student's performance and progress is evaluated annually. At the end of each spring semester, students submit an annual report describing their research, academic activities, and accomplishments using a specific form designed for that purpose (Annual Report Form- see Document Repository). At the same time, the Director of Graduate Studies solicits feedback from graduate faculty regarding student performance in class, research activities, and/or as a teaching assistant. Based on the annual report and feedback from faculty, the advisor writes a letter to the student summarizing the student's accomplishments, feedback from other faculty, and provides feedback and advice for the future year. The annual report and the advisor's letter are reviewed in June by the graduate faculty at a meeting called for that purpose.
Source of Evidence: Academic indirect indicator of learning - other

**Target for O1: Neuroscience Theory and Content**
The annual review indicates that there are serious concerns with less than 5% of the students.

**Findings 2010-2011 - Target: Met**
There were serious concerns with one out of 31 students. Therefore, there were concerns with only 3.2% of the students.

There were serious concerns with one out of 31 students. Therefore, there were concerns with only 3.2% of the students.
Target for Q3: Communication and Collaboration

The annual review indicates that there are serious concerns with less than 5% of the students.

Findings 2010-2011 - Target: Met

There were serious concerns with one out of 31 students. Therefore, there were concerns with only 3.2% of the students.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

No actions planned due to infancy of the graduate program
This program was approved by the Board of Regents in November, 2009 and the first cohort of students was admitted in January, 2010. As this program is still new, no actions are planned at this time.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

New program with action plan in development
This program is still new and the first cohort of students were admitted in January 2010 with two additional cohorts admitted in August 2010 and 2011. Due to the infancy of this program we are still developing our action plan. In addition to reviewing student performance on their Qualifying exams, and dissertation defense we are working on the following action items:

1. Continued enhanced Responsible Conduct in Research (RCR) training. RCR training is required by the National Institutes of Health and may soon be required by the National Science Foundation as part of graduate student training. This training is designed to expose students to best ethical practices for conducting research. We are teaching our first “official” graduate RCR course (Intro to Graduate Studies) and data collected from this course will verify that we are in compliance with RCR guidelines and can used if we decide to apply for graduate training grants in the future. 2. We have had two cohorts of students take the new Neuroscience PhD qualifying exam. After reviewing the Milestone Evaluation forms we have determined that we will better be able to assess student performance if we separate out the oral exam scores from the written exam scores. We will revise this document in Fall 2011. 3. Using the revised Milestone Evaluation form we will be able to delve deeper into specific indicators of student performance instead of just focusing on overall global scores. Using a more in-depth analysis of data from the Milestone Evaluation forms we will be able to better determine if our students are adequately prepared for the exam as well as determine if assessments used in our Core courses are sufficient in training our students in the scientific process. 4. We propose to implement Professional Development courses and workshops for our students to better prepare them for conference presentations, job interviews, enhancing teaching performance etc. 5. As part of the interdisciplinary nature of our PhD program we worked with the Philosophy Dept. to develop a “Concentration in Neuroethics” that our students can voluntarily participate as a way of enhancing their graduate training.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We did not make any changes in the assessment during the 2010-11 academic year due to the fact that we first admitted students into our program in Jan. 2010. Consequently this is our second report. We do plan on separating our Qualifying Exam Milestone Evaluation form out into two parts (oral and written) for the next academic year to be able to make a more in-depth analysis of student performance.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This is a new doctoral program and therefore we still do not have enough data to make changes in our degree based on the small sample size from our assessment findings. We did make an addition to our curriculum and added a revised Intro to Graduate Studies course based on the National Institutes of Health required Responsible Conduct in Research training. We currently have our five new (admitted Fall 2011) students enrolled.

Georgia State University
Assessment Data by Section
2010-2011 Nursing BS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Byrdine F. Lewis School of Nursing is to create a premier multicultural learning environment that produces leaders, clinicians, scholars and researchers who exemplify nursing excellence and enhance healthcare delivery to Georgia and beyond.
**Goals**

**G 1: Critical Thinking**  
Apply concepts and theories as a basis for problem solving, decision-making, and critical thinking in nursing.

**G 2: Research**  
Integrate knowledge from nursing research in caring for individuals, families, groups, and the community.

**G 3: Generalist Nursing Knowledge**  
Integrate knowledge of self, science, and the humanities when providing nursing care to individuals, families, groups or the community.

**Student Learning Outcomes/Objectives**

**SLO 3: Evidence Based Practice (G: 2) (M: 4)**
Students will complete an evidence based practice paper in either NURS 3610 or NURS 3710 and will obtain at least 74 % on the grading rubric.

**Other Outcomes/Objectives**

**O/O 1: CTW (G: 1) (M: 1, 2)**
Graduates who enter the program in Fall 2009 or thereafter will take two critical thinking through writing courses.

**O/O 2: Critical Thinking Exam (G: 1) (M: 3)**
Students in the nursing program will complete a standardized critical thinking exam in their first semester and the last semester of the nursing program.

**O/O 4: Research Article Critique (G: 2) (M: 5)**
All students will complete a research article critique as part of the course work in NURS 3500 and will obtain a minimum of 74% of the possible points on the rubric.

**O/O 5: Literature Search Activity (G: 2) (M: 6)**
All students enrolled in NURS 3500 Nursing Reserach will complete a literature search activity paper on a topic related to nursing. Students will obtain at least 74% of the possible points on the rubric.

**O/O 6: NCLEX First Time Pass Rate (G: 3) (M: 7)**
Graduates of the pre-licensure program will successfully complete the NCLEX with a first time pass rate of 85% or better.

**O/O 7: Exit Survey (G: 3) (M: 8)**
Graduating seniors completing the exit survey will indicate that they felt prepared to "integrate knowledge of self, science, and the humanities when providing nursing care of individuals, families, groups, or the community" (program outcome).

**Measures, Targets, and Findings**
M 1: CTW NURS 2080 (O: 1)

Students enrolled in NURS 2080 will complete four clinical narratives and by the fourth clinical narrative 85% will be demonstrating an increased performance in their critical thinking as evidence by an increased score in item six (Critical thinking is evident in the clinical narrative and during the decision making process) of the rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: CTW

All students enrolled and completing NURS2080 will complete the 4 required narratives. 85% of students completing the activity will show an increase in critical thinking as evidenced by an increased score on the 4th narrative.

Findings 2010-2011 - Target: Not Met

For Fall 2010, 76.1% (51 of 67) students had an improvement in their total score by the 4th clinical narrative; 15% (10 of 67) students had a decrease in their total score. For Spring 2011, 91% (64 of 70) students had an improvement in their total score by the 4th clinical narrative assignment; 9% (6 of 70) total scores remained the same, none of the total scores decreased. For the 2010-2011 academic year, 84% (115 of 137) of all student taking NURS2080 had an increase in critical thinking as evidenced by an increased score by the 4th narrative. Historically, it is noted that approximately 7-10% of students enrolled in the sophomore level nursing classes do not continue in the nursing program. For some, this is due to inability to progress due to grades, and for others the student realizes nursing is not a good career match for them. Considering this fact, it is not reasonable to expect all students to be successful in this exercise. Some students may have determined they cannot be successful grade wise, and others determine that nursing is not the correct profession for them. Regardless of the reason, students may not fully engage in the writing activity. A student can pass NURS2080 and not be successful in improving critical thinking as evidenced by an increased score on the narrative writing activity.

M 2: CTW NURS 4600 (O: 1)

95% of students enrolled and completing NURS 4600 will complete the CTW assignment and obtain a minimum of 74% on the evaluation rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: CTW

All students enrolled and completing NURS4600 will complete the CTW assignment. By the 3rd submission, 95% will achieve the required score of >74%.

Findings 2010-2011 - Target: Met

For Fall 2010, 92.2% (59 of 64) of students achieved at least the minimum score of 74% on the CTW assignment. For Spring 2011, 98.7% (77 of 78) of students achieved the minimum score. For academic year 2010-2011, 96% (136 of 142) of students achieved at least the minimum score of 74% on the CTW assignment. Students can pass NURS4600 and not achieve the minimum score on the CTW writing assignment. Additionally, it is noted by the instructor of NURS4600, the students who are unsuccessful at this assignment are typically ESL students, and they have struggled with writing consistently throughout the program. These students are constantly referred to the writing center at GSU. However, if they are passing the course, they are not required to seek help.

M 3: Standardized critical thinking exam (O: 2)

All students will take a standardized critical thinking exam during their last semester of nursing school. 85% of the graduating seniors will receive a score at or above the national average on their first attempt.

Source of Evidence: Standardized test of subject matter knowledge

Target for O2: Critical Thinking Exam

85% of the graduating seniors will receive a score at or above the national average on a standardized critical thinking exam on their first attempt.

Findings 2010-2011 - Target: Not Met

For Summer 2010, 19 seniors took the standardized critical thinking exam. 94% (18 of 19) achieved a score at or above the national average. For Fall 2010, 38 seniors took the standardized critical thinking exam. 89% (34 of 38) achieved a score at or above the national average. For Spring 2011, 66 seniors took the standardized critical thinking exam. 71% (47 of 66) achieved a score at or above the national average. For the academic year 2010-2011, 123 seniors took the standardized critical thinking exam. 80.5% achieved a score at or above the national average. Clearly, the students did not meet this target. According to the instructor responsible for seeing that the students complete this activity, there is minimal reward or penalty for students meeting the national average on this test. Students can literally open the test, answer one question and close the test. Scores range from 2-80 on this national test. (note these are scores not percents)

M 4: Evidence based practice project (O: 3)

Students will complete an evidence based practice paper in either NURS 3610 or NURS 3710. 90% will obtain at least 74% on the grading rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Evidence Based Practice

90% of students enrolled in NURS3610 or NURS3710 will achieve a score of 74% or better on an evidence based practice paper.

Findings 2010-2011 - Target: Not Met

For summer 2010, 84% (26 of 31) of students achieved the minimum score of 74% on the evidence based practice paper. For Fall 2010, 86% (61 of 71) of students achieved the minimum score of 74% on the evidence based practice paper. For Spring 2011 96% (43 of 45) of students achieved the minimum score of 74% on the evidence based practice paper. For the 2010-2011 academic year, 88.4% (130 of 147) students achieved the minimum score of 74% on the evidence based paper. This is an improvement over last year’s results. While we are still not at the threshold desired, strides have been made. It should be noted that there are 5 reasons students do not achieve the minimum score on this assignment. 1. Students do not follow directions for the assignment. 2. Students do not use an approved evidence based source for the assignment. 3. Students
plagiarize; fail to cite correctly. 4. Students do not comply with the APA format. 5. English is not the student's primary language, and therefore they have difficulty writing.

<table>
<thead>
<tr>
<th>M 5: Research Article Critique (O: 4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>All students completing NURS3500 will complete a research article critique as part of the course work in NURS 3500 and at least 90% will obtain a minimum of 74% of the possible points on the rubric.</td>

**Findings 2010-2011 - Target: Met**

For Summer 2010, 100% (19 of 19) of students achieved a score of 74% or better on the literature search activity paper. For Fall 2010 98% (49 of 51) of students achieved a score of 74% or better on the research article critique. For Spring 2011, 98% (59 of 60) of students achieved a score of 74% or better on the research article critique. For the academic year 2010-2011, 98% (127 of 130) of students achieved a score of 74% or better on the research article critique.

</tr>
</tbody>
</table>

**Findings 2010-2011 - Target: Met**

Data was obtained from 126 graduating seniors from the 2010-2011 academic year. 98.4% of the graduating seniors from whom we have data indicated they felt satisfactorily prepared to integrate knowledge of self, science, and the humanities when providing care to individuals, families, groups or the community.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Alumni Survey**

The real dilemma is alumni tracking. (as evidenced by a <5% response rate). 80% of respondents indicated a positive response to "integrating knowledge of self, science, and humanities when providing nursing care to individuals, families, groups, or the community." Again, this question will be reviewed for clarity. If multiple variables are contained in the same question, revision will occur. The Assistant Director for External Affairs will continue to develop a reliable data base for BFLSON graduates. Once a reliable data base is obtained and the question is reviewed for clarity, a repeat survey can be addressed. The graduates will be encouraged to become and stay engaged with the BFLSON. This will be accomplished by the continued publication of the bi-annual newsletter, and a potential social activity. New graduates will be encouraged to become and stay active with the BFLSON alumni group. For this to happen, an up-to-date reliable data base must be developed.

*Established in Cycle: 2008-2009*

*Implementation Status: Planned*

*Priority: High*
Implementation Description: This is the end of the academic year. This will give the Assistant Director for External Affairs time to develop a reliable data base.
Projected Completion Date: 06/2010
Responsible Person/Group: The Assistant Director for External Affairs
Additional Resources: A graduate assistant is requested to assist with the development and upkeep of the data base. We request a graduate assistant for the fall, spring, and summer semesters.
Budget Amount Requested: $5,000.00 (recurring)

Critical Thinking Exam
The Program Evaluation and Effectiveness Committee of the BFLSON will evaluate the characteristics of the class of Fall 2008 to determine if they were significantly different from the class of Summer 2008 and Spring 2009 in aspects of GPA, number of course failures during the program, and success on the exit exam. The committee will determine if students need to continue to take a separate critical thinking exam, as the exit exam is an assessment of critical thinking. Perhaps the students are not motivated to achieve maximum success on a separate critical thinking exam.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

CTW NURS 2080
NURS 2080 will develop clearer objectives related to this writing project. Consistent graders for each student's paper will be initiated Fall 2009. All graders will meet in the beginning of the semester to discuss issues noted the previous semester. One instructor will review all papers for a consistent numeric grade.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

CTW NURS 4600
We will continue to monitor the CTW assignment in NURS 4600 for continued achievement of target goal.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Evidence Based Practice
The Program Evaluation and Effectiveness Committee of the BFLSON with guidance from the Undergraduate Program Committee (UPC) will continue to monitor this measure. Course instructors in NURS 3610 and NURS 3710 will be instructed to continue to require this writing assignment. Bases on the reasons the course instructor gave for student's failure the following areas will be studied:
1. Students do not follow directions for the assignment
2. Students do not use an approved evidence based source for the assignment.
3. Students plagiarize; fail to cite correctly.
4. Students do not comply with the APA format
5. English is not the student's primary language, and therefore they have difficulty writing.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Exit Survey
This question on the exit survey will be reworded when the survey is revised the next time. It is the opinion of The Program Evaluation and Effectiveness Committee of the BFLSON that the graduates may not understand the intent of this question on the current survey. The committee will evaluate if the question(s) need clarification, or if there are too many variables, and the graduates may not understand what is being asked. Additionally by grouping the variables, if a student feels lacking on one variable, but not the others, they may answer negatively because of the one area lacking, and the other areas may not be lacking. The The Program Evaluation and Effectiveness Committee of the BFLSON will assess the questionnaire.

Established in Cycle: 2008-2009

Relationships (Measure | Outcome/Objective):
Measure: Standardized critical thinking exam
Outcome/Objective: Critical Thinking Exam

Implementation Description: A grade associated with NURS4610 will encourage students to seriously consider this exam.
Projected Completion Date: 08/2010

Evidence Based Paper Success
The faculty member responsible for this target identified the following reasons why students are not successful achieving the minimum score on this assignment. 1. Students do not follow directions for the assignment. 2. Students do not use an approved evidence based source for the assignment. 3. Students plagiarize; fail to cite correctly. 4. Students do not comply with the APA format. 5. English is not the student’s primary language, and therefore they have difficulty writing. The faculty member will consult with the Program Evaluation and Effectiveness Committee and the Undergraduate Program Committee to identify a mechanism to achieve this target.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

NCLEX pass rate assessment
While the target of 85% was achieved, 89.29% was a drop from the previous year. The undergraduate program committee along with the undergraduate program coordinator, will explore the characteristics of those students who were unsuccessful to determine if any curriculum or advisement changes need to occur.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Add weight to the Exit test
The course administrator has added consequences to this test. The students did improve on this measure, yet the goal of 85% has not been reached. The students will continue to have consequences related to this standardized test. The course administrator will continue to make sure the students are aware of the consequences and make sure the consequences are significant enough to warrant attention to this exit activity.
Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Continued observation of 2080 writing assignment
It is commendable that the target was exceeded for Spring 2011. However the target was not met for the Fall 2010 class. This years overall score was significantly improved from the last cycle. For this reason the UG program coordinator has met with the faculty involved in this course and reviewed practices. Continued surveillance will result and we anticipate continued improvement in this area.
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Evidence Based project
The focus of this project has changed slightly to reflect a more direct approach to this end. The expectation now include a review and not a formal paper. The end result of using evidence continues, but the assignment will change beginning summer 2010. This more closely reflects how a nurse would use the evidence in a real world situation.
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Summer graduates and plan to increase pass rate

While the overall pass rate far exceeded the goal and exceeded the state and national pass rate, we noticed some interesting information. 3 of the 6 failures for the period of inquiry were graduates from the summer class. This class constituted 19 of the total 123 students. For this reason, we looked at the difference in this group of students or perhaps the way they are taught and evaluated in the summer. The course administrator along with the UG program coordinator and the assistant dean for nursing decided that the summer 7 week session was too short to deliver all the required material. Additionally, the course had no attendance policy, and the students did not attend class with regularity. For Summer 2012, the course will be delivered during a 10 week session as many of the clinical nursing courses are, and the attendance policy will be written in the syllabus and enforced.

Goals

G 1: Integration of Knowledge
To integrate knowledge of self, science, and the humanities in advanced practice nursing.

G 2: Legal and Ethical Issues in Advanced Nursing
Incorporate knowledge of legal and ethical issues in advanced practice nursing.

G 3: Theory as a Basis for Advanced Practice Nursing
Evaluate concepts and theories in nursing as a basis for advanced practice nursing.

G 4: Advanced Practice Nursing in Specializations
Demonstrate behaviors consistent with the selected advanced practice role.

G 5: Assessment of Factors Affecting Healthcare
Analyze the influence of socio-political, economic, and ecological forces on nursing practice, health, healthcare delivery, and healthcare providers.

G 6: Activities for Improvement of Health
Initiate activities that promote nursing and the improvement of health and healthcare.

G 7: Integrating Knowledge into Practice
Integrate knowledge of self, science, and the humanities in advanced practice nursing.

G 8: Collaboration in the Provision of Healthcare
Collaborate with individuals, families, communities and others for the purpose of providing nursing care and promoting health and wellness.

G 9: Participation in Research
Engage in research to support and promote nursing knowledge and to improve advanced practice nursing.

Student Learning Outcomes/Objectives

SLO 1: Professional Commitment (G: 1, 4, 7) (M: 1, 9, 10, 11)
At end-of-program, 80% of the masters students will indicate that they met/exceeded the program objective of exhibiting an understanding of the value of professional commitment as reported on the end-of-program survey.

Relevant Associations: Commission on Collegiate Nursing Education (CCNE) National Organization of Nurse Practitioners; American Nurses Credentialling Center (Clinical Nurse Specialists and Nurse Practitioner Certification in Adult Health, Psychiatric Mental Health); National Certification Board of Pediatric Nurse Practitioners; National Certification Corporation for Obstetric, Gynecologic, and Neonatal Nursing Specialties

We have previously reported alumni data. Next cycle pending. Interpretation and recommendations will follow.

Source of Evidence: Alumni survey or tracking of alumni achievements

**M 12: Influences of Socio-political Forces on Healthcare (O: 2, 8, 12)**

Spring 2010 data, 78% (21/27) of the students indicated that they met/exceeded the program objective of analyzing the influence of socio-political forces on health, healthcare delivery, and healthcare providers. Data from this cycle under review. Interpretation and recommendations to follow.

Source of Evidence: Student course evaluations on learning gains made
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Action Plan Development Following Master’s Program Evaluation**
An action plan will be developed at the completion of the full evaluation of the master’s program in December 2010.
- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Practice in Specialty Area | Outcome/Objective: Practice in Specialty Area
- Projected Completion Date: 11/2010
- Responsible Person/Group: Associate Director for Academic Affairs; Faculty
- Budget Amount Requested: $0.00 (no request)

**Using Theories in Advanced Practice Nursing**
An action to be taken regarding this objective will be determined during the process of evaluation of the master’s program—clinical specialties taking place during the academic year (2020-2011).
- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Theory as a Basis of Nursing Practice | Outcome/Objective: Theory as a Basis for Nursing Practice
- Implementation Description: To be determined
- Projected Completion Date: 04/2011
- Responsible Person/Group: Masters Program Committee Coordinator of the Master’s Program; Associate Director for Academic Affairs
- Budget Amount Requested: $0.00 (no request)

---

**Georgia State University**
**Assessment Data by Section**
**2010-2011 Nursing PhD**
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
The mission of the Byrdine F. Lewis School of Nursing is to create a premier multicultural learning community that produces leaders, clinicians, scholars and researchers who exemplify nursing excellence and enhance healthcare delivery in Georgia and beyond. The Byrdine F. Lewis School of Nursing will be nationally recognized for innovative, responsive, educational nursing programs focused upon diversity, urban healthcare, and vulnerable populations. The School will be noted for expert practitioners, community partnerships, and leading-edge research.

**Goals**

**G 1: Research Implementation**
Plan and implement nursing research that is socially relevant in the 21st century.

**G 2: Theory Utilization**
Link theory and research to the promotion of health in vulnerable populations.

**G 3: Health Promotion in Vulnerable Populations**
Analyze health promotion issues in vulnerable populations.

**G 4: Application of Diverse Modes of Inquiry**
Explore, develop, and apply diverse modes of inquiry to the discipline of nursing.

**G 5: Scholarly Activities**
Complete scholarly activities such as grant submission, presentations at regional and national meetings, submission of an article for publication in a refereed journal, etc.

**G 6: Completion of PhD Program**
Students will successfully complete requirements for graduation with a PhD in nursing.
### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: Research Implementation (G: 1, 6) (M: 1, 3, 5, 7, 9)</th>

</table>

M 6: Manuscript Submission (O: 6)
Of the 22 students who have completed their core courses, four (18.1%) have reported submitting manuscripts for publication.
Source of Evidence: Performance in subsequent schooling feedback

M 7: Grant Application Submission (O: 1, 7)
Of the 22 students who have completed their core course, five (22.7%) have reported submitting grant applications for research funding. To date, four have received funding.
Source of Evidence: Honors and awards outside the institution

M 8: Presentations at Professional Meetings (O: 8)
Of the 22 students who have completed core courses, 18 (81.8%) have reported presenting oral or poster abstracts at professional meetings.
Source of Evidence: Presentation, either individual or group

M 9: Completion of PhD Program (O: 1, 9)
In Fall 2009, we had a total of 53 students. In Spring 2009, 30 students were enrolled in core courses, eight were taking comprehensive examinations, and fourteen were completing dissertations. One student withdrew from courses (personal reasons) and two students completed their dissertations.
Source of Evidence: Existing data

Georgia State University
Assessment Data by Section
2010-2011 Nutrition BS
As of: 12/13/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Division of Nutrition at Georgia State University prepares professionals who enhance individual and community health through dietetics practice and who contribute to professional and scholarly knowledge in the fields of nutrition and dietetics. Admission to this Commission on Accreditation for Dietetics Education (CADE)-accredited program is at the junior year. The program graduates approximately 30 students each year.

Goals
G 1: Prepare dietetics professionals
The DPD will prepare graduates to be competent for entry into accredited supervised practice programs.

G 2: Make effective use of resources in problem solving
The DPD will promote professional development by emphasizing problem-solving skills, lifelong learning skills, and critical thinking skills.

Student Learning Outcomes/Objectives
SLO 1: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice (G: 1, 2) (M: 1)
Students are able to demonstrate how to locate, interpret, evaluate and use professional literature to make ethical evidence-based practice decisions.
Relevant Associations: Goal 1 and 2

SLO 2: Professional Practice Expectations: beliefs, values, attitudes and behaviors for the professional dietitian level of practice (G: 1, 2)
Students are able to demonstrate effective and professional oral and written communication and documentation and use of current information technologies when communicating with individuals, groups and the public.
Relevant Associations: Goal 2

SLO 3: Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and popula (G: 1) (M: 2)
Students are able to use the nutrition care process to make decisions, to identify nutrition-related problem and determine and evaluate nutrition interventions, including medical nutrition therapy, disease prevention and health promotion.

SLO 4: Practice Management and Use of Resources (G: 2)
Students are able to apply management and business theories and principles to the development, marketing and delivery of programs or services.
SLO 5: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice (G: 1)

Learning Outcome: Students are able to use current information technologies to locate and apply evidence-based guidelines and protocols, such as the ADA Evidence Analysis Library, Cochrane Database of Systematic Reviews and the U.S. Department of Health and Human Services, Agency for Healthcare Research and Quality, National Guideline Clearinghouse Web sites.

Relevant Associations: Goal 1

SLO 6: Demonstrate science understanding (G: 1, 2) (M: 2)

Demonstrate an understanding of the influence of chemical, microbiological, and physiological disciplines as they affect food and nutrition. This outcome/objective encompasses Commission on Accreditation for Dietetics Education (CADE) Learning Outcomes II.17-II.30.

SLO 7: Demonstrate promotion of healthy lifestyle (G: 1)

Demonstrate an understanding of the science of food and food policy in promotion of a healthy lifestyle and pleasurable eating in diverse population groups. This outcome/objective encompasses Commission on Accreditation for Dietetics Education (CADE) Learning Outcomes V.42-V.62.

SLO 8: Integrate social sciences (G: 1, 2)

Integrate psychological, social and economic aspects of the environment and examine how they individually and collectively affect food and nutrition. This outcome/objective encompasses Commission on Accreditation for Dietetics Education (CADE) Learning Outcomes III.31-III.34.

Measures, Targets, and Findings

M 1: Research Paper (O: 1)

This paper is a component of the capstone Critical Thinking through Writing course (NUTR 4950). It is completed in stages, with two revision cycles. Originally, the paper was a group assignment completed by students in groups of 4-5 students. For 2010, the assignment was changed to an individual research paper since the group paper failed to identify individual progress from junior year to senior year. Students wrote the paper based on their primary research question. The paper had one revision prior to formulation of the final paper. Two components of the evaluation rubric are used for this evaluation: rationale and content. Each of these is evaluated on a scale of basic (0-2), proficient (4), and mastery (6). 90% of students should receive a proficient score on rubric for final draft of the research paper. Rubric is located in depository.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice**

The target for organization is all students meet or exceed proficiency (4) with a mean class score of 5 or above.

The target for content is all students meet or exceed proficiency (4) with a mean class score of 5 or above.

These targets are set without benefit of baseline data because this is the first year of implementation.

**Findings 2010-2011 - Target: Met**

There were 19 students in NUTR 4950. The mean score on the rubric for organization class was 5.4 and for content the mean score was 5.2.

M 2: Discipline-specific Critical Thinking (O: 3, 6)

Critical thinking is essential for dietetic practitioners. This CADE-accredited program focuses on preparing dietetic practitioners. The measure used for this assessment is direct measures of student performance on specific, critical thinking questions included on exams in junior courses (NUTR 3010, NUTR 3500, NUTR 3600, NUTR 3700) and senior courses (NUTR 3150, NUTR 3160, NUTR 4000, NUTR 4200, NUTR 4250, NUTR 4300). Approximately 20 questions from each year's class exams will be selected. Half of these questions will measure application of knowledge about nutrients, and the other half will demonstrate science understanding. The expected mean score for the junior class is 75%, and the expected mean score for the senior class is 85%. While the content for the courses progresses from the junior year to the senior year, implying that the senior year is more difficult, program expectation is that critical thinking will improve as students are exposed to more examples of assignments that require critical thinking instead of rote memory.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and populations**

The expected mean score for the junior class is 75%, and the expected mean score for the senior class is 85%.

**Findings 2010-2011 - Target: Met**

The mean score for the juniors was 80% and the mean score for seniors was 88%. This related measure will change to reflect the new CADE standards for the DPD program.

**Target for O6: Demonstrate science understanding**

9

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Expanded evaluation of writing

Although students exceeded the target, we realize that this is only one measure and does not show progression from their entry to graduation. The rubric might have been compressed for grading purposes and might not evaluate the full range of performance. In the upcoming academic year we will apply the rubric to two courses, a junior course NUTR 3600 and the senior course NUTR 4950. The rubric will be revised for use in both courses. The evaluation process will entail selecting a random sample (30-35% of the class) of final papers from NUTR 3600 and conducting a paired comparison of those papers with papers from NUTR 4950 the following year. These comparisons will be made by a team of faculty evaluators who will not have access to the rating form completed by the instructors of these two courses. Data will be used to improve assignments and progression of assignments.

Revision of Program Goals

Assessment report will be revised to include the required CADE Goals, Knowledge Requirements and Learning outcomes for the program. New Goals: Goal 1: Prepare graduates to be competent for entry into CADE accredited supervised practice programs or entry level nutrition positions. Goal 2: Promote professional development by emphasizing problem-solving skills, lifelong learning skills, and critical thinking skills. Goal 3: Attract and retain well qualified candidates.

Revised Mission / Purpose

Operations Management (OM) focuses on the management of resources and activities that produce and deliver the goods and services for customers. OM can play a critical role in enhancing a company’s competitive position by providing superior products and services.

Goals

G 1: Depth of OM study
One goal of the MS Concentration in Operations Management program is to offer students in depth knowledge related to operations and supply chain management.

Student Learning Outcomes/Objectives

SLO 1: Develop a Strategic View of OM (M: 1, 2, 3)
The ability to analyze and evaluate alternative operations strategies for a given business environment and to identify the appropriate facility location, design and technology choices as related to the operations function of the organization.
### Measures, Targets, and Findings

**M 1: Reasoned Analysis (O: 1)**  
Evaluation of individual MS student's case and/or homework analyses will be completed. The individual work will be integrative in nature and will occur in the MGS 8710 course.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Develop a Strategic View of OM**

**Learning Objective 1:** Strategic View of OM  
Fail Fails to meet standards=1  
Meet Meets standards=2  
Exceed Exceeds standards=3  
Measurable Reasoned Analysis: The student must be able to: complete a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student cannot determine the effect that firm specific dimensions have on a selected topic. The student is able to complete a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student can determine the effect that firm specific dimensions have on a selected topic. The student exceeds at completing a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student excels at determining the effect that a firm's specific dimensions have on a selected topic.

**Findings 2010-2011 - Target: Partially Met**  
The students met the standard at the rate of 70% to 75%, while 25% to 30% of the time they exceeded the standard. The failure by some students to attain the "Exceed" standard is due to a lack of adequate integrative thinking in their group projects. The students did not apply in-depth analysis of their process applications to exceed the standard.

**M 2: Integration of Recommendations (O: 1)**  
Normal 0 false false false EN-US X-NONE X-NONE Students should be able to determine the effect that the OM dimensions have on a selected topic and integrate recommendations on a firm's OM applications both within the firm or industry.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Develop a Strategic View of OM**

Rubric for Measurements of Learning Outcome 1 Learning Objective 1: Strategic View of OM Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3  
Measurable Integration of recommendations: The student must be able to: integrate recommendations on a firm's OM applications both within the firm or industry. The student cannot determine the effect that the OM dimensions have on a selected topic. The student is able to integrate recommendations on a firm's OM applications both within the firm or industry. The student determines the effect that the OM dimensions have on a selected topic. The student excels at integrating recommendations on a firm's OM applications both within the firm or industry. The student easily determines the effects that the OM dimensions have on a selected topic.

**Findings 2010-2011 - Target: Not Met**  
The students met the standard at the rate of 70% to 75%, while 25% to 30% of the time they exceeded the standard. The failure by some students to attain the "Exceed" standard is due to a lack of adequate integrative thinking in their group projects. The students did not apply in-depth analysis of their process applications to exceed the standard.

**M 3: Performance (O: 1)**  
Normal 0 false false false EN-US X-NONE X-NONE This measures the students' ability to analyze or understand how the firm's operations process performance is affected by the competitive environment through their ability to identify the critical success factors of an OM application and the assessment of available resources and capabilities.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Develop a Strategic View of OM**

80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Rubric for Measurements of Learning Outcome 1 Learning Objective 1: Strategic View of OM Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3  
Measurable Performance: The student must be able to: assess performance through an assessment of available resources and capabilities. The students are not able to assess performance through an assessment of available resources and capabilities. Students are able to analyze or understand how the firm's operations process performance is affected by the competitive environment. The student excels at identifying critical success factors of an OM application. The students are able to easily assess performance through an assessment of available resources and capabilities. Students excel at analyzing or understanding how the firm's operations process performance is affected by the competitive environment.
Findings 2010-2011 - Target: Met

Student findings reflect a 80% level of understanding and monitoring performance levels within their group projects. The level of sophistication regarding analysis is not where we want it and will be an area for improvement, as mentioned previously.

M 4: Critical Thinking (O: 2)

Normal 0 false false false EN-US X-NONE X-NONE Evaluation of individual MS student’s work as completed in the required OM course. The accumulation of this type of knowledge will be received through the application of exam questions that will be measured overtime.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Develop Decision Making Abilities

Student should pass each outcome/objective as indicated by satisfactory work on course exams.

Findings 2010-2011 - Target: Partially Met

Homework assignments, case analysis and group project executive summaries reflect reasonable to good decision making capabilities. Students need to be reeducated in all steps of rational problem solving techniques.

M 5: Environmental Impact Evaluation Skills (O: 3)

Normal 0 false false false EN-US X-NONE X-NONE Will develop a focus and will highlight the effects that OM decisions have on the environmental and substantiality aspects of industry.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Develop an Environmental/substantiality Viewpoint

80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Leaning Objective 3: Develop a Environmental/Substantiality Viewpoint Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 5 Environmental Impact Evaluation The student is not able to complete and deliver a project that shows an understanding of the environmental impact of OM decisions or are able to contribute their functional expertise to the solution. The student is able to complete and deliver a project that shows an understanding of the environment impact of OM decisions or are able to contribute their functional expertise to the solution. The student is able to complete and deliver a project that shows an excellent understanding of the environment impact of OM or are easily able to contribute their functional expertise to the solution.

Findings 2010-2011 - Target: Not Met

The student is not able to complete and deliver a project that shows an understanding of the environmental impact of OM decisions or are able to contribute their functional expertise to the solution.

M 6: Team Skills (O: 4)

The student should develop and enhance their team skills in the completion of completing project work in the Operations Management area. This includes positive participation in group activities and the completion of work that is needed for the group's progress.

Source of Evidence: Student course evaluations on learning gains made

Target for O4: Become a Strong Team Member

80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Objective 4: Become a Strong Team Member Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 6 Team Skills The student did not develop team skills by indicated by poor returns on peer evaluations. The student develops team skills by indicated by average returns on peer evaluations. The student develops strong team skills by indicated by very positive returns on peer evaluations.

Findings 2010-2011 - Target: Partially Met

Results indicate a partial meeting of this objective.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

A strategic view of OM

With respect to the first learning outcome, to develop a strategic view of OM, two actions will be taken: - In MGS 8710, add a homework assignment to ask students aspects in which companies use operations management knowledge from a strategic perspective. Evaluate after next offering. - In MGS 8710, add a case about operations making significant difference for a company’s long term growth. Evaluate after next offering.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: Continued implementation will be needed for evaluation.
Projected Completion Date: 12/2011
Responsible Person/Group: Operations Management faculty Members
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Decision Making Abilities

With respect to the second learning outcome, to develop decision-making abilities, two actions will be taken: - In MGS 8710, ask students to add more analysis in students’ group project. Evaluate after next offering. - In MGS 8710, add several new measures in supply chain and revenue management analysis in accordance with the business environment: increased globalization. Evaluate after next offering.

Established in Cycle: 2008-2009
Team Membership
With respect to the fourth learning outcome, to become a strong team member, two actions will be taken: · Incorporate into teaching material for MGS 8710 and 8770 lessons on effective teams. · Require team members in the group project of MGS 8710 and 8770 to create a team charter indicating an emphasis on the importance of cooperation and fairly distributed individual contributions. Evaluate after next offering.

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Ability to organize, developed and advanced a operations management business plan and vision using critical thinking through writing at a business level, as opposed to an academic level. With the use of a well developed rubric for the CTW course, we are able to establish viable outcomes and objectives based on the learning outcomes for the course.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
There is no class in CTW requiring the measurement of attributes involving the development of a thesis and the advancement of the thesis.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Our assessment regarding need for a CTW course for the concentration in Operations Management MS program is that there is no immediate need.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
There has been no changes to date, as there is no CTW course at present.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
The has been minor changes in the evaluation/ assessment process of Operations Management MS regarding the project content requirements, such as, sustainability and Information Technology. The balance of the required and elective course requirements, i.e., two exams and multiple cases have remained unchanged. The basic outline for these courses regarding the assessment process has been deemed successful with the students and faculty.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
There has been no changes to the curriculum, courses or the sequencing of the courses during the past year’s term.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
No changes of significance have been made, despite the addition of new course materials in the MGS 8710 Operations Planning and the selection of a new text. MGS 8760 Quality Management falls into the same category as MGS 8710 as it was reintroduced during the Fall semester, 2011.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
The evaluations and anecdotal comments made by students assure the Operations Management faculty that the courses are being well received and the objectives/ outcomes of the courses are practical and create value for the students.

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
The OM faculty continues to review updated text that are felt to improve the learning experience for the students. This is an ongoing process. Our current syllabus consisting of two major exams covering 5 to 6 chapters each, weekly case analysis of relevant articles
and cases, and a major team based operations project has been quite successful with our objectives and outcomes developed for these courses.

Georgia State University
Assessment Data by Section
2010-2011 Organizational Change MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
The MS in Organizational Change is designed to provide the in-depth theoretical and applied training needed to be a leader or implementer of organizational change initiatives. The MS in Organizational Change extends the students’ previously acquired basic management and organizational behavior skills by developing advanced technical and analytical competency in applied change management practices. The MS in Organizational Change, therefore, allows students to distinguish themselves as change management specialists either as managers or as internal or external consultants. Topics include negotiation, leadership, organizational change, and coaching.

**Goals**

**G 1: Negotiate Agreements**
Goal 1: To graduate students from the MS program with the ability to negotiate agreements that advance the organization’s interests by optimally balancing the simultaneous need to be cooperative and to be competitive.

**G 2: Enhance Leadership Skills**
Goal 2: To graduate students from the MS program with an awareness of how to enhance their own leadership skills over the course of their careers.

**G 3: Managerial Coaching**
Goal 3: To graduate students from the MS program in Organizational Change with an awareness of developing employees through managerial coaching by using the skills and techniques of all facets of managerial coaching.

**G 4: Analyze Change Needs and Construct Plan**
Goal 4: To graduate students from the MS program with the ability to analyze organizational change needs and to construct a change management plan.

**Student Learning Outcomes/Objectives**

**SLO 1: Divide Value in Negotiation (G: 1) (M: 1)**
Outcome/Objective 1: Understand and effectively apply the tools necessary to divide value in negotiations. Full Description: The MS graduate will understand the concepts of bargaining zone, anchoring, and walk-away alternatives. They will be able to negotiate agreements that optimize the organization’s interests with regard to the competitive element of negotiating.

**SLO 2: Create Value in Negotiation (G: 1) (M: 2)**
Outcome/Objective 2: Understand and effectively apply the tools necessary to create value in negotiation. Full Description: The MS graduate will understand the concepts of creating value, bilateral concessions, package offers, and contingent elements to the agreement. They will be able to negotiate agreements that optimize the combined total value distributed between both negotiators.

**SLO 3: Prepare Leadership Development Plan (G: 2) (M: 3, 4)**
Outcome/Objective 3: Students should be able to understand and describe their own leadership strengths and weaknesses, and should be able to prepare leadership development plans that will enhance their leadership capabilities. These plans will incorporate appropriate and sound leadership development resources, tools and processes.

**SLO 4: Recognize Coaching Moment (G: 3) (M: 5, 6)**
Outcome/Objective 4: Recognize a coaching moment. Full Description: The MS-Organizational Change graduate will be able to recognize coaching moments that occur in the midst of managing others, and even more specifically when there is any kind of change taking place at an organizational level, a departmental level, or at an individual level such as a change of job position or a required change of attitude.

**SLO 5: Perform Change Management Project (G: 4)**
Outcome/Objective 5: Perform an OD/Change Management Consulting Project

**SLO 6: Recommend Intervention Strategy and Plan (G: 4)**
Outcome/Objective 6: Recommend an appropriate OD intervention strategy and plan.

**Measures, Targets, and Findings**

**M 1: Divided Value in Capstone Negotiation (O: 1)**
Measures The value to the buyer or seller of the final deal negotiated in the capstone one-on-one negotiation. Capstone one-on-one negotiation in MGS 8430 is a simulated business negotiation. It involves two parties, a buyer and a seller. A database exists of over 200 agreements recorded from previous sections of MGS 8430 from which to calculate agreement percentiles.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Divide Value in Negotiation**

Meeting or exceeding a value at the 60th percentile of agreements normed on previous sections of MGS 8430. The 60th percentile for buyers is $290,000. The 60th percentile for sellers is $397,500.

**Findings 2010-2011 - Target: Partially Met**

As shown in the attached table, the average was 55.8%. Three of six students met the achievement target. Without the one student who had a percentile of 22%, the average would have met the target average of 60%.

**M 2: Created Value in Capstone Negotiation (O: 2)**

Measures The combined total value obtained by the buyer and the seller in the capstone one-on-one negotiation. Capstone one-on-one negotiation in MGS 8430 is a simulated business negotiation. It involves two parties, a buyer and a seller. A database exists of over 200 agreements recorded from previous MGS 8430 sections from which to calculate agreement percentiles. This particular negotiation is designed so that the combined total can only be optimized when bilateral concessions are used effectively and when contingent elements are effectively included in the agreement.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O2: Create Value in Negotiation**

Meeting or exceeding a value at the 60th percentile of agreements normed on previous sections of MGS 8430. The 60th percentile for the combined total is $639,000.

**Findings 2010-2011 - Target: Not Met**

As shown in the attached table, the average percentile across 6 students was 44.2%. Of the 6, 2 students reached the achievement target.

**M 3: Leadership Self-Assessment (O: 3)**

Project in MGS 8420 Measures Describes their own leadership strengths and weaknesses.

Source of Evidence: Project, either individual or group

**Target for O3: Prepare Leadership Development Plan**

A 2.0 average on all criteria. Measurement will be done by applying the following rubric:

**Findings 2010-2011 - Target: Met**

Only 3 students were in the assessment group in this cycle. Although all 3 met the achievement target, this evidence should be treated as preliminary because it comes from such a small population of students.

**M 4: Leadership Development Plan (O: 3)**

Prepare leadership development plans that will enhance their leadership capabilities. These plans will incorporate appropriate and sound leadership development resources, tools and processes.

Source of Evidence: Project, either individual or group

**Target for O3: Prepare Leadership Development Plan**

A 2.0 average on all criteria. Measurement will be done by applying Rubric 2 to randomly selected project reports.

**Findings 2010-2011 - Target: Met**

Only 3 students were in the assessment group in this cycle. Although all 3 met the achievement target, this evidence should be treated as preliminary because it comes from such a small population of students.

**M 5: Coaching Scenario Assignment (O: 4)**

Ability to write up a coaching scenario that clearly demonstrates a managerial coaching moment. This comes from the coaching scenario assignment and coaching log book in MGS 8425

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Recognize Coaching Moment**

A 2.0 average on all criteria. Measurement will be done by applying Rubric 3 to randomly selected coaching scenarios.

**Findings 2010-2011 - Target: Met**

Only one student was in the assessment group in this cycle. Although the one student met the achievement target, this evidence should be treated as preliminary because it comes from such a small population of students.

**M 6: Reflect on Own Coaching Effectiveness (O: 4)**

Ability to respond to think reflectively about their own effectiveness as a coach in the role of coaching others.

Source of Evidence: Project, either individual or group

**Target for O4: Recognize Coaching Moment**

A 2.0 average on the coaching log books. Measurement will be done by applying Rubric 4 to randomly selected coaching log books.
Findings 2010-2011 - Target: Met

Only one student was in the assessment group in this cycle. Although the one student met the achievement target, this evidence should be treated as preliminary because it comes from such a small population of students.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Additional Methods of Creating Value
MGS 8430 instructors will cover additional methods for creating value when that topic is covered in class. A target of 30 additional lecture minutes will be dedicated to these additional methods.

Responsible Person/Group: MGS 8420 instructors

Current emphasis monitored
Given that the results were based on only 6 students and that half of the students met the achievement target, we are not yet convinced that significant changes are needed. The course instructors will assure that the topic of dividing value in negotiation is taught sufficiently according to the current emphasis.

**Mission / Purpose**

**MS-PFP PROGRAM MISSION:** The MS in Personal Financial Planning is designed to prepare students to: (1) Enter the field of financial planning at the planner level; (2) Pass the Certified Financial Planner exam; and; (3) Serve as the foundation for a leadership role in a financial planning firm. It will do so by developing students’ technical expertise in the topics of financial planning and their ability to integrate that expertise to help individuals plan their financial lives. The MS-PFP provides a more concentrated and in-depth consideration of financial planning topics than is offered by the MBA-PFP and thus better serves the needs of the those who are certain of their intent to pursue a financial planning career and assume a leadership position in a financial planning firm. RMI DEPARTMENT MISSION/VISION: To be the world’s leader in risk management scholarship and education. Through the collaboration of experts in multiple disciplines, we will be recognized internationally as leaders in: a) the development of integrated applications of economics, law, mathematics, and probability theory to the quantitative and qualitative measurement of risks; b) the selection and design of individual, organizational, and societal strategies for the efficient management of risk; and c) the dissemination of this knowledge.

**Goals**

**G 1: Enter the PFP field as a planner**
The MS in Personal Financial Planning will prepare students, upon completion, to enter the field of financial planning at the planner level.

**G 2: Pass the Certified Financial Planner exam**
The MS in Personal Financial Planning will prepare students, upon completion, to pass the Certified Financial Planner exam.

**G 3: Prepare for leadership role**
The MS in Personal Financial Planning will prepare students, upon completion, to serve as the foundation for a leadership role in a financial planning firm.

**Student Learning Outcomes/Objectives**

**SLO 1: Technical expertise - overall (G: 1, 2, 3) (M: 1, 3)**
The MS-PFP graduate will have the overall technical financial planning expertise of at least an entry-level planner. The MS-PFP graduate will understand the 89 topics of the 2004 CFP Job Analysis at or above the level of an entry-level financial planner. This standard is set by the Certified Financial Planner exam administered by the CFP Board. A passing score on the exam is at least 60%.

**SLO 2: Technical expertise-major financial planning areas (G: 1, 2, 3) (M: 1)**
The MS-PFP graduate will have the technical financial planning expertise of at least an entry-level planner in each of the six major technical areas of personal financial planning (i.e., Planning Fundamentals, Income Tax Planning, Insurance Planning, Investment Planning, Retirement Planning, and Estate Planning) at or above the level of a beginning financial planner. This standard is set by the related questions in the Certified Financial Planner exam administered by the CFP Board. A passing score on the exam is at least 60%.

**SLO 3: Identify a good client-planner fit (G: 1, 2, 3) (M: 4)**
The MS-PFP graduate will have the ability to identify a good client-planner fit, and then gather and organize pertinent personal and financial client data to support an effective analysis of and plan for meeting the client's financial needs. The MS-PFP graduate will have the ability to evaluate critically his/her own financial planning strengths and weaknesses and, based thereon, be able to identify those clients and circumstances with which he/she will be most effective in providing advice and guidance.

**Other Outcomes/Objectives**

**O/O 4: Integrate technical financial planning concepts (G: 1, 2, 3) (M: 2)**
The MS-PFP graduate will have the ability to effectively integrate technical financial planning concepts to assist individuals with meeting their financial needs. The MS-PFP graduate will be able to integrate each of the major technical areas of PFP (Planning Fundamentals, Income Tax Planning, Insurance Planning, Investment Planning, Retirement Planning, and Estate Planning) by properly analyzing pertinent data, identifying financial needs, and developing objectives, strategies, and an appropriate action plan for meeting those needs.

**Measures, Targets, and Findings**

**M 1: Mock CFP Exam (PFP 8520 Capstone Course) (O: 1, 2)**
In PFP 8520 Advanced Studies in Personal Financial Planning (capstone course), each student takes a mock CFP exam. Relative
performance across the areas of financial planning are measured, with feedback to the course work in the curriculum and to the design of PFP 8520 itself.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Technical expertise - overall**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to all mock exam results in each 4-year evaluation period.

**Target for O2: Technical expertise-major financial planning areas**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to all mock exam results in each 4-year evaluation period.

**M 2: Financial Plan prepared in PFP 8520 (capstone) (O: 4)**

In PFP 8520 Advanced Studies in Personal Financial Planning (capstone course), each student prepares a financial plan, acquiring a new client and preparing a comprehensive plan on that client. This client is discussed in the class.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O4: Integrate technical financial planning concepts**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to all Financial Plans submitted during each 4-year evaluation period.

**M 3: CFP® Exam (O: 1)**

The CFP® Exam is administered three times each year. Many of the program’s graduates take this examination and the CFP Board of Standards reports the results to the Program Director. This examination tests competence to become a CFP certificant. The percentage of our graduates passing the examination will be compared to the national average to assess mastery of the technical and analytical skills necessary to practice as a financial planner. The long-range passing percentage for program graduates will be kept and compared with the most recent performance of the graduates and the national performance averages. Each year, the Program Director will analyze the data received from the CFP Board. The Program Director also will use his or her best efforts to monitor the frequency, bases, and nature of any disciplinary action taken by the CFP Board against any graduate of the program and will report the results of this monitoring effort.

Source of Evidence: Certification or licensure exam, national or state

**Target for O1: Technical expertise - overall**

CFP® Exam pass rates for PFP program students and graduates will be higher than the national average.

**M 4: Planner File prepared in PFP 8520 Capstone Course (O: 3)**

In PFP 8520 Advanced Studies in Personal Financial Planning (capstone course), each student prepares a file of supporting data and analyses, including an analysis of client fit in support of his/her financial plan.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O3: Identify a good client-planner fit**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE FOUR RUBRIC to all Planner Files submitted during each 4-year evaluation period.

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Action plan based on Mock Exam**

Our sample was based on one year’s data. The data collection process will be improved by keeping more complete records of exam performance by area in future years. The assessment committee will also rely more on quizzes given by area prior to the mock exam. The quiz material will be reinforced prior to comprehensive exam. All quizzes will be kept for a more complete assessment of performance by area.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Mock CFP Exam (PFP 8520 Capstone Course) | Outcome/Objective: Technical expertise - overall

**Mission / Purpose**

The Department of Philosophy has developed this policy to set out its student learning outcomes and assessment procedures. Philosophy has a central role in any university. The writings of philosophers such as Aristotle, Descartes, Hume, and Kant are among the greatest products of the human mind. They are worth studying for their inherent value as well as for their impact on subsequent history. Much philosophical work is concerned with abstract and fundamental questions: Are there objective moral truths? Is there a God? These issues have moved minds for centuries. At the same time, philosophy is deeply involved with practical issues, such as the nature of the good life and what constitutes a just society. In the last two decades there has been an explosion of activity in applied philosophy with the result that philosophers now work in numerous cross-disciplinary fields such as business ethics, bioethics, philosophy of law, philosophy of science, philosophy of language and philosophy of mind. Despite its wide range of applications, philosophy has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, only philosophy systematically studies what distinguishes good arguments from bad. Consequently, those who teach philosophy are as much concerned with fostering reasoning skills as with imparting information.

**Goals**

**G 1: Phil 1010**

Phil 1010, Critical Thinking (in Area B), contributes significantly to GSU's General Education program by helping students hone critical thinking skills that are applicable to any endeavor. Students learn to effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**G 2: Phil 2010**

Phil 2010, Introduction to Philosophy (Area C) offers students the opportunity to confront big questions and to learn what history's most original thinkers have said about issues fundamental to existence as a human being. This contributes significantly to GSU's General Education program by helping students hone critical thinking skills that are applicable to any endeavor. Students learn to effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. Students also learn to effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

**Student Learning Outcomes/Objectives**

**SLO 1: 1010 Objective 1: Recognizing Arguments (G: 1) (M: 1)**

All students who take Phil 1010 should be able to accurately distinguish arguments from non-arguments.

**General Education/Core Curriculum Associations**

| 3.0 | Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |
| 9.0 | Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |

**Institutional Priority Associations**

| 2 | Student promotion and progression |

**Standard Associations**

| 1 | Outcomes of educational programs, including student learning outcomes (3.3.1.1) |

**Strategic Plan Associations**

| 1.5 | Other efforts in support of Goal 1 (Undergraduate Education). |

**SLO 2: 1010 Objective 2: Premises & Conclusions (G: 1) (M: 2)**

All students who take Phil 1010 should be able to identify the premises and conclusions of arguments.

**General Education/Core Curriculum Associations**

| 3.0 | Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |
| 9.0 | Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |

**Institutional Priority Associations**

| 2 | Student promotion and progression |

**Standard Associations**

| 1 | Outcomes of educational programs, including student learning outcomes (3.3.1.1) |

**Strategic Plan Associations**

| 1.5 | Other efforts in support of Goal 1 (Undergraduate Education). |

**SLO 3: 1010 Objective 3: Subordinate Arguments (G: 1) (M: 3)**

All students who take Phil 1010 should understand the relation between main and subordinate arguments.

**General Education/Core Curriculum Associations**

<p>| 3.0 | Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |
| 9.0 | Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |</p>

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).
### M1: 1010 Measure 1: Recognizing Arguments (O: 1)

Every fall, five sections of Phil 1010 taught by different instructors will be selected at random. Four final argument analyses will be selected at random from each of these five sections. (It will be the analyses of the first four students on the roll [assuming that each of these four turns in an analysis, if they do not, continue down the roll], but only one per student.) A committee of three continuing faculty (tenured, tenure-track or lecturers) will assign each analysis letter grades (A+, A, A-, B+, B, etc.) on the student's ability to analyze information and arguments by (i) distinguishing arguments from non-arguments.

Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O1: 1010 Objective 1: Recognizing Arguments</th>

Improving Assessment Reporting

After the 2007-2008 Assessment Cycle, it was indicated to us that we should give more than numerical scores for the findings regarding various measures. Importantly, the faculty of the Department review the numerical data collected via the assessment process, but do not limit themselves to this (quantitative) data. We recognize its value, but also its limitations. Hence, our assessment of student learning is also informed by qualitative data such as our professional judgments about student papers and feedback about the classes that we receive from exemplary majors and our supplemental instructors. Nonetheless, in an effort to clarify what the numerical scores mean, the Assessment Coordinator will propose to the Department the following rubrics for the purpose of assessing philosophical skills (for 1010 and 2010), writing (for 1010), and content knowledge (for 2010). Philosophical Skills (for 1010 and 2010)

4: When we indicate that we think students are doing work scored at a 4.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide charitable and accurate explanation of the philosophical positions and distinctions that are relevant to their own theses, present an insightful and compelling argument, and consider and respond to viable objections. Work done by such students demonstrates original thinking, going beyond what was said in class and in the readings. 3: When we indicate that we think students are doing work scored at a 3.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their theses, present a reasonably compelling argument, and consider possible objections. However, work done by such students is not original, in that it does not go much beyond what was said in class and in the readings, and/or does not develop some important points fully enough. 2: When we indicate that we think students are doing work scored at a 2.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an explanation of the philosophical positions and distinctions that are relevant to their theses, but this explanation is inaccurate in some important ways. Such students do demonstrate an ability to present an argument for a thesis, but their arguments are not original or compelling and they fail to consider possible objections and/or leave important points undeveloped. 1: When we indicate that we think students are doing work scored at a 1.0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a proper thesis (even when they have a unified topic). Typically, they assert views but give little or no attempt to use arguments to defend those views. 0: When we indicate that we think students are doing work scored at a 0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a proper thesis (even when they have a unified topic). Typically, they assert views but give little or no attempt to use arguments to defend those views. They are polished, reflect excellent self-editing through multiple drafts, and display a sense of personal writing style, written in clear prose that is pleasurable to read.

Improving 2010

Improving 2010 The Department now allows a great deal of variety in the many sections of Phil 2010, both in terms of content taught and in terms of the assessment mechanisms used in the courses. We also have a variety of people teaching the courses—we have tenured and tenure-track professors, lecturers and senior lecturers, as well as visiting instructors, and in some cases GTAs. We currently have a policy that sets certain multiply-realizable requirements (for example, while some metaphysics must be included in the course, it is up to the instructor whether to teach about free will, the mind-body problem, or the existence of god; they can teach about other topics in metaphysics as well, as long as they teach about one of these). Given feedback from many majors who took 2010 early in their career at GA State, from outside reviewers, and from faculty who regularly teach the course, the Undergraduate Committee is currently in the process of revising this policy. We hope that the revised policy will help us to improve student learning in this course. One way we will foster this result is to significantly curtail (while not completely eliminating) the ability of non-regular faculty to choose the topics and readings they use.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Improving 1010

In response to student and instructor feedback, the text for Phil 1010 is being substantially revised and a new version will be used in Fall 2010.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 08/2010
Responsible Person/Group: Rainbolt/Dwyer

Improving Assessment Reporting

After the 2007-2008 Assessment Cycle, it was indicated to us that we should give more than numerical scores for the findings regarding various measures. Importantly, the faculty of the Department review the numerical data collected via the assessment process, but do not limit themselves to this (quantitative) data. We recognize its value, but also its limitations. Hence, our assessment of student learning is also informed by qualitative data such as our professional judgments about student papers and feedback about the classes that we receive from exemplary majors and our supplemental instructors. Nonetheless, in an effort to clarify what the numerical scores mean, the Assessment Coordinator will propose to the Department the following rubrics for the purpose of assessing philosophical skills (for 1010 and 2010), writing (for 1010), and content knowledge (for 2010). Philosophical Skills (for 1010 and 2010)

4: When we indicate that we think students are doing work scored at a 4.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide charitable and accurate explanation of the philosophical positions and distinctions that are relevant to their own theses, present an insightful and compelling argument, and consider and respond to viable objections. Work done by such students demonstrates original thinking, going beyond what was said in class and in the readings. 3: When we indicate that we think students are doing work scored at a 3.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their theses, present a reasonably compelling argument, and consider possible objections. However, work done by such students is not original, in that it does not go much beyond what was said in class and in the readings, and/or does not develop some important points fully enough. 2: When we indicate that we think students are doing work scored at a 2.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an explanation of the philosophical positions and distinctions that are relevant to their theses, but this explanation is inaccurate in some important ways. Such students do demonstrate an ability to present an argument for a thesis, but their arguments are not original or compelling and they fail to consider possible objections and/or leave important points undeveloped. 1: When we indicate that we think students are doing work scored at a 1.0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a correct thesis (even when they have a unified topic). Typically, they assert views but give little or no attempt to use arguments to defend those views. 0: When we indicate that we think students are doing work scored at a 0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a properly organized structure that follows from a clear thesis, with varied sentence structure and no significant grammar or spelling mistakes. They are polished, reflect excellent self-editing through multiple drafts, and display a sense of personal writing style, written in clear prose that is pleasurable to read. 3: Papers assessed at a 3.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and very few grammar and spelling mistakes. They have been self-edited and do not read like a first draft. After the 2007-2008 Assessment Cycle, it was indicated to us that we should give more than numerical scores for the findings regarding various measures. Importantly,
the faculty of the Department review the numerical data collected via the assessment process, but do not limit themselves to this (quantitative) data. We recognize its value, but also its limitations. Hence, our assessment of student learning is also informed by qualitative data such as our professional judgments about student papers and feedback about the classes that we receive from exemplary majors and our supplemental instructors. Nonetheless, in an effort to clarify what the numerical scores mean, the Assessment Coordinator will propose to the Department the following rubrics for the purpose of assessing philosophical skills (for 1010 and 2010), writing (for 1010), and content knowledge (for 2010). Philosophical Skills (for 1010 and 2010) 4: When we indicate that we think students are doing work scored at a 4.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide charitable and accurate explanation of the philosophical positions and distinctions that are relevant to their own theses, present an insightful and compelling argument, and consider and respond to viable objections. Work done by such students demonstrates original thinking, going beyond what was said in class and in the readings. 3: When we indicate that we think students are doing work scored at a 3.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their theses, present a reasonably compelling argument, and consider possible objections. However, work done by such students is not original, in that it does not go much beyond what was said in class and in the readings, and/or does not develop some important points fully enough. 2: When we indicate that we think students are doing work scored at a 2.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an explanation of the philosophical positions and distinctions that are relevant to their theses, but this explanation is inadequate in some important ways. Such students do demonstrate an ability to present an argument for a thesis, but their arguments are not original or compelling and they fail to consider possible objections and/or leave important points undeveloped. 1: When we indicate that we think students are doing work scored at a 1.0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a proper thesis (even when they have a unified topic). Typically, they assert views but give little or no attempt to use arguments to defend those views. 0: When we indicate that we think students are doing work scored at a 0 for philosophical skills, we intend this to mean that the student seems able to: provide no coherent explanation of the philosophical positions and distinctions that are relevant to the class topic or even to offer a unified topic. Typically, they assert views but make virtually no attempt to defend those views; they often indicate a lack of understanding of the assignments. Writing (for 1010) 4: Papers assessed at a 4.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and no significant grammar or spelling mistakes. They are polished, reflect excellent self-editing through multiple drafts, and display a sense of personal writing style, written in clear prose that is pleasurable to read. 3: Papers assessed at a 3.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and very few grammar and spelling mistakes. They have been self-edited and do not read like a first draft. 2: Papers assessed at a 2.0 for writing have a thesis statement and some organization of paragraphs, but overall do not flow. They contain a significant number of grammar or spelling errors and read like a first draft. 1: Papers assessed at a 1.0 for writing are poorly organized, with paragraphs that do not have a coherent structure. They contain numerous grammar and/or spelling errors and read like first drafts that have not been proofread. 0: Papers assessed at a 0 for writing are similar to papers assessed at a 1.0, but contains so many grammar and/or spelling errors that the very meaning of some sentences becomes ambiguous and hard to understand. Content (for 2010) 4: Students or papers assessed at a 4.0 for their content knowledge demonstrate an exemplary understanding of all of the texts discussed in the course, including subtle points that many miss. 3: Students or papers assessed at a 3.0 for their content knowledge demonstrate a good understanding of most of the texts discussed in the course, but miss subtle points. 2: Students or papers assessed at a 2.0 for their content knowledge demonstrate a limited understanding of some of the texts discussed in the course, but miss not only subtle points but even basic points from some of the texts. 1: Students or papers assessed at a 1.0 for their content knowledge demonstrate lack of understanding of the basic points of most of the texts discussed in the course. 0: Students or papers assessed at a 0 for their content knowledge seem not to have any understanding of the basic points of the texts discussed in the course.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High  
**Projected Completion Date:** 12/2009  
**Responsible Person/Group:** Andrew J. Cohen

**Add element to student tests**

Beginning in the Spring of 2011, the tests for 1010 were improved to include an assessment of the ability of the students to distinguish arguments from non-arguments. This should help improve the findings for 1010 measure #1

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: 1010 Measure 1: Recognizing Arguments | Outcome/Objective: 1010 Objective 1: Recognizing Arguments

**Remove 1010 Objective 3**

Upon going through this revised process, we discovered that this measure served little purpose and will be removing it.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: 1010 Measure 2: Premises & Conclusions | Outcome/Objective: 1010 Objective 2: Premises & Conclusions  
Measure: 1010 Measure 3: Subordinate Arguments | Outcome/Objective: 1010 Objective 3: Subordinate Arguments

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the tests process will you make in the coming academic year?

We completely revamped our assessment policies in the Fall of 2010 and were able to use the new policies right away (excepting for the M.A. program). Importantly, we previously used 3 measures for both 1010 and 2010: philosophical skills, writing ability, and application. Phil 1010 is no longer a class with substantial writing, so that measure was no longer sensible for that class. "Application of skills" was never clear to many of our faculty and has been removed from the assessment policy for both classes. Phil 1010 concentrates on teaching students how to argue well. We thus set about to make fine distinctions of the skill set we think of as "critical thinking" and came up with the four used here: (i) distinguishing arguments from non-arguments, (ii) identifying premises and
The Department of Philosophy has developed this policy to set out its student learning outcomes and assessment procedures. Philosophy has a central role in any university. The writings of philosophers such as Aristotle, Descartes, Hume, and Kant are among the greatest products of the human mind. They are worth studying for their inherent value as well as for their impact on subsequent history. Much philosophical work is concerned with abstract and fundamental questions: Are there objective moral truths? Is there a God? These issues have moved minds for centuries. At the same time, philosophy is deeply involved with practical issues, such as the nature of the good life and what constitutes a just society. In the last two decades there has been an explosion of activity in applied philosophy with the result that philosophers now work in numerous cross-disciplinary fields such as business ethics, bioethics, philosophy of law, philosophy of science, philosophy of language and philosophy of mind. Despite its wide range of applications, philosophy has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, only philosophy systematically studies what distinguishes good arguments from bad. Consequently, those who teach philosophy are as much concerned with fostering reasoning skills as with imparting information.

**Goals**

**G 1: Philosophy BA**

Despite its wide range of applications, philosophy as currently practiced in the English-speaking world has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, the
systematic study of what distinguishes good arguments from bad is central to the philosophical enterprise. Consequently, those who teach philosophy are as much concerned with fostering critical thinking skills and clear argumentative writing as with imparting information. We believe our major should and does both. As such, students who earn the B.A. in Philosophy will demonstrate a knowledge of representative philosophers and movements in historical and contemporary philosophy as well as knowledge of the fundamental concepts, principles, and issues found in the various fields of philosophy. They will also demonstrate the ability to read critically with comprehension, think critically, and write clearly and critically.

### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: B.A. Objective 1: Critical Thinking (G: 1) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students who earn the B.A. in Philosophy will demonstrate the ability to (a) read critically with comprehension and (b) think critically.</td>
</tr>
</tbody>
</table>

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

<table>

### Measures, Targets, and Findings

#### M 1: BA Measure 1: Critical Thinking (O: 1)

Every Fall, instructors of all Phil 3000 and Phil 4990 classes include on their syllabi the requirement that final papers be submitted electronically to the professor. The instructors of these classes will send these to the Assessment Coordinator. The Assessment Coordinator will use a random number generator (such as that found at www.random.org) to select 15 papers total from all Phil 3000 classes and 10 (current policy says 15; we will adjust) papers total from all Phil 4990 classes. (These should come equally from each of the classes. For example, if there are 3 Phil 3000 classes, 5 papers should be chosen from each class; if there are 2 Phil 4990 classes, 7 papers should be chosen from each class and a 15th paper should be chosen at random from the combined set of papers from both.) Every Spring, the Assessment Coordinator distributes the selected papers to the other three members of the Assessment Committee. Those three continuing faculty (tenured, tenure-track or lecturers) assign each paper a letter score (A+, A, A-, B+, B, etc.) on critical thinking. When the scoring is complete, the Assessment Coordinator calculates the average score of the Phil 3000 papers and the average score of the Phil 4990 papers.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: B.A. Objective 1: Critical Thinking**

Our target is that the average 3000 student's critical thinking ability is assessed a 2.25 and the average 4990 student's critical thinking ability is assessed a 2.5.

**Findings 2010-2011 - Target: Met**

In this 2010-2011 cycle, the average 3000 student's critical thinking ability was assessed a 2.49 and the average 4990 student's critical thinking ability was assessed a 2.68. Moreover, in Phil 2010, the student's critical thinking ability was assessed a 2.39. Thus, we see introductory students at 2.39, progressing students at 2.49, and finishing students at 2.68. This seems like a reasonable progression.

#### M 2: BA Measure 2: Content Knowledge (O: 2)

Every Fall, instructors of all Phil 3000 and Phil 4990 classes include on their syllabi the requirement that final papers be submitted electronically to the professor. The instructors of these classes will send these to the Assessment Coordinator. The Assessment Coordinator will use a random number generator (such as that found at www.random.org) to select 15 papers total from all Phil 3000 classes and 10 (current policy says 15; we will adjust) papers total from all Phil 4990 classes. (These should come equally from each of the classes. For example, if there are 3 Phil 3000 classes, 5 papers should be chosen from each class; if there are 2 Phil 4990 classes, 7 papers should be chosen from each class and a 15th paper should be chosen at random from the combined set of papers from both.) Every Spring, the Assessment Coordinator distributes the selected papers to the other three members of the Assessment Committee. Those three continuing faculty (tenured, tenure-track or lecturers) assign each paper a letter score (A+, A, A-, B+, B, etc.) on content knowledge. When the scoring is complete, the Assessment Coordinator calculates the average score of the Phil 3000 papers and the average score of the Phil 4990 papers.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: B.A. Objective 2: Content Knowledge**

Our target is that the average 3000 student's content knowledge is assessed a 2.25 and the average 4990 student's content knowledge is assessed a 2.5.

**Findings 2010-2011 - Target: Met**

In this 2010-2011 cycle, the average 3000 student's content knowledge was assessed a 2.68 and the average 4990 student's content knowledge was assessed a 2.79. Moreover, in Phil 2010, the student's content knowledge was assessed a 2.26. Thus, we see introductory students at 2.26, progressing students at 2.68, and finishing students at 2.79. This seems like a reasonable progression.

#### M 3: BA Measure 3: Written Communication (O: 3)

Every Fall, instructors of all Phil 3000 and Phil 4990 classes include on their syllabi the requirement that final papers be submitted electronically to the professor. The instructors of these classes will send these to the Assessment Coordinator. The Assessment Coordinator will use a random number generator (such as that found at www.random.org) to select 15 papers total from all Phil 3000 classes and 10 (current policy says 15; we will adjust) papers total from all Phil 4990 classes. (These should come equally from each of the classes. For example, if there are 3 Phil 3000 classes, 5 papers should be chosen from each class; if there are 2 Phil 4990 classes, 7 papers should be chosen from each class and a 15th paper should be chosen at random from the combined set of papers from both.) Every Spring, the Assessment Coordinator distributes the selected papers to the other three members of the Assessment Committee. Those three continuing faculty (tenured, tenure-track or lecturers) assign each paper a letter score (A+, A, A-, B+, B, etc.) on written communication. When the scoring is complete, the Assessment Coordinator calculates the average score of the Phil 3000 papers and the average score of the Phil 4990 papers.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: B.A. Objective 3: Written Communication**

Our target is that the average 3000 student's written communication ability is assessed a 2.25 and the average 4990 student's written communication ability is assessed a 2.5.

**Findings 2010-2011 - Target: Met**

In this 2010-2011 cycle, the average 3000 student's written communication ability is assessed a 2.62 and the average 4990 student's written communication ability is assessed a 2.88. This seems like a reasonable progression.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**CTW courses**
We continue to monitor CTW assignments; we are not yet certain whether changes to CTW assignments will be needed.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 12/2009
- **Responsible Person/Group:** Andrew J. Cohen

**Split 4000/6000s**
We are currently working on a proposal to split our 4000 level classes from our 6000 level classes (they currently meet together). We have reason to believe this will help improve graduate and undergraduate learning.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 08/2010
- **Responsible Person/Group:** Department. Needs Provost approval for additional funding.
- **Additional Resources:** Additional tenure track faculty.

**Monitor Phil Skills closely**
The fact that the evaluated papers by our majors did not meet our target this year is disheartening. However, the 2.0 is not very far from our target of 2.75 and that target was met for the last 3 years. We thus intend to watch the situation closely. If we see a repeat of this performance we will have to determine if changes are warranted, either in the target or in our teaching.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High

**Change to Instructor evaluation of content knowledge**
Beginning in the 2011-2012 cycle, we will have the instructors of the Phil 3000 and Phil 4990 classes do the assessment of the content knowledge demonstrated in their student’s papers. This should significantly improve the value of this measure.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: BA Measure 2: Content | Outcome/Objective: B.A. Objective 2: Content Knowledge

**Reduce # of 4990 papers used**
Beginning in the 2011-2012 cycle, we will use 10 papers from Phil 4990 students instead of 15. Given the number of students, this should leave us with the valuable evidence needed while making the process simpler. Given the larger number of students in Phil 3000, we will continue to use 15 papers from those classes.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: BA Measure 1: Critical Thinking | Outcome/Objective: B.A. Objective 1: Critical Thinking
- Measure: BA Measure 2: Content | Outcome/Objective: B.A. Objective 2: Content Knowledge
- Measure: BA Measure 3: Written Communication | Outcome/Objective: B.A. Objective 3: Written Communication

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We previously had a fourth assessed “skill”: collaboration. This was in response to wider requirements that have since been eliminated and we have thus eliminated it from our assessment process. Our BA is now assessed by considering 3 standard skills our students should have: critical thinking, content knowledge, and writing ability. Importantly, the desire of the Department is to do the Assessment by considering the students in the different classes by comparison to what we believe a graduate of our Department should be at, skill-wise. We thus expect higher numbers in Phil 3000 then in Phil 2010 and higher numbers still in Phil 4990. Now that we have completed a cycle with the new policies, we anticipate (1) formally reducing the number of papers used in the assessment of Phil 4990 to 10 and (2) altering our policy such that the professors teaching Phil 3000 and Phil 4990 will provide the assessment scores for content knowledge.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Given the new system we have put in place, it would be to soon to use its results to suggest changes to our program.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you
Annual Report Section Responses

Most Important Accomplishments for Year
We completely revamped our assessment policies in the Fall of 2010 and were able to use the new policies right away (excepting for the M.A. program).

Challenges for Next Year
Given the major changes put in place in our new assessment policy, we expected to have to make adjustments.

Modifications in Intended Outcomes

Modifications in Measurement Methods
1. Now that we have completed a cycle with the new policies, we anticipate formally reducing the number of papers used in the assessment of Phil 4990 to 10. 2. We also anticipate altering our policy such that the professors teaching Phil 3000 and Phil 4990 will provide the assessment scores for content knowledge.

Georgia State University
Assessment Data by Section
2010-2011 Philosophy MA
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Department of Philosophy has developed this policy to set out its student learning outcomes and assessment procedures. Philosophy has a central role in any university. The writings of philosophers such as Aristotle, Descartes, Hume, and Kant are among the greatest products of the human mind. They are worth studying for their inherent value as well as for their impact on subsequent history. Much philosophical work is concerned with abstract and fundamental questions: Are there objective moral truths? Is there a God? These issues have moved minds for centuries. At the same time, philosophy is deeply involved with practical issues, such as the nature of the good life and what constitutes a just society. In the last two decades there has been an explosion of activity in applied philosophy with the result that philosophers now work in numerous cross-disciplinary fields such as business ethics, bioethics, philosophy of law, philosophy of science, philosophy of language and philosophy of mind. Despite its wide range of applications, philosophy has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, only philosophy systematically studies what distinguishes good arguments from bad. Consequently, those who teach philosophy are as much concerned with fostering reasoning skills as with imparting information.

Goals

G 1: Goal of the M.A. Program
Despite its wide range of applications, philosophy as currently practiced in the English-speaking world has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, the systematic study of what distinguishes good arguments from bad is central to the philosophical enterprise. Consequently, those who teach philosophy are as much concerned with fostering critical thinking skills and clear argumentative writing as with imparting information. We believe our major should and does do both. As such, students who earn the M.A. in Philosophy will demonstrate a knowledge of representative philosophers and movements in historical and contemporary philosophy as well as knowledge of the fundamental concepts, principles, and issues found in the various fields of philosophy. They will also demonstrate the ability to read critically with comprehension, think critically, and write clearly and critically. This is the same goal that we have B.A. students, but we expect graduates of the M.A. program to have a greater mastery of the content knowledge and a higher level of philosophical and communication skills than graduates of the B.A. program.

Outcomes/Objectives

O/O 1: Learning Objectives for Philosophy MA 1: Content (M: 1, 3)
Students pursuing the MA in philosophy are expected to gain a greater mastery of the content knowledge that graduates of the B.A. program attain. These include: general knowledge of a variety of philosophical systems and movements from the different periods in the history of Western philosophy (ancient/medieval and modern) and detailed knowledge of at least one system or movement in each of these two periods; general knowledge of the thought of various major philosophers from the different periods in the history of Western philosophy and detailed knowledge of at least one philosopher from each of the two periods; a familiarity with representative philosophers and movements in contemporary philosophy and in-depth understanding of at least one philosopher in at least two of the movements; knowledge of the fundamental concepts, principles, and issues found in at least three of the main areas of philosophy (ethics, aesthetics, metaphysics, epistemology, and logic, all defined broadly so as to exhaust all fields of philosophy); knowledge of the distinctive contributions made by philosophy to intellectual inquiry; and knowledge of the relevance of philosophy to contemporary American culture and life.

O/O 2: Learning Objectives for Philosophy MA 2: Skills (M: 2, 3)
Students pursuing the MA in philosophy are expected to gain a higher level of the philosophical skills than graduates of the B.A. program attain. These include: the ability to read critically and with comprehension; the ability to think critically and to write clearly...
and persuasively; the ability to apply principles and techniques of logic to philosophical discussions; and the ability to conduct philosophical research effectively.

### Measures, Targets, and Findings

#### M 1: MA Content Knowledge (O: 1)

All students receiving the MA defend a thesis to a committee of at least 3 faculty members. Upon successful defense, the committee members all indicate a content knowledge score (on a 4.0 scale).

**Source of Evidence:** Senior thesis or culminating major project

**Target for O1: Learning Objectives for Philosophy MA 1: Content**

Our target is that the average an M.A. student is assessed on their knowledge of content applicable to their thesis at a 3.3.

**Findings 2010-2011 - Target: Met**

For the 2010 calendar year, M.A. students received, on average, an assessment of 3.67 on the knowledge of content applicable to their theses.

#### M 2: MA Philosophical Skills (O: 2)

All students receiving the MA defend a thesis to a committee of at least 3 faculty members. Upon successful defense, the committee members all indicate a philosophical skills score (on a 4.0 scale).

**Source of Evidence:** Senior thesis or culminating major project

**Target for O2: Learning Objectives for Philosophy MA 2: Skills**

Our target is that the average an M.A. student is assessed on their content skills at a 3.3.

**Findings 2010-2011 - Target: Met**

For the 2010 calendar year, M.A. students received, on average, an assessment of 3.53 on their philosophical skills.

#### M 3: Acceptance into PhD Program (O: 1, 2)

As an additional piece of evidence regarding how the Department succeeds in teaching our grad students both content and philosophical skills, we determine the percentage of those students that applied to PhD programs from January through December of the preceding year who were admitted to those programs. Preparing students for PhD programs is part of our mission and acceptance to such programs is a clear sign that we are creating quality MAs; this is to say that this is a clear sign that our MA graduates have content knowledge and philosophical skills.

**Source of Evidence:** Academic indirect indicator of learning - other

**Target for O1: Learning Objectives for Philosophy MA 1: Content**

Achievement Target: We hope that any of the students who graduate with an MA who wish to continue on to a PhD program are accepted into a program they will thrive in. We set, as a realistic target, 75%.

**Findings 2010-2011 - Target: Met**

For the 2010 calendar year, we had 10 MA graduates apply to PhD programs. All but one were accepted to at least one school (that one was accepted to several law schools). One of these students was accepted into 3 psychology PhD programs. Of the others, one student was accepted to 8 Philosophy PhD programs, another to 6, another to 3, and another to 2. The acceptance rate is thus 90% for those who applied. We take this as clear indication that our grad students are learning philosophical skills and content. (Six graduates did not apply to PhD programs; one was accepted into 4 J.D. programs and is pursuing that career path; another is enrolled in a Master of Public Affairs program.)

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Improving Assessment Reporting

After the 2007-2008 Assessment Cycle, it was indicated to us that we should give more than numerical scores for the findings regarding various measures. Importantly, the faculty of the Department review the numerical data collected via the assessment process, but do not limit themselves to this (quantitative) data. We recognize its value, but also its limitations. Hence, our assessment of student learning is also informed by qualitative data such as our professional judgments about student papers. Nonetheless, in an effort to clarify what the numerical scores mean, the Assessment Coordinator will propose to the Department the following rubrics for the purpose of assessing philosophical skills and content knowledge. Philosophical Skills 4: When we indicate that we think students are doing work scored at a 4.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide charitable and accurate explanation of the philosophical positions and distinctions that are relevant to their own theses, present an insightful and compelling argument, and consider and respond to viable objections. Work done by such students demonstrates original thinking, going beyond what was said in class and in the readings. 3: When we indicate that we think students are doing work scored at a 3.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their theses, present a reasonably compelling argument, and consider possible objections. However, work done by such students is not original, in that it does not go much beyond what was said in class and in the readings, and/or does not develop some important points fully enough. 2: When we indicate that we think students are doing work scored at a 2.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an explanation of the philosophical positions and distinctions that are relevant to their theses, but this explanation is inaccurate in some important ways. Such students do demonstrate an ability to present an argument for a thesis, but their arguments are not original or compelling and they fail to consider possible objections and/or leave important points undeveloped. 1: When we indicate that we think students are doing work scored at a 1.0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a proper thesis (even when they have a unified topic). Typically, they assert views but give little or no attempt to use arguments to defend those views. 0: When we indicate that we think students are doing work scored at a 0 for philosophical skills, we
intend this to mean that the student seems able to: provide no coherent explanation of the philosophical positions and distinctions that are relevant to the class topic or even to offer a unified topic. Typically, they assert views but make virtually no attempt to defend those views; they often indicate a lack of understanding of the assignments. Content 4: Students or papers assessed at a 4.0 for their content knowledge demonstrate an exemplary understanding of all of the texts discussed in the course, including subtle points that many miss. 3: Students or papers assessed at a 3.0 for their content knowledge demonstrate a good understanding of most of the texts discussed in the course, but miss subtle points. 2: Students or papers assessed at a 2.0 for their content knowledge demonstrate a limited understanding of some of the texts discussed in the course, but miss not only subtle points but even basic points from some of the texts. 1: Students or papers assessed at a 1.0 for their content knowledge seem not to have any understanding of the basic points of the texts discussed in the course. 0: Students or papers assessed at a 0 for their content knowledge seem not to have any understanding of the basic points of the texts discussed in the course.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: 2009-2010 Assessment Cycle
Projected Completion Date: 12/2009
Responsible Person/Group: Andrew J. Cohen

**New Measure for both Outcomes**
The Assessment Coordinator will propose the following: As an additional piece of evidence regarding how the Department succeeds in teaching our grad students both content and philosophical skills, we will determine the percentage of those students that applied to PhD programs from January through December of the preceding year who were admitted to those programs. Preparing students for PhD programs is part of our mission and acceptance to such programs is a clear sign that we are creating quality MAs; this is to say that this is a clear sign that our MA graduates have content knowledge and philosophical skills.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: Current Assessment Cycle
Projected Completion Date: 01/2009

Split 4000/6000s
We are currently working on a proposal to split our 4000 level classes from our 6000 level classes (they currently meet together). We have reason to believe this will help improve graduate and undergraduate learning.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 08/2010
Responsible Person/Group: Department. Needs Provost approval for additional funding.
Additional Resources: Additional tenure track faculty.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We completely revamped our assessment policies in the Fall of 2010 and were able to use the new policies right away, except for assessing the M.A. program. The only change for the M.A. program assessment was the addition of an additional objective (and corresponding measurement and findings): the ability of our graduates to engage in written communication. In the future, data for this assessment will be collected in the same way that the other assessment data is collected: the thesis committee of each student will provide their scores of the student for written communication ability.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Our M.A. program is one of the strongest in the country and widely recognized as such. We will continue providing an excellent M.A. education.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

See the answer to academic question 1 above.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment this year (2010-2011)?

We need to refine our new policy.

**Annual Report Section Responses**

**Most Important Accomplishments for Year**
We completely revamped our assessment policies in the Fall of 2010 and were able to use the new policies right away (excepting for the M.A. program).

**Challenges for Next Year**
Given the major changes put in place in our new assessment policy, we expected to have to make adjustments.

**Modifications in Intended Outcomes**
Our new policy includes an assessment of the M.A. students' writing ability. This will be an additional outcome.

**Modification in Measurement Methods**
The thesis committees of M.A. students will add an assessment score of the student’s writing ability.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Physical Therapy DPT**

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

In accordance with, and in support of the mission of Georgia State University and the Brydine F. Lewis School of Nursing and Health Professions, the mission of the Division of Physical Therapy is to prepare, teach and graduate doctors of physical therapy who are knowledgeable in the practice of physical therapy, committed to clinical excellence, demonstrate professional distinction, and are passionate in their pursuit of scholarly activities that contribute to the body of scientific and clinical knowledge. Note: 103 graduate students were enrolled in the Doctor of Physical Therapy program in Fall of 2011. Thirty-three doctors of physical therapy graduated in August of 2011.

---

**Goals**

**G 1: Prepare a competent physical therapist that is ready to work autonomously.**
1. Prepare a competent physical therapist that is ready to work autonomously in a variety of settings throughout the continuum of healthcare. o Provide culturally competent physical therapy services for prevention, health promotion, fitness, and wellness, to individuals, groups and communities. o Provide a variety of clinical educational opportunities to allow students to perform competently across the healthcare continuum.

**G 2: Prepare a competent physical therapist who has obtained a sufficient level of knowledge.**
2. Prepare a competent physical therapist who has obtained a sufficient level of knowledge in the foundational (basic, applied and social) and clinical sciences to understand the facts, concepts, and principles essential to competent evidence based practice. o Deliver and manage a plan of care that is safe, effective and patient/client centered and incorporates all elements of the physical therapy management model as described in the Guide to Physical Therapist Practice. o Monitor and adjust the plan of care in response to patient/client outcomes. o Provide physical therapy interventions to achieve patient/client goals and outcomes. o Consistently and critically evaluate sources of information related to physical therapy practice, research, and education and apply knowledge from these sources in a scientific manner and to appropriate populations. o Consistently integrate the best evidence for practice from sources of information with clinical judgment and patient/client values to determine the best care for a patient/client. o Use clinical judgment and reflection to identify, monitor, and enhance clinical reasoning in order to minimize errors and enhance patient/client outcomes. o Consistently apply current knowledge, theory, and professional judgment while considering the patient/client perspective in patient/client management.

**G 3: Prepare a competent physical therapist that recognizes the limits of current knowledge, clinical skill, and experience.**
3. Prepare a competent physical therapist that recognizes the limits of current knowledge, clinical skill, and experience and demonstrate the commitment to acquire new knowledge and skill through lifelong learning. o Acquire new knowledge and skill: writing and presenting evidence based practice paper/research project, attend conferences and consult with colleagues o Facilitate reflective thinking using reflective journals, small group discussions o Utilize technology to access information o Formulate clinical patterns based on best available evidence for various patient populations. o Read literature, attend conferences, and consult with colleagues to examine and evaluate current and future trends to challenge the status quo of the practice of physical therapy.

**G 4: Prepare a competent physical therapist who embraces a multi-cultural learning environment.**
4. Prepare a competent physical therapist who embraces a multi-cultural learning environment that assists in the development of culturally competent physical therapy practitioners o Identify respect and act with consideration for patients'/clients' differences, values preferences and expressed needs in all professional activities. o Effectively educate others using culturally appropriate teaching methods that are commensurate with the needs of the learner. o Provide culturally competent physical therapy services for prevention, health promotion, fitness and wellness to individuals, groups and communities.

**G 5: Prepare a competent physical therapist who promotes interdisciplinary collaboration.**
5. Prepare a competent physical therapist who promotes interdisciplinary collaboration in the pursuit of clinical and scholarly activities. o Collaborate with patients/clients, family members, payers, other professionals, and other individuals to determine a plan of care that is acceptable, realistic, culturally competent, and patient/client-centered. o Develop and participate in inter-departmental research collaboration and education opportunities.

**G 6: Prepare a competent physical therapist that supports professional, community, and clinical service.**
6. Prepare a competent physical therapist that supports professional, community, and clinical service opportunities and activities. o Incorporate pro bono services into practice. o Participate and show leadership in community organizations and volunteer service. o Advocate for the health and wellness needs of society. o Provide consultation within boundaries of expertise to businesses, schools, government agencies, other organizations, or individuals. o Participate in professional organizations.

**G 7: Prepare a competent physical therapist who models professionalism consistent with the American Physical Therapy Association.**
7. Prepare a competent physical therapist who models professionalism consistent with the American Physical Therapy Association’s core values. o Adhere to legal practice standards, including all federal, state and institutional regulations related to patient/client care and fiscal management. o Practice in a manner consistent with the professional code of ethics. o Participate in organizations and efforts that support the role of the physical therapist in furthering the health and wellness of the public. o Place patient/client’s needs above the physical therapist’s needs. o Exhibit caring, compassion, and empathy in providing services to patients/clients. o Demonstrate integrity in all interactions with patients/clients, family members, caregivers, other health care providers, students, other...
Demonstrate professional behavior in all interactions with patients/clients, family members, caregivers, other health care providers, students, other consumers, and payers. Expressively and receptively communicate in a culturally competent manner with patients/clients, family members, caregivers, practitioners, interdisciplinary team members, consumers, payers, and policy makers. Influence legislative and political processes.

### Student Learning Outcomes/Objectives

**SLO 1: Professional Practice Expectation: Accountability (G: 1, 6, 7) (M: 1, 2, 5, 6, 7, 8)**

Upon completion of the program, student/graduates will demonstrate the ability to actively accept responsibility for diverse roles, obligations, and actions, including self-regulation and other behaviors that positively influence patient/client outcomes, the profession, and health care needs of society.

**Institutional Priority Associations**
1. Student promotion and progression
2. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 2: Professional Practice Expectation: Compassion/Caring (G: 4, 6) (M: 1, 2, 6, 7, 8)**

Upon completion of the program, student/graduates will demonstrate compassion, caring and empathy in providing service to patients/clients.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 3: Professional Practice Expectation: Integrity (G: 1, 6, 7) (M: 1, 2, 4, 5, 6, 7, 8)**

Upon completion of the program, student/graduates will demonstrate integrity in all interactions with patients/clients, family members, caregivers, and other health care providers, students, other consumers and payers.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 4: Professional Practice Expectations: Professional Duty (G: 6, 7) (M: 1, 2, 5, 6, 7, 8)**

Upon completion of the program, student/graduates will demonstrate professional behaviors in all interactions with patients/clients.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 5: Professional Practice Expectations: Communication (G: 1, 5, 6) (M: 1, 2, 4, 6, 7, 8)**

Upon completion of the program, student/graduates will expressively and receptively communicate in a culturally competent manner.
with patients/clients, family members, caregivers, practitioners, interdisciplinary team members, consumers, payers, and policy makers.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

<table>
<thead>
<tr>
<th>SLO</th>
<th>Professional Practice Expectations: Altruism (G: 6, 7) (M: 1, 2, 6)</th>
</tr>
</thead>
</table>
Upon completion of the program, student/graduates will exemplify primary regard for the interest of their patients/clients, thus assuming fiduciary responsibility of placing the needs of the patient/client ahead of their self-interests.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

<table>
<thead>
<tr>
<th>SLO</th>
<th>Professional Practice: Cultural Competence (G: 1, 2, 4, 7) (M: 1, 2, 5, 6, 7, 8)</th>
</tr>
</thead>
</table>
Upon completion of the program, student/graduates will identify, respect, and act with consideration for patients/clients differences, values, preferences, and expressed needs in all professional activities.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
5.4 Enhance the global competency of students, faculty and staff.

<table>
<thead>
<tr>
<th>SLO</th>
<th>Professional Practice Expectation: Clinical Reasoning (G: 2, 3) (M: 2, 3, 4, 5, 6, 7, 8)</th>
</tr>
</thead>
</table>
Upon completion of the program, student/graduates will demonstrate a systematic process for clinical judgment and reflection to identify, monitor, and enhance clinical reasoning.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

<table>
<thead>
<tr>
<th>SLO</th>
<th>Professional Practice Expectations: Evidence-Based Practice (G: 2, 3, 5) (M: 1, 2, 3, 4, 5, 6, 7, 8)</th>
</tr>
</thead>
</table>
Upon completion of the program, student/graduates will integrate the best possible research evidence with clinical expertise and
patient values, to optimize patient/client outcomes and quality of life to achieve the highest level of excellence in clinical practice.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**SLO 10: Professional Practice Expectation: Education (G: 4, 5) (M: 2, 3, 4, 5, 6, 7, 8)**

Upon completion of the program, student/graduates will effectively educate others using culturally appropriate teaching methods that are commensurate with the needs of the learner.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 11: Patient/Client Management Expectation (G: 1, 2, 3, 5) (M: 2, 3, 4, 5, 6, 7)**

Upon completion of the program, student/graduates will demonstrate competency in the five elements of care including examination, evaluation, diagnosis, prognosis, and intervention for patients across the lifespan.

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 12: Practice Management Expectations (G: 1, 5) (M: 2, 3, 4, 5, 6, 7)**

Upon completion of the program, student/graduates will demonstrate competence in determining a plan of care that is acceptable, realistic, culturally competent, and patient/client-centered.

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
Measures, Targets, and Findings

M 1: Professional Behaviors (O: 1, 2, 3, 4, 5, 6, 7, 9)

Source of Evidence: Field work, internship, or teaching evaluation

Target for O1: Professional Practice Expectation: Accountability
Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2010-2011 - Target: Met
Based on performance criteria #3, #6 (Accountability, Professional Development): #3 Accountability Class 2011 (9th semester): 18.88- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 15.78- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 11.21- In between Intermediate and Advance Beginner #6 Professional Development Class 2011 (9th semester): 18.6- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 15.42- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 9.7- Intermediate.

Target for O2: Professional Practice Expectation: Compassion/Caring
Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2010-2011 - Target: Met
Based on performance criteria #2, #12 (Professional Behavior, Plan of Care): #2 Professional Behavior Class 2011 (9th semester): 19.09- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 16.3- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 11.48- In between Intermediate and Advance Beginner. One student performed below this level with remediation in progress. #12 Plan of Care Class 2011 (9th semester): 18.21- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 14.17- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 8.41- In between Advance Beginner and Intermediate. One student performed below this level with remediation in progress.

Target for O3: Professional Practice Expectation: Integrity
Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2010-2011 - Target: Met
Based on performance criteria #2 (Professional Behavior): #2 Professional Behavior Class 2011 (9th semester): 19.09- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 16.3- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 11.48- In between Intermediate and Advance Beginner. One student performed below this level with remediation in progress.

Target for O4: Professional Practice Expectations: Professional Duty
Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2010-2011 - Target: Met
Based on performance criteria #2, #6 (Professional Behavior, Professional Development): #2 Professional Behavior Class 2011 (9th semester): 19.09- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 16.3- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 11.48- In between Intermediate and Advance Beginner. One student performed below this level with remediation in progress. #6 Professional Development Class 2011 (9th semester): 18.6- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 15.42- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 9.7- Intermediate.

Target for O5: Professional Practice Expectations: Communication
Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2010-2011 - Target: Met
Based on performance criteria #4 (Communication): #4 Communication Class 2011 (9th semester): 18.73- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 15.36- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 10.41- In between Intermediate and Advance Beginner.

Target for O6: Professional Practice Expectations: Altruisim

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

Outcomes of educational programs, including student learning outcomes (3.3.1.1)
Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

**Findings 2010-2011 - Target: Met**

Based on performance criteria #3 (Accountability): #3 Accountability Class 2011 (9th semester): 18.88- In between Entry Level and Beyond Entry Level Class 2012 (6th semester): 15.78- In between Advanced Intermediate and Entry Level Class 2013 (3rd semester): 11.21- In between Intermediate and Advance Beginner.

**Target for O7: Professional Practice: Cultural Competence**

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

**Findings 2010-2011 - Target: Met**

**Target for O9: Professional Practice Expectations: Evidence-Based Practice**

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

**M 2: Licensure Exam Pass Rate (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12)**

The National Physical Therapy Examination pass rate for the program (first time and ultimate)

Source of Evidence: Certification or licensure exam, national or state

**Target for O1: Professional Practice Expectation: Accountability**

90% first time pass rate; 100% ultimate pass rate.

**Findings 2010-2011 - Target: Met**

34 graduates of the 2010 class scored 100% for first time testing for the State Boards of Physical Therapy examination. Mean score was 671.56 compared to the national mean of 648.62. At the time of this report 22 graduates of the 2011 class scored 100% for first time testing for the State Boards of Physical Therapy examination. The mean scores were not available at the time of this report. The remaining graduates of 2011 are scheduled to take the test at a later date.

**Target for O2: Professional Practice Expectation: Compassion/Caring**

90% first time pass rate; 100% ultimate pass rate.

**Findings 2010-2011 - Target: Met**

34 graduates of the 2010 class scored 100% for first time testing for the State Boards of Physical Therapy examination. Mean score was 671.56 compared to the national mean of 648.62. **Findings 2010-2011 - Target: Met**

Based on performance criteria #1, #8, #12, #16, #17, #18 (Safety, Screening, Outcomes Assessment, Financial resources,
**M 4: Research Project (O: 3, 5, 8, 9, 10, 11, 12)**

Progressing over a two year period, student’s engagement in a research project will result in 1) a manuscript for submission to a peer-reviewed journal, and/or 2) a poster/platform presentation at a regional or national meeting.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O3: Professional Practice Expectation: Integrity**

Completed program requirement of student-driven research project progressing over three semesters resulting in a manuscript and/or poster/platform for peer-review and presentation.

**Findings 2010-2011 - Target: Met**

For the period 2010-2011 all 3rd year DPT Students completed research projects under the direct supervision of faculty as required for graduation from the program. Posters from 5 research projects were presented at the Physical Therapy Association of Georgia 2010 fall meeting at Mercer University in Atlanta, Georgia. 1 poster was presented at the 2011 CSM meeting in New Orleans. A record number of abstracts were submitted for presentation at this year's Fall PTAG meeting. Two of which requested to make platform presentations with the rest being poster presentations. Posters of 7 research projects will be presented at the Physical Therapy Association of Georgia fall meeting in Dahlonega, Georgia on October 29, 2011. These posters were/are externally peer-reviewed by the State organization’s Research Committee prior to being accepted to present. 1 research paper was accepted for publication in the Physical and Occupational therapy in Geriatrics journal on 6/17/2011.

Second year DPT students will score 75% or higher on a 100-question cumulative and comprehensive multiple choice examination. Third year DPT students will score 80% on a 200-question cumulative and comprehensive examination.

Findings 2010-2011 - Target: Met
For the school year 2010-2011 comprehensive testing results include: Class of 2011: 86% pass first time testing, mean score of 85.7 Class of 2012: 83% pass first time testing, mean score of 80.6 Class of 2013: 93% pass first time testing, mean score of 77.3 After remediation all students achieved a passing score which is required for program continuation.

Target for O10: Professional Practive Expectation: Education
First year DPT students will score 70% or higher on a 50-question cumulative and comprehensive multiple choice examination. Second year DPT students will score 75% or higher on a 100-question cumulative and comprehensive multiple choice examination. Third year DPT students will score 80% on a 200-question cumulative and comprehensive examination.

Findings 2010-2011 - Target: Met
For the school year 2010-2011 comprehensive testing results include: Class of 2011: 86% pass first time testing, mean score of 85.7 Class of 2012: 83% pass first time testing, mean score of 80.6 Class of 2013: 93% pass first time testing, mean score of 77.3 After remediation all students achieved a passing score which is required for program continuation.

Target for O11: Patient/Client Management Expectation
First year DPT students will score 70% or higher on a 50-question cumulative and comprehensive multiple choice examination. Second year DPT students will score 75% or higher on a 100-question cumulative and comprehensive multiple choice examination. Third year DPT students will score 80% on a 200-question cumulative and comprehensive examination.

Findings 2010-2011 - Target: Met
For the school year 2010-2011 comprehensive testing results include: Class of 2011: 86% pass first time testing, mean score of 85.7 Class of 2012: 83% pass first time testing, mean score of 80.6 Class of 2013: 93% pass first time testing, mean score of 77.3 After remediation all students achieved a passing score which is required for program continuation.

Target for O12: Practice Management Expectations
First year DPT students will score 70% or higher on a 50-question cumulative and comprehensive multiple choice examination. Second year DPT students will score 75% or higher on a 100-question cumulative and comprehensive multiple choice examination. Third year DPT students will score 80% on a 200-question cumulative and comprehensive examination.

Findings 2010-2011 - Target: Met
For the school year 2010-2011 comprehensive testing results include: Class of 2011: 86% pass first time testing, mean score of 85.7 Class of 2012: 83% pass first time testing, mean score of 80.6 Class of 2013: 93% pass first time testing, mean score of 77.3 After remediation all students achieved a passing score which is required for program continuation.

Graduate survey scores on a scale of 0-5:
1. Satisfaction with overall academic experience: 4.3
2. Adequate preparation: 4.7
3. Academic challenge: 4.7
4. Clinical preparation: 4.4

**Target for O10: Professional Practice Expectation: Education**
Graduate score of greater >4 on survey of four program components including overall academic experience, preparedness, challenge, length of clinical experience.

**Findings 2010-2011 - Target: Met**
Graduate survey scores on a scale of 0-5:
1. Satisfaction with overall academic experience: 4.3
2. Adequate preparation: 4.7
3. Academic challenge: 4.7
4. Clinical preparation: 4.4

**Target for O11: Patient/Client Management Expectation**
Graduate score of greater >4 on survey of four program components including overall academic experience, preparedness, challenge, length of clinical experience.

**Findings 2010-2011 - Target: Met**
Graduate survey scores on a scale of 0-5:
1. Satisfaction with overall academic experience: 4.3
2. Adequate preparation: 4.7
3. Academic challenge: 4.7
4. Clinical preparation: 4.4

**Target for O12: Practice Management Expectations**
Graduate score of greater >4 on survey of four program components including overall academic experience, preparedness, challenge, length of clinical experience.

**Findings 2010-2011 - Target: Met**
Graduate survey scores on a scale of 0-5:
1. Satisfaction with overall academic experience: 4.3
2. Adequate preparation: 4.7
3. Academic challenge: 4.7
4. Clinical preparation: 4.4

**M 7: Employer Survey (O: 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12)**
Employers of GSU DPT graduates were surveyed and asked to grade the competence of the graduates on a scale from 5 to 1 (Strongly Agree- Slightly Disagree) on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions

Source of Evidence: Employer survey, incl. perceptions of the program

**Target for O1: Professional Practice Expectation: Accountability**
Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

**Findings 2010-2011 - Target: Met**
Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

**Target for O2: Professional Practice Expectation: Compassion/Caring**
Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

**Findings 2010-2011 - Target: Met**
Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

**Target for O3: Professional Practice Expectation: Integrity**
Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

**Findings 2010-2011 - Target: Met**
Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

**Target for O4: Professional Practice Expectations: Professional Duty**
Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

**Findings 2010-2011 - Target: Met**
Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

**Target for O5: Professional Practice Expectations: Communication**
Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.
Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

Target for O7: Professional Practice: Cultural Competence

Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

Target for O8: Professional Practice Expectation: Clinical Reasoning

Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

Target for O9: Professional Practice Expectations: Evidence-Based Practice

Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

Target for O10: Professional Praction Expectation: Education

Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

Target for O11: Patient/Client Management Expectation

Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

Target for O12: Practice Management Expectations

Employer survey score of >4 on the following characteristics: Autonomy, Knowledge, Accountability, Professionalism Behavior, Safety, Clinical Reasoning, Professional Development, Plan of Care, Interventions.

Findings 2010-2011 - Target: Met

Employer survey only revealed one response with an average score of 4 on all criteria except professional behavior which scored a 5.

M 8: Alumni Survey (O: 1, 2, 3, 4, 5, 7, 8, 9, 10)

Source of Evidence: Alumni survey or tracking of alumni achievements

Target for O1: Professional Practice Expectation: Accountability

Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O2: Professional Practice Expectation: Compassion/Caring

Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.
Findings 2010-2011 - Target: Met

Target for O3: Professional Practice Expectation: Integrity
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O4: Professional Practice Expectations: Professional Duty
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O5: Professional Practice Expectations: Communication
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O7: Professional Practice: Cultural Competence
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O8: Professional Practice Expectation: Clinical Reasoning
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O9: Professional Practice Expectations: Evidence-Based Practice
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Target for O10: Professional Practice Expectation: Education
Alumni survey score of >4 in the following areas: Autonomy, Knowledge, Professional Development, Education, Professional Behavior, Cultural Competence, Accountability.

Findings 2010-2011 - Target: Met

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Cardiopulmonary Instructor
Transition teaching responsibilities in Cardiopulmonary PT course to a licensed PT with advanced credentialing as a Cardiopulmonary Care clinical specialist.
- Established in Cycle: 2008-2009
- Implementation Status: Finished
- Priority: High
Assistant to ACCE
Discussion to determine need and feasibility of hiring administrative assistant for ACCE.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 04/2012
Responsible Person/Group: Division Head
Additional Resources: Budget considerations

Core Faculty Positions
By the end of Spring 2012 fill two open core faculty positions with qualifications to include: PhD, DSc, DPT with knowledge and teaching experience in acute care, neuro-rehab, pediatrics, and/or geriatrics.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: Both positions approved by university and applications are being accepted.
Projected Completion Date: 04/2012
Responsible Person/Group: Division Head

Opening Faculty Clinic
By the end of Spring 2011 open the University approved faculty clinic to serve as a rehabilitation center for the University population and surrounding community, education site for current student population and to advance research opportunities within the division and as promoted by the University Strategic Plan.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: GSU Faculty clinic approved by the University July 2011. Currently pending Board of Regents approval.
Projected Completion Date: 05/2012
Responsible Person/Group: Division Head
Additional Resources: Site Determination

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

All measurable outcomes goals were met this past calendar year. No specified plans were established the previous academic year.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Critical thinking among students has been demonstrated as indicated by measurement of comprehensive evaluation, national testing and CPI scoring. Improvement is present comprehensive evaluation and is reflective in the national testing pass rates and mean scoring.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

The CTW has been used within the program since 2006 and has been consistent up to 2009-2010. The 2009-2010 assessment was not performed due to faculty and division head turn over with re-implementation occurring for this past academic year which has been helping in the assistance of program re-accreditation.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

Given the previous academic year was not assessed, some changes from the previous assessment have occurred with goals, objectives and measurement criteria. All changes occurred in reflection with the upcoming re-accreditation and and requirements therein.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No assessment report was performed for last year due to faculty and division head exit. Future assessment will take into consideration student course and faculty evaluation to further reflect on the effectiveness of each course and instructor.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data impact is a reflection of a strong program teaching and graduating competent physical therapists. Given the turn over in faculty and leadership the recent success should be viewed favorably toward the current faculty and program in general. Comment from students/graduates though positive do reflect the need to address issues such as course redundancy and addition of core faculty to teach courses currently being addressed with adjunct faculty.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you
take? What changes did you make as a result?
2009-2010 assessment not completed due to faculty and division head turn-over.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
We have learned that our program is strong overall yet improvements can be made in relation to filling open faculty positions which will allow for consistent student learning opportunities and allow faculty to complete all required scholarship and service requirements.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Many of the recent new faculty hires are new to the education/teaching environment. As part of each faculty plan, mentorship and continuing education will be in place to improve upon their teaching skills. It is expected with this plan and the increasing experience of teaching that the goals and objectives of the program will continue to be met and enhanced.

Annual Report Section Responses

Most Important Accomplishments for Year
1. Successful program completion and graduation of the 2011 DPT class in consideration of Division Head and faculty attrition during the course of their program. 2. Faculty practice approval by school dean and university provost and president.

Challenges for Next Year
1. Maintain program, student and faculty objective and goals despite current core faculty status minus two. 2. Hire two full time core faculty to establish goal of 50% advanced degree personnel (PhD, DSc, EdD) and fill current teaching needs. 3. Successful completion of CAPTE re-accreditation. 4. Passage of Faculty Practice by Board of Regents. 5. Curriculum change from 9 semesters to 8.

Modifications in Intended Outcomes
None

Modifications in Measurement Methods
1. Improve delivery of alumni and employer survey to increase response of participants. 2. Add instructor and course evaluation measurements.

Publications and Presentations
Scholarship forms available through division head.

Academic Teaching Activities
Academic teaching responsibilities and accomplishments available through Division Head.

International Activities
1. Clinical education sites established in Europe.

Contributions to Student Retention
1. Department student retention committee in place. For the academic year 2010-2011 two students left the program. One due to family reasons and another secondary to failed clinical education requirements.

Service to the External Community
Students and faculty are actively involved with charity and non-profit organizations promoting the university, program and profession. The following are organizations that our program, students and faculty participated with: Good Samaritan Clinic, The ALS Association; MS association; Getting 2 Tri Foundation; The Down Syndrome Buddy Walk; Migrant Worker Health Initiative in collaboration with Emory University.

Georgia State University
Assessment Data by Section
2010-2011 Physics & Astronomy Assessment of Core
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Department of Physics and Astronomy teaches a number of courses in the University Core. Introductory physics and astronomy courses may be either terminal sequences or preparation for additional courses or professional degree programs. The mission of the
department in introductory science courses is to provide the students with the ability to understand and analyze their world by making use of the theoretical and practical tools of science, in particular physics and astronomy. The mission of these courses is to a) provide foundational knowledge of the workings of the physical world, b) allow students to develop the ability to perform reasoning and analysis from a scientific perspective, c) teach both conceptual and practical knowledge of physical processes, and d) enhance the students abilities in applying mathematical or technological tools in their analysis. Where these courses serve as prerequisites to upper division courses or professional degree programs the department also seeks to give the students the content knowledge and skills required to succeed in those courses or programs.

Goals

G 1: University Learning Outcome - Critical Thinking
Among the skills developed in introductory science sequences such as those taught in the department of physics & astronomy are those identified by the university as important in all areas of study and fields of preparation. The department supports those learning outcomes by integrating them into the goals of its Area D science courses. Once of these learning outcomes is critical thinking. As applied to the introductory science courses, critical thinking is closely related to the ability to understand and apply the scientific process.

G 2: Area D GenEd Learning Goal
Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

Student Learning Outcomes/Objectives

SLO 1: Critical Thinking (G: 1) (M: 2)
A student that complete an Area D laboratory science sequence should be able to: a. formulate appropriate questions and testable hypotheses for research; b. effectively collect appropriate (empirical) evidence; c. apply and integrate principles and concepts to analyze problems within specific core areas; d. appropriately evaluate and interpret claims, arguments, evidence and hypotheses; e. use the results of analysis to appropriately construct new arguments or alternate hypotheses and formulate new questions.

SLO 2: Understanding of Mechanics Concepts (G: 2) (M: 3)
Students in Phys1111 and Phys2211 will demonstrate a competent understanding of mechanics, in particular, forces and Newton's Laws.

General Education/Core Curriculum Associations
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

SLO 3: Understanding of Electricity & Magnetism Concepts (G: 2) (M: 4)
Students in Phys1112 and Phys2212 will demonstrate a competent understanding of electricity & magnetism, in particular, charges, electric fields and forces, electric potential and potential energy, currents, magnetic fields and forces and electromagnetic induction.

General Education/Core Curriculum Associations
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

Measures, Targets, and Findings

M 2: Multiple Choice Questions on Astronomy Final Exams (O: 1)
A set of core questions is included on final exams in every section. These questions stressed physical, spatial, and quantitative reasoning. A sample of the multiple choice questions used can be found at Astr1010.

Source of Evidence: Academic direct measure of learning - other

Target for O1: Critical Thinking
The critical thinking questions on the exams are routinely the most difficult. Since they are based in the astronomy taught in the course, they require understanding of the concepts as well as the critical thinking skills being tested here. For this reason, we have set target performance level of an average score of 50% on each question.

Findings 2010-2011 - Target: Met
Data was collected for students in selected sections of the assessed astronomy courses. Based on data from Astr1010, the average score on the 10 final exam questions was 58%. Based on data from Astr1020, the average score on the 10 final exam questions was 53%.

M 3: Mechanics Diagnostic Test (O: 2)
Within the lab portion of the courses, students in Phys1111K and Phys2211K take a widely-used multiple choice mechanics diagnostic test at the beginning of the course and again near the end of the course. This test has been developed using the most widely held misconceptions.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target for O2: Understanding of Mechanics Concepts
For the diagnostic test used, published literature in the field gives a score of 60% as a competent understanding of mechanics concepts and 80% as mastery. We have therefore set a goal of 60% for the post test for both Phys1111K and Phys2211K. In addition, physics education researchers often use normalized gain to gauge the success of introductory mechanics courses. Normalized gain for each student is the increase in score from pre-test to post-test divided by the largest gain that student could
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Department Assessment Committee Review

The Departmental Assessment Committee will meet and review the results from the previous three years. They will discuss ways to address the few areas in which targets were not met for Critical Thinking in General Education courses. Among the possible actions discussed will be 1) changes in measurement tools, 2) changes in implementation of measurement tools, and 3) curriculum changes to improve instruction in critical thinking. In addition, the department assessment committee with interact with the new IMPACT (Improving Physics & Astronomy Curriculum & Teaching) group to address the few areas in which targets were not met for Critical Thinking in General Education courses. Among the possible actions discussed will be 1) changes in measurement tools, 2) changes in implementation of measurement tools, and 3) curriculum changes to improve instruction in critical thinking.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** Planned
- **Priority:** Low
- **Measure:** Multiple Choice Questions on Astronomy Final Exams
- **Outcome/Objective:** Critical Thinking
- **Implementation Description:** September 30, 2008
- **Responsible Person/Group:** Brian Thoms/Department Assessment Committee

#### Evaluation of Phys1111/1112 Interventions

A number of changes have been made to the delivery of Phys1111/1112 classes including new faculty, new textbook, and an innovative "studio" physics learning environment. In addition to the critical thinking assessment, a number of other evaluation methods are being used to determine the success of these innovations. Included in these is the use of standard assessment instruments developed in the field of physics education research. An IRB approved research effort is underway.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** These evaluations will be completed by the end of the Spring 2010 term with analysis to occur over Summer 2010
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Brian Thoms and John Evans

#### Changing Learning Outcome & Assessment Method

New learning outcomes have been passed by the university senate. Instead of assessing critical thinking in the physics and astronomy Area D science sequences, the department will begin assessing the new Area D learning goal of "Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms." The method of assessment will remain the same in Astr1010 and Astr1020 where multiple choice final exams will be used. However for the introductory physics courses (Phys1111/1112/2211/2212) we will no longer use common final exam questions. Instead we will be administering some widely used diagnostic tests of conceptual understanding. For the mechanics courses (Phys1111 and Phys2211), a standard exam covering Newton's Laws and Forces will be administered at the beginning of the semester and again at the end. For the electricity & magnetism courses (Phys1112 and Phys2212), the force test will be given at the beginning of the semester and a standard exam of E&M concepts will be given near the end of the course. These exams will generally be given in the laboratory portion of the course.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** The force diagnostic test will be given at the beginning of all 4 physics courses

### Findings 2010-2011 - Target: Not Met

Only findings for Spring 2011 will be reported here. Results for Fall 2010 were very similar, but since that was the initial semester using the new outcome and collecting the data using an electronic collection rather than bubble forms, Spring 2011 data is believed to be more reliable. Phys1111K students scored an average of 26% on the pre-test and 43% on the post-test. The average normalized gain was 0.24. Phys2211K students scored an average of 36% on the pre-test and 50% on the post-test. The average normalized gain was 0.23.

### M 4: Electricity & Magnetism Diagnostic Test (O: 3)

Within the lab portion of the courses, students in Phys1112K and Phys2212K take a multiple choice diagnostic test of electricity & magnetism conceptual understanding. Since the language is often unfamiliar to the students at the beginning of the course and published research indicates there is no value in giving it as a pre-instruction test, it is given only once near the end of the course.

- **Source of Evidence:** Standardized test of subject matter knowledge

#### Target for O3: Understanding of Electricity & Magnetism Concepts

Only limited data has been published for performance on this diagnostic. In that work at an institution comparable to GSU, post-instruction scores were reported of 44% for a Phys1112 equivalent course and 47% for a Phys2212 equivalent course. We have adopted these values as our initial targets for this measure.

- **Findings 2010-2011 - Target: Not Met**

  In the Spring of 2011, students in Phys1112 scored 30% while students in Phys2212 scored 41%. However, there were some issues with the timing of the exam compared to the coverage of material in the lecture portion of the course that may have resulted in lower scores than would represent the actual student learning in the courses.
**Goals**

**G 1: Physics Content Knowledge and Application Skills**

Students receiving a B.S. in physics should understand the core principles of physics, usually divided into the areas of classical mechanics, electricity & magnetism, statistical & thermal physics, and quantum physics. In addition students should be able to apply knowledge and skills to new situations.

**Physics111/Phys1112 Redesign**

The first year of data using the new Area D learning outcome and using the diagnostic tests has shown that both the initial scores and the learning outcomes are lower than many scores reported in the literature. We have therefore embarked on some curricular and pedagogical review of one of our course sequences, Phys111 and Phys112, the algebra-based introductory physics. Over the course of this process we will standardize the course content over all sections. In addition, we are moving some content to be taught in the laboratory only so that the lecture will be able to concentrate on a smaller core of material. The laboratory portion will then be redesigned to accommodate this material in a stand-alone fashion. This course redesign is expected to take all of the 2011-2012 academic year and be implemented in the 2012-2013 academic year. The department is considering a similar re-examination of the Phys2211/Phys2212 sequence beginning in Fall of 2012.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The department has changed its learning outcome for the core physics classes to the new Area-based outcome. The core astronomy courses have continued to assess critical thinking but will be changing to the new outcome this year. For the physics courses, besides changing the outcome the department has changed the method of assessment. Instead of common final exam questions covering critical thinking we are now using nationally recognized diagnostic tests to assess conceptual understanding in physics. We are using pre- and post-tests where appropriate to assess learning gains. One reason for the change is that using widely used assessment instruments allows us to compare our students initial knowledge and learning gains with those found in other programs. Since this is the first year using these instruments across all physics courses, we made some logistical changes in how the testing was done over the course of the year. We intend to keep the process the same for the coming year.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The first year of data using the new Area D learning outcome and using the diagnostic tests has shown that both the initial scores and the learning outcomes are lower than many scores reported in the literature. We have therefore embarked on some curricular and pedagogical review of one of our course sequences, Phys111 and Phys112, the algebra-based introductory physics. Over the course of this process we will standardize the course content over all sections. In addition, we are moving some content to be taught in the laboratory only so that the lecture will be able to concentrate on a smaller core of material. The laboratory portion will then be redesigned to accommodate this material in a stand-alone fashion. This course redesign is expected to take all of the 2011-2012 academic year and be implemented in the Fall of 2012. The department is considering a similar re-examination of the Phys2211/Phys2212 sequence beginning in Fall of 2012.

**Georgia State University**

**2010-2011 Physics BS**

*As of: 12/12/2016 04:11 PM EST*

*Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.*

**Mission / Purpose**

The Department of Physics and Astronomy offers a bachelor of science in physics. In addition to the standard program in physics, concentrations in Applied Physics, Astronomy, Pre-Medicine, Biophysics, Geology, and Computer Science are available. All bachelor degrees are constructed around a core of upper division physics and math courses which cover the core subject matter for a degree in physics. All physics majors also complete upper division lab and research requirements. In addition to the physics content, instruction in scientific reasoning, scientific writing, and technology are emphasized. The mission of the program is quite broad since students go on to many different career paths. Half of physics majors nationally go to graduate school in some field including physics, math, chemistry, engineering, medicine and law. The other half pursue careers which include research & development, business, technical sales or support, K-12 education, and many others. Due to the rigor of a physics degree program, the overwhelming feature of a student with a physics degree should be the ability to think clearly and apply scientific reasoning. The mission of the B.S. in physics program is to prepare students for a wide variety of fields and activities which require analysis, critical thinking, and the application of physical principles and scientific critical thinking to new situations.

**Goals**

**G 1: Physics Content Knowledge and Application Skills**

Students receiving a B.S. in physics should understand the core principles of physics, usually divided into the areas of classical mechanics, electricity & magnetism, statistical & thermal physics, and quantum physics. In addition students should be able to apply...
appropriate mathematical tools to set-up and solve quantitative problems using those core principles.

**G 2: Skills of a scientist**

Students receiving a B.S. in physics should demonstrate the skills and abilities needed to use their scientific knowledge and problem-solving skills in a collaborative, technological environment.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Classical Mechanics (G: 1) (M: 1)**  
Students demonstrate a knowledge and understanding of core principles in classical mechanics and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 2: Electricity & Magnetism (G: 1) (M: 1)**  
Students demonstrate a knowledge and understanding of core principles in electricity & magnetism and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 3: Statistical & Thermal Physics (G: 1) (M: 1)**  
Students demonstrate a knowledge and understanding of core principles in statistical & thermal physics and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 4: Quantum Physics (G: 1) (M: 1)**  
Students demonstrate a knowledge and understanding of core principles in quantum physics and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 5: Scientific Collaboration (G: 2) (M: 2, 3)**  
Students collaborate effectively with other students in a laboratory setting as they perform physics experiments.

**SLO 6: Research Implications (G: 2) (M: 3)**  
Students effectively evaluate the implications and applications of research and technology and express them in laboratory reports.

**SLO 7: Scientific Critical Thinking (G: 2) (M: 2, 3)**  
Students apply the basic scientific process as they perform and report laboratory experiments. That is, they develop research questions appropriate for research, appropriately collect experimental or theoretical data to address identified research questions, analyze and interpret data to evaluate research questions, and use results of data analysis to formulate new research questions.

**SLO 8: Scientific Communication (G: 2) (M: 2, 3)**  
Students communicate effectively orally and in writing in a context relevant to scientific research using appropriate formats and styles.

**SLO 9: Scientific & Research Technology (G: 2) (M: 2, 3)**  
Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature research and scientific writing in laboratory and research settings.

---

**Measures, Targets, and Findings**

**M 1: Evaluations in Content Courses (O: 1, 2, 3, 4)**

Physics Majors take a number of required courses in their junior and senior years that cover the content in the Physics and Math Core. The core content courses are Phys3401 (Modern Physics I), Phys3850 (Statistical and Thermal Physics), Phys4600 (Classical Mechanics), and Phys4700 (Electricity and Magnetism). The outcomes are assessed by the instructors for each of the core courses by rating each student on each outcomes with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty. The criteria for each course are in the Document Repository and are linked below.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Classical Mechanics**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Not Met**

Nine physics majors completed Phys4600, Classical Mechanics, in the Spring 2011 semester. According to the criteria given above, the average evaluation for their knowledge and understanding of core principles in this area was 3.7 out of 5.0. The average evaluation for their ability to use mathematics to solve problems in this area was 3.7 out of 5.0.

**Target for O2: Electricity & Magnetism**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Partially Met**

Ten physics majors completed Phys4700, Electricity Magnetism, in the Fall 2010 semester. According to the criteria given above, the average evaluation for their knowledge and understanding of core principles in this area was 4.2 out of 5.0. The
Target for **O3: Statistical & Thermal Physics**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Not Reported This Cycle**

Phys3850, Statistical Thermal Physics, was offered in the Spring of 2011. However, no assessments were performed for this course.

Target for **O4: Quantum Physics**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Sixteen physics majors completed Phys3401, Modern Physics I, in Fall 2010 semester. According to the criteria given above, the average evaluation for their knowledge and understanding of core principles in this area was 4.2 out of 5.0. The average evaluation for their ability to use mathematics to solve problems in this area was 4.1 out of 5.0.

**M 2: Laboratory Reports in Advanced Physics Lab (O: 5, 7, 8, 9)**

Physics Majors are also required to take a junior-level laboratory course, Phys3300 (Advanced Physics Laboratory). This course is designed to bring the student from the level of the introductory physics labs (where goals and procedures are mostly given to them) up to a level where they are prepared to do a Research Project (more independent and open-ended project, collaborating with graduate students and professors in a research lab). The development of critical thinking skills and appropriate written communication (lab notebooks and lab reports) are emphasized. In this lab course the students work both independently and collaboratively. They also use computers and other specialized laboratory apparatus. The outcomes are assessed by the instructor by rating each student on each outcomes with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and have been placed in the Document Repository and linked below.

Source of Evidence: Academic direct measure of learning - other

Target for **O5: Scientific Collaboration**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Fourteen physics majors completed Phys3300, Advanced Physics Laboratory - CTW, in th Fall 2010 semester. According to the criteria given above, the average evaluations were 4.6 out of 5.0 for scientific collaboration.

Target for **O7: Scientific Critical Thinking**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Fourteen physics majors completed Phys3300, Advanced Physics Laboratory - CTW, in th Fall 2010 semester. According to the criteria given above, the average evaluations were 4.4 out of 5.0 for scientific critical thinking.

Target for **O8: Scientific Communication**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Fourteen physics majors completed Phys3300, Advanced Physics Laboratory - CTW, in th Fall 2010 semester. According to the criteria given above, the average evaluations were 4.3 out of 5.0 for scientific communication.

Target for **O9: Scientific & Research Technology**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Fourteen physics majors completed Phys3300, Advanced Physics Laboratory - CTW, in th Fall 2010 semester. According to the criteria given above, the average evaluations were 4.6 out of 5.0 for scientific and research technology.

**M 3: Senior Research Project (O: 5, 6, 7, 8, 9)**

The capstone of the physics bachelor's degree program for catalog years prior to Fall 2009 is Phys4950, Senior Research. In this course students work in the research lab of a professor (within Physics and Astronomy or another department) to perform a research project. The project is one that is integrated with the ongoing research done in that group and may lead to the student being part of a presentation at a scientific conference or an article in a scientific journal. It is meant to prepare students for graduate work or a career in corporate research and development or basic research. The student participates in research group interaction (e.g. group meetings) over the course of the project. At the conclusion of the project, the student presents his/her results as a written and oral report. The outcomes are assessed by the faculty mentor overseeing the students senior research project by rating the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty. Criteria for assessment have been placed in the Document Repository and are also linked below. Beginning with the Fall
2009 catalog, physics majors will be required to complete a 3 credit hour CTW course, Phys4900, Research Project, instead of the 1 credit hour Senior Research. This course will be taught each spring semester and possibly also in the summer.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O5: Scientific Collaboration**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Four physics majors were assessed for Senior Research projects, Phys4950, and two physics majors were assessed for Research Project course, Phys4900, in 2010-2011. According to the criteria given above, the average evaluations were 4.2 out of 5.0 for scientific collaboration.

**Target for O6: Research Implications**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Not Met**

Four physics majors were assessed for Senior Research projects, Phys4950, and two physics majors were assessed for Research Project course, Phys4900, in 2010-2011. According to the criteria given above, the average evaluations were 3.7 out of 5.0 for research implications.

**Target for O7: Scientific Critical Thinking**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Not Met**

Four physics majors were assessed for Senior Research projects, Phys4950, and two physics majors were assessed for Research Project course, Phys4900, in 2010-2011. According to the criteria given above, the average evaluations were 3.7 out of 5.0 for scientific critical thinking.

**Target for O8: Scientific Communication**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Not Met**

Four physics majors were assessed for Senior Research projects, Phys4950, and two physics majors were assessed for Research Project course, Phys4900, in 2010-2011. According to the criteria given above, the average evaluations were 3.7 out of 5.0 for scientific communication.

**Target for O9: Scientific & Research Technology**

Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2010-2011 - Target: Met**

Four physics majors were assessed for Senior Research projects, Phys4950, and two physics majors were assessed for Research Project course, Phys4900, in 2010-2011. According to the criteria given above, the average evaluations were 4.0 out of 5.0 for scientific & research technology.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Implementation of Assessment in CTW courses**

The program's two CTW courses are being taught for the first time this year. These two courses replace courses previously used as major parts of our assessment of student learning outcomes. The assessments are being migrated over to the new courses. The interplay between CTW assessments and learning outcomes assessment is being worked out. Phys3300, the new lab course, is being taught for the first time in the Fall of 2009. Phys4900, the new research class, is being taught for the first time in Spring 2010. Since most of our upperclassmen are under the older catalogs, many will still complete the older research class (fewer credit hours and less externally supervised written work). Since the program is relatively small, the performance of the assessments while students are split between two different research requirements creates some unknowns in our assessment which will only be revealed in the spring term.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Laboratory Reports in Advanced Physics Lab | Outcome/Objective: Scientific & Research Technology
- Measure: Senior Research Project | Outcome/Objective: Research Implications

Implementation Description: New courses are being taught for the first time over the 2009-2010 academic year. Phys3300 is being taught in Fall 2009 and Phys4900 in Spring 2010.

Projected Completion Date: 04/2010
Responsible Person/Group: Brian Thoms
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process for the B.S. in Physics has not been changed this cycle. We continue to use instructor evaluations of student work in core content classes and in required lab and research classes to evaluate student learning outcomes. We are not planning any changes in the assessment process in the coming year.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The B.S. in Physics program has been growing significantly over the last five years. Five years ago the program was graduating 3 to 4 students per year. The program is now graduating 8 to 10 students per year and still growing. In the fall of 2011 there are 25 students in Modern Physics I and 20 students in the Advanced Physics Laboratory, two required physics major courses typically taken by juniors. These are large classes by the standards of upper division physics courses. The department is working to maintain the effectiveness of our instruction in the face of these increasing numbers. Although we have not completely met all of our targets, we are using the assessment data to monitor our effectiveness as the size of the classes increases. Some courses may in the future be split into two sections based on the assessment data.

Mission / Purpose
Coming Soon

Goals
G 1: Coming Soon
Coming Soon

G 2: Research Skills
Students receiving a M.S. in physics should demonstrate the skills and abilities needed to use their scientific knowledge and problem-solving skills in a collaborative, technological environment.

Student Learning Outcomes/Objectives

SLO 1: Collaboration in Scientific Research (M: 2, 3)
Students collaborate effectively with colleagues including other students, postdoctoral researchers, committee members, faculty advisor, and outside research collaborators.

SLO 2: Motivations and Implications of Research (M: 4, 5, 6)
Students effectively evaluate the implications and applications of research and technology.

SLO 3: Scientific Critical Thinking (M: 4, 5, 6)
Students apply the basic scientific process as they perform and report their research. That is, they develop research questions appropriate for research, appropriately collect experimental or theoretical data to address identified research questions, analyze and interpret data to evaluate research questions, and use results of data analysis to formulate new research questions.

SLO 4: Scientific Communication (M: 2, 3, 4, 5, 6)
Students communicate effectively orally and in writing in a context relevant to scientific research using appropriate formats and styles for scientific journals, meetings, conferences, or colloquia.

SLO 5: Physics & Astronomy Knowledge and Math Skills (M: 1, 4, 6)
Students demonstrate knowledge of core principles, and an ability to apply that knowledge, in advanced classical mechanics, advanced electromagnetic theory, and quantum mechanics. Astronomy concentration students will instead demonstrate knowledge of core principles, and an ability to apply that knowledge, in at least two of the above areas, as well as in the fundamentals of astrophysics.

SLO 6: Scientific & Research Technology (M: 2, 3, 5)
Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature
research and scientific writing in laboratory and research settings.

### Measures, Targets, and Findings

**M 1: Astronomy Qualifying Exam I (O: 5)**

As part of the astronomy concentration, each astronomy graduate student takes a first qualifying exam, consisting of an extensive written exam on the broad scope of astronomy and astrophysics and the essential skills required to apply the relevant physical and mathematical reasoning. Students are counseled at this point on their preparedness for further study. The learning outcomes related to core principles and math skills are assessed by the exam committee by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty which can be found at Astronomy Qualifying Exam I Assessment Form.

Physics M.S. with Astronomy Concentration (non-thesis option) students work in close collaboration with their research committee throughout the course of their M.S. program. Students write a research paper which is reviewed by a committee of faculty members. The learning outcomes related to the research paper are assessed by the committee at the completion of degree requirements by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty which is part of the Astronomy MS Committee Evaluation Form.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Motivations and Implications of Research**
Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Findings 2010-2011 - Target: Not Reported This Cycle**
Just one student was rated by their research advisor or committee member at the completion of their M.S. requirements in 2010-2011. Therefore no data is being reported this cycle.

**Target for O3: Scientific Critical Thinking**
Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Findings 2010-2011 - Target: Not Reported This Cycle**
Just one student was rated by their research advisor or committee member at the completion of their M.S. requirements in 2010-2011. Therefore no data is being reported this cycle.

**Target for O4: Scientific Communication**
Target performance is 4.0 out of 5.0 maximum for each learning outcome.
Findings 2010-2011 - Target: Not Reported This Cycle

Just one student was rated by their research advisor or committee member at the completion of their M.S. requirements in 2010-2011. Therefore no data is being reported this cycle.

Target for O6: Scientific & Research Technology

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

Findings 2010-2011 - Target: Not Reported This Cycle

Just one student was rated by their research advisor or committee member at the completion of their M.S. requirements in 2010-2011. Therefore no data is being reported this cycle.

M 6: Physics Presentation and General Examination (O: 2, 3, 4, 5)

Physics M.S. (non-thesis option) students work in close collaboration with their research committee throughout the course of their M.S. program. Students take a general examination (typically an oral examination) administered by a committee of faculty members. The learning outcomes related to the general examination are assessed by the committee at the completion of degree requirements by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are part of the Physics MS Committee Evaluation Form.

Source of Evidence: Presentation, either individual or group

Target for O2: Motivations and Implications of Research

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

Findings 2010-2011 - Target: Met

Fifteen committee member evaluations were performed of student's dissertation defenses. The average rating for Motivations and Implications of Research was 4.5 out of 5.0.

Target for O3: Scientific Critical Thinking

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

Findings 2010-2011 - Target: Met

Fifteen committee member evaluations were performed of student's dissertation defenses. The average rating for Scientific Critical Thinking was 4.4 out of 5.0.

Target for O4: Scientific Communication

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

Findings 2010-2011 - Target: Met

Fifteen committee member evaluations were performed of student's dissertation defenses. The average rating for Scientific Communication was 4.4 out of 5.0.

Target for O5: Physics & Astronomy Knowledge and Math Skills

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

Findings 2010-2011 - Target: Met

Fifteen committee member evaluations were performed of student's dissertation defenses. The average rating for Physics Knowledge and Math Skills was 4.4 out of 5.0.

M 7: Astronomy Thesis Defense

Physics M.S. with Astronomy concentration (thesis option) students present their research in a general colloquium which is followed by a defense in front of their committee of three to five faculty members. The learning outcomes related to the defense are assessed by the committee at its completion by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are part of the Physics MS with Astronomy Concentration Committee Evaluation Form.

Source of Evidence: Presentation, either individual or group

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assessment Committee Review and Report

The departmental assessment committee will present the results for this past year (along with the previous 3 years) to the faculty to keep them informed on the performance of the M.S. students in both the physics and the astronomy track. The assessment shows very high achievement of learning goals for students in both tracks of the MS in Physics program. In past years there have been occasional low scores in some areas but all results were very good this year. Therefore, the departmental assessment committee will not be recommending any changes in either the assessment methods or the curriculum at this time.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure:Astronomy Advisor | Outcome/Objective: Collaboration in Scientific Research
  Measure:Scientific & Research Technology | Outcome/Objective: Scientific Communication
  Measure:Astronomy Committee Research Paper | Outcome/Objective: Motivations and Implications of Research
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The department has not changed its assessment process since last year's assessment.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The assessment findings indicate a very high level of achievement for the students in the program. No significant changes are planned for the coming year based on this assessment.

Mission / Purpose
Coming Soon

Goals
G 1: Coming Soon
Coming Soon

Student Learning Outcomes/Objectives

SLO 1: Collaboration in Scientific Research (M: 2)
Students collaborate effectively with colleagues including other students, postdoctoral researchers, committee members, faculty advisor, and outside research collaborators.

SLO 2: Motivations and Implications of Research (M: 3, 4)
Students effectively evaluate the implications and applications of research and technology.

SLO 3: Scientific Critical Thinking (M: 3, 4)
Students apply the basic scientific process as they perform and report their research. That is, they develop research questions appropriate for research, appropriately collect experimental or theoretical data to address identified research questions, analyze and interpret data to evaluate research questions, and use results of data analysis to formulate new research questions.

SLO 4: Scientific Communication (M: 2, 3, 4)
Students communicate effectively orally and in writing in a context relevant to scientific research using appropriate formats and styles for scientific journals, meetings, conferences, or colloquia.

SLO 5: Physics Knowledge and Math Skills (M: 1, 3, 4)
Normal 0 false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Students demonstrate knowledge of core principles, and an ability to apply that knowledge, in advanced classical mechanics, advanced electromagnetic theory, advanced quantum mechanics, and advanced statistical mechanics. Students in the applied physics or biophysics options shall be able to demonstrate and apply knowledge in certain alternative areas appropriate to their specialties. Students demonstrate and apply appropriate mathematical skills in the context of their specialization, including matrix algebra, vector and tensor analysis, Fourier series and boundary value problems, and complex analysis.
SLO 6: Scientific & Research Technology (M: 2)

Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature research and scientific writing in laboratory and research settings.

Measures, Targets, and Findings

M 1: Physics Qualifying Exam (O: 5)

Students take a number of required courses during their first three semesters that cover the physics and math content for their particular area of research. Following their third semester they take a Qualifying Examination (Q-exam) in the areas applicable to their area of research. The learning outcomes related to core principles and math skills are assessed by the exam committee by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and can be found in the Physics Qualifying Exam Evaluation Forms for Classical Mechanics, Electricity & Magnetism, Statistical Mechanics, and Quantum Mechanics.

Source of Evidence: Academic direct measure of learning - other

**Target for O5: Physics Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Not Reported This Cycle**

No results were reported for the assessment of the Physics Qualifying exam for 2010-2011 cycle.

M 2: Research Advisor Evaluation (O: 1, 4, 6)

The students work in close collaboration with their research advisor throughout the course of their Ph.D. program. The advisor has the opportunity to observe and evaluate the student’s progress in collaboration and technology. The learning outcomes are assessed by the research advisor following the student’s successful dissertation defense. The advisor rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are the first section of the advisor evaluation form.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Collaboration in Scientific Research**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Met**

Three students were rated by their research advisor after successfully completing their dissertation and defense. The average rating for Collaboration in Scientific Research was 4.3 out of 5.0.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Met**

Three students were rated by their research advisor after successfully completing their dissertation and defense. The average rating for Scientific Communication Research was 4.5 out of 5.0.

**Target for O6: Scientific & Research Technology**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Met**

Three students were rated by their research advisor after successfully completing their dissertation and defense. The average rating for Scientific & Research Technology was 4.6 out of 5.0.

M 3: Committee Evaluation of Dissertation (O: 2, 3, 4, 5)

In the dissertation and oral defense, the student presents the motivation, methods, results, and implications of their research. When the student has finished the dissertation, and successfully defended it, the members of the dissertation committee produce a final assessment. Based on the written dissertation, the committee assesses the learning outcomes related to motivation and implications, the scientific process, written communication skills, and physics, astronomy, and math knowledge and application. The committee rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are sections of the documents available in the committee member evaluation form and advisor evaluation form.

Source of Evidence: Senior thesis or culminating major project

**Target for O2: Motivations and Implications of Research**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Met**

Twenty-one committee member evaluations were performed of student's dissertations. The average rating for Motivations and Implications of Research was 4.5 out of 5.0.

**Target for O3: Scientific Critical Thinking**

Target performance is 4.0 out of 5.0 for each learning outcome.
**Findings 2010-2011 - Target: Met**
Twenty-one committee member evaluations were performed of student’s dissertations. The average rating for Scientific Critical Thinking was 4.6 out of 5.0.

**Target for O4: Scientific Communication**
Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Met**
Twenty-one committee member evaluations were performed of student’s dissertations. The average rating for Scientific Communication Research was 4.5 out of 5.0.

**Target for O5: Physics Knowledge and Math Skills**
Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2010-2011 - Target: Met**
Twenty-one committee member evaluations were performed of student’s dissertations. The average rating for Physics Knowledge and Math Skills was 4.6 out of 5.0.

**M 4: Committee Evaluation of Doctoral Defense (O: 2, 3, 4, 5)**

In the dissertation and oral defense, the student presents the motivation, methods, results, and implications of their research. When the student has finished the dissertation, and successfully defended it, the members of the dissertation committee produce a final assessment. Based on the oral presentation and defense, the committee assesses the learning outcomes related to motivation and implications, the scientific process, communication skills, and physics, astronomy, and math knowledge and application. The committee rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are sections of the documents available in the committee member evaluation form and advisor evaluation form.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
The department has not changed its assessment process since last year’s assessment. Although data was collected last year, no report was submitted for the Astronomy PhD. Also, the number of students completing the Physics PhD each year is small. Therefore the report for this cycle contains data collected from July 2009 to June 2011.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The assessment findings indicate a very high level of achievement for the students in the program. No significant changes are planned for the coming year based on this assessment.

Georgia State University
Assessment Data by Section
2010-2011 Political Science Assessment of Core
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Department of Political Science's undergraduate program and its central role in the University core curriculum is to increase substantive knowledge, analytical skills and communication skills by educating students about governmental institutions and processes in the state of Georgia, the United States and the World.

Goals
G 1: Substantive Knowledge
The department seeks student learning outcomes of substantive knowledge and understanding about American and Georgian government commensurate with the performance of citizenship duties and the stability of an effective civil society and to recognize the universality of politics in human experience, an appreciation of political issues from a global perspective, and an appreciation of global issues from a political perspective.

G 2: Analytic skills
The department seeks to improve basic analytic skills through the core courses.

G 3: Communication Skills
The department seeks student learning in oral and written communication.

Student Learning Outcomes/Objectives
SLO 1: Substantive Knowledge in American and Global Politics (G: 1) (M: 1)
First learning outcome: Students should demonstrate understanding of the structures and processes of American government commensurate with the performance of citizenship duties and the stability of an effective civil society. Specifically, students should have a fundamental knowledge of constitutionalism, federalism, separation of powers, civil liberties, and the electoral process.
Second learning outcome: Students should demonstrate recognition of the universality of politics in human experience and understanding of major global issues, an appreciation of political issues from a global perspective, and an appreciation of global issues from a political perspective.

General Education/Core Curriculum Associations
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.
8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.
**SLO 2: Analytic Skills in Introductory Political Science (G: 2) (M: 2)**

Students should demonstrate an understanding of the difference between normative and descriptive explanations of political behavior.

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.
8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

---

**SLO 3: Communication Skills in Political Science (G: 3) (M: 3)**

Students should demonstrate an ability to write a paper or make an oral presentation with a clear thesis statement or question, support this statement or address this question in a logical manner, and draw logical conclusions from findings.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

---

**Measures, Targets, and Findings**

**M 1: Measures of Substantive Knowledge (O: 1)**

Concerning the first learning outcome (American government), students should be able to pass exams involving these concepts. The department uses ten (10) common questions that all sections of POLS 1101 administer to students as part of various quizzes and examinations. These questions assess students on, among other objectives, the acquisition of substantive knowledge. student scores on these questions are compiled to show passing rate on these questions as a measure of learning outcomes for the course. In addition the department collects data involving the overall pass rate for these classes. Concerning the second learning outcome (Global Issues), students should be able to pass exams demonstrating the political nature of global issues. The department uses fifteen (15) common questions that all sections of POLS 2401 administer to students as part of various quizzes and examinations. These questions assess students on, among other objectives, the acquisition of substantive knowledge. student scores on these questions are compiled to show passing rate on these questions as a measure of learning outcomes for the course. In addition the department collects data involving the overall pass rate for these classes.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Substantive Knowledge in American and Global Politics**

The department assesses student learning outcome in this area by two measures for each of the two courses (POLS 1101 & POLS 2401). For POLS 1101 The department seeks a pass rate of 75% for each individual common question. In addition the department also seeks to achieve a target of 75% of students earning a grade of C or higher in the course. For POLS 2401 The department seeks a pass rate of 60% for each individual common question. In addition the department also seeks to achieve a target of 75% of students earning a grade of C or higher in the course. The goal is to eliminate use of grades for learning assessment in the next reporting cycle.

**Findings 2010-2011 - Target: Met**

Please see attached report of learning outcomes in both POLS 1101 and POLS 2401. (Report POLS 1101 & 2401 Substantive Knowledge 2010-2011)

**M 2: Measures of Analytic Skills (O: 2)**

The assessment of this goal is the same for both learning outcomes listed above (an understanding of the difference between normative and descriptive explanations of political behavior, and an ability to assess evidence using principles of logical analysis and be able to apply that evidence when making conclusions).

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Analytic Skills in Introductory Political Science**

For POLS 1101 student responses to the 10 common questions many of which involve use of analysis are used to measure analytic skills. The department aims at achieving a passing rate of 75% on the 10 common questions for assessment. For POLS 2401 student performance on various exercises designed to elicit use of analytic skills are used for assessment. Faculty are asked to assign a score ranging from 0 to 4 for each students performance on this exercise. 4= Excellent, 3= Very Good, 2=Satisfactory, 1= Passing and 0= Failing. A sample exercise used for this is attached below. The achievement target for the objective is an average score of 2.25 on the above scale.

**Findings 2010-2011 - Target: Met**
Please see Report POLS 1101 & 2401 Analytic Skill 2010-2011 for assessment scores on POLS 1101 Please see Report POLS 1101 & 2401 Analytic Skill 2010-2011 for assessment scores on POLS 2401

M 3: Measures of Communication Skills (O: 3)

Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Instructors POLS 2401 were asked to assess each student's performance on a written assignment and rate it on a scale of 1 to 4 as follows - Sophisticated 4, Competent 3, weak 2, Poor 1 See written assignments attached.

Source of Evidence: Academic direct measure of learning - other

Target for O3: Communication Skills in Political Science

The department seeks an average score of 2.5 or higher on the four point assessment of the written assignment

Findings 2010-2011 - Target: Met

Please see assessment scores for communications skills in attached Report POLS 2401 Communication Skills 2010-2011

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Electronic text for Global Issues POLS 2401

One of the major challenges of teaching the Global Issues course POLS 2401 has been the absence of a text which would cover all the core issues discussed at an appropriate level and the outdated nature of much material in traditional texts. It was decided that the best way to solve these issues was to develop an electronic text to be used in the course.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: The department (in conjunction with a major publisher) has developed an electronic text which will be used starting spring 2011. This will enable us to select appropriate material from a variety of different sources as well as to update the material more rapidly.
Projected Completion Date: 07/2010

Enhancement of assessment tools

The department is in the process of enhancing existing assessment tools for POLS 1101 and 2401 in order to provide better assessment of learning outcomes for the POLS courses in the core. This includes developing more sophisticated assessment tools for analytical skills and substantive knowledge as well as communications skills. The goal is to move away completely from the use of grades in assessments for these courses.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 07/2012
Responsible Person/Group: director undergraduate studies, Coordinators for POLS 2401 and POLS 1101
Additional Resources: Summer funding for faculty

Georgia State University
Assessment Data by Section
2010-2011 Political Science BA
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 The Department of Political Science is committed to preparing undergraduate majors to think critically, to communicate ideas and arguments effectively, to make informed choices, and to engage in creative problem-solving. The Department’s mission also includes grounding its students in the methodology of social science as well as preparing students for the practical and professional application of their course of study. Moreover, the Department strives to create an important experiential component to the BA program in Political Science, encouraging study abroad, discipline-oriented internships, and participation in competitive academic teams (Mock Trial, Model United Nations, Model Arab League). The Department of Political Science seeks to fulfill the above mission by offering undergraduate students education in the five major sub-fields of the discipline: American Politics, Comparative Politics, International Relations, Political Theory, and Public Administration/Policy. We offer specific concentrations in prelaw education and in International Relations. The BA program in Political Science endeavors to ensure that students get broad exposure to these fields. The Department is exceptionally well placed to help realize the University’s mission of producing responsible citizens who can contribute to the ideals of an open, democratic and global society. The Department seeks to enhance student participation outside the classroom, to stimulate and award academic excellence, and to stimulate general awareness throughout the University community of the nature and impact of the field of Political Science

Goals

G 1: Understanding of US and global political institutions and behavior
All students in the BA program in Political Science will demonstrate basic understanding of political institutions and behavior both in the United States and globally.

G 3: Developing critical thinking skills appropriate to the discipline
All students in the BA program in Political Science will demonstrate critical thinking skills appropriate to the discipline
G 4: Effective written and oral communications
All students in the BA program in Political Science will demonstrate effective writing and oral presentation skills

G 2: Methodological and analytical skills
All students in the BA program in Political Science will demonstrate a competence in methodological and analytical skills

Student Learning Outcomes/Objectives

SLO 1: Appropriate methodological and analytical skills (G: 2) (M: 1)
Students will demonstrate methodological skills appropriate to the Major. Specifically students will demonstrate basic knowledge of the use of social statistics. Students will demonstrate an ability to understand data reported in various forms. Students will demonstrate an ability to conduct research using traditional and new technological resources. Students will demonstrate an understanding of the scientific method, including the formulation of hypotheses and the role of independent, control and dependent variables.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: Critical thinking (G: 3) (M: 2)
Students will demonstrate competence in six critical thinking skills identified as central to the discipline of political science - identification of question or issue, consideration of assumptions and/or context, formulation of a testable hypothesis, collection and presentation of facts/data, analysis of facts and data, and integration and synthesis of other perspectives.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 3: Effective Communication (G: 4) (M: 3)
Students will demonstrate the ability to write a paper or make an oral presentation with a clear thesis statement or question, support this statement or address this question in a logical manner, and draw logical conclusions from findings.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 4: Substantive Knowledge- US structures and processes (G: 1) (M: 4)
Students will demonstrate understanding of the structures and processes of the institutions of government and the behavior of governmental and non governmental actors in the United States. Specifically, students will demonstrate a fundamental knowledge of constitutionalism, federalism, knowledge of the key institutions of government and the key actors as well as separation of powers, civil liberties, and the electoral process for American Government

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 5: Substantive knowledge -Global structures and processes (G: 1) (M: 5)
Students will demonstrate understanding of the structures and processes of international institutions and the government and the behavior of governmental and non governmental actors in the international system. Students will demonstrate and understanding of political issues from a global perspective, and an appreciation of global issues from a political perspective. Specifically students will demonstrate an understanding of comparative perspectives and the international system

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings

M 1: Methodological Skills (O: 1)
The department uses assessments from a number of courses to assess learning outcomes for this objective. 1. Instructors for POLS 3800 - Introduction to political research (a required course for all majors) are asked to assess student learning in several methodological skills using a rubric (see attached rubric). Assessment scores from the first three items on the rubric are used to assess learning outcome for this objective. 2. Instructors in POLS 3200, POLS 3400 (required courses for International Affairs Concentration) and POLS 3140 (Required course for pre-law concentration) are asked to evaluate student learning outcomes in use of methodological skills in written assignments and papers submitted as part of the course. This measure uses a five (5) point scale to assess students. A score of five (5) representing the highest level of learning outcomes and one (1) the lowest. The scale is as follows: 1. Demonstrates an absence of methodological skills 2. Demonstrates basic understanding and use of methodological skills 3. Demonstrates competency in methodological skills 4. Demonstrates mastery of methodological skills 5. Demonstrates sophistication in methodological skills

Source of Evidence: Academic direct measure of learning - other

Target for O1: Appropriate methodological and analytical skills
On the POLS 3800 rubric the department expects 80% of students to score 1 or better out of two on the three items of the rubric used to measure achievement of this objective. On the assessments from POLS 3200, POLS 3400 and POLS 3140 The department seeks a learning outcome score of three (3) or better in methodological skills appropriate to the major.
Findings 2010-2011 - Target: Met

246 students took POLS 3800 in the Fall and Spring Semesters of 2010-2011. 10 sections of the course were taught during the period. The three assessment scores (on the first 3 items of the rubric) used to assess outcomes for this objective yielded the following. On the Identification of Research Question assignment 65.9% of our students scored a 2 (competent), 28.5% scored a 1 (Developing) 5.7% scored a 0 (Absent). On the Formulation of Testable Hypothesis assignment 57.7% of our students scored a 2 (competent), 33.7% scored a 1 (Developing) 8.5% scored a 0 (Absent). Percentage figures are rounded off. On the Analysis of Data/Facts assignment 45.9% of our students scored a 2 (competent), 42.3% scored a 1 (Developing) 12.2% scored a 0 (Absent). Percentage figures are rounded off. Instructor scores on assessments of student methodological skills in the other courses were as follows - POLS 3200 - 4.25, POLS 3400 - 3.70 and POLS 3140 - 3.75

M 2: Critical Thinking measures (O: 2)

This measure evaluates student achievement in terms of critical thinking skills identified by the department as critical thinking skills appropriate to the major. The department uses learning assessments from POLS 4900 (CTW course) to measure achievement in this objective. The course uses a rubric for this assessment (Please see attached rubric). The first six items of the POLS 4900 Assessment rubric are used to assess learning outcomes for critical thinking.

Source of Evidence: Academic direct measure of learning - other

Target for O2: Critical thinking

We expect 80% of our students to score a 3 or better on each of the six items on the rubric (the first six) being used to measure critical thinking learning outcomes.

Findings 2010-2011 - Target: Met

On the effective formulation of the research question portion of the rubric (items 1-3) the scores were as follows. Identification of question or issue - 39.7% of our students scored a 5 (Sophisticated). 48.5% scored 3-4 (Competent) 5.9% scored 1-2 (Developing). 2. Consideration of assumptions and/or context - 36.6% of our students scored a 5 (Sophisticated), 58.8% scored 3-4 (Competent) 4.1% scored 1-2 (Developing). 3. Formulation of a testable hypothesis - 44.1% of our students scored a 5 (Sophisticated), 47.1% scored 3-4 (Competent) 5.8% scored 1-2 (Developing). On the effective collection and use of data portion of the rubric (items 4-5) the scores were as follows. Collection and presentation of facts/data - 47.1% of our students scored a 5 (Sophisticated), 39.7% scored 3-4 (Competent) 5.8% scored 1-2 (Developing). 5. Analysis of facts/data - 51.5% of our students scored a 5 (Sophisticated), 35.3% scored 3-4 (Competent) 5.9% scored 1-2 (Developing). On the Integration and synthesis of other perspectives - 33.8% of our students scored a 5 (Sophisticated), 54.4% scored 3-4 (Competent) 11.8% scored 1-2 (Developing). Percentage figures are rounded off. Percentage figures are rounded off.

M 3: Effective Communication (O: 3)

Normal 0 false false false EN-US X-NONE X-NONE The assessment of effective communications skill was carried out using two courses (Both of them CTW courses and required of all majors) POLS 3800 and POLS 4900. Both these courses use rubrics to assess learning (Please see attached rubrics). The last items on each of these rubrics deal with communication skills and are used to assess learning for this objective.

Source of Evidence: Academic direct measure of learning - other

Target for O3: Effective Communication

On the POLS 3800 assessment Rubric we expect 80% of our students to score 1 or higher out of a possible score of 2 on Item four (4) of the rubric. On the POLS 4900 assessment rubric we expect 80% of our students to score 3 or higher out of a possible score of 5 on Item seven (7) of the rubric.

Findings 2010-2011 - Target: Met

On the Effective Presentation of Conclusions Skill On the POLS 3800 assessment rubric 54.5% of our students scored 2 (Competent). 34.6% scored 1 (Developing) and 10.7% scored 0 (Absent). On the Presentation of conclusions skill on the POLS 4900 Assessment Rubric 36.8% of our students scored a 5 (Sophisticated), 54.4% scored 3-4 (Competent) 7.4% scored 1-2 (Developing). Percentage figures are rounded off.

M 4: Measure of substantive knowledge US structures and processes (O: 4)

Source of Evidence: Academic direct measure of learning - other

Target for O4: Substantive Knowledge- US structures and processes

The department seeks a learning outcome score of three (3) or better in substantive knowledge of American political structures and processes.

Findings 2010-2011 - Target: Met

In the period Summer 2010 to Spring 2011 220 students took POLS 3140. The learning outcome score for substantive knowledge this course during the period was 4.00.

M 5: Measure substantive knowledge global structures and processes (O: 5)

The Department offers three concentrations in the major, General Political Science, Pre Law and International Relations with different course requirements for each concentration. Students must earn 27 credit hours in the major to graduate and must take at least one course in each of the five subject areas in political science, to wit, American Government, Comparative Politics, International Relations, Public Administration and Political Theory. Currently the only courses that all majors must take are POLS 3800, Introduction to Political Research and POLS 4900 (starting incoming class Fall 2009). Capstone Seminar. Students in International Affairs take POLS 3200, Comparative Politics and POLS 3400, International Relations, while student in Pre Law take the introductory course of POLS 3140, Judicial Politics and Process. POLS 3200 and 3400 instructors were asked to evaluate learning outcomes in substantive knowledge in the area of American government and processes for each student using results of exams and quizzes as well as written work turned in for the course. They used the following five (5) point scale, with five (5) representing the highest level of learning outcomes and one (1) the lowest. The instructors rated each student in the following subject area: overall knowledge/mastery of the subject matter. The scale is as follows: 1. Demonstrates an absence of knowledge 2. Demonstrates basic knowledge 3. Demonstrates competency 4. Demonstrates mastery 5. Demonstrates sophistication See examples of attached projects and quizzes used in POLS 3200 and POLS 3400.
## Mission / Purpose

The Department of Political Science offers comprehensive programs leading to the Master of Arts degree. Covering all of the discipline's major fields - American politics, Comparative Politics, International Relations, and Political Theory - the programs are designed to produce scholars and practitioners who are experts in their substantive field of study and who are able to combine theoretical sophistication with methodological rigor. MA students can pursue a general program in Political Science or specialize in American Politics, Comparative Politics/International Relations, Professional Political Practices, or a dual MA in International Business and Government. The Department's mission is to simultaneously (1) fill a much-needed niche in the Atlanta area and in the region for a strong terminal Master's program and (2) provide the proper research foundation for those excellent students who wish to continue on for a PhD.

## Goals

G 1: Strengthening of Analytical Skills
MA students should demonstrate improved analytical skills commensurate with their area of specialization.

**G 2: Deepening of Substantive Knowledge**
MA students should demonstrate a deepening in their knowledge of the research literature in political science.

**G 3: Deepening of Method Skills**
MA students should demonstrate a deepening in their social scientific methods skills, both quantitative and qualitative.

### Student Learning Outcomes/Objectives

**SLO 1: Use of Appropriate Research Skills (G: 1) (M: 1)**
MA students should demonstrate research skills commensurate with their area of specialization.

**SLO 2: Mastery of Relevant Research Literature (G: 2) (M: 1)**
Students should demonstrate knowledge of the research literature in their area of specialization.

**SLO 3: Effective Reporting of Research Findings (G: 3) (M: 1)**
Students should demonstrate the ability to write a professional research report or thesis in their area of specialization indicating ability to formulate research questions, to synthesize such questions with appropriate literature, to utilize appropriate research methods to answer the question(s), and to analyze data so as to answer the question(s) and raise additional questions.

### Measures, Targets, and Findings

**M 1: Review of Thesis and Non-Thesis Projects (O: 1, 2, 3)**
The members of each MA thesis committee or of a non-thesis paper will individually assess the student’s achievement in terms of the program's stated learning objectives.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Use of Appropriate Research Skills**
All completed and approved MA thesis and non-thesis projects should demonstrate mastery of the program’s stated learning objectives.

**Findings 2010-2011 - Target: Partially Met**
Eight thesis projects and four non-thesis projects were completed this year (fall 2010 through summer 2011), up from seven thesis projects last year. Thesis projects were evaluated by the respective thesis committees to determine the degree to which learning objectives were met. Of the thesis projects evaluated, all but one met the department's stated objective of averaging 3.5 or more on a learning outcomes scale of 1-5. Among these theses were some that were described as among the best that faculty members had seen in their time at GSU, including two that rated 4.5 or better and one that received a perfect 5. At the lower end of the spectrum, one thesis averaged a 2.9 on all five objectives. Faculty on that committee considered the project to be minimally acceptable.

**Target for O2: Mastery of Relevant Research Literature**
All completed and approved MA thesis and non-thesis projects should demonstrate mastery of the program’s stated learning objectives.

**Findings 2010-2011 - Target: Partially Met**
Eight thesis projects and four non-thesis projects were completed this year (fall 2010 through summer 2011), up from seven thesis projects last year. Thesis projects were evaluated by the respective thesis committees to determine the degree to which learning objectives were met. Of the thesis projects evaluated, all but one met the department's stated objective of averaging 3.5 or more on a learning outcomes scale of 1-5. At the lower end of the spectrum, one thesis averaged a 2.9 on all five objectives. Faculty on that committee considered the project to be minimally acceptable.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
2-draft requirement
Last year we implemented a two-draft requirement for all non-thesis papers, requiring the first draft to be turned in just after mid-semester, at the same time as the defense date for thesis papers. Based, admittedly, on a limited amount of data, we think this has helped improve the quality of the non-thesis papers and will continue this requirement.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):

Implementation Description: This is continued from last year.
Projected Completion Date: 10/2009
Responsible Person/Group: Graduate director, non-thesis committee members
Additional Resources: none

Pre- and post-tests for methods sequence
For next year, we plan to strengthen our assessment capacity for the graduate programs by implementing a pre-test and post-test for students in our required methods sequence, POLS 8800 (fall) and POLS 8810 (spring). 8800 teaches research design, while 8810 is intermediate applied statistics. Because we must do this in order, the first pre-test will be given in Fall 2010, and the first results will not be reported until June 2011. The Graduate Director will work with the instructors of these two courses to come up with appropriate pre- and post-tests and ensure inter-coder reliability. Normally the same person teaches 8800 on a regular basis, and the same is true for 8810.

Established in Cycle: 2008-2009
Implementation Status: On-Hold
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Review of Thesis and Non-Thesis Projects | Outcome/Objective: Mastery of Relevant Research Literature

Implementation Description: We will give the first pre-test in August 2010, the last post-test in April 2011, and report results in June 2011.
Projected Completion Date: 07/2010
Responsible Person/Group: Grad director, graduate committee, instructors of 8800 and 8810.

"C" grade minimum
The department voted this spring that no course grade under "C" could be used for credit towards the MA or PhD, and the graduate catalog has now been updated to reflect the change.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Implementation Description: It has been added to the graduate catalog and will be enforced by the graduate director and the college graduate office.
Projected Completion Date: 02/2010
Responsible Person/Group: Graduate Director

Admissions procedure reform
Last spring the department adopted a "single meeting" approach to evaluating our MA and PhD applicants in lieu of the rolling procedure of the past. This new approach allowed us to rationalize our admissions decisions and to make better use of our scarce assistantship resources.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Implementation Description: The graduate director and graduate committee meet to decide admissions and assistantships.
Projected Completion Date: 02/2010
Responsible Person/Group: Graduate director; graduate committee.

Elimination of Public Policy and Administration
The department voted last month to eliminate "Public Policy and Administration" as a major comprehensive exam and course distribution field. This change reflects the current lack of faculty in that field as well as the growth of the public management and policy department in the Andrew Young School and brings the official rules into line with the current scholarly emphasis of the department.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Implementation Description: Graduate director and college graduate office will enforce
Responsible Person/Group: Graduate Director

Elimination of Spring Intake
We have eliminated spring intake for our MA program. We were finding that students who entered our program in January were (1) having trouble following their courses because they had not yet taken POLS 8800, and (2) having trouble socially fitting into their cohorts.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Implementation Description: Graduate office will stop accepting applications.
Responsible Person/Group: Graduate office; graduate director

Faculty advisors
The department has decided to resuscitate our advisement program for incoming graduate students. This semester, all new graduate students were assigned a faculty advisor in their area who can provide them with advice.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Finished  
**Priority:** High  
**Implementation Description:** Graduate director will assign advisors to incoming graduate students.  
**Projected Completion Date:** 08/2010  
**Responsible Person/Group:** Graduate director; faculty.

**Joint MA / JD**

We are in the process of negotiating the creation of a joint MA / JD degree program with the law school. This joint agree will attract students that are interested in both law and politics.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** A sub-committee of the graduate committee is currently leading the discussions.  
**Projected Completion Date:** 11/2010  
**Responsible Person/Group:** Graduate director; sub-committee of graduate committee.

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**  
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The primary changes undertaken in the program last year are the following: (1) we added a new regular course in advanced quantitative methods to our methods sequence to better prepare our graduate students in the increasingly sophisticated techniques that they will be expected to know; (2) we expanded graduate recruitment to include purchasing GRE scores and contacting potential candidates this way; and (3) we eliminated spring intake for our MA program to better create clear cohorts in the required methods sequence.

**ACADEMIC PROGRAM QUESTION 2:**  
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We will consider adding a new qualitative methods component to the methods sequence, and we will expand again our recruitment efforts to include visits to metro Atlanta colleges and universities.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Political Science PhD**

As of: 12/12/2016 04:11 PM EST  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Department of Political Science at Georgia State University recognizes that a research department at a research university needs a genuinely strong doctoral program. As such, the PhD program aims to provide students with a comprehensive grounding in the methodology and philosophy of social science as well as specific training in multiple fields and subfields of the discipline. The PhD program focuses on producing high quality researchers and teachers. The Department strives to develop graduates who are successful at publishing and teaching, and who obtain tenure-track positions in the southeast and nationally. The training students receive in seminars should equip them to pursue their own research, present it at conferences, and secure publication of their work. The program aims to provide doctoral students with varied opportunities to develop research records and skill sets attractive to potential employers.

**Goals**

**G 5: Teaching Effectiveness**

Students should demonstrate an ability to teach courses in his or her primary field and sub-fields of the discipline.

**G 4: Research Enterprise and Professional Socialization**

Students should demonstrate a full understanding of the research enterprise. This includes the ability to critique others’ work and an ability to be a contributing scholar by producing original research.

**G 3: High Level of Competency in Research Methods**

Students should demonstrate a high level of competency in research skills appropriate to his or her research endeavors and a familiarity with a broad range of methodologies, including quantitative and qualitative approaches.

**G 2: Competency in Second Field or Subfield**

Students should demonstrate competency in at least a second substantive area of political science.

**G 1: Comprehensive Understanding of Major Field**

The student should demonstrate familiarity with the breadth and diversity of models, approaches, and intellectual traditions within that

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Comprehensive Understanding of Major Field**

The Department’s performance target is for all doctoral students taking comprehensive exams to pass those exams at the first sitting. If not, then the Department aims for students to pass the exams on their second and final sitting. Comprehensive exams test students' knowledge of, at minimum, two fields in the discipline.

**Findings 2010-2011 - Target: Partially Met**

Comprehensive exams are normally offered twice a year, in December and May. This academic year, a total of 11 students took comprehensive exams, and 7 passed all three of their exams (64%). All but one of the six students who took exams were taking them for the first time. This represents an increase from the last academic year’s pass rate of 50% and a reduction from the pass rate of two years ago, which was 87.5%. As is worth noting, it is not surprising that there should be significant fluctuation in the comp pass rate given the small sample size. In addition, it is likely that the department's quality standards for comprehensive exams are increasing slowly every year along with the growing reputation of the department, and the improved pass rate over last year indicates that students are adjusting to these higher standards. Also, on the positive side of the ledger, two of the students who passed their exams received a "high pass" on at least one of them, something that is rare in our department, and two of the students who failed only failed one of their three exams. Therefore, only two of the six exams demonstrated serious problems in quality. Sample of readers' comments on passing exams in the student's primary fields: "The student displays an unusually strong command of the literature on international politics and provides clear and compelling arguments and answers to the questions. The student offers thoughtful critiques of the IR literature, suggesting a strong ability to think independently, and skillfully draws upon the literature in other fields of political science to generate useful syntheses. The answers are very well written and demonstrate strong competence in the literature. The student is able to make very insightful connections across subfields of IR, but also across fields of political science, especially comparative politics. The answer also demonstrated the ability to skillfully use empirical examples to make a larger theoretical point." "Candidate did well explaining the benefits of experiments, but ignored discussion of observational data almost completely."

**Target for O2: Competency in Second Field or Subfield**

The Department’s performance target is for all doctoral students taking comprehensive exams to pass those exams at the first sitting. If not, then the Department aims for students to pass the exams on their second and final sitting. Comprehensive exams test students' knowledge of, at minimum, two fields in the discipline.

**Findings 2010-2011 - Target: Partially Met**

Comprehensive exams are normally offered twice a year, in December and May. This academic year, a total of 11 students took comprehensive exams, and 7 passed all three of their exams (64%). All but one of the six students who took exams were taking them for the first time. This represents an increase from the last academic year’s pass rate of 50% and a reduction from the pass rate of two years ago, which was 87.5%. As is worth noting, it is not surprising that there should be significant fluctuation in the comp pass rate given the small sample size. In addition, it is likely that the department's quality standards for comprehensive exams are increasing slowly every year along with the growing reputation of the department, and the improved pass rate over last year indicates that students are adjusting to these higher standards. Also, on the positive side of the ledger, two of the students who passed their exams received a "high pass" on at least one of them, something that is rare in our department, and two of the students who failed only failed one of their three exams. Therefore, only two of the six exams demonstrated serious problems in quality. Sample of readers' comments on passing exams in the student's sub-fields: "This is an easy pass. The answers were well constructed and did a great job of synthesizing the relevant literature without neglecting the need to fully address the question."
M 2: Assessment of Doctoral Dissertations (O: 1, 3, 4)

The members of each doctoral dissertation committee will individually provide to the Director of Graduate Studies a written assessment stating the degree to which the dissertation and its defense indicate success in achievement of the program's stated learning outcomes.

Source of Evidence: Presentation, either individual or group

Target for O1: Comprehensive Understanding of Major Field

It is the Department’s target that all successfully defended doctoral dissertations demonstrate a comprehensive understanding of the student’s major subfield, that all demonstrate a high level of competency in research methods appropriate to the discipline, that all demonstrate the ability to critique others’ work, and that all demonstrate the ability to be a contributing scholar by producing original research. On a 5-point performance scale (with 5 representing the top performance level), the department seeks scores of 3.5 or better.

Findings 2010-2011 - Target: Met

Three doctoral dissertations were successfully defended this year (from fall 2010 through summer 2011). Based on averaging the assessments completed by each student's dissertation committee members, all three of the dissertations met the department’s goal of scores of 3.5 or better on the 5 point performance scales established for each of the five learning objectives (average scores were 4.0, 4.7, and 3.9). The highest ranked dissertation was an outstanding one that met or exceeded all of the department's learning goals. The weaker two dissertations were judged by their committees to be acceptable but still weak on some dimensions. The committee members all expressed the opinion that considerable revision would be needed for these projects to be published. In general, all three dissertations tended to be weakest in their demonstration of competency in a minor field and strongest in the student's field of expertise.

Target for O3: High Level of Competency in Research Methods

It is the Department’s target that all successfully defended doctoral dissertations demonstrate a comprehensive understanding of the student’s major subfield, that all demonstrate a high level of competency in research methods appropriate to the discipline, that all demonstrate the ability to critique others’ work, and that all demonstrate the ability to be a contributing scholar by producing original research. On a 5-point performance scale (with 5 representing the top performance level), the department seeks scores of 3.5 or better.

Findings 2010-2011 - Target: Met

Three doctoral dissertations were successfully defended this year (from fall 2010 through summer 2011). The dissertations were ranked 4, 4.7, and 4 on the research methods dimension, indicating that there has been improvement in strengthening students' methodological skills (see action plan for details on recent changes to the methods sequence).

Target for O4: Research Enterprise and Professional Socialization

It is the Department’s target that all successfully defended doctoral dissertations demonstrate a comprehensive understanding of the student’s major subfield, that all demonstrate a high level of competency in research methods appropriate to the discipline, that all demonstrate the ability to critique others’ work, and that all demonstrate the ability to be a contributing scholar by producing original research. On a 5-point performance scale (with 5 representing the top performance level), the department seeks scores of 3.5 or better.

Findings 2010-2011 - Target: Met

Three doctoral dissertations were successfully defended this year (from fall 2010 through summer 2011). Based on averaging the assessments completed by each student's dissertation committee members, all three of the dissertations met the department’s goal of scores of 3.5 or better on the 5 point performance scales established for evaluating the students' familiarity with the research enterprise (the averages were 4, 4.5, and 4.7).

M 3: Conference presentations, publications and grants (O: 1, 3, 4)

This measure gauges research competency and professional socialization by assessing the success of graduate students in placing their work at conferences and in publishing outlets and in attracting funding to support their research.

Source of Evidence: Presentation, either individual or group

Target for O1: Comprehensive Understanding of Major Field

Doctoral students should present their work at at least one professional conference each year. Doctoral should students regularly submit work for publication and for grant competitions.

Findings 2010-2011 - Target: Met

At least 20 doctoral students presented their work at professional conferences this year (based on department funding records). These conferences range from small gatherings to the most prestigious (and competitive) in the discipline. For example, fully six of our PhD students presented a paper or poster at the 2010 American Political Science Association Convention, a conference with an acceptance rate well under 50% (including for faculty). In addition, both doctoral and masters student members of the Political Science Graduate Student Association organized their third annual conference at Georgia State on building political institutions, attracting scholars from around the country and even from abroad to Georgia State. In this past year we also placed three former PhD students in tenure-track / permanent positions (Georgia Gwinnett, Thammasat University [in Bangkok], and Southern Utah University), and at least five of our graduate students published in 2010-2011. In addition, two of our PhD students received Revise and Resubmit offers at journals ranked within the top 10 in the discipline (out of about 200 journals ranked). We also had a number of our students applying for grants, and one of them was awarded a highly competitive travel grant to spend fall semester doing field work in Asia. Finally, several students have made marks in related professional fields over the past year, with one doing development consulting in Africa and another working with the UN to improve refugee camp conditions.

Target for O3: High Level of Competency in Research Methods

Doctoral students should present their work at at least one professional conference each year. Doctoral should students regularly submit work for publication and for grant competitions.
Findings 2010-2011 - Target: Met

At least 20 doctoral students presented their work at professional conferences this year (based on department funding records). These conferences range from small gatherings to the most prestigious (and competitive) in the discipline. For example, fully six of our PhD students presented a paper or poster at the 2010 American Political Science Association Convention, a conference with an acceptance rate well under 50% (including for faculty). In addition, both doctoral and masters student members of the Political Science Graduate Student Association organized their third annual conference at Georgia State on building political institutions, attracting scholars from around the country and even from abroad to Georgia State. In this past year we also placed three former PhD students in tenure-track / permanent positions (Georgia Gwinnett, Thammasat University [in Bangkok], and Southern Utah University), and at least five of our graduate students published in 2010-2011. In addition, two of our PhD students received Revise and Resubmit offers at journals ranked within the top 10 in the discipline (out of about 200 journals ranked). We also had a number of our students applying for grants, and one of them was awarded a highly competitive travel grant to spend fall semester doing field work in Asia. Finally, several students have made marks in related professional fields over the past year, with one doing development consulting in Africa and another working with the UN to improve refugee camp conditions.

Target for O5: Teaching Effectiveness

The department finds that this goal was met this year. Thirteen instructors taught a total of 21 sections in fall, spring, and summer of 2010-11 (up from 19 sections last year). Seven instructors taught 10 sections in fall 2010, ten instructors taught 10 sections in spring 2011, and one instructor taught 1 section in summer 2011. Seven instructors taught 10 sections of POLS 1101 (Introduction to American Politics) and six instructors taught 11 sections of POLS 2401 (Global Issues). Six of these 22 sections were large (an unfortunate increase in over-100 sections over last year) and nine were small (a positive increase in under-25 sections from last year). Syllabi were examined by the 2401 and 1101 coordinators and found to be substantially in common learning outcomes for 2401 and will complete doing so this year for 1101. The average score for overall teaching effectiveness (question 17) was 4.4 for 1101 and 4.3 for 2401 (the relevant numbers were 4.5 and 4.0 last year); it ranged from 3.7 to 4.8 for 1101 and from 3.4 to 4.9 for 2401. These numbers are quite impressive for graduate instruction in this discipline (out of about 200 journals ranked). We also had a number of our students applying for grants, and one of them was awarded a highly competitive travel grant to spend fall semester doing field work in Asia. Finally, several students have made marks in related professional fields over the past year, with one doing development consulting in Africa and another working with the UN to improve refugee camp conditions.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continue to fund grad student conference travel
Budget permitting, the department will continue to offer financial support to students for travel to conferences to present their work. Last year, we were able to offer students $250 per conference for a total of two conferences per student per year. This year we had to cut that back to one per student per year at $250.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Conference presentations, publications and grants | Outcome/Objective: Research Enterprise and Professional Socialization

Responsible Person/Group: Graduate director, department chair

In-house teaching prep course for grad student instructors
The department will develop an in-house course required of all PhD students and open to MA students, before they are assigned a course of their own to teach. The course will cover basic pedagogical topics as well as techniques for effective teaching of some of the substantive material in POLS 1101 and POLS 2401, the two courses most often taught by graduate students.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Teaching Effectiveness | Outcome/Objective: Teaching Effectiveness

Implementation Description: Maymester
Projected Completion Date: 04/2010
Responsible Person/Group: Grad director, course instructor
Additional Resources: Ideally, we could have funds dedicated for this course to be taught each Maymester.

Pre- and post-tests in required methods sequence
To strengthen our ability to assess and teach competency in research methods, we will implement pre- and post-tests in our two required methods courses, POLS 8800 (Elements of Research Design) and POLS 8810 (Applied Intermediate Statistics). These courses are taught each fall and spring respectively. The Graduate Director will work with the two instructors (each course is normally taught regularly by the same instructor) to come up with appropriate tests and ensure inter-coder reliability. Because it makes sense to collect data following the course sequence, we will implement this measure in August 2010 and report first results in June 2011.

Established in Cycle: 2008-2009
Implementation Status: On-Hold
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Assessment of Doctoral Dissertations | Outcome/Objective: High Level of Competency in Research Methods

Implementation Description: Because it makes sense to collect data following the course sequence, we will implement this measure in August 2010 and report first results in June 2011.
Projected Completion Date: 07/2010
Responsible Person/Group: Graduate director, graduate committee, instructors of 8800 and 8810.

"C" Grade Limit
The department voted this spring that no course grade under "C" could be used for credit towards the MA or PhD, and the graduate catalog has now been updated to reflect the change.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Implementation Description: Added to the graduate catalog and enforced by the college graduate office and the department graduate director.
Projected Completion Date: 02/2010
Responsible Person/Group: Graduate Director.
Additional Resources: None.

Admission reform
Last spring the department adopted a "single meeting" approach to evaluating our MA and PhD applicants in lieu of the rolling procedure of the past. This new approach allowed us to rationalize our admissions decisions and to make better use of our scarce assistantship resources.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Implementation Description: Graduate director and graduate committee organizes a single meeting to discuss applicants and assistantships.
Projected Completion Date: 02/2010
Responsible Person/Group: Graduate director and graduate committee.

Elimination of Public Policy and Administration
The department voted last month to eliminate "Public Policy and Administration" as a major comprehensive exam and course distribution field. This change reflects the current lack of faculty in that field as well as the growth of the public management and policy department in the Andrew Young School and brings the official rules into line with the current scholarly emphasis of the department.

Established in Cycle: 2009-2010
Implementation Status: Finished
### Methods Sequence Reform

The department plans to add a third course to the required methods sequence for PhD students. This is partially in response to data gathered through the assessment process that shows that some of our PhD students do not have adequate methodological skills. The specific details of the proposal are as follows:

1. The 8800 and 8810 requirements would be maintained as they exist now, such that students must take 8800 in their first semester and 8810 in their second.
2. PhD students (not MA students) would be required to take a third methods course, either “Advanced Quantitative Methods” or “Advanced Qualitative Methods”, as they prefer.
3. “Advanced Qualitative Methods” would be offered every other spring semester and could be taken at the same time as 8810. This sequence would allow students to take the course within two years of beginning the program.
4. “Advanced Quantitative Methods” would be offered every other fall semester and would have to be taken after completion of 8810. Students entering the program in the year it is not offered could take it the following fall. Those entering in the year it is offered would have to wait until the first semester of their third year to take the course. For this reason it would be better to offer the course every year, but if resources (or enrollment concerns) make that impossible, we can allow students in this position to go forward with comps at the end of their second year even without having taken the course. That way, their progress would not be slowed.
5. “Advanced Quantitative Methods” would cover the most commonly used statistical methods not fully discussed in 8800 or 8810, as determined by the instructor. These could include, for example, maximum likelihood estimation, duration models, panel models, and hierarchical models. 

### Teaching Course for Graduate Students

The department introduced a new teaching course for our graduate instructors in May 2010. This course targets political science instruction and allows students multiple opportunities to practice their teaching, and we believe that it will further improve our already good graduate student teaching evaluations.

### Expanded Recruitment

The department will begin reaching out to metro Atlanta schools more fully to recruit new graduate students. We will also continue with our expanded recruitment efforts, which last year included purchasing GRE scores, emailing minority APSA scholars, and contacting faculty at a number of Georgia and southern undergraduate institutions.

| Priority: High | Implementation Description: Added to graduate catalog and enforced by graduate director and college graduate office. |
| Projected Completion Date: 09/2010 |
| Responsible Person/Group: Graduate Director |

| Faculty advisors |

The department has decided to resuscitate our advisement program for incoming graduate students. This semester, all new graduate students were assigned a faculty advisor in their area who can provide them with advice until they can choose their own thesis or dissertation advisors.

| Established in Cycle: 2009-2010 |
| Implementation Status: Finished |
| Priority: High |
| Implementation Description: Graduate director assigns advisors |
| Projected Completion Date: 08/2010 |
| Responsible Person/Group: Graduate Director |

| Teaching Course for Graduate Students |

The department introduced a new teaching course for our graduate instructors in May 2010. This course targets political science instruction and allows students multiple opportunities to practice their teaching, and we believe that it will further improve our already good graduate student teaching evaluations.

| Established in Cycle: 2009-2010 |
| Implementation Status: Planned |
| Priority: High |
| Implementation Description: We need a new faculty member to offer one of the courses, and we are hiring the position now. The graduate director and chair will cooperate in implementing the new policies. |
| Projected Completion Date: 08/2011 |
| Responsible Person/Group: Graduate director and chair. |
| Additional Resources: New faculty member |

| Expanded Recruitment |

The department will begin reaching out to metro Atlanta schools more fully to recruit new graduate students. We will also continue with our expanded recruitment efforts, which last year included purchasing GRE scores, emailing minority APSA scholars, and contacting faculty at a number of Georgia and southern undergraduate institutions.

| Established in Cycle: 2010-2011 |
**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The primary changes undertaken in the program last year are the following: (1) we added a new regular course in advanced quantitative methods to our methods sequence to better prepare our graduate students in the increasingly sophisticated techniques that they will be expected to know; (2) we expanded graduate recruitment to include purchasing GRE scores and contacting potential candidates this way; and (3) we eliminated spring intake for our MA program to better create clear cohorts in the required methods sequence.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We will consider adding a new qualitative methods component to the methods sequence, and we will expand again our recruitment efforts to include visits to metro Atlanta colleges and universities. We may also discuss changes to our comprehensive exams, but this will need to be a consensus decision.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Professional Accountancy-Financial Reporting & Assurance MPA**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**
For students to develop skills in: (1) developing financial reporting systems, (2) interpreting and predicting choices in financial reporting systems, (4) applying taxation law to business entities.

**Goals**

**G 1: Develop financial reporting systems**
Develop financial reporting systems.

**G 2: Interpret and predict choices in financial reporting systems**
Interpret and predict choices in financial reporting systems.

**G 3: Apply tax law to business entities**
Apply taxation law to business entities.

**Student Learning Outcomes/Objectives**

**SLO 1: Develop reporting systems: Prepare consolidated financial statements (G: 1) (M: 1)**
Prepare consolidated financial statements.

**SLO 2: Develop reporting systems: Analyze financial accounting standards (G: 1) (M: 2)**
Critically analyze current and proposed financial accounting standards to identify their strengths and weaknesses.

**SLO 3: Develop reporting systems: Analyze accounting's effect on stock prices (G: 1) (M: 3)**
Analyze the effect of accounting results on stock prices.

**SLO 4: Interpret and predict: Analyze earnings management (G: 2) (M: 4)**
Analyze why and how managers manage earnings.

**SLO 5: Interpret and predict: Perform financial analysis (G: 2) (M: 5)**
Perform financial analysis for making lending and investment decisions.

**SLO 6: Apply tax law: Identify relevant tax law (G: 3) (M: 6)**
Identify relevant tax law for the creation and liquidation of entities, state and local taxation, international taxation, and estates.
SLO 7: Apply tax law: Develop tax research skills (G: 3) (M: 7)
Develop research skills to find and evaluate tax authority.

SLO 8: Apply tax law: Apply tax law (G: 3) (M: 8)
Apply appropriate taxation law in situations involving individuals and entities.

### Measures, Targets, and Findings

| M 1: Develop reporting systems: Prepare consolidated financial statements Acct 8130 (O: 1) |
| Prepare consolidated financial statements. Performance on assignments in Acct 8130. |
| Source of Evidence: Academic direct measure of learning - other |

**Target for O1: Develop reporting systems: Prepare consolidated financial statements**
Exam mean of 75%

**Findings 2010-2011 - Target: Partially Met**
Except for noncontrolling interests (NCI), students scored 75% or above. FastTrack MPA classes are 4 hours in duration. The first exam, covering chapters 1-3, usually takes 2 hours, leaving 2 hours for class lecture on the next topic, NCI. Student participation was minimal because the exam was exhausting. The class needs an incentive to engage in class discussion.

| M 2: Develop reporting systems: Analyze financial accounting standards Acct 8410 (O: 2) |
| Analyze financial accounting standards. Performance on exam questions in 8410. |
| Source of Evidence: Academic direct measure of learning - other |

**Target for O2: Develop reporting systems: Analyze financial accounting standards**
Mean score of 80% or above

**Findings 2010-2011 - Target: Partially Met**
In the FastTrack MPA, the mean score was 75%. The course was taught over a period of three semesters for one hour credit each, beginning fall 2010. The volume of course materials needs to be recalibrated for a one credit class. Due to the format of class meetings (4.25 hours), the final exam was given in the final two hours of the last class meeting, with regular class held in the first two hours with students being tested on the material just discussed and material from previous classes. In the FlexMPA, the mean score on exam questions was 82%. Although overall the target was met, students had difficulty identifying the strengths and weaknesses of an accounting standard from the point of view of parties other than preparers, e.g., analysts, shareholders, creditors, auditors. The mean score on this question was 76%

| M 3: Develop reporting systems: Analyze accounting effect on stock prices Acct 8410 (O: 3) |
| Analyze accounting’s effect on stock prices. Performance on assignments in Acct 8410. |
| Source of Evidence: Academic direct measure of learning - other |

**Target for O3: Develop reporting systems: Analyze accounting’s effect on stock prices**
Exam mean of 80% or better

**Findings 2010-2011 - Target: Partially Met**
In the FastTrack MPA, the mean score on exam questions was 74%. The course was taught over a period of three semesters for one hour credit each, beginning fall 2010. The volume of course materials needs to be recalibrated for a one credit class. Due to the format of class meetings (4.25 hours), the final exam was given in the final two hours of the last class meeting, with regular class held in the first two hours with students being tested on the material just discussed and material from previous classes. In the FlexMPA, the mean score on exam questions was 81%. Although the target was met overall, students had difficulty applying the Efficient Markets concept to an exam case in which managers were pressured by dissident shareholders to change the depreciation method to boost the stock price. The average score on this question was 75%

| M 4: Interpret and predict: Analyze earnings management Acct 8410 (O: 4) |
| Analyze earnings management. Performance on assignments in Acct 8410. |
| Source of Evidence: Academic direct measure of learning - other |

**Target for O4: Interpret and predict: Analyze earnings management**
Exam question mean of 80% or better

**Findings 2010-2011 - Target: Partially Met**
In the FastTrack MPA, the mean exam score was 76%. The course was taught over a period of three semesters for one hour credit each, beginning fall 2010. The volume of course materials needs to be recalibrated for a one credit class. Due to the format of class meetings (4.25 hours), the final exam was given in the final two hours of the last class meeting, with regular class held in the first two hours with students being tested on the material just discussed and material from previous classes. In the FlexMPA, the exam score mean was 83%. Although students met the target, they had difficulty with a question involving the relation between earnings management and market efficiency. The mean score on this question was 79%

| M 5: Interpret and predict: Perform financial analysis Acct 8700 (O: 5) |
| Perform financial analysis for making lending and investment decisions. Performance target of mean of 75% on test questions in Acct 8700. |

| Target for O5: Interpret and predict: Perform financial analysis |
| Exam question mean of 80% or better |

**Findings 2010-2011 - Target: Partially Met**
In the FastTrack MPA, the mean exam score was 76%. The course was taught over a period of three semesters for one hour credit each, beginning fall 2010. The volume of course materials needs to be recalibrated for a one credit class. Due to the format of class meetings (4.25 hours), the final exam was given in the final two hours of the last class meeting, with regular class held in the first two hours with students being tested on the material just discussed and material from previous classes. In the FlexMPA, the exam score mean was 83%. Although students met the target, they had difficulty with a question involving the relation between earnings management and market efficiency. The mean score on this question was 79%.

## Mission / Purpose

Based on our commitment to diversity, advocacy, and the belief that change is possible, the mission of the Department of Counseling and Psychological Services is to prepare competent counseling professionals to contribute to the body of knowledge that undergirds the profession and to provide service to the profession and the community.

## Goals

<table>
<thead>
<tr>
<th>G 1: Goal #1</th>
<th>To prepare counselors to work with diverse populations.</th>
</tr>
</thead>
<tbody>
<tr>
<td>G 2: Goal #2</td>
<td>To integrate advanced theoretical perspectives into clinical practice.</td>
</tr>
<tr>
<td>G 3: Goal #3</td>
<td>To improve student's learning of qualitative and/or quantitative research methodologies.</td>
</tr>
<tr>
<td>G 4: Goal #4</td>
<td>Enhance individual and group counseling skills.</td>
</tr>
</tbody>
</table>

## Outcomes/Objectives

<table>
<thead>
<tr>
<th>O/O 1: Implementation of specific theories in practice. (M: 2, 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will demonstrate through participation in activities related to community involvement through the Student Affiliate Organization (SAO) Sigma iota or one of the departmental student organizations. This participation can be in local, state, and national organizations (community).</td>
</tr>
<tr>
<td>O/O 1: Process ethical dilemmas and lead others (M: 2, 4, 5)</td>
</tr>
<tr>
<td>Process ethical dilemmas and lead others in supervision for successful resolution and toward the implementation of an intervention.</td>
</tr>
<tr>
<td>O/O 2: Ethical group guidelines for ACA, ASGW, and APA (M: 2, 3, 5)</td>
</tr>
<tr>
<td>Training and application of ethical guidelines pertinent to the establishment, conducting, and group outcome for various types of groups are acquired.</td>
</tr>
<tr>
<td>O/O 3: Apply group theory through research. (M: 2, 4)</td>
</tr>
<tr>
<td>Group theory assists in noting the size of effective group work, curative variables, and membership roles. Research is to aid in the selection of appropriate theoretical application for various issues brought to counseling.</td>
</tr>
<tr>
<td>O/O 4: Co-leader functions (M: 2)</td>
</tr>
<tr>
<td>Co-leadership functions pertains to the standard level in didactic learning and in the application component. The advantages and disadvantages in co-leadership training is central to effective group functioning and outcome.</td>
</tr>
<tr>
<td>O/O 5: Acquire knowledge and use of adjunct structures (M: 2, 3, 4, 5)</td>
</tr>
<tr>
<td>Adjunct structure is to acquire learning in the utilization of different group formations, intervening in community actions and needs and community resources for this development.</td>
</tr>
<tr>
<td>O/O 6: Sensitivity and group learning in diversity (M: 3, 4, 9, 10)</td>
</tr>
<tr>
<td>Sensitivity in group learning in diversity is to acquire and respect differences in communication (verbal and non-verbal), values, mores, and the world view of all clients.</td>
</tr>
<tr>
<td>O/O 7: Work with individuals experiencing a trauma/crisis (M: 4, 5, 10)</td>
</tr>
<tr>
<td>Students will assess for individual and group crises for clinical significance. Students will develop a theoretical bases and skills of crisis counseling (individual and group). Students will take the on-line examination for the Certified QPR program.</td>
</tr>
<tr>
<td>O/O 8: Advocate for the profession. (M: 1, 8, 11)</td>
</tr>
<tr>
<td>Advocate by demonstrating actions that will further the identity and respect for the counseling profession.</td>
</tr>

<td>O/O 9: Share knowledge with professional community. (M: 1, 6, 7, 8, 9, 10, 11)</td>
</tr>
<tr>
<td>Share knowledge through speaking, volunteerism, employment, supervision, and involvement in professional organizations. These involvements are to be with the body of master level students, community requests, and professionals.</td>
</tr>
<tr>
<td>O/O 10: Implement advanced counseling skills. (M: 2, 6, 7, 10)</td>
</tr>
<tr>
<td>Implement advanced counseling skills during the internship field experience. Implementation of these skills and knowledge will be</td>
</tr>
</tbody>
</table>
Implement advanced counseling skills during the internship field experience. Implementation of these skills and knowledge will be assessed utilizing Form 1010 by external reviewers at the site of placement.

**O/O 11: Lead groups in the counseling relationship. (M: 1, 2, 4, 7, 9, 10)**
Work with individuals and groups to effectively lead groups and affect change in the counseling relationship.

### Measures, Targets, and Findings

**M 1: Involvement in a community and or profession activ (O: 8, 9, 11)**
Students will demonstrate through participation in activities related to community involvement through the Student Affiliate Organization (SAO) Chi Sigma Iota or one of the departmental student organizations. This participation can be in local, state, and national organizations (community).

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O8: Advocate for the profession.**
90% of all students enrolled in the Ed.S. Program in Professional Counseling will belong to the American Counseling Association and have participated in some form of community and/or professional activities.

**Findings 2010-2011 - Target: Met**
All students enrolled in the Ed.S. Program in Professional Counseling belong to the American Counseling Association and have participated in some form of community and/or professional activities.

**Target for O9: Share knowledge with professional community.**
90% of all students enrolled in the Ed.S. Program in Professional Counseling will belong to the American Counseling Association and have participated in some form of community and/or professional activities.

**Findings 2010-2011 - Target: Met**
All students enrolled in the Ed.S. Program in Professional Counseling belong to the American Counseling Association and have participated in some form of community and/or professional activities.

**Target for O11: Lead groups in the counseling relationship.**
90% of all students enrolled in the Ed.S. Program in Professional Counseling will belong to the American Counseling Association and have participated in some form of community and/or professional activities.

**Findings 2010-2011 - Target: Met**
All students enrolled in the Ed.S. Program in Professional Counseling belong to the American Counseling Association and have participated in some form of community and/or professional activities.

**M 2: Ethical group guidelines for ACA (O: 1, 1, 2, 3, 4, 5, 10, 11)**
Training and application of ethical guidelines pertinent to the establishment, conducting, and group outcome for various types of groups are acquired.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Implementation of specific theories in practice.**
All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

**Findings 2010-2011 - Target: Met**
All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

**Target for O1: Process ethical dilemmas and lead others**
All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

**Findings 2010-2011 - Target: Met**
All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

**Target for O2: Ethical group guidelines for ACA, ASGW, and APA**
All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.
### Findings 2010-2011 - Target: Met

All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

### Target for O3: Apply group theory through research.

All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

### Findings 2010-2011 - Target: Met

All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

### Target for O4: Co-leader functions

All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

### Findings 2010-2011 - Target: Met

All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

### Target for O5: Acquire knowledge and use of adjunct structures

All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

### Findings 2010-2011 - Target: Met

All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

### Target for O10: Implement advanced counseling skills.

All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

### Findings 2010-2011 - Target: Met

All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

### Target for O11: Lead groups in the counseling relationship.

All Ed.S. students in Professional Counseling will successfully lead personal growth groups and receive supervision on their leadership style and techniques. Students will audio tape their personal groups and share these tapes with the instructor and other students in the class.

### Findings 2010-2011 - Target: Met

All Ed.S. students in Professional Counseling successfully lead personal growth groups and received supervision on their leadership style and techniques. Students audio taped their personal groups and shared these tapes with the instructor and other students in the class.

### M 3: Apply group theory via research (O: 1, 2, 5, 6)

Group theory assists in noting the size of effective group work, curative variables, and membership roles. Research is to aid in the selection of appropriate theoretical application for various issues brought to counseling.

Source of Evidence: Performance (recital, exhibit, science project)

### Target for O1: Implementation of specific theories in practice.

All students will integrate their preferred theoretical orientation while successfully leading their personal growth groups. Students will receive feedback from their instructor and peers.

### Findings 2010-2011 - Target: Met

100% of Ed.S. students integrated their preferred theoretical orientation into their group leadership experiences. Students received feedback and suggestions for improvement from instructor and peers.

### Target for O2: Ethical group guidelines for ACA, ASGW, and APA

All students will integrate their preferred theoretical orientation while successfully leading their personal growth groups. Students
All Ed.S. students in Professional Counseling will, successfully co-facilitate a 9-week personal growth group, comprised of masters students in Professional Counseling.

Findings 2010-2011 - Target: Met
All Ed.S. students in Professional Counseling successfully co-facilitated a 9-week personal growth group, comprised of masters students in Professional Counseling.

Target for O6: Sensitivity and group learning in diversity
All Ed.S. students in Professional Counseling will, successfully co-facilitate a 9-week personal growth group, comprised of masters students in Professional Counseling.

Findings 2010-2011 - Target: Met
All Ed.S. students in Professional Counseling successfully co-facilitated a 9-week personal growth group, comprised of masters students in Professional Counseling.

Target for O7: Work with individuals experiencing a trauma/crisis
All Ed.S. students in Professional Counseling will, successfully co-facilitate a 9-week personal growth group, comprised of masters students in Professional Counseling.

Findings 2010-2011 - Target: Met
All Ed.S. students in Professional Counseling successfully co-facilitated a 9-week personal growth group, comprised of masters students in Professional Counseling.

Target for O11: Lead groups in the counseling relationship.
All Ed.S. students in Professional Counseling will, successfully co-facilitate a 9-week personal growth group, comprised of masters students in Professional Counseling.

Students will successfully complete the online Professional QPR training.

Findings 2010-2011 - Target: Met
100% of the Ed.S. students in Professional Counseling who enrolled in the Crisis Management course during the 2010-11 academic year successfully completed the online Professional QPR training.

M 11: Implementation of specific theories in practice (O: 8, 9)
Students will provide a written description of specific theories that can be applied to his/her current counseling practice. The scenario is to be developed and implementation of theory elements described for client care: (philosophy, data gathering, assessment, treatment, monitoring functioning, and referral).
Source of Evidence: Project, either individual or group

Target for O8: Advocate for the profession.
Students will successfully submit a written description of specific theories that can be applied to his/her current counseling practice. The scenario is to be developed and implementation of theory elements described for client care: (philosophy, data gathering, assessment, treatment, monitoring functioning, and referral).

Findings 2010-2011 - Target: Met
94% of all Ed.S. Professional Counseling students received a minimum score of 80 on the Personal Theory Paper.

Target for O9: Share knowledge with professional community.
Students will successfully submit a written description of specific theories that can be applied to his/her current counseling practice. The scenario is to be developed and implementation of theory elements described for client care: (philosophy, data gathering, assessment, treatment, monitoring functioning, and referral).

Findings 2010-2011 - Target: Met
94% of all Ed.S. Professional Counseling students received a minimum score of 80 on the Personal Theory Paper.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Ed.S. Action Plan
Provide more individualized feedback by faculty on the development and completion of the Residency Plan.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Faculty will implement this change by the commencement of Spring semester of 2010.
Projected Completion Date: 12/2009
Responsible Person/Group: Dr. Brian J. Dew, Coordinator of Ed.S. Program in Professional Counseling
Additional Resources: none
Budget Amount Requested: $0.00 (no request)
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Students in the Ed.S. program in Professional Counseling continued to demonstrate excellent both within the classroom and various clinical settings throughout metropolitan Atlanta. Please note that this program is being phased out due to transition to the 60 credit hour Mental Health Program and thus, is no longer accepting new students. As of fall, 2011, approximately 20 students are enrolled.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Students in this Ed.S. program ascertain and demonstrate advanced skills in group and individual counseling as well as obtain a more detailed knowledge of qualitative and/or quantitative skills.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Due to the development of the 60 credit hour Mental Health Counseling program, the CPS department is no longer accepting students in this program. Approximately 20 students are still enrolled, of whom 80% expect to complete the degree by Spring 2012.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
Please see the response in #3.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
Due to the high level of student performance on predetermined objectives and measurements, no changes in the assessment process were made to this program.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
No changes to curriculum or courses have been made as a result of the phasing out of this program as well as high student achievement.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?
We used data from the 2009-2010 assessment to establish student outcome measures for the masters degree program in Mental Health Counseling.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
Data from this year’s assessment efforts supports effective classroom and practica training of our advanced students in Professional Counseling.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
We anticipate that students will continue to meet all predetermined goals and objectives in the 2011-12 academic year.

Goals

G 1: Professional Counseling (MS) Program Goals
The academic goals for the masters degree program in Professional Counseling are the following: 1) Prepare counselors to offer effective clinical services to diverse clientele; 2) Integrate evidence-based theoretical interventions into counseling orientation; and 3) Enhance understanding of research methods in order to increase interpretation and contribution to the profession’s literature base.

Outcomes/Objectives

O/O 1: Applies appropriate technology for counseling. (M: 3, 6, 8, 9, 11, 15, 18)
Students will gain an understanding and will practice an application of appropriate use of technology to assist clients through educational, social, and career assessment.

Findings 2010-2011 - Target: Met
86% of all M.S. students in the Professional Counseling Program scored a minimum of 75% on the Career Assessment section of the 2010-11 Comprehensive Exam.

M 5: Form 1015: Written and Oral External Evaluation (O: 2, 5, 6, 7)
The end of year external site reviewers evaluate the intern’s written and oral communications skill and demonstrated effectiveness in the acquisition of behavioral identity and behaviors related to best client care (to include case presentations and record keeping).
Source of Evidence: Field work, internship, or teaching evaluation

Target for O2: Understands and practices the ACA Code of Ethics
Each student enrolled in CPS 7680 will earn a minimum of 3.0 average on the Ethics Section found in Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned at least a 3.0 average on the Ethics Subscale section on Form 1015 (average grade 4.4).

Target for O5: Can counsel and consult with diverse populations.
Each student enrolled in CPS 7680 will earn a minimum of 3.0 average on the Multicultural/Diversity Section found in Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned at least a 3.0 average on the Multicultural/Diversity Subscale section on Form 1015 (average grade 4.4).

Target for O6: Effectively works with groups of clients.
Each student enrolled in CPS 7680 will earn a minimum of 3.0 average on the Group Work section found in Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned at least a 3.0 average on the Group Work Subscale section on Form 1015 (average grade 4.1).

Target for O7: Acquires an identity as a professional counselor
Each student enrolled in CPS 7680 will earn a minimum of 3.0 average on the Counselor Identity Section found in Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned at least a 3.0 average on the Counselor Identity section on Form 1015 (average grade 4.5).

M 6: Form 1010 is a 1-6 rating scale for effectiveness. (O: 1, 2, 6)
Form 1010 is a 1-6 rating scale for counseling effectiveness in interviewing for data collection and in assessing for client needs through the counseling process and conceptualization (2 scales).
Source of Evidence: Field work, internship, or teaching evaluation

Target for O1: Applies appropriate technology for counseling.
All practicum students will score a minimum of 3 on Counseling Effectiveness as evidenced by the Form 1010 1-6 rating subscale.

Findings 2010-2011 - Target: Met
All students earned a minimum of 3 on the Form 1010 Counseling Effectiveness subscale (average score was 4.4 out of 6).

Target for O2: Understands and practices the ACA Code of Ethics
All practicum students will earn a average minimum score of 4 on the Counseling Ethics Form 1010 subscale.

Findings 2010-2011 - Target: Met
All students averaged higher than 4.0 on the Form 1010 subscale that assessed for Counseling Ethics (average score: 4.9 out of 6).

Target for O6: Effectively works with groups of clients.
All practicum students will earn a minimum average of 3.5 on the Group Counseling subscale (out of 6).

Findings 2010-2011 - Target: Met
All practicum students enrolled in CPS 7660 earned a 3.5 or higher on the Group Counseling Subscale (out of 6). The average Group Counseling subscale score was 4.5.

**M 7: Form 1015 (1-5 Scale) for effectivenes re: ethics. (O: 2, 5)**

Students will be rated by on-site supervisors for effective application of ethics in client care.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O2: Understands and practices the ACA Code of Ethics**

All students enrolled in CPS 7680 will receive an average minimum score of 3.0 on the Form 1015 Ethics Section.

**Findings 2010-2011 - Target: Met**

All students enrolled in CPS 7680 earned at least a 3.0 average on the Ethics Subscale section on Form 1015 (average grade: 4.6).

**Target for O5: Can counsel and consult with diverse populations.**

All students enrolled in CPS 7680 will receive an average minimum score of 3.0 on the Form 1015 Multicultural/Diversity Section.

**Findings 2010-2011 - Target: Met**

All students enrolled in CPS 7680 earned at least a 3.0 average on the Multicultural/Diversity Subscale section on Form 1015 (average grade: 5.0).

**M 8: Comprehensive Examination Appraisal Subtest (O: 1, 2, 4)**

Appraisal subtest on the 150 departmental examination contains 12 questions relative to appraisal in vocational, educational, and psychological assessment.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Applies appropriate technology for counseling.**

80% of students taking the Comprehensive Exam in Professional Counseling during the 2009-2010 academic year will answer 75% of the questions included in the Appraisal section correctly.

**Findings 2010-2011 - Target: Met**

86% of students who took the Comprehensive Exam in Professional Counseling during the 2010-11 academic year answered 75% of the questions included in the Appraisal section correctly.

**Target for O2: Understands and practices the ACA Code of Ethics**

80% of students taking the Comprehensive Exam in Professional Counseling during the 2009-2010 academic year will answer 75% of the questions included in the Assessment and Ethics sections correctly.

**Findings 2010-2011 - Target: Met**

86% of students who took the Comprehensive Exam in Professional Counseling during the 2010-11 academic year answered 75% of the questions included in the Assessment and Ethics section correctly.

**Target for O4: Practices educational, social, & career assessment**

80% of students taking the Comprehensive Exam in Professional Counseling during the 2009-2010 academic year will answer 75% of the questions included in the Assessment and Career sections correctly.

**Findings 2010-2011 - Target: Met**

84% of students who took the Comprehensive Exam in Professional Counseling during the 2010-11 academic year answered 75% of the questions included in the Assessment and Career sections correctly.

**M 9: Form 1015 Clinical Reasoning (O: 1, 2, 3, 4)**

Form 1015 Clinical reasoning tests for knowledge in assessment and interpretation of educational, psychological, social, and career. This scale is a 1-5 rating with less than 3.0 rated as ineffective.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O1: Applies appropriate technology for counseling.**

All students enrolled in CPS 7680 will score a minimum of 3.0 on the "Use of Technology" section found in Form 1015.

**Findings 2010-2011 - Target: Met**

All students enrolled in CPS 7680 scored a minimum of 3.0 on the "Use of Technology" section found in Form 1015.

**Target for O2: Understands and practices the ACA Code of Ethics**

All students enrolled in CPS 7680 will score a minimum of 3.0 on the "Clinical Reasoning" section found in Form 1015.

**Findings 2010-2011 - Target: Met**

All students enrolled in CPS 7680 scored a minimum of 3.0 on the "Clinical Reasoning" section found in Form 1015.

**Target for O3: Conducts effective program evaluation and research**

All students enrolled in CPS 7680 will score a minimum of 3.0 on the "Clinical Reasoning" section found in Form 1015.
All students enrolled in CPS 7680 will score a minimum of 3.0 on the "Clinical Reasoning" section found in Form 1015.

**Targets for O4: Practices educational, social, & career assessment**

All students enrolled in CPS 7680 will score a minimum of 3.0 on the "Clinical Reasoning" section found in Form 1015.

**Findings 2010-2011 - Target: Met**

All students enrolled in CPS 7680 scored a minimum of 3.0 on the "Clinical Reasoning" section found in Form 1015.

M 10: CPS 7260 Acquire knowledge specific to application (O: 2, 5, 6, 7)

CPS Departmental Comprehensive Examination (1 of 12 subtest) measuring theory, strategies, application, and outcome for individual, family communication, and treatment.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Targets for O2: Understands and practices the ACA Code of Ethics**

80% of all students will receive a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Findings 2010-2011 - Target: Met**

87% of all students received a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Targets for O5: Can counsel and consult with diverse populations.**

80% of all students will receive a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Findings 2010-2011 - Target: Met**

87% of all students received a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Targets for O6: Effectively works with groups of clients.**

80% of all students will receive a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Findings 2010-2011 - Target: Met**

87% of all students received a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Targets for O7: Acquires an identity as a professional counselor**

80% of all students will receive a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

**Findings 2010-2011 - Target: Met**

87% of all students received a score of 75 or higher on the Comprehensive Exam section related to counseling theories and interventions.

M 11: CPS 7260 Acquire knowledge specific to application. (O: 1, 2, 5, 6)

An external review is conducted across a national sample, CACREP sample, and non-CACREP sample taking the National Counseling Examination. Human Relations is one of 8 measures. 90% of the students will average at or exceed the mean for the comparison groups. This submeasure has 43 questions out of a 200 item examination.

Source of Evidence: Comprehensive/end-of-program subject matter exam

83% of all students taking the Professional Counseling Masters-level Comprehensive Examination scored a minimum of 75% on the research and evaluation section.

M 18: Form 1015 (O: 1, 2, 3, 4, 5, 6, 7)

Form 1015 with 10 subscales (1-5 likert scale) assessing overall knowledge is administered at year end. The 10 subscales are knowledge, clinical reasoning, relationship skills, assessment, intervention, written communication, oral communication, ethics, sensitivity to diversity, and attitudes toward supervision.

Source of Evidence: Field work, internship, or teaching evaluation

Target for O1: Applies appropriate technology for counseling.
All students enrolled in CPS 7680 will earn a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Target for O2: Understands and practices the ACA Code of Ethics
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Target for O3: Conducts effective program evaluation and research
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Target for O4: Practices educational, social, & career assessment
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Target for O5: Can counsel and consult with diverse populations.
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Target for O6: Effectively works with groups of clients.
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Target for O7: Acquires an identity as a professional counselor
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Findings 2010-2011 - Target: Met
All students enrolled in CPS 7680 earned a minimum of 3.0 on the Cumulative Evaluation (average of all subscales) on Form 1015.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assessment of development in practicum/internship experiences
The Professional Counseling Faculty (soon to be renamed the Clinical Mental Health Faculty) will schedule a meeting per semester in order to discuss student issues as they matriculate through the practicum and internship program. If faculty express concerns, the Coordinator of the program will meet with the student to discuss the aforementioned issues and ways to address faculty concerns.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Will implement this policy no later than the commencement of Spring semester 2010.
Projected Completion Date: 12/2009
Responsible Person/Group: Dr. Brian J. Dew, Coordinator of the Professional Counseling Program
Additional Resources: None
Budget Amount Requested: $0.00 (no request)
Transition from Professional Counseling to Mental Health Counseling
Faculty and students will successfully transition from a 48 credit hour Professional Counseling Masters of Science Program to a 60 credit hour Mental Health Counseling Program. Required classes have been added, an additional semester of coursework is now required, and changes to the Comprehensive Examinations will be made. Our first cohort of MHC students will enter in the Fall 2010.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Projected Completion Date: 12/2010
Responsible Person/Group: Mental Health Counseling Program Faculty

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
For ALL measures, students in the masters degree program in Professional Counseling met the minimum scores as established by program faculty. Students continue to demonstrate mastery on all CACREP-core areas and exceed both non-CACREP and CACREP program scores on the National Counselor Examination.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Students in the Professional Counseling masters program demonstrate both the learning of clinical theory within the first year of the academic program and demonstration of counseling skills in the program's second year via the practicum/internship sequence.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Please note that the 48 credit hour masters program in Professional Counseling is being phased out and replaced by the 60 credit hour masters program in Mental Health Counseling. Starting in fall of 2011, only 17 students remained in the Professional Counseling Program and nearly all students will have completed by spring 2012.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
The masters program in Professional Counseling is in the process of being phased out and replaced by the masters program in Mental Health Counseling. Starting in fall 2011, 17 students remained in the program of which nearly 90% will have graduated by Spring 2012. The Mental Health Counseling Program will have a separate WEAVE report affiliated with its performance.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No changes were made due to the fact that 100% of objectives were met in the previous year.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The accreditation of our Professional Counseling program is requiring that student outcome data be used to justify program effectiveness. This data will be used in the 2011-2011 WEAVE report.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
We used the outcome data from the 2009-2010 assessment to develop and implement the student outcome measurements for the Mental Health Counseling Program.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
Faculty members in the Professional Counseling Program continue to provide excellent training and supervision to the students in this program. No areas of deficiency were noted.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Since 90% of students now enrolled in this program are in the practicum/internship sequence, the objectives and goals that will be measured will have to change. Please note that the majority of students will be in the Mental Health Counseling Program and their outcomes and measurements will be provided in a separate WEAVE report.
**Mission / Purpose**

The Department of Psychology at Georgia State University has a long history of offering both undergraduate and graduate degree programs for both traditional and non-traditional students. Psychology is an extraordinarily broad field and the departmental curriculum reflects the diversity of our discipline. Psychology can be broadly defined as the study of behavior, and of those biological, psychological and socio-cultural factors that which create and influence behavior. It also encompasses the application of basic knowledge to improve the human condition. Psychology has links to numerous other disciplines (e.g., biology, sociology), and also a long tradition of interdisciplinary interaction and collaboration (e.g., education, medicine) based on shared goals in both basic and applied endeavors. The department offers a general undergraduate degree program that is integrated with the broader liberal arts education goals of the College of Arts and Sciences. It also contributes to the core curriculum for all undergraduates in the College.

**Goals**

**G 1: Area D: Natural and Computational Sciences**
Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**G 2: Area E: Social Science**
Students effectively analyze the complexity of human behavior, and how historical, economic, political, and/or spatial relationships develop, persist, and change.

**Student Learning Outcomes/Objectives**

**SLO 2: Knowledge Base of General Psychology (G: 2) (M: 2)**
Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Other Outcomes/Objectives**

**O/O 1: Knowledge Base of Physiological Mechanisms of Behavior (G: 1) (M: 1)**
Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings and historical trends in the physiological basis of behavior.

**General Education/Core Curriculum Associations**

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Measures, Targets, and Findings**

**M 1: PSYC1100 (Intro to Biopsychology) - Learning Survey 2010-11 (O: 1)**
Students are asked to rate on a scale of 1-5 their own knowledge in 8 different areas of the course once at the beginning of the semester, and once at the end. The course areas are listed below. A copy of the learning survey can be found in the document repository. General Knowledge of Psychology 1) What biological psychology is about 2) The theory of evolution through natural selection Knowledge in Specific Areas of Psychology 3) Neurons and how they work 4) The brain and the nervous system 5) Vision 6) Audition 7) Learning and memory 8) Schizophrenia 9) Language
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Knowledge Base of Physiological Mechanisms of Behavior**
Our target for this measure is significant improvement in the average, total score on the survey, with a moderate or better effect size.

**Findings 2010-2011 - Target: Met**
Average total scores on the survey at the end of the course (M=33.07, SD=4.70) were significantly higher than at the beginning of the course (M=24.28, SD=5.53), (t(392)=10.93, p<.001). The effect size was large, Cohen's d=.68.

**M 2: PSYC1101 Mastery Test (O: 2)**
In all sections of PSYC1101, Introduction to Psychology, instructors are asked to include twenty questions on their final exam. These twenty questions constitute a mastery test which we use to measure progress toward outcome 1, Knowledge Base. A copy of the mastery test can be found in the document repository.
Source of Evidence: Academic direct measure of learning - other

**Target for O2: Knowledge Base of General Psychology**
Our target is that 70% of students will pass the mastery test with a score of 70% or better.

**Findings 2010-2011 - Target: Partially Met**
Sixty-seven percent of the sampled students (n=188 of 280) passed the mastery test with a score of 70% or better. The mean score on the test was 75 with a standard deviation of 14.3.
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since last year's assessment report we have added a measure of progress toward the core objective of natural and computational sciences. Our recently revised course offering, PSYC1100 - Introduction to Biopsychology, already contained a measure that can be used to track progress in this core curriculum objective. This course was previously entitled Natural Science Aspects of Psychology, and has since been revised thoroughly, prompting our revision of the measurement. We hope to improve this assessment process by analyzing data from all sections of this course.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Because the data from the 1100 course are relatively new, we have not yet had time to act upon them - currently, the target is being met. For the 1101 mastery test measurement, we did not meet the target. This is the first semester this has occurred and we will continue to monitor this measurement. If we continue to fail to meet the target, we may consider revising the curriculum or discussing the appropriateness of the target level, e.g. comparing our targets to those of other core objective measures.

Georgia State University
Assessment Data by Section
2010-2011 Psychology BA, BS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The department offers a general undergraduate degree program aligned with the American Psychological Association's guidelines for a baccalaureate in psychology and that is integrated with the broader liberal arts education goals of the College of Arts and Sciences. The department's undergraduate mission is to teach scientific thinking about behavior, the skills related to the conduct of research and the values that reflect psychology as both a science and an applied discipline, and to convey knowledge, skills, and values consistent with liberal arts education that are further developed in psychology.

Goals

G 1: Knowledge Skills and Values Specific to Psychology

[Comment for reviewers: As a member of the Undergraduate Assessment Committee I have reviewed Weave reports from several departments and have noticed that many reporters use the level of Assessment Goals as established in the Weave system differently. I thought it would be useful to say a bit about how we in the Psychology Department are using Weave and how this aligns with American Psychological Association standards for undergraduate degree program learning outcomes. The APA Guidelines for the Undergraduate Psychology Major (see document repository) outline ten learning objectives, each of which falls under one of two broad categories: Knowledge, skills and values consistent with the science and application of psychology; and knowledge, skills and values consistent with a more general liberal arts education that are further developed in psychology.) The first category represents objectives that provide hallmarks of psychology education. The general goal is to foster knowledge, skills and values consistent with the science and application of psychology, specifically. Five specific objectives are associated with this broad goal.

G 2: Knowledge, Skills, and Values Consistent with Liberal Arts Education that are Further Enhanced by Psychology

This broad goal describes specific outcomes that are usually a part of a general education program or liberal arts education, and which are enhanced by the discipline of Psychology. Conversely, liberal arts training in these areas contributes to a better understanding of the scientific study of behavior.

G 3: Knowledge, scientist, and applied
1. To train graduate students to be well-versed both broadly in psychology (e.g., history of the field, research methodology) as well as experts in specific areas of concentration (e.g., clinical, child clinical, specific research program). 2. To train graduate students to be scientists (e.g., empiricists, critical thinkers) across domains (e.g., applied, theoretical). 3. To train graduate students to be able to apply their skills across settings (e.g., research, instruction, applied) and within specific areas of individualized interest and concentration (e.g., community center for disadvantaged populations).

Student Learning Outcomes/Objectives

SLO 1: Knowledge Base of Psychology (G: 1) (M: 1, 2)

Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

General Education/Core Curriculum Associations

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 2: Research Methods in Psychology (G: 1) (M: 7, 8, 11)**
Students will understand and apply basic research methods in psychology, including research design, data analysis and interpretation.

**SLO 3: Critical Thinking Skills in Psychology (G: 1) (M: 6)**
Students will respect and use critical and creative thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes.

**SLO 4: Application of Psychological Principles (G: 1) (M: 9, 10)**
Students will understand and apply psychological principles to personal, social, and organizational issues.

**SLO 5: Values in Psychology (G: 1) (M: 8, 10)**
Students will be able to weigh evidence, tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a discipline.

**SLO 6: Information and Technological Literacy (G: 2) (M: 5)**
Students will demonstrate information competence and the ability to use computers and other technology for many purposes.

**SLO 7: Communication Skills (G: 2) (M: 4, 6)**
Students will be able to communicate effectively in a variety of formats.

**SLO 8: Sociocultural and International Awareness (G: 2) (M: 8, 9, 10)**
Students will recognize, understand, and respect the complexity of sociocultural and international diversity.

**SLO 9: Personal Development (G: 2) (M: 3, 7, 9)**
Students will develop insight into their own and others' behavior and mental processes and apply effective strategies for self-management and self-improvement.

**SLO 10: Career Planning and Development (G: 2) (M: 7, 9, 12)**
Students will emerge from the major with realistic ideas about how to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

**Measures, Targets, and Findings**

**M 1: PSYC1100 Learning Survey (O: 1)**
Students are asked to rate on a scale of 1-5 their own knowledge in 8 different areas of the course once at the beginning of the semester, and once at the end. The course areas are listed below. A copy of the learning survey can be found in the document repository. General Knowledge of Psychology 1) What biological psychology is about 2) The theory of evolution through natural selection Knowledge in Specific Areas of Psychology 3) Neurons and how they work 4) The brain and the nervous system 5) Vision 6) Audition 7) Learning and memory 8) Schizophrenia 9) Language
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Knowledge Base of Psychology**
Our target for this measure is significant improvement in the average, total score on the survey, with a moderate or better effect size.

**Findings 2010-2011 - Target: Met**
Average total scores on the survey at the end of the course (M=33.07, SD=4.70) were significantly higher than at the beginning of the course (M=24.28, SD=5.53), t(392)=10.93, p<.001. The effect size was large (Cohen's d=.68).

**M 2: PSYC1101 - Mastery Test (O: 1)**
In all sections of PSYC1101, Introduction to Psychology, instructors are asked to include twenty questions on their final exam. These twenty questions constitute a mastery test which we use to measure progress toward outcome 1, Knowledge Base. Our performance target for this measurement is greater than 70% average score. A copy of the mastery test can be found in the document repository.
Source of Evidence: Academic direct measure of learning - other

**Target for O1: Knowledge Base of Psychology**
Our achievement target is that 70% of students pass the mastery test (70% or better).

**Findings 2010-2011 - Target: Partially Met**
Sixty-seven percent of the sampled students (n=188 of 280) passed the mastery test with a score of 70% or better. The mean score on the test was 75 with a standard deviation of 14.3.

**M 3: PSYC3110 - Behavioral Observation (O: 9)**
Students in PSYC3110 - Interpersonal Behavior are asked to learn 3 interpersonal skills (listener, evaluator and talker) and perform
M 4: PSYC3110 - Pre/Post Self-Evaluation (O: 7)
The pre/post-test self-report measure, "Gauge My Progress," was drawn from the Core Communication (Miller & Miller, 1998) workbook used in the course. Students are asked to rate on a five-point scale his or her typical and desired behaviors regarding 11 communication skills. Improvement in communication skills is indicated by a smaller difference between ratings of typical and desired behaviors. Pre- and post-test measures were administered on the first and last days of class, respectively.
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O7: Communication Skills**
Statistically significant improvement between pre- and post-test; moderate or better effect size.

**Findings 2010-2011 - Target: Met**

Students showed significant improvement between the pre-test (M=27.87, SD=12.98) and post-test (M=21.94, SD=12.35). This effect was significant, F(1, 128)=31.29, p<0.001, and of moderate effect size (partial Eta^2 = 0.196).

M 5: PSYC3530 - PORT Tutorial Quiz (O: 6)
The Psychology Online Research Tools tutorial was developed by Kim Darnell, Lyn Thaxton and Chris Goode as an online tutorial to introduce students to the computer-based library research tools available for psychology. Students taking PSYC3530 - Advanced Research Design and Analysis take the tutorial near the beginning of the semester. A 20 point quiz is given to assess the effectiveness of the tutorial. A copy of the quiz can be found in the document repository.
Source of Evidence: Academic direct measure of learning - other

**Target for O6: Information and Technological Literacy**
Seventy-five percent passing with a grade of 75% or better.

**Findings 2010-2011 - Target: Met**
Seventy-seven percent of sampled students (n=54 of 70) passed with a grade of 75% or better.

M 6: PSYC3530 and 4800 (CTW) Final Papers (O: 3, 7)
PSYC 3530 provides psychology majors with experience in research design, data analysis, and scientific communication needed for higher-level understanding in 4000-level courses, the development and writing of senior-year theses, and graduate study. Topics include the structure and style of scientific writing in psychology, experimental design, statistical techniques, and the preparation of a formal research paper in APA style. The form of the final paper varied across terms: Students who took the course in Fall 2010 completed an APA-style research project proposal, including Introduction, Method, and Projected Results sections, with 10 recent peer-reviewed articles as primary sources; students who took the course in Spring 2011 completed an APA-style literature review based on 4-10 recent peer-reviewed articles as primary sources. A 20 point quiz is given to assess the effectiveness of the tutorial. A copy of the quiz can be found in the document repository. PSYC 4800 is a senior seminar; each section focuses on a different topic. As such, the types and topics of the CTW posttest writing assignments vary across sections. Below is a brief description of the different assignments for which student examples have been provided, organized by section. PSYC 4800, Section 1 (4800-1) Each student will complete a weekly short reaction essay (approximately two well-formed paragraphs) on the article or chapter assigned for discussion. These essays should evaluate the theoretical arguments and evidence presented and/or compare and contrast the assigned article(s) with other points made in class. At the end of the essay, each student should list a question to discuss during class. Though brief, these submissions should use appropriate organization, style, and grammar. PSYC 4800, Section 2 (4800-2) The Case: In 1996 Oprah Winfrey had a guest on her show from the Human Society who discussed the practice of feeding cows ground-up meat from dead livestock. This practice, now banned by the Food and Drug Administration in the United States, is believed to have contributed to the spread of bovine spongiform encephalopathy, commonly known as "mad cow disease". Oprah, after hearing of the risks associated with this practice, pronounced on her show that she would not eat another burger. The resultant "Oprah Crash" of 1996 sent beef prices and cattle futures tumbling downward by nearly 10%. Cattle ranchers were convinced that Oprah's comments led to the decline in prices, the public's concerns regarding the safety of beef, and the heightened fear of mad cow disease. Oprah Winfrey was sued in 1998 by the cattle industry for $12 million in damages and losses. The ranchers sued under a Texas law, the False Disparagement of Perishable Food Products Act regarding the safety of beef, and the heightened fear of mad cow disease. Oprah, after hearing of the risks associated with this practice, pronounced on her show that she would not eat another burger. The resultant "Oprah Crash" of 1996 sent beef prices and cattle futures tumbling downward by nearly 10%. Cattle ranchers were convinced that Oprah's comments led to the decline in prices, the public's concerns regarding the safety of beef, and the heightened fear of mad cow disease. Oprah Winfrey was sued in 1998 by the cattle industry for $12 million in damages and losses. The ranchers sued under a Texas law, the False Disparagement of Perishable Food Products Act of 1995. The Assignment: Act as a trial consultant for jury selection and (based on research) suggest two characteristics that should be used to determine who you would select for the jury or two characteristics that should be used to remove people from the jury. Remember to write scientifically and do not use the word "I". You can take the side of the prosecuting attorney or the defense attorney. PSYC 4800, Section 3 (4800-3) As a final project, each student must prepare a synthesis paper in which he/she describes and evaluates the various theories of the psychology of war discussed in the course, reflecting on their similarities and differences and the connections the student sees between the various theories and the data about the psychology of war discussed over the semester.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Critical Thinking Skills in Psychology**

**Findings 2010-2011 - Target: Met**
For PSYC3530 students, the median score for Organization and Logic was 3, which is in the 'developing' range, and 93% of sampled students (n=154 of 166) received scores of 2 or higher. The median score for Position and Balance was 3, which is in the 'developing' range, and 95% of sampled students (n=158 of 166) received scores of 2 or higher. The median score for
Use of Evidence was 3, which is in the 'developing' range, and 98% of sampled students (n=163 of 166) received scores of 2 or higher. For PSYC4800 students, the median score for Organization and logic was 5, which is in the 'mastering' range, and 96% of sampled students (n=75 of 78) received scores of 4 or higher. The median score for Position and Balance was 5, which is in the 'mastering' range, and 100% of sampled students (n=78) received scores of 4 or higher. The median score for Use of Evidence was 5, which is in the 'mastering' range, and 78% of sampled students (n=61 of 78) received scores of 4 or higher.

Target for O7: Communication Skills

In 2010-2011, instructors rate each student's submission on 6 criteria: Grammar and Mechanics; Content and Development; Organization and Logic; Use of Evidence, Position and balance, and Citation and Use of Sources. We use Grammar and Mechanics, Content and Development and Citation and Use of Sources as measures of Communication Skills in Psychology. In both PSYC3530 and PSYC4800, instructors rate each student’s submission on a 5 point scale (see document repository for full rubric). A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC3530, our junior CTW course, the target is the majority of students to be in the Developing (2-3) range for these measures.

Findings 2010-2011 - Target: Met

The median score for Grammar and Mechanics was 3, which is in the 'developing' range, and 83% (n=138 of 166) students received a rating of 2 or higher. The median score for Content and Development was 3, which is in the 'developing' range, and 98% (n=163 of 166) students received a rating of 2 or higher. The median score for Citation and Use of Sources was 3, which is in the 'developing' range, and 95% (n=158 of 166) students received a rating of 2 or higher.

M 7: PSYC4760 - Research Practicum Survey (of students) (O: 2, 9, 10)

Students in PSYC4760, Research Practicum, are asked to rate their research practicum experience on a scale of 1-5 for seven dimensions: 1) Research methods/Research skill development 2) Application of psychological theory to a practical setting 3) Personal development 4) Information & technology 5) Values in psychology 6) Career planning/Personal Development 7) Career planning/Mentoring We use students' responses to numbers 1, 3, 6 and 7 to measure progress toward objectives 2, 9, 10 (and 10 again). The complete Research Practicum survey of students can be found in the document repository. Source of Evidence: Student course evaluations on learning gains made

Target for O2: Research Methods in Psychology

Our target for this item is that 70% of students rate their application of research methodology 4, the highest rating. This indicates that the statement "this experience helped me acquire or improve skills related to psychology (i.e. evaluating research, understanding how studies are set up and conducted, understanding statistical analyses, learning about disorders, learned how to work with participants/animals, becoming more independent)," was rated as "very true."

Findings 2010-2011 - Target: Met

87% (n=66 of 76 respondents) rated this item with a score of 4.

Target for O9: Personal Development

Our target for this item is that 70% of students rate their application of personal development as 4, the highest rating. This indicates that the statement "this practicum experience has had a positive impact on my personal development (i.e., it had an impact on my insight into my own thoughts, feelings and behaviors)" was rated as "very true."

Findings 2010-2011 - Target: Met

84% of students (n=65 of 77 respondents) rated this item as 4, very true.

Target for O10: Career Planning and Development

Our target for this item is that 70% of students rate their progress toward career planning and development, as well as the impact of their relationship with their mentor on their career development as 4, the highest rating. This indicates that the statements "My practicum experience has had a positive impact on my professional development (i.e. I have a better understanding of what I would like to do or not do professionally, including graduate school, pursuing a masters versus a doctoral degree, pursuing a particular career or field in graduate school, etc.)," and "I feel that my relationship with my practicum supervisor or supervising graduate student had a positive impact on my development," were rated as "very true."

Findings 2010-2011 - Target: Met

70% of students (n=64 of 77 respondents) rated their progress at 4; and 86% (n=64 of 74 respondents) rated the impact of their relationship with their supervisor most highly (4).

M 8: PSYC4760 - Research Practicum Survey (of supervisors) (O: 2, 5, 8)

Supervisors of students in PSYC4760, Research Practicum, are asked to fill out a survey about their practicum students. Certain sets of questions pertain to specific learning outcomes. Our measurements of some of these outcomes are currently under development. It is our goal to have at least a 1:1 ratio of measurements to outcomes. In the interim, we are using responses to portions of the practica evaluations to measure outcomes toward the following goals: 2: Research Methods in Psychology (research practicum only) 4: Application of Psychological Principles (applied practicum only) 8: Sociocultural and International Awareness (both) 5: Values in Psychology (both) 9: Personal Development (both) 10: Career Planning and Development (both) A copy of the complete research practicum survey of supervisors can be found in the document repository. Source of Evidence: Employer survey, incl. perceptions of the program

Target for O2: Research Methods in Psychology

Our target for this measure is that 80% of students receive a rating of 4 or higher on items related to research skills. This range of scores indicates that the supervisor rated students' performance on "design and conduct of quantitative or qualitative research studies in laboratory or field settings," and "appropriate use of statistics" as "good" or "excellent."
## Findings 2010-2011 - Target: Met

97% of students received a rating of 4 or higher for designing research studies in laboratory or field settings (n=70 of 72 respondents), and 98% received a rating of 4 or higher for appropriate use of statistics (n=44 of 45 respondents).

### Target for O5: Values in Psychology

Our target for this measure is that 80% of students receive a score of 4 or better for items probing the ethical conduct of research. This range of scores indicates that the supervisor rated students' "ethical behavior" as "good" or "excellent."

### Findings 2010-2011 - Target: Met

100% of students received a rating of 4 or higher on ethical behavior (n=92 of 92 respondents).

### Target for O8: Sociocultural and International Awareness

Our target for this measure is that 80% of students receive a rating of 4 or better for items probing sociocultural and international awareness. This range of scores indicates that the supervisor rated students' "sensitivity to or respect for diverse populations being served/who were subjects," as "good" or "excellent."

### Findings 2010-2011 - Target: Met

100% of students received a rating of 4 or better for this item (n=80 of 80 respondents).

#### M 9: PSYC4770 - Applied Practicum Survey (of students) (O: 4, 8, 9, 10)

Students in PSYC4760, Applied Practicum, are asked to rate their applied practicum experience on a scale of 1-5 for ten dimensions: 1) Application of psychological theory to a practical setting; 2) Application/skill acquisition; 3) Application/knowledge of community mental health services; 4) Communication and collaboration; 5) Critical thinking; 6) Personal Development; 7) Values/Sociocultural awareness; 8) Values/Ethics; 9) Career Planning/Professional Development; and 10) Career planning/Mentoring. We use students' responses to numbers 1, 6, 7, 9 and 10 to measure progress toward objectives 4, 9, 8, 10 (and 10 again), respectively.

Source of Evidence: Student course evaluations on learning gains made

#### Target for O4: Application of Psychological Principles

Our target for this item is that 70% of students rate their application of psychological theory to a practical setting as 4, the highest rating. This indicates that the statement "I was able to see and/or apply psychological principles and theories learned in the classroom to the real world" was rated as "very true."

### Findings 2010-2011 - Target: Partially Met

50% of surveyed students (n=6 of 12 respondents) rated this item at 4.

#### Target for O8: Sociocultural and International Awareness

Our target for this item is that 70% of students rate their experience regarding values/social awareness as 4, the highest rating. This indicates that the statement "I was able to get a better understanding of what different types of people experience through my practicum experience (e.g. women who are bettered, children who have experienced sexual abuse; the role of discrimination, prejudice and economic factors in people's lives)" was rated as "very true."

### Findings 2010-2011 - Target: Met

75% of students surveyed (n=6 of 12 respondents) rated this item most highly (4).

#### Target for O9: Personal Development

Our target for this item is that 70% of students rate the degree to which their practicum experience enhanced their personal development as 4, the highest rating. This indicates that the statement "My practicum experience has had a positive impact on my personal development (e.g. it has had an impact on my insight into my own thoughts, feelings and behaviors)" was rated as "very true."

### Findings 2010-2011 - Target: Met

75% of surveyed students (n=9 of 12 respondents) rated this item most highly (4).

#### Target for O10: Career Planning and Development

Our target for this item is that 70% of students rate the degree to which their practicum experience enhanced their professional development and their relationship with their mentor as 4, the highest rating. This indicates that the statements "My practicum experience has had a positive impact on my professional development (e.g. I have a better understanding of what I would like to do or not do professionally, including graduate school);" and "I feel that my relationship with my practicum supervisor had a positive impact on my development (e.g. the supervision I received helped me develop a sense of professional identity, I gained a deeper understanding of the agency or the mental health field, both the positive and negative)" were both rated as "very true."

### Findings 2010-2011 - Target: Partially Met

67% of surveyed students (n=8 of 12 respondents) rated the first item at 4, and 75% (n=9 of 12 respondents) rated this item at 4.

#### M 10: PSYC4770 - Applied Practicum Survey (of supervisors) (O: 4, 5, 8)

Supervisors of students in PSYC4770, Applied Practicum, are asked to fill out a survey about their practicum students. Certain sets of questions pertain to specific learning outcomes. Our measurements of some of these outcomes are currently under development. It is our goal to have at least a 1:1 ratio of measurements to outcomes. In the interim, we are using responses to portions of the practica evaluations to measure outcomes toward the following goals: 2: Research Methods in Psychology (research practicum only) 4: Application of Psychological Principles (applied practicum only) 8: Sociocultural and International Awareness (both) 5: Values in
Target for O4: Application of Psychological Principles

Our target for this measure is that 80% of students receive a score of 4 or better for items probing the application of psychological principles. This range of scores indicates that the supervisor rated students' performance on "understanding an application of basic psychological theories to the clients being served" and "appropriate evaluation and analysis of situations pertaining to clients utilizing psychological concepts and principles" as "good" or "excellent."

Findings 2010-2011 - Target: Met

87% of students received a rating of 4 or higher for the item probing application of basic principles (n=20 of 23 respondents) and 91% of students received a rating of 4 or higher for the item proving the utilization of psychological concepts.

Target for O5: Values in Psychology

Our target for this measure is that 80% of students receive a score of 4 or better for items probing students' ethical conduct during the practicum. This range of scores indicates that the supervisor rated students' "ethical conduct, (e.g. maintaining confidentiality)." as "good" or "excellent."

Findings 2010-2011 - Target: Met

96% of students received a rating of 4 or higher for this item (n=25 of 26 respondents).

Target for O8: Sociocultural and International Awareness

Our target for this measure is that 80% of students receive a score of 4 or better for items probing students' sociocultural and international awareness. This range of scores indicates that the supervisor rated students' "sensitivity to or respect for diverse populations" as "good" or "excellent."

Findings 2010-2011 - Target: Met

96% of students received a rating of 4 or higher on this item (n=26 of 27 respondents).

M 11: PSYC4760 - Research Practicum Science Self-efficacy survey (O: 2)

A modified version of Chemers' (2010) Scientific Self-Efficacy Scale was administered to students in PSYC4760 at the beginning and end of the semester. This scale measures students' belief in their own ability to use scientific skills to solve real problems, e.g. "use technical science skills," and "generate a research question to answer." A complete version of the survey can be found in the documents repository.

Source of Evidence: Academic direct measure of learning - other

Target for O2: Research Methods in Psychology

Significant increase in Science Self-Efficacy, between pre- and post- measurements, with moderate or greater effect size.

Findings 2010-2011 - Target: Met

Science self-efficacy scores increased significantly from pre (M=37.31, SD=5.20) to post-practicum (M=41.02, SD=5.36). This increase was significant, t(50)=4.255, p<0.001, and the effect size was moderate to large (Cohen's d=.60).

M 12: PSYC4760 - Careers Survey (O: 10)

As part of the research practicum pre/post survey we included some questions about science careers. These questions measure attitudes toward science careers in general, as they apply to the student. A complete copy of the research practicum pre/post survey can be found in the documents repository.

Source of Evidence: Administrative measure - other

Target for O10: Career Planning and Development

Significant increase in science careers attitudes with moderate or larger effect size.

Findings 2010-2011 - Target: Met

Attitudes toward science careers were significantly higher at the end of the program (M=53.73, SD=8.70) than at the end of the program (M=50.76, SD=10.76), t(50)=2.53, p<.015. This was a small to moderate effect, Cohen's d=.32.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Introduce CTW Courses

Two new Critical Thinking through Writing courses come online this year: PSYC3530, Advanced Research Design and Analysis, part of our redesigned quantitative core, and PSYC4800, Seminar in Psychology. The former is a survey of advanced research designs and their appropriate statistical analyses. Students learn about advanced statistics and their application with an emphasis on expressing critical thinking about psychological research through writing. The latter is designed to be a senior year capstone course. We plan on offering several special topics seminars. This semester, we began offering a PSYC4800 seminar called Neurobiology of Music. As a CTW course, students are encouraged to demonstrate critical thinking about this topic in a variety of written assignments.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High
Implementation Description: PSYC4800 is currently being offered (Fall, 2009). PSYC3530 will be offered in Spring 2010.
Projected Completion Date: 07/2009
Remap measures to outcomes.

At the review of last year's learning outcomes assessment, it was suggested we make some changes to our outcomes and the measures we use to assess them. Specifically, it was recommended that we have fewer objectives - at the time we were reporting on 11 learning objectives. It was also recommended we have fewer objectives being measured by a single outcome. To address these suggestions we have developed the following plan.

The 11 objectives we were monitoring were based on ten learning objectives recommended for undergraduate programs in psychology by the American Psychological Association in a 2000 report, plus our university core objective (Contemporary Issues). As the ten learning goals outlined by the APA are so well-suited for our undergraduate program, we feel strongly that we should monitor each goal. Our subcommittee has identified courses with measures already in place that we can use to track progress toward these goals. We could not find sufficient justification for eliminating any of the ten. We do not, however, see the necessity of reporting on our core objective along with our undergraduate program objectives, as we report on it separately.

While the goals themselves will remain very much the same, our mapping of measurements to goals will undergo a major revision. We anticipate it will take at least two years before we are measuring progress toward each goal with the new measures, but we have already identified from which courses we will be collecting measurement data. For some of these courses we have already identified a specific measure, that is already being taken as part of the course, that we can use to track progress toward specific goals.

Our planned map of courses to goals is as follows: 1. Knowledge Base of Psychology - Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings and historical trends in psychology. Course: PSYC1100. Measure: We already have a mastery test in place that we can use to measure progress toward this goal. 2. Research Methods in Psychology - Students will understand and apply basic research methods in psychology, including research design, data analysis and interpretation. Course: PSYC3510 (2˚ measure PSYC3530) - we will need to find an existing measure in the course - this is the first semester it is being taught. 3. Critical Thinking Skills in Psychology - Students will respect and use critical and creative thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes. Course: PSYC4800 - We have a two sample writing analysis in the course already - we will use an existing CTW rubric to compare pre/post writing samples. 4. Application of Psychology - Students will understand and apply psychological principles to personal, social, and organizational issues. Course: PSYC2040, PSYC2101 - We need to identify an existing measure in these courses to serve as a “1” and “2” measurements for this goal. 5. Values in Psychology - Students will be able to weigh evidence, tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a discipline. PSYC3510 - We need to identify an existing measure in these courses to serve as a measurement toward this goal. 6. Information and Technological Literacy - Students will demonstrate information competence and the ability to use computers and other technology for many purposes. We have a measure in place that is perfect for this goal - the library works with our department to offer a quiz on the Psychology Online Research Tutorial. 7. Communication Skills - Students will be able to communicate effectively in a variety of formats. PSYC3110 - we will not change our existing measure for this goal. 8. Sociocultural and International Awareness - Students will recognize, understand, and respect the complexity of sociocultural and international diversity. Course: PSYC3570 - Multicultural Psychology - We need to identify and existing measure in this course to serve as a measurement for this goal. 9. Personal Development - Students will develop insight into their own and others' behavior and mental processes and apply effective strategies for self-management and self-improvement. Course: PSYC3110 - we will not change our existing measure for this goal. 10. Career Planning and Development - Students will emerge from the major with realistic ideas about how to implement their psychological knowledge, skills and values in occupational pursuits in a variety of settings. Course: PSYC2030 - Careers in Psychology - We will identify a measure that already exists in this new course.

Establish Peer Tutoring Centers for Writing and Statistics

We received an internal grant to fund graduate student tutors for writing and statistics. The funding period ended, but we continued the model as a volunteer, peer-based tutoring center, which is now housed in Kell Hall.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: We plan to implement new measures of learning outcomes over the next two years.
Projected Completion Date: 07/2011
Responsible Person/Group: Chris Goode, Kim Darnell, Sarah Cook, Rachelle Cohen.
Additional Resources: Two Graduate Student Assistants to help analyze data.

Establish Peer Tutoring Centers for Writing and Statistics

We received an internal grant to fund graduate student tutors for writing and statistics. The funding period ended, but we continued the model as a volunteer, peer-based tutoring center, which is now housed in Kell Hall.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: Peer Tutoring Center for Writing and Statistics - Undergraduate peers tutor students who need help with writing and statistics, primarily in our quantitative core (PSYC3510/3530).
Responsible Person/Group: Marika Lamoreaux, Liz Sheehan

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have been revising measures for learning outcomes over the past three years. We followed established American Psychological Association guidelines for learning outcomes in an undergraduate degree program in psychology. Since adopting this model we have tried to identify measures that already exist as part of coursework that probe these items. Our goal was to have at least one unique measurement per learning outcome, and then to target objectives wherein it would be useful to have multiple measurements. We made these changes to conform to APA best practices for our discipline, and to address, in part, comments on previous learning
ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Some of the data we analyzed this past year confirm that we are on the right track with improvements we have made as a result of previous action plans, e.g., establishing the CTW course sequence and offering peer tutoring in psychological statistics and writing. We also created a Careers in Psychology course, and hope to see improvements in the related objective (career planning & development) as measures are developed and refined in that course, and in our other existing measure (survey in the applied practicum) as more students in the major take the course. Based on the data we report here, we met all targets except for 4 measurements: the 1101 mastery test, which measures progress toward the knowledge base objective; the listening and talking measurement, which measures progress toward the personal development objective, the utility of the applied practicum survey which measures progress toward the career planning and development objective, and the applied practicum survey which measures progress toward the application of psychological principles objective. It is unlikely we will make major changes to our program based on these data, as this was the first year we did not meet our targets for these measures. We established some action plans in the previous year (described above) and it may be they have not been in place long enough to maintain our targets for the related measures (e.g. the careers course and career planning). If the knowledge base-related measurement remains only partially met for another year running, we may consider revising our target (for example measuring progress for majors only?) or addressing the problem with a change to our introductory course. We may make some changes to our curriculum for other reasons, e.g. to accommodate the record number of majors passing through our department. It is unlikely that these changes will affect the objectives we track here, but we may consider revising measures of progress toward those objectives.

Georgia State University
Assessment Data by Section
2010-2011 Psychology PhD
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the PhD program in the Department of Psychology is to educate graduate students in various areas of psychology and provide specific training in scholarship, research, clinical, and other skills, consistent with the expertise of the current faculty. Five programs are represented: Clinical Psychology, Community Psychology, Cognitive Sciences, Development Psychology, and Neuropsychology and Behavioral Neuroscience. Our graduate students seek entry to our program hoping to become licensed clinical psychologists; psychologists in community, non-profit, or governmental organizations; college teachers in undergraduate institutions; and researchers in research settings including research universities. Our mission is to provide the appropriate education and training for a PhD psychologist in such settings.

Goals
G 1: Psychological Science
To train graduate students to be scientists (e.g., empiricists, critical thinkers) across domains (e.g., applied, theoretical).

G 2: Knowledge in Psychology
To train graduate students to be well-versed broadly in psychology (e.g., history of the field, research methodology) as well as experts in specific areas of concentration (e.g., clinical, child clinical, specific research program).

G 3: Applied Skills in Psychology
To train graduate students to be able to apply their skills across settings (e.g., research, instruction, applied) and within specific areas of individualized interest and concentration (e.g., community center for disadvantaged populations).

Student Learning Outcomes/Objectives
SLO 1: Theory and Content (G: 2) (M: 1, 2, 3, 4, 5, 6, 7, 8, 12, 15, 16)
Students will develop expertise with major concepts, theoretical perspectives, empirical findings, and historical trends in the field of Psychology, the program area, and the research specialty area.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

General Education/Core Curriculum Associations
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

SLO 2: Research Methods (G: 1, 3) (M: 1, 2, 3, 4, 5, 6, 7, 8, 11, 12, 15, 16)
Students will understand and appropriately apply research methods including research design, data analysis, and interpretation.
Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**SLO 3: Communication and Collaboration Skills (G: 3) (M: 1, 2, 3, 5, 6, 7, 8, 12, 13, 14, 15, 16)**
Students will communicate and collaborate effectively in a variety of formats and settings.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. 1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 6: Personal Development (G: 3) (M: 13, 14, 15, 16)**

Students will show insight into their own and others’ behavior and mental processes and apply effective strategies for self-management and self-improvement.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 7: Information and Technology Literacy (G: 3) (M: 1, 2, 3, 5, 6, 7, 8, 15, 16)**

Students will demonstrate information technology competence and the ability to use computers and other technology for relevant purposes.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 8: Values in Psychology (G: 1, 3) (M: 3, 4, 8, 9, 12, 13, 14, 15, 16)**

Students will weigh evidence, tolerate ambiguity, act ethically, and reflect other values underpinning psychology.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 9: Sociocultural and International Awareness (G: 2, 3) (M: 1, 2, 5, 6, 7, 10, 12, 15, 16)**

Students will incorporate knowledge of sociocultural and international diversity in their work.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

2.4 Enhance the global competency of students, faculty and staff.

**SLO 10: Career Planning and Development (G: 2, 3) (M: 13, 14, 15, 16)**

Students will emerge from graduate school with ideas about how to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Institutional Priority Associations**
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

Target for O3: Communication and Collaboration Skills
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

Findings 2010-2011 - Target: Met
100% of students received a score of 2 or 3.

Target for O5: Critical Thinking Skills
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

Findings 2010-2011 - Target: Met
100% of students received a score of 2 or 3.

Target for O7: Information and Technology Literacy
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

Findings 2010-2011 - Target: Met
100% of students received a score of 2 or 3.

Target for O9: Sociocultural and International Awareness
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

Findings 2010-2011 - Target: Met
100% of students received a score of 2 or 3.

M 3: MA Thesis (Pass or Fail) (O: 1, 2, 3, 5, 7, 8)
Evaluated by faculty committee and defended orally in committee meeting
Source of Evidence: Senior thesis or culminating major project

Target for O1: Theory and Content
At least 90% of students should pass on first attempt.

Findings 2010-2011 - Target: Met
100% of students passed on first attempt.

Target for O2: Research Methods
At least 90% of students should pass on first attempt.

Findings 2010-2011 - Target: Met
100% of students passed on first attempt.

Target for O3: Communication and Collaboration Skills
At least 90% of students should pass on first attempt.

Findings 2010-2011 - Target: Met
100% of students passed on first attempt.

Target for O5: Critical Thinking Skills
At least 90% of students should pass on first attempt.

Findings 2010-2011 - Target: Met
100% of students passed on first attempt.

Target for O7: Information and Technology Literacy
At least 90% of students should pass on first attempt.

Findings 2010-2011 - Target: Met
100% of students passed on first attempt.

Target for O8: Values in Psychology
At least 90% of students should pass on first attempt.

Findings 2010-2011 - Target: Met
100% of students passed on first attempt.

M 4: General Exam (Pass or Fail) (O: 1, 2, 4, 5, 8)
Target for **O1: Theory and Content**
A minimum of 90% of students should pass on first attempt

**Findings 2010-2011 - Target: Not Met**
76% of students failed the General Exam on the first attempt.

Target for **O2: Research Methods**
A minimum of 90% of students should pass on first attempt

**Findings 2010-2011 - Target: Not Met**
76% of students failed the General Exam on the first attempt.

Target for **O4: Application**
A minimum of 90% of students should pass on first attempt

**Findings 2010-2011 - Target: Not Met**
76% of students failed the General Exam on the first attempt.

Target for **O5: Critical Thinking Skills**
A minimum of 90% of students should pass on first attempt

**Findings 2010-2011 - Target: Not Met**
76% of students failed the General Exam on the first attempt.

Target for **O8: Values in Psychology**
A minimum of 90% of students should pass on first attempt

**Findings 2010-2011 - Target: Not Met**
76% of students failed the General Exam on the first attempt.

**M 16: Annual evaluation (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10)**

Faculty members of each program review all students in their program annually to determine how many students are performing satisfactorily on each learning outcome.

**Target for O1: Theory and Content**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O2: Research Methods**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O3: Communication and Collaboration Skills**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O4: Application**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O5: Critical Thinking Skills**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O6: Personal Development**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O7: Information and Technology Literacy**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O8: Values in Psychology**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O9: Sociocultural and International Awareness**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2010-2011 - Target: Met**
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

**Target for O10: Career Planning and Development**
At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

Findings 2010-2011 - Target: Met
At least 95% of student evaluations indicated that they are meeting or exceeding expectations.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Discuss with Graduate Program Committee
The Director of Graduate Studies (DGS) will bring these results to the Graduate Program Committee (GPC; Chairs of the 5 program) to determine whether the achievement target is reasonable or the training is adequate in this domain.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Publications and presentations | Outcome/Objective: Critical Thinking Skills

Responsible Person/Group: DGS and GPC

Discuss with Graduate Program Committee
The Director of Graduate Studies (DGS) will bring these results to the Graduate Program Committee (GPC; Chairs of the 5 program) to determine whether the achievement target is reasonable or the training is adequate in this domain.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Publications and presentations | Outcome/Objective: Personal Development

Responsible Person/Group: DGS and GPC

Discuss with Graduate Program Committee

**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Publications and presentations | Outcome/Objective: Career Planning and Development

**Responsible Person/Group:** DGS and GPC

### Evaluate Communication and Collaboration Skills training as evaluated with the General Exam

The Graduate Program Committee will evaluate training in communication and collaboration skills, especially training related to the skills assessed on the General Exam.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: General Exam GLOE | Outcome/Objective: Communication and Collaboration Skills

**Responsible Person/Group:** Graduate Program Committee

### Evaluate Communication and Critical Thinking Skills training as evaluated with the General Exam

The Graduate Program Committee will evaluate training in critical thinking, especially these skills as they are demonstrated on the General Exam.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: General Exam GLOE | Outcome/Objective: Critical Thinking Skills

**Responsible Person/Group:** Graduate Program Committee

### Evaluate Research Methods training as evaluated with the General Exam

The Graduate Program Committee will evaluate training in research methods, especially the skills that are assessed with the General Exam.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: General Exam GLOE | Outcome/Objective: Research Methods

**Responsible Person/Group:** Graduate Program Committee

### Evaluate teaching performance

The Director of Graduate Studies (DGS) will bring these results to the Graduate Program Committee (GPC; Chairs of the 5 program) to determine whether the achievement target is reasonable or the training is adequate in this domain.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

Evaluate Theory and Content training as evaluated with the General Exam
Findings will be discussed by the Graduate Program Committee (Chairs of the 5 Psychology program) to identify whether training in theory and content should be improved, especially around the skills assessed by the General Exam.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: General Exam GLOE | Outcome/Objective: Theory and Content

Responsible Person/Group: Graduate Program Committee
**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In a review of the 2009-2010 assessment report (feedback was never received from the college assessment committee), the Graduate Program Committee (GPC; Chairs of the 5 Psychology graduate programs/concentrations) and the Director of Graduate Studies (DGS) largely retained the structure of the assessment process. It was determined that an additional review of the objectives, measures, and targets will be made in conjunction with feedback from the College assessment committee. The DGS plans to evaluate the objectives to determine where they are in line with the objectives of the University’s Strategic Plan and other agencies (e.g., SACS). The DGS will work with graduate instructors and faculty to determine if better measures might be created, such as pre- and post-assessments of learning within domains (e.g., research methods).

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data largely reinforce the perception of the department that graduate training is adequate. However, there is some appreciation that greater numbers of students should publish and present papers. In addition, the higher number of failures and poor performance on the General Exam deserves greater scrutiny to determine if the problem is with the training, the exam, or some other variable.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Public Administration MPA**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

The Master of Public Administration (MPA) program of the Andrew Young School of Policy Studies prepares students to become leaders as executives, managers, analysts, and policy specialists in public and nonprofit sectors.

### Goals

**G 1: Understanding disciplinary and conceptual foundations of public or nonprofit administration**

Students learn major disciplinary and conceptual foundations of public or nonprofit administration. This includes theories of organization and bureaucracy, administrative behavior and management, politics and administration, and public policy-making.

**G 2: Understanding of basic methods and statistics for applied research**

Students learn basic methods and statistics for research in the public and nonprofit sectors. These include the scientific method in applied research, elementary research design, measurement, qualitative research, computer-assisted data analysis, and beginning statistics including descriptive statistics, crosstabulation, introductory inferential statistics, and graphical presentations.

**G 3: Understanding intermediate methods and statistics**

Students understand intermediate methods and statistics in applied research in the public and nonprofit sectors. These include survey research, experimental and quasi-experimental designs, sampling, and intermediate statistical techniques including analysis of variance, correlation and regression, and time-series analysis.

**G 4: Understanding basic principles of microeconomics applied to public or nonprofit sectors**

Students will understand basic principles of microeconomics as applied to public and nonprofit sectors.

**G 5: Understanding practice and problems of budgeting and finance in public or nonprofit organizations**

Students understand the practice and problems of budgeting and finance in the public or nonprofit organizations. This includes fiscal management in government and nonprofits with special emphasis on budgetary procedures and the means of budgetary analysis.

**G 6: Understanding approaches to management systems and strategies in nonprofit and public organizations**

Students understand the approaches to the management of systems and strategies in public and nonprofit organizations, focusing primarily on problem-solving strategies and techniques for use at the executive and operating levels.

**G 7: Understanding legal issues relevant to public and nonprofit organizations**

Students understand basic legal issues relevant to the managers of public and nonprofit organizations.

**G 8: Understanding theories and practice of leadership and organizational behavior**

Students understand theories and practice of leadership and organizational behavior relevant to public and nonprofit organizations. This includes communication, motivation, group dynamics, organizational change, leadership and decision making in public organizations.

**G 9: Analyze problems, develop solutions, and communicate about policy and management issues**

Students understand how to critically assess public or nonprofit policy and management issues and to develop solutions through research and analysis. Students understand how to effectively communicate verbally and through writing about public or nonprofit policy and management issues, problems, and solutions.

<tr>
<th>Student Learning Outcomes/Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SLO 1</strong>: Demonstrate understanding of models of government and administrative reform (G: 1) (M: 1)</td>
</tr>
<tr>
<td>Students demonstrate their understanding of key difference among the models of government and administrative reform or important contemporary organizational and environmental challenges faced by leaders and managers of nonprofit organizations and the policy and management issues that confront the public sector.</td>
</tr>
<tr>
<td><strong>SLO 2</strong>: Identify major ethical issues that arise in public or nonprofit sector (G: 1) (M: 2)</td>
</tr>
<tr>
<td>Students must be able to identify the major ethical issues that arise in the public or nonprofit sector.</td>
</tr>
<tr>
<td><strong>SLO 3</strong>: Analyze the nature and function of the public sector (G: 1) (M: 3)</td>
</tr>
<tr>
<td>Students analyze the nature and function of the public service in the US, including the importance of public sector in modern societies or demonstrate an understanding of the scope and significance of the nonprofit sector in the U.S and abroad.</td>
</tr>
<tr>
<td><strong>SLO 4</strong>: Apply basic concepts of measures and data sets (G: 2) (M: 4)</td>
</tr>
<tr>
<td>Students must demonstrate the ability to apply basic concepts of measures and data sets.</td>
</tr>
<tr>
<td><strong>SLO 5</strong>: Demonstrate skills using the computer to perform basic statistical analysis (G: 2) (M: 5)</td>
</tr>
<tr>
<td>Students demonstrate skills using the computer to perform basic statistical analysis using SPSS.</td>
</tr>
<tr>
<td><strong>SLO 6</strong>: Demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results (G: 2) (M: 6)</td>
</tr>
<tr>
<td>Students are able to demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and describe the results correctly.</td>
</tr>
<tr>
<td><strong>SLO 7</strong>: Demonstrate ability to apply introductory statistical techniques to analyze questions facing public and nonprofit managers (G: 2) (M: 7)</td>
</tr>
<tr>
<td>Students must demonstrate the ability to apply introductory statistical techniques to analyze the kinds of questions facing public and nonprofit managers.</td>
</tr>
<tr>
<td><strong>SLO 8</strong>: Demonstrate understanding of principles of research design methods appropriate to public and nonprofit administration and policy (G: 3) (M: 8)</td>
</tr>
<tr>
<td>Students demonstrate the ability to understand basic principles of research design methods appropriate for research in public and nonprofit administration and policy.</td>
</tr>
<tr>
<td><strong>SLO 9</strong>: Ability to interpret regression coefficients on interval-level and dummy independent variables (G: 3) (M: 9)</td>
</tr>
<tr>
<td>Students must demonstrate the ability to interpret regression coefficients on interval-level and dummy independent variables in both bivariate and multiple regression.</td>
</tr>
<tr>
<td><strong>SLO 10</strong>: Ability to demonstrate graduate-level writing skill in policy-relevant research (G: 3) (M: 10)</td>
</tr>
<tr>
<td>Students demonstrate graduate-level writing skills in policy-relevant research using real-world context. Students must be able to emphasize interpretation and application of statistics in reports.</td>
</tr>
<tr>
<td><strong>SLO 11</strong>: Demonstrate understanding of microeconomic principles (G: 4) (M: 11)</td>
</tr>
<tr>
<td>Students demonstrate an understanding of microeconomic principles (such as supply and demand and market dynamics).</td>
</tr>
<tr>
<td><strong>SLO 12</strong>: Apply basic theoretical and empirical tools of economic analysis to public and nonprofit policy issues (G: 4) (M: 12)</td>
</tr>
<tr>
<td>Students will be able to apply basic theoretical and empirical tools of economic analysis to policy issues affecting the public and nonprofit sectors.</td>
</tr>
<tr>
<td><strong>SLO 13</strong>: Demonstrate understanding of market failure and the potential role of the public and nonprofit sectors (G: 4) (M: 13)</td>
</tr>
<tr>
<td>Students demonstrate an understanding of the effects of market failure and the potential role of the public and nonprofit sectors.</td>
</tr>
<tr>
<td><strong>SLO 14</strong>: Describe the technical nature and process of public and nonprofit budgeting (G: 5) (M: 14)</td>
</tr>
<tr>
<td>Students describe and explain the technical nature of public or nonprofit budgeting in the U.S., including the timetable and rules of the process that are typical of the three levels of government or typical of the nonprofit sector. Students should be able to conduct a budget analysis and demonstrate an understanding of key indicators of financial health.</td>
</tr>
<tr>
<td><strong>SLO 15</strong>: Compare politics of budgeting with rational methods of resource allocation in public or nonprofit organizations (G: 5) (M: 15)</td>
</tr>
<tr>
<td>Students will be able to assess, explain, and compare the political aspects of budgeting with rational methods of resource allocation in the U.S or explain how organizational characteristics and external sources of regulation and funding affect nonprofit organizations.</td>
</tr>
<tr>
<td><strong>SLO 16</strong>: Demonstrate ability to identify key components of results oriented management frameworks (G: 6)</td>
</tr>
</tbody>
</table>
Students demonstrate the ability to identify key components of results oriented management frameworks as they apply in the public and nonprofit sectors.

**SLO 17: Demonstrate understanding of models of organizational structure and design (G: 6) (M: 17)**

Students demonstrate the ability to understand the advantages and disadvantages of various models of organizational structure and design.

**SLO 18: Demonstrate knowledge of contract and administrative law in public sector or nonprofit law (G: 7) (M: 18)**

Students able to demonstrate knowledge of contract law and administrative law, including rulemaking, adjudication of administrative action, and judicial review of administrative action or demonstrate knowledge of nonprofit law in the areas of charitable giving, advocacy, lobbying, commercial activity, fundraising, and employee compensation.

**SLO 19: Evaluate the legal rights and responsibilities of public or nonprofit managers and employees (G: 7) (M: 19)**

Students able to evaluate the legal rights and responsibilities of public or nonprofit managers and employees.

**SLO 20: Demonstrate understanding of administrative, adjudicatory, and alternative dispute resolution (G: 7) (M: 20)**

Students demonstrate ability to understand administrative, adjudicatory, and alternative dispute resolution avenues to resolve conflict and grievances.

**SLO 21: Ability to evaluate major theories of leadership and organizational behavior (G: 8) (M: 21)**

Students able to identify and evaluate the major theories of leadership and organizational behavior.

**SLO 22: Demonstrate how organizational and leadership theories are applied in public and nonprofit organizations (G: 8) (M: 22)**

Students able to demonstrate how specific organizational and leadership theories are applied in public and nonprofit organizations.

**SLO 23: Demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies (G: 8) (M: 23)**

Students demonstrate how to use organizational theories and related tools to solve practical management problems in a public and nonprofit agency.

**SLO 24: Demonstrate ability to effectively analyze problems and develop solutions (G: 9) (M: 24)**

Students will demonstrate an ability to use critical thinking skills to analyze problems and develop solutions to these problems.

**SLO 25: Effective verbal and written communication skills related to public or nonprofit issues (G: 9) (M: 25)**

Students will demonstrate an ability to communicate clearly and concisely through written or oral communication. Different classes will emphasize different aspects of communication skills depending on the nature of the material to be covered.

---

**Measures, Targets, and Findings**

**M 1: Describe and analyze the key models of government and administrative reform (O: 1)**

In policy memos and on the final exam students will be able to describe and analyze the key models of government and administrative reform or demonstrate knowledge of important contemporary organizational and environmental challenges faced by leaders and managers of nonprofit organizations and the policy and management issues that now confront the sector (PMA 8111 or PMA 8210)

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Demonstrate understanding of models of government and administrative reform**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students at least partially meet this objective. In policy memos and on the final exam students will be able to describe and analyze the key difference between models of government and administrative reform driving public policy.

**Findings 2010-2011 - Target: Met**

93.06% of students in PMA 8111 at least partially meet this objective.

**M 2: Identify major ethical issues that arise in public or nonprofit sector (O: 2)**

In an ethics memo and on the final exam students will be able to identify the major ethical issues that arise in public or nonprofit organizations.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Identify major ethical issues that arise in public or nonprofit sector**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester.
There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students at least partially meet the objective. In an ethics memo and on the final exam students will be able to identify the major ethical issues that arise in public or nonprofit organizations.

**Findings 2010-2011 - Target: Met**

100% of the students in PMAP 8111 at least partially met this objectives as demonstrated in a policy memo and on the final examination.

**M 3: Describe the nature and function of the public or nonprofit sector (O: 3)**

On papers, policy memos, and the final exam students will describe the nature and function of the public sector or demonstrate an understanding of the scope and significance of the nonprofit sector in the U.S. and abroad (PMAP 8111 or PMAP 8210)

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Analyze the nature and function of the public sector**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8111 and PMAP 8210 will at least partially meet this objective. On papers, policy memos, and the final exam students will describe the nature and function of the public or nonprofit sector.

**Findings 2010-2011 - Target: Met**

100% of students enrolled in the courses at least partially met the objectives. This was measured on papers, policy memos, and the final examinations.

**M 4: Apply basic concepts of measures and using data sets (O: 4)**

Students complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.

Source of Evidence: Academic direct measure of learning - other

**Target for O4: Apply basic concepts of measures and data sets**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.

**Findings 2010-2011 - Target: Met**

85.5% of the students fully demonstrated the knowledge or skill and met this objective.

**M 5: Demonstrate skills using the computer to perform basic statistical analysis (O: 5)**

Students do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

Source of Evidence: Academic direct measure of learning - other

**Target for O5: Demonstrate skills using the computer to perform basic statistical analysis**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

**Findings 2010-2011 - Target: Met**

85.5% of students fully demonstrated the knowledge or skill.

**M 6: Demonstrate ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results (O: 6)**

The students’ final examination and final paper provide evidence of their ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results.

Source of Evidence: Academic direct measure of learning - other

**Target for O6: Demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results**

Target for O19: Evaluate the legal rights and responsibilities of public or nonprofit managers and employees

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students in PMAP 8411 will at least partially meet the objective. On the homework assignments and the final examination students demonstrate their understanding of administrative, adjudicatory, and alternative dispute resolution.

Findings 2010-2011 - Target: Met
All of the students met this objective.

M 20: Demonstrated understanding of administrative, adjudicatory, and alternative dispute resolution (O: 20)

On the homework assignments and the final examination students demonstrate their understanding of administrative, adjudicatory, and alternative dispute resolution.

Source of Evidence: Academic direct measure of learning - other

Target for O20: Demonstrate understanding of administrative, adjudicatory, and alternative dispute resolution

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8411 will at least partially meet this objective. On the homework assignments and the final examination students demonstrate their understanding of administrative, adjudicatory, and alternative dispute resolution.

Findings 2010-2011 - Target: Met
96.97% of the students fully demonstrated the knowledge and skill, thus, meeting the objective.

M 21: Demonstrated ability to evaluate major theories of leadership and organizational behavior (O: 21)

On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

Source of Evidence: Academic direct measure of learning - other

Target for O21: Ability to evaluate major theories of leadership and organizational behavior

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8431, Leadership and Organizational Behavior, will at least partially meet the objective. On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

Findings 2010-2011 - Target: Met
91.6% of students fully demonstrated the knowledge or skill and met the objective.

M 22: Demonstrated how organizational and leadership theories are applied in public and nonprofit organizations (O: 22)

On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

Source of Evidence: Academic direct measure of learning - other

Target for O22: Demonstrate how organizational and leadership theories are applied in public and nonprofit organizations

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8431 will at least partially meet this objective. On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

Findings 2010-2011 - Target: Met
95.65% of the students fully demonstrated the skills or knowledge and met the objective.

M 23: Demonstrated how to use organizational theories to solve management problems in public and nonprofit agencies (O: 23)

On the midterm essay, the final essay, and the case study students demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies.

Source of Evidence: Academic direct measure of learning - other

Target for O23: Demonstrate how to use organizational theories to solve management problems in public
and nonprofit agencies
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students in MPA 8431 will at least partially meet this objective. On the midterm essay, the final essay, and the case study students demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies.

M 24: Demonstrate ability to analyze problems effectively and develop solutions (O: 24)
Students will demonstrate an ability to use critical thinking skills to analyze problems and develop solutions to these problems. Students will demonstrate an ability to analyze problems and develop solutions using written, analytical or quantitative skills depending on the nature of the class. (All Courses)

Source of Evidence: Academic direct measure of learning - other

Target for O24: Demonstrate ability to effectively analyze problems and develop solutions
Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2010-2011 - Target: Met
All students demonstrated the skills or knowledge and met the objective.

M 25: Effective verbal and written communication on public or nonprofit issues (O: 25)
Students will demonstrate an ability to communicate clearly and concisely through written or oral communication. Different classes will emphasize different aspects of communication skills depending on the nature of the material to be covered.

Source of Evidence: Academic direct measure of learning - other

Target for O25: Effective verbal and written communication skills related to public or nonprofit issues
Faculty teaching all core courses are asked to rate the performance of students on the learning objectives at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2010-2011 - Target: Met
All of the students met the objective.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Faculty review of curriculum in progress
In response to the WEAVE reporting process, the faculty who teach courses in the MPA program are engaged in an on-going process of curriculum review. During the past year several issues have been discussed and actions are pending. For example, the two-course sequence in research methods and statistics was a problem in the initial WEAVE report. Faculty met and examined the content of the two courses, variations in material covered by different instructors, and ways to make sections more consistent. This change was implemented during the past academic year, and progress made in better student learning outcomes. During the current academic year (2009-10), the issue has shifted to the discussion of two issues—the course law (MPA 8411 Law for Public and Nonprofit Managers) and a potential capstone course. There is concern over the content and learning outcomes of the law course. It is under review, and new content related to contract law is under development for next year. There is also consideration of the issue of developing a capstone course for students in the MPA curriculum. A pilot version of the course was scheduled for the spring semester 2010, but not offered. The design and content of the course is under review for next year.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 04/2011
Responsible Person/Group: MPA Committee and full faculty of the PMAP Department

Analysis Questions and Analysis Answers
ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

During the past year, a faculty committee was established for each degree program. (In the past, one committee worked on the entire WEAVE report.) These committees examined last year’s report, reviewed the mission statement, program goals, learning objectives, and measure for each objective for each degree program. In the MPA Committee, there were learning objectives added and appropriate measures put in place. In the BS in Public Policy degree program, the syllabus for each course were reviewed by the committee to determine if the learning objectives for each course overlapped with other courses, and if measures were appropriate
for each learning objective. Recommendations were made to faculty members teaching courses where measures did not match objectives. These are now more closely aligned. For the MPP program, the committee produced the first report on this new degree program, which replaced the old MS in Urban Policy. The PhD Committee looked closely at examination practices in the core and fields of specialization. Some new procedures were put in place to improve outcomes on the examinations.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The members of the PMAP faculty were pleased with the data from the assessment process this past year. Faculty members were more aware of the WEAVE process and took seriously the responsibility of collecting and reviewing the data from each degree program in the department. The changes that were made in the learning objectives of the MPA degree program were made in anticipation of the accreditation renewal process in three year, which for the first time will be based on mission driven learning outcomes.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?

As a result of the last year’s assessment process and data, degree committees were established this year to address the WEAVE process for each program separately. This helped the MPA program faculty begin to align the WEAVE data collection process with the needs of the accreditation process of the National Association of Schools of Public Affairs and Administration. New learning objectives were added for the program and appropriate measures established. For the doctoral program, the committee revised the examination process to help students do better on the tests.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment this year (2010-2011)?

It is an old lesson, but the more broadly a responsibility is shared the greater the potential that people will understand and appreciate the entire process. This past year, faculty began to take responsibility for understand the WEAVE data collection process and, as a result, the report was a better reflection of this more wide-spread involvement. Overall, the faculty of the PMAP Department are pleased with the process we use and the results we are achieving.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

The faculty will continue to monitor the data collection process and how this information reflects the quality of the instruction in every class that is part of a degree program. It is difficult to anticipate how much improvement will be made.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Public Health MPH**

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Institute of Public Health has the mission of advancing health through leadership, scholarship, research, and service to better the human condition and promote the common good. The most significant application of that mission is to prepare students through the Master of Public Health (MPH) degree program to apply multi-disciplinary skills in public health practice and research and to assume leadership roles to address contemporary public health problems. The mission of the Institute of Public Health complements the stated mission of its administrative college home, the College of Health and Human Sciences, which is “to engage in teaching, scholarly endeavors, and service activities that improve health and well-being, and address social justice issues within a multi-cultural society.” With a focus on scholarship and research in urban health and health disparities, the Institute supports the mission of Georgia State University “to achieve a front-rank position among the nation's premier state-supported universities located in an urban setting.” The Institute’s mission is strengthened by the objective of the University System of Georgia, through its Strategic Plan for Public Health Education, Research and Service, “to ensure that the System becomes one of the national leaders in public health education, research and service.”

Note: The Master of Public Health program began in the Fall of 2004 and currently has 120 graduate students enrolled. The first students graduated in Spring 2006.

**Goals**

**G 1: IPH Program Goal**

The goal of the GSU IPH is to uphold the overarching goal of the Council on Education for Public Health [CEPH], which is to ‘enhance health in human populations through organized community effort’. The IPH focus is to prepare students to enter the public health workforce so that health problems of local communities, and the world, can be identified, addressed, and/or prevented.

**Student Learning Outcomes/Objectives**

**SLO 1: Understand Core Public Health Concepts (M: 1)**

Understand Core Public Health Concepts Articulate and utilize an understanding of core public health concepts in the areas of biostatistics, epidemiology, social and behavioral sciences, health services administration, and environmental health, as well as the eight emerging areas identified by IOM.

**Measures, Targets, and Findings**

**M 1: Final Thesis or Special Capstone Project (O: 1, 2, 3, 4, 5, 6, 7, 8)**

Each MPH Student has the option of completing either a thesis or special capstone research project. Both culminating experiences are designed to test the student's competency in core public health knowledge, skills and abilities and to ensure proficiency in the student's area of specialization. Students must present their thesis or capstone project in writing and defend it orally, to a faculty committee. Process evaluation will consider the number of thesis and capstone projects completed during each academic year.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Understand Core Public Health Concepts**

100% of students will successfully complete a thesis or special capstone project.

**Target for O2: Demonstrate Communication and Research Skills**

100% of students will successfully complete a thesis or special capstone project.

**Target for O3: Demonstrate Planning, Implementation, Evaluation**

100% of students will successfully complete a thesis or special capstone project.

**Target for O4: Assess Public Health Conditions**

100% of students will successfully complete a thesis or special capstone project.

**Target for O5: Analyze Health Disparities**

100% of students will successfully complete a thesis or special capstone project.

**Target for O6: Understand an Ecological Approach to Public Health**

100% of students will successfully complete a thesis or special capstone project.

**Target for O7: Apply Critical Thinking Skills**

100% of students will successfully complete a thesis or special capstone project.

**Target for O8: Apply Theory in Field Settings**

100% of students will successfully complete a thesis or special capstone project.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Complete Doctoral Program Application**

We are developing a proposal to initiate a PhD program within the IPH. We will continue to seek support and approval throughout the
Enhancing Alumni Communications
Due to the APR Self-Study, we were able to enhance our alumni response rate to the alumni survey this academic year. We want to maintain our exposure and contact with this very important stakeholder group as we move forward.

Revise Monitoring Measures
The IPH faculty and staff will collectively review and revise measures currently in place so that we can become more efficient in capturing our productivity, effectiveness, and quality.

Student Learning Outcomes/Objectives

**Measures, Targets, and Findings**

**M 1: Students demonstrate how citizens shape public policy (O: 1)**

Students demonstrate how citizens can help to shape public policy. This is demonstrated on the writing assignments for the course (weekly memos), the ULearn discussion board sessions, and final report.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Demonstrate how citizens can shape public policy**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet the objective. This will be measured by weekly memos, ULearn discussion board sessions, and the final report.
M 2: Participate and report on public and community affairs through service learning (O: 2)

Students participate in service learning and report on activities in their agencies that demonstrate how citizens work in public and community affairs. This is measured using weekly memos and hours logged using Volunteer Solutions. Also, class presentations at end of semester.

Source of Evidence: Field work, internship, or teaching evaluation

Target for O2: Participate in public and community affairs

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet the objective. This will be measured by using weekly memos and hours logged using Volunteer Solutions. Also, class presentations at end of semester.

Findings 2010-2011 - Target: Met
91.0% at least partially met the objective.

M 3: Demonstrate writing skills appropriate to public policy (O: 3)

Students will demonstrate writing skills appropriate to the field of public policy. This is demonstrated through weekly policy memos and a final paper that meet the CTW requirements of the course.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Develop writing skills appropriate to public policy

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students enrolled in the Citizenship course will at least partially meet the objective. Students will demonstrate writing skills appropriate to the field of public policy. This is demonstrated through weekly policy memos and a final paper that meet the CTW requirements of the course.

Findings 2010-2011 - Target: Met
86.8% at least partially met the objective.

M 4: Students demonstrate how leaders from all sectors lead organizational change (O: 4)

On a midterm and final examination, students demonstrate their ability to understand how leaders from all three sectors lead change in their organizations.

Source of Evidence: Academic direct measure of learning - other

Target for O4: Demonstrate how leaders make change in their organizations

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet this objective. On a midterm and final examination, students demonstrate their ability to understand how leaders from all three sectors lead change in their organizations.

Findings 2010-2011 - Target: Met
89.3% at least partially met the objective.

M 5: Students answer test questions on midterm and final exams on leadership theory (O: 5)

Students demonstrate understanding of important theories of leadership on midterm and final examinations as well as a final paper.

Source of Evidence: Academic direct measure of learning - other

Target for O5: Demonstrate understanding of key theoretical issues on leadership

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially demonstrate this objective. Students demonstrate understanding of important theories of leadership on midterm and final examinations as well as a final paper.

Findings 2010-2011 - Target: Met
80.7% at least partially met the objective.

M 6: Students compare theoretical approaches to practical applications of leadership (O: 6)

Students write paragraphs after each class period describing practical applications of leadership with theoretical perspectives. This is also measured in the final application paper assignment.

Source of Evidence: Written assignment(s), usually scored by a rubric
Target for O6: Compare leadership theory and practice

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students enrolled in the Policy Leadership course will meet this objective. Students write paragraphs each week showing their ability to apply theoretical perspectives on leadership to their roles as emerging leaders. This is also measured in the final application paper assignment.

Findings 2010-2011 - Target: Met
89.3% at least partially met the objective.

M 7: Demonstrate knowledge of main current policy issues (O: 7)

Measure knowledge of main policy issues currently under debate using exams and classroom policy debates.

Source of Evidence: Academic direct measure of learning - other

Target for O7: demonstrate knowledge of main policy issues under debate

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in PMAP 3311, Critical Policy Issues, will meet this objective. Measure knowledge of main policy issues currently under debate using exams and classroom policy debates.

Findings 2010-2011 - Target: Met
87.3% at least partially met the objective.

M 8: Apply knowledge of public policy process to current policy issues (O: 8)

Apply knowledge of the public policy process to current policy issues. This is measured by the final class presentation as well as the examinations.

Source of Evidence: Presentation, either individual or group

Target for O8: Apply knowledge of public policy process to current policy issues

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in the Policy Leadership course will meet this objective. Students must demonstrate their ability to apply knowledge of the public policy process to current policy issues. This is measured by the final class presentation and examinations.

Findings 2010-2011 - Target: Met
90.9% at least partially met the objective.

M 9: Demonstrate critical thinking about policy process and policy outcomes (O: 9)

Students will exhibit critical thinking about the public policy process and policy outcomes. This is measured by the final class presentation.

Source of Evidence: Presentation, either individual or group

Target for O9: Demonstrate critical thinking about policy process and policy outcomes

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students will at least partially meet the objective. Students must demonstrate critical thinking about the public policy process and policy outcomes. This is measured by the final class presentation.

Findings 2010-2011 - Target: Met
87.3% at least partially met the objective.

M 10: Application of statistical techniques to analyze public issues (O: 10)

Students apply introductory statistical techniques to analyze public policy issues. This is measured by performance on examinations.

Source of Evidence: Academic direct measure of learning - other

Target for O10: Apply introductory statistical techniques to public policy

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in the course will at least partially meet this objective. Students apply introductory statistical techniques to analyze public policy issues. This is measured by performance on examinations.

Findings 2010-2011 - Target: Met
82.7% at least partially met the objective.
M 11: Develop skills using computer to perform basic statistical analysis (O: 11)
Students develop skills in using the computer to perform basic statistical analysis using SPSS. This is demonstrated using examinations and class assignments.
Source of Evidence: Academic direct measure of learning - other

**Target for O11: Demonstrate skills using computer to perform basic statistical analysis**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in PMAP 4041, Policy Data Analysis, will at least partially meet this objective.
Students develop skills in using the computer to perform basic statistical analysis using SPSS. This is demonstrated using examinations and class assignments.

**Findings 2010-2011 - Target: Met**
87.0% at least partially met the objective.

M 12: demonstrate ability to apply scientific method to policy issues (O: 12)
Students demonstrate their ability to apply scientific method to the evaluation of public policy issues. This is measured through examinations.
Source of Evidence: Academic direct measure of learning - other

**Target for O12: Apply scientific method to policy issues**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students enrolled in PMAP 4051, Evaluating Public Policy, will at least partially meet this objective.
Students demonstrate their ability to apply scientific method to the evaluation of public policy issues. This is measured through examinations.

**Findings 2010-2011 - Target: Met**
88.0% at least partially met the objective.

M 13: Demonstrate ability to use appropriate techniques for evaluation research (O: 13)
Students demonstrate ability to use appropriate techniques for evaluation research. These techniques include experiments, survey research, qualitative field research, and others. This will be measured using examinations and the major policy evaluation writing assignment.
Source of Evidence: Academic direct measure of learning - other

**Target for O13: Demonstrate use of appropriate techniques for evaluation research**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet this objective. Students demonstrate ability to use appropriate techniques for evaluation research. These techniques include experiments, survey research, qualitative field research, and others. This will be measured using examinations and the major policy evaluation writing assignment.

**Findings 2010-2011 - Target: Met**
88.0% at least partially met the objective.

M 14: Demonstrate ability to write an evaluation research proposal as a CTW assignment (O: 14)
Students will complete a written evaluation research proposal to demonstrate how they would design an evaluation project for a public policy. This is measured by the major CTW (Critical Thinking through Writing) assignment.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O14: Demonstrate ability to write an evaluation research design (CTW)**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students will at least partially meet this objective. Students will complete a written evaluation research proposal to demonstrate how they would design an evaluation project for a public policy. This is measured by the major CTW (Critical Thinking through Writing) assignment.

**Findings 2010-2011 - Target: Met**
88.0% at least partially met the objective.

M 15: Demonstrate understanding of legal and political frameworks that underlie market economy (O: 15)
Students demonstrate understanding of legal and political frameworks that underlie the market economy. This is measured by examinations and class assignments.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Action Plan**

Public management and policy faculty approved the creation of a committee to review instructor assessment scores for PMAP 4061. The committee met several times and developed the following recommendations: The Department of Public Management and Policy should work with the Office of Academic Assistance in the Andrew Young School of Policy Studies to assure that students complete the micro and macro economics prerequisites for the 4061 course. The Department of Public Management and Policy should do more to educate faculty about the WEAVE process and their role in helping us to meet our learning objectives. We have made some progress toward a culture change, but this is a long-term process. Faculty members do not always understand that the role extends beyond teaching the students as best they can; we must be improving learning and retention, and this is one of their responsibilities. In this case, we recommend revising the e-mail sent to faculty as a part of the ratings process. We caution against providing more information than faculty can absorb, but the e-mail should explain the purpose of the ratings and departmental goals and expectations. Instructors should be required to provide a brief explanation of WEAVE scoring when developing their assessment reports. It would be easy to provide a space for comments at the bottom of the spreadsheets that are used to collect the instructor ratings. Indeed, faculty could be required to comment when their average score is less than 85%. It is essential to understand the thinking of the instructors as they are giving the low scores. Of course, they might also be encouraged to comment on high scores -- secrets of success, etc. The Department of Public Administration and Policy should create a committee to outline the content expectations for the 4061 course. There has been some tension about the role of economics in this course, and it would be a good time to resolve this matter. Economics and public administration faculty defined policy analysis differently, and instructors of this course definitely need additional guidance. If we determine that students need detailed economic knowledge to complete this course, then we might think of creating a support system of some sort. We have many graduate students able to provide assistance, for example. There should be no reason why our excellent students should be getting unsatisfactory assessment scores. In fact, an electronic filing system could provide easy access to short course guideline documents. (Faculty committees could ultimately develop guidelines for every course.) See above, the spreadsheet rating form could remind faculty about these guidelines and even ask them to indicate that they have reviewed them. It has become routine to review past course syllabi, but we need to go further. The course guidelines can provide tips about teaching strategies and outline departmental expectations for each individual course. This would be much better than relying on hearsay or developing expectations in some random way that faculty members are likely to forget about.

Improve MATH skills of students in lower division courses

The drop in the percentage of students who did not at least partially meet this objective from the 2008-09 academic year was steep.
Last year, xx% at least partially met this objective, compared to only 70.16% who at least partially met this same objective this year. There is other evidence to support the observation that some PMAP students are weak in basic math skills. The rate of D, F, and W grades in the PMAP 4041 course (Policy Data Analysis) was 34% during the fall 2009 semester, compared to a 13% DFW rate for all the PMAP core courses. At present, students can take the upper division Policy Data Analysis course with only a grade of D in the lower division MATH courses 1101 or 1111. The two step Action Plan calls for changing the requirement to a minimum grade of C in either basis lower division MATH 1101 or 1111 course during the fall semester 2010. The second step of the Action Plan is to require all students to take and earn a minimum grade of C in MATH 1070, Elementary Statistics as a prerequisite for taking PMAP 4041. This prerequisite should improve the math skills of students taking PMAP 4041.

Established in Cycle: 2009-2010

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Public Policy MPP**

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Master of Public Policy (MPP) is an interdisciplinary degree program designed to provide students with an understanding of policy analysis as well as methods of generating new knowledge about specific policy areas.

**Goals**

**G 2: Understanding basic methods and statistics for applied research**

Students learn basic methods and statistics for research in the public and nonprofit sectors. These include the scientific method in applied research, elementary research design, measurement, qualitative research, computer-assisted data analysis, and beginning statistics including descriptive statistics, crosstabulation, introductory inferential statistics, and graphical presentations.

**G 1: Understanding the policy process**

Students understand the development of policy through the policy process framework as well as through other policy models. Students are introduced to different actors and factors likely to influence public policy.

**G 3: Understanding advanced research methods and statistics**

Students understand advanced methods and statistics in applied research in the public and nonprofit sectors. These include survey research, experimental and quasi-experimental designs, sampling, and intermediate statistical techniques including analysis of variance, correlation and regression, and time-series analysis.

**G 4: Understanding basic principles of microeconomics applied to public policy**

Students will understand basic principles of microeconomics applied to public administration and policy.
### G 6: Understanding the principles of policy analysis
Understand how to identify public policy problems, some of the characteristics of different policy alternatives, and how to choose among different policy options.

### G 5: Understanding the principles of policy evaluation
This course is designed to introduce students to the conceptual methods used to analyze the need for change in the public sector.

Students understand how to identify attributes of problems that may be addressed through public policy.

**SLO 17: To understand the characteristics of different policy alternatives (G: 6) (M: 17)**

Students learn to understand the characteristics of different policy alternatives and in which circumstances it may be appropriate to use them.

**SLO 18: To understand how to construct a policy memo (G: 6) (M: 18)**

Students understand how to construct a policy memo for a potential client.

** Measures, Targets, and Findings**

**M 1: Students understand different ways of categorizing public policies (O: 1)**

Students demonstrate understanding of different ways of categorizing public policies. This is measured on the students' examinations in PMAP 8011, Politics and Policy.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Understand different ways of categorizing policies**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students will at least partially meet this objective.

**Findings 2010-2011 - Target: Met**

During the past year, 83.4% of the students enrolled in PMAP 8011 fully demonstrated their ability to meet this objective. This was measured by their performance on examinations.

**M 2: Understand how different actors are likely to influence policies (O: 2)**

Students demonstrate understanding of how different actors are likely to influence policy decisions. This is measured by in-class policy debates and on written assignments.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Understand how different actors are likely to influence policies**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students will at least partially meet this objective.

**Findings 2010-2011 - Target: Met**

During the past year, 86.1% of the students enrolled in PMAP 8011 at least partially demonstrated this skill or knowledge as demonstrated by their performance in classroom debates and on written assignments.

**M 3: Students understand different models of policy making (O: 3)**

Students understand different models of policy making such as the policy process model, as well as other models drawn from the public policy literature. This is measured by examinations and written assignments.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Understand different models of policy-making**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students in PMAP 8011 will at least partially meet this objective.

**Findings 2010-2011 - Target: Met**

During the past year, 86.2% of the students enrolled in PMAP 8011 demonstrated the ability to understand the different models of policy making.

**M 4: Students must demonstrate the ability to apply basic concepts of measures and data sets (O: 4)**

Students in PMAP 8121 complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.

Source of Evidence: Academic direct measure of learning - other

**Target for O4: Apply basic concepts of measures and data sets**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.
M 5: Demonstrate skills using the computer to perform basic statistical analysis (O: 5)

Students in PMAP 8121 do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

Source of Evidence: Academic direct measure of learning - other

Target for O5: Demonstrate skills using the computer to perform basic statistical analysis

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

Findings 2010-2011 - Target: Met

85.5% of students enrolled in PMAP 8121 fully demonstrated the knowledge or skill.

M 6: Demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results (O: 6)

The students' final examination and final paper provide evidence of their ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results.

Source of Evidence: Academic direct measure of learning - other

Target for O6: Demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. The students' final examination and final paper provide evidence of their ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results.

Findings 2010-2011 - Target: Met

84.3% of students enrolled in PMAP 8121 during the past year met this objective.

M 7: Demonstrate ability to apply introductory statistical techniques to analyze questions facing public managers (O: 7)

The students' final paper and the midterm and final examinations in PMAP 8121 measure their ability to apply introductory statistical techniques to analyze questions facing public managers.

Source of Evidence: Academic direct measure of learning - other

Target for O7: Demonstrate ability to apply introductory statistical techniques to analyze questions facing policy analysts

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. The students' final paper and the midterm and final examinations measure their ability to apply introductory statistical techniques to analyze questions facing public managers.

Findings 2010-2011 - Target: Met

83.03% of the students enrolled in PMAP 8121 during the past year met the objective.

M 8: Demonstrate understanding of principles of research design methods appropriate to public administration and policy (O: 8)

Students in PMAP 8131 use examinations and the final paper to demonstrate their understanding of basic principles of research design methods appropriate for research in public administration and policy.

Source of Evidence: Academic direct measure of learning - other

Target for O8: Demonstrate understanding of principles of research design methods appropriate to public administration and policy

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8131, Applied Research Methods and Statistics II, will at least partially meet this objective. Students use examinations and the final paper to demonstrate their understanding of basic principles of research design methods appropriate for research in public administration and policy.
M 9: Ability to interpret regression coefficients on interval-level and dummy independent variables (O: 9)

Source of Evidence: Academic direct measure of learning - other

Target for O9: Ability to interpret regression coefficients on interval-level and dummy independent variables
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8131 will at least partially meet this objective. Students skills in PMAP 8131 of interpreting regression coefficients on interval-level and dummy independent variables are measured by examinations and the final paper.

Findings 2010-2011 - Target: Met
87.82% of students enrolled in PMAP 8131 during the past year fully demonstrated the knowledge or skill and met the objective.

M 10: Demonstrate understanding of microeconomic principles and the public sector (O: 10)

Source of Evidence: Academic direct measure of learning - other

Target for O10: Demonstrate understanding of microeconomic principles and the public sector
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 93.94% of students enrolled in PMAP 8131 during the past year fully demonstrated the knowledge or skill and met this objective.

Findings 2010-2011 - Target: Met
93.94% of students enrolled in PMAP 8131 during the past year fully demonstrated the knowledge or skill and met this objective.

M 11: Apply basic theoretical and empirical tools of economic analysis to public policy issues (O: 11)

Source of Evidence: Academic direct measure of learning - other

Target for O11: Apply basic theoretical and empirical tools of economic analysis to public policy issues
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 87.26% of the students enrolled in PMAP 8131 during the past year fully demonstrated the knowledge or skill and met the objective.

Findings 2010-2011 - Target: Met
93.94% of students enrolled in PMAP 8141 during the past year fully demonstrated the knowledge or skill and met the objective.

M 12: Demonstrate understanding of the effects of public expenditures programs (O: 12)

Source of Evidence: Academic direct measure of learning - other

Target for O12: Demonstrate understanding of the effects of public expenditures programs
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 87.82% of students enrolled in PMAP 8131 during the past year fully demonstrated the knowledge or skill and met the objective. Students will demonstrate their understanding of microeconomic principles and the public sector on a midterm examination and written assignments.

Findings 2010-2011 - Target: Met
87.82% of students enrolled in PMAP 8131 during the past year fully demonstrated the knowledge or skill and met the objective.

87.26% of the students enrolled in PMAP 8131, Microeconomics for Public Policy, will at least partially meet this objective.

82% of students enrolled in PMAP 8131 will at least partially meet this objective.

87.82% of students enrolled in PMAP 8141 will at least partially meet this objective.

82% of students enrolled in PMAP 8141 will at least partially meet this objective.

87.82% of students enrolled in PMAP 8141 during the past year fully demonstrated the knowledge or skill and met the objective.
M 13: Identify Causes of Bias in Regression Analysis (O: 13)
Students enrolled in PMAP 8521, Evaluation Research, will demonstrate the ability to identify the causes of bias in regression analysis. Source of Evidence: Academic direct measure of learning - other

Target for O13: Identify Causes of Bias in Regression Analysis
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8521 will at least partially meet this objective. Students skills of being able to identify major threats to validity in evaluation studies are measured by examinations and the final project.

Findings 2010-2011 - Target: Met
93.9% of the students enrolled in PMAP 8521 during the past year fully demonstrated the knowledge or skill and met the objective.

M 14: Identify Major Threats to Validity in Evaluation Studies (O: 14)
Students enrolled in PMAP 8521 will demonstrate the ability to identify major threats to validity in evaluation studies. Source of Evidence: Academic direct measure of learning - other

Target for O14: Identify Major Threats to Validity in Evaluation Studies
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8521 will at least partially meet this objective. Students skills of being able to identify major threats to validity in evaluation studies are measured by examinations and the final project.

Findings 2010-2011 - Target: Met
100% of the students enrolled in PMAP 8521 during the past year demonstrated the skills or knowledge and met the objective.

M 15: Select Appropriate Evaluation Design for a Particular Evaluation Domain (O: 15)
Students enrolled in PMAP 8521 can select the appropriate evaluation design for a particular evaluation domain. Source of Evidence: Academic direct measure of learning - other

Target for O15: Select Appropriate Evaluation Design for a Particular Evaluation Domain
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8521 will at least partially meet this objective. Students skills of being able to select the research design appropriate for a particular evaluation domain.

Findings 2010-2011 - Target: Met
100% of the students enrolled in PMAP 8521 during the past year demonstrated the skills and knowledge and met this objective.

M 16: Understand how to identify policy problems (O: 16)
The students enrolled in PMAP 8531 will demonstrate that they can identify policy problems. This is measured by the students' papers. Source of Evidence: Academic direct measure of learning - other

Target for O16: To understand how to identify policy problems
Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2010-2011 - Target: Met
All students enrolled in PMAP 8531 during the past year demonstrated the skills or knowledge and met this objective.

M 17: Understand the characteristics of different policy alternatives (O: 17)
Students enrolled in PMAP 8531 will demonstrate their understanding of the characteristics of different policy alternatives. This is measured by their performance of papers and two examinations. Source of Evidence: Academic direct measure of learning - other

Target for O17: To understand the characteristics of different policy alternatives
Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating
the knowledge or skill: 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

### Findings 2010-2011 - Target: Met

All students enrolled in PMAP 8531 during the past year demonstrated the skills or knowledge and met the objective.

<tbody>
<tr>
<td>Students will demonstrate their understanding of the theoretical framework section of the public policy section of the core</td>
</tr>
</tbody>
</table>
Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Demonstrate understanding of public policy theory**

The achievement target for the core portion of the comprehensive examination is 67% of students passing this portion of the exam.

**Findings 2010-2011 - Target: Met**

During the 2010-2011 academic year, 7 students attempted the core portion of the comprehensive examination. Six of these students (85.7%) passed the core portion of the comprehensive examination.

**M 2: Analytical Methods Section of Comprehensive Exam (O: 2)**

Students will demonstrate their understanding of analytical methods on the methods section of the core comprehensive examination.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O2: Students apply analytical methods to public policy**

The achievement target for the core portion of the comprehensive examination is 67% of students passing this portion of the exam.

**Findings 2010-2011 - Target: Met**

During the 2010-2011 academic year, 7 students attempted the core portion of the comprehensive examination. Six of these students (85.7%) passed the core portion of the comprehensive examination.

**M 3: Major Field Comprehensive Examination (O: 3)**

Students will demonstrate their understanding of a major field on the comprehensive examination.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O3: Demonstrate Understanding of Major Field**

The achievement target for the major field portion of the comprehensive examination is 67% of students passing this part of the exam.

**Findings 2010-2011 - Target: Met**

During the 2010-2011 academic year, one student attempted the major field portion of the comprehensive examination. The student passed. The program met this portion of the achievement target.

**M 4: Dissertation and Original Research (O: 4)**

Students will produce and defend a dissertation proposal, produce conference papers and journal manuscripts, and produce a doctoral dissertation.

Source of Evidence: Senior thesis or culminating major project

**Target for O4: Produce Original Public Policy Research**

All candidates will successfully propose and defend a dissertation proposal. By the end of the third year in the doctoral program, all students will present a conference paper and submit at least one manuscript for review as a journal article. All students will produce and successfully defend their doctoral dissertations.

**Findings 2010-2011 - Target: Met**

During the past year, 4 students produced and successfully defended their dissertation proposals. During the past year, 20 doctoral students produced 30 conference papers, and 12 students submitted 20 manuscripts for review as journal articles, book chapters, and conference proceedings. Of the 35 active students in the doctoral program who are in their second year or later, all but 4 have presented papers and submitted manuscripts. These 4 students are scheduled to do so during the next academic year. During the past year, 8 students produced and successfully defended their dissertations.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Revised methods courses and core comprehensive exam**

In the 2007-08 WEAVE report this was among the stated objectives in the PhD Program in Public Policy: Students will demonstrate their understanding of the analytical methods used to study public policy through the core comprehensive examination. 90% will pass the comprehensive exam. After seeing that we did not meet this objective, the doctoral program committee met to review the content of the two required methods courses and the procedures used to measure the students' performance which is the percentage who pass the methods section of the comprehensive examination. The content of the two course sequence was revised by the committee and the staffing changed. As a result of this process, the student performance improved during the 2008-09 academic year, but this turnaround is a long-term process since students take the courses in their first year in the PhD program and the comprehensive exams are taken in year three. The doctoral program committee is continuing to monitor the progress of students in the two research methods classes and their performance as measured by the methods section of the comprehensive examination.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 04/2012
- **Responsible Person/Group:** Doctoral Program Committee of the Joint PhD Program in Public Policy

**Doctoral Program Committee developed 3-part action plan**

The Doctoral Program Committee developed a three-part Action Plan to improve students' performance on the major field portion of
the comprehensive examinations. First, faculty members will update the reading list for students in each major field. Next, the Doctoral Program Committee will review admission criteria against performance on the comprehensive examinations. Perhaps some students were admitted in the past who should not have been. Finally, each major field advisor will conduct tutorial sessions for those students preparing for the examination. A special focus will be placed on the students who failed this year’s field exams.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Major Field Comprehensive Examination | Outcome/Objective: Demonstrate Understanding of Major Field

Implementation Description: Faculty will complete these action plan steps prior to the beginning of the new academic year.
Projected Completion Date: 08/2010
Responsible Person/Group: Doctoral Program Committee

| **G 1: G1: Content Knowledge**  
Candidates are informed educators who have a strong knowledge of the content needed to teach literacy. |

| **G 2: G2: Planning and Teaching Performance**  
Candidates are professional educators with pedagogical knowledge and dispositions needed to design culturally responsive learning spaces. |

| **G 3: G3: Impact on Students**  
Candidates are effective educators whose teaching practices have a measurable impact on the reading development of their students. |

<table>
<thead>
<tr>
<th>Student Learning Outcomes/Objectives</th>
</tr>
</thead>
</table>
| **SLO 1: History of Literacy (G: 1) (M: 1)**  
Candidates are knowledgeable of literacy research and histories of literacy development. |

| **SLO 2: Foundations of Reading and Writing (G: 1) (M: 2)**  
Candidates will demonstrate knowledge of the linguistic, psychological, and sociological foundations of reading and writing processes and instruction. |

| **SLO 3: SBRR (G: 2) (M: 3)**  
Candidates will demonstrate knowledge of the SBRR principles (phonemic awareness, phonics, vocabulary, fluency, and comprehension) as related to literacy development. |

| **SLO 4: Planning and Teaching Performance (G: 2) (M: 4)**  
Candidates create a literate environment that fosters literacy by integrating foundational knowledge, use of instructional practices, approaches and methods, curriculum materials, and the appropriate use of assessments. |

| **SLO 5: Range of Curricular Materials (G: 2) (M: 5)**  
Candidates use a wide range of curricular materials in effective reading instruction for learners at different stages of literacy development and from different cultural and linguistic backgrounds. |

| **SLO 6: Professional Development (G: 2) (M: 6)**  
Candidates view professional development as a career long effort and responsibility. |

| **SLO 7: Impact on Students (G: 3) (M: 7)**  
Candidates use a variety of assessment tools and practices to plan effective instruction. |

| **SLO 8: Evaluate Practice (G: 2) (M: 8)**  
Candidates work with colleagues to observe, evaluate, and provide feedback on each other's practice. |

66% of the students received a 4, 33% of the students received a 5

### M 8: Portfolio Rating Standard 8: Evaluate Practice (O: 8)

Candidates demonstrate their understanding how to observe, evaluate, and provide feedback on each other's practice in the Planning and Teaching Performance portion of their video portfolio.

**Target for O8: Evaluate Practice**

Students will average 4 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

**Findings 2010-2011 - Target: Met**

66% of the students received a 4, 33% of the students received a 5

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Redesigned Portfolio

Portfolio will be re-designed with professional standards aligned with courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** Lori Elliott
- **Additional Resources:** nono
- **Budget Amount Requested:** $0.00 (no request)

#### Redesigned Portfolio

The MEd faculty are in the process of redesigning the exit portfolio for the MEd students. The framework will be drawn from the 2010 International Reading Standards for reading specialists. Students will create a video document that provides opportunities for synthesis and analysis of the reading process, diagnosis, and instructional decision making.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 08/2010
- **Responsible Person/Group:** MEd faculty in Reading, Language and Literacy Education

#### Video Portfolio

The MEd students currently submit video portfolios that are based on the IRA standards (2004). There are new standards (2010) that will be utilized in the future based on acceptance from the PSC. Candidates continue to refine their process and create video portfolios that demonstrate their knowledge and understanding of the reading process, instructional practices, and assessments.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 08/2012

**video refinement**

MEd Reading Specialists candidates do well on the video portfolio. However, as the video portfolio becomes more established we are...
going to require candidates to demonstrate more synthesis across the standards so that it is clear to the viewer that the candidate has a deep knowledge of the reading/writing process, how to design and implement strategies based on this knowledge, and how to effectively assess children's literacy progress. Additionally, with future changes to the program to better reflect the trends in the field, the candidate will also add information related to home/community literacy practices and response to intervention information to their video presentation.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: High

**Relationships (Measure | Outcome/Objective):**
- Measure: Portfolio Rating Standard 1: History | Outcome/Objective: History of Literacy
- Measure: Portfolio Rating Standard 2: Foundations | Outcome/Objective: Foundations of Reading and Writing
- Measure: Portfolio Rating Standard 3: SBR | Outcome/Objective: SBR
- Measure: Portfolio Rating Standard 4: Literate Environments | Outcome/Objective: Planning and Teaching Performance
- Measure: Portfolio Rating Standard 5: Curricular Materials | Outcome/Objective: Range of Curricular Materials
- Measure: Portfolio Rating Standard 6: Prof Dev | Outcome/Objective: Professional Development
- Measure: Portfolio Rating Standard 7: Assessment | Outcome/Objective: Impact on Students
- Measure: Portfolio Rating Standard 8: Evaluate Practice | Outcome/Objective: Evaluate Practice

**Implementation Description:** Candidates will be instructed to synthesize across their coursework to complete the video portfolio

**Projected Completion Date:** 08/2012

---

**Analysis Questions and Analysis Answers**

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

N/A

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

N/A

**CTW Reflection 3:** Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

N/A

**CTW Reflection 4:** Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

N/A

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The MEd Reading faculty meet on a regular basis to discuss the direction of the MEd reading specialist program. There have been no changes in how we assess the students. The students, however, continue to refine their process of creating the portfolio. We have a large number of sample videos that students may view as they begin to create their own. In the upcoming year, the MEd Reading faculty will begin to consider how to update the program to better reflect trends in the field. This will necessitate a change in learning outcomes and objectives, which will also change the rubric for the video portfolio.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The MEd Reading faculty meet on a regular basis to discuss the direction of the MEd reading specialist program. Through the assessment of the students' video portfolios we are considering redesigning the coursework to better reflect the current trends in the field. There will be greater attention to issues related to community and home literacies, as well as digital literacies, thereby impacting the standards and rubric that will be used to assess students' understandings.

**ADMINISTRATIVE DEPT QUESTION 1:**

Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:**

What have you learned from your assessment this year (2010-2011)?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**

What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

Georgia State University
Mission / Purpose
The Ed.S. in Reading is designed to provide students the in-depth theoretical and applied knowledge needed to excel in school, district, and state level positions in literacy curriculum.

Goals
G 1: Content knowledge
EdS candidates are informed educators who have a strong knowledge of the content needed to teach literacy.

G 2: Teaching Performance
EdS candidates have pedagogical knowledge and dispositions to effectively teach literacy practices as well as provide coaching/leadership in the area of literacy development.

G 3: Impact on Students
EdS candidates are effective educators whose teaching practices have a measurable impact on the reading development of their students.

Student Learning Outcomes/Objectives
SLO 1: Knowledge of the field (G: 1) (M: 1)
Knowledge of the Field of Literacy: Reading-Language Arts. Accomplished Early and Middle Childhood/ Literacy: Reading–Language Arts teachers know and understand current literature and theories about reading–language arts. They evaluate this knowledge and use it in their instructional practice.

SLO 2: Continued development (G: 2) (M: 2)
Candidates constantly seek to improve their knowledge and practice through a continuing process of professional reading, writing, dialogue, inquiry, and reflection.

SLO 3: Reciprocal nature of literacy development (G: 2) (M: 3)
Candidates understand the reciprocal nature of the literacy processes of reading, writing, listening, speaking, and viewing, and they provide developmentally appropriate learning activities that integrate among the language arts and across the curriculum.

SLO 4: Lifelong learning and effective instruction (G: 3) (M: 4)
Candidates use their knowledge of reading processes, language development, texts, and ongoing assessment to advance literacy, develop strategic readers, promote an appreciation of reading as vital to lifelong learning, and create effective instruction so that readers can negotiate, inquire about, and construct meaning across the curriculum.

SLO 5: Knowledge of writing (G: 3) (M: 5)
Candidates use their knowledge of writing processes, language development, writing development, and ongoing assessment to provide instruction in the components of writing, assist students in constructing meaning in their written work, and provide genuine opportunities for students to write for a variety of purposes and audiences.

SLO 6: Knowledge of oral language (G: 3) (M: 6)
Candidates know, value, and teach oral language development and listening and speaking skills as essential components of literacy, and they provide opportunities for students to listen and speak for a variety of purposes and audiences.

SLO 7: Knowledge of viewing (G: 3) (M: 7)
Candidates know, value, and teach viewing as an essential component of literacy. They use a wide variety of print and nonprint resources to develop students' viewing and visual-representation skills.

Measures, Targets, and Findings
M 1: Knowledge of field (O: 1)
EdS candidates will demonstrate their knowledge and understanding of the field of literacy development and instruction in the content area of their portfolio.

Source of Evidence: Portfolio, showing skill development or best work.

Target for O1: Knowledge of the field
Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2010-2011 - Target: Met
100% of the students scored a 4; with 50% of them scoring a 5.

100% of the students scored a 4.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Portfolio
The EdS students complete a portfolio that demonstrates their knowledge and competence in literacy development. The program is being phased out so there are no substantive changes in the way the portfolio is designed or how students go about completing the requirements for the portfolio.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Knowledge of field | Outcome/Objective: Knowledge of the field
- Measure: Knowledge of oral language | Outcome/Objective: Knowledge of oral language
- Measure: Knowledge of viewing | Outcome/Objective: Knowledge of viewing
- Measure: Knowledge of writing | Outcome/Objective: Knowledge of writing
- Measure: Lifelong learning and effective instruction | Outcome/Objective: Lifelong learning and effective instruction
- Measure: Reciprocal nature of literacy development | Outcome/Objective: Reciprocal nature of literacy development

Implementation Description: To continue supporting students in the program, there are planned advising sessions that review the requirements.

Projected Completion Date: 08/2012

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The EdS Reading Specialist program has not undergone any substantive changes in the assessment process. The current students are aware of and knowledgeable about the standards and rubric for the portfolio. The program is being phased out.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The number of students pursuing the EdS degree has declined in recent years, thereby prompting a decision to phase the degree and program out. No changes are planned in courses or sequence of courses at this time.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Mission / Purpose

Note: This program should be listed as Reading, Language and Literacy ESOL - Online MAT Degree Program (Georgia On My Line). The M.A.T. major in Reading, Language, and Literacy Education provides initial teacher preparation in ESOL for individuals holding bachelor's degree and who have an interest in English to speakers of other languages in K-12 settings. The Master of Arts in Teaching (M.A.T.) enables ESOL paraprofessional or provisional teachers to earn initial certification. The course of study meets the requirements for professional certification at the initial level in ESOL and the requirements for a Reading Endorsement. The M.A.T. teacher education program for English for Speakers of Other Languages (ESOL) is one of the five distance learning programs and two non-degree endorsements offered by the College of Education at Georgia State University through Georgia OnmyLine (GOML). Georgia ONmyLINE provides access to a full array of online and distance education offerings from the 35 colleges and universities in the University System of Georgia. This M.A.T. in Reading, Language and Literacy Education (ESOL) at Georgia State University ("GSU") is a collaborative program between GSU, Valdosta State University ("VSU"), and North Georgia College and State University ("NGCSU"), institutions of the Board of Regents of the University System of Georgia.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. In this online program, we strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

Goals

G 1: Content Knowledge
Candidates are informed educators who have expert knowledge of the content needed to teach English to Speakers of Other Languages in grades PreK-12.

G 2: Professional and pedagogical knowledge, skills, and dispositions
Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching English to Speakers of Other Languages in Grades PreK-12.

G 3: Impact on student learning
Candidates are highly effective educators whose teaching practices have a measurable impact on the English to Speakers of Other Languages learning of their students.

Student Learning Outcomes/Objectives

SLO 1: Demonstrate Content Knowledge (G: 1) (M: 1, 7)
Candidates have knowledge and understanding of the major concepts, theories, methods, and research related to language acquisition and historical knowledge of theories, methods, and research on language acquisition (Goal 1). (Key Assessment - Content Knowledge: GACE II scores and Content Knowledge section of Final Teaching Evaluation rubric Overall Assessment Score for Content Curriculum).

SLO 2: Demonstrate Professional and Pedagogical Skills (G: 1, 3) (M: 2, 3)
Candidates create learning environments which support ESOL students' cultural identities, language and literacy development, and content area achievement through planning and implementation of a wide range of instructional methods, and curriculum materials; view teacher-researcher models of inquiry, professional development, collaboration with colleagues as career-long efforts and responsibilities; and advocate for ESOL students and their families (Goal 2). (Key Assessment- Planning: Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction); Key Assessment- Clinical Practice: Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric)

SLO 3: Demonstrate Professional Dispositions (G: 1, 2) (M: 5)
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision (Goal 2). (Key Assessment - Dispositions: Unit-wide Dispositions Rubric)

SLO 4: Uses a variety of assessments for impact on PreK-12 students (G: 3) (M: 4, 6)
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Goal 3) (Key Assessment - Impact on Student Learning: Teacher Work Sample rubric (Section on Analysis of Student Learning)
Final Teaching Evaluation Rubric: Section on Overall Assessment Score for Content Curriculum (EDCI 7680)

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Demonstrate Content Knowledge**

90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2010-2011 - Target: Met**

100% of candidates in 2010-11 scored at the proficient level (Score 4 or higher) of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. M.A.T. Content Knowledge (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Developing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates can discuss the major concepts, theories, methods, and research related to the nature and acquisition of language; discuss how this knowledge has aided you in the creation of learning environments that support the language and literacy development and content area achievement of ELLs, and demonstrate the impact of pedagogy informed by our current and historical knowledge of theories, methods, and research on language acquisition on the linguistic, literacy, and content area achievement of ELLs (both individuals and groups) through the inclusion of student work. 2.1 Candidates are knowledgeable about the major concepts, theories, and research related to the nature and role of culture and cultural groups and the ways in which you use those theories to construct learning environments that support ESOL students’ cultural identities, language and literacy development and content area achievement. 2.1

**M 2: Planning Performance (O: 2)**

Teacher Work Sample rubric: Sections on Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction (EDCI 7680).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Demonstrate Professional and Pedagogical Skills**

90% of candidates will demonstrate an acceptably proficient (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of planning as shown in their Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction). These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2010-2011 - Target: Met**

100% scored at the proficient level (Score 4 or higher) M.A.T. Planning performance (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Developing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates have demonstrated the ability to plan for lessons for learners of English as a second language. 2.1

**M 3: Clinical Practice at Midpoint (O: 2)**

Midpoint Teaching Evaluation Instrument (EDCI 7660)

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Demonstrate Professional and Pedagogical Skills**

90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate a effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Midpoint Teaching Evaluation Instrument. This level is expected by the midpoint of the practicum internship.

**Findings 2010-2011 - Target: Met**

100% scored at the proficient level (Score 4 or higher), M.A.T. clinical practice at midpoint (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Developing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates have successfully taught ESOL students while utilizing ESOL pedagogy and approaches acquired in the courses at the midpoint of their coursework. 2.1

**M 4: Clinical Practice at Endpoint (O: 4)**

Student Teaching Evaluation Rubric (EDCI 7680)

Source of Evidence: Professional standards

**Target for O4: Uses a variety of assessments for impact on PreK-12 students**

90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Final Teaching Evaluation Instrument. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2010-2011 - Target: Met**

100% of the candidates scored at the proficient level, (4 or higher) M.A.T. clinical practice at endpoint (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Developing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates have successfully taught ESOL students while utilizing ESOL pedagogy and approaches acquired in the courses at the end of the program. 2.1

**M 5: Dispositions (O: 3)**

Unit-wide Dispositions Rubric

Source of Evidence: Written assignment(s), usually scored by a rubric
Target for O3: Demonstrate Professional Dispositions

90% of candidates will demonstrate an acceptable level of performance (Score 3) or higher levels and 40% of candidates will demonstrate an exceptional level (Score 4) in the area of dispositions as shown in their Unit-Wide Dispositions rubric. These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met

100% of the candidates scored at the proficient level or higher (score 4). M.A.T. Dispositions (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Developing (2 pts) Beginner-(1 pts) No Evidence-(0 pts)
Candidates believe in the worth, ability and potential of others; trust learner’s capacity for change; believe others can and will rather than can’t or won’t. Candidates believe in the worth, ability and potential of self; possess a fundamentally positive sense of self-adequacy, capability and dependability; have positive expectations of self 2 1

M 6: Effects on P-12 Student Learning (O: 4)

Teacher Work Sample rubric: Section on Analysis of Student Learning (EDCI 7680).
Source of Evidence: External report

Target for O4: Uses a variety of assessments for impact on PreK-12 students

90% of candidates will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of effects on P-12 Student Learning as shown on their scores of the Teacher Work Sample rubric (Section on Analysis of Student Learning). This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met

100% of the candidates scored at the proficient level (4 or higher). M.A.T. Effects on P-12 Student Learning (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Developing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates have made impact on the P-12 ESOL students’ learning. 2 1

M 7: Content Knowledge: GACE II Scores (O: 1)

Candidate performance on GACE tests for English to Speakers of Other Languages (forms 119 and 120). * * Data for students who pursued a certification only is included.
Source of Evidence: Certification or licensure exam, national or state

Target for O1: Demonstrate Content Knowledge

100% of candidates will pass the GACE 1 and 2 tests by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Met

100 percent of the candidates passed the GACE tests. See table below: M.A.T. Content Knowledge.GACE (Summer 2010, Fall 2010, & Spring 2011) Pass Fail English to Speakers of Other Languages (ESOL), Test I 3 English to Speakers of Other Languages (ESOL), Test II 3

Strengthening Professional Standard
Compared to other standards in the portfolio, the reading endorsement standard 10, “students view professional development as a career long effort and responsibility” has been ranked the lowest. This result indicates that students need to be better prepared to address this standard in the course work as well as in the program. Therefore, the coordinator of the program will communicate with each of the students and course instructors to encourage the students to participate in various professional development opportunities and to document their activities throughout the program.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Responsible Person/Group: Jayoung Choi

improving clinical practice
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their teaching performance. This means that candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Clinical Practice at Midpoint
  Outcome/Objective: Demonstrate Professional and Pedagogical Skills
Implementation Description: Candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

improving clinical practice at endpoint
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their teaching performance. This means that candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Clinical Practice at Endpoint
  Outcome/Objective: Uses a variety of assessments for impact on PreK-12 students
Implementation Description: Candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.
**Improving content knowledge**

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in this content knowledge. This means that we set our expectations from the outset clearly and we maintain closer monitoring of candidates’ obtaining content knowledge.

*Established in Cycle:* 2010-2011  
*Implementation Status:* Planned  
*Priority:* High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Content Knowledge via Coursework  
- **Outcome/Objective:** Demonstrate Content Knowledge

**Implementation Description:** As we were successful in attaining this target, we will continue with our implementation plan of effective monitoring of our students and effective teaching.

**Projected Completion Date:** 06/2012  
**Responsible Person/Group:** Jayoung Choi & MSIT Faculty

---

**Improving content knowledge: GACE**

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their GACE scores. This means that candidates’ content knowledge learning is monitored through course work and additional support to prepare for the tests is provided in their last semester of the program by the program coordinator.

*Established in Cycle:* 2010-2011  
*Implementation Status:* Planned  
*Priority:* High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Content Knowledge: GACE II Scores  
- **Outcome/Objective:** Demonstrate Content Knowledge

**Implementation Description:** Candidates’ content knowledge learning is monitored through course work and additional support to prepare for the tests is provided in their last semester of the program by the program coordinator.

**Projected Completion Date:** 06/2012  
**Additional Resources:** Jayoung Choi & other MSIT faculty

---

**Improving dispositions**

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving dispositions. This means that expectations are clearly stated and delivered to the candidates at the outset and their work is consistently monitored throughout the program.

*Established in Cycle:* 2010-2011  
*Implementation Status:* Planned  
*Priority:* High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Dispositions  
- **Outcome/Objective:** Demonstrate Professional Dispositions

**Implementation Description:** Expectations are clearly stated and delivered to the candidates at the outset and candidates’ work is consistently monitored throughout the program by the program coordinator.

**Projected Completion Date:** 06/2012  
**Responsible Person/Group:** Jayoung Choi & other MSIT faculty

---

**Improving effects on P-12 student learning**

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their impact on learners’ learning. This means that candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

*Established in Cycle:* 2010-2011  
*Implementation Status:* Planned  
*Priority:* High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Effects on P-12 Student Learning  
- **Outcome/Objective:** Uses a variety of assessments for impact on PreK-12 students

**Implementation Description:** Candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

**Projected Completion Date:** 06/2012  
**Responsible Person/Group:** Jayoung Choi & other MSIT faculty

---

**Improving planning**

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving planning. This means that candidates will be requested to plan rigorous lessons taking into account multiple factors through course work and through internship, which will be supervised by the university supervisor and the mentor teachers.

*Established in Cycle:* 2010-2011  
*Implementation Status:* Planned  
*Priority:* High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Planning Performance  
- **Outcome/Objective:** Demonstrate Professional and Pedagogical Skills

**Implementation Description:** Candidates will be requested to plan rigorous lessons taking into account multiple factors through course work and through internship, which will be supervised by the university supervisor and the mentor teachers.

**Projected Completion Date:** 06/2012

## Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements** - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Content knowledge has been strengthened as a result of close monitoring of students' work in the courses and in the program.

**CTW Reflection 2: Assessment** - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

N/A

**CTW Reflection 3: Needs** - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

N/A

**CTW Reflection 4: Overall Reflection** - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

N/A

### ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

N/A

### ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

N/A

### ADMINISTRATIVE DEPT QUESTION 1:

Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

### ADMINISTRATIVE DEPT QUESTION 2:

What have you learned from your assessment this year (2010-2011)?

N/A

### ADMINISTRATIVE DEPARTMENT QUESTION 3:

What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

## Georgia State University

### Assessment Data by Section

2010-2011 Reading, Language, Literacy (ESOL) MEd

As of 12/13/2010 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

### Mission / Purpose

This program should be listed as Reading, Language and Literacy M.Ed. Degree with ESOL Concentration. The mission for the major in reading, language, and literacy program is to provide educators with a master's level study of literacy processes and literacy instruction for culturally diverse learners with specialization in one of three options: reading instruction, early literacy, or teaching. English as a second language. Our purpose is to develop teachers as critical inquirers in multicultural, urban settings. Our faculty are committed to preparing educators who are expected to be advocates for their students through the example of our teaching, research, mentoring and service.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development.

In our department, Middle Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice.

We strive to realize our vision of pluralism, equity and social justice where individuals have access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge for the greater good.

### Goals

G1: Become a Subject and Pedagogical Knowledge Expert
Students in the RLL MEd (ESOL) program will become experts in Reading, Language, Literacy and the Early Literacy and/or ESOL subject disciplines.

**G 2: Promote Student Language and Literacy Development**
Students in the RLL MEd (ESOL) program will apply the pedagogical content knowledge and skills to planning, managing, and evaluating instruction to promote student language and literacy development.

**G 3: Become Reflective Practitioners**
Students in the RLL MEd (ESOL) program will think critically and reflectively about his/her practice and develop appropriate dispositions with learners from diverse linguistic and cultural backgrounds.

**G 4: Become Members of Professional Communities**
Students in the RLL MEd (ESOL) program will become members of one or more professional learning communities.

### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: Demonstrate Content Knowledge in Reading (G: 1) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidates are knowledgeable about and can apply research-based practices for the teaching of phonemic awareness, phonics, vocabulary, fluency and comprehension (SBRR principles).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 2: Demonstrate Content Knowledge in ESOL (G: 1) (M: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidates will understand the major concepts, theories, and research related to the nature and acquisition of language learning and teaching.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 3: Demonstrate Content Knowledge in Culture (G: 1) (M: 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidates will understand the major concepts, theories, and research related to culture, language teaching and learning.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 5: Demonstrate Advocacy on Behalf of Learners (G: 3) (M: 5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidates will demonstrate a disposition indicating that teachers should reflect on, support and advocate for ESOL students and their families and work collaboratively to improve their learning environment.</td>
</tr>
</tbody>
</table>

### Other Outcomes/Objectives

<table>
<thead>
<tr>
<th>O/O 4: Demonstrate Student Language and Literacy Development (M: 4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidates will know, manage, and implement a variety of standards-based teaching strategies and techniques for developing and integrating English listening, speaking, reading and writing, and for accessing the core curriculum. Candidates will support ESOL students in accessing the core curriculum as they learn language and academic content together.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>O/O 6: Demonstrate Membership in Professional Communities (G: 4) (M: 6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Candidates are members of various learning and professional communities and organizations. Candidates will collaborate with and are prepared to serve as a resource to all staff, including paraprofessionals, to improve learning for all ESOL students.</td>
</tr>
</tbody>
</table>

### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: Achievement of Content Knowledge in Reading (O: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of our candidates will achieve a &quot;proficient&quot; or &quot;advanced&quot; rating on this standard. While the majority of our students met this standard, three failed to do so.</td>
</tr>
</tbody>
</table>

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrate Content Knowledge in Reading**

One hundred percent (100%) will score at the Proficient or Advanced level on this standard.

**Findings 2010-2011 - Target: Met**

100% of our candidates achieved this target. Three of the four graduates attained "advanced" with one student gaining "proficiency." The average of the scores attained is 4.75.

<table>
<thead>
<tr>
<th>M 2: Achievement of Content Knowledge in ESOL (O: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of our candidates will achieve a &quot;proficient&quot; or &quot;advanced&quot; rating on this standard. The majority of our students met this standard while 2 achieved passing.</td>
</tr>
</tbody>
</table>

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Demonstrate Content Knowledge in ESOL**

100% of our candidates will achieve advance or proficient levels in this standard.

**Findings 2010-2011 - Target: Met**

100% of our candidates attained this target. 50% of the teachers achieved "advanced" and 50% "proficient." With an average score of 4.6 more students are leaning toward "advanced."
### M 3: Achievement of Content Knowledge in Culture (O: 3)
100% of our candidates will achieve a "proficient" or "advanced" rating on this standard.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O3: Demonstrate Content Knowledge in Culture**
100% of our students will achieve an advance or proficient on this standard.

**Findings 2010-2011 - Target: Met**
100% of our students attained this target. 50% of our students attained "advanced" and 50% attained "proficiency." With the average score of 4.6 most of our students are leaning toward "advanced."

### M 4: Achievement of Instructional Practices (O: 4)
100% of our candidates will achieve a "proficient" or "advanced" rating on this standard.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O4: Demonstrate Student Language Literacy Development**
100% of our students will achieve an advanced or proficient on this standard.

**Findings 2010-2011 - Target: Met**
100% of our students met this target. However, for this year's reporting, this target attained the weakest average score of 4.25 with three students achieving "proficient" and only one student attaining "advanced."

### M 5: Achievement of Reflective Action (O: 5)
100% of our candidates will achieve a "proficient" or "advanced" rating on this standard.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O5: Demonstrate Advocacy on Behalf of Learners**
100% of our students will achieve an advanced or proficient on this standard.

**Findings 2010-2011 - Target: Met**
100% of our students attained this target. This portfolio continues to be the strongest standard for our students. This year shows that of all the standards, this one attained the highest overall average of 4.75. Three of our students attained "advanced" and one attained "proficiency."

### M 6: Achievement of Professional Communities Membership (O: 6)
100% of our candidates will achieve a "proficient" or "advanced" rating on this standard.
Source of Evidence: Portfolio, showing skill development or best work

**Target for O6: Demonstrate Membership in Professional Communities**
100% of our students will achieve an advanced or proficient on this standard.

**Findings 2010-2011 - Target: Met**
100% of our students attained this target. 50% of our students attained "advanced" and 50% attained "proficient."

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
For all candidates to attain above intermediate and for the majority to attain the highest level in our assessment measures.
In today’s world teachers of English Language Learners need to be highly qualified in all categories of our assessment measures. Therefore we will strive for the majority of our candidates to reach the highest level in our work. While the median is acceptable we will raise the bar to indicate how strongly we feel about highly qualified teachers.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Achievement of Content Knowledge in Culture
- **Outcome/Objective:** Demonstrate Content Knowledge in Culture

**Implementation Description:** These standards are set for the new cohort who will begin with us in August, 2010.

- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Dr. Tinker Sachs, Co-ordinator, MEd and Dr. Yi, Co-ordinator MAT-ESOL
- **Additional Resources:** All ESOL faculty
- **Budget Amount Requested:** $0.00 (no request)

For all candidates to attain above intermediate and for the majority to attain the highest level in our assessment measures.

In today’s world teachers of English Language Learners need to be highly qualified in all categories of our assessment measures. Therefore we will strive for the majority of our candidates to reach the highest level in our work. While the median is acceptable we will raise the bar to indicate how strongly we feel about highly qualified teachers.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):

Measure: Achievement of Instructional Practices | Outcome/Objective: Demonstrate Student Language Literacy Development

Implementation Description: These standards are set for the new cohort who will begin with us in August, 2010.
Projected Completion Date: 07/2010
Responsible Person/Group: Dr. Tinker Sachs, Co-ordinator, MEd and Dr. Yi, Co-ordinator MAT-ESOL
Additional Resources: All ESOL faculty
Budget Amount Requested: $0.00 (no request)

Goal partially met more monitoring will be done of weak students

We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.

More support for weak students

We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.

More support for weak students

We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.

More support for weak students

We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.
**Implementation Description:** We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.

**Projected Completion Date:** 05/2011

**Responsible Person/Group:** ESOL Faculty

**Additional Resources:** nil

**Budget Amount Requested:** $0.00 (no request)

### More support for weak students

We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.

**Established in Cycle:** 2009-2010

**Implementation Status:** Planned

**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Achievement of Content Knowledge in ESOL
- Outcome/Objective: Demonstrate Content Knowledge in ESOL

### More support for weak students through close monitoring.

We will provide more support for weaker students from the onset of their course work and over the duration of the program to better enable them to meet this standard.

**Established in Cycle:** 2009-2010

**Implementation Status:** Planned

**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Achievement of Professional Communities Membership
- Outcome/Objective: Demonstrate Membership in Professional Communities

### Weak students will be monitored closely.

While the majority of our students met all the goals there was still a small number who lagged behind in meeting the highest standard possible. The action plan calls for closer monitoring and more support offered so that these students too might excel.

**Established in Cycle:** 2009-2010

**Implementation Status:** Planned

**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Achievement of Content Knowledge in Reading
- Outcome/Objective: Demonstrate Content Knowledge in Reading

### Continue effective monitoring and implementation of this target.

We will continue with the current design of our program, continue updating and strengthening so that our students continue to shine in advocating for their learners and parents.

**Established in Cycle:** 2010-2011

**Implementation Status:** In-Progress

**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Achievement of Instructional Practices
- Outcome/Objective: Demonstrate Student Language Literacy Development

### Continue monitoring student progress and effective implementation strategies.

As we have been successful with our past implementation plan of effective teaching and monitoring of students’ progress, we will continue with this.

**Established in Cycle:** 2010-2011

**Implementation Status:** In-Progress

**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
Measure: Achievement of Content Knowledge in Reading | Outcome/Objective: Demonstrate Content Knowledge in Reading

Implementation Description: Continue monitoring student progress and effective implementation strategies
Responsible Person/Group: Gertrude Tinker Sachs and MSIT faculty.
Additional Resources: Nil
Budget Amount Requested: $0.00 (no request)

Continue our plan of effective monitoring and teaching.
As we were successful in attaining this target, we will continue with our implementation plan of effective monitoring of our students and effective teaching.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Achievement of Content Knowledge in Culture | Outcome/Objective: Demonstrate Content Knowledge in Culture
  
  Implementation Description: Continue our plan of effective monitoring and teaching.
  Responsible Person/Group: Gertrude Tinker Sachs and MSIT faculty.
  Additional Resources: Nil
  Budget Amount Requested: $0.00 (no request)

Continue to provide additional opportunities for students to develop in this area.
As all our students met this target, we will continue to monitor and provide additional opportunities for our students to demonstrate leadership in their professionalism through presenting at conferences and at in-school events and seeking publications for their writing.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Achievement of Professional Communities Membership | Outcome/Objective: Demonstrate Membership in Professional Communities
  
  Implementation Description: Continue to provide additional opportunities for students to develop in this area
  Responsible Person/Group: Gertrude Tinker Sachs and MSIT faculty.
  Additional Resources: Nil
  Budget Amount Requested: $0.00 (no request)

Continue with the implementation of effective teaching and monitoring of all students.
Our implementation of higher standards, good monitoring, focussed and effective teaching with pertinent assignments have helped us to realize this objective. We will continue to apply these strategies.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Achievement of Content Knowledge in Reading | Outcome/Objective: Demonstrate Content Knowledge in Reading
  
  Implementation Description: Greater clarity in our expectations from the outset and closer monitoring of this standard throughout students' term of studies.
  Responsible Person/Group: Gertrude Tinker Sachs and MSIT faculty.
  Additional Resources: Nil
  Budget Amount Requested: $0.00 (no request)

Greater clarity in our expectations from the outset and closer monitoring of this standard.
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in teaching. This means, clearly working on this standard with great clarity in our expectations from the outset and closer monitoring of this standard.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Achievement of Content Knowledge in Reading | Outcome/Objective: Demonstrate Content Knowledge in Reading

**Analysis Questions and Analysis Answers**

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A
CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?  
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?  
N/A

**ACADEMIC PROGRAM QUESTION 1:**  
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?  
Since our last assessment report, we have continued to monitor our students more closely by collecting data on our students from the outset in our classes. This closer monitoring of students was deemed necessary so that academically weak students could be identified early and given the necessary support and encouragement to successfully attain our standards. In the coming academic year we will continue to implement our close monitoring of all students especially the academically weak ones so that appropriate support may be offered.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.  
The data obtained from the assessment findings inform us of the strengths and weaknesses of our program. We are generally strong and increased vigilance and close monitoring of our students with the necessary support will help us to maintain our strength. Based on this year’s data, we know that we need to continue to be vigilant. This means, keeping an eye on our curriculum so that it is always upgraded to meet the needs of all stakeholders, monitoring our teaching so that we continue to be responsive to our students’ challenges and maintaining awareness of the societal context (at the local, national and international levels) so that we continue to prepare quality teachers to meet the needs of 21st century urban teaching contexts.

**ADMINISTRATIVE DEPT QUESTION 1:**  
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?  
N/A

**ADMINISTRATIVE DEPT QUESTION 2:**  
What have you learned from your assessment this year (2010-2011)?  
N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**  
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?  
N/A

---

**Georgia State University**  
**Assessment Data by Section**

| 2010-2011 Reading, Language, Literacy (ESOL) Online MEd | As of: 12/12/2016 04:11 PM EST | (Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request) |

**Mission / Purpose**

This program should be listed as Reading, Language and Literacy M.Ed. with ESOL Concentration - Online Degree Program (Georgia On My Line). The program's underlying framework is constructivism, which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in ESOL education. The M.Ed. major in English Speakers of Other Languages provides for master's level study in ESOL Education and Reading Education and leads to T-5 certification in ESOL(grades K-12). The program ensures that candidates gain increased subject matter knowledge and pedagogical knowledge, demonstrate success in bringing K-12 students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content. Our mission is to prepare teachers who are leaders in the field in their knowledge, teaching and dispositions so as to enable their students to attain the highest standards in their literacy, language and emotional development. Our faculty are committed to preparing educators who are expected to be advocates for their students through the example of our teaching, research, mentoring and service.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. In this online program, we strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

**Goals**

**G 1: Content Knowledge**
Students will have knowledge of reading and ESOL.

G 2: Professional and pedagogical knowledge, skills, and dispositions
Students are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching reading and English to Speakers of Other Languages in their base certifications (Grades PreK-12).

G 3: Impact on student learning
Students are highly effective educators whose teaching practices have a measurable impact on reading and the English to Speakers of Other Languages learning of their students.

Student Learning Outcomes/Objectives

SLO 1: Demonstrate Content Knowledge in ESOL (G: 1) (M: 1)
Candidates have knowledge and understanding of the major concepts, theories, methods, and research related to language acquisition and historical knowledge of theories, methods, and research on language acquisition.

SLO 2: Demonstrate Content Knowledge in Reading (G: 1) (M: 2)
Students are knowledgeable about and can apply research-based practices for the teaching of phonemic awareness, phonics, vocabulary, fluency, and comprehension.

SLO 3: Demonstrate Professional and Pedagogical Skills (G: 2) (M: 3, 4)
Students create learning environments which support ESOL students' cultural identities, language and literacy development, and content area achievement through planning and implementation of a wide range of instructional methods, and curriculum materials; view teacher-researcher models of inquiry, professional development, collaboration with colleagues as career-long efforts and responsibilities; and advocate for ESOL students and their families. Students also demonstrate the effectiveness of the P-12 students' learning of reading.

SLO 4: Demonstrate Professional Dispositions (G: 2) (M: 5)
Students demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision.

SLO 5: Uses a variety of assessments for impact on PreK-12 students (G: 3) (M: 6)
Students use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning.

Measures, Targets, and Findings

M 1: Content Knowledge in ESOL (O: 1)
Content Knowledge in ESOL through coursework is assessed.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Demonstrate Content Knowledge in ESOL
90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the English to Speakers of Other languages content area as shown in their TSLE course work.

Findings 2010-2011 - Target: Met
100% scored at the acceptable level (Score 3 or higher) and a minimum of 69% scored at the proficient level (Score 4 or higher) in the area of ESOL content knowledge as shown in their course work and the pertinent portfolio standard narrative. Med.Content Knowledge in ESOL(Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Develop-ing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates can discuss the major concepts, theories, methods, and research related to the nature and acquisition of language; discuss how this knowledge has aided you in the creation of learning environments that support the language and literacy development and content area achievement of ELLs, and demonstrate the impact of pedagogy informed by our current and historical knowledge of theories, methods, and research on language acquisition on the linguistic, literacy, and content area achievement of ELLs (both individuals and groups) through the inclusion of student work. 11 3 9 Candidates are knowledgeable about the major concepts, theories, and research related to the nature and role of culture and cultural groups and the ways in which you use those theories to construct learning environments that support ESOL students' cultural identities, language and literacy development and content area achievement. 12 6 5

M 2: Content knowledge in Reading (O: 2)
Content knowledge in Reading in coursework is assessed.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Demonstrate Content Knowledge in Reading
90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the area of reading theories and pedagogy as shown in their EDRD course work.

Findings 2010-2011 - Target: Met
100% scored at the acceptable level (Score 3 or higher) and a minimum of 95% scored at the proficient level (Score 4 or higher) in the area of reading theories and pedagogy as shown in their coursework.
M 3: Planning Performance (O: 3)

Students’ ability to plan effectively is assessed in the course work and clinical practice.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Demonstrate Professional and Pedagogical Skills

90% of candidates will demonstrate an acceptably proficient (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of planning.

Findings 2010-2011 - Target: Met

100% scored at the acceptable level (Score 3 or higher) and a minimum of 48% scored at the proficient level (Score 4 or higher) in the area of effects on P-12 Student Learning as shown on their scores of the Teacher Work Sample rubric Med. Planning performance (Summer 2010, Fall 2010, & Spring 2011) Advanced (5 pts) Proficient(4 pts) Basic (3 pts) Develop-ing (2 pts) Beginner-(1 pts) No Evidence-(0 pts) Candidates have demonstrated the ability to effectively plan for reading lessons. 11 12

M 4: Clinical Practice (O: 3)

Students’ effectiveness of lessons drawing on the learning theories and approaches is assessed in course work and clinical practice.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Demonstrate Professional and Pedagogical Skills

90% of students will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of clinical practice.

Findings 2010-2011 - Target: Met

100% scored at the acceptable level (Score 3 or higher) and a minimum of 48% scored at the proficient level (Score 4 or higher) in the area of clinical practice. Details of Action Plans for This Cycle (by Established cycle, then alpha)

Embed

Although the portfolio standards are presently embedded in the various courses through required course work and projects, the plan is to draw more attention to the standard(s) by requiring a draft of the narrative for that standard as one of the course requirements. It will be the instructor’s responsibility to read and respond to the narrative(s) until their quality warrants at least a 3 on the portfolio grading scale of 1-5, a 3 being necessary to pass the standard

- **Implementation Description:** Time for complete implementation
- **Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Frances Howard
- **Additional Resources:**
- **Budget Amount Requested:** $0.00 (no request)

**Embed standards for portfolio**
Although the portfolio standards are presently embedded in the various courses through required course work and projects, the plan is to draw more attention to the standard(s) by requiring a draft of the narrative for that standard as one of the course requirements. It will be the instructor’s responsibility to read and respond to the narrative(s) until their quality warrants at least a 3 on the portfolio grading scale of 1-5, a 3 being necessary to pass the standard.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** The action plan will be reassessed after one year.
- **Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Frances Howard
- **Additional Resources:**
- **Budget Amount Requested:** $0.00 (no request)

**Strengthening Professional Standard**
Compared to other standards in the portfolio, the reading endorsement standard 10, “students view professional development as a career long effort and responsibility” has been ranked the lowest. This result indicates that students need to be better prepared to address this standard in the course work as well as in the program. Therefore, the coordinator of the program will communicate with each of the students and course instructors to encourage the students to participate in various professional development opportunities and to document their activities throughout the program.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Responsible Person/Group:** Jayoung Choi

**Improving clinical practice**
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their teaching performance. This means that candidates’ teaching performance will be closely monitored through course work.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Improving content knowledge**

improving content knowledge. Reading

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their content knowledge in Reading. This means that expectations for them to learn content knowledge are high in the courses and their learning will be closely monitored throughout course work.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Content Knowledge in Reading | Outcome/Objective: Demonstrate Content Knowledge in Reading

Implementation Description: Expectations for them to learn content knowledge are high in the courses and their learning will be closely monitored throughout course work.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

improving dispositions

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in dispositions. This means that expectations are clearly set at the outset of the program and their overall progress is closely monitored throughout the program.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Dispositions | Outcome/Objective: Demonstrate Professional Dispositions

Implementation Description: expectations are clearly set at the outset of the program and their overall progress is closely monitored throughout the program.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

improving effects on P-12 student learning

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their impact on learners’ learning in P-12. This means that candidates will successfully learn content knowledge, on which they plan and implement rigorous lessons, which are followed by critical reflection on their teaching.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Effects on P-12 Student Learning | Outcome/Objective: Uses a variety of assessments for impact on PreK-12 students

Implementation Description: Continue our plan of effective monitoring and teaching.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

improving planning

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving planning. This means that candidates will be requested to plan rigorous lessons taking into account multiple factors through course work. This will be closely monitored by program coordinator.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Planning Performance | Outcome/Objective: Demonstrate Professional and Pedagogical Skills

Implementation Description: Candidates will be requested to plan rigorous lessons taking into account multiple factors through course work. This will be closely monitored by program coordinator.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Content knowledge has been strengthened as a result of close monitoring of students’ work in the courses and in the program.
CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?  
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?  
N/A

CTW Reflection 4: Overall Reflection - Have what been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?  
N/A

ACADEMIC PROGRAM QUESTION 1:  
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?  
N/A

ACADEMIC PROGRAM QUESTION 2:  
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g. revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.  
N/A

ADMINISTRATIVE DEPT QUESTION 1:  
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?  
N/A

ADMINISTRATIVE DEPT QUESTION 2:  
What have you learned from your assessment this year (2010-2011)?  
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3:  
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?  
N/A

Georgia State University  
Assessment Data by Section  
2010-2011 Reading, Language, & Literacy (ESOL) TEEMS MAT  
As of: 12/12/2016 04:11 PM EST  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.) 

Mission / Purpose  
The exact title of this degree program should be: Reading, Language and Literacy TEEMS ESOL MAT. Our TEEMS-ESOL program is a nontraditional approach to teacher education at the graduate level and leads to certification in Pre-K-12. It is built upon cutting edge research and best practices in preparing teachers to work in urban environments with students who are linguistically and culturally diverse. Our mission is to prepare teachers who are leaders in the field in their knowledge, teaching and dispositions so as to enable their students to attain the highest standards in their literacy, language and emotional development. Our faculty are committed to preparing educators who are expected to be advocates for their students through the example of our teaching, research, mentoring and service.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development.

In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice.

We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.
Goals

G 1: Content knowledge
Candidates are informed educators who have expert knowledge of the content needed to teach English to Speakers of Other Languages in grades PreK-12.

G 2: Professional and pedagogical knowledge, skills, and dispositions
Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching English to Speakers of Other Languages in Grades PreK-12.

G 3: Impact on student learning
Candidates are highly effective educators whose teaching practices have a measurable impact on the English to Speakers of Other Languages learning of their students.

Student Learning Outcomes/Objectives

SLO 1: Demonstrate Content Knowledge (M: 1, 2)
Candidates have knowledge and understanding of the major concepts, theories, methods, and research related to language acquisition and historical knowledge of theories, methods, and research on language acquisition (Goal 1). (Key Assessment - Content Knowledge: GACE II scores and Content Knowledge section of Final Teaching Evaluation rubric Overall Assessment Score for Content & Curriculum).

SLO 2: Demonstrate Professional and Pedagogical Skills (M: 3, 4, 5)
Candidates create learning environments which support ESOL students' cultural identities, language and literacy development, and content area achievement through planning and implementation of a wide range of instructional methods, and curriculum materials; view teacher-researcher models of inquiry, professional development, collaboration with colleagues as career-long efforts and responsibilities; and advocate for ESOL students and their families (Goal 2). (Key Assessment- Planning: Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction); Key Assessment- Clinical Practice: Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric)

SLO 3: Demonstrate Professional Dispositions (M: 6)
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision (Goal 2). (Key Assessment - Dispositions: Unit-wide Dispositions Rubric)

SLO 4: Uses a variety of assessments for impact on PreK-12 students (M: 7)
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Goal 3) (Key Assessment - Impact on Student Learning: Teacher Work Sample rubric (Section on Analysis of Student Learning)

Measures, Targets, and Findings

M 1: Content Knowledge: GACE II Scores (O: 1)
Candidate performance on GACE tests for English to Speakers of Other Languages (forms 119 and 120). * * Data for students who pursued a certification only is included.
Source of Evidence: Certification or licensure exam, national or state

Target for O1: Demonstrate Content Knowledge
GACE Scores are still pending as of 5/10/2011.

Findings 2010-2011 - Target: Met
Our passing rate for GACE tests for 2010-2011 is 100%, which indicates that our students are able to take and pass the content tests.

M 2: Content Knowledge via Coursework (O: 1)
Final Teaching Evaluation Rubric: Section on Overall Assessment Score for Content Curriculum (EDCI 7680)
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Demonstrate Content Knowledge
90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2010-2011 - Target: Partially Met
95 % of candidates in 2010-11 met the target of demonstrating adequately proficiency (Score 3) or higher levels of knowledge
in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. On the four categories for content knowledge, a minimum of 24% and a maximum of 33% of candidates scored at the effectively proficient level (Score 4).

**M 3: Planning Performance (O: 2)**

Teacher Work Sample rubric: Sections on Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction (EDCI 7680).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Demonstrate Professional and Pedagogical Skills**

90% of candidates will demonstrate an acceptably proficient (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of planning as shown in their Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction). These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2010-2011 - Target: Met**

The following results are for each area: Contextual Factors: 100% scored at the acceptable level (Score 3 or higher) and a minimum of 100% scored at the proficient level (Score 4 or higher) Learning Goals: 100% scored at the proficient level (Score 4 or higher) Assessment Plan: 94% scored at the acceptable level (Score 3 or higher) and a minimum of 69% scored at the proficient level (Score 4 or higher) Design for Instruction: 100% scored at the acceptable level (Score 3 or higher) and a minimum of 89% scored at the proficient level (Score 4 or higher).

**M 4: Clinical Practice at Midpoint (O: 2)**

Midpoint Teaching Evaluation Instrument (EDCI 7660)

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Demonstrate Professional and Pedagogical Skills**

90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Midpoint Teaching Evaluation Instrument. This level is expected by the midpoint of the practicum internship.

**Findings 2010-2011 - Target: Partially Met**

The following results are for each area on the Midpoint Teaching Evaluation Instrument: Knowledge of Students and Learning: 100% scored at the adequate level (Score 3 or higher) and a minimum of 24% scored at the effective level (Score 4 or higher) Learning Environments: 100% scored at the adequate level (Score 3 or higher) and a minimum of 38 % scored at the effective level (Score 4 or higher). Assessment: 100% scored at the adequate level (Score 3 or higher) and a minimum of 19% scored at the effective level (Score 4 or higher). Planning and Instruction: 100% scored at the adequate level (Score 3 or higher) and a minimum of 19% scored at the effective level (Score 4 or higher).

**M 5: Clinical Practice at Endpoint (O: 2)**

Student Teaching Evaluation Rubric (EDCI 7680)

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Demonstrate Professional and Pedagogical Skills**

90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at endpoint as shown on their scores of the Final Teaching Evaluation Instrument. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2010-2011 - Target: Met**

The following results are for each area on the Final Teaching Evaluation Instrument: Knowledge of Students and Learning: 94% scored at the adequate level (Score 3 or higher) and a minimum of 83% scored at the effective level (Score 4 or higher) Learning Environments: 89% scored at the adequate level (Score 3 or higher) and a minimum of 78% scored at the effective level (Score 4 or higher). Assessment: 94% scored at the adequate level (Score 3 or higher) and a minimum of 72 % scored at the effective level (Score 4 or higher). Planning and Instruction: 94% scored at the adequate level (Score 3 or higher) and a minimum of 83% scored at the effective level (Score 4 or higher) Professionalism: 100% scored at the adequate level (Score 3 or higher) and a minimum of 78% scored at the effective level (Score 4 or higher).

**M 6: Dispositions (O: 3)**

Unit-wide Dispositions Rubric

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Demonstrate Professional Dispositions**

90% of candidates will demonstrate an acceptable level of performance (Score 3) or higher levels and 40% of candidates will demonstrate an exceptional level (Score 4) in the area of dispositions as shown in their Unit-Wide Dispositions rubric. These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2010-2011 - Target: Met**

Among the five categories assessed for dispositions (Empathy, Positive View of Others, Positive View of Self, Authenticity, and Meaningful and Purposeful Vision), candidates scored 100% of candidates demonstrated an acceptable level of performance (Score 3) or higher levels and a minimum of 47% of candidates demonstrated an exceptional level (Score 4).

**M 7: Effects on P-12 Student Learning (O: 4)**

Teacher Work Sample rubric: Section on Analysis of Student Learning (EDCI 7680).
Details of Action Plans for This Cycle (by Established cycle, then alpha)

### Increase Collaboration and Communication

The PSCNCATE review of our program indicated a need for increased involvement by public school partners. In addition, faculty have noted a need to increase communication between faculty, supervisors, and cooperating teachers. In 2005-2006, efforts will be made to have at least 2 meetings with all faculty and all supervisors to discuss, evaluate, and redesign when necessary program design, syllabi, and supervision practices. In addition, all supervisors will visit practicum/supervision sites prior to the arrival of student teachers to meet with cooperating teachers and provide an overview of the program and expectations. We expect this initiative to strengthen the overall success of our interns when in the field.

**Established in Cycle:** 2005-2006
**Implementation Status:** In-Progress
**Priority:** Medium
**Implementation Description:** 2006-2007 school year
**Responsible Person/Group:** TEEMS RLL-ESOL Faculty and Supervisors: Amy Flint, Gertrude Tinker Sachs, Yan Wang and Eudes Aoulou

### Increased Focus on Assessment

Candidates in the TEEMS RLL-ESOL Program performed moderately well on “Understanding and using assessment for learning.” Evidence for demonstrating this standard was revealed in their electronic student teaching notebooks, supervisor observations and portfolio standards. To that end the TEEMS faculty will more systematically address issues of authentic assessment, rubric creation, and how assessment drives instruction. The faculty will do this in courses and in student teaching seminars.

**Established in Cycle:** 2007-2008
**Implementation Status:** In-Progress
**Priority:** High
**Implementation Description:** 2008-2009 School year
**Responsible Person/Group:** TEEMS RLL-ESOL faculty and supervisors: Gertrude Tinker-Sachs, Amy Flint, Teresa Fisher,

### Increasing content knowledge as well as professional and pedagogical skills

1. Though 95% of candidates in 2010-11 met the target of demonstrating adequately proficiency (Score 3) or higher levels of knowledge in the English to Speakers of Other languages (ESOL) content area, a minimum of 24% and a maximum of 33% of candidates scored at the effectively proficient level (Score 4) on the four categories for content knowledge. In order for our candidates to meet higher levels of knowledge (Score 4 or 5) in the ESOL content area, we plan to integrate more various kinds of learning tasks, assignments, and activities into ESOL content area courses. For instance, from fall 2010, both TSLE 7240 and 7250 have already incorporated research and practice readings and in-depth discussions about the role and use of multimodality and technology to classes. In TSLE 7250, a group of students (a cooperative learning team) are asked to make a presentation about weekly readings in a multimodal and creative manner (e.g., critiquing readings and presenting discussion questions for the class, showing video clips that are related to weekly readings, and preparing activities to learn abstract and difficult theoretical concepts). In addition, TSLE classes plan to hold a mini-conference about students' final projects or papers at the last class. By doing so, our candidates will have an opportunity to share their academic interests and experiences with the entire classmates, increase theoretical and practical knowledge about the learning and teaching of ESOL, and will be more likely to become an active member in an academic community.

2. 100% of candidates in 2010-11 met the target of demonstrating adequately proficiency (Score 3) in professional and pedagogical skills through the "Clinical Practice at Midpoint"; however, a minimum of 19% and a maximum of 38% of candidates scored at the effectively proficient level (Score 4 or higher). Thus, in order to help our candidate increase their professional and pedagogical skills, ESOL faculty members plan to provide our candidates with more opportunities to engage in discussions and reflections about four areas, (a) knowledge of students and learning, (b) learning environments, (c) assessment, and (d) planning and instruction. More specifically, in TSLE classes, our candidates are asked to observe and interview English language learners about their language acquisition, to analyze interviews for a brief report, and to investigate the context where learning may take place. In addition, in EDRD reading classes, our candidates are asked to assess pre-k-12 students' English language and literacy (especially reading) skills and conduct lessons based on their assessment of students' language and literacy skills. By doing so, our candidate are likely to increase their knowledge of professional and pedagogical skills in ESOL.

**Established in Cycle:** 2010-2011
**Implementation Status:** In-Progress
**Priority:** High
**Implementation Description:** ESOL faculty members plan to provide our candidates with more opportunities to engage in various kinds of learning tasks, assignments, and activities into TSLE content area courses and EDRD reading courses. Detailed descriptions are seen in the section "Description" above.
**Projected Completion Date:** 05/2011
**Responsible Person/Group:** Dr. Tinker Sachs, Co-ordinator MEd and Dr. Yi, Co-ordinator of our MAT-ESOL
**Additional Resources:** All ESOL faculty.
**Budget Amount Requested:** $0.00 (no request)

### Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this**
academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
Though we have not made any major change in the assessment process, we have phased portfolio assessment into the course throughout the program so that we have been able to see the progress of our candidates learning in the program.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The findings indicate that we are doing well in general, but we would like to do better. Our scores in assessment reflected some weaknesses with some of our candidates so this is an area which we have targeted for more specific instructional emphasis. All ESOL faculty members are reinforcing this area in their respective courses.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A

2010-2011 Real Estate BBA
(Ast 12/13/2010 @ 11:17 PM EST)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The BBA real estate major is designed for individuals entering careers in the real estate industry. It provides the student with the real estate knowledge and analytical skills necessary to support real property decisions in business environments as well as the requisite skills to effectively communicate them. The primary objectives of the program are for students to develop 1) sufficient industry knowledge to support real estate decision making; 2) analytical skills leading to sound equity investment recommendations, value enhancing project funding strategies, effective project development plans; and 3) persuasive business communication skills.

Student Learning Outcomes/Objectives

SLO 1: To develop creative decision-making skills (M: 2, 3, 4)
To develop creative decision-making skills associated with the real estate industry. 1) The student should be able to apply knowledge of real estate analytical tools to produce sound equity investment recommendations. 2) The student should be familiar with available real estate financing products and be able to develop financing strategies for funding real estate projects. 3) The student should be able to use knowledge of real estate development to layout efficient project development plans.

SLO 2: To develop business communication skills (M: 1)
The student should be able to communicate real estate decisions and recommendations effectively.
Measures, Targets, and Findings

**M 1: Performance on writing assignments (O: 2)**
Performance on writing assignments in writing intensive designated course
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: To develop business communication skills**
75%

**Findings 2010-2011 - Target: Met**
Average 79%. 79% of students achieved the target.

**M 2: Assignments in the real estate development course (O: 1)**
Performance on assignments in the real estate development course
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: To develop creative decision-making skills**
75%

**Findings 2010-2011 - Target: Met**
Fall semester average 87%. 100% of students met the target. Spring semester average 90%. 100% of students met the target.

**M 3: Assignments in the finance and mortgage course (O: 1)**
Performance on assignments in the finance and mortgage banking course.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: To develop creative decision-making skills**
75%

**Findings 2010-2011 - Target: Met**
Fall semester average 84%. 92% of students met the target. Spring semester average 81%. 78% of students met the target.

**M 4: Assignments in the real estate investment course (O: 1)**
Performance on assignments in the real estate investment course
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: To develop creative decision-making skills**
75%

**Findings 2010-2011 - Target: Met**
Fall semester average 83%. 83% of students met the target. Spring semester average 82%. 75% of students met the target.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Grading by some professors**
We have an instructor who graded higher than we would normally expect. Chair has addressed this issue with the instructor and will monitor progress.

  - **Established in Cycle:** 2006-2007
  - **Implementation Status:** In-Progress
  - **Priority:** Medium
  - **Implementation Description:** 8/15/07
  - **Responsible Person/Group:** Department Chair
  - **Additional Resources:** None

**CTW assessment development plan**
Develop RE4700 as a CTW course and plan to implement assessment of students in 2010-2011.

  - **Established in Cycle:** 2008-2009
  - **Implementation Status:** Planned
  - **Priority:** Medium
  - **Projected Completion Date:** 05/2011
  - **Responsible Person/Group:** Paul Gallimore

**Further exposition of learning outcomes**
The Department will identify the mission and general program goals. The Department will undertake a review to facilitate clarification of the locus of the learning outcomes and their articulation with the courses in which they are assessed. The use of percentage targets for learning outcome measured achievement will be reviewed.

  - **Established in Cycle:** 2009-2010
  - **Implementation Status:** In-Progress
  - **Priority:** High
New Learning Outcome Framework
BBA (Major in Real Estate) - Student Learning Outcome Matrix Assessment conducted using embedded examination questions or project work. Outcome Measures Criteria Assessed within (course) Outcome 1. Develop creative decision-making skills M1 Apply knowledge of real estate analytical tools to produce sound equity investment recommendations Understand investment principles. Apply knowledge of investment analysis techniques to real property. RE4160 M2 Evaluate appropriate real estate financing methods in varying circumstances Understand the methods of financing real estate. Effectively compare the types of financing instruments, RE4150 M3 Use knowledge of real estate development to layout efficient project development plans. 1. Understand design, construction, and analysis procedures 2. Appreciate the impact of changing technical and economic activities on space needs and the form and design of physical structures. RE4050 Outcome 2 Develop business communications skills M1 Formulate and communicate soundly-constructed analyses and recommendations relating to real estate decisions 1. Identify, evaluate and assemble arguments based around real estate problems 2. Persuasively communicate interpretations and solutions to real estate problems RE4700

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Implementation Description: Adopt new framework for assessment and recording of learning outcomes with progressive implementation during 2011-2012.
Projected Completion Date: 06/2012
Responsible Person/Group: Paul Gallimore

Georgia State University
Assessment Data by Section 2010-2011 Real Estate MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Master of Science in Real Estate degree is designed for individuals who are principally interested in careers in the real estate industry and those who will use real property in business decision making. It provides the student with both general and specialized real estate knowledge and analytical skills. The MSRE program is based on a synthesis of legal, physical, market and financial considerations that affect the real property decision process. The primary objectives of the program are for students to develop and integrate: (1) analytical skills for decision making associated with the real estate industry (2) leadership skills, and (3) interpersonal skills that contribute to teamwork.

Student Learning Outcomes/Objectives
SLO 1: Understand the real estate framework (M: 1, 2, 3)
Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Outcome 1. Understand the framework within which real estate markets operate and the interaction of the components of that framework

SLO 2: Apply theoretical principles and skills (M: 4, 5, 6)

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continuation of new framework implementation plan**

Review achievement targets. At present target is expressed as an average. The Department will review whether this should be modified to encompass a minimum percentage of students attaining target. This was signaled in last year’s Action Plan but not fully pursued because for a number of courses last year was the first implementation of the new framework. Support instructors in interpreting and implementing new criteria. This continues to be an action point and is considered particularly relevant where instructors are new to teaching the course.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Implementation Description:** During session
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Paul Gallimore/Department

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Rehabilitation Counseling MS**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Department of Counseling and Psychological Services and the graduate rehabilitation program are committed to excellence in the vocational preparation of individuals in a wide variety of rehabilitation and health care settings. The department prepares students for careers in human service and physical and mental health settings such as governmental agencies, rehabilitation centers, non-profit community based residential and non-residential programs, educational institutions, and private for-profit businesses. The department also prepares professionals who will provide service in managed care, case management, vocational rehabilitation, and related areas. Graduates will also have knowledge and understanding of gender, cultural, ethnic, and physical issues as they relate to people with disabilities. In addition, graduates are expected to have a service and research mission to enhance and advance the field of rehabilitation and health care for people with disabilities. Established in Cycle: 2005-2006 Active Through: 2011-2012 Entry Status: Final

**Goals**

**G 1: Successfully obtain employment**

Students, upon graduation, will obtain employment or continue their education in areas of their professional interests related to assisting people with disabilities. Disability is broadly defined to include people with physical, cognitive, and/or emotional diagnoses.

**G 2: Certification and/or licensing**

Students, upon graduation and within the time frames as established by regulation or protocol, will successfully achieve relevant licensing and/or certification(s) if applicable. In Georgia, typical licensing is as a professional counselor. Certification is typically Certified Rehabilitation Counselor (national).

**G 3: Work with clients with disabilities**

Students, upon graduation, if applicable, will be employed in settings which benefit people with cognitive, emotional and/or physical disabilities. Note: Other acceptable options are that some graduates may (1) select to continue their education, (2) delay entry into the workforce to raise a family, or (3) work in settings which may indirectly benefit people with disabilities (e.g., employment with policy or regulatory setting agencies or boards, educational institutions, etc.).

**Outcomes/Objectives**

**O/O 1: Demonstration of rehab counseling competence (G: 1, 2, 3) (M: 1, 2, 3)**

Students will demonstrate competence in applying the foundations of rehabilitation counseling to their field work, including knowledge
of rehabilitation counseling history, professional identify, the rehabilitation practice setting, medical and psychological aspects of disabilities, barriers and enhancements to case management and job placement, and ethical and legal considerations.

#### Target for O1: Demonstration of rehab counseling competence

90% pass rate on first attempt is expected

**Findings 2010-2011** - Target: **Met**

The last report by the national certification board (Commission on Rehabilitation Counselor Certification) indicates that GSU students far exceed the national average of scores (GSU ~95% vs national average ~80%).

#### Target for O2: Certification and licensing ethical code practice

90% of students will pass the comprehensive exam and 85% will pass the CRC exam on the first attempt

**Findings 2010-2011** - Target: **Met**

All students passed the masters comprehensives. The last CRCC report indicates ~95% CRC certification exam pass.

#### Target for O1: Demonstration of rehab counseling competence

Successfully complete the internship sequence as judged by faculty and site supervisor.

**Findings 2010-2011** - Target: **Met**

One student was required to repeat an internship sequence. All other students successfully completed the internship on schedule.

#### Target for O2: Certification and licensing ethical code practice

Students will demonstrate knowledge about psychological diagnosis.

**Findings 2010-2011** - Target: **Met**

The new DSM diagnosis class was implemented as expected and all students successfully achieved passing grades.

#### Target for O3: Work with clients with disabilities

All students will select an internship site that provides services to people with disabilities

**Findings 2010-2011** - Target: **Met**

All sites were approved. New sites were visited by the department's internship coordinator.
Target for O4: Counsel and consult with diverse populations
Ethical conduct foundation will be accomplished through coursework associated with the introductory class (6050). All student will pass this class.

Findings 2010-2011 - Target: Met
All students successfully completed the class.

M 3: Evaluation of work with clients with disabilities (O: 1, 3, 4)
Demonstration will be examined by (a) At least 90% of students will successfully complete an assessment of rehabilitation potential of a “real” client, and they will have adequate grades for term papers on topics of disabilities in CPS 8410 and 8420. They will also achieve satisfactory written review of performance with clients in their practicum/internship sites by the faculty instructor and on-site supervisors. (b) Written evaluation and group evaluation experiential interaction in self-disclosure and core conditions, as well as CPS 7660 (form 1005) and 6410, (c) CPS 7430 assessment project, and (e) 80% of internship supervisors will rate students as good or better.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Demonstration of rehab counseling competence
Successfully complete the practicum and internship

Findings 2010-2011 - Target: Met
All students successfully completed the requirements.

Target for O3: Work with clients with disabilities
Successful completion by all students of helping skills, group and internship classes

Findings 2010-2011 - Target: Met
One student was required to complete additional work with regard to role playing by submitting supplemental video examples.

Target for O4: Counsel and consult with diverse populations
Evaluation will occur through site practicum/internship class supervisors and faculty. All students will successfully accomplish this goal.

Findings 2010-2011 - Target: Met
One student was required to engage in additional internship experience before graduating from the program.

M 4: Counsel and consult with diverse populations (O: 3, 4)
Students will demonstrate effective counseling and consulting with diverse populations including disability, culture, ethnicity, gender, race, etc.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O3: Work with clients with disabilities
Students will engage in rehabilitation counseling with “clients” who receive services from community providers.

Findings 2010-2011 - Target: Met
Evidence was accumulated through practicum and internship classes as well as an evaluation of person with a disability with oversight by a professional partner arranged by the assessment of rehabilitation potential professor.

Target for O4: Counsel and consult with diverse populations
Students will obtain the foundation for this measure by taking and passing at least one class relating to cultural and diversity. Additionally, practice will be accomplished through role play in helping skills related classes and practicum/internship classes.

Findings 2010-2011 - Target: Met
Students successfully completed a class on diversity. With regard to helping skills, one student was required to complete extra work. With regard to practicum/internship, one student was required to complete extra hours of practice.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continued accreditation
The program will meet accreditation requirements and a community board of advisors will be included in the rehabilitation program planning.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
| Measure: Certification tests and major exams | Outcome/Objective: Certification and licensing ethical code practice

Implementation Description: Continued accreditation by CORE and participation by board of advisors. This is an on-going process.
Projected Completion Date: 11/2012
Responsible Person/Group: Roger Weed

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
| Measure: Certification tests and major exams | Outcome/Objective: Certification and licensing ethical code practice

Implementation Description: Continued accreditation by CORE and participation by board of advisors. This is an on-going process.
Projected Completion Date: 11/2012
Responsible Person/Group: Roger Weed
Ethics class/DSM Training
The program evaluation from the past year has detected that the ethics training in infused in several classes and several areas of overlap exist. We have also noted that diagnostic training (DSM) could be enhanced. This issue was discussed with the rehabilitation advisory board and over the next year there are plans to enhance ethics training in the introductory class (6050), eliminate the “stand alone” ethics class and require the DSM training class.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Reviews and assessments of ethical conduct | Outcome/Objective: Certification and licensing ethical code practice

Implementation Description: Initiate the application to academic affairs.
Projected Completion Date: 07/2009
Responsible Person/Group: Roger Weed, Lindy Parker, Debbie Berens

Reviews of student competence
The coordinator of the program will solicit information from faculty of classes designed for demonstration of competence and site supervisors for internships.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 05/2009
Responsible Person/Group: Roger Weed

Reviews of student competence with clients
The assessment project and internship evaluations will be reviewed for adequacy of practical application of educational outcomes.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: “Real” clients for assessment project and internship sites.
Responsible Person/Group: Roger Weed and Joe Hill

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Some learning outcomes have been updated or slightly modified. The adding of DSM diagnosis, as a required class, has been implemented. The introductory class has been revised to specifically enhance the education on the topic of ethics.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Curriculum changes were planned during the pervious cycle and implemented during this cycle. No additional changes appeared to be required. The occasional student who does not meet expectations has been required to completed extra work or participate in remedial education.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?

How the department used the results rests with the Chair. In general, the program utilizes questionnaires of graduates and off-campus supervisors as well as a community advisory board to remain contemporary and relevant. Minor chnages are on-going with major academic changes planned annually (such as the previous year’s addition of the DSM diagnosis class as well as a revised introductory class to include additional content on ethics).

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?

Basically that the rehabilitation program is an asset to Georgia State University and that we are providing quality instruction that is valued by employers. Even in this challenging economy graduates are able to find suitable employment.

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

The primary strategy is for instructors in the rehabilitation program is to remain vigilant to needs and problems as they arise (a well established tradition). Personally I am satisfied with the program planning and operation. Our accreditation is secure and employers have expressed accolades regarding our graduates.
**Mission / Purpose**

In the aftermath of the September 11th attacks, the importance of Religious Studies as a discipline was widely acknowledged by legislators and citizens across the nation. While resistant to any notion that the academic study of religion should be reduced to, or even motivated primarily by, an interest in religiously sanctioned violence, the Department of Religious Studies shares the conviction that educated students in a university with a strong commitment to the Humanities need to learn about religious beliefs, practices, and motivations in a scholarly and dispassionate educational setting. The Department also is committed to the view that such students need to gain this knowledge, not from those who are already and necessarily committed to a particular set of beliefs and practices, but rather from comparative scholars who are trained in the histories, languages, and practices of more than one religion. Public universities are one of the few public settings in which such education about religion (rather than “religious education” itself) is currently available. Given this fact, it is perhaps not surprising that Religious Studies has enjoyed remarkable national growth in the past decade. But it is important to note that the field has been growing for decades, with new degrees (graduate and/or undergraduate) in Religious Studies being established during the last twenty years at such schools (to use the Southeast as an example) as the University of Georgia, Florida State University, Florida International, University of South Florida, University of Alabama at Birmingham, Clemson University, Duke University, UNC-Greensboro and Wilmington, University of Tennessee at Knoxville, among others. Georgia State University’s diverse student body and the University’s Strategic Plan (with its emphasis on globalization, international study abroad opportunities, and multi-cultural outreach in the city of Atlanta) contribute to making its Religious Studies Program absolutely essential for the realization of its larger aims and aspirations. Although it would be an overstatement to say that University projects like the new programs in Middle East Studies, Jewish Studies, and Asian Studies would not exist without Religious Studies participation, it is safe to say that these programs would be far weaker. The Department of Religious Studies is currently one of three participating members of the 2nd Century Initiative on Transnational Violence and its faculty are important contributors to the thriving intellectual life of this University.

In order to contribute to the realization of its curricular mission, the Department of Religious Studies offers an impressive range of courses in service to the General Humanities curriculum in the College of Arts and Sciences, as well as its own thriving undergraduate and masters programs. Long admired for the quality of its instructional efforts, the Department is particularly interested in promoting a better factual knowledge base, more robust critical thinking skills, and the essential experience of developing high quality independent research projects for all students.

**Goals**

**G 1: Knowledge of the Academic Study of Religion**

It is expected that students majoring in Religious Studies will acquire appropriate knowledge in each of the following areas (parenthetic lists are suggestive, not inclusive or mandatory): 1) Religious Traditions of the World (Hinduism, Buddhism, Confucianism, Daoism, Shinto, Mesoamerican religion, Greek and Roman religion, Judaism, Christianity, Islam) 2) Foundational Thinkers in the World Religions (Laozi, Confucius, Buddha, Homer, Sophocles, Abraham, Jesus, Paul, Muhammad) 3) Contemporary Religious Thinkers (Gandhi, Suzuki, Maimonides, Buber, Augustine, Aquinas, Luther, Malcolm X, Martin Luther King Jr, Nagarjuna, Shankara, etc.) 4) Major Theorists in the Study of Religion (Mircea Eliade, W.C. Smith, Sigmund Freud, William James, Emile Durkheim, Karl Marx, Max Weber, Mary Daly, Mary Douglas, Jonathan Z Smith, Clifford Geertz, etc.) 5) Critical Theoretical Methods and Theories (historical, anthropological, philological, philosophical, sociological, psychological, ethical, feminist, etc.) 6) Fundamental Technical Categories (sacred space and time, cosmology, myth, ritual, sacrifice, scripture, hermeneutics, ethics, deities, etc.) 7) Comparative Themes (ethics, mysticism, sex and gender, death, politics, festivals, war and violence, etc.) 8) Historical Place of Religion in Culture (non-textual expression, popular religion/culture, pluralism and exclusivism, syncretism, art and music, etc.)

**G 2: Technical Skills in the Academic Study of Religion**

It is expected that students majoring in Religious Studies will acquire appropriate technical skills in the following areas: 1) Reading Critically (outlining arguments fairly, identifying conclusions charitably, contextualizing authors and texts, detecting vagueness/ambiguity, etc.) 2) Thinking and Writing Critically (establishing premises and reaching conclusion, avoiding fallacies, utilizing proper grammar/diction/usage, etc.) 3) Conducting Effective Research in Religious Studies (using libraries and on-line resources, evaluating scholarship, scholarly synthesis, etc.)

**Student Learning Outcomes/Objectives**

**SLO 1: General Knowledge of Religious Histories and Traditions (M: 2, 4)**

The Department of Religious Studies aims to promote students’ ability to extrapolate a general working knowledge of the great historical religious traditions, among them Judaism, Christianity, Islam, Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Daoism, Shinto.

**SLO 3: General Knowledge of Major Religious Thinkers, Modern Theorists of Religion and Comparative Methods (M: 1, 2, 4)**

The Department of Religious Studies aims to promote students’ ability to understand, contextualize, and explain the thought of major religious thinkers within a specific tradition, as well as the major representatives of the modern comparative study of such religions.

**SLO 8: Skills in Critical Thinking and Expression (M: 3, 4)**

The Department of Religious Studies aims to promote students’ ability to think critically, and to write persuasively, within the academic study of religion.

**Other Outcomes/Objectives**

**O/O 9: Experience in Conducting Scholarly Research in Comparative Religion (M: 3, 4)**

The Department of Religious Studies aims to promote students’ ability to conduct effective research in the comparative academic study of many of the world’s religions.
### Measures, Targets, and Findings

#### M 1: Evaluating Capstone Papers (Theoretical) (O: 3)

Each graduating major is solicited to submit a capstone paper from an upper-level Departmental course from his or her final year in residence. Each paper is subsequently evaluated by members of the Assessment Committee (normally consisting of three tenured/tenure-track faculty members) with regard to theoretical content, i.e., knowledge of critical theory in the study of religion, scholarly categories, comparative method, etc.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O3: General Knowledge of Major Religious Thinkers, Modern Theorists of Religion and Comparative Methods**

75% of faculty evaluations for historical content ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for historical content ranking 3.3 or higher.

**Findings 2010-2011 - Target: Met**

87% of graduating seniors submitted capstone papers in this cycle. 100% of these papers received a score of 2.7 or higher from the Assessment Committee, and 66% received a score of 3.3 or higher.

#### M 2: Evaluating Capstone Papers (Historical) (O: 1, 3)

Each graduating major is solicited to submit a capstone paper from an upper-level Departmental course from his or her final year in residence. Each paper is subsequently evaluated by members of the Assessment Committee (normally consisting of three tenured/tenure-track faculty members) with regard to historical content, i.e., knowledge of religious history, religion in its social and cultural contexts, comparative data, etc.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: General Knowledge of Religious Histories and Traditions**

75% of faculty evaluations for historical content ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for historical content ranking 3.3 or higher.

**Findings 2010-2011 - Target: Met**

87% of graduating seniors submitted capstone papers in this cycle. 80% of these papers received a score of 2.7 or higher from the Assessment Committee, and 50% received a score of 3.3 or higher.

**Target for O3: General Knowledge of Major Religious Thinkers, Modern Theorists of Religion and Comparative Methods**

75% of faculty evaluations for historical content ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for historical content ranking 3.3 or higher.

**Findings 2010-2011 - Target: Met**

87% of graduating seniors submitted capstone papers in this cycle. 80% of these papers received a score of 2.7 or higher from the Assessment Committee, and 50% received a score of 3.3 or higher.

#### M 3: Evaluation of Capstone Papers (Technical Skills) (O: 8, 9)

Each graduating major is solicited to submit a capstone paper from an upper-level Departmental course from his or her final year in residence. Each paper is subsequently evaluated by members of the Assessment Committee (normally consisting of three tenured/tenure-track faculty members) for evidence of technical research and writing skills.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O8: Skills in Critical Thinking and Expression**

75% of faculty evaluations for technical skills ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for technical skills ranking 3.3 or higher.

**Findings 2010-2011 - Target: Met**

87% of graduating seniors submitted capstone papers in this cycle. 100% of these papers received a score of 3.3 or higher.

**Target for O9: Experience in Conducting Scholarly Research in Comparative Religion**

75% of faculty evaluations for technical skills ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for technical skills ranking 3.3 or higher.

**Findings 2010-2011 - Target: Not Reported This Cycle**

86% of graduating seniors submitted capstone papers in this evaluation cycle, but none of these submissions constituted a full-fledged research paper amenable to evaluation under this rubric.

#### M 4: Evaluating Student Exit-Surveys (Numerical) (O: 1, 3, 8, 9)

Each graduating major is solicited to fill out and submit an exit survey, where the respondent is asked to assess the effectiveness of the Religious Studies major with regard to specific learning outcomes, i.e., understanding the nature and varieties of religion, familiarity with critical theory and major theorists, ability to conduct research and to write critically, etc. Students rank goals on a five-point scale, with 1 being the lowest, and 5 being the highest ranking.

Source of Evidence: Exit interviews with grads/program completers

**Target for O1: General Knowledge of Religious Histories and Traditions**

90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.
### Findings 2010-2011 - Target: Partially Met

Only 11% of graduating seniors filled out an exit questionnaire, making assessment in this cycle more difficult. Student surveys averaged 4.0 in the assessment of their historical preparation, and 5.0 in the assessment of their comparative skills. Specific mention was made of a perceived shortage of coursework in Buddhism.

#### Target for O3: General Knowledge of Major Religious Thinkers, Modern Theorists of Religion and Comparative Methods

90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

### Findings 2010-2011 - Target: Not Met

Only 11% of graduating seniors filled out an exit questionnaire, making assessment in this cycle more difficult. Student surveys averaged 3.0 in the assessment of their theoretical preparation, and here once again specific mention was made of a perceived shortage of coursework in theoretical aspects of the study of Buddhism.

#### Target for O8: Skills in Critical Thinking and Expression

90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

### Findings 2010-2011 - Target: Met

Only 11% of graduating seniors filled out an exit questionnaire, making assessment in this cycle more difficult. Student surveys averaged 5.0 in the assessment of their comparative skills, and 5.0 in the assessment of their technical training and the enhancement of their critical skills.

#### Target for O9: Experience in Conducting Scholarly Research in Comparative Religion

90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Long-Range Curricular Planning

With the addition of several new faculty over the last two years, and more likely forthcoming, the Department will develop a comprehensive, but flexible plan for curricular offerings over the next several years.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 12/2010
- **Responsible Person/Group:** Kathryn McClymond, Jonathan Herman, Curriculum Committee

#### Modifying Assessment Criteria

The Assessment Committee will modify the existing Assessment procedure so that individual measures match more precisely with specific learning objectives.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 02/2010
- **Responsible Person/Group:** Jonathan Herman, Assessment Committee

#### Research and CTW Courses

The Department will take deliberate steps to provide a significant research component in at least one of the required CTW courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Tim Renick

#### Comparative Religion

Reviewing curriculum to determine if sufficient comparative courses are offered within each cycle.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** Low
- **Projected Completion Date:** 04/2011
- **Responsible Person/Group:** Kathryn McClymond

#### Research in Religious Studies

Continued monitoring that majors have sufficient exposure to research methods in department’s signature courses; continued integration of research component into CTW courses.
Student Learning Outcomes/Objectives

Goals

G 1: Fluency in the Academic Study of Religion
It is expected that students majoring in Religious Studies achieve fluency in the academic study of religion, so that they may go on to doctoral work in the field, teach religious studies in a community college or high school, or bring what they learned here to bear on whatever field they pursue. This entails basic knowledge of the religious traditions of the world (Hinduism, Buddhism, Confucianism, Taoism, Shinto, African Religion, Judaism, Christianity, Islam), fundamental historical religious figures (Laozi, Confucius, Buddha, Abraham, Jesus, Paul, Mohammed) major religious thinkers (Gandhi, Suzuki, Maimonides, Buber, Augustine, Aquinas, Luther, Malcolm X, King, Nagarjuna, Shankara, etc.), major theorists in the study of religion (Elaidé, W.C. Smith, Freud, James, Durkheim, Marx, Weber, Daly, Douglas, J.Z. Smith, etc.) representative critical theories and methods (historical, anthropological, philosophical, sociological, psychological, ethical, feminist, etc.), fundamental technical categories (sacred space and time, cosmology, myth, ritual, sacrifice, scripture, hermeneutics, ethics, deities, etc.), common comparative themes (ethics, mysticism, gender issues, death, politics, festivals, war and violence, etc.), and the historical role of religion in culture (non-textual expression, popular religion/culture, pluralism and exclusivism, syncretism, art and music, etc.).

Student Learning Outcomes/Objectives

SLO 1: Knowledge of History of Religions (M: 1, 5)
Ability to understand the role religion plays historically in both popular and elite culture, to extrapolate a general working knowledge of at least four religious traditions and to synthesize a detailed knowledge of two traditions, e.g., Judaism, Christianity, Islam, Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Daoism, Shinto.

SLO 2: Knowledge of Theories of Religion (M: 2, 5)
Ability to explain, critique, and apply principles of at least three theorists or thinkers in the academic study of religion, and to demonstrate fluency in major terms and concepts in the field.
### SLO 3: Methodological Approaches to Religion (M: 4, 5)
Ability to understand and apply at least two critical and methodological approaches to the study of religion.

### SLO 4: Comparative Approaches to Religion (M: 5)
Ability to compare two or more traditions with regard to at least one specific theme.

### SLO 5: Reading Scholarly Texts (M: 3, 5)
The ability to read scholarly texts critically and with comprehension.

### SLO 6: Research in Religious Studies (M: 1, 5)
The ability to conduct effective scholarly research in religious studies.

### Other Outcomes/Objectives

**O/O 7: Critical Thought and Expression (M: 3, 5)**
The ability to construct clearly written arguments and commentary.

### Measures, Targets, and Findings

**M 1: Historical Content Evaluation of M.A. Theses (O: 1, 6)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee assigns each thesis a numerical grade (4.0 scale) on mastery of historical content. Moreover, each faculty member makes specific written comments evaluating the student's command of this content.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Knowledge of History of Religions**
75% of faculty evaluations scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**Target for O6: Research in Religious Studies**
75% of faculty evaluations of historical content scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 2: Theoretical Content Evaluation of M.A. Theses (O: 2)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee assigns each thesis a numerical grade (4.0 scale) on mastery of theoretical content. Moreover, each faculty member makes specific written comments evaluating the student's command of this content.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O2: Knowledge of Theories of Religion**
75% of faculty evaluations of theoretical content scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 3: Critical Reading/Writing Evaluation of M.A. Thesis (O: 5, 7)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee produces written comments detailing the extent to which the thesis demonstrates the student’s ability to engage in critical reading, thinking, and writing in the academic study of religion. Moreover, each faculty member makes specific written comments evaluating the student's command of these skills.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O5: Reading Scholarly Texts**
75% of faculty evaluations on critical skills scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**Target for O7: Critical Thought and Expression**
75% of faculty evaluations scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 4: Methodological Evaluation of M.A. Thesis (O: 3)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee assigns each thesis a numerical grade (4.0 scale) on the ability to apply different methodological approaches to the study of religion. Moreover, each faculty member makes specific written comments evaluating the student's command of these skills.

Source of Evidence: Capstone course assignments measuring mastery
Target for **O3: Methodological Approaches to Religion**
75% of faculty evaluations on methodological issues scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 5: Evaluating Student Exit-Surveys (O: 1, 2, 3, 4, 5, 6, 7)**
Each graduating MA student is solicited to fill out and submit an exit survey, where the respondent was asked to assess the effectiveness of the Religious Studies masters degree with regard to specific learning outcomes, i.e., understanding the nature and varieties of religion, familiarity with critical theory and major theorists, ability to conduct research and write critically, etc. Students ranked goals on a five-point scale, with 1 being the lowest, 5 being the highest ranking. Moreover, students were asked to offer comments specifically addressing the strengths and weaknesses of the program, advise for future graduate students, and so forth.

Source of Evidence: Exit interviews with grads/program completers

Target for **O1: Knowledge of History of Religions**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O2: Knowledge of Theories of Religion**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O3: Methodological Approaches to Religion**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O4: Comparative Approaches to Religion**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O5: Reading Scholarly Texts**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O6: Research in Religious Studies**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O7: Critical Thought and Expression**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Monitoring Thesis Research**
The Graduate Committee will implement changes in the process by which students conceptualize and research their theses, mandating more familiarity with research techniques, library resources, and alternative methodologies.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 02/2010
- **Responsible Person/Group:** Vincent Lloyd, Curriculum Committee

**New Assessment Criteria**
The Assessment Committee will modify the existing Assessment procedure so that individual measures match more precisely with specific learning objectives.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 03/2010
- **Responsible Person/Group:** Jonathan Herman, Vincent Lloyd, Curriculum Committee

**Scheduling Graduate Seminars**
The Department will develop a long-range plan for developing and staffing a diverse range of appropriately configured graduate-only seminars.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 02/2011
- **Responsible Person/Group:** Kathryn McClymond, Vincent Lloyd, Curriculum Committee
Theory and Method
Continue integrating theoretical and methodological components into graduate-only seminars, in addition to the required course in advance theory and method.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Theoretical Content Evaluation of M.A. Theses | Outcome/Objective: Knowledge of Theories of Religion
Projected Completion Date: 04/2011
Responsible Person/Group: Kathryn McClymond

Theory and Method
Implementation of more theory-methodology oriented courses.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Historical Content Evaluation of M.A. Theses | Outcome/Objective: Research in Religious Studies
Measure: Methodological Evaluation of M.A. Thesis | Outcome/Objective: Methodological Approaches to Religion
Projected Completion Date: 04/2011
Responsible Person/Group: Molly Bassett

Thesis Timeline
Establish a prospectus/thesis timeline, with specific benchmarks, clarification of methodology, research plan, etc.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Critical Reading/Writing Evaluation of M.A. Thesis | Outcome/Objective: Reading Scholarly Texts
Responsible Person/Group: Molly Bassett

Georgia State University
Assessment Data by Section
2010-2011 Respiratory Therapy BS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Bachelor of Science Program in Respiratory Therapy major is designed for students entering the respiratory therapy profession. Our mission is to provide a rigorous and comprehensive undergraduate education in the science of respiratory care that results in graduates who have the knowledge and analytical skills necessary to deliver respiratory care to patients who have breathing or other cardiopulmonary disorders.

Goals
G 1: Critical and Ethical Thinkers
To develop a deep and broad understanding of respiratory care content based on sound clinical decision making.

G 2: Professional Issues in Respiratory Care
To be aware of and concerned about being well-informed regarding the issues and factors affecting the professional practice of respiratory care.

G 3: Positions of Leadership
Students are prepared for leadership positions in healthcare settings where respiratory care is practiced

Student Learning Outcomes/Objectives
SLO 1: Communication Skills (G: 1) (M: 1, 2)
In order to discern that our students are critical and ethical thinkers, students will be able to: 1. communicate orally by presenting a patient case study to the faculty and their peers at least once while in the program which is logically organized and based on data found in medical records and/or oral interviews. 2. communicate in writing using medical terminology by addressing patient care plans to improve patient outcomes.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate
comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
3. Outcomes of educational support services (3.3.1.3)

**Strategic Plan Associations**

1. Increase the level of scholarship support for undergraduate students.
2. Establish a Student Success Center.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
5.1 Create an International Consortium of Universities for Critical Issues Challenging Cities.

**SLO 2: Critical Thinking in Respiratory Therapy (G: 1, 2, 3) (M: 1, 3, 4)**

Students are to think logically and in meaningful ways so that their actions reflect their critical thinking.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.1 Increase the level of scholarship support for undergraduate students.
1.2 Establish a Student Success Center.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.

**SLO 3: Registry Credential (G: 3)**

To prepare for leadership positions in healthcare settings, students will demonstrate mastery of advanced level respiratory care knowledge.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.4 Enhance supporting infrastructure for the conduct of research.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

---

**Measures, Targets, and Findings**

**M 1: Case Presentation (O: 1, 2)**

Case presentations allow students to actively learn in their discipline while solving problems like the ones they will encounter in the real world when they graduate. This requires students to draw upon their abilities to manage time while synthesizing information by organizing relevant information and discarding information that is not useful.

To demonstrate mastery of this goal, all students will successfully orally present a case study to the faculty and students at least once during the clinical seminar as part of their clinical practice rotations.

Source of Evidence: Presentation, either individual or group

**Target for O1: Communication Skills**

All students will achieve minimum grade of 90% on their assigned oral case presentation based on standard rubric used by the faculty.

**Findings 2010-2011 - Target: Partially Met**

During fall semester 2010, 33 students were evaluated during clinical seminar. Grades ranged from 86 to 99. 70 is the highest score based on rubric used by faculty but is calibrated to 0 to 100 score for grading purposes. Average score was 93 with 27 out of 32 (84%) meeting the target score. For spring semester 2011, 14 students out of 34 (86%) achieved 90% or higher. Scores ranged from 80 to 100 with the average score = 91%.

**M 2: Capstone Course (O: 1)**

RT 4085 is a critical thinking through writing capstone course that concentrates on a series of reflective assignments designed to allow the senior student to demonstrate improvement in clinical thinking and writing skills.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Communication Skills**

Students will achieve a passing grade on a written assignment of a professional issue during RT 4075 based on approved rubric by CTW.

**Findings 2010-2011 - Target: Met**

Student scores on a professional issue paper ranged from 75 to 97 after three revisions allowed. Lowest grades improved from 75 to 80.

**M 3: NBRC Entry Level CRT (O: 2)**

All students must successfully pass the National Board for Respiratory Care (NBRC) Certified Respiratory Therapist exam to demonstrate cognitive mastery of entry level skills. This exam allows for licensure in the State of Georgia. Provided in web-based format. For this assessment, evidence will focus on one competency from the exam which on the test matrix is: Maintain Records and Communicate Information. This competency includes the following: record therapy and results using conventional terminology as required by the health care setting and/or regulatory agency; specify therapy administered which includes date, time, frequency of therapy, medication, and ventilatory data; note and interpret patient's response to therapy, effects of therapy, adverse reactions, patient's subjective and objective response to therapy; verify computations and note erroneous data, auscultatory findings, cough and sputum production and characteristics, vital signs, and pulse oximetry, heart rhythm, capnography readings.

Source of Evidence: Certification or licensure exam, national or state

**Target for O2: Critical Thinking in Respiratory Therapy**
90% of students will score 80% of higher on this competency.

### Findings 2010-2011 - Target: Partially Met

33 of 33 students (100%) passed the CRT on first attempt. From review of the score report, RT students average score on this competency was 4.21 while the national average was 3.28. The highest possible scores was 5.0. For this competency, 26 of 33 (79%) students scores 80% or higher.

### M 4: NBRC Written Registry Exam (O: 2)

All students must successfully pass the National Board for Respiratory Care (NBRC) Written Registry Exam to demonstrate cognitive mastery of advanced-level skills. Provided in web-based format. For this assessment, evidence will focus on one competency from the exam which on the test matrix is: Maintain Records and Communicate Information. This competency includes the following: record therapy and results using conventional terminology as required by the health care setting and/or regulatory agency; specify therapy administered which includes date, time, frequency of therapy, medication, and ventilatory data; note and interpret patient’s response to therapy, effects of therapy, adverse reactions, patient’s subjective and objective response to therapy; verify computations and note erroneous data, auscultatory findings, cough and sputum production and characteristics, vital signs, and pulse oximetry, heart rhythm, capnography readings.

Source of Evidence: Standardized test of subject matter knowledge

### Target for O2: Critical Thinking in Respiratory Therapy

90% of students will score 80% or higher on the WRRT matrix item III.A.1 as determined by the National Board of Respiratory Care.

### Findings 2010-2011 - Target: Partially Met

32 of 33 or 97% passed the WRRT on the first attempt. From review of the score report, the average score on this competency was 2.97 with the national average at 2.61. For this competency, 4.0 was the highest possible score. 25 of 33 (76%) students scored 80% or higher.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Capstone course

Will continue to monitor.

Established in Cycle: 2008-2009  
Implementation Status: In-Progress  
Priority: Medium

Relationships (Measure | Outcome/Objective):  
Measure: Capstone Course | Outcome/Objective: Communication Skills

Projected Completion Date: 12/2010  
Responsible Person/Group: Instructor for RT 4085  
Additional Resources: GTA as a CTW assistant for office hours and other assistance for students.  
Budget Amount Requested: $2,000.00 (recurring)

### Case presentation

Will continue to refine standards. Rubric added for review. RT Seminar Oral Presentation of Case Study  
Student ____________________________  
Disease ____________________________  
Semester ____________________________  
CATEGORY EXCELLENT 10 Points

Good 9 Points Fair 8 Points POOR 7 Points Power Point Presentation Score ________  
Presentation is clear, concise and easily follows oral presentation. Does not deviate from content. Follows PowerPoint presentation majority of the time with minimal deviation from content. Follows PowerPoint presentation most of the time with some deviations from content. Fails to follow PowerPoint presentation with excessive deviation from content. Visual Aids Score ________  
All illustrations such as diagrams, tables, charts, x-rays, and other illustrations are appropriate for content presentation. Most illustrations such as diagrams, tables, charts, x-rays, and other illustrations are appropriate for content presentation. Some were inappropriate. Most illustrations such as diagrams, tables, charts, x-rays or illustrations were inappropriate for content presentation. Organization Score ________  
Excellent flow and transition from topic to topic. Very organized and refers to slides or other notes appropriately. Does not read slides verbatim. Good flow and transition from one topic to topic. Organized and refers to slides or other notes appropriately. Does not read from slides most of the time. Some difficulty with flow and transition from topic to topic. Disorganized and refers to notes inappropriately. Reads verbatim from the slides most of the time. Poor flow from topic to topic. Very disorganized and reads constantly from notes or slides. Reads verbatim from the slides all the time. Content Knowledge Score ________  
Demonstrates full understanding of the topic. Answers majority of questions correctly. Demonstrates some understanding of parts of the topic. Answers most questions correctly. Does not seem to understand the topic very well. Unable to answer questions correctly. Presentation and Professionalism Score ________  
Is professional in delivery; looks confident; establishes eye contact. Presents with clear voice and excellent pronunciation. Everyone can hear the presentation. Well dressed. Slightly nervous and less confident. Establishes eye contact. Presents with clear voice and good pronunciation and hearing presentation. Well dressed. Seems nervous. Establishes eye contact but not confident. Some difficulty with precise pronunciation and hearing presentation. Well dressed. Very nervous, does not make eye contact and lacks confidence. Difficult to understand presentation with imprecise pronunciation and cannot hear presentation. Inappropriate dress. Spelling/Abbreviations Score ________  
No misspelled words and/or incorrect abbreviations. Few misspelled words and/or incorrect abbreviations. Several misspelled words and/or incorrect abbreviations. Numerous misspelled words and/or incorrect abbreviations. References Score ________

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Respiratory Therapy MS**

*As of: 12/12/2016 04:11 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

In support of the mission of Georgia State University and the Brydine F. Lewis School of Nursing and Health Professions, the purpose of the Master of Science degree in Health Sciences with a concentration in Respiratory Therapy is to expand the knowledge of current and future respiratory therapists who will be the leaders and educators in the profession of respiratory care.

**Goals**

**G 1: Critical and ethical thinkers**

To develop a deep and broad understanding of respiratory care content based on sound clinical decision making.

**G 2: Knowledge of professional issues in respiratory care**

To be aware of and concerned about being well-informed regarding the issues and factors affecting the professional practice of respiratory care.

**G 3: Leadership and educational positions**

Students are prepared for leadership positions in health care settings or for educational positions in academic institutions.

**Student Learning Outcomes/Objectives**

**SLO 1: Communication in respiratory care (M: 1, 2)**

In order to discern that our students are critical and ethical thinkers, our students will be able to: 1) communicate orally by presenting a patient case study to the faculty and their peers at least once while in the program which is logically organized and based on data found in medical records and/or oral interviews OR through debates on issues affecting the practice of respiratory care. 2) communicate in writing to improve critical thinking skills in the discipline through problem solving by addressing issues affecting the practice of respiratory care.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
3 Outcomes of educational support services (3.3.1.3)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 2: Critical thinking in the application of research (M: 2)**

An entry-level understanding in the design, interpretation and ethical conduct of research.

**SLO 3: Understanding Health Policy in the United States (M: 3)**

Evaluate contemporary principles in health policy in the US and other countries to better understand the essential components of delivering health services.

**Measures, Targets, and Findings**

**M 1: Understanding advanced topics in respiratory care (O: 1)**

Students will be able to demonstrate their knowledge through debates, case presentations or projects presented orally or through end-of-semester writing assignments in the core master’s curriculum (RT 6030, 7030, 7095).

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Communication in respiratory care**

All graduate students must complete oral presentation assignments in core master’s curriculum.

**Findings 2010-2011 - Target: Met**

All current entry-level integrated master’s students have completed oral presentations as required in the core curriculum.

**M 2: Demonstrate appreciation for the research process (O: 1, 2)**

Either through thesis or graduate project, oral communication and writing skills competence by faculty evaluation during thesis defense or presentation of project.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Communication in respiratory care**

Successful oral defense of thesis study to thesis committee or directed study project to faculty members.

**Findings 2010-2011 - Target: Met**

Six students completed thesis research successfully.

**Target for O2: Critical thinking in the application of research**

At least 75% of graduate students will complete a thesis as opposed to a directed studies juried project.

**Findings 2010-2011 - Target: Not Met**

Of total of 14 MS students in 2010-2011 academic year, 8/14 or 57% completed the thesis option.

**M 3: Understanding Health Policy in the US (O: 3)**

Students will show mastery of contemporary concepts by participation in class discussions, debates, and successful completion of final written exam in HHS 8000 - Trends affecting Health Policy.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Understanding Health Policy in the United States**

Master’s students will complete the final exam in HHS 8000 which is a comprehensive assessment of Health Policy in the US with at least a score of 85% or higher.
Findings 2010-2011 - Target: Met

Twelve students successfully completed HHS 8000 with scores higher than 85%. Scores ranged from 86 - 99.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Rubric Development
Continue development of rubric for evaluation of thesis proposals.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium

  **Relationships (Measure | Outcome/Objective):**
  - Measure: Demonstrate appreciation for the research process | Outcome/Objective: Critical thinking in the application of research

  **Projected Completion Date:** 06/2012
  **Responsible Person/Group:** RT Faculty

#### Thesis option
At least 75% of graduate students will choose thesis option as opposed to project option for completion of master's degree.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium

  **Relationships (Measure | Outcome/Objective):**
  - Measure: Demonstrate appreciation for the research process | Outcome/Objective: Critical thinking in the application of research

  **Projected Completion Date:** 07/2010
  **Responsible Person/Group:** RT Faculty

  **Additional Resources:** Will track for need for additional faculty member to assist with thesis advisement and course work.

#### Appreciation of the thesis process
Thesis advise can be time consuming. Many of the MS students are international students in which English is not their first language. Faculty are reviewing GRE scores to determine if higher verbal scores should be required. Along with the newly required statistics course, students will be advised starting in the first term of study with the literature course being moved from summer semester (3rd semester of program) to spring semester (2nd semester of program) to provide more time for topic development and literature review. Will also monitor for the need for an additional graduate courses and the need for an additional faculty member in respiratory care to assist with thesis advisement and teaching of master's courses.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium

  **Relationships (Measure | Outcome/Objective):**
  - Measure: Demonstrate appreciation for the research process | Outcome/Objective: Critical thinking in the application of research

  **Responsible Person/Group:** Robert Harwood

#### HHS 8000
Will continue to monitor. Consider another method of measurement since instructor in respiratory therapy no longer teaching course.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium

  **Relationships (Measure | Outcome/Objective):**
  - Measure: Understanding Health Policy in the US | Outcome/Objective: Understanding Health Policy in the United States

  **Responsible Person/Group:** Robert Harwood

#### Thesis research and project advisement
A new statistics course was developed and offered for the first time during spring semester 2011. Students who express interest in thesis research are required to take this course in order to complete thesis option. Students who plan to complete the project option are not required but are advised to consider completing course.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium

  **Relationships (Measure | Outcome/Objective):**
  - Measure: Demonstrate appreciation for the research process | Outcome/Objective: Communication in respiratory care
  - Measure: Critical thinking in the application of research

  **Responsible Person/Group:** Robert Harwood

#### Understanding advanced topics in respiratory care
Oral and written communication will continue to be a high priority. Faculty assigned to core curriculum courses will continue to assign patient case studies, literature reviews, and debates that require a higher level of problem solving and discernment of ideas.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium

  **Relationships (Measure | Outcome/Objective):**
  - Measure: Demonstrate appreciation for the research process | Outcome/Objective: Communication in respiratory care
  - Measure: Understanding advanced topics in respiratory care | Outcome/Objective: Communication in respiratory care

  **Responsible Person/Group:** Robert Harwood
Georgia State University
Assessment Data by Section
2010-2011 Risk Management & Insurance (Mathematical Risk Management) MS
As of 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

### Mission / Purpose
MISSION
The MS RMI degree with a Specialization in Mathematical Risk Management (MRM program) prepares students for careers in quantitative risk management and financial engineering positions emphasizing risk management. Graduates will be qualified for positions in a variety of organizational settings including financial institutions, risk management consultancies, and in the treasury departments of non-financial corporations. The program achieves these goals by emphasizing the application of mathematics in economics and finance to address contemporary risk management problems through the appropriate diagnosis, analysis, pricing, and customization of solutions to risk management problems and opportunities broadly defined to include both financial and operational risk exposures. The MRM program differentiates itself from an MBA with a concentration in Risk Management and Insurance through: More rigorous coverage of mathematical and statistical theory, The development of programming skills in a variety of programming languages and econometric software, and Specific emphasis on the development of modeling skills of the financial and operational risk exposures of both of traded and non-traded assets and liabilities, asset-backed securities, and other complex financially engineered assets.

### Goals
**G 1: Students will develop technical expertise in specified areas**
Students will develop an adequate level of technical expertise in the areas of financial economics, insurance economics, actuarial science and modern risk management theory.

**G 2: Students will quantify and analyze stochastic risk exposures**
Students will be able to quantify and analyze a variety of stochastic risk exposures.

**G 3: Students will determine value of assets and liabilities**
Students will be able to determine the value of assets and liabilities and document various associated risks.

**G 4: Students will develop integrated risk management models**
Students will be able to develop firm-wide integrated risk management models and identify and manage the limitations associated with the models.

### Student Learning Outcomes/Objectives
**SLO 1: Mathematical and statistical theory expertise (G: 1, 2) (M: 1, 2)**
The MS-RMI (MRM) graduate will have the technical expertise in mathematical and statistical theory to quantify and analyze various financial and operational stochastic risk exposures.

### Other Outcomes/Objectives
**O/O 2: Economic and financial theory expertise (G: 1, 3) (M: 3)**
The MS-RMI (MRM) graduate will have the technical expertise in economic and financial theory to determine the value of traded and non-traded assets and liabilities and to document the risks associated with the securities.

**O/O 3: Development of firm-wide integrated risk management models (G: 1, 2, 4) (M: 4, 5)**
The MS-RMI (MRM) graduate will be able to draw upon theory from financial economics, insurance economics, actuarial science and modern risk management to develop firm-wide integrated risk management models capable of analyzing the costs and opportunities of a firm's various risk exposures. Students will be able to: 1. Recommend the risks that should be managed and the tools available that will most efficiently achieve the firm's objectives. 2. Identify the limitations of the models and therefore the associated risks of those limitations along with strategies to manage these exposures.

### Measures, Targets, and Findings
**M 1: Exams in MRM 8320 (O: 1)**
Each student will demonstrate expertise in the quantification and analysis of operational stochastic risk exposures through responses to selected questions from course exams in MRM 8320 Introduction to Stochastic Risk Management Models.

Source of Evidence: Performance (recital, exhibit, science project)
M 2: Selected student projects in ECON 8780 (O: 1)
Through performance on selected projects in ECON 8780 Financial Econometrics, each student will demonstrate technical expertise in mathematical and statistical theory to quantify and analyze various financial stochastic risk exposures.
Source of Evidence: Performance (recital, exhibit, science project)

M 3: Projects and exams in MRM 8610 (O: 2)
Through performance on selected projects and exam questions in MRM 8610 Financial Engineering, each student will demonstrate the technical expertise in economic and financial theory to determine the value of traded and non-traded assets and liabilities and to document the risks associated with the securities.
Source of Evidence: Performance (recital, exhibit, science project)

M 4: Selected student case work in RMI 8370 (O: 3)
Through performance on selected case work in RMI 8370 Financial Risk Management, each student will demonstrate the ability to recommend appropriately the risks that should be managed and the tools available that will most efficiently achieve the firm's objectives.
Source of Evidence: Performance (recital, exhibit, science project)

M 5: Selected projects in MRM 8620 (O: 3)
Through performance on selected projects in MRM 8620 Quantitative Financial Models, each student will demonstrate the ability to identify the limitations of the risk management models and therefore the associated risks of those limitations along with strategies to manage these exposures.
Source of Evidence: Performance (recital, exhibit, science project)

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continue retention of exams/projects
Continue to retain selected student exams and projects for four years. Aggregate increasing collection of annual data until achieve four-year data sample. Maintain rolling four-year data sample thereafter.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure:Projects and exams in MRM 8610 | Outcome/Objective:Economic and financial theory expertise

Projected Completion Date: 08/2012
Responsible Person/Group: Course Faculty and MRM Assessment Group
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Retain and evaluate student work
Retain selected samples of applicable student work from 2009-2010 course offerings. Perform preliminary analysis of the same for 2009-2010 assessment report.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure:Exams in MRM 8320 | Outcome/Objective:Mathematical and statistical theory expertise
- Measure:Selected projects in MRM 8620 | Outcome/Objective:Development of firm-wide integrated risk management models
- Measure:Selected student case work in RMI 8370 | Outcome/Objective:Development of firm-wide integrated risk management models
- Measure:Selected student projects in ECON 8780 | Outcome/Objective:Mathematical and statistical theory expertise

Projected Completion Date: 08/2010
Responsible Person/Group: Course Faculty and MRM Assessment Group
Additional Resources: None
Budget Amount Requested: $0.00 (no request)
**Student Learning Outcomes/Objectives**

**SLO 1: See Mission/Purpose (M: 1)**

**Measures, Targets, and Findings**

**M 1: See Mission/Purpose (O: 1)**

Source of Evidence: Academic direct measure of learning - other

**Target for O1: See Mission/Purpose**

Complete approval of revisions to program. Revise assessment plan in light of revised program. Implement revised assessment plan.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Program Revision Approval**

Achieve approval of program revisions. Revise assessment plan to match revised program. Begin implementation of revised plan.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** See Mission/Purpose | **Outcome/Objective:** See Mission/Purpose

- **Projected Completion Date:** 08/2010
- **Responsible Person/Group:** Richard Phillips and Marty Grace
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Risk Management & Insurance BBA**

*As of: 12/12/2016 04:11 PM EST*

(includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

BBA-RMI PROGRAM MISSION: The BBA in Risk Management and Insurance (RMI) is designed to prepare students to: (1) Apply quantitative models to the measurement of business risks, (2) Assess the hazard risks that are common to business organizations, (3) Apply the enterprise risk management process to managing risk in business organizations.

**Goals**

**G 1: Quantify business risk using modeling tools**

Students will be able to quantify business risk by applying appropriate modeling tools.

**G 2: Assess common business risks**

Students will be able to assess the common property, liability and personnel risks of a business organization.

**G 3: Apply forecasting techniques to loss data**

Students will be able to apply forecasting techniques to loss data to project the future impact of risks on a business organization.

**G 4: Apply cash flow analysis to risk financing options**

Students will be able to apply cash flow analysis to risk financing options as an aid in decision-making.

**G 5: Explain and apply enterprise risk management process**

Students will be able to explain the enterprise risk management process and apply it to actual business situations through case study.

**Student Learning Outcomes/Objectives**

**SLO 1: Identification and structuring of risky situations (G: 2, 3) (M: 1)**

Students will be able to recognize risk and uncertainty and their impact on individual, business, and societal decision making. Pertinent risks include those related to the person and property, leverage, longevity, securing future consumption, and asset...
Students will be able to take an uncertain situation and determine the nature of the problem(s) to be solved.

**SLO 2: Modeling risk using quantitative tools (G: 1, 2, 3, 4) (M: 1)**

Students will be able to take an uncertain situation, and: (1) recognize mathematical, financial and/or statistical tools to be used in solving, and (2) use quantitative tools to model risks and craft alternatives to address them.

**SLO 3: Comprehension of the business risk management process (G: 1, 2, 3, 4) (M: 2)**

Students will have technical comprehension of the business risk management process, including the identification and evaluation of loss exposures, the analysis of the various risk control and financing techniques available to manage the exposures, decision making under conditions of uncertainty, control mechanisms to monitor the results of the risk management program.

**SLO 4: Technical knowledge of the Enterprise Risk Management process (G: 1, 5) (M: 3)**

Students will have theoretical and technical knowledge of the Enterprise Risk Management (ERM) process. Students will be able to identify and critically analyze the strategies that firms use to enhance corporate value through their risk management function.

### Measures, Targets, and Findings

**M 1: Performance on selected Projects in RMI 3750 (O: 1, 2)**

Each student will demonstrate through performance on selected projects in RMI 3750 Probability Theory and Simulation Analysis in Risk Management an understanding of the sources of uncertainty in a business application.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Identification and structuring of risky situations**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

**Target for O2: Modeling risk using quantitative tools**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

**M 2: Selected Projects and identified exam questions in RMI 4300 (O: 3)**

Students will be given the task of identifying and prioritizing the hazard risks of a given business organization through the use of a Risk Mapping approach to risk assessment.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Comprehension of the business risk management process**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of students during each 4-year evaluation period.

**M 3: Selected case studies and exam questions in RMI 4350 (O: 4)**

Each student will demonstrate through performance on selected case studies and exam questions in RMI 4350 Enterprise Risk Management theoretical and technical knowledge of the Enterprise Risk Management (ERM) process and the ability to identify and critically analyze the strategies that firms use to enhance corporate value through their risk management function.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O4: Technical knowledge of the Enterprise Risk Management process**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE THREE RUBRIC to a random selection of students during each 4-year evaluation period.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Assignments to include added focus on making recommendations and conclusions**

RMI 4350 is a CTW course. Course assignments will be revised to focus more on providing the student with practice and feedback on making recommendations and conclusions.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Selected case studies and exam questions in RMI 4350 | Outcome/Objective: Technical knowledge of the Enterprise Risk Management process

Projected Completion Date: 08/2011
Responsible Person/Group: Martin Grace and Harold Weston

---

Georgia State University
Assessment Data by Section
Mission / Purpose
The Mission of the Bachelors of Business Administration (BBA) program is to provide broad general education and the core business knowledge and skills to prepare both traditional and non-traditional students for entry-level position in public, private, and not-for-profit organizations and to stimulate in students a desire for life-long learning.
This was actually established as the mission of the BBA program in the 2004-2005 cycle.

In the 2010-2011 AY the Robinson College undertook the development of a new strategic plan for the College that builds on the GSU strategic plan. In the Summer of 2011 a task force, building on the RCB strategic plan, began developing a set of recommendations to be made to the College Executive Committee that will significantly update the BBA program. It is anticipated that as a result of this larger process a new Mission Statement will emerge for the BBA program.

Goals
G 2: Communications Capabilities
Students graduating from the Robinson College of Business with a BBA degree will be effective business communicators.

G 1: Analysis Capabilities
Students graduating from the Robinson College of Business with a BBA degree will be effective and efficient business problem analysts in their major.

G 3: Team Work Capabilities
Students graduating from the Robinson College of Business with a BBA degree will be able to function effectively as team members.

G 4: Life-long Learning
Students graduating from the Robinson College of Business with a BBA degree will demonstrate a desire for life-long learning

Student Learning Outcomes/Objectives
SLO 1: Effective Analytical Skills (G: 1) (M: 6)
Students will demonstrate analytical skills in solving business problems.

SLO 2: Effective Communication Skills (G: 2) (M: 4, 5, 7)
Students will demonstrate effective oral and written communication skills.

SLO 3: Effective Use of Computer Technology (G: 1, 2) (M: 7)
Students will show the ability to effectively use and manage technology of business related purposes.

SLO 4: Effective Team Membership (G: 3) (M: 2, 3)
Students will show the ability to function as effective members of a team.

SLO 5: Appreciation of Life-long Learning (G: 4) (M: 1)
Students will exhibit a positive attitude toward continual learning upon completion of the BBA program.

Other Outcomes/Objectives
O/O 6: Ethics and Social Responsability (G: 1, 4) (M: 8)
Measures, Targets, and Findings

M 1: Further Education -- Self Report (O: 5)
This measure reports the number of students anticipating continuing formal education after completion of their BBA degree.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O5: Appreciation of Life-long Learning
Over 60% of students show an interest in continuing their formal education in some form in the future. Measurement will be done by looking at self report data entered for the Educational Testing Service's Business Test, which is administered to graduating seniors in their final semester.

Findings 2010-2011 - Target: Not Reported This Cycle
The RCB did not conduct the Educational Benchmark Service exit survey in the 2010-2011 cycle. It is anticipated that it will be conducted in the Spring of 2012.

M 2: Ability to Work on Teams (O: 4)
Category for Evaluation Possible Scores 1 2 3 4 5 Quality of Work: Consider the degree to which the student team member provides work that is accurate and complete. Produces unacceptable work, fails to meet minimum group or project requirements. Occasionally produces work that meets minimum group or project requirements. Meets minimum group or project requirements. Regularly produces work that meets minimum requirements and sometimes exceeds project or group requirements. Produces work that consistently exceeds established group or project requirements. Timeliness of Work: Consider the student team member's timeliness of work. Fails to meet deadlines set by group. Occasionally misses deadlines set by group. Regularly meets deadlines set by group. Consistently meets deadlines set by group and occasionally completes work ahead of schedule. Consistently completes work ahead of schedule. Task Support: Consider the amount of task support the student team member gives to other team members. Consistently provides task support to other group members. Sometimes gives task support to other members. Occasionally provides task support to other group members. Rarely gives task support to other members. Leadership: Consider the leadership activities. Consistently displays good leadership skills. Regularly displays good leadership skills. Occasionally displays exemplary leadership skills. Overall Performance Rating: Consider the overall performance of the student team member while in the group. Performance significantly fails to meet group requirements. Performance fails to meet some group requirements. Performance meets all group requirements. Performance consistently exceeds all group requirements.

Source of Evidence: Student course evaluations on learning gains made

Target for O4: Effective Team Membership
We will have at least 80% of students achieving a 4.0.

Findings 2010-2011 - Target: Not Reported This Cycle
No new assessment was done in the 2010-2011 cycle. Team events (participation, member selection, evaluation) are a major part of the RCB strategic plan revision in the 2011-2012 cycle.

M 3: Ability to Function in a Team Environment (O: 4)
Category for Evaluation Possible Scores 1 2 3 4 5 Quality of Work: Consider the degree to which the student team member provides work that is accurate and complete. Produces unacceptable work, fails to meet minimum group or project requirements. Occasionally produces work that meets minimum group or project requirements. Meets minimum group or project requirements. Regularly produces work that meets minimum requirements and sometimes exceeds project or group requirements. Produces work that consistently exceeds established group or project requirements. Timeliness of Work: Consider the student team member's timeliness of work. Fails to meet deadlines set by group. Occasionally misses deadlines set by group. Regularly meets deadlines set by group. Consistently meets deadlines set by group and occasionally completes work ahead of schedule. Consistently completes work ahead of schedule. Task Support: Consider the amount of task support the student team member gives to other team members. Consistently provides task support to other group members. Occasionally provides task support to other group members. Rarely provides task support to other members. Leadership: Consider the leadership activities. Consistently demonstrates team leadership. Occasionally demonstrates exemplary leadership. Occasionally demonstrates exemplary leadership. Overall Performance Rating: Consider the overall performance of the student team member while in the group. Performance significantly fails to meet group requirements. Performance fails to meet some group requirements. Performance meets all group requirements. Performance consistently exceeds all group requirements.

Source of Evidence: Student course evaluations on learning gains made

Target for O4: Effective Team Membership
We will have at least 80% of students achieving a 4.0.
includes in class meetings.) Failed to attend the group meetings. Attended 1%-32% of the group meetings. Attended 33%-65% of the group meetings. Attended 66%-99% of the group meetings. Attended 100% of the group meetings. Responsibility: Consider the ability of the student team member to carry out a chosen or assigned task, the degree to which the student can be relied upon to complete a task. Is unwilling to carry out assigned tasks. Sometimes carries out assigned tasks but never volunteers to do a task. Carries out assigned tasks but never volunteers to do a task. Consistently carries out assigned tasks and occasionally volunteers for other tasks. Consistently carries out assigned tasks and always volunteers for other tasks. Measure 2: Involvement: Consider the extent to which the student team member participates in the exchange of information (does outside research, brings outside knowledge to group). Fails to participate in group discussions and fails to share relevant material. Sometimes participates in group discussions and rarely contributes relevant material for the project. Takes part in group discussions and shares relevant information. Regularly participates in group discussion and sometimes exceeds expectations. Consistently exceeds group expectations for participation and consistently contributes relevant material to the project. Leadership: Consider how the team member engages in leadership activities. Does not display leadership skills. Displays minimal leadership skills in team. Occasionally assumes leadership role. Regularly displays good leadership skills. Consistently demonstrates exemplary leadership skills. Overall Performance Rating: Consider the overall performance of the student team member while in the group. Performance significantly fails to meet group requirements. Performance fails to meet some group requirements. Performance meets all group requirements. Performance meets all group requirements consistently and sometimes exceeds requirements. Performance consistently exceeds all group requirements.

Source of Evidence: Presentation, either individual or group

**Target for O4: Effective Team Membership**

<table>
<thead>
<tr>
<th>Findings</th>
<th>2010-2011 - Target: Not Reported This Cycle</th>
</tr>
</thead>
</table>

No new assessment was done in the 2010-2011 cycle. Team events (participation, member selection, evaluation) are a major part of the RCB strategic plan revision in the 2011-2012 cycle.

**M 4: Oral Communications Skills (O: 2)**

This measure contains three sub-parts that respectively look at the alignment of the material and method of the presentation with the audience, the synthesis and arrangement of the content presented, and the overall effectiveness of the student's oral presentation style and behavior. Measurement will be done by applying the Measure 4 Rubric to the final oral student presentations done as part of the BBA program's capstone course, BUSA 4980. Measure 4 Effective Communications Skills: Oral Communication Skills Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i Alignment of Material Presented with the Audience Student aligns the material with the audience in the presentation at hand with a high degree of accuracy and clarity. Student aligns the material with the audience in the presentation at hand with an effective degree of accuracy. Student shows a weak ability to align the material with the audience in the presentation at hand. ii Synthesis and Arrangement of the Content Presented Student synthesizes and arranges the content in the presentation at hand with a high degree of accuracy and clarity. Student synthesizes and arranges the content in the presentation at hand with an effective degree of accuracy. Student shows a weak ability to synthesize and arrange the content in the presentation at hand.

**Target for O2: Effective Communication Skills**

On all three sub-parts’ criteria we will have at least 80% of students achieving a 3.0. Measurement will be done by applying the Measure 4 Rubric to the final oral student presentations done as part of the BBA program's capstone course, BUSA 4980.

**Findings 2010-2011 - Target: Not Reported This Cycle**

No new assessment was done in the 2010-2011 cycle. Development of oral presentation skills throughout the undergraduate experience is a major part of the RCB strategic plan revision in the 2011-2012 cycle.

**M 5: Written Communication Skills (O: 2)**

The rubric for this item was modified in the 2010-2011 cycle. The prior rubric as well as the current rubric are linked in the Document Repository. For this item the rubric titled "New Rubric of Assessment of CTW papers on Assessment Criteria for Written Communications" was used. For this item 33 students papers produced for the CTW classes in the Spring Semester of 2011 in the RCB were selected. Of these papers 32 were assessable using the rubric developed for this and other questions in assessment. The results of that assessment with the names removed are included in the results matrix for the 2010-2011 cycle and are linked here from the Document Repository.

**Source of Evidence: Written assignment(s), usually scored by a rubric**

**Target for O2: Effective Communication Skills**

On the effective writing criterion we will have at least 80% of students achieving a 3.0. Measurement will be done by applying the Rubric on Assessment Criteria for Written Communications to Critical Thinking through Writing assignments collected from the second (i.e. senior level) CTW designated class in each major in the Robinson College of Business.

**Findings 2010-2011 - Target: Partially Met**

A total of 32 assignments in CTW classes were used in this assessment. Two papers were not usable and the 30 that remained were scored by a single, trained rater using the written communications rubric. The results showed that 6 of the 30 usable papers were rated a (4), 18 were rated a (3) and 6 were rated a (2). We the scored exams are used then the average hits the minimum level of 3.0 in the target. However, if the two unusable submission are included in the database, then the average score dips below the target. As a result of the mixed results the decision was taken to mark this as “partly met.”

**M 6: Effective Analytical Skills (O: 1)**

The rubric for this item was modified in the 2010-2011 cycle. The prior rubric as well as the current rubric are linked in the Document Repository. For this item only the measure "Systematically & Logically Interpret Data” were used. For this item 32 students papers...
produced for the CTW classes in the Spring Semester of 2011 in the RCB were selected. Of these papers 30 were assessable using the rubric developed for this and other questions in assessment. The results of that assessment with the names removed are included in the results matrix for the 2010-2011 cycle and are linked here from the Document Depository.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Effective Analytical Skills**

We will have at least 80% of students achieving a 3.0 on both sub-parts of the Assessment Criteria for Decision Making rubric first used in the 2010-2011 cycle.

---

**Findings 2010-2011 - Target: Not Met**

A total of 32 CTW assignments were selected from three different CTW classes in the MGS department. These were in Entrepreneurship, Business Analysis on Service Operations Management. Of these, a total of 30 papers were usable. These 30 papers were all assessed based on the two measures of the Assessment Criteria for Decision Making Measure of the CTW rubric. On the first dimension the measurement of students’ ability to make systematic inferences there were 5 students that scored a (4), 10 students that scored a (3) 13 students that scored a (2) and 2 students that scored a (1). This average of 2.59 is well below the target average of 3.0. On the second dimension measuring the students’ ability to draw conclusions and make recommendations there were 6 students that scored a (4), 14 students that scored a (3), 14 students that scored a (2) and 6 students that scored a (1). This average of 2.44 is well below the target average of 3.0.

---

**Target for O2: Effective Communication Skills**

To earn a higher than average performance rating on the Educational Benchmarking exit survey when measured against ratings by students of all three groups of peer schools and improvement in absolute rating over prior year.

---

**Findings 2010-2011 - Target: Not Reported This Cycle**

The RCB did not conduct the Educational Benchmarking exit survey on the 2010-2011. Thus, no new results are obtained. The RCB remains concerned about the student communication capabilities and this is reflected in the Action Plan and in the Initiatives for the new RCB Strategic Plan.

---

**Target for O3: Effective Use of Computer Technology**

On both of these questions students should score above the mean for the classifications of Select Six Peer Institutions, Carnegie Class Institutions, and All Participating Institutions. On both of these questions student scores will improve year-on-year.

---

**Findings 2010-2011 - Target: Not Reported This Cycle**

The RCB did not conduct the Educational Benchmarking exit survey on the 2010-2011. Thus, no new results are obtained. The RCB remains concerned about the students’ ability to use technology and this is reflected in the Action Plan and in the Initiatives for the new RCB Strategic Plan.

---

**Target for O6: Ethics and Social Responsibility**

80% of students will be at or above the “B” level on the rubric scoring of the case analysis. Grading Rubric for Ethics and Social Responsibility Dimension of Citic Pacific case analysis. A = 5 = Integrated, comprehensive, and dynamic analysis; one that is rationally supported and effective. B = 4 = Working toward “A” but incomplete, some inconsistencies or misunderstandings; analysis has gaps, could be more effective. C = 3 = Working toward “B,” but with weaknesses in many areas, major inconsistencies, or failure to properly address items needed for assignment completion. D = 2 = Case Analysis turned in, little else; poor or no analysis of merit; lacking rationale or analysis; poor understanding of corporate governance mechanisms and little or no effective effort to remedy. F = 1 = Failure to do assignment at threshold level.

---

**Findings 2010-2011 - Target: Not Met**

A selection of 30 papers were reviewed for assessment purposes. These papers were randomly selected from ten different sections of BUSA 4980 from the 2010-2011 academic year. The rubric established in the summer of 2010 following the first year of this exercise was applied. The results showed that 26 out of the 30 students identified a behavior problem at Citic Pacific in their case analysis at a level of (3) or higher. Of these 26 13 were at the level of (4) in terms of being able to identify the sources of the ethical lapses both individually and organizationally but lacked completeness in there conclusions and/or recommendations. Another six were deemed to be very effective and rater a (5) on the rubric. That left seven at the level of (3). The remaining seven were given the rating of (2). Thus, 19/30 were at the level of (4) or (5), which is slightly below the target goal of 80% of the students being able to not only identify some ethical and legal issue but also being able to provide analysis as to the cause and to make recommendations as to the responses that should occur.

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Law and Ethics**

In the 2008-2009 AY the Undergraduate Steering Committee recommended the addition of a law and ethics component to the Learning Outcomes of the Undergraduate degree program and the Assessment process. In the next assessment cycle the following
will be done: A Learning Outcome, Measurement Rubric, and Target Performance level will be established for the Undergraduate program. Elements of law and ethics will be infused in the material in the capstone strategic management course, BUSA 4980. A case with significant law and ethics issues will be woven into the materials in the capstone strategy course, BUSA 4980. An assessment of students' performance on the law and ethics infused case will be made and based on the results the next set of steps will be taken to establish law and ethic orientations throughout the undergraduate curriculum.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Ethics and Social Responsibility | Outcome/Objective: Ethics and Social Responsibility
Projected Completion Date: 04/2010
Responsible Person/Group: BUSA 4980 faculty, RCB Assessment committee, UG Steering Committee
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Communication Skills
The assessment process of 2008-2009 showed that Communication skills were not being effectively assessed. This was traced to two areas of concern: 1) The quality of the activates, written and oral, being assessed were not of a high enough quality in terms of their suitability for being assessment vehicles, and 2) the rubrics developed for the assessments were not adequate. In the recommendations to the RCB Executive Committee communications initiatives that would significantly change the development of communication skills in RCB were presented under the charge that RCB students are "ready to execute." Specifically the sub-committee recommended curricular changes that would: Develop, use, receive feedback on, and be evaluated on their oral presentation skills across the entire curriculum, not just in selected and isolated classes. Develop, use, receive feedback on, and be evaluated on their prose writing (not outlining or bullet-pointing) skills across the entire curriculum, not just in selected and isolated classes.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Ability to Use Technology | Outcome/Objective: Effective Communication Skills
Measure: Oral Communications Skills | Outcome/Objective: Effective Communication Skills
Measure: Written Communication Skills | Outcome/Objective: Effective Communication Skills
Implementation Description: Beginning in the 2009-2010 cycle the RCB undertook the process of developing a new strategic plan, which included reviewing the undergraduate program as a whole. Existing action plans were subsumed in this effort and new thrusts proposed. The Summer 2011 report from the undergraduate sub-committee to the RCB Exec. Committee is attached here.
Projected Completion Date: 04/2017
Responsible Person/Group: BUSA 4980 Instructors, RCB Assessment Committee, RCB Undergraduate Steering Committee, RCB Executive Committee, RCB Dean’s Office
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Technology Skills
The College will initiate a new focus on the undergraduate Students’ Skill in the use of Technology. The current assessment mechanisms were found to be wanting in terms of telling the College Assessment Committee the level of skills on different software packages, i.e. spreadsheets, database, word processing. Specifically the sub-committee recommend an initiative to: Develop, use, receive feedback on, and be evaluated on their applied business technology skills (e.g. Excel) across the entire curriculum, not just in selected and isolated classes.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Ability to Use Technology | Outcome/Objective: Effective Use of Computer Technology
Implementation Description: Beginning in the 2009-2010 cycle the RCB undertook the process of developing a new strategic plan, which included reviewing the undergraduate program as a whole. Existing action plans were subsumed in this effort and new thrusts proposed. The Summer 2011 report from the undergraduate sub-committee to the RCB Exec. Committee is attached here.
Projected Completion Date: 04/2017
Responsible Person/Group: BUSA 4980 Instructors, RCB Assessment Committee, RCB Undergraduate Steering Committee, RCB Executive Committee, RCB Dean’s Office
Additional Resources: None
Budget Amount Requested: $0.00 (no request)
In the 2010-2011 AY the Robinson College undertook the development of a new strategic plan for the College that builds on the GSU strategic plan. In the Summer of 2011 a task force, building on the RCB strategic plan, began developing a set of recommendations to be made to the College Executive Committee that will significantly update the MBA program. It is anticipated that as a result of this larger process a new Mission Statement will emerge for the MBA program.

Goals

G 1: Analytical Decision Makers
Graduates of the Robinson College of Business will be analytically skilled decision makers

G 2: Perspectives
Graduates of the Robinson College of Business MBA Programs will be decision makers who effectively incorporate global, ethical, and culturally diverse perspectives.

G 3: Leadership
Graduates of the Robinson College of Business MBA Programs will be effectively leaders.

G 4: Teamwork
Graduates of the Robinson College of Business MBA Programs will be effective as members of teams.

Student Learning Outcomes/Objectives

SLO 1: Students can Analyze Relevant Questions (G: 1, 2) (M: 1, 2)
The student should be able to identify, prioritize and focus on critical success factors for a business unit and to analyze an organization's resources, capabilities, and competitive environment.

Relevant Associations:

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

SLO 2: Students can Propose Alternative Solutions (G: 1, 2, 3) (M: 3)
The student should be able to develop viable competitive strategies, present a reasoned analysis, and justify recommendations that integrate functional, global, legal and ethical dimensions in the business decision process.

Relevant Associations:

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

Measures, Targets, and Findings

M 1: Critical Success Factor Analysis (O: 1)

Measure 1 Students Can Analyze Relevant Questions: Critical Success Factor Analysis Students Can: Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i Identify Critical Success Factors Student can identify almost all Critical Success Factors in a situation with almost no superfluous factors included. Student can identify most Critical success factors but includes some superfluous factors. Student can identify some Critical success factors but includes many superfluous factors. Student can not sufficiently distinguish Critical Success Factors from other elements in the situation. ii Prioritize Critical Success Factors Student can prioritize almost all of Critical Success Factors in a situation with almost no superfluous factors included. Student can prioritize most of the Critical Success factors that are identified. Student can not prioritize Critical Success Factors. Student's presentation focuses on the Critical Success Factors identified and provides emphasis in the correct priority. Student's presentation focuses on many of the Critical Success Factors with a general emphasis based on priority. Student's presentation focuses on only a few of the Critical Success Factors. iii Focus On Critical Success Factors Student's presentation largely fails to focus on the Critical Success Factors.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Students can Analyze Relevant Questions
On all three sub-parts' criteria we will have at least 80% of students achieving a 3.0.

Findings 2010-2011 - Target: Not Met

Students again did not meet this goal. As is prior years the first item was by far the strongest and about 70% of students were able to identify the critical success factors. However, as in prior years the ability of the students to prioritize and build recommendations around the critical success factors remains in the 60% range.

M 2: Environmental Opportunity Analysis (O: 1)

Measure 2 Students Can Analyze Relevant Questions: Environmental Opportunity Analysis Students Ability to: Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i Understand a Firm's Resources and Capabilities Student's presentation focuses on the Critical Success Factors identified and provides emphasis in the correct priority. Student's presentation focuses on many of the Critical Success Factors with a general emphasis based on priority. Student's presentation focuses on only a few of the Critical Success Factors.
reflects ability to accurately categorize, analyze and discuss. Student's understanding reflects strong ability to accurately identify and describe. Student's understanding reflects weak ability to accurately identify, describe and explain. Student's understanding reflects no or very little ability to accurately identify, describe and explain. ii Analyze of a Firm's Competitive Environment based on the understanding of the Resources and Capabilities Student can accurately appraise, assess and interpret the opportunities for a firm's resources and capabilities in the light of the competitive environment, Student can accurately identify, and describe the opportunities for a firm's resources and capabilities in the light of the competitive environment, Student has difficulty accurately identifying, and describing the opportunities for a firm's resources and capabilities in the light of the competitive environment. Student shows no or little ability to accurately identify, and describe the opportunities for a firm's resources and capabilities in the light of the competitive environment.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Students can Analyze Relevant Questions**

On all three sub-parts' criteria we will have at least 80% of students achieving a 3.0.

**Findings 2010-2011 - Target: Not Met**

Students did not meet the goal of 80% scoring at 3 or 4 on item i with a total of 60.5%. This is consistent with prior years. Performance on the second item reverted to the levels of 2008-2009 with about 68% of students scoring 3 or 4.

**M 3: Student Ability to Develop Corporate Strategies (O: 2)**

Measure 3 Students Can Propose Alternative Solutions: Ability to develop corporate strategies

Students Can: Excellent (4) Competent (3) Less than competent (2) Ineffective (1)

I Integration of functional dimensions

Student fully and effectively integrates all major functional dimensions into the development of a strategic alternative. Student includes multiple functional dimensions into the development of a strategic alternative. Student only includes some of the functional dimensions into the development of a strategic alternative. Student fails to include functional dimensions into the development of a strategic alternative. II Integration of global dimensions

Student fully and effectively integrates all major global dimensions into the development of a strategic alternative. Student includes multiple global dimensions into the development of a strategic alternative. Student only includes some of the global dimensions into the development of a strategic alternative. Student fails to include global dimensions into the development of a strategic alternative.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Students can Propose Alternative Solutions**

On all four sub-parts' criteria we will have at least 80% of students achieving a 3.0.

**Findings 2010-2011 - Target: Not Met**

This goal was not met. The ability to get students to incorporate the global, legal, and ethical dimensions without prompting them in asking the question remains very limited. Only with respect to the multi-functional perspective did students come close to the goal of 80% with a score of 75%. The global dimension was raised without prompting in only about 30% of the answers analyzed. Legal and ethical considerations were not mentioned in over 80% of the answers analyzed. Again, there was no prompting in the questions to look for legal or ethical issues and the cases did not overtly raise issues of law or ethics.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Law and Ethics**

The assessment process of 2008-2009 showed very low scores in the area of law and ethics. Two possible interpretations of this result are possible. One is that the measurement was flawed; the second is that the measurement was fine and the learning objective was not being attained. Upon review it seems that the answer is a mix of the two items. Some of the alternative exercises that students could choose from in the assessed assignment did not have clear legal or ethical issues for discussion. However, on the options that did have such concerns the level of discussion was below target levels. In the short term the assignments for the assessment will be more carefully vetted to see that opportunities for discussion of legal and/or ethical issues are clearly set out. In the longer term the leadership of the College will work with Department toward increased consideration of legal and ethical issues in decision making throughout the core curriculum, not just in the Legal Environment course.

**Established in Cycle:** 2008-2009

**Implementation Status:** In-Progress

**Priority:** High

**Projected Completion Date:** 04/2010

**Responsible Person/Group:** RCB MBA Steering Committee; RCB Assessment Committee

**Additional Resources:** None

**Budget Amount Requested:** $0.00 (no request)

**Leadership and Team Skill Measurement**

The assessment process on the measures of Leadership and Group Participation was not helpful in terms of providing results to the College that will enable them to target specific aspects of both skill sets for improvement. Analysis of the rubric used for these measurements indicated a sophisticated measure embedded in a good measurement devise for both measures. Analysis of the data collected from students indicates, however, that students were using the measurement instruments in a very elementary way. For the 09-10 assessment cycle it would be preferable if the assessment instrument can be retained. The challenge is to elicit more thoughtful and reflective responses from students in their completion of the assessment instrument. The College will work with the faculty members in the Strategic Management class to try to improve participation quality in this class.

**Established in Cycle:** 2008-2009

**Implementation Status:** In-Progress

**Priority:** High

**Relationships (Measure | Outcome/Objective):**

Measure: Environmental Opportunity Analysis | Outcome/Objective: Students can Analyze Relevant Questions

**Projected Completion Date:** 04/2010

**Responsible Person/Group:** RCB Assessment Committee; MBA Steering Committee

**Additional Resources:** None

**Budget Amount Requested:** $0.00 (no request)
Georgia State University
Assessment Data by Section
2010-2011 Robinson College of Business PhD
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Ph.D. program of the College of Business Administration develops for graduates a high level of competence in conducting research and in teaching business disciplines by requiring (1) training in theory; (2) training in general research techniques as well as research techniques specific to a discipline; (3) research experience with faculty members on contemporary research problems and issues; and (4) training on teaching methodology reinforced with active classroom teaching experience.

Goals
G 1: Goals for Ph.D. in Business Administration Grads
To place graduates in tenure-track academic or research institutions. To prepare graduates to do quality, relevant academic research and to publish and present their research in competitive academic journals and at top academic conferences. To prepare graduates to be effective teachers.

Outcomes/Objectives
O/O 1: Comprehensive understanding of subject (M: 1, 2, 3, 4, 5, 6, 7)
Students should be able to critically evaluate and discuss theoretical developments and the results of original research. Students should be able to conduct original research in collaboration with college faculty.

O/O 2: Competency in research (M: 3, 4, 5, 6, 8)
Students should be able to critically evaluate and discuss theoretical developments and the results of original research. Students should be able to conduct original research in collaboration with college faculty.

O/O 3: Mastery of methodology (M: 5, 6)
Students are expected to have a firm grasp of quantitative and research methodology, including statistics, regression, research design and multivariate data analysis.

O/O 4: Teaching excellence (M: 7)
Students should be able to present theoretical and applied material to a diverse group of students. Graduates will accept positions at institutions where the teaching skills learned in the program are utilized and further refined.

O/O 5: Professional Development and Academic Community (M: 3, 4, 5, 6)
Students are expected to participate in discipline-specific association meetings through attendance and presentation of scholarly papers. Students are expected to do publishable research with faculty and colleagues.

O/O 6: Placement in research-oriented institutions (M: 5, 6)
Successful placement of graduates is contingent on many factors. Admissions committees in each academic unit must seek applicants who are interested in research (as well as academically qualified). Students must be actively engaged in research from the outset of their studies and should be actively mentored by a research-active faculty member. Students should attend conference and present papers in order to gain recognition of faculty from other research universities. Students are expected to produce a thoughtful and well-researched dissertation. Once placed, alumni should remain active researchers.

Measures, Targets, and Findings
M 1: Performance in coursework (O: 1)
Students are expected to maintain a 3.0 overall GPA and earn a C or better in all coursework.
Source of Evidence: Academic direct measure of learning - other

M 2: Preliminary Examination (O: 1)
Upon completion of cmajor field and quantitative/research methods coursework, all students will be given a comprehensive examination over all coursework. This examination is written, supplemented in some cases by an oral examination. Students will not be permitted a second attempt to pass the preliminary examination except upon recommendation, by majority vote, of the group of faculty members who graded the examination. A maximum of two attempts is permitted to pass the preliminary examination.
Source of Evidence: Comprehensive/end-of-program subject matter exam

M 3: Internal monitoring (O: 1, 2, 5)
Each academic unit is encouraged to develop internal measures of academic performance such as additional papers and examinations. Students are encouraged to submit papers to academic journals and conferences.
M 4: The Dissertation (O: 1, 2, 5)

Students must demonstrate the ability to conduct a research program leading to a significant contribution to the discipline. The student’s dissertation proposal must be defended orally and include a summary of the following: The purpose of the study; the nature of the subject to be investigated and its importance; a brief review of the literature; the theory if any, to be developed; the empirical methodology, techniques, and data sources, if any, to be used; the nature of the hypotheses to be developed or tested, where appropriate; and a time frame for completion of the dissertation. When the dissertation committee judges the dissertation to be complete, it must be defended orally in a final dissertation defense. A unanimous decision of the committee is required to pass both the proposal and the final oral defense.

Source of Evidence: Senior thesis or culminating major project

M 5: Conference presentations and participation (O: 1, 2, 3, 5, 6)

Students are encouraged to present original research at academic and professional conferences. The College helps fund student travel to such conferences. Participation in such activities often leads to offers of employment in tenure track positions.

Source of Evidence: Presentation, either individual or group

M 6: Research papers (O: 1, 2, 3, 5, 6)

Students are encouraged to do original and collaborative research and to submit papers for publication in academic journals.

Source of Evidence: Written assignment(s), usually scored by a rubric

M 7: Teaching assignments (O: 1, 4)

Students serve as graduate teaching assistants (GTAs). The student evaluations from the courses taught is used as feedback for honing teaching techniques. Students holding GTAs are registered for BA 9510. At the end of the semester, their performance is evaluated and they are assigned a grade of S or U.

Source of Evidence: Student course evaluations on learning gains made

M 8: Research performance (O: 2)

All Ph.D. students are given research assignments within their academic units. They are expected to maintain a consistent level of quality work. Students with graduate research assistantships (GRAs) are registered for BA 8510. At the end of the semester, the students' performance is evaluated and grade of S or U is assigned.

Source of Evidence: Performance (rectal, exhibit, science project)

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Monitoring student mastery of body of knowledge

Academic units will continue to evaluate students with the comprehensive examination. Units are being encouraged to have a formal review of students at the end of the first year. Students will be evaluated through the preliminary dissertation defense and the final oral defense of the dissertation.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Responsible Person/Group: Ph.D. coordinators in each academic unit

Pedagogical training

All students who are slated to teach must take the Teaching Seminar course. Student evaluations from the courses taught by doctoral students are reviewed by the academic unit and discussed with the student. Each academic unit has a teaching mentor who works with students concerning all aspects of teaching, including course preparation and classroom management.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Responsible Person/Group: Ph.D. unit coordinator and department chair

Placement of graduates in research institutions

Successful placement of graduates is contingent on many factors. Admissions committees in each academic unit must seek applicants who are interested in research (as well as academically qualified). Students must be actively engaged in research from the outset of their studies and should be actively mentored by a research-active faculty member. Students should attend conferences and present papers in order to gain recognition of faculty from other research universities. Students must produce a thoughtful and well-researched dissertation. Once placed, alumni should remain active researchers.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Responsible Person/Group: Ph.D. unit coordinator, Ph.D. Program Office
Mission / Purpose
The Ed. S. School Counseling Program is designed to produce educationally oriented professional school counselors with broadly based, multi-disciplinary backgrounds whose over arching goal is to help all P-12 students be successful in school. Graduates are equipped to counsel students in P-12 settings as well as parents and teachers; to consult with parents, teachers and other school and community personnel, to advocate for students and parents, to evaluate school counseling programs, and to coordinate the resources of the school and the community in order to meet the developmental needs of the students. The role calls for facilitating, nurturing persons knowledgeable of educational objectives and accustomed to working with others in providing leadership and expertise in child growth and development, assessment, group process facilitation, interviewing and consultation skills, classroom intervention techniques, interpersonal dynamics, program evaluation, advocacy and the curriculum of the school.

Goals
G 1: P-12 Student Learning and Development
School counselors are committed to their students and to their learning, growth and development. To this end, school counselors use their skills to assist students in individual, small group, and classroom guidance settings. School counselors also monitor and evaluate student learning and development to provide the most effective school counseling programs.

G 2: Professional Practice/Experience
School counselors reflect on their practice and learn from that experience.

G 3: Learning Communities
School counselors are participating members of learning communities. This participation allows them to share their expertise and to gain valuable ideas from other practicing school counselors.

Student Learning Outcomes/Objectives
SLO 1: Demonstrates Counseling Knowledge and Skills (G: 1) (M: 1)
School counselors understand and practice effective counseling skills that contribute to P-12 student learning and development.
Relevant Associations: American School Counselor Association

SLO 2: Monitors and Evaluates P-12 Student Learning & Dev (G: 1) (M: 2)
In order to assist all P-12 students in school success, school counselors must monitor, manage, and evaluate student learning and development. Student learning and development as assisted by school counselors takes place through school counselors’ leadership in individual and small group counseling, classroom guidance activities, parent and teacher consultation, using community resources, and advocating for students.
Relevant Associations: American School Counselor Association

SLO 3: Professional Reflection and Learning (G: 2) (M: 3)
School counselors reflect continually on their professional practice. This reflection allows them to learn from their experiences, including those practices that are effective and those that need to be revised.
Relevant Associations: American School Counselor Association

SLO 4: Participates in Learning Communities (G: 3) (M: 4)
School counselors participate in learning communities, including classroom groups, mentoring relationships, feeder school groups, and other appropriate learning groups. In this way, school counselors can share their expertise with others, as well as learn from other school counselors.
Relevant Associations: American School Counselor Association

Measures, Targets, and Findings
M 1: Audio Tape of Counseling Skills (O: 1)
Students will provide direct services (demonstrate effective individual and small group counseling, classroom guidance and consultation skills) to students, parents and teachers in the school setting. An audio tape of one such session will be critiqued by the class to indicate effective counseling skills that will promote student/parent/teacher learning and development. Students must also complete a tape critique form that provides the purpose of the session, a summary of the session, their strengths and what they learned from the experience.
Source of Evidence: Video or audio tape (music, counseling, art)
Target for O1: Demonstrates Counseling Knowledge and Skills
At least 90% of the students will earn a Satisfactory grade on the tape presented.

Findings
2010-2011 - Target: Met
100% of the students earned a Satisfactory grade on the tape presented.

M 2: Action Research Project (O: 2)
Students will implement a selected accountability protocol following the ASCA National Model. Students will be required to plan and implement an intervention, evaluate the effectiveness of the intervention using the ASCA Guidance Curriculum Results Report...
template, complete the Guidance Curriculum Results Report, and evaluate the original plan. This last evaluation should include and explain the rationale for the lesson plan and describe the process, lessons learned and implications for your school counseling program. The finished product will be an easy to understand program evaluation manual to evaluate Academic, Personal/Social, and Career Preparedness interventions used when working with individual students, small groups of students, and in classroom guidance at the elementary, middle and high school levels.

Source of Evidence: Project, either individual or group

**Target for O2: Monitors and Evaluates P-12 Student Learning & Dev**

At least 90% of the students will earn a Satisfactory grade on the action research project.

**Findings 2010-2011 - Target: Met**

100% of the students earned a Satisfactory grade on the action research project.

**M 3: Supervision Session Summary Form (O: 3)**

After completing a supervision session with another school counselor, students must complete a Session Summary Form that includes information about the supervisee, a session analysis, a description of the supervisor's (student) strengths and weaknesses, and plans for the next session.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Professional Reflection and Learning**

At least 90% of the students will earn a Satisfactory grade on the supervision session summary forms submitted.

**Findings 2010-2011 - Target: Met**

100% of the students earned a Satisfactory grade on the supervision session summary forms submitted.

**M 4: Small Group Feedback of Audio Tapes (O: 4)**

Students in CPS 8480 and CPS 8661 meet in small groups to analyze and critique each other's audio-taped supervision or counseling sessions. Students use a standard form and provide both written and oral feedback to their peers, following a peer consultation model.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Participates in Learning Communities**

At least 90% of the students will earn a Satisfactory grade on the feedback provided to their peers.

**Findings 2010-2011 - Target: Met**

100% of the students earned a Satisfactory grade on the feedback provided to their peers.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Maintain and Monitor**

The School Counseling Faculty will monitor student`s grades on projects and other measures used to assess competence. In addition, this faculty will consider other ways to assess competence with regard to the outcomes and objectives.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: High

**Relationships (Measure | Outcome/Objective):**

- Measure: Action Research Project | Outcome/Objective: Monitors and Evaluates P-12 Student Learning & Dev
- Measure: Audio Tape of Counseling Skills | Outcome/Objective: Demonstrates Counseling Knowledge and Skills
- Measure: Small Group Feedback of Audio Tapes | Outcome/Objective: Participates in Learning Communities
- Measure: Supervision Session Summary Form | Outcome/Objective: Professional Reflection and Learning

**Implementation Description:** The School Counseling faculty will monitor the outcomes/objectives.

- Projected Completion Date: 09/2010
- Responsible Person/Group: School Counseling Faculty
- Additional Resources: At least one additional school counseling faculty member.

**Maintain and Monitor**

The School Counseling Faculty will monitor students' grades on projects and other measures used to assess competence. In addition, this faculty will consider other ways to assess competence with regard to the outcomes and objectives.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High

**Relationships (Measure | Outcome/Objective):**

- Measure: Action Research Project | Outcome/Objective: Monitors and Evaluates P-12 Student Learning & Dev
- Measure: Audio Tape of Counseling Skills | Outcome/Objective: Demonstrates Counseling Knowledge and Skills
- Measure: Small Group Feedback of Audio Tapes | Outcome/Objective: Participates in Learning Communities
- Measure: Supervision Session Summary Form | Outcome/Objective: Professional Reflection and Learning

- Projected Completion Date: 09/2011
- Responsible Person/Group: School Counseling Faculty

**Analysis Questions and Analysis Answers**
**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process is very specific and comprehensive because of new requirements by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP 2009). Students are assessed on standards in eight core areas: professional orientation and ethical practice; social and cultural diversity; human growth and development, career development; helping relationships; group work; assessment; and research and program evaluation. Students seeking the Ed.S. in School Counseling must demonstrate that they have the knowledge, skills and practices necessary to promote the academic, career, and personal/social development of all P-12 students. School Counseling Program standards require assessment of knowledge, skills and practices in the areas of foundations; counseling, prevention and interventions; diversity and advocacy; assessment; research and evaluation; academic development; collaboration and consultation; and leadership. Assessment in these areas will occur during the internship as well as in school counseling specific classes that students are required to complete. The assessment process itself is monitored to determine if it is effective for assessing student progress. The School Counseling faculty will continue to examine the goals and objectives for the Education Specialist Program in School Counseling. If revisions are made in the goals and objectives, the methods for assessing them also will change. In addition, the rubrics used for assessment will be examined for possible changes. Currently no changes have been made in the assessment process.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

100% of Ed.S.-seeking students are meeting the goals set by the School Counseling faculty for the Ed. S. program. This indicates that the data obtained from the assessment findings support continuing the current curriculum.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 School Counseling MEd**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The School Counseling program within the Department of Counseling and Psychological Services at Georgia State University is dedicated to training professional school counselors who are prepared to use school data to design, implement, and evaluate developmentally appropriate school counseling programs that promote academic, vocational and personal/social success for all K-12 students. Student learning occurs in the following areas: student data collection in diverse K-12 schools, delivery of counseling and guidance services, collaboration and consultation with parents and other educators, and the design, implementation, and evaluation of a comprehensive K-12 school counseling program. Our model for school counselor preparation is based on the American School Counselor Association’s (ASCA) National Model for School Counseling Programs and the Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for School Counseling Programs.

**Goals**

**G 1: Foundations of School Counseling**

Foundations of school counseling include the history and philosophy of the school counseling profession, professional roles and credentialing, current models of school counseling programs (ASCA National Model) and ethical and legal standards related to the profession.

**G 2: Counseling Interventions**

Counseling interventions include individual, small and large group and school-wide approaches to intervention.

**G 3: Social Justice: Diversity, Leadership and Advocacy**

Diversity includes the cultural, ethical, economic, legal, and political issues surrounding community, environmental and institutional opportunities that enhance, as well as barriers that impede, the academic, career and personal/social development of all P-12 students. Diversity pertains to the effects of ability levels, stereotyping, family, socioeconomic status, gender and sexual identity and their effects on student achievement. Working as leaders, school counselors promote student success by closing existing achievement gaps, and influencing systemwide changes for school reform. School counselors advocate for students’ educational needs and work proactively to remove barriers to learning.

**G 4: Assessment**

Assessment includes selecting appropriate assessment strategies that can be used to evaluate the academic, career and personal/social development of all P-12 students and analyzing assessment information to determine needs as well as the effectiveness of educational programs.

**G 5: Research and Evaluation**

Research and evaluation includes knowing basic strategies for evaluating counseling outcomes and methods of using data to inform decision making and accountability. In addition it includes developing measurable outcomes for school counseling programs, activities, interventions and experiences.

**G 6: Academic Development**

To promote academic development, school counselors work to close achievement gaps and use differentiated instructional strategies to teach counseling and guidance related material to promote the achievement of all students.

**G 7: Consultation and Collaboration**

Consultation and collaboration includes empowering parents, guardians and families to act on behalf of their children, locating and
Student Learning Outcomes/Objectives

SLO 1: Knowledge of Foundations of School Counseling (G: 1) (M: 1)
Students will demonstrate an understanding of the foundations of school counseling including history and philosophy, professional identity, roles and credentialing, and ethical and legal standards related to the profession on a comprehensive exam in CPS 6020/6030.

Relevant Associations: The Council for Counseling and Related Educational Programs (CACREP)

SLO 2: Demonstrates Skills in Counseling and Guidance (G: 2) (M: 2)
During CPS 7661 and CPS 7681 (practicum and internship) students must demonstrate individual and small group counseling skills. Individual counseling skills include understanding counseling theories related to the school setting, using a consistent model to conceptualize student concerns and selecting appropriate counseling interventions, structuring the session, establishing and maintaining open and honest communication, responding empathetically, using appropriate questioning techniques, reflecting content and feelings, allowing silence when appropriate, identifying and disclosing mistaken goals of behavior, offering alternatives when appropriate, summarizing and using appropriate closure techniques. In addition, interns must demonstrate their effective use of peer facilitation and their ability to deal with specific issues such as abuse, eating disorders, drug abuse, and suicide risk, etc. Small group counseling skills include understanding the theoretical and experiential aspects of group purpose, development, dynamics, counseling theories, group counseling methods and skills, using group process observations within the group setting to facilitate student growth and development, using a consistent theoretical model or approach when planning group strategies, effectively structuring group sessions, facilitating the establishment of group norms/clear ground rules and consequences, maintaining an open/relaxed atmosphere, reflecting content and feelings of group members, inviting and/or encouraging all group members to participate, using appropriate summary/closure techniques, and effectively terminating the group experience. Students use individual counseling and small group counseling to promote academic development, career development and personal/social development.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 3: Demonstrates Interpersonal Skills used in Counseling (G: 2) (M: 3)
Students demonstrate interpersonal skills learned during CPS 6410 including building rapport, reflecting feeling and content, summarizing, setting goals, planning interventions, and closure.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 4: Demonstrates Knowledge of Diversity (G: 3) (M: 4)
Research indicates that a significant contributor to multicultural competencies is experience with culturally diverse individuals. Towards this end, students enrolled in CPS 7340 will create a field experience plan that will allow opportunities to combine theory with practice, extend learning and reinforce concepts gained through reading, lectures, and class participation. Students must attend a social event or cultural happening focusing on a group whose race, ethnicity, gender, or sexual orientation differs from their own. Students must observe verbal and non verbal behaviors and initiate social interactions. In addition, students will read journal articles or book chapters that relate to the cultural group identified in the field project. The experience will be described in a paper.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 5: Demonstrates MC Awareness, Advocacy, Ldrship (G: 3) (M: 5)
Interns must demonstrate their ability to respect students as individuals with differing personal and family backgrounds and with different skills, talents, and interests. Interns must be sensitive to school, community and cultural norms, understand the counselor’s role in social justice, advocacy, and conflict resolution, and effectively use knowledge of culture, advocacy, and social justice to create academic, personal/social, and career development programs that meet the needs of diverse populations.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 6: Knowledge of Indiv & Group Approaches to Appraisal (G: 4) (M: 6)
In CPS 7450 students demonstrate their understanding of appraisal concepts by writing a case study that includes a definition of appraisal, how appraisal relates to the counseling process, intake questions and anticipated responses, issues that need to be addressed and evaluated further, selected instruments and rationale for their selection, legal, ethical and moral issues, resolutions, and multicultural considerations.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 7: Demonstrates Advocacy, Ldrshp, Action Research (G: 3, 5, 6) (M: 7)
Work on the Targeted Intervention Project (TIP) is begun during CPS 8260 and completed during CPS 7661/7681. Students analyze the demographic data from their school and determine where gaps exist between demographic groups in achievement, access to classes, or other services, formulate a plan that is academically and developmentally appropriate to close the gap, and implement that plan. A research method is selected to evaluate the results of the plan. A paper is written describing their efforts.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 8: Demonstrates Classroom Guidance Skills (G: 6) (M: 8)
Students must demonstrate the following classroom guidance skills: defining session goals, structuring the group, using age appropriate materials, using a variety of activities, keeping the group on task, employing effective classroom management skills, pacing the lesson appropriately, and using appropriate summary/closure techniques.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

SLO 9: Knowledge of Consultation & Collaboration (G: 7) (M: 9)
Students must demonstrate their knowledge of consultation and collaboration, including theories of consultation, methods of working
with parents, families, teachers, and communities to empower them and build partnerships, and conducting programs to enhance students’ development needs.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

**SLO 10: Demonstrates Consultation & Collab. Skills (G: 7) (M: 10)**

Students must demonstrate the following consultation and collaboration skills: establishing rapport, structuring the interview, responding empathetically, reflecting content, providing encouragement/support, identifying mistaken goal of behavior, defining and focusing on problem areas, helping to develop a plan of action or treatment strategy, helping the consultee learn to advocate for self as appropriate, planning for follow-up session, and using appropriate closure techniques.

Relevant Associations: Council on Accreditation of Counseling and Related Educational Programs

**Measures, Targets, and Findings**

**M 1: Comprehensive Exam (O: 1)**

CPS 6020/6030 provides an overview of the foundations and unique issues of school counseling, including history and philosophy, professional roles and credentials, and ethical and legal standards related to the profession. The comprehensive test covers all aspects of the course to assess student knowledge.

Source of Evidence: Academic indirect indicator of learning - other

**Target for O1: Knowledge of Foundations of School Counseling**

At least 90% of the students will earn a B or better on the comprehensive exam.

**Findings 2010-2011 - Target: Met**

100% of the students earned a B or better on the comprehensive exam.

**M 2: Site Supr. Eval of Indiv & Small Group Counseling (O: 2)**

Site supervisors for CPS 7661/7681 evaluate their intern’s skills in individual and small group counseling. Evaluation consists of case consultation, listening to tape recorded sessions and/or direct observation.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O2: Demonstrates Skills in Counseling and Guidance**

At least 80% of the students will be rated at the novice/independent level or higher on the over-all area for individual counseling. At least 80% of the students will be rated at the novice/independent level or higher on the over-all area for small group counseling. Site supervisors will provide the ratings.

**Findings 2010-2011 - Target: Met**

100% of the students were rated at the novice/independent level or higher on the over-all area for individual counseling and for small group counseling.

**M 3: Final Video Tape (O: 3)**

Students are evaluated on their effective use of counseling skills via a final video tape role play in CPS 6410. This tape should reflect skills learned during the semester, including building rapport, reflecting feeling and content, summarizing, setting goals, planning interventions and closure.

Source of Evidence: Video or audio tape (music, counseling, art)

**Target for O3: Demonstrates Interpersonal Skills used in Counseling**

At least 90% of the students will earn a score at or above the cut-off score of 25.

**Findings 2010-2011 - Target: Met**

100% of the students earned a score at or above the cut-off score of 25. On the first try, 94% of the students earned this score. One student earned at least 25 on the second try.

**M 4: Multicultural Experience Activity (O: 4)**

Research indicates that a significant contributor to multicultural competencies is experience with culturally diverse individuals. Towards this end, students enrolled in CPS 7340 will create a field experience plan that will allow opportunities to combine theory with practice, extend learning and reinforce concepts gained through reading, lectures, and class participation. Students must attend a social event or cultural happening focusing on a group whose race, ethnicity, gender, or sexual orientation differs from their own. Students should observe verbal and non verbal behaviors and initiate social interactions. In addition, students will read journal articles or book chapters that relate to the cultural group identified in the field project. Students will write a 4-5 page paper that summarizes knowledge gained from the field experience and from the readings.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Demonstrates Knowledge of Diversity**

At least 80% of the students will earn a B or better on the multicultural experience activity.

**Findings 2010-2011 - Target: Met**

100% of the students earned a B or better on the multicultural experience activity.

**M 5: Site Supr. Eval. of MC Awareness, Advocacy, Ldrshp (O: 5)**

Site supervisor's for CPS 7661/7681 evaluate students on their ability to articulate, model and advocate for an appropriate school
counselor identity and program; demonstrate a commitment to helping all students excel; appreciate and value human diversity; show respect for students' varied talents and perspectives by designing and implementing prevention and intervention plans related to the effects of atypical growth and development, health and wellness, language, ability level, multicultural issues and factors of resiliency on student learning and development; respect students as individuals with differing personal and family backgrounds and with different skills, talents, and interests; sensitivity to school, community and cultural norms; help students feel valued and learn to value each other; understand the counselor's role in social justice, advocacy, and conflict resolution; be culturally self-aware and understand the impact of biases, prejudices, processes of intentional and unintentional oppression and discrimination on the student's academic, personal/social, and career development; effective use of knowledge of culture, advocacy, and social justice to create academic, personal/social and career development programs that meet the needs of the diverse population; and other aspects of multicultural awareness, advocacy, and leadership in the school setting.

Source of Evidence: Field work, internship, or teaching evaluation

100% of the students were rated at the novice/independent level or higher on the overall area rating for consultation and collaboration skills.

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Maintain and Monitor**

The School Counseling faculty members meet regularly (twice per month - or more) in order to assess other issues that may arise that are not currently being addressed in our training program. This is a portion of our continuous improvement plan that we implement in accordance with our national accrediting bodies: NCATE and CACREP. As we maintain and monitor our training program, we make decisions collectively, and in accordance with our national standards, when courses or other training experiences need to be altered.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 09/2011
- **Responsible Person/Group:** School Counseling Faculty

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process is very specific and comprehensive because of new requirements by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP 2009). Students are assessed on standards in eight core areas: professional orientation and ethical practice; social and cultural diversity; human growth and development; career development; helping relationships; group work; assessment; and research and program evaluation. CACREP also requires program specific standards (89 specific standards over 8 areas). Students who are preparing to become school counselors must demonstrate that they have the knowledge, skills and practices necessary to promote the academic, career, and personal/social development of all P-12 students. School Counseling Program standards require assessment of knowledge, skills and practices in the areas of foundations; counseling, prevention and interventions; diversity and advocacy; assessment; research and evaluation; academic development; collaboration and consultation; and leadership. Assessment in these areas will occur during practicum and internship as well as in core and school counseling specific classes that students are required to complete. Each student is assessed on each standard (core and program) to determine if remediation needs to take place. At the end of each semester the program faculty will assess how well the standards are being taught and will make any necessary changes in the curriculum. The assessment process itself also will be monitored to determine if it is effective for assessing student progress.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The assessments indicate that our students are performing effectively. We will continue to provide the instructions and experiences that we now provide. Changes were made in the objectives for the required courses because of changes in requirements by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Also, a course in crisis intervention was added to the curriculum because of new CACREP standards pertaining to this topic. Because of Board of Regents regulations that Master's program must be no more than 48 semester hours, a course in multicultural education was dropped to make room for crisis intervention. Multicultural education is covered in another course in the CPS Department.

**ADMINISTRATIVE DEPT QUESTION 2:**

What have you learned from your assessment this year (2010-2011)?

The students met all of the assessment requirements set by the program; thus, we believe our program curriculum is meeting the needs of M.Ed. students effectively. From informal evaluations, it was found that the students wanted their site placements earlier so that they could become familiar with their school site during the summer before their placement began. In this way they could more easily satisfy the requirements that are based on school data.
**Mission / Purpose**

The goal of the Masters/Ed.S. program in School Psychology is to train school psychologists to become certified for work in the schools. By successfully completing the courses, practica and internships in this program, the graduating school psychologists are prepared to continue to provide and evaluate effective school psychological services that include consultation, preventive intervention, counseling as well as data-based decision making and psycho-educational diagnosis targeted to students, teachers, parents, administrators and community members affiliated with public schools. In addition, graduates develop advanced knowledge and skills in using research methodology and statistics, in planning, implementing, and evaluating school-based evaluation research, in understanding current trends in the field of school psychology, in ethical issues relevant to the practice of psychology in educational settings and in using technology to facilitate practice in school settings.

**Goals**

**G 2: Understands School Psychology Practice**
Students will understand the foundations and practice of school psychology.

**G 1: Professionalism**
To ensure that our graduates are prepared to work in a diverse society. In addition, our graduates are informed about and committed to legal and ethical practices.

**G 3: Scientific and Research Foundations for Professional Practice**
To ensure that our graduates are sufficiently grounded in the basic science of psychology and that they can use research findings to properly conduct research, particularly in educational settings.

**G 4: Professional Strategies Targeted to the Needs of Learners, Their Parents, and Their Schools**
To ensure that our graduates are proficient at providing intervention, consultation, and psychoeducational assessments.

**Student Learning Outcomes/Objectives**

| SLO 1: Understand Development of Wellness, Socialization and Life Competencies (G: 4) (M: 1, 2, 3) |
| Students will understand the development of socialization skills and life competencies in school-age children. |
| Relevant Associations: NASP & NCATE |

| SLO 2: Develops Cognitive and Academic Skills (G: 4) (M: 1, 2, 3) |
| Students will understand the developmental progress of Cognitive and Academic skills in children. |
| Relevant Associations: NASP & NCATE |

| SLO 3: Promotes System-Based Service Delivery Through Collaboration (G: 2) (M: 1, 2, 3) |
| Students will demonstrate competence in home/school/community collaboration. |
| Relevant Associations: NASP & NCATE |

**Strategic Plan Associations**

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

| SLO 4: Implements Data Based Decision Making (G: 4) (M: 1, 2, 3) |
| Students will be able to implement effective Data-Based Decision Making. |
| Relevant Associations: NASP & NCATE |

| SLO 5: Understand Professional, Legal, Ethical Responsibilities (G: 2) (M: 1, 2, 3, 4) |
| Student will understand responsibilities related to professional, legal, and ethical duties. |
| Relevant Associations: NASP & NCATE |

| SLO 6: Effectively utilizes technological applications (G: 1) (M: 1, 2, 3) |
| Students will understand and utilize information technology effectively. |
| Relevant Associations: NASP & NCATE |

| SLO 7: Understand diversity, development, & learning (G: 1, 2, 3, 4) (M: 1, 2, 3) |
| Student will understand student diversity in development and learning in the schools. |
| Relevant Associations: NASP & NCATE |

**Strategic Plan Associations**
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).
5.4 Enhance the global competency of students, faculty and staff.

**SLO 8: Effective at Consultation & Collaboration (G: 4) (M: 1, 2, 3)**
Students will practice effective consultation and collaboration in schools.
Relevant Associations: NASP & NCATE

**SLO 9: Understands School Organizations, Policy, & Climate (G: 2) (M: 1, 2, 3)**
Students will understand school system organization, policy development, and school climate for school-age children.
Relevant Associations: NASP & NCATE

**SLO 10: Understands Prevention & Crisis Intervention (G: 4) (M: 1, 2, 3)**
Students will understand and learn how to implement effective methods of prevention and crisis intervention involving children's mental health.
Relevant Associations: NASP & NCATE

**SLO 11: Understands Research and Program Evaluation (G: 3) (M: 1, 2, 3)**
Students will conduct and understand research and program evaluation.
Relevant Associations: NASP & NCATE

---

### Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

### Measures, Targets, and Findings

#### M 1: Internship Portfolio (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11)
The Internship Portfolio is a compilation of psychological reports consultation reports, assigned activities, the site-based supervisors' rating and university-based supervisors' rating of the student that demonstrates the graduate student's performance and mastery of required skills and competency in program objectives.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Understand Development of Wellness, Socialization and Life Competencies**
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

- **Findings 2010-2011 - Target: Met**
  - 100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

**Target for O2: Develops Cognitive and Academic Skills**
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

- **Findings 2010-2011 - Target: Met**
  - 100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

**Target for O3: Promotes System-Based Service Delivery Through Collaboration**
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

- **Findings 2010-2011 - Target: Met**
  - 100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

**Target for O4: Implements Data Based Decision Making**
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

- **Findings 2010-2011 - Target: Met**
  - 100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

**Target for O5: Understand Professional, Legal, Ethical Responsibilities**
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

- **Findings 2010-2011 - Target: Met**
  - 100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

**Target for O6: Effectively utilizes technological applications**
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

- **Findings 2010-2011 - Target: Met**
  - 100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.
### Target for O7: Understand diversity, development, & learning
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

### Target for O8: Effective at Consultation & Collaboration
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

### Target for O9: Understands School Organizations, Policy, & Climate
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

### Target for O10: Understands Prevention & Crisis Intervention
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

### Target for O11: Understands Research and Program Evaluation
100% of Ed.S. interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. interns received a rubric rating of "3" or higher for this area of competency.

### M 2: Practicum Portfolio (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11)
Practicum Portfolio is a compilation of psychological reports, consultation reports, assigned activities, the site-based supervisors' rating, and the university-based supervisors' rating of the student that demonstrates the graduate student's acquisition of required skills and competency in targeted areas.

**Source of Evidence:** Portfolio, showing skill development or best work

### Target for O1: Understand Development of Wellness, Socialization and Life Competencies
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

### Target for O2: Develops Cognitive and Academic Skills
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

### Target for O3: Promotes System-Based Service Delivery Through Collaboration
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

### Target for O4: Implements Data Based Decision Making
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

### Target for O5: Understand Professional, Legal, Ethical Responsibilities
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.
Target for **O6**: Effectively utilizes technological applications  
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

Target for **O7**: Understand diversity, development, & learning  
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

Target for **O8**: Effective at Consultation & Collaboration  
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

Target for **O9**: Understands School Organizations, Policy, & Climate  
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

Target for **O10**: Understands Prevention & Crisis Intervention  
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

Target for **O11**: Understands Research and Program Evaluation  
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of Ed.S. practicum students received a rubric rating of "3" or higher for this area of competency.

**M 3: Supervisor Ratings (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11)**  
Practicum and Internship site-based supervisor's rate the students' skill and acquisition of school psychology knowledge and skills across the identified objectives of the EdS program.  
Source of Evidence: Performance in subsequent schooling feedback

Target for **O1**: Understand Development of Wellness, Socialization and Life Competencies  
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

Target for **O2**: Develops Cognitive and Academic Skills  
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

Target for **O3**: Promotes System-Based Service Delivery Through Collaboration  
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

**Findings 2010-2011 - Target: Met**  
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

Target for **O4**: Implements Data Based Decision Making
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O5: Understand Professional, Legal, Ethical Responsibilities
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O6: Effectively utilizes technological applications
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O7: Understand diversity, development, & learning
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O8: Effective at Consultation & Collaboration
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O9: Understands School Organizations, Policy, & Climate
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O10: Understands Prevention & Crisis Intervention
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Target for O11: Understands Research and Program Evaluation
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

#### Findings 2010-2011 - Target: Met
100% of internship and practicum students received a rating of "3" or higher from their field-based supervisor for this area of competency.

### M 4: PEF Disposition Survey (O: 5)
Students complete the Professional Education Faculty's unit-wide Student Disposition Survey at multiple points in the program (prior to practicum, at the conclusion of practicum, exit from the program, and 1 year post-graduation).

Source of Evidence: Student course evaluations on learning gains made

#### Target for O5: Understand Professional, Legal, Ethical Responsibilities

---

[Note: This text seems to be a draft or an excerpt from a larger document. The table structure and content are consistent with the text provided.]
Student survey responses will demonstrate an understanding of their professional, legal, and ethical responsibilities as school psychologists.

Findings 2010-2011 - Target: Not Reported This Cycle
This survey was in development by the GSU Professional Education Faculty (PEF) during the 2010-2011 school year.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Administration of PEF Student Disposition Survey
This survey is currently being finalized by the appropriate PEF committees.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: PEF Disposition Survey | Outcome/Objective: Understand Professional, Legal, Ethical Responsibilities

Implementation Description: We hope to implement this during Spring 2012.
Responsible Person/Group: School Psychology Faculty
Additional Resources: Administrative support for moving assessment materials and data to LiveText

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The Professional Education Faculty has moved from using faculty and student ratings on the STARS to a unit-wide survey of students’ dispositions. Our assessment measures have been revised to reflect these changes. In addition, we are in the process of moving (with the rest of the College of Education) to full implementation of the LiveText assessment management program. The use of LiveText will facilitate and improve our ability to collect and analyze data on student learning and outcomes.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

School psychology has a long history of using data on student performance for evaluating our degree program. We have used this data to make changes to the program in previous years, but have no curriculum or course changes to report for the current year.

Georgia State University
Assessment Data by Section
2010-2011 School Psychology PhD
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The GSU school psychology PhD is an innovative program that seeks to develop and amplify the role of the school psychologist beyond their traditional roles and functions. Training is oriented toward developing students who are proficient practitioners and researchers. Students refine their knowledge and skills in assessment, prevention/intervention, and consultation. Students develop a cognate that reflects their particular interests and intended area of specialization. PhD school psychology students are also trained to be producers of research.

Goals

G 1: Goal 1: Professionalism
To prepare our graduates to ground his/her practice in basic science and to conduct legal and ethical practices in a pluralistic, diverse society.

G 2: Goal 2: Scientific and Research Foundations for Professional Practice
To ensure that our graduates can use research findings and properly conduct research, particularly research regarding the practice of psychology in educational settings.

G 3: Goal 3: Professional Strategies Targeted to the Needs of Learners, Their Parents, and Their Schools
To ensure that our graduates are proficient at intervention, consultation, and assessment.

G 4: Goal 4: Area of Sub-Specialization
To ensure that our graduates, in addition of professional preparation as a school psychologist, has a subspecialty.

### Measures, Targets, and Findings

#### M 1: Successful completion of pre-dissertation research (O: 5)
PhD students must complete a pre-dissertation research project as part of the program and prior to taking the comprehensive exam.

**Source of Evidence:** Project, either individual or group

**Target for O5: Use and conduct research**
100% of students will successfully complete their pre-dissertation.

**Findings 2010-2011 - Target: Met**
100% of students who attempted this component of the program during the 2010-2011 school year were successful.

#### M 2: Successful completion of dissertation research (O: 5)
A doctoral dissertation that represents independent scholarly research is required.

**Source of Evidence:** Senior thesis or culminating major project

**Target for O5: Use and conduct research**
100% of students who defend their dissertation will be successful.

**Findings 2010-2011 - Target: Met**
100% of students who attempted this component of the program during the 2010-2011 school year were successful.

#### M 3: Successful completion of comprehensive examination (O: 2, 4, 5, 6, 7, 8)
A comprehensive examination that assesses knowledge of advanced principles of psychology, school psychology, ethics, and professional practice must be passed prior to graduation.

**Source of Evidence:** Comprehensive/end-of-program subject matter exam

**Target for O2: Follow the tenets of legal, ethical, and social responsibility in practice**
As part of their comprehensive examination, at least 90% of students will demonstrate the ability to follow tenets of legal, ethical, and social responsibility in practice.

**Findings 2010-2011 - Target: Met**
During 2010 and 2011, 84% of school psychology doctoral students passed their comprehensive examination on the first attempt; 94% passed on their first or second attempt.

**Target for O4: Understand the principles of psychology and school psychology**
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of the principles of psychology and school psychology.

**Findings 2010-2011 - Target: Met**
During 2010 and 2011, 84% of school psychology doctoral students passed their comprehensive examination on the first attempt; 94% passed on their first or second attempt.

**Target for O5: Use and conduct research**
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of the use and conduct of research.

**Findings 2010-2011 - Target: Met**
During 2010 and 2011, 84% of school psychology doctoral students passed their comprehensive examination on the first attempt; 94% passed on their first or second attempt.

**Target for O6: Intervention**
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of effective intervention practices.

**Findings 2010-2011 - Target: Met**
During 2010 and 2011, 84% of school psychology doctoral students passed their comprehensive examination on the first attempt; 94% passed on their first or second attempt.

**Target for O7: Consultation**
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of effective consultation practices.

**Findings 2010-2011 - Target: Met**
During 2010 and 2011, 84% of school psychology doctoral students passed their comprehensive examination on the first attempt; 94% passed on their first or second attempt.

**Target for O8: Psychoeducational Assessment**
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of psychoeducational assessment.

**Findings 2010-2011 - Target: Met**

During 2010 and 2011, 84% of school psychology doctoral students passed their comprehensive examination on the first attempt; 94% passed on their first or second attempt.

**M 5: Readiness for Entry into Practice (O: 1, 2, 3, 4, 5, 6, 7, 8)**

Our graduates are assessed evaluating all program goals during his/her pre-doctoral internship. Licensed site supervisors are asked to evaluate each student utilizing a 5 point likert scale. 5= Student demonstrates outstanding and/or advanced performance on this objective and competency, 4= Student demonstrates satisfactory performance on this objective and competency. 3= Student’s performance on this objective and competency is developing. 2= Student’s performance on this objective needs improvement; remediation plan may be required. 1= Student’s performance on this objective and competency is unsatisfactory; remediation required.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O1: Diversity Awareness & Sensitive Service Delivery**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O2: Follow the tenets of legal, ethical, and social responsibility in practice**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O3: Understand the practice of psychology**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O4: Understand the principles of psychology and school psychology**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O5: Use and conduct research**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O6: Intervention**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O7: Consultation**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Target for O8: Psychoeducational Assessment**

100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2010-2011 - Target: Met**

100% of doctoral interns received a rubric rating of "3" or higher for this area of competency.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

Consider modification of comprehensive examination process
The school psychology faculty will review student performance on previous and up-coming administrations of our doctoral comprehensive examination. Based on our review, revisions may be made to the examination structure and/or scoring process.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: High  
Implementation Description: Review of comprehensive examination results; discuss and possible development of alternate comp procedures.  
Projected Completion Date: 05/2013  
Responsible Person/Group: School Psychology Faculty

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made to our assessment process this year. No changes are planned for the upcoming academic year.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

No changes were made to the program this year. Some changes in the course sequence are anticipated during the current year based on changes at the college level in the doctoral core.

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Science Education MEd**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

**Goals**

G 1: Exploring issues of equity in the science classroom

Exploring issues of equity in the science classroom

G 2: Becoming reflective practitioners

Becoming reflective practitioners through the use of inquiry/action research

**Outcomes/Objectives**

O/O 1: Constructs and uses assessments effectively (G: 2) (M: 2)

Teachers of science construct and use effective assessment strategies to determine the backgrounds and achievements of learners and facilitate their intellectual, social, and personal development. They assess students fairly and equitably, and require that students engage in ongoing self-assessment.

O/O 2: Promotes science in the community (G: 1) (M: 9)

Teachers of science relate their discipline to their local and regional communities, involving stakeholders and using the individual, institutional, and natural resources of the community in their teaching. They actively engage students in science-related studies or activities related to locally important issues.

O/O 3: Strives for continuous professional growth (G: 2) (M: 10)

Teachers of science strive continuously to grow and change, personally and professionally, to meet the diverse needs of their students, school, community, and profession. They have a desire and disposition for growth and betterment.

O/O 4: Engages learners in the nature of Science (G: 2) (M: 3, 6)

Teachers of science engage students effectively in studies of the history, philosophy, and practice of science. They enable students to distinguish science from nonscience, understand the evolution and practice of science as a human endeavor, and critically analyze assertions made in the name of science.

O/O 5: Promotes learners’ safety and welfare (G: 1) (M: 1)

Teachers of science organize safe and effective learning environments that promote the success of students and the welfare of all living things. They require and promote knowledge and respect for safety, and oversee the welfare of all living things used in the classroom or found in the field.
Measures, Targets, and Findings

**M 1: Portfolio Element: Safety Certification (O: 5)**

The teacher candidates will be required to attend the safety certification course at Georgia State University. Students will attach a copy of the certificate in their portfolio using the format provided below. The safety certification will be used as satisfactory way to meet the safety standard. Students will either attach a copy of the completion certificate or scan your certificate and insert it at the bottom of this document.

**Target for O5: Promotes learners’ safety and welfare**

100% of teacher candidates will attend and 90% will successfully complete the safety certification workshop.

**Findings 2010-2011 - Target: Met**

100% of students successfully completed the safety certification workshop.

**M 2: Portfolio component: SSI lesson plan (assessment) (O: 1)**

Teacher candidates develop a SSI mini unit based on the processes described in class. Mini-unit will consist of five lessons (the lessons will focus on Nature of Science, Inquiry, SS issues, science in the community, and assessment. The SSI unit should include a title page, the unit as defined in class, references, and any ancillary materials (handouts, lab sheets, assignment sheets, etc.). The unit plan will engage their students in science related learning for a total of 5 hours. This lesson plan will focus on student assessment. The SSI unit is graded using a rubric using various criteria on a 4 point scale. A rating point of 3 indicates that the teacher candidates have incorporated all the five components in the lesson plans with a strong emphasis, 2 indicates that the teacher candidates have incorporated all the elements, 1 indicates that the teacher candidates have inferred the integration of various components, and 0 indicates that the various components are missing from the SSI unit criteria. The SSI unit is graded using a rubric using various criteria on a 4 point scale. A rating point of 3 indicates that the teacher candidates have incorporated all the five components in the lesson plans with a strong emphasis, 2 indicates that the teacher candidates have incorporated all the elements, 1 indicates that the teacher candidates have inferred the integration of various components, and 0 indicates that the various components are missing from the SSI unit criteria.

**Target for O1: Constructs and uses assessments effectively**

90% of teacher candidates attain a score of ‘2’ or higher on element rubric.

**Findings 2010-2011 - Target: Met**

100% of teacher candidates attain a score of ‘2’ or higher on element rubric.

**M 3: Portfolio Element: Socio-Scientific Issues Plan (O: 4)**

Teacher candidates develop a SSI mini unit based on the processes described in class. Mini-unit will consist of five lessons (the lessons will focus on Nature of Science, Inquiry, SS issues, science in the community, and assessment. The SSI unit should include a title page, the unit as defined in class, references, and any ancillary materials (handouts, lab sheets, assignment sheets, etc.). The unit plan will engage their students in science related learning for a total of 5 hours. The SSI unit is graded using a rubric using various criteria on a 4 point scale. A rating point of 3 indicates that the teacher candidates have incorporated all the five components in the lesson plans with a strong emphasis, 2 indicates that the teacher candidates have incorporated all the elements, 1 indicates that the teacher candidates have inferred the integration of various components, and 0 indicates that the various components are missing from the SSI unit criteria.

**Target for O4: Engages learners in the nature of Science**
Teacher candidates will identify a minimum of 5 peer-reviewed articles that encompass student and teacher interactions (for e.g. classroom management, modification for ESOL learners, science teaching in urban settings, and technology integration etc.). The students will summarize the articles, reflect on the findings of the articles, and discuss the implications for a classroom. The lesson plan is graded using a rubric using various criteria on a 3 point scale. A rating point of 3 indicates that the student exceeds expectation, 2 indicates that the student meets expectations, and 1 indicates that the student has not met the criteria.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O8: Can engage learners in inquiry**

90% of teacher candidates attain a score of ‘2’ or higher on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher on element rubric.

**M 5: Portfolio Element: Peer teaching/Reflection paper (O: 9)**

Teacher candidates use one of the lesson plans in the SSI unit to do peer teaching. For the purpose of Peer teaching, they the lesson plan must include: objectives to be taught; activity materials; development of a problem-solving experience for the students; contextualizing the lesson plan in a specific context. The peer teaching will take place in class between 15 to 20 minutes. Post peer-teaching, the teacher candidates will document reflective thoughts about the lesson (two pages). They will answer the following questions: To what extent did you achieve the objectives, rationale, or purpose of the lesson? What did you feel were the strengths of the lesson? The weaknesses of the lesson? What was your perception of the classroom climate? How would you describe the students’ behavior during the presentation? What would you suggest for improvement in teaching the lesson? The peer teaching is graded using a rubric using various criteria on a 4 point scale. A rating point of 5 indicates that the teacher candidates have incorporated all the components of effective teaching in their peer teaching with a strong emphasis, 4 indicates that the teacher candidates have incorporated all the elements, 3 indicates that the teacher candidates taught the lesson ineffectively using various components, and rating of 0-2 indicates that the teacher candidates did not demonstrate various components of effective teaching in their peer teaching.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O9: Can plan and implement science curriculum**

90% of teacher candidates attain a score of ‘4’ or higher on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘4’ or higher on element rubric.

**M 6: Socio-Scientific Issues Unit (Nature of Science) (O: 4)**

Teacher candidates develop a SSI mini unit based on the processes described in class. Mini-unit will consist of five lessons (the lessons will focus on Nature of Science, Inquiry, SS issues, science in the community, and assessment). The SSI unit should include a title page, the unit as defined in class, references, and any ancillary materials (handouts, lab sheets, assignment sheets, etc.). The unit plan will engage their students in science related learning for a total of 5 hours. The SSI unit is graded using a rubric using various criteria on a 4 point scale. A rating point of 5 indicates that the teacher candidates have incorporated all the five components in the lesson plans with a strong emphasis, 2 indicates that the teacher candidates have incorporated all the elements, 3 indicates that the teacher candidates taught the lesson ineffectively using various components, and rating of 0-2 indicates that the teacher candidates have inferred the integration of various components, and 0 indicates that the various components are missing from the SSI unit criteria.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O4: Engages learners in the nature of Science**

90% of teacher candidates attain a score of ‘2’ or higher on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher on element rubric.

**M 7: Portfolio element:Curriculum Exploration/Analysis (O: 6)**

The curriculum exploration and analysis paper will require teacher candidates to generate a list of criteria after consulting professional documents to evaluate curriculum materials. Using these criteria, the teacher candidates will examine two science curricula: one traditional curriculum developed by textbook publishing companies and one NSF reform based curriculum. The teacher candidates will write a report based on the criteria highlighting the strengths and weaknesses of each curriculum. The curriculum explorations paper is graded using a rubric on a 3 point scale. A rating point of 3 indicates that the teacher candidates exceeds expectations, 2 indicates that the teacher candidates meets expectations, and 1 indicates that the teacher candidates has not met the criteria.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O6: Knows and can apply modern science content**

90% of teacher candidates attain a score of ‘2’ or higher on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher on element rubric.
**M 8: Student portfolio element: Lesson Plan (O: 6)**

Demonstration of content skills through a lesson plan. The Content knowledge section of the portfolio focuses on candidates' understanding of the foundations of science (NSTA standard 1) through the development of a Socio-Scientific Issues Science (SSI) Unit that covers a science topic of social relevance. These units include all lesson plans, assessments, and resources for teaching the unit. The lesson plan is graded using a rubric using various criteria on a 3 point scale. A rating point of 3 indicates that the teacher candidates exceeds expectactions, 2 indicates that the teacher candidate meets expectations, and 1 indicates that the teacher candidates has not met the criteria.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O6: Knows and can apply modern science content**

90% of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

**M 9: Portfolio Element: Socio-Scientific Issues Unit (O: 2, 7)**

Teacher candidates develop an SSI mini unit based on the processes described in class. Mini-unit will consist of five lessons (the lessons will focus on Nature of Science, Inquiry, SS issues, science in the community, and assessment. The SSI unit should include a title page, the unit as defined in class, references, and any ancillary materials (handouts, lab sheets, assignment sheets, etc.). The unit plan will engage students in science related learning for a total of 5 hours. The SSI unit is graded using a rubric using various criteria on a 4 point scale. A rating point of 3 indicates that the teacher candidates have incorporated all the five components in the lesson plans with a strong emphasis, 2 indicates that the teacher candidates have incorporated all the elements, 1 indicates that the teacher candidates have inferred the integration of various components, and 0 indicates that the various components are missing from the SSI unit criteria.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Promotes science in the community**

90% of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

**Target for O7: Understand issues in science and technology**

90% of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

**M 10: Professional Growth Plan (O: 3)**

Teacher candidates will submit at least three documents/artifacts demonstrating professional growth activities/plan within the last two years. Teacher candidates will be given choices in terms selecting the artifacts such as becoming active members of NSTA/GSTA (National Science Teachers Association/ Georgia Science Teachers Association), in-service professional development workshops, presentations at conferences, and publications in scholarly journals etc. Teacher candidates will describe what they learnt from their experiences with the help of a reflection paper. They will describe the artifacts that document their professional growth. They will evaluate their own professional growth, list their ongoing goals and design a plan to meet these goals. The professional growth plan and the reflection paper will be graded using a rubric using various criteria on a 3 point scale. A rating point of 3 indicates that the student exceeds expectation), 2 indicates that the student meets expectations, and 1 indicates that the students has not met the criteria.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O3: Strives for continuous professional growth**

90% of students attain a score of ‘2’ or higher’ on element rubric.

**Findings 2010-2011 - Target: Met**

100 % of teacher candidates attain a score of ‘2’ or higher’ on element rubric.

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Pk-12 Involvement**

Program faculty will maintain the current design and implementation of the program, but explore and implement ways to involve the engagement of pk-12 faculty to provide their input in the program design during the 2008-2009 academic year.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** Low

**Relationships (Measure | Outcome/Objective):**

- Measure: Portfolio Element: Safety Certification | Outcome/Objective: Promotes learners’ safety and welfare
- Measure: Portfolio Element: Socio-Scientific Issues Unit | Outcome/Objective: Promotes science in the community
- Measure: Portfolio Element: Socio-Scientific Issues Plan | Outcome/Objective: Engages learners in the nature of Science
- Measure: Professional Growth Plan | Outcome/Objective: Strives for continuous professional growth

**Implementation Description:** As the program is ending after this semester, this item is now closed.

**Projected Completion Date:** 09/2010

**Responsible Person/Group:** COE Dean's office
Providing diverse experiences in the program
Our student population comprises of in-service teachers that may be working with a specific student population. We need to formalize ways of providing diverse learning experiences to our students and collect data on this process.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High
Implementation Description: As the program is being deactivated and students are all graduating this semester, this item is no longer active.
Projected Completion Date: 09/2010
Responsible Person/Group: All program faculty. We have implemented two changes discussed in our actions plan for 2006-2007. For providing diverse experiences to our students (in-service teachers), we now require the students to do a revised program assessment (peer teaching). We need to meet as a group to further discuss and develop ideas for integrating diverse learning experiences for our students.
Additional Resources: None

Communication between faculty and candidates
The program plan to improve communication between faculty and candidates to better support and guide candidates. The faculty will host a meeting with candidates at least once a semester in addition to various informal interactions and communication.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: The faculty will host a meeting with candidates at least once a semester in addition to various informal interactions and communication.
Projected Completion Date: 10/2011
Responsible Person/Group: The adviser of the one remaining student has been meeting regularly with the student and keeping in close contact until she graduates in December, 2011.

Faculty and Student Communication
As this program draws to a close, the one remaining student and faculty member/adviser will work together in the portfolio completion and review process. At this time, all candidates have finished coursework and have graduated except for this one particular student who in her last semester.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Implementation Description: Email and telephone contact.
Projected Completion Date: 12/2011
Responsible Person/Group: Lisa Martin-Hansen, Adviser

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No specific changes were made in the assessment process. There is no plan to change our assessment process in the coming year.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
There will be no changes to the program. All the candidates met the expected outcomes and successfully completed the program. However, the program plan to continue on improving communication between faculty and candidates throughout the program.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A
ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A

Georgia State University
Assessment Data by Section
2010-2011 Science Education Online MEd
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission for the Science Education M.Ed. Online Degree Program (Georgia On My Line) is parallel to the mission statement of the Georgia State University Professional Education Faculty. The GSU PEF is unique in that it represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MEd. Online Program in Science Education is to prepare science teachers who are informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and communities. Specifically, the mission for the Science Education M.Ed. Online Degree Program (Georgia On My Line) is to provide an opportunity for certified teachers to build capacity by expanding their content knowledge and pedagogical practices. Candidates develop knowledge, teaching expertise, and dispositions related to the Standards set forth by the National Science Teachers Association (NSTA).

Goals
G 1: Goal/Purpose Statement
Candidates who are admitted to this program have basic science knowledge; therefore the goals of the program to develop candidates who are: 1. Highly competent science teachers who have the knowledge, skills and dispositions necessary to advance the learning of students in science grades 6-12. 2. Prominent science teachers who utilize assessment strategies to determine the impact of their teaching on student learning in grades 6-12. 3. Highly qualified science teachers with exemplary knowledge of science.

Student Learning Outcomes/Objectives
SLO 1: Planning (Pedagogical Knowledge and Skills) (M: 1)
Aligned with Goal 1; Key Assessment - Professional and Pedagogical Knowledge and Skills: Exit Portfolio Standard – Skills of Science Candidates will be able to: Utilize a variety of teaching actions, strategies, and methodologies including interactions with students that promote learning and achievement; use advanced technology to extend and enhance the learning of all students; and use prior conceptions and student interests to create communities of diverse learners who can construct meaning from their science experiences.

SLO 2: Effects on P-12 Student Learning (M: 2)
Aligned with Goal 2; Key Assessment – Effects on K-12 Learners: Exit Portfolio Assessment and Impact on Student Learning Candidates will be able to: Use a variety of contemporary and traditional assessment strategies to evaluate the intellectual, social, and personal development of the learner in all aspects of science, and engage in reflective practice by using outcome data to guide and change instruction.

Other Outcomes/Objectives
O/O 3: Content Knowledge (M: 3)
Aligned with Goal 3; Key Assessment – Content Knowledge; Exit Portfolio Standard: Content Candidates will be able to: Unify concepts and processes in the teaching of science as an interdisciplinary unit; utilize their knowledge of life, physical, earth and space sciences such that they can teach science as inquiry, incorporate technology, and relate science teaching to the personal, historical, and social perspectives of life.

Measures, Targets, and Findings
M 1: Measure for Planning (Pedagogical Knowledge and Skills) (O: 1)
Candidates are expected to complete a portfolio which will include a narrative and artifacts to demonstrate their mastery of the Key Assessment - Professional and Pedagogical Knowledge and Skills: Exit Portfolio Standard Skills of Science. This section of the portfolio will provide documentation that students have met the major standards in the areas of pedagogical knowledge which will include planning, instructional skills, and content knowledge. Students must achieve a rating of at least "2" out of a possible "3" for this measure.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

### Clinical Practice

Linked to Clinical Practice (Pedagogical Knowledge) Data show that 33% of the students scored at the far exceeds expectation level, 33% scored at the exceeds expectation level, and 33% scored at the exceeds level. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing course work. Several students had to resubmit their work more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content for EDSC 7550, EDSC 8600, EDSC 8430, and EDSC 8400.

#### Relationships (Measure | Outcome/Objective):

- Measure: Measure for Content Knowledge
- Outcome/Objective: Content Knowledge

#### Implementation Description:

Plan should be fully implemented at the end of the fall semester 2010.

#### Projected Completion Date:

11/2010

#### Responsible Person/Group:

All faculty teaching in the MEd. Online Program in Science.

#### Additional Resources:

No additional resources needed.

**Budget Amount Requested:** $0.00 (no request)

### Effects on P-12 Learning

Linked to the Effects on P-12 Learning Data show that 50% of the students scored at the far exceeds expectation level and 50% scored at the meets level. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing course work. Several students had to resubmit their work more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content for EDSC 7550, EDSC 8600, and EDSC 8400.
Planning (Pedagogical Knowledge and Skills)

Effects on P-12 Learning

Linked to Planning (Pedagogical Knowledge and Skills) Data show that 50% of the students scored at the far exceeds expectation level and 50% scored at the meets expectation level. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing course work. Several students had to resubmit their work more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content for EDSC 7550 and EDSC 8400.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Measure for Effects on P-12 Student Learning | Outcome/Objective: Effects on P-12 Student Learning

Implementation Description: Plan should be fully implemented at the end of the fall semester 2010.
Projected Completion Date: 11/2010
Responsible Person/Group: All faculty teaching in the MEd. Online Program in Science.
Additional Resources: No additional resources needed.
Budget Amount Requested: $0.00 (no request)

Content Knowledge

Linked to Content Knowledge: Data show that 37.5% of the students scored at the far exceeds expectation level and 62.5% scored at the exceeds expectation level. The portfolio standards were assigned as a part of course requirements for EDSC 7550, EDSC 8600, EDSC 8430, and EDSC 8400. Several students had to resubmit their work more than once to receive an acceptable rating. The minimum number of submissions was two and the maximum was 27. In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Measure for Content Knowledge | Outcome/Objective: Content Knowledge

Implementation Description: In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio. Students will be notified of the sessions through email.
Projected Completion Date: 12/2011
Responsible Person/Group: All Science Education Faculty.
Additional Resources: No additional resources are needed.
Budget Amount Requested: $0.00 (no request)

Effects on P-12 Learning

Linked to the Effects on P-12 Learning Data show that 37.5% of the students scored at the far exceeds expectation level, 12.5% at the exceeds level, and 50% scored at the meets expectation level. The portfolio standards were assigned as a part of the course requirements for EDSC 7550, EDSC 8600, and EDSC 8400. Several students had to resubmit their work more than once to receive an acceptable rating. The minimum number of submissions was 2 and the maximum was 27. In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio.

Implementation Description: In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio. Students will be notified of the sessions through email.
Projected Completion Date: 12/2011
Responsible Person/Group: All Science Education Faculty.
Additional Resources: No additional resources are needed.
Budget Amount Requested: $0.00 (no request)

Planning (Pedagogical Knowledge and Skills)

Linked to Planning (Pedagogical Knowledge and Skills) Data show that 37.5% of the students scored at the far exceeds and exceeds expectation levels and 25% scored at the meets expectation level. The portfolio standards were assigned as a part of the course requirement for EDSC 7550 and EDSC 8400 which meant that the students completed the portfolio requirement while enrolled in a methods course. Several students had to resubmit their work more than once to receive an acceptable rating. The minimum number of submissions was two and the maximum was 27. In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):  
Measure: Measure for Planning (Pedagogical Knowledge and Skills)  
Outcome/Objective: Planning (Pedagogical Knowledge and Skills)

Implementation Description: In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio in order to minimize the number of revisions to obtain an acceptable document.

Projected Completion Date: 12/2011

Responsible Person/Group: All Science Education Faculty

Additional Resources: None

Budget Amount Requested: $0.00 (no request)

---

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

NA

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

NA

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

NA

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Students submitted the exit portfolio as a culminating project which included artifacts to document the effects that their teaching had on P-12 learners. Data showed that 50% of the students scored at the meets expectation level which is acceptable. This also indicates that there is a need to improve in this area; therefore, students were asked to develop an assessment plan in which they were expected to collect their students' performance data, analyze the data, and modify their instructional practices based on the findings. This assessment plan was designed to help them reflect on their teaching practices and ultimately improve the performance of the students that they teach. It also afforded the students an opportunity to improve the assessment instruments that they were using to evaluate the work of their students. More emphasis will be placed on alternative assessment models in EDSC 8400.

ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Students are challenged to examine their students' performance data as revealed by the documents submitted in their portfolios. Data from portfolio assessment indicated the need to focus more on assessment and assessment types. With this in mind, a section on assessment was included in EDSC 8400 with an assignment to develop an assessment plan for their students who were not performing at an acceptable level. Students struggled with this assignment; therefore, in the future more time and resources will be devoted to teaching the assessment unit. Special attention will be given to alternative assessment and the development of alternative assessment instruments.

ADMINISTRATIVE DEPT QUESTION 1:

Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

NA

ADMINISTRATIVE DEPT QUESTION 2:

What have you learned from your assessment this year (2010-2011)?

NA

ADMINISTRATIVE DEPARTMENT QUESTION 3:

What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

NA
Mission / Purpose
The mission of the Master of Art in Teaching (MAT) in Secondary Science is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MAT Secondary Science program is to prepare educators who are: informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and local and global communities.

Goals
G 1: Content Knowledge
1. Candidates will be seen as more knowledgeable others in their classrooms, in their schools, and in their communities with regard to their understandings of the content and ways of knowing within the disciplines of science

G 2: Professional and pedagogical knowledge, skills, and dispositions
2. Candidates will be skilled craftspeople with the appropriate dispositions for translating their content knowledge into meaningful learning experiences for a diverse set of learners in grades 6 - 12 science classrooms.

G 3: Impact on student learning
3. Candidates will be reflective professionals with the capacity to analyze the effect that their teaching practices have on the learning of the students in their grades 6 - 12 science classes.

Student Learning Outcomes/Objectives
SLO 1: Content Knowledge (G: 1) (M: 1)
Candidates will possess and use research-based, discipline-specific knowledge and pedagogy to facilitate learning for all.

SLO 2: Professional and Pedagogical Knowledge (G: 2) (M: 2)
Candidates will be able use their knowledge of child, adolescent, and adult development and theories of learning to design meaningful educational opportunities for all learners.

SLO 3: Pedagogical Skills and Learning Experiences (G: 2) (M: 3)
Candidates will be able to coordinate time, space, activities, technology and other resources to provide active and equitable engagement of diverse learners in real world experiences.

SLO 6: Impact on Student Learning and Assessment (G: 3) (M: 6)
Candidates will be able to design and utilize a range of formal and informal assessment strategies to evaluate and ensure the continuous development of all learners and support learners in engaging in the process of self-assessment.

SLO 7: Impact on Student Learning and Reflection (G: 3) (M: 7)
Candidates will be able to reflect critically upon data as part of a recursive process when planning, implementing and assessing teaching, learning, and development.

Other Outcomes/Objectives
O/O 4: Pedagogical Skills and Learning Environments (G: 2) (M: 4)
Candidates will be able to create engaging learning environments where the diverse perspectives, opinions, and beliefs of others are acknowledged and respected.

O/O 5: Professional Dispositions (G: 2) (M: 5)
Candidates will be able to exhibit ethically-appropriate behavior towards students, colleagues, administrators, and community members and will be able to commit to continuing personal and professional development.

Measures, Targets, and Findings
M 1: Objective 1 - Content Knowledge (O: 1)
There will be three sources of data for determining the extent to which a candidate has met this objective: 1. The candidates’ performance on the GACE Broadfield and / or discipline-specific content exams. 2. Supervisor ratings on the Standard 1: Content Knowledge components of the Mid-term and Final Evaluation Key Assessments. 3. Reviewer ratings on the content and curriculum standard in the final e-portfolio.

Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Content Knowledge
1. For the GACE tests, the target is for 100% of the candidates to pass both the Middle-level Math and Middle-level Science exams. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates receiving ratings of Basic or below.

Findings 2010-2011 - Target: Met
1. The GACE scores for the current cohort of students have not been completed as many students will be taking the exams in the summer of 2011. 2. For the Mid-term evaluation, the candidates averaged above a 3.5 on all 4 elements of the Content Standard and only 1 student received a rating below Adequately Demonstrated (and only on a single element); for the Final Evaluation, the candidates averaged above a 3.5 on all 4 elements of the Content Standard (achieving averages which were higher than those attained on the Mid-term despite having moved from middle-school to high-school settings) and no student received a score below Adequately Demonstrated on any of the elements. 3. The electronic portfolio evaluations were not completed by the time the initial findings for this report were written.

**M 2: Objective 2 - Professional and Pedagogical Knowledge (O: 2)**

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Design for Instruction and Instructional Decision Making assignments in the Teacher Work Sample 2. Ratings by supervisors on the Mid-term and Final Evaluation related to this area 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

**Target for O2: Professional and Pedagogical Knowledge**

1. For the Learning Goals assignment, the target is for the candidates to average a score of 17 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates receiving ratings of Basic or below.

**Findings 2010-2011 - Target: Met**

1. For the Learning Goals assignment the overall candidate average was above 17, as none of the candidates received a score below this value. (It may be necessary to raise the target for this assignment.) For the Design for Instruction assignment, the overall candidate average was 27.92, with only four students receiving scores below the target average that was set. 2. For the Mid-term Evaluation, the overall candidate average was 3.57, with no candidate receiving a rating below Adequately Demonstrated on any of the elements; for the Final Evaluation, the overall candidate average was 3.57, with more students receiving a rating of Effectively Demonstrated than in the Mid-term Evaluation, and, again, with no candidate receiving a rating below Adequately Demonstrated. 3. The electronic portfolio evaluations were not completed by the time the initial findings for this report were written.

**M 3: Objective 3 - Pedagogical Skills and Learning Experiences (O: 3)**

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Design for Instruction and Instructional Decision Making assignments in the Teacher Work Sample 2. Ratings by the supervisor on this element in the Mid-term and Final Evaluation Key Assessment 3. Evaluation by the reviewer of this section of the e-portfolio.

**Target for O3: Pedagogical Skills and Learning Experiences**

1. For the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Instructional Decision Making assignment, the target is for the candidates to average a score of 13 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates receiving ratings of Basic or below.

**Findings 2010-2011 - Target: Partially Met**

1. For the Design for Instruction assignment, the overall candidate average was 27.88 with six candidates scoring below the target average score (a small concern). For the Instructional Decision Making assignment, the overall candidate average was 13.62 with seven candidates scoring below the target average score (a small concern). 2. For the Mid-term Evaluation, the overall candidate average was 3.49, which is slightly below the target average; specifically, on two of the elements -- Lesson Plan & Instruction and Overall Assessment of Planning & Instruction -- the student means were 3.38 and 3.35 respectively. Further, on Monitoring & Adjustments, 3 candidates (14%) received ratings below Adequately Demonstrated. For the Final Evaluation, improvements were seen as the overall candidate average was 3.66, with more students receiving a rating of Effectively Demonstrated than in the Mid-term Evaluation, and with no candidate receiving a rating below Adequately Demonstrated on any of the elements. 3. The electronic portfolio evaluations were not completed by the time the initial findings for this report were written.

**M 4: Objective 4 - Pedagogical Skills and Learning Environments (O: 4)**

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluations of the Contextual Factors assignment within the Teacher Work Sample 2. Ratings by the supervisor on this element in the Mid-term and Final Evaluation Key Assessments 3. Evaluations by the reviewer of this section of the electronic portfolio.

**Target for O4: Pedagogical Skills and Learning Environments**

1. For the For the Contextual Factors assignment, the target is for the candidates to average a score of 21 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates receiving ratings of Basic or below.

**Findings 2010-2011 - Target: Met**

1. For the Contextual Factors assignment, the overall candidate average was 21.8 with eight candidates scoring below the target average score (a small concern). 2. For the Mid-term Evaluation, the overall candidate average was 3.61, with no more than 2 students receiving ratings below Adequately Demonstrated on any element; for the Final Evaluation, the overall candidate average was 3.69, with more students receiving a rating of Effectively Demonstrated than in the Mid-term...
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Extended Practica
Specific findings will be shared with faculty members who teach in the MAT Science Program. Faculty have recommended that practica experiences be lengthened to provide for additional practice time under the supervision and guidance of their mentor teachers.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Objective 4 - Pedagogical Skills and Learning Environments | Outcome/Objective: Pedagogical Skills and Learning Environment

M 5: Objective 5 - Professional Dispositions (O: 5)
There will be two sources of data for determining the extent to which a candidate has met this objective: 1. Ratings by the supervisor on the Dispositions Key Assessment 2. Evaluation by the reviewer of the corresponding section of the electronic portfolio
Source of Evidence: Portfolio, showing skill development or best work

Target for O5: Professional Dispositions
1. For the Reflection and Self-Evaluation assignment within the Teacher Work Sample 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments 3. Evaluation by the reviewer of the corresponding section of the electronic portfolio

Findings 2010-2011 - Target: Met
1. For the Disposition Key Assessment rubric, the candidates achieved an overall average above the target score, with only one candidate receiving a score below this value. 2. The electronic portfolio evaluations were not completed by the time the initial findings for this report were written.

M 6: Objective 6 - Impact on Student Learning and Assessment (O: 6)
There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Assessment Plan and Impact on Student Learning assignments within the Teacher Work Sample 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments 3. Evaluation by the reviewer of the corresponding section of the electronic portfolio
Source of Evidence: Portfolio, showing skill development or best work

Target for O6: Impact on Student Learning and Assessment
1. For the Assessment Plan assignment, the target is for the candidates to average a score of 22 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates receiving ratings of Basic or below

Findings 2010-2011 - Target: Partially Met
1. For the Contextual Factors assignment, the overall candidate average was above the target average with only two candidates receiving a rating below this value. 2. For the Mid-term Evaluation, the overall candidate average was 3.48, with only 1 student receiving a rating below Adequately Demonstrated (which indicates the target may have been set a little high). 3. The electronic portfolio evaluations were not completed by the time the initial findings for this report were written.

M 7: Objective 7 - Impact on Student Learning and Reflection (O: 7)
There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Reflection and Self-Evaluation assignment within the Teacher Work Sample 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments 3. Evaluation by the reviewer of the corresponding section of the electronic portfolio
Source of Evidence: Portfolio, showing skill development or best work

Target for O7: Impact on Student Learning and Reflection
1. For the Reflection & Self-Evaluation assignment, the target is for the candidates to average a score of 22 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates receiving ratings of Basic or below

Findings 2010-2011 - Target: Met
1. For the Reflection & Self-Evaluation assignment, the overall candidate average was 22.9 with six candidates scoring below the target average score. 2. For the Mid-term Evaluation, the overall candidate average was 3.86, with only 1 student receiving a rating below Adequately Demonstrated on each element; for the Final Evaluation, the overall candidate average was 3.78, with fewer students receiving a rating of Effectively Demonstrated than in the Mid-term Evaluation, and with no candidate receiving a rating below Adequately Demonstrated on any of the elements. 3. The electronic portfolio evaluations were not completed by the time the initial findings for this report were written.
Extended Practica
Specific findings will be shared with faculty members who teach in the MAT Science Program. Faculty have recommended that practica experiences be lengthened to provide for additional practice time under the supervision and guidance of their mentor teachers.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 04/2010
Responsible Person/Group: Lisa Martin-Hansen

Extended Practicum
Specific findings will be shared with faculty members who teach in the MAT Science Program. Faculty have recommended that practica experiences be lengthened to provide for additional practice time under the supervision and guidance of their mentor teachers.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 04/2010
Responsible Person/Group: Lisa Martin-Hansen

Related Action Plan(s):
Faculty members teaching in the MAT science program will revisit standard #6 and revise the activities targeting these areas.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
- Measure: Objective 6 - Impact on Student Learning and Assessment | Outcome/Objective: Impact on Student Learning and Assessment

Implementation Description: Faculty member teaching in the MAT science program will revisit standard #6 and revise the activities targeting these areas.
Projected Completion Date: 07/2010
Responsible Person/Group: MAT Science Ed Unit

Concern over issues in the community and its assessment
Even though the portfolio data indicates that this objective has been met, there was conflicting data coming from the observations. The issue seemed to be that if a supervisor did not see direct evidence of this objective in the lesson observed, the candidate was given a low score on the observation. In the portfolios, the candidates were able to show evidence in the artifacts they provided of meeting this objective. The point needs to be communicated to the supervisors that this objective needs to be assessed in the larger context of the whole practicum experience and not within the thin slice of a few observations.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):
- Measure: Objective 6 - Impact on Student Learning and Assessment | Outcome/Objective: Impact on Student Learning and Assessment

Implementation Description: Certainly, the supervisors and faculty need to continue to emphasize this area of teaching practice. However, it seems important that the supervisors need to be given some guidance in how to think about assessing this objective. This guidance will be communicated by science education faculty, particularly the program coordinator.
Projected Completion Date: 07/2011
Responsible Person/Group: All science education faculty

Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Pedagogical Skills and Learning Experiences: Assistance with Teacher Work Sample
A. Pedagogical Skills and Learning Experiences: The results of the Teacher Work Sample (TWS) indicate that students need additional assistance in the following areas: Instructional design and planning and assessment. Data showed that students needed clearer explanations of the TWS and the integrated nature of the assignments. The following actions will be taken to help students improve their knowledge and skills in assessment, instructional planning and instructional design. Students will receive more assistance with the TWS assignment in the methods courses and the methods course assignments will be aligned with the TWS. During Professional Advisement Week, students will also receive help with the TWS.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):
- Measure: Objective 3 - Pedagogical Skills and Learning Experiences | Outcome/Objective: Pedagogical Skills and Learning Experiences

Implementation Description: Students will receive more assistance with the TWS assignment in the methods courses and the methods course assignments will be aligned with the TWS. During Professional Advisement Week, students will also receive help with the TWS.
Projected Completion Date: 04/2012
Using Assessment Data

Impact on Student Learning and Assessment: Students showed acceptable performance on this standard; however, closer examination of the data revealed that there are some minor deficiencies with the interpretation of student assessment data. In the methods courses more emphasis will be placed on assessment, specifically how to use assessment data to improve instruction. A section of the assessment unit will cover data interpretation, particularly as it relates to different sub-groups of students within a class.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Objective 6 - Impact on Student Learning and Assessment | Outcome/Objective: Impact on Student Learning and Assessment

Implementation Description: In the methods courses more emphasis will be placed on assessment, specifically how to use assessment data to improve instruction. A section of the assessment unit will cover data interpretation, particularly as it relates to different sub-groups of students within a class.

Projected Completion Date: 04/2012
Responsible Person/Group: All science education faculty

Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
NA

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
NA

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
NA

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Reflection on student performance data for the Teacher Work Sample (TWS) indicated that some modifications were needed. The TWS was implemented as a means to create a cohesive and interrelated set of assessments which included some alternative types of assessment for performance based assignments. Several of the instruments used for alternative assessment were refined to provide better reliability among the supervisors performing the student ratings. In addition, the curriculum for the methods courses was revised in order to make assessment instruments and their interrelationships clearer to students.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

In an effort to meet both national and local standards, the faculty reviewed the curriculum for the MAT Secondary Science Program. The curriculum was revised so that the students would see the relationships between state / national standards, scope & sequence of curriculum documents, learning goals and objectives as part of curriculum planning, and a flow of actions related to developing larger curricular units and then translating that into individual lessons that build on each other. The methods courses will focus more on different forms of assessment as a means of creating a more holistic picture of individual and group learning. The Instructional Technology course was eliminated as a requirement and replaced with a set of suggested options based on the developmental needs of the candidates.

ADMINISTRATIVE DEPT QUESTION 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
NA

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment this year (2010-2011)?
NA

ADMINISTRATIVE DEPARTMENT QUESTION 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Georgia State University
Assessment Data by Section
2010-2011 Social Foundations MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
MISSION: The master's degree in Social Foundations of Education expands and deepens students' critical understandings that challenge traditional educational authority and accepted practices for advanced graduate work and professional lives.

Goals
G 1: Designs and Conducts Research
The student demonstrates the ability to design a major research study, appropriate at the Masters level.

Student Learning Outcomes/Objectives
SLO 1: The student will complete a thesis or project (G: 1) (M: 1)
The student has completed a thesis or project advancing an original point of view as a result of Social Foundations research.

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

Measures, Targets, and Findings
M 1: Masters Scoring Activity (O: 1)
A faculty advisor and two committee members are responsible for directing the master's thesis research or master's projects. During the last academic term of coursework, each student will be required to complete an oral examination. The candidate's committee will administer the oral examination, which is not to exceed two hours. The committee will complete the scoring rubric after the oral exam (see Document Repository). The criteria are:
1. Understands the concepts and tools of inquiry in foundational disciplines
2. Demonstrates knowledge of previous research or literature in the field
3. Makes normative or critical judgments that are insightful and detailed
4. Provides evidence of quality written work (see Analytical Writing Guide)
5. Conducts a quality oral defense
Source of Evidence: Senior thesis or culminating major project

Target for O1: The student will complete a thesis or project
95% of MS Social Foundations students will meet or exceed expectations as outlined in the scoring rubric.

Findings 2010-2011 - Target: Met
Four students graduated during the reporting period.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

MS thesis and project options
Monitor the quality of students who select the thesis or project option.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Masters Scoring Activity | Outcome/Objective: The student will complete a thesis or project
Projected Completion Date: 05/2012
Responsible Person/Group: MS Program Coordinator
Additional Resources: 0
Budget Amount Requested: $0.00 (no request)

MS Thesis and Project
The program faculty will continue to monitor the assessment.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Masters Scoring Activity | Outcome/Objective: The student will complete a thesis or project
Responsible Person/Group: MS program coordinator

Additional Resources: None

Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We created an analytical rating guide (uploaded) to inform our evaluation of students' written work. We revised the thesis/project rubric to identify work that the program faculty could signify as "honors" level quality. The honoree would receive a certificate at COE honors day.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

No planned revisions to curriculum and courses at this time. We will receive further assessment data from OIR for the APR report, and use that to inform our program goals and objectives.

Georgia State University
Assessment Data by Section
2010-2011 Social Studies Education MEd
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The mission of the Master of Education (MED) in Social Studies is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MED Social Studies program is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

**Goals**

**G 1: Goal: Leadership**
1) Leaders in their Social Studies communities;

**G 2: Goal: Pedagogical Content Knowledge**
2) Creators of democratic, socioconstructivist learning environments for diverse students using appropriate pedagogical content knowledge and innovative technology; and,

**G 3: Goal: Scholarship**
3) Scholars of educational theory and research as applied to social studies education.

**Student Learning Outcomes/Objectives**

**SLO 1: Content Knowledge (G: 1, 2) (M: 1)**
1) Content Knowledge Standards: Candidates demonstrate deep subject knowledge in a minimum of two social studies content areas: 1) multiculturalism (required) and 2) one of the following: history, world geography, economics, civics, sociology, and/or psychology (Goal 1, 2 / Key Assessment: Portfolio)

**SLO 2: Curriculum Standards (G: 1, 3) (M: 1)**
2) Curriculum Standards: Candidates demonstrate knowledge of major concepts, issues, and processes of inquiry relevant to social studies as well as articulates major theories, debates, and issues in social studies education (Goal 1, 3 / Key Assessment: Portfolio)

**SLO 3: Learning Environment (G: 2, 3) (M: 1)**
3) Learning Environment: Candidates establish a positive and engaging learning environment for all students within the field of social studies education (Goal 2, 3 / Key Assessment: Portfolio)

**SLO 4: Knowledge of Students (G: 2, 3) (M: 1)**
4) Knowledge of Students: Candidates possess deep knowledge of students and adaptations to their individual situations to provide for optimal learning (Goal 2, 3 / Key Assessment: Portfolio)

**SLO 5: Assessment (G: 1, 2, 3) (M: 1)**
5) Assessment: Candidates demonstrate use of efficacious and appropriate assessment tools (Goal 1, 2, 3 / Key Assessment:
Measures, Targets, and Findings

M 1: Professional Portfolio (O: 1, 2, 3, 4, 5)

Portfolio Instructions Provided for Each Key Assessment Below: Overview The portfolio for the Master of Education in Social Studies serves as an exit requirement for this program. Each fall and spring semester, portfolio development seminars will be held during MSIT’s Professional Advising Week (PAW). During these seminars, faculty and students collaboratively discuss the standards for the program, relevant artifacts, and how to compile the program portfolio. As a Master of Education in Social Studies, expertise in the following standards (adapted from National Council on the Social Studies and the Georgia Professional Growth Plan based on the Extended Georgia Framework for Teaching) must be demonstrated through the portfolio which consists of at least three (3) artifacts demonstrating proficiency in each standard. Evaluation of the Portfolio Formal evaluation of each students’ portfolio takes place at the final semester of the program. It is suggested you submit a draft well prior to the due date for feedback from your advisor. The final evaluation will be based on an examination of the submitted portfolio. All portfolio standards must be met by a minimum rating of a “3” for candidates to be recommended to graduate. If you have questions, you can go to the HELP BUTTON at the top of the screen, or contact your advisor for assistance. Guidelines for Creating your Portfolio: 1. Read each standard carefully: Each standard contains multiple elements. Be sure to address each element explicitly. 2. Read the assessment rubric carefully: The criteria for each standard indicate the way each narrative and its corresponding artifacts will be evaluated. 3. Write thorough but concise narrative essay: Be sure that your narratives are well-developed, but not excessively wordy. Narratives should be focused on the standard and should be well-organized, clear, and coherent. 4. Explain how each artifact relates to the standard: Each carefully chosen artifact should be introduced in the narrative along with an explanation of how the artifact demonstrates how you have met the standard. As a general rule, artifacts should be those you (or your students) have created during your degree program. 5. Use other professionals as resources: Seek feedback on your writing and artifacts from your peers and other professional colleagues. Share your work with others prior to submitting your portfolio for review. 6. Consider feedback from a colleague: The feedback you receive from your draft evaluation will guide your revisions for the final portfolio. 7. Proofread carefully: Consider the portfolio as a representation of your professionalism. You may be asked to revise narratives if your writing does not meet expected standards for writing at the graduate level. Consider visiting the University Writing Center for assistance, if needed: http://www2.gsu.edu/~wwwcwr/services.html. Compiled by Teresa Fisher, Mary Ariail, and Dana Fox

Source of Evidence: Project, either individual or group

Target for O1: Content Knowledge

All students will achieve an exemplary or accomplished level of portfolio performance as indicated on the rubric.

**Findings 2010-2011 - Target: Partially Met**

M 2: Unit-Wide Dispositions Rubric (O: 6)

Faculty evaluate candidates on demonstration of empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision.

Source of Evidence: Evaluations

Target for O6: Disposition

All students will achieve a (4= Strength, that means that the disposition is a pervasive trait of the student or 3 = Developing that means the student is aware of and values that trait.)

Findings 2010-2011 - Target: Met

All students assessed received either a 4, or 3 on all portions of the dispositions rubric indicating a met target.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

M.Ed. Collaboration

MSIT is in the process of combining the master's degree programs in the department with the Educational Leadership department to create an innovative master’s degree program highlighting the social studies as well as urban teaching and leadership with a coaching and / or leadership endorsement.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 09/2010
Responsible Person/Group: Ad Hoc Committee
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Recruitment

We need to look at how students are recruited for this program and work on some materials and/or processes to increase enrollment.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Projected Completion Date: 04/2009
Responsible Person/Group: Social Studies Faculty
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Revise Portfolio Assessment

We need to look at the portfolio assessment plan and revise it to better meet the GA frameworks and students' coursework.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Projected Completion Date: 04/2010
Responsible Person/Group: Social Studies Faculty
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Content Knowledge - Action Plan

All students did not achieve the exemplary or accomplished level of Content Knowledge. This is demonstrated in the program portfolio and program faculty should revisit this section of the portfolio to clarify the guidelines governing this section. Additionally, this M.Ed. is being collapsed into a more comprehensive M.Ed. program which will better address the issue of diversity. This new M.Ed. is expected to begin in Spring 2012.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Professional Portfolio | Outcome/Objective: Content Knowledge
Responsible Person/Group: COE Program Faculty / SS Program Faculty
Additional Resources: n/a

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this
academic year? How do these relate to the Action Plans that you specified last year?

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Faculty have collaborated to create an innovative M.Ed. program which spans two departments (MSIT / EPS). The new M.Ed. allows students to gain content knowledge in their area of specialty - but also to obtain coaching and leadership endorsements. This M.Ed. encompasses a field component - all of which will address weaknesses in the current SS M.Ed. program and better utilize faculty resources.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Data analysis provides insight to strengths and weaknesses in the program. As highlighted by the content knowledge/diversity target not being met, program faculty need to develop ways in which students can better demonstrate their knowledge.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

Georgia State University
Assessment Data by Section
2010-2011 Social Studies Education--TEEMS MAT
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development.

Goals
G 1: Content and Pedagogical Knowledge
Candidates in social studies initial teacher education programs will be experts in their knowledge of the multiple contexts, purposes, and ends of education as well as specific pedagogical aims and interests.

G 2: Professional and Pedagogical Knowledge, Skills, and Dispositions
Candidates in social studies initial teacher education programs will be experts in the knowledge, skills, and dispositions needed to develop an understanding of the purposes and history of the field of social studies.

G 3: Student Learning
Our candidates will be effective educators who create learning environments that have a positive impact on student learning.

Student Learning Outcomes/Objectives
**SLO 1: Content and Curriculum (G: 1) (M: 1)**

The teacher candidate demonstrates content knowledge; adapts content and teaching to meet observed learner needs; builds teaching on a strong and current foundation in the content area(s) they teach; makes content relevant to students; uses available resources, including technology, to learn more about content area(s); and, follows state and local curriculum.

**SLO 2: Planning (G: 2) (M: 2)**

The teacher candidate locates, comprehends, and builds rationales from curriculum guides, other applicable documents, and experienced colleagues; plans and carries out instruction based on state and local performance standards; selects and varies instructional strategies, assessing their impact on student engagement and learning; observes students closely and acknowledges how adjustments in teaching can impact learning; explores teaching roles to discover appropriate approaches for assigned students; assesses individual learners’ needs and seeks resources to improve instruction and increase student achievement; learns to work and plan productively as part of a team, grade level, and/or department group.

**SLO 3: Clinical Practice (G: 2) (M: 3)**

The teacher candidate creates a learning environment in which students can learn both independently and collaboratively; organizes and manages time, space, activities, technology, software, and other resources; understands the importance of and builds a functional classroom management plan; seeks, uses, and refines strategies for motivating learners; creates a culturally responsive classroom; learns about and uses resources specific to the school, district, and community; develops appropriate verbal, nonverbal, and media communication techniques to foster supportive learning-based interactions in the classroom.

**SLO 4: Dispositions (G: 2) (M: 4)**

The teacher candidate learns basic information about the history, ethics, organization, and practices of education; learns about, locates resources for, and follows laws related to rights and responsibilities of students, educators, and families; adheres to state and local Codes of Ethics, and models ethical behavior for students; reflects on teaching practice and examines the connections to student learning; self-assesses teaching strengths and areas for improvement, seeking and using guidance from mentors and instructional leaders; works through appropriate channels to seek answers to questions, voice concerns, explore ideas, and speak out about issues that matter to them and their students; accepts entry-level leadership roles (e.g., clubs, special topics, coaching) with support of identified mentors, administrators, coaches, and facilitators.

**SLO 5: Impact on Student Learning (G: 3) (M: 5)**

The teacher candidate will have a basic understanding of assessment and measurement theory; collect and use pre-assessment data to select student learning goals; use formative and summative assessments at appropriate points in the learning process; identify students’ learning needs and provide students with goals for learning; develop and implement consistent, fair, and accurate grading procedures; report student progress to students, families, and administrators; use required resources to keep accurate and up-to-date records and reports of student work and behavior; examine ways to identify student strengths and weaknesses through various assessment processes and methods.

**Measures, Targets, and Findings**

**M 1: Content and Curriculum (O: 1)**

Data for the objective of Content Knowledge are taken from the Midpoint (Practicum) Teaching Evaluation Instrument and the Final StudentTeaching Evaluation Instrument. The midyear evaluation takes place prior to clinical practice, at or near the end of the Practicum I (field experience). The final evaluation takes place at or near the end of Practicum II/III (student teaching). For each assessment, students are evaluated on their command of Content Knowledge by their university supervisor, who observes and confers with students and considers feedback from the student's mentor teacher. Candidates are not given specific instructions for this assessment; rather, they demonstrate their content knowledge through their teaching performance and ongoing conversations with mentor teachers and university supervisors.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Content and Curriculum**

100% of students will score at the level of Adequately Demonstrated and 80% of students will score at the level of Effectively Demonstrated on this standard.

**Findings 2010-2011 - Target: Met**

A total of 100% of students scored at the level of Adequately Demonstrated on this standard. 81% of the students received the an Effectively Demonstrated rating on this standard. The mean was 3.81 with a standard deviation of 0.39.

**M 2: Planning (O: 2)**

The key assessment for planning is contained in the rubrics for the Teacher Work Sample. Students are evaluated on their ability to plan a four-week unit based on contextual factors of the school setting, appropriate learning goals that they establish based on their knowledge of the context, an assessment plan that addresses the learning goals, and a design for instruction that includes at least four weeks of lesson plans. The instructions relevant to the assessment for planning are provided for the candidates in the students' course template in the sections for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction. Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate’s TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Planning with the rubrics for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Planning**

100% of students will score at the level of Proficient and 80% of students will score at the level of Exemplary on this standard.

**Findings 2010-2011 - Target: Met**
A total of 100% of students scored at the level of Adequately Demonstrated on this standard. 80% of the students received the an Effectively Demonstrated rating on this standard. The mean was 3.80 with a standard deviation of 0.38.

M 3: Clinical Practice (O: 3)
Candidates are assessed for Clinical Practice with the use of rubrics contained in the Midpoint Teaching Evaluation Instrument (taken prior to students’ clinical practice) and the Final Teaching Evaluation Instrument (taken near the end of students' clinical practice). Rubrics in these two instruments are based on the Georgia GSTEP standards and are used to assess students on Standard 2: Knowledge of Students and Learning, Standard 3: Learning Environments, Standard 4: Assessment, Standard 5: Planning and Instruction, and Standard 6: Professionalism. The first key assessment for Clinical Practice is given at or near the end of Practicum I. The emphasis in Practicum I is to familiarize candidates with the school through immersion in a middle school setting. Candidates are encouraged to observe a wide variety of settings within the school and to learn as much as possible about the school context, including classroom culture, policies, procedures, and protocols. Candidates plan and teach a limited number of lessons (5-10). At least three of these lessons are observed by the university supervisor, who uses an observation tool based on the Georgia Framework for Teaching. The university supervisor provides immediate feedback to the candidate after the lesson. Near the end of the Practicum semester, the university supervisor completes the Midpoint (Practicum) Teaching Evaluation Instrument, using knowledge of the candidate’s teaching performance gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate. The second assessment for Clinical Practice is done at or near the end of the candidates’ semester of student teaching. During this semester, which is typically spent in a high school (grades 9-12), the teacher candidates gradually takes on an increasing amount of responsibility until they eventually assume the full role of the classroom teacher. During this semester, the candidates are required to teach a minimum of four weeks of lessons during which they plan, teach, reflect upon, and evaluate their praxis. The university supervisor conducts a minimum of three formal observations, providing feedback and support to the teacher candidate. Near the end of the student teaching semester, the university supervisor completes the Final Student Teaching Evaluation Instrument, using knowledge of the student gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate.

Source of Evidence: Portfolio, showing skill development or best work

Target for O3: Clinical Practice
100% of students will score at the level of Adequately Demonstrated and 60% of students will score at the level of Effectively Demonstrated on this standard.

Findings 2010-2011 - Target: Met
A total of 100% of students scored at the level of Adequately Demonstrated on this standard. 64% of the students received the an Effectively Demonstrated rating on this standard. The mean was 3.65 with a standard deviation of 0.48.

M 4: Dispositions (O: 4)
The assessment for Dispositions is entitled "Dispositions of Effective Education Professionals" and is used in all programs in the Professional Education Unit. Each program in the unit administers the assessment at approximately midpoint and end of program. For Social Studies MAT programs, the Dispositions assessment is completed by the university supervisor at the end of Practicum I and at the end of student teaching.

Source of Evidence: Existing data

Target for O4: Dispositions
100% of students will score at the level of Acceptable and 70% of students will score at the level of Exceptional on this standard.

Findings 2010-2011 - Target: Met
A total of 100% of students scored at the level of Acceptable on this standard. 77% of the students received the an Exceptional rating on this standard. The mean was 3.78 with a standard deviation of 0.42.

M 5: Impact on Student Learning (O: 5)
The key assessment for Effects on Student Learning is contained in the rubrics for the Teacher Work Sample. Students are evaluated on their ability to analyze the results of a four-week unit that they teach during the semester of student teaching. A key component of the Teacher Work Sample project is the design and implementation of an assessment plan, which includes a pre-test and a post-test as a part of the teaching unit. The instructions relevant to the assessment for Effects on Student Learning are provided for the candidates in the students' course template in the sections for Analysis of Student Learning and Reflection and Self-Evaluation (See PDF file for Teacher Work Sample attached below). Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate's TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Effects on Student Learning with the rubrics for Analysis of Student Learning and Reflection and Self-Evaluation in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Portfolio, showing skill development or best work

Target for O5: Impact on Student Learning
100% of students will score at the level of Proficient and 80% of students will score at the level of Exemplary on this standard.

Findings 2010-2011 - Target: Met
A total of 100% of students scored at the level of Acceptable on this standard. 94% of the students received the a Proficient rating on this standard. 86% of the students received an Exemplary rating on this standard. The mean was 4.84 with a standard deviation of 0.40.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Maintain Performance
Although candidates performed exceptionally well on all outcomes, social studies would like to continue to achieve 100% competency on all standards. Social studies faculty will meet regularly and identify areas for improvement to promote 100% competency.
Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: At the completion of the upcoming cohorts of teacher candidates' MAT TEEMS SS initial teacher preparation program.
Projected Completion Date: 05/2010
Responsible Person/Group: Program Coordinator and Faculty affiliated with the MAT TEEMS SS program.
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Maintain Student Performance
Although candidates performed exceptionally well on all outcomes, social studies would like to continue to achieve 100% competency on all standards. Social studies faculty will meet regularly and identify areas for improvement to promote 100% competency.

Established in Cycle: 2008-2009
Implementation Status: Planned

Budget Amount Requested: $0.00 (no request)

Classroom Management
The results of student exit survey data indicated student need for more classroom management instruction and skills. Many students stated that more experiences and training in effective classroom management would greatly benefit their teaching and improve their overall instruction. We will devout more instructional time and focus field experiences on the use of effective classroom management strategies.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Implementation Description: Within our methods courses and field experiences, instructors will provide additional concentrated instruction on the use of various effective classroom management strategies.
Responsible Person/Group: Dr. Chantee Earl McBride

Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

To improve the assessment process for our program, we have included the Teacher Work Sample. This assessment is designed to address the overall program goals and serve as one of the program's key assessments. It was necessary to provide a clear and concise assessment that would directly align with the state and national standards for Social Studies and Teacher Education. As we continue to review and streamline the assessment process, modifications or additions to the Teacher Work Sample, and overall program course of study will be implemented. We understand the need to constantly evaluate the effectiveness of our assessments in hopes of providing quality educational experiences for all of our aspiring Social Studies teachers.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The assessment data indicated that our program efforts to impact pre-service teachers content knowledge and planning have been successful. Our Social Studies pre-service teachers performed at adequate and proficient levels on their evaluations in regards to planning and content knowledge. These results indicate that our increased and focused efforts within the coursework and practicum on content and planning of instruction were well received. We will continue to emphasize these areas within our courses, and in addition, provide more instruction on effective classroom management skills for our students.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment this year (2010-2011)?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

**Georgia State University**
**Assessment Data by Section**
**2010-2011 Social Work BSW**
*As of: 12/12/2016 04:11 PM EST*
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
To prepare students for generalist social work practice in a range of roles and services that deal with the existing and developing challenges that confront individuals, families, groups, and communities.

**Goals**

**G 1: Professional Identity**
Students will identify as a professional social worker, and conduct themselves accordingly with the standards of practice

**G 2: Social Work Ethics**
Students will be able to apply social work ethical principles to guide their professional practice

**G 3: Critical Thinking for Professional Judgments**
Students will demonstrate their ability to critically analyze various types of information to be able to communicate professional judgments to clients, colleagues and other constituencies in social work practice.

**G 4: Engage in Research**
Students will be able to engage in research informed practice, and practice informed research

**G 5: Knowledge of Human Behavior**
Students will be able to apply knowledge of human behavior and the social environment

**Student Learning Outcomes/Objectives**

**SLO 1: Professional Boundaries (G: 1) (M: 1)**
Students will be able to understand the context of their practice, and how their behavior embodies the values of the social work profession. This is especially critical within their relationship with clients and professional colleagues.

**SLO 2: Manage personal values (G: 2) (M: 2)**
Students will be able to recognize and manage personal values in a way that allows professional values to guide practice

**SLO 3: Appraise and Integrate Knowledge (G: 3) (M: 3)**
Students will be able to distinguish, appraise, and integrate multiple sources of knowledge, including research-based knowledge, and practice wisdom.

**SLO 4: Use Research Evidence (G: 4) (M: 4)**
Students will be able to use research evidence to inform practice.

**SLO 5: Critique and Apply Knowledge (G: 5) (M: 5)**
Students will be able to critique and apply knowledge to understand person and environment
**Measures, Targets, and Findings**

**M 1: SW 4950 Log on Professional Boundaries (O: 1)**

Students prepare a 4 pages log on their interactions with clients and colleagues at their internship site. They have to assess their ability to uphold their social work professional boundaries; that is, be able to act in a professional manner that represents the mission and auspice of their internship site.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Professional Boundaries**

90% of students will receive 24 out of 30 points (80%) on the rubric for the assignment

**Findings 2010-2011 - Target: Met**

The average score was 27.1 which is above the target of 24 points.

**M 2: SW 3700 Self Reflection Paper (O: 2)**

Students prepare a self reflection paper on their experience of doing role plays and tapes on working as a counselor with various client issues.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Manage personal values**

80% of students will receive 8 points for the paper (80%).

**Findings 2010-2011 - Target: Met**

The average grade on the paper was 93% so the goal of 80% was exceeded

**M 3: SW 3200 Historical Biography (O: 3)**

Students research a historical figure in social work / social justice and prepare a summary of that person's life and impact on social work. Multiple sources are used to look comprehensively at the contribution and impact of the individual on the field.

Source of Evidence: Project, either individual or group

**Target for O3: Appraise and Integrate Knowledge**

80% of students will receive 64 points (80%) or more on the assignment

**Findings 2010-2011 - Target: Partially Met**

The average point score on this assignment was 77.3 so not all students met this outcome

**M 4: SW 3500 Library Assignment (O: 4)**

Library assignment on research

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Use Research Evidence**

90% of students will achieve at least 8 out of 10 possible points on the paper

**Findings 2010-2011 - Target: Met**

This assignment was offered in Fall and the average grade as 95% and again in the Spring and the average grade was 88% so this goal of 90% was met.

**M 5: SW 3330 Case Review Paper (O: 5)**

Case review paper where students must complete a literature review and synthesize material to apply findings to a case study

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O5: Critique and Apply Knowledge**

80% of students will receive 80% of points on the assignment

**Findings 2010-2011 - Target: Met**

81% of the students reached 80% of points on this assignment

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**CTW**

The School has exceeded the minimum number of courses required for CTW. Beginning in Fall, we have 3 courses that students will complete: two semesters of a human behavior theory course and one semester of a social welfare policy courses. We exceeded the minimum number to provide additional opportunities for our students to work on critical thinking skills.

**Established in Cycle:** 2008-2009
**Implementation Status:** Finished
**Priority:** High
**Implementation Description:** Begins in Fall 2009
**Projected Completion Date:** 07/2009
### Field Research
Additional content on research and evidence based practice will be included in the field seminars that accompany the internships to assist students to integrate this content in their placement sites.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

### Generalist Practice
Next academic year, 2009-10, the School is planning to review the entire undergraduate curriculum and change to a competency based approach. This new structure will help students identify the particular competencies needed for entry level BSW practice, and assist faculty with sequencing the values, skills, and knowledge that students need at various points in their educational careers.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 08/2009

### Survey Theory
Part of the CTW courses in our School are the theory-related courses (2 semesters). Students will have the opportunity to work more closely on the application of theory to practice situations.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** Medium
- **Projected Completion Date:** 07/2009

### Theory
This assignment will be included in the first semester CTW course. Problems in student performance were a combination of understanding content, as well as being able to organize content in a meaningful way within the paper. Starting next academic year, students will have the opportunity to rewrite the paper, as well as turn in drafts prior to a final version.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

### Theory Early Life
This course is the first CTW offering for students within the major. Additional opportunities to submit paper drafts and rewrite the assignment will be included. In addition, writing consultants will be used in all sections to provide additional one-on-one consultation for student support with their papers.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

### Theory Field
The range in performance evaluations by section ranged from 73% - 88%. This area was the lowest ratings across all areas of the internship evaluations. To increase ability to use theory to guide practice, additional content on theory will be added to the field seminar course which runs concurrently with the internship. These changes will include additional overview of theoretical content, and practice on integration of theory with cases within presentations and written assignments.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 12/2009

### Orientation
Orientation to major
- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Medium
- **Implementation Description:** The orientation process for majors is being refined. This will help students make decisions about sequencing courses and expectations about progression of programs of study. At this point, we have developed a new model that is a hybrid of individual and group formats. This seems to be working well
- **Responsible Person/Group:** BSW Program Committee

### Policy
Policy has been divided into three sections (instead of the previous 2). This allows for a lower student:faculty ratio and hopefully, additional attention to content and questions from students.
- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** Expend additional teaching resource to have 3 sections of policy
### Research

**Summer Course**
- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** Medium
- **Implementation Description:** Continue to offer research methods in summer with expanded enrollment
- **Responsible Person/Group:** Director of School

### CTW Revision

During spring semester when this course is offered, students were required to enroll in two CTW courses. We received feedback, and analyzed CTW assignment grades, and made the decision to eliminate one of the Spring semester CTW courses. That leaves one CTW requirement in Fall, and only one in Spring. The SSW is also doing some additional training of CTW instructors around requirements.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished
- **Priority:** High

### Relationships (Measure | Outcome/Objective):
- **Measure:** SW 3200 Historical Biography
- **Outcome/Objective:** Appraise and Integrate Knowledge
- **Responsible Person/Group:** Mary McLaughlin, BSW Director

---

### Georgia State University

**Assessment Data by Section**

**2010-2011 Social Work MSW**

As of: 12/12/2016 04:11 PM EST

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

### Mission / Purpose

The mission of the MSW program is to prepare students for social work leadership roles in the effort to solve, in partnership with others, the existing and developing challenges that confront communities and the people within these communities.

### Goals

**G 1: Critical Thinking**
- Students will be able to apply critical thinking to inform and communicate professional judgments

**G 2: Community Partnerships**
- Students will engage in community partnership practices that are responsive to diversity and difference

**G 3: Social and Economic Justice**
- Students will develop skills to advance human rights and social and economic justice.

**G 4: Context that shape social work practice**
- Students will develop skills to assess and shape macro contexts that influence the practice of social work

**G 5: Intervention Skills with Communities**
- Students will develop skills to be effective social work practitioners within community settings

### Student Learning Outcomes/Objectives

**SLO 1: Evaluate & Integrate Multiple Sources of Knowledge (G: 1) (M: 1)**
- Students will be able to evaluate and integrate multiple sources of knowledge, including research-based knowledge and practice-generated knowledge

**SLO 2: Theory and Practice with Communities (M: 2)**
- Students will read a book that describes a case example of an urban area that is undergoing transformation. They will write a paper that integrates theory and practice concepts with this case example.

**SLO 3: Power and Privilege (M: 3)**
- Students will analyze ways which differential power and privilege shape communities and society

**SLO 4: Leadership in Community Change (M: 4)**
- Students will develop leadership skills in promoting changes to improve community well being

**SLO 5: Community Collaboratives (M: 5)**
Students will develop skills to develop, monitor, and strengthen collaborative relationships that build healthy communities

**Measures, Targets, and Findings**

**M 1: Eval prop (O: 1)**
Students will construct and submit an evaluation proposal that integrates learning from their evaluation course with experiences that they are having in their internship site.

Source of Evidence: Project, either individual or group

**Target for O1: Evaluate & Integrate Multiple Sources of Knowledge**

The class average for the proposal will be 90% or higher on SW 8200, Evaluation & Technology course.

**Findings 2010-2011 - Target: Met**
The class average on the proposal was 90%

**M 2: Common Ground (O: 2)**
Student read a book on gentrification and community change titled, Common Ground, and write a paper that integrates concepts from community theories and practice to understand this experience.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Theory and Practice with Communities**

The class average for the integrative paper on Common Ground will be 90% or higher

**Findings 2010-2011 - Target: Met**
The class average for the paper was 100%

**M 3: Power & Privilege (O: 3)**
Students write a reflection paper that analyzes how concepts of power and privilege within organizations, communities, and society within SW 8300, Leadership & Management

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Power and Privilege**

The class average for the paper on power and privilege will be 90% or higher in the Leadership & Management course.

**Findings 2010-2011 - Target: Met**
The class average on the paper on power and privilege was 92%

**M 4: Dissemination of Community Project (O: 4)**
Students do presentation and associated final paper about their experience working with a community partner on a service learning project

Source of Evidence: Capstone course assignments measuring mastery

**Target for O4: Leadership in Community Change**

The class average for the paper and oral presentation on the community projects will be 90% or higher

**Findings 2010-2011 - Target: Met**
The class average for the oral presentation and paper was 98% on their community projects

**M 5: Community Skills (O: 5)**
Students will write a paper on skills development for social work practice at the community level.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O5: Community Collaboratives**

The class average for the paper that outlines community practice skills in SW 8100 Skills and Techniques of Community Partnerships course, will be 90% or higher

**Findings 2010-2011 - Target: Met**
The class average for the paper on community collaboratives was 90%

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**SurveyAssessment**

This item was rated low compared to the target, and had 6% reporting minimal confidence. The MSW program committee will review ways to enhance this content within the program.

Established in Cycle: 2008-2009

Implementation Status: Planned

Priority: High
**SurveyConfidence**
In leadership and management class, include additional time to discuss leadership outcome with graduating students  
- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** High

**SurveyFacilitation**
Provide an additional opportunity with the field internship seminar to discuss learning on this skill.  
- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** High

**SurveyInfluence**
Have MSW program committee review this item and determine a method to increase students’ learning in second year field seminar course  
- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** High

**SurveyPolicy**
Student complete the policy course during the first year of the graduate program. Clearly, they are stating that they need additional opportunities to develop this skill during the second year, and integrating the content. The MSW program committee will review ways to "boost" this content during the second year of the program.  
- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** High

**SurveyResearch**
The School sponsors monthly brown bag sessions for students, which have traditionally been focused on practice outcomes. Next year, some of the topics will involve evidence based practice approaches, and include more content on research  
- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** High

**SurveyTechnology**
This course is a candidate to be restructured as a hybrid course (50% on line). The advantage to this structure is that students can self pace and go through content in a slower pace, if the content seems to difficult. The School has tried that approach with other content areas, and has achieved good success.  
- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** High

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have totally changed our assessment protocol. The major issue was that we needed to align our WEAVE assessment with the new accreditation standards in social work that are competency based.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have resequenced some of the courses and have modified the numbers to be more representative of progression in the students' programs of study.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?

We set up faculty work groups that looked at the data in depth across curriculum sequence areas. That is, foundation year of the graduate program (Year 1) and progression to the advanced year (Year 2). As a result of setting up this new review structure, there is a more thorough analysis of our curriculum and structure.

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment this year (2010-2011)?

Some of the content that we had “packaged” in the foundation or advanced year needed to be resequenced. In addition, we moved some of the content and assignments across areas within the curriculum to better integrate the academic and internship components of the graduate social work program.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you
With a more concerted structure between reaccreditation requirements and the WEAVE protocol, we are collecting data that is more meaningful and has direct relevance to our curriculum design. We anticipate that the current administrative structure of review by faculty will continue - which broadens the overview from the responsibility of the curriculum committee to the full faculty.

**Annual Report Section Responses**

**Most Important Accomplishments for Year**
Restructure of the assessment protocol to a competency based approach which is aligned with the new assessment standards in social work.

**International Activities**
We offered our first study abroad elective this past year. We hope to expand this course and continue to offer as an elective.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Sociology Assessment of Core**
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Goals**

**G 2: Analysis of Contemporary Problems**
Students develop the ability to identify, analyze, and suggest solutions to pressing social problems. Students analyze contemporary multicultural, global, or international questions.

**G 1: Acquisition of Knowledge**
Students articulate key sociological concepts and theories and utilize key data sources that provide sociological information and research findings.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

**Student Learning Outcomes/Objectives**

**SLO 1: Acquisition of knowledge (G: 1) (M: 1)**
Common embedded questions on objective exams are designed to allow students to demonstrate their knowledge of key sociological concepts and theories, and about social conditions and problems.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

**SLO 2: Analysis of Contemporary Problems (G: 2)**
Through common embedded questions on objective exams, students demonstrate their ability to identify, analyze, and suggest solutions to pressing social problems, both locally and globally.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

**Measures, Targets, and Findings**

**M 1: SOCI 1101 and SOCI 1160 embedded exam questions (O: 1)**

SOCI 1101 and soci 1160 exam questions The goal assessment categories here are "Sociological Perspective," "Multicultural Issues," and "Global/International Issues." Five multiple-choice questions were designed to assess competence in each goal area. Instructors in all sections of Soci 1101 and Soci 1160 were requested to select at least one multiple choice in each of the three sections and to embed the questions in their final exams. Instructors were free to select more than one question as long there was at least one question to assess each of the three goals. The total number of students who were assessed in this area was 993 students from 11 sections of 1101 (637 students), and 7 sections of 1160 (354 students). In the area of "Sociological Perspective," 96% of students in 1101 and 89% of students in 1160 answered questions correctly; in the area of "Multicultural Issues," 95% of students in 1101 and 92% of those in 1160 answered questions correctly; and in the area of "Global/International Issues correctly," 95% of students in 1101 and 90% in 1160 answered questions correctly. Edit Finding Add Action Plan Related Action Plan(s): (details in Action Plan Tracking) 1. 2007-2008 Help

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Acquisition of knowledge**
At least 80% of students should answer questions correctly.
Mission / Purpose
The Department of Sociology at Georgia State University is committed to excellence in the advancement of knowledge about social forces, social behavior, and social change. Through dedicated research, teaching, and service, the Department's work benefits students, colleagues, policy makers, and the public. Established in Cycle: 2007-2008 Active Through: 2007-2008 Entry Status: Final Established By: Migration Tool on 10/13/2008 Help

Goals
G 1: Acquisition of knowledge
Students study and learn to clearly articulate key sociological concepts and theories.

G 2: Application of knowledge
Students apply the most up-to-date facts and information about social conditions and problems.

G 3: Utilization of Data Sources
Students utilize key data sources that provide sociological information and research findings analytically.

G 4: Analysis of Social Problems
Students will apply their skills to develop an analysis of contemporary social problems.

G 5: Communication skills
Through their work in sociology, students gain the skills necessary to clearly communicate their understanding, insights, and analyses verbally and in writing.

G 6: Critical Thinking Skills
Students demonstrate their abilities to synthesize data, data analysis, and theoretical arguments into cogent and insightful interpretive writing (or problem solving).

G 7: Acquisition of Knowledge
Students study and learn to clearly articulate key sociological concepts and theories.

Student Learning Outcomes/Objectives
SLO 2: data collection and data analysis (G: 1, 2, 3) (M: 3)
A. Students acquire the skills to collect data  B. Students demonstrate appropriate computer skills  C. Students are able to read and understand sociological research reports/articles

SLO 3: Analysis of Social Problems (G: 1, 2, 3, 4, 5, 6) (M: 2, 4)
Faculty assessment of students' ability to: A. to identify, analyze, and suggest solutions to pressing social problems  B. analyze contemporary multicultural, global, or international questions

SLO 4: Communication Skills (G: 5) (M: 2)
A. Students develop effective written communication and editing skills  B. Students show appropriate writing conventions and formats

Other Outcomes/Objectives
O/O 1: Acquisition of Knowledge (G: 1) (M: 1, 2, 3, 4)
Faculty assessments of students' abilities to: A. articulate key sociological concepts and theories  B. apply the most up-to-date facts and information about social conditions and problems  C. utilize key data sources that provide sociological information and research findings

O/O 5: Critical Thinking Skills (G: 6) (M: 2, 3)
A. Students formulate research questions and formulate testable hypotheses  B. Students are able to analyze and interpret data
### Measures, Targets, and Findings

#### M 1: Sociological Theory (SOCI 3030) Final Exam or Paper (O: 1)

This measure is derived from professors' evaluations of how well, in their exams or papers, students articulated key sociological concepts or theories. 84 students in two sections were evaluated. Professors judged that 38% of their students were doing work they considered excellent (a score of 4); that 25% were doing work they evaluated as very good (a score of 3); that 15% were doing work they saw as good (a score of 2); and that 21% were doing work they considered to be poor (a score of 1). Our target is to have 70% of students assessed as excellent or very good in this measure; we fell short of this, at 63%.

Source of Evidence: Standardized test of subject matter knowledge

#### M 2: SOCI 3020 (Sociological Methods) Paper and/or Exam (O: 1, 3, 4, 5)

Assessment is based on professors' evaluations of: students' course papers (in which they develop research proposals) and/or final exams. Students' work is assessed on each outcome/objective measure. Fifty students (in 2 sections of the same professor) were assessed based on their course papers. The professor evaluated 42% of these papers as excellent (a score of 4) at demonstrating students' "acquisition of knowledge"; 34% were judged to be "very good" (a score of three) in this area; 12% were judged to be "good" (a score of 2) and 12% were judged to be poor (a score of 1). In terms of communication skills, the professor assessed 42% of students' papers as excellent; 34% as very good; 12% as good, and 12% as poor. In terms of demonstration of "critical thinking," the professor assessed 42% of students' papers as excellent; 34 as very good; 12% as good, and 12% as poor. In terms of demonstrating "analytic skills," professors assessed 42% of students' papers as excellent; 34% as very good;12% as good; and 12% as poor.

#### M 3: SOCI 3010 (Social Statistics) student performance (O: 1, 2, 5)

Professors' evaluations of students' analytic skills and critical thinking skills in Statistics courses. Professors evaluate students on a 4-point scale. Forty students (in one section) were evaluated. The professor assessed 12.5% of students to be excellent (a score of four) in their demonstration of analytic skills (appropriate computer skills); 50% were assessed as very good, 25% as good, and 12.5% as poor in this area. The professor judged 25% to be excellent in their demonstration of critical thinking skills (able to analyze and interpret data). She assessed 50% of students as very good; 12.5% as good; and 12.5% as poor in this area.

<table>
<thead>
<tr>
<th>Target for O2: data collection and data analysis</th>
</tr>
</thead>
</table>
70% of the students will score "excellent" or "very good" in their demonstration of analytic skills (appropriate computer skills) on their final exams.

**Findings 2010-2011 - Target: Not Met**

Target: not met. 62% of students were assessed as "excellent" or "very good" in terms of their analytic skills.

**Target for O5: Critical Thinking Skills**

70% of the students will score "excellent" or "very good" in their critical thinking.

**Findings 2010-2011 - Target: Met**

Target: Met. 75% of students were assessed as "excellent" or "very good" in their demonstration of critical thinking skills on their final exams.

**M 4: SOCI 3201 (Inequalities) Final Exam (O: 1, 3)**

This measure is based on professors' evaluations (using a 4-point scale) of students' demonstration of "acquisition of knowledge"; their ability to identify, analyze, and suggest solutions to pressing social problems; and their ability to analyze contemporary multicultural, global, or international issues, based on their performance on their final exams. The work of 111 students (in three sections) was assessed. In the area of "acquisition of knowledge," professors judged 28% of students' work to be excellent; 23% to be very good; 41% to be good, and 9% to be poor. In the first measure on analyzing contemporary problems, professors judged 28% of students’ work to be excellent; 23% to be very good; 41% to be good; and 9% to be poor. In the second (global) measure, professors judged 28% of students’ work to be excellent; 23% to be very good; 41% to be good; 9% to be poor.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Acquisition of Knowledge**

70% of the students will score "excellent" or "very good" in their acquisition of knowledge.

**Findings 2010-2011 - Target: Not Met**

Target: Not met. 51% of students were assessed as "excellent" or "very good" in terms of their acquisition of knowledge.

**Target for O3: Analysis of Social Problems**

70% of the students will score "excellent" or "very good" in their analysis of social problems.

**Findings 2010-2011 - Target: Not Met**

Target: Not Met. 51% of students were assessed as "excellent" or "very good" in terms of their analyses of social problems on their finals exam.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**focus on students' abilities to demonstrate knowledge acquisition**

Professors will continue to focus on helping students to articulate their acquired knowledge and to their analyses. We are not far below our target, in these areas. The variation from year to year of professors' assessments of student work may have more to do with changes in evaluators than with any significant change in quality of students.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: SOCI 3010 (Social Statistics) student performance | Outcome/Objective: data collection and data analysis
- Measure: SOCI 3201 (Inequalities) Final Exam | Outcome/Objective: Acquisition of Knowledge
- Measure: Analysis of Social Problems
- Measure: Sociological Theory (SOCI 3030) Final Exam or Paper | Outcome/Objective: Acquisition of Knowledge

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Sociology MA**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Department of Sociology at Georgia State University provides graduate students with a broad exposure to the discipline of Sociology as well as in-depth study in special areas of expertise. The broad knowledge of Sociology comes through coursework in a variety of substantive areas, as well as through training in research methodologies, statistics, and theory. The goals of the Department are to provide a general intellectual foundation that supports the student's analytical understanding of social life, a sound methodological background that prepares the student for social research and policy evaluation, and a rich and specialized body of knowledge that equips the student for the practice of Sociology in both the public and private sectors.

**Goals**
G 1: Analytical Skills
Students are expected to master appropriate analytical skills.

G 2: Critical Thinking Skills
Students are expected to possess appropriate critical thinking skills.

G 3: Communication Skills
Students are expected to evidence appropriate written communication skills.

G 4: Acquisition of Knowledge Skills
Students are expected to appropriately use sociological concepts, theories, information, and data sources.

G 5: Analysis of Contemporary Questions Skills
Students are required to possess the ability to appropriately analyze pressing social problems.

<th><strong>Details of Action Plans for This Cycle (by Established cycle, then alpha)</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Course Ordering Changes</strong></td>
</tr>
<tr>
<td>In order for M.A.-level students to perform better in their Social Research Methods courses, Social Statistics courses, and in their Masters theses, the Sociology department has made some modifications to the ordering of M.A.-level methods and statistics courses. This re-ordering of the statistics and methods courses will require students to complete the courses in a more timely, less spread-out, manner. (Previously, students would sometimes delay their progression through the course sequences, which would affect their learning and retention.) This re-ordering will also make it easier for students without sufficient prior knowledge or coursework in these areas to take undergraduate-level prerequisite courses, without getting behind their fellow students in their graduate cohort. However, part of the reason that this objective was not met is because only three assessments were made regarding M.A. Theses this year. Of those three assessments, two were rated as &quot;excellent&quot; (one was rated as &quot;good&quot;).</td>

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

We set up an action plan to reorder our statistics and methods courses, which has been going well. We have also agreed as a faculty to increase the rigor of all of our required courses in statistics, methods, and theory.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

We are able to see by the time students work on their Masters theses that their critical thinking skills have vastly improved.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We don't feel at this time that our CTW program needs additional development. There hasn't been a problem in the implementation of our “course ordering” plan. No assistance is necessary.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

No changes have been made since last year; this year we maintained our previous change and monitored it. At the Masters level, we haven't made any changes since last year.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We haven't made changes since last year. We made a change last year and are monitoring it. There will be a new Director of Graduate Studies next year; I am unaware what changes in the assessment process she will make in the future.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have been satisfied with the results of the graduate assessments. The changes we have made would have been made without the assessment findings. The faculty stay involved with the degree program regardless of the assessment outcomes or procedures. At this point we are just continuing to monitor the changes previously put in place. The new Director of Graduate Studies may change things next year, that I do not know.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?

We didn't have to use them -- we met and exceeded our goals. We keep track of our program beyond these assessment reports.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?

That our Masters program seems to be humming along nicely.

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

I do not know. There will be a new Director of Graduate Studies in a few months. She may change things or may not.

Georgia State University
Assessment Data by Section
2010-2011 Sociology PhD
(As of: 12/12/2016 04:11 PM EST)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Department of Sociology at Georgia State University provides graduate students with a broad exposure to the discipline of Sociology as well as in-depth study in special areas of expertise. The broad knowledge of Sociology comes through coursework in a variety of substantive areas, as well as through training in research methodologies, statistics, and theory. The goals of the Department are to provide a general intellectual foundation that supports the student's analytical understanding of social life, a sound methodological background that prepares the student for social research and policy evaluation, and a rich and specialized body of knowledge that equips the student for the practice of Sociology in both the public and private sectors.

Goals
G 1: Analytical Skills
Students are expected to master appropriate analytical skills.

G 2: Critical Thinking Skills
Students are expected to possess appropriate critical thinking skills.
**G 3: Communication Skills**
Students are expected to evidence appropriate written communication skills.

**G 4: Acquisition of Knowledge Skills**
Students are expected to appropriately use sociological concepts, theories, information, and data sources.

**G 5: Analysis of Contemporary Questions Skills**
Students are required to possess the ability to appropriately analyze pressing social problems.

### Student Learning Outcomes/Objectives

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

We decided to reorganize our PhD doctoral exams, as previously described. The course ordering changes that we put in place a couple of years ago have been monitored as well. They seem to have worked. The students who failed last year’s doctoral exams had been in the program for a long time and had taken these course prior to our reordering. Students who matriculated into the program more recently and have been subjected to the course ordering changes seem to do better on the doctoral exams.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

By the time a student starts to work on (and finish) their dissertation there is vast improvement in their critical thinking skills.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We’ve put a change in place this year (changing the doctoral exams and increasing the rigor of our required courses in statistics, methods, and theory) that we will continue to monitor. The department has also agreed and affirmed to all instructors that methodological content should be increased in all substantive graduate courses, and not leave methods/statistics instruction to just the specific courses in those topics. Thus, we are also taking steps to improve our instruction in this area. We also added an additional course requirement on methods/statistics.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

50% of students will pass the Methods/Statistics Qualifying Examination.

**Findings 2010-2011 - Target: Not Met**

The PhD Qualifying Examination in Methods and Statistics was given taken six times in 2010-2011. Of those six attempts there were 4 (66.7%) failures and 2 (33.3%) passes.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Statistics/Methods Instruction**

The department decided last year (to go into effect August 2011) to change its doctoral examinations from qualifying examinations in statistics, methods, and theory to a specialty examination. This past year (2010-2011) we offered the last two exams in the old, qualifying exam, format. The new, specialty exam format will go into effect in August 2011; it represents a major change in our doctoral instruction that will bring our requirements more in-line with our peer institutions. Although there were six attempts at the qualifying exam in methods/statistics, that represents just three students. Three students took the exam in January 2011, and all three failed the exam. The students retook the exam in May. Of those three students, one failed the methods/statistics exam for a second time (and is being scholastically terminated from the program, per College rules) and the other two passed. Although the department decided last year to change the doctoral examinations, we continue to take very seriously our instruction in sociological statistics and methods. The department has also agreed and affirmed to all instructors that methodological content should be increased in all substantive graduate courses, and not leave methods/statistics instruction to just the specific courses in those topics. Thus, we are also taking steps to improve our instruction in this area. We also added an additional course requirement on methods/statistics.

Established in Cycle: 2010-2011  
Implementation Status: In-Progress  
Priority: High  

**Relationships (Measure | Outcome/Objective):**

| Measure: Methods Qualifying Exam | Outcome/Objective: Analytical Techniques  
| Data Analysis | Data Collection | Formulating Hypotheses |

**Implementation Description:** The new exams go into effect next month, in August. The increased instruction in methods/statistics (and the increased emphasis on these topics in other courses) went into effect this past academic year, 2010-2011.

**Responsible Person/Group:** Dawn Baunach

**Theory Instruction**

The department decided last year (to go into effect August 2011) to change its doctoral examinations from qualifying examinations in statistics, methods, and theory to a specialty examination. This past year (2010-2011) we offered the last two exams in the old, qualifying exam, format. The new, specialty exam format will go into effect in August 2011; it represents a major change in our doctoral instruction that will bring our requirements more in-line with our peer institutions. Although there were five attempts at the qualifying exam in theory, that represents just three students. Three students took the exam in January 2011. Of those three, two failed and one passed. The two students who failed the exam in January retook the exam in May. Of those two students, one failed the theory exam for a second time (and is being scholastically terminated from the program, per College rules) and the other is rewriting a conditional pass answer in August. Although the department decided last year to change the doctoral examinations, we continue to take very seriously our instruction in sociological theory. Just this week a group of faculty has decided to hold a working discussion group to discuss our two theory courses. The department has also agreed and affirmed to all instructors that theoretical content should be increased in all substantive graduate courses, and not leave theory instruction to just two specific courses. Thus, we are also taking steps to improve our theory instruction in the two theory courses and in all substantive courses.

Established in Cycle: 2010-2011  
Implementation Status: In-Progress  
Priority: High  

**Relationships (Measure | Outcome/Objective):**

| Measure: Theory Qualifying Exam | Outcome/Objective: Concepts and Theories  
| Facts and Information | Global Questions | Social Problems |

**Implementation Description:** The new exams are going into effect next month. The increased theoretical standards of all courses went into effect this past academic year. The working theory group will begin having meetings next month.

**Responsible Person/Group:** Dawn Baunach
We have completely changed the format of our doctoral exams, including their timing, method, and content. All faculty have been involved in the creation of the new exam format. Many faculty have already been involved in the administration of the new exams. Additionally, the faculty who teach the required courses in statistics, methods, and theory have been involved by increasing the rigor of their courses.

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We haven't changed any of the learning outcomes, measures, targets. But we have changed what are being used to evaluate those targets (i.e., the doctoral exams have changed). There will be a new Director of Graduate Studies in a few months, so I don't know what changes she may make to the assessment process.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have changed the doctoral exams and have decided to increase the rigor of our required courses.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?

Although we largely met our goals, we decided for the good of the program more generally (and to bring it more in line with our peer departments) to change our doctoral exams. Our decision to increase the rigor of our required graduate courses (in statistics, methods, and theory) was made not because of the assessments results (which we had met), but just because we want to increase the rigor of our program (produce stronger graduates, etc.). We decided this as a department independent of the assessments.

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment this year (2010-2011)?

We didn't meet some of our goals because two (of only three) students taking the doctoral exams this past year were "hold-overs" from many years ago. Most doctoral students in the program elected to wait to take the exams this year (as opposed to last year) because of the new, better format. Some of those who took the exams last year were some of the weaker students admitted many years ago. (In one case, admitted ten years ago.) Since then our admissions standards have increased quite a bit. One of the students who failed the exam would not be admitted into the program today and would not have made it through our more rigorous courses (and the two "C" rule that went into effect a couple of years ago). The other two students who took the exams last year came to our PhD program without Masters degrees in Sociology. In the old system they were allowed to move on to doctoral courses without having to take additional masters-level courses. This too has changed in the past few years. In sum, many of the changes we have made more generally to the program in the past few years (increasing admissions standards, enforcement of grade requirements, enforcement of prerequisites, increased course rigor, etc.) have produced a better, stronger group of doctoral students. The students who failed the exams last year, did not really experience these general program changes, and thus were some of our weaker students. In the end, we believe that all of the changes we have made to the program in the past few years have vastly improved it.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

I don't know. In a few months there will be a new Director of Graduate Studies.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Spanish BA**

*As of: 12/12/2016 04:11 PM EST (Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

The mission of the Department is, through the study of modern and classical languages, cultures and literatures, 1. to provide students the opportunity to improve their critical thinking skills; 2. to better appreciate universal humanistic values; 3. to encourage them to acquire an international perspective; 4. to equip them to function as global citizens; 5. to prepare them, through the various majors in modern languages, for future careers as teachers, translators and interpreters, as well as for important positions in international business.

**Goals**

**G 1: Knowledge of Hispanic Literature**

Student will understand the particularities of Hispanic literature.

**G 2: Outcomes for the current period**

Previous assessments could not be completed successfully due to several factors including personnel changes in the Department, the complexity of the program and the unsatisfactory design of the original rubrics. After consultation with GSU's Director of Academic Assessment, it was decided to focus on a single goal, General Goal 6, for the current period. The assessment was made in the Introduction to Literature course, a requirement for all majors in Spanish. The new rubric for this goal was redesigned by departmental faculty skilled in the science of assessment. It includes 4 weighted criteria of a literary text: Focus on Topic (35%), Literary Lens Use (35%), Organization (15%) and Accuracy of Grammar and Spelling (15%).
**Student Learning Outcomes/Objectives**

**SLO 6: Knowledge of Hispanic Literatures (M: 1)**
The student shall demonstrate a general acquaintance with target language literatures and the ability to critically analyze and interpret the literary, cultural and historical content of literary texts.

**Measures, Targets, and Findings**

**M 1: Paper (O: 6)**
In Spanish 3307 (Introduction to the Study of Literary Texts), students wrote a paper whose purpose was to demonstrate their ability to critically analyse and interpret the literary, cultural and historical content of a literary text. They were evaluated for their appropriate focus on the topic (35%), their literary lens use (35%), the clear and succinct organization of their paper (15%), and the correctness of their grammar and spelling (15%).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O6: Knowledge of Hispanic Literatures**
We hope that students will be able to achieve a score of 8.0-8.4 in their assessment for literature. However, because Goal 6 assessment is new and in its first phase, it will not be possible to identify accurately important trends and localize areas of weakness and strength at this time. For this reason and to get more precise and relevant information, the Department will continue with this single focus for the Academic Year 2010-2011. The results of both years will then be compared and analyzed, areas of weakness and strength identified, and corrective actions taken for each criteria and in each major, and a decision will be made whether to assess a larger number of goals.

**Findings 2010-2011 - Target: Met**
During this period, 4 courses of Spanish 3307 (Introduction to the Study of Literary Texts) were taught. Students majoring in Spanish achieved the results of 8.2, 8.3, 8.6, 8.6.

---

**Georgia State University**
**Assessment Data by Section**

**2010-2011 Spanish MA**
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
The mission of the Department is to give students preparing for the M.A. in Spanish the opportunity to develop appropriate proficiencies in the Spanish language, to acquaint them with the literary and cultural productions of Spanish speaking countries, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching and research, translation and interpretation, international business, and other areas. The Department's mission, with regard to students preparing for the M.A. in Spanish, is to encourage them to contribute to the development, organization and dissemination of research and criticism in the literatures and cultures of Spanish speaking countries, and in linguistics and language pedagogy. As a core element in the University's mission of internationalization, the Department encourages their interest and involvement in international exchanges.

**Goals**

**G 1: Goals for 2010-11**
In Fall 2010, I began as Director of Graduate Studies for MCL. Previous to my tenure as DGS, no work had been done on establishing rubrics or developing measures for direct and indirect assessment of graduate student learning in our department. MCL had already established a series of outcomes dating back to 2004-05. According to those outcomes, I began to develop a means for directly assessing student work: seminar papers, theses, non-thesis papers, written exit exams, and oral exit exams. I have accumulated this data into excel sheets which I have placed in the document repository. I have also included there the Milestone Evaluation used to assess this work. In Spring 2011, I began to develop indirect assessment measures including a survey for our MA students, a similar survey for our faculty (to gauge the difference in perception between faculty and students), and an annual report for students to inform me of their professional and academic activities relevant to our MA program (All of these documents are available in the Document Repository). These indirect assessment were put online via Google Docs to make it easier for individuals to do the survey and easier for me to track the results that were loaded directly into an Excel format. All of my focus toward assessment in 2010-11 was dedicated to the development of clear rubrics that were easy to follow and easy to use for the faculty of MCL, but that also created concrete data that would lead to clear conclusions about the ability of MCL to meet our stated goals and desired outcomes with regard to student learning. Now that I have begun to accumulate data and faculty are on board with the measures I have devised, I will be focused this year on tracking the data, assessing it, and developing an action plan through WEAVE.

**Student Learning Outcomes/Objectives**

**SLO 1: Research and Data Collecting Skills (M: 1)**
Students are able to read and understand research, acquire skills to collect data and utilize key data sources that provide literary and linguistic information and research findings.
**SLO 2: Critical Thinking Skills (M: 1)**
Students demonstrate competence in the analysis of literary texts and the evaluation of critical thinking in literature.

**SLO 3: Acquisition of Knowledge (M: 1)**
Students articulate key literary and philosophical concepts and theories, apply the most up-to-date facts and information in resolving literary and linguistic issues and demonstrate appropriate literary, linguistic, historical and cultural knowledge.

**SLO 4: Effective writing, communication and editing (M: 1)**
Students demonstrate communicative competence in written and oral Spanish.

### Measures, Targets, and Findings

**M 1: Direct and indirect assessment (O: 1, 2, 3, 4)**

Direct Assessment:
1. M.A. Thesis: The thesis must be original work by the student. The proposal must be approved by faculty members.
2. M.A. Research paper: The aim of this project is for the candidate to apply theoretical concepts to her or his present or future professional practices (integration). Candidates will present the results of their research in a 12-20 page paper. Candidates have a choice to write the project in either their target language or in English, under the direction of their graduate advisor.
3. M.A. General Examination: After completing all course work for the degree, candidates are required to pass a written and an oral General Examination based on a reading list. Candidates in the literature concentration must be prepared to discuss all the works listed in their chosen areas both individually and in relation to each other and to the period in which they are written. The written exam requires candidates to choose three fields from Spanish reading list. 4. Oral Exam: For the oral examination Spanish candidates are responsible for one additional area of their choice from the reading list, one additional area based on course work taken in culture or literature, and the three areas covered in the written exam. This examination is scheduled 7 to 10 days following successful completion of the written exam. It lasts a minimum of one hour and is conducted by an M.A. Committee. Indirect Assessment: Student evaluations, annual reports, and teaching portfolios are evaluated by the Department’s executive committee.

Source of Evidence: Senior thesis or culminating major project

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Encourage Scholarship**
Supervise student work that can be presented at professional meetings.
- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Implementation Description: Planned
- Responsible Person/Group: Graduate Spanish Faculty

**Mentoring**
Mentor M.A. candidates who express a desire to continue graduate work at the doctoral level.
- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Implementation Description: Planned
- Responsible Person/Group: Graduate Spanish Faculty

**Professional Activities**
Encourage and oversee M.A. candidates’ initiatives (such as the graduate conference) that contribute to student growth and institution visibility.
- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Implementation Description: Planned
- Responsible Person/Group: Graduate Spanish Faculty

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Speech BA**

*As of 12/13/2016 23:11 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
Speech communication explores the construction, diffusion, analysis, and impact of messages as they occur among individuals, groups, organizations, and cultures in the media age. Students will learn major theories and concepts within this discipline that they will then use to create, perform, and critique the effectiveness of various types of communicative acts.

**Goals**
G 1: Communication Development/Strategy
Students understand the development and strategic aspects of human communication.

G 2: Communication Research
Students understand the communication research tradition.

G 3: Communication Competence
Students utilize communication competence and critical thinking skills.

Student Learning Outcomes/Objectives

SLO 1: Human Communication Models (G: 1) (M: 1)
Students can identify competing models of human communication.

General Education/Core Curriculum Associations
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 2: Communication Variations (G: 1) (M: 2)
Students can describe variations in communication across age, gender, race, culture, and/or disability.

General Education/Core Curriculum Associations
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Strategic Plan Associations
5.4 Enhance the global competency of students, faculty and staff.

SLO 3: Use of Power (G: 1)
Students can explain the use of power in various human communication situations.

General Education/Core Curriculum Associations
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 4: Communication Competence Requirements (G: 1) (M: 3)
Students can explain various requirements for communication competence.

General Education/Core Curriculum Associations
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 5: Research Models/Paradigms (G: 2)
Students can identify different research paradigms/models of research in the field of communication.

Strategic Plan Associations
3.1 Enhance a research culture.

SLO 6: Scholarly Publication Summarization (G: 2) (M: 4)
Students can effectively summarize scholarly publications of various kinds.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate
comprehension of written material: purpose, message, and rhetorical situation.

Strategic Plan Associations
3.1 Enhance a research culture.

SLO 7: Research Process/Results Comprehension (G: 2)
Students can appropriately critique the research process and arguments/conclusions presented in scholarly publications.

General Education/Core Curriculum Associations
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Strategic Plan Associations
3.1 Enhance a research culture.

SLO 8: Verbal/Nonverbal Skills (G: 3) (M: 5)
Students demonstrate effective verbal and nonverbal delivery skills.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 9: Writing Skills (G: 3) (M: 6)
Students demonstrate effective writing skills.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 10: Adaptation to Diversity (G: 3) (M: 7)
Students demonstrate competent adaptation to diverse audience and communication situation.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 11: Message Critique (G: 3) (M: 8)
Students appropriately critique the content, structure, and style of oral, written, and mediated messages in a variety of contexts.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

Measures, Targets, and Findings

M 1: Comm and Gender Final Exam Question (O: 1)
Students in 4490 Communication and Gender Fall 2010 answered a final exam question asking them to identify four separate theoretical paradigms and how each addressed the question of gender development. Students' answers were coded using the attached rubric. The Competing Models of Communication rubric assesses 3 categories on a 1-5 scale with 1=Poor and 5 = Excellent. The three categories are 1) Identification of four distinct theoretical approaches/paradigms; 2) Explanation of four distinct theoretical approaches/paradigms; and 3) Identification of theories associated with each approach/paradigm.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Human Communication Models
Average of 4 (out of 5) by the majority of the students
### Findings 2010-2011 - Target: Met

Students in 4490 wrote answers to an essay exam in class and were evaluated using this form in the Fall 2010 semester. Of the 18 students evaluated, 11 students achieved a 4 or higher on the competing models rubric.

### M 2: Intercultural Communication Paper #3 (O: 2)

Students in 3750 Intercultural Communication wrote a paper which asked them to critically analyze an aspect of the English-Only movement in the state of Georgia from at least two perspectives using intercultural concepts and theories. Specifically, students studied various cultural issues surrounding the English-Only Driver's License debate here in Georgia. Students were asked to state as neutrally as possible at least two sides to the issue. Then, students were asked to identify and analyze the cultural issues impacting the debate. Last, students had to take a side on the issue and argue their rationale. The attached rubric assesses students’ ability to understand the variations between cultures that are influencing the immigration debate as it pertains to English-only Driver's License tests. The rubric is a Likert-type scale ranging from 1 to 5 with 1 = Poor and 5 = Excellent. The rubric assesses 1) The ability of student to engage in perspective-taking by fairly and accurately stating more than one side to the debate; 2) The ability of students to identify intercultural concepts particular to this debate; and 3) The ability of students to apply intercultural concepts to this particular debate.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Communication Variations**

Average of 4 (out of 5) by the majority of the students

### Findings 2010-2011 - Target: Met

Students in 3750 Intercultural Communication wrote papers and were evaluated using this form in the Spring 2011 semester. Of the 25 students evaluated, 18 students achieved a 4 or higher on the Situational and Demographic Communication Variations Rubric.

### M 3: Comm & Aging Frasier Character Analysis (O: 4)

Students in Communication and Aging answered a question which required them to analyze the popular Sitcom Frasier to determine the level of communication competence the characters exhibited. Scores were ranked from 1-10, with 1 being poorly answered and 10 being excellently answered.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O4: Communication Competence Requirements**

7 out of 10 by majority of the students

### Findings 2010-2011 - Target: Met

Students in Communication and Aging wrote a paper which analyzed an aspect of the English-Only debate in the State of Georgia. A writing rubric was developed with analyzed writing based on organization (intro, body, and conclusion elements) and style (grammar, spelling, and APA formatting). The rubric scores students from 1-3 with 1=Unsatisfactory, 2=Satisfactory, 3=Good. See attached rubric for further details. Two categories (introduction/conclusion and body) are averaged together to form the Verbal Skills; three categories (use of voice, use of body, rapport with audience) are averaged together to form the Nonverbal Skills.

Source of Evidence: Presentation, either individual or group

**Target for O8: Verbal/Nonverbal Skills**

Average of 2 (out of 3) by the majority of the students

### Findings 2010-2011 - Target: Not Met

This rubric was used for students in SPCH 4800 Communication and Diversity for both the fall and spring semesters. Of the 28 students evaluated, only 7 students achieved an average of 4.0 or higher.

### M 4: Comm & Diversity Annotated Bibliography (O: 6)

This rubric has three items and was applied to an annotated bibliography assignment. The three items include: clear writing style (lack of grammar, spelling and typographical errors), concise explanation of the research, and informative. Each item was measured on a 1-5 Likert Type Scale; see attached rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O6: Scholarly Publication Summarization**

Average of 4 (out of 5) by the majority of the students

### Findings 2010-2011 - Target: Met

Students in SPCH 4800 Communication and Diversity gave formal presentations in class and were evaluated with this form in the spring semester. Adapted “The Competent Speaker” evaluation form, a form created by the National Communication Association; assesses 3 categories on a 1-3 scale with 1=unsatisfactory, 2=satisfactory, 3=good. See attached rubric for further details. Two categories (introduction/conclusion and body) are averaged together to form the Verbal Skills; three categories (use of voice, use of body, rapport with audience) are averaged together to form the Nonverbal Skills.

Source of Evidence: Presentation, either individual or group

**Target for O8: Verbal/Nonverbal Skills**

Average of 2 (out of 3) by the majority of the students

### M 5: Comm and Diversity Presentation (O: 8)

Students in SPCH 4800 Communication and Diversity gave formal presentations in class and were evaluated with this form in the spring semester. Of the 14 students evaluated, 11 students achieved a 2.0 or higher on the Verbal Skills Dimension. Of the 14 students evaluated, 11 students achieved a 2.0 or higher on the Nonverbal Skills Dimension.

### Findings 2010-2011 - Target: Met

Students in SPCH 3750 Intercultural Communication Spring 2011 wrote a paper which analyzed an aspect of the English-Only debate in the State of Georgia. A writing rubric was developed with analyzed writing based on organization (intro, body, and conclusion elements) and style (grammar, spelling, and APA formatting). The rubric scores students from 1-3 with 1=Unsatisfactory, 2=Satisfactory, and 3=Good. See attached rubric for more details.
### Target for O9: Writing Skills

Average of 2 (out of 3) by the majority of students

#### Findings 2010-2011 - Target: Not Met

Students in SPCH 3750 Intercultural Communication wrote a paper analyzing an aspect of Georgia's English-only debate. They were required to have proper organization and style usage. Of the 25 students evaluated, 12 of them achieved a 2 or higher on the Writing Rubric.

### M 7: Targeted Health Message (O: 10)

Students studied a particular group all semester, and as part of their final assignment, they created a "targeted health message" for their group. This required identifying a specific health issue, explaining that health issue and articulating how that health issue was appropriate for their group; in addition, they were expected to identify the format of this health message (e.g., banner ad on website, print advertisement in paper, public service announcement on the radio, etc.), explain the details of the message format, and articulate how this message format was appropriate to their selected group. A rubric was created to measure these 6 items on a 1-5 Likert Type Scale. See attached rubric.

Source of Evidence: Capstone course assignments measuring mastery

### Target for O10: Adaptation to Diversity

Average of 4 (out of 5) by the majority of the students

#### Findings 2010-2011 - Target: Met

This rubric was used for students in SPCH 4800 Communication and Diversity for both the fall and spring semesters. Of the 32 students evaluated, 19 students achieved an average of 4.0 or higher.

### M 8: Persuasion Response Paper #13 Obama Campaign (O: 11)

Students in Persuasion wrote a Paper which they analyzed message efficacy in a specific context. The assignment was as follows: “Based on the information provided in the extra reading and the explanation of political campaigns in the textbook, explain why Obama's campaign was more effective than McCain's campaign during the 2008 presidential election. (Effectiveness is based on the fact that Obama won).” Students were evaluated on their ability to connect the persuasion theory/concept to the given situation. Students were awarded between 0 and 10 points. This was not the grade given on the assignment, but was, rather, a portion of the whole grade. (The other sections included explained the concept, explained situation, grammar/spelling, and source citation. These elements are not included in this measure.)

Source of Evidence: Written assignment(s), usually scored by a rubric

### Target for O11: Message Critique

Target Level: 7 (out of 10) by a majority of the students.

#### Findings 2010-2011 - Target: Met

Students in Persuasion wrote a paper analyzing message efficacy in the Obama and McCain campaigns. They were required to apply Persuasion theories to the assigned situation. Of the 21 students evaluated, 21 achieved a score of 7 or higher on this measure.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### revision of curriculum/assessment plan

Normal 0 false false false MicrosoftInternetExplorer4 The speech faculty is still discussing the speech major's curriculum revisions, more specifically how those revisions impact the learning goals and objectives for the major. Once new goals and objectives have been established, a new assessment plan will be created. Assignments for our two CTW courses, Persuasion and Communication & Diversity, have been developed by the faculty to be used for assessment purposes.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** Early Fall Semester 2009
- **Projected Completion Date:** 08/2009
- **Responsible Person/Group:** Speech faculty

#### Develop Measure for Objective #3: Power

One of our objectives is for students to be able to explain the use of power in various human communication situations. For this cycle, we did not collect data to measure this objective. For the next cycle, we need to identify specific courses and assignments that could give us the necessary data to measure this objective.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Discuss with Speech Faculty courses in which "power" is taught. Identify assignments that can be used for data and develop plan for gathering that data.
- **Responsible Person/Group:** Assessment Coordinator and Speech Faculty

#### Develop Measure for Objective #5: Research Paradigm Identification

One of our objectives is to teach students to identify different research paradigms in the field of communication. For this cycle, we did not collect data to measure this objective. For the next cycle, we need to identify specific courses and assignments that could give us the necessary data to measure this objective.

- **Established in Cycle:** 2010-2011
Develop Measure for Objective #7: Research Critique

One of our objectives states that we want students to be able to appropriately critique the research process and arguments/conclusions presented in scholarly publications. For this cycle, we did not collect data to measure this objective. For the next cycle, we need to identify specific courses and assignments that could give us the necessary data to measure this objective. Also, we will discuss the annotated bibliography assignments with faculty teaching upper division/research courses. We will encourage faculty to move beyond having these be summary assignments to having them require research critique.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Implementation Description: Meet with Speech Area faculty to discuss classes and assignments that will give us the necessary measures.

Responsible Person/Group: Assessment Coordinator and Speech Area Faculty

Gather additional data

One of the goals of the Speech Major is equip students to summarize scholarly research. The target was not met for this objective. To better understand whether this an ongoing and/or widespread issue with our students, we should gather more data from additional assignments.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Comm & Diversity Annotated Bibliography | Outcome/Objective: Scholarly Publication Summarization

Implementation Description: Have discussion with faculty teaching upper division, especially research courses, which assignments best assess ability to summarize research and make a plan to gather student work to analyze for next year's assessment. Also have discussion about assigning annotated bibliographies as first-round assignments in classes that require a term paper.

Responsible Person/Group: Assessment Coordinator and Speech Faculty

Writing Rubric Design

I would like to revise the writing rubric scale. The current scale ranges from 1 to 3. Revising the scale will allow it to more accurately reflect the range of students' current ability levels. Also, this will allow the assessor to understand in which areas students need further training. Further, the rubric should also assess the content of the paper to see that the content is accurately and thoroughly explained. The current rubric does not assess content.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Intercultural Communication Paper #3 | Outcome/Objective: Writing Skills

Implementation Description: Assessment Coordinator for Speech will research potential writing rubrics to use in writing courses and decide upon one to use for next year's assessment data.

Responsible Person/Group: Assessment Coordinator for Speech

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

- We significantly revised our assessment plan from last year. We did this in three ways. First, we revised our mission statement to be specific to the Speech Area rather than using the Communication Major's mission statement. This more accurately reflects the Speech track and differentiates our mission from the other tracks in the department. Second, we revised our goals. A few of our goals were too broad. We narrowed our focus and picked measurable goals. This allowed us to discuss as a faculty what our focus was and what we felt students should leave knowing/understanding. Last, we worked to tie our goals and objectives to the both the university's strategic plan and the general education curriculum. Because we changed all of these things, this was our first attempt to assess our new objectives.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to
curriculum or courses are made for other reasons, please explain.

Based on this year's assessment data, we will engage in discussions that center around the following:

Improving assignments, developing a rubric that cuts across classes, assigning annotated bibliographies in more classes, and working on developing broader knowledge of discipline in Persuasion course. One way we can improve based on this data is to adapt the assignments we give students to enhance student learning. In two specific instances, the faculty will discuss ways in which assignments can move from basic summary or description assignments to assignments that require critique and synthesis. The targeted health message will move from just being described to being developed. The annotated bibliography will move from requiring just a summary to requiring a critique of the article. A second way we can improve based on this data is to develop a writing rubric that cuts across classes. Students in our major are clearly struggling with writing skills. If we create a rubric which students grow accustomed to seeing and faculty grow accustomed to using, the goals and expectations will become increasingly clear. We could then pinpoint in which areas students struggle more. Having a shared rubric could allow us to have more beneficial discussions about gaps in student learning. A third way we discussed improving is (potentially) assigning annotated bibliographies in more courses as a precursor to term papers. In addition to giving students more writing opportunities and exposure to scholarly research, the faculty are also discussing whether we should build modules into lectures wherein we teach students how to read and understand research articles. A fourth goal for improving students learning based on this data is to more consciously use the Persuasion course (one of our CTW courses) as a class to develop a broader knowledge of the communication discipline.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Sports Administration MS**

(Include those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The Master of Science in Sports Administration degree seeks to prepare graduates with professional skills and knowledge for careers in the $600-plus billion dollar sports business industry through an exceptional program inspired by excellence, vision, scholarship, leadership, and entrepreneurship. This program is one of only 34 approved masters programs in the country (out of 240-plus programs). Within this industry -- ranking as the 6th largest industry in the USA -- there is a multitude of organizations and enterprises that require highly trained personnel and executives in sport business, such as, sports media (TV, print, electronic), university and high school sports, sports apparel and equipment designers and manufacturers, sports arenas, sport marketing firms, athletic clubs, professional sport teams, fitness management centers, and the sports tourism industry.

**Goals**

G 2: Students will gain a focused knowledge of the discipline of sport business management.

G 1: To prepare students to be successful professionals working in the sport business industry.

**Student Learning Outcomes/Objectives**

SLO 1: Students will demonstrate knowledge of theoretical and practical fundamentals of sport business management. (G: 2) (M: 1, 2, 3, 4)

Students will demonstrate knowledge of theoretical and practical fundamentals of sport business management.

Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management; Sport Marketing Association.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of research (3.3.1.4)

SLO 4: Sport Marketing (M: 4)

Demonstrate an understanding and application of sport marketing to sport business.

SLO 5: Understands Administration of Sport and Management and Leadership Theory (G: 1, 2) (M: 1, 3)

Develop an understanding of management functions and leadership aspects in sport business.

Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management; Sport Marketing Association; COSMA

**Standard Associations**

1. Outcomes of administrative support services (3.3.1.2)

SLO 7: Has work experience in the sport business industry (M: 2, 4)

Student will perform work in a sport business setting. Work will be conducted with an approved sport business, supervised by an in-office agency representative, and monitored by a faculty member through weekly reports.

Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management (NASSM); Commission on Sport Management Accreditation (COSMA)
Other Outcomes/Objectives

O/O 2: Can develop financial plans and forecasts for sport business (M: 1, 2, 3, 4)
Student will be able to develop financial planning techniques applicable to the sport business industry. This includes creating budgets and forecasting revenues and expenses.
Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management (NASSM); Commission on Sport Management Accreditation (COSMA)

O/O 6: Socio-cultural Aspects of Sport (M: 4)
Students study the role and significance of sports in contemporary society, issues of a cultural nature, aspects of the human experience in sport, such as gender, race, sexual orientation, age, and disability issues; and the effects of and relationships with various factors, such as the media, violence, religion, and commercialization, on the sporting world.

O/O 8: , (M: 4)

Measures, Targets, and Findings

M 1: Major Projects (O: 1, 2, 5)
The student will demonstrate conceptual understanding of unique aspects of sport business in major projects in courses. Each instructor will evaluate the projects with an emphasis on the accuracy of the application of course content to the project; organization of the project; and accuracy of research material used for the project. On any major project in a course, 80% of students will score a passing grade (80% or higher).
Source of Evidence: Project, either individual or group

M 2: Papers (O: 1, 2, 7)
Papers in each course will be evaluated by the instructor of that course. Evaluation emphasis will be on writing skills, coverage and accuracy of the content, and accurate citation with review of literature. Evaluation will be of equal parts of each item. In courses that require a paper or other written assignment, 80% of students will meet or exceed a passing score of 80% as evaluated by the instructor.
Source of Evidence: Written assignment(s), usually scored by a rubric

M 3: Presentations (O: 1, 2, 5)
Presentations in 50% of major required courses. Instructors in each course will evaluate the presentation with an emphasis on appropriate organization of the presentation; accuracy of information presented; and relevancy of information presented. In courses that require a presentation, 80% of students will meet or exceed a passing score of 80% as evaluated by the instructor.
Source of Evidence: Presentation, either individual or group

M 4: Comprehensive Exam (O: 1, 2, 4, 6, 7, 8)
A culminating all-essay comprehensive exam that covers all required course content. The exams are evaluated by program faculty; each section is scored with a 0-10 scale. The student must average a 7.0 on all evaluated parts of the exam to pass. In a comprehensive examination, 90% of students will score a passing mark; exams are scored by specific professors based on subject matter.
Source of Evidence: Comprehensive/end-of-program subject matter exam

Georgia State University
Assessment Data by Section
2010-2011 Sports Medicine MS
As of: 12/12/2016 04:11 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The program for the major in sports medicine prepares students for career opportunities in the field of athletic training. The program includes course work and laboratory experiences in the areas of prevention, management, evaluation, and rehabilitation of athletic injuries. The program also includes a research project in which findings will be presented at a graduate student symposium prior to graduation. The purpose of this program is to provide qualified candidates with in-depth experiences beyond entry-level athletic training expectations. Additionally, all students must complete a minimum of 400 hours of clinical experience in an approved setting as part of the degree program requirements.

Goals
G 1: Demonstrates effective Sports Medicine Administration
Students through daily participation, demonstrate administrative functions in a variety of athletic settings. Measured through evaluations given every semester on a 1-5 scale.

G 2: Understands and applies therapeutic Modalities
Students will demonstrate both practical and cognitive knowledge of therapeutic modalities.

**G 3: Understands importance of professional Development and service to the profession**
Students will demonstrate an understanding of professional development, responsibilities, and its importance to their continued growth in their chosen field.

**G 4: Knows orthopedic Assessment and injury rehabilitation**
Students demonstrate knowledge in orthopedic assessment and injury rehabilitation.

**G 5: Understanding and utilizing Evidenced Based Practice as related to athletic training practice**
Students will learn how to obtain, synthesize, and conduct research.

### Outcomes/Objectives

**O/O 1: Understanding and utilizing Evidenced Based Practice as related to athletic training practice (G: 5) (M: 1, 3, 6)**
Students demonstrate knowledge and understanding of current research methods, including evidenced based practice, and are able to read and interpret current research in their field.

### General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Institutional Priority Associations

2 Student promotion and progression

### Standard Associations

4 Outcomes of research (3.3.1.4)

### Strategic Plan Associations

3.1 Enhance a research culture.

3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**O/O 2: Is proficient in acute Injury and Illness Care (G: 1, 2, 3, 4, 5) (M: 2, 4, 6, 7, 8)**
Students develop advanced proficiency in the acute care and management of activity related injury and illness.

### General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Institutional Priority Associations

2 Student promotion and progression

3 Timely graduation

### Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

5 Outcomes of community/public service (3.3.1.5)

### Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

3.1 Enhance a research culture.

3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**O/O 3: Demonstrates effective Sports Medicine Administration (G: 1, 3) (M: 4)**

(Draft/In Progress) Students through daily participation, demonstrate administrative functions in a variety of athletic settings.

### Measures, Targets, and Findings

**M 1: Professional Presentations (O: 1, 5)**
To gain full understanding of professional issues, students must present a minimum of twice annually in a peer setting on a relevant professional issue. All will submit an abstract for poster or oral presentation at a scientific conference.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Understanding and utilizing Evidenced Based Practice as related to athletic training practice**
Students will present twice a semester utilizing evidence based research and will be graded on presentation.

<table>

- **Measure:** Understanding and utilizing Evidenced Based Practice as related to athletic training practice
- **Measure:** Clinical Site Evaluation | **Outcome/Objective:** Demonstrates effective Sports Medicine Administration
- **Measure:** Orthopedic Assessment and Injury Rehabilitation | **Outcome/Objective:** Understanding and utilizing Evidenced Based Practice as related to athletic training practice
- **Measure:** Orthopedic Assessment and Injury Rehabilitation | **Outcome/Objective:** Understands and applies therapeutic Modalities
- **Measure:** Orthopedic Assessment and Injury Rehabilitation | **Outcome/Objective:** Understands and applies therapeutic Modalities
- **Measure:** Professional Presentations | **Outcome/Objective:** Understanding and utilizing Evidenced Based Practice as related to athletic training practice
- **Measure:** Orthopedic Assessment and Injury Rehabilitation | **Outcome/Objective:** Understands and applies therapeutic Modalities
- **Measure:** Orthopedic Assessment and Injury Rehabilitation | **Outcome/Objective:** Understands and applies therapeutic Modalities
- **Measure:** Orthopedic Assessment and Injury Rehabilitation | **Outcome/Objective:** Understands and applies therapeutic Modalities

**Implementation Description:** Understands and applies therapeutic Modalities | Knows orthopedic Assessment and Evaluation Mgt.

**Evidence based research project**
Students will identify, critique, and present current literature on various topics related to athletic training practice. Students will also get into small groups and select a topic of interest related to athletic training practice and perform a system review. Project purpose, methods, results, and conclusions will be presented to class. The systematic review projects will take place during the Evidence Based Medicine Course.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Thesis or Research Project | **Outcome/Objective:** Understanding and utilizing Evidenced Based Practice as related to athletic training practice

**Implementation Description:** Presentation assignments have been added to Rehabilitation and Modalities classes.

**Responsible Person/Group:** Dr. Shelley Linens
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
Since last year’s assessment report, we have fine tuned the research project to have clearly defined expectations and due dates throughout the entire year. These changes were made to improve the quality of research. We will further fine tune the research process with an Evidence Based Medicine class in the first summer semester and have added a special section, just for our students, of the basic research course required by the College of Education. This class will better address our students’ needs in quantitative analysis. We have also changed the credit hours associated with our Rehabilitation class from 2 hours to 3 hours in order to better prepare our students for rehabilitation of a wider variety of injuries and for the rehab components of the final competency exam. We have also decided to have only one biomechanics course, instead of 2, because biomechanical concepts are not a primary focus of our program and therefore shouldn’t require a second course. This new course will be created for the Sports medicine professional.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
No changes will be made based on this year’s assessment data. Curriculum and course changes were submitted during the year and will go into effect in the next year. Changes include: Evidence Based Medicine Course add Credit hours have been increased for Rehabilitation class, from 2 to 3. There were 2 biomechanics courses, but there will only be one in the future. Course has been streamlined and will be directed to only our students.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from last year’s (2009-2010) assessment. What actions did you take? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment this year (2010-2011)?
We have continued to meet most of our goals and have submitted curriculum and course changes in hopes of better preparing our students to meet all of our goals.

ADMINISTRATIVE DEPARTMENT QUESTION 3: What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Implementation of curriculum and course changes submitted during this assessment period. We anticipate a 5% improvement in Final Competency scores and final grades in Rehabilitation course.

Annual Report Section Responses

Most Important Accomplishments for Year
President of National Association visited campus and gave a presentation. Five curriculum changes were submitted and accepted. Website updated. Began annual alumni party at Annual Sports Medicine Conference.

Challenges for Next Year
Offering a cadaver lab for the Graduate Anatomy class.

Publications and Presentations
One graduate student presented at Regional Sports Medicine conference.

Academic Teaching Activities
Three teaching assistant positions are open each semester to assist with undergraduate anatomy course and athletic training lab class.

Service to the External Community
Two students presented taping and splinting skills to local physicians. Seven students volunteered for medical coverage at the Peachtree Road Race. Six students volunteered for medical coverage at the Georgia Games.
Mission / Purpose
Recognizing that physical activity is vital for all people, the Department of Kinesiology and Health at Georgia State University seeks to: 1. Discover new knowledge and advance the understanding of the role of physical activity in attaining optimal health and well-being, 2. Educate members of society and prepare future professionals, and 3. Promote healthy lifestyles through life-long activity and learning. The Ph.D. major in Kinesiology is designed to prepare students for research and teaching careers at colleges and universities and for health, physiological performance, rehabilitative science, and related fields. Three concentration areas, Biomechanics and Physical Rehabilitation, Exercise Physiology, and Exercise Psychology are available within this program.

Goals
G 1: Knowledge
Students will gain knowledge in Kinesiology and advanced knowledge in their area of research focus

G 2: Problem solving
Students will become better problem-solvers

G 3: Skills
Students will gain skills necessary to be successful in research, scholarship, and teaching

Outcomes/Objectives
O/O 1: Prepare for careers as professors and researchers (G: 1, 2, 3) (M: 1, 2)
Prepare graduates for careers as professors and researchers in higher education and research institutions

O/O 2: Understanding of research (G: 1, 2, 3) (M: 2, 3)
Graduates understand the concepts and applications of exercise physiology and biomechanics research methodology

O/O 3: Specialization (G: 1, 2, 3) (M: 4)
Graduates of the program will have a subspecialty that strengthens their skills in their major concentration

O/O 4: Grant writing and management (G: 1, 2, 3) (M: 5)
Graduates are prepared for careers that involve grant writing and management skills

O/O 5: Cultural sensitivity (G: 3) (M: 6)
Graduates are prepared to work with individuals who are culturally and individually different

Measures, Targets, and Findings
M 1: Comprehensive exams and dissertation (O: 1)
Students pass comprehensive exams and write dissertations that contribute to the body of research literature in the exercise physiology and biomechanics fields
Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Prepare for careers as professors and researchers
95% of students will successfully complete this requirement

Findings 2010-2011 - Target: Met
All eligible students passed their comprehensive exams. All graduating students received professorships.

M 2: Research presentations (O: 1, 2)
Students must present papers at professional conferences before they are allowed to sit for comprehensive exams
Source of Evidence: Presentation, either individual or group

Target for O1: Prepare for careers as professors and researchers
100% of students complete this requirement

Findings 2010-2011 - Target: Partially Met
50% of students met this requirement.

Target for O2: Understanding of research
100% of the students will complete this requirement

**Findings 2010-2011 - Target: Partially Met**

50% of students met this requirement

**M 3: Research and statistical design (O: 2)**

Students must successfully pass courses and projects that include statistical and research design and methods components

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Understanding of research**

100% of the students will complete this requirement

**Findings 2010-2011 - Target: Met**

All students taking statistical/research design courses passed the courses.

**M 4: Cognate (O: 3)**

Successful completion of the cognate portion of their doctoral program

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Specialization**

100% of students that successfully complete the program will develop skills in areas of specialization within their respective fields

**Findings 2010-2011 - Target: Met**

75% of students have successfully completed their cognate. The remaining 25% of students are on track to complete their cognate.

**M 5: Seminar and professional development (O: 4)**

Successful completion of seminars and dissertation grant proposals

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O4: Grant writing and managment**

95% of students will meet this requirement

**Findings 2010-2011 - Target: Met**

100% of the students have completed seminars addressing grant writing/management and/or have written grant proposals. At least one student had their proposal funded.

**M 6: Cultural and individual sensitivity (O: 5)**

Cultural and individual sensitivity will be emphasized in coursework

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O5: Cultural sensitivity**

100% of students will complete this requirement

**Findings 2010-2011 - Target: Met**

All doctoral students are exposed to multicultural perspectives in their coursework, class projects, and/or research.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Annual review of doctoral students**

Kinesiology faculty members will meet once in the late Spring (or early summer) semester to review the progress of their doctoral students toward course, residency, and research completion.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Summer 2009
- **Projected Completion Date:** 04/2017
- **Responsible Person/Group:** Kinesiology faculty

**Review and/or revise outcomes and measures**

Kinesiology faculty have developed a policy involving the annual review of doctoral students. This meeting is held in the spring semester and each doctoral student is required to submit a current curriculum vitae, progress report on course work and residency requirements, with special attention to research/scholarship projects. This meeting essentially addresses all aspects of the learning outcomes assessment outcomes/objectives and measures, as well as other issues related to the program.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Cognate
- **Outcome/Objective:** Specialization
- **Measure:** Comprehensive exams and dissertation
- **Outcome/Objective:** Prepare for careers as professors and researchers
**Measure:** Cultural and individual sensitivity | **Outcome/Objective:** Cultural sensitivity
**Measure:** Research and statistical design | **Outcome/Objective:** Understanding of research
**Measure:** Research presentations | **Outcome/Objective:** Prepare for careers as professors and researchers
**Measure:** Seminar and professional development | **Outcome/Objective:** Grant writing and management

**Projected Completion Date:** 04/2012
**Responsible Person/Group:** Kinesiology faculty

**Research presentations**
Kinesiology faculty need to review research programs to insure that doctoral students are participating and presenting research prior to dissertation.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 04/2012

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Annual review of doctoral students. This program insures that students are making adequate progress in their program, as well as in their residency requirements.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This year’s analysis indicated that a small percentage of our students may not be meeting the requirement related to research presentations before their dissertation. A meeting among the Kinesiology faculty will address whether this perceived deficiency is real or an artifact.

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Taxation MTX**

*(As of: 12/12/2016 04:11 PM EST)*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
The Master of Taxation (M.Tx.) program offers a variety of courses that provide students with opportunities to develop research, technical and communication skills that tax professionals need to excel in their careers.

**Goals**

**G 1: Tax Research**
Students will be competent tax law researchers.

**G 2: Technical Tax Knowledge for Practice**
Students will be knowledgeable in the technical areas of tax law for professional practice.

**G 3: Strong Communications Skills**
Students will be effective communicators both in written communications and in oral presentations and will be able to document their research conclusions.

**Student Learning Outcomes/Objectives**

**SLO 1: To develop ability to conduct tax research (M: 1, 2, 3)**
Expected outcomes of above stated program objectives: (1) The student should be able to identify tax issues; (2) The student should be able to locate relevant authority for resolving tax issues; and (3) The student should be able to correctly evaluate primary tax authority. The assessment method for this learning objective is performance on projects in Tax Research (Tx 8030).

**SLO 2: Acquisition of substantive tax knowledge (M: 4, 5)**
Students will demonstrate technical knowledge of tax law in the key areas of corporations and partnerships.

**SLO 3: Demonstrate professional communications skills. (M: 6)**
Students will demonstrate the ability to correctly and effectively document and cite research conclusions in writing and in oral
### Measures, Targets, and Findings

#### M 1: Identifying Tax Issues (O: 1)

Students complete self-tests on an electronic self-assessment website developed by Georgia State University. The assessments consist of four self-tests related to questions of fact and law and identifying issues in various areas of tax law. Assessment takes place in TX 8030.

Source of Evidence: Project, either individual or group

**Target for O1: To develop ability to conduct tax research**

Average score of 70 on questions of Identifying Issues.

**Findings 2010-2011 - Target: Partially Met**

- Fall 2010: 71.63
- Spring 2011: 75.96
- Summer 2011: 67.98

#### M 2: Locating Tax Authority (O: 1)

Students perform online exercises designed to improve ability to effectively and efficiently locate tax authority using electronic resources. Assessment involves a series of self-tests to locate authority using different search techniques and different research databases on an electronic self-assessment website developed by Georgia State University. Assessment takes place in TX 8030.

Source of Evidence: Project, either individual or group

**Target for O1: To develop ability to conduct tax research**

Average score of 70 on Locating Authority self-tests.

**Findings 2010-2011 - Target: Not Met**

- Fall 2010: 53.79
- Spring 2011: 66.05
- Summer 2011: 57.41

#### M 3: Evaluating Tax Authority (O: 1)

Students complete self-tests on an electronic self-assessment website developed by Georgia State University. The assessments consist of questions related to evaluating tax authority located during research and to properly reconciling conflicting authorities. Assessment takes place in TX 8030.

Source of Evidence: Project, either individual or group

**Target for O1: To develop ability to conduct tax research**

Average score of 70 on Evaluating Authority self-tests.

**Findings 2010-2011 - Target: Met**

- Fall 2010: 82.63
- Spring 2011: 79.04
- Summer 2011: 80.43

#### M 4: Knowledge of Corporate Tax Law (O: 2)

Performance is measured by class average on multiple examinations covering detailed elements of forming, operating, and liquidating a corporation.

Source of Evidence: Project, either individual or group

**Target for O2: Acquisition of substantive tax knowledge**

Class average of 85%.

**Findings 2010-2011 - Target: Partially Met**

- Summer 2011: 86 average
- Fall 2011: 84 average

#### M 5: Knowledge of Partnership Taxation (O: 2)

Performance is measured by class average on several exams which test the rules for creating a partnership entity, determining outside basis of partners, and applying the distribution rules to determine proper tax treatment.

Source of Evidence: Project, either individual or group

**Target for O2: Acquisition of substantive tax knowledge**

Class average of 85%.

**Findings 2010-2011 - Target: Met**

- Spring 2011: 87.8
- Summer 2011: 88.9

#### M 6: Demonstrate professional written communications skills (O: 3)

Students are assessed by their overall average in the Business Communications course, BCOM.

Source of Evidence: Project, either individual or group

**Target for O3: Demonstrate professional communications skills.**

Students are assessed on their overall average in the class with a target of 80%.
Findings 2010-2011 - Target: Met

Fall 2010: 90.15

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Tx 8120**
Since there is insufficient time to cover all current topics, consider eliminating the corporate tax return project or providing it as an additional exercise for students desiring the compliance experience.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 08/2010
- **Responsible Person/Group:** Course Instructor.
- **Additional Resources:** None.
- **Budget Amount Requested:** $0.00 (no request)

**Locate Authority -- Change Measurement**
Old Locating Authority tests used strict boolean logic requiring the students to use connectors and specific syntax to formulate searches. Most professional research systems now allow "natural language" searching and a less rigid boolean logic. Our previous instrument did not allow the flexibility that is now found in professional research systems, so we have changed the measurement to incorporate modern research methods.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Developed the instrument in Fall 2011. Revised the questions in Spring 2012.
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Lucia Smeal

**Substitute Boolean Logic self-tests with Final Exam Research Questions**
The Locating Authority tests used Boolean logic requiring the students to use connectors and specific syntax to formulate searches. However, most students now use "natural language" or Google-type searches. Thus, while the students were performing adequately on in-class research assignments, they did not do well with purely Boolean searching. As of Fall 2011, we no longer use the Locating Authority website self-tests tests to assess the students. Instead, we are developing a final examination questions with research questions that will allow the students to use more updated methods of locating tax authority.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** We will develop a final, take-home exam for TX 8030 which requires the students under time pressure to perform independent research incorporating the elements of each of the first three learning objectives with a focus on locating authority. The target score for the exam is 85%. The exam will function as the Locating Authority assessment in conjunction with continued use of the MTX writing websites for the other two assessments.
- **Projected Completion Date:** 08/2011
- **Responsible Person/Group:** Tx 8030 Professor

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Teaching & Learning EdS**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

### Mission / Purpose

The Ed.S. program with a major in Teaching and Learning is intended for professional educators who demonstrate high levels of expertise in their areas of concentration and wish both to develop those areas further and to develop themselves as inquirers, program leaders and instructional specialists. The purpose of this applied degree is to extend the academic preparation and teaching skills of experienced classroom teachers and instructional leaders and to foster the application of these skills and abilities to a variety of educational settings. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good. The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development.

### Goals

**G 1: Develop Education Experts in Concentrations**

Accomplished graduates of the Ed.S. in Teaching and Learning will demonstrate high levels of expertise in their areas of concentration. Concentration areas include Art Education, English Education, English as a Second Language Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Childhood Education, Music Education, Reading...
Education, Science Education, and Social Studies Education.

**G 2: G2: Develop Education Experts, Inquirers & Leaders**

Accomplished graduates of the Ed.S. in Teaching and Learning will develop themselves as inquirers, program leaders, and instructional specialists in their areas of concentration. Concentration areas include Art Education, English Education, English as a Second Language Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Childhood Education, Music Education, Reading Education, Science Education, and Social Studies Education.

100% of program completers will demonstrate an intermediate level of knowledge and skill needed to achieve this objective.

Findings 2010-2011 - Target: Not Reported This Cycle
The Educational Specialist (Ed.S.) degree in Teaching and Learning is currently being deactivated, and students are no longer being admitted to the program.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Future of Ed.S.
We are currently evaluating the viability of the Ed.S. because of the persistent low enrollment in concentration areas. We intend to make a decision regarding our commitment to the future of the program during 2009-2010.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High
Implementation Description: End of Spring Semester 2010
Projected Completion Date: 04/2010
Responsible Person/Group: Department Chair and Ed.S. Faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Future of Ed.S.

Future of Ed.S.
For the last two academic years (2008-2009 and 2009-2010), faculty have evaluated the viability of the Ed.S. in Teaching and Learning degree because of the persistent low enrollment within individual concentration areas. In September 2010, we are submitting curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Relationships (Measure | Outcome/Objective):

Measure: M4: Faculty Rating: Ability to Reflect | Outcome/Objective: O4: Reflects on and Learns from Experience
Measure: M5: Faculty Rating: Learning Communities | Outcome/Objective: O5: Participates in Learning Communities
Implementation Description: Once the curriculum review process is completed, the Ed.S. in Teaching and Learning degree will be officially de-activated.
Projected Completion Date: 12/2010
Responsible Person/Group: Department Faculty and Department Chair
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Ed.S. TLG Program Deactivation In-Progress
In September 2010, we submitted curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education. Our proposals were approved, and we are currently deactivating the Ed.S. in Teaching and Learning degree program.
Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: The Ed.S. in Teaching and Learning is currently being deactivated. Students are no longer being accepted into the program. Faculty are ensuring that students currently enrolled matriculate through the completion of their degree.
Projected Completion Date: 05/2012
Responsible Person/Group: Department Chair and Program Faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

### Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements** - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
NA

**CTW Reflection 2: Assessment** - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
NA

**CTW Reflection 3: Needs** - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

**CTW Reflection 4: Overall Reflection** - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
NA

### Academic Program Question 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
In September 2010, we submitted curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education. Our proposals were approved, and we are currently deactivating the program.

### Academic Program Question 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
In September 2010, we submitted curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education. Our proposals were approved, and we are currently deactivating the program.

### Administrative Dept Question 1:
Explain how your department used the results from last year's (2009-2010) assessment. What actions did you take? What changes did you make as a result?
In September 2010, we submitted curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education. Our proposals were approved, and we are currently deactivating the program.

### Administrative Dept Question 2:
What have you learned from your assessment this year (2010-2011)?
In September 2010, we submitted curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education. Our proposals were approved, and we are currently deactivating the program.

### Administrative Department Question 3:
What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
In September 2010, we submitted curriculum proposals to de-activate the following eleven (11) Ed.S. concentrations: Art Education, English as a Second Language Education, English Education, Foreign Language Education, Library Media Technology, Mathematics Education, Middle Level Education, Music Education, Reading Education, Science Education, and Social Studies Education. Our proposals were approved, and we are currently deactivating the program.
### Mission / Purpose

The mission of the Ph.D. degree program in Teaching and Learning is to prepare accomplished graduates who demonstrate advanced knowledge in a major and cognate discipline, expertise in research design and methodologies, and a strong professional identity through their consistent contributions to a community of educational scholars.

### Goals

**G 1: Develop Researchers in Teaching and Learning**

Accomplished graduates of the Ph.D. in Teaching and Learning degree program will demonstrate advanced knowledge in a major and cognate discipline, expertise in research design and methodologies, and a strong professional identity through their consistent contributions to a community of educational scholars.

### Outcomes/Objectives

<table>
<thead>
<tr>
<th>O/O 1: Research Competence (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Ph.D. candidate demonstrates general research competence including expertise in at least one research paradigm.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>O/O 2: Knowledge of Foundations of Education (M: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Ph.D. candidate develops an in-depth understanding of forces such as historical, social, political, psychological and economic influences that affect education today.</td>
</tr>
</tbody>

</tbody>
</table>

### Measures, Targets, and Findings

**M 1: M1: Faculty Rating of Research Competence (O: 1)**

A summary rating describing the candidate's research competence will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O1: Research Competence**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.

**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated research competence in at least one paradigm. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 2: M2: Faculty Rating of Foundational Knowledge (O: 2)**

A summary rating describing the candidate's foundational knowledge will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O2: Knowledge of Foundations of Education**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.
**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated an in-depth understanding of forces such as historical, social, political, psychological, and economic influences that affect education today. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 3: M3: Faculty Rating of Scholarship within Major (O: 3)**

A summary rating describing the candidate's scholarship within the major will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O3: O3: Creates New Knowledge in Major**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.

**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated the creation of new knowledge and scholarship in their disciplines or majors. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 4: M4: Faculty Rating of Knowledge of Major (O: 4)**

A summary rating describing the candidate's knowledge of the major will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O4: O4: Extensive Knowledge of Major Field**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.

**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated an extended knowledge base in the major discipline. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 5: M5: Faculty Rating of Knowledge of Cognate (O: 5)**

A summary rating describing the candidate's knowledge of the cognate area will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O5: O5: Extensive Knowledge in Cognate Area**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.

**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated an extended knowledge base in a cognate area associated with the major discipline. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 6: M6: Faculty Rating of Identity and Contributions (O: 6)**

A summary rating describing the candidate's professional identity and his/her contributions to the profession will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O6: O6: Professional Identity and Contributions**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.

**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated a developing professional identity through their contributions to the community of scholars in their field. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 7: M7: Faculty Rating of Teaching and Prof Dev (O: 7)**

A summary rating describing the candidate's teaching and professional development will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O7: O7: Teaching and Professional Development**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.
in the major discipline of inquiry. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**M 8: M8: Faculty Rating of Technology Skills (O: 8)**

A summary rating describing the candidate’s technology skills will be derived by the dissertation chair and committee members from review of the residency report and accompanying research artifacts, performance on written and oral comprehensive exams focusing on research methodology, and on the dissertation performance.

Source of Evidence: Evaluations

**Target for O8: O8: Technology as Tool for Inquiry**

On a scale from 1 to 5 (with 5 high), students must receive a faculty rating of at least 3.

**Findings 2010-2011 - Target: Met**

All completers of the Ph.D. in Teaching and Learning demonstrated an in-depth understanding of and expertise in technology as a tool for inquiry for teaching and learning. Thus, 100% of program completers met the achievement target of a faculty rating of level 3 or higher (scale 1=low, 5=high).

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Tracking Our Graduates’ Positions in Higher Ed**

We will continue to track the types of positions/academic appointments our students accept upon their graduation from the Ph.D. program, with the goal of placing a higher percentage of our graduates in research-intensive positions (e.g., an appointment as a faculty member in a research institution of higher education).

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** End of Spring Semester 2010
- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** Department Chair and Department Faculty
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Tracking Our Graduates’ Positions in Higher Ed**

We will continue to track the types of positions/academic appointments our students accept upon their graduation from the Ph.D. program, with the goal of placing a higher percentage of our graduates in research-intensive positions (e.g., an appointment as a faculty member in a research institution of higher education).

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** At the end of each semester, faculty will submit to the department chair the following: (1) name of Ph.D. graduate, (2) graduate’s new position title, and (3) graduate's new institutional affiliation. This information will be compiled by the chair and submitted in the department annual report each year.
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Department Faculty and Department Chair
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Tracking Our Graduates Positions in Higher Ed**

We will continue to track the types of positions/academic appointments our students accept upon their graduation from the Ph.D. program, with the goal of placing a higher percentage of our graduates in research-intensive positions (e.g., an appointment as a faculty member in a research institution of higher education).

NA
Goals

G 1: Urban Teacher Leadership M.S.
Student Learning Outcomes/Objectives

**SLO 1: Students will perform as change agents in schools. (M: 1)**

Students will effectively perform as change agents by positively impacting the culture of the school by facilitating effective dialogue among colleagues, administrators and community members challenging old paradigms of teaching and learning and creating new plans of action. These students will actively participate in creating a school climate conducive to change through a process of redefining roles and relationships, rethinking goals, developing excellence through planning, inquiry and collaboration. They will also engage in the politics of creating excellence in urban schools so that children from diverse groups will be academically successful. These students will also complete a leadership project which institutes change in their schools or school communities.

Relevant Associations: In standards for Programs in Educational Leadership, Standard 1.0 states that candidates who complete the program are educational leaders who develop a vision for learning for a school that promotes the success of all students. Candidates base this vision on relevant knowledge and theories including but not limited to an understanding of learning goals in a pluralistic society, the diverse learners and learners’ needs, schools as interactive social and cultural systems, and social and organizational change. The National Board of Professional Teaching standards’ core propositions state that teachers are members of learning communities and that they work with other professionals on instructional policy, curriculum development and staff development and that teachers also work collaboratively with parents and engage them productively in the work of the school.

Other Outcomes/Objectives

**O/O 2: Students employ critical perspectives in education (M: 2)**

Students will employ normative, interpretative and critical perspectives in education. Students will effectively use pedagogies appropriate for economically disenfranchised children to increase academic achievement. Students will also use strategies from proven instructional programs that have produced excellence in urban educational settings. These students will also draw on the best practices of effective leaders in urban education, business and communities to ensure the academic success of diverse groups of students.

**O/O 3: Students will design, develop and implement action research in their classrooms and schools. (M: 1, 3)**

Students will engage in a process of critical inquiry involving the asking of questions and the collection, analysis and sharing of the data which drives an action to be taken. They engage in continuous action research projects that enhance the opportunity for academic excellence of urban children. Students will identify research methods, procedures, assessments and research design. Students will also design and conduct a major research study.

Relevant Associations: The National Board for Professional Teaching standards have as one of its core propositions that teachers critically examine their practice on a regular basis to deepen their knowledge, expand their repertoire of skills and incorporate new findings into their practice. The Standards for Advance Programs in Educational Leadership state that candidate demonstrate the ability to use appropriate assessment strategies and research methods to understand and accommodate diverse school and community conditions and dynamics. The standards also state that candidates demonstrate an understanding of how to use appropriate research strategies to promote an environment for improved student achievement.

Measures, Targets, and Findings

**M 1: Practicum Project Rubric, Reading, Presentation (O: 1, 3)**

EPEL7680 - On the practicum project, students are graded on a portfolio which includes the following: internship plan (0-15 points), internshiplog (0-20 pts.), career development plan (0-10 pts.), personal/leadership profile (0-10 pts.), self-assessment essay relating 8 roles of leadership (0-10 pts.), school improvement action research proposal(0-35 pts.). EPS 8970A-students are graded on class participation(0-50pts),45-50pts- prepared, read assignments, knows material,demonstrates authentic interest in subject matter, participates frequently, 39-44pts - prepared/read assignments, knows most of the material, demonstrates interest in the subject matter, participates frequently, (33-38pts)-semi-prepared, semi-read assignments,demonstrates uncommitted attempt to subject matter, participates only occasionally, (0-32pts) - not prepared and did not read material,does not know the material and does not participate in class. Students are also graded on a position paper and presentation(0-50pts).45-50pts - demonstrates thorough reading of material with carefull analysis and critical insight. Presentation is clear,intersting, engaging and thoughtful. Handout is clear, concise and virtually error-free. (39-44pts)-demonstrates a standard analysis and typical insight. Presentation is generally clear, somewhat engaging, but handout is unclear. (33-38pts) student demonstrates little reading,cursory analysis and vague insight. Presentation is generally unclear and difficult to follow. Handout is unclear and has numerous errors.(0-32pts) demonstrates no reading, poor analysis. Presentation isunrelated to the text. Handout is not present. [Preview Formatting]

Source of Evidence: Project, either individual or group

**M 2: Course Activities - Papers, Projects, Presentations (O: 2)**

EPSF7120 - students are graded on interview papers (0-20pts.), peer-reviewed group presentations (0-25 pts.), position papers (0-35pts.), journals (0-20 points). EPEL 7410 - Students are graded on instructional supervision issue (issue paper -(0- 20 pts); issue paper/presentation -(0- 20 pts), mid-term exam -(0- 30 pts), final exam -(0-30 pts). EPSF 7450- students are graded on: reform model curriculum handout (0-10pts) reform model curriculum presentation (0-15pts), educative experience paper (0-25pts.), history of curriculum timeline(0-10 pts) history of curriculum paper (0-15pts), curriculum position paper(0-25pts).

Source of Evidence: Written assignment(s), usually scored by a rubric

**M 3: Research Project (O: 3)**

These are applied courses and the assignments are action oriented. In EPRS7910 - Students are graded on: research journal (20pts.), exam(20pts.), action research project (60 pts.) (0-20pts) research journals; (0-20pts) - action research report; (0-20pts) - action research presentation. In EPS 7980 the students earn credit for supervised development and preparation of the master’s project. Students receive an “S”, “IP” or “F”.

1. Students will perform as change agents in urban schools. 2. Students will employ critical perspectives in education. 3. Students will design, develop and implement action research in their classrooms and schools.
Source of Evidence: Project, either individual or group

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**EPY 8250**
Because of transitioning of program faculty, this course (psychology of the inner city child) is no longer offered. As a result, students in the program are encouraged to take sociology of the inner city child in order to have experiences related to the challenges faced by inner city children.

- Established in Cycle: 2008-2009
- Implementation Status: Finished
- Priority: High

**Experiences in Other Urban Areas**
Students in the UTL program will have the opportunity to participate in a summer study of urban school systems in other cities in the United States and abroad. Currently, faculty is planning for school visits in Chicago, IL, in Summer 2010, and London, England, in Summer 2011. By taking part in these experiences, students will have a broader understanding of how systems can vary greatly in how they address student needs.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium

**Maintain and Monitor**
Faculty will continue to implement the program as designed, while monitoring all current student learning outcomes in the 2009-2010 academic year.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: High
- Responsible Person/Group: Faculty members

**Practicum (EPEL 7680A and 7680B) Requirements**
Because of changes to programs in the educational leadership unit, the requirements and assignments for EPEL 7680a and EPEL 7680b were modified to better support the roles required of school leaders and teacher leaders. EPEL 7680A now focuses on preparing students to better understand data. EPEL 7680B now focuses on action research and specifically, research designed to give educators a stronger understanding of their own cultural proficiency.

- Established in Cycle: 2008-2009
- Implementation Status: Finished
- Priority: High

---

**Georgia State University**

**Assessment Data by Section**

**2010-2011 Women's Studies Assessment of Core**

As of: 12/12/2016 04:11 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
Women's Studies at Georgia State University contributes to the university's broader mission of encouraging critical thinking through a focus on feminist and womanist interdisciplinary scholarship, teaching, and community participation. Women's Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. We therefore make explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct our understandings of the world. Furthermore, we analyze the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. In order to explore these issues, we emphasize the following: race, globalization, sexuality, and social change. We promote transformative thinking and activism toward ending oppression and working for freedom and justice.

**Goals**

**G 1: 1) Develop Critical Thinking Skills**
Students should develop critical thinking skills, which include the ability to read and write clearly and carefully, and they should be able to evaluate and analyze claims presented in various textual sources.

**G 3: Feminist/Womanist Perspectives**
Students should develop a basic understanding of broad feminist/womanist interdisciplinary perspectives.

**G 2: Develop writing skills**
Demonstrates the ability to analyze concepts through writing clear, concise, well-argued and well-organized papers.

**Student Learning Outcomes/Objectives**
**SLO 1: Critical Reading Skills (G: 1) (M: 1)**
Demonstrates critical reading skills through the ability to grasp the main point(s) and supporting arguments of an academic or narrative text.

**SLO 2: Thesis Development (G: 1, 2) (M: 1, 2, 4)**
Shows the ability to develop a clear and coherent thesis that directs the entire paper or exam response.

**SLO 4: Feminist/Womanist Perspectives (G: 3) (M: 2, 3, 4)**
Apply feminist/womanist perspectives to contemporary sociocultural issues

**Other Outcomes/Objectives**

**O/O 3: Writing skills (G: 1, 2) (M: 1, 2, 3, 4)**
Demonstrates appropriate writing skills through the ability to develop sufficient evidence, organize the material carefully, and utilize appropriate grammatical conventions for clear and concise writing.

**Measures, Targets, and Findings**

**M 1: Reading Response papers (O: 1, 2, 3)**

Critical responses will enable you to expand upon your general reading of a text and delve deeper to more fully develop your own interpretive and critical voice. While you will demonstrate your understanding of the reading in your critical response, you will do so by crafting an argument about some element of the article or book. In other words, each critical response paper will have a thesis statement that you prove using evidence from the reading itself. Critical response papers should be typed and double-spaced, and should be 2-3 pages in length. In order to get a more nuanced measurement, we collected a set of reading responses from both the beginning and end of 2 classes (random selection, choosing specific students with both papers) in order to see what sorts of progress are made throughout the class. In the 2010-2011 cycle, we decided to look only at a sample of the final papers, because we are measuring writing skills in general, and not only those developed in a single class. We also switched the number system so that 5 is high because the old way of doing it confused members of the committee.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Critical Reading Skills**
On the first set of papers from early on in the semester, we expect that students will have about 1/2 with a score of at least 3, and 1/3 with a score of 2 or higher. On the second set of papers from later in the semester, we hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. This time, we only looked at the final assignment, and we switched the scale so that 5 is excellent, and 1 is unacceptable, in the interests of clarity.

**Findings 2010-2011 - Target: Met**
We found that 91% of students scored at least a 3, and that 55% scored a 4 or 5, so that we met our achievement target.

**Target for O2: Thesis Development**
On the first set of papers from early on in the semester, we expect that students will have about 1/2 with a score of at least 3, and 1/3 with a score of 2 or higher. On the second set of papers from later in the semester, we hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. In terms of our action plan, instead of reworking our targets, we decided to focus only on the later papers this year, in order to measure what they know after they have been in the class.

**Findings 2010-2011 - Target: Partially Met**
On this measure, we found that 73% received at least a 3, and 64% received a 4 or 5. While these results indicate that we did not actually meet our target for basic skills, we were quite close. It also suggests that students either scored quite high or low; there were not a lot of average scores in this section. I suspect that this disparity has as much to do with their writing skills before entering university as it does with the specific results of the class.

**Target for O3: Writing skills**
We measured writing skills here with 2 elements on a rubric -- the first involves evidence, organization, and development, and the second involves writing skills on the level of the sentence, such as syntax, grammar, and punctuation. On the first set of papers from early on in the semester, we expect that students will have about 1/2 with a score of at least 3, and 1/3 with a score of 2 or higher. On the second set of papers from later in the semester, we hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. Once again, on this target, we also only had samples from the final paper, and we had continued to use the altered scale.

**Findings 2010-2011 - Target: Partially Met**
In terms of evidence, 91% of students received at least a 3, and 73% scored a 4 or 5, which exceeds our expectations. In terms of sentence-level skills, 73% of students received at least a 3, and 45% received a 4 or 5, which does not quite meet our expectations. This is the first time that I remember students doing better on evidence than on sentence-level skills; perhaps we have spent so much time focusing on how to provide sufficient evidence that we have actually helped students increase their skills, and now we can turn our attention to sentence structure.

**M 2: Analysis Papers (O: 2, 3, 4)**
The analytic paper should develop a clear and persuasive argument, with a focused, specific thesis statement, solid organization and
development, clear and sufficient evidence; it should also demonstrate appropriate grammar and syntax. The paper should also display students' knowledge of and ability to apply feminist/womanist knowledge and perspectives to their chosen topic.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Thesis Development**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2.

Findings 2010-2011 - Target: Partially Met

On this measure, we found that 83% of students received at least a 3 (on the switched scale), but only 12% received a 4 or 5, which again suggests that increased attention to Thesis Development is helping students to achieve certain base-line expectations, but not to excel at the rate we would like to see.

**Target for O3: Writing skills**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. In terms of writing skills, we have combined 2 measures from the rubric: one involves evidence, development, and organization, and the second involves writing on the level of the sentence, including syntax, grammar, and punctuation.

Findings 2010-2011 - Target: Partially Met

In terms of writing skills, once again we have measured these both in terms of evidence as well as in terms of sentence-level skills. In terms of evidence, 100% received at least a 3, and 50% received at least a 4, which exceeds our expectations. In terms of sentence-level skills, we found that 88% received at least a 3, and 33% received at least a 4, which suggests that we met our expectations in terms of average skills, but not in terms of excellent writing.

**Target for O4: Feminist/Womanist Perspectives**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2.

Findings 2010-2011 - Target: Met

In terms of demonstrating knowledge, we found that 100% of students received at least a 3, and 67% of students received at least a 4. This finding exceeds our expectations, which shows, once again, that students are most successful in terms of demonstrating knowledge, especially compared to their development of basic writing skills.

**M 3: Final Exams (O: 3, 4)**

Students will respond to 4 out of 6 questions in 1 1/2 - 2 pages each. Each answer should address all portions of the question thoroughly, demonstrating familiarity with the material, the ability to utilize concepts to make arguments, and appropriate writing conventions.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Writing skills**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2.

Findings 2010-2011 - Target: Met

In terms of the writing skills, we found that 88% scored at least a 3, and 63% scored a 4 or 5. Here, we have met our goals, once again demonstrating that students often demonstrate stronger writing skills in terms of essay exams than they do on papers. Or, the results suggest that we score their writing skills a bit differently.

**Target for O4: Feminist/Womanist Perspectives**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2.

Findings 2010-2011 - Target: Met

In order to measure how well students demonstrate their understanding of feminist/womanist perspectives, we decided to read these through two rubrics: one measures the responsiveness of the answer to the question, and the other measures their demonstration of general feminist/womanist knowledge. I am happy to report that our target goals were met on both these rubrics. In terms of showing knowledge, 100% received at least a 3, with 88% scoring a 4 or 5. In terms of measuring the response, 100% of these also received at least a 3, with 75% scoring a 4 or 5.

**M 4: Personal Narrative Paper (O: 2, 3, 4)**

Dr. Julie Kubala WST 2010 First Paper Assignment Summer 2011 This handout will outline not only the requirements for the paper, but also give you some guidelines for peer review. 1) Your paper assignment is to write a personal narrative exploring your relationship with gender and/or feminism (identity and/or politics). 2) Although it is a personal narrative, it is important that you include analysis. 3) In order to facilitate the inclusion of sufficient analysis, be sure you can find a clear and focused main point (thesis statement) in your own and others' papers. 4) One way to accomplish this goal is to choose a specific experience to describe and then analyze in the context of its relationship to your identity. 5) One thing to be careful of is to avoid being too broad – you cannot cover your entire life or identity in a relatively short paper!!! 6) Even though the assignment is to write narrative, storytelling should not take up more than half the paper. 7) As with any other essay, it should be concise, organized, and well-written. 8) Because it is a personal narrative, you might not adhere strictly to grammar rules; one way to check whether your writing is sufficiently clear is to ask your peer group to pay particular attention to your sentence structure. 9) In the peer group process, be sure to offer constructive criticism – while it is nice to begin with emphasizing the positive aspects of the paper, simply telling the writer that "this is good" does not really help them. 10) Part of the benefit of peer review involves increasing your own reading skills; ideally, this process should help the reviewer as well as the author of the paper. 11) The paper should be approximately 4-6 pp. long, typed, double-spaced, 12
You do not need a title page (although you do need a title) – simply put your name and course time at the top.

12) You should bring enough copies of your paper to class for your group on June 27. Rubric: 1 2 3 4 5 Clear, focused, analytic main point 1 2 3 4 5 Engaging and significant narrative; relevant to important class topics 1 2 3 4 5 Sufficient and specific evidence; well developed 1 2 3 4 5 Organization – in this, the narrative and analytic sections should be nicely integrated 1 2 3 4 5 Clearly written

Source of Evidence: Written assignment(s), usually scored by a rubric

### Target for O2: Thesis Development

In terms of developing a thesis, we realistically believe that 75% of students should receive at least a 3, with 50% scoring a 4 or 5. In other words, we expect 3/4 to demonstrate basic competence, with half performing well in terms of writing a thesis.

<table>
<thead>
<tr>
<th>Findings 2010-2011</th>
<th>Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>In terms of writing a thesis, we found that 88% scored at least a 3, and 50% scored a 4. While we have met our goals here, we are just at them, so I think we can work further on developing thesis statements.</td>
<td></td>
</tr>
</tbody>
</table>

### Target for O3: Writing skills

In terms of writing skills, we realistically believe that 75% of students should receive at least a 3, with 50% scoring a 4 or 5. In other words, we expect 3/4 to demonstrate basic competence, with half showing that they have strong writing skills.

<table>
<thead>
<tr>
<th>Findings 2010-2011</th>
<th>Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>On this rubric, I am happy to report that 100% of students scored at least a 3, and 63% scored a 4 or 5, which meets our target.</td>
<td></td>
</tr>
</tbody>
</table>

### Target for O4: Feminist/Womanist Perspectives

In terms of demonstrating the mastery of feminist/womanist perspectives, we realistically believe that 75% of students should receive at least a 3, with 50% scoring a 4 or 5. In other words, we expect 3/4 to demonstrate basic competence, with half showing that they have a strong ability to apply their knowledge of content to a particular project.

<table>
<thead>
<tr>
<th>Findings 2010-2011</th>
<th>Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>Here, we are also using two measurements: one measures the application of feminist/womanist knowledge, and the other involves students’ ability to combine experience and theory into a clear and coherent analysis. This second rubric, then, provides a somewhat different take on the demonstration of perspectives, involving a more skill-based measurement. In terms of the experience-theory rubric, 88% of students scored at least a 3, and 50% scored a 4 or higher. While that does meet our target, the results here also suggest that while students are doing better at achieving adequacy than excellence. In terms of the applied knowledge rubric, 88% also received at least a 3, and 63% received a 4 or higher.</td>
<td></td>
</tr>
</tbody>
</table>

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Add additional rubric

After we have completed our collection of personal narrative papers, we will include an additional rubric: Students connect what they learn to lived experience.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 05/2010
- **Responsible Person/Group:** Director of Undergraduate Studies

#### Collect additional measures

We intend to collect personal narratives in addition to the analysis papers for our evaluation.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** We have done so for the last year.
- **Projected Completion Date:** 05/2010
- **Responsible Person/Group:** Julie Kubala, director of undergraduate studies

#### Develop materials to enhance writing instruction

I am presently in the process of collecting materials to enhance writing instruction in the classroom. I have a draft of these materials that I piloted in 2 courses last semester, but given the small sample size, it is unclear whether these materials have actually improved student performance. We are hoping that by increasing writing instruction in the classroom, we will help students develop their writing skills, particularly in terms of the collection of evidence.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 12/2009

#### Rework targets

Since the only target that was not met involved the baseline papers, I think the important thing here is to focus on the improvement, rather than having targets for the baselines themselves, as we don’t actually have any control over students abilities when they join our classes.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have made a couple of changes in the assessment process within the last year. The primary change we have made is that we have developed a Writing Instruction Sheet that we distribute in order to remind students of several writing techniques. These papers allow us to both further develop our assessment of students' writing skills as well as assessing clear examples of "connecting experience to theory." As we worked on the assessment report this year, we realized that we need to include "connecting experience to theory" as a specific learning outcome. In this year's report, we ended up merging two rubrics: "demonstrating appropriate feminist/womanist knowledge" and "connecting experience to theory"; we need to separate these out, as they really cannot be assessed together. The other revision that we have made in the past year is to slightly rework our targets. We continue to struggle with how to realistically assess what students are learning in our classes, given the wide disparities in writing skills that students have when they enter college.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

As we continue to assess our introductory classes, we continue to realize that we can work to improve writing instruction within the classroom. While we traditionally have spent a great deal of time focusing on thesis statements, we clearly still need to maintain this focus, as students are still having difficulty with this skill. In terms of sentence-level skills, we have not focused on this issue particularly, as we have not really noticed a problem here before. Or, maybe the other areas are improving so that the slight weakness in this aspect has become more apparent.

**Increased writing instruction**

Given that the two areas in which we did not completely meet our targets were thesis and sentence-level writing skills, we will try to increase our writing instruction in the classroom. While we traditionally have spent a great deal of time focusing on thesis statements, we are still having difficulty with this skill. In terms of sentence-level skills, we have not focused on this issue particularly, as we have not really noticed a problem here before. Or, maybe the other areas are improving so that the slight weakness in this aspect has become more apparent.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

Measure: Reading Response papers | Outcome/Objective: Writing skills

**Increased writing instruction**

Since we have found extremely similar results on both of these measures, it seems clear that the action plan that is mentioned for the reading response papers should also be established for the analytical papers.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

Measure: Analysis Papers | Outcome/Objective: Writing skills

**pilot program with WAC consultants**

In the academic year 2011-2012, we are planning to utilize Writing Across the Curriculum Graduate Consultants in two of our courses in order to see if the availability of more intensive one-on-one tutoring can aid with the persistence of writing problems that we continue to identify. Since students are generally stronger in terms of demonstrating their ability to comprehend and use key feminist/womanist concepts, we are continuing to work on strengthening the writing components of our introductory courses.

*Additional Resources: WAC consultants*

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Projected Completion Date:** 06/2012  
**Responsible Person/Group:** Julie Kubala
Mission / Purpose

Women's Studies at Georgia State University contributes to the university's broader mission of encouraging critical thinking through a focus on feminist and womanist interdisciplinary scholarship, teaching, and community participation. Women's Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. We therefore make explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct our understandings of the world. Furthermore, we analyze the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. In order to explore these issues, we emphasize the following: race, globalization, sexuality, and social change. We promote transformative thinking and activism toward ending oppression and working for freedom and justice.

Goals

G 1: New and innovative ideas
To develop innovative approaches to relevant issues and debates within the field.

G 2: Critical Thinking through Writing
To be able to display critical thinking through writing skills, such as organizing material clearly, developing ideas clearly and carefully, and providing sufficient evidence for claims.

G 3: Demonstrate knowledge of field
Demonstrate the knowledge of and ability to use appropriate interdisciplinary theoretical perspectives within the fields of feminist/womanist scholarship.

Student Learning Outcomes/Objectives

SLO 1: Research Questions (G: 1) (M: 3)
Students should demonstrate their ability to formulate new research questions, providing innovative approaches to existing feminist/womanist scholarship.

SLO 2: Evidence (G: 2) (M: 3, 4)
Students should demonstrate their critical thinking through writing skills by providing sufficient evidence for claims and developing their arguments clearly and carefully.

SLO 3: Organization (G: 2) (M: 2, 3)
Students should demonstrate their critical thinking through writing skills by organizing their papers, both in terms of structuring their paragraphs as well as structuring the entire paper in a clear and coherent fashion.

SLO 4: Theoretical Perspectives (G: 3) (M: 1, 2, 3, 4)
Students should be able to demonstrate their knowledge of appropriate interdisciplinary feminist/womanist theoretical perspectives in their written work.

SLO 5: Application of skills (G: 3) (M: 1, 2, 3)
Students should be able to demonstrate their ability to apply the theoretical perspectives and interdisciplinary skills that they have learned in the field, in both written and other types of work.

SLO 6: Critical thinking through writing skills (G: 2) (M: 1, 3, 4)
This outcome measures general writing skills, syntax, grammar, punctuation; it focuses on the clear and coherent expression of ideas.

Measures, Targets, and Findings

M 1: Final Exam (O: 4, 5, 6)
In this final exam, students should demonstrate their knowledge of and ability to use feminist/womanist theoretical perspectives. Furthermore, we scored sample exams on their ability to develop and argue their responses, as well as their ability to express ideas clearly and coherently.

Source of Evidence: Academic direct measure of learning - other

Target for O4: Theoretical Perspectives
We hope that all students will achieve at least a 3 on our rubric, and over 1/2 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

Findings 2010-2011 - Target: Met
For this outcome, we were pleased to find that 100% scored at least a 3, and 67% scored a 4 or 5.
<table>
<thead>
<tr>
<th>Target for O5: Application of skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>We hope that all students will achieve at least a 3 on our rubric, and over 1/2 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.</td>
</tr>
</tbody>
</table>

**Findings 2010-2011 - Target: Met**

In terms of the scores measuring students ability to apply their argument skills well, once again 100% scored at least a 3, and 50% scored a 4 or 5, which does meet our target.

<table>
<thead>
<tr>
<th>Target for O6: Critical thinking through writing skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). <thead>
<tr>
<th>M 3: Final Paper (O: 1, 2, 3, 4, 5, 6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students shall write a final paper, on a topic that they will determine that is relevant to the class and approved by the professor, that utilizes the knowledge and applies the skills learned in the class in order to develop an innovative approach to a particular question in the interdisciplinary fields of feminist/womanist scholarship. Additionally, students will demonstrate their critical thinking through writing skills in this assignment; these skills include thesis development, organization, support for claims, and clear, concise writing, following appropriate grammar and syntax. We are including in this measure not only final seminar papers, but senior research papers as well. The senior research papers have similar requirements, although the standards are higher since they involve a semester long project.</td>
</tr>
</tbody>
</table>

Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O1: Research Questions</th>
</tr>
</thead>
<tbody>
<tr>
<td>We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.</td>
</tr>
</tbody>
</table>

**Findings 2010-2011 - Target: Partially Met**

For this measure, we found that 86% received at least a 3, and 30% received a 4 or 5. Once again, we are finding that we are getting close to our target in terms of people doing basically well, but we are not reaching our target in terms of people doing above competence in terms of developing new research questions.

**Findings 2010-2011 - Target: Not Met**

For this measure, we found that 83% of students received at least a 3, and 36% received a 4 or 5. We are regrettably far from our target here, which suggests that we need to renew the focus on developing research questions more carefully.

<table>
<thead>
<tr>
<th>Target for O2: Evidence</th>
</tr>
</thead>
<tbody>
<tr>
<td>We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.</td>
</tr>
</tbody>
</table>

**Findings 2010-2011 - Target: Partially Met**

On this outcome, we found that 83% of students received at least a 3, and 73% received a 4 or 5. While we did not completely meet our target here, it seems less dramatic than the "research questions" outcome, and we can tie in some writing improvement with the action plan for the previous objective.
Target for O3: Organization
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

Findings 2010-2011 - Target: Partially Met
Here, we found that all students received at least a 3, and 64% received a 4 or 5. Again, we came quite close to our target here.

Target for O4: Theoretical Perspectives
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

Findings 2010-2011 - Target: Met
We are pleased that all of our students received at least a 3 on this rubric, and 82% scored a 4 or 5. As usual, this aspect of our assessment tends to be the strongest, suggesting that students are learning the content well.

Target for O5: Application of skills
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

Findings 2010-2011 - Target: Partially Met
On this rubric, we found that all students achieved at least a 3, and 73% received a 4 or 5, coming very close to our target. Nor surprisingly, yet again, students who scored well on demonstrating knowledge also tended to do well in terms of application of skills.

Target for O6: Critical thinking through writing skills
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as poor and 5 as excellent).

Findings 2010-2011 - Target: Partially Met
We are pleased to report that 100% of students received at least a 3 on this rubric, and 64% received a 4. Once again, students are gaining basic competence in writing, but we are not having as much success with getting students to go beyond these basic expectations.

M 4: interview/film critique (O: 2, 4, 6)
I'm not sure if I should even include this assignment, because I didn't get a copy of the actual assignment. I'll try to fix this as soon as I can.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Evidence
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as poor and 5 as excellent).

Findings 2010-2011 - Target: Not Met
We found that 75% of students received at least a 3, but 0% received higher. I am not sure about using these sample papers, as they are very poor representations, and I am not completely sure what they show.

Target for O4: Theoretical Perspectives
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as poor and 5 as excellent).

Findings 2010-2011 - Target: Partially Met
We found that 75% of students received at least a 3, and 25% of students received at least a 4. Again, I am not sure about including this sample set within the assessment.

Target for O6: Critical thinking through writing skills
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as poor and 5 as excellent).

Findings 2010-2011 - Target: Partially Met
Here, we found that 100% of students received at least a 3, but 0 received a 4 or 5.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Assignment Re-selection
Select more appropriate assignments to evaluate; in particular, we should increase the kinds of assignments we evaluate so we can take in the wide variety of pedagogical approaches within our faculty.

Established in Cycle: 2005-2006
Implementation Status: Planned
Priority: Medium
Implementation Description: ongoing
Projected Completion Date: 05/2010
Responsible Person/Group: Core faculty
Additional Resources: time

Improve rubrics
Consider implementing more explicit criteria to define rubrics for student assignments. To do so, we should collectively decide as a faculty what rubrics we would use to evaluate student assignments.

Established in Cycle: 2005-2006
Implementation Status: Planned
Priority: Medium
Implementation Description: ongoing
Projected Completion Date: 05/2010
Responsible Person/Group: Core faculty
Additional Resources: time

Modify assessment
Departmental Conversation about evaluators’ interpretations of measures and/or the measures themselves

Established in Cycle: 2005-2006
Implementation Status: Planned
Priority: Medium
Implementation Description: ongoing
Projected Completion Date: 05/2010
Responsible Person/Group: Core faculty
Additional Resources: time

Early intervention
We are designating our 3010 course, Feminist Theories, as a Critical Thinking Through Writing Course, which should focus attention on student writing earlier in the program.

Established in Cycle: 2006-2007
Implementation Status: In-Progress
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Final Paper | Outcome/Objective: Research Questions
  Implementation Description: Fall 2007
  Projected Completion Date: 05/2011
  Responsible Person/Group: Core faculty (Many of us teach WSt 3010)

Increase critical thinking through writing skills
Given that our assessment targets were not met in two particular areas: organization and evidence, it appears that our students are having the most difficulty in terms of critical thinking through writing skills. Hopefully, given that students will need to take a CTW course earlier in their careers, that will help students improve in these areas. Until the CTW is fully operational, we can work to increase writing instruction throughout our upper-level courses.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Low
Relationships (Measure | Outcome/Objective):
  Measure: Final Paper | Outcome/Objective: Research Questions
  Projected Completion Date: 05/2011
  Responsible Person/Group: Core Faculty

Increased writing instruction
We need to develop a plan that will implement early intervention (perhaps a professor approval) of research questions.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Final Paper | Outcome/Objective: Research Questions

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

While we are not proposing a change in our rubric as of yet, we do need to carefully evaluate the effectiveness of our rubrics. One consistent pattern that we have recognized this year is that students are doing well in terms of acquiring basic competence in their
writing skills, but we are not meeting our targets for students to excel at these skills. We should probably more carefully calibrate our rubrics, so we can see exactly what our students continue to have difficulty with, so that we can formulate interventions that will more directly address the problems that they have. I think that our first priority has been to work toward basic competency for all students, and while I agree with this priority, we need to figure out how to encourage already strong writers to improve. One further change that we will make is to decrease the number of measures that we assess. Since our assessment is so strongly focused on writing skills (and rightly so, I believe), then it is not particularly useful to assess the interviews/film critiques, since these formats do not allow students to really show their writing skills. Also, since we had so few examples of this measure, it is hard to derive any useful results from the assessment process. We will continue to assess the longer upper-level papers, since they provide much more reliable information for us to increase our effectiveness in the classroom.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This year, we observed that students had the most difficulty with the aspect, "developing new research questions," so we will work on addressing that issue more concretely within our upper-level classrooms. One suggestion for improvement would require students to turn in proposals for their papers, which will include a working thesis and an outline, so that teachers will be able to guide students into strong and well-thought-out thesis statements. In similar CTW classes, we have required a revision component in papers which has been quite effective in terms of increasing students' writing skills. While this would be desirable in these courses as well, we do not have the necessary time to require revisions of all papers. Furthermore, we will encourage all professors to utilize the writing instructional materials that we have developed for the core courses. Although these materials are primarily aimed at lower-level courses, much of the basic information about thesis statements, evidence, organization and sentence structure can prove a useful reminder for all writers (and professors!). Once again, I think it is important to note that we are almost always meeting our targets in terms of students' demonstrating basic competence in their writing. Currently, we are emphasizing meeting our targets for excellent writing, since we have previously been focusing on achieving basic skills. In some ways, it will be far more difficult to achieve these targets since our students do not take a sequence of courses, and since so many of them declare their major so late in their college careers. I would also emphasize that students continue to do well on the aspects of the rubric that measure "demonstrating knowledge" or "applying feminist/womanist skills." It seems clear that our students are learning the concepts that we teach quite well, and that it is their communication of these ideas as well as their writing skills in general, that we should continue to work to improve.

---

<thead>
<tr>
<th>Mission / Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Women's Studies contributes to the university's broader mission of encouraging critical thinking through a focus on feminist and womanist interdisciplinary scholarship, teaching, and community participation. Women's Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. The field therefore makes explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct one's understandings of the world. Furthermore, women's studies analyzes the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. In order to explore these issues, Women's Studies classes emphasize the following: race, globalization, sexuality, and social change.</td>

<th>Goals</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>G 1: Research Question</strong></td>
</tr>
<tr>
<td>Students will learn how to formulate innovative and feasible research questions that will lead to their thesis research, and contribute to the field of women's studies.</td>
</tr>
</tbody>
</table>

| **G 2: Theoretical Frameworks** |
| Students will demonstrate their understanding of, and ability to synthesize, a range of feminist theories and to employ feminist theoretical frameworks in their theses. |

| **G 3: Critical Thinking** |
| Students will demonstrate critical thinking skills through effective writing. |

<table>
<thead>
<tr>
<th>Student Learning Outcomes/Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SLO 7: Research Questions (G: 1) (M: 1, 2)</strong></td>
</tr>
<tr>
<td>Students will demonstrate their ability to formulate new research questions, providing innovative approaches to existing feminist and/or womanist research.</td>
</tr>
</tbody>
</table>

| **SLO 8: Evaluating Arguments (G: 3) (M: 1, 2)** |
| Students will demonstrate their ability to evaluate the claims, arguments, and chain of reasoning present in texts. |

| **SLO 9: Organization (G: 3) (M: 1, 2)** |
| Students will structure their papers and thesis proposals in a clear and coherent fashion. |

| **SLO 10: Overall Grammar (G: 3) (M: 1, 2)** |
| Students will demonstrate critical thinking skills through effective writing. |
Students will demonstrate proficiency in overall writing and grammar skills, including syntax, punctuation, and citation.

**SLO 11: Theoretical Frameworks (G: 1, 2) (M: 1, 2)**

Students will demonstrate their knowledge and understanding of key feminist and/or womanist theoretical perspectives and apply them in their own work.

### Measures, Targets, and Findings

**M 1: thesis proposal (O: 7, 8, 9, 10, 11)**

Students write a thesis proposal introducing their thesis topic and research question, charting the field of inquiry in a literature review, and detailing the methods they will use in their project. They complete the first draft of this thesis proposal in the spring semester of a required first year class, the Women's Studies proseminar. We expect that they will be able to articulate a clear and innovative research question, and that their thesis proposal will demonstrate their knowledge and understanding of key feminist and/or womanist frameworks in their literature review as they chart out the related fields to their research topic. We also expect that they will demonstrate critical thinking skills through their writing, organize the proposal coherently, and utilize correct grammar.

Source of Evidence: Senior thesis or culminating major project

**Target for O7: Research Questions**

Our target is for all of our students to achieve at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Target for O8: Evaluating Arguments**

Our target is for all of our students to achieve at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Target for O9: Organization**

Our target is for all of our students to achieve at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Target for O10: Overall Grammar**

Our target is for all of our students to achieve at least a score of 3 (on a scale of 1-5, 5 being the highest).

**M 2: final paper for graduate class (O: 7, 8, 9, 10, 11)**

Write a 10-12 page paper based primarily on readings outside of class. Your paper will take up such questions as: What is method? How does it work? What are its epistemological and ontological assumptions? What can it offer? What are its limitations? I will evaluate your paper on the basis of the following (with an emphasis on #1): 1) You have a clear thesis and argument that you develop through evidence, example, and analysis. 2) You should be clear in your use of terms (e.g., "feminism", "experience"), through definition, example, or both. 3) You provide (and use) a reference list that includes at least 10 sources. 4) You use standard format (double space, 12 point font), spell check, proof-read, and don't exceed page limits.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O7: Research Questions**

Students will achieve at least a score of 3.5 out of 5.

**Findings 2010-2011 - Target: Met**

We found that all of our students met this target, with a range of 3.5 - 4.75. We further tabulated the results according whether the students were first year or second year students, and we found that the first year average was 4.09, while the second year average was 4.56.

**Target for O8: Evaluating Arguments**

Students will achieve at least a score of 3.5 out of 5.

**Findings 2010-2011 - Target: Partially Met**

We found that 83% of our students met this goal. We further tabulated the results to separate them out according to first and second year students, and we found that the first year students achieved a score of 3.969 while the second year students achieved a score of 4.75.

**Target for O9: Organization**

Students will achieve at least a score of 3.5 out of 5.

**Findings 2010-2011 - Target: Partially Met**

We found that 83% of our students met this target, with a range of 3.25-4.5. We further tabulated the results to separate them out according to first and second year students, and we found that the first year students achieved an average score of 3.94 while the second year students achieved an average score of 4.5.

**Target for O10: Overall Grammar**

Students will achieve at least a score of 3.5 out of 5.
Findings 2010-2011 - Target: Partially Met

We found that 83% of our students met this target, with a range of 3.25-4.625. We further tabulated the results to separate them out according to first and second year students, and we found that the first year students achieved an average score of 3.875 while the second year students achieved a score of 4.5.

Target for O11: Theoretical Frameworks

Students will achieve at least a score of 3.5 out of 5.

Findings 2010-2011 - Target: Partially Met

We found that 83% of our students met this target, with a range of 3 - 4.625. We further tabulated the results to separate them out according to first and second year students, and we found that the first year students achieved an average score of 3.84 while the second year students achieved an average score of 4.56.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

early intervention

We have found that some of our students come in to the program with poor grammar skills, but it is not until they begin to write their thesis proposal or later that they finally seek out support from outside sources, like the Writing Studio.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: final paper for graduate class | Outcome/Objective: Overall Grammar
  - Measure: thesis proposal | Outcome/Objective: Overall Grammar
- Implementation Description: We will identify students who have particular problems with grammar in the first year, and preferably the first semester of the program, and refer them to the Writing Studio in the first semester.
- Responsible Person/Group: core faculty in Women's Studies
- Additional Resources: none
- Budget Amount Requested: $0.00 (no request)

increased focus in proseminar on RQ

Last year we implemented a major change in our program in order to respond to many of the problems our students had been having progressing through the program in a timely manner. We added a required proseminar course in which they receive training and support about how to put together a thesis proposal. The proseminar spent a lot of time on the literature review and on writing abstracts, but not as much time on defining a research question.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: thesis proposal | Outcome/Objective: Research Questions
- Implementation Description: We will incorporate more training and workshops on writing a research question in the proseminar. 
  - Responsible Person/Group: the instructor for the Proseminar in consultation with women’s studies core faculty.
  - Additional Resources: none
  - Budget Amount Requested: $0.00 (no request)

more focus on writing skills

Last year we implemented a major change in our program in order to respond to many of the problems our students had been having progressing through the program in a timely manner. We added a required proseminar course in which they receive training and support about how to put together a thesis proposal. The proseminar focused more on the basics of putting a proposal together than on the mechanics of writing.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: final paper for graduate class | Outcome/Objective: Organization
  - Measure: thesis proposal | Outcome/Objective: Organization
- Implementation Description: The proseminar will incorporate more peer review with more focus on writing skills and organization. Core classes will also provide more feedback on writing skills and organization.
  - Responsible Person/Group: instructor for proseminar and WSI core faculty
  - Additional Resources: none
  - Budget Amount Requested: $0.00 (no request)

emphasis on core courses

Like the "evaluating arguments" outcome, in this area first years collectively scored lower than second years (with first years achieving an average of 3.84 compared to second years who achieved an average of 4.56). It makes sense, then, to focus on the core courses, all of which are offered (and required) in the first year. These are already the courses in which students are expected to gain a solid understanding of feminist and womanist theoretical frameworks. Instructors of these courses will be advised to emphasize the theoretical frameworks with our first year students.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: Medium
- Relationships (Measure | Outcome/Objective):
**Measure:** final paper for graduate class  
**Outcome/Objective:** Theoretical Frameworks

**Implementation Description:** Instructors will implement the action plan in a way that makes sense in the context of their course.

**Responsible Person/Group:** All core course instructors.

**Additional Resources:** NA

**Budget Amount Requested:** $0.00 (no request)

---

**Focus on reading for graduate school in core courses**

While the first year students collectively met the goal of achieving a 3.5, it is clear when looking at the separated results that the weakness in this area lies in the first year class (second years scored very high -- 4.75) and could be attributed to the fact of just having entered graduate school. Our plan to address this, then, will be focused on the core classes (WST 8001 Feminist Theories), WST 8002 (Globalization and Gender), WST 8003 (New Directions in Feminism), and WST 8004 (Feminist Methodologies). These are required courses for all first year students, and are the classes in which the largely acclimate to the program and to graduate school. Instructors of these core courses will put a greater focus on teaching strategies for reading at the graduate level, possibly including assignments such as critical responses, in which students must summarize the argument before providing analysis.

**Established in Cycle:** 2010-2011
**Implementation Status:** Planned
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: final paper for graduate class  
- Outcome/Objective: Evaluating Arguments  
- Theoretical Frameworks

**Implementation Description:** Instructors for each of the courses will implement this action plan in whatever way makes the most sense for their class, given the structure of their assignments.

**Responsible Person/Group:** All instructors of the WST core classes.

**Additional Resources:** NA

**Budget Amount Requested:** $0.00 (no request)

---

### Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

While we maintained the same learning outcomes, we realized that perhaps we were not using the best tool to measure these outcomes. Because the students' weak areas were in grammar, organization, and formulating research questions, we thought these might be better assessed using a regular seminar (final) paper rather than the first draft of the thesis proposal that they produce in the proseminar. Further, we sought a means of accumulating some data about the differences (if any) between our first and second year students, and the thesis proposal only captured first year students. Therefore, this year, we used final papers from a sampling of graduate courses in order to assess a range of students in a more general context. We haven't yet used comprehensive exams as a measure, though the comprehensive exams are the tool we use internally to determine whether students have synthesized the core courses. Since our action plans are beginning to focus on the core courses, it seems logical that the next measure we would use is the comprehensive exams. If possible, we will combine these with a sampling of final papers from regular graduate seminar courses.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have recently made a major curriculum revision in our program, which is to require a Women's Studies proseminar, and we have seen tremendous positive results from that. Because it is a major change, we are still honing the class, and part of that honing has been in relation to the assessment findings (i.e., greater focus on formulating research questions in prosemin). Because this year's action plans focus on putting greater emphasis on our learning outcomes in the core classes, we will implement pedagogy discussions at the departmental level in order to share strategies, successes, and failures regarding the implementation of the action plans.
