4: Can provide leadership for urban education Student is able to lead an effective urban school Student Learning Outcome: No Established in Cycle: 2005-2006 Active Through: 2007-2008 Entry Status: Final Last Updated By: Jean Yerian on 10/20/2008 Established By: Migration Tool on 10/13/2008 Relevant Associations: Georgia PSC Standards-(ELCC - Educational Leadership Constituent Council, 2001) 1. Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by facilitating the development, articulation, implementation, and stewardship of a school vision of learning supported by the school community. 2. Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by promoting a positive school culture, providing an effective instructional program, applying best practice to student learning, and designing comprehensive professional growth plans for staff. 3. Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by managing the organization, operations, and resources in a way that promotes a safe, efficient, and effective learning environment. 4. Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by collaborating with families and other community members, responding to diverse community interests and needs, and mobilizing community resources. 5. Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by acting with integrity, fairly, and in an ethical manner. 6. Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by understanding, responding to, and influencing the larger political, social, economic, legal, and cultural context. 7. Internship: The internship provides significant opportunities for candidates to synthesize and apply the knowledge and practice and develop the skills identified in standards 1-6 through substantial, sustained, standards-based work in real settings, planned and guided cooperatively by the institution and school district personnel for graduate credit. Strategic Plans President, Georgia State University 3.1 New Academic Programs (Modes of Delivery) Institutional Priorities 1.11 Targeted programs of distinctiveness that are nationally and internationally recognized 2.22 Educational support systems that foster student access and success 3.31 Use of our unique location and environment to offer a distinctive education to our students 3.32 Participation in partnerships that have a positive impact on the community, state, and nation 4.45 Compliance with federal, state, and BoR regulations and accrediting and professional standards

Measures, Targets, and Findings

M 1: Evaluations in Key Courses (O: 1)

Source of Evidence: Evaluations

Target for O1: Outcomes/Objective 1

70% of students will exceed expectations in the courses listed. 30% of students will meet expectations in the courses listed.

Findings 2011-2012 - Target: Partially Met

EPEL 7000 - 91% of students exceeded expectations, 9% of students met expectations EPEL 7500 - 90% of students exceeded expectations, 10% of students did not meet expectations EPEL 7330 - 80% of students exceeded expectations, 20% of students did not meet expectations EPEL 7410 - 78% of students exceeded expectations, 11% of students met expectations, 11% of students did not meet expectations EPSF 7450 - 100% of students exceeded expectations

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action Research

The data indicate that students can perform action research at an acceptable rate. However, the Educational Leadership unit has redesigned the master’s program to ensure higher levels of effectiveness and understanding in action research by focusing more on the data analysis and action research in the two practicum courses. The in-school performances have been shifted to the courses to allow for more attention in the practicum courses on data analysis and action research.

Established in Cycle: 2008-2009
Implementation Status: Terminated
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Evaluations in Key Courses | Outcome/Objective: Outcomes/Objective 1

Implementation Description: The M.Ed. in Educational Leadership is being shifted to inactive status by the Department of Educational Policy Studies. As a result of this change, the programmatic goals have been put on hold. The department plans to work over the next year to redesign the degree to better meet the needs of current and prospective students.

Responsible Person/Group: All leadership faculty

Additional Resources: Greater collaboration with research faculty and others with expertise in school-based research

Change Agent in Schools

The data indicate that students can be effective change agents at an acceptably high rate. With the redesign of the master’s program, students will have even more opportunity to serve as leaders through common essential performance assessments and through anew emphasis on issues of diversity in schools and communities.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Evaluations in Key Courses | Outcome/Objective: Outcomes/Objective 1

Implementation Description: The M.Ed. in Educational Leadership is being shifted to inactive status by the Department of Educational Policy Studies. As a result of this change, the programmatic goals have been put on hold. The department plans to work over the...
next year to redesign the degree to better meet the needs of current and prospective students.

**Responsible Person/Group:** Educational Leadership Unit

**Leadership Theory in Schools**
The data indicate that students can apply leadership knowledge at an acceptably high rate. However, the Educational Leadership unit has just undergone a comprehensive program redesign required by the Georgia Board of Regents and the Professional Standards Commission. With this change, we have significantly altered the master’s program to embed performance based assessments and practicum experiences in each class. We feel this is the best way to integrate theory and practice, and the students in the program concur.

**Established in Cycle:** 2008-2009
**Implementation Status:** In-Progress
**Priority:** High
**Implementation Description:** The M.Ed. in Educational Leadership is being shifted to inactive status by the Department of Educational Policy Studies. ---

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**
The M.Ed. in Educational Leadership has been deactivated.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**
The M.Ed. in Educational Leadership has been deactivated.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**
The M.Ed. in Educational Leadership has been deactivated.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**
The M.Ed. in Educational Leadership has been deactivated.

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
The M.Ed. in Educational Leadership is being shifted to inactive status by the Department of Educational Policy Studies. As a result of this change, all programmatic changes have been put on hold. The department plans to work over the next year to redesign the degree to better meet the needs of current and prospective students.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The M.Ed. in Educational Leadership is being shifted to inactive status by the Department of Educational Policy Studies. As a result of this change, all programmatic changes have been put on hold. The department plans to work over the next year to redesign the degree to better meet the needs of current and prospective students.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
The M.Ed. in Educational Leadership has been deactivated.

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?
The M.Ed. in Educational Leadership has been deactivated.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
The M.Ed. in Educational Leadership has been deactivated.
### Mission / Purpose
The mission of the Educational Leadership Unit of Educational Policy Studies Department is to prepare graduates to be effective school and/or school system leaders who positively impact student achievement.

The unit's mission is in keeping with the Educational Leadership Constituents Council (ELCC) Standards.

### Goals

**G 1: Conducts Scholarly Research**
PhD students who graduate from Educational Policy Studies with a concentration in leadership will be researchers and practitioners who can contribute significantly to educational research and effective educational leadership.

**G 2: Possesses important values and beliefs**
PhD students who graduate from Educational Policy Studies with possess dispositions (underlying assumptions, values, and beliefs) appropriate to an educational philosophy that is dedicated to social justice and high expectations for every student.

### Student Learning Outcomes/Objectives

**SLO 1: Successfully complete comprehensive examinations (G: 1) (M: 1)**
Students will be able to successfully write and defend high quality comprehensive examinations.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2. Student promotion and progression
3. Timely graduation

**Strategic Plan Associations**
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 2: Successfully complete prospectus (G: 1) (M: 2)**
Students will be able to successfully write and defend high quality prospectuses.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2. Student promotion and progression
3. Timely graduation

**Strategic Plan Associations**
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 3: Successfully defend dissertations (G: 1) (M: 3)**
Students will be able to successfully write and defend high quality dissertations.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial
relationships develop, persist, and/or change.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression
3 Timely graduation

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

SLO 4: Develop effective dispositions (G: 2) (M: 4)
Students will develop and/or enhance effective dispositions.

General Education/Core Curriculum Associations
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Strategic Plan Associations
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

Measures, Targets, and Findings

M 1: Committee evaluation of comprehensive examinations (O: 1)
Students' comprehensive examinations will be evaluated by the students' faculty committee using the Comprehensive Examination Rubric. Students will prepare and defend their comprehensive examinations as prescribed by EPS policy.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target for O1: Successfully complete comprehensive examinations
95% of students will successfully prepare and defend their comprehensive examinations. The Comprehensive Examination Rubric will be used to evaluate the examinations.

Findings 2011-2012 - Target: Not Reported This Cycle
No EDL, PhD students took comprehensive examinations during this reporting cycle.

M 2: Committee evaluation of prospectus (O: 2)
In the presentation of the prospectus, the students provide the committee with a clear and concise description of the proposed study. In general, the description is to include a rationale, a review of relevant literature, the proposed research method(s), and an overall organizational plan. The members of the dissertation committee will evaluate the prospectus using the EDL Prospectus Rubric, scaled from 1 to 3.

Source of Evidence: Presentation, either individual or group

Target for O2: Successfully complete prospectus
95% of students will successfully prepare and defend their prospectuses. The Prospectus Evaluation Rubric will be used for evaluation purposes.

Findings 2011-2012 - Target: Met
Three EDL, PhD students (100%) successfully defended their prospectuses upon the first preparation and presentation during this reporting cycle. Their success was determined by showing that they: 1. Sufficiently understood the concepts and tools of inquiry in foundational disciplines 2. Sufficiently demonstrated knowledge of previous research or literature in the field 3. Sufficiently demonstrated normative or critical judgments that were insightful and detailed 4. Successfully demonstrated the above through their written and oral presentations.

M 3: Committee evaluation of dissertation (O: 3)
In the dissertation and oral defense, the students present a review of the literature, an exploration of the methodology, results, and implications of their research. The members of the dissertation committee will evaluate the dissertation and defense using the EDL Dissertation Rubric, scaled from 1 to 3.

Source of Evidence: Senior thesis or culminating major project

Target for O3: Successfully defend dissertations
95% of students will successfully prepare and defend their dissertations.

Findings 2011-2012 - Target: Met
Eight EDL, PhD students successfully prepared and defended their dissertations during this reporting cycle. Their success was determined by showing that they: 1. Understood the concepts and tools of inquiry in foundational disciplines 2.
Demonstrated knowledge of previous research or literature in the field 3. Demonstrated normative or critical judgments that were insightful and detailed 4. Demonstrated the above through their written and oral presentations 5. Produced work that contributed meaningfully to the field. Only one student had meaningful changes that were required following the dissertation defense.

**M 4: Advisor review of disposition assessment (O: 4)**

Students will be assessed based on the College of Education's Disposition Assessment and 4 point rubric. The characteristics assessed are: empathy, positive view of others, positive view of self, authenticity, and meaningful vision and purpose.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O4: Develop effective dispositions**

95% of students will score 3 or higher on the post assessment. Measure will be used when admissions to the program are re-activated.

**Findings 2011-2012 - Target: Not Reported This Cycle**

Measure will be used when admissions to the program are re-activated.

**Establishment of unit procedures for Comprehensive Examinations**

Because there has been some variation in how advisors have handled the Comprehensive Examinations, there is a need for the members of the EDL unit to discuss and determine if more consistency would be beneficial. Therefore, prior to re-activating the readmission process for the EDL, PhD (which is currently on hold), the unit will discuss and possibly establish a consistent set of procedures within the parameters of the department's revised Comprehensive Examination policy.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Committee evaluation of comprehensive examinations
- **Outcome/Objective:** Successfully complete comprehensive examinations

**Projected Completion Date:** 05/2014

**Review of Comprehensive Examinations Policy**

1. The EPS Department is in the process of revising the Comprehensive Examinations Policy.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Committee evaluation of comprehensive examinations
- **Outcome/Objective:** Successfully complete comprehensive examinations

**Projected Completion Date:** 02/2013

**Responsible Person/Group:** Department’s Faculty Affairs Committee

**Additional Resources:** None

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Educational Policy Studies/Research Measurement and Stat PhD**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

The mission of the Research, Measurement, and Statistics unit of Educational Policy Studies Department is to cultivate and develop educational researchers capable of investigating problems of the 21st century. This is in keeping with Georgia State University's overarching goal to be recognized as a dynamic academic community where teaching and research combine to produce leaders and create solutions to conquer the challenges of the 21st century.

**Goals**

**G 1: Key educational researchers**

Students who graduate from Educational Policy Studies with a concentration in Research, Measurement, and Statistics will be key researchers who can contribute significantly to educational research.

**G 2: methodological expertise**

Students who graduate from Research Measurement and Statistics program will be experts in the areas of quantitative and or qualitative research methodologies.
Student Learning Outcomes/Objectives

<table>

3.6 Other efforts in support of Goal 3 (Leading Public Research University).

Measures, Targets, and Findings

M 1: Committee Evaluation of the Dissertation (O: 1, 2, 3, 4, 5)

In the dissertation and oral defense, the student presents a review of the literature, an exploration of the methodology, results, and implications of their research. When the student has finished the dissertation and successfully defended it, the members of the dissertation committee produce a final assessment. Based on the written dissertation, the committee assesses the learning outcomes related to content knowledge of the issue, design of the study, review and critique of the literature, application of methodological expertise, and implications. The committee rates the student on each outcome with a score scaled from 1 to 3. The criteria for these scores are set by the assessment committee in consultation with the faculty and are sections of the documents available in the committee member evaluation form and advisor evaluation form.

Source of Evidence: Senior thesis or culminating major project

Target for O1: Design a research study
85% of the students will meet the expectations 15% will exceed

Target for O2: Literature review
85% of the students will meet the expectations 15% will exceed

Target for O3: Data collection and analysis
85% of the students will meet the expectations 15% will exceed
| Target for **O4**: Complete a dissertation study |
| 85% of the students will meet the expectations 15% will exceed |

| Target for **O5**: methodological expertise |
| 85% of the students will meet the expectations 15% will exceed |

| **M 2**: Committee evaluation of the Prospectus (O: 1, 2, 3, 5) |
| Students’ dissertation proposal will be evaluated using a rubric and analytic guide. The students work in close collaboration with their research advisor and their dissertation committee to prepare a prospectus report. The learning outcomes are assessed by the dissertation advisory committee members following the student’s oral presentation of the prospectus. The committee rates the student on each outcome with a score scaled from 1 to 3. The criteria for these scores are set by the RMS faculty. An analytic guide accompanies this rubric. |
| Source of Evidence: Project, either individual or group |

| Target for **O1**: Design a research study |
| 85% of the students will meet the expectations 15% will exceed |

| Target for **O2**: Literature review |
| 85% of the students will meet the expectations 15% will exceed |

| Target for **O3**: Data collection and analysis |
| 85% of the students will meet the expectations 15% will exceed |

| Target for **O5**: methodological expertise |
| 85% of the students will meet the expectations 15% will exceed |

| **M 3**: Comprehensive Exam (O: 2, 5) |
| Ph.D. students in RMS write a comprehensive exam when they have completed their course work. This exam covers the knowledge(s) gained in the major/content/cognate areas of the program. The members of the advisory committee will evaluate the learning outcomes with a scoring scaled from 1-3 and an analytic guide that the faculty of the RMS program created. |
| Source of Evidence: Comprehensive/end-of-program subject matter exam |

| Target for **O2**: Literature review |
| 85% of the students will meet the expectations 15% will exceed |

| Target for **O5**: methodological expertise |
| 85% of the students will meet the expectations 15% will exceed |

| **M 4**: Faculty Scaled Rubric (O: 1, 2, 5) |
| This rubric is a 3 point scale that evaluates students' performance on the comprehensive exam. |
| Source of Evidence: Comprehensive/end-of-program subject matter exam |

| Details of Action Plans for This Cycle (by Established cycle, then alpha) |

**Redesigning assessment plan**
Following the Annual Program Review (APR) the decision was made to report the units in the department individually. Research, Measurement, and Statistics is one of the three units in Educational Policy Studies. This is the first year of planning to create the assessment. The unit is meeting to decide on mission, the goals, the learning outcomes and the measures that we will use to evaluate them.

- Established in Cycle: 2011-2012
- Implementation Status: In-Progress
- Priority: High

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Educational Policy Studies/Social Foundations PhD**

*(As of 12/12/2016 04:41 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

THIS REPORT IS FOR THE SOCIAL FOUNDATIONS UNIT ONLY. The Department of Educational Policy Studies offers a Ph.D. degree in Educational Policy Studies with concentrations in educational leadership, social foundations of education, and research, measurement, and statistics. The program allows students to examine the philosophy and practice of education and to develop skills...
in both the methodology and the study of educational practice. Students will prepare to become policy makers and examiners of policy and the effects of policy on education. The broader requirements of the Department of Educational Policy Studies offer students the opportunity to linked their programs of study with broader social and educational issues in such areas as race, gender, leadership, and policy. This broader context established an understanding of the programs of study as essential components rather than separate structures of our social, economic, and political lives.

**Goals**

**G 1: Critically Evaluates Literature**
This goal is important for the department to evaluate whether our SF doctoral students have demonstrated the ability to critique, summarize, and interpret the findings from published research and scholarship.

**G 2: Interprets Schooling/Education in Diverse Contexts**
The purpose of this goal is to evaluate whether our SF doctoral students have demonstrated a knowledge base of theories on how to analyze educational issues about race, class, and gender.

**G 3: Conducts Scholarly Research**
The purpose of this goal is to evaluate whether SF doctoral students have demonstrated the ability to design and execute a major research study in their program.

**Student Learning Outcomes/Objectives**

**SLO 1: Students will examine policymaking power (G: 1) (M: 1)**
Although student learning comes from a number of classes, we are using just one of the doctoral cohort classes—EPS 9270—for measuring the assessment. The policy paper must examine a key characteristic of policymaking: power. There are, as we will examine in the readings on policy, a number of ways to examine policy. To some degree there are two sets of policy studies, one focused on how to make the system work better and one focused on how deeply flawed the system is. Yet underneath both sets, and sometimes brought to the forefront of policy discussions, is an important question: What is power?

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

**SLO 2: Students will prepare a cultural studies analysis (G: 2) (M: 2)**
A critique and analysis of the readings in light of the ways cultural meanings of race, class and gender are represented in education via media. Each student will be asked to carefully observe print media and television/movies (of your choosing)—in order to interpret the class readings and conceptual treatments among the courses themes: Critical Race Theory, White Privilege, Youth Subcultures, (Post) Colonialism & Globalization, Masculinities & Feminities, Sexualities, and Social Class Differences.

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

**SLO 3: Students will write high quality dissertations (G: 3) (M: 3)**
We plan to discuss an assessment to measure the quality of dissertations that will guide SF students and faculty committee members as they work together to develop high quality dissertations.

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

**Measures, Targets, and Findings**

**M 1: Power Analysis (O: 1)**
The paper of at least ten pages, with at least ten scholarly or research references, addressing the following questions: what is power?, who exercises it in United States educational policy?, and how do they exercise it? You may use as references the required and recommended readings for this course, but you will also need to use at least six other references, and they must be research or scholarly references. The instructor uses an Analytical Rating Guide rubric (see Document Repository).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Students will examine policymaking power**
95% of students will obtain a score of 2 or better as evaluated by program faculty for this activity.

**Findings 2011-2012 - Target: Met**
Four Social Foundations students met the assessment.

**M 2: Cultural Studies Analysis (O: 2)**
For purposes of evaluation, the student will prepare a paper, 5-7 pages consisting of the following 3 parts: (Part A) identification and discussion of media images chosen; (Part B) theoretical analysis of Part A using textual readings for supporting evidence; (Part C) concluding remarks or summary statements on the potential media bias and/or impact of popular cultural consumption. The paper will be evaluated using the following rubric: 3=exceeded outcomes. Comprehensive, insightful, creative, inquisitive, demonstrates conceptual clarity, integrates reading, terms, concepts, and shows syntactical accuracy. 2=met outcomes. Generally clear, somewhat
Target for O2: Students will prepare a cultural studies analysis
95% of students will obtain a score of 2 or better as evaluated by program faculty for this activity.

Findings 2011-2012 - Target: Met
9 students met or exceeded the outcomes.

M 3: Dissertation Scoring Assessment (O: 3)
The scoring assessment of dissertations for Social Foundation (SF) students.

Source of Evidence: Senior thesis or culminating major project

Target for O3: Students will write high quality dissertations
95% of students successfully passed their dissertation defenses.

Findings 2011-2012 - Target: Met
One Social Foundations student graduated during the assessment period.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Cultural Studies Analysis
Program faculty will maintain existing outcome measures for the doctoral cohort and monitor current levels of performance.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Cultural Studies Analysis | Outcome/Objective: Students will prepare a cultural studies analysis

Responsible Person/Group: LOA Coordinator
Additional Resources: None

Dissertation Quality
Program faculty will discuss the evaluation of dissertation defenses, and consider the design and implementation of a scoring rubric for quality writing outcomes.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Dissertation Scoring Assessment | Outcome/Objective: Students will write high quality dissertations

Projected Completion Date: 06/2012
Responsible Person/Group: LOA Coordinator
Additional Resources: None

Power Analysis
Program faculty will maintain existing outcome measures for the doctoral cohort and monitor current levels of performance.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Power Analysis | Outcome/Objective: Students will examine policymaking power

Responsible Person/Group: LOA Coordinator
Additional Resources: None

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since undergoing APR review this year we will make changes to the LOAs. There will be an annual assessment report for SF doctoral students that will establish data for performance indicators. We will no longer use the power analysis and cultural studies analysis reporting from the two doctoral cohort courses.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We are completing the APR review in Fall Semester 2012. An action plan regarding LOA improvements and reporting structure for SF doctoral students is forthcoming.
Annual Report Section Responses

**Most Important Accomplishments for Year**—Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.

We are completing the APR process this semester, fall '12. An action plan for SF doctoral student LOAs is forthcoming.

---

Georgia State University

**Assessment Data by Section**

2011-2012 Educational Psychology MS

*As of: 12/12/2016 04:41 PM EST*

(Include those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The mission of the Educational Psychology Program is to offer students a unique opportunity to apply the principles of experimental psychology to the systematic study of education. Majoring in educational psychology allows the student to master content areas such as learning, instruction, cognition, motivation, life-span development, applied behavior analysis and socialization. The educational psychology program at the Masters level prepares students to pursue a variety of career paths, including research, evaluation, and the applied practice of a number of disciplines, including K-12 instruction. There were 25 students (including two concurrent students) in the MS program as of summer 2010; of these 9 students graduated during this report period.

---

**Goals**

**G 1: Displays expertise with major concepts**

Displays expertise with major concepts

**G 2: Participates in scholarly activities**

Participates in scholarly activities

**G 3: Values underpinning educational psychology**

Values underpinning educational psychology

**G 5: Professional Seminar**

Attendance of a professional seminar in their first semester of enrollment in the EPY program.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Students demonstrate expertise in Ed. Psych. (G: 1) (M: 1)**

Students demonstrate expertise with major concepts, theoretical perspectives, and empirical findings in the field of Educational Psychology.

**SLO 2: Students demonstrate independence and competence (G: 2) (M: 2)**

Students demonstrate independence and competence in scholarly activities.

**SLO 3: Students demonstrate values underpinning ed. psych (G: 3) (M: 3)**

Students can weigh evidence, tolerate ambiguity, act ethically, and reflect other values underpinning educational psychology.

**SLO 4: Understand and apply research methods (M: 4)**

Understand and apply research methods including research design, data analysis, and interpretation.

**SLO 5: Exposure to the field of EPY (G: 5) (M: 5)**

Students will attend EPY 8961 to obtain exposure to major concepts, theoretical perspectives, and empirical findings in the field of Educational Psychology.

---

**Institutional Priority Associations**

2 Student promotion and progression

---

**Measures, Targets, and Findings**

**M 1: Masters Comprehensive Exam (O: 1)**

Each MS student in the Educational Psychology program must complete a comprehensive exam before finishing the program. Faculty read and score comprehensive exams as pass/fail. The comprehensive exam is made up of two parts. The first part consists of writing either a thesis or a project. For the thesis, students conduct their own research, and for the project students write an in-depth analysis of an area within the field. The written component of the comprehensive exam is followed by an oral defense of the thesis or project and is conducted by the student’s committee.
Target for O1: Students demonstrate expertise in Ed. Psych.

All students will pass the oral and written portions of the comprehensive exam.

Findings 2011-2012 - Target: Met

All students passed their comprehensive exams.

M 2: Thesis or Project (O: 2)

Each MS student in the Educational Psychology program must complete a thesis research study or a comprehensive literature review project. For the thesis, students conduct their own research, and for the project students write an in-depth analysis of an area within the field. The written component of the comprehensive exam is followed by an oral defense of the thesis or project and is conducted by the student’s committee.

Source of Evidence: Presentation, either individual or group

Target for O2: Students demonstrate independence and competence

All students will complete their theses/projects.

Findings 2011-2012 - Target: Met

All students successfully completed their theses/projects.

M 3: Portraying values of Ed. Psych. (O: 3)

As part of the comprehensive exam, each MS student in the Educational Psychology program must either complete an empirical study which shows evidence of the ability to weigh evidence, tolerate ambiguity, and act ethically; or must complete a scholarly literature review which shows evidence of the ability to weigh evidence and tolerate ambiguity inherent in many research studies.

Source of Evidence: Senior thesis or culminating major project

Target for O3: Students demonstrate values underpinning ed. psych

All students who engage in theses/projects will successfully portray values of EPY.

Findings 2011-2012 - Target: Met

All students who engaged in theses/projects successfully portrayed values of EPY.

M 4: Research Design and Statistics (O: 4)

All students in the MS program are required to complete coursework related to research design and statistics. This coursework is agreed upon by the students and two faculty members and becomes a part of the student’s planned program. Generally, this coursework includes developing expertise in ANOVA, ANCOVA, MANOVA, multiple regression and qualitative techniques. Students decide with their adviser and committee which skills meet individual needs and goals.

Source of Evidence: Academic direct measure of learning - other

Target for O4: Understand and apply research methods

All students will successfully complete coursework related to research expertise prior to beginning work on their project or thesis.

Findings 2011-2012 - Target: Met

All students successfully completed coursework related to research expertise prior to beginning work on their project or thesis.

M 5: Educational Psychology Seminar (O: 5)

All EPY students are required to enroll in EPY 8961 during the first semester of their first year. As part of this seminar, students discuss current issues and topics in Educational Psychology.

Source of Evidence: Performance (recital, exhibit, science project)

Target for O5: Exposure to the field of EPY

All students will complete this professional development seminar.

Findings 2011-2012 - Target: Met

All students successfully completed this professional development seminar.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Review of program

Faculty will review the program to determine if changes need to be made.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: As decided last year, all new students, in the fall of 2010 took EPY 8961, a course which orient them to GSU, EPSE, and EPY. This past fall, the COE approved our decision to make this a requirement. During this year, we discussed implementing a test option for students to choose from, in addition to selecting a project or thesis. Details need to be finalized, and this option will either become available in the spring of 2012 or the fall of 2012.
Projected Completion Date: 05/2012
Responsible Person/Group: Program Coordinator
Additional Resources: none
**Tracking of Applicants**

Applicants' demographics (such as race, gender, age, GPA/GRE scores) will be tracked for the following categories: Accepted and Enrolled, Accepted and Did Not Enroll, Rejected.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: High
- Implementation Description: This is an ongoing action
- Projected Completion Date: 05/2012
- Responsible Person/Group: Program Coordinator
- Additional Resources: none

**Master’s Handbook**

The Master's Handbook will be updated to reflect new changes in policy and new URL addresses.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Implementation Description: This is an ongoing action
- Projected Completion Date: 05/2012
- Responsible Person/Group: Program Coordinator and EPY faculty
- Additional Resources: none

Faculty will review the program to determine if changes need to be made

EPY 8961, a course which orients them to GSU, EPSE, and EPY was developed. This past fall, the COE approved our decision to make this a requirement. During this year we developed a test option for students to choose from, in addition to selecting a project or thesis.

- Established in Cycle: 2011-2012
- Implementation Status: Finished
- Priority: High
- Implementation Description: Added to the handbook
- Projected Completion Date: 05/2012

**The Master's Handbook was updated**

The Master's Handbook was updated to reflect new changes in policy and new URL addresses.

- Established in Cycle: 2011-2012
- Implementation Status: Finished
- Priority: High
- Implementation Description: Made available to students
- Projected Completion Date: 06/2012
- Responsible Person/Group: EPY Coordinator

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Educational Psychology PhD**

(As of: 12/13/2016 04:41 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The mission of the Educational Psychology Program is to offer students a unique opportunity to apply the principles of experimental psychology to the systematic study of education. Majoring in educational psychology allows the student to emphasize content areas such as learning, instruction, cognition, motivation, life-span development, applied behavior analysis and socialization. The educational psychology program at the Doctoral level prepares students for careers in teaching in schools, colleges, and universities; as researchers in state and city departments of education; and professionals in training research programs in government and industry. There were 21 students as of Fall 2010 in the Ph.D. program; of these 0 graduated during this academic year.

**Goals**

**G 1: Annual Review**

Students will undergo an annual review of their PhD performance

**G 2: Professional Seminar**

Students will attend a professional seminar in their first semester of enrollment in the EPY PhD program.

**G 3: Dissertation**

Students will undergo the scholarly activity of writing and defending a dissertation.

**G 4: College teaching**

Develop competence in college teaching

**G 5: Scholarly activities**

Participates in scholarly activities
### Student Learning Outcomes/Objectives

</tr>
</tbody>
</table>
M 5: Presentations and Publications (O: 6)

All students in EPY are expected to present papers at professional organizations and publish in professional journals.

Source of Evidence: Presentation, either individual or group

**Target for O6: Demonstrate competence in scholarly activities**

Students will present, publish and write grant proposals related to their areas of interest.

**Findings 2011-2012 - Target: Met**

During this reporting period, approximately 20 presentations, publications, and grant proposals were authored or coauthored by Educational Psychology doctoral students.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**EPY 9660**

The teaching residency will become an official course, called EPY 9660: Internship in Educational Psychology.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** The course became available in August of 2009.
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Program Coordinator

**Remedial Plan**

When a student receives a rating of unsatisfactory, students are informed in writing about areas in which they are not meeting goals of the program, and a remediation plan is prepared and signed by both the student and the advisor.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** This is an ongoing process.
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Program Faculty

**Remediation Plan**

When a student receives a rating of unsatisfactory, students are informed in writing about areas in which they are not meeting goals of the program, and a remediation plan is prepared and signed by both the student and the advisor.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** This is an ongoing process and no longer needs to be included in our action plan.
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Program Faculty
- **Additional Resources:** none

**Tracking of Applicants**

Applicants’ demographics (such as race, gender, age, GPA/GRE scores) will be tracked for the following categories: Accepted and Enrolled, Accepted and Did Not Enroll, Rejected. We will also keep records in the same excel file for each applicant in regards to evaluations of the different sections of their applications.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** This was conducted during this past year and will continue as an action plan. A new addition that we started this year, is to also record our evaluations of the different aspects of their application, such as their essays, vita, letters of recommendation, etc.
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Program Coordinator
- **Additional Resources:** none

**Phd Handbook**

The Phd handbook will be continuously reviewed and updated to reflect new requirements and URL address changes.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** This is an ongoing action
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** EPY coordinator and faculty
- **Additional Resources:** none

**Improve our Recruitment efforts to the Ph.D. program**

We have established a recruitment committee with the focus attracting more highly qualified students to our program.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** We will design additional recruitment materials and strategies.
PhD Handbook was updated

The PhD handbook will be continuously reviewed and updated to reflect new requirements and URL address changes

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High
Projected Completion Date: 07/2012
Responsible Person/Group: EPY Coordinator

Georgia State University
Assessment Data by Section
2011-2012 English Assessment of Core
As of 12/12/2016 04:41 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

Lower Division Studies in the English Department is committed to providing the highest level of writing and reading instruction for our students as they enter the University. We seek to develop students’ writing skills, critical thinking, and reading comprehension by engaging them in a variety of expository, argumentative, and literary (on the sophomore level) readings that lead to competent writing skills; and through encouraging understanding of the social and discourse communities that shape writing. Our program's work with students also aims to connect writing to larger University initiatives. The FLC program, the First Year Reading Book, Student Success Academy, WAC, and the Department's Writing Studio have influence on the course curriculum and stated outcomes and goals.

Goals

G 1: Competency in Writing
Student will demonstrate competency in writing through consideration of the rhetorical situation, and through their ability to identify key issues, present their findings in a logical structure, formulate an alternative point of view, formulate a central/anchor thought (thesis), and use effective support and evidence.

G 2: Reading Comprehension
Student will demonstrate ability to interpret a text accurately, particularly in terms of main ideas or important concepts. Additionally, students will demonstrate ability to identify, summarize, and evaluate both major and minor issues, as well as the interrelationships between them.

G 3: Developing Critical Readers and Writers
To realize our mission of developing critical and effective readers and writers, the core courses in English are committed to helping our students 1) develop critical thinking through analytical reading of literary, cultural, and other works. 2) Develop their writing style by engaging in several forms of writing (summary, expository, argumentative, etc.) 3) Help student connect their writing process to the larger University community, 4) Work with University programs (FLC, First Year Book, Student Success Academy, Writing Studio, Writing Across the Curriculum, etc.) to create and maintain writing program initiatives, and 5) train Graduate Teaching Assistants in the proper assessment and feedback models needed to encourage and direct our students.

Student Learning Outcomes/Objectives

SLO 1: Identification (G: 1, 2, 3) (M: 1)
Identification and articulation of key issue(s) (does it answer the question?).

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.1 Increase the level of scholarship support for undergraduate students.

SLO 2: Logical Structure (G: 1, 2, 3) (M: 1)
Identification of valid positions on the issue (presented in a logical structure).
General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.1 Increase the level of scholarship support for undergraduate students.

SLO 3: Alternative Viewpoints (G: 1, 3) (M: 1)
Student is able to formulate and effectively articulate alternative view points.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.1 Increase the level of scholarship support for undergraduate students.

SLO 4: Thesis (G: 1, 3) (M: 1)
Students will demonstrate their formulation of a position on an issue. Their papers will develop a central thesis, and their papers will follow the structure and line of argument supported by this thesis.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.1 Increase the level of scholarship support for undergraduate students.

SLO 5: Evidence (G: 1, 3) (M: 1)
Students will demonstrate effective use of reasons in support of stated position.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.1 Increase the level of scholarship support for undergraduate students.

SLO 6: Reading Comprehension (G: 2, 3) (M: 2)
Students will demonstrate their ability to effectively summarize and evaluate texts (in this case, The Other Wes Moore). Students should be able to identify major arguments and the interrelationships between the major and [minor] sub-arguments.
General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings

M 1: Written assignment assessing writing skills (O: 1, 2, 3, 4, 5)

In order to assess writing skills, instructors gave ENGL1101 students a prompted essay question for the University's freshman reading book, The Other Wes Moore. Instructors graded these essays using the revised 2012 rubric (in documents section).

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Identification

At least 70% of students will score a “3” out of "4" on Identification.

Findings 2011-2012 - Target: Met

88% of students received a score of 3 or 4.

Target for O2: Logical Structure

At least 70% of students will score a “3” out of "4" on Logical Structure.

Findings 2011-2012 - Target: Met

71% of students received a score of 3 or 4.

Target for O3: Alternative Viewpoints

At least 70% of students will score a “3” out of "4" on Alternative Viewpoints.

Findings 2011-2012 - Target: Partially Met

50% of students scored a 3 or 4.

Target for O4: Thesis

At least 70% of students will score a “3” out of "4" on thesis construction.

Findings 2011-2012 - Target: Met

80 % of students scored a 3 or 4.

Target for O5: Evidence

At least 70% of students should score a 3 or 4 on Evidence.

Findings 2011-2012 - Target: Partially Met

69% of students scored a 3 or 4.

M 2: Written assignment assessing reading comprehension (O: 6)

In order to assess reading comprehension skills, instructors gave ENGL1101 students a reading comprehension quiz. The instructors graded these quizzes using the revised reading comprehension rubric (attached in documents section).

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O6: Reading Comprehension

Students will score at least a "3" out of "4" on the Reading Comprehension Rubric. Please see "documents" section for 2011-2012 Rubric.

Findings 2011-2012 - Target: Met

72% of students received a 3 or 4.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Written Communication - Core

The data collected from our new Writing Assessment Rubrics indicates students are doing well with previously low-scoring areas (thesis and structure). However, it appears students are having issues expressing alternative points of view and providing clear...
support for their claims. These issues, we feel, will improve when the students exit 1102, as that course is designed to teach students how to include oppositional viewpoints and evidence.

**Lower Division Lit Survey Assessment**

Currently, lower division is working to implement new assessment strategies for the literature survey courses. The office of lower division is working with the lower division studies committee to create a new plan assessment of these courses. We have moved toward a themed model for these courses. We have also started requiring TAs to develop "select texts" (Bedford St. Martin’s is helping us with this) for their reading materials.

**Revise Rubrics**

Our new reading comprehension rubrics allowed us to assess the comprehension levels of our incoming 1101 students.

**1101 through 1102 tracking of individual students**

Our new assessment data collecting allows us to track student progress in the 1101 and 1102 courses. We would like to retest the same sample students once they exit 1102 to see if their writing scores improve. This will require devising a similar essay prompt and grading this prompt with the same revised rubric used in the 1101 assessment. We can compare the individual assessment scores to track student progress and to assess areas in which we need to improve our pedagogical approach.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We revised the rubric, we made the first year book and the data collection a mandatory part of each TA's syllabus, and we used the preliminary data to direct students (those scoring 2 and 1) to learning resources.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Next year we will revise the course to introduce evidence and alternative points of view earlier in the curriculum. We will also start assessing the University's Freshman Success Academy students separately from our "regular" incoming Freshman class.

**Annual Report Section Responses**

**Most Important Accomplishments for Year**—Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.

We have worked to train TAs in assessment. In four meetings throughout the year, we went over assessment models and conducted grade norming sessions using the revised writing and reading comprehension rubrics. With this additional training, we are more confident in the reporting we receive from our TAs. We also devised a single prompt for assessing writing in the 1101 course. We feel
the single prompt gives us more accurate assessment reports. We collected writing and reading comprehension data from all of our 1101 students (sample size included in this report). In addition to the information reported here, we also collected demographic information we feel will be useful in tracking student progress through their 1102 courses.

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

The 1101 and 1102 courses have increasingly become the catch-all for assessment and University-initiated programs. We anticipate more programs designed to use the 1101 and 1102 courses as a way to collect data. This puts a burden on our TAs. Additionally, these new initiatives often do not consider the goals and aims of our approach to teaching.

**Modifications in Measurement Methods**—If you modified any of the measures or methods you use in the measurement process, please note those here.

We used newly revised rubrics for both the reading and writing assessment portions of this data collection period.

**Contributions to Student Retention**—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

1101 and 1102 are core courses. We work closely with the office of student retention (implementing their new attendance policy and continuing to participate in their early alert program, the FLC office, the Atlanta Connection program, the Student Success program, and with the tutoring services offered by the athletic program.

**Georgia State University**

**Assessment Data by Section**

**2011-2012 English Concentration in Creative Writing**

*As of: 12/12/2016 04:41 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

---

**Mission / Purpose**

The English department prepares its students in the Creative Writing concentration with knowledge of literary composition, aesthetics, vocabulary and techniques, familiarity with established literary models, and the ability to produce creative engaging literary works so that they are prepared to enter graduate programs and publish in creative writing or embark upon other writing careers.

**Goals**

**G 1: Mastery of Writing**

Graduates of this concentration are competent writers, both in terms of basic communications skills and imaginative expression.

**G 2: Knowledgeable about Genre**

Graduates of this concentration are well versed in the literary production (significant figures and works, aesthetic techniques, literary vocabulary) of their chosen genre.

**G 3: Knowledgeable about the Profession of Writing**

Graduates of this concentration are aware of sources of contemporary literature that they can read for models of good writing and are familiar with appropriate venues for publication.

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrate Content Knowledge Related to Creative Writing (M: 2)**

Students will demonstrate an understanding of content knowledge related to Creative Writing (writers that have influenced their creative output, literary techniques they have used in their own writing, vocabulary they have learned about the genre they have selected, etc).

**SLO 2: Demonstrate Familiarity with Appropriate Examples of Literary Works (M: 2)**

Students will demonstrate a familiarity with representative examples of writing in fiction or in poetry, depending upon the student’s choice of genre.

**Measures, Targets, and Findings**

**M 2: Senior Exit Portfolio (O: 1, 2)**

While the senior exit portfolios have been required of students since the fall of 2002, we have collected data only since the fall of 2004. In the middle of his or her final semester, every graduating senior submits a portfolio, which consists of selected writings produced during the course of the student's career in the program as well as a reflective essay in which the student considers his or her progress as a student of English. The specific instructions for the compilation of the portfolio are different for each of the department's four concentrations: Literature, Secondary English, Rhetoric and Composition, and Creative Writing. Every portfolio is read by two faculty members associated with the student's particular concentration. The faculty members assess the portfolios, using criteria aligned with the department's undergraduate learning outcomes. Each criterion is rated on a 5-point scale, and the results are tabulated with mean scores and median scores for each criterion. In the summer, the Assessment Coordinator meets with each of the directors of the four concentrations to analyze the data and make suggestions for procedural and programmatic change. The suggestions are presented to the full faculty at the first department meeting of the semester and, if approved, integrated into the
yearly assessment plan. From 2004-2010, the portfolios for all concentrations were reported on in one assessment report, but in 2009-2010, the department decided that each concentration would report separately. This switch has also opened up the possibility for each concentration to select particular outcomes to concentrate on for a particular assessment cycle (even though the portfolio review still involves assessment for all the criteria listed on an assessment form). In the 2009-2010 assessment plan, the Creative Writing concentration chose to focus on two outcomes: demonstration of content knowledge related to Creative Writing and the demonstration of familiarity with appropriate examples of literary works.

Source of Evidence: Portfolio, showing skill development or best work

<table>
<thead>

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Rewrite mission, goals, and objectives to better suit the particulars of the Creative Writing concentration

Now that the department has decided to break down the assessment work into the four different concentrations, faculty members in each concentration will examine the mission, goals, and objectives to see if they want to make changes in order to better match the specific skills and knowledge their students are expected to gain and the particular types of assignments they are expected to produce.

| Established in Cycle: 2009-2010 |
| Implementation Status: In-Progress |
| Priority: Medium |
| Projected Completion Date: 01/2011 |
| Responsible Person/Group: Faculty in Creative Writing |
| Budget Amount Requested: $0.00 (no request) |

Continue to track the discrepancy between the number of fiction students and poetry students

There was a sizable discrepancy between the number of poetry students (8) and the number of fiction students (23). The Creative Writing Faculty is still uncertain of the reason for this gap. They will continue to track the numbers and try to find the cause for it and to consider the implications of it.

| Established in Cycle: 2010-2011 |
| Implementation Status: In-Progress |
| Priority: Medium |
| Projected Completion Date: 08/2011 |
| Responsible Person/Group: Director of Creative Writing |

Lower target for outcome (familiarity with appropriate examples) for poetry portfolios

Since the poetry faculty have had a harder time norming their grades, the poetry portfolios often do not meet the targets. Therefore, the poetry target for this outcome (familiarity with appropriate examples of literary works) will be set at 4.0 for poetry in the next assessment cycle while the target of 4.2 for fiction portfolios will remain the same.

| Established in Cycle: 2010-2011 |
| Implementation Status: Finished |
| Priority: Medium |

Lower the target for this outcome (Content Knowledge Related to Creative Writing) on the poetry portfolios

Since the poetry faculty have had a harder time norming their grades, the poetry portfolios often do not meet the targets. Therefore, the poetry target for this outcome (Content Knowledge related to Creative Writing) will be set at 4.0 for poetry in the next assessment cycle while the target of 4.2 for fiction portfolios will remain the same.

| Established in Cycle: 2010-2011 |
| Implementation Status: Finished |
| Priority: Medium |
Address concern over diminishing student numbers in poetry specialty
For this past two years, the department has been tracking the number of poetry students who graduate each semester and has observed that it is often less than the number of fiction students by at least 50%. This raises concerns because with a diminished student base, specialty classes in poetry such as English 3150a (Introduction to Poetry), English 3170 (Poetry Technique), and English 4310A (Senior Seminar; Poetry) will undoubtedly be affected (by being very small in size or unable to run during a particular semester because of under enrollment). Another concern is that with fewer specialty courses being offered, advanced graduate students in poetry will not have the opportunity to teach these courses, and this would detract from the value of the graduate program. While the department is still unclear about the reason for this shift in numbers, the situation seems serious enough to warrant immediate discussion and possible action. Therefore, the director of Creative Writing will bring this question to the poetry faculty and work with them to brainstorm possible solutions. The Director of Creative Writing will meet with the poetry faculty during the fall of 2012 to address this concern and offer possible solutions that could be implemented by the beginning of the 2013-2014 assessment cycle.

Consider other possible assessment tools
Faculty associated with this concentration will begin to discuss the development of other assessment tools beyond the senior exit portfolio. One possibility is to create a measure that assesses students' skills in grammar and syntax in the introductory classes (English 3150a and 3150b). Getting a clearer sense of students' mastery of basic writing skills early on in their program would be helpful in determining what specifically needs to be addressed in the specialty classes that follow to bring students up to the level of competence that is expected by the end of their studies. The Director of Creative Writing will meet with Creative Writing faculty to begin a discussion about additional assessment measures with the intention of being able to create and implement any new tools by the beginning of the 2013-2014 assessment cycle.

Examine previous poetry portfolios that received divergent scores
In an effort to determine why the poetry scores fall below fiction scores in most instances, the Assessment Coordinator will work with the director of the Creative Writing program to identify past portfolios that received divergent scores from different readers so that faculty members in this concentration can look at these examples and discuss expectations concerning the portfolio with the hope of creating greater consistency in the scoring of the portfolios. The Assessment Coordinator will gather these materials and make them available to the director of Creative Writing by Dec. 31, 2012. Then, the faculty will discuss the discrepancies and generate ways to address this issue by May 31, 2013.

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

One significant change is that this concentration now has a mission statement and goals specific to its program (rather than the general statement and goals for the whole English program). The next step for improving undergraduate assessment is to investigate other opportunities when assessment can happen, ideally in a course that occurs early on in the program. Consequently, the next year will be spent considering other assessment tools with the hope of implementing any new measures by the beginning of the 2013-2014 school year.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The Creative Writing portfolios met all of the assessment targets. In part, this was due to the fact that the targets for poetry were set lower since this sub-specialty was not meeting its targets in the past three years (since the department began distinguishing poetry results from fiction results). The seven poetry portfolios submitted in 2011-2012 met the target set for knowledge related to creative writing because of the lower standard. On the other hand, these portfolios far exceeded the lower standard on the other criterion related to familiarity with literary examples. Since the concentration is still trying to determine the cause of the lower scores in poetry...
as compared to fiction, the Director of Creative Writing in conjunction with the Assessment Coordinator will identify examples of past portfolios that received widely divergent scores and meet with the poetry faculty to discuss expectations about the portfolio. Ideally, this action will improve the norming of scores in the poetry section of this concentration. The 20 fiction portfolios submitted in 2011-2012 met the targets set for them, by a wide margin in the case of knowledge related to Creative Writing and by a small margin in the case of familiarity with literary works. The Creative Writing faculty are going to begin to discuss other measures for assessing student work in the concentration at other points in the program rather than just the final semester of the senior seminar. Since there are so many classes that students are required to take in this concentration, there a number of courses that could be selected for this purpose.

---

**Georgia State University**  
**Assessment Data by Section**  
**2011-2012 English Concentration in Literature**  
(As of: 12/12/2016 04:41 PM EST)  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**  
The English Department prepares its graduates with a concentration in literature to demonstrate exceptional critical thinking, interpret and analyze texts of all kinds, and communicate effectively, both orally and in writing.

---

**Goals**

**G 1: Critical Thinking Skills**  
Students think critically by reading closely, applying theoretical models, and discerning and interpreting cultural, political, and historical contexts.

**G 2: Interpretation Skills**  
Students read and interpret written texts of all types—especially those containing imaginative or artistic representations of human experience—by conducting research and adopting various critical approaches and perspectives.

**G 3: Effective Communication**  
Students communicate their ideas effectively and eloquently, both orally and in writing.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Ability to think critically and interpret texts (M: 1)**  
Students will be able to interpret figurative language, to identify literary and thematic patterns, to read for multiple meanings, to apply knowledge of conventions from different periods and genres, to read and use scholarly and theoretical works, and to evaluate critical arguments and construct alternative positions when necessary.

**SLO 2: Knowledge of literary history, major figures, and genres (M: 1)**  
Students will demonstrate knowledge of major figures, genres, and historical periods of English, American, and World literature.

**SLO 3: Mastery of basic elements of writing (M: 1)**  
Students will demonstrate an ability to use basic elements of writing (such as grammar, punctuation, diction, syntax, and organization).

---

**Measures, Targets, and Findings**

**M 1: Literature Senior Exit Portfolio (O: 1, 2, 3)**  
While the senior exit portfolios have been required of students since the fall of 2002, we have been collecting data only since the fall of 2004. In the middle of his or her final semester, every graduating senior submits a portfolio, which consists of selected writings produced during the course of the student’s career in the program as well as a reflective essay in which the student considers his or her progress as a student of English. The specific instructions for compiling the portfolio are different for each of the department’s four concentrations: Literature, Secondary English, Rhetoric and Composition, and Creative Writing. Every portfolio is read by two faculty members associated with the student’s particular concentration. The faculty members assess the portfolios, using criteria aligned with the department’s undergraduate learning outcomes. Each criterion is rated on a 5-point scale, and the results are tabulated with mean scores and median scores for each criterion. In the summer, the Assessment Coordinator meets with each of the directors of the four concentrations to analyze the data and make suggestions for procedural and programmatic change. The suggestions are presented to the full faculty at the first department meeting of the semester and, if approved, integrated into the yearly assessment plan. From 2004-2010, the portfolios for all concentrations were reported on in one assessment report, but in 2009-2010, the department decided that each concentration would report separately. This switch has also opened up the possibility for each concentration to select particular outcomes to concentrate on for a particular assessment cycle (even though the portfolio review still involves assessment for all the criteria listed on an assessment form). In 2009-2010, the Literature concentration chose to focus on three outcomes: knowledge of literary history, major figures, and genres; ability to think critically and interpret texts; and mastery of the basic elements of writing.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Ability to think critically and interpret texts**  
The target for this outcome related to critical thinking and interpretation skills is a 4.2 out of 5.0.
Findings 2011-2012 - Target: Met

There were 38 portfolios submitted in the Literature concentration this year. The average score for this outcome related to critical thinking and interpretation skills was a 4.51, meaning that it met the target. This average also represented the highest score for this outcome in the past six assessment cycles.

Target for O2: Knowledge of literary history, major figures, and genres

The target for this outcome related to the knowledge of literary history, major figures, and genres is a 4.2 out of 5.0.

Findings 2011-2012 - Target: Met

The average score for this outcome related to the knowledge of literary history, major figures, and genres was a 4.43, meaning that it met the target. This average was also the highest score earned for this outcome in the past six assessment cycles.

Target for O3: Mastery of basic elements of writing

The target for this outcome related to the mastery of basic elements of writing was a 4.2 out of 5.0.

Findings 2011-2012 - Target: Met

The average score for this outcome related to the mastery of basic elements of writing was a 4.48, meaning that it met the target. This reflects a slight improvement over last year's average for this outcome which was a 4.35.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Advise students about portfolio contents

Because the writings in a number of the Literature portfolios have demonstrated a limited breadth of knowledge, we need to help students see the importance of including a wider range of essays (American/British/world literature, from different periods, with theoretical engagement). More detailed instructions about the need to a diverse selection of writings will be supplied to instructors of the senior seminar so that these instructors can provide better guidance to students as they prepare their portfolios.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 08/2011
Responsible Person/Group: Director of Undergraduate Studies

Continue using same outcomes and targets in portfolio assessment

This concentration will continue to focus on the following three outcomes in their assessment of the senior portfolios: the ability to think critically and interpret texts; the knowledge of literary history, major figures, and genres; and the mastery of basic elements of writing. The targets will also remain the same.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Begin discussing additional assessment tools

Faculty associated with this concentration will begin to discuss the development of other assessment tools beyond the senior exit portfolio. One possibility is to create a measure that assesses student mastery of content knowledge in the single author courses. This particular class may be an ideal course for assessing content knowledge in this concentration since all students are required to take one single author course; in addition, the syllabus of this course typically involves some type of culminating writing that determines student knowledge about the author under consideration. An assessment tool could be created in conjunction with this culminating project. Another possibility for further assessment of student work in this concentration is the internship course. While the internship is not a required course, the department has made efforts in recent years to promote this opportunity since it offers students such a unique and meaningful educational experience. Implementing an assessment tool for the internship program could help the department to clarify its value and to determine its success.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: The director of Undergraduate Studies will begin a discussion about additional assessment measures with faculty members associated with the Literature concentration with the intention of being able to create and implement any new tools by the beginning of the 2013-2014 assessment cycle.
Responsible Person/Group: Director of Undergraduate Studies

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

One significant change is that this concentration now has a mission statement and goals specific to its program (rather than the general statement and goals for the whole English program). The next step for improving undergraduate assessment is to investigate other opportunities when assessment can happen, ideally in a course that occurs early on in the program. Consequently, the next year will be spent considering other assessment tools with the hope of implementing any new measures by the beginning of the 2013-2014 school year.
ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The assessment results for the Literature concentration in 2011-2012 were very encouraging with students earning the highest mean average of the past six assessment cycles on all three of the outcomes associated with the senior exit portfolio (content knowledge, reading interpretation, and the ability to use basic elements of writing). Given this success, this concentration is not planning any changes to the educational program; however, faculty members associated with this concentration will begin to discuss the possibility of creating an additional assessment tool that could capture student success rates at a point in the program other than just the senior seminar. The single author course and the internship are possible courses that could provide meaningful assessment information in content knowledge (the single author course) and in professional training (the internship).

Georgia State University
Assessment Data by Section
2011-2012 English Concentration in Rhetoric/Composition
(As of: 12/12/2016 04:41 PM EST)
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, global and multi-ethnic literary and cultural studies, pedagogy, critical theory, creative writing, rhetoric and composition, professional and technical writing, and secondary education. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs. (This mission statement is in the process of being revised and will be updated by Oct. 2012.)

Goals
G 1: Knowledge of language and linguistics
Students will demonstrate an awareness of the centrality of language to human experience as well as an understanding of some of the structures and functions of language.

G 2: Effective Written Communications
Students will be able to apply knowledge of the elements of rhetoric for effective communications in writing; to write for a variety of forms as appropriate to audience, purpose, and occasion; to recognize a range of social, academic, and professional situations and adapt language accordingly; and to comprehend the grammatical and syntactical patterns of the English language and use them as tools in writing and revising.

G 3: Interpretive Skills
Students will be able to interpret figurative language, to identify literary and thematic patterns, to read for multiple meanings, to apply knowledge of conventions from different periods and genres; to read and use scholarly and theoretical works, and to evaluate critical arguments and construct alternative positions when necessary.

Student Learning Outcomes/Objectives
SLO 1: Ability to think critically and interpret texts (M: 1)
Students will be able to interpret figurative language, to identify literary and thematic patterns, to read for multiple meanings, to apply knowledge of conventions from different periods and genres; to read and use scholarly and theoretical works, and to evaluate critical arguments and construct alternative positions when necessary.

SLO 2: Effective written communications (M: 1)
Students will develop the skills to use language effectively in written communications.

SLO 3: Knowledge of language and linguistics (M: 1)
Students will demonstrate an awareness of the centrality of language to human experience as well as an understanding of some of the structures and functions of language.

Measures, Targets, and Findings
M 1: Rhetoric and Composition senior exit portfolio (O: 1, 2, 3)
While the senior exit portfolios have been required of students since the fall of 2002, we have collected data only since the fall of 2004. In the middle of his or her final semester, every graduating senior submits a portfolio, which consists of selected writings produced during the course of the student's career in the program as well as a reflective essay in which the student considers his or her progress as a student of English. The specific instructions for compiling the portfolio are different for each of the department's four concentrations: Literature, Secondary English, Rhetoric and Composition, and Creative Writing. Every portfolio is read by two faculty members associated with the student's particular concentration. The faculty members assess the portfolios, using criteria that are aligned with the department's undergraduate learning outcomes, and the results are tabulated with mean scores and median scores for each criterion. In the summer, the Assessment Coordinator meets with each of the directors of the four concentrations to analyze the data and make suggestions for procedural and programmatic change. The suggestions are presented to the full faculty at the first department meeting of the semester and, if approved, integrated into the yearly assessment plan. From 2004-2010, the
portfolios for all concentrations were reported on in one assessment report, but in 2009-2010, the department decided that each concentration would report separately. This switch has also opened up the possibility for each concentration to select particular outcomes to concentrate on for a particular assessment cycle (even though the portfolio review still involves assessment for all the criteria listed on an assessment form). In 2009-2010, the Rhetoric and Composition concentration chose to continue to focus on the following three outcomes: knowledge of language and linguistics; effective written communications; and the ability to think critically and interpret texts.

| Priority: Medium |

<table>
<thead>
<tr>
<th>Set new targets for the portfolios</th>
</tr>
</thead>
<tbody>
<tr>
<td>Given that the portfolios are going to be ranked on a 5-point scale, the following targets will be set: 4.0 for the ability to think critically and interpret texts; 4.1 for effective written communications, and 4.0 for knowledge of language.</td>
</tr>
</tbody>
</table>
Consider other assessment measures
The faculty in the Secondary English concentration will discuss other options for implementing new assessment measures in courses that occur earlier in this program than does the Senior Seminar. Ideally, the department should strive to capture data from an early point in the program to go along with the assessment currently being done at the end point of the program.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

One significant change is that this concentration now has a mission statement and goals specific to its program (rather than the general statement and goals for the whole English program). The next step for improving undergraduate assessment is to investigate other opportunities when assessment can happen, ideally in a course that occurs early on in the program. Consequently, the next year will be spent considering other assessment tools with the hope of implementing any new measures by the beginning of the 2013-2014 school year.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Because the assessment data for this concentration for 2011-2012 was lost, there is no analysis for this section. There are also no programmatic changes planned for the upcoming year.
Students will be able to reflect upon the profession of teaching and the effectiveness of particular classroom practices.

### Measures, Targets, and Findings

**M 1: Secondary English Senior Exit Portfolio (O: 2, 3, 4)**

While the senior exit portfolios have been required of students since the fall of 2002, we have collected data only since the fall of 2004. In the middle of his or her final semester, every graduating senior submits a portfolio which consists of selected writings produced during the course of the student’s career in the program as well as a reflective essay in which the student considers his or her progress as a student of English. The specific instructions for compiling the portfolio are different for each of the department’s four concentrations: Literature, Secondary English, Rhetoric and Composition, and Creative Writing. Every portfolio is read by two faculty members associated with the student’s particular concentration. The faculty members assess the portfolios, using criteria aligned with the department’s undergraduate learning outcomes. Each criterion is rated on a 5-point scale, and the results are tabulated with mean scores and median scores for each criterion. In the summer, the Assessment Coordinator meets with each of the directors of the four concentrations to analyze the data and make suggestions for procedural and programmatic change. The suggestions are presented to the full faculty at the first department meeting of the semester and, if approved, integrated into the yearly assessment plan. From 2004-2010, the portfolios for all concentrations were reported on in one assessment report, but in 2009-2010, the department decided that each concentration would report separately. This switch has also opened up the possibility for each concentration to select particular outcomes to concentrate on for a particular assessment cycle (even though the portfolio review still involves assessment for all the criteria listed on an assessment form). In 2009-2010, the Secondary English concentration chose to focus on three outcomes: knowledge of language and linguistics; effective written communications; and the ability to reflect upon teaching.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Knowledge of language and linguistics**

According to the 2009-2010 assessment report, the target for this outcome related to the knowledge of language and linguistics is a 4.2 out of 5.0.

**Findings 2011-2012 - Target: Met**

Twenty-one Secondary English senior portfolios were submitted this year. Students averaged a 4.40 for this outcome related to the knowledge of language and linguistics, meaning that their portfolios met the target for this outcome. This score also represented the highest mark for this outcome in the last six assessment cycles.

**Target for O3: Effective Written Communications**

According to the 2009-2010 assessment report, the target for this outcome related to the effective written communications is a 4.2 out of 5.0.

**Findings 2011-2012 - Target: Met**

Students averaged a 4.30 for this outcome related to effective written communications, meaning that their portfolios met the target for this outcome. This score was slightly lower than the last score for this outcome which was a 4.43.

**Target for O4: Ability to Reflect upon Teaching**

According to the 2009-2010 assessment report, the target for this outcome related to the ability to reflect upon teaching is a 4.2 out of 5.0.

**Findings 2011-2012 - Target: Met**

The average score for this outcome was a 4.40. This score met the target and was in the middle of the scores earned over the past six years, which ranged from 4.2 - 4.6.

**M 2: Senior Seminar Exam (O: 4)**

Starting in 2009-2010, the Senior Seminar for students in the Secondary English concentration has included a question on the final exam that asks students to reflect upon what they have learned about the profession of English teaching from the various elements of the course (lesson and unit planning, the integration of the standards in teaching, resources available for classroom instruction, classroom management as demonstrated by teachers at their observation sites, and content enhancement possibilities through teaching conferences). Scores for the question on the exam that asks students to reflect upon teaching will be tabulated and reported as part of the assessment report.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O4: Ability to Reflect upon Teaching**

The expectation for the teaching philosophy assignment to be completed by students in the senior seminar is that at least 75% will receive a 90% or above for this assignment.

**Findings 2011-2012 - Target: Partially Met**

This year, students were asked to write a teaching philosophy for the senior seminar and this was used in place of the exam. This statement was scored on four criteria: comprehension of key pedagogical concepts, effective reflection on pedagogical practice; integration of pedagogical concepts and practice into their own ideas about teaching; and demonstration of audience awareness. A four-point ranking was used, with excellent indicating the knowledge or skill was demonstrated masterfully and frequently, competent indicating the knowledge or skill was demonstrated competently and frequently, uneven indicating the knowledge or skill was demonstrated masterfully and frequently was demonstrated unevenly, with some competence and some frequency, and insufficient indicating the knowledge or skill was insufficiently or frequently demonstrated. The average score for the comprehension of key pedagogical concepts was a 3.5 which falls short of the target. The average score for the effective reflection on pedagogical practice was a 3.6. The average score for the pleasant side of the pedagogical concepts and practice into their own ideas about teaching was a 3.5. And the average score for the demonstration of audience awareness was 3.6. All three of these criteria met the target.
**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Promote and Support the internship program for Secondary English students

Efforts were made in the spring and summer to encourage students in the Secondary English concentration to sign up to do an internship in a school at some point in their program. As a result, some ten students will likely be doing internships this year. Funding has been allocated for an instructor to serve as the director of this specialized internship program. We plan to advertise the internship program again this year (by distributing fliers in the 3040 classes, sending out reminders on the undergraduate listserv, and offering an internship workshop) so that an even greater percentage of Secondary English students get experience in the schools as interns. While we are not yet requiring this as a course, we are strongly encouraging this group of students to take advantage of this opportunity.

- **Established in Cycle:** 2010-2011  
  **Implementation Status:** In-Progress  
  **Priority:** High  
  **Projected Completion Date:** 08/2011  
  **Responsible Person/Group:** Secondary English Committee  
  **Additional Resources:** Funding needed to provide one course release for an instructor to direct this specialized internship program.  
  **Budget Amount Requested:** $0.00 (no request)

### Require students to include a paper about language in portfolios

Starting in the spring of 2012, students will be required to include in their senior portfolios a piece of evidence demonstrating their explicit knowledge of language. This writing should come out of one of the following classes: Practical Grammar (English 3105), Language Analysis for Teachers of English (English 3190), Introduction to the English Language (English 3200), Advanced Grammar (English 3210), History of the English Language (English 3220), and Language in the African-American Community (English 3955). This requirement is in addition to the requirements already listed in the portfolio instructions for this concentration.

- **Established in Cycle:** 2010-2011  
  **Implementation Status:** In-Progress  
  **Priority:** High  
  **Projected Completion Date:** 12/2011  
  **Responsible Person/Group:** Renee Schatteman, Assessment Coordinator

### Requiring students in the senior seminar and the specialized 3040 class to write a statement about their teaching philosophy

Last year, we asked students in the Senior Seminar to write a final exam question that required them to reflect upon the practice of teaching. This year, we will instead ask students to write a statement which articulates their teaching philosophy, drawing upon the various experiences they have had in this course. Starting in the fall of 2012, the instructor who teaches the specialized introductory class (English 3040) for prospective teachers will also ask students to write a teaching philosophy statement. At first, we will look at the scores from each class to see how much students are learning in these two individual classes. In a few years' time, we will be able to compare the teaching philosophy statement written at the beginning of a student's program with the statement that same student is able to write at the end of the program, which will give us a sense of development in this learning outcome over the full program.

- **Established in Cycle:** 2010-2011  
  **Implementation Status:** On-Hold  
  **Priority:** Medium  
  **Projected Completion Date:** 01/2012  
  **Responsible Person/Group:** Instructors of the 4330 class and the specialized 3040 class

### Set target for the teaching philosophy assignment

The expectation for the teaching philosophy assignment to be completed by students in the senior seminar is that at least 75% will receive a 90% or above for this assignment. For all the portfolio outcomes, the department will use the same targets as were used in the last portfolio assessment cycle.

- **Established in Cycle:** 2010-2011  
  **Implementation Status:** Finished  
  **Priority:** Medium  
  **Projected Completion Date:** 08/2011  
  **Responsible Person/Group:** Assessment Coordinator

### Consider options for additional assessment measures

Since it is uncertain at this point whether student enrollment can support the creation of a specialized English 3040 class, the faculty in the Secondary English concentration should discuss other options for implementing new assessment measures in courses that occur earlier in this program than does the Senior Seminar. Ideally, the department should strive to capture data from an early point in the program to go along with the assessment currently being done at the end point of the program.

- **Established in Cycle:** 2011-2012  
  **Implementation Status:** Planned  
  **Priority:** Medium  
  **Implementation Description:** The Chair of the Secondary English committee will find out about the decision concerning the specialized 3040 class from the Department Chair and the Associate Chair and then bring the matter to the Secondary English committee for discussion.  
  **Projected Completion Date:** 05/2013  
  **Responsible Person/Group:** the Chair of the Secondary English committee

### Coordinate key pedagogical ideas to be presented in the senior seminar
The missed target on the criterion related to the comprehension of key pedagogical ideas in the teaching philosophy assignment suggests that students are not fully comprehending and internalizing the critical teaching ideas presented in the senior seminar. This could be related to the fact that the concentration does not have a strong sense of which concepts are critical to teacher preparation, so instructors who teach the senior seminar will meet during the course of 2012-2013 to agree upon the concepts to be presented and integrated into students’ teaching philosophies.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: The instructors who teach the senior seminar for this concentration will meet to come up with a list of key pedagogical ideas to be presented in this course.
Projected Completion Date: 05/2013
Responsible Person/Group: The Assessment Coordinator and the instructors of this senior seminar.

Decide whether or not to run the specialized 3040 class for Secondary English students
Last year, the faculty in Secondary English decided to begin offering a specialized course in English 3040 (Introduction to Literary Studies) for students in this concentration, but this class did not run in the fall 2012 semester for two reasons: the instructor ended up taking family leave and the class was seriously underenrolled. The department needs to decide if enrollment can be improved with additional advertisement and whether or not to offer a specialized English 3040 in 2013-2014.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: The Chair of the Secondary English committee will discuss this matter with the Associate Chair of the department who, in consultation with the chair, will decide whether or not this course should be offered again.
Projected Completion Date: 12/2012
Responsible Person/Group: Ultimately, the chair of the department

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

One significant change is that this concentration now has a mission statement and goals specific to its program (rather than the general statement and goals for the whole English program). The next step for improving undergraduate assessment is to investigate other opportunities when assessment can happen, ideally in a course that occurs early on in the program. Consequently, the next year will be spent considering other assessment tools with the hope of implementing any new measures by the beginning of the 2013-2014 school year.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Because the targets for the senior exit portfolio were met, this concentration does not have specific programmatic actions to be taken at the moment related to this assessment measure. On the other hand, the assessment from the teaching philosophy assignment had one criterion that was not met—the mastery of critical concepts of English pedagogy. Because of that, the instructors of this course will meet this year to discuss the critical elements and to make sure that the course offers an effective approach for introducing this material to students. In addition, since it is uncertain at this point whether student enrollment can support the creation of a specialized English 3040 class, the faculty in the Secondary English concentration should discuss other options for implementing new assessment measures in courses that occur earlier in this program than does the Senior Seminar. Ideally, the department should strive to capture data from an early point in the program to go along with the assessment currently being done at the end point of the program.

Georgia State University
Assessment Data by Section
2011-2012 English Creative Writing MFA
As of: 12/12/2016 04:41 PM EST
( includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies and creative writing. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs. (This mission statement is in the process of being revised and will be updated by Oct. 2012.)

Goals
G 1: Assure mastery of content knowledge
The department will strive to assure that MFA students master the content knowledge related to the Creative Writing concentration to the level that is expected for masters work.

G 2: Encourage scholarly engagement with critical approaches, theoretical frameworks, and/or historical contexts
The department will emphasize the importance of a scholarly engagement with critical approaches, theoretical frameworks, and/or
historical contexts in masters work, in particular in the thesis writing.

**G 3: Foster effective written communications**
The department will work to foster effective written communication skills in MFA students.

### Student Learning Outcomes/Objectives

**SLO 1: Content Knowledge (M: 1, 2)**

M.F.A. students will demonstrate a thorough familiarity with representative examples of writing by major figures in fiction or poetry, English and American literary history of fiction or poetry, and form and theory of fiction or poetry, depending on the student's choice of genre.

**SLO 2: Application of Literary Studies (M: 1)**

Students will be able to draw upon the knowledge of composition and aesthetics gained in their English studies to compose meaningful literary works. They will also be able to develop vocabularies for studying and discussing poetry and fiction, depending on the student's choice of genre.

**SLO 3: Craftsmanship (M: 1)**

Students will be able to produce writing that is authentic and engaging, in part by identifying and accessing material from their own lives and interests and is of sufficient quality to be deemed publishable in national literary journals.

**SLO 4: Revising Skills**

Students will be able to evaluate the strengths and weaknesses of both published and student writing and to offer specific and constructive criticism. Students will also be able to evaluate the range of critical responses from fellow students and the instructor and to revise their creative writing to create work of a sufficient quality to be deemed publishable in national literary journals.

**SLO 5: Effective Communication Skills (M: 2)**

Students will be able to communicate effectively in a wide range of written and spoken communications.

**SLO 6: Researching Skills**

Students will conduct graduate-level research on topics related to English studies and will demonstrate mastery in using traditional methods of research as well as non-traditional information technology.

**SLO 7: Evaluative Skills**

Students will be able to evaluate information and materials for their accuracy, persuasiveness, and relevance to a research project.

### Measures, Targets, and Findings

**M 1: M.F.A. Thesis (O: 1, 2, 3)**

The Creative theses have been assessed since 2009-2010. Students who finish their thesis are assessed collectively by their thesis committee members who fill out a form (with a 5-point scale) that is aligned to the graduate learning outcomes (see attached assessment form). If there are dissenting opinions about the scores, those different scores can be indicated on the assessment form. The committee chair is responsible for making sure that the assessment form is completed and turned into the assistant to the Graduate Director after the thesis work has been submitted. A student cannot be advanced for graduation if this assessment step has not been done.

*Source of Evidence: Senior thesis or culminating major project*

**Target for O1: Content Knowledge**

In 2010-2011, the decision was made to include 6 rankings on the MFA thesis assessment form because the score of 6 is reserved for work that is ready to go to publication and some MFA theses are of that quality. Consequently, the target for the content knowledge outcome of the MFA thesis was revised to be 5.0 out of 6.0.

**Findings 2011-2012 - Target: Met**

Two students completed the MFA thesis in 2011-2012. The average score for all of the criteria on the M.F.A. thesis was a 6.0. That score exceeded the target and represented an improvement over last year’s scores.

**Target for O2: Application of Literary Studies**

In 2010-2011, the decision was made to include 6 rankings on the MFA thesis assessment form because the score of 6 is reserved for work that is ready to go to publication and some MFA theses are of that quality. Consequently, the target for the content knowledge outcome of the MFA thesis was revised to be 5.0 out of 6.0.

**Findings 2011-2012 - Target: Met**

The average score for the application of literary studies outcome on the two M.F.A. theses completed this year was a 6.0. That score exceeded the target.

**Target for O3: Craftsmanship**

In 2009-2010, the target for the application of craftsmanship learning outcome of the MFA thesis was set at 4.7 out of 5.0.

**Findings 2011-2012 - Target: Met**
The average score for the craftsmanship learning outcome (the ability to produce work that is authentic and engaging, the ability to produce work that is grammatically sound and syntactically correct, and the use of a variety of literary techniques) on the M.F.A. thesis was a 6.0. That score exceeded the target.

M 2: M.F.A. Exams (O: 1, 5)

M.F.A. students in the Creative Writing Program are required to pass two four-hour exit exams given over two days. The exam given on the first day tests the student's knowledge of literary vocabulary, major literary figures, literary history, and form and theory in the literature of the student's chosen genre before the twentieth century. The exam given on the second day tests the student's knowledge of literary vocabulary, major literary figures, literary history, and form and theory in the literature of the student's chosen genre after the beginning of the twentieth century. Each M.F.A. exam is read and graded by a committee of three faculty chosen by the student. The committee consists of the student's major professor, a second member who must be in the relevant area of creative writing, and a third member from the English department.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Content Knowledge

In the 2009-2010 assessment plan, a target was set for the Creative Writing MFA exams that 25% or fewer of the examinees would earn a low pass or a fail on their exams.

Findings 2011-2012 - Target: Met

Two MFA exams were taken this year and neither received a low pass or failing grade. One exam was awarded a high pass while the other exam earned a pass. The target was met, with a 0% low pass/failure rate and a 100% high pass/pass rate.

Target for O5: Effective Communication Skills

In the 2008-2009 assessment plan, the department determined to set a target for all M.F.A. exams stating the intention that fewer than 15% of examinees would earn a low pass or a fail on their exams. This target was set to build upon the progress shown in last year's, where only 14% of exams were given a score of a low pass or a failure.

Findings 2011-2012 - Target: Met

Two MFA exams were taken this year and neither received a low pass or failing grade. One exam was awarded a high pass while the other exam earned a pass. The target was met, and the 0% low pass/failure rate and a 100% high pass/pass rate.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Create explanation sheet for M.F.A. thesis rankings

The Director of Creative Writing will create a list of criteria to accompany the M.F.A. thesis assessment form, similar to the criteria developed for the PhD dissertation assessment tool.

Established in Cycle: 2005-2006
Implementation Status: In-Progress
Priority: High
Implementation Description: The Assessment Coordinator will work with the Director of Creative Writing to develop this form.
Projected Completion Date: 12/2012
Responsible Person/Group: Director of Creative Writing

Create a document that explains the rankings on the thesis assessment form

The Graduate of Creative Writing, in conjunction with other Creative Writing faculty, will create a document that explains the meaning of each of the rankings of the thesis assessment form (outstanding, excellent, good, fair, poor, inadequate) in terms of the specific work of this concentration. This intention of this action step is that the explanation of the rankings can help in the norming process to better ensure accurate and useful results.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Director of Creative Writing
Budget Amount Requested: $0.00 (no request)

Rewrite mission and goals for MFA program

By spring of 2013, faculty in the Creative Writing concentration will revise the mission statement and their goals on the assessment report. Presently, these items reflect the mission and goals for the whole of the MA program. Now that we have broken up the assessment reporting in terms of concentration, Creative Writing can rewrite these items to more specifically match their program.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 12/2012
Responsible Person/Group: Director of Creative Writing in collaboration with other Creative Writing faculty
Budget Amount Requested: $0.00 (no request)

Change MFA thesis assessment from a 5 point range to a 6 point range

MFA theses are presently assessed like the Literature theses, using a 5-point scoring range. This was determined by the Literature concentration because there are not many theses that are immediately ready for publication, in contrast to the PhD dissertation. But the MFA is a terminal degree, and the quality of work is expected to be comparable to the PhD. Therefore, the Creative Writing faculty would like to use a 6-point scale so that they can indicate outstanding ranking for those theses that are ready for publication.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Distinguish between primary and secondary exams on MFA exams
To provide more information about the exam results for the MFA, primary exam results will be distinguished from secondary exam results.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Set a target of 5.0 out of 6.0 for the criteria on thesis assessment sheet
A new target of 5.0 out of 6.0 will be set for all the criteria on the revised (6 point) thesis assessment form.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Projected Completion Date: 08/2011
Responsible Person/Group: Assistant to the Graduate Director

Consider limiting the number of outcomes in assessment of MFA theses
In past years, the department has always used the full range of outcomes in the graduate assessment work of the MFA theses. The department will now consider if it wants to limit the number of outcomes to be considered each year, perhaps on a rotating basis, as is done with the undergraduate assessment work.

Established in Cycle: 2011-2012
Implementation Status: Planned
Implementation Description: The Assessment Coordinator will discuss this issue with the Director of Creative Writing.
Projected Completion Date: 05/2013
Responsible Person/Group: the Assessment Coordinator and the Director of Creative Writing

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process for the MFA concentration. During the next year, a number of steps will be taken. The mission statement and goals will be revised to address the specifics of Creative Writing. Also, the department will begin to discuss whether we should continue using the full range of outcomes in our assessment tools or limit the number of outcomes we consider each year (perhaps on a rotating basis). In addition, the department will create an explanation sheet that explains the possible rankings for the thesis work (similar to the document we use with the dissertation assessment).

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This year, two MFA exams were taken; one received a high pass and the other a pass, meaning that they exceeded the target of a 15% or less low pass/fail rate. This matched the results from the previous year. There were also two MFA theses completed this year. Both received the highest scores in all areas, meaning they also exceeded the target. These thesis results were an improvement over the last year. Because of the success in both areas, this concentration has no plans to make changes to the program this year.
In our department, MSIT, our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta, the nation, and around the world. We are committed to innovation and creativity to push the boundaries of knowledge and practice.

We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

**Goals**

**G 1: Content knowledge for teaching English Language Arts**
Candidates are informed educators who have knowledge of the content needed to teach English Language Arts in Grades 6-12.

**G 2: Knowledge, skills, & dispositions to teach English Language Arts**
Candidates are professional educators with knowledge, skills, and dispositions needed to succeed in teaching English Language Arts in Grades 6-12.

**G 3: Impact on student learning in English Language Arts**
Candidates are effective educators whose teaching practices have a measurable impact on the English Language Arts learning of their students.

**Outcomes/Objectives**

**O/O 1: Content knowledge (G: 1) (M: 1, 2)**
Candidates have knowledge and understanding of the content needed to teach English language arts. (Key Assessments - GACE performance and Content Knowledge section of Final Teaching Evaluation rubric Overall Assessment Score for Content & Curriculum)

**O/O 2: Planning (Pedagogical Knowledge and Skills) (G: 2) (M: 3)**
Candidates demonstrate their knowledge and skills through planning and implementation of a wide range of instructional methods and curriculum materials for teaching English language arts. (Key Assessment - Planning: Pedagogical Knowledge and Skills: Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction)

**O/O 3: Effects on P-12 Student Learning (G: 3) (M: 4)**
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Key Assessment - Effects on P-12 Student Learning: Teacher Work Sample rubric (Section on Analysis of Student Learning)

**O/O 4: Clinical Practice (Pedagogical Knowledge) (G: 2) (M: 5, 6)**
Candidates create learning environments which promote respect for and support of individual differences of ethnicity, race, language, culture, gender, and ability through planning and implementation of a wide range of instructional methods, and curriculum materials. (Key Assessment - Clinical Practice (Pedagogical Knowledge): Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric)

**O/O 5: Dispositions (G: 2) (M: 7)**
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. (Key Assessment - Dispositions: Unit-wide Dispositions Rubric)

**Measures (Key Assessments), Targets, and Findings**

**M 1: Content Knowledge GACE Scores (O: 1)**
Candidate performance on GACE tests for English Language Arts, forms 020 and 021.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Content knowledge**
100% of candidates will pass the required GACE II tests for English language arts education.

**Findings 2011-2012 - Target: Partially Met**
Note: The GACE II scores are reported a year later than the current year under review. Our 2010-2011 aggregate pass rate for the exams is 96% One student failed the GACE English 20 exam and 2 students failed the English 21 exam. Students scored slightly lower on 10 of the 12 state average subareas of English 20 Exam and scored slightly lower on 6 of the 12 state average subareas on English 21 Exam.

**M 2: Content Knowledge via Coursework (O: 1)**
Target for O1: Content knowledge

90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the English language arts content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met

The aggregate pass rates for this key assessment are based on a score of 3 or higher on all of the criteria within the scoring guide. The aggregate pass rates for this key assessment administered in Fall 2011 is 95% at the Adequate Demonstration (Score 3) Level. At least 42% of the students met the criteria on the scoring guide at the Effective level (Score 4) on all 4 aspects of the content knowledge domain.

M 3: Planning performance (O: 2)

Target for O2: Planning (Pedagogical Knowledge and Skills)

90% of candidates will demonstrate an acceptably proficient (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of planning as shown in their Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction). These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Partially Met

The aggregate pass rates for this key assessment are based on a score of 3 or higher on all of the criteria within the scoring guide. The aggregate pass rates for this key assessment administered in Spring 2012 is 100% for the rubrics used to assess Design for Instruction, Contextual Factors, and Learning Goals at the Acceptable (Score 3) level. The aggregate pass rate for the Assessment Plan, rubric was 100% at the Acceptable (Score 3) Level for four of the five criteria. On the criterion "Adaptations Based on Individual Needs of Student", 87% of students scored at the Acceptable (Score 3) Level. Our analysis of the Spring 2012 group further indicates the following: Contextual Factors: at least 12% scored at the proficient level (Score 4) and a minimum of 68% scored at the exemplary level (Score 5) Learning Goals: at least 6% scored at the proficient level (Score 4) and a minimum of 87% scored at the exemplary level (Score 5) Design for Instruction: at least 6% scored at the proficient level (Score 4) and a minimum of 73% scored at the exemplary level (Score 5). In contrast, on the Assessment Plan: at least 11% scored at the proficient level (Score 4) and a minimum of 70% scored at the exemplary level (Score 5). Two students did not meet the acceptable level, scoring at the developing (Score 2) level on one dimension: "Adaptations Based on Individual Needs of Student”

M 4: Effects on P-12 Student Learning (O: 3)

Target for O3: Effects on P-12 Student Learning

90% of candidates will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of effects on P-12 Student Learning as shown on their scores of the Teacher Work Sample rubric (Section on Analysis of Student Learning). This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met

The aggregate pass rates for this key assessment are based on a score of 3 or higher on all of the criteria within the scoring guides. The aggregate pass rates for this key assessment administered in Spring 2012 is 100% at the Adequate Demonstration (Score 3) Level. Furthermore, on the Clarity and Accuracy of Presentation criterion, 68% of students scored at the exemplary (Score 5) level and 31% scored at the proficient (Score 4) level.

M 5: Clinical Practice at Midpoint (O: 4)

Target for O4: Clinical Practice (Pedagogical Knowledge)

90% of candidates will demonstrate an adequately proficient level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Midpoint Teaching Evaluation Instrument. This level is expected by the midpoint of the practicum internship.

Findings 2011-2012 - Target: Partially Met

Midpoint: The following results are for each area on the Midpoint Teaching Evaluation Instrument: Knowledge of Students and Learning: 94% scored at the adequate level (Score 3 or higher) and a minimum of 68% scored at the effective level (Score 4 or higher) Learning Environments: 97% scored at the adequate level (Score 3 or higher) and a minimum of 35% scored at the effective level (Score 4 or higher). On both subcategories of classroom management and classroom environment, 52% scored at the effective level, while 89% scored at the adequate level for communication. Further analysis also shows that 57% scored at the effective level in an overall score regarding their skills and professional knowledge with learning environments. Assessment: 94% scored at the adequate level (Score 3 or higher) and a minimum of 21% scored at the effective level (Score 4 or higher) Planning and Instruction: 95% scored at the adequate level (Score 3 or higher) and a minimum of 26% scored at the effective level (Score 4 or higher) Professionalism: 95% scored at the adequate level (Score 3 or higher) and a minimum of 66% scored at the effective level (Score 4 or higher).
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assessment Action Plan

Update (Fall 2010): We are changing our key assessments for 2010-11 and beyond to reflect students' knowledge, learning, and practices as they work in their practicum/field experience in urban schools. In other words, we are aligning our key assessments with the program curriculum so that students can explicitly see the connections between the theory in methods courses and practices in field placements. The domains of our key assessments include the following:

- Content Knowledge
- Pedagogical Knowledge
- Clinical Practice at Endpoint
- Dispositions
- Professionalism

Measure (Key Assessment): Content Knowledge

Outcome/Objective: Content knowledge

Implementation Description: We want to begin this process with the 2010 cohort, therefore we will be seeking instruments for measuring this standard during the Fall 2009 and Spring 2010 terms.

Projected Completion Date: 05/2010

Responsible Person/Group: TEEMS English Education Faculty

Additional Resources: Support from Field Placement Office in MSIT and Associate Chair of MSIT, as well as Associate Dean for Academic Affairs

Community Action Plan

The STARS tool helped the TEEMS faculty to determine areas needing improvement; as a result, assessment opportunities are now embedded within our coursework that link communities and schools to student learning. In the future, we would like to keep this curriculum change unchanged.

Measure (Key Assessment): Content Knowledge GACE Scores

Outcome/Objective: Content knowledge

Implementation Description: We want to begin this process with the 2010 cohort, therefore we will be seeking instruments for measuring this standard during the Fall 2009 and Spring 2010 terms.

Projected Completion Date: 05/2010

**Mid-point teaching evaluation**
In order to raise scores on the two lowest levels of this assessment: classroom management and learning environments, we are devoting more attention to these topics in our first methodology course, EDCI 6600, offered in the summer semester. Presently, students create classroom management plans including designing an effective learning environment. We will include more classroom management strategies and practice scenarios. We will also invite classroom management experts, special education professors and practicing teachers, to visit our methodology classes to offer advice and practical solutions to the students during the other methodology courses. A classroom management module during the students’ practicum experience is being developed.

Academic Program Question 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

This year we have not made changes to our assessment process because we are working through a system that was initially implemented in 2010-2011. At this point, we are working our way through this process in order to better understand how we can use this data for serving our students well and developing our ideas about teaching.

Academic Program Question 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We present our discussion of our assessment results to improve our program in each of the three areas: 1) content knowledge; 2) professional and pedagogical knowledge, skills, and dispositions; and 3) student learning. 1. Content knowledge Based on data from students' passing rates on the GACE English exams and on their performance of content knowledge while being evaluated during student teaching, we find that our students are consistently knowledgeable about the content needed to teach English language arts. They perform at or above the expectations set for the cohort and the state. We can use this data to continue to implement our curriculum and to fine tune it to be sure that students continue to perform their knowledge of English language arts in terms of language, literature, reading, writing, speaking, viewing, and listening skills. Changes that we have implemented to the English MAT program include a streamlining of the portfolio project to focus on a well-crafted teaching philosophy to be accompanied by a host of artifacts that illustrate students' achievement, knowledge, and core principles established across the coursework required in the program. We introduced this change specifically because students requested a more focused effort on teaching philosophies and ways to connect their coursework. Students voiced these needs for change during our EDCI 6600, EDLA 6550, and EDLA 7550 course conversations and opportunities for writing and giving feedback. Since our students tend to score higher than the state average on the GACE exams for English language arts, we encourage them to work in small groups to foster collegial relationships that support each other in preparing for these exams. We made available through electronic chat and discussion forums, opportunities for students who had completed the exams to share their study materials and discuss their strategies for preparing for the exams. We also confer with students at least twice a year during our Professional Advisement Week, as well as prior to the start of the summer methods courses, to advise students on how to choose English literature and language courses to supplement and enhance their content knowledge in our field. 2. Professional and pedagogical knowledge, skills, and dispositions Based on data from students' teaching performances in their practicum and student teaching experiences, and in the domains of planning, clinical practice, and dispositions, we find that our students are consistently successful and knowledgeable in practicing their teaching and planning skills. The high ratings of our students support the efforts we put into our curriculum throughout the year, from the initial summer methods courses through to the spring student teaching experience in our year-long program. We can use this data to continue to implement our curriculum and to fine tune it to be sure that students consistently present their content knowledge and dispositions for teaching in their daily practices. Like the changes we made to the portfolio requirements for the program, we expanded the professional reading texts in the EDLA 6550 and 7550 courses to include more research-based literature on differentiation for a number of key populations that students expressed a need for further knowledge and skills. Specifically, we introduced texts and sessions in class to teach students about working with African American male youth, students with special educational needs, students who are English Language Learners, and gender differences—all of whom were discussed in light of teaching them literacy, literature, and language skills and processes. Based on student feedback from exit surveys at the end of the year, we find that our students are consistently successful and knowledgeable in making an impact on student learners. The high ratings of our students support the efforts we employ to prepare students to meet the needs of diverse learners, especially those learners located in urban schools. We can use this data to continue to implement our curriculum and to fine tune it to be sure that students consistently understand, plan for, and meet the needs of diverse student learners. To support the MAT students' learning and reflecting on their learning, we implemented a project in which they are required to present what they learned during the semester that they take the EDLA 6550 course. The project requires students to use multiple media, present their material to the class, thus using their knowledge and skills for media, language, and literacy use, as well as modelling for them a synthesis and summative assessment that can be used with adolescent youth in English language arts classes. This project encourages the graduate students to experience reflection on their own action and serves as a model that can be used in student teaching and later teaching experiences. The implementation of the Teacher Work Sample, in addition to supporting students' expressed needs for support in developing lesson and curriculum plans, also serves as a means for observing and analyzing student learning when the graduate student is in the teaching role. With careful observation of students,
attention to details in planning for student engagement with language, literature, and culture, our graduate students learn to address
issues of classroom management as well. Besides help with planning, classroom management is the singular topic that our students
say they need help with when they are in our methods courses, when they discuss their field experiences with mentors and
supervisors, and when they reflect on their student teaching experience at the end of the final semester.

ADMINISTRATIVE DEPT QUESTION 1:  Explain how your department used the results from the previous cycle’s
(2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle?
What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2:  What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your
department’s effectiveness?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3:  How will you use your findings from this year? What strategies for improvement will you use over the coming
year? What degree of improvement do you anticipate?
N/A

Georgia State University
Assessment Data by Section
2011-2012 English MA: Literature
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical
inquiry, creative endeavor, and professional training in areas of English language studies, global and multi-ethnic literary and cultural
studies, pedagogy, and secondary education. Our students will develop strong oral, written, and electronic communication skills as
they progress through our programs. (This mission statement is being revised and will be updated by October 2012.)

Goals
G 1: Assure Mastery in Content Knowledge
In addition to knowledge of major figures, genres, periods, movements, and critical approaches in American, British, and world
literatures, students in the M.A program in literary studies will be able to discuss these as a constellation of interconnected fields
rather than unrelated categories of information. For example, students will be able to discuss major authors' works in the context of
their historical periods and cultural movements.

G 2: Scholarly Engagement with Theoretical Frameworks
The department will strive to produce M.A. students in Literary Studies who demonstrate a scholarly engagement with critical
approaches, theoretical frameworks, and/or historical contexts in masters work, in particular in the thesis writing.

G 3: Foster Effective Communications
The department will strive to produce M.A. students in Literary Studies who can demonstrate effective written communication skills.

Student Learning Outcomes/Objectives

SLO 1: Content Knowledge (M: 1, 2)
In addition to knowledge of major figures, genres, periods, movements, and critical approaches in American, British, and world
literatures, students will be able to discuss these as a constellation of interconnected fields rather than unrelated categories of
information. For example, students will be able to discuss major authors' works in the context of their historical periods and cultural
movements.

SLO 2: Knowledge of Language (M: 1, 2)
Students will demonstrate an understanding of the history, structure, and social implications of language as a means of discourse;
进一步，他们将能够讨论这些可能性和限制性的问题。

SLO 3: Scholarly vocabulary (M: 1, 2)
Students will bring to their analysis of literary works an appropriate scholarly vocabulary that demonstrates an understanding of
concepts important to the study of literature. Examples might include critical terms such as postmodern, deconstruction, and semiotic
and technical terms drawn from formal study, such as Rimé Riche, ballad, and quarto.

SLO 4: Knowledge and application of theoretical approaches to reading literature (M: 1, 2)
Students will demonstrate knowledge of major theoretical approaches to reading literature and be able to apply them in their own
assessment and interpretation of texts.
### Measures, Targets, and Findings

#### M 1: Assessment of work in the Pro-Seminar (O: 1, 2, 3, 4, 5, 6, 7)

Since the spring of 2008, the English department has required M.A. students in literature to take the Pro-Seminar in the second semester of their program. This course is intended to teach students about the professional elements of literary studies and to prepare them to write the thesis that will serve as the culmination of their masters program. Accordingly, students are expected to complete a draft of their prospectus by the end of the course. Beginning in the spring of 2009, instructors of the literature Pro-Seminar were requested to assess student work in this course, using an assessment form with criteria that are aligned to the graduate learning outcomes (see attached assessment form). In previous years, students were instructed to take the Pro-Seminar during their second semester. Now, they are allowed to choose between their second semester and their third semester. Because of that, only a small number (4 students) took the Pro-Seminar in the spring of 2011, and we anticipate a large group will consequently be enrolled in the fall 2011 class or classes.

Source of Evidence: Academic direct measure of learning - other

#### Target for O1: Content Knowledge

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2011-2012 - Target: Met**

The fifteen students in this year’s pro-seminar classes averaged a 4.6 (out of 5) in this outcome related to knowledge of major figures, genres, periods, movements, and critical approaches, meaning that the target was met. This represents a slight decline from scores for this outcome from the previous assessment cycle (5.0).

#### Target for O2: Knowledge of Language

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2011-2012 - Target: Met**

The average score for the students in this year’s Pro-Seminar classes was a 4.5 (out of 5) for this outcome related to the understanding of the history, structure, and/or social implications of language. This score just met the target and matches the score earned in the previous assessment cycle.

#### Target for O3: Scholarly vocabulary

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2011-2012 - Target: Met**

The average score for the students in the Pro-Seminar classes this year was a 4.5 for this outcome related to the use of scholarly vocabulary. This just met the standard and represented a decrease over the score (5.0) for this outcome from previous assessment cycle.

#### Target for O4: Knowledge and application of theoretical approaches to reading literature

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2011-2012 - Target: Not Met**

The average for the students in the Pro-Seminar classes this year was a 4.0 for this outcome related to the knowledge and application of theoretical approaches to reading literature. This does not meet the target. It also represents the lowest score earned for this criterion in the four years of assessment results.

#### Target for O5: Skills of inquiry

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

**Findings 2011-2012 - Target: Met**

The average score for the students in this year’s Pro-Seminar classes was a 4.5 for this outcome related to the ability to formulate effective questions, which just meets the target and represents a decrease from last year’s score of a 5.0.

#### Target for O6: Effective Communications Skills

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.
The average of the students in the Pro-Seminar this year was a 4.1 for the ability to communicate effectively in written and spoken communications. This score does not meet the target, but it does mark a slight increase over last year’s score of 4.0.

**Target for O7: Researching Skills**

In the 2009-2010 assessment report, the department decided to continue with a target of 4.5 in all areas on the Pro-Seminar assessment form.

The average score for students in the Pro-Seminar classes this year for the criterion related to researching skills is a 4.2. This score does not meet the target but it does represent a slight increase over last year’s score of 4.0.

**M 2: M.A. Thesis in Literary Studies (O: 1, 2, 3, 4, 6, 7)**

The literature theses have been assessed since 2009-2010. During that first year, only 5 theses were assessed because the department did not yet have a fully working system in place. During 2010-2011, that problem was sorted out and 21 theses were assessed. According to the system, students who finish their thesis are assessed collectively by their thesis committee members who fill out a form (with a 5-point scale) that is aligned to the graduate learning outcomes (see attached assessment form). It their are disserting opinions about the scores, those different scores can be indicated on the assessment form. The committee chair is responsible for making sure that the assessment form is completed and turned into the assistant to the Graduate Director after the thesis work has been submitted. A student cannot be advanced for graduation if this assessment step has not been done.

**Source of Evidence:** Senior thesis or culminating major project

**Target for O1: Content Knowledge**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

The average score for the 11 theses assessed was a 4.50 for this learning outcome related to knowledge of figures, genres, periods, and movements. This score just meets the target, and it represents a slight increase over last year’s average score of 4.45.

**Target for O2: Knowledge of Language**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

The average for the 11 theses assessed this year was a 4.50 for this outcome related to knowledge of language, meaning that it just met the target. This score was also a slight decrease from last year’s average score of 4.55.

**Target for O3: Scholarly vocabulary**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

The average for the 11 theses assessed this year was a 4.50 for the use of scholarly vocabulary, which just meets the intended target. It also represents an increase over the 4.38 score of the previous assessment cycle.

**Target for O4: Knowledge and application of theoretical approaches to reading literature**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

The average for the 11 theses assessed this year was a 4.2 for the outcome related to critical approaches, theoretical frameworks, and cultural contexts, meaning it did not meet the target. This is the lowest score for all six outcomes. Similarly, in the 2010-2011 assessment, it was on the lower end of the results with a 4.35 score.

**Target for O6: Effective Communications Skills**

Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year’s results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

The average of the 11 theses assessed this year was a 4.5 for this outcome related to effective written communications. This just meets the target. It is also a decrease from the 2010-2011 score for this outcome which was a 4.9.

**Target for O7: Researching Skills**
Last year, the department decided to set a threshold of 4.5 out of 5.0 for all the criteria used in assessing the thesis. The data that is generated from this year's results will enable the Graduate Director to set more specific targets in future years, as the department comes to a fuller understanding of what the M.A. thesis is intended to demonstrate.

**Findings 2011-2012 - Target: Met**

The average score for the 11 theses assessed this year was a 4.7, which exceeds the target and represents a slight improvement over the 2010-2011 score which was a 4.69.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Create a document that explains the rankings on the MA thesis assessment

The Graduate Director will create a document to explain what the rankings on the MA in Literary Studies assessment form (excellent, good, fair, poor, and inadequate) mean in terms of the specific work of this concentration. This intention of this action step is that the explanation of the rankings can help in the norming process to better ensure accurate and useful results.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Implementation Description:** The Assessment Coordinator will work with the Graduate Director to create this document.
- **Projected Completion Date:** 12/2012
- **Responsible Person/Group:** Graduate Director
- **Budget Amount Requested:** $0.00 (no request)

#### Maintain the target of 4.5 out of 5 for criteria on thesis and Pro-seminar

The targets used for the criteria on the MA thesis and Pro-Seminar will be repeated in next year's assessment cycle.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Projected Completion Date:** 08/2011
- **Responsible Person/Group:** Assessment Coordinator

#### Revise the mission statement and goals

Faculty associated with the Literature M.A. program will revise the mission statement and goals so that they reflect the particular concern of the M.A. in this concentration.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Projected Completion Date:** 12/2012
- **Responsible Person/Group:** Director of the Graduate Program

#### Apply the assessment tool for the Pro-Seminar to the prospectus instead of the class

Since the Pro-Seminar class was initiated five years ago, the assessment measure has always been used to evaluate student work in the entire course. To gain a better assessment of the primary work of the Pro-Seminar—the draft of the prospectus of the thesis—the assessment form will be retooled to be directed towards the particulars of that work. Ideally, this will give a more direct measure of student success in the class.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** The Director of Graduate Studies will consult with the Graduate Studies Committee to revise the current form. Hereafter, instructors of the Pro-Seminar will use the form at the end of the semester to evaluate each student's thesis prospectus.
- **Projected Completion Date:** 11/2012
- **Responsible Person/Group:** the Director of Graduate Studies

#### Consider limiting the number of outcomes used to assess thesis work

In past years, the department has always used the full range of outcomes in the graduate assessment work of the M.A. theses. The department will now consider if it wants to limit the number of outcomes to be considered each year, perhaps on a rotating basis, as is done with the undergraduate assessment work.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** The Assessment Coordinator will discuss this issue with the Graduate Director
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** the Assessment Coordinator and Graduate Director

### Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process for this MA concentration. During the next year, a number of steps will be taken. The mission statement and goals will be reviewed to see if any revisions are needed. Also, the department will begin to discuss whether we should continue using the full range of outcomes in our assessment tools or limit the number of outcomes we consider each year (perhaps on a rotating basis). In addition, the department will create an explanation sheet that explains the possible
**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The results from the Pro-Seminar were mixed, with four of the criteria meeting their targets and three (in researching skills, effective communications, and theoretical/conceptual framework) falling just below their targets. The department has decided to retool this assessment so that it is applied to the draft of the prospectus instead rather than to the student work of the entire class. The purpose of this shift is to get a more direct evaluation of the prospectus writing since this is linked to the development of the thesis. The revised assessment form will be distributed to students at the beginning of the Pro-Seminar so that they understand the outcomes which will be used to evaluate their work. The form will also draw special attention to the learning outcome related to the application of theoretical knowledge since this is often an area of weakness in both the Pro-Seminar assessment data and the thesis assessment data. (For example, the results of the eleven theses that were completed this year indicate that all targets were met with the exception of the criterion related to theoretical/conceptual framework.)

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 English MA: Rhetoric/Composition**

*Assessment Data by Section*

**As of: 12/12/2016 04:41 PM EST**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

---

**Mission / Purpose**

The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, rhetoric and composition, and professional and technical writing. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs. (This mission statement is being revised and will be updated by October 2012.)

---

**Goals**

**G 1: Encourage a scholarly engagement with theoretical frameworks**

The department will strive to produce M.A. students who demonstrate a scholarly engagement with critical approaches, theoretical frameworks, and/or historical contexts in masters work, in particular in the thesis writing.

**G 2: Assure mastery in content knowledge**

The department strives to graduate MA students in this concentration who have a well-rounded knowledge in the content of Rhetoric and Composition studies as well as advanced knowledge in the content associated with their particular specialty.

**G 3: Effective Written Communications**

The department will strive to produce M.A. students who can demonstrate effective written communication skills.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Mastery of Rhetorical Practices (G: 3) (M: 1)**

Students will have mastery of typical genres of academic writing (e.g., research paper, research proposal, abstracts, presentations, book reviews, websites for teaching). Students focusing on Professional and Technical Writing will also have mastery of professional writing genres and electronic media (e.g., technical article, documentation, websites for multiple purposes).

**SLO 2: Knowledge of the History of Rhetoric (G: 2) (M: 1)**

Students will be familiar with the history of rhetoric from pre-classical Greece to the modern era, although students may focus more on one time frame and area of the discipline than another (emphasizing, for example, classical rhetorical history or the history of composition pedagogy or professional writing history).

**SLO 3: Knowledge of the Theories of Rhetoric (G: 1, 2) (M: 1)**

Students will have read the work of rhetorical theorists from a wide range of periods, covering a diverse set of perspectives. Theories of writing practices and pedagogy should be included in this work.

**SLO 4: Effective Written Communications (G: 1, 3) (M: 1)**

Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in journals and publications devoted to Rhetoric and Composition.

**SLO 5: Researching skills (G: 1, 2) (M: 1)**

M.A. students in Rhetoric and Composition will be able to isolate a fruitful question for in-depth investigation and to carry out research, using both traditional and non-traditional research methods.

---

**Measures, Targets, and Findings**

**M 1: M.A. Thesis in Rhetoric and Composition (O: 1, 2, 3, 4, 5)**
Starting in the fall of 2007, students who entered the M.A. Program were required to complete a thesis by the end of their program. While we had hoped to develop and begin using the thesis assessment tool by the spring of 2009, more time was needed to create a system for this assessment process that will guarantee that each thesis is evaluated in this manner. Starting in the spring of 2010, students who finish their thesis will be assessed by their thesis committee, using a form (with a 6-point scale) that is aligned to the graduate learning outcomes. The committee chair will be responsible for calling an assessment meeting after the thesis work has been submitted, and the assistant to the Graduate Director will be responsible for checking to see that the assessment forms are completed. A student will not be advanced for graduation if this assessment step has not been done.

Source of Evidence: Senior thesis or culminating major project

### Target for O1: Mastery of Rhetorical Practices

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2011-2012 - Target: Met**

Three M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to mastery of rhetorical practices (in particular the thesis genre) was a 5.0, meaning that it met the target.

### Target for O2: Knowledge of the History of Rhetoric

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2011-2012 - Target: Not Met**

Three M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to knowledge of the history of rhetoric was a 4.3, meaning that it did not met the target.

### Target for O3: Knowledge of the Theories of Rhetoric

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2011-2012 - Target: Met**

Three M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to knowledge of the theories of rhetoric was a 4.7, meaning that it met the target.

### Target for O4: Effective Written Communications

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2011-2012 - Target: Met**

Three M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to effective written communications was a 5.0, meaning that it met the target.

### Target for O5: Researching skills

In the 2009-2010 assessment plan, a target of 4.5 out of 5.0 was set for all learning outcomes assessed in the M.A. thesis in Rhetoric and Composition.

**Findings 2011-2012 - Target: Met**

Three M.A. theses in Rhetoric and Composition were defended this year. The average score for the outcome related to researching skills was a 5.0, meaning that it met the target.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Revise the mission and goals to suit the particulars of the Rhetoric and Composition M.A. program

Now that the graduate assessment has been broken down into the three graduate concentrations, the Rhetoric and Composition faculty will work to revise the mission and goals of their assessment report to more specifically match the particulars of their program.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 01/2011

#### Consider making English 8120 (Writing for Academic Publication) into this concentration’s Pro-Seminar class

The English 8120 class (Writing for Academic Publication) essentially functions as a pro-seminar for the Rhetoric and Composition M.A. students. The faculty members will consider making this class the Pro-Seminar for students in this concentration.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Rhetoric and Composition Faculty

#### Create an explanation sheet for the rankings on the MA Thesis

Faculty members in Rhetoric and Composition will create an explanation sheet for the five possible rankings on the MA thesis.

- **Established in Cycle:** 2010-2011
Consider limiting number of outcomes used in assessing thesis work
In past years, the department has always used the full range of outcomes in the graduate assessment work of the M.A. theses. The department will now consider if it wants to limit the number of outcomes to be considered each year, perhaps on a rotating basis, as is done with the undergraduate assessment work.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process for this MA concentration. During the next year, a number of steps will be taken. The mission statement and goals will be revised to include more specifics related to the study of rhetoric and composition. Also, the department will begin to discuss whether we should continue using the full range of outcomes in our assessment tools or limit the number of outcomes we consider each year (perhaps on a rotating basis). In addition, the department will create an explanation sheet that explains the possible rankings for the thesis work (similar to the document we use with the dissertation assessment).

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This year, three students completed their M.A. theses in this concentration. All targets for the M.A. thesis were met with the exception of knowledge of the history of rhetoric (it earned a 4.3 mean score while the target was a 4.5).
## Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: PhD dissertation (O: 1, 2, 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Graduating Ph.D. students in Creative Writing are assessed on the work of their dissertation. This assessment is facilitated by the Graduate Director at the student's dissertation defense, and the form is completed by faculty members on the student's committee. The dissertation assessment form, which uses a 6-point scale, rates how effectively the student work demonstrates the graduate learning outcomes. (See the attached assessment form for the Creative Writing dissertation.) In the summer, the Graduate Director meets with the Assessment Coordinator to analyze the resulting data in order to make suggestions for procedural and programmatic change. Those suggestions are brought to the Graduate Studies Committee in early fall for review, and an action plan is formulated and presented to the entire faculty at an early fall department meeting.</td>
</tr>
</tbody>
</table>

Source of Evidence: Senior thesis or culminating major project

### Target for O1: Content Knowledge

In the 2009-2010 assessment report, a 4.7 target out of 6.0 was set for this outcome related to content knowledge.

#### Findings 2011-2012 - Target: Met

The four Creative Writing dissertations defended this year scored a mean average of a 5.3 on the three criteria related to Content Knowledge: the knowledge of representative examples of writing by major figures in poetry or fiction, depending on the student's choice of genre; the knowledge of literary history of English or American poetry or fiction, depending upon the student's choice of genre; and the knowledge of form and theory of fiction or poetry, depending upon the students' choice of genre. This score surpassed the target but did not achieve the same average as the two previous assessment cycles (when the dissertations earned a 6.0 for these criteria in both years).

### Target for O2: Applying Literary Studies to Creative Writing

In the 2009-2010 assessment report, a target of 4.7 out of 6.0 was set for this outcome related to the application of literary studies to a student's creative writing.

#### Findings 2011-2012 - Target: Met

The three Creative Writing dissertations each scored a 5.0 for this learning outcome (as listed in the criterion that rates the dissertation's ability to draw upon the knowledge of composition and aesthetics in English studies to create meaningful literary works, deemed worthy of publication). This exceeds the target but represents a decrease from the score of 6.0 earned for this outcome in the two previous assessment cycles.

### Target for O3: Craftsmanship

In the 2009-2010 assessment report, a 4.7 target out of 6.0 was set for this outcome related to craftsmanship.

#### Findings 2011-2012 - Target: Met

The three Creative Writing dissertations scored an average of a 5.4 on the three criteria related to the learning outcome that addresses issues of craftsmanship: the ability to produce work that is authentic and engaging (with a score of 5.3); the ability to produce work that is grammatically sound and syntactically correct (with a score of 5.5); and the use of a variety of literary techniques (with a score of 5.3). This score exceeds the target but represents a decrease from the 6.0 averages earned in the two previous assessment cycles.

<table>
<thead>
<tr>
<th>M 2: PhD Exams (O: 1, 6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Creative Writing Ph.D. examinations are conducted in the fall and the spring each year. Each student writes two exams (one in a primary area of study and a second in a secondary area). The candidate works with a primary advisor to create a reading list for each exam. The exams serve to demonstrate detailed and thorough knowledge of all facets related to the candidate’s study and dissertation area. Each exam is read by three faculty members and is assessed on a scale of four possible grades: high pass, pass, low pass, fail. The readers provide written commentary that explains the assigned grades to the Director of Graduate Studies.</td>

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O1: Content Knowledge**

In the 2009-2010 assessment plan, a target was set for the Creative Writing PhD exams that 20% or fewer of the examinees would earn a low pass or a fail on their exams.

**Findings 2011-2012 - Target: Met**

Ten Creative Writing Ph.D. exams were taken in 2011-2012, and the percentage of low passes and failures was 20%, meaning that the target was just met. This was an improvement over the previous assessment cycle, where there was a 30% low pass/ failure rate. In addition, the high pass/pass rate this year of 20% which matches the rate from last year. This concentration's low pass/ failure rate continues to be higher than that of the other concentrations. Looking more closely at the exam results, the two primary poetry exams both earned a high pass; the two primary fiction exams earned a pass and a low pass; the four secondary poetry exams earned three passes and a low pass; and the two secondary fiction exams both earned passes. These results indicate that the poetry students fared better on their exams than the fiction students, as the low passes were earned on a primary fiction exam and a secondary poetry exam.

**Target for O6: Effective Communications**

In the 2009-2010 assessment plan, a target was set for the Creative Writing PhD exams that 20% or fewer of the examinees would earn a low pass of a fail on their exams.

**Findings 2011-2012 - Target: Met**

Ten Creative Writing Ph.D. exams were taken in 2011-2012, and the percentage of low passes and failures was 20%, meaning that the target was just met. This was an improvement over the previous assessment cycle, where there was a 30% low pass/ failure rate. In addition, the high pass/pass rate this year of 20% which matches the rate from last year. These results indicate that the poetry students fared better on their exams than the fiction students, as the low passes were earned on a primary fiction exam and a secondary poetry exam.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Revise the mission statement and the goals**

Faculty in the Creative Writing concentration will revise the mission statement and their goals on the assessment report. Presently, these items reflect the mission and goals for the whole of the PhD program. Now that we have broken up the assessment reporting in terms of concentration, Creative Writing can rewrite these items to more specifically match their program.

Provide fiction PhD students with examples of successful poetry exams

The Director of Creative Writing will ask the poetry faculty to keep examples of successful poetry secondary exams that can be used as models for students who are taking the exam.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: PhD Exams | Outcome/Objective: Content Knowledge

Projected Completion Date: 08/2011
Responsible Person/Group: Director of Creative Writing and poetry faculty

Consider changing the targets for the Creative Writing dissertations

Description: Because the dissertations in this concentration have received strong scores over the past three years since we began reporting on them (with scores ranging from 5.3-6.0), the department will consider whether the 4.7 target needs to be revised.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Consider limiting the outcomes used in assessing Creative Writing dissertations

In past years, the department has always used the full range of outcomes in the graduate assessment work. The department will now consider if it wants to limit the number of outcomes to be considered each year, perhaps on a rotating basis, as is done with the undergraduate assessment work.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process for this PhD concentration. During the next year, a number of steps will be taken. The mission statement and goals will be revised to be more specific to the work of Creative Writing. Also, the department will begin to discuss whether we should increase the target for the dissertation needs and whether we should continue using the full range of outcomes in our assessment tools or limit the number of outcomes we consider each year (perhaps on a rotating basis). Finally, the Director of Creative Writing will work with the Assessment Coordinator to create an explanation sheet for the rankings on the dissertation assessment form.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The Creative Writing dissertations fared very well this year. All the scores were in the range of 5.0 - 5.5, well about the 4.7 average that was set as the target. This year four students defended their dissertations, the largest pool in the past three years of assessment tracking, so it is all the more impressive that the scores were so high. The ten PhD exams that were taken by Creative Writing students just met the target of having a low pass/failure rate of 20%. This year, we distinguished between scores on primary exams as compared to secondary exams, and by poetry students and fiction students. The data reveals that on the primary exam, the poetry students did better, with two high passes, while the fiction students has a pass and a low pass. On the secondary exam, there was no clear advantage of one over the other as poetry had three passes and one low pass and fiction had two passes. Given that all the targets were met, the Creative Writing faculty are not intending to make any programmatic changes this year.
G 2: Encourage a scholarly engagement with critical approaches, theoretical frameworks, and/or historical contexts
The department strives to graduate PhD students in this concentration who are able to successfully apply critical approaches, theoretical frameworks, and/or historical contexts in the study of literary texts.

G 3: Foster effective written communications
The department strives to graduate students who have effective written communication skills that they can use successfully for any specific purpose and any particular audience.

Student Learning Outcomes/Objectives

SLO 1: Content Knowledge of Literary Studies (M: 1, 2)
This learning outcome for the English Ph.D. in Literary Studies is comparable to that for the M.A. in literary studies with crucial differences in terms of specificity. Generally speaking, the goal of the master’s program is broad-based knowledge of the aspects of literary study and an ability to evaluate a work of literature with an understanding of its various contents. Doctoral study aims for graduates to have greater mastery of content than masters level work.

SLO 2: Knowledge and Application of Literary Theory (M: 1, 2)
Students will demonstrate knowledge of major theoretical approaches to reading literature and will be able to apply this knowledge in their own assessment and interpretation of texts. This learning outcome for the English Ph.D. in literary studies is comparable to that for the M.A. in literary studies with crucial differences in terms of specificity. Doctoral study aims for graduates to demonstrate a higher degree of critical sophistication than master's level work.

SLO 3: Effective Communication Skills (M: 1, 2)
Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in literary studies.

SLO 4: Effective Researching Skills (M: 1)
Using and building upon the knowledge and skills acquired during master's level study, doctoral graduates in Literary Studies will be able to isolate a fruitful question for extended, in-depth investigation and to carry out focused, productive, and thorough research, using both traditional and non-traditional research methods.

Measures, Targets, and Findings

M 1: PhD dissertation (O: 1, 2, 3, 4)
Graduating Ph.D. students in literary studies are assessed on the work of their dissertation. This assessment is facilitated by the Graduate Director at the student’s dissertation defense, and the form is completed by faculty members on the student’s committee. The dissertation assessment form, which uses a 6-point scale, rates how effectively the student work demonstrates the graduate learning outcomes. (See the assessment form for the literature dissertation as well as the description of the ratings found in the document repository.) In the summer, the Graduate Director meets with the Assessment Coordinator to analyze the resulting data in order to make suggestions for procedural and programmatic change. Those suggestions are brought to the Graduate Studies Committee in early fall for review and an action plan is formulated and presented to the entire faculty at an early fall department meeting.

Source of Evidence: Senior thesis or culminating major project

Target for O1: Content Knowledge of Literary Studies
A target of 4.7 was set for this learning outcome related to content knowledge.

Findings 2011-2012 - Target: Met
Fifteen literature dissertations were completed in 2011-2012, and they received three scores related to content knowledge: the first concerning the knowledge of literary figures, genres, periods, and movements as relevant to the chosen topic of the dissertation (with an average score of 5.1), the second concerning the knowledge of appropriate scholarly vocabulary that demonstrates an understanding of critical concepts and technical concepts important to the study of literature (with an average score of 5.0), and the third with the knowledge of the history, structure, and/or social implications of language as a means of discourse/ system of representation (with an average score of 5.1). These averages for the three areas of content knowledge average out to a 5.07, and therefore the target was very successfully met. These scores also represent a decrease from 2010-2011 (where the average was 5.20) but an increase over the average in 2009-2010 (where the average was a 4.70).

Target for O2: Knowledge and Application of Literary Theory
In the 2009-2010 assessment report, a target of 4.5 (on a six-point scale) was set for this outcome (which is now listed on the literature dissertation assessment form as "the knowledge and application of critical approaches, theoretical frameworks, and/or historical contexts in the dissertation work"). This is the third of three years during which the department has set this outcome as a rolling target.

Findings 2011-2012 - Target: Met
The mean average for the knowledge and application of literature theory for the fifteen literature dissertations assessed this year was a 5.1. This average was well above the target and was in keeping with the average earned in the previous year.
Target for O3: Effective Communication Skills

A target of 4.7 out of 6.0 was set for this outcome related to effective communications skills.

Findings 2011-2012 - Target: Met

Fifteen literature dissertations were defended in 2011-2012, and the scores related to the two criteria used to evaluate effective communications skills on the dissertation were above the target. The two criteria are "the dissertation effectively communicates the argument and results of the research" (which received a 4.9 average) and "the oral defense demonstrates mastery of the topics researched and sound defense of the project" (which received a 5.2 average). The combined average of these two criteria related to effective communications was a 5.05, which again was considerably higher than the 4.7 target. The combined average did represent a decrease from the 2010-2011 average which was 5.5.

Target for O4: Effective Researching Skills

A target of 4.7 was set for this outcome related to effective research skills.

Findings 2011-2012 - Target: Met

The average score for this outcome on the fifteen literature dissertations defended in 2011-2012 was a 5.3. This score clearly met the target; it also represented a decrease from the average earned in the previous year of 5.71.

M 2: PhD exams (O: 1, 2, 3)

The Ph.D. examinations are conducted in the fall and the spring each year. Each student writes two exams (one in a primary area of study and a second in a secondary area). The candidate works with a primary advisor to create a reading list for each exam. The exams serve to demonstrate detailed and thorough knowledge of all facets related to the candidate’s study and dissertation area. Each exam is read by three faculty members and is assessed on a scale of four possible grades: high pass, pass, low pass, fail. The readers provide written commentary that explains the assigned grades to the Director of Graduate Studies.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Content Knowledge of Literary Studies

In the 2009-2010 assessment plan, the department decided to continue with a target for all Ph.D. exams which would allow for only 15% or fewer of the examinees to earn a low pass of a fail on their exams. This target was set to build upon the progress shown in last year’s results where only 14% of literature exams were given a score of a low pass or a failure.

Findings 2011-2012 - Target: Met

Exam results in 2011-2012 show that only 7.1% of the 14 exams earned a low pass or fail rate. This score is an improvement over the 2010-2011 scores where 9.4% of literature exams earned such scores. In addition, the pass/high pass rate for this year were 92.8%, which is the highest rate earned over the past four years, with the exception of 2008-2009 when the pass/high pass rate was 93%.

Target for O2: Knowledge and Application of Literary Theory

In the 2009-2010 assessment plan, the department decided to continue with a target for all Ph.D. exams which would allow for only 15% or fewer of the examinees to earn a low pass of a fail on their exams. This target was set to build upon the progress shown in last year’s results where only 14% of literature exams were given a score of a low pass or a failure.

Findings 2011-2012 - Target: Met

Exam results in 2011-2012 show that only 7.1% of the 14 exams earned a low pass or fail rate. This score is an improvement over the 2010-2011 scores where 9.4% of literature exams earned such scores. In addition, the pass/high pass rate for this year were 92.8%, which is the highest rate earned over the past four years, with the exception of 2008-2009 when the pass/high pass rate was 93%.

Target for O3: Effective Communication Skills

In the 2009-2010 assessment plan, the department decided to continue with a target for all Ph.D. exams which would allow for only 15% or fewer of the examinees to earn a low pass of a fail on their exams. This target was set to build upon the progress shown in last year’s results where only 14% of literature exams were given a score of a low pass or a failure.

Findings 2011-2012 - Target: Met

Exam results in 2011-2012 show that only 7.1% of the 14 exams earned a low pass or fail rate. This score is an improvement over the 2010-2011 scores where 9.4% of literature exams earned such scores. In addition, the pass/high pass rate for this year were 92.8%, which is the highest rate earned over the past four years, with the exception of 2008-2009 when the pass/high pass rate was 93%.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continue with targets set for previous assessment cycle

The previous targets for the outcomes that are assessed on the PhD exams and the dissertation will remain the same.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Create a prospectus writing seminar for PhD students

The graduate faculty will put together a prospectus writing seminar which will be required of all incoming PhD students in the Literature concentration. This course will be run as a workshop, where students will get feedback on one another's initial drafts of a
prospectus. This course will be taken in the last semester of coursework and before the PhD exams. It is not meant to result in a definitive prospectus; rather, it is intended to teach critical elements of doctoral writing and to emphasize the importance of establishing a clear and convincing critical, historical, or theoretical framework for the dissertation topic. The present plan is to pilot this course in the fall of 2013 and to offer it year after that.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective): Measure: PhD dissertation | Outcome/Objective: Knowledge and Application of Literary Theory
Implementation Description: The Director of the Graduate Program will meet with the Graduate Studies committee to work out the details for this course.
Projected Completion Date: 05/2012
Responsible Person/Group: The Director of the Graduate Program

Distinguish between primary and secondary PhD exams
The reporting on Literature PhD exams in the past has not distinguished between primary and secondary exams. Starting this year, the scores will be broken out based on these two categories so that the department can see if students fare differently on these two exams.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assistant to the Graduate Director

Consider changing the target for the PhD dissertations
Because the dissertations in this concentration have been very strong for the past two years (with scores ranging from 4.9-5.7), the department will consider whether the 4.7 target needs to be revised.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: the Assessment Coordinator will discuss this issue with the Graduate Director
Projected Completion Date: 05/2013
Responsible Person/Group: Assessment Coordinator and Graduate Director

Consider limiting the number of outcomes assessed each year
In past years, the department has always used the full range of outcomes in the graduate assessment work. The department will now consider if it wants to limit the number of outcomes to be considered each year in the assessment of PhD dissertations, perhaps on a rotating basis, as is done with the undergraduate assessment work.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: the Assessment Coordinator will discuss this with the Graduate Director
Projected Completion Date: 05/2013
Responsible Person/Group: Assessment Coordinator and Graduate Director

Review mission statement and goals to see if they need to be more particular to the concentration
The Director of Graduate Studies will review the mission statement and the goals of the Literature concentration to see if they need to be revised to add more specific information about this particular graduate concentration.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium
Implementation Description: The Director of Graduate Studies, at the request of the Assessment Coordinator, will review the mission statement and goals and decide if they need to be revised.
Projected Completion Date: 12/2012
Responsible Person/Group: Director of Graduate Studies

Set high pass target of 40% or greater for PhD exams
In addition to the 15% or lesser low pass/failure rate for the PhD exams, the department will also set a target of 40% or greater for the high pass rate.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: The Assessment Coordinator will report in the next assessment cycle on the high pass rate for the Literature exams, indicating whether or not they met the target of 40% or greater.
Projected Completion Date: 10/2012
Responsible Person/Group: the Assessment Coordinator

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process for this PhD concentration. During the next year, a number of steps will be taken. The mission statement and goals will be reviewed to see if any revisions are needed. Also, the department will begin to discuss
whether we should increase the target for the dissertation needs and whether we should continue using the full range of outcomes in our assessment tools or limit the number of outcomes we consider each year (perhaps on a rotating basis).

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data on the Literature dissertations completed in 2011-2012 was encouraging as the target of 4.7 for all criteria was met. The fact that the scores were strong across the board (mean scores of 4.9-5.3) was especially affirming considering that as many as fifteen dissertations were defended this year. Comments included by faculty on the dissertation assessment forms indicate that four of these dissertations are strong enough to be submitted for publication without too much revision work. The score of 5.1 on the criterion related to the theoretical/conceptual strength of the dissertation marks the second year in a row that dissertations have met the target in this area. (Previously, this was consistently the weakest area of dissertation work.) Even so, the department is now very committed to the idea of creating a doctoral writing workshop to provide more guidance on dissertation writing, especially in terms of the theoretical/conceptual aspects. While the idea of such a class has circulated around the department for some time, there is momentum now to create this seminar course and to pilot it in the fall of 2013. Besides helping students as they work towards a prospectus, the course is also intended to focus on writing style and to provide guidance about courses and exams—the other key elements of the PhD program. The Literature PhD exams were also successful. The low pass/fail rate for the fourteen exams that were taken was a 7.1%, far below the target of less than 15%. In addition, the high pass rate was 57.4% which marks a huge increase of 11% over the best high pass rate of any previous year. What might account for this improvement in exam scores is that the majority of students are opting to take the take-home exam as opposed to the on-site exam, and they seem to do better in this alternative setting. Two actions will be taken regarding the exams this year. Firstly, when the data is collected the primary exams will be distinguished from secondary exams. Secondly, the department is going to set a high-pass target of 40% or more to be used in addition to the low pass/fail target to determine student success on the exams.

---

**Georgia State University**
**Assessment Data by Section**
**2011-2012 English PhD in Rhetoric/Composition**
(As of: 12/12/2016 04:41 PM EST)

**Mission / Purpose**

The mission of the Department of English at Georgia State University is to promote the pursuit and development of knowledge, critical inquiry, creative endeavor, and professional training in areas of English language studies, rhetoric and composition, and professional and technical writing. Our students will develop strong oral, written, and electronic communication skills as they progress through our programs. (This mission statement is in the process of being revised and will be updated by October 2012.)

**Goals**

**G 1: Assure mastery in content knowledge**
The department strives to graduate PhD students in this concentration who have a well-rounded knowledge in the content of Rhetoric and Composition studies as well as advanced knowledge in the content associated with their particular specialty.

**G 2: Apply critical approaches, theoretical frameworks, and/or historical contexts**
The department strives to graduate PhD students in this concentration who are able to successfully apply critical approaches, theoretical frameworks, and/or historical contexts in their examination of topics related to rhetoric and composition.

**G 3: Foster effective written communications**
The department strives to graduate students who have effective written communication skills that they can use successfully for any specific purpose and any particular audience.

**Student Learning Outcomes/Objectives**

**SLO 1: Knowledge of the History of Rhetoric (M: 1, 2)**

Students will demonstrate knowledge of the history of rhetoric from pre-classical Greece to the modern era. Students will also specialize in one time frame and area of the discipline (emphasizing, for example, classical rhetorical history or the history of composition pedagogy or professional writing history).

**SLO 2: Knowledge of Rhetorical Practices (M: 2)**

Students will have mastery of typical genres of academic writing (e.g., research paper, research proposal, abstracts, presentations, book reviews, websites for teaching). Students focusing on Professional and Technical Writing will also have mastery of professional writing genres and electronic media (e.g., technical article, documentation, websites for multiple purposes).

**SLO 3: Knowledge of the Theories of Rhetoric (M: 1, 2)**

Students will have read the work of rhetorical theorists from a wide range of periods, covering a diverse set of perspectives. Theories of writing practices and pedagogy should be included in the dissertation.

**SLO 4: Effective Written Communications (M: 1, 2)**

Students will be able to communicate effectively in a wide range of written and spoken contexts and will be prepared for professional publication in journals and publications devoted to Rhetoric and Composition.
## SLO 5: Researching Skills (M: 1)

Using and building upon the knowledge and skills acquired during master's level study, doctoral graduates will be able to isolate a fruitful question for extended, in-depth investigation and to carry out focused, productive, and thorough research, using both traditional and non-traditional research methods.

### Measures, Targets, and Findings

#### M 1: PhD dissertation (O: 1, 3, 4, 5)
Graduating Ph.D. students in Rhetoric and Composition are assessed on the work of their dissertation. This assessment is facilitated by the Graduate Director at the student's dissertation defense, and the form is completed by faculty members on the student's committee. The dissertation assessment form, which uses a 6-point scale, rates how effectively the student work demonstrates the graduate learning outcomes. (See the attached assessment form for the Rhetoric and Composition dissertation.) In the summer, the Graduate Director meets with the Assessment Coordinator to analyze the resulting data in order to make suggestions for procedural and programmatic change. Those suggestions are brought to the Graduate Studies Committee in early fall for review, and an action plan is formulated and presented to the entire faculty at an early fall department meeting.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Knowledge of the History of Rhetoric**

In the 2009-2010 action plan, a target of 4.7 was set for all outcomes related to the Rhetoric and Composition dissertation.

**Findings 2011-2012 - Target: Met**

One Rhetoric and Composition PhD student defended his dissertation this year. The score he earned for this learning outcome related to the knowledge of the history of rhetoric was a 5.0 which met the target. This score was a decrease from the average earned in the previous cycle, a 5.8.

**Target for O3: Knowledge of the Theories of Rhetoric**

In the 2009-2010 action plan, a target of 4.7 was set for all outcomes related to the Rhetoric and Composition dissertation.

**Findings 2011-2012 - Target: Met**

One Rhetoric and Composition PhD student defended his dissertation this year. The score he earned for this learning outcome related to the knowledge of the theories of rhetoric was a 5.0 which met the target. This score was a decrease from the average earned in the previous cycle, a 5.8.

**Findings 2011-2012 - Target: Met**

One Rhetoric and Composition PhD student defended his dissertation this year. The score he earned for this learning outcome related to the knowledge of the theories of rhetoric was a 5.0 which met the target. This score was a decrease from the average earned in the previous cycle, a 5.8.

**Target for O4: Effective Written Communications**

In the 2009-2010 action plan, a target of 4.7 was set for all outcomes related to the Rhetoric and Composition dissertation.

**Findings 2011-2012 - Target: Not Met**

The one Rhetoric and Composition dissertation assessed this year received a score of 4.0 for the mastery of academic writing (in particular that of the dissertation genre) and 4.0 for the ability to effectively communicate an argument and results of research. The average of these two scores is a 4.0 for this learning outcome related to effective written communications. This does not met the target, and represents a decrease from last year's score, a 5.8.

**Target for O5: Researching Skills**

In the 2009-2010 action plan, a target of 4.7 was set for all outcomes related to the Rhetoric and Composition dissertation.

**Findings 2011-2012 - Target: Not Met**

The one Rhetoric and Composition PhD dissertation assessed this year earned a 5.0 for this learning outcome related to the researching skills which met the target. This score was a decrease from the average earned in the previous cycle, a 5.8.

### M 2: PhD Exams (O: 1, 2, 3, 4)

The Ph.D. examinations are conducted in the fall and the spring each year. Each student writes two exams (one in a primary area of study and a second in a secondary area). The candidate works with a primary advisor to create a reading list for each exam. The exams serve to demonstrate detailed and thorough knowledge of all facets related to the candidate's study and dissertation area. Each exam is read by three faculty members and is assessed on a scale of four possible grades: high pass, pass, low pass, fail. The readers provide written commentary that explains the assigned grades to the Director of Graduate Studies.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O1: Knowledge of the History of Rhetoric**

In the 2009-2010 assessment plan, a target for Rhetoric and Composition Ph.D. exams was set that 15% or fewer of the examinees would earn a low pass of a fail on their exams.

**Findings 2011-2012 - Target: Met**

Eleven Rhetoric and Composition Ph.D. exams were taken in 2011-2012, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This matches the rates of the last assessment cycle. On the other end of the scale, the high pass/ pass rate for Rhetoric and Composition students was 100%, which also matches the rate of the 2010-2011 exams.
Target for O2: Knowledge of Rhetorical Practices

In the 2009-2010 assessment plan, a target for Rhetoric and Composition Ph.D. exams was set that 15% or fewer of the examinees would earn a low pass of a fail on their exams.

Findings 2011-2012 - Target: Met

Eleven Rhetoric and Composition Ph.D. exams were taken in 2011-2012, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This matches the rates of the last assessment cycle. On the other end of the scale, the high pass/ pass rate for Rhetoric and Composition students was 100%, which also matches the rate of the 2010-2011 exams.

Target for O3: Knowledge of the Theories of Rhetoric

In the 2009-2010 assessment plan, a target for Rhetoric and Composition Ph.D. exams was set that 15% or fewer of the examinees would earn a low pass of a fail on their exams.

Findings 2011-2012 - Target: Met

Eleven Rhetoric and Composition Ph.D. exams were taken in 2011-2012, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This matches the rates of the last assessment cycle. On the other end of the scale, the high pass/ pass rate for Rhetoric and Composition students was 100%, which also matches the rate of the 2010-2011 exams.

Target for O4: Effective Written Communications

In the 2009-2010 assessment plan, a target for Rhetoric and Composition Ph.D. exams was set that 15% or fewer of the examinees would earn a low pass of a fail on their exams.

Findings 2011-2012 - Target: Met

Eleven Rhetoric and Composition Ph.D. exams were taken in 2011-2012, and the percentage of low passes and failures was 0%, meaning that the target was exceeded. This matches the rates of the last assessment cycle. On the other end of the scale, the high pass/ pass rate for Rhetoric and Composition students was 100%, which also matches the rate of the 2010-2011 exams.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Create a document that explains the rankings of the dissertation assessment form

Faculty in the Rhetoric and Composition Concentration will discuss what the various rankings on the dissertation assessment form mean in terms of student achievement. The faculty in that concentration will then create a document that explains each ranking, and this form will be attached to the Assessment form that is completed at each dissertation defense. The intention of this document is to help with the norming of the assessment.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Rhetoric and Composition faculty

Faculty in Rhetoric and Composition will revise the mission and goals

By spring of 2011, faculty in the Rhetoric and Composition concentration will revise the mission statement and their goals on the assessment report. Presently, these items reflect the mission and goals for the whole of the PhD program. Now that we have broken up the assessment reporting in terms of concentration, this concentration can rewrite these items to more specifically match their program.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: faculty in Rhetoric and Composition

Revise the dissertation assessment form so that it offers 6 possible rankings

The Rhetoric and Composition PhD program has previously used an assessment form with only five possible rankings. To make this form comparable to the Literary Studies form, it will be changed to six points to allow for the "outstanding" category.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium
Projected Completion Date: 08/2011
Responsible Person/Group: Assessment Coordinator

Consider limiting the number of outcomes for the assessment of Rhetoric and Composition dissertations

In past years, the department has always used the full range of outcomes in the work of assessing the dissertations for this concentration. The department will now consider if it wants to limit the number of outcomes to be considered each year, perhaps on a rotating basis, as is done with the undergraduate assessment work.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: The Assessment Coordinator will discuss this issue with the Rhetoric and Composition faculty member assigned to assessment work.
Projected Completion Date: 05/2013
Continue tracking dissertation results
This year’s dissertation results included two scores that did not meet the target (regarding criteria related to effective written communications and graduate level research). But since this was based on one dissertation alone, the department will continue to monitor dissertation results next year rather than making particular action plans for these areas at this time. This is based on the assumption that the low scores had more to do with the individual student than with the success of the program.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Implementation Description: The Rhetoric and Composition faculty will give special consideration the dissertation results when provided with the assessment data by the Assessment Coordinator at the end of the spring semester.
Projected Completion Date: 06/2013
Responsible Person/Group: the Rhetoric and Composition faculty

Distinguish between primary and secondary exams
The reporting on Rhetoric and Composition PhD exams in the past has not distinguished between primary and secondary exams. Starting this year, the scores will be broken out based on these two categories so that the department can see if students fare differently on these two exams.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: The assistant to the Graduate Director will indicate whether each exam is a primary or secondary exam in her reporting to the Assessment Coordinator.
Projected Completion Date: 10/2012
Responsible Person/Group: the Assessment Coordinator

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process for this PhD concentration. During the next year, a number of steps will be taken. The mission statement and goals will be revisions to include specifics related to Rhetoric and Composition. Also, the department will begin to discuss whether we should continue using the full range of outcomes in our assessment of the Rhetoric and Composition dissertations or limit the number of outcomes we consider each year (perhaps on a rotating basis).

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This year, Rhetoric and Composition students took eleven PhD exams and performed extremely well on them. The low pass/failure rate was 0% and the high pass rate was 72.7%, the best score in four years of dissertation assessment tracking. On the other hand, there was only one dissertation completed this year, and two out of the six criteria received scores that fell below the targets set for them. Because this was based on a single student, the department does not want to make programmatic changes at this time but rather will continue to monitor the dissertation results next year.
O/O 1: Seeing the big picture (G: 1) (M: 1, 2, 3)
The Executive Doctorate in Business will advance the knowledge and expertise required to identify, understand, and successfully tackle the interdisciplinary, big picture issues that characterize global business management today.

O/O 2: Honing the skills (M: 1, 2, 3)
The Executive Doctorate in Business will develop in the student the skills in formal social inquiry required to define and address complex issues and to disseminate knowledge related to their profession in a variety of professional and public outlets “to influence professional activity and public policy.”

O/O 3: Giving the global perspective (M: 1, 2, 3)
The Executive Doctorate in Business will give an interdisciplinary, globally oriented perspective that is unavailable in traditional advanced degree programs.

Measures, Targets, and Findings

M 1: Performance in coursework (O: 1, 2, 3)
The program will have six content courses to provide students with knowledge about global business leadership and five courses on research practices, design and analysis to equip the students with the understanding required to undertake formal research. Students are expected to maintain a 3.0 average in coursework. Students must earn a C or better in all courses. Students who do not meet these requirements or who are struggling to meet them are counseled out of the program.
Source of Evidence: Performance (recital, exhibit, science project)

M 2: Group projects (O: 1, 2, 3)
During the second and third semesters, students participate in research projects in groups of two to three people, under the supervision of a senior researcher. Each project will address a contemporary business issue and be conducted with the objective of publishing the results.
Source of Evidence: Senior thesis or culminating major project

M 3: Independent research (O: 1, 2, 3)
During the fourth, fifth and sixth semesters, each student engages in an independent research project under the supervision of a senior researcher. This project addresses a business issue affecting the student's firm. Each student will produce and defend a doctoral thesis with the expectation of publishing it.
Source of Evidence: Senior thesis or culminating major project

Georgia State University
Assessment Data by Section
2011-2012 Exercise Science BS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Department of Kinesiology and Health in accord with the College of Education and the other colleges and departments of the university seeks an ever increasing degree of excellence in a wide variety of programs. The Department’s mission includes instruction, research and scholarly activity, and community service in the areas of exercise science, sports administration, sports medicine, health and physical education, and recreation. The department provides professional preparation and continuing education in each of these fields, generates and communicates knowledge, and serves the community with particular emphasis on the urban setting of which it is a part. The Department recognizes the necessity of cross cultural competence and actively supports international development activities in research, teaching and service. Although the department is diverse in the disciplines it embraces, the members of the faculty are united in their interdisciplinary commitment to the highest quality in all of these pursuits.

Goals

G 1: Problem Solving
Exercise science students will become better problem-solvers.

G 2: Critical Thinking
Exercise science students will demonstrate clearer critical-thinking skills.

G 3: Content Knowledge
Exercise science students will gain broad knowledge of the discipline.

G 4: Preparation for relevant positions
Students will be prepared for positions in the discipline including corporate, community, commercial, and clinical centers.

Student Learning Outcomes/Objectives
**SLO 1: Safety, Injury Prevention, Emergency Procedures (G: 1, 2, 3, 4) (M: 1, 2, 3, 4)**

1. Students will be able to identify, describe and demonstrate proper safety techniques, injury prevention, and emergency procedures for those who engage in physical activity and exercise programs.

**Institutional Priority Associations**
2 Student promotion and progression

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 2: Program Administration (G: 1, 2, 3, 4) (M: 5, 6)**

1. Students will be able to identify the components of effective exercise program administration including quality assurance and outcome assessment procedures.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2 Student promotion and progression

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 3: Case Study (G: 1, 2, 3, 4) (M: 7, 8, 9)**

Students will be able to identify critical information from a health history/case study and use this information to determine risk classification, proper exercise test selection and testing supervision.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2 Student promotion and progression

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

**SLO 4: Exercise Physiology and Related Exercise Science (G: 1, 2, 3, 4) (M: 10, 11, 12, 13)**

Students will be able to identify, discuss, and apply the concepts of anatomy, physiology, exercise physiology, biomechanics as they apply to the proper conduct of physical activity and exercise programs.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
1 Student retention
2 Student promotion and progression

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
SLO 5: Pathophysiology and Risk Factors (G: 1, 2, 3, 4) (M: 14, 15, 16, 17)

1. Students will be able to identify and discuss the risk factors that underlie the major chronic diseases.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 6: Health Appraisal, Fitness and Clinical Exercise Testing (G: 1, 2, 3, 4) (M: 18, 19, 20, 21, 22, 23, 24, 25)

1. Students will be able to properly assess the current fitness levels of apparently healthy individuals as well as those who have controlled metabolic, pulmonary, or cardiovascular disease.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

1 Student retention

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 7: ECG and Diagnostic Techniques (G: 1, 2, 3, 4) (M: 26, 27, 28)

1. Students will be able to identify and discuss normal and abnormal cardiac rhythms and other ECG abnormalities that may present at rest and/or during exercise.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 8: Patient Management and Medications (G: 1, 2, 3, 4) (M: 29, 30)
Students will be able to identify and discuss the effects major cardiovascular, pulmonary, and metabolic medications and how these are used to manage patients with these diseases.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Institutional Priority Associations**

2 Student promotion and progression

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 9: Exercise Prescription and Programming (G: 1, 2, 3, 4) (M: 31, 32, 33, 34)**

Students will be able to use assessment data to design scientifically sound exercise programs for apparently healthy individuals as well as for those with controlled cardiovascular, pulmonary, or metabolic disease.

**General Education/Core Curriculum Associations**

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2 Student promotion and progression

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 10: Nutrition and Weight Management (G: 1, 2, 3, 4) (M: 35, 36)**

1. Students will be able to identify and discuss basic nutrition and weight management concepts as they apply to those who will engage in exercise programs.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 11: Human Behavior and Counseling (G: 1, 2, 3, 4) (M: 37, 38)**

1. Students will be able to identify and discuss the application of basic human behavior and counseling strategies as they apply to physical activity and exercise programs.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

Details of Action Plans for This Cycle (by Established cycle, then alpha)

ACSM Examination Procedures
Students will begin taking the required ACSM examination during the Fall of 2009. Meetings will be held with all students registered for KH 4750 Practicum in Exercise Science to inform students of the examination requirements and to conduct a review session. Practice examinations have been posted on ULearn that allow students to check their readiness for the examination.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 09/2009
Responsible Person/Group: Jeff Rupp, Program Coordinator Other exercise science faculty
Budget Amount Requested: $0.00 (no request)

Implementation of new Objectives
During the past academic year (2010-2011) faculty in the exercise science program identified and adopted all new program objectives for the B.S. in Exercise Science program. These new objectives better reflect the knowledge skills and abilities that students must exhibit in order to successfully pass the American College of Sports Medicine professional certification program. Because this was an extensive revision of the current objectives, the process was very time consuming and performance data was not collected during this time period.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: During the 2011-2012 academic year faculty will be determining achievement targets and measures as well as collecting performance data on each objective. This data will be compiled and reported during the next evaluation cycle.
Projected Completion Date: 04/2012
Responsible Person/Group: KH Exercise Science faculty. Dr. Andy Doyle, program coordinator.

Georgia State University
Assessment Data by Section
2011-2012 Exercise Science MS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
Mission / Purpose

The MS degree program in Exercise Science seeks to contribute to the KH Department's mission, which seeks to discover new knowledge and advance the understanding of the role of physical activity in attaining optimal health and well-being, educate members of society and prepare future professionals, and promote healthy lifestyles through life-long activity and learning. This mission includes research and scholarly activity, instruction, and community service in the areas of exercise science, sports administration, sports medicine, and health and physical education. The M.S. program in Exercise Science provides academic preparation and continuing education in exercise science while its faculty generate and communicate knowledge and serve the community with particular emphasis on the urban setting of which it is a part. The Department recognizes the necessity of cross cultural competence and actively supports international development activities in research, teaching and service. Although the department is diverse in the disciplines it embraces, the members of the faculty are united in their interdisciplinary commitment to the highest quality in all of these pursuits.

Goals

G 1: Knowledge
Students will gain knowledge of Exercise Science.

G 2: Skills
Students will gain skills necessary to be successful in their chosen Exercise Science field.

Outcomes/Objectives

O/O 1: Demonstrates content knowledge in Exercise Science (G: 1) (M: 1, 5, 6)
Students should have a basic understanding of the scientific principles of exercise physiology and related exercise science, including pathophysiology and risk factors and exercise prescription and programming.

Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities content matter areas 1, 2, and 7. In addition, Program is accredited by the Commission on Accreditation of Allied Health Education Programs.

O/O 2: Apply knowledge to practical situations (G: 1, 2) (M: 2, 5)
Students should demonstrate practical skills related to the knowledge base of the program, including health appraisal, fitness and clinical exercise testing, electrocardiography, and diagnostic techniques.

Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities content matter areas 3 and 4. In addition, Program is accredited by the Commission on Accreditation of Allied Health Education Programs.

O/O 3: Demonstrates knowledge of exercise testing (G: 1, 2) (M: 3, 5)
Students should demonstrate knowledge of basic equipment, facility requirements, absolute and relative contraindications, procedures, and protocols for the exercise test.

Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities Learning Outcomes 4.6.1.1, 4.6.1.7, and 4.6.2. In addition, Program is accredited by the Commission on Accreditation of Allied Health Education Programs.

O/O 4: Understands research and human subjects issues (G: 1) (M: 4, 5)
Students should understand and interpret research in exercise science and should understand issues associated with clinical testing and research involving human subjects, including informed consent.

Relevant Associations: Accreditation Standards: American College of Sports Medicine Knowledge, Skills, and Abilities Learning Outcomes 4.6.1.6, 4.6.2.1, 4.6.2.8, 2.6.0.4, and 2.6.0.5. In addition, Program is accredited by the Commission on Accreditation of Allied Health Education Programs.

Measures, Targets, and Findings

M 1: Basic Content Knowledge examinations and quizzes (O: 1)
Written examinations and quizzes in KH courses 6280, 7500, 7510, 7550, 7620, 8270, and 8390.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Demonstrates content knowledge in Exercise Science
75% scoring at or above 80% on exam

Findings 2011-2012 - Target: Met
Target achievement was met. Students demonstrated success in this measure, with 100% of students scoring at or above 80% on exams/quizzes in the following classes: KH 6280, KH 7500, KH 7510, KH 7550, KH 7630, and KH 8870.

M 2: Practical Exams (O: 2)
Oral arrhythmia examination and laboratory exams

Source of Evidence: Performance (recital, exhibit, science project)

Target for O2: Apply knowledge to practical situations
90% of students will demonstrate a proficient level of knowledge and understanding.

Findings 2011-2012 - Target: Met
100% of students demonstrated proficiency on this measure based on the following courses: KH 7550 and KH 7630.
### M 3: GXT practical exam (O: 3)
Practical exam assessing students’ ability to administer graded exercise tests to various populations
Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Demonstrates knowledge of exercise testing**
90% of students will demonstrate proficiency.

**Findings 2011-2012 - Target: Met**
100% of the students demonstrated proficiency in this measure based on results from the following courses: KH 7550.

### M 4: Case Studies and Labs (O: 4)
Laboratory assignments associated with instrumentation and testing and written Case Studies
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Understands research and human subjects issues**
90% of the students will demonstrate a proficient level of knowledge and understanding

**Findings 2011-2012 - Target: Met**
100% of the students demonstrated success in this measure in the following courses: KH 6280 and KH 7550.

### M 5: ACSM EXAM (O: 1, 2, 3, 4)
American College of Sports Medicine Standardized Test: Health Fitness Specialist or Clinical Exercise Specialist
Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Demonstrates content knowledge in Exercise Science**
80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2011-2012 - Target: Partially Met**
67% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam

**Target for O2: Apply knowledge to practical situations**
80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2011-2012 - Target: Partially Met**
67% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam

**Target for O3: Demonstrates knowledge of exercise testing**
80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2011-2012 - Target: Partially Met**
67% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam

**Target for O4: Understands research and human subjects issues**
80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) national standardized exam

**Findings 2011-2012 - Target: Partially Met**
67% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam

### M 6: ACSM Exam (O: 1)
80% of students will pass the ACSM HFS or CES exam.
Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Demonstrates content knowledge in Exercise Science**
80% of students will pass the American College of Sports Medicine Health Fitness Specialist (HFS) or Clinical Exercise Specialist (CES) exam.

**Findings 2011-2012 - Target: Partially Met**
67% of our students passed the American College of Sports Medicine Health Fitness Specialist Exam

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

Monitor and maintain current strengths
We will continue to monitor future achievement in order to maintain standards due to the finding that all achievement levels were met.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- **Measure:** Basic Content Knowledge examinations and quizzes | **Outcome/Objective:** Demonstrates content knowledge in Exercise Science
- **Measure:** Case Studies and Labs | **Outcome/Objective:** Understands research and human subjects issues
- **Measure:** GXT practical exam | **Outcome/Objective:** Demonstrates knowledge of exercise testing
- **Measure:** Practical Exams | **Outcome/Objective:** Apply knowledge to practical situations

Implementation Description: 2009-2010
Projected Completion Date: 12/2011
Responsible Person/Group: Exercise Science Faculty

Review and/or Revise Outcomes/Objectives

Review and/or revi***e outcomes/objectives to insure they best reflect outcome requirements associated with the Commission on Accreditation of Allied Health Education Programs and/or industry best practice standards

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- **Measure:** Basic Content Knowledge examinations and quizzes | **Outcome/Objective:** Demonstrates content knowledge in Exercise Science
- **Measure:** Case Studies and Labs | **Outcome/Objective:** Understands research and human subjects issues
- **Measure:** GXT practical exam | **Outcome/Objective:** Demonstrates knowledge of exercise testing
- **Measure:** Practical Exams | **Outcome/Objective:** Apply knowledge to practical situations

Implementation Description: Exercise Science faculty will review outcomes/objectives during the 2011-2012 period
Projected Completion Date: 12/2011
Responsible Person/Group: Exercise Science Faculty

Compare ACSM exam content with course content

Compare ACSM exam content with course content and add deficient material to appropriate courses.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Implementation Description: Exercise Science Faculty meeting
Projected Completion Date: 12/2011
Responsible Person/Group: Exercise Science faculty

Compare ACSM exam content with course content

Compare ACSM exam content with course content and add deficient material to appropriate courses.

Relationships (Measure | Outcome/Objective):
- **Measure:** ACSM EXAM | **Outcome/Objective:** Demonstrates content knowledge in Exercise Science

Implementation Description: Exercise Science Faculty meeting
Projected Completion Date: 12/2011
Responsible Person/Group: Exercise Science Faculty

Additional final exam options

Given the diverse nature of the students in the M.S. Exercise Science Program, we will allow students to take national level certifying exams from agencies other than American College of Sports Medicine. For example, a growing interest in Exercise Science field is the development of strength and conditioning coaches at the middle school, high school, college, and professional levels. Therefore, our program will allow students to take the Certified Strength and Conditioning Specialist exam from the National Strength and Conditioning Association.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Students will be allowed to take CSCS exam to satisfy the M.S. Exercise Science program requirement.
Responsible Person/Group: KH faculty
Additional Resources: none

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No significant changes were made to the assessment plan last year. Students have met or exceeded nearly all achievement goals. However, students achieved borderline results on the requirement of 80% pass rate on the American College of Sports Medicine (ACSM) certifying exams. Several factors may contribute to this borderline result. First, passing the exam is not a requirement to obtain the degree or to work in the field. Therefore, individual differences in students' motivation for studying and the passing exam may contribute the current pass rate of approximately 67%. Second, some students have already taken ACSM certifying exams and are forced to take ACSM exams that may not be well suited for their career aspirations. Third, students have expressed the desire to take certifying exams that are more appropriate to their career aspirations regardless of whether they have taken an ACSM exam already. Based on these factors, the faculty have decided to allow students more options in satisfying the program requirement of a national certifying exam, e.g., Certified Strength and Conditioning Specialist from the National Strength and Conditioning Association.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Borderline pass rates on American College of Sports Medicine (ACSM) exams have prompted the faculty to allow for greater options in the national certifying exam requirement of the M.S. program (Fitness and Health Promotion concentration). The reasons for this achievement result has already been discussed in this report. In addition to allowing more national certifying exam options to suit career goals of the students, the faculty will meet to determine whether curriculum proposals will be developed to address specific career paths (e.g., adding/refining concentrations focusing on cardiac rehabilitation, corporate wellness, strength and conditioning, gerontology) within the Exercise Science field.

Georgia State University
Assessment Data by Section
2011-2012 Film & Video BA
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The film program at Georgia State multiple professional, creative and research traditions, all of which are focused on student development beyond the academic unit. The program promotes a broad appreciation of both artistic, creative endeavors and intellectual, critical traditions in the study of film and media. It is the program's belief that a graduate's success will largely be determined by a developed sense of critical thinking, aesthetic contemplation, and the intellectual cultivation. Our program seeks to enhance the Department of Communication's mission of participation in cutting edge scholarly and artistic programs and collaborating with and enhancing the local, state, regional, national and global communities related to communication.

Goals
G 1: understand and interpret
Students will be able to understand and interpret ideas presented in media involving moving images.

G 2: identify structures
Students will be able to identify narrative structures in stories using moving images.

G 3: fundamental concepts
Students will understand fundamental visual production and post-production concepts.

G 4: spectator/textual pleasure
Students will be able to recognize a relationship between spectatorship and textual pleasure in media involving moving images.

Student Learning Outcomes/Objectives
SLO 1: understand and interpret (G: 1) (M: 1)
Understand and interpret ideas presented in media and can deploy such understanding to formulate unique ideas.

SLO 2: narrative structures (G: 2) (M: 2)
Students will be able to identify and discuss various narrative structures in media using moving images employed for story delivery.
### SLO 3: prod/post-prod concepts (G: 3) (M: 3)
Students will understand the fundamental concepts of mise-en-scene, editing and cinematography relating to the generation of meaning.

### SLO 4: spectator/textual pleasure (G: 4) (M: 4)
Students will be able to recognize and articulate a relationship between spectatorship and textual pleasure.

### Measures, Targets, and Findings

#### M 1: writing assignment (O: 1)
Students in the senior capstone courses, Film 4750 and Film 4910, will write analytical papers and will be assessed using the following rubric:

1. Can understand basic filmic ideas expressed by others.
2. Can fully understand, comment on, and discuss the ideas and theories of others.
3. Has the ability not only to understand and interpret the ideas of others but to use that as the groundwork to begin establishing unique ideas.
4. Can fully establish, develop, and communicate logical, coherent, and engaging ideas on specific topics.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: understand and interpret**
70% of students will score 3 or above on the writing rubric.

#### M 2: descriptive writing assignment (O: 2)
Students in the senior capstone courses will write a paper that identifies and discusses key narrative features of visual media, and it will be assessed with the following rubric:

1. Has minimal to basic understanding of narrative structures.
2. Can identify various narrative structures.
3. Is able to identify, understand, and discuss various narrative structures as well as the complications within.
4. Has a full understanding of narrative structure, as well as how to interpret, identify, and dissect it and discuss its meanings and implications.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: narrative structures**
70% of the students will score a 3 or above on the rubric.

#### M 3: mise-en-scene (O: 3)
Students in the capstone courses, Film 4750 and Film 4910, will identify in a written assignment mise-en-scene and the consequences that it has in media using moving images.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: prod/post-prod concepts**
70% of students will score 3 or above on the written assignment about mise-en-scene using the following rubric:

1. Has a basic understanding of mise-en-scene and its implications.
2. Can have limited discussions about mise-en-scene.
3. Understands the broad concepts of mise-en-scene and can comprehensively discuss its ideas and theories.
4. Fully grasps the idea of mise-en-scene and can discuss the placement of images on screen and well as its implications that relates to and supports the story and characters.

#### M 4: spectator/textual relationship (O: 4)
Students in the senior capstone courses, Film 4750 and Film 4910, will be able to write a paper describing the relationship between spectatorship and textual pleasure involving media using moving images.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: spectator/textual pleasure**
70% of the student papers about the relationship between spectatorship and textual pleasure will score at least 3 or above on the following rubric:

1. Has an introductory sense of how cinematic pleasure occurs.
2. Has a basic understanding of the mechanisms of spectator positioning and identification.
3. Articulates the basic theoretical underpinnings of spectatorship.
4. Discusses complications in identification (art cinema, multiple identifications, etc.)

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**curriculum revision**
It is anticipated that a significant revision of the Film/Video curriculum will be approved for implementation in the Fall 2011. The new curriculum will provide an opportunity for the faculty to articulate in more precise language the desired learning outcomes of the new curriculum. Greater participation by the faculty will facilitate the adoption of the goals, learning outcomes and other details of the assessment process, especially in regard to collecting data.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** meetings to discuss the revised curriculum and its assessment
- **Projected Completion Date:** 11/2010
- **Responsible Person/Group:** Film/Video faculty
- **Additional Resources:** none
- **Budget Amount Requested:** $0.00 (no request)

### Fundamental Concepts
Determine system by which students' understanding of the fundamental concepts of mise-en-scene, editing, and cinematography relating to the generation of meaning can be measured.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Implementation Description: Faculty need to find ways that a conversation about media aesthetics can be linked to other program discussions about other learning outcomes.
- Projected Completion Date: 10/2010
- Responsible Person/Group: Film/Video faculty
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

**Improve student performance**

Only one of the goals/learning outcomes, production/post-production, met its assessment target. The faculty should discuss how the instruction of mise-en-scene and fundamental media aesthetics can be used to teach students about spectatorship, textual pleasure, narrative structures, and interpreting ideas and meaning from moving images. A few questions to be considered for the new curriculum: - Are class discussions preparing students for the writing assignments and are the goals of the assignments clearly detailed in class? - Do class discussions emphasize aspects of media that are not associated with curricular goals, e.g. arguments within moving image media, developing meaning through moving images, etc. - Can instructors be encouraged to foster a better class conversation about the generation of spectatorial pleasure? A challenging aspect of media culture is the ways in which it discourages introspection or reflexivity in its audience.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Implementation Description: Faculty meetings to discuss the new curriculum and its assessment.
- Projected Completion Date: 11/2010
- Responsible Person/Group: Film/video faculty
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

**Narrative Structure Assessment**

Develop system to determine if students can identify and discuss various narrative structures media employ for story delivery.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Implementation Description: Conduct program-wide discussion of differences between story and narrative, a challenging differentiation given current media ability to paint over such distinctions.
- Projected Completion Date: 10/2010
- Responsible Person/Group: Film/Video faculty
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

**Spectatorial Pleasure**

How to create system to assess students' understanding of the generation of spectatorial pleasure. Recognize and articulate a relationship between spectatorship and textual pleasure.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Implementation Description: A challenging aspect of media culture is the ways in which it discourages introspection or reflexivity in its audience. Film/Video faculty will examine ways to assess students' understanding.
- Projected Completion Date: 10/2010
- Responsible Person/Group: Film/Video faculty
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

**Student Understanding Measures**

Establish a system to measure students' understanding and interpretation of ideas presented in media and if they can deploy such understanding to formulate unique ideas.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Implementation Description: Faculty will meet to examine these results and then assess our target and specific means of achieving goal. In class, do we talk in one direction then expect student papers to meet goals taken from another direction? Do we talk about media but not about arguments?
- Responsible Person/Group: Film/Video Faculty
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)
Mission / Purpose
Description: The mission of the undergraduate BBA finance program is to prepare graduates to succeed in entry-level positions in finance and business in general. To achieve this goal, our graduates should have proficiency in three general areas: (1) Communication skills. Students should be able to write and present financial business reports and presentations that are concise, to identify and evaluate key issues, and to reach supported conclusions. (2) Critical thinking skills. Students should be able to think critically. (3) Technical knowledge. Students should possess a strong technical knowledge of finance.

Goals
G 2: Students will develop quantitative skills used in financial analysis
G 3: Students will gain very broad knowledge of finance
G 4: Students will be prepared for financial practice
G 5: Students will use critical thinking in financial decision-making

Student Learning Outcomes/Objectives
SLO 1: The development and application of foundation knowledge (M: 1, 3)
BBA-Finance students will be able to: (i) Apply principles of macroeconomic theory and policy. (ii) Apply principles of microeconomic theory of the firm. (iii) Acquire a general knowledge of business and business practices outside of the area of finance.

SLO 2: The development and application of technical skills (M: 1, 3, 4)
These technical skills that we would like BBA-Finance students to develop and apply include: (i) Be proficient in capabilities in information technology as they relate to finance. (ii) Possess technical capabilities for analyzing the financial condition and performance of a corporation, investment portfolio or other financial entity. (iii) Possess the necessary conceptual and technical skills to be proficient in financial model building. (iv) Possess computer and technology skills, including (but not limited to) spreadsheet capabilities, familiarity with those software packages employed in analyzing financial issues, and general operating procedure capabilities.

SLO 3: The development and application of analytical, conceptual, and integrative finance skills (M: 1, 2, 3, 4)
(i) Possess knowledge and capability in their chosen specialization from corporate finance, investments, or financial institutions and markets. (ii) Be proficient in assessing the impact of financial transactions on a corporation, investment portfolio or other financial entity. (iii) Be able to identify and assess the valuation and risk of real and financial assets. (iv) Be capable of applying models for analyzing financial strategies and alternatives for purposes of solving real world financial problems. (v) Be exposed to educational and career development opportunities resulting from the globalization of finance.

Measures, Targets, and Findings
M 1: Representative questions from courses (O: 1, 2, 3)
To examine student performance in select courses (FI 4000, FI 4040 and FI 4300), the course-instructors selectively chose five representative questions [from the assignments, quizzes, cases, mid-term and final exams] for their courses that together represent core learning in these courses. The questions are briefly described indicating how the questions fulfill learning objectives of the course. Each instructor has also indicated student performance on these five selected, representative questions using the median and maximum score attainable. In the Document Repository see “Exhibit 1a-Fall2011: Direct Assessment of Course Performance” for findings from Fall 2011 and “Exhibit 1b-Spring2012: Direct Assessment of Course Performance” for findings from Spring 2012. This measure has 3 related learning outcome objectives as indicated in “Exhibit 2-2012:BBA Assessment Plan and Alignment” (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes), also included in the Document Repository.

Target for O1: The development and application of foundation knowledge
Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

Findings 2011-2012 - Target: Met
Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that students are continuing to learn at the expected level of performance or higher and that their foundation knowledge thus meets our targets.

Target for O2: The development and application of technical skills
Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

Findings 2011-2012 - Target: Met
Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that students are continuing to learn at or above the expected level of performance and that their technical skills thus meet our targets.

Target for O3: The development and application of analytical, conceptual, and integrative finance skills
Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in
Findings 2011-2012 - Target: Met
Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that students are continuing to learn at or above the expected level of performance and that their analytical, conceptual, and integrative finance skills thus meet our targets.

M 2: National performance indicator: ETS (O: 3)
All BBA students take the Educational Testing Service (“ETS”) Major Field Test that evaluates performance of each student across all major areas in the BBA program. Performance of our finance majors are tracked relative to national performance of undergraduate BBA students. For current and historic results, please see "Exhibit 3-2012: Educational Testing Service (ETS) Results", which can be found in the Document Repository.
Source of Evidence: Standardized test of subject matter knowledge

Target for O3: The development and application of analytical, conceptual, and integrative finance skills
Students should achieve at the 90th percentile in Finance and Accounting and at the 80th percentile in International.

Findings 2011-2012 - Target: Met
Analyzing recent and long-term performance, finance majors are achieving this target fairly consistently in the areas of Finance and Accounting. Performance in all the other areas has significantly improved since the previous year.

M 3: Alignment of student learning outcomes (O: 1, 2, 3)
This measure relates course level student outcomes to program level learning outcomes. In the Document Repository, please see "Exhibit 2-2012: BBA Assessment Plan and Alignment" (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes) for details showing how student learning outcomes of representative courses (FI 4000, FI 4040, and FI 4300) align and map well onto program learning outcomes.
Source of Evidence: Academic direct measure of learning - other

M 4: Enhance student practical training (O: 2, 3)
To enable students to engage in the practicum of finance, we partner with Atlanta area corporations to offer field study experiences to students. These field study assignments, offered in conjunction with FI 4391 "Field studies in finance", allow students to gain course credit, to see how classroom knowledge can be effectively applied in the real world, and to have the opportunity to work with senior managers on practical projects that are of implementable interest to these organizations. Feedback over the last several years indicates high levels of satisfaction of employers and high levels of applied learning on the part of student participants.
Source of Evidence: Project, either individual or group

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Careers and professionalism in Finance
We seek to expand student awareness and knowledge of career development and alternative career paths in finance. We have recently created for student viewing several video recordings of leading Atlanta-based financial executives discussing their careers and job functions as well as identifying student pathways for similar success.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Representative questions from courses | Outcome/Objective: The development and application of technical skills
  Implementation Description: continuous
  Responsible Person/Group: Professor Rasha Ashraf, course coordinator for FI 4000

Critical thinking through writing
We seek to improve the critical thinking and written communication skills of students through the implementation of the University's Critical Thinking through Writing Initiative. With the finance major, this program continues to be integrated within our FI 4020 course, which is a required course for all finance majors in the BBA program.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Alignment of student learning outcomes | Outcome/Objective: The development and application of analytical, conceptual, and integrative finance skills
  Implementation Description: continuous
  Responsible Person/Group: Professors Rich Fendler and Pete Eisemann
  Additional Resources: student assistants

Practical training
The field study in finance course "FI 4391" has been found useful for providing BBA-Finance majors with real-world experience in independent project management (in both financial services firms and non-financial global business organizations). This has become increasingly important given the global recession and the decline in employment in the financial and non-financial sectors of the economy. We will continue to seek and partner with participating corporations to provide students the opportunity to acquire worthwhile and relevant practical experience.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

As different instructors continue to rotate through our courses, we continue to educate them on the assessment process as applies to the learning objectives in their courses. We will continue this process during the coming academic year with new faculty.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We observed that our greater emphasis on developing mathematical and accounting skills and increasing awareness of international finance issues has resulted in significant improvement in student exit testing performance in these and other key areas. We will continue this emphasis during the next year. Further, we are increasing our utilization of databases obtained with a Student Technology Fee Grant to further students’ understanding of financial market operations through practical applications.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

The Department has in place several faculty overseeing each critical action plan component: Professor Rasha Ashraf and Genna Brown for the careers component in FI 4000; Professor Richard Fendler and Peter Esemann for the critical thinking through writing initiative in FI 4020; and Professor Milind Shrikhande and Richard Fendler for the enhancement of practical training through FI 4391. The changes have resulted in 1) furthering student knowledge of career paths and post-degree opportunities in the field of finance; 2) improved their critical thinking skills; and 3) expanded the number of field study opportunities for our finance majors. Of note, for the careers component in FI 4000, during the past year we built a library of video interviews with CFOs and other high level executives of leading Atlanta based corporations. These executives discuss the finance function within a corporate organization and discuss various career paths for students interested in finance. Also in FI 4000, the Department has reduced the maximum class size from approximately 60 to 40 students. The course coordinator is working with all instructors in this important required class to increase the focus on building finance quantitative skills. To increase the effectiveness of our critical thinking through writing initiative in FI 4020, during the recent academic year, the Department has reduced the maximum class size from 45 to 30 students. This class size limit will continue for the 2012-2013 academic year.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

All individual and overall targets were met indicating that the Department of Finance continues to be at the forefront of the college leader in terms of the quality of students produced. We will continue to be diligent in ensuring a high quality program for students. As a result of this year's review, we are pleased that student performance on the ETS exam significantly improved, especially in the non-finance subject areas. We will continue to monitor initiatives taken in the previous year to ensure high levels of performance.

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We will continue to pursue similar strategies that have been successful in the past including faculty curriculum review committees along with input from our external industry advisory committee members. Our main strategy for improvement during the coming year will be to use the findings of the recently conducted Academic Program Review (APR) and continue the implementation of our action plan for improving the effectiveness of our BBA program. One item of note in the plan that will have a direct effect on the BBA program is the development of a Finance Major Honors program.

Georgia State University
Mission / Purpose

Description: The Master of Science degree program with a major in Finance is designed for individuals with an undergraduate business degree seeking an advanced knowledge of Masters level finance, including particular expertise in a chosen area of specialization (one of Corporate Finance, Investments, or Financial Institutions and Markets). The goal of the program is to provide students with the skills necessary to understand the context for issues encountered in the rapidly evolving financial environment, to analyze alternative financial scenarios and to develop effective policy initiatives. The program provides graduates with the technical skills needed to support a complete understanding of advanced issues in finance as well as with the analytical, conceptual and integrative skills needed to achieve a high degree of success in their careers in finance. The Fast-Track Master of Science in Finance provides participants the opportunity to gain these skills in a cohort format for preparing for careers in senior level financial management.

Goals

G 1: Knowledge of finance and related fields
Students will develop knowledge of the discipline of finance and related business practices.

G 2: Conceptual and technical skills development
Students will develop conceptual and technical skills necessary for financial model building and analysis.

G 3: Problem-solving skills for real world application
Students will develop problem-solving skills used in the analysis of commonly encountered issues in the practice of finance.

G 4: The development of critical thinking skills
Students will develop critical thinking skills for analyzing complex financial issues.

G 5: Professional leadership skills
Students will be prepared to join senior management levels in financial and non-financial organizations.

Student Learning Outcomes/Objectives

SLO 1: The development and application of foundation knowledge (M: 1, 2, 3)
MS-Finance students will be able to: (i) Apply principles of macroeconomic theory and policy. (ii) Apply principles of microeconomic theory of the firm. (iii) Acquire a general knowledge of business and business practices outside of the area of finance.

Other Outcomes/Objectives

O/O 2: The development and application of technical skills (M: 1, 2, 3, 4)
Technical skills that MS-Finance students will develop and apply include: (i) Proficiency in capabilities in information technology as they relate to finance. (ii) Technical capabilities for analyzing the financial condition and performance of a corporation, investment portfolio or other financial entity. (iii) The necessary conceptual and technical skills to be proficient in financial model building. (iv) Computer and technology skills, including (but not limited to) spreadsheet capabilities, familiarity with those software packages employed in analyzing financial issues, and general operating procedure capabilities.

O/O 3: The development and application of analytical, conceptual, and integrative finance skills (M: 1, 2, 3, 4)
MS-Finance students will: (i) Possess knowledge and capability in their chosen specialization from corporate finance, investments, or financial institutions and markets. (ii) Be proficient in assessing the impact of financial transactions on a corporation, investment portfolio or other financial entity. (iii) Be able to identify and assess the valuation and risk of real and financial assets. (iv) Be capable of applying models for analyzing financial strategies and alternatives for purposes of solving real world financial problems. (v) Be exposed to educational and career development opportunities resulting from the globalization of finance.

Measures, Targets, and Findings

M 1: Representative questions from courses (O: 1, 2, 3)
To examine student performance in select courses from each specialization (FI 8020, FI 8200, and FI 8310), the course instructors selectively chose five representative questions [from the assignments, quizzes, cases, mid-term and final exams] for their courses that together represent core learning in these courses. The questions are briefly described indicating how the questions fulfill learning objectives of the course. Each instructor has also indicated student performance on these five selected, representative questions using the median and maximum score attainable. In the Document Repository see "Exhibit 1a-2011:Direct Assessment of Course Performance-I (Fall 2011)" for findings from Fall 2011 and "Exhibit 1b-2012: Direct Assessment of Course Performance-II (Spring 2012)" for findings from Spring 2012. This measure has 3 related learning outcome objectives as indicated in "Exhibit 2-2012:MS Assessment Plan and Alignment" (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes), also included in the Document Repository.

Source of Evidence: Academic direct measure of learning - other

Target for O1: The development and application of foundation knowledge
**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Curriculum**

The quality of students entering the MS-Finance Program has maintained its improvement over the 2003-04 baseline year with average GMAT scores during 2010-11 at approximately 635, based on a sample-study of students admitted to the program. To maintain and improve upon these gains in student quality, there is need to refine certain aspects of the program based on formal and informal student feedback. The technical background courses in Management Science can overlap with a student’s prior coursework. To enable students to engage in the practicum of finance, we partner with Atlanta area corporations to offer field study experiences to students. These field study assignments, offered in conjunction with FI 8391 “Field Studies in Finance”, allow students to gain course credit as well as the opportunity to work with senior managers on real world projects that are of implementable interest to these organizations. Feedback over the last several years indicates high levels of satisfaction of employers and high levels of applied learning on the part of student participants.

Source of Evidence: Project, either individual or group

**M 2: MS-Finance Exit Survey Responses (O: 1, 2, 3)**

To provide student feedback on the MS-Finance Program we conducted exit surveys at the end of each Fall semester. These exit surveys provide a perspective from graduating students that will be used by the MS-Finance Program Committee and the Department of Finance to make any necessary refinements to program design and curricular offerings. Over the last six years, survey responses have indicated fairly high satisfaction levels with curricula and teaching and learning processes within the MS-Finance program. In the Document Repository, see “Exhibit 3-2012: MS Exit Survey”. In addition, we have conducted a course satisfaction survey for both the Spring 2011 and Fall 2011 Fast Track MS-Finance sets of courses. These results are presented in “Exhibit 4a-2012: Fast Track MS Course Survey (Spring 2011)” and “Exhibit 4b-2012: Fast Track MS Course Survey (Fall 2011)”, respectively. The findings indicate an encouraging response from students and their comments will provide guidance in the fast track program moving forward.

Source of Evidence: Academic direct measure of learning - other

**M 3: Alignment of student learning outcomes (O: 1, 2, 3)**

In the Document Repository, see “Exhibit 2-2012: MS Assessment Plan and Alignment” for details showing how learning outcomes of representative courses (FI 8020, FI 8200, and FI 8310) align with program learning outcomes. This alignment indicates that the representative questions testing student learning outcomes are well aligned with overall program learning outcomes.

Source of Evidence: Academic direct measure of learning - other

**M 4: Enhance student practical training (O: 2, 3)**

To enable students to engage in the practicum of finance, we partner with Atlanta area corporations to offer field study experiences to students. These field study assignments, offered in conjunction with FI 8391 “Field Studies in Finance”, allow students to gain course credit as well as the opportunity to work with senior managers on real world projects that are of implementable interest to these organizations. Feedback over the last several years indicates high levels of satisfaction of employers and high levels of applied learning on the part of student participants.

Source of Evidence: Project, either individual or group

---

**Findings 2011-2012 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that our MS students are continuing to learn at or above the expected level of performance and that their technical skills meet our targets.

**Target for O2: The development and application of technical skills**

Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2011-2012 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that our MS students are continuing to learn at or above the expected level of performance and that their technical skills meet our targets.

**Target for O3: The development and application of analytical, conceptual, and integrative finance skills**

Median scores shall be at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.
Our experience in developing and offering the field-study in finance course FI 8391 continues to prove highly useful for providing MS-Finance students with real-world experience in independent project management (in both financial services firms and non-financial global business organizations). We will continue to identify additional corporate partners for purposes of expanding opportunities for students to participate. Our goal is to eventually have the field study course become an integral part and distinguishing aspect of the program.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):

Measure: MS-Finance Exit Survey Responses | Outcome/Objective: The development and application of analytical, conceptual, and integrative finance skills

Implementation Description: continuous

Responsible Person/Group: Professors Milind Shrikhande and Richard Fendler

Program marketing and innovation

In 2009 we believed that there was a potential executive audience for the Fast Track MS-Finance program who desires a strong cohort format with an emphasis on academic training in corporation finance. In response, we initiated plans to launch such a program beginning in January 2010 and after a successful offering began a second cohort in January 2011. In addition, we will continue to bring to the attention of students pursuing an MBA degree, whether in finance, accounting, risk management, or another related concentration, the benefit to their skill set that an MS-Finance program offers. Along these lines, we have developed a template that guides students in selecting and scheduling courses in such a way to most efficiently earn joint MBA and MS degrees in finance. We are furthering efforts to attract students in the FMBA program to similarly complete the MS-Finance degree requirements in an efficient manner. Further improvements were planned for the summer schedule commencing in 2012 to make the program more family and employer friendly. The results of these initiatives appear to be paying benefits. For the cohort starting January 2012, we began with 32 students, which is the highest to date.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: In January 2010 we successfully launched a one-year Executive MS in Finance program at the Robinson College's Buckhead Executive Center. In January 2011 we changed the name of the program to Fast Track MS in Finance. This program name was maintained for the 2012 cohort and appears to be developing a brand to be used for cohorts in future years.

Responsible Person/Group: Professors Milind Shrikhande and Alfred Mettler

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

During the 2011-2012 academic year, there were no significant changes made in the assessment process of the flex MS-Finance program since last year's assessment report. Still, with each academic year, there is the likelihood that new and/or different faculty will instruct those graduate courses in which much of the assessment of student learning is embedded. While the courses remain relatively the same from semester to semester, the instructors may change from one year to the next. As a result, these new faculty are trained to enable their participation in the assessment process. Beginning in Spring 2011 we added a new assessment tool for the Fast Track MS-Finance program wherein course effectiveness surveys of students were conducted for Spring courses. We hope that such surveys will be implemented with each cohort going forward to include in our assessment process. Finally, the Department recently completed is Academic Program Review and has begun implementation of the Action Plan that may yield potential changes in our assessment process.

ACADEMIC PROGRAM QUESTION 2:  What is the impact of the data obtained from assessment findings on your educational program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Two years ago the Department changed the title of its formerly called Executive MS in Finance program to Fast Track MS in Finance program. The admissions office continued to modify slightly entrance requirements as to years of work experience. Due to this change and improvement in marketing efforts, the enrollment in the program has significantly increased. There were changes made in the curriculum including a new course in Financial Leadership. Also, the course scheduling was revised with now only 2 classes offered in the summer and an additional 5 class offered in the Spring and Fall semesters. Further, effective Fall 2012, we have replaced the course on corporate restructuring and finance with a course on global banking and finance. We will continue to review the progress of this program and obtain feedback from students, faculty, and the industry advisory committee for improving the curriculum and structure. In response to earlier feedback from students, we continue to seek participation from leading industry executives to enhance student learning in the classroom.

ADMINISTRATIVE DEPT QUESTION 1:  Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

As mentioned, in 2011, the Executive MS-Finance program title was changed to Fast Track MS-Finance program, which reduced the years of required work experience of applicants. A number of structural changes were made to help promote the quality of the program and student success. Included was a one course reduction in the number of classes taken during the Summer, thus allowing a one month break. In turn, 5 classes were added on Saturdays during the Spring and Fall semesters. Also, a new course on Financial Leadership was added to the program replacing a course on applied regression analysis. The more important aspects of this latter course were incorporated into the business modeling course. The new course on Financial Leadership appears to have been well received by students and the instructor will continue to make improvements with repeated offerings and experience teaching this very unique class in financial education.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

Overall targets continue to be met indicating that the Department continues to be a college leader in terms of the quality of students produced. We will continue to be diligent in ensuring a high quality program for students. Our findings continue to provide us with valuable information for improving the curriculum. To facilitate continual improvement we are also actively involving our industry advisory board to provide input on program design and curriculum and to enhance student interaction with senior executives in industry.

ADMINISTRATIVE DEPARTMENT QUESTION 3:

How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We will continue to pursue similar strategies that have been successful in the past including the use of faculty review committees along with input from our MS-Finance industry advisory committee members. Our main strategy for improvement during the coming year will be to use the findings of the recently conducted Academic Program Review (APR) and the resulting action plan for improving the effectiveness of our MS program.

Georgia State University
Assessment Data by Section
2011-2012 French BA
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Department is, through the study of modern and classical languages, cultures and literatures, 1. to provide students the opportunity to improve their critical thinking skills; 2. to better appreciate universal humanistic values; 3. to encourage them to acquire an international perspective; 4. to equip them to function as global citizens; 5. to prepare them, through the various majors in modern languages, for future careers as teachers, translators and interpreters, as well as for important positions in international business.

Goals
G 4: Knowledge of French and French Literature
Student shall demonstrate several abilities: 1. to understand French when spoken by a proficient speaker on general and non-technical topics at normal conversational speed; 2. to speak French with a varied vocabulary, good pronunciation, and grammatical accuracy; 3. to read and comprehend general and non-technical materials written in French; 4. and to write French with clarity and grammatical accuracy. 5. Students demonstrate a general acquaintance with the various cultures where French is spoken and literatures written in French. 6. Students shall demonstrate the ability to critically interpret the literary, cultural and historical content of literary texts.

G 5: Outcomes for the current period
For the current period, the French section of the Department decided to focus on more goals important to the degree program and add Goals 3, 4, 5 to the previous assessment restricted to Goal 6. This assessment was made in the Introduction to the Analysis of Literary Texts, an introductory course required for all French majors before they take more advanced literature courses. The rubric for these goals was redesigned by departmental faculty skilled in the science of assessment. It includes 4 weighted criteria of a literary text: Focus on Topic (35%), Literary Lens Use (35%), Organization (15%) and Accuracy of Grammar and Spelling (15%).

G 6: Target
Students shall demonstrate the ability to understand French when spoken by a proficient speaker on general and non-technical topics at normal conversational speed; to speak French with a varied vocabulary, good pronunciation, and grammatical accuracy; to read and comprehend general and non-technical materials in this language and to write in French with clarity and grammatical accuracy. Students will also demonstrate a general acquaintance with French cultures and the ability to critically analyze and interpret the literary, cultural and historical content of literary texts.

Student Learning Outcomes/Objectives
SLO 4: Knowledge of French Literature (G: 4) (M: 1)
The student shall demonstrate a good command of the French language, a general acquaintance with target language literatures and the ability to critically analyze and interpret the literary, cultural and historical content of literary texts.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings
M 1: paper (O: 4)
In French 3033 (Introduction to the Analysis of Literary Texts), students wrote an end-of-course paper whose purpose was to demonstrate their ability to critically analyze and interpret the literary, cultural and historical content of a literary text. They were evaluated for their appropriate focus on the topic (35%), their literary lens use (35%), the clear and succinct organization of their paper (15%), and the correctness of their grammar and spelling (15%).
Source of Evidence: Written assignment(s), usually scored by a rubric
Target for O4: Knowledge of French Literature

The target is for students to achieve a score of 8.0-8.4 in their assessment for literature.

Findings 2011-2012 - Target: Partially Met

The BA programs in MCL have a new reporter/director of undergraduate studies. During this reporting cycle the new reporter is using the resources, methods, and results given to him by his predecessor. Two French 3033 (Introduction to the Analysis of Literary Texts) were taught during this cycle. The stated target of 8.0-8.4 was partially met. The average student score in one section was 8.93 (meets target). Meanwhile, in the other section the average student score was 6.55 (does not meet target), which includes the score for one student who received zeros in every measure. Not counting this student, the average rose slightly to 7.6. The French Section will continue in its efforts to reach the target score in every section, although the limited sample group in the second section (one class with only ten students, one of whom did none of the work for the course) suggests that the underperformance regarding the stated target may be an anomaly.

Georgia State University
Assessment Data by Section
2011-2012 French MA
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Department is to give students preparing for the M.A. in French the opportunity to develop appropriate proficiencies in the French language, to acquaint them with the literary and cultural productions of France and French speaking countries, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching and research, translation and interpretation, international business, and other areas. The Department's mission, with regard to students preparing for the M.A. in French, is to encourage them to contribute to the development, organization and dissemination of research and criticism in the focus areas of French and Francophone literatures and cultures, linguistics and language pedagogy. As a core element in the University's mission of internationalization, the Department encourages their interest and involvement in international exchanges.

Goals

G 1: Goals for 2010-11
In Fall 2010, I began as Director of Graduate Studies for MCL. Previous to my tenure as DGS, no work had been done on establishing rubrics or developing measures for direct and indirect assessment of graduate student learning in our department. MCL had already established a series of outcomes dating back to 2004-05. According to those outcomes, I began to develop a means for directly assessing student work: seminar papers, theses, non-thesis papers, written exit exams, and oral exit exams. I have accumulated this data into excel sheets which I have placed in the document repository. I have also included there the Milestone Evaluation used to assess this work. In Spring 2011, I began to develop indirect assessment measures including a survey for our MA students, a similar survey for our faculty (to gauge the difference in perception between faculty and students), and an annual report for students to inform me of their professional and academic activities relevant to our MA program (All of these documents are available in the Document Repository). These indirect assessment were put online via Google Docs to make it easier for individuals to do the survey and easier for me to track the results that were loaded directly into an Excel format. All of my focus toward assessment in 2010-11 was dedicated to the development of clear rubrics that were easy to follow and easy to use for the faculty of MCL, but that also created concrete data that would lead to clear conclusions about the ability of MCL to meet our stated goals and desired outcomes with regard to student learning. Now that I have begun to accumulate data and faculty are on board with the measures I have devised, I will be focused this year on tracking the data, assessing it, and developing an action plan through WEAVE.

Student Learning Outcomes/Objectives

SLO 1: Effective writing, communication and editing (M: 1)
Students develop effective written communication and editing skills and show appropriate writing conventions and formats.

SLO 2: Research and Data Collectiong Skills (M: 1)
Students are able to read and understand research, acquire skills to collect data and utilize key data sources that provide literary and linguistic information and research findings.

SLO 3: Critical Thinking Skills (M: 1)
Students demonstrate competence in the analysis of literary texts and the evaluation of critical thinking in literature.

SLO 4: Acquisition of Knowledge (M: 1)
Students articulate key literary and philosophical concepts and theories, apply the most up-to-date facts and information in resolving literary and linguistic issues and demonstrate appropriate literary, linguistic, historical and cultural knowledge.

Measures, Targets, and Findings

M 1: Thesis, Pedagogical project or research paper (O: 1, 2, 3, 4)
A committee of French professors will use the thesis, pedagogical research project, and/or research paper to evaluate mastery of the skills and learning outcomes of the M.A. candidate in French. The written exam consists of three questions based on three areas from French literature and/or civilization reading list as well as on students' coursework.

Source of Evidence: Senior thesis or culminating major project

### Target for O1: Effective writing, communication and editing
Students were rated on a scale of 1-4 Target is to have 90% of students at or above a rate of 2. 1= Fails to Meet Standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard

**Findings 2011-2012 - Target: Met**
Students were rated as the following: 1= 22 2= 56 3= 24 4=6 94% of students met the standard

### Target for O2: Research and Data Collectioning Skills
Students were rated on a scale of 1-4 Target is to have 90% of students at or above a rate of 2. 1= Fails to Meet Standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard

**Findings 2011-2012 - Target: Met**
Students were rated as the following: 1= 4 2= 22 3= 9 4=1 97% of students met the standard

### Target for O3: Critical Thinking Skills
Students were rated on a scale of 1-4 Target is to have 90% of students at or above a rate of 2. 1= Fails to Meet Standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard

**Findings 2011-2012 - Target: Met**
Students were rated as the following: 1= 5 2= 30 3= 12 4=1 97% of students met the standard

### Target for O4: Acquisition of Knowledge
Students were rated on a scale of 1-4 Target is to have 90% of students at or above a rate of 2. 1= Fails to Meet Standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard

**Findings 2011-2012 - Target: Met**
Students were rated as the following: 1= 12 2= 38 3= 20 4=2 97% of students met the standard

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Adding Courses
The French section has added one new course for the new concentration in French Studies, and more are under consideration

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Planned
- **Responsible Person/Group:** French Faculty

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Geography BA**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

### Mission / Purpose
The Geography BA in the Department of Geosciences presents an integrative perspective on the relations among social, political, economic, and physical phenomena occurring across space. The program is committed to teaching the concepts and research methods of the discipline in order to prepare geography majors for professional careers or advanced study or both. Students acquire geographic knowledge and thinking skills in order to understand the complex nature of the human and environmental patterns found in the world around them. Therefore, the program is committed to excellence in both the theoretical and applied arenas.

### Goals

**G 1: Thinking Skills**
Students are thinking critically to understand and apply knowledge of environmental patterns found in the world around them

**G 2: Research**
Student formulates appropriate questions for geosciences research.

### Student Learning Outcomes/Objectives
<table>
<thead>
<tr>
<th>SLO 1: Critical Thinking - Information Evaluation (G: 1) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student evaluates claims, arguments, evidence, and hypotheses.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 2: Contemporary Issues - Diverse Disciplines (G: 1) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students effectively analyzes contemporary issues within the context of diverse disciplinary perspectives.</td>

</tbody>
</table>

### Measures, Targets, and Findings

#### M 1: Research Papers (O: 1, 2, 3)
Research Papers: For Urban Geography and Issues Courses: Final research paper and policy brief designed for students to integrate course concepts with some original research on public policy or policy analysis.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Critical Thinking - Information Evaluation**
75% to be proficient in critical thinking scoring 3 out of 5 50% to be proficient in critical thinking scoring 4 out of 5 25% to be proficient in critical thinking scoring 5 out of 5

**Findings 2011-2012 - Target: Met**
The average student score in critical thinking was 4 out of 5

**Target for O2: Contemporary Issues - Diverse Disciplines**
75% to be proficient in diverse disciplines scoring 3 out of 5 50% to be proficient in diverse disciplines scoring 4 out of 5 25% to be proficient in diverse disciplines scoring 5 out of 5

**Findings 2011-2012 - Target: Met**
Students in these courses averaged 4 of 5

**Target for O3: Methods**
75% to be proficient in methods scoring 3 out of 5 50% to be proficient in methods scoring 4 out of 5 25% to be proficient in methods scoring 5 out of 5

**Findings 2011-2012 - Target: Met**
Students averaged 4 of 5

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Improve critical-thinking skills of Geography majors**
Critical-thinking learning outcomes had the lowest scores among all the outcomes; therefore, critical-thinking skills of Geography majors need to be improved.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 12/2009

**Improve scores on Outcome 10 in GEOG 4764**
In order to improve scores on Outcome 10 (Critical Thinking -- Information Evaluation) in Geography 4764 (Urban Geography), the instructor will provide students with solid examples of appropriate evaluations of claims, arguments, evidence, and hypotheses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 07/2009

**Increase the number of measures for certain outcomes**
It has been determined that the program needs at least six measures per learning outcome. There were 82 outcome/measure combinations for the 2008-2009 assessment, thereby yielding a mean value of six measures per outcome. To reach the minimum number of six measures per outcome, the following is needed: at least five additional measures for Outcome 4 (Communication – Visual) and Outcome 5 (Quantitative Skills – Arithmetic Operations); at least three additional measures for Outcome 6 (Quantitative Skills – Problem Solving), at least two additional measures for Outcome 8 (Critical Thinking – Question Formulation (2)), Outcome 9 (Critical Thinking – Evidence Collection), and Outcome 11 (Technology); and one additional measure for Outcome 3 (Communication – Oral), Outcome 12 (Collaboration), and Outcome 13 (Contemporary Issues – Diverse Disciplines). Therefore, a high-priority area is increasing the number of measures for outcomes linked to quantitative skills, visual communication, and critical thinking.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 12/2009
Actions
Geosciences is proposing to combining B.A (GEOG) and B.S. (GEOL) degree programs. All new assessment will be developed reflecting goals and outcome of a new combined degree B.S. degree program. The 3.9 is lower than we want for this particular measure but is close to target; no change in approaches are warranted for this outcome.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Combining disciplines
This year the department will combine Geography and Geology into one major. We will discuss ways to combine our goals and objectives and find ways to measure these.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Projected Completion Date: 05/2013

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We changed our measure of assessment from a departmental examination to actual class assignments.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

To assess percentage of students achieving targets, rather than using whole-class data.

Georgia State University
Assessment Data by Section
2011-2012 Geology Assessment of Core
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
Our mission is to provide our students the opportunity to go beyond the memorization of geological facts in order to critically evaluate the major concepts related to Earth Science.

Goals
G 1: Natural Processes
Students will recognize how natural processes shape the world around them.

G 2: Society and Environment
Student will better understand the interactions between society and the natural world.

Student Learning Outcomes/Objectives

SLO 1: Earth System (G: 1) (M: 1)
Students will recognize the components of the earth spheres and explain how they work together to form the earth system.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: Global Society (G: 2) (M: 2)
Students will recognize the relationship between human cultural interactions and global change.

Measures, Targets, and Findings

M 1: Exam Questions for Natural Processes (O: 1)
GEOL and GEOG core courses were given questions to answer related to natural processes. See attachment for questions.
Source of Evidence: Academic direct measure of learning - other
Target for O1: Earth System
We anticipate that at least 70% of students will answer each question correctly.

Findings 2011-2012 - Target: Partially Met
We collected data related to earth systems from 3 courses (GEOL 1121, GEOL 1122, and GEOG 1113) and tested a total of 757 students. Of the students tested, we found the following: In GEOL 1121: 75% answered Question 1 correctly. 72% answered Question 2 correctly. 81% answered Question 3 correctly. 63% answered Question 4 correctly. 93% answered Question 5 correctly. In GEOL 1122: 85% answered Question 1 correctly. 69% answered Question 2 correctly. 27% answered Question 3 correctly. 41% answered Question 4 correctly. 56% answered Question 5 correctly. In GEOG 1113: 82% answered Question 1 correctly. 82% answered Question 2 correctly. 73% answered Question 3 correctly. 94% answered Question 4 correctly. 82% answered Question 5 correctly.

M 2: Exam Questions for Society and Environment (O: 2)
GEOL and GEOG core classes were given questions to answer related to Society and Environment. See attached questions.
Source of Evidence: Academic direct measure of learning - other

Target for O2: Global Society
We expect that 70% of our students will answer each question correctly.

Findings 2011-2012 - Target: Partially Met
We collected data related to global society from 1 course (GEOG 1101) and tested a total of 100 students. Of the students tested, we found the following: In GEOG 1101: 39% answered Question #1 correctly. 68% answered Question #2 correctly. 81% answered Question #3 correctly. 66% answered Question #4 correctly. 24% answered Question #5 correctly.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Exam Questions for Society and Environment
These results come from just one course, and the questions were created mid semester, so we will need to continue to observe how these questions work in this course.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Exam Questions for Society and Environment | Outcome/Objective: Global Society

Exam Questions Natural Processes
We did not meet our goals for several of the questions on the examinations. We created these questions at the mid-semester, so we are new to the faculty teaching the courses. When we next teach these courses, the faculty should be aware of the questions and prepare to work with students on these topics. We will also look at questions that had a high rate of failure and consider how we can address them.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Exam Questions for Natural Processes | Outcome/Objective: Earth System

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We have used exam questions in the past as a form of assessment for the core courses. We revised these questions in the fall and have started collecting data. We plan to work in making sure that these questions are implemented in all of our core courses in the future.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
We just started using these new questions, so we will spend this year making sure that faculty are aware of them and integrating them into their curriculum.
Mission / Purpose
Mission/Purpose
The Department of Geosciences at Georgia State University is committed to excellence in instruction and research in the Earth Sciences. We expect all our graduates to develop a thorough knowledge base in geology which will place them in a good position for moving on to graduate school or to employment in geology. We expect each graduate to have a strong understanding of the constitution of the earth; earth processes, both internal and external; and earth history.

Goals
G 1: Structure
Geology majors are familiar with the phases, structures, and workings of the earth.

G 2: Human Impact
Geology majors will be aware of human impact on the earth.

G 3: Data
Geology majors will be able to collect and analyze data related to the lithosphere and hydrosphere.

Student Learning Outcomes/Objectives
SLO 4: Foundation knowledge Acquisition (G: 1) (M: 2)
Student demonstrate knowledge of key geological concepts.

SLO 6: Critical Thinking - Evidence Collection (G: 3) (M: 2)
Student collects appropriate evidence.

SLO 7: Critical Thinking - Information Evaluation (G: 2, 3) (M: 2)
Student evaluates claims, arguments, evidence, and hypotheses.

Measures, Targets, and Findings
M 1: “LOESS” Exit Survey
The Learning Outcomes Exit Survey for Seniors (LOESS) was given to six graduating seniors. The test consisted of 90 questions, 10 questions from each of nine geology courses. The courses are Geol 1121 (Introductory Geosciences I), Geol 1122 (Introductory Geosciences II), Geol 3002 (Introduction to Earth Materials), Geol 4006 (Sedimentary Environments and Stratigraphy), Geol 4013 (Structural Geology), Geol 4015 (Crystallography and Optical Mineralogy), Geol 4016 (Igneous and Metamorphic Petrology), Geol 4017 (Environmental Geology), and Geol 4007 (Hydrogeology). Geol 1121, 1122, 3002, 4006, 4013, 4015, and 4016 are required for the BS degree; Geol 4017 and 4007 are not required but are taken by almost every graduating student.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

M 2: Problems (O: 4, 6, 7)
Students complete homework problems that require them to practice concepts discussed in class. For example, students may be asked to interpret geological maps and cross sections.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O4: Foundation knowledge Acquisition
75% of students should score 3 out of 5, or proficient, in foundation knowledge acquisition. 50% of students should score 4 our of 5, or high, on foundation knowledge acquisition. 25% of students should score 5 our of 5, or exceptional, on foundation knowledge acquisition.

Findings 2011-2012 - Target: Met
In Geol 4007, the students averaged 3 out of 5 in foundation knowledge acquisition. In Geol 4013, the students averaged 4 out of 5, but very close to 5, in foundation knowledge acquisition.

Target for O6: Critical Thinking - Evidence Collection
75% of students should score 3 out of 5, or proficient, in critical thinking. 50% of students should score 4 our of 5, or high, on critical thinking. 25% of students should score 5 our of 5, or exceptional, on critical thinking.

Findings 2011-2012 - Target: Met
In Geol 4007, the students averaged 3 out of 5 in critical thinking-evidence collection. In Geol 4013, the students averaged 4 out of 5, but very close to 5, in critical thinking-evidence collection.

Target for O7: Critical Thinking - Information Evaluation
75% of students should score 3 out of 5, or proficient, on information evaluation 50% of students should score 4 our of 5, or high, on information evaluation. 25% of students should score 5 our of 5, or exceptional, on information evaluation.

Findings 2011-2012 - Target: Met
In Geol 4007, the students averaged 3 out of 5 in information evaluation. In Geol 4013, the students averaged 4 out of 5, but very close to 5, in information evaluation.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Revise Assessment Plan
Geosciences department has recently reorganized and has agreed to establish one set of assessment goals for the entire department. The new departmental assessor will be working with faculty across the department to establish new goals and discuss forms of assessment.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High
- Projected Completion Date: 05/2012
- Responsible Person/Group: Seth Rose and Department as a whole

Combine Departments
This year the department will combine Geography and Geology into one major. We will discuss ways to combine our goals and objectives and find ways to measure these.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes in the assessment process will you make in the coming academic year?

We changed our measure of assessment from a departmental examination to actual class assignments.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

To set individual targets rather than combined goals and objectives for the courses. Now they are averaged.

Georgia State University
Assessment Data by Section
2011-2012 Geosciences MS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The primary mission of the Geoscience MS degree is to produce well-educated students in Geology and Geography. That mission includes delivering courses at the MS level relevant to what students in Geology and Geography need to know and providing stimulating research opportunities in both concentrations at the MS level.

Goals
G 1: Students will be knowledgeable Geoscientists
Students will learn research and practical knowledge toward success in their respective fields of Geography and Geology.

Student Learning Outcomes/Objectives

SLO 1: Quality Non-thesis Project (M: 1)
Students will demonstrate well conceived non-thesis projects for each of the Geoscience concentrations: Geography and Geology. The outcomes include: coverage of topic, quality of data collected, quality of interpretation, discussion and conclusions

SLO 2: Quality Thesis Research (M: 2)
Students will demonstrate quality research design and implementation for each of the Geosciences concentrations: Geography and Geology.

Measures, Targets, and Findings

M 1: Non-thesis project Rubric (O: 1)
Non-thesis projects in each area (Geography and Geology) are assessed on a 1-5 scale (5 = excellent, 4= very good, etc) by the thesis director, graduate director or department chair. Basis of evaluation includes: depth and coverage of topic, quality of data, quality of interpretations, discussion and conclusions).

Source of Evidence: Senior thesis or culminating major project

**M 2: Thesis Research Rubric (O: 2)**

The thesis for each concentration (Geography and Geology) will be measured on a 5-point scale rubric for: research design, data collection, implications, and discussion.

Source of Evidence: Senior thesis or culminating major project

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 German BA**

(As of: 12/12/2016 04:41 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

---

**Mission / Purpose**

The mission of the Department is to give students majoring in German the opportunity to develop appropriate proficiencies in the German language, to acquaint them with the literature and culture of German speakers, to promote their interest and involvement in international exchanges through study abroad programs, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching, business, translation and interpretation, and other areas.

**Goals**

**G 4: Knowledge of German Literature**

Student will understand the particularities of German literature.

**G 5: Outcomes for the current period**

After consultation with GSU's Director of Academic Assessment, the German Section decided to focus on a single goal, General Goal 6, for the current period. The assessment was made in the Introduction to Literature course, a requirement for all majors in French, German and Spanish. The new rubric for this goal was redesigned by departmental faculty skilled in the science of assessment. It includes 4 weighted criteria of a literary text: Focus on Topic (35%), Literary Lens Use (35%), Organization (15%) and Accuracy of Grammar and Spelling (15%).

---

**Outcomes/Objectives**

**O/O 6: Knowledge of German Literature (M: 1)**

The student shall demonstrate a general acquaintance with German literatures and the ability to critically analyze and interpret the literary, cultural and historical content of literary texts.

**Measures, Targets, and Findings**

**M 1: Paper (O: 6)**

In German 3312 (Introduction to Reading German Literary Texts), students wrote a paper whose purpose was to demonstrate their ability to critically analyse and interpret the literary, cultural and historical content of a literary text. They were evaluated for their appropriate focus on the topic (35%), their literary lens use (35%), the clear and succinct organization of their paper (15%), and the correctness of their grammar and spelling (15%).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O6: Knowledge of German Literature**

We hope that students will be able to achieve a score of 8.0-8.4 in their assessment for literature.

**Findings 2011-2012 - Target: Met**

The BA programs in MCL have a new reporter/director of undergraduate studies. During this reporting cycle the new reporter is using the resources, methods, and results given to him by his predecessor. One Course of German 3311 (Reading German Literature) was taught during this period (the course was taught in Fall 2011). Students majoring in German achieved a result of 8.75.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 German MA**

(As of: 12/12/2016 04:41 PM EST)
**Mission / Purpose**

The mission of the Department is to give students preparing for the M.A. in German the opportunity to develop appropriate proficiencies in the German language, to acquaint them with the literary and cultural productions of Germany and German speaking countries, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching and research, translation and interpretation, international business, and other areas. The Department's mission, with regard to students preparing for the M.A. in German, is to encourage them to contribute to the development, organization and dissemination of research and criticism in the focus areas of German literature and culture, linguistics and language pedagogy. As a core element in the University’s mission of internationalization, the Department encourages their interest and involvement in international exchanges.

**Goals**

**G 1: Goals for 2010-11**

In Fall 2010, I began as Director of Graduate Studies for MCL. Previous to my tenure as DGS, no work had been done on establishing rubrics or developing measures for direct and indirect assessment of graduate student learning in our department. MCL had already established a series of outcomes dating back to 2004-05. According to those outcomes, I began to develop a means for directly assessing student work: seminar papers, theses, non-thesis papers, written exit exams, and oral exit exams. I have accumulated this data into excel sheets which I have placed in the document repository. I have also included there the Milestone Evaluation used to assess this work. In Spring 2011, I began to develop indirect assessment measures including a survey for our MA students, a similar survey for our faculty (to gauge the difference in perception between faculty and students), and an annual report for students to inform me of their professional and academic activities relevant to our MA program (All of these documents are available in the Document Repository). These indirect assessment were put online via Google Docs to make it easier for individuals to do the survey and easier for me to track the results that were loaded directly into an Excel format. All of my focus toward assessment in 2010-11 was dedicated to the development of clear rubrics that were easy to follow and easy to use for the faculty of MCL, but that also created concrete data that would lead to clear conclusions about the ability of MCL to meet our stated goals and desired outcomes with regard to student learning. Now that I have begun to accumulate data and faculty are on board with the measures I have devised, I will be focused this year on tracking the data, assessing it, and developing an action plan through WEAVE.

**Student Learning Outcomes/Objectives**

**SLO 1: Effective writing, communicating and editin (M: 1)**

Students develop effective written communication and editing skills and follows appropriate writing conventions and formats.

**SLO 2: Research and data collecting skills (M: 1)**

Students are able to read and understand research, acquire skills to collect data and utilize key data sources that provide literary and linguistic information and research findings.

**SLO 3: Critical thinking skills (M: 1)**

Students demonstrate competence in the analysis of literary texts and the evaluation of critical thinking in literature.

**SLO 4: Acquisition of knowledge (M: 1)**

Students articulate key literary and philosophical concepts and theories, apply the most up-to-date facts and information in resolving literary and linguistic issues and demonstrate appropriate literary, linguistic, historical and cultural knowledge.

**Measures, Targets, and Findings**

**M 1: Pedagogical project or research paper (O: 1, 2, 3, 4)**

A committee of German professors will use the pedagogical research project, and/or research paper to evaluate mastery of the skills and learning outcomes of the M.A. candidate in German.

Source of Evidence: Senior thesis or culminating major project

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Health & Physical Education BSED**

As of: 12/12/2016 04:41 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The purpose of the Bachelor of Science Program in Health and Physical Education at Georgia State University is to develop competent leaders who provide and promote health and physical activity in P-12 schools. The theme of this program is to develop teachers as facilitators of learning. The program emphasizes broad pedagogical knowledge in health and physical education. Coursework, extensive field experience and collaboration among school and university faculty combine to develop a program that supports the professional growth of the novice educator.
Goals

G 1: Goal 1: Professional Knowledge and Skills
HPE students will understand how individuals learn and develop and can provide developmentally appropriate instructional strategies and opportunities to develop physically educated individuals based on state and national standards.

G 2: Goal 2: Planning
HPE students will plan a variety of developmentally appropriate instructional strategies to develop physically educated individuals based on state and national standards.

G 3: Goal 3: Effects on P-12 Student Learning
HPE students will understand and use assessment to foster physical, cognitive, social and emotional development of students in physical activity.

G 4: Goal 4: Clinical Practice
HPE students will demonstrate reflective practices by evaluating the effects of their actions on others and seek opportunities to grow professionally.

Student Learning Outcomes/Objectives

SLO 1: Goal 1: Professional Knowledge and Skills (G: 1) (M: 1)  
Objective #1: Candidates will demonstrate effective task presentation as determined by the following criteria: a. Teacher uses refinement and extension tasks throughout the lesson to build student skill. b. Teacher uses application tasks after students have developed adequate knowledge, skill and performance c. Teacher addresses safety concerns or potential problems. d. Teacher uses multiple teaching strategies for delivering the unit. e. Teacher generalizes important concepts for the unit to other activities.

SLO 3: Goal 3: Effects on P-12 Student Learning (M: 3)  
Objective #1: Students will demonstrate ability to use assessment data from students to alter lesson emphasis and/or unit plans.

Other Outcomes/Objectives

O/O 2: Goal 2: Planning (M: 2)
Objective #1: Students will demonstrate ability to develop a contextual analysis and rationale for their physical education and health units as determined by the following criteria: a. Teachers will select instructional models based on understanding and thoughtful reflection. b. Teachers will demonstrate a thorough understanding of the model, its strengths and limitations. c. Teacher will select activities that are developmentally appropriate and lead to student success and learning. Objective #2: Candidates will demonstrate ability to plan block and individual lesson plans as determined by the following criteria: a. Teacher shows relationships of activity to those areas with related concepts. b. Teacher develops a lesson that someone unfamiliar with the lesson could use the plan and know the exact expectations for the students. c. Teacher bases lesson modifications on personal research of teaching effectiveness. d. Teacher develops models based plans consistent with associated benchmarks. Objective #3: Candidates will develop goals and objectives as determined by the following criteria: a. Lesson plans goals are written for all 3 domains. b. Lesson plan goals demonstrate continuous progress toward reaching unit goals. c. When appropriate goals specify both process and product.

O/O 4: Goal 4: Clinical Practice (M: 4)
Objective #1: Candidates will demonstrate the ability to write reflections based on data obtained from assessments used during the lesson. Objective #2: Candidate reflections will center on the impact their performance had on student learning. Objective #3: Candidate reflections will provide suggestions for improving the delivery of lesson content to enhance student learning.

Measures, Targets, and Findings

M 1: Goal 1: Professional Knowledge and Skills (O: 1)
The key assessment for this goal and corresponding objective is the student's task presentation. This assessment is evaluated in KH 4520 and again in KH 4710. In KH 4520 task presentation is evaluated by the course instructor. In KH 4710, task presentation is evaluated by the student's cooperating teacher as well as their University Supervisor responsible for observing the student teacher during their student teaching placement. A rubric is used by all faculty to evaluate the effectiveness of the student's task presentation. This evaluation is ongoing throughout both KH 4520 and 4710. During KH 4710, task presentation is evaluated at a minimum of once every two weeks by the University Supervisor and more frequently by the student's cooperating teacher. An average is calculated across all evaluations and is reported for this key assessment.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Goal 1: Professional Knowledge and Skills  
80% of HPE students should achieve a rating of 4 or above on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

Findings  2011-2012 - Target: Met
Explaination of How Task Presentation is Used in the HPE Program. Task presentation is used as a measure of competence in the ability to demonstrate pedagogical content knowledge (PCK) in teaching. PCK is the ability to combine content knowledge with pedagogical knowledge to effectively instruct specific groups of learners in schools. This assessment is broad covering pedagogical skills in the teaching of content that is developmentally and functionally appropriate. The rubric for scoring task presentation reflects qualitative behaviors that correspond respectively to the following: Lesson progressions use no refinement and extension activities to develop skill (1 point unsatisfactory); Lesson consists mostly of informing and application tasks (2 points needs improvement); Lesson progressions use few refinement and extension activities to develop
skill (3 points satisfactory); Lesson consists mostly of informing and application tasks (4 points very good); Care is taken to
present information sequentially so that students can build on prior knowledge when asked to complete more complex tasks (5
points outsdtanidng). Analysis of Task Presentation A total of 71% of candidates demonstrated very good or outstanding
performance in task presentation in KH 4520, a midpoint evaluation metric. In the equivalent graduate Non-T4 class (KH 7250)
50% of candidates were very good in task presentation. This may reflect differences in both the quality and quantity of
practice teaching received between these two groups of students, with undergraduate HPE candidates receiving more
practice teaching than non-T4 candidates at this point in their respective curiculum. However, task presentation scores
improved after student teaching. A total of 80% of candidates following student teaching were outstanding in their task
presentation skills. These findings emphasize (a) the importance of the opportunity to work full time with an experienced
teacher in the field of physical education, (b) the increased knowledge of learners' characteristics (e.g., emotional, physical,
mental, cultural and ethnic), their needs, abilities and interests obtained by candidates through student teaching, which
enabled them to improve their pedagogical content knowledge, and (c) the improved ability to relate and/or apply the task
presentation to the instructional model being used. [Preview Formatting]

M 2: Goal 2: Planning (O: 2)
Key assessments for this Program Goal and respective Objectives include: Contextual Analysis and Rationale, Block and Lesson
Plans and Learning Goals and Objectives. These key assessments are incorporated into a written project completed by all HPE
students during two classes (KH 4520 and KH 4710). Students are required to select an instructional model by which to teach HPE
content to a P-12 class. As part of their models assignment, students have to write a contextual analysis describing the model they
chose, why they chose that model and not another model as well as analyze specific features and characteristics of the HPE setting
that impact the instructional model selected. Students then have to write learning goals and objectives for their P-12 students based
on pre-assessment of student's present level performance and develop block and lesson plans to guide the teaching of HPE content
in accordance with the model selected. Models projects in KH 4520 are evaluated by the course instructor. Models projects for KH
4710 are evaluated by a pair of HPE faculty. A rubric is used by all faculty across both courses to guide the grading of the model's
projects.
Source of Evidence: Video or audio tape (music, counseling, art)

Target for O2: Goal 2: Planning
80% of HPE students should achieve a rating of 4 or above on the HPE Key Assessment Rubric equating to a qualitative rating of
very good/outstanding.

Findings 2011-2012 - Target: Met
Explanation of How Planning Assessments are Used in the HPE Program. A meaningful contextual analysis, quality block and
lesson plans and developmentally appropriate and challenging goals and objectives enable the HPE faculty to determine the
degree to which candidates: · Have a readiness to teach and a confidence and clarity to meet their teaching goals · Are
successful in stimulating their students. They do so because their lesson plans move carefully and thoughtfully from one idea
–step-by-step to another idea and in good sequence of content development. · Invite student participation · Limit managerial
(non-learning) time · Use a variety of procedures · Ensure continuity of learning from lesson to lesson · Provide for individual
differences · Strive to adapt learning material to the needs of the students · Can summarize and check outcomes. Rubric for
Scoring Planning (Pedagogical Knowledge and Skills) Unsatisfactory 1 point Needs Improvement 2 points Satisfactory 3 points
Very Good 4 points Outstanding 5 points. Contextual Analysis and Rationale Uses only direct instruction. No effort made to
consider other instructional models. Uses only direct instruction regardless of the content delivered. Choice o f instructional
model inhibits student learning OR Model selection is based on teacher preference rather than student needs/abilities.
Content of unit (activity) may not match instructional model selected. Teaching model selected is appropriate for the context in
which it will be delivered. Takes into account the number, age, and skill level of students. Instructional model was selected
based on understanding and reflection. Teacher candidate demonstrates an understanding of the model, its strengths and
limitations. Activities are developmentally appropriate and lead to student success and learning. Instructional model was
selected based on in depth understanding and thoughtful reflection. Teacher candidate demonstrates a thorough
understanding of the model, its strengths and limitations. Activities are developmentally appropriate and lead to student
success and learning. Block & Lesson Plans Goal for the unit are superficial and/or target extraneous topics. Unit is focused
on keeping students busy rather than meaningful learning concepts. Lesson content is the same for all students, regardless
of skill levels Goal for the unit are questionable and/or target extraneous topics. Unit is focused on keeping students busy
rather than meaningful learning concepts. Lesson content is the same for all students, regardless of skill levels Identifies
important concepts for the unit selected. Activities selected for the unit emphasize content knowledge related to these
concepts. Lesson modifications are developed for students with special needs. Makes references to important concepts for
the unit to other activity areas. Teacher candidate shows relationship of activity to those areas with related concepts.
Someone unfamiliar with the lesson could use the plan as written and know the exact expectations for students. Lesson
modifications are based on research done by the teacher candidate. Modifications for special needs students are
developmentally appropriate. Generalizes important concepts for the unit to other activity areas. Teacher candidate shows
relationship of activity to those areas with related concepts. Someone unfamiliar with the lesson could use the plan as written
and know the exact expectations for students. Lesson modifications are based on research done by the teacher candidate.
Modifications for special needs students are developmentally appropriate. Learning Goals & Objectives Goals for unit are
superficial, target unrelated topics and/or are missing. No connection between program and instructional goals Goals for unit
are superficial and/or target extraneous topics. Little connection between program and instructional goals. Goals are set at an
inappropriate level of difficulty (students may already be able to achieve them) Lesson plan goals are stated in measurable
terms about observable behavior and are related to unit plan goals, goals are linked to state standards. Level of difficulty will
require student learning to achieve them. Goals are realistic and based on pre-assessment of student needs Lesson plan
goals are written for all 3 domains and demonstrate continuous progress toward reaching unit goals. When appropriate goals
specify both process and product. Lesson plan goals are written for all 3 domain, are measurable, s and demonstrate
continuous progress toward reaching unit goals. When appropriate goals specify both process and product. Analysis of
Findings for Key Assessment #3 Planning (Pedagogical Knowledge and Skills) There are three assessments that comprise
planning (pedagogical knowledge and skills). These include contextual analysis and rational for the teaching model selected
in the respective class, block and lesson plans, and learning goals and objectives. HPE candidates do very well on these
assessments due to the design of the overall program (see Tables 2D and 2E). The design is integrative in nature: HPE
candidates start early in their career at GSU in all aspects of planning from curriculum plans to unit plans and daily lesson
plans. This is due in large part to the heavy field based series of courses that combine theory and practice starting in the
junior year and are completely field based in the senior year. Thus, HPE candidates have multiple opportunities throughout
the program to develop their skills in writing effective curriculum plans, unit plans, daily lesson plans, and IEP (Individual
Education Plans). These plans are broad in scope across the P-12 curriculum in health, physical education, and adapted
physical education Each of the three assessments comprising planning is addressed below. Contextual Analysis and
Rationale. Data from this key assessment show that 83% and 40% of the BSEd and Non-T4 candidates, respectively, were
very good in writing a contextual analysis and rationale prior to student teaching. After the completion of student teaching 83%


% of HPE candidates were outstanding in writing a contextual analysis. Block and Lesson Plans. Data from this key assessment show that 71% and 80% of the BSEd and Non-T4 candidates, respectively, were very good in writing block and lesson plans midway through their program. By the end of student teaching 83% of students were rated as outstanding in writing block and lesson plans. Learning Goals and Objectives. Data from this key assessment show that 57% and 50% of BSEd and Non-T4 candidates rate very good in the writing of learning goals and objectives prior to student teaching with 83% being outstanding in writing learning goals and objectives at the end of student teaching.

M 3: Goal 3: Effects on P-12 Student Learning (O: 3)

Key assessment for this goal and corresponding objective is the analysis of student learning. As part of their models project in KH 4520 and KH 4710 students are required to use multip types of assessments to determine P-12 student's learning HPE material. GSU students are then required to report the data from these assessments, analyze the results from their assessments and describe the changes they will and/or did make to their teaching to address the findings of their assessments. HPE faculty use the HPE key assessment rubric to grade student's assessment project (this project is part of the model's project).

Source of Evidence: Portfolio, showing skill development or best work

Target for O3: Goal 3: Effects on P-12 Student learning

80% of HPE students should achieve a rating of 4 on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

Findings 2011-2012 - Target: Met

Explanation of How Analysis of Student Learning is Used in the HPE Program. Prior to student teaching, candidates complete a field-based course (KH 4520 for BSE, KH 7250 for Non-T4) that requires them to analyze their ability to positively impact P-12 students’ learning. All candidates in the program complete one (Non-T4) or two (BSE) instructional models project/s during student teaching. The models project is a comprehensive instructional unit that includes pre- and post-assessments of major learning outcomes for P-12 students. By comparing learning gains across the span of the unit, candidates determine and analyze the impact they have on P-12 student learning. It is important to recognize that candidates are at the novice level of understanding and using assessments. In addition, the types, and amount of assessments chosen and used are linked to and differ for the type of instructional mode selected and the anticipated outcomes for that model. Rubric for Scoring Analysis of Student Learning Unsatisfactory 1 point Needs Improvement 2 points Satisfactory 3 points Very Good 4 points Outstanding 5 points. Analysis of Findings of Effects on P-12 Student Learning. KH 4520 was the first class students were required to conduct an analysis of student learning. A total of 28% of candidates scored very good on their ability to demonstrate their impact on student learning. KH 7250 serves as the first class in which graduate HPE non-T4 candidates completed this same assessment. Here to, 40% of candidates received a score of very good. HPE candidates completed an analysis of student learning in KH 4710 as part of their student teaching requirements. At this time, 83% of candidates received a score of outstanding.

M 4: Goal 4: Clinical Practice (O: 4)

The key assessment for this goal and objective include lesson reflections. As part of their requirement in KH 4710 (student teaching), GSU students are required to complete several different types of reflection assignments. These assignments are both incorporated into the models project and extend beyond the models project. Students have to complete a written reflection for each lesson plan they complete during student teaching, including the lessons taught as part of their models project. GSU students also have to write a final reflection paper summarizing what they learned about themselves as teachers and what they would do differently. The HPE key assessment rubric is used by all faculty to evaluate student’s reflection papers.

Source of Evidence: Portfolio, showing skill development or best work

Target for O4: Goal 4: Clinical Practice

80% of HPE students should achieve a rating of 4 on the HPE Key Assessment Rubric equating to a qualitative rating of very good/outstanding.

Findings 2011-2012 - Target: Met

Explanation of How Lesson Reflections are Used in the HPE Program Lesson reflections are used to determine the degree to which candidates; (a) develop an ability to engage in self-evaluation in assessing strengths as well as areas of need; (b) provide reexamination of personal goals and values in view of the complex demands of teaching and (c) analyze and assess personal characteristics related to teaching (e.g., perception of self and others, classroom behaviors, attitudes about children/teenagers and teaching, knowledge and skills), which are deemed prerequisite for becoming a successful teacher. Rubric for Scoring Lesson Reflections Unsatisfactory 1 point Needs Improvement 2 points Satisfactory 3 points Very Good 4 points Outstanding 5 points. Analysis of Lesson Reflections Lesson reflections were the key assessment to evaluate clinical practice. Prior to student teaching 71% of BSEd candidates received very good ratings for their lesson reflections. At the end of student teaching 80% of students were outstanding in writing lesson reflections. These numbers suggest that candidates have developed an increased ability to engage in self-evaluation not only on what they do as teachers but they are strongly aware of the reasons their decisions may or may not have been effective as well as providing suggestions and insights on what and how they would change things for the future.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Use of Assessment Results to Improve Performance

The following discussion is a summary of the principle findings, faculty’s interpretations of those findings and changes planned for the preparation program resulting from analysis of the data. Steps the HPE faculty will take to use the information from assessments for improvement of both candidate performance and the preparation program also are addressed. Content Knowledge Summary of principal findings. After analyzing the data from the two major assessments chosen to demonstrate content knowledge (GACE and average GPA for content courses) it can be determined that these two assessments measure the content knowledge of HPE candidates. GSU program completers are passing the GACE content knowledge test with between 88-98% pass rates and have pass rates within 2 percentage points and above on all 6 subareas on tests 115 and 116. In addition, HPE candidates have a content core average GPA of 2.97, 3.1 and 3.24 for the last three years, respectively. Steps taken to use information from assessments. The HPE faculty as a group are reflective and responsive to candidate performance. Last year, in response to faculty perceptions regarding the sequencing of course content, the HPE faculty developed a content matrix for the Initial preparation program (BSEd and Med non-T4) to better determine in which courses specific content was taught. This information serves two purposes; the first is to
improve student performance, and the second, to ensure the program effectively addresses the dual curriculum of health and physical education across P-12. Changes planned for the preparation program. The current plan is to maintain and monitor both GACE and average GPA. Candidates’ subscores will be shared with program faculty responsible for teaching related content so they can improve or add additional time for developing content in existing classes. Scores also will be shared with HPE faculty so we can revise curriculum sequencing and/or add new courses to ensure content is effectively addressed. Lastly, the HPE faculty plan to review core content average GPA at each transition point in the program. Professional and Pedagogical Knowledge, skills and Dispositions (including planning, clinical practice and dispositions) Summary of principal findings. There are multiple assessments for analyzing HPE candidates’ professional and pedagogical knowledge, skills and dispositions. These include a contextual analysis, lesson planning, learning goals and objectives, lesson reflections, task presentation, analysis of student learning, and dispositions. After analyzing the data from the contextual analysis, lesson planning, and learning goals and objectives between 84-92% of candidates were very good or outstanding in their performance across these three assessments at the end of student teaching suggesting that HPE candidates have a readiness to teach and a confidence and clarity to meet their teaching goals, ensure continuity of learning from lesson to lesson, provide for individual differences and strive to adapt learning material to the needs of the students. On lesson reflections, 84% of candidates were rated very good or outstanding at the end of student teaching suggesting that candidates developed the ability to engage in self-evaluation not only on what they did as teachers but on the reasons their decisions may or may not have been effective. Following student teaching, 81% of candidates were very good or outstanding in task presentation highlighting the importance of full time teaching with full classes of students to strength teaching skills. Data from dispositions (100% rated as very good by faculty) are strongly supportive of the professional expectations and behaviors demonstrated by candidates at the end of student teaching. Steps taken to use information from assessments. The information from these assessments e.g., goals and objectives, has been used, where appropriate and relevant to adjust assignment directions and the grading rubric for the models project conducted during the second half of student teaching this Spring 2011. Changes planned for the preparation program. The current plan is to maintain the assignment selection and to review the expectations and directions for each assignment to ensure candidates are given clear guidelines. The HPE faculty will continue to work on a content matrix for the MeD program including the non-T4 candidates to ensure candidates across the two programs are gaining similar quality and quantity experiences. The content matrix will help ensure improvements of both HPE candidate performance and the preparation program in general. To this end, efforts are currently underway to revise the MeD non-T4 program to include a full 16 weeks of full time student teaching in place of the current 8 weeks of student teaching. Non-T4 candidates, who are not currently employed by a school district, will do two student teaching placements at the elementary and middle or high school, similar to that done by BSEd candidates. Several changes for the BSEd program go in effect Fall 2011 which are anticipated to improve candidate performance in the areas of pedagogical knowledge and skills. These changes include: (a) moving KH 3420 to the fall semester to be taught with KH 3200, (b) having KH 3020, 3030, and 3040 taught by full time HPE faculty, and (c) having teacher education requirements completed prior to taking courses in area G. Lastly, the HPE faculty plan to maintain and monitor the disposition data yearly to maintain current levels and will implement PDP’s where necessary to help candidates improve their performance in this area. Impact on Student Learning Summary of principal findings. Data for this assessment are taken from an instructional models project, a major unit involving planning, teaching and assessing student learning. HPE candidates scored well on this assessment with 91% of candidates obtaining a rating of satisfactory, very good or outstanding at the end of student teaching suggesting that candidates are able to alter their plans based on results from daily assessments. Steps taken to use information from assessments. Any immediate action with regard to this assessment would have had negative and detrimental effects on the performance of candidates currently in their second half of student teaching. Steps to use this information going forward are outlined below. Changes planned for the preparation program. While the assignment itself is a meaningful exercise in combining planning, teaching and assessment, the HPE faculty will have to revisit the expectations for this assignment as well as the explanations for project completion to ensure that candidates demonstrate their best and most thorough work and to better evaluate the impact on student learning. Additionally, the expectations for assessing P-12 student learning must be reviewed to better reflect the real constraints of teaching physical education in schools.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Responsible Person/Group: The HPE faculty as a group are responsible for ensuring the goals and objectives are met and the recommended changes are put in place.

Use of Assessment Results to Improve Performance
See description of the Use of Assessment Results to Improve Performance discussed in the Planned section.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In the previous year we tested the effectiveness of changes made to our rubric and evaluated the link of key assessments with goals and objectives. In the previous year we also revised the instructions and expectations for the respective key assessments. In the coming year we will continue to monitor assignment instructions and assignment quality based on the rubric and make any changes necessary to ensure students continue to perform to meet and/or exceed expectations.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data obtained illustrate the strength of the HPE program in terms of both its faculty and its content. Changes and improvements focus on both improving areas that are currently strong and strengthening areas that are weaker to ensure a strong program that prepares students to be effective teachers and contributing members in the school community.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

This past year we implemented the rubric designed the previous year to assess student competence on selected key assessments.
**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

We learned that we developed an effective rubric from which to evaluate key assessments. We also learned that the assignment selection is meaningful and appropriate reflection of student learning and performance.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We will use the knowledge this year to continue to monitor improvements as the impact of some course changes will not be evident for another year when upcoming students will have taken courses with revised content corresponding to the goals and objectives previously outlined.

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Health & Physical Education MEd**

(As of 12/12/2016 04:41 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The Health and Physical Education Program seeks to develop competent leaders who provide and promote Health and Physical Education in P-12 schools.

**Goals**

**G 1: should be committed to increasing student learning and development**
Candidates that graduate from this program should be committed to increasing student learning outcomes and development

**G 2: should be able to use their content knowledge and expertise to help their students learn and grow**
Candidates that graduate from this program should be able to use their content knowledge and expertise to help their students learn and grow professionally

**G 3: should be able to work with colleagues in order to increase their content knowledge and appreciate the professional association**
Candidates that graduate from this program should be able to work with colleagues in order to increase their content knowledge and appreciate the professional associations as beneficial to their learning

**G 4: should be able to manage and assess student learning**
Candidates that graduate from this program should be able to manage and assess student learning. Using assessment results, candidates should be able to make appropriate adjustments to their teaching process for the purpose of the enhancement of student learning.

**G 5: should be able to reflect on & learn from professional experience**
After teaching, candidates should be able to reflect on their lessons, seeking ways to improve teaching effectiveness. Drawing from content and pedagogical knowledge, candidates should be able to continually seek to increase their knowledge and teaching effectiveness.

**Student Learning Outcomes/Objectives**

**SLO 1: Should be able to demonstrate the ability to plan (G: 2, 4) (M: 1)**
Candidates graduating from this program should be able to demonstrate the ability to plan effective instructional units for K-12 students

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

**SLO 4: should be able to plan and teach using a variety of HPE instructional models (G: 1, 2) (M: 4)**
Candidates that graduate from this program should be able to plan and teach using a variety of physical education and health instructional models

Relevant Associations:
General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

SLO 5: should be able to conduct research & synthesize the findings in a written document (G: 3) (M: 5)
Candidates that graduate from this program should be able to conduct research on a topic of interest and synthesize the findings in a written document

Relevant Associations:

General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

Other Outcomes/Objectives

O/O 2: should be able to demonstrate the ability to teach, reflect, and make appropriate modifications for improving teaching (G: 1, 2, 4, 5) (M: 2)
Candidates that graduate from this program should be able to demonstrate the ability to teach K-12 students, reflect on their teaching effectiveness, and make appropriate modifications for improving their teaching practice

General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

O/O 3: should be able to systematically supervise other teachers (G: 3, 5) (M: 3)
Candidates that graduate from this program should be able to supervise other teachers (preservice or inservice) and use systematic observation data to guide their supervision feedback

Relevant Associations:

General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

<tr>
<td>Target is 75% of program completers with at least 6 of the 9 indicators in the Unit Plan Project scored as Acceptable or Target.</td>
</tr>
<tr>
<td><strong>Findings 2011-2012 - Target: Met</strong></td>
</tr>
<tr>
<td>All of our KH 7240 students demonstrated the ability to plan an instructional unit towards the end of the semester</td>
</tr>
</tbody>
</table>

| **M 2: Teaching experience (O: 2)** |
| Teacher candidates are required to teach a unit of instruction. The unit will last approximately 6 days (elementary) or 10 days (secondary). Candidates are required to reflect on the experience, submit videos of them teaching the classes, and a summary of the experience |
| Source of Evidence: Performance (recital, exhibit, science project) |
| **Target for O2: should be able to demonstrate the ability to teach, reflect, and make appropriate modifications for improving teaching** |
| Target is 75% of program completers reaching a score of at least 25 (out of 30) on the instructional portion of the KH 7250 Models Project. |

| **M 3: Project to demonstrate supervision competence (O: 3)** |
| This project is a final project for the EDUC 8360 class. Following several exercises designed to teach them how to supervise others, teacher candidates are required to submit a final project where they actually do a live supervision with another teacher and then provide feedback to this teacher with the intent of improving teaching performance. Following the supervision experience, candidates are required to summarize the experience using data from the observation and a re-cap of the feedback provided to the person observed. |
| Source of Evidence: Project, either individual or group |
| **Target for O3: should be able to systematically supervise other teachers** |
| Target is 75% of program completers scoring at least 25 (out of 30) on both the digital and peer supervision projects. |
| **Findings 2011-2012 - Target: Met** |
| Of the 7 students who submitted their supervision project by the due time all met the target and received at least 25 points out of the 30 available points for the live supervision project. |

| **M 4: KH 7250 Instructional models project (O: 4)** |
| This project can be completed in either the health or physical education content area. Candidates are required to develop a unit of instruction using an instructional model that is most appropriate for the context in which the model will be taught. Candidates are then expected to teach the model to K-12 students and then reflect on the experience (successes, areas that could be improved, next steps to help them grow). |
| Source of Evidence: Project, either individual or group |
| **Target for O4: should be able to plan and teach using a variety of HPE instructional models** |
| Target is 75% of program completers scoring at least 30 (out of 40) points on the KH 7250 models project assignment. |

| **M 5: Research synthesis (O: 5)** |
| The purpose of this assignment is to develop teacher candidate ability to develop a research question and then conduct a complete review of the extant literature on that topic. The teacher candidate writes the research synthesis and then presents it to other students in KH 7820. |
| Source of Evidence: Written assignment(s), usually scored by a rubric |
| **Target for O5: should be able to conduct research & synthesize the findings in a written document** |
| Target is 75% of program completers scoring at least 37 (out of 45) on the major paper in KH 7820. |

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assessing planning skills and knowledge**
Five areas have been identified in which at least one student was assessed as "Not Met": Needs assessment, Instructional analysis, Arrangement of resources, Monitoring system, and Evaluation system. However, in most areas, only 1 or 2 students did not meet the stated criterion, so the deficiencies are not deemed to be severe. The course instructor will provide added emphasis on these areas in the future, and monitor students with formative assessments during each course.

**Established in Cycle:** 2008-2009
**Implementation Status:** Finished
**Priority:** Low
Assessing Unit planning

While this standard was "Met" by all but one student, there was a scattering of "Not met" by a few students on some parts of this major project. The action plan is to conduct additional guidance as students plan this project, and to use formative assessments as they develop this project—rather than use summative assessments only. Starting in the spring of 2010 (next time this course is offered), the instructor will have developed rubrics for "progress reports" and assessments on this major project.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Low

Assessment of supervision knowledge and skills

Students are performing well in this area. The action plan is to maintain this level of performance while monitoring students in subsequent course sections.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Low

Assessment of teaching

In several assessed areas at least one student was rated as "Not met": Knowledge of growth and development, Communicative skills, Use of class time, Instruction, Evaluation of students, Self evaluation, Planning/preparation, Teacher/Student interaction in class, and Class climate. While the number of areas is substantial, in most areas it was only one student who did not meet the standard; and it was almost always the same student. In the future the course instructor will conduct more formative assessments during the course, to identify students who are not meeting this standard at those times. Additional monitoring and interaction with the instructor will be planned for those students, as needed.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Medium

Summary of 2008-2009 Assessment data

Using the selected assessments in 2008-2009, it was determined from the Faculty end-of-program ratings that 100% of all students were meeting each of the five NBPTS Standards. The data were essentially the same for the 2007-2008 program completers, indicating consistency over time. Nonetheless, the HPE graduate faculty have begun discussions to revise the major research project in the program, away from the Collaborative Action Research (CAR) Project, to participation in ongoing faculty research efforts. Those discussions will proceed through the 2009-2010 academic year.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High

Maintain and monitor

The assessment used to measure this outcome appears to be appropriate, and all completers met the stated objective. There is no need for change at this time.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
**Maintain and monitor**

The assessment used to measure this outcome appears to be appropriate, and all three completers scored above the stated criterion, demonstrating their ability to conduct a research literature synthesis. There is no need to change at this time.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High

**Additional Resources:**

- None

---

**Re-calibrate the rubric used in this assessment**

The rubric currently used in this assessment appears to be too stringent, as many more of the indicators should have been scored as "Target" but going by the definitions in the rubric had to be scored as "Acceptable."

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High

**Additional Resources:**

- None

---

**Refine supervision project**

I will go back to the course assignment and refine the supervision assignment to reflect a better supervision project that allows more students to be successful in completing it.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: Medium

---

## Administrative residency and field study

The two semester health care management residency facilitates the transition from the classroom to the workplace by providing students with an entry point and extensive exposure to a health care management career. The full-time, off-campus residency assures that all graduates have an integrated experience that applies didactic knowledge in a real world health care setting.

- **Established in Cycle:** 2008-2009

- **Measure:** Development of student knowledge areas

### Curriculum improvements and competencies

CAHME accreditation is requiring that all HA programs be competency based. The Institute is in the process of selecting a base competency model, modifying where appropriate, mapping the curriculum content areas to the competencies, and evaluating the measures to assess attainment of the competencies. HA has further refined our competency model for our CAHME accreditation. It consists of 4 domains, 26 competencies, and about 80 benchmarks for these competencies. AY 11-12 is our self-study year. A capstone case course HA 8680 is being implemented MayMester 2012

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

### Relationships (Measure | Outcome/Objective):

- **Measure:** % CAHME educational content areas provided | **Objective:** Competency in Business skills and knowledge
- **Measure:** Competency in Knowledge of the healthcare environment | **Objective:** Competency in Leadership knowledge and skills
- **Measure:** Competency in professionalism knowledge/skills | **Objective:** Develop real world experience in the HA field

- **Measure:** Quality of Instructors and SEIP ratings for H.A. | **Objective:** Develop real world experience in the HA field
- **Measure:** Student evaluation of H.A. program | **Objective:** Develop real world experience in the HA field
- **Measure:** Preceptor evaluation of student performance during residency, on-site visits, and residency presentations
- **Measure:** Development of student knowledge areas

### Additional Information

- **Projected Completion Date:** 05/2014
- **Responsible Person/Group:** Dr. Andrew Sumner and Dr. Pat Ketsche

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Curriculum improvements and competencies**

CAHME accreditation is requiring that all HA programs be competency based. The Institute is in the process of selecting a base competency model, modifying where appropriate, mapping the curriculum content areas to the competencies, and evaluating the measures to assess attainment of the competencies. HA has further refined our competency model for our CAHME accreditation. It consists of 4 domains, 26 competencies, and about 80 benchmarks for these competencies. AY 11-12 is our self-study year. A capstone case course HA 8680 is being implemented MayMester 2012

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

### Relationships (Measure | Outcome/Objective):

- **Measure:** % CAHME educational content areas provided | **Objective:** Competency in Business skills and knowledge
- **Measure:** Competency in Knowledge of the healthcare environment | **Objective:** Competency in Leadership knowledge and skills
- **Measure:** Competency in professionalism knowledge/skills | **Objective:** Develop real world experience in the HA field
- **Measure:** Provide CAHME specified competencies areas
- **Measure:** Assessment of residents by HA faculty | **Objective:** Develop real world experience in the HA field
- **Measure:** GPA of each HA student | **Objective:** Provide CAHME specified competencies areas
- **Measure:** Capstone questions | **Objective:** Develop real world experience in the HA field
- **Measure:** Preceptor evaluation of student knowledge areas | **Objective:** Develop real world experience in the HA field
- **Measure:** Quality of Instructors and SEIP ratings for H.A. | **Objective:** Develop real world experience in the HA field
- **Measure:** Student evaluation of H.A. program | **Objective:** Develop real world experience in the HA field
- **Measure:** Preceptor evaluation of student performance during residency, on-site visits, and residency presentations
- **Measure:** Development of student knowledge areas

### Additional Information

- **Projected Completion Date:** 05/2014
- **Responsible Person/Group:** Dr. Andrew Sumner and Dr. Pat Ketsche

---

**Administrative residency and field study**

The two semester health care management residency facilitates the transition from the classroom to the workplace by providing students with an entry point and extensive exposure to a health care management career. The full-time, off-campus residency assures that all graduates have an integrated experience that applies didactic knowledge in a real world health care setting.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

### Relationships (Measure | Outcome/Objective):

- **Measure:** % CAHME educational content areas provided | **Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field
- **Measure:** Preceptor evaluation of student knowledge areas | **Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field
- **Measure:** Quality of Instructors and SEIP ratings for H.A. | **Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field
- **Measure:** Student evaluation of H.A. program | **Objective:** Competency in professionalism knowledge/skills
- **Measure:** Develop real world experience in the HA field
- **Measure:** Preceptor evaluation of student performance during residency, on-site visits, and residency presentations
- **Measure:** Development of student knowledge areas

### Additional Information

- **Projected Completion Date:** 05/2014
- **Responsible Person/Group:** Dr. Andrew Sumner and Dr. Pat Ketsche
Implementation Description: Fall 2010 target for CAHME competencies in IHA
Projected Completion Date: 05/2012
Responsible Person/Group: Dr. Andrew Sumner and Dr. Pat Ketsche

Additional Resources: Development and Implementation of CAHME competencies requires much additional faculty effort.

Marketing of MHA and MSHA program
Many potential students are not aware of HA area of study, including many that are int eh MBA, PMBA and MS programs at GSU.
Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: % CAHME educational content areas provided | Outcome/Objective: Competency in Knowledge of the healthcare environment
Measure: Preceptor evaluation of student knowledge areas | Outcome/Objective: Competency in Knowledge of the healthcare environment
Measure: Quality of Instructors and SEIP ratings for H.A. | Outcome/Objective: Competency in Knowledge of the healthcare environment
Measure: student evaluation of H.A. program | Outcome/Objective: Competency in Knowledge of the healthcare environment

Responsible Person/Group: Dr. Andrew Sumner and Dr. Pat Ketsche

Georgia State University
Assessment Data by Section
2011-2012 Health Science-Nutrition MS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
To prepare professionals who enhance individual and community health through dietetics practice and to contribute to professional and scholarly knowledge in the fields of nutrition and dietetics.

Goals
G 1: Knowledge of Research Techniques
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are entry-level researchers who have knowledge of research techniques needed to interpret and conduct nutrition research.

G 2: Effective Communication Skills
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are highly effective educators whose communication skills are appropriate for advanced practitioners in the field of nutrition/dietetics.

G 3: Advanced Knowledge of Nutrition
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are informed practitioners who have advanced knowledge of nutrition needed to meet the needs of clients and patients.

G 4: Knowledge of Health Care Policies
Candidates in the Master of Science in Health Sciences with a concentration in Nutrition program are informed health care professionals who have knowledge of health care policies needed to successfully provide services to clients and patients.

Student Learning Outcomes/Objectives

SLO 1: Design, Interpretation and Conduct of Research (M: 1)
Candidates demonstrate entry-level competence in the design, interpretation, and ethical conduct of nutrition research.

SLO 2: Use of Current and Emergent Technologies to Enhance Nutrition Care (M: 2)
Candidates demonstrate technical and scientific oral and written communication skills through the use of current and emerging technologies to enhance the practice and delivery of nutrition care in a professional and ethical manner.

SLO 3: Comprehend Interrelationships between Macro- and Micronutrient Intakes (M: 3, 4)
Candidates will comprehend the interrelationships between macro- and micronutrient intakes as they impact human health in normal and disease states.

SLO 4: Understand the Essential Components of Delivering Health Services (M: 5)
Candidates will successfully evaluate contemporary principles of health policy in the U.S. and other countries to better understand the essential components of delivering health services.
### Measures, Targets, and Findings

#### M 1: Research Proposal Assignment (O: 1)
**SNHP 6000** (Research Methods for Health Professionals) – Research Proposal Assignment  
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Design, Interpretation and Conduct of Research**

- Target – Of the total points available, 25% of students will receive a score of >90% and 75% of students will receive a score of >80%

#### Findings 2011-2012 - Target: Met

- 7 of 9 (78%) scored >90%; 9 of 9 (100%) scored >80%

#### M 2: Research Presentation (O: 2)
**NUTR 6012** (Orientation to Practice) – Research Presentation  
Source of Evidence: Presentation, either individual or group

**Target for O2: Use of Current and Emergent Technologies to Enhance Nutrition Care**

- Eighty percent of student groups will receive an evaluation of “exceeds expectations” or “meets/exceeds expectations” on all presentation evaluation criteria by the majority of the evaluators

#### Findings 2011-2012 - Target: Met

- 80% (4 of 5 groups) received an evaluation of exceeds or meets/exceeds expectations on all presentation evaluation criteria by the majority of the evaluators

#### M 3: Macronutrients Final Exam (O: 3)
**NUTR 6104** (Advanced Normal Nutrition – Macronutrients) – Final Exam  
Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Comprehend Interrelationships between Macro- and Micronutrient Intakes**

- Of the total points available on the exam, 25% of students will score >90% and 75% will score >80%

#### Findings 2011-2012 - Target: Met

- 10 of 19 (53%) scored >90%; 17 of 19 (89%) scored >80%

#### M 4: Micronutrients Quizzes (O: 3)
**NUTR 6106** (Advanced Normal Nutrition – Micronutrients) - Five quizzes are given during the semester  
Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Comprehend Interrelationships between Macro- and Micronutrient Intakes**

- Of the total points available on the quizzes, 10% of students will score >90% and 50% will score >80%

#### Findings 2011-2012 - Target: Partially Met

- 0 of 11 students (0%) scored >90%; 7 of 11 students (64%) scored >80%

#### M 5: Trends Affecting Health Policy Assignment (O: 4)
**SNHP 8000** (Trends Affecting Health Policy) – Debate on Trends Affecting Health Policy Assignment  
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Understand the Essential Components of Delivering Health Services**

- Of the total points available on the assignment, 25% of students will score >90% and 75% will score >80%

#### Findings 2011-2012 - Target: Met

- 31 of 31 (100%) scored >90%

#### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Additional Reviewers and Criteria**

- Only 3 faculty reviewers were available to evaluate the students’ presentations. A greater number of reviewers will be recruited in the future. An additional criteria (response to audience questions) will be added to the evaluation form to evaluate understanding of the project and ability to provide a response.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 01/2012

**Assignment Change**

The Research Proposal Assignment will be changed from a group project to an individual project to ensure that all students gain experience with all components of the research proposal process.
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 07/2011

Continue to Monitor
Continue to monitor this assessment
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Continue to Monitor
This is a new measure. NUTR 6106 (Advanced Normal Nutrition - Micronutrients) is a required and very challenging course.
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Continue to Monitor
This assessment measure will continue to be monitored as the faculty instructor changed from academic year 2010-2011 to 2011-2012
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Trends Affecting Health Policy Assignment | Outcome/Objective: Understand the Essential Components of Delivering Health Services

Continue to Monitor
Continue monitoring this assessment and encourage students to utilize this assignment as a means of beginning their research interest for a future thesis project
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Research Proposal Assignment | Outcome/Objective: Design, Interpretation and Conduct of Research

Continue to Monitor
The target for at least 10% of students to achieve >90% on the quizzes was not met but we did meet the target for 50% of students achieving >80%, which is an improvement from the 2010-2011 academic year. We will continue to monitor student progress in NUTR 6106 (Advanced Normal Nutrition - Micronutrients). NUTR 6106 is a core course in the graduate curriculum. Students who are not successful in this course will need assistance in order to function as a nutrition professional.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Micronutrients Quizzes | Outcome/Objective: Comprehend Interrelationships between Macro- and Micronutrient Intakes

Continue to Monitor
The target for this assessment measure was not met in the last academic year but was met in the current academic year. We will continue to monitor this assessment.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Research Presentation | Outcome/Objective: Use of Current and Emergent Technologies to Enhance Nutrition Care

Continue to Monitor
This assessment measure was not met in the last academic year but was met in the current academic year. We will continue to monitor this assessment measure.
Established in Cycle: 2011-2012

Priority: High

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

All Goals, Objectives and Measures were revised for academic year 2010-2011 and forward to reflect the core learning outcomes for the Master of Health Sciences with a concentration in nutrition program. Additional assessment measures may be added in the coming academic year.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

All targets were met in academic year 2011-2012. Two required courses for the Master of Health Sciences with a concentration in nutrition (NUTR 6104 and NUTR 6106) will be converted to an online format in an effort to provide a program that is accessible to working Dietitians. The assessments will permit evaluation of student success before and after the format change.

Georgia State University
Assessment Data by Section
2011-2012 History Assessment of Core
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The U.S. History Survey (2110) introduces students to the fundamentals of historical thinking and historical methods through analysis of political, economic, and social developments in the United States.

Goals
G 1: Historical Knowledge and Critical Thinking Skills
The history department expects students of the U.S. History Survey to develop an aptitude for the knowledge and the critical thinking skills necessary to historical literacy and historical analysis.

Student Learning Outcomes/Objectives
SLO 1: Source Differentiation (M: 1)
Students in 2110 will be able to identify and differentiate primary and secondary sources, and to analyze and interpret them.

SLO 2: Encounters and Conflicts in Historical Context (M: 2)
Students in 2110 will be able to discuss and analyze historical developments across cultural and geographic boundaries, with an appreciation for how historical context, change over time, and/or spatial dimensions affect historical responses.

SLO 3: Historical Geography (M: 3)
Students in 2110 will demonstrate knowledge of the historical geography of the United States.

Measures, Targets, and Findings
M 1: Source Differentiation (O: 1)
A student who receives a 1 cannot differentiate a primary source from a secondary source. A student who receives a 2 is able to differentiate a primary source from a secondary source, but not able to put those differences to use in historical interpretation. A student who receives a 3 can both differentiate primary sources from secondary sources and put those differences to use in historical interpretation.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Source Differentiation
60% to receive 2 or above; 30% to receive 3

Findings 2011-2012 - Target: Not Reported This Cycle
No data collected for 2011-12.

M 2: Encounters and Conflicts in Historical Context (O: 2)
A student who receives a 1 cannot understand or explain encounters or conflicts within or between past cultures within their historical context; no awareness of change over time. A student who receives a 2 can analyze encounters or conflicts within or between past cultures, and is able to use historical context to demonstrate rudimentary understanding of multiple historical perspectives and change over time. A student who receives a 3 can analyze encounters or conflicts within or between past cultures; is able to use historical context to competently recognize and interpret multiple historical perspectives and change over time.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Encounters and Conflicts in Historical Context**

</tbody>
</table>

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Designate new specific skills for assessment**
Identify more precisely the discipline-relevant student critical thinking skills that can be measured in assessments and can provide data for ongoing tracking of student progress.

**Established in Cycle:** 2007-2008
**Implementation Status:** Finished
**Priority:** Medium
**Implementation Description:** October 08
**Responsible Person/Group:** Freshmen Studies Committee

**Establish new measurements to assess student learning**
Develop an assessment rubric for the specific critical thinking skills identified in Action 1 that can measure student progress across assignments over the course of the semester

**Established in Cycle:** 2007-2008
**Implementation Status:** Finished
**Priority:** Medium
**Implementation Description:** October 08
**Responsible Person/Group:** Freshmen Studies Committee

**Assess data**
Collect and assess data for fall 2012 and spring 2013. Submit findings into WEAVE.

**Established in Cycle:** 2011-2012
**Implementation Status:** Planned
**Priority:** High

**New Assessment Process**
For the cycle 2012-13, we have revised the Outcomes, Measures, and assessment rubric for the Core. We will begin collecting data for HIST 2110 in the fall of 2012, and will continue to do so through the spring of 2013.

**Established in Cycle:** 2011-2012
**Implementation Status:** In-Progress
**Priority:** High

**Revise Assessment Instrument (Rubric)**
After collecting and assessing data from 2012-13, revise rubric so that it includes a category of "Excellent." Incorporate feedback from instructors and faculty teaching 2110.

**Established in Cycle:** 2011-2012
**Implementation Status:** Planned
**Priority:** High
Mission / Purpose

Description: The Department of History at Georgia State University is committed to excellence in the advancement of knowledge through the study of various aspects of humanity’s recorded past. Some members of the department explore the rise and fall of empires, while others describe the everyday lives of men and women. The department is interested in every period of the past and all parts of the world. The department also seeks to advance knowledge by examining the principles and theories that influence the writing of history, seeking to understand the forces that have structured human life and the ideas that have shaped the way people perceive and experience their worlds. The department is concerned with change and continuity within societies, and interactions among cultures. The department pays particular attention to the effect of perspectives and values because the discipline of history involves the interpretation of findings, not just the collection of facts. Through dedicated research, teaching, and service, the department’s work benefits students, colleagues, policy makers, and the public. Established in Cycle: 2005-2006 Active Through: 2009-2009 Entry Status: Final Last Updated By: Migration Tool on 10/13/2008 Established By: Migration Tool on 10/13/2008

Goals

G 1: Professional skills and values
The history department works to ensure that its majors know how to access, use, and evaluate various kinds of historical evidence to determine relative worth, while teaching students professional values regarding fidelity to sources and how to build upon the scholarship of others.

G 2: Interdisciplinary and Comparative Perspectives
The history department is committed to helping students develop an awareness of historiography -- that is differing interpretations or debates over particular historical questions -- while encouraging interdisciplinary and comparative approaches to the past.

Student Learning Outcomes/Objectives

SLO 1: Professional Skills (G: 1) (M: 1)
The history student is able to evaluate the relative worth of different types of evidence (textual, material, media, oral, visual, quantitative and statistical); to listen to and learn from others while exchanging information and ideas; to evaluate and critique different historical perspectives and explanations; to present arguments persuasively within a conversational setting as well as a written format; and to write clearly, economically, imaginatively and persuasively about historical facts, issues, and interpretations. The history student is able to use effectively sources that come from libraries, archives, and oral interviews, and to document sources properly while demonstrating computer skills appropriate to the discipline.

SLO 2: Historiography (G: 2) (M: 1)
The history student, knowing that history asks questions of evidence, can demonstrate an awareness of how differing questions result in conflicting interpretations of the same evidence over time.

SLO 3: Interdisciplinary Awareness (G: 2) (M: 1)
The history student understands the benefits of interdisciplinary approaches to studying the past by recognizing contributions from such fields as anthropology, archaeology, art history, economics, geography, literature, philosophy, political science, psychology, sociology and statistics.

SLO 4: Comparative/Global/Transnational Perspective (G: 2) (M: 1)
The history student is able to compare historical developments and problems across cultural, geographical, and national boundaries, while appreciating how temporal, cultural, and spatial dimensions affect historical responses.

SLO 5: Professional Values (G: 1) (M: 1)
Aware of the debt all historians have to the scholarship of others, the history student engages in historical research and discourse that maintains fidelity to evidence while being tolerant of alternative approaches to obtaining, interpreting, and applying historical knowledge.

Measures, Targets, and Findings

M 1: capstone course seminar paper (O: 1, 2, 3, 4, 5)
For 2012, five members of the Department of History Undergraduate Studies Committee read a randomly selected sample of fifteen student research papers (three papers each from five different classes) written for HIST 4990 in Fall 2011 and Spring 2012 Semesters. The papers were evaluated on a 1-4 scale with 1 meaning no evidence of outcome, 2 meaning some evidence of outcome, 3 meaning met expectations, and 4 meaning exceeded expectations. Five Standard Learning Outcomes were assessed with 1LO being professional skills, 2LO being historiography, 3LO being interdisciplinary awareness, 4LO being comparative/global/transnational perspective, and 5LO being professional values. The results are listed under 2011-2012 Assessment Summary/Findings. During 2011, the Department of History Undergraduate Studies Committee evaluated 18 final research papers written for the Department of History Capstone Course Hist 4990 taken from classes offered in Spring 2010, Fall 2010, and Spring 2011. The papers were evaluated on a 1-4 scale with 1 meaning no evidence of outcome, 2 meaning some evidence of outcome, 3 meaning met expectations, and 4 meaning exceeded expectations. Five Standard Learning Outcomes were assessed with 1LO being professional skills, 2LO being historiography, 3LO being interdisciplinary awareness, 4LO being comparative/global/transnational perspective, and 5LO being professional values. The results are listed under 2010-2011. For 2010, the history department undergraduate studies committee read a sample of sixteen student research papers written for HIST 4990 in Spring, Summer, and Fall 2009. We assessed the extent to which these students seemed to have mastered our stated outcomes. Each paper was evaluated on a one to four scale for the five outcomes/objectives, with one meaning no evidence of this outcome, two meaning some evidence of the outcome but below expectations, three meaning met expectations, and four meaning excelled expectations.
Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Professional Skills**
The department's target is for 70% of our graduating students to score three (met expectations) or four (exceeded expectations) in this area.

**Findings 2011-2012 - Target: Partially Met**
In 2012, the Department of History’s assessment of Learning Outcome #1 on Professional Skills fell short of the benchmark of seventy percent. Only 60% or 9 out of the 15 papers demonstrated having met or exceeded expectations suggesting that all of our students achieve some level of professional skills. Indeed, across all five learning outcomes the percentages of students meeting or exceeding the expectations of the department diminished in 2012, thereby necessitating an evaluation of the assessment tool in relationship to the stated Learning Outcomes as a possible course of action.

**Target for O2: Historiography**
The department's target is for 60% of our graduating students to score three or four in this area.

**Findings 2011-2012 - Target: Not Met**
In 2012, the Department of History’s assessment of Learning Outcome #2 on Historiography fell short of the benchmark of sixty percent. Only forty-five percent or 6 out of the 15 papers demonstrated having met or exceeded expectations, nevertheless with all of the papers ranking above 1, suggesting that all of our students achieved some understanding of the usefulness of the paper in demonstrating an understanding of historiography.

**Target for O3: Interdisciplinary Awareness**
The department's target is for 60% of our graduating students to score three or four in this area.

**Findings 2011-2012 - Target: Not Met**
In 2012, the Department of History’s assessment of Learning Outcome #3 on Interdisciplinary Awareness fell short of the benchmark of sixty percent. Only forty-six percent or 7 out of the 15 papers demonstrated having met or exceeded expectations. Indeed, across all five learning outcomes the percentages of students meeting or exceeding the expectations of the department diminished in 2012, thereby necessitating an evaluation of the assessment tool in relationship to the stated Learning Outcomes as a possible course of action.

**Target for O4: Comparative/Global/Transnational Perspective**
The department's target is for 70% of our graduating students to score three or four in this area.

**Findings 2011-2012 - Target: Not Met**
In 2012, the Department of History’s assessment of Learning Outcome #4 on Comparative/Global/Transnational Perspective fell short of the benchmark of sixty percent. Only forty-eight percent or 7 out of the 15 papers demonstrated having met or exceeded expectations. To be fair, the course description of History 4990 with its research paper that is used as the assessment tool does not require an analysis of interdisciplinary awareness as a class requirement, thereby necessitating an evaluation of the usefulness of the paper in demonstrating an understanding of a comparative/global/transnational perspective.

**Target for O5: Professional Values**
The department's target is for 70% of our graduating students to score three or four in this area.

**Findings 2011-2012 - Target: Partially Met**
In 2012, the Department of History’s assessment of Learning Outcome #5 on Professional Values fell short of the benchmark of seventy percent. Some fifty-eight percent or 9 out of the 15 papers demonstrated having met or exceeded expectations suggesting that all of our students achieved some level of awareness regarding Professional Values but also revealing the need to revisit course requirements and assessment tools in calculating success in this area.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Comparative/Global/Transnational**
The majority of our student papers performed well in this area. Those that did not treated topics that made comparison difficult. We plan to circulate our department’s standards to remind students and faculty that this is one of our defined goals.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: capstone course seminar paper
  - outcome/Objective: Comparative/Global/Transnational Perspective
- **Projected Completion Date:** 03/2010
- **Responsible Person/Group:** Denise Davidson

**Historiography**
We plan to do more to emphasize historiographical debates in our upper-division courses. Students learn about historiography in HIST 3000, Introduction to Historical Studies. Many of the intervening courses drop the issue of historiography to a large extent. We hope that by assigning more short research-type assignments in our upper-division courses, our students will become more comfortable with talking about historiographical debates in their seminar papers. We have also changed to pre-requisites for HIST 4990, our capstone course, to require at least two 4000-level classes prior to enrolling in the class. By ensuring that all our majors...
get some experience doing research and writing about historiography in our 4000-level classes, we hope that their performance will improve in 4990.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Historiography

Implementation Description: We have already submitted the proposal to change the prerequisites for 4990 in the course catalog, and the department agreed with the idea of working on emphasizing research skills and historiography in our upper-division courses.
Projected Completion Date: 09/2010
Responsible Person/Group: Denise Davidson

Interdisciplinary Awareness
We seem to be doing quite well in terms of interdisciplinary awareness as all but two of our sample group satisfied the criteria. We continue to emphasize different disciplines and their impact on history in HIST 3000.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Interdisciplinary Awareness

Professional Skills
To improve our students’ level of preparedness for the capstone seminar paper, we have agreed as a department to do more to emphasize research skills in our upper-division courses. We will be organizing a pedagogy workshop on research and writing assignments for these classes later this semester.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Professional Skills
Projected Completion Date: 03/2010
Responsible Person/Group: Denise Davidson

Professional Values
We hope that the changes described under in action plan for the “historiography” outcome will have a similar effect in this area. We are going to emphasize more research-type assignments in our 4000-level classes so as to give students more research and writing experience in the classes that lead up to 4990. This experience should help them to develop the skills and values described here. The faculty have agreed to attend a workshop on research assignments during the upcoming semester.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Professional Values
Projected Completion Date: 09/2010
Responsible Person/Group: Denise Davidson

Revision of outcomes
The history department’s undergraduate studies committee plans to revise our outcomes in the upcoming year. Currently, we have a total of ten, five for the core courses and five for the upper division courses. However, our majors need to demonstrate mastery of both the lower-division and upper-division outcomes. We also noticed some redundancy in our current five upper-division outcomes. Our plan is to combine the ten outcomes for both levels and then collapse some to create eight for the upper-division courses. We believe that these revisions will allow us to track better our students’ level of mastery of the desired outcomes. Once we have revised the outcomes, we will create a new, more detailed rubric for the assessment process.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Comparative/Global/Transnational Perspective
Implementation Description: The history department’s undergraduate studies committee will work on revising the outcomes in Fall 2010 and present them to the department as a whole in early Spring 2011. They should be finalized in time for the 2011 assessment cycle.
Responsible Person/Group: Denise Davidson, soon to be replaced by Glenn Eskew.

Revision of outcomes
The history department's undergraduate studies committee plans to revise our outcomes in the upcoming year. Responsible Person/Group: Denise Davidson, soon to be replaced by Glenn Eskew.

Re-evaluate assessment tool as appropriate measurement for desired outcome
While Hist 4900 is designed as the department's capstone course, it is set up as a research class whose subject is determined by the individual faculty member assigned to teach it each semester. The rough parameters of the course require the student to do work in primary sources and then write a research paper arguing an original thesis about a subject chosen through conversations between the student and the professor. The course and the paper's subject might or might not include a Comparative/Global/Transnational Perspective. Given the need to use archival sources in the Atlanta area, some professors design their Hist 4900 classes around American topics that do not engage Comparative/Global/Transnational themes, thereby making the subjects of the student papers from these classes poor products for assessing student understanding of a Comparative/Global/Transnational Perspective. Consequently some other method of measurement needs to be developed or this Learning Outcome changed.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: capstone course seminar paper | Outcome/Objective: Comparative/Global/Transnational Perspective
Implementation Description: The Undergraduate Studies Committee will have to consider both the rules that produce the product being evaluated and the method of assessment to determine an appropriate solution to this problem.
Projected Completion Date: 09/2015
Responsible Person/Group: Undergraduate Studies Committee

Appropriateness of Assessment Tool
Using the evidence from three years of assessment in History 4990, it is apparent the capstone research paper serves the purposes of assessment only when the course is designed to address such Learning Outcomes as "Interdisciplinary Awareness" and "Comparative/Global/Transnational Perspective." While students can be expected to have engaged "Professional Skills," "Historiography" and "Professional Values" in other courses and demonstrate those skills in the 4990 paper, unless the topic for the class specifies an "Interdisciplinary Awareness" or "Comparative/Global/Transnational Perspective," then these skills—while no doubt obtained in other history courses—will not be demonstrated in the paper, thereby weakening it as an assessment tool. To address this problem, the Undergraduate Studies Committee will meet and consider possible solutions that might include the revision of course requirements or the adoption of new assessment tools.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** Revision of course requirements and catalog copy.  
**Projected Completion Date:** 09/2013  
**Responsible Person/Group:** Undergraduate Studies Committee

### Analysis Questions and Analysis Answers

#### ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Over 2011-2012, the Undergraduate Studies Committee began a discussion regarding the usefulness of the History 4990 capstone paper as an assessment tool. The committee decided to wait until the third year of evaluations could demonstrate a pattern of learning in the major. Consequently with three years of assessment, it is apparent the 4990 paper does not adequately demonstrate an awareness among the student of "Historiography," "Interdisciplinary Awareness" and "Comparative/Global/Transnational Perspective." As a result, the Action Plan of the Undergraduate Studies Committee will be to determine a more suitable solution, perhaps to alter course requirements to address these shortcomings and still use the History 4990 paper as an assessment tool, or to add additional assessment tools that can measure these desired Learning Outcomes.

#### ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Using the evidence from three years of assessment in History 4990, it is apparent the capstone research paper serves the purposes of assessment only when the course is designed to address such Learning Outcomes as "Interdisciplinary Awareness" and "Comparative/Global/Transnational Perspective." While students can be expected to have engaged "Professional Skills," "Historiography" and "Professional Values" in other courses and demonstrate those skills in the 4990 paper, unless the topic for the class specifies an "Interdisciplinary Awareness" or "Comparative/Global/Transnational Perspective," then these skills—while no doubt obtained in other history courses—will not be demonstrated in the paper, thereby weakening it as an assessment tool. To address this problem, the Undergraduate Studies Committee will meet and consider possible solutions that might include the revision of course requirements or the adoption of new assessment tools.

### Goals

**G 1:** Prepare student to research, write and teach history

**G 2:** Assist students in becoming active, interdisciplinary learners

**G 3:** Academic Honesty  
Nurture in students the qualities of honesty and accuracy.

**G 4:** Global Perspective  
Help students understand the links between history and the larger world.
**Student Learning Outcomes/Objectives**

**SLO 1: Professional Skills (M: 1)**
The student demonstrates skills essential to conducting and presenting historical research, including techniques and methods of archival/primary material research, synthesis and analysis of secondary material, as well as organization and historical argumentation. All students should show outcomes at the high-competent level (rank of 6 on assessment instrument) or sophisticated level (rank of 7-8 on assessment instrument).

**SLO 6: Writing Skills**
A student's writing skills will be assessed from a range of weak to exceptional.

**SLO 7: Oral Presentation & Participation**
The student's oral presentation and participation will be rated from weak to exceptional.

**Other Outcomes/Objectives**

**O/O 2: Histiography**
The student shows awareness of existing arguments and historical literature – empirical, methodological, and theoretical – pertaining to a specific project or problem of historical research.

**O/O 3: Interdisciplinary Awareness**
The student is aware of the relations between historical research/writing and work in the other disciplines, especially those in the humanities and social sciences, and is able to employ theories and methods from these disciplines where appropriate to enrich historical research/writing.

**O/O 4: Comparative/Global/Transnational Perspectives**
The student can situate historical developments/problems across cultural/geographical boundaries, appreciating how temporal, cultural, and spatial dimensions affect historical responses.

**O/O 5: Professional Values**
Students must become aware of and internalize professional standards for research, argumentation, and use of secondary works. This involves, among other questions, defining and recognizing plagiarism and the unattributed use of the work of colleagues and students.

**Measures, Targets, and Findings**

**M 1: Assessment Instrument (O: 1)**
Source of Evidence: Evaluations

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**General Examinations**
During academic year 2012-2013 elements of the rubric/instrument will be applied to all general examination at the completion of MA coursework.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** End of Spring 2013 semester
- **Projected Completion Date:** 04/2013

**Rubric Testing**
The graduate assessment instrument is now in use in all graduate courses. It was modified with a broader range of numerical rankings and new categories of evaluation in 2011-12 to enhance accuracy and encourage instructors to better evaluate student progress in meeting outcomes and objectives.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** The end of Spring semester 2012
- **Projected Completion Date:** 04/2012
- **Responsible Person/Group:** Faculty members who will teach respective courses

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and
improvements in the assessment process will you make in the coming academic year?

Following our assessment action plan, during Spring semester 2010, the department for the first time utilized its new assessment instrument in all graduate courses. The department instituted this policy in order to better track and record student progress in meeting programmatic outcome goals. The graduate committee reviewed the assessment results and decided to modify the assessment instrument in 2011-2012 by extending the range of numerical rankings to enhance accuracy and encourage instructors to better evaluate outcomes and objectives. We also replaced the "professional skills" category on the assessment instrument with "writing skills" and "oral presentation and participation" to better reflect what "professional skills" actually are in the history field. In the future, we will design and implement a new assessment instrument for graduate comprehensive exams.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculums or courses are made for other reasons, please explain.

The collated assessment ranking show that on average the department is meeting its achievement target. The assessment instrument measures a number of student learning outcomes twice in the course of the semester: mid-point and at the end. At the midpoint of the semester, learning outcomes average 5.75, meeting the low-competent level. By the end of the semester, learning outcomes averaged 6.18, meeting the high-competent level, the baseline for our achievement outcome. (The results of the Fall 2011 assessment process are available for review in the department's graduate office). Students performed somewhat below the high-competent level in "Interdisciplinary Awareness" and "Comparative Perspectives" but somewhat above the high-competent level in "Professional Values", "Historiography", and "Writing Skills". Such rankings suggest that instructors could do more to design assignments that support our interdisciplinary and comparative awareness learning outcomes. In addition, the overall assessment rankings indicate that some students may need extra help meeting specific outcome goals. The department will continue its mentoring program for first year students to ensure they are making progress toward meeting all outcome goals. In addition, the assessment outcomes show that Ph.D. students tend to perform better than MA students, which we expect given their level of training. Yet this data also suggests that the department could do more to prepare MA students in basic outcomes, particularly in our required 7000-level course offerings.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

The department is now using the revised assessment instrument in all graduate courses, which has resulted in ranking for outcome goals for individual students as well as a broad view of how the department is helping MA students as a group meet those goals. Annual assessment reports will allow the department to track student success on both the individual and group levels in time and will continue to identify strengths and weaknesses in the graduate program.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

The department values improved information on the preparation and learning of its graduate students and we are pleased that for the most part they rank highly on our objective/outcome goals. Yet we would like all students to show outcomes at the high-competent (rank of 6 on the current assessment instrument) or sophisticated (rank of 7-8 on the current assessment instrument). Once we have assessment results for several years, said results will aid the department's evaluation of the recent graduate curriculum changes. Assessment rankings will facilitate annual evaluations of student progress and will aid in the determination of assistantship appointments.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We are in general pleased with the results of the department's revised assessment instrument and will continue to use the current instrument. In the future we will implement an assessment instrument for our PhD comprehensive exams, an important component of our graduate program. The instrument will be designed to measure student performance in the exams, in order to evaluate the department's exam procedures. While it is difficult to anticipate results, we hope that on-going data collection on graduate courses and evaluation of the exam procedures will increase the accuracy and usefulness of the assessment process and will contribute to improving our graduate programs.

**Annual Report Section Responses**

**Most Important Accomplishments for Year**—Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.

Implemented assessment instrument in graduate courses in Fall 2011 and evaluated instrument results.

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.

Design and implement assessment instrument for graduate comprehensive exams.

**Contributions to Student Retention**—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

In Fall 2010, the department implemented a new MA program designed to improve retention and facilitate progress toward graduation by streamlining the program, setting clear core course and field requirements, and instituting a graduate student mentoring system.
Mission / Purpose

The mission of the program of graduate education in History of Georgia State University is to prepare students at the PhD level for professional activities in History and related fields. This involves not only the mechanics of research, teaching, and writing but developing such personal qualities as accuracy, honesty, thoroughness, and evenhandedness. The Department demands active learning, involving the student in reading and participation in seminars, in research and analysis of primary sources, and in the presentation of the resulting findings in written and verbal formats that adhere to recognized professional standards. Graduates of GSU graduate History program are prepared not only to be competent historians and teachers but also to function successfully in the larger community, both within and outside the academy.

Goals

G 1: Prepare students to research, write and teach history

G 2: Learning
Assist students in becoming active, interdisciplinary learners

G 3: Academic Honesty and Integrity
Nurture in students the qualities of honesty and accuracy

G 4: Global Perspective
Help students understand the links between history and the larger world

Outcomes/Objectives

O/O 1: Professional Skills (M: 1)
The student demonstrates skills essential to conducting and presenting historical research, including techniques and methods of archival/primary material research, synthesis and analysis of secondary material, as well as organization and historical argumentation. All students should show outcomes at the high competent level (rank of 6 on assessment instrument) or sophisticated level (rank of 7-8 on assessment instrument).

O/O 2: Historiography (M: 1)
The student shows awareness of existing arguments and historical literature – empirical, methodological, and theoretical – pertaining to a specific project or problem of historical research.

O/O 3: Interdisciplinary Awareness (M: 1)
The student is aware of the relations between historical research/writing and work in the other disciplines, especially those in the humanities and social sciences, and is able to employ theories and methods from these disciplines where appropriate to enrich historical research/writing.

O/O 4: Comparative/Global/Transnational Perspectives (M: 1)
The student can situate historical developments/problems across cultural/geographical boundaries, appreciating how temporal, cultural, and spatial dimensions affect historical responses.

O/O 5: Professional Values (M: 1)
Students must become aware of and internalize professional standards for research, argumentation, and use of secondary works. This involves, among other questions, defining and recognizing plagiarism and the unattributed use of the work of colleagues and students.

Measures, Targets, and Findings

M 1: Graduate Assessment Instrument (O: 1, 2, 3, 4, 5)
A rubric that was designed to assess a student's skill set in two core courses of the program.
Source of Evidence: Academic direct measure of learning - other

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Following our assessment action plan, during Spring Semester 2010, the department for the first time utilized its new assessment instrument in all graduate courses. The department instituted this policy in order to better track and record student progress in meeting programmatic outcome goals. The graduate committee reviewed the assessment results and decided to modify the assessment instrument in 2011-2012 by extending the range of numerical rankings to enhance accuracy and encourage instructors to better evaluate outcomes and objectives. We also replaced the "professional skills" category on the assessment instrument with "writing skills" and "oral presentation and participation" to better reflect what "professional skills" actually are in the history field. In the future, we will design and implement a new assessment instrument for graduate comprehensive exams.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The collated assessment rankings show that on average the department is meeting its achievement target. The assessment instrument measures a number of student learning outcomes twice in the course of the semester: mid-point and at the end. At the mid-point of the semester, learning outcomes averaged 5.75, meeting the low-competent level. By the end of the semester, learning outcomes averaged 6.18, meeting the high-competent level, the baseline for our achievement outcome. (The results of the Fall 2011 assessment process are available for review in the department's graduate office). Students performed somewhat below the high-competent level in "Interdisciplinary Awareness" and "Comparative Perspectives" but somewhat above the high-competent level in "Professional Values", "Historiography", and "Writing Skills". Such rankings suggest that instructors could do more to design assignments that support our interdisciplinary and comparative awareness learning outcomes. In addition, the overall assessment rankings indicate that some students may need extra help meeting specific outcome goals. The department will continue its mentoring program for first year students to ensure they are making progress towards meeting all outcome goals. In addition, the assessment outcomes show that Ph.D. students tend to perform better than MA students, which we expect given their level of training.

**ADMINISTRATIVE DEPT QUESTION 1:**
Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

The department is now using the revised assessment instrument in all graduate courses, which has resulted in rankings for outcome goals for individual students as well as a broad view of how the department is helping PhD students as a group meet those goals. Annual assessment reports will allow the department to track student success on both the individual and group levels over time and will continue to identify strengths and weaknesses in the graduate program.

**ADMINISTRATIVE DEPT QUESTION 2:**
What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

The department values improved information on the preparation and learning of its graduate students and we are pleased that for the most part they rank highly on our objective/outcome goals. Yet we would like all students to show outcomes at the high-competent (rank of 6 on the current assessment instrument) or sophisticated (rank of 7-8 on the current assessment instrument). Once we have the baseline results for several years, said results will aid the department's evaluation of the recent graduate curriculum changes. Assessment ranking will facilitate annual evaluations of student progress and will aid in the determination of assistantship appointments.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We are in general pleased with the results of the department's revised assessment instrument and will continue to use the current instrument. In the future we will implement an assessment instrument for our PhD comprehensive exams, an important component of our graduate program. The instrument will be designed to measure student performance in the exams, in order to evaluate the department's exam procedures. While it is difficult to anticipate results, we hope that on-going data collection on graduate courses and evaluation of the exam procedures will increase the accuracy and usefulness of the assessment process and will contribute to improving our graduate programs.

Annual Report Section Responses

**Most Important Accomplishments for Year:** Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.

Implemented assessment instrument in graduate courses in Fall 2011 and evaluated instrument results.
**Student Learning Outcomes/Objectives**

**Mission / Purpose**

What do students need to learn to prepare for careers in the hospitality field? Students are expected to understand the business processes essential to profitable, sustainable operations. Every hospitality course incorporates quality service principles including service to internal and external stakeholders and continuous improvement principles. Because this is a labor-intensive industry, there is a dedicated Hospitality Human Resources course and HR processes are covered in most hospitality courses (Hospitality Law - employment law, Cost Control and Financial Analysis - employee productivity, for example). Every hospitality course incorporates ethical decision-making and business practices. Technology is also a fundamental in the courses in terms of understanding how technology is used in any industry segment from hotels to restaurants to venues and event management. Technology applications that support the delivery of quality service are the focus. Marketing in the hospitality curriculum focuses on marketing principles for services rather than tangible goods. Industry specific courses (hotel management, restaurant management, event management, private club management, tradeshow and meetings management, for example) cover the trends and issues of that segment as well or organizational structure, functional areas, metrics used and service standards. The hospitality curriculum consists of seven required major courses and a variety of elective courses from which majors can select three (9 hours.) Hospitality majors are required to work at least 570 hours in industry-related positions. To certify that these hours have been worked, students are required to take "Hospitality Work Study" (HADM 4900) for which there is no fee and no credit hours. Students complete a work portfolio as part of this process.

Prior feedback on assessment reports has stated that the reports try to cover too much and are difficult to understand. The focus of the 2010-2011 report will relate to three overall, general programmatic goals and the outcomes that are directly connected to these goals. These outcomes are linked to the School of Hospitality’s senior-level courses, HADM 4100 (Cost Control and Financial Analysis) and HADM 4800 (Hospitality Strategic Management.) Since the lower-level courses are pre-requisites to HADM 4100 and HADM 4800, it is logical to expect the lower-level outcomes will have been achieved and will be built upon in HADM 4100 and HADM 4800. HADM 4100 and HADM 4800 require a composite of knowledge and skills reflecting the other five hospitality courses.

**Goals**

**G 2: Students will be prepared with business knowledge and service skills.**
Students will be prepared for the hospitality industry with business knowledge and service skills to optimize the success of companies and corporations.

**G 3: Students will develop the analytical skills to evaluate the business environment of today and the future.**
Students will be prepared with analytical skills in all functional areas to evaluate the business environment of today and of the future.

**G 1: Students will be prepared for management and leadership positions in the hospitality industry.**
Hospitality students will have the knowledge and skills in all major functional areas to be effective managers and leaders in hospitality businesses.

**Student Learning Outcomes/Objectives**

<table>
<thead>
<tr>
<th>SLO 1: Demonstrate critical thinking skills in analyzing hospitality business operations (G: 1, 2, 3) (M: 4, 6, 7)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will demonstrate critical thinking skills in gathering, analyzing and applying relevant information in making strategic and sound business decisions. This information will include both internal and external influences on the respective business operation. For example, current economic conditions, competitive forces, social trends, demographics and legal/governmental/political affairs are involved in the analysis of external business conditions. An internal analysis includes factors such as profit and loss ratios for the business, condition of facilities, product and service levels in competing with other businesses, marketing strength, ownership/management relations, employee stability (in recruiting and retention), and knowledge/skill level of the internal workforce.</td>
</tr>
</tbody>
</table>

Relevant Associations:

- The School of Hospitality is accredited through the Accreditation Commission for Programs in Hospitality Administration (ACPHA). Required curricular content areas required by ACPHA and related to this objective include an introduction, emphasis and reinforcement of:

  1. The marketing of goods and services
  2. The legal environment
  3. The economic environment
  4. Exposure to critical thinking skills
### Measures, Targets, and Findings

#### M 4: Work Experience Portfolio (O: 1, 2, 3)
Hospitality majors are required to work a minimum of 750 hours in the industry prior to graduation. The Work Experience Portfolio is an in-depth analysis of this work experience. It requires for the student to evaluate key business components (service levels - internal and external; human resource approaches - dealing with diversity, optimizing employee satisfaction and effective teamwork; financial results - potential areas for growth, areas of waste, pricing structure; strategic principles - clear mission, goals and objectives and responding to the environmental changes.) In addition to evaluating the work experience, students are asked to make recommendations for improvement (analysis and application of knowledge). For 2008-2009, the topic of sustainability was added to the work portfolio in order to address current practices and what the hospitality business could be doing. This measure is related to all of the three stated objectives. The student portfolio includes sections that require the student to provide examples of their work behavior in providing quality service and products to external customers, providing quality service to internal customers, handling ethical situations, dealing with organizational change, workplace conflicts, working with cultural diversity and analyzing areas of opportunities for profitability as well as cutting costs. Based on their work experiences, students are also asked evaluate their knowledge and skills areas in the work portfolio and are asked to elaborate on specific career goals.

**Source of Evidence:** Portfolio, showing skill development or best work

#### Target for O1: Demonstrate critical thinking skills in analyzing hospitality business operations
The target is for a minimum of 90% of students to show critical thinking skills in evaluating the application of service skills (internal and external), organizational change, conflict management and working in a diverse workplace.

**Findings** 2011-2012 - Target: Met

For this past academic year, 94% showed evidence of critical thinking skills in the designated areas.

#### Target for O2: Apply principles of financial analysis in the evaluation of business results
At least 90% of the students should show evidence of observing, evaluating and making recommendations for areas of financial opportunity in increasing profits and reducing overhead costs.

**Findings** 2011-2012 - Target: Met

100% of the students provided at least one area for enhancing profitability and one way to control costs.

#### Target for O3: Apply Service Knowledge and Skills
The target is for a minimum of 90% of the students to comprehensively evaluate their service experiences in the workplace showing evidence of effective application of service knowledge and skills.

**Findings** 2011-2012 - Target: Met

100% of the students showed evidence of effectively applying service knowledge and skills during their work experience.

#### M 5: Employer Evaluation of Work Experience (O: 3)
All hospitality majors are required to have a minimum of 750 hours of industry experience. Employers submit a written structured evaluation for each student under their supervision. These evaluations are regularly grouped and analyzed in terms of positive and negative feedback. The evaluation form (which is provided to employers) includes 12 factors: 1. Knowledge of areas involved in job position 2. Technical skills 3. Interpersonal and service skills with customers 4. Interpersonal and service skills with co-workers 5. Interaction with supervisors/managers 6. Written communication abilities 7. Oral communication abilities 8. Ability to accept feedback 9. Willingness to learn 9. Work habits (attendance, punctuality, accuracy) 10. Demonstration of potential leadership abilities 11. Credibility/ethical behavior 12. Work performance was reflective of what would be expected of a major in hospitality

**Source of Evidence:** Employer survey, incl. perceptions of the program

#### Target for O3: Apply Service Knowledge and Skills
At least 95% of the employers of hospitality majors will provide a satisfactory evaluation of their service knowledge and skills.

**Findings** 2011-2012 - Target: Met

100% of hospitality majors positively critiqued the application of service knowledge and skills in a hospitality work-setting.

#### M 6: Food Safety/Sanitation Certification (O: 1, 3)
HADM 3401/3402 (Food Production Lab) requires that all students complete a standardized food safety/sanitation exam during the semester of that course. Because of the importance of food safety and sanitation, this measure is directly related to service knowledge and skills for those students working in foodservice and those working indirectly with foodservice departments or

**Findings** 2011-2012 - Target: Met

100% of hospitality majors positively critiqued the application of service knowledge and skills in a hospitality work-setting.
outsourced providers. Knowledge of food safety and sanitation is also applicable to the objective of critical thinking skills in the hospitality industry regarding food sourcing decisions, facility lay-out (kitchen and storerooms) and minimizing human error.

Source of Evidence: Standardized test of subject matter knowledge

<table>
<thead>
<tr>
<th>Target for O1: Demonstrate critical thinking skills in analyzing hospitality business operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>The standard for the School of Hospitality is that 100% of majors will successfully pass the national certification test for food safety and sanitation. The goal is for a minimum of 95% to pass on the first try with the remaining 5% to pass on the second try.</td>
</tr>
</tbody>
</table>

**Findings 2011-2012 - Target: Met**
Hospitality majors passed the Food Safety and Sanitation exam resulting in 100% being certified. Less than 3% of the students had to take the exam twice to become certified.

<table>
<thead>
<tr>
<th>Target for O3: Apply Service Knowledge and Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>The standard for the School of Hospitality is that 100% of majors will successfully pass the national certification test for food safety and sanitation. The goal is for a minimum of 95% to pass on the first try with the remaining 5% to pass on the second try.</td>
</tr>
</tbody>
</table>

**Findings 2011-2012 - Target: Met**
All hospitality majors became certified in Food Safety and Sanitation with less than 3% having to take the exam a second time to pass.

**M 7: Hospitality Case Study (O: 1)**
An average of three case studies are assigned per semester in HADM 4800. One of these case studies per semester is reviewed for the demonstration of critical thinking skills in a business setting.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Demonstrate critical thinking skills in analyzing hospitality business operations**
A minimum of 75% of the hospitality majors in the senior capstone course will achieve a minimum of 85% on the case study demonstrating the ability to evaluate and analyze a business situation incorporating internal and external information to the operation.

**Findings 2011-2012 - Target: Met**
For the selected case analysis, 90% of the students had a minimum of 85% on the case study demonstrating the application of critical thinking skills in analyzing a hospitality business situation.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Approval of ACPHA Annual Report**
The School of Hospitality is also accredited by ACPHA (Accreditation Commission for Programs in Hospitality Administration.) The annual report will be submitted for 2011 which includes a submission of updates on learning objectives and assessment progress. The action step is to submit a comprehensive, up-to-date report to feedback for continual improvement. The deadline for the submission of this report is January 2012.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Projected Completion Date:** 12/2011
- **Responsible Person/Group:** Debby Cannon

**Coordination among faculty**
Through enhanced faculty communication and coordination, the department will focus on achieving more consistency between sections of the same course taught by different faculty.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Debby Cannon

**Curriculum Review Process**
During the 2011/2012 academic year, the hospitality faculty will conduct, at minimum, a one-day meeting to comprehensively review all course content, methods of assessing student learning and a review of specific teaching techniques. These topics were discussed at the annual hospitality faculty retreat on 8/19/11 but a more in-depth and longer session is needed.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 04/2012
- **Responsible Person/Group:** Debby Cannon to facilitate but all faculty would be involved.

**Hospitality Business Simulation**
The business simulation exercise used in HADM 4100 will be evaluated and most likely replaced with a newer, more industry-based version. The professor currently teaching HADM 4100 will retire in June 2012 so the new faculty member will be involved in this decision.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The CTW course continues to be "Hospitality Strategic Management." Whereas this course was focused on project-based assignments, a change for this academic year is to utilize case studies. The projects, which were with industry partners, varied in their results depending on the involvement of the industry partners and time constraints that we faced with industry participation. Case studies are more structured and can be selected and revised to reflect real-world changes. Comparing students from semester to semester is also more realistic with case studies versus projects with numerous changing factors.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

Students adequately demonstrated critical thinking based on the targeted goals established for the measures. One of the important variaives for students in optimizing their critical thinking abilities is their level of confidence. Between entry and exit in the course, the focus is on students 1) having an increased awareness of what critical thinking is; 2) understanding the importance of critical thinking in making business decisions in the real-world; 3) increasing level of confidence in their abilities to think critically and 4) having the ability to transfer these skills and confidence level from the classroom to a professional work setting.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

We continue to revise measures to reflect the needs of the hospitality industry. The increased attention on analytics will be seen in possibly adding a hotel simulation exercise to HADM 4800 with structured business decisions incorporated into this simulation experience. Several products (hotel simulation learning packages) have been reviewed and the most appropriate one has been selected. Funding is now being considered for this addition to HADM 4800, the CTW course.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**

There is a greater awareness of CTW courses among students and faculty. There is more discussion among non-CTW instructors and the CTW instructor on changes to the CTW course. It is not just one person who determines the content since this is also the department's capstone course.

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

For this year, we revised the learning objectives to have a stronger tie to the stated goals. We also modified some of the measures to reflect classroom changes based on new faculty. For example, our "Hospitality Cost Control and Financial Analysis" course no longer uses the business simulation because it had become outdated and did not adequately reflect business reality. The list of objectives...
and measures are more streamlined. We also referred to the accreditation standards for the Accreditation Commission for Programs in Hospitality Administration (ACPHA) in guiding these objectives and measures. We our reaccreditation scheduled for 2014, we want to make sure the assessment process is lateral to the ACPHA standards. Reinstating the hospitality senior exit exam and possibly including one more industry-based certification for majors (in addition to the food safety and sanitation certification) are likely. A pilot group of students will be taking the certification exam at the end of fall semester 2012 and the senior exit exam could be ready by spring 2013.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data support that most hospitality majors are meeting the measures tied to our program's curricular objectives and goals. Because more attention is being placed on analytical skills in the areas of financial information and business results, the School of Hospitality will revise particularly the two senior required courses (HADM 4100 and HADM 4800) to include more of the industry-accepted metrics and analytic reports.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

We revamped the outcomes and measures from 2010-2011. The team project, included as a measure in 2010-2011, was difficult to replicate each semester. More structured case studies replaced the team project which had too many variables that were hard to control. The case studies are discussed in a team setting which does provide the opportunity to share different perspectives.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

The department did reach its stated target goals. The findings incorporated both in-class measures (through assignments such as the case study and food safety/sanitation certification), student analysis of learning experiences and work performance (the work portfolio) and feedback from employers (the employer evaluation of performance) as related to the delineated objectives. A continued emphasis on oral and written communication is necessary in maximizing the professionalism of our students.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We have discussed stronger assessment measures such as an industry-based certification and reinstating the hospitality senior exit exam incorporating more analytical information. The industry certification will be piloted this semester (fall 2012) with the senior exit exam possibly being reinstated spring 2013.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Human Resource Management MS**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

The Master of Science in Human Resources Management program prepares students for careers as specialists or generalists in the practice of Human Resource Management. Students are offered detailed knowledge in functional areas of recruiting, compensation, employment law, organizational development, and related Human Resources areas. Coursework provides preparation for the Human Resources Certification Institute (HRCI) examination.

This Mission Statement was actually established in the 2007-2008 cycle. It did not migrate, however, to the 2008-2009 cycle.

**Goals**

**G 1: All facets of compensation in organizations**

To graduate students from the MS in HRM program with an awareness of the role and techniques of all facets of compensation in Human Resources Management.

**G 2: Facets of recruitment and selection**

To graduate students from the MS in HRM program with an awareness of the role and techniques of all facets of recruitment and selection in Human Resources Management.

**G 3: Labor relations law**

To graduate students from the MS in HRM program with an awareness of the role and knowledge areas of employment relations law in Human Resources Management.

**G 4: Performance management and employee relations**

To graduate students from the MS in HRM program with knowledge and skills in the area of performance management and employee relations in Human Resources Management.

**Student Learning Outcomes/Objectives**
### SLO 1: Compensation System Design (M: 1, 2)

The MS-HRM graduate will be able to design a comprehensive compensation system that incorporates strategic alternatives, job and pay structures such as grades and bands and incentive programs, and compensation budgets.

### SLO 2: Comprehensive Employee Recruitment (M: 3, 4)

The MS-HRM graduate will be able to design an accurate, valid, and detailed employee recruitment and selection system that incorporates job analysis, behavioral interviews, work samples, and tests.

### SLO 3: Employment Law (M: 5, 6)

The MS-HRM graduate will understand and effectively apply employment law. The student will be able to identify relevant case issues and laws, draw reasonable conclusions, and recommend policies to address the situation.

### SLO 4: Employee Relations (M: 7, 8)

The MS-HRM graduate will be able to understand and effectively choose and design performance management techniques that enhance employer productivity and minimize bias.

### Measures, Targets, and Findings

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Compensation System Design**
With respect to the first learning outcome, the student's ability to design comprehensive compensation system, two actions will be taken:

- In MGS 8390 add a homework assignment to teach linkages among competitive conditions, strategies, and compensation strategies. Evaluate after next offering.
- In MGS 8390 provide a written check sheet of items to be included for project to students. Evaluate after next offering.

<table>
<thead>
<tr>
<th>Established in Cycle:</th>
<th>2008-2009</th>
</tr>
</thead>
<tbody>
<tr>
<td>Implementation Status:</td>
<td>Finished</td>
</tr>
<tr>
<td>Priority:</td>
<td>High</td>
</tr>
</tbody>
</table>

**Employee Recruitment and Selection**
With respect to the second learning outcome, the student's ability to understand and effectively apply all major components into a comprehensive employee recruitment and selection system, two actions will be taken:

- In MGS 8360 offer students the opportunity to use instructor feedback to revise job analysis, job description, and job specification. Evaluate after next offering.
- In MGS 8360 offer students the opportunity to use instructor feedback to revise questions, scoring system, work sample, and other tests. Evaluate after next offering.

<table>
<thead>
<tr>

**Compensation Class Content Change**
Add one hour class time to review competitive conditions, strategies, and compensation strategies. Evaluate after next offering.
Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Alternatives and Rationale in Compensation | Outcome/Objective: Compensation System Design

Responsible Person/Group: Lucy McClurg
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Compensation Review Checklist
One week prior to due date, review in class written check sheet of items to be included for project to students. Evaluate after next offering.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Integration of All Compensation Components | Outcome/Objective: Compensation System Design

Projected Completion Date: 12/2010
Responsible Person/Group: Lucy McClurg
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Add language skills for international students
Continue with action plan items from last year, but in addition refer international students with language problems to the University assistance office for additional training. Revisit and reevaluate to see if training affects student performance in compensation.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Refer students who need additional language skills to University Center for help.
Projected Completion Date: 11/2012
Responsible Person/Group: All HR instructors
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Check coverage of topics in all HR core classes
Ensure job analysis and job description are taught in all HR core classes and covered at a minimum of one hour in each class. Give students more practice in all classes.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Check coverage of topics in all HR core classes.
Projected Completion Date: 11/2012
Responsible Person/Group: All core course instructors.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Continue emphasis on topic in MGS 8360
Continue emphasis on topic in MGS 8360. Since several different instructors have taught the course recently, not all are including the topic. Check syllabi to ensure coverage.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Check coverage of topic across instructors to be sure it is being emphasized in all classes.
Projected Completion Date: 11/2012
Responsible Person/Group: Instructors of MGS 8360
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Continue in-class exercises
Continue to use in-class exercises and critiques of policy statements written in class. Give immediate feedback and opportunity for correction and additions.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Continue to use in-class rewrite exercise on policy statement formulation.
Projected Completion Date: 11/2012
Responsible Person/Group: Instructors in all core HR classes.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Expand use of components to all core HR classes
Reinforce performance measurement processes by including in all HR core classes and emphasizing usage and linkages to all aspects of HR in each class. Not all instructors are covering this topic in detail.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Help international students with language skills
Continue to apply CTW practices to the MGS 8320 course and work with international students and others who need basic language help. Refer students to University Center for help on basics. Continue to require rewriting in MGS 8320.

Increase class time on topic
Add 30 minutes to lecture on integrating components, including addition of short in-class activity.

Increase lecture time in MGS 8300 on performance management
Instructors in MGS 8300 will increase class lecture time by 30 minutes on performance management tools and techniques. The class time will be taken away from lecture materials that are adequately covered in the text.

Performance Management Improvement
Add 15 minutes to lecture in MGS 8300, evaluate results in the next cycle.

Work from check sheet for Compensation projects
Instructor of MGS 8390 will provide to students three weeks before due date a check sheet for compensation term projects (design of a compensation system). Class time will be spent reviewing the components and requirements.

Apply more CTW techniques to grad class
Apply more writing assignments and rubrics used in the undergraduate CTW classes to the MGS 8320 class.
**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have involved new faculty and PTIs to a greater extent in the evaluation of the program and in collecting data. This has resulted in more discussion about strengths and weaknesses of our programs and students.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We were able to identify several key areas in which students were not making good progress, including linkages with strategic business plans and in general writing skills. We changed delivery of course materials and increased class time to target those weaknesses. In general, we left more of the coverage of basic knowledge and concepts to the students and made them responsible for learning those easier topics on their own, and we used more of class time to focus on application and advanced skills.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Instructional Technology MS**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

The mission for the Master of Science degree in Instructional Technology is to provide students with the basic knowledge, skills, and attitudes required to perform as an instructional technologist. An instructional technologist is a professional educator who can combine knowledge of the learning process, knowledge of instructional systems theory, and knowledge of various forms of media and learning environments to create the most effective and efficient learning experiences. The program is designed for individuals interested in working with adults in a wide variety of training and development areas such as those found in education, business and industry. We seek to further this mission by enhancing and facilitating learning and problem solving through the systemic and systematic application of creative thought.

**Goals**

**G 1: Produce Educators in Learning Technologies in P-16**

The MS program aims to increase the number and improve the skills of practitioners in the Learning Technologies in the P-16 education sector.

**G 2: Produce Educators in Learning Technologies in Corp**

The MS program aims to increase the number and improve the skills of practitioners in the Learning Technologies in the corporate, government and military sectors.

**G 3: Produce Educators in Learning Technologies in Non-Profit Sectors**

The MS program aims to increase the number and improve the skills of practitioners in the Learning Technologies in the non-profit and non-governmental organization sectors.

**Student Learning Outcomes/Objectives**

**SLO 1: Has knowledge of Instructional Development (G: 1, 2, 3) (M: 1, 2, 3, 4, 5)**

Candidates demonstrate the knowledge, skills, and dispositions to develop instructional materials and experiences by applying principles, theories, and research related to print, audiovisual, computer-based, and integrated technologies.

**SLO 2: Has knowledge of Instructional Systems Design (G: 1, 2, 3) (M: 1, 2, 3, 4, 5)**

Candidates demonstrate the knowledge, skills, and dispositions to design conditions for learning by applying principles, theories, and research associated with instructional systems design, message design, instructional strategies, and learner characteristics.

**SLO 3: Has knowledge of Instructional Systems Management (G: 1, 2, 3) (M: 1, 2, 3, 4, 5)**

Candidates demonstrate knowledge, skills, and dispositions to plan, organize, coordinate, and supervise instructional technology by
applying principles, theories and research related to project, resource, delivery system, and information management.

**SLO 4: Utilizes Processes & Resources for Learning (G: 1, 2, 3) (M: 1, 2, 3, 4, 5)**
Candidates demonstrate the knowledge, skills, and dispositions to use processes and resources for learning by applying principles, theories, and research related to media utilization, diffusion, implementations, and policy-making.

**SLO 5: Has knowledge of Instructional Systems Evaluation (G: 1, 2, 3) (M: 1, 2, 3, 4, 5)**
Candidates demonstrate knowledge, skills, and dispositions to evaluate the adequacy of instruction and learning by applying principles, theories, and research related to problem analysis, criterion-referenced measurement, formative and summative evaluation, and long-range planning.

All majors create an electronic portfolio of their work and present it to the faculty at the end of their program. The portfolio should provide evidence of accomplishment in all program areas. Faculty will compile a summary rating of all relevant standards based on the portfolio.  
Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Has knowledge of Instructional Development**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through portfolio development and presentation.

**Target for O2: Has knowledge of Instructional Systems Design**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through portfolio development and presentation.

**Target for O3: Has knowledge of Instructional Systems Management**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through portfolio development and presentation.

**Target for O4: Utilizes Processes & Resources for Learning**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through portfolio development and presentation.

**Target for O5: Has knowledge of Instructional Systems Evaluation**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through portfolio development and presentation.

All students complete an internship and prepare a written report of their activities, particularly noting how the activities relate to their program of study. Faculty will compile a summary rating of all relevant standards based on the report and on input provided by the internship supervisor.  
Source of Evidence: Field work, internship, or teaching evaluation

**Target for O1: Has knowledge of Instructional Development**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through internship reports.

**Target for O2: Has knowledge of Instructional Systems Design**
95% of completers will demonstrate target knowledge.

**Findings 2011-2012**
100% of completers demonstrated target knowledge through internship reports.

Findings 2011-2012 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

Target for O3: Has knowledge of Instructional Systems Management
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2011-2012 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

Target for O4: Utilizes Processes & Resources for Learning
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2011-2012 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

Target for O5: Has knowledge of Instructional Systems Evaluation
95% of completers will achieve "meets" or "exceeds" on all standards.

Findings 2011-2012 - Target: Met
100% of completers achieved "meets" or "exceeds" on all standards.

M 5: Analysis of Curriculum and Syllabi (O: 1, 2, 3, 4, 5)
Faculty will review syllabi and other curricular materials for currency and depth.
Source of Evidence: Curriculum/syllabus analysis of course to program

Target for O1: Has knowledge of Instructional Development
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2011-2012 - Target: Met
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Target for O2: Has knowledge of Instructional Systems Design
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2011-2012 - Target: Met
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Target for O3: Has knowledge of Instructional Systems Management
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2011-2012 - Target: Met
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Target for O4: Utilizes Processes & Resources for Learning
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2011-2012 - Target: Met
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Target for O5: Has knowledge of Instructional Systems Evaluation
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Findings 2011-2012 - Target: Met
100% of the reviewed syllabi and curriculum materials adequately reflect current practice in the field.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continue to Monitor Curriculum
Program faculty will maintain the current design and implementation of the program, and continue to monitor the stated student learning outcomes during the 2010-2011 academic year.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium
Implementation Description: ongoing
Responsible Person/Group: All faculty
**Focus Online Degree Program On Corporate Settings**
Focus the online MS degree on students interested in business and corporate sectors.

**Established in Cycle:** 2009-2010
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- **Measure (Key Assessment):** Analysis of Curriculum and Syllabi | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** Comprehensive Exam | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** End of Course Assessments | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** Internship Report | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning

**Projected Completion Date:** 08/2011
**Responsible Person/Group:** All faculty
**Additional Resources:** None
**Budget Amount Requested:** $0.00 (no request)

**Implement Certificate in Online Education Program**
We implemented our add-on certificate program in online education.

**Established in Cycle:** 2009-2010
**Implementation Status:** Finished
**Priority:** High
**Projected Completion Date:** 08/2010
**Responsible Person/Group:** All faculty

**Increase Recruitment Efforts**
We will actively recruit new students and maintain our high admission standards.

**Established in Cycle:** 2009-2010
**Implementation Status:** In-Progress
**Priority:** High
**Implementation Description:** Ongoing
**Responsible Person/Group:** All faculty

**Investigate Certificate Program for P-12**
In order to recruit more students and better serve those students in the region, we begin continue exploring the possibility of a certificate program in expectation that the state will approve a teaching certificate in instructional technology.

**Established in Cycle:** 2009-2010
**Implementation Status:** Finished
**Priority:** High
**Implementation Description:** We determined not to pursue state certification.
**Projected Completion Date:** 08/2012
**Responsible Person/Group:** All Faculty
**Additional Resources:** One clinical Faculty line to start.
**Budget Amount Requested:** $65,000.00 (recurring)

**Online Degree Program**
In order to increase enrollment and better serve students in the region, we offer our MS degree online. We continue to grow this degree program.

**Established in Cycle:** 2009-2010
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- **Measure (Key Assessment):** Analysis of Curriculum and Syllabi | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** Comprehensive Exam | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** End of Course Assessments | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** Internship Report | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning
- **Measure (Key Assessment):** Portfolio | **Outcome/Objective:** Has knowledge of Instructional Development
  - Has knowledge of Instructional Systems Design | Has knowledge of Instructional Systems Evaluation | Has knowledge of Instructional Systems Management | Utilizes Processes & Resources for Learning

**Projected Completion Date:** 08/2011
Virtual Presentation of Exit Portfolio
Students create their exit portfolio and virtually present it to the instructional technology faculty and their peers

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Portfolio | Outcome/Objective: Utilizes Processes & Resources for Learning
Implementation Description: Use of learning and communication resources such as Elluminate and uLearn.
Projected Completion Date: 08/2012
Responsible Person/Group: All faculty
Additional Resources: None

Deactivate Endorsement of Online Teaching
Program enrollment has been low and we have had difficulty keeping up with the reporting burden. We will deactivate this program this year.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: In-process
Responsible Person/Group: Dr. Shoffner
Additional Resources: None

Increase Focus on Corporate Training
As part of an effort to diversify program offerings in the College of Education we will seek to increase the focus of our MS program on the corporate training sector.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: In-process
Responsible Person/Group: All faculty
Additional Resources: None

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
This year we completed and analysis of the MS program and decided to begin implementing two major changes. 1. We will deactivate the Endorsement in Online Education. Demand for this program has been low and the paperwork burden has been too onerous to justify the small number of students involved. 2. We will shift the focus of the MS toward corporate training. While we still will provide service courses to our and other programs' students we will seek to help the college in its efforts to diversify program offerings by focusing on corporate training. The state GOML program in this area is focused on p-16 education so we see corporate training as an under-served niche for us. Additionally, we will pursue a major at the undergraduate level in Human Learning and Development that will serve as a conduit for students into the MS program. We have succeeded in increasing enrollments in the MS program over the last couple of years and we will continue to seek to do so in the future.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Students have become more discerning consumers of information. Their search strategies are improving and they are doing a better job of evaluating the information they find.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
NA

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We are maintaining the same assessment program as last year since it has proved to be effective. In the coming year as our National Standards are revised we will need to revisit and perhaps revise the assessment outcomes.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
Based on our assessment data we decided to discontinue the Endorsement in Online Teaching and Learning and to not pursue a state teacher certification program in instructional technology.
ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
NA

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?
NA

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
NA

Georgia State University
Assessment Data by Section
2011-2012 Instructional Technology PhD
As of 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission for the doctoral program in instructional technology is to provide specialization for instructional technologists in all aspects of the field, including instructional design, alternative instructional delivery systems, research, management, evaluation, and consulting for the betterment of education and human development. We seek to bring about this mission by enhancing and facilitating learning and problem solving through the systemic and systematic application of creative thought.

Goals
G 1: Produce Researchers in Learning Technologies
The IT Ph.D. program will produce graduates capable of conducting world-class research in Learning Technologies.

G 2: Produce Educators in Learning Technologies
The IT Ph.D. program will produce graduates capable of world-class teaching in Learning Technologies.

Student Learning Outcomes/Objectives
SLO 1: Understands and uses technology (M: 1, 2, 3, 4)
The Ph.D. student understands and uses technology as a tool of inquiry for teaching and learning.

SLO 3: Demonstrates research expertise (M: 1, 2, 3, 4, 5, 6)
The Ph.D. student demonstrates a general research competence including expertise in at least one research paradigm.

SLO 4: Engages in scholarship (M: 1, 2, 3, 4, 5, 6)
The Ph.D. student engages in scholarship and creates new knowledge about teaching and learning in his/her major discipline of inquiry.

SLO 5: Understands foundations of education (M: 1, 2, 3, 4, 5, 6)
The Ph.D. student develops an in-depth understanding of forces such as historical, social, political, psychological, and economic influences that affect education today.

SLO 6: Develops a professional identity (M: 1, 2, 3, 4)
The Ph.D. student develops an identity as a professional and contributes to a professional community of scholars and educators.

SLO 7: Develops an extended knowledge base (M: 1, 2, 3, 4, 5, 6)
The Ph.D. student develops an extended knowledge base that is associated with or that supports the major discipline of inquiry.

Other Outcomes/Objectives
O/O 2: Develops leadership for the profession (M: 1, 2, 3, 4)
The Ph.D. student provides leadership through teaching and professional development within his/her major discipline of inquiry.
## Measures (Key Assessments), Targets, and Findings

**M 1: Dissertation (O: 1, 2, 3, 4, 5, 6, 7)**

Each student will write and successfully defend a dissertation based on a study which he or she conducts. The dissertation must be approved by the dissertation committee members, the department chair, and the college dean. Faculty will compile a summary rating of the relevant standards based on the dissertation.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Understands and uses technology**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**Target for O2: Develops leadership for the profession**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**Target for O3: Demonstrates research expertise**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**Target for O4: Engages in scholarship**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**Target for O5: Understands foundations of education**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**Target for O6: Develops a professional identity**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**Target for O7: Develops an extended knowledge base**

95% of program completers will meet or exceed all standards.

**Findings 2011-2012 - Target: Met**

100% of program completers met or exceeded all standards.

**M 2: Curriculum and Syllabi Analysis (O: 1, 2, 3, 4, 5, 6, 7)**

Faculty will review syllabi and curriculum materials to insure they adequately reflect current practice in the field.

Source of Evidence: Document Analysis

**Target for O1: Understands and uses technology**

Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**

Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Target for O2: Develops leadership for the profession**

Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**

Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.
### Target for O3: Demonstrates research expertise
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

### Target for O4: Engages in scholarship
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

### Target for O5: Understands foundations of education
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

### Target for O6: Develops a professional identity
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

### Target for O7: Develops an extended knowledge base
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

**Findings 2011-2012 - Target: Met**
Faculty reviewed syllabi and curriculum materials to insure they adequately reflect current practice in the field.

### M 3: Residency Report (O: 1, 2, 3, 4, 5, 6, 7)
Each student will prepare a written report detailing their accomplishments in the areas of Teaching, Research, and Service. Faculty will compile a summary rating of the relevant standards based on the residency report.

Source of Evidence: Capstone course assignments measuring mastery

### Target for O1: Understands and uses technology
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.

### Target for O2: Develops leadership for the profession
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.

### Target for O3: Demonstrates research expertise
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.

### Target for O4: Engages in scholarship
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.

### Target for O5: Understands foundations of education
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.
Target for **O6: Develops a professional identity**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.

Target for **O7: Develops an extended knowledge base**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students met or exceeded the standard.

**M 4: Ph.D. candidacy review (O: 1, 2, 3, 4, 5, 6, 7)**
A summary rating derived from residency report, comps, internship and dissertation performance will be determined for each standard. This rating will occur at the time the student is admitted into candidacy.
Source of Evidence: Portfolio, showing skill development or best work

Target for **O1: Understands and uses technology**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

Target for **O2: Develops leadership for the profession**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

Target for **O3: Demonstrates research expertise**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

Target for **O4: Engages in scholarship**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

Target for **O5: Understands foundations of education**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

Target for **O6: Develops a professional identity**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

Target for **O7: Develops an extended knowledge base**
95% of Ph.D. students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of students admitted into candidacy met or exceeded all standards.

**M 5: Written Comprehensive Examination (O: 3, 4, 5, 7)**
Each student will complete a written comprehensive examination, prepared specifically for him or her by the members of his or her committee. The examination will take place over three days and will not exceed four hours per day in length. Faculty will compile a summary rating of the relevant standards based on the written exam.
Source of Evidence: Comprehensive/end-of-program subject matter exam

Target for **O3: Demonstrates research expertise**
95% of students will achieve meets or exceeds on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards on the first attempt.

**Target for O4: Engages in scholarship**
95% of students will achieve meets or exceeds on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards on the first attempt.

**Target for O5: Understands foundations of education**
95% of students will achieve meets or exceeds on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards on the first attempt.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards on the first attempt.

**Target for O7: Develops an extended knowledge base**
95% of students will achieve meets or exceeds on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards on the first attempt.

**M 6: Oral Comprehensive Examination (O: 3, 4, 5, 7)**

Each student will complete an oral comprehensive examination, prepared specifically for him or her by the members of his or her committee. The examination will take place in one session and will begin as a defense of the written exam and then proceed to other areas of interest to the committee. Faculty will compile a summary rating of the relevant standards based on the oral exam.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O3: Demonstrates research expertise**
95% of students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards.

**Target for O4: Engages in scholarship**
95% of students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards.

**Target for O5: Understands foundations of education**
95% of students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards.

**Target for O7: Develops an extended knowledge base**
95% of students will achieve "meets" or "exceeds" on all standards.

**Findings 2011-2012 - Target: Met**
100% of program completers achieved "meets" or "exceeds" on all standards.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Improve Post Completion Jobs**
Improve the quality of the positions students accept upon graduation from the program.

*Established in Cycle: 2009-2010*
*Implementation Status: Planned*
*Priority: High*
*Implementation Description: Monitor student completers and mentor them through the job search process.*
*Responsible Person/Group: All IT Faculty*
*Additional Resources: none*
*Budget Amount Requested: $0.00 (no request)*
### Increase Number of Program Completers
We will monitor and try to increase the number of doctoral graduates per year.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Increase student monitoring in order to improve graduation rates.
- **Projected Completion Date:** 09/2012
- **Responsible Person/Group:** All IT faculty.
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

### Increase Research Opportunities
We will seek to engage all Ph.D. students more actively in ongoing faculty research projects prior to their dissertation research.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Curriculum and Syllabi Analysis | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Dissertation | Outcome/Objective: Demonstrates research expertise
  - Develops an extended knowledge base | Engages in scholarship
  - Measure (Key Assessment): Oral Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
  - Engages in scholarship
  - Measure (Key Assessment): Ph.D. candidacy review | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Residency Report | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Written Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
  - Engages in scholarship

- **Implementation Description:** Ongoing
- **Responsible Person/Group:** All faculty

### Monitor Standards
Program faculty will maintain the current design and implementation of the program, and continue to monitor the stated student learning outcomes during the 2010-2011 academic year. Due to the increasingly rapid pace of technology evolution and the core function of technology in this program, it may be necessary to shorten the syllabus review cycle to bi-annually. Additionally, faculty may need additional resources in the future to fund professional development in order to stay current with technological change.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Curriculum and Syllabi Analysis | Outcome/Objective: Demonstrates research expertise
  - Engages in scholarship
  - Understands and uses technology | Understands foundations of education

- **Implementation Description:** Ongoing
- **Responsible Person/Group:** IT Unit
- **Additional Resources:** Funding for Professional Development
- **Budget Amount Requested:** $3,000.00 (recurring)

### Recruit Full-time Students
As we transition to becoming a more research oriented institution we need to recruit more full-time Ph.D. students to assist in that effort. We have added a couple of additional full-time Ph.D. students and we will continue to pursue additional students.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Implementation Description:** Ongoing
- **Responsible Person/Group:** All faculty

### Seek External Funding
In order to support more full-time Ph.D. students we will seek more external funding for faculty research.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Curriculum and Syllabi Analysis | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Dissertation | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Oral Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
  - Engages in scholarship
  - Measure (Key Assessment): Ph.D. candidacy review | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Residency Report | Outcome/Objective: Demonstrates research expertise
  - Develops a professional identity | Engages in scholarship
  - Measure (Key Assessment): Written Comprehensive Examination | Outcome/Objective: Demonstrates research expertise
  - Engages in scholarship
Engages in scholarship

Implementation Description: Ongoing
Responsible Person/Group: All faculty

Review Program Length
In order to improve time to completion rates and enhance the research skills and marketability of our graduates, we will review the entire Ph.D program with an eye to shortening it overall and including more research experience. Such a change is now possible thanks to recent revisions in college policy.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Implementation Description: We shortened the program form 66 to 60 hours, eliminated the cognate, and increased the number of research hours required.
Responsible Person/Group: All Faculty
Additional Resources: none

Revise Standards
The Association for Educational Communications and Technology is in the process of revising professional standards in the field. As our standards are based on these we will need to review and possibly revise our standards once their revision is complete.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: in process
Responsible Person/Group: All Faculty
Additional Resources: none

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
NA

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
NA

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
NA

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
Based on assessment data and as per our action plan we shortened the Ph.D. program by six hours. We believe that this will help improve time to completion rates. Additionally, we increased the number of research hours students now complete. We believe this will enhance the research abilities of students and their research productivity. We also admitted a larger cohort of students in order to increase program size as specified in our action plan. We instituted a one hour research seminar that every student takes every semester prior to being admitted into candidacy. We will use this seminar to monitor the students’ progress more closely.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
We changed the length of the program and instituted a more cohort oriented approach. We also instituted a 1 hour research seminar students take every semester. We will monitor students through this seminar to get a finer grained analysis of their progress.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
NA

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?
NA

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Georgia State University
Assessment Data by Section
2011-2012 International Business MS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The MIB program is designed for individuals who aspire to organizational or entrepreneurial leadership and/or managerial positions across functional areas in firms with significant presence or activity in international markets. The primary objectives of the MIB program are to: develop an in-depth understanding of the international business environment, build capabilities to deal effectively in international markets, extend functional skills to deal with managerial issues in the global marketplace, demonstrate proficiency in a foreign language, develop intercultural awareness and sensitivity, develop team skills to be contributing members of an effective global team, and complete an extended work experience outside of the student's native country.

Goals

G 1: Goal 1: Understanding of International Business Environment
Full Description: Students will have the ability to identify and analyze strategic and operational opportunities or problems in a specific international setting. The measurements may incorporate case histories, analytical papers, market studies, etc.

G 2: Goal 2: Country Market Analysis
Full Description: Students will be able to conduct systematic country market analysis from the perspective of potential exporters, investors, global procurers, and other firms. Students will identify the factors that contribute to global market opportunity, identify diverse sources of data, and systematically analyze it in order to generate practical recommendations for managers.

G 3: Goal 3: Extend Functional Skills in International Operations
Full Description: Students will be able to demonstrate their functional knowledge to analyze a case in the international context. They will be able to delineate the impact on business practice of international and cross-cultural issues. Students will demonstrate expertise in such areas as: Cross-Cultural and Collaborative Skills; Global Supply Chain Management; Global CSR; International Marketing and Positioning; Global Financial System Analysis; Global Legal Environment; International Entrepreneurship.

G 4: Goal 4: Second Language Proficiency
Full Description: The students need to be proficient in a second language in order to conduct business. If the students do not have proficiency in a second language before they are admitted to the MIB program, they must take language courses while they are in the program before they are granted the degree.

G 5: Goal 5: Team Skills
Full Description: Students will engage in a team based project in the Capstone Course that will be self-assessed, team-assessed, and faculty assessed.

G 6: Goal 6: Extended Work Experience
Full Description: Students will complete an internship providing foreign business experience, cultural awareness and functional expertise. Students will file monthly internship reports that consist of three parts: a) examples of foreign business experience, b) examples of comparisons for cultural differences, and c) particular examples of tasks and responsibilities undertaken.

Student Learning Outcomes/Objectives

SLO 1: Complete analyses Goal 1 (M: 1, 2, 3, 4)
Related Measures: M.1: Critical Success Factor Situation Analysis M.2: Identification of Viable Strategic Alternatives M.3: Impact of Competitor Action and Reaction to Analyze the Success of Viable Alternatives Measure 1 Understanding of International Business Environment – Critical Success Factor Analysis Fails to meet standards = 1. The student cannot sufficiently distinguish critical success factors, align major resources with these factors, and construct logical cause-effect relationships. Meets standards = 2. The student can identify most critical success factors, and generally align most factors with firm's major resources. Exceeds standards = 3. The student captures almost all critical success factors, tightly aligns resources with these factors, and effectively compares the firm's position in a thorough manner. Measure 2 Understanding of International Business Environment – Identification of Viable Alternatives Fails to meet standards=1. The student cannot set out clear, viable alternatives for action based on critical success factors in the environment. Meets standards=2. The student can generate some viable alternatives that are aligned with the critical success factors in the environment. Exceeds standards=3. The student generates clear and well-supported viable alternatives of action that a grounded in the critical success factors of the environment. Measure 3 Understanding of International Business Environment – Impact on Competitor Actions and Reactions Under the Alternatives Fails to meet standards=1. The student cannot clearly illustrate of explain how a competitive action will be responded to by rival firms in the environment. Meets standards=2. The student can generally set out the likely competitive responses to strategic moves in the environment. Exceeds standards=3. The student clearly sets out the impact of the alternatives on the competitors in the environment and incorporates it into the overall analysis and decision

SLO 5: Complete Analyses Goal 3
Case analysis or a final paper that shows how business decisions are subject to international dynamics by demonstrating functional area knowledge in the context of international environment Measure 7 Extend Functional Skills in International Operations Fails to meet standards=1. The student cannot sufficiently distinguish between domestic and international contexts. Meets standards=2. The student is able to recognize at least two functional areas and integrate them. Exceeds standards=3. The student can fully capture the implications of four or more functional area decisions.
Other Outcomes/Objectives

O/O 7: Complete Analyses Goal 4

- M.8: There are three assessment methods, either one should be met. Completion of foreign language requirement at a foreign institution Or Passing an examination approved by the GSU IIB Department Or Sit for an examiner as determined by IIB Measure 8 Second Language Proficiency Fails to meet standards=1. The student does not a) complete the second language requirement at an institution other than GSU, or b) pass an exam prepared and approved by the GSU IIB department, or c) successfully sit for an examiner approved by the GSU IIB department. Meets standards=2. The student does a) complete the second language requirement at an institution other than GSU, or b) pass an exam prepared and approved by the GSU IIB department, or c) successfully sit for an examiner approved by the GSU IIB department. Exceeds standards=3. The student does a) complete the second language requirement at an institution other than GSU, or b) pass an exam prepared and approved by the GSU IIB department, or c) successfully sit for an examiner approved by the GSU IIB department on their skill level is distinctly higher than that needed for a pass.

SLO: Complete Analyses Goal 5

- 90% of students should pass each outcome/objective with “Meets Standards” criteria. 30% of students should pass each outcome/objective with “Exceeds Standards” criteria. M.9 * Team Skills Team Assessment Fails to meet standards=1. In peer evaluation forms it shows that: Student cannot work effectively with others, cannot incorporate functional knowledge, and problem solving. Meets standards=2. In peer evaluation forms it shows that: Student can apply multiple views and perspectives to create consensus. Exceeds standards=3. In peer evaluation forms it shows that: Student can bring multiple views and perspectives to problem solving and create synergies from diverse perspectives. Measure 10 * Team Skills Faculty Assessment Fails to meet standards=1. In team evaluation forms by the faculty of the team members: The student has not been an effective member of the team in incorporating knowledge and problem solving. Meets standards=2. In team evaluation forms by the faculty of the team members: The student has effectively worked with his/her teammates, incorporated functional knowledge and problem solving. Exceeds standards=3. In team evaluation forms by the faculty of the team members: The student has integrated multiple views and perspectives to problem solving, can create synergies from diverse perspectives and demonstrate critical thinking. * Kaufman, Felder, and Fuller (2000); May and Gueldenzoph (2003)

SLO 10: Target Levels Goal 5 (M: 10, 11)

90% of students should pass each outcome/objective with “Meets Standards” criteria. 30% of students should pass each outcome/objective with “Exceeds Standards” criteria.

SLO 11: Complete Analyses Goal 6

- M.11: Faculty assessment of monthly internship report M.12: Faculty assessment of cumulative supervisor/company report Measure 11 Extended Work Experience Monthly internship report Non Pass: The student fails to file his/her monthly internship report, or files incomplete reports with missing sections. Pass: The student files his/her monthly internship report and provides details on a) foreign business experience, b) detailed observations of the foreign culture, c) description of the tasks and responsibilities undertaken. Exceed: The student files his/her monthly internship report and provides details on and comparison of a) foreign business experience, b) cultural differences, c) how he/she integrated concepts learned in class to real-life cases. Measure 12 Extended work Experience Cumulative internship report Non Pass: The company/supervisor fails to file a cumulative internship report, or files an incomplete report with missing sections. Pass: The company/supervisor files a cumulative internship report and provides brief description of the student's responsibilities and adequate execution of these tasks. Exceed: The company files a cumulative internship report and provides a commendation for outstanding work ethic and accomplishment of tasks and responsibilities assigned.

Other Outcomes/Objectives

O/O 2: Target Levels Goal 1

- 90% of students will get 2.0 on Measures 1, 2 and 3 30% of students will get 3.0 on Measures 1, 2 and 3

O/O 3: Complete Analyses Goal 2

Related Measures: M.4: Explicit identification of criteria, by which the students will conduct this analysis, the dataset they will use. M.5: Interpreting the data in order to arrive at recommendations M.6: Delineation of country level, industry level, and from firm level variable to conduct the analysis Measure 4 Country Market Analysis - Explicit Identification of criteria, Fails to meet standards=1. The student fails to consult reliable data sources and considers trends in less than three macro variables. Meets standards=2. The student identifies and consults two sources for data and analyzes the trends in three macro variables. Meets standards=2. The student identifies and consults two sources for data and analyzes the trends in three macro variables. Exceeds standards=3. The student consults three or more reliable sources for data and analyzes trends in four or more macro variables. Measure 5 Country Market Analysis – Data Interpretation, Fails to meet standards=1. The student does not apply the techniques developed in IB for country market analysis in data interpretation. Meets standards=2. The student generally accesses tools developed in IB in interpreting the data collected for a country market analysis. Exceeds standards=3. The student uses tools developed in IB to develop rich and insightful interpretations of the data collected in a country market analysis. Measure 6 Country Market Analysis – Delineation of different Levels in Analysis Fails to meet standards=1. The student does not effectively distinguish between the different levels of analysis in the country market analysis. Meets standards=2. The student shows an understanding of the different levels of analysis and conducts the country market analysis in that way. Exceeds standards=3. The student can effectively distinguish the different levels of analysis and integrate the different perspectives from each in the country market analysis.

O/O 4: Target Levels Goal 2 (M: 5, 6, 7)

- 90% of students will get 2.0 on Measures 4, 5 and 6. 30% of students will get 3.0 on Measures 4, 5 and 6

O/O 6: Target Levels Goal 3 (M: 8)

- 90% of students will get 2.0 on Measure 7. 30% of students will get 3.0 on Measure 7

O/O 8: Target Levels Goal 4 (M: 9)

80% of MB students pass one of the three measures on their first attempt. 90% of MB students pass one of the three measures on their second attempt.
**O/O 12: Target Levels Goal 6 (M: 12, 13)**

90% of students should pass each outcome/objective with "Pass" criteria. 10% of students should pass each outcome/objective with "Exceed" criteria.

### Measures, Targets, and Findings

#### M 1: Measures (O: 1)

- M.1: Critical Success Factor Situation Analysis
- M.2: Identification of Viable Strategic Alternatives
- M.3: Impact of Competitor Action and Reaction to Analyze the Success of Viable Alternatives

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 2: Measure 1 (O: 1)

- M.1: Critical Success Factor Situation Analysis

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 3: Measure 2 (O: 1)

- M.2: Identification of Viable Strategic Alternatives

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 4: Measure 3 (O: 1)

- M.3: Impact of Competitor Action and Reaction to Analyze the Success of Viable Alternatives

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 5: Measure 4 (O: 4)

- M.4: Explicit identification of criteria, by which the students will conduct this analysis, the dataset they will use.

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 6: Measure 5 (O: 4)

- M.5: Interpreting the data in order to arrive at recommendations

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 7: Measure 6 (O: 4)

- M.6: Delineation of country level, industry level, and from firm level variable to conduct the analysis

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 8: Measure 7 (O: 6)

- M.7: Case analysis or a final paper that shows how business decisions are subject to international dynamics by demonstrating functional area knowledge in the context of international environment

Source of Evidence: Written assignment(s), usually scored by a rubric

#### M 9: Measure 8 (O: 8)

- M.8: There are three assessment methods, either one should be met. Completion of foreign language requirement at a foreign institution Or Passing an examination approved by the GSU IIB Department Or Sit for an examiner as determined by IIB

Source of Evidence: Standardized test of subject matter knowledge

#### M 10: Measure 9 (O: 10)

- M.9: Team Assessment: Ability to bring multiple views/perspective to problem solving, and demonstrate individual performance when functioning in the team.

Source of Evidence: Evaluations

#### M 11: Measure 10 (O: 10)

- M.10: Faculty Assessment: Ability to drive towards consensus in the presence of diverse perspectives, and demonstrate that the student has improved the team's performance.

Source of Evidence: Evaluations

#### M 12: Measure 11 (O: 12)

- M.11: Faculty assessment of monthly internship report

Source of Evidence: Field work, internship, or teaching evaluation

#### M 13: Measure 12 (O: 12)

- M.12: Faculty assessment of cumulative supervisor/company report

Source of Evidence: Field work, internship, or teaching evaluation
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Update Assessment Plan

In order to attract more students the program has been modified in terms of format and focus. We are working to develop a new assessment plan in light of these program revisions.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: In coordination with the Assistant Dean for Assessment, a committee consisting of faculty teaching in the program is engaged in the development and implementation of the assessment plan with the intention of collecting the first assessment data for this cohort in Spring 2013.
Projected Completion Date: 05/2013
Responsible Person/Group: Leigh Ann Liu, Program Faculty, Tracy Widman

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The entire assessment process is being revised. The delivery format of the program was modified to be a cohort, lock-step program instead of a flexible enrollment program. Previously, the flexible format and the low enrollment in the program provided obstacles to assessing the program with any confidence in the results. The new format and a slight change in the focus of the program resulted in a multiplicative larger entering class. The new format and the slight change in focus requires modifications to our objectives, measures, and targets.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Small number of students in each required course (often times only one or two students) and the absence of any individual, non-course specific program requirements combined with the random sequencing of courses by students created data collection obstacles. When data was collected, it was from such a small number of students who commonly had not attempted all course requirements that the data was rightly found to be of minimal and questionable use. Changing the program to a cohort format will ensure that students have completed the coursework in the prescribed sequence, allowing for more confidence and validity in the data collected. The larger number of students in each required course will result in our having more than one or two data points for each measure.

Georgia State University

Assessment Data by Section

2011-2012 Journalism BA

As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The Department of Communication is firmly committed to the goals of academic excellence, strong research programs and international relevance set forth in the Georgia State University’s Strategic Plan. The Department encompasses multiple professional, creative and research traditions, all of which are organized around the idea that central to the human experience is the use of symbols for the purpose of making and understanding meaning. As an academic unit, the Department is committed to cultivating a deeper appreciation of the creative and intellectual traditions of communication by providing students with critical thinking and media literacy skills, enhancing students’ oral, written and visual communication processes through participation in cutting edge scholarly and artistic programs and collaborating with and enhancing the local, state, regional, national and global communities related to communication. Note: The Department has about 1,400 undergraduate majors, about 840 are Journalism majors.

Goals

G 1: evaluate information
Students will be able to find and evaluate credible sources of information.

G 2: objective analysis
Students will be able to analyze and interpret information for bias and objectivity.

G 3: apply standards when originating content
Students will be able to apply ethical standards and conventions of journalism and related mass communication industries when creating original content, e.g. news stories, press releases, newsletters, etc.,

Student Learning Outcomes/Objectives

SLO 1: Research and evaluate info. (G: 1, 2) (M: 2)
Normal 0 false false false MicrosoftInternetExplorer4 Conduct research and evaluate information by methods appropriate to the communication professions in which they work
SLO 2: Understand history/role of pro communicators (M: 1)
Demonstrate an understanding of the history and role of professionals and institutions in shaping communications

SLO 3: Understand diversity relating to communications
Demonstrate an understanding of the diversity of groups in a global society in relationship to communications

SLO 5: Ethically pursuing truth, accuracy, fairness
Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity

SLO 8: Write correctly and clearly (G: 3)
Write correctly and clearly in forms and styles appropriate for the communication professions, audiences and purposes they serve

SLO 9: Critically evaluate own/others' work
Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatically correctness

SLO 10: Apply numerical/statistical concepts
Apply basic numerical and statistical concepts

Measures, Targets, and Findings

M 1: Understand history/role of pro communicators (O: 2)
Assessment based on multiple choice test drawn from standardized tests for journalism majors. See document repository
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Understand history/role of pro communicators
Students are expected to pass a multiple-choice test on journalism history and roles of professionals with a minimum of 70%

Findings 2011-2012 - Target: Partially Met
Students achieved an average of 71.6% on multiple choice test

M 2: RESEARCH COMPETENCY (O: 1)
Students were asked to assess the veracity of two statements and provide two sources to support for their decisions
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Research and evaluate info.
70% of Students were expected to complete assignment successfully.

Findings 2011-2012 - Target: Partially Met
71.6% of students were able to complete assignment successfully.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

CTW
Adding the CTW course as a capstone to the Journalism curriculum will allow for additional assessment measures of students' research abilities.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: Beginning fall semester
Projected Completion Date: 07/2009
Responsible Person/Group: Journalism faculty

CTW
With the addition of the CTW courses to the Journalism curriculum, the assessment of the critical thinking learning outcome will be emphasized and standardized in the junior-level and capstone courses.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: Beginning fall semester
Projected Completion Date: 07/2009
Responsible Person/Group: Journalism faculty

CTW
With the addition of the CTW courses--specifically the capstone course options-- to the Journalism curriculum, the assessment of the
research learning outcome will be emphasized and standardized.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: Beginning of Fall semester
Projected Completion Date: 07/2009
Responsible Person/Group: Journalism faculty

CTW
With the addition of the CTW courses—specifically the capstone Media, Ethics & Society course—to the Journalism curriculum, the assessment of the ethics learning outcome will be emphasized and standardized.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: Beginning fall semester
Projected Completion Date: 07/2009
Responsible Person/Group: Journalism faculty

With the addition of two CTW courses in the Journalism curriculum next year, additional measures will be easily included, e.g. embedded assignments in the junior-level CTW course.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: Beginning fall semester
Projected Completion Date: 07/2009
Responsible Person/Group: Journalism faculty

multiple measures
At least one more measure is needed to assess the theories learning outcome. A rubric to score a sample of student papers written about theory in Jour 3070 was abandoned this year but perhaps should be reconsidered. An assessment exam about theories was abandoned several years ago, but perhaps embedded questions in existing Jour 3070 exams should be considered.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

multiple measures
At least one more measure should be added to assess the diversity learning outcome. Perhaps a specific assignment requiring multiple viewpoints to be included should be required in at least one of the core Journalism courses.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

multiple measures
At least one more measure should be added to assess the evaluation learning outcome. Perhaps a writing style/editing assignment or an embedded exercise about editing on an exam could be used.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

multiple measures
At least one more measure should be considered to assess students' ability to critically evaluate others' work. Perhaps an embedded assignment in at least one of the Journalism core courses or an exercise on an exam should be considered.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Midpoint of fall semester
Projected Completion Date: 09/2009
Responsible Person/Group: Journalism faculty

revised curriculum
The revised Journalism curriculum has more technology in more courses earlier in the major map than the existing curriculum. The assessment of the use of tools/technology will be much easier as embedded assignments in at least two of the new Journalism core courses will be measured. The curriculum revision will not be fully implemented until AY 2011 so next year will be a transition year, allowing for a pilot study of measures to be tried.

Established in Cycle: 2008-2009
Implementation Status: Planned
align outcomes with goals
Normal 0 false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Revise/increase number of goals to align all eleven learning outcomes with a goal.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Faculty will assess each outcome to ensure that it flows from specific goal. This assessment will also identify goals not yet captured
Projected Completion Date: 10/2010
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Data Collection Protocol
Improve collection of data and develop multiple measures for each goal/learning outcome.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Faculty will determine most efficient and effective process by which data can be collected for assessment. In addition, faculty will determine assessment tools that best measure learning outcomes.
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Rotate Assessment
Determine rotation of learning outcomes to be assessed in each cycle. Not all goals/learning outcomes have to be assessed every year, but each one has to be assessed regularly.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Faculty will determine system by which all learning outcomes will be assessed at least once over a three-year rotation.
Projected Completion Date: 10/2010
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Student Work Selection
Random selection of student work rather than selection based on cross-section of student work by performance.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: Instructors will randomly select student work from several assignments for assessment
Projected Completion Date: 10/2010
Responsible Person/Group: Journalism faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Assessment Reconfiguration
Current assessment protocols need to be revised to ensure that assessments truly reflect student achievement. The program will need to standardize assessment tools and rubrics for each outcome, as well as create systems whereby students understand the assessment process and rubrics that will be used to assess achievement.
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 04/2012
Responsible Person/Group: Journalism Faculty
Budget Amount Requested: $0.00 (no request)

Increased analysis of secondary sources
Students should be given the opportunity to assess the validity of ‘facts’ drawn from sources by seeking to check those facts against third party data—governmental, academic or proprietary. Students should be required to rate the validity on a standard scale to be established by the class where assessment in taking place.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Journalism History and Professionalism
Students should be required to have understanding of a minimum of 20 historical events that shaped modern journalism. Students should be required to identify 10 key elements that demonstrate professionalism in the field of journalism.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relation of (Measure | Outcome/Objective):
Measure: Understand history/role of pro communicators | Outcome/Objective: Understand history/role of pro communicators

Responsible Person/Group: Instructors of journalism history courses

**Georgia State University**

**Assessment Data by Section**

2011-2012 Law

As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The Georgia State University College of Law is committed to providing a high quality legal education in its full time and part time, day and evening programs. In order to fully prepare students for professional lives as practicing attorneys or professionals making other uses of their professional knowledge and skills, the College of Law uses a variety of teaching methodologies, including the case study method, the Socratic method, lectures, seminars, writing workshops, and clinical education. The College of Law seeks to produce students whose knowledge, performance and behavior exemplify the best of the legal profession. In addition to taking classroom courses, students are encouraged to participate in our two live-client clinics, the Tax Clinic and the HeLP Clinic. The Tax Clinic helps clients resolve issues with the IRS. The HeLP Clinic helps clients who come to the clinic with a variety of legal problems related to health problems. The Tax Clinic works closely with the IRS, while the HeLP Clinic works closely with Egleston Hospital and Atlanta Legal Aid. We also encourage students to engage in significant pro bono activities related to skills they develop in the College of Law. As of Spring 2007, 701 students are enrolled in our JD program. In the academic year 2006-07, beginning with Summer 2006 and ending in Spring 2007, 212 students earned J.D. degrees from the College of Law. Ten of those students earned joint degrees; a breakdown follows: JD/MPA - 2; JD/MBA - 7; JD/MPA - 2; Other - 1.

Since the issuance of the Carnegie Report evaluating legal education in the United States, the College of Law has been undergoing a long-term rigorous review of our entire curriculum. In year one, every member of the College faculty was required to read the entire Carnegie Report and participate in "book club" sessions held on weekend days at faculty members' homes. In year two, the Faculty Curriculum Committee was charged with studying our entire curriculum, with an eye to suggesting changes responsive to the Carnegie Report. A student representative was appointed to serve on the Committee, as well. By the end of the year, the Committee had made a series of findings and proposals, and presented them to the faculty. In year three, the faculty held a day-long retreat to consider the Committee's proposals. The retreat, attended by nearly every faculty member, revealed that there were still some wrinkles to be ironed out in the proposals. As a result, significant changes were not approved at the retreat. Nevertheless, there was a consensus that the faculty was committed to moving forward to making substantial changes in our curriculum, primarily those addressed to students' writing skills. All agree that the current required RWA I and RWA II classes do a good job of improving students' writing skills. At the same time, we recognize that many students come into law school with such deficient writing skills that we need far more than two semesters of first year courses to bring them to a "practice-ready" skill level.

**Goals**

**G 1: Basic proficiency in legal writing**

Any accredited law school graduate, whether she practices law in a traditional sense or not, needs to be an effective communicator. While oral communication skills often get the most attention in modern American society, the reality is that written communication is more common, more permanent, and more important. For this reason, we seek to produce law graduates who can communicate in clear written form with clients, the courts and the public. Generally, their written communications are intended to perform three distinct functions: (i) identify relevant legal issues; (ii) identify, explain and analyse the existing law dealing with such issues; (iii) predict resolution of the issues by applying the existing facts to the existing law, or propose legal solutions to deal with them in the future.

**G 2: Basic proficiency in legal research**

All students must learn how to find the existing law, whether it be in the form of statutes, regulations or caselaw. Students must also learn the proper format for using and citing the law in memos, briefs, and other relevant forums.

**G 3: Basic proficiency in fundamental legal principles**

All students must learn the fundamentals of the American legal system. Once they learn these fundamentals, they may choose to "specialize" and take courses in specific areas of the law.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Basic proficiency in objective legal writing (M: 2, 2)**

The primary vehicle via which all students must demonstrate writing proficiency occurs in the required RWA I and II courses. All law students must take and pass these courses in order to graduate; indeed, they must do so in order to take any elective courses. In the Fall (RWA I), the objective is to have the students master the art of "objective writing." Students are first provided with a hypothetical legal scenario and "canned" research, already developed by the entire RWA faculty. Students must first produce a "closed memo," in which they objectively describe the issue, the relevant existing law, and their assessment of how a court would resolve the issue. The hypothetical is a "balanced" one, meaning that there are generally equally good arguments to be made that the relevant law supports one result or the other. The student must learn to identify and effectively present the different possible interpretations of the law, and the varying results at which courts might arrive. The memo is written as if a new law associate is presenting the memo to a senior law firm partner who needs to know whether or not to take on a client's case. In the course of writing their memos, students receive constant feedback, both written and oral, from their RWA instructors. The final product is graded using a highly specific grading rubric.
SLO 2: Basic proficiency in advocacy legal writing (M: 2)

In the Spring (RWA II), the objective is to have the students master the art of “advocacy writing.” This differs from RWA II in two primary respects. First, the students are no longer able to rely upon any “canned research.” For this semester, they rely almost entirely upon research they develop on their own. The research skills are those learned in both RWA I and II, as well as in Legal Bibliography, a course taught by law librarians, second, the product the students must produce for RWA II is a legal brief. A brief is a document presented to a court for the benefit of one party to a lawsuit. Thus, unlike the memos which are intended to present objective descriptions of the law, the brief uses the current law to argue for the position of the client the lawyer represents in a lawsuit. Students are assigned to represent one side or the other.

Other Outcomes/Objectives

O/0 4: xxx (M: 2)

xxx

Measures, Targets, and Findings

M 2: Production of satisfactory written product (O: 1)

Using the grading rubric in attached scoring sheets, students’ memos are objectively evaluated. They are given multiple opportunities to meet with instructors and write and re-write their papers.

Source of Evidence: Evaluations

Target for O1: Basic proficiency in objective legal writing

Our target is that every single student at the College of Law acquire the proficiency described herein. While that is not possible, our more modest goal is simply to say that students who do not achieve this proficiency will not pass RWA. In fact, there is a significant correlation between those students who do not pass RWA the first time (or at least make a C) and those who do not end up graduating from the College of Law. A significant number of students who are excluded for academic reasons at the end of their first year have either failed or done very poorly in RWA.

M 2: Writing Intervention exercises (O: 1, 2, 4)

In addition to RWA, all students must also take Civil Procedure I in the Fall and Civil Procedure II in the Spring. Traditionally, these courses have both been tested and graded using one exam at the end of each semester. Especially in Civil Procedure I, the exams have been almost exclusively essay exams. Since Civil Procedure is both required and rather esoteric (especially Civil Procedure I), it seems like a good course to attempt to assess and measure the degree to which students' writing skills are up to par. Picking up on that idea, two Civil Procedure professors first started using a “writing intervention” program throughout the course of the semester to see if such interventions would improve upon the skills already first learned in RWA I. In its first iteration, one professor used the intervention program, while the other did not. So as to make fair comparisons of the results in the two classes, each professor otherwise used the same syllabus and the same final exam. The intervention used in the first (experimental) year and beyond consisted of giving students five three-page, take-home papers, in addition to the final exam. The papers were designed to help students learn how to break a legal rule into its component parts, analyze and apply facts to each of the rule's elements, and make arguments on both sides. Two weeks into the semester, the intervention professor gave her students an initial single issue “practice” paper. After the students turned the paper in, the intervention professor read approximately ten papers to get a sense of the common errors and issues. Before assigning the next paper, she reviewed the IRAC formula (issue, rule, analysis, and conclusion) with the class. She also gave students general feedback on common problems she saw in the papers she read and discussed how to avoid these problems in the future. Since that first experimental year, these methods have been incorporated into that professor's class, and they are being copied by other professors, as well.

Source of Evidence: Evaluations

Target for O1: Basic proficiency in objective legal writing

The goals of these writing intervention exercises are threefold. First, we want all students to become comfortable with practicing writing exercises. While the point of this practice is to succeed on examinations, such practice is good preparation for work as a practicing lawyer. Second, we want students to become comfortable with self-editing, so that they are capable of both writing good quality papers, but also improving upon them the second or later time around. Third, we want all students to write better final exams (just as they will later write better letters, memos, briefs, and all manner of legal documents) than they would write without the intervention.

Target for O2: Basic proficiency in advocacy legal writing

The goals of these writing intervention exercises are threefold. First, we want all students to become comfortable with practicing writing exercises. While the point of this practice is to succeed on examinations, such practice is good preparation for work as a practicing lawyer. Second, we want students to become comfortable with self-editing, so that they are capable of both writing good quality papers, but also improving upon them the second or later time around. Third, we want all students to write better final exams (just as they will later write better letters, memos, briefs, and all manner of legal documents) than they would write without the intervention.
Target for O4: xxx

The goal is to have all students demonstrate their proficiency in research and legal writing at the same time. This assessment is made via the "legal writing requirement," pursuant to which each student must produce one substantial paper during law school which means specific criteria for length, sophistication and quality. For every such paper, the student must submit multiple drafts to the supervising professor before turning in the final product. No student may graduate from the College of Law without satisfying this requirement.

Georgia State University
Assessment Data by Section
2011-2012 Managerial Science BBA
As of 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Department of Managerial Sciences seeks to provide its undergraduate majors with a rich understanding of fundamental principals in general management, human resource management, operations management, entrepreneurship, and the concepts that underlie the social, psychological, and cultural aspects of organizations, as well as the skills to use this understanding effective in organizations of all types.

This was set as the Department's Mission in the 2005-2006 cycle. It failed to migrate forward in the WEAVE update for the 2008-2009 cycle. In the 2011 - 2012 cycle it was revised.

Goals

G 2: Functional Expertise
All BBA graduates in the Department of Managerial Sciences will have an understanding of the principles, tools, and best practices in one of the Department's four discipline areas: Business Analysis, Entrepreneurship, Human Resources, and Operations Management.

G 3: Decision Making Skills
All BBA graduates in the Department of Managerial Sciences will be effective critical thinkers.

G 1: General Management Knowledge and Understanding
All BBA graduates in the Department of Managerial Sciences will understand the concepts that underlie the social, psychological, and cultural aspects of organizations and the processes through which these concepts shape organizational effectiveness.

Student Learning Outcomes/Objectives

SLO 1: Student Performance for All Areas (G: 1, 3) (M: 1)
All BBA graduates in the Department of Managerial Sciences will be able to effectively use the concepts and tools of the social, psychological, and cultural aspects of organizations in the identification and analysis of managerial problems, and in making recommendations for action on those problems.

General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: Student Performance in their Functional Concentration (G: 2, 3) (M: 2)
All BBA graduates in the Department of Managerial Sciences will be able to effectively use the concepts and tools in their area of concentration, Business Analysis, Entrepreneurship, Human Resource Management, or Operations Management, in a highly effective identification and analysis of problems in that area, and in making recommendations for action on those problems.

General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 3: Critical Thinking in Decision Making (G: 3) (M: 1, 2)
All students in any MGS undergraduate track need to develop critical thinking skills for problem solving in their track. At the time of their completion of the degree, students in their chosen functional track will show their ability to apply critical thinking techniques in addressing issues and problems that they are likely to confront as managers.

General Education/Core Curriculum Associations
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
Measures, Targets, and Findings

**M 1: Skills in General Management (O: 1, 3)**

The MGS BBA Rubric #1 captures the student’s skill level in performing identification, making application, doing analysis and supporting recommendations with respect to the social, psychological, and cultural aspects of organizations in addressing problems in management. The MGS BBA Rubric #3 captures the student's general use of critical thinking aspects of their work.

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Target for O1: Student Performance for All Areas**

Students will average a 2.8/3.0 on each of the four skill dimensions of the MGS BBA Rubric #1. On no skill dimension will more than 10% of students score a 1.0, and on no skill dimension will more that 40% of students score a 2.0 or lower.

**Findings 2011-2012 - Target: Not Met**

Papers were selected from the three different 4000-level CTW classes in the Managerial Sciences Department for assessment. The average scores on the four components of the rubric were 2.5, 2.5, 2.4 and 2.1 respectively. These means were below the desired average of 2.8 on each component. The distributions showed that the percentage of students on each the four components of the rubric were with a 1.0 was 13, 17, 17, and 23 respectively. All of these were above the goal of 10 percent or less. The distributions showed that the percentage of students on each the four components of the rubric were with a 2.0 or 1.0 to be 53, 43, 43, and 63 respectively. All of these were above the goal of 40 percent or less.

**Target for O3: Critical Thinking in Decision Making**

Students will average a 2.8/3.0 on each of the four skill dimensions of the MGS BBA Rubric #3. On no skill dimension will more than 10% of students score a 1.0, and on no skill dimension will more that 40% of students score a 2.0 or lower.

**Findings 2011-2012 - Target: Partially Met**

Papers were selected from the three different 4000-level CTW classes in the Managerial Sciences Department for assessment. The average scores on the four components of the rubric were 2.13, 2.63, 2.43 and 2.33 respectively. These means were below the desired average of 2.8 on each component. The distributions showed that the percentage of students on each the four components of the rubric were with a 1.0 was 10, 13, 30, and 27 respectively. All of these were above the goal of 10 percent or less except the first one, which just met the goal. The distributions showed that the percentage of students on each the four components of the rubric were with a 2.0 or 1.0 to be 30, 43, 43, and 53 respectively. All of these were above the goal of 40 percent or less except the first one, which met the goal.

**M 2: Skills in the Student's Concentration (O: 2, 3)**

The MGS BBA Rubric #2 captures the student’s skill level in performing identification, making application, doing analysis and supporting recommendations with respect to the social, psychological, and cultural aspects of organizations in addressing problems in management. The MGS BBA Rubric #3 captures the student's general use of critical thinking aspects of their work.

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Target for O2: Student Performance in their Functional Concentration**

Students will average a 2.8/3.0 on each of the four skill dimensions of the MGS BBA Rubric #2. On no skill dimension will more than 10% of students score a 1.0, and on no skill dimension will more that 40% of students score a 2.0 or lower.

**Findings 2011-2012 - Target: Partially Met**

Papers were selected from the three different 4000-level CTW classes in the Managerial Sciences Department for assessment. The average scores on the four components of the rubric were 2.56, 2.86, 2.73 and 2.36 respectively. All but one of these means were below the desired average of 2.8 on each component. The distributions showed that the percentage of students on each the four components of the rubric were with a 1.0 was 17, 7, 10, and 17 respectively. One distribution met the goal of 10 percent or less and another exceeds it. Two dimensions had distributions that failed to meet the goal. The distributions showed that the percentage of students on each the four components of the rubric were with a 2.0 or 1.0 to be 40, 16, 26, and 53 respectively. Two distributions exceeded the goal of 40 percent or less and another met it. Only on goal had a distribution that failed to meet the goal.

**Target for O3: Critical Thinking in Decision Making**

Students will average a 2.8/3.0 on each of the four skill dimensions of the MGS BBA Rubric #3. On no skill dimension will more than 10% of students score a 1.0, and on no skill dimension will more that 40% of students score a 2.0 or lower.

**Findings 2011-2012 - Target: Partially Met**

Papers were selected from the three different 4000-level CTW classes in the Managerial Sciences Department for assessment. The average scores on the four components of the rubric were 2.13, 2.63, 2.43 and 2.33 respectively. These means were below the desired average of 2.8 on each component. The distributions showed that the percentage of students on each the four components of the rubric were with a 1.0 was 10, 13, 30, and 27 respectively. All of these were above the goal of 10 percent or less except the first one, which just met the goal. The distributions showed that the percentage of students on each the four components of the rubric were with a 2.0 or 1.0 to be 30, 43, 43, and 53 respectively. All of these were above the goal of 40 percent or less except the first one, which met the goal.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Revision of MGS

Managerial Sciences needs to expand and improve its measurements. New measures have to be able to better detect the sources of
the disappointing performance that MGS is experiencing relative to other students who are not Management majors. The first step in this will be having the department assessment team attend the daylong assessment workshop that the College is sponsoring on Sept 19th. Subsequently, members of the department assessment team need to apply lessons from that session and quickly develop new measures and ways of measuring. Those measures will then be implemented in the department in the 2008-09 cycle.

Challenging Courses
Evaluate the rigor and challenge of the Department's threshold course for majors, MGS 4000.

Emphasis on Conclusions and Recommendations
Review of the results in the initial use of the three inter-related rubrics for the 2011-2012 cycle showed that these were the two weakest area of student performance on their critical thinking in general and their application to managerial sciences dimensions as well as their area of concentration. The new assessment committee will begin working with all instructors on ways to develop better skills in these areas across the MGS cirriculum.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The MGS Department has totally overhauled its assessment process under its new Chair. For the 2011 – 2012 cycle new rubrics were developed to align better with the goals and learning outcomes of the department. At the end of the cycle a department level committee was formed with representative of each of the discipline areas in the MGS Department. This Committee was charged with beginning the “closing the loop” process with the 2011-2012 results. This committee will also revise the initial rubrics included in this report as needed and work to establish a culture of assessment in the department.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The weak results in critical thinking processes in general and in the specific areas looked at in the assessment will lead to an initial thrust to emphasize drawing conclusions and making recommendations.

Georgia State University
Assessment Data by Section
2011-2012 Marketing BBA
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Department of Marketing at Georgia State University at the BBA level is to prepare students for entry level positions in marketing, sales and related fields by helping them acquire the skills they need to: Analyze marketing problems and situations. Develop effective marketing strategies and tactics Clearly communicate their analyses and recommendations.

Goals

G 1: Analysis of Marketing Situations/Problems
Students will be able to accurately describe and analyze marketplace situations, key issues, problems and decisions facing marketing organizations and to describe and analyze the qualitative and quantitative pros and cons of alternative solutions.

G 2: Applying Quantitative Tools
Students will be proficient in the use of standard marketing metric tools employed by marketing organizations for situation analyses
and development of marketing strategy and tactics.

**G 3: Critical Thinking and Problem Solving**
Students will exhibit critical thinking skills in the process of solving marketing problems and in arriving at logical and feasible solutions/recommendations for marketing organizations.

**G 4: Formulate Marketing Strategy and Tactics**
Students will be able to develop useful and feasible strategies and tactics to address specific marketing situations/problems using the marketing mix.

**G 5: Communication Skills**
Students will be able to communicate clearly and effectively in written and oral form.

### Student Learning Outcomes/Objectives

**SLO 1: Identify and analyze key marketing problems (G: 1) (M: 1)**
Students will be able to identify and thoroughly analyze a marketing organization's competitive situation.

**SLO 2: Accurately Employ Marketing Metric Tools (G: 2) (M: 1)**
Students will be proficient at the use of standard metrics tools employed in marketing analysis and strategy.

### Other Outcomes/Objectives

**O/O 3: Logical and feasible recommendations/solutions (G: 3, 4) (M: 1)**
Students will be proficient in developing logical and feasible solutions and recommendations to marketing organizations.

**O/O 4: Clear concise writing (G: 5) (M: 1)**
Students will demonstrate proficiency at clear, logical, business-like writing.

**O/O 5: Oral communication (G: 5) (M: 2)**
Students will be able to engage in clear, meaningful discussion of marketing problems and issues.

### Measures, Targets, and Findings

**M 1: Case Analysis Write Up (O: 1, 2, 3, 4)**
Assessment in the Marketing Department focuses on our capstone course, MK 4900 (Marketing Problems). Our departmental assessment of student learning is based on case analyses, class discussion and group projects. Because group projects are no longer acceptable as measurements of performance for the purposes of this report, case analysis is used for assessing learning with respect to content and analytical skills. Class discussion (contribution) is used to assess communication skills performance. For the 2009-2010 assessment, we used scores on students' analysis of a case entitled "Nundies." The case requires students to assess the marketplace conditions for a new product entry, develop pricing strategy, conduct a break even required share analysis, critique a proposal for product introduction, recommend a go/no go decision, justify their recommendation and offer alternative courses of action (if deemed necessary). Cases are graded via a rubric comprised of several items. Student performance on each item is scored on a 100 point scale.

Source of Evidence: Written assignment(s), usually scored by a rubric

#### Target for O1: Identify and analyze key marketing problems
An average score of 85% for relevant scoring on 2 items on case analysis rubric Exhibits a solid understanding of the marketplace situation and issues facing Advance Materials. Exhibits good insight into the into the introductory program that Advanced Materials has used to market Nundies. For the 2010-2011 Reporting Period (15 Points) Thoroughly evaluates the pros and cons of the alternative proposals that have been identified for "Nundies" Employed both qualitative and quantitative information in the analysis. (15 Points) Total possible points for this item = 30 Target score average = 25.5.

**Findings 2011-2012 - Target: Met**
The average score on this measure was 25.5 out of 30 possible point. This was 84.03%, of total possible points. Out of 73 usable case analyses (across three sections of MK 4900): 23 students (31.5%) were above target. (27+) 30 students (41.1%) were at target (24-26) 23 students (31.5%) were below target (< 26.0) Because nearly 3 out of 4 students were at, or above, target, we consider the goal to have been met.

#### Target for O2: Accurately Employ Marketing Metric Tools
An average score of 85% or higher on items relevant to marketing metrics in case analysis. Specific tasks can include: Accurate break-even analysis and assessment of required break-even share of market. Appropriate product pricing given competitive set. Assessment of market size potential. Production of appropriate P&L or Pro Forma statement. Competent computation of contribution, margin and profit. Total possible score for this assessment item = 15 Target average score = 12.75

**Findings 2011-2012 - Target: Not Met**
The average score on this measure was 10.89 out of 15 or 72.1% Out of 73 usable case analyses; 16 students (22%) were above target. (90%+) 12 students (16.4%) were at target. (80%-90%) 43 students (59%) were below target. (< 80%) This aspect of marketing analysis continues to be a problem. Despite the addition of a required course in Marketing Metrics. We
Increased Class Discussion

Typically, there are 5 or more such discussions. The instructor assigns scores to each student after each discussion and posts them within one week on ULearn. In order to account for lapses in memory on the part of the instructor, students may dispute a contribution grade within 24 hours after they are posted. At the end of the semester, the instructor tallies up the total possible points and then develops a percentage score for each student. This percentage is then multiplied by the total possible semester points. This becomes the contribution grade for the student for that semester. Percent of total contribution points is the measure we are using for this assessment.

Findings 2011-2012 - Target: Met

Out of a total of 73 usable case analyses: 20 students (27%) scored above target (90%+) 24 students (33%) scored at target (80% - 90%) 29 students (40%) scored below target (< 80%) Looking at the data, it appears that there is an association between scores on the metrics assessment and scores on the marketing recommendation assessment. This makes intuitive sense because grades on a student's marketing strategy recommendation must be supported by qualitative and quantitative data. Thus, a lack of quantitative analysis will affect the quality of one's recommendation. Since a clear majority (60%) of students have scored at or above target, and considering the link between this item and the item scoring their quantitative skills, we consider this target to have been met. As long as we assess student learning in this (linked) manner, we expect that an improvement in the former will probably lead to improvement in the latter.

Target for O4: Clear concise writing

An average score of 85/100 on 4 items that assess clear, concise writing/presentation. Total points = 30. Target score is 25.5 Organization/Coherence: Logical, coherent structure guides the reader smoothly through the document. Good use of headings, sub-headings and paragraphing (5) Writing Style: Uses precise and accurate language. Sentences are well structured, varied and writing is concise and focused. (10) Mechanics: Diligently proof-read for spelling, punctuation and usage errors (5) Data Presentation: Graphs/Tables are well composed, properly labeled, appropriate and relevant. (5)

Findings 2011-2012 - Target: Met

Out of 73 usable case analyses: 23 students (32%) scored above target. (90+%) 33 students (45%) scored at target (80%-90%) 17 students (23%) scored below target (< 80%)

We consider this target to have been met.

Target for O5: Oral communication

Average of 85/100 total points for in class case discussion.

Findings 2011-2012 - Target: Met

Out of 78 usable records: 24 students (31%) scored above target (90%+) 29 students (37%) scored at target (80% - 90%) 15 students (23%) scored below target (< 80%) With the majority (68%) scoring at or above target, we consider this target to have been met.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Increase Usage of Written Assignments

We will recommend to undergraduate instructors that they develop more assignments that require writing in their classes. This can be as simple as short, one-page reaction papers. We will also encourage them to require students to employ specific writing frameworks (e.g. memorandum) that force them to develop their thoughts logically and clearly. We must also note, here, that we are not writing instructors, and our students are required to take only one business communication course.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Case Analysis Write Up | Outcome/Objective: Clear concise writing

Implementation Description: Spring 2010
Projected Completion Date: 12/2009
Responsible Person/Group: Undergraduate Curriculum Committee.
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Increased Class Discussion

We will recommend to undergraduate instructors that they increase their use of class discussion through posing problem solving questions and the use of mini-cases.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Increased problem solving assignments
The undergraduate curriculum committee will issue a formal recommendation to all undergraduate instructors asking them to include at least 3 problem solving assignments in their syllabus, with provision made for in-class discussion and feedback. We will also recommend that these assignments can be in the form of mini-case analyses. These are often present as end-of-chapter activities in most textbooks and should be fairly easy to implement. These could be either individual or group assignments. They could be take-home or entirely in class. What matters is that they provide students with opportunities to develop their logical and critical thinking abilities. We hope that the cumulative effect will be an improvement in our students’ ability to articulate clear, feasible recommendations on major assignments. We will issue a recommendation along with a copy of this report to all undergraduate instructors.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Measure: Accurately Employ Marketing Metric Tools
Outcome/Objective: Oral communication
Implementation Description: Fall Semester
Projected Completion Date: 07/2009
Responsible Person/Group: Undergraduate Curriculum Committee
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Introduce Required Course in Marketing Metrics
In the 2008-2009 academic year, we introduced a new course entitled "Marketing Metrics". Our purpose was to better prepare our students for performing the kinds of quantitative analyses employed in marketing management. This is not a marketing research or statistics course but rather it covers such tools as break-even, margin analysis, pro forma development, etc. The course becomes a requirement of all majors in the 2009-2010 academic year. In addition, it will be a pre-requisite for MK 4900, in which these techniques must be applied. Our goal is to improve the ability of our students to perform these types of analyses and to apply the learning from them. We expect that this will be reflected in improved scores on assignments pertinent to this objective.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Measure: Accurately Employ Marketing Metric Tools
Outcome/Objective: Logical and feasible recommendations/solutions
Implementation Description: Fall Semester, 2009
Projected Completion Date: 07/2009
Responsible Person/Group: Undergraduate Curriculum Committee.
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Recommend Case Analysis/Discussion in All Required Courses
Current departmental policy does not require that instructors use case analysis and discussion in all required courses. Therefore, many, if not most, marketing majors have no experience in this learning format prior to taking our capstone class. One of the recommendations that will be forthcoming from our Undergraduate Curriculum Task Force is to incorporate at least one case analysis/discussion recommendations that will be forthcoming from our Undergraduate Curriculum Task Force is to incorporate at least one case analysis/discussion in each required course. We believe that this should make students more comfortable and experienced at this format.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Measure: Accurately Employ Marketing Metric Tools
Outcome/Objective: Logical and feasible recommendations/solutions
Implementation Description: Fall Semester, 2009
Projected Completion Date: 07/2009
Responsible Person/Group: Undergraduate Curriculum Committee.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Require Marketing Metrics Course
As of Fall Semester 2009, all students entering the Marketing Major have been required to take Marketing Metrics as part of their plan of study, and prior to enrolling in the capstone course (MK 4900). The 2010-2011 Academic Term will be the first in which the majority of majors should have taken this course at the time of assessment via the instruments employed in MK 4900. We also will be recommending that marketing metrics be included in all required courses for the department.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Measure: Accurately Employ Marketing Metric Tools
Outcome/Objective: Logical and feasible recommendations/solutions
Implementation Description: Requirement for Marketing Metrics has been implemented.
Projected Completion Date: 08/2010
Responsible Person/Group: Undergraduate Curriculum Committee
Continued Focus on Marketing Metrics
Our department is continuing its plans to place more emphasis on marketing metrics throughout the undergraduate curriculum. All courses are to include at least one case analysis that includes metrics. At this point, nearly all students in our capstone classes have taken Marketing Metrics prior to the capstone class.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Case Analysis Write Up | Outcome/Objective: Accurately Employ Marketing Metric Tools

Implementation Description: Ongoing.
Responsible Person/Group: Undergraduate Curriculum Committee
Additional Resources: None

Improve Case Discussion participation
It is not clear what can be done to improve this measure. It’s possible that this year’s findings are an anomaly, since case discussion is a required part of the course. One of the instructors of our capstone class will be taking the Harvard Business School seminar on case discussion leadership this (fall) semester. We are hoping that this will lead to new ideas and improved techniques for encouraging case discussion.

Established in Cycle: 2010-2011
Implementation Status: On-Hold
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Case Discussion | Outcome/Objective: Oral communication

Projected Completion Date: 12/2011
Responsible Person/Group: David Nasser
Additional Resources: None

Increased Case Analysis in Curriculum
We are implementing a plan to increase the use of case analysis throughout our undergraduate curriculum.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Case Analysis Write Up | Outcome/Objective: Logical and feasible recommendations/solutions

Implementation Description: Ongoing
Responsible Person/Group: Undergraduate Curriculum Committee

Recommend increased emphasis on Metrics in Curriculum
We will continue to recommend a systematic emphasis on metrics throughout the undergraduate curriculum. We strongly urge all faculty to include at least basic metrics in their course planning so that students have adequate exposure to these items before entering our metrics and capstone classes. Even where students know the mechanics of calculating certain key metrics, they are not always able to see the connection between data found in a case and the proper metric to apply, nor how to employ the data in developing strategy and supporting recommendations.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Case Analysis Write Up | Outcome/Objective: Accurately Employ Marketing Metric Tools

Implementation Description: Discuss in committee. Issue a department wide memo. Include in next department meeting. Assign members of the UCC to track implementation across the curriculum
Responsible Person/Group: Undergraduate Curriculum Committee

Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have made no substantive changes in the process. Beginning with the Undergraduate Curriculum Committee, we plan to discuss whether our target metrics for assessment are too stringent. To that end, we will seek feedback from other departments in the Robinson College of Business regarding how they set measurement goals.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

There has been no impact that differs from previous years. We are meeting several of our measurement targets, other than that for Marketing Metrics. Based on the results we have observed this year, we will seek feedback from the faculty on improving our students’ proficiencies in metrics. One suggestion is to incorporate at least some basic metrics into all required undergrad courses prior to students taking our Metrics and Capstone classes.

**Communication of Assessment Results**

Provide each faculty member who teaches classes to our MS students with the results of the assessment. These results, including the outcomes/objectives, measures and grading rubrics for each criterion, will communicate to the faculty what the program is striving to achieve. This information in combination with the assessment results will guide faculty in knowing what areas need or would benefit from additional emphasis.

**Update Assessment Plan**

In order to attract more students the program has been modified in terms of format and focus. We are working to develop a new assessment plan in light of these program revisions.

- Established in Cycle: 2011-2012
- Implementation Status: In-Progress
- Priority: High

**Implementation Description:** In coordination with the Assistant Dean for Assessment, a committee consisting of faculty teaching in the
Program is engaged in the development and implementation of the assessment plan with the intention of collecting the first assessment data for this cohort in Spring 2013.

Projected Completion Date: 05/2013
Responsible Person/Group: Bruce Pilling, Program Faculty, Tracy Widman

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The entire assessment process is being revised. The delivery format of the program was modified to be a cohort, lock-step program instead of a flexible enrollment program. Previously, the flexible format and the low enrollment in the program provided obstacles to assessing the program with any confidence in the results. The new format and a slight change in the focus of the program resulted in a multiplicative larger entering class. The new format and the slight change in focus requires modifications to our objectives, measures, and targets.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

A small number of students in each required course (often times only one or two students) and the absence of any individual, non-course program requirements combined with the random sequencing of courses by students created data collection obstacles. When data was collected, it was from such a small number of students who commonly had not attempted all course requirements that the data was rightly found to be of minimal and questionable use. Changing the program to a cohort format will ensure that students have completed the coursework in the prescribed sequence, allowing for more confidence and validity in the data collected. The larger number of students in each required course will result in obtaining more than one or two data points for each measure.

Georgia State University
Assessment Data by Section
2011-2012 Mathematics & Statistics Assessment of Core

Mission / Purpose

“Basic quantitative literacy depends on students being introduced to the foundations of quantitative reasoning and then given reinforcement experiences which develop and deepen in the student the habits of thinking which the student has been encouraged to develop. Taking one course is not enough to endow a student with a habit of mind, but completing a carefully devised program can provide sufficient practice to make a pattern of thought part of the student's intellectual tools. The construction of such a program requires leadership from the mathematics faculty and other faculty as well as commitment to the three other major points of this report.”

The Department of Mathematics and Statistics is fully committed to providing all of the students of Georgia State University with these foundations in the core courses and providing the university with baseline data for its students' abilities to perform quantitative reasoning. In particular, the department will

1 Use placement testing to help determine appropriate entry into the quantitative literacy program; and,
2 Provide foundational experience(s) within (usually) the first year of the student's college work.

1 From the Preface of Quantitative Reasoning for College Graduates: A Complement to the Standards, Committee on the Undergraduate Program in Mathematics (CUPM), MAA. http://www.maa.org/past/ql/ql_toc.html

Goals

G 1: Quantitative Literacy
Quantitative literacy is knowledge of and confidence with basic mathematical/analytical concepts and operations required for problem-solving, decision-making, and real-world applications.

G 2: Translation
Students effectively translate problem situations into their symbolic representations and use those representations to solve problems.

Student Learning Outcomes/Objectives

SLO 1: Computation (G: 1) (M: 1, 2, 3)
Students effectively perform arithmetic operations, as well as reason and draw appropriate conclusions from numerical information.

SLO 2: Translation (G: 1) (M: 1, 2, 3)
Students effectively translate problem situations into their symbolic representations and use those representations to solve problems.

Measures, Targets, and Findings

M 1: PreQL Success Rates (O: 1, 2)
Pre/Post testing of student abilities basic quantitative literacy. Our idea was to test during the first week, middle of the
semester as well as at the end. This would tell us the length of time associated with their learning. We have currently implemented
the first two weeks and end of the semester quizzing. Regular course embedded assessments are used for the “middle of the
semester” time. We intend on studying how to improve this by tracking those students that progress through lower level sequences.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Computation**

Targets for the QL quizzes: • 50% response rate • 70% success rate

**Findings 2011-2012 - Target: Partially Met**

Quantitative Literacy quizzes were made available to all Math1070, 1101, 1111, 1113, and 2211 students this past academic
year (both at the beginning of the semester and at the end of the semester). Completing the quizzes was voluntary with bonus
points to tests awarded for each correct response. It was thought that this would encourage students to engage the
assessment with an honest effort. Our goal of response rates of 50% were met by Math1070, Math 1111 and 1113 in the fall
and spring, partly by Matth2211 (Fall). Many Math2211 instructors reported the inability to access the quiz result report
receiving the following error: An unexpected system exception has occurred. Most instructors were unwilling to pull the data by
hand as this is an extremely time consuming.

**Target for O2: Translation**

Targets for the QL quizzes: • 50% response rate • 70% success rate

**Findings 2011-2012 - Target: Partially Met**

Our goal of response rates of 50% were met by Math1070, Math 1111 and 1113 in the fall and spring. Many Math 2211
instructors reported the inability to access the quiz result report receiving the following error: An unexpected system exception
has occurred. Most instructors were unwilling to pull the data by hand as this is an extremely time consuming. Some
instructors also did not send the data to the coordinator.

**M 2: PostQL Success Rates (O: 1, 2)**

We can see from the tables above, the “Betty and Wilma” problem is more difficult by students than the “Ducks and Cows” problem.
The most common error is the conversion of a decimal hour to minutes. MML which gives partial credit on this problem for the correct
number of hours. But, uLearn would mark this completely wrong if either part is incorrect. The results of the “Coin Toss” problem are
positive, since probability is a prominent subject in elementary statistics Math1070. As can be seen for both Fall semester 2011 and
Spring semester 2012 the success rate increases from less than 70% on the pre QL's to above 70% on the Post QL. This gives clear
evidence that Math 1070 helps the students improve their quantitative reasoning for these types of concepts. Though probability is
not a topic covered in four of the five classes, an improvement on this question is clear at the end of the semester. Further analysis
needs to be done in order to determine if the basic problem solving skills that are developed during the class or the diagram for the
probability question that led to this improved student performance on this question for Math1070 students. It is interesting to note that
the two classes that had formal Problem Solving Activities (Math1111 and Math1113) often outperformed students in Math2211.

Though probability is not a topic covered in Math1113, it is clear to see an improvement on this question. As students complete the
Problem Solving Activities (in Math 1113) during the semester, it is possible students might have developed analytical abilities to
solve those QL problems and their performance shows an improvement at the end of the semester. From the tables we find that in
more than half cases students are reaching the success rate of 70% on these activities. In addition, we have seen improvement in the
performance of students from the Pre- to the Post QL tests. In particular, we see the improvement of Math1070 compared to that
of Math1070 last year. Since we adopted a new model, Math1101 has not reached the success rate of 70% in most cases. There is a
big room for the improvement. Our department had a target of 50% response (these are voluntary quizzes) and this target was met in
Math 1070, 1111, 1113 both semesters. If we try the same teaching model of Math111, Math1113, Math1070 for Math1101, the
success rate will reach 70%. It was hoped that using the “course coordinator” course would help these response rates, but too often
the quizzes did not “drop” down to the individual instructor classes and so had to be manually uploaded.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Computation**

Targets for the QL quizzes: • 50% response rate • 70% success rate

**Target for O2: Translation**

Targets for the QL quizzes: • 50% response rate • 70% success rate

**M 3: Class Summary Tables (O: 1, 2)**

Looking at the data by class makes it easier to determine improvement levels of the students. Student performance similar from Fall
to Spring.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Improve Response and Success Rates**

Better communicate with all instructors (especially GTAs) the importance of providing the students with these QL Quizzes. Instructors
should emphasize that students will receive bonus points if they take QL Quizzes. Track students to see how many are progressing
from Math1070, Math 1111, 1113 to 2211 to see if “seeing” the quizzes more than once is inflating the success rates of later classes.

*Established in Cycle: 2010-2011*
*Implementation Status: Planned*
*Priority: Medium*

**Relationships (Measure | Outcome/Objective):**

- **Measure:** PreQL Success Rates
- **Outcome/Objective:** Computation
**Mission / Purpose**

Mathematics is one of the great unifying themes in our modern culture. It is a language, a science, an art form, and a tool of tremendous power. The Department of Mathematics and Statistics, in its courses for both majors and non-majors, seeks to introduce students to this vast area of knowledge and to show them how mathematics can be used to solve problems. The overarching goals of any program in mathematics are that mathematics instruction should (from MAA's Source Book for College Mathematics Teaching, Schoenfeld, 1990): Provide students with a sense of the discipline of mathematics. Develop student's understanding of important concepts in core areas of mathematics. Develop student's ability to explore problem situations in a range of settings, at several levels of difficulty, and with a variety of methods. Help students to develop a mathematical point of view – perceive and represent structure and structural relationships. Help student's to develop the ability to read and use mathematical literature and reference material.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Mathematics BS**

As of: 12/12/2016 04:41 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)
**Goals**

**G 1: Problem-solving**
Students will learn to solve practically important problems

**G 2: Knowledge of the discipline**
Students will gain broad knowledge of the discipline

**G 3: Positions in the discipline**
Students will be prepared for positions in the discipline

**Student Learning Outcomes/Objectives**

**SLO 3:** Technology (G: 1) (M: 4)
The ability for the students to use technology to either solve concrete mathematical problems or present their results.

**SLO 5:** Ability to consult and understand the specialized literature in their major (G: 2) (M: 1)
The ability of the students to consult a mathematical journal and identify a scientific article that addresses their needs; the ability to summarize the main points of the work consulted.

**SLO 7:** Mathematical proofs (G: 3) (M: 2)
The ability to read, analyze, write and present mathematical proofs, which represent the foundation of mathematics.

**Measures, Targets, and Findings**

**M 1: Review project (O: 5)**
Review project designed to measure the students' ability to professionally evaluate articles published in mathematical journals in their fields.

Source of Evidence: Project, either individual or group

**Target for O5: Ability to consult and understand the specialized literature in their major**
ALL students in the capstone course, Math 4991 (Senior Seminar), were asked to consult a reputable undergraduate mathematical journal and select an article based on their overall mathematical interests. Then they were required to write a detailed mathematical review of that article.

**Findings 2011-2012 - Target: Met**
Fall 2011: There were five (5) students taking the course. Each of them gave two presentations throughout the semester, including one 30-minute presentation on a chapter from the textbook and one 30-minute presentation on a published paper written by undergraduate students. Most students did well on these presentations. Almost all the students read the materials carefully before the presentations and asked the instructor if they have questions. Almost all the presentations were enthusiastically prepared and well organized. All of the five students in fall 2011 received at least 12.5 (out of 15) in these two presentations. Spring 2012: The students in Math 4991 were first given a lecture by our science librarian Kathy Werner on how to access GSU library and use JSTOR to search for literature in mathematics and statistics. The students were required to select an article from the Mathematical Monthly, write a report on the article and do a in-class presentation on the subject. The students were also taught how to write a scientific paper, which improved their ability in appreciating and understanding a mathematics paper. The student final reports were submitted first, then feedback was given to the students before their final in class presentations on the paper review. All fifteen (15) students accomplished both the written report and in class presentation beautifully. Those final presentations amply demonstrated their grasp of the topics and papers of their choice.

**M 2: In-class presentations (O: 7)**
In-class presentations designed to measure critical thinking, oral, and writing skills necessary for reading, analyzing and presenting mathematical proofs.

Source of Evidence: Presentation, either individual or group

**Target for O7: Mathematical proofs**
ALL students in the capstone course, Math 4991 (Senior Seminar), were asked to give two in-class presentations on a topic from the textbook involving mathematical proofs, and the other on a research topic.

**Findings 2011-2012 - Target: Met**
Fall 2011: There were three projects on solving applied problems given to students in Math 4991 in the semester. The first project asked them to write proofs. All projects have 15 as the highest possible points. Among five students, one received 15, three scored 11-13, and one got 9. The second project was a computational project that requires using Maple. All five students did very well and received 15. The last project was writing a research paper of at least 5 pages. All five students in fall 2011 did reasonably well and received scores 12.5-15. Spring 2012: The first set of lectures in Math 4991 was designed to show the students how to best state a mathematical theorem and how to write mathematical proofs. The in class examples were from number theory and geometry and algebra. The students then had to choose two theorems, one out of the textbooks and one from another 3000 or 4000 level mathematics courses, to proof as their first project. The report should include an introduction to each of the theorems before the theorem statements and proofs. Correctness and clarity were the main criteria for the proofs. After receiving the feedback on their written report, they had to present the proofs to one of their theorems in class, each having 25 minutes. All fifteen students in spring 2012 did quite well in both.
Technology Projects designed to measure the student ability to use Mathematica, Matlab, or Maple for solving mathematical problems of general interests, as well as their ability to use LaTeX in preparing mathematical presentations.

Source of Evidence: Project, either individual or group

**Target for O3: Technology**

In Spring 2011, all students in the capstone course, Math 4991 (Senior Seminar), were required to learn how to use Mathematica to solve practically oriented problems. All students were required to learn how to use LaTeX and use it, together with BEAMER, in a research presentations.

**Findings 2011-2012 - Target: Met**

Fall 2011: Math 4991 course was taught in a classroom with computers and computer projectors. Students used technology Maple to solve mathematical problems, and used LaTeX to write papers. They used PowerPoint or LaTeX Beamer to give presentations. Among all 5 students in fall 2011, all but one student could use Maple well; all students could write in LaTeX.

Spring 2012: The students were strongly encouraged to write their first report on theorem proofs with LaTeX. 11 out of 15 students mastered LaTeX, some even showed expert level skills by programming LaTeX to generate figures. The second project was designed to teach the students to use Matlab to numerically integrate difference equations and plot trajectories and phase diagrams. All but one students (who was missing class due to family reasons) learned to use Matlab and turned in beautiful reports on the project. The students were required to use Beamer, or Keynote, or Powerpoint to make slides for their final presentation on mathematical paper reviews. Out of 15 students, more than half of the students used Beamer, and 2 used keynote (with LaTeX equation editor), and the rest used Powerpoint for their slide presentation.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Engagement of the Undergraduate Mathematics Committee

Undergraduate Mathematics Committee will play an active role in the development of the assessment program for Math BS in AY 2011-2012. Members of the committee will discuss effective ways to perform assessment.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** AY11-12
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Dr. Enescu (the chair of the Undergraduate Mathematics Committee)

#### Improvement of student proof writing skills

We continue to make the prerequisite courses, Math 3435 (Introductory Linear Algebra) and Math 3000 (Bridge to Higher Mathematics), significantly more effective in order to give our students a better opportunity to master their proof writing skills and to integrate their knowledge in the subsequent coursework. That will help our students to succeed in the capstone Senior Seminar (4991) course as well as in their future research and teaching work. In particular, students will be much better prepared to comprehend and perform mathematical proofs.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - Measure: In-class presentations
  - Outcome/Objective: Mathematical proofs
- **Implementation Description:** AY11-12
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Dr. Guantao Chen (chair of the Department)

#### Introduction to the software

Students should be introduced to various types of mathematics software, which is needed 1. to solve mathematical problems numerically and display the results (Maple, Matlab, Geometry Pad); 2. to typeset a project report, a paper, or any other math text (LaTeX); 3. to make a quality presentation on a topic in undergraduate math (LaTeX-Beamer, LaTeX-Proseminar). The Department now has all the necessary resources. Students learn various types of software in Math 4991 as well as in some elective courses. Also the department will continue to actively support Mathematics and Statistics club and an undergraduate research program (RIMMES). Both of these have become a focus of interest among math majors. During the RIMMES final conference students make presentations using LaTeX-Beamer, LaTeX-Proseminar. They perform numerical simulations for their research projects with Matlab and other software.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Technology Projects
  - Outcome/Objective: Technology
- **Implementation Description:** AY11-12
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Dr. Guantao Chen, the Department chair

**Additional Resources:** Math 4991 (Senior Seminar) should always be taught in a computer lab. Maple, Matlab and LaTeX must be installed on every machine.
Mission / Purpose
The mission of the Master of Education (MED) in Mathematics Education (MTE) is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MED-MTE program is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge, and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities. The MED-MTE provides for master’s level study in mathematics education pedagogy and mathematics content and leads to T-5 certification in secondary Mathematics Education (grades 6-12). The program ensures that candidates gain increased subject matter knowledge and pedagogical knowledge, demonstrate success in bringing middle and high school students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content. The program's underlying framework is constructivism (and aligned with the NCTM Standards), which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban mathematics education.

Goals
G 1: Informed and Knowledgeable to Teach
Candidates are informed educators who have expert knowledge of the content needed to teach Mathematics in Grades 6-12.

G 2: Knowledge, Skills, and Dispositions
Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching Mathematics in Grades 6-12.

G 3: Highly Effective Educators
Candidates are highly effective educators whose teaching practices have a measurable impact on the Mathematics learning of their students.

Student Learning Outcomes/Objectives
SLO 1: Knowledge of Mathematics and NCTM Standards (G: 1) (M: 1, 2)
Candidates have knowledge and understanding of mathematics content and process skills (NCTM Standards), the history and evolution of the mathematics, the philosophical foundations, an extensive range of advance mathematics content. (Goal 1) (Key Assessment - Content Knowledge: Portfolio Standards 1-4)

SLO 2: Diverse Learning Environments (G: 2) (M: 2, 4)
Candidates create learning environments which promote respect for and support of individual differences of ethnicity, race, language, culture, gender, and ability through planning and implementation of a wide range of instructional methods, and curriculum materials and view teacher-researcher models of inquiry, professional development, and collaboration with colleagues as career-long efforts and responsibilities. (Goal 2) (Key Assessment - Professional and Pedagogical Knowledge and Skills: Portfolio Standards 5-8)

SLO 3: Dispositions (G: 2) (M: 2, 4)
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. (Goal 2) (Key Assessment - Dispositions: Portfolio)

SLO 4: Student Learning and Assessment (G: 3) (M: 3)
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Goal 3) (Key Assessment - Impact on Student Learning: Portfolio Standard 9)

Measures (Key Assessments), Targets, and Findings
M 1: Portfolio Standard 3 and 8 (O: 1)
Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Knowledge of Mathematics and NCTM Standards
Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met
100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitor to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

M 2: Portfolio Standard 5, 6, and 7 (O: 1, 2, 3)
Students will average 2.5 or higher, with 90% of students scoring a 2 or higher and no more than 10% of students scoring a 1 or lower when measured on the rubric.

### Target for O1: Portfolio, showing skill development or best work

**Source of Evidence:** Portfolio, showing skill development or best work

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### Target for O2: Diverse Learning Environments

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### Target for O3: Dispositions

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### M 3: Portfolio 9 (O: 4)

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### Target for O4: Student Learning and Assessment

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### M 4: Portfolio Standard 2, 4, 11 (O: 2, 3)

**Source of Evidence:** Portfolio, showing skill development or best work

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### Target for O2: Diverse Learning Environments

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.

### Target for O3: Dispositions

**Findings 2011-2012 - Target: Met**

100% of students met target, scoring either Exceeds or Meets on Learning Outcome/Objective. The 2011-2012 academic cycle marks the fifth year of the program redesign in the Master of Education-Mathematics Education (MED-MTE) degree program. The program will continue to be monitored to ensure that all learning outcomes/objectives are being addressed, and that students are meeting or exceeding desired target.
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### To continue monitoring student/program outcomes

The MED-MTE is a new program design that went into full implementation during 2007-2008; the 2008-2009 AY marks the second AY in which all students completed the program redesign. Currently, all students who completed the MED-MTE redesign program either met or exceeded the goals/objectives of the new program redesign. The MED-MTE faculty will continue to monitor the impact of the redesigned program. At this time, given that all MED-MTE program completers/graduates are meeting or exceeding the program goals/objectives, there are no new Action Plans required at this time, except for continued monitoring of student/program outcomes.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** To continue to monitor student/program outcomes
- **Projected Completion Date:** 09/2009
- **Responsible Person/Group:** All MED-MTE faculty, specifically the MED-MTE coordinator (currently, Dr. David W. Stinson)
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

#### To continue monitoring student/program outcomes

**To continue monitoring student/program outcomes**

The MED-MTE is a new program design that went into full implementation during 2007-2008; the 2009-2010 AY marks the third AY in which all students completed the program redesign. Currently, all students who completed the MED-MTE redesign program either met or exceeded the goals/objectives of the new program redesign. The MED-MTE faculty will continue to monitor the impact of the redesigned program. At this time, given that all MED-MTE program completers/graduates are meeting or exceeding the program goals/objectives, there are no new Action Plans required at this time, except for continued monitoring of student/program outcomes.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** To continue monitoring student/program outcomes  
**Projected Completion Date:** 09/2010  
**Responsible Person/Group:** All MED-MTE faculty, specifically the MED-MTE coordinator (currently, Dr. David W. Stinson)  
**Additional Resources:** None  
**Budget Amount Requested:** $0.00 (no request)

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and
improvements in the assessment process will you make in the coming academic year?

All completers met or exceeded target; no changes were made to the degree program.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

All completers met or exceeded target; no changes were made to the degree program.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Mathematics Education Online MEd**

*As of: 12/12/2016 04:41 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

---

**Mission / Purpose**

The mission of the M.Ed in Mathematics Education program is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

The mission of the Master of Education (MED) in Mathematics is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools.

The M.Ed. major in Mathematics Education provides for master's level study in Mathematics Education and Mathematics content and leads to T-5 certification in secondary Mathematics (grades 6-12). The program ensures that candidates gain increased subject matter knowledge and pedagogical knowledge, demonstrate success in bringing middle and high school students from diverse backgrounds to high levels of learning, and use technology skillfully as a tool for teaching and learning content.

The program's underlying framework is constructivism, which suggests that human beings create knowledge through acting on their environment and interacting with other humans. The program encourages and supports planning, teaching, and reflection with colleagues who are committed to excellence in urban Mathematics education.

---

**Goals**

**G 1: Content Knowledge**

The goal of the M.Ed Online Mathematics Education program is to help candidates to be informed educators who have expert knowledge of the content needed to teach Mathematics in Grades 6-12.

**G 2: Pedagogical Content Knowledge and Dispositions**

Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching Mathematics in grades 6-12.

**G 3: Effects on P-12 Student Learning**

Candidates are highly effective educators whose teaching practices have a measurable impact on the mathematics learning of students.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrates strong content knowledge (G: 1) (M: 1)**

Students in M.Ed. in Mathematics Education (online program) are expected have strong knowledge and understanding of Algebra, geometry, statistics, problem solving and, history and evolution of mathematics.

**SLO 2: Demonstrates pedagogical content knowledge (G: 2) (M: 2, 3, 4)**
Students in MEd. Online Program in Mathematics Education are expected to implement successful instructional techniques to promote higher order thinking and effective problem solving skills with using student centered, technology-intensive and differentiated instruction in diverse classroom settings.

**SLO 3: Understands and uses effective assessment techniques (G: 3) (M: 2)**

Students in the M.Ed. in Mathematics Education Program (Online) are expected to use a variety of assessment techniques to evaluate students' academic, social and personal development in all aspects of mathematics.

**SLO 4: Demonstrates effective dispositions (G: 2) (M: 3, 5)**

Students in the M.Ed. in Mathematics Education Program (Online) are expected to demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision.

### Measures (Key Assessments), Targets, and Findings

**M 1: Portfolio section "Content" (O: 1)**

Students are expected to complete a portfolio which includes a narrative and supporting artifacts to demonstrate their mastery of the National Mathematics Standards. These sections of portfolio will provide documentation that students have met the majority of standards in the areas of content knowledge.

*Source of Evidence: Capstone course assignments measuring mastery*

**Target for O1: Demonstrates strong content knowledge**

Each student is required to pass the portfolio requirement in order to meet the requirements of the program. That is, each student must achieve a rating of at least "2" out of a possible "3" for each standard and the supporting artifacts.

**Findings 2011-2012 - Target: Met**

Every student successfully met the requirement for this standard. 86% of the students satisfied the requirement and 13% exceeded the standard.

**M 2: Portfolio section "Impact on Student Learning" (O: 2, 3)**

Students are expected to complete a portfolio which includes a narrative and supporting artifacts to demonstrate their mastery of the National Mathematics Standards. This section of portfolio will provide documentation that students have met the majority of standards in the areas of impact on student learning and assessment.

*Source of Evidence: Project, either individual or group*

**Target for O2: Demonstrates pedagogical content knowledge**

Each student is required to pass the portfolio requirement in order to meet the requirements of the program. That is, each student must achieve a rating of at least "2" out of a possible "3" for each standard and the supporting artifacts.

**Findings 2011-2012 - Target: Met**

100% of the students met the expectations of this objective. 20% of the students exceeded the expectations by achieving 3 out of 3.

**M 3: Microteaching Video (O: 2, 4)**

Students are expected to videotape themselves while teaching and write a reflection about their teaching practice.

*Source of Evidence: Video or audio tape (music, counseling, art)*

**Target for O2: Demonstrates pedagogical content knowledge**

Students are expected to get 7 out of 10 to achieve this goal.

**Findings 2011-2012 - Target: Met**

100% of the students meet the expectations of this objective by achieving 3 or 4 points out of 4 for each section of the rubric.

**M 4: Portfolio Section "Teacher Preparation and Connections" (O: 2)**

Students are expected to complete a portfolio which includes a narrative and supporting artifacts to demonstrate their mastery of the National Mathematics Standards. These sections of portfolio will provide documentation that students have met the majority of standards in the areas of pedagogical knowledge which will include planning, instructional skills, and content knowledge.

*Source of Evidence: Portfolio, showing skill development or best work*

**Target for O2: Demonstrates pedagogical content knowledge**

Each student is required to pass the portfolio requirement in order to meet the requirements of the program. That is, each student must achieve a rating of at least "2" out of a possible "3" for each standard and supporting artifacts.

**Findings 2011-2012 - Target: Met**

100% of the students met the expectations of this objective. 20% of the students exceed the expectations by getting 3 out of 3.

**M 5: Unit-wide Dispositions Rubric (O: 4)**

Unit-wide Dispositions Rubric.

*Source of Evidence: Academic direct measure of learning - other*
Target for **O4: Demonstrates effective dispositions**

Students are expected to get at least 7 out of 10 in the rubric.

**Findings 2011-2012 - Target: Met**

100 percent of the students meet the expectations of this objective.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Action Plan: Clinical Practice

Data show that all students met the expectation after one or more resubmissions of the assignment. Students will be provided a sample video to make sure that they have a clear understanding of the expectations.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Plan should be fully implemented by the end of the fall semester 2011.
- **Projected Completion Date:** 12/2011
- **Responsible Person/Group:** All faculty teaching in the MEd. Online Program in Mathematics Education.
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

### Action Plan: Dispositions

All students met this requirements. We will continue working closely with students to make sure they understand the standard well and work accordingly.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Unit-wide Dispositions Rubric | Outcome/Objective: Demonstrates effective dispositions
  - Implementation Description: During regular advisement sessions, students will be informed about the requirement and encouraged to work accordingly.
- **Projected Completion Date:** 12/2012

### Action Plan: Effects on P-12 Learning

Data show that 83% of the students met the expectation and 17% of the students exceed the expectations after one or more resubmissions of the portfolio. Although the portfolio standards were assigned as a part of the course EDMT 7560-Theory and Pedagogy of Mathematics Instruction students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. In order to make sure that students have a clear understanding of the standards, more emphasis will be given to the portfolio standards during the advisement sessions that we hold once every semester.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Plan should be fully implemented by the end of the fall semester 2011.
- **Projected Completion Date:** 12/2011
- **Responsible Person/Group:** All faculty teaching for MEd. in Mathematics Education (Online)
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

### Action Plan: Impact on Student Learning

Data show that 83% of the students met the expectation and 17% of the students exceed the expectations after one or more resubmissions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content of EDMT 7560-Theory and Pedagogy of Mathematics Instruction and EDMT 7360-Integration of Technology in Mathematics Instruction.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Portfolio section "Impact on Student Learning" | Outcome/Objective: Demonstrates pedagogical content knowledge
- **Projected Completion Date:** 12/2012

### Action Plan: Mathematical Preparation

All students met this requirement after one or more revisions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content of MATH 6301-College Geometry, MATH 6435-Linear Algebra and MATH 6547-Mathematical Statistics I.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Portfolio section "Content" | Outcome/Objective: Demonstrates strong content knowledge
- **Projected Completion Date:** 12/2012
**Action Plan: Microteaching Video**

All students met this requirement. Clear instructions are helpful for students to meet this expectation. However, sample teaching video will be provided to help students to have a better understanding of the expectation.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- Measure (Key Assessment): Microteaching Video | Outcome/Objective: Demonstrates pedagogical content knowledge

**Projected Completion Date:** 12/2012

**Action Plan: Planning (Pedagogical Knowledge and Skills)**

Data show that 50% of the students met the expectation and 50% of the students exceed the expectations after one or more resubmissions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. More emphasis will be given to the portfolio standards during the advisement sessions that we hold each semester to make sure that students have a clear understanding of them.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Plan should be fully implemented by the end of the fall semester 2011.
- **Projected Completion Date:** 12/2011
- **Responsible Person/Group:** All faculty teaching for M.Ed in Mathematics Education (Online)
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Action Plan: Teaching Preparation and Connections**

Data show that all of the students met the expectation after one or more resubmissions of the portfolio. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing the coursework. Students had to resubmit their work for the portfolio more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content of EDMT 7560-Theory and Pedagogy of Mathematics Instruction

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- Measure (Key Assessment): Portfolio Section "Teacher Preparation and Connections" | Outcome/Objective: Demonstrates pedagogical content knowledge

**Projected Completion Date:** 12/2012

---

### Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

N/A

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

N/A

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

N/A

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**

N/A

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No change has been done in the assessment process. With the release of new Common Core State Standards, learning outcomes, measures and targets will be revised to align with CCSS-Math.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on the data, we will do a curriculum change to provide more opportunities to extend their knowledge on curriculum and assessment techniques in mathematics education. The curriculum change will require to develop a new mathematics education methods course to address those issues.

**ADMINISTRATIVE DEPT QUESTION 1:**

Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
**Georgia State University**

**Assessment Data by Section**

2011-2012 Mathematics Education--TEEMS MAT

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

---

**Mission / Purpose**

The mission of the Master of Arts in Teaching program for Mathematics is aligned with the mission of the GSU PEF, which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the TEEMS program in Mathematics is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

---

**Goals**

**G 2: Commit to Achievement of Urban Students**
The teacher candidate in MAT Mathematics Education program will be committed to the achievement of the unique social and academic needs of diverse adolescent/secondary level students in urban environments.

**G 4: Commit to the Learning Community**
The teacher candidate will believe that all students can learn and being community-oriented educators, they will continue to pursue professional development.

**G 1: Become Content & Pedagogical Knowledge Experts**
The teacher candidate will be knowledgeable in mathematics content areas, have the pedagogical knowledge to create effective teaching environments, and to include the use of innovative technology as a part of their instruction, curriculum, and reflective practices.

**G 3: Facilitate Learning in Urban Environments**
The teacher candidate will be knowledgeable about learning environments for diverse learners and be able to facilitate learning in such settings.

---

**Outcomes/Objectives**

**O/O 1: Demonstrate pedagogical content knowledge (G: 1) (M: 1, 7, 8, 11, 12, 14)**
The teacher candidate demonstrates pedagogical content knowledge in Mathematics with technology integration to create and assess rigorous, relevant, and engaging student-centered lessons.

**O/O 2: Demonstrate Sensitivity to Diverse Learners' Needs (G: 2) (M: 2, 6, 7, 8, 13, 14, 15)**
The teacher candidate possesses a strong knowledge base about and demonstrate sensitivity to the social and academic needs of diverse adolescent/secondary level students

**O/O 3: Can Effectively Create Productive Learning Environments for Diverse Learners (G: 3) (M: 3, 6, 7, 8, 10, 13, 14, 15)**
The teacher candidate creates a productive and responsive learning environment for diverse learners while providing for students with exceptionalities.

**O/O 4: Demonstrates that All Learners can Learn (G: 2, 3) (M: 4, 7, 8, 10, 14, 15)**
The teacher candidate understands and demonstrates the belief that all students can learn.

**O/O 5: Demonstrate the Attitude of a Reflective Educator (G: 2, 4) (M: 5, 9, 10, 16)**
The teacher candidate demonstrates an efficacious attitude as a community-oriented educator who continues reflection and individual professional development throughout their career.

### M 6: INTASC Standard 6 Rating from program portfolio (O: 2, 3)

Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 6.

**Source of Evidence:** Portfolio, showing skill development or best work

**Target for O2: Demonstrate Sensitivity to Diverse Learners' Needs**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target:** Met

90% of candidates have met this expectation.

### M 7: INTASC Standard 7 Rating from program portfolio (O: 1, 2, 3, 4)

Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 7.

**Source of Evidence:** Portfolio, showing skill development or best work

**Target for O1: Demonstrate pedagogical content knowledge**

100% of candidates have met this expectation.

**Findings 2011-2012 - Target:** Met

100% of candidates have met this expectation.

**Target for O2: Demonstrate Sensitivity to Diverse Learners' Needs**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target:** Met

90% of candidates have met and exceeded this expectation.

**Target for O3: Can Effectively Create Productive Learning Environments for Diverse Learners**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target:** Met

90% of candidates have met the expectations.

### M 8: INTASC Standard 8 Rating from program portfolio (O: 1, 2, 3, 4)

Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 8.

**Source of Evidence:** Portfolio, showing skill development or best work

**Target for O1: Demonstrate pedagogical content knowledge**

90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.
Findings 2011-2012 - Target: Met
100% of candidates have met this expectation.

Target for O2: Demonstrate Sensitivity to Diverse Learners’ Needs
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met
90% of candidates have met and exceeded this expectation.

Target for O3: Can Effectively Create Productive Learning Environments for Diverse Learners
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met
90% of candidates have met the expectations.

Target for O4: Demonstrates that All Learners can Learn
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met
100% of the candidates have met this expectation.

M 9: INTASC Standard 9 Rating from program portfolio (O: 5)
A portfolio rating for standard 9 will be derived from each teacher candidate's written and oral rationales, explaining how portfolio artifacts demonstrate student competencies.
Source of Evidence: Portfolio, showing skill development or best work

Target for O5: Demonstrate the Attitude of a Reflective Educator
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met
100% of candidates have met the expectation.

M 10: INTASC Standard 10 Rating from program portfolio (O: 3, 4, 5)
Supervisors' final evaluation, mentor evaluations, and portfolio evaluations are combined into faculty ratings of teacher candidates in live text for Standard 10.
Source of Evidence: Portfolio, showing skill development or best work

Target for O3: Can Effectively Create Productive Learning Environments for Diverse Learners
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met
90% of candidates have met the expectations.

Target for O4: Demonstrates that All Learners can Learn
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

Findings 2011-2012 - Target: Met
100% of the candidates have met this expectation.

Target for O5: Demonstrate the Attitude of a Reflective Educator
90% of candidates will demonstrate a proficient level of knowledge and understanding of the standard with little/no assistance and supervision from a professor, clinical teacher or assigned mentor. The candidate demonstrates the standard consistently in a field setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.
setting and can assess the effectiveness of his/her professional decisions and actions. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target: Met**
100% of the candidates have met this expectation.

**M 11: KA#1: Georgia Content Test (O: 1)**
The GACE content tests is a requirement for certification and completing the master’s degree.

M 16: KA#6: Dispositions (O: 5)
Evidence of Dispositions will be demonstrated in livetext portfolio.
Source of Evidence: Portfolio, showing skill development or best work

Target for O5: Demonstrate the Attitude of a Reflective Educator
90% of the candidates are expected to meet the target.

Findings 2011-2012 - Target: Met
100% of candidates have met the overall disposition requirements.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Increasing mathematics proficiency for teaching
Faculty members will focus on developing and enhancing teachers proficiency for teaching mathematics. Two courses are being developed to address this national and local concern in light of student learning. In the meanwhile the program is being maintained and monitored.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Two courses are being developed and must be sent for approval before implementation.
Projected Completion Date: 05/2012
Responsible Person/Group: Mathematics Education Faculty
Additional Resources: N/A
Budget Amount Requested: $0.00 (no request)

Maintain and Modify Syllabi
Program faculty will maintain the modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2010-2011 academic year and beyond.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Relationships (Measure [Key Assessment] | Outcome/Objective):
Measure (Key Assessment): INTASC Standard 1 Rating from program portfolio | Outcome/Objective: Demonstrate pedagogical content knowledge
Implementation Description: Continuous until changes are required.
Responsible Person/Group: MSIT Mathematics Education Faculty

Maintain and Monitor Sequence of Activities
Program faculty will maintain and monitor the sequence of modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2009-2010 academic year and beyond.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Maintain and Monitor Sequence of Activities
Program faculty will maintain the modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2009-2010 academic year and beyond.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
- Measure (Key Assessment): INTASC Standard 3 Rating from program portfolio | Outcome/Objective: Can Effectively Create Productive Learning Environments for Diverse Learners

Implementation Description: Continuous until changes are required.
Responsible Person/Group: MSIT Mathematics Education Faculty

Maintain and Monitor Sequence of Activities
Program faculty will maintain the sequence of modified activities and discourses in the methods courses and continue to build and monitor relationships in the schools to reinforce the implementation of multiple strategies for the stated learning outcomes during 2009-2010 academic year and beyond.

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**
Major accomplishment is that we maintained the students' achievement of passing the GACE II exams (100%) and completing all content requirements for certification as previous years.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**
Students came into the program with several misconceptions of how to teach, classroom management skills, and within content knowledge. Towards the end of student teaching students have cleared up most, if not all, of their misconceived ideas. However, they continue to work on this with their mentor teachers and mathematics coaches.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What assistance might you need to address those areas?**
While there is still room for improvement in all areas, two areas are of immediate concern: (1) Creating Productive Learning Environments for Diverse Learners and (2) demonstrating pedagogical content knowledge. Assistance needed would be efforts to reconstruct the program to include a course that facilitates pre-service and in-service teachers' creativity for producing better learning environments for diverse learners and demonstration of effective pedagogical content knowledge. In the year 2011-2012, Mathematics educators from campus-site and school-site and a mathematician planned to collaborate in the methods courses. During this current year 2012-2013, they have collaborated in teaching modules of mathematics in the methods courses to develop pre-service and in-service teachers pedagogical content knowledge. The mathematics educator of the methods courses have also collaborated with the educator for inclusion throughout the program and methods courses in facilitating and monitoring the teachers' plan for inclusiveness of diverse learners. This implementation is working very well. We will monitor the progress and analyze the benefits at the end of the academic year.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?**
Within the pedagogical methods courses, faculty has initiated and integrated efforts of facilitating pedagogical content knowledge. However, those efforts need to be more elaborate to be more effective. Our plan to collaborate has been executed and this current academic year 2012-2013, implementation of the collaboration is in progress.

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report?

The impact of the data obtained from assessment findings has been positive. The pedagogy courses in the program will be revised for greater impact. Though we continue to modify the courses based on feedback, the impact remains positive. As planned in the year 2011-2012 for the current year 2012-2013, mathematics educators and mathematicians collaborated in teaching a module of mathematics in the methods courses to build the pedagogical content knowledge of the teacher candidates. This implementation will be monitored, assessed, and report on next year. The progress is good so far.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

N/A

**ADMINISTRATIVE DEPT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

**Assessment Data by Section**

**2011-2012 Mathematics MS**

*As of: 12/12/2016 04:41 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

Department of Mathematics and Statistics’ Mission Statement Mathematics is one of the great unifying themes in our modern culture. It is a language, a science, an art form, and a tool of tremendous power. The Department of Mathematics and Statistics, in its courses for both majors and nonmajors, seeks to introduce students to this vast area of knowledge and to show them how mathematics can be used to solve problems. Graduate education should deepen and intensify that knowledge, preparing its graduates to enter society as creative, scientifically literate citizens.

**Goals**

G 1: Assess graduate curriculum and learning outcomes

Develop and assess learning outcomes for the program using specific outcomes for courses and thesis work.

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrate advanced critical thinking skills. (M: 5, 8, 11)**

Graduates should demonstrate advanced critical thinking skills. This includes the ability to see connections across fields within mathematics and statistics as well as the ability to see applications of mathematics and statistics to other disciplines. Students should develop a mathematical intuition about “how things work” in one or more field within the discipline. This also includes the ability to draw conclusions from data, and to develop an appropriate approach to solving problems. Students should be able to extend solution methods to problems not exactly like in the book, both in a theoretical and applied setting.

**SLO 2: Demonstrate communication skills, oral and written (M: 6, 15)**

Graduates should demonstrate communication skills, both oral and written. This includes the ability to explain ideas to nonspecialists.

**SLO 4: Demonstrate Analytical Skills (M: 1, 5, 8)**

The analytical skills in Statistics include skills to collect data, computer skills, and understanding research reports/articles.

**SLO 5: Demonstrate knowledge of the discipline. (M: 2, 3, 4, 6, 7, 13)**

Graduates should demonstrate knowledge of the discipline. This includes the ability to understand research problems in one or more areas of mathematics and statistics. Students should have an appreciation for the history of the subject, and the sequence of results
that has led to the current state of development of one or more areas of mathematics and statistics.

</tbody>
</table>

| **M 2: See connections across fields. (O: 5)** |
| Students have the ability to see connections within mathematics and statistics as well as the ability to see applications of mathematics and statistics to other disciplines. |
| Source of Evidence: Senior thesis or culminating major project |

| **M 3: Understand research problems. (O: 5)** |
| Students show the ability to understand research problems in one or more areas of mathematics and statistics. |
| Source of Evidence: Senior thesis or culminating major project |

| **M 4: Show an appreciation for history of mathematics. (O: 5)** |
| Students should have an appreciation for the history of the subject, and the sequence of results that has led to the current state of development of one or more areas of mathematics and statistics. |
| Source of Evidence: Academic direct measure of learning - other |

| **M 5: Extend solution methods. (O: 1, 3, 4)** |
| Students should be able to extend solution methods to problems not exactly like in the book, both in a theoretical and applied setting. |
| Source of Evidence: Academic direct measure of learning - other |

| **M 6: Explain ideas to nonspecialists. (O: 2, 5)** |
| Students show the ability to explain ideas to nonspecialists. |
| Source of Evidence: Senior thesis or culminating major project |

| **M 7: Develop a mathematical intuition. (O: 5)** |
| Students should develop a mathematical intuition about “how things work” in one or more field within the discipline. |
| Source of Evidence: Academic direct measure of learning - other |

| **M 8: Draw conclusions from data. (O: 1, 3, 4)** |
| Students show the ability to draw conclusions from data, and to develop an appropriate approach to solving problems. |
| Source of Evidence: Academic direct measure of learning - other |

| **M 9: Show the ability to solve problems. (O: 3)** |
| Students should be able to identify, analyze and solve the statistical problems. |
| Source of Evidence: Senior thesis or culminating major project |

| **M 11: To formulate research hypothesis. (O: 1, 3)** |
| Students should be able to formulate research questions and/or formulate hypotheses. |
| Source of Evidence: Academic direct measure of learning - other |

| **M 13: Know the update knowledges in statistics. (O: 5)** |
| Students should be able to apply the most up-to-date information and knowledges in the field of statistics. |
| Source of Evidence: Academic direct measure of learning - other |

| **M 15: Show effective written communication. (O: 2)** |
| Students should be able to write technical reports or articles. |
| Source of Evidence: Senior thesis or culminating major project |

| Details of Action Plans for This Cycle (by Established cycle, then alpha) |
| Evaluation at thesis defense. |
For each thesis student, the thesis committee will evaluate all seven measures of achieved student program outcomes on a 5 point scale.

Established in Cycle: 2005-2006
Implementation Status: Planned
Priority: High
Implementation Description: End of final exams for each semester.
Responsible Person/Group: Thesis advisor for each student.

Analysis Questions and Analysis Answers

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

Based on the results from the previous cycle’s (2010-2011) assessment, we redesigned the thesis/non-thesis project assessment form and encouraged the graduate faculty to provide more guidance to the students in the process of writing their theses. We noticed some improvement in the overall quality of the theses.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

Mathematics/Statistics: MS Thesis/Non-thesis Assessment Fair Good Very Good Excellent Outstanding 1. Is the thesis/project clearly written and well organized? 5 2 Comments: Most of the theses/projects are clearly written and well organized. But some of them still need improvement 71% 29%. What is the main contribution of the thesis/project research? 1 4 2 Comments: 29% of the theses/projects proposed novel mathematical/statistical methods. But most of the theses/projects were based on simulation and data analysis results 14% 57% 29% 3. Does the candidate have comprehensive knowledge on the thesis/project research? 2 5 5 Comments: Majority (84%) of the students have comprehensive knowledge on the thesis/project research. 16% 42% 42% 4. Is the thesis/project technically sound and the main result justified? 5 2 Comments: Majority of the theses/projects had sound results. But some of the theses/projects results still need simulation/theoretical justifications. 71% 29% 5. Are the results in the thesis/project published or publishable in a research journal? 3 2 2 Comments: 58% of the results in theses/projects are publishable in research journals after some revisions. 42% 29% 29% 6. What is the overall quality of the thesis/project? 0 5 2 Comments: The overall quality of the theses/projects is very good to excellent. 71% 29% 7. Thesis/Project committee’s recommendation: [ Pass / Fail ] 7 passes Comments: This assessment is based on 7 observations of thesis/Project defense results in 2012 Summer semester, 2012 Spring semester and 2011 Fall semester. The observed data indicate that the overall quality of the MS theses/projects in statistics is very good to excellent. But some improvements like the publication rate are still needed. Graduate Director: Zhongshan Li and Gengsheng Qin Date: 11/4/2012

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We believe that the assessment measures used this year mainly based on the theses/non-theses projects are quite effective. We intend to continue to use these measures to assess the quality of theses/projects. We also plan to use feedback from a core course in the MS program, Math 8200, to assess student achievement from another perspective. We expect to have continued improvement in student learning outcomes.

**Assessment Data by Section**

2011-2012 MBA/MHA and Concentration in Health Administration MBA

*As of: 12/12/2016 04:41 PM EST (Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

The vision of the Institute of Health Administration (IHA) within the J. Mack Robinson College of Business at Georgia State University is to prepare a leader's level of future healthcare/business leaders. The flagship double degree MBA/MHA program is accredited by the AACSB and CAHME (The Commission on Accreditation of Healthcare Management Education), the MBA is ranked 7th and MHA is ranked 34th nationally (USNEWSWR, 2009). The mission is to prepare graduates to assume managerial and leadership positions in health sector organizations through • A leading-edge curriculum that integrates business and health care knowledge. • The engagement in scholarly inquiry related to the improvement of the effectiveness, efficiency, and quality of health care services and the health care system, and • Providing and promoting professional service to the academic and health care communities.

**Goals**

**G 1: Provide CAHME specified competency areas**

Identify, analyze, and interpret economic, social, political, environmental, ethical, and medical issues affecting health care organizations.

**G 2: Business skills and knowledge**

This relate to the second domain of the HLA competency model.

**G 3: Knowledge of the Healthcare Environment**

This related to the first domain of the HLA competency model.
**G 4: Develop leadership knowledge and skills**
This is the fourth domain of our hybrid HLA competency model.

**G 5: Develop professionalism knowledge/skills**
This is the third domain of our hybrid HLA competency model.

---

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assurance of competencies
During AY 2010 the HA faculty will be mapping competencies based on the HLA model to specific course content of MHA and MBA courses.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** By the start of next academic year, a comprehensive mapping of all HLA-based competencies will be mapped to all MHA and MBA courses  
**Projected Completion Date:** 07/2010  
**Responsible Person/Group:** Dr. Pat Ketsche, Dr. Andy Sumner, and all other HA faculty/staff

Faculty referred to Center for Teaching and Learning
Faculty member was referred to Center for Teaching and Learning for improvement. The faculty totally revised the course, changed texts and course format.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Finished  
**Priority:** High  
**Projected Completion Date:** 07/2009  
**Responsible Person/Group:** Chair

**Georgia State University**  
**Assessment Data by Section**  
**2011-2012 Mental Health Counseling MS**  
*As of: 12/12/2016 04:41 PM EST*  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
Based on our commitment to diversity, advocacy and the belief that change is possible, the mission of the 60 credit hour, Mental Health Counseling Masters of Science Program in the Department of Counseling and Psychological Services is to prepare competent professionals to deliver effective, culturally sensitive, and empirically based mental health services to diverse populations within a wide array of counseling settings.

**Goals**

**G 1: Overall Program Objective**
Reflect current knowledge and projected needs concerning counseling practice in a multicultural and pluralistic society. Students who are preparing to work as clinical mental health counselors will demonstrate the professional knowledge, skills, and practices necessary to address a wide variety of circumstances within the clinical mental health counseling context.

**Student Learning Outcomes/Objectives**

**SLO 1: Ethical and legal issues applied to mental health counseling (M: 1, 2, 3)**
Students in the Mental Health program will gain an understanding of ethical and legal considerations specifically related to the practice of clinical mental health counseling.

**SLO 2: Characteristic and behaviors that influence the counseling process (M: 4)**
Students will gain an understanding of the counseling process in a multicultural society, including counselor characteristics and behaviors that influence helping processes.

**SLO 3: Diversity and competence multicultural counseling (M: 5)**
Students will gain an understanding of the cultural context of relationships, issues, and trends in a multicultural society, including theories of multicultural counseling, identity development, and social justice.

**SLO 4: Effects of crises, disasters and other trauma-causing events (M: 6)**
Students will gain an understanding of the nature and needs of persons at all developmental levels and in multicultural contexts, including effects of crises, disasters, and other trauma-causing events on persons of all ages.

**SLO 5: Group Work in Mental Health Counseling (M: 7)**
Students will be provided both theoretical and experiential understandings of group purpose, development, dynamics, theories, methods, skills, and other group approaches in a multicultural society, including group leadership or facilitation styles and approaches, including characteristics of various types of group leaders and leadership styles.

**SLO 6: Principles of Mental Health Counseling including Advocacy in a Multicultural Diverse Society (M: 8)**
Students will gain knowledge of the principles of mental health, including prevention, intervention, consultation, education, and advocacy, as well as the operation of programs and networks that promote mental health in a multicultural society.
### Measures, Targets, and Findings

#### M 1: Four 3R Assignments (O: 1)

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: Ethical and legal issues applied to mental health counseling**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments.

**Findings 2011-2012 - Target: Met**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments.

#### M 2: Four 3R Assignments (O: 1)

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: Ethical and legal issues applied to mental health counseling**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments.

**Findings 2011-2012 - Target: Met**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments.

#### M 3: Four 3R Assignments (O: 1)

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments. The purpose of this assignment is to differentiate between various aspects of Mental Health law and the American Counseling Association Code of Ethics.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: Ethical and legal issues applied to mental health counseling**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments.

**Findings 2011-2012 - Target: Met**

100% of students enrolled in the Mental Health Counseling Program and who are taking CPS 6010 (Ethics and Professional Identity in Mental Health Counseling) will earn a minimum cumulative score of 80% on four 3R assignments.

#### M 4: Performance Video (O: 2)

100% of all Mental Health Counseling Students enrolled in CPS 6410 (Basic Counseling Skills) will achieve a minimum score of 25 on the final performance video.

**Source of Evidence:** Video or audio tape (music, counseling, art)
Target for **O2**: Characteristic and behaviors that influence the counseling process

All students (100%) in the Mental Health Counseling program who enroll in CPS 6410 (Basic Counseling Skills) will achieve a minimum score of 25 on the final performance video.

**Findings 2011-2012 - Target: Met**

100% of all Mental Health Counseling Students enrolled in CPS 6410 (Basic Counseling Skills) will achieve a minimum score of 25 on the final performance video.

---

**M 5: Group Cultural Presentation (O: 3)**

Students who are enrolled in CPS 7340 (SocioCultural Issues in Counseling and Psychological Services) must earn a minimum of 80% on the group presentation. This assignment requires a synthesis of multicultural models and developmental theories specific to a diverse community.

Source of Evidence: Presentation, either individual or group

**Target for **O3**: Diversity and competence multicultural counseling**

Students who are enrolled in CPS 7340 (SocioCultural Issues in Counseling and Psychological Services) must earn a minimum of 80% on the group presentation. This assignment requires a synthesis of multicultural models and developmental theories specific to a diverse community.

**Findings 2011-2012 - Target: Met**

All Students enrolled in CPS 7340 (SocioCultural Issues in Counseling and Psychological Services) earned a minimum of 80% on the group presentation.

---

**M 6: Midterm and Final Examination Multiple Choice Questions (O: 4)**

90% of all Mental Health Students enrolled in CPS 8470 (Crisis Intervention) will earn a minimum score of 80% on the midterm AND final examination.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for **O4**: Effects of crises, disasters and other trauma-causing events**

90% of all Mental Health Students enrolled in CPS 8470 (Crisis Intervention) will earn a minimum score of 80% on the midterm AND final examination.

**Findings 2011-2012 - Target: Met**

More than 90% of all Mental Health Students enrolled in CPS 8470 (Crisis Intervention) earned a minimum score of 80% on the midterm AND final examination.

---

**M 7: Participation in 9 75-minute Experiential Groups (O: 5)**

All Mental Health Counseling students enrolled in CPS 6450 (Group Counseling Systems) will complete a group assignment by attending ALL 9 75-minute experiential-based, personal growth groups.

Source of Evidence: Capstone course assignments measuring mastery

**Target for **O5**: Group Work in Mental Health Counseling**

All Mental Health Counseling students enrolled in CPS 6450 (Group Counseling Systems) will complete a group assignment by attending ALL 9 75-minute experiential-based, personal growth groups.

**Findings 2011-2012 - Target: Met**

All Mental Health Counseling students enrolled in CPS 6450 (Group Counseling Systems) completed a group assignment by attending ALL 9 75-minute experiential-based, personal growth groups.

---

**M 8: Research Project and Presentation (O: 6)**

All Mental Health Counseling students in CPS 7000 (Consulting, Advocacy, and Leadership in Mental Health Counseling) will earn a minimum of 85% of the research project and presentation. These assignments will be related to a specific aspect of the Mental Health Profession.

Source of Evidence: Project, either individual or group

**Target for **O6**: Principles of Mental Health Counseling including Advocacy in a Multicultural Diverse Society**

All Mental Health Counseling students in CPS 7000 (Consulting, Advocacy, and Leadership in Mental Health Counseling) will earn a minimum of 85% of the research project and presentation. These assignments will be related to a specific aspect of the Mental Health Profession.

**Findings 2011-2012 - Target: Met**

All Mental Health Counseling students in CPS 7000 (Consulting, Advocacy, and Leadership in Mental Health Counseling) earned a minimum of 85% of the research project and presentation.

---

**M 9: Midterm and Final Examination CPS 7500: Individual and Family Over the Lifespan (O: 7)**

90% of all students who take CPS 7500: Individual and Family Over the Lifespan will earn a minimum score of 80% on both the midterm and final examination.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for **O7**: Human Growth and Development**

90% of all students who take CPS 7500: Individual and Family Over the Lifespan will earn a minimum score of 80% on both the midterm and final examination.
Findings 2011-2012 - Target: Met
More than 90% of all students who take CPS 7500: Individual and Family Over the Lifespan earned a minimum score of 80% on both the midterm and final examination.

M 10: Midterm and Final Examination (CPS 8460 (Biopsychosocial Aspects of Addiction) (O: 8)
90% of all students taking CPS 8460 (Biopsychosocial Aspects of Addiction) must earn a minimum of 80% on the midterm and final examination.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O8: Addiction and Addictive Behaviors
90% of all students taking CPS 8460 (Biopsychosocial Aspects of Addiction) must earn a minimum of 80% on the midterm and final examination.

Findings 2011-2012 - Target: Met
90% of all students taking CPS 8460 (Biopsychosocial Aspects of Addiction) earned a minimum of 80% on the midterm and final examination.

M 11: Midterm and Final Examination (CPS 8100: Psychobehavioral Diagnosis) (O: 9)
90% of all Mental Health Counseling students enrolled in CPS 8100 will earn a minimum of 80% on the midterm and final examination.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O9: Diagnosis
90% of all Mental Health Counseling students enrolled in CPS 8100 will earn a minimum of 80% on the midterm and final examination.

Findings 2011-2012 - Target: Met
Greater than 90% of all Mental Health Counseling students enrolled in CPS 8100 earned a minimum of 80% on the midterm and final examination.

M 12: Suicide Assessment (O: 10)
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.
Source of Evidence: Project, either individual or group

Target for O10: Crisis Intervention and Assessment
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.

Findings 2011-2012 - Target: Met
All Mental Health Counseling students successfully completed a suicide assessment exercise in CPS 8470: Crisis Intervention.

M 13: Suicide Assessment (O: 10)
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.
Source of Evidence: Project, either individual or group

Target for O10: Crisis Intervention and Assessment
All Mental Health Counseling students will successfully complete a suicide assessment exercise in CPS 8470: Crisis Intervention.

Findings 2011-2012 - Target: Met
All Mental Health Counseling students successfully completed a suicide assessment exercise in CPS 8470: Crisis Intervention.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Assessment of development in practicum/internship experiences 2011-12
The Clinical Mental Health Faculty will meet every semester to discuss student issues as they matriculate through the practicum and internship program. If faculty express concerns, the Coordinator of the program will meet with the student to discuss the aforementioned issues and ways to address faculty concerns.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High

Assessment of development in practicum/internship experiences 2012-13
The Clinical Mental Health Faculty will meet every semester to discuss student issues as they matriculate through the practicum and internship program. If faculty express concerns, the Coordinator of the program will meet with the student to discuss the aforementioned issues and ways to address faculty concerns.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Development of Internship Sites and Supervisors
Program will conduct ongoing evaluation and development of practicum and internship sites and supervisors. The evaluation will be based on site visits, intern evaluations, and feedback from university supervisors. Development of onsite supervisors will be achieved through peer consultation and professional development and CEU workshops.

Monitor faculty and site supervisors
Monitor faculty reports and encourage site supervisors to conduct the department Form 1015 in 10 areas of skill implementation while encouraging site supervisors to conduct skill evaluations in the practice of counseling.

Program Evaluation and Development 2011-12
Mental Health Counseling Program faculty (core and affiliated) will meet annually to discuss the current status and future direction of the Mental Health Counseling program. Current academic and programmatic issues will be discussed and faculty will design future directions for curriculum development.

Program Evaluation and Development 2012-13
Mental Health Counseling Program faculty (core and affiliated) will meet annually to discuss the current status and future direction of the Mental Health Counseling program. Current academic and programmatic issues will be discussed and faculty will design future directions for curriculum development.

Program faculty will maintain and monitor 2011-12
Program faculty will maintain the current design and implementation of the program, and continue to monitor the stated student learning outcomes.

Program faculty will maintain and monitor 2012-13
Program faculty will maintain the current design and implementation of the program, and continue to monitor the stated student learning outcomes.

Georgia State University
Assessment Data by Section
2011-2012 Middle Level Education (LA and SS) TEEMS MAT
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Master of Arts in Teaching program for Middle Level Language Arts and Social Studies is aligned with the mission of the GSU Professional Education Faculty, which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the TEEMS program in Middle Level Language Arts and Social Studies is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

Goals
G 1: Goals for teacher candidates enrolled in MCE LA/SS
The goals for teacher candidates enrolled in the Middle Level Education Language Arts/Social Studies program include the development of students who are aware of the unique social and academic needs of diverse adolescent/middle level students; knowledgeable of pedagogical content knowledge opportunities in Language Arts and Social Studies content area planning and instruction, including the use of innovative technology; are knowledgeable about learning environments for diverse learners; believe that all students can learn and are community-oriented educators who will continue to pursue professional development.
**Student Learning Outcomes/Objectives**

**SLO 1: The Diverse Adolescent Learner (M: 3, 4, 5)**
Possess a strong knowledge base and demonstrate sensitivity to the social and academic needs of diverse adolescent/middle level students.

**SLO 2: Pedagogical Content Knowledge (M: 1, 2, 3, 4, 5)**
Demonstrate pedagogical content knowledge in Language Arts and Social Studies with technology integration to create and assess rigorous, relevant, and engaging student-centered lessons.

**SLO 3: Learning Environment (M: 3, 4, 5)**
Create a productive and responsive learning environment for diverse learners while providing for students with exceptionalities.

**SLO 4: Professional Community Oriented Educator (M: 3, 4, 5, 6)**
Demonstrate the belief that a) all students can learn and b) an efficacious attitude as a global and community-oriented educator who continues reflection and individual professional development throughout their career.

**Measures (Key Assessments), Targets, and Findings**

**M 1: GACE II Content Area Exam Language Arts and Social Studies (O: 2)**
Students must have a minimum of 12 credit hours in English coursework and 12 credit hours in Social Studies coursework and must pass the GACE II content test in Middle Level Language Arts and Middle Level Social Studies before being recommended for certification.

Source of Evidence: Certification or licensure exam, national or state

**Target for O2: Pedagogical Content Knowledge**
All students enrolled in the Middle Level Language Arts/Social Studies program will pass the GACE II content exams.

**Findings 2011-2012 - Target: Met**
The GACE pass percentage was 100%. GACE scores are not broken up by student name so an individual analysis of scores is not possible.

**M 2: Content Knowledge Demonstrated in Teaching (O: 2)**
Content Knowledge rubrics in the Midpoint (Practicum) Teaching Evaluation Instrument and the Final Teaching Evaluation Instrument: Data for the key assessment of Content Knowledge are taken from the Midpoint (Practicum) Teaching Evaluation Instrument and the Final Student Teaching Evaluation Instrument. The midpoint evaluation takes place prior to clinical practice, at or near the end of the Practicum I (field experience). The final evaluation takes place at or near the end of Practicum III (student teaching). For each assessment, students are evaluated on their command of Content Knowledge by their university supervisor, who observes and confers with students and considers feedback from the student's mentor teacher. Candidates are not given specific instructions for this assessment; rather, they demonstrate their content knowledge through their teaching performance and ongoing conversations with mentor teachers and university supervisors. The Teaching Evaluation rubrics are used twice during each student's program - at the midpoint of the program (before clinical practice) and at the end of the program (at the end of clinical practice). The rubric is aligned with the PEF Conceptual Framework, and the portion of the rubric that is used to assess Content Knowledge addresses the following Conceptual Framework standard: CF 1.2. Data generated from reports of student performance in the area of Content Knowledge are used to evaluate the effectiveness of the program in preparing students who have a strong background in the areas of Middle Level Language Arts and Social Studies.

Source of Evidence: Performance in subsequent schooling feedback

**Target for O2: Pedagogical Content Knowledge**
All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong content knowledge by obtaining a rating of "Effectively" or "Adequately" on the observation instrument used to assess their pedagogical content knowledge via teaching.

**Findings 2011-2012 - Target: Partially Met**
Effectively Demonstrated (4 pts) Adequately Demonstrated (3 pts) Partially Demonstrated (2 pts) Not demonstrated (1 pts) Not Observed or Not Able to Rate (NATR) (0 pts) Mean Mode Stdev Subject Specific Content/Concepts 14 8 0 0 0 3.64 4 0.48 Pedagogical (Instructional Methods) 11 11 0 0 0 3.50 4 0.50 Content Connections 7 14 1 0 0 3.27 3 0.54 Overall Assessment of Content Knowledge 14 8 0 0 0 3.64 4 0.48 Subject Specific Content/Concepts GA-GSTEP-1 14 (63%) 8 (36%) Pedagogical (Instructional Methods) GA-GSTEP-1 11 (50%) 11 (50%) Content Connections GA-GSTEP-1-7 (31%) 14 (63%) 1 (4%) Overall Assessment of Content Knowledge GA-GSTEP-1, GA-GSU-COE-CF-1.2 14 (63%) 8 (36%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not demonstrated Not Observed or Not Able to Rate (NATR) One student (4%) met this standard at the partially demonstrated level. All other students successfully met this objective.

**M 3: Teacher Work Sample: Planning (O: 1, 2, 3, 4)**
The key assessment for planning is contained in the rubrics for the Teacher Work Sample (TWS). Students are evaluated on their ability to plan a four-week unit based on contextual factors of the school setting, appropriate learning goals that they establish based on their knowledge of the context, an assessment plan that addresses the learning goals, and a design for instruction that includes at least four weeks of lesson plans. The instructions relevant to the assessment for planning are provided for the candidates in the students’ course template in the sections for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction. (See PDF file for Teacher Work Sample below). Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate's TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Planning
with the rubrics for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Project, either individual or group

**Target for O1: The Diverse Adolescent Learner**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

**Findings 2011-2012 - Target: Met**

Unacceptable (1 pts) Developing (2 pts) Acceptable (3 pts) Proficient (4 pts) Exemplary (5 pts) Mean Mode Stdev Alignment with Learning Goals and Instruction 0 0 0 17 4.85 5 0.36 Clarity of Criteria and Standards for Performance 0 0 0 18 4.90 5 0.30 Multiple Modes and Approaches 0 0 0 0 20 5.00 5 0.00 Technical Soundness 0 0 0 1 19 4.95 5 0.22 Adaptations Based of Individuals Needs of Student 0 0 0 19 5.00 5 0.00 Alignment with Learning Goals and Instruction 3 (15%) 17 (85%) Clarity of Criteria and Standards for Performance 2 (10%) 18 (90%) Multiple Modes and Approaches 20 (100%) Technical Soundness 1 (5%) 19 (95%) Adaptations Based of Individuals Needs of Student 19 (100%) Unacceptable Developing Acceptable Proficient Exemplary

**Target for O2: Pedagogical Content Knowledge**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

**Findings 2011-2012 - Target: Partially Met**

Effectively Demonstrated (4 pts) Adequately Demonstrated (3 pts) Partially Demonstrated (2 pts) Not demonstrated (1 pts) Not Observed or Not Able to Rate (NATR) (0 pts) Mean Mode Stdev Subject Specific Content/Concepts 14 8 0 0 3.64 4 0.48 Pedagogical (Instructional Methods) 11 11 0 0 3.50 4 0.50 Content Connections 7 14 1 0 3 2.73 3 0.54 Overall Assessment of Content Knowledge 14 8 0 0 3.64 4 0.48 Subject Specific Content/Concepts/Concepts GA-GSTEP-1 14 (63%) 8 (36%) Pedagogical (Instructional Methods) GA-GSTEP-1 11 11 (50%) 11 (50%) Content Connections GA-GSTEP-1 7 17 (31%) 14 (63%) 1 (4%) Overall Assessment of Content Knowledge GA-GSTEP-1, GA-GSU-COE-CF-1.2 14 (63%) 8 (36%) Effectively Demonstrated Adequately Demonstrated Partially Demonstrated Not demonstrated Not Observed or Not Able to Rate (NATR)

**Target for O3: Learning Environment**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

**Target for O4: Professional Community Oriented Educator**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate strong planning skills by obtaining a rating of "Effectively" or "Adequately" on the rubric associated with the Teacher Work Sample.

**M 4: Clinical Practice (O: 1, 2, 3, 4)**

Candidates are assessed for Clinical Practice with the use of rubrics contained in the Midpoint Teaching Evaluation Instrument (taken prior to students' clinical practice) and the Final Teaching Evaluation Instrument (taken near the end of students' clinical practice). Rubrics in these two instruments are based on the Georgia GSTEP standards and are used to assess students on Standard 2: Knowledge of Students and Learning, Standard 3: Learning Environments, Standard 4: Assessment, Standard 5: Planning and Instruction, and Standard 6: Professionalism. The first key assessment for Clinical Practice is given at or near the end of Practicum I. The emphasis in Practicum I is to familiarize candidates with the school through immersion in both an elementary and middle school setting. Candidates are encouraged to observe a wide variety of settings within the school and to learn as much as possible about the school context, including classroom culture, policies, procedures, and protocols. Candidates plan and teach a limited number of lessons (5-10). At least three of these lessons are observed by the university supervisor, who uses an observation tool based on the Georgia Framework for Teaching. The university supervisor provides immediate feedback to the candidate after the lesson. Near the end of the Practicum semester, the university supervisor completes the Midpoint (Practicum) Teaching Evaluation Instrument, using knowledge of the candidate's teaching performance gained through formal observations, oral and written feedback from the mentor teacher, informal conversations and encounters with the candidate. The second assessment for Clinical Practice is done at or near the end of the candidates' semester of student teaching. During this semester, which is typically spent on the same middle school campus, the teacher candidates gradually take on an increasing amount of responsibility until they eventually assume the full role of the classroom teacher. During this semester, the candidates are required to teach a minimum of four weeks of lessons during which they plan, teach, reflect upon, and evaluate their praxis. The university supervisor conducts a minimum of three formal observations, providing feedback and support to the teacher candidate. Near the end of the student teaching semester, the university supervisor completes the Final Student Teaching Evaluation Instrument, using knowledge of the student gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: The Diverse Adolescent Learner**

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate excellent clinical practice skills by obtaining a rating of "Effectively" or "Adequately" on the observation instrument associated with the students' field work.

**Findings 2011-2012 - Target: Partially Met**

Unacceptable (1 pts) Developing (2 pts) Acceptable (3 pts) Proficient (4 pts) Exemplary (5 pts) Mean Mode Stdev Knowledge of Community, School and Classroom Factors 0 0 0 1 21 4.83 5 0.47 Knowledge of Characteristics of Students 0 0 0 2 22 4.92 5 0.28 Knowledge of Students' Varied Approaches to Learning 0 0 1 23 4.96 5 0.20 Knowledge of Students' Skills and Prior Learning 0 0 0 6 18 4.75 5 0.43 Implications for Instructional Planning and Assessment 1 0 0 1 22 4.79 5 0.82 Knowledge of Community, School and Classroom Factors 1 (4%) 2 (8%) 21 (87%) Knowledge of Characteristics of Students 2 (8%) 22 (91%) Knowledge of Students' Varied Approaches to Learning 1 (4%) 23 (95%) Knowledge of Students' Skills and Prior Learning 6 (25%) 18 (75%) Implications for Instructional Planning and Assessment 1 (4%) 1 (4%) 22 (91%) Unacceptable Developing Acceptable Proficient Exemplary
M 5: Effects on Student Learning (O: 1, 2, 3, 4)

The key assessment for Effects on Student Learning is contained in the rubrics for the Teacher Work Sample. Students are evaluated on their ability to analyze the results of a four-week unit that they teach during the semester of student teaching. A key component of the Teacher Work Sample project is the design and implementation of an assessment plan, which includes a pre-test and a post-test as a part of the teaching unit. The instructions relevant to the assessment for Effects on Student Learning are provided for the candidates in the students’ course template in the sections for Analysis of Student Learning and Reflection and Self-Evaluation (See PDF file for Teacher Work Sample attached below). Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate’s TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Effects on Student Learning with the rubrics for Analysis of Student Learning and Reflection and Self Evaluation in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Project, either individual or group

Target for O1: The Diverse Adolescent Learner

All students enrolled in the Middle Level Language Arts and Social Studies program will demonstrate significant and impactful effects on student learning by obtaining a rating of "Exemplary" or "Proficient" on the rubric associated with the Teacher Work Sample.

Findings 2011-2012 - Target: Partially Met

Unacceptable (1 pts) Developing (2 pts) Acceptable (3 pts) Proficient (4 pts) Exemplary (5 pts) Mean Mode Stdev

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Strengthen Pedagogical Content Knowledge
The majority of our students demonstrated effective and/or adequate pedagogical content connections, however at least one student fell below the acceptable target level. Faculty will assess the program via a scheduled program assessment in the Fall of 2012 to assess the presence/strength of pedagogical content knowledge and connections and determine if further curriculum needs to be developed in order to promote PCK and connections within the program coursework.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
- Measure (Key Assessment): Clinical Practice | Outcome/Objective: Professional Community Oriented Educator
- Measure (Key Assessment): Content Knowledge Demonstrated in Teaching | Outcome/Objective: Pedagogical Content Knowledge

Projected Completion Date: 05/2013
Responsible Person/Group: UATL Faculty
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
n/a

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
n/a

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
n/a

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
n/a

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Faculty have not made significant changes in the assessment system since last year’s report. We continue to focus on using the system in place to benefit student learning in the program.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The faculty are currently developing a plan to assess and make any alignment changes necessary in the curriculum and coursework with regards to state and national standards to include classroom management, technology, globalization, and universal design. We continue to respond to data collected, student feedback and academic scholarship to refine and improve our program.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
n/a

ADMINISTRATIVE DEPT QUESTION 2: n/a
What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

n/a

ADMINISTRATIVE DEPARTMENT QUESTION 3:
How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

n/a

Georgia State University
Assessment Data by Section
2011-2012 Middle Level Education (Math and Science) TEEMS MAT
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Master of Art in Teaching (MAT) in Middle-level Math-Science is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MAT Middle-level Math-Science program is to prepare educators who are: informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and local and global communities.

Goals
G 1: Content Knowledge
1. Candidates will be seen as more knowledgeable others in their classrooms, in their schools, and in their communities with regard to their understandings of the content and ways of knowing within the disciplines of mathematics and science.

G 2: Professional and pedagogical knowledge, skills, and dispositions
2. Candidates will be skilled craftspeople with the appropriate dispositions for translating their content knowledge into meaningful learning experiences for a diverse set of learners in grades 4 - 8 mathematics and science classrooms.

G 3: Impact on student learning
3. Candidates will be reflective professionals with the capacity to analyze the effect that their teaching practices have on the learning of the students in their grades 4 - 8 mathematics and science classes.

Student Learning Outcomes/Objectives
SLO 1: Content Knowledge (G: 1) (M: 1)
Candidates will possess and use research-based, discipline-specific knowledge and pedagogy to facilitate learning for all students.

SLO 2: Professional and Pedagogical Knowledge and Skills (G: 2) (M: 2)
Candidates will be able use their knowledge of child, adolescent, and adult development and theories of learning to design meaningful educational opportunities for all learners.

SLO 3: Professional Dispositions (G: 2) (M: 3)
Candidates will be able to exhibit ethically-appropriate behavior towards students, parents, colleagues, administrators, and community members and will be able to commit to continuing personal and professional development.

SLO 4: Impact on Student Learning (G: 3) (M: 4)
Candidates will be able to reflect critically upon data as part of a recursive process when planning, implementing and assessing teaching, learning, and development.

Measures (Key Assessments), Targets, and Findings
M 1: Content Knowledge Assessment (O: 1)
The measure for content knowledge is the student's score on the Content section of the Midpoint Evaluation of Student Teaching.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Content Knowledge
100% of students will score at the level of "Adequately Demonstrated" or higher on all elements of the rubric.

Findings 2011-2012 - Target: Met
Effectively Demonstrated (4 pts) Adequately Demonstrated (3 pts) Partially Demonstrated (2 pts) Not demonstrated (1 pts) Not
Strengthening knowledge of professionalism

M 2: Objective 2 - Professional and Pedagogical Knowledge (O: 2)

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Learning Goals and Design for Instruction assignments in the Teacher Work Sample. 2. Ratings by supervisors on the Mid-term and Final Evaluation related to this area. 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Target for O2: Professional and Pedagogical Knowledge and Skills

1. For the Learning Goals assignment, the target is for the candidates to average a score of 17 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 2.5 rating, with no more than 15% of the candidates receiving ratings of Unsatisfactory.

Findings 2011-2012 - Target: Met

1. For the Learning Goals assignment, the target was met with only one student (2%) not meeting the "acceptable" rating. For the Design for Instructions assignment, the target was met, although there were 2 (4%) students with scores below the "acceptable" rating. For the Mid-term and Final Evaluation Rubrics, the target was met as only 1.6% of candidate ratings suggest a need for improvement. 3. The Electronic Portfolio data had not been compiled at the time of the initial findings report.

M 3: Professional Dispositions (O: 3)

The measure for professional dispositions is the student's score on the Dispositions Rubric at the End of Student Teaching.

Target for O3: Professional Dispositions

95% of candidates will score at the level of "Acceptable" or higher on all elements of the rubric at both the midpoint and endpoint disposition assessments.

Findings 2011-2012 - Target: Met

On the midpoint dispositions rubric 100% of candidates demonstrated an "acceptable" or "exceptional" rating on all elements of the rubric. On the endpoint dispositions rubric 96% of candidates demonstrated an "acceptable" or "exceptional" rating on all elements of the rubric. This finding indicates that our candidates possess the dispositions needed to have empathy, positive view of others, positive view of self, authenticity, and meaningful purpose/vision. We will continue to review dispositions due to their impact on student achievement.

M 4: Impact on Student Learning (O: 4)

The measure for impact on student learning is the Narrative concerning Impact on Student Learning in the student's e-portfolio.

Target for O4: Impact on Student Learning

100% of students will score at the level of "Acceptable" or higher on all elements of the rubric.

Findings 2011-2012 - Target: Partially Met

This target was partially met with 93% of students scoring at the "acceptable" or higher rating.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Additional support in professionalism

Faculty will provide additional support to students through focused assignments. Student handbook will clearly describe expectations for professionalism.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: The target date of October 2010 will give faculty adequate time to implement the additional support structures.
Projected Completion Date: 09/2010
Responsible Person/Group: Program faculty; field experiences director
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Strengthening knowledge of professionalism

While faculty ratings on professionalism of teacher candidates (via the STARS system) have met our achievement target, our assessment results based on portfolio evaluation have indicated we have partially met our achievement target. To strengthen our teacher candidates' knowledge of professionalism, we will provide a revised coursework (added learning modules on legal and ethical issues) which will guide our teacher candidates to develop basic knowledge of professionalism. Also teacher candidates will be required to submit weekly reflections as part of their coursework which will offer continued communication and guidance between...
Impact on Student Learning

Provide more support for students related to classroom management

The MAT MCE Math and Science students take two methods courses: One with a math focus and one with a science focus. It is difficult as it is for the instructors to prepare students in the methodologies specific to those two disciplines in single courses. And without a third course which could introduce general features of pedagogy such as notions of lesson planning, classroom management, etc., it falls on the instructors of the two methods courses to try to add that content in as well. As a result, it is likely that insufficient attention is being paid to those areas, because students have provided feedback to that effect. The preferred solution would be to find a way to add a third methods course such as exists in the MAT SCE Science program. However, until a way to do that with a schedule which is already over-crowded is determined, some kind of patchwork solutions will be required. One is to require students to read a book related to classroom management to go along with the discipline-specific methods books they are now required to read. Another is something that will be tried this semester: Bringing in a guest speaker (in this case a teacher trained in behavior management techniques). We will continue to look for other options.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Methods Courses

In the mathematics and science methods courses, there is a need to have assignments that speak to the issue of classroom learning environments. These issues should be inclusive of classroom management issues. Scholarly readings from practitioner and research journals will be shared with cohort members for discussion and practice in their practicum placements. In addition, guest speakers (preferably those teaching in urban spaces) will be invited to a classroom management/learning environments session to help pre-service teachers develop action plans for their developing their own plans as it pertains to learning environments.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 09/2012

Refined TWS/Rubrics

The implementation of the TWS is a means to create a cohesive, interrelated set of assessments that also impact student learning. As it stands, there are refined rubrics for assessments to provide better structure to the TWS for pre-service teachers and university supervisors alike. These refined rubrics also make the expectations clear for students as it pertains to impacting student learning and assessment.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Revised TWS/Rubrics

Our degree program had some changes institutionalized made based off of last year’s action plan. We implemented a revised version of TWS as a means to create a cohesive, interrelated set of assessments. During the practicum I, students chart their goals with specificity. During practicum II and III, students delve deeper into these goals and use their stated goals to meet the needs of learners. We also refined the rubrics for assessments to provide better reliability among the supervisors performing the ratings of students' learning outcomes.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Content Knowledge Action Plan

In the mathematics and science methods courses, there needs to be a stronger connection to other disciplines. While the mathematics and science connections are made fairly easy, there needs to be more integration of other academic disciplines. All candidates take EDRD 7630, so it might be prudent for students to further utilize some of the strategies introduced in that course. Additionally, there needs to be more integration of other subjects that are also aligned to the standards. Further, pre-service teachers need to explore multiple ways to bridge “school” content knowledge with the world outside of school.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 07/2011

Responsible Person/Group: Program coordinator in conjunction with methods course instructors

Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Impact on Student Learning

Our goal was to ensure that 100% of teacher candidates score at the "acceptable" rate on their impact on student learning. Overall in the program, we had 93% of students to score at the "acceptable" rate. Two students (7%) scored at the "developing" rate. We will work to implement an action plan that differentiates instruction for teacher candidates who rate at the "developing" and below category.
Implementation Description: The TEEMS Team (coordinator, professors, university supervisors, and mentor teachers) will work closely together to monitor students' performance in monitoring middle grades students' performance in course work and Practicum and will provide more directive support for those candidates who do not meet early 'acceptable' ratings.

Projected Completion Date: 05/2013

Responsible Person/Group: Coordinator of the TEEMS Math/Science Program, TEEMS Math/Science Course Instructors, University Supervisors, and Mentor Teachers

Additional Resources: N/A

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Our major CTW accomplishments this year were improving in content knowledge, professional and pedagogical knowledge, and professional dispositions. Last year, we worked on meeting the goals in content knowledge. We were successful in this action plan.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Students improved in critical thinking from entry level to exit class. This was demonstrated through their midpoint and final evaluations.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Our program is still in need of development in the area of "impact on student learning." We are working towards an integrative approach with this area.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
The impact of CTW on our program has been the data analysis/and reflection that allows us to make our program even more effective.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We have changed the curricular map and targets to better support student success.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
We have made changes to the content within classes. The data has helped us to notice gaps that need further addressing. An example of these changes is the implementation of classroom management within each course. As a unit, we are mapping out what aspect of classroom management should be discussed in which class. This curricular mapping will be beneficial to students and will help with program alignment.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
We used the previous year's assessment to note the changes that we should make in content knowledge. We also used the data to determine what aspects of the program we should keep.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?
We have learned that we have been effective in training new teachers, but that there is always room for improvement. We are specifically working on training the new teachers on the impact that they have on student learning.

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
We will use the data to make programmatic changes and updates to how we teach students about their impact on student learning. Course offerings and practicum experiences will focus on this element. We expect that all students will meet the goals for this area in the upcoming year.

Georgia State University
Assessment Data by Section
2011-2012 Middle Level Education BSE
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the BSE program in Middle Level Education is to prepare teachers to teach in two of the following areas in grades 4-8: Reading, Language Arts, Mathematics, Science, and Social Studies.

**Goals**

**G 1: Candidates are Informed Educators with Expert Content Knowledge**
Candidates are informed educators who have expert knowledge in two content fields in middle level education.

**G 2: Candidates are Informed Educators with Necessary Knowledge, Skills, and Dispositions for teaching Middle Level Students**
Candidates are informed educators with knowledge, skills, and dispositions needed to succeed in teaching middle level students.

**G 3: Candidates are Effective Educators who Impact Student Learning**
Candidates are effective educators whose teaching practices have a measurable impact on the learning of their students.

**Student Learning Outcomes/Objectives**

**SLO 1: Candidates Demonstrates Knowledge in their Content Field (G: 1) (M: 1)**
Candidates demonstrate knowledge and understanding of the central concepts, tools of inquiry, standards, and structures of content in their chosen teaching fields.

**SLO 2: Candidates Plan, Implement, and Reflect on Instruction Methods (G: 2) (M: 2)**
Candidates plan, implement, and reflect upon a wide range of instructional methods through teacher inquiry.

**SLO 3: Candidates Create Meaningful Learning Experiences (G: 2) (M: 3)**
Candidates create meaningful learning experiences that develop all young adolescents’ competence in subject matter and skills.

**SLO 4: Candidates Demonstrate Positive Dispositions (G: 2) (M: 4)**
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision for working with middle level students.

**SLO 5: Candidates Demonstrate a Positive Impact on Student Learning. (G: 3) (M: 5)**
Candidates use a variety of teaching methods and assessment tools to measure and reflect up their impact on their students’ learning.

**Measures (Key Assessments), Targets, and Findings**

**M 1: Student Teaching Evaluation (O: 1)**
Students are knowledge and understanding of the central concepts, tools of inquiry, standards, and structures of content in their chosen teaching fields is evaluated by their university supervisors via the Student Teaching Evaluation Rubric.
Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Candidates Demonstrates Knowledge in their Content Field**
100% of students will receive a score of "3" (adequately demonstrated) or higher on all rubric components related to content knowledge.

**Findings 2011-2012 - Target: Met**
Of the 47 students assessed, 16 students (35%) scored at the level of 3 (adequately demonstrated) and 31 students (65%) scored at the level of 4 (effectively demonstrated). Thus, 100% of the students scored at the level of 3 or higher on this measure.

**M 2: Teacher Work Sample Rubric (O: 2)**
Candidates demonstrate their ability to plan, implement, and reflect upon a wide range of instructional methods through the Teacher Work Sample project. They are evaluated via the Teacher Work Sample rubric.
Source of Evidence: Senior thesis or culminating major project

**Target for O2: Candidates Plan, Implement, and Reflect on Instruction Methods**
100% of students will receive a score of "3" (Acceptable) or higher on all rubric components related to planning; at least 80% with a score of "4" (Proficient) or higher; and at least 70% with a score of "5" (Exemplary) or higher.

**Findings 2011-2012 - Target: Partially Met**
See attached documents. 100% of the students scored a "3" or higher in the areas of contextual factors, and learning goals. 99% of the students scored a "3" or higher in assessment, design for instruction, and planning. We did not meet our target.

**M 3: Teaching Evaluation Rubrics (O: 3)**
Candidates create meaningful learning experiences that develop all young adolescents’ competence in subject matter and skills. During student teaching, they are evaluated via the following rubrics: Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric
Source of Evidence: Performance (recital, exhibit, science project)
### Target for O3: Candidates Create Meaningful Learning Experiences

100% of students will score a level "3" or "adequately demonstrated" in the following areas 2-5 of the teaching evaluation rubric: (2) knowledge of students and learning, (3) learning environments, (4) assessments, and (5) planning and instruction.

#### Findings 2011-2012 - Target: Partially Met

98% of the students scored a "3" or acceptable. 2% of all students scored a "1" or unacceptable.

### M 4: Dispositions Assessment Rubric (O: 4)

Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. Candidates dispositions will be evaluated via the Dispositions Assessment Rubric.

Source of Evidence: Performance (recital, exhibit, science project)

#### Target for O4: Candidates Demonstrate Positive Dispositions

100% of students will score a level "3: acceptable" or higher, while 50% of students will score at a level of "4: exceptional."

#### Findings 2011-2012 - Target: Met

100% of students scored at a level of acceptable or higher on all elements. At least 78% scored at a level of "Exceptional" or higher.

### M 5: Teacher Work Sample - Analysis of Student Learning (O: 5)

Students document the effects of their teaching on student learning through their work on the Teacher Work Sample project. A rubric is used to assess the students' work.

Source of Evidence: Senior thesis or culminating major project

#### Target for O5: Candidates Demonstrate a Positive Impact on Student Learning.

100% of students will score at the level of Acceptable or higher on all elements of the rubric. At least 90% will score at the level of Proficient or higher on all elements. At least 75% will score at the level of Exemplary or higher on all elements.

#### Findings 2011-2012 - Target: Not Met

See attached document. Only 90% of students scored at a level of Acceptable or higher. In reviewing the results for the 2011-2012 academic year, we realized that a target of 100% for this large a group may be unrealistic. We are adjusting our target to 95% at the level of acceptable.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Focus on action research as a continual process of thinking/being in the classroom

Although most of our students did well on the action research project, not everyone was at the proficient or partially proficient level. We plan to add more instruction related to action research in EDCI 4640, and talk specifically about how this action research process is a way of thinking/being in the classroom, not just a formal research plan to use once in teacher education courses.

- **Established in Cycle**: 2010-2011
- **Implementation Status**: Planned
- **Priority**: High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**

- **Measure (Key Assessment)**: Teacher Work Sample - Analysis of Student Learning
- **Outcome/Objective**: Candidates Demonstrate a Positive Impact on Student Learning.

**Implementation Description**: Work more carefully with preservice teachers to help them understand action research as a way of thinking/being in the classroom. This instruction/discussion will take place in EDCI 4640.

**Projected Completion Date**: 04/2012

**Responsible Person/Group**: Instructor of EDCI 4640.

#### Improved instruction related to action research

Although most of our students did well on the action research project, not everyone was at the proficient or partially proficient level. We plan to add more instruction related to action research to EDRD 4600 and EDCI 4640 in order to help students better understand the importance of each required component of action research.

- **Established in Cycle**: 2010-2011
- **Implementation Status**: Planned
- **Priority**: High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**

- **Measure (Key Assessment)**: Teacher Work Sample Rubric
- **Outcome/Objective**: Candidates Plan, Implement, and Reflect on Instruction Methods

**Implementation Description**: The instructor of EDRD 4600 will devote one full class session and two partial class sessions to action research methods.

**Projected Completion Date**: 08/2011

**Responsible Person/Group**: EDRD 4600 instructor.

#### Increased content in methods courses

Although almost all of our preservice teachers were rated at a score of "3" or "adequately demonstrated" or higher in their content knowledge, not 100% of the students were rated at this level. In fact, approximately 26% of our preservice teachers received a "3" instead of a "4" or "effectively demonstrated" on pedagogical content knowledge as it relates to instructional methods and planning. Given this, our plan in the coming year is to increase content learning experiences in our methods courses within the BSE MLE program.
Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
  Measure (Key Assessment): Student Teaching Evaluation | Outcome/Objective: Candidates Demonstrates Knowledge in their Content Field

Implementation Description: The BSE MLE program coordinator will work with methods course instructors to add more content into the course syllabi.
Projected Completion Date: 04/2012
Responsible Person/Group: BSE MLE program coordinator and BSE MLE methods course instructors.

**95% is the level of acceptable**
In reviewing the results for the 2011-2012 academic year, we realized that a target of 100% for this large a group may be unrealistic. We are adjusting our target to 95% at the level of acceptable.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
  Measure (Key Assessment): Teacher Work Sample Rubric | Outcome/Objective: Candidates Plan, Implement, and Reflect on Instruction Methods

**95% of students will score a “3” or acceptable.**
The current number of 100% is unrealistic because of our growing BSE student population. 95% is a more realistic expectation.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
  Measure (Key Assessment): Teaching Evaluation Rubrics | Outcome/Objective: Candidates Create Meaningful Learning Experiences

**Increase Students’ Impact on Student Learning**
We will focus more in our methods courses on ways to help our students aware of ways to increase and measure student learning.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
  Measure (Key Assessment): Teacher Work Sample - Analysis of Student Learning | Outcome/Objective: Candidates Demonstrate a Positive Impact on Student Learning.

**Revise target**
In reviewing the results for the 2011-2012 academic year, we realized that a target of 100% for this large a group may be unrealistic. We are adjusting our target to 95% at the level of acceptable.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure (Key Assessment) | Outcome/Objective):
  Measure (Key Assessment): Teacher Work Sample - Analysis of Student Learning | Outcome/Objective: Candidates Demonstrate a Positive Impact on Student Learning.
Responsible Person/Group: Program faculty
Additional Resources: None

**Revise target**
We will revise target.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
  Measure (Key Assessment): Teacher Work Sample - Analysis of Student Learning | Outcome/Objective: Candidates Demonstrate a Positive Impact on Student Learning.

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**
N/A

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**
N/A
CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
The assessment vehicle currently used for students is the Teacher Work Sample (TWS). The TWS contains the following components: 1. contextual factors, 2. learning goals, 3. assessment plan, 4. design for instruction, 5. instructional decision making, 6. analysis of student learning, and 7. reflection and self-evaluation. The Teacher Work Sample Project was developed by The Renaissance TWS Group, a consortium of teacher preparation institutions that are using teacher work samples as a tool for instruction and performance assessment of teacher candidates and are committed to promotion and development of work samples through sharing of information, materials, expertise, and research.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
Overall, our students are performing well in all categories of Assessment Planning, Contextual Factors, Design for Instruction, and Learning Goals. Most of them have scored beyond just a "3" or acceptable. Here are the specifics:
1. Assessment Plan: 80% of our students scored a "5" or exemplary in "alignment and learning." 2. Contextual Factors: 80% of our students scored a "5" or exemplary in "knowledge of characteristics of students." 3. Design for Instruction: 80% of our students scored a "5" or exemplary in "lesson and unit structure." 4. Learning Goals: 82% of our students scored a "5" or exemplary in "use of variety of instruction." 5. Resources and Use of Technology: 88% of our students scored a "5" or exemplary in "resources and use of technology." 6. Learning Goals: 92% of our students scored a "5" or exemplary in "significance, challenge and variety." 7. Alignment with Local State and National Standards: 93% of our students scored a "5" or exemplary in "alignment with local state and national standards." We expect to see these numbers increase further as the B.S.E. programs continue to enhance instruction and procedures.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A

Georgia State University
Assessment Data by Section
2011-2012 Modern & Classical Languages Assessment of Core
As of 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Department of Modern and Classical Languages is committed to the advancement of knowledge about contemporary and ancient languages and, in particular, about the ways in which they impact civilization by molding numerous cultures and shaping their literatures. The Department's excellence in research, teaching and service benefits students and colleagues by broadening their understanding of the world community and strengthening their ability to function in a cross-cultural and multicultural environment, and as a result, contributes to the general betterment of society.

Goals
G 1: Oral communication
The student shall demonstrate the ability to speak the target language with a varied vocabulary, good pronunciation, and grammatical accuracy.

Student Learning Outcomes/Objectives
**SLO 1: ORAL COMMUNICATION (G: 1) (M: 1)**

Interpersonal communication: task-based activities that require interaction with classmates. This mode will be used to assess comprehension and comprehensibility.

**Presentational communication:** tasks in which students create spoken language. This mode will be used to assess vocabulary use and fluency.

**Measures, Targets, and Findings**

**M 1: 2001 Level Oral Interview in MCL core French, German, and Spanish courses (O: 1)**

In the 2009-2010 cycle, an oral interview was introduced to assess the core French, German, and Spanish courses. In the previous cycle it was established that students would demonstrate their ability to speak (the most comprehensive language skill) the target language with a varied vocabulary (albeit limited to the situations and language domains covered up to the 2001 level), good pronunciation, and grammatical accuracy (also limited to the situations and language domains covered up to the 2001 level). The 2001 (third semester) level was chosen for the interview assessment since at this time students will have already completed two semesters of language training—since the interviews were held at the end of the 2001 semester, students had in fact completed three semesters of language training. Also, 2001 would still allow the faculty to repeat the assessment in 2002 (fourth semester), the last course in the Lower Division language sequence and an ideal time to introduce an exit assessment tool, such as an oral interview. The interviews were started in Spring 2010 and then, for the purpose of data and semester comparison, were repeated in Spring 2011 in all three most-commonly taught languages—Spanish, French, and German. In Spring 2011, Spanish, the largest of the three programs, also conducted interviews in Span 2002, fourth semester of Spanish. In Spring 2010, it had been determined that 2002 interviews would be a convenient source of exit data, as the fourth semester of Spanish is indeed the last course in Lower Division Spanish. Span 2002 interviews would also provide information on how the program evolves from semester to semester.

**BRIEF DESCRIPTION OF RESULTS AND FINDINGS**

The oral interview rubric consists of seven categories (or factors) being measured (see the assessment summaries attached for each language). For illustration purposes, these categories were finally converted into a four-range scale: 10 range = Optimal performance 9 range = Good performance 8 range = Middle point performance 7 range = Needs improvement Optimal and Good performance mean ideal progress toward developing skills in the target language and acquiring knowledge about the language and its related culture(s). A student in a Middle point range shows achievement that is fair, needs to continue to work on some areas (see the seven-factor summaries attached), but his/her performance meets expectation for a student who is in the process of acquiring the target language. A range of Needs improvement, nonetheless, shows more significant difficulties and challenge to acquiring the target language and knowledge of its related culture(s). Importantly, a student in this range does not meet expectation for the level. RESULTS Table 1. Results by language for Spring 2010 Language Number of students interviewed out of total (as posted in Gosolar for Spring 2010) Percentage of interviewed students Average Four—range average Number and percentage that needs improvement French 16/91 17.6% 8.1 Middle (GOOD) 4/91 (4.4%) German 7/28 25.0% 8.5 Middle (GOOD) 2/28 (7.1% Spanish 13/180 7.2% 9.4 OPTIMAL 0/180 (0%) Table 2. Results by language and by Spanish level for Spring 2011 Language Number of students interviewed Percentage of students interviewed Average Four—range average Number and percentage that needs improvement French 2001 16/51 31.4% 8.1 Middle (GOOD) 4/51 (7.8%) Germ 2001 7/29 24.1% 8.5 Middle (GOOD) 2/29 (6.9%) Span 2001 39/168 23.2% 8.7 Middle (GOOD) 10/168 (6.8%) Span 2002 23/116 19.9% 8.9 Middle (GOOD) 3/116 (2.6%) In general, in the two semesters, Spring 2010 and Spring 2011, the results appear as highly positive. No particular skill is identified as in need of more attention (see, for instance, Table 3 below for Spring 2011 results) by the faculty: in every category, the figures are within the Middle (=GOOD) range of the four-range scale. Rather, these figures show (see Tables 1 and 2) that a small but particular number of students are in need of improvement. In Spring 2010, this was the case especially in French (with 4 out of 16 students in the range of 7), who either needed to continue to work (harder) on all the language areas. In Spring 2011, however, the percentages are a lot better balanced at the 2001 level across the three languages (7.8% in French, 6.9% in German, and 6.8% in Spanish), and significantly reduced in Span 2002 (2.6%).

**Results**

**Target for O1: ORAL COMMUNICATION**

MCL wants to see 75% of its students score x and at least 30% of its students score x +Y

**Findings 2011-2012 - Target: Partially Met**

Our findings are attached, see spreadsheet. We found that X is true.
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Develop fluency

These results will be used to identify the best tasks for the classroom to increase fluency, an aspect often overlooked in first-year classes. It is expected that the information will help develop lessons on formulaic sequences, paraphrasing, and other real language strategies that are usually neglected in the lower-level language classes.

#### Oral Communication

The Department of Modern and Classical Languages (MCL herebyforth) has been implementing some sort of oral communication assessment among students taking first-year Spanish. The assessment requires special considerations since the enrollment limits for elementary Spanish classes is 30-32 students. In a regular fall or spring semester there are 35 sections of first-year Spanish.

An informal survey of oral assessment conducted among colleagues, shows that the most common form used is face-to-face interviews during office hours. Given the special make up of Georgia State students, there are many students who could not meet office hours because they have previous engagements (academic and otherwise) at those times. The second form is to take the last week of classes and conduct interviews during that time. Experience shows that the second modality always presents circumstances that throw off the schedule, aside from the fact that one has to sacrifice class time. Also, the assessment needs to be recorded in order to verify scores, and as evidence in case of grade disputes.

The MCL faculty has agreed to meet during FA09 to discuss possible venues of assessing oral communication on the core. The French and German sections are going to conduct face-to-face interviews, while the Spanish section has yet to determine how oral communication will be assessed. The three sections have decided to use the same type of assessment but due to the number of students (and sections) in Spanish there will be different instruments.

2012 Update (By Oscar Moreno) In 2009, the Learning Outcome Committee determined that all three languages --French, German, and Spanish-- would adopt a similar assessment tool and that the results would be shared. In 2010, 2011, and 2012, all three languages have followed the same data collection guidelines and a single coordinator (Dr. Oscar Moreno, the group leader) is now charged with storing and analyzing the data. The group leader, assisted by the other two language coordinators, will produce a final report --covering 2010 to 2012-- to be submitted in March 2013 to the Department's Learning Outcome Committee.

#### A faculty meeting for review of findings and planning a course of action

During Fall 2011 a meeting with faculty from all languages will take place (date to be determined) in order to review and discuss the results and findings. The WEAVE reporter, also the LOA group leader, will then suggest to focus on the following: 1. Ways to ensure a sample population of at least 25% of the students in every language. 2. To include the 2002 level for French and German starting in Spring 2012. 3. To minimize, and if possible eliminate, the need for the interviews to be done on a purely voluntary basis. For a more reliable assessment of the program, there should be a mechanism that can guarantee a random but reliable sample population. 4. Importantly, to identify innovations and changes to the MCL language program(s) that can reduce the number of students in need of improvement.

#### Spring 2013 follow-up

At the end of Fall 2011, it was determined that the sample of student interviews --for the assessment of oral communication-- would be increased up to an ideal 25% of the target population and that Span 2002 would add for confirmation of the tendencies observed in Span 2001 until then: the interviews conducted until that semester showed that all three programs--French, German, and Spanish--were effective, with an average in all three languages of 'GOOD performance', to mean that, on average, the students served by these programs were indeed making adequate progress toward developing oral/conversational skills in the target language and that they were acquiring knowledge about the language and its related culture(s). It was also observed, however, that the assessment tool and the data collection procedure (mostly based on students volunteering for the interviews) might need improvement. In Spring and Fall 2012 improvement to the data collection procedure (reaching an ideal 25% of the student population) were implemented. The data collected during the 2012 academic year is currently being collected (in Spring 12 and Fall 12) and will be reviewed in Spring 2013.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In 2011, it was determined that, in general, the three programs involved --French, German, and Spanish-- were meeting the faculty expectations (i.e. allowing students to be able to use the language functionally as they faced native speakers of the target language or highly proficient speakers of the target language. However, a more representative sample of students appeared to be needed. Therefore, in 2012, an effort was made to collect information for about 25% of the student population in each language. The data for Spring and the Fall 2012 will be compared in Spring 2013 and the concerns about the assessment tool and data collection will then be addressed.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

A general conclusion out of the results obtained in 2010 and 2011 is that all three language programs --French, German, and French-- are indeed meeting the expectation of most students served with a functional command of the target language by the end of the Lower Division sequence. However, due to the data collection method, the reporting faculty also suspected that these results may have been somewhat inflated. In 2012, an effort was then made to collect information for about 25% of their student population per language. The data collection for 2012 is now in progress. In Spring 2013, the MCL faculty will review the data and, if the initial concerns are confirmed, some other form of assessment will be introduced that can supplement the current oral interview at the end of each semester. In all, as said, it may be stated at this time that all three languages are indeed working towards functional proficiency and that the program students are indeed largely reaching, albeit at a basic level, an ability to communicate in the target language after three semesters. Importantly, this is particularly believed to be the case when students take the Lower Division courses in a consecutive manner. A form of supplementary assessment will also have to include a record of student history in the program. If the assumption that consecutive semesters are in fact more effective than free registration (i.e. registering for the foreign language requirement courses whenever a student feels it necessary or appropriate), the Lower Division programs in French, German, and Spanish will need to ensure that consecutive semesters are promoted and that students are advised in that direction.

Georgia State University
Assessment Data by Section
2011-2012 Multiple and Severe Disabilities MEd
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the five concentrations in Multiple and Severe Disabilities (Autism, Deaf/Hard of Hearing, Early Childhood Special Education, Moderate, Severe, and Profound Intellectual Disabilities, and Physical and Health Disabilities), is to prepare graduate level teachers who are grounded in research-based curriculum development, instructional technology, data collection and interpretation, and the ethical foundations of the profession. The program prepares teachers to be responsive to the learning needs of students, the concerns and questions of parents, and the collaborative needs of related professionals. The program provides students with recommendations for certification in its respective areas (e.g., Special Education: General Curriculum, Special Education: Adapted Curriculum, Physical and Health Disabilities, Deaf/Hard of Hearing).

Goals
G 1: Demonstrates content pedagogical knowledge.
Demonstrates content pedagogical knowledge.

G 2: Understands student development regarding learning
Understands student development regarding learning.

G 3: Can effectively teach diverse groups of learners.
Can effectively teach diverse groups of learners.

G 4: Can effectively plan for and assess instruction.
Can effectively plan for and assess instruction.

Student Learning Outcomes/Objectives
SLO 1: Teacher demonstrates content pedagogy. (G: 1) (M: 1)
The teacher demonstrates understanding of the central concepts, tools of inquiry, and structures of the discipline he or she teaches by creating learning experiences that make these aspects of subject matter meaningful for students.
Relevant Associations: Council for Exceptional Children standards.

SLO 2: Demonstrates understanding of how children learn (G: 2) (M: 2)
The student demonstrates understanding of how children learn and develop over a period of time, by providing learning opportunities that demonstrate a child's intellectual, social, and/or behavioral development/growth.

Relevant Associations: Council for Exception Children Standards.

**Other Outcomes/Objectives**

**O/O 3: Effectively teaches diverse learners. (G: 3) (M: 3)**

The teacher demonstrates understanding of how students differ in their approaches to learning and uses effective communication and professional behavior while differentiating instruction based on student need.

Relevant Associations: Council for Exceptional Children Standards.

**O/O 4: Effectively plans for instruction. (G: 4) (M: 4)**

The teacher plans for and uses assessment in instruction based upon knowledge of subject matter, student needs, the community and curriculum goals.

Relevant Associations: Council for Exceptional Children Standards.

**Measures, Targets, and Findings**

**M 1: Teaching Sequence (O: 1)**

EXC 7190 Teaching Sequence using a rubric of 1-4 with 4 being the strongest to include: Rationale and design, lesson plans and continuous assessments and post-assessments and discussion of findings.

Source of Evidence: Project, either individual or group

**Target for O1: Teacher demonstrates content pedagogy.**

90% or more of students will score at or above a 3 out of 4 on the teaching sequence rubric.

**Findings 2011-2012 - Target: Partially Met**

With an N of 31 students, 84% scored at or above a 3 out of a 4 on the teaching sequence rubric. The range was 2 to 4. The mean score was 3.48.

**M 2: Pupil Change Project (O: 2)**

P-12 change project using a rubric of 1-4 with 4 being the strongest to include a description of the behavior to be changed, a treatment for change, baseline and treatment data or pre and post instructional data, and analysis and discussion of the results.

Source of Evidence: Project, either individual or group

**Target for O2: Demonstrates understanding of how children learn**

90% or more of students will score at or above a 3 out of 4 on the pupil change project rubric.

**Findings 2011-2012 - Target: Met**

With an n of 28 students, 100% scored at or above a 3 out of a 4 on the pupil change project rubric. The range was 3.5 to 4. The mean score was 3.88.

**M 3: Performance Evaluation (O: 3)**

Performance Evaluation Rubric of 1-4 with 4 being the strongest to include indicators based on the Georgia Framework.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Effectively teaches diverse learners.**

90% or more of students will score at or above a 3 out of 4 on the performance rubric.

**Findings 2011-2012 - Target: Met**

With an n of 29 students, 100% scored at or above a 3 out of 4 on the performance rubric. The range was 3.29 – 4. The mean score was 3.88.

**M 4: Lesson Plan (O: 4)**

Lesson Plan Rubric of 1-4 with 4 being the strongest to include lesson title and description, primary learning outcomes, procedures, technology, assessment, modifications, extension, and reflection.

Source of Evidence: Project, either individual or group

**Target for O4: Effectively plans for instruction.**

90% or more of students will score at or above a 3 out of 4 on the lesson plan rubric.

**Findings 2011-2012 - Target: Partially Met**

With an n of 29 students (and several students having done 2 Lesson Plans), 81 % scored at or above a 3 out of a 4 on the lesson plan. The range was 2 – 4. The mean score was 3.9
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Comprehensive exam rubric**
Faculty decided to revise the assessment rubric for the comprehensive exams to provide better information.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Teaching Sequence
  - Outcome/Objective: Teacher demonstrates content pedagogy.
- **Implementation Description:** In progress
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** MSD and BLD faculty

**Performance observation rubric**
MSD faculty discussed the complexity of the performance observation rubric and it was decided that it needed to be streamlined to generate data in a manner that is useful across the department.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
- **Implementation Description:** Some changes have occurred, but discussion is ongoing
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** MSD and BLD faculty

**Current data collection**
Most of the MSD students had no difficulty effectively planning for instruction and in those few instances that students had difficulty with a few indicators, remediation was given and students were then able to meet criteria. This indicator was scored as partially met due to the difficulty a few students had initially. Faculty will examine those areas and stress them more in their coursework. However, questions came up regarding how WEAVE data utilizes the Livetext data which is part of the NCATE and PAAR reports. MSD program faculty plan on examining the use of other modalities to capture student data. BLD is trying a new system based on class performance, grades, and comprehensive exams. MSD will examine effectiveness of BLD system and determine if this change would benefit MSD and WEAVE reporting data (to provide additional data, rather than repeating data in other reports).

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Lesson Plan
  - Outcome/Objective: Effectively plans for instruction.
- **Implementation Description:** MSD faculty to meet to discuss results and current data system
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** MSD faculty

**Teaching sequence rubric and student eval**
The students who did not achieve a 3 out of 4 or higher, only missed certain parts of the assessment rubric. MSD will further examine the student performance and rubric to determine if changes need to be made in the way students are evaluated or in teaching sequence content. This will be part of the discussion on the way data is examined and utilized to determine if a change is needed to enrich the acquired data and provide additional information (rather than having repetition between data NCATE, PAAR, WEAVE).

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Teaching Sequence
  - Outcome/Objective: Teacher demonstrates content pedagogy.
- **Implementation Description:** MSD will meet and examine student performance and evaluation measure
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** MSD faculty

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Music Assessment of Core**

*As of: 12/12/2016 04:41 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**
The mission of the School of Music is to provide a comprehensive, rigorous, and innovative academic program that serves the pursuit of artistic, professional, and scholarly excellence for all students.

**Goals**

**G 1: Humanities/Fine Arts Goal**
Students will effectively analyze the meanings of texts and/or music, express ways that culture shapes values, and critically evaluate them.
## Student Learning Outcomes/Objectives

### SLO 1: Evaluation of Performance (G: 1) (M: 1)
Students will be able to provide critical evaluation of a specific musical performance including expression of musical insight into the pieces played.

**Strategic Plan Associations**
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

## Measures, Targets, and Findings

### M 1: Music Society and Culture (O: 1)
All students enrolled in Music, Society and Culture were required to write a report on a large ensemble concert they had attended. Eligible ensembles were limited to School of Music groups only giving the students seven ensembles from which to choose. The report is assessed on, among other items, grammar and sentence structure, accuracy of musical terminology, and musical insight. Please refer to the uploaded rubric.

Source of Evidence: Academic direct measure of learning - other

### Target for O1: Evaluation of Performance
We expect 80% of the students enrolled in Music, Society and Culture to receive an acceptable rubric score on this single evaluation.

**Findings 2011-2012 - Target: Met**
A sample of 55 students were chosen from a spring section of the course. Of the 55, 6 scored a 3 or 4 (unacceptable) on the rubric and 39 scored a 1 or 2 (acceptable). Thus 89% received an acceptable score.

## Details of Action Plans for This Cycle (by Established cycle, then alpha)

### Learning Outcomes
Develop learning outcomes and a rubric for assessment to offer more particular data for ongoing tracking of student progress

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** Medium  
**Projected Completion Date:** 04/2011  
**Responsible Person/Group:** Faculty who teach core

### Continued Refinement of Rubric
The instructors of Music, Society and Culture are being encouraged to refine the rubric to cover more points. As the target for this measure is being met consistently, we may consider adding a new or different measure in future cycles.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** Medium  
**Relationships (Measure | Outcome/Objective):**  
  Measure: Music Society and Culture | Outcome/Objective: Evaluation of Performance

**Implementation Description:** Meetings with the faculty who teach this course and the WEAVE Assessment Coordinator  
**Projected Completion Date:** 09/2013  
**Responsible Person/Group:** Lara Dahl, Javier Albo  
**Additional Resources:** None at this time.

---

### Georgia State University

**Assessment Data by Section**

**2011-2012 Music Bachelors**  
(As of: 12/13/2016 04:41 PM EST)  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

### Mission / Purpose
The mission of the School of Music is to provide a comprehensive, rigorous, and innovative academic program that is consistent with the urban context and mission of Georgia State University and to serve the pursuit of artistic, professional, and scholarly excellent through experiences of lasting value to all stakeholders.

### Goals

**G 1: Common Body of Knowledge**
All students will possess a common body of knowledge in music.

**G 2: Essential Competencies, Experiences and Opportunities**
All students will possess a set of essential competencies and will receive essential experiences and opportunities.

### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: Performance (G: 1) (M: 3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students exhibit musical performance ability that demonstrates (1) their technical skills on a major instrument or voice, an understanding of repertory, (2) the ability to sight read with fluency, (3) keyboard competency and (4) growth in artistry through regular ensemble experiences.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 2: Musicianship Skills and Analysis</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will acquire (1) an understanding of the common elements and organizational patterns of music, (2) sufficient understanding of and capability with musical forms, processes, and structures to use this knowledge, and (3) the ability to place music in historical, cultural, and stylistic contexts.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 3: Composition (G: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students must acquire a rudimentary capacity to create original or derivative music.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 4: History and Repertory (G: 1) (M: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students must acquire basic knowledge of music history and repertoires through the present time.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 5: Conducting (G: 2) (M: 1)</th>

<tbody>
<tr>
<td>Students must be a competent conductor.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 6: Improvisation (G: 2) (M: 4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students must acquire the skills to improvise at a rudimentary level.</td>
</tr>
</tbody>
</table>

### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: Conducting Proficiency (O: 5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student possesses conducting knowledge and proficiency as evidenced by results of the final conducting examination in Basic Conducting Class (MUS 2490).</td>
</tr>
<tr>
<td>Source of Evidence: Academic direct measure of learning - other</td>
</tr>
</tbody>
</table>

**Target for O5: Conducting**

We would expect that 80% of students to receive a rubric assessment of Outstanding on their last conducting assessment of the semester. Please refer to attached rubric.

**Findings 2011-2012 - Target: Not Met**

16 students were enrolled in the course for Summer 2012. Of the 16, 9 received a rubric score of Outstanding on this assessment. This represents 56% of the class.

<table>
<thead>
<tr>
<th>M 2: Repertoire Analysis (O: 4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Programs are reviewed for diversity of genres, eras, composers, and styles.</td>
</tr>
<tr>
<td>Source of Evidence: Performance (recital, exhibit, science project)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>M 3: Piano Proficiency (O: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students demonstrate piano proficiency through the rigorous piano proficiency examination given at the end of the piano sequence</td>
</tr>
<tr>
<td>Source of Evidence: Performance (recital, exhibit, science project)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>M 4: Basic Improvisation Performance (O: 6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic Improvisation is a required course for all Bachelor of Music students. The course is taught by a single professor and is offered in every semester (spring, summer, fall). Each student is required to give a final improvisatory performance at the conclusion of the semester. This performance is being used as the measure with the goal being 95% of the students receiving a score of 73 or better.</td>
</tr>
<tr>
<td>Source of Evidence: Performance (recital, exhibit, science project)</td>
</tr>
</tbody>
</table>

**Target for O6: Improvisation**

Each student in the Basic Improvisation course is required to do an individual improvisation project that is typically due three to four weeks after the midpoint of the semester. The instructor has developed a rubric for scoring this project. Our target is that 100% of the students will receive a 1 or 2.

**Findings 2011-2012 - Target: Met**

For the Spring 2012 semester 17 students were enrolled. Of those 14 received a 1, 1 received a 2 and 2 received a 4. We did not meet our target of 100% of students receiving a 1.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
Critical Thinking Assessment

Periodic meetings will be held of the humanities (core) music faculty during the fall semester of 2010 in order to finalize the critical thinking course content and assessment methodology. Implementation of any curricular or instructional changes will take place during the spring semester of 2011.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: Medium
- Projected Completion Date: 12/2010
- Responsible Person/Group: Marva Carter

Improve learning outcomes and rubrics

Increase faculty use of measurable student learning outcomes and rubrics in courses and for non-course requirements, e.g., juries, recitals, exit projects, etc. An excellent rubric has already been developed by the Voice Area. It is our hope that this will serve as the jumping off point for other areas as well.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High
- Projected Completion Date: 07/2011
- Responsible Person/Group: Faculty, Ad Hoc Assessment committee

Learning Outcomes and Rubrics

Learning outcomes and rubrics for assessment must exist across all areas and programs and offer richer data for ongoing tracking of student progress.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High
- Implementation Description: This would set the target date after our NASM (National Association of Schools of Music) Accreditation Review and campus visit
- Projected Completion Date: 07/2011
- Responsible Person/Group: Entire Faculty

Repertoire Meetings

In order to meet this measure for all students we are planning to have ensemble conductor, area coordinator, and applied teacher meetings to discuss repertoire choices at the beginning of each semester. During these meetings, repertoire choices will be discussed and modified in order to make sure that each student is being exposed to a diverse cross section of works. In addition, it is hoped that programming “themes” will emerge that can be utilized to help students synthesize knowledge from their various courses.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Projected Completion Date: 06/2012
- Responsible Person/Group: Ensemble conductors, area coordinators, applied instructors
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

Realignment of Goals

This year we modified our Outcomes to line up with those set by the National Association of Schools of Music, our accrediting agency. We therefore added new Outcomes for which we have not yet determined measures. We will create new measures and use them for the next cycle.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Projected Completion Date: 07/2013
- Responsible Person/Group: Robert Ambrose
- Additional Resources: None

Georgia State University

Assessment Data by Section

2011-2012 Music Masters

As of: 12/13/2016 04:41 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Georgia State University School of Music is to preserve, promote, and advance humanity’s rich and expanding tradition of artistic music-making through performance, composition, education, and research in accordance with the urban and global initiatives of the University.

Goals

G 2: Research Goal

Students will be inquisitive musicians who use primary and secondary sources to inform their music making and scholarship.

G 1: Performance Goal
Students will be emerging artists who perform with technical and expressive facility.

### Student Learning Outcomes/Objectives

**SLO 1: Repertoire, technique, artistry, style (M: 1)**

Demonstrates advanced levels of repertoire knowledge, technique, artistry, and style appropriate to a diverse representation of composers, historical eras, performance practices, and interpretive guidelines

Relevant Associations: National Association of Schools of Music National Council for Accreditation of Teacher Education GA Professional Standards Commission

**SLO 2: Research and literature/repertoire knowledge (M: 2)**

Demonstrates research skills in music and advanced understanding of the literature and repertoire appropriate for his or her concentration

Relevant Associations: National Association of Schools of Music National Council for the Accreditation of Teacher Education GA Professional Standards Commission

### Measures, Targets, and Findings

#### M 1: Recital Jury (O: 1)

Students present their recital program before a jury for approval to perform. Students are judged on technical and expressive facility. Data are from jury reports from students registered for MUS 8950 in Spring Semester.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Repertoire, technique, artistry, style**

85% of students achieve satisfactory proficiency to be approved for their final recital on the first attempt.

**Findings 2011-2012 - Target: Met**

12 of 14 (86%) of students were approved for their final recital on the first attempt.

#### M 2: Bibliography Project (O: 2)

Students must present an exhaustive bibliography on a topic relevant to their concentration as part of MUS 8000 (Introduction to Graduate Studies). There are two such projects during the semester: the first is instructor guided, the second is independent. Data comes from assessments of the second project by students enrolled in MUS 8000 (Fall Semester).

Source of Evidence: Project, either individual or group

**Target for O2: Research and literature/repertoire knowledge**

85% of students receive a 3 or 4 on the project. Scale: 1. Not adequate. 2. Adequate, but below expectations. 3. Meets expectations. 4. Exceeds expectations.

**Findings 2011-2012 - Target: Met**

40 of 43 students (96%) obtained a 3 or 4 on the project.

### Details of Action Plans for This Cycle (byEstablished cycle, then alpha)

**Review Research Objectives and Measures**

Review the Research Objective and Measures for appropriateness.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 04/2013
- **Responsible Person/Group:** Director of Graduate Studies/Area Coordinators of Music History and Music Theory

**Revise Rubrics**

Revise current rubrics for recital jury.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 11/2012
- **Responsible Person/Group:** Director of Graduate Studies/Area Coordinators

**Analysis Questions and Analysis Answers**

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Not Relevant to Masters Program.

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been
able to discern in a given class and/or over time from the entry level to the exit class?

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment rubric has been modified to allow us to account not just for students who pass or fail the project or event being measured, but to subdivide the category of "pass" into those whose performance was 1) acceptable, but below expectations; 2) appropriate (met expectations); or 3) exceptional (exceeding expectations). We will provide data on the percentage of students who met or exceeded expectations. We have revised the outcomes and targets accordingly. We plan to reconsider the project of the Research Outcome, possibly replacing it with a project that better shows how students are prepared to conduct and evaluate research.

ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We plan to track the new outcomes for another year before making specific recommendations about the educational program.

Georgia State University
Assessment Data by Section
2011-2012 Neuroscience PhD
As of: 12/13/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the neuroscience doctoral program in the Neuroscience Institute at Georgia State University is to promote research and education in the set of disciplines that have a common interest in understanding the structure and function of the nervous systems of animals, including humans. The objective of the degree program is to provide comprehensive training in the neurosciences and professional development. This training is meant to prepare students for a variety of career paths involving research, teaching, and/or science advocacy.

Goals

G 1: Neuroscience Theory and Content
Develop expertise with major concepts, theoretical perspectives, and empirical findings in neuroscience and in their research specialty area.

G 2: Critical Thinking Skills
Use critical and creative thinking, skeptical inquiry, and the scientific approach.

G 3: Communication and Collaboration
Be able to communicate scientific information and work effectively with peers.

Student Learning Outcomes/Objectives

SLO 1: Neuroscience Theory and Content (G: 1) (M: 1, 2, 3, 4)
Apply knowledge from other scientific disciplines to the understanding of fundamental neuroscience principles. Use concepts in neuroscience to describe, explain, and evaluate phenomena and to generate new ideas.

SLO 2: Critical Thinking Skills (G: 2) (M: 1, 2, 3, 4)
Ask scientific questions and construct reasonable hypotheses. Establish a research focus that identifies and builds on primary interests in neuroscience. Practice scientific method and understand its limitations. Perform laboratory skills consistent with the requirements of their field. Use statistical reasoning routinely for evaluating research and develop appropriate applications of statistics and other analytical methods. Seek the most precise and parsimonious explanation. Use skepticism consistently as an evaluative tool. Formulate and test alternative explanations and models on the basis of evidence. Evaluate relevant content from a broader range of available resources; show refined and flexible use of published research. Create compelling arguments with attention to subtle meaning of content; anticipate and defend against criticism, adapt arguments for wide range of audiences.

SLO 3: Communication and Collaboration (G: 3) (M: 1, 2, 3, 4)
Communicate effectively in oral and written forms. Read and demonstrate an understanding of scientific literature. Critique and
analyze claims of others in a scientific context. Demonstrate an understanding of scientific terminology. Work effectively in group situations.

### Measures, Targets, and Findings

#### M 1: Qualifying Exam (O: 1, 2, 3)

Students write a research grant application and defend it orally to their committee members. Students are evaluated by their examination committee members using a form designed for that purpose (Milestone Evaluation Form- see Document Repository).

Source of Evidence: Comprehensive/end-of-program subject matter exam

<table>
<thead>
<tr>
<th>Target for O1: Neuroscience Theory and Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greater than 95% of students pass their Qualifying Exam the first time they take it.</td>
</tr>
</tbody>
</table>

#### Findings 2011-2012 - Target: Met

Four students took the Qualifying Exam during this period and all four passed on their first attempt. Therefore, 100% of students passed the Qualifying Exam.

<table>

</tbody>
</table>

#### Findings 2011-2012 - Target: Met

Four students defended a dissertation for the first time and all four were approved. Therefore, 100% of students passed their
dissertation defenses the first time.

**Target for O2: Critical Thinking Skills**
Greater than 95% of students pass their dissertation defense the first time they defend.

**Findings 2011-2012 - Target: Met**
Four students defended a dissertation for the first time and all four were approved. Therefore, 100% of students passed their dissertation defenses the first time.

**Target for O3: Communication and Collaboration**
Greater than 95% of students pass their dissertation defense the first time they defend.

**Findings 2011-2012 - Target: Met**
Four students defended a dissertation for the first time and all four were approved. Therefore, 100% of students passed their dissertation defenses the first time.

**M 4: Annual Review (O: 1, 2, 3)**
Each student's performance and progress is evaluated annually. At the end of each spring semester, students submit an annual report describing their research, academic activities, and accomplishments using a specific form designed for that purpose (Annual Report Form- see Document Repository). At the same time, the Director of Graduate Studies solicits feedback from graduate faculty regarding student performance in class, research activities, and/or as a teaching assistant. Based on the annual report and feedback from faculty, the advisor writes a letter to the student summarizing the student's accomplishments, feedback from other faculty, and provides feedback and advice for the future year. The annual report and the advisor's letter are reviewed in June by the graduate faculty at a meeting called for that purpose.

Source of Evidence: Academic indirect indicator of learning - other

**Target for O1: Neuroscience Theory and Content**
The annual review indicates that there are serious concerns with less than 5% of the students.

**Findings 2011-2012 - Target: Met**
There were serious concerns with one out of 35 students. Therefore, there were concerns with only 2.8% of the students.

**Target for O2: Critical Thinking Skills**
The annual review indicates that there are serious concerns with less than 5% of the students.

**Findings 2011-2012 - Target: Met**
There were serious concerns with one out of 35 students. Therefore, there were concerns with only 2.8% of the students.

**Target for O3: Communication and Collaboration**
The annual review indicates that there are serious concerns with less than 5% of the students.

**Findings 2011-2012 - Target: Met**
There were serious concerns with one out of 35 students. Therefore, there were concerns with only 2.8% of the students.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**No actions planned due to infancy of the graduate program**
This program was approved by the Board of Regents in November, 2009 and the first cohort of students was admitted in January, 2010. As this program is still new, no actions are planned at this time.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High

**New program with action plan in development**
This program is still new and the first cohort of students were admitted in January 2010 with two additional cohorts admitted in August 2010 and 2011. Due to the infancy of this program we are still developing our action plan. In addition to reviewing student performance on their Qualifying exams, and dissertation defense we are working on the following action items: 1. Continued enhanced Responsible Conduct in Research (RCR) training. RCR training is required by the National Institutes of Health and may soon be required by the National Science Foundation as part of graduate student training. This training is designed to expose students to best ethical practices for conducting research. We are teaching our first "official" graduate RCR course (Intro to Graduate Studies) and data collected from this course will verify that we are in compliance with RCR guidelines and can used if we decide to apply for graduate training grants in the future. 2. We have had two cohorts of students take the new Neuroscience PhD qualifying exam. After reviewing the Milestone Evaluation forms we have determined that we will better be able to assess student performance if we separate out the oral exam scores from the written exam scores. We will revise this document in Fall 2011. 3. Using the revised Milestone Evaluation form we will be able to delve deeper into specific indicators of student performance instead of just focusing on overall global scores. Using a more in-depth analysis of data from the Milestone Evaluation forms we will be able to better determine if our students are adequately prepared for the exam as well as determine if assessments used in our Core courses are sufficient in training our students in the scientific process. 4. We propose to implement Professional Development courses and workshops for our students to better prepare them for conference presentations, job interviews, enhancing teaching performance etc. 5. As part of the interdisciplinary nature of our PhD program we worked with the Philosophy Dept. to develop a "Concentration in Neuroethics" that our students can voluntarily participate as a way of enhancing their graduate training.
### Mission / Purpose

The mission of the Byrdine F. Lewis School of Nursing is to create a premier multicultural learning environment that produces leaders, clinicians, scholars and researchers who exemplify nursing excellence and enhance healthcare delivery to Georgia and beyond.

### Goals

**G 1: Critical Thinking**
Apply concepts and theories as a basis for problem solving, decision-making, and critical thinking in nursing.

**G 2: Research**
Integrate knowledge from nursing research in caring for individuals, families, groups, and the community.

**G 3: Generalist Nursing Knowledge**
Integrate knowledge of self, science, and the humanities when providing nursing care to individuals, families, groups or the community.

### Student Learning Outcomes/Objectives

**SLO 3: Evidence Based Practice (G: 2) (M: 4)**
85% of students enrolled in NURS3610 will achieve a score of 74% or better according to the rubric on an evidence based practice paper. 85% of students enrolled in NURS3710 will achieve a satisfactory score according to the guidelines on an evidence based practice exercise on the first attempt.

### Other Outcomes/Objectives

**O/O 1: CTW (G: 1) (M: 1, 2)**
Graduates who enter the program in Fall 2009 or thereafter will take two critical thinking through writing courses.

**O/O 2: Critical Thinking Exam (G: 1) (M: 3)**
Students in the nursing program will complete a standardized critical thinking exam in their first semester and the last semester of the nursing program. 85% of US students scoring less than national average on the entrance Critical Thinking Assessment will show an improvement on the exit Ctitical Thinking Assessment

**O/O 4: Research Article Critique (G: 2) (M: 5)**
All students will complete a research article critique as part of the course work in NURS 3500 and will obtain a minimum of 74% of the possible points on the rubric.

**O/O 5: Literature Search Activity (G: 2) (M: 6)**
All students enrolled in NURS 3500 Nursing Reserarch will complete a literature search activity paper on a topic related to nursing. Students will obtain at least 74% of the possible points on the rubric.

grounded in the translation of current evidence into one's practice.

### O/O 6: NCLEX First Time Pass Rate (G: 3) (M: 7)

Graduates of the pre-licensure program will successfully complete the NCLEX with a first time pass rate of 85% or better.

**Relevant Associations:** The Essentials of Baccalaureate Education for Professional Nursing Practice, (2008). Washington, DC: American Association of Colleges of Nursing. Essential IX: Baccalaureate Generalist Nursing Practice: The baccalaureate-graduate nurse is prepared to practice with patients, including individuals, families, groups, communities and populations across the lifespan and across the continuum of healthcare environments.

### O/O 7: Exit Survey (G: 3) (M: 8)

Graduating seniors completing the exit survey will indicate that they felt prepared to "integrate knowledge of self, science, and the humanities when providing nursing care of individuals, families, groups, or the community" (program outcome).

**Relevant Associations:** The Essentials of Baccalaureate Education for Professional Nursing Practice, (2008). Washington, DC: American Association of Colleges of Nursing. Essential IX: Baccalaureate Generalist Nursing Practice: The baccalaureate-graduate nurse is prepared to practice with patients, including individuals, families, groups, communities and populations across the lifespan and across the continuum of healthcare environments.

### Measures, Targets, and Findings

#### M 1: CTW NURS 2080 (O: 1)

Students enrolled in NURS 2080 will complete four clinical narratives and by the fourth clinical narrative 85% will be demonstrating an increased performance in their critical thinking as evidence by an increased score in item six (Critical thinking is evident in the clinical narrative and during the decision making process) of the rubric.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: CTW**

All students enrolled and completing NURS2080 will complete the 4 required narratives. 85% of students completing the activity will show an increase in critical thinking as evidenced by an increased score on the 4th narrative.

**Findings 2011-2012 - Target: Not Reported This Cycle**

See CTW report submitted by CTW ambassador.

#### M 2: CTW NURS 4600 (O: 1)

95% of students enrolled and completing NURS 4600 will complete the CTW assignment and obtain a minimum of 74% on the evaluation rubric.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: CTW**

All students enrolled and completing NURS4600 will complete the CTW assignment. By the 3rd submission, 95% will achieve the required score of >74%.

**Findings 2011-2012 - Target: Not Reported This Cycle**

See report filed by CTW ambassador.

#### M 3: Standardized critical thinking exam (O: 2)

Students in the nursing program will complete a standardized critical thinking exam in their first semester and the last semester of the nursing program. 85% of UG students scoring less than national average on the entrance Critical Thinking Assessment will show an improvement on the exit Critical Thinking Assessment

**Source of Evidence:** Standardized test of subject matter knowledge

**Target for O2: Critical Thinking Exam**

85% of the graduating seniors will receive a score at or above the national average on a standardized critical thinking exam on their first attempt.

**Findings 2011-2012 - Target: Not Met**

For the summer 2011, 26 students took the critical thinking exam. 12 students exceeded the national average (46.15%). For fall 2011, 44 students took the critical thinking exam. 38 students exceeded the national average (86%). For spring 2012, 67 students took the critical thinking exam. 42 students exceeded the national average (62.7%). for the cycle, 137 students took the critical thinking exam. 92 exceeded the national average (67.15%)

#### M 4: Evidence based practice project (O: 3)

85% of students enrolled in NURS3610 will achieve a score of 74% or better according to the rubrick on an evidence based practice paper. 85% of students enrolled in NURS3710 will achieve a satisfactory score according to the guidelines on an evidence based practice exercise on the first attempt.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O3: Evidence Based Practice**

90% of students enrolled in NURS3610 or NURS3710 will achieve a score of 74% or better on an evidence based practice paper.

**Findings 2011-2012 - Target: Not Met**

For summer 2011, 29/33 (87%) students achieved a score of 74% or better on the evidence based paper rubrick. For fall
For summer 2011, 29/33 (87%) students achieved a score of 74% or better on the evidence based paper rubric. For fall 2011, 30/35 (85.7%) students achieved a score of 74% or better on the evidence based paper rubric. For spring 2012, 38/41 (92.7%) students achieved a score of 74% or better on the evidence based paper rubric. For the cycle, 97/109 (88.9%) achieved a score of 74% or better on the evidence based paper rubric.

M 5: Research Article Critique (O: 4)
All students completing NURS3500 will complete a research article critique as part of the course work in NURS 3500 and at least 90% will obtain a minimum of 74% of the possible points on the rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O4: Research Article Critique
90% of students completing NURS3500 will achieve a score of 74% or better on a research article critique.

Findings 2011-2012 - Target: Met
For summer 2011, 11/13 (85%) students achieved a score of 74% or better on the research critique. For fall 2011, 53/53 (100%) students achieved a score of 74% or better on the research critique. For spring, 68/70 (97%) students achieved at least a score of 74% on the research critique. For the cycle, 132/136 (97.1%) students achieved a score of 74% or better on the research critique.

M 6: Literature Search Activity Paper (O: 5)
All students enrolled in NURS 3500 will complete a literature search activity paper on a topic related to nursing. 90% of students will obtain at least 74% of the possible points the literature search activity as measured by the rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O5: Literature Search Activity
90% of students achieve at least the minimum score of 74% on the literature search activity paper.

Findings 2011-2012 - Target: Met
For summer 2011, 13/13 (100%) students achieved at least a score of 74% on the literature search activity. For fall 2011, 53/53 (100%) students achieved at least a score of 74% on the literature search activity. For spring 2012, 68/70 (97%) students achieved at least a score of 74% on the literature search activity. For the cycle, 134/136 (98.5%) students achieved at least a score of 74% on the literature search activity.

M 7: NCLEX First Time Pass Rate (O: 6)
85% of the graduates of the undergraduate nursing program who take the NCLEX will pass on the first attempt.

Source of Evidence: Certification or licensure exam, national or state

Target for O6: NCLEX First Time Pass Rate
85% of graduating nursing students will pass the NCLEX on the first attempt.

Findings 2011-2012 - Target: Met
For summer 2011, 24/26 (92.3%) of graduates passed the NCLEX exam on the first attempt. For fall 2011, 44/45 (97.8%) of graduates passed the NCLEX exam on the first attempt. For spring 2012, 62/65 (95.3%) of graduates passed the NCLEX exam on the first attempt. For the cycle, 130/136 (95.6%) of graduates passed the NCLEX exam on their first attempt.

M 8: Exit Survey (O: 7)
85% of the graduating seniors who complete the exit survey will indicate that they felt satisfactorily to excellently prepared to "integrate knowledge of self, science, and the humanities when providing nursing care of individuals, families, groups, or the community" (program outcome).

Source of Evidence: Exit interviews with grads/program completers

Target for O7: Exit Survey
85% of the graduating seniors who complete the exit survey will indicate that they felt satisfactorily to excellently prepared to "integrate knowledge of self, science, and the humanities when providing nursing care of individuals, families, groups, or the community" (program outcome).

Findings 2011-2012 - Target: Met
For summer 2011, 100% of the graduating seniors felt they were satisfactorily prepared or better, 80.1% of the graduating seniors indicated they felt good or better and 38% indicated they were excellently prepared. For fall 2011, 95% of the graduating seniors indicated they felt satisfactorily prepared, 83.7% indicated they felt good or better, and 25% indicated they were excellently prepared. For spring 2012, 97.7% indicated they were satisfactorily prepared, 77% indicated they felt good or better, and 9% indicated they were excellently prepared. For the cycle, 97.3% indicated they were satisfactorily to excellently prepared to integrate knowledge of self, science, and the humanities when providing nursing care of individuals, families, groups, or the community.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Alumni Survey
The real dilemma is alumni tracking. (as evidenced by a <5% response rate). 80% of respondents indicated a positive response to "integrating knowledge of self, science, and the humanities when providing nursing care to individuals, families, groups, or the community." Again, this question will be reviewed for clarity. If multiple variables are contained in the same question, revision will occur. The Assistant Director for External Affairs will continue to develop a reliable data base for BFLSON graduates. Once a reliable data base is obtained and the question is reviewed for clarity, a repeat survey can be addressed. The graduates will be encouraged
to become and stay engaged with the BFLSON. This will be accomplished by the continued publication of the bi-annual newsletter, and a potential social activity. New graduates will be encouraged to become and stay active with the BFLSON alumni group. For this to happen, an up-to-date reliable data base must be developed.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** This is the end of the academic year. This will give the Assistant Director for External Affairs time to develop a reliable data base.  
**Projected Completion Date:** 06/2010  
**Responsible Person/Group:** The Assistant Director for External Affairs  
**Additional Resources:** A graduate assistant is requested to assist with the development and upkeep of the data base. We request a graduate assistant for the fall, spring, and summer semesters.  
**Budget Amount Requested:** $5,000.00 (recurring)

---

**Critical Thinking Exam**

The Program Evaluation and Effectiveness Committee of the BFLSON will evaluate the characteristics of the class of Fall 2008 to determine if they were significantly different from the class of Summer 2008 and Spring 2009 in aspects of GPA, number of course failures during the program, and success on the exit exam. The committee will determine if students need to continue to take a separate critical thinking exam, as the exit exam is an assessment of critical thinking. Perhaps the students are not motivated to achieve maximum success on a separate critical thinking exam.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** This is the end of the next academic year.  
**Projected Completion Date:** 06/2010  
**Responsible Person/Group:** The Program Evaluation and Effectiveness Committee of the BFLSON  
**Additional Resources:** None at this time

---

**CTW NURS 2080**

NURS 2080 will develop clearer objectives related to this writing project. Consistent graders for each student's paper will be initiated Fall 2009. All graders will meet in the beginning of the semester to discuss issues noted the previous semester. One instructor will review all papers for a consistent numeric grade.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** By the end of Fall 2009 semester, these changes will be in place.  
**Projected Completion Date:** 11/2009  
**Responsible Person/Group:** Faculty assigned to NURS 2080  
**Additional Resources:** None at this time

---

**CTW NURS 4600**

We will continue to monitor the CTW assignment in NURS 4600 for continued achievement of target goal.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** Continue to monitor for this academic year.  
**Projected Completion Date:** 06/2010  
**Responsible Person/Group:** Nursing faculty assigned to teach NURS 4600  
**Additional Resources:** None at this time

---

**Evidence Based Practice**

The Program Evaluation and Effectiveness Committee of the BFLSON with guidance from the Undergraduate Program Committee (UPC) will continue to monitor this measure. Course instructors in NURS 3610 and NURS 3710 will be instructed to continue to require this writing assignment. Bases on the reasons the course instructor gave for student's failure the following areas will be studied: 1. Students do not follow directions for the assignment 2. Students do not use an approved evidence based source for the assignment. 3. Students plagiarize; fail to cite correctly. 4. Students do not comply with the APA format 5. English is not the student's primary language, and therefore they have difficulty writing.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** The Program Evaluation and Effectiveness Committee along with input from the UPC  
**Projected Completion Date:** 10/2010  
**Responsible Person/Group:** The Program Evaluation and Effectiveness Committee of the BFLSON The UPC  
**Additional Resources:** None at this time

---

**Exit Survey**

This question on the exit survey will be worded when the survey is revised the next time. It is the opinion of The Program Evaluation...
and Effectiveness Committee of the BFLSON that the graduates may not understand the intent of this question on the current survey. The committee will evaluate if the question(s) need clarification, or if there are too many variables, and the graduates may not understand what is being asked. Additionally by grouping the variables, if a student feels lacking on one variable, but not the others, they may answer negatively because of the one area lacking, and the other areas may not be lacking. The Program Evaluation and Effectiveness Committee of the BFLSON will assess the questionnaire.

Clinical narrative papers generated from NURS2080
It is commendable that the target was exceeded for Spring 2011. However the target was not met for the Fall 2010 class. This year's overall score was significantly improved from the last cycle. For this reason the UG program coordinator has met with the faculty involved in this course and reviewed practices. Continued surveillance will result and

Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Standardized critical thinking exam | Outcome/Objective: Critical Thinking Exam

Implementation Description: A grade associated with NURS4610 will encourage students to seriously consider this exam.
Projected Completion Date: 08/2010

Evidence Based Paper Success
The faculty member responsible for this target identified the following reasons why students are not successful achieving the minimum score on this assignment. 1. Students do not follow directions for the assignment. 2. Students do not use an approved evidence based source for the assignment. 3. Students plagiarize; fail to cite correctly. 4. Students do not comply with the APA format. 5. English is not the student’s primary language, and therefore they have difficulty writing. The faculty member will consult with the Program Evaluation and Effectiveness Committee and the Undergraduate Program Committee to identify a mechanism to achieve this target.

Budget Amount Requested: $0.00 (no request)

Add weight to the Exit test
The course administrator has added consequences to this test. The students did improve on this measure, yet the goal of 85% has not been reached. The students will continue to have consequences related to this standardized test. The course administrator will continue to make sure the students are aware of the consequences and make sure the consequences are significant enough to warrant attention to this exit activity.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Standardized critical thinking exam | Outcome/Objective: Critical Thinking Exam

Implementation Description: Added weight and attention to the exit activity will be implemented by the course administrator.
Projected Completion Date: 10/2011
Responsible Person/Group: Course administrator along with consultation from the UG program coordinator.
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Continued observation of 2080 writing assignment
It is commendable that the target was exceeded for Spring 2011. However the target was not met for the Fall 2010 class. This years overall score was significantly improved from the last cycle. For this reason the UG program coordinator has met with the faculty involved in this course and reviewed practices. Continued surveillance will result and we anticipate continued improvement in this area.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: CTW NURS 2080 | Outcome/Objective: CTW

Implementation Description: The course administrator, a relatively new faculty member, has met with the UG program coordinator and discussed ways to improve the student's attention to this activity. Continued monitoring will take place with results submitted and evaluated every semester.
Responsible Person/Group: Course administrator and UG program coordinator.
Additional Resources: none

Evidence Based project
The focus of this project has changed slightly to reflect a more direct approach to this end. The expectation now include a review and not a formal paper. The end result of using evidence continues, but the assignment will change beginning summer 2010. This more closely reflects how a nurse would use the evidence in a real world situation.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
*Measure:* Evidence based practice project  
*Outcome/Objective:* Evidence Based Practice

**Implementation Description:** Changing the assignment to reflect a more real world approach

**Projected Completion Date:** 08/2011  
**Responsible Person/Group:** Course administrators for NURS3610 and NURS3710 along with the UG program coordinator  
**Additional Resources:** none

### Summer graduates and plan to increase pass rate

While the overall pass rate far exceeded the goal and exceeded the state and national pass rate, we noticed some interesting information. 3 of the 6 failures for the period of inquiry were graduates from the summer class. This class constituted 19 of the total 123 students. For this reason, we looked at the difference in this group of students or perhaps the way they are taught and evaluated in the summer. The course administrator along with the UG program coordinator and the assistant dean for nursing decided that the summer 7 week session was too short to deliver all the required material. Additionally, the course had no attendance policy, and the students did not attend class with regularity. For Summer 2012, the course will be delivered during a 10 week session as many of the clinical nursing courses are, and the attendance policy will be written in the syllabus and enforced.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
*Measure:* NCLEX First Time Pass Rate  
*Outcome/Objective:* NCLEX First Time Pass Rate

**Implementation Description:** Summer 2012  
**Responsible Person/Group:** NURS4610 course administrator  
**Additional Resources:** none

### Action plan to include revised measurement

Will change measurement to more accurately reflect progress of students. New measure will be: 85% of UG students scoring less than national average on the entrance Critical Thinking Assessment will show an improvement on the exit Critical Thinking Assessment

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
*Measure:* Standardized critical thinking exam  
*Outcome/Objective:* Critical Thinking Exam

**Projected Completion Date:** 11/2012  
**Responsible Person/Group:** UG Faculty  
**Additional Resources:** none

### Revised target

The target will be revised to more accurately reflect the students accomplishments in the area of Evidence Based Practice. the new target will read: 85% of students enrolled in NURS3610 will achieve a score of 74% or better according to the rubrick on an evidence based practice paper. 85% of students enrolled in NURS3710 will achieve a satisfactory score according to the guidelines on an evidence based practice exercise on the first attempt.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
*Measure:* Evidence based practice project  
*Outcome/Objective:* Evidence Based Practice

**Responsible Person/Group:** CA of NURS3610, CA of NURS3710  
**Additional Resources:** none

professional meetings (50%) by 5-years post-graduation.

**SLO 11: Professional Membership (G: 1, 5, 6) (M: 11)**
Alumni survey results (1-, 3-, and 5-year graduates) will report membership in professional nursing organizations (80%).

**SLO 12: Influences of Socio-political Forces on Healthcare (G: 4, 5, 6) (M: 8, 12)**
At the end-of-program, 80% of the students will indicate that they met/exceeded the program objective of analyzing the influence of socio-political forces on health, healthcare delivery, and healthcare providers.

**Measures, Targets, and Findings**

**M 1: Analyze Various Approaches to Nursing Practice (O: 1, 2, 5)**
At end-of-program, 80.4% (51/41) of students will indicated that they met/exceeded the objective of analyzing various approaches to nursing practice.

**Source of Evidence:** Student course evaluations on learning gains made

**Target for O5: Analysis of Various Approached to APN Practice**
In the end of program evaluation, 80% of the students will indicate that they met or exceeded the objective of analyzing a variety of approaches used in the practice of nursing.

**Findings 2011-2012 - Target: Met**
In the end of program evaluation, 80% (n=41/51) indicated that they met or exceeded the objective of analyzing a variety of approaches used in the practice of nursing.

**M 2: Legal and Professional Issues in Practice (O: 2, 4, 5, 9)**
100% of the students enrolled in clinical courses demonstrated evidence of ethical practice as evidenced by the successful completion of the clinical practice portion of the courses.

**Source of Evidence:** Performance (recital, exhibit, science project)

**Target for O2: Legal and Professional Issues in Advanced Practice Nursing**
100% of the students enrolled in the clinical courses demonstrated evidence of ethical and legal practice in the clinical setting as determined by successful completion of the clinical courses.

**Findings 2011-2012 - Target: Met**
100% of the students enrolled in the clinical courses demonstrated evidence of ethical and legal practice in the clinical setting as determined by successful completion of the clinical courses.

**Target for O9: Demonstration of Caring Nursing Practice**
The end of program evaluation will indicate that 85% of the students will report that they met/exceeded the objective of demonstrating caring in nursing practice.

**Findings 2011-2012 - Target: Not Met**
In the end of program survey, 82% (n = 42/51) indicated that they met/exceeded the objective of demonstrating caring in nursing practice.

**M 3: Theory as a Basis of Nursing Practice (O: 3)**
At the end of the program, 70.5% (36/51) of the students met/exceeded the program objective that they evaluated concepts and theories in nursing as a basis for advanced nursing practice. Benchmark not meet; action plan to be established.

**Source of Evidence:** Student course evaluations on learning gains made

**Target for O3: Theory as a Basis for Nursing Practice**
85% of the graduating students will report that they met/exceeded the objective of evaluating concepts and theories related to advanced practice nursing.

**Findings 2011-2012 - Target: Not Met**
71% (n = 36/51) of the students completing the end of program survey indicated that they met/exceeded the expectations of evaluating concepts and theories related to advanced nursing practice.

**M 4: Demonstration of Caring in Nursing Practice (O: 4, 5, 9, 9)**
At end-of-program, 82.4% (42/51) of the students indicated that they demonstrated caring in nursing practice.

**Source of Evidence:** Student course evaluations on learning gains made

**M 6: Collaboration in Provision of Care (O: 6, 9, 9)**
At end-of-program, 77% (39/51) of the students indicated that they met/exceeded the program objective of collaborating with the client, family, community, and others for the purpose of improving health. Benchmark not met consistently for the current and past cycles; action plan under development

**Source of Evidence:** Student course evaluations on learning gains made

**M 7: Participation in Research (O: 7, 10)**
At the end-of-program, 75% (38/51) indicated that they were well/very well prepared to implement evidence-based practice; 68% (34/50) indicated that they agreed/strongly agreed that they were prepared to engage in research to support and improve nursing practice. Benchmark not meet for past cycles; action plan to be developed.

Source of Evidence: Alumni survey or tracking of alumni achievements

**M 8: Integration of Knowledge (Self, Sciences, Etc.) (O: 8, 12)**

At end-of-program, 80% (41/51) of the students indicated that they met/exceeded the program objective for integrating knowledge of self, science, and the humanities in their advanced nursing practice experiences.

Source of Evidence: Student course evaluations on learning gains made

**M 9: Practice in Specialty Area (O: 1, 9, 9)**

We have previously reported alumni data. Next cycle pending. Interpretation and recommendations will follow.

Source of Evidence: Alumni survey or tracking of alumni achievements

**M 10: Scholarly Productivity (O: 1, 10)**

We have previously reported alumni data. Next cycle pending. Interpretation and recommendations will follow.

Source of Evidence: Alumni survey or tracking of alumni achievements

**M 11: Professional Membership (O: 1, 11)**

We have previously reported alumni data. Next cycle pending. Interpretation and recommendations will follow.

Source of Evidence: Alumni survey or tracking of alumni achievements

**M 12: Influences of Socio-political Forces on Healthcare (O: 2, 8, 12)**

At the end-of-program, 69% (35/51) of the students indicated that they met/exceeded the program objective of analyzing the influence of socio-political forces on health, healthcare delivery, and healthcare providers. Benchmarks not meet; action plan under development.

Mission / Purpose

The mission of the Byrdine F. Lewis School of Nursing is to create a premier multicultural learning community that produces leaders, clinicians, scholars and researchers who exemplify nursing excellence and enhance healthcare delivery in Georgia and beyond. The Byrdine F. Lewis School of Nursing will be nationally recognized for innovative, responsive, educational nursing programs focused upon diversity, urban healthcare, and vulnerable populations. The School will be noted for expert practitioners, community partnerships, and leading-edge research.

Goals

G 1: Research Implementation
Plan and implement nursing research that is socially relevant in the 21st century.

G 2: Theory Utilization
Link theory and research to the promotion of health in vulnerable populations.

G 3: Health Promotion in Vulnerable Populations
Analyze health promotion issues in vulnerable populations.

G 4: Application of Diverse Modes of Inquiry
Explore, develop, and apply diverse modes of inquiry to the discipline of nursing.

G 5: Scholarly Activities
Complete scholarly activities such as grant submission, presentations at regional and national meetings, submission of an article for publication in a refereed journal, etc.

G 6: Completion of PhD Program
Students will successfully complete requirements for graduation with a PhD in nursing.

Student Learning Outcomes/Objectives

SLO 1: Research Implementation (G: 1, 6) (M: 1, 3, 5, 7, 9)
100% of the graduating students will plan and implement research that is socially relevant in the 21st century.

SLO 2: Theory Utilization (G: 2) (M: 2, 3, 4)
90% of the doctoral students will successfully complete the NURS 8040 Theory Construction course.

SLO 3: Health Promotion in Vulnerable Populations (G: 3) (M: 1)
90% of the doctoral students will successfully link theory and research to health issues in vulnerable populations as demonstrated by successful completion of the NURS 8100 Vulnerable Populations course.

SLO 4: Application of Diverse Modes of Inquiry (G: 1, 4) (M: 1, 3, 5)
90% of the doctoral students will successfully complete the NURS 8035 Qualitative Research Course in which they apply skills of collecting qualitative data.

SLO 5: Application of Quantitative Research Methods (G: 4) (M: 3, 5)
90% of the students will successfully complete NURS 8050 Quantitative Research Methods I and NURS 8051 Quantitative Research Methods II in which they develop a quantitative research study proposal.

SLO 6: Submission of Manuscripts for Publication (G: 5) (M: 6)
30% of the students who have completed the core courses will submit manuscripts, either independently or co-authored by faculty, for publication.

SLO 7: Submission of Research Proposal for Funding (G: 1, 5) (M: 7)
30% of the students who have completed their comprehensive examinations will submit proposals for funding to support their doctoral dissertation research.

SLO 8: Presentations at Professional Meetings (G: 5) (M: 8)
50% of the students who have completed the core courses will submit abstracts, either independently or co-authored with faculty, for scholarly presentations at professional nursing meetings.

SLO 9: Completion of the PhD Program (G: 6) (M: 3, 9)
80% of the doctoral students admitted to the nursing doctoral program will successfully complete the requirements for graduation.

Measures, Targets, and Findings
M 1: Health Promotion in Vulnerable Populations (O: 3)
In Spring 2009, 12 (100%) of the doctoral students enrolled in NURS 8100 Vulnerable Populations successfully linked theory and research to health issues in vulnerable populations as demonstrated by successful completion of the written assignments of the course.
Source of Evidence: Written assignment(s), usually scored by a rubric

M 1: Qualitative Research Implementation (O: 1, 4)
85.7% (n=6) of the doctoral students successfully implemented a pilot qualitative research study and analysis during NURS 8012 Qualitative Research Methods.
Source of Evidence: Student course evaluations on learning gains made

M 2: Theory Utilization (O: 2)
In Spring 2009 seven (100%) of the doctoral students enrolled in NURS 8035 Theoretical and Philosophical Foundations successfully explored theories related to research in their area of interest..
Source of Evidence: Written assignment(s), usually scored by a rubric

M 3: Socially Relevant Research Implementation (O: 1, 2, 4, 5, 9)
Three doctoral students successfully implemented socially relevant research projects and graduated in 2008-2009.
Source of Evidence: Written assignment(s), usually scored by a rubric

M 4: Theory Utilization 2 (O: 2)
100% (n=6) successfully completed the NURS 8012 Theory Construction requirements.
Source of Evidence: Written assignment(s), usually scored by a rubric

M 5: Application of Quantitative Research Methods (O: 1, 4, 5)
Nine (100%) doctoral students successfully completed NURS 8050 Quantitative Research Methods I in Fall 2008. Eight (88.9%) of the students successfully completed NURS 8051 Quantitative Research Methods II in Spring 2009.
Source of Evidence: Student course evaluations on learning gains made

M 6: Manuscript Submission (O: 6)
Of the 22 students who have completed their core courses, four (18.1%) have reported submitting manuscripts for publication.
Source of Evidence: Performance in subsequent schooling feedback

M 7: Grant Application Submission (O: 1, 7)
Of the 22 students who have completed their core course, five (22.7%) have reported submitting grant applications for research funding. To date, four have received funding.
Source of Evidence: Honors and awards outside the institution

M 8: Presentations at Professional Meetings (O: 8)
Of the 22 students who have completed core courses, 18 (81.8%) have reported presenting oral or poster abstracts at professional meetings.
Source of Evidence: Presentation, either individual or group

M 9: Completion of PhD Program (O: 1, 9)
In Fall 2009, we had a total of 53 students. In Spring 2009, 30 students were enrolled in core courses, eight were taking comprehensive examinations, and fourteen were completing dissertations. One student withdrew from courses (personal reasons) and two students completed their dissertations.
Source of Evidence: Existing data

Georgia State University
Assessment Data by Section
2011-2012 Nutrition BS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Division of Nutrition at Georgia State University prepares professionals who enhance individual and community health through dietetics practice and who contribute to professional and scholarly knowledge in the fields of nutrition and dietetics. Admission to this Commission on Accreditation for Dietetics Education (CADE)-accredited program is at the junior year. The program graduates approximately 30 students each year.

Goals
G 1: Prepare dietetics professionals
The DPD will prepare graduates to be competent for entry into accredited supervised practice programs.
### Student Learning Outcomes/Objectives

**SLO 1: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice (G: 1, 2) (M: 1)**

Students are able to demonstrate how to locate, interpret, evaluate and use professional literature to make ethical evidence-based practice decisions.

Relevant Associations: Goal 1 and 2

**SLO 2: Professional Practice Expectations: beliefs, values, attitudes and behaviors for the professional dietitian level of practice (G: 1, 2)**

Students are able to demonstrate effective and professional oral and written communication and documentation and use of current information technologies when communicating with individuals, groups and the public.

Relevant Associations: Goal 2

**SLO 3: Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and popula (G: 1) (M: 2)**

Students are able to use the nutrition care process to make decisions, to identify nutrition-related problem and determine and evaluate nutrition interventions, including medical nutrition therapy, disease prevention and health promotion.

**SLO 4: Practice Management and Use of Resources (G: 2)**

Students are able to apply management and business theories and principles to the development, marketing and delivery of programs or services.

**SLO 5: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice (G: 1)**

Learning Outcome: Students are able to use current information technologies to locate and apply evidence-based guidelines and protocols, such as the ADA Evidence Analysis Library, Cochrane Database of Systematic Reviews and the U.S. Department of Health and Human Services, Agency for Healthcare Research and Quality, National Guideline Clearinghouse Web sites.

Relevant Associations: Goal 1

**SLO 6: Demonstrate science understanding (G: 1, 2) (M: 2)**

Demonstrate an understanding of the influence of chemical, microbiological, and physiological disciplines as they affect food and nutrition. This outcome/objective encompasses Commission on Accreditation for Dietetics Education (CADE) Learning Outcomes II.17-II.30.

**SLO 7: Demonstrate promotion of healthy lifestyle (G: 1)**

Demonstrate an understanding of the science of food and food policy in promotion of a healthy lifestyle and pleasurable eating in diverse population groups. This outcome/objective encompasses Commission on Accreditation for Dietetics Education (CADE) Learning Outcomes V.42-V.62.

**SLO 8: Integrate social sciences (G: 1, 2)**

Integrate psychological, social and economic aspects of the environment and examine how they individually and collectively affect food and nutrition. This outcome/objective encompasses Commission on Accreditation for Dietetics Education (CADE) Learning Outcomes III.31-III.34.

### Measures, Targets, and Findings

**M 1: Research Paper (O: 1)**

This paper is a component of the capstone Critical Thinking through Writing course (NJTR 4950). It is completed in stages, with two revision cycles. Originally, the paper was a group assignment completed by students in groups of 4-5 students. For 2010, the assignment was changed to an individual research paper since the group paper failed to identify individual progress from junior year to senior year. Students wrote the paper based on their primary research question. The paper had one revision prior to formulation of the final paper. Two components of the evaluation rubric are used for this evaluation: rationale and content. Each of these is evaluated on a scale of basic (0-2), proficient (4), and mastery (6). 90% of students should receive a proficient score on rubric for final draft of the research paper. Rubric is located in depository.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice**

The target for organization is all students meet or exceed proficiency (4) with a mean class score of 80% or above.

The target for content is all students meet or exceed proficiency (4) with a mean class score of 80% or above.

These targets are set without benefit of baseline data because this is the first year of implementation.
Findings 2011-2012 - Target: Met

22 of the 25 students received greater than 80%. 10 of the 25 students received 90% or higher.

M 2: Discipline-specific Critical Thinking (O: 3, 6)

Critical thinking is essential for dietetic practitioners. This CADE-accredited program focuses on preparing dietetic practitioners. The measure used for this assessment is direct measures of student performance on specific, critical thinking questions included on exams in junior courses (NUTR 3010, NUTR 3500, NUTR 3600, NUTR 3700) and senior courses (NUTR 3150, NUTR 3160, NUTR 4000, NUTR 4200, NUTR 4250, NUTR 4300). Approximately 20 questions from each year's class exams will be selected. Half of these questions will measure application of knowledge about nutrients, and the other half will demonstrate science understanding. The expected mean score for the junior class is 75%, and the expected mean score for the senior class is 85%. While the content for the courses progresses from the junior year to the senior year, implying that the senior year is more difficult, program expectation is that critical thinking will improve as students are exposed to more examples of assignments that require critical thinking instead of rote memory.

Source of Evidence: Academic direct measure of learning - other

Target for O3: Clinical and Customer Services: development and delivery of information, products and services to individuals, groups and popula

The expected mean score for the junior class is 75%, and the expected mean score for the senior class is 85%.

Findings 2011-2012 - Target: Not Reported This Cycle

90% of the students receive at least 85% or better on total possible participation points for class discussion on the marketing section of the management case study assignment. 90% of the students receive at least 80% or better on the HR case study.

Target for O6: Demonstrate science understanding

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Expanded evaluation of writing

Although students exceeded the target, we realize that this is only one measure and does not show progression from their entry to graduation. The rubric might have been compressed for grading purposes and might not evaluate the full range of performance. In the upcoming academic year we will apply the rubric to two courses, a junior course NUTR 3600 and the senior course NUTR 4950. The rubric will be revised for use in both courses. The evaluation process will entail selecting a random sample (30-35% of the class) of final papers from NUTR 3600 and conducting a paired comparison of those papers with papers from NUTR 4950 the following year. These comparisons will be made by a team of faculty evaluators who will not have access to the rating form completed by the instructors of these two courses. Data will be used to improve assignments and progression of assignments.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Research Paper | Outcome/Objective: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice

Implementation Description: Begins Fall semester 2009 with NUTR 3600 (juniors) and ends Spring semester 2011 (seniors) for the first cycle.
Projected Completion Date: 07/2009
Responsible Person/Group: DPD Director
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Revision of Program Goals

Assessment report will be revised to include the required CADE Goals, Knowledge Requirements and Learning outcomes for the program. New Goals: Goal 1: Prepare graduates to be competent for entry into CADE accredited supervised practice programs or entry level nutrition positions. | Goal 2: Promote professional development by emphasizing problem-solving skills, lifelong learning skills, and critical thinking skills. Goal 3: Attract and retain well qualified candidates.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Research Paper | Outcome/Objective: Scientific and Evidence Base of Practice: Integration of scientific information and research into practice

Revision of Program Goals

Georgia State University
Assessment Data by Section
2011-2012 Operations Management MS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
Operations Management (OM) focuses on the management of resources, capabilities and processes that produce and deliver the goods and services for consumer markets. OM can play a critical role in enhancing a company's competitive position by providing superior products and services. The Operations Management MS program is offered for the purpose of developing an in-depth knowledge base regarding operations, logistics and supply chain management.

Goals
G 1: Depth of OM study
The primary goal of the MS Concentration in Operations Management program is to develop students who have an in-depth knowledge relative to operations, logistics and supply chain management. Secondarily, an understanding of the use of the tools and techniques available for correcting and measuring key performance indicators. Examples are inventory turns, days of inventory available, working capital measures, Operating efficiency, Productivity, ROI, TQM and Six sigma.

Student Learning Outcomes/Objectives
SLO 1: Develop a Strategic View of OM (M: 1, 2, 3)
The ability to analyze and evaluate alternative operations tactics and strategies for a given business environment and to identify the appropriate capacity, facility capabilities & locations, product & service design, organizational design and process technology choices as related to the operations function of the organization.

SLO 2: Develop Decision Making Abilities (M: 4)
Normal 0 false false false EN-US X-NONE X-NONE The Student will be able to identify critical success factors of the operations management activities of an organization. This includes the ability to correctly identify, analyze and select the appropriate decision in terms of the operations management function.

SLO 3: Develop an Environmental/substantiality Viewpoint (M: 5)
Normal 0 false false false EN-US X-NONE X-NONE The student will become aware of the impact that OM and Supply Chain decisions have on the environment and industrial sustainability. They should be able to select the appropriate solutions to OM problems in the environmental/sustainability framework

SLO 4: Become a Strong Team Member (M: 6)
The student will develop and enhance their team skills in the completion of completing project work in the Operations Management area. This includes positive participation in group activities and the completion of work that is needed for the group’s progress.

SLO 5: Student Objective
Student outcomes deal with the students’ ability to recognize an operational problem, state the problem, analyze the cause and effects of the problem, establish viable criteria for evaluating alternatives, develop viable alternatives using the concepts, principles and tools of operations, analyze the alternatives against the weighted criteria, select the appropriate alternative, evaluate the hurdles for the selected alternative and implementation.

Measures, Targets, and Findings
M 1: Re reasoned Analysis (O: 1)
Evaluation of individual MS student’s case and/or homework analyses will be completed. The individual work will be integrative in nature and will occur in the MGS 8710 course.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Develop a Strategic View of OM
Leaning Objective 1: Strategic View of OM

- Target: Meets standards

Measure 1: Meets standards

- Measure 2: Meets standards

Measure 3: Meets standards

Findings 2011-2012 - Target: Met

Student findings reflect a 90% level of understanding and monitoring performance levels within their group projects. The level of sophistication regarding analysis is not where we want it and will be an area for improvement, as mentioned previously.

M 2: Integration of Recommendations (O: 1)

Normal 0 false false EN-US X-NONE X-NONE Students should be able to determine the effect that the OM dimensions have on a selected topic and integrate recommendations on a firm's OM applications both within the firm or industry.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Develop a Strategic View of OM

Rubric for Measurements of Learning Outcome 1 Learning Objective 1: Strategic View of OM Fail Fails to meet standards Meet Meets standards=2 Exceed Exceeds standards=3 Measure 2 Integration of recommendations The student is able to integrate recommendations on a firm's OM applications both within the firm or industry. The student cannot determine the effect that the OM dimensions have on a selected topic. The student is able to integrate recommendations on a firm's OM applications both within the firm or industry. The student determines the effect that the OM dimensions have on a selected topic. The student excels at integrating recommendations on a firm's OM applications both within the firm or industry. The student easily determines the effects that the OM dimensions have on a selected topic.

Findings 2011-2012 - Target: Partially Met

Student findings reflect 75% to 80% understanding the importance of integrative thinking in their group project assignments. We should be able to focus more on this aspect of the project and improve this learning objective.

M 3: Performance (O: 1)

Normal 0 false false EN-US X-NONE X-NONE This measures the students' ability to analyze or understand how the firm's operations process performance is affected by the competitive environment through their ability to identify the critical success factors of an OM application and the assessment of available resources and capabilities.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Develop a Strategic View of OM

80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Rubric for Measurements of Learning Outcome 1 Learning Objective 1: Strategic View of OM Fail Fails to meet standards Meet Meets standards=2 Exceed Exceeds standards=3 Measure 3 Performance The student is not able to identify critical success factors of an OM application. The students are not able to assess performance through an assessment of available resources and capabilities. Students are not able to analyze or understand how the firm's operations process performance is affected by the competitive environment. The student is able to identify critical success factors of an OM application. The students are able to assess performance through an assessment of available resources and capabilities. Students are able to analyze or understand how the firm's operations process performance is affected by the competitive environment. The student excels at identifying critical success factors of an OM application. The students are able to easily assess performance through an assessment of available resources and capabilities. Students excel at analyzing or understanding how the firm's operations process performance is affected by the competitive environment.

Findings 2011-2012 - Target: Met

Student findings reflect 75% to 80% understanding the importance of integrative thinking in their group project assignments. We should be able to focus more on this aspect of the project and improve this learning objective.

M 4: Critical Thinking (O: 2)

Normal 0 false false EN-US X-NONE X-NONE Evaluation of individual MS student's work as completed in the required OM course. The accumulation of this type of knowledge will be received through the application of exam questions that will be measured overtime.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Develop Decision Making Abilities

Student should pass each outcome/objective as indicated by satisfactory work on course exams.

Findings 2011-2012 - Target: Met

Homework assignments, case analysis and group project results reflect good to excellent decision making capabilities

M 5: Environmental Impact Evaluation Skills (O: 3)

Normal 0 false false EN-US X-NONE X-NONE Will develop a focus and will highlight the effects that OM decisions have on the environmental and substantiality aspects of industry.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Develop an Environmental/substantiality Viewpoint

Leaning Objective 1: Strategic View of OM Fail Fails to meet standards=1 Meets standards=2 Exceed Exceeds standards=3 Measure 1: Measured Analysis The student is not able to complete a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student cannot determine the effect that firm specific dimensions have on a selected topic. The student is able to complete a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student can determine the effect that firm specific dimensions have on a selected topic. The student exceeds at completing a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student exceeds at determining the effect that a firm's specific dimensions have on a selected topic.

Findings 2011-2012 - Target: Partially Met

The students met the standard at the rate of 75% to 80%, while 20% to 25% of the time they exceeded the standard. The short fall by some students (groups) to attain the "Exceed" standard is due to a lack of adequate understanding and use of the process analysis tools; steady state analysis, activity cycle time, system cycle time, process capacity, bottleneck analysis, critical path analysis and other process metrics. The written portion of their homework, case summaries and group project reports was at the "Exceed" level of our rubric. Further emphasis must be placed on the process analysis and supply chain improvement.
80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Leaning Objective 3: Develop a Environmental/Substantiality Viewpoint Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 5 Environmental Impact Evaluation The student is not able to complete and deliver a project that shows an understanding of the environment impact of OM decisions or are able to contribute their functional expertise to the solution. The student is able to complete and deliver a project that shows an understanding of the environment impact of OM decisions or are able to contribute their functional expertise to the solution. The student is able to complete and deliver a project that shows an excellent understanding of the environment impact of OM or are easily able to contribute their functional expertise to the solution.

**Findings 2011-2012 - Target: Not Met**

All professors are looking at ways to improve the awareness of the environmental impact and sustainability of logistics and supply chain management. There are any number of ways we can engage students in this subject matter and the majority of it will be done through case analysis and education in class lectures.

**M 6: Team Skills (O: 4)**

The student should develop and enhance their team skills in the completion of completing project work in the Operations Management area. This includes positive participation in group activities and the completion of work that is needed for the group's progress.

Source of Evidence: Student course evaluations on learning gains made

**Target for O4: Become a Strong Team Member**

80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Objective 4: Become a Strong Team Member Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 The student did not develop team skills by indicated by poor returns on peer evaluations. The student develops team skills by indicated by average returns on peer evaluations. The student develops strong team skills by indicated by very positive returns on peer evaluations.

**Findings 2011-2012 - Target: Partially Met**

Results indicate a partial meeting of this objective. At best we are seeing 60% to 70% of our students developing strong team skills.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### A strategic view of OM

With respect to the first learning outcome, to develop a strategic view of OM, two actions will be taken:  
- In MGS 8710, add a homework assignment to ask students aspects in which companies use operations management knowledge from a strategic perspective. Evaluate after next offering.  
- In MGS 8710, add a case about operations making significant difference for a company' long term growth. Evaluate after next offering.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Continued implementation will be needed for evaluation.
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** Operations Management faculty Members
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

#### Decision Making Abilities

With respect to the second learning outcome, to develop decision-making abilities, two actions will be taken:  
- In MGS 8710, 8730, 8740 and 8760 and 8770 we will ask students to add more decision making analysis in their group project. Evaluate after next offering.  
- In MGS 8710, 8730, 8740 and 8760 and 8770 we will add several new measures in supply chain and revenue management analysis in accordance with the business environment: increased globalization. Evaluate after next offering.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Continued implementation will be needed for evaluation.
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** Operations Management Faculty Members
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

#### Team Membership

With respect to the third learning outcome, to become a strong team member, two actions will be taken:  
- Incorporate into teaching material for In MGS 8710, 8730, 8740 and 8760 lessons on effective teams.  
- Require team members in the group project of In MGS 8710, 8730, 8740 and 8760 and 8770 to create a team charter indicating an emphasis on the importance of cooperation and fairly distributed individual contributions. Evaluate after next offering.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Continued implementation will be needed for evaluation.
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** Operations Management Faculty Members
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

#### Changes to course syllabi

We will meet in the summer 2012 to discuss appropriate changes to course syllabi and ensure that all instructors are using the same
rubric measuring device.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Meeting scheduled July 2012 with all instructors involved in teaching In MGS 8710, 8730, 8740, 8760 and 8770 for the purpose of making necessary changes to course syllabi.
Responsible Person/Group: Yusen Xia and Walter Wallace

Georgia State University
Assessment Data by Section
2011-2012 Organizational Change MS
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

The MS in Organizational Change is designed to provide the in-depth theoretical and applied training needed to be a leader or implementer of organizational change initiatives. The MS in Organizational Change extends the students' previously acquired basic management and organizational behavior skills by developing advanced technical and analytical competency in applied change management practices. The MS in Organizational Change, therefore, allows students to distinguish themselves as change management specialists either as managers or as internal or external consultants. Topics include negotiation, leadership, organizational change, and coaching.

Goals

G 1: Negotiate Agreements
Goal 1: To graduate students from the MS program with the ability to negotiate agreements that advance the organization’s interests by optimally balancing the simultaneous need to be cooperative and to be competitive.

G 2: Enhance Leadership Skills
Goal 2: To graduate students from the MS program with an awareness of how to enhance their own leadership skills over the course of their careers.

G 3: Managerial Coaching
Goal 3: To graduate students from the MS program in Organizational Change with an awareness of developing employees through managerial coaching by using the skills and techniques of all facets of managerial coaching.

G 4: Analyze Change Needs and Construct Plan
Goal 4: To graduate students from the MS program with the ability to analyze organizational change needs and to construct a change management plan.

Student Learning Outcomes/Objectives

SLO 1: Divide Value in Negotiation (G: 1) (M: 1)
Outcome/Objective 1: Understand and effectively apply the tools necessary to divide value in negotiations. Full Description: The MS graduate will understand the concepts of bargaining zone, anchoring, and walk-away alternatives. They will be able to negotiate agreements that optimize the organization’s interests with regard to the competitive element of negotiating.

SLO 2: Create Value in Negotiation (G: 1) (M: 2)
Outcome/Objective 2: Understand and effectively apply the tools necessary to create value in negotiation. Full Description: The MS graduate will understand the concepts of creating value, bilateral concessions, package offers, and contingent elements to the agreement. They will be able to negotiate agreements that optimize the combined total value distributed between both negotiators.

SLO 3: Prepare Leadership Development Plan (G: 2) (M: 3, 4)
Outcome/Objective 3: Students should be able to understand and describe their own leadership strengths and weaknesses, and should be able to prepare leadership development plans that will enhance their leadership capabilities. These plans will incorporate appropriate and sound leadership development resources, tools and processes.

SLO 4: Recognize Coaching Moment (G: 3) (M: 5, 6)
Outcome/Objective 4: Recognize a coaching moment. Full Description: The MS-Organizational Change graduate will be able to recognize coaching moments that occur in the midst of managing others, and even more specifically when there is any kind of change taking place at an organizational level, a departmental level, or at an individual level such as a change of job position or a required change of attitude.

SLO 5: Perform Change Management Project (G: 4)
Outcome/Objective 5: Perform an OD/Change Management Consulting Project

SLO 6: Recommend Intervention Strategy and Plan (G: 4) (M: 7)
Outcome/Objective 6: Recommend an appropriate OD intervention strategy and plan.
**SLO 7: Recognize OD Consulting Opportunities (G: 4) (M: 8)**
The MS-Organizational Change graduate will be able to recognize OD (Organization Development) consulting opportunities that occur in the midst of managing their day-to-day work, and even more specifically when there is any kind of change taking place at an organizational level, a departmental level, or at an individual level such as a change to the existing structure, processes, metrics, employee roles, etc. within their sphere of influence. Related Measures OD Consultant Notebook in MGS 8450

**SLO 8: Apply OD Consulting Skills (G: 4) (M: 9)**
Demonstrate ability to apply OD Consulting skills learned in class. Related Measures Course project in MGS 8450

### Measures, Targets, and Findings

**M 1: Divided Value in Capstone Negotiation (O: 1)**
Measures The value to the buyer or seller of the final deal negotiated in the capstone one-on-one negotiation Capstone one-on-one negotiation in MGS 8430. The capstone is a simulated business negotiation. It involves two parties, a buyer and a seller. A database exists of over 200 agreements recorded from previous MGS 8430 sections from which to calculate agreement percentiles.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Divide Value in Negotiation**
Meeting or exceeding a value at the 60th percentile of agreements normed on previous sections of MGS 8430. The 60th percentile for buyers is $290,000. The 60th percentile for sellers is $397,500.

**Findings 2011-2012 - Target: Not Met**
Average percentile for M.S. students was 55.8%. 50% of M.S. students reached the 60th percentile.

**M 2: Created Value in Capstone Negotiation (O: 2)**
Measures The combined total value obtained by the buyer and the seller in the capstone one-on-one negotiation. Capstone one-on-one negotiation in MGS 8430. The capstone is a simulated business negotiation. It involves two parties, a buyer and a seller. A database exists of over 200 agreements recorded from previous MGS 8430 sections from which to calculate agreement percentiles. This particular negotiation is designed so that the combined total can only be optimized when bilateral concessions are used effectively and when contingent elements are effectively included in the agreement.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O2: Create Value in Negotiation**
Meeting or exceeding a value at the 60th percentile of agreements normed on previous sections of MGS 8430. The 60th percentile for the combined total is $639,000.

**Findings 2011-2012 - Target: Not Met**
Average percentile for M.S. students was 44.2%. 33% of M.S. students reached the 60th percentile.

**M 3: Leadership Self-Assessment (O: 3)**
Project in MGS 8420. Measures Describes their own leadership strengths and weaknesses.

Source of Evidence: Project, either individual or group

**Target for O3: Prepare Leadership Development Plan**
A 2.0 average on all criteria. Measurement will be done by applying the following rubric:

**Findings 2011-2012 - Target: Met**
Average faculty rating of 2.0 on a 3.0 scale. 100% of students met or exceeded the target.

**M 4: Leadership Development Plan (O: 3)**
Prepare leadership development plans that will enhance their leadership capabilities. These plans will incorporate appropriate and sound leadership development resources, tools and processes.

Source of Evidence: Project, either individual or group

**Target for O3: Prepare Leadership Development Plan**
A 2.0 average on all criteria. Measurement will be done by applying Rubric 2 to randomly selected project reports.

**Findings 2011-2012 - Target: Met**
Average faculty rating of 2.0 on a 3.0 scale. 100% of students met or exceeded the target.

**M 5: Coaching Scenario Assignment (O: 4)**
Ability to write up a coaching scenario that clearly demonstrates a managerial coaching moment. This comes from the coaching scenario assignment and coaching log book in MGS 8425

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Recognize Coaching Moment**
A 2.0 average on all criteria. Measurement will be done by applying Rubric 3 to randomly selected coaching scenarios.

**Findings 2011-2012 - Target: Partially Met**
Average faculty rating of 1.88 on a 3.00 scale. 75% of M.S. students met or exceeded 2.0 on all criteria.

### M 6: Reflect on Own Coaching Effectiveness (O: 4)

**Ability to respond to think reflectively about their own effectiveness as a coach in the role of coaching others.**

**Source of Evidence:** Project, either individual or group

**Target for O4: Recognize Coaching Moment**

A 2.0 average on the coaching log books. Measurement will be done by applying Rubric 4 to randomly selected coaching log books.

**Findings 2011-2012 - Target:** Partially Met

Average faculty rating of 1.88 on a 3.0 scale. 75% of M.S. students met or exceeded 2.0 on all criteria.

### M 7: OD Recommendations (O: 6)

**Inclusion of and appropriateness of recommendations and the rationale behind them.**

**Source of Evidence:** Project, either individual or group

**Target for O6: Recommend Intervention Strategy and Plan**

A 2.0 average on all criteria. Measurements will be done by applying the Measure 6 Rubric (Table 3) to randomly selected project reports.

**Findings 2011-2012 - Target:** Partially Met

Average faculty rating of 1.92 on a 3.0 scale. 75% of M.S. students met or exceeded 2.0 on all criteria.

### M 8: Reflect on Own OD Effectiveness (O: 7)

**Ability to respond and to think reflectively about their own effectiveness and the effectiveness of others employed in the role of (internal or external) OD Consultant.**

**Source of Evidence:** Project, either individual or group

**Target for O7: Recognize OD Consulting Opportunities**

A 2.0 average on the OD Consultant notebooks. Measurement will be done by applying the Measurement 7 Rubric (Table 3) to randomly selected OD Consultant Notebooks.

**Findings 2011-2012 - Target:** Not Met

Average faculty rating of 1.75 on a 3.0 scale. 72% of M.S. students met or exceeded 2.0 on all criteria.

### M 9: Organizational Change Project (O: 8)

**Demonstration of OD Consulting skills in the OD/Change Management Project (Group Assignment)**

**Source of Evidence:** Project, either individual or group

**Target for O8: Apply OD Consulting Skills**

A 2.0 average on all criteria. Measurement will be done by applying the Measure 8 Rubric (Table 3) to randomly selected team evaluations.

**Findings 2011-2012 - Target:** Partially Met

Average faculty rating of 1.88 on a 3.0 scale. 75% of M.S. students met or exceeded 2.0 on all criteria.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Additional Methods of Creating Value

MGS 8430 instructors will add an additional in-class activity on the topic of dividing value. Evaluate after next offering.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Created Value in Capstone Negotiation | **Outcome/Objective:** Create Value in Negotiation
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** MGS 8430 instructors

- **Continue to gather data**

Because data in this cycle was from only 3 students, we will continue to collect data.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Leadership Development Plan | **Outcome/Objective:** Prepare Leadership Development Plan
  - **Measure:** Leadership Self-Assessment | **Outcome/Objective:** Prepare Leadership Development Plan
- **Projected Completion Date:** 12/2012
- **Responsible Person/Group:** MGS 8420 instructors
Continue to gather data
Because data in this cycle was from only one student, we will continue to collect data.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Reflect on Own Coaching Effectiveness | Outcome/Objective: Recognize Coaching Moment

Projected Completion Date: 12/2012
Responsible Person/Group: MGS 8425 instructors

Continue to gather data
Because data in this cycle was from only one student, we will continue to collect data.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Coaching Scenario Assignment | Outcome/Objective: Recognize Coaching Moment

Projected Completion Date: 12/2012
Responsible Person/Group: MGS 8425 instructors

Continue to Gather Data
Because data in this cycle was from only 3 students, we will continue to collect data.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Leadership Self-Assessment | Outcome/Objective: Prepare Leadership Development Plan

Projected Completion Date: 12/2012
Responsible Person/Group: MGS 8420 instructors

Current emphasis monitored
Given that the results were based on only 6 students and that half of the students met the achievement target, we are not yet convinced that significant changes are needed. The course instructors will assure that the topic of dividing value in negotiation is taught sufficiently according to the current emphasis.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Dividing Value in Capstone Negotiation | Outcome/Objective: Divide Value in Negotiation

Projected Completion Date: 12/2012
Responsible Person/Group: MGS 8430 course instructors
Additional Resources: none

Add Coaching Example to Class Session
Add a discussion in class of an additional example. Evaluate after next offering.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Projected Completion Date: 05/2013
Responsible Person/Group: MGS 8425 instructors

Add creating value planning session
Provide an additional exercise in which students work together in small groups for a planning session before the creating value negotiation occurs.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Created Value in Capstone Negotiation | Outcome/Objective: Create Value in Negotiation

Projected Completion Date: 05/2013
Responsible Person/Group: MGS 8430 instructors

Additional Dividing Value activity
Add an additional in-class activity on the topic of dividing value. Evaluate after next offering.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Divided Value in Capstone Negotiation | Outcome/Objective: Divide Value in Negotiation

Projected Completion Date: 05/2013
**Responsible Person/Group:** MGS 8430 instructors

**Allocate coaching feedback time**

Continue to offer students opportunities to receive feedback for deeper reflection concerning the coaching roles. Devote in-class time to discussing the team coaching experiences that drive the entries that are turned in for the coaching log book.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Coaching Scenario Assignment | Outcome/Objective: Recognize Coaching Moment
- Projected Completion Date: 05/2013

**Change In-Class OD Example**

Change the example illustrated in the in-class discussion to a more complex example and add an additional 20 minutes allotted to the class discussion.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Reflect on Own OD Effectiveness | Outcome/Objective: Recognize OD Consulting Opportunities
- Projected Completion Date: 05/2013

**Expand In-Class Discussion of Making OD Recommendations**

Continue the current approach, adding an additional 30 minutes to the in-class discussion. Re-evaluate after next offering.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: OD Recommendations | Outcome/Objective: Recommend Intervention Strategy and Plan
- Projected Completion Date: 05/2013

**Re-Write Instructions for Change Project**

Re-write the written instructions for the assignment. Add a discussion of the consequences of not participating equally in the group project.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Organizational Change Project | Outcome/Objective: Apply OD Consulting Skills
- Projected Completion Date: 05/2013

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

A year ago, we did a major re-orientation of our assessment outcomes, measures, and targets. Therefore, this year, we have been gathering data and have made no changes to the outcomes, measures, or targets until we have reviewed data from this major re-vamping. In the coming year, we anticipate that we will fine-tune the phrasing of some of the targets. For example, saying that we have a target of 80% of students meeting a threshold seems to us as a better program-level assessment than the current phrasing which implies that we target having 100% of students meet the threshold. We did have some targets that were met in this cycle; if the targets are again met in the next cycle, we anticipate progressing toward a focus on additional outcomes.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We revised the curriculum to include a greater focus on Leadership. We added courses to the required core in Leadership Coaching (MGS 8425), Power in Organizations (MGS 8435), and Leading Work Teams (MGS 8440). Because of the change in focus, we have also changed the name of the program from "Organizational Change" to "Leadership and Organizational Change." This change in curriculum also changes the credit hours in the program to being 60% required core and 40% elective. (Previously, it was 40% required core and 60% elective.) This change was a conscious effort in order to focus more student time on the elements that are the more central goals of the program.
Mission / Purpose

MS-PFP PROGRAM MISSION: The MS in Personal Financial Planning is designed to prepare students to: (1) Enter the field of financial planning at the planner level; (2) Pass the Certified Financial Planner exam; and; (3) Serve as the foundation for a leadership role in a financial planning firm. It will do so by developing students’ technical expertise in the topics of financial planning and their ability to integrate that expertise to help individuals plan their financial lives. The MS-PFP provides a more concentrated and in-depth consideration of financial planning topics than is offered by the MBA-PFP and thus better serves the needs of the those who are certain of their intent to pursue a financial planning career and assume a leadership position in a financial planning firm.

Goals

G 1: Enter the PFP field as a planner
The MS in Personal Financial Planning will prepare students, upon completion, to enter the field of financial planning at the planner level.

G 2: Pass the Certified Financial Planner exam
The MS in Personal Financial Planning will prepare students, upon completion, to pass the Certified Financial Planner exam.

G 3: Prepare for leadership role
The MS in Personal Financial Planning will prepare students, upon completion, to serve as the foundation for a leadership role in a financial planning firm.

Student Learning Outcomes/Objectives

SLO 1: Technical expertise - overall (G: 1, 2, 3) (M: 1, 3)
The MS-PFP graduate will have the overall technical financial planning expertise of at least an entry-level planner. The MS-PFP graduate will understand the 89 topics of the 2004 CFP Job Analysis at or above the level of an entry-level financial planner. This standard is set by the Certified Financial Planner exam administered by the CFP Board. A passing score on the exam is at least 60%.

SLO 2: Technical expertise-major financial planning areas (G: 1, 2, 3) (M: 1)
The MS-PFP graduate will have the technical financial planning expertise of at least an entry-level planner in each of the six major technical areas of personal financial planning (i.e., Planning Fundamentals, Income Tax Planning, Insurance Planning, Investment Planning, Retirement Planning, and Estate Planning) at or above the level of a beginning financial planner. This standard is set by the related questions in the Certified Financial Planner exam administered by the CFP Board. A passing score on the exam is at least 60%.

SLO 3: Identify a good client-planner fit (G: 1, 2, 3) (M: 4)
The MS-PFP graduate will have the ability to identify a good client-planner fit, and then gather and organize pertinent personal and financial client data to support an effective analysis of and plan for meeting the client’s financial needs. The MS-PFP graduate will have the ability to evaluate critically his/her own financial planning strengths and weaknesses and, based thereon, be able to identify those clients and circumstances with which he/she will be most effective in providing advice and guidance.

Other Outcomes/Objectives

O/O 4: Integrate technical financial planning concepts (G: 1, 2, 3) (M: 2)
The MS-PFP graduate will have the ability to effectively integrate technical financial planning concepts to assist individuals with meeting their financial needs. The MS-PFP graduate will be able to integrate each of the major technical areas of PFP (Planning Fundamentals, Income Tax Planning, Insurance Planning, Investment Planning, Retirement Planning, and Estate Planning) by properly analyzing pertinent data, identifying financial needs, and developing objectives, strategies, and an appropriate action plan for meeting those needs.

Measures, Targets, and Findings

M 1: Mock CFP Exam (PF520 Capstone Course) (O: 1, 2)
In PF520 Advanced Studies in Personal Financial Planning (capstone course), each student takes a mock CFP exam. Relative performance across the areas of financial planning are measured, with feedback to the course work in the curriculum and to the design of PF520 itself.

Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Technical expertise - overall
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to all mock exam results in each 4-year evaluation period.

Findings 2011-2012 - Target: Not Met
Average of 1.5 on each of the criteria in the sample of mock exams. Have 50 percent of 1s, which does not meet goal of less
Target for O2: Technical expertise-major financial planning areas
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to all mock exam results in each 4-year evaluation period.

Findings 2011-2012 - Target: Not Met
Average of 1.5 on each of the criteria in the sample of mock exams. Have 50 percent of 1s, which does not meet goal of less than 20 percent of 1s. See action plan below.

M 2: Financial Plan prepared in PFP 8520 (capstone) (O: 4)
In PFP 8520 Advanced Studies in Personal Financial Planning (capstone course), each student prepares a financial plan, acquiring a new client and preparing a comprehensive plan on that client. This client is discussed in the class.

Source of Evidence: Capstone course assignments measuring mastery

Target for O4: Integrate technical financial planning concepts
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to all Financial Plans submitted during each 4-year evaluation period.

Findings 2011-2012 - Target: Met
No criteria has a result below 2. Criteria one through three have average of 2.5. Weakest result is in criteria number 4 (development of client action plan), which has an average of 2.0. See action plan below.

M 3: CFP® Exam (O: 1)
The CFP® Exam is administered three times each year. Many of the program’s graduates take this examination and the CFP Board of Standards reports the results to the Program Director. This examination tests competence to become a CFP certificant. The percentage of our graduates passing the examination will be compared to the national average to assess mastery of the technical and analytical skills necessary to practice as a financial planner. The long-range passing percentage for program graduates will be kept and compared with the most recent performance of the graduates and the national performance averages. Each year, the Program Director will analyze the data received from the CFP Board. The Program Director also will use his or her best efforts to monitor the frequency, bases, and nature of any disciplinary action taken by the CFP Board against any graduate of the program and will report the results of this monitoring effort.

Source of Evidence: Certification or licensure exam, national or state

Target for O1: Technical expertise - overall
CFP® Exam pass rates for PFP program students and graduates will be higher than the national average.

Findings 2011-2012 - Target: Met
Pass rate for 2008-2012 of 75 percent exceeding national average of 60%. Meets goal.

M 4: Planner File prepared in PFP 8520 Capstone Course (O: 3)
In PFP 8520 Advanced Studies in Personal Financial Planning (capstone course), each student prepares a file of supporting data and analyses, including an analysis of client fit in support of his/her financial plan.

Source of Evidence: Capstone course assignments measuring mastery

Target for O3: Identify a good client-planner fit
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE FOUR RUBRIC to all Planner Files submitted during each 4-year evaluation period.

Findings 2011-2012 - Target: Met
Average of 2.0 on criterion number 1. Average of 2.5 on criterion number 2. See action plan below.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action plan based on Mock Exam
Our sample was based on one year's data. The data collection process will be improved by keeping more complete records of exam performance by area in future years. The assessment committee will also rely more on quizzes given by area prior to the mock exam. The quiz material will be reinforced prior to comprehensive exam. All quizzes will be kept for a more complete assessment of performance by area.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 12/2009

Action plan for mock exam
Our sample was based on one year's data. The data collection process will be improved by keeping more complete records of exam performance by area in future years. The assessment committee will also rely more on quizzes given by area prior to the mock exam. The quiz material will be reinforced prior to comprehensive exam. All quizzes will be kept for a more complete assessment of performance by area.

Established in Cycle: 2008-2009
Implementation Status: Planned
Improve identification of client fit
Identification of client fit will be improved through the development and implementation of a more focused practitioner workshop series that emphasizes client selection and retention.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Planner File prepared in PFP 8520 Capstone Course | Outcome/Objective: Identify a good client-planner fit
Implementation Description: Implementation of this plan is ongoing and will remain so until determined by Assessment Committee.
Projected Completion Date: 01/2014
Responsible Person/Group: MSPFP Program Director

Reinforce strategies to improve client implementation
Strategies will be reinforced to improve client implementation in PFP 8520. Role play exercises will be focused on implementation issues.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Financial Plan prepared in PFP 8520 (capstone) | Outcome/Objective: Integrate technical financial planning concepts
Implementation Description: This implementation plan remains ongoing.
Projected Completion Date: 12/2013
Responsible Person/Group: MSPFP Program Director

Reinforce CFP exam style questions
We will reinforce CFP exam style questions in Fundamentals, Insurance, retirement, and Estate Planning classes.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Conrad Ciccotello

Tie CFP "Body of Knowledge" closely to curriculum
An effort will be made to tie the CFP Body of Knowledge (comprising specific 89 areas) more closely to the PFP curriculum.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Projected Completion Date: 01/2011
Responsible Person/Group: Conrad Ciccotello

Emphasize quizzes by functional area prior to comprehensive exam
Emphasize quizzes given by functional area prior to comprehensive exam. Continue to examine quizzes for more complete assessment of performance by area.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Mock CFP Exam (PFP 8520 Capstone Course) | Outcome/Objective: Technical expertise - overall | Technical expertise-major financial planning areas
Projected Completion Date: 01/2013
Responsible Person/Group: MSPFP Program Director
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process has remained the same. The standardized professional exam that students take (CFP) provides a clear quantitative benchmark for the program. The capstone class procedures are well established as to the preparation for the exam.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

These changes are captured in the action plan. In summary, we plan to emphasize quizzes given by functional area prior to comprehensive exam. Continue to examine quizzes for more complete assessment of performance by area. Reinforce strategies to improve client implementation in PFP 8520. Focus role play exercises on implementation issues. Improve identification of client fit through focused guest practitioner interactions (including role play and clinical analysis) that emphasize client selection and retention.

Georgia State University
Assessment Data by Section
2011-2012 Philosophy Assessment of Core
As of: 12/12/2016 04:41 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
Philosophy has a central role in any university. The writings of philosophers such as Aristotle, Descartes, Hume, and Kant are among the greatest products of the human mind. They are worth studying for their inherent value as well as for their impact on subsequent history. Much philosophical work is concerned with abstract and fundamental questions: Are there objective moral truths? Is there a God? These issues have moved minds for centuries. At the same time, philosophy is deeply involved with practical issues, such as the nature of the good life and what constitutes a just society. In the last two decades there has been an explosion of activity in applied philosophy with the result that philosophers now work in numerous cross-disciplinary fields such as business ethics, bioethics, philosophy of law, philosophy of science, philosophy of language and philosophy of mind. Despite its wide range of applications, philosophy has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, only philosophy systematically studies what distinguishes good arguments from bad. Consequently, those who teach philosophy are as much concerned with fostering reasoning skills as with imparting information.

Goals
G 1: Phil 1010
Phil 1010, Critical Thinking (in Area B), contributes significantly to GSU's General Education program by helping students hone critical thinking skills that are applicable to any endeavor. Students learn to effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. Outcomes 1 and 2 and Measures 1 and 2 are relevant to Phil 1010.

G 2: Phil 2010
Phil 2010, Introduction to Philosophy (Area C) offers students the opportunity to confront big questions and to learn what history's most original thinkers have said about issues fundamental to existence as a human being. This contributes significantly to GSU's General Education program by helping students hone critical thinking skills that are applicable to any endeavor. Students learn to effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. Students also learn to effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them. Outcomes 3 and 4 and Measures 3 and 4 are relevant to Phil 1010.

Student Learning Outcomes/Objectives

SLO 1: 1010 Objective 1: IDing Premises & Conclusions (G: 1) (M: 1)
All students who take Phil 1010 should be able to identify the premises and conclusions of arguments.

General Education/Core Curriculum Associations
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
### SLO 2: 1010 Objective 2: Argument Evaluation (G: 1) (M: 2)
All students who take Phil 1010 should be able to critically evaluate the arguments of others.

**General Education/Core Curriculum Associations**
- 3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
- 2 Student promotion and progression

**Standard Associations**
- 1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
- 1.5 Other efforts in support of Goal 1 (Undergraduate Education).

### SLO 3: 2010 Objective 1: Critical Thinking (G: 2) (M: 3)
Students who take Phil 2010 should be able to think critically and effectively as evidenced by a basic ability to present clear and sound arguments.

**General Education/Core Curriculum Associations**
- 3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
- 4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
- 2 Student promotion and progression

**Standard Associations**
- 1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
- 1.5 Other efforts in support of Goal 1 (Undergraduate Education).

### SLO 4: 2010 Objective 2: Content (G: 2) (M: 4)
Students who take Phil 2010 should have mastery of some standard content knowledge, including the following: (i) a basic understanding of central problems in metaphysics (What is real?) (ii) a basic understanding of central problems in epistemology (What do we know?) (iii) a basic understanding of central problems in ethics (What should we do?) (iv) a basic understanding of how to apply ethical theory to practical ethical problems. (v) a basic familiarity with some classical and some contemporary authors. (We do not separate these out in the Measures and Findings.)

**General Education/Core Curriculum Associations**
- 3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
- 4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
- 2 Student promotion and progression

**Standard Associations**
- 1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
- 1.5 Other efforts in support of Goal 1 (Undergraduate Education).

### Measures, Targets, and Findings

**M 1: 1010 Measure 1: IDing Premises & Conclusions (O: 1)**
Every fall, five sections of Phil 1010 taught by different instructors will be selected at random. Four final argument analyses will be selected at random from each of these five sections. (It will be the analyses of the first four students on the roll (assuming that each of these four turns in an analysis; if they do not, continue down the roll), but only one per student.) A committee of three continuing faculty (tenured, tenure-track or lecturers) will assign each analysis letter grades (A+, A, A-, B+, B, etc.) on the student's ability to analyze information and arguments by (ii) identifying premises and conclusions.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: 1010 Objective 1: IDing Premises & Conclusions**
Our target is that the average 1010 student's ability to identify premises and conclusions is assessed a 2.25.

**Findings 2011-2012 - Target: Met**

For this 2011-2012 cycle, average 1010 student's ability to identify premises and conclusions was assessed a 2.75.

**M 2: 1010 Measure 2: Argument Evaluation (O: 2)**

Every fall, five sections of Phil 1010 taught by different instructors will be selected at random. Four final argument analyses will be selected at random from each of these five sections. (It will be the analyses of the first four students on the roll (assuming that each of these four turns in an analysis; if they do not, continue down the roll), but only one per student.) A committee of three continuing faculty (tenured, tenure-track or lecturers) will assign each analysis letter grades (A+, A, A-, B+, B, etc.) on the student's ability to analyze information and arguments by (iv) critically evaluating the arguments of others.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: 1010 Objective 2: Argument Evaluation**

Our target is that the average 1010 student's ability to critically evaluating the arguments of others is assessed a 2.25.

**Findings 2011-2012 - Target: Met**

For this 2011-2012 cycle, the average 1010 student's ability to critically evaluating the arguments of others was assessed a 2.75.

**M 3: 2010 Measure 1: Critical Thinking (O: 3)**

Every Fall, five sections of Phil 2010 will be selected at random. Four final exams will be selected at random from each of these five sections. (It will be the exams of the first four students on the roll (assuming that each of these students turns in an exam; if they do not, continue down the roll), but only one per student.) The instructor of the course will assign each exam letter grades (A+, A, A-, B+, B, etc.) on the following criterion: 2. Think critically and effectively as evidenced by (i) a basic ability to present clear and sound arguments.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: 2010 Objective 1: Critical Thinking**

Our target is that the average 2010 student's ability to think critically and effectively is assessed a 2.25.

**Findings 2011-2012 - Target: Met**

In this 2011-2012 cycle, the average 2010 student's ability to think critically and effectively is assessed a 2.54.

**M 4: 2010 Measure 2: Content (O: 4)**

Every Fall, five sections of Phil 2010 will be selected at random. Four final exams will be selected at random from each of these five sections. (It will be the exams of the first four students on the roll (assuming that each of these students turns in an exam; if they do not, continue down the roll), but only one per student.) The instructor of the course will assign each exam letter grades (A+, A, A-, B+, B, etc.) on the following criterion: 1. Mastery of content knowledge, more particularly, any of the following: (i) have a basic understanding of central problems in metaphysics (What is real?) (ii) have a basic understanding of central problems in epistemology (What do we know?) (iii) have a basic understanding of central problems in ethics (What should we do?) (iv) have a basic understanding of how to apply ethical theory to practical ethical problems. (v) have a basic familiarity with some classical and some contemporary authors.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O4: 2010 Objective 2: Content**

Our target is that the average 2010 student's knowledge of content is assessed a 2.25.

**Findings 2011-2012 - Target: Met**

In this 2011-2012 cycle, the average 2010 student's knowledge of content was assessed a 2.58.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Improving 1010**

In response to student and instructor feedback, the text for Phil 1010 is being substantially revised and a new version will be used in Fall 2010.

- Established in Cycle: 2008-2009
- Implementation Status: Finished
- Priority: High
- Projected Completion Date: 08/2010
- Responsible Person/Group: Rainbolt/Dwyer

**Improving 2010**

Improving 2010 The Department now allows a great deal of variety in the many sections of Phil 2010, both in terms of content taught and in terms of the assessment mechanisms used in the courses. We also have a variety of people teaching the courses--we have tenured and tenure-track professors, lecturers and senior lecturers, as well as visiting instructors, and in some cases GTAs. We currently have a policy that sets certain multiply-realizable requirements (for example, while some metaphysics must be included in the course, it is up to the instructor whether to teach about free will, the mind-body problem, or the existence of god; they can teach about other topics in metaphysics as well, as long as they teach about one of these). Given feedback from many majors who took 2010 early in their career at GA State, from outside reviewers, and from faculty who regularly teach the course, the Undergraduate Committee is currently in the process of revising this policy. We hope that the revised policy will help us to improve student learning in this course. One way we will foster this result is to significantly curtail (while not completely eliminating) the ability of non-regular faculty to choose the topics and readings they use.
**Improving Assessment Reporting**

After the 2007-2008 Assessment Cycle, it was indicated to us that we should give more than numerical scores for the findings regarding various measures. Importantly, the faculty of the Department review the numerical data collected via the assessment process (all of which is based on our judgments and experience), and also consider the limitations of that data. Hence, our assessment of student learning is also informed by qualitative data such as our professional judgments about student papers and feedback about the classes that we receive from exemplary majors and our supplemental instructors. Nonetheless, in an effort to clarify what the numerical scores mean, the Assessment Coordinator will propose to the Department the following rubrics for the purpose of assessing philosophical skills (for 1010 and 2010), writing (for 1010), and content knowledge (for 2010).

**Philosophical Skills (for 1010 and 2010):**

1: When we indicate that we think students are doing work scored at a 1.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their own theses, present an insightful and compelling argument, and consider respond to viable objections. Work done by such students demonstrates original thinking, going beyond what was said in class and in the readings. 3: When we indicate that we think students are doing work scored at a 3.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their own theses, present a reasonably compelling argument, and consider possible objections. However, work done by such students is not original, in that it does not go much beyond what was said in class and in the readings, and/or does not develop some important points fully enough. 2: When we indicate that we think students are doing work scored at a 2.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an explanation of the philosophical positions and distinctions that are relevant to their theses, but this explanation is inaccurate in some important ways. Such students do demonstrate an ability to present an argument for a thesis, but their arguments are not original or compelling and they fail to consider possible objections and/or leave important points undeveloped.

1: When we indicate that we think students are doing work scored at a 4.0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a proper thesis (even when they have a unified topic). Typically, they assert views or give little or no attempt to use arguments to defend those views. 0: When we indicate that we think students are doing work scored at a 0 for philosophical skills, we intend this to mean that the student seems able to: provide no coherent explanation of the philosophical positions and distinctions that are relevant to the class topic or even to offer a unified topic. Typically, they assert views but make virtually no attempt to defend those views; they often indicate a lack of understanding of the assignments. Writing (for 1010):

4: Papers assessed at a 4.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and no significant grammar or spelling mistakes. They are polished, reflect excellent self-editing through multiple drafts, and display a sense of personal writing style, written in clear prose that is pleasurable to read. 3: Papers assessed at a 3.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and very few grammar and spelling mistakes. They have been self-edited and do not read like a first draft. 2: Papers assessed at a 2.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and a few grammar and spelling mistakes. They may have been self-edited, but do not read like a first draft. 1: Papers assessed at a 1.0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and some organization of paragraphs, but overall do not flow. They contain a few grammar or spelling errors and read like a first draft. 0: Papers assessed at a 0 for writing have a well-organized structure that follows from a clear thesis, with varied sentence structure and very few grammar and spelling mistakes. They have been self-edited and do not read like a first draft.

**Established in Cycle:** 2008-2009

**Implementation Status:** Finished

**Priority:** High

**Projected Completion Date:** 07/2009

**Responsible Person/Group:** Eddy Nahmias
Add element to student tests
Beginning in the Spring of 2011, the tests for 1010 were improved to include an assessment of the ability of the students to distinguish arguments from non-arguments. This should help improve the findings for 1010 measure #1

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Remove 1010 Objective 3
Upon going through this revised process, we discovered that this measure served little purpose and will be removing it.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: 1010 Measure 1: IDing Premises & Conclusions & Outcome/Objective: 1010 Objective 1: IDing Premises & Conclusions

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In the 2010-2011 cycle, we had 4 factors evaluated in Phil 1010: 1. Students’ ability to recognize arguments 2. Students’ ability to distinguish premises from conclusions 3. Students’ ability to distinguish arguments and subarguments 4. Student’s ability to evaluate arguments. Members of the Department’s Assessment Committee suggested that (A) #1 was unworkable given how Phil 1010 is taught and students tested and (B) that #3 was really only a component of #4 and did not need to be separated. Departmental discussion lead to consensus about both so that we now score only: 1. Students’ ability to distinguish premises from conclusions 2. Student’s ability to evaluate arguments.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have added courses at the 3000 level to improve the ability of students exiting 2010 to progress to more difficult classes.
SLO 1: B.A. Objective 1: Critical Thinking (G: 1) (M: 1)
Students who earn the B.A. in Philosophy will demonstrate the ability to (a) read critically with comprehension and (b) think critically.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 2: B.A. Objective 2: Content Knowledge (G: 1) (M: 2)
Students who earn the B.A. in Philosophy will demonstrate a knowledge of representative philosophers and movements in historical and contemporary philosophy as well as the fundamental concepts, principles, and issues found in the following concentrations: ethics, metaphysics, and epistemology. (These concentrations are to be defined broadly so as to exhaust all fields of philosophy.)

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 3: B.A. Objective 3: Written Communication (G: 1) (M: 3)
Students who earn the B.A. in Philosophy will demonstrate the ability to write clearly and critically.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

Measures, Targets, and Findings
M 1: BA Measure 1: Critical Thinking (O: 1)
Every Fall, instructors of all Phil 3000 and Phil 4990 classes include on their syllabi the requirement that final papers be submitted electronically to the professor. The instructors of these classes will send these to the Assessment Coordinator. The Assessment Coordinator will use a random number generator (such as that found at www.random.org) to select 15 papers total from all Phil 3000 classes and 10 (current policy says 15; we will adjust) papers total from all Phil 4990 classes. (These should come equally from each of the classes. For example, if there are 3 Phil 3000 classes, 5 papers should be chosen from each class; if there are 2 Phil 4990 classes, 7 papers should be chosen from each class and a 15th paper should be chosen at random from the combined set of papers from both.) Every Spring, the Assessment Coordinator distributes the selected papers to the other three members of the Assessment Committee. Those three continuing faculty (tenured, tenure-track or lecturers) assign each paper a letter score (A+, A, A-, B+, B, etc.) on critical thinking. When the scoring is complete, the Assessment Coordinator calculates the average score of the Phil 3000 papers and the average score of the Phil 4990 papers.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: B.A. Objective 1: Critical Thinking**

Our target is that the average 3000 student's critical thinking ability is assessed a 2.25 and the average 4990 student's critical thinking ability is assessed a 2.5.

**Findings 2011-2012 - Target: Met**

In this 2011-2012 cycle, the average 3000 student's critical thinking ability was assessed a 2.75 and the average 4990 student's critical thinking ability was assessed a 3.21. Moreover, in Phil 2010, the student's critical thinking ability was assessed 2.54. Thus, we see introductory students at 2.54, progressing students at 2.75, and finishing students at 3.21. This progression suggests the program is successfully helping students to improve their critical thinking skills.

**M 2: BA Measure 2: Content Knowledge (O: 2)**

Every Fall, instructors of all Phil 3000 and Phil 4990 classes include on their syllabi the requirement that final papers be submitted electronically to the professor. The instructors of these classes will send these to the Assessment Coordinator. The Assessment Coordinator will use a random number generator (such as that found at www.random.org) to select 15 papers total from all Phil 3000 classes and 10 (current policy says 15; we will adjust) papers total from all Phil 4990 classes. (These should come equally from each of the classes. For example, if there are 3 Phil 3000 classes, 5 papers should be chosen from each class; if there are 2 Phil 4990 classes, 7 papers should be chosen from each class and a 15th paper should be chosen at random from the combined set of papers from both.) Every Spring, the Assessment Coordinator distributes the selected papers to the other three members of the Assessment Committee. Those three continuing faculty (tenured, tenure-track or lecturers) assign each paper a letter score (A+, A, A-, B+, B, etc.) on content knowledge. When the scoring is complete, the Assessment Coordinator calculates the average score of the Phil 3000 papers and the average score of the Phil 4990 papers.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: B.A. Objective 2: Content Knowledge**

Our target is that the average 3000 student's content knowledge is assessed a 2.25 and the average 4990 student's content knowledge is assessed a 2.5.

**Findings 2011-2012 - Target: Met**

In this 2011-2012 cycle, the average 3000 student's content knowledge was assessed a 2.6 and the average 4990 student's content knowledge was assessed at 3.44. Moreover, in Phil 2010, the student's content knowledge was assessed a 2.58. Thus, we see introductory students at 2.58, progressing students at 2.6, and finishing students at 3.44. This progression suggests the program is successfully helping students to improve their content knowledge, especially at the higher levels.

**M 3: BA Measure 3: Written Communication (O: 3)**

Every Fall, instructors of all Phil 3000 and Phil 4990 classes include on their syllabi the requirement that final papers be submitted electronically to the professor. The instructors of these classes will send these to the Assessment Coordinator. The Assessment Coordinator will use a random number generator (such as that found at www.random.org) to select 15 papers total from all Phil 3000 classes and 10 (current policy says 15; we will adjust) papers total from all Phil 4990 classes. (These should come equally from each of the classes. For example, if there are 3 Phil 3000 classes, 5 papers should be chosen from each class; if there are 2 Phil 4990 classes, 7 papers should be chosen from each class and a 15th paper should be chosen at random from the combined set of papers from both.) Every Spring, the Assessment Coordinator distributes the selected papers to the other three members of the Assessment Committee. Those three continuing faculty (tenured, tenure-track or lecturers) assign each paper a letter score (A+, A, A-, B+, B, etc.) on written communication. When the scoring is complete, the Assessment Coordinator calculates the average score of the Phil 3000 papers and the average score of the Phil 4990 papers.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: B.A. Objective 3: Written Communication**

Our target is that the average 3000 student's written communication ability is assessed a 2.25 and the average 4990 student's written communication ability is assessed a 2.5.

**Findings 2011-2012 - Target: Met**

In this 2011-2012 cycle, the average 3000 student's written communication ability was assessed a 2.88 and the average 4990 student's written communication ability was assessed a 3.11. This progression suggests the program is successfully helping students to improve their written communication skills.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**CTW courses**

We continue to monitor CTW assignments; we are not yet certain whether changes to CTW assignments will be needed.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 12/2009
Monitor Phil Skills closely
The fact that the evaluated papers by our majors did not meet our target this year is disheartening. However, the 2.0 is not very far from our target of 2.75 and that target was met for the last 3 years. We thus intend to watch the situation closely. If we see a repeat of this performance we will have to determine if changes are warranted, either in the target or in our teaching.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Change to Instructor evaluation of content knowledge
Beginning in the 2011-2012 cycle, we will have the instructors of the Phil 3000 and Phil 4990 classes do the assessment of the content knowledge demonstrated in their student’s papers. This should significantly improve the value of this measure.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: BA Measure 2: Content
- Outcome/Objective: B.A. Objective 2: Content Knowledge
Responsibility Person/Group: Andrew Jason Cohen

Reduce # of 4990 papers used
Beginning in the 2011-2012 cycle, we will use 10 papers from Phil 4990 students instead of 15. Given the number of students, this should leave us with the valuable evidence needed while making the process simpler. Given the larger number of students in Phil 3000, we will continue to use 15 papers from those classes.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):

Responsibility Person/Group: Andrew Jason Cohen

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We have streamlined data collection, recognizing that fewer students take Phil 4990, so reducing the number of papers from those classes used in the assessment process. We also altered the system so that the instructors teaching Phil 3000 and Phil 4990 provided the assessment scores for content knowledge. This vastly improves our reporting of student content knowledge.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
We do not anticipate any major changes at this time.

ADMINISTRATIVE DEPT QUESTION 1:  Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
We’ve refined our assessment process and added some courses (esp. at the 3000 level).

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?
The following evidence speaks clearly: CRITICAL THINKING WRITING CONTENT Phil 2010: 2.542.58 Phil 3000: 2.752.882.6 Phil 4990: 3.213.113.44 It seems clear that the Department's teaching is effective.

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
We will monitor our program, but expect to continue our successful work.
Mission / Purpose
Philosophy has a central role in any university. The writings of philosophers such as Aristotle, Descartes, Hume, and Kant are among the greatest products of the human mind. They are worth studying for their inherent value as well as for their impact on subsequent history. Much philosophical work is concerned with abstract and fundamental questions: Are there objective moral truths? Is there a God? These issues have moved minds for centuries. At the same time, philosophy is deeply involved with practical issues, such as the nature of the good life and what constitutes a just society. In the last two decades there has been an explosion of activity in applied philosophy with the result that philosophers now work in numerous cross-disciplinary fields such as business ethics, bioethics, philosophy of law, philosophy of science, philosophy of language and philosophy of mind. Despite its wide range of applications, philosophy has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, only philosophy systematically studies what distinguishes good arguments from bad. Consequently, those who teach philosophy are as much concerned with fostering reasoning skills as with imparting information.

Goals
G 1: Goal of the M.A. Program
Despite its wide range of applications, philosophy as currently practiced in the English-speaking world has one overarching theme: it is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, the systematic study of what distinguishes good arguments from bad is central to the philosophical enterprise. Consequently, those who teach philosophy are as much concerned with fostering critical thinking skills and clear argumentative writing as with imparting information. We believe our major should and does do both. As such, students who earn the M.A. in Philosophy will demonstrate a knowledge of representative philosophers and movements in historical and contemporary philosophy as well as knowledge of the fundamental concepts, principles, and issues found in the various fields of philosophy. They will also demonstrate the ability to read critically with comprehension, think critically, and write clearly and critically. This is the same goal that we have B.A. students, but we expect graduates of the M.A. program to have a greater mastery of the content knowledge and a higher level of philosophical and communication skills than graduates of the B.A. program.

Outcomes/Objectives
O/O 1: Learning Objectives for Philosophy MA 1: Content (M: 1, 3)
Students pursuing the M.A. in philosophy are expected to gain a greater mastery of the content knowledge that graduates of the B.A. program attain. These include: general knowledge of a variety of philosophical systems and movements from the different periods in the history of Western philosophy (ancient/modern and modern) and detailed knowledge of at least one system or movement in each of these two periods; general knowledge of the thought of various major philosophers from the different periods in the history of Western philosophy and detailed knowledge of at least one philosopher from each of the two periods; a familiarity with representative philosophers and movements in contemporary philosophy and in-depth understanding of at least one philosopher in at least two of the movements; knowledge of the fundamental concepts, principles, and issues found in at least three of the main areas of philosophy (ethics, aesthetics, metaphysics, epistemology, and logic, all defined broadly so as to exhaust all fields of philosophy); knowledge of the distinctive contributions made by philosophy to intellectual inquiry; and knowledge of the relevance of philosophy to contemporary American culture and life.

O/O 2: Learning Objectives for Philosophy MA 2: Skills (M: 2, 3)
Students pursuing the M.A. in philosophy are expected to gain a higher level of the philosophical skills than graduates of the B.A. program attain. These include: the ability to read critically and with comprehension; the ability to think critically and to write clearly and persuasively; the ability to apply principles and techniques of logic to philosophical discussions; and the ability to conduct philosophical research effectively.

Measures, Targets, and Findings
M 1: MA Content Knowledge (O: 1)
All students receiving the MA defend a thesis to a committee of at least 3 faculty members. Upon successful defense, the committee members all indicate a content knowledge score (on a 4.0 scale).
Source of Evidence: Senior thesis or culminating major project

Target for O1: Learning Objectives for Philosophy MA 1: Content
Our target is that the average an M.A. student is assessed on their knowledge of content applicable to their thesis at a 3.3.

Findings 2011-2012 - Target: Met
For the 2011 calendar year, M.A. students received, on average, an assessment of 3.67 on the knowledge of content applicable to their theses.

M 2: MA Philosophical Skills (O: 2)
All students receiving the MA defend a thesis to a committee of at least 3 faculty members. Upon successful defense, the committee members all indicate a philosophical skills score (on a 4.0 scale).
Source of Evidence: Senior thesis or culminating major project

Target for O2: Learning Objectives for Philosophy MA 2: Skills
Our target is that the average an M.A. student is assessed on their content skills at a 3.3.

Findings 2011-2012 - Target: Met
For the 2011 calendar year, M.A. students received, on average, an assessment of 3.6 on their philosophical skills.
As an additional piece of evidence regarding how the Department succeeds in teaching our grad students both content and philosophical skills, we determine the percentage of those students that applied to PhD programs from January through December of the preceding year who were admitted to those programs. Preparing students for PhD programs is part of our mission and acceptance to such programs is a clear sign that we are creating quality MAs; this is to say that this is a clear sign that our MA graduates have content knowledge and philosophical skills.

Source of Evidence: Academic indirect indicator of learning - other

Target for O1: Learning Objectives for Philosophy MA 1: Content

Achievement Target: We hope that any of the students who graduate with an MA who wish to continue on to a PhD program are accepted into a program they will thrive in. We set, as a realistic target, 75%.

Findings 2011-2012 - Target: Met

For the 2011 calendar year, we had 12 MA graduates apply to PhD programs. All but two were accepted to at least one school (one who was not was accepted to six top law schools an enrolled in what is arguably the best university for law and philosophy together). One of the 10 accepted into PhD programs was accepted into 7 top schools. Another was accepted 3 others schools and 4 others had 2 acceptances. The acceptance rate is thus 83% for those who applied. We take this as clear indication that our grad students are learning philosophical skills and content. (Eleven graduates did not apply to PhD programs; one was accepted into 5 J.D. programs and is pursuing that career path; another is also pursuing that path. In addition, one is in a Psychology master's program, several are teaching, and one is a monk.)

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Improving Assessment Reporting

After the 2007-2008 Assessment Cycle, it was indicated to us that we should give more than numerical scores for the findings regarding various measures. Importantly, the faculty of the Department review the numerical data collected via the assessment process, but do not limit themselves to this (quantitative) data. We recognize its value, but also its limitations. Hence, our assessment of student learning is also informed by qualitative data such as our professional judgments about student papers. Nonetheless, in an effort to clarify what the numerical scores mean, the Assessment Coordinator will propose to the Department the following rubrics for the purpose of assessing philosophical skills and content knowledge. Philosophical Skills 4: We indicate that we think students are doing work scored at a 4.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an insightful and compelling argument, and consider and respond to viable objections. Work done by such students demonstrates original thinking, going beyond what was said in class and in the readings. 3: When we indicate that we think students are doing work scored at a 3.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide a fair and accurate explanation of the philosophical positions and distinctions that are relevant to their theses, present an insightful and compelling argument, and consider possible objections. However, work done by such students is not original, in that it does not go much beyond what was said in class and in the readings, and/or does not develop some important points fully enough. 2: When we indicate that we think students are doing work scored at a 2.0 for philosophical skills, we intend this to mean that the student has a demonstrated ability to: provide an explanation of the philosophical positions and distinctions that are relevant to their theses, but this explanation is inaccurate in some important ways. Such students do demonstrate an ability to present an argument for a thesis, but their arguments are not original or compelling and they fail to consider possible objections and/or leave important points undeveloped. 1: When we indicate that we think students are doing work scored at a 1.0 for philosophical skills, we intend this to mean that the student seems able to: provide little or no explanation of the philosophical positions and distinctions that are relevant to the class topic or even to develop a proper thesis (even when they have a unified topic). Typically, they assert views but give little or no attempt to use arguments to defend those views. 0: When we indicate that we think students are doing work scored at a 0 for philosophical skills, we intend this to mean that the student seems to be: provide no coherent explanation of the philosophical positions and distinctions that are relevant to the class topic or even to offer a unified topic. Typically, they assert views but make virtually no attempt to defend those views; they often indicate a lack of understanding of the assignments. Content 4: Students or papers assessed at a 4.0 for their content knowledge demonstrate an exemplary understanding of all of the texts discussed in the course, including subtle points that many miss. 3: Students or papers assessed at a 3.0 for their content knowledge demonstrate a good understanding of most of the texts discussed in the course, but miss subtle points. 2: Students or papers assessed at a 2.0 for their content knowledge demonstrate a limited understanding of some of the texts discussed in the course, but miss not only subtle points but even basic points from some of the texts. 1: Students or papers assessed at a 1.0 for their content knowledge demonstrate lack of understanding of the basic points of most of the texts discussed in the course. 0: Students or papers assessed at a 0 for their content knowledge seem not to have any understanding of the basic points of the texts discussed in the course.

New Measure for both Outcomes

The Assessment Coordinator will propose the following: As an additional piece of evidence regarding how the Department succeeds in teaching our grad students both content and philosophical skills, we will determine the percentage of those students that applied to PhD programs from January through December of the preceding year who were admitted to those programs. Preparing students for PhD programs is part of our mission and acceptance to such programs is a clear sign that we are creating quality MAs; this is to say that this is a clear sign that our MA graduates have content knowledge and philosophical skills.

Analysis Questions and Analysis Answers
**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

No changes.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Physical Therapy DPT**

(As of: 12/12/2016 04:40 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

In accordance with, and in support of the mission of Georgia State University and the Brydine F. Lewis School of Nursing and Health Professions, the mission of the Division of Physical Therapy is to prepare, teach and graduate doctors of physical therapy who are knowledgeable in the practice of physical therapy, committed to clinical excellence, demonstrate professional distinction, and are passionate in their pursuit of scholarly activities that contribute to the body of scientific and clinical knowledge. Note: 97 graduate students were enrolled in the Doctor of Physical Therapy program in Fall of 2012. Thirty-five doctors of physical therapy graduated in August of 2012.

---

**Goals**

**G 1: Prepare a competent physical therapist that is ready to work autonomously.**
1. Prepare a competent physical therapist that is ready to work autonomously in a variety of settings throughout the continuum of healthcare. o Provide culturally competent physical therapy services for prevention, health promotion, fitness, and wellness, to individuals, groups and communities. o Provide a variety of clinical educational opportunities to allow students to perform competently across the healthcare continuum.

**G 2: Prepare a competent physical therapist who has obtained a sufficient level of knowledge.**
2. Prepare a competent physical therapist who has obtained a sufficient level of knowledge in the foundational (basic, applied and social) and clinical sciences to understand the facts, concepts, and principles essential to competent evidence based practice. o Deliver and manage a plan of care that is safe, effective and patient client centered and incorporates all elements of the physical therapy management model as described in the Guide to Physical Therapist Practice. o Monitor and adjust the plan of care in response to patient/client status. o Provide physical therapy interventions to achieve patient/client goals and outcomes. o Consistently and critically evaluate sources of information related to physical therapy practice, research, and education and apply knowledge from these sources in a scientific manner and to appropriate populations. o Consistently integrate the best evidence for practice from sources of information with clinical judgment and patient/client values to determine the best care for a patient/client. o Use clinical judgment and reflection to identify, monitor, and enhance clinical reasoning in order to minimize errors and enhance patient/client outcomes. o Consistently apply current knowledge, theory, and professional judgment while considering the patient/client perspective in patient/client management.

**G 3: Prepare a competent physical therapist that recognizes the limits of current knowledge, clinical skill, and experience.**
3. Prepare a competent physical therapist that recognizes the limits of current knowledge, clinical skill, and experience and demonstrate the commitment to acquire new knowledge and skill through lifelong learning. o Acquire new knowledge and skill: writing and presenting evidence based practice paper/research project, attend conferences and consult with colleagues. o Facilitate reflective thinking using reflective journals, small group discussions. o Utilize technology to access information. o Formulate clinical patterns based on best available evidence for various patient populations. o Read literature, attend conferences, and consult with colleagues to examine and evaluate current and future trends to challenge the status quo of the practice of physical therapy.

**G 4: Prepare a competent physical therapist who embraces a multi-cultural learning environment.**
4. Prepare a competent physical therapist who embraces a multi-cultural learning environment that assists in the development of culturally competent physical therapy practitioners. o Identify respect and act with consideration for patients' clients' differences, values preferences and expressed needs in all professional activities. o Effectively educate others using culturally appropriate teaching methods that are commensurate with the needs of the learner. o Provide culturally competent physical therapy services for prevention, health promotion, fitness and wellness to individuals, groups and communities.

**G 5: Prepare a competent physical therapist who promotes interdisciplinary collaboration.**
5. Prepare a competent physical therapist who promotes interdisciplinary collaboration in the pursuit of clinical and scholarly activities. o Collaborate with patients/clients, family members, payers, other professionals, and other individuals to determine a plan of care that is acceptable, realistic, culturally competent, and patient/client-centered. o Develop and participate in inter-departmental research collaboration and education opportunities.

**G 6: Prepare a competent physical therapist that supports professional, community, and clinical service.**
6. Prepare a competent physical therapist that supports professional, community, and clinical service opportunities and activities. o Incorporate pro bono services into practice. o Participate and show leadership in community organizations and volunteer service. o Advocate for the health and wellness needs of society. o Provide consultation within boundaries of expertise to businesses, schools, government agencies, other organizations, or individuals. o Participate in professional organizations.
G 7: Prepare a competent physical therapist who models professionalism consistent with the American Physical Therapy Association.

7. Prepare a competent physical therapist who models professionalism consistent with the American Physical Therapy Association’s core values. o Adhere to legal practice standards, including all federal, state and institutional regulations related to patient/client care and fiscal management.
  o Practice in a manner consistent with the professional code of ethics.
  o Participate in organizations and efforts that support the role of the physical therapist in furthering the health and wellness of the public.
  o Place patient/client’s needs above the physical therapist’s needs.
  o Demonstrate integrity in all interactions with patients/clients, family members, caregivers, other health care providers, students, other consumers, and payers.
  o Demonstrate professional behavior in all interactions with patients/clients, family members, caregivers, other health care providers, students, other consumers, and payers.
  o Expressively and receptively communicate in a culturally competent manner with patients/clients, family members, caregivers, practitioners, interdisciplinary team members, consumers, payers, and policy makers.
  o Influence legislative and political processes.

Student Learning Outcomes/Objectives

SLO 1: Professional Practice Expectation: Accountability (G: 1, 6, 7) (M: 1, 2, 5, 6, 7, 8)

Upon completion of the program, student/graduates will demonstrate the ability to actively accept responsibility for diverse roles, obligations, and actions, including self-regulation and other behaviors that positively influence patient/client outcomes, the profession, and health care needs of society.

Institutional Priority Associations
  2 Student promotion and progression
  3 Timely graduation

Standard Associations
  1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
  5 Outcomes of community/public service (3.3.1.5)

Strategic Plan Associations
  2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
  5.4 Enhance the global competency of students, faculty and staff.

SLO 2: Professional Practice Expectation: Compassion/Caring (G: 4, 6) (M: 1, 2, 6, 7, 8)

Upon completion of the program, student/graduates will demonstrate compassion, caring and empathy in providing service to patient/clients.

Institutional Priority Associations
  1 Student retention
  2 Student promotion and progression
  3 Timely graduation

Standard Associations
  1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
  5 Outcomes of community/public service (3.3.1.5)

Strategic Plan Associations
  2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

SLO 3: Professional Practice Expectation: Integrity (G: 1, 6, 7) (M: 1, 2, 4, 5, 6, 7, 8)

Upon completion of the program, student/graduates will demonstrate integrity in all interactions with patients/clients, family members, caregivers, and other health care providers, students, other consumers and payers.

Institutional Priority Associations
  1 Student retention
  2 Student promotion and progression
  3 Timely graduation

Standard Associations
  1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
  5 Outcomes of community/public service (3.3.1.5)

Strategic Plan Associations
  2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

SLO 4: Professional Practice Expectations: Professional Duty (G: 6, 7) (M: 1, 2, 5, 6, 7, 8)

Upon completion of the program, student/graduates will demonstrate professional behaviors in all interactions with patients/clients.

Institutional Priority Associations
  1 Student retention
  2 Student promotion and progression
  3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5 Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

### SLO 5: Professional Practice Expectations: Communication (G: 1, 5, 6) (M: 1, 2, 4, 6, 7, 8)

Upon completion of the program, student/graduates will expressively and receptively communicate in a culturally competent manner with patients/clients, family members, caregivers, practitioners, interdisciplinary team members, consumers, payers, and policy makers.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

### SLO 6: Professional Practice Expectations: Altruism (G: 6, 7) (M: 1, 2, 6)

Upon completion of the program, student/graduates will exemplify primary regard for the interest of their patients/clients, thus assuming fiduciary responsibility of placing the needs of the patient/client ahead of their self-interests.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

### SLO 7: Professional Practice: Cultural Competence (G: 1, 2, 4, 7) (M: 1, 2, 5, 6, 7, 8)

Upon completion of the program, student/graduates will identify, respect, and act with consideration for patients/clients differences, values, preferences, and expressed needs in all professional activities.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

5.4 Enhance the global competency of students, faculty and staff.

### SLO 8: Professional Practice Expectation: Clinical Reasoning (G: 2, 3) (M: 2, 3, 4, 5, 6, 7, 8)

Upon completion of the program, student/graduates will demonstrate a systematic process for clinical judgment and reflection to identify, monitor, and enhance clinical reasoning.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 9: Professional Practice Expectations: Evidence-Based Practice (G: 2, 3, 5) (M: 1, 2, 3, 4, 5, 6, 7, 8)**

Upon completion of the program, student/graduates will integrate the best possible research evidence with clinical expertise and patient values, to optimize patient/client outcomes and quality of life to achieve the highest level of excellence in clinical practice.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4 Outcomes of research (3.3.1.4)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**SLO 10: Professional Practice Expectation: Education (G: 4, 5) (M: 2, 3, 4, 5, 6, 7, 8)**

Upon completion of the program, student/graduates will effectively educate others using culturally appropriate teaching methods that are commensurate with the needs of the learner.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5 Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 11: Patient/Client Management Expectation (G: 1, 2, 3, 5) (M: 2, 3, 4, 5, 6, 7)**

Upon completion of the program, student/graduates will demonstrate competency in the five elements of care including examination, evaluation, diagnosis, prognosis, and intervention for patients across the lifespan.

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
5 Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 12: Practice Management Expectations (G: 1, 5) (M: 2, 3, 4, 5, 6, 7)**

Upon completion of the program, student/graduates will demonstrate competence in determining a plan of care that is acceptable, realistic, culturally competent, and patient/client-centered.

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

Based on performance criteria #5 (Cultural Competence): #5 Cultural Competence Class 2012 (9th semester): 17.9- In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 13.7- In between Advanced Intermediate and Entry Level; Class 2014 (3rd semester): 9.2- Intermediate.

**Target for O9: Professional Practice Expectations: Evidence-Based Practice**

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

**M 2: Licensure Exam Pass Rate (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12)**

The National Physical Therapy Examination pass rate for the program (first time and ultimate)

Source of Evidence: Certification or licensure exam, national or state

**Target for O1: Professional Practice Expectation: Accountability**

90% first time pass rate; 100% ultimate pass rate.

**Findings 2011-2012 - Target: Met**

35 graduates of the 2010 class scored 100% for first time testing for the State Boards of Physical Therapy examination. Mean score was 671.66 compared to the national mean of 647.72. 34 graduates of the 2011 class scored 91% for first time testing for the State Boards of Physical Therapy examination. Mean score was 660.32 compared to the national mean of 651.50. At the time of this report 29 graduates of the 2012 class scored 100% for first time testing for the State Boards of Physical Therapy examination. Mean score was 670.59 compared to the national mean of 653.07. Ultimate pass rate over the past three years is currently at 99% as compared to 89% nationally.

**Target for O2: Professional Practice Expectation: Compassion/Caring**

90% first time pass rate; 100% ultimate pass rate.

M 3: Clinical Skills (O: 8, 9, 10, 11, 12)

Source of Evidence: Performance (recital, exhibit, science project)

Target for O8: Professional Practice Expectation: Clinical Reasoning

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2011-2012 - Target: Met

Based on performance criteria #7 (clinical reasoning): Class 2012 (9th semester): 17.2 - Entry Level; Class 2013 (6th semester): 11.8- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.4- In between Advanced Beginner and Intermediate.

Target for O9: Professional Practice Expectations: Evidence-Based Practice

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2011-2012 - Target: Met

Based on performance criteria #6, #7 (professional development, clinical reasoning): #6 Professional Development Class 2012 (9th semester): 17.5- Entry Level; Class 2013 (6th semester): 12.5-Advanced Intermediate; Class 2014 (3rd semester): 8.5-Intermediate. #7 Clinical Reasoning Class 2012 (9th semester): 17.2- Entry Level; Class 2013 (6th semester): 11.8- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.4- In between Advanced Beginner and Intermediate.

Target for O10: Professional Pratction Expectation: Education

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2011-2012 - Target: Met

Based on performance criteria #14 (Educational Intervention): #14 Educational Intervention Class 2012 (9th semester): 17.5- In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 12.3- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.8- In between Advanced Beginner and Intermediate.

Target for O11: Patient/Client Management Expectation

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2011-2012 - Target: Met

Based on performance criteria #1, #8, #9, #10, #11, #13, #14, #15, #17, #18 (Safety, Screening, Examination, Evaluation, Diagnosis & Prognosis, Procedural interventions, Educational interventions, Documentation, Financial resources, Direction and supervision of personnel): #1 Safety Class 2012 (9th semester): 17.9 - In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 13.4- Advanced Intermediate; Class 2014 (3rd semester): 10- In between Intermediate and Advanced Intermediate, #8 Screening Class 2012 (9th semester): 17.2- Entry Level; Class 2013 (6th semester): 11.8- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.1- In between Advanced Beginner and Intermediate, #9 Examination Class 2012 (9th semester): 17.2- In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 13.86- Advanced Intermediate Class 2014 (3rd semester): 8.24- In between Advanced Beginner and Intermediate, #10 Evaluation Class 2012 (9th semester): 17.2- In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 11.7- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.3- In between Advanced Beginner and Intermediate, #11 Diagnosis & Prognosis Class 2012 (9th semester): 17.2- In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 11.7- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.4- In between Advanced Beginner and Intermediate.
M 4: Research Project (O: 3, 5, 8, 9, 10, 11, 12)

Source of Evidence: Capstone course assignments measuring mastery

Progressing over a two year period, student's engagement in a research project will result in 1) a manuscript for submission to a Target for and/or poster/platform for peer-review and presentation.

Findings 2011-2012 - Target: Met

Based on performance criteria #1, #8, #12, #16, #17, #18 (Safety, Screening, Plan of Care, Outcomes Assessment, Financial resources, Direction and supervision of personnel): #1 Safety Class 2012 (9th semester): 17.9- In between Entry Level and Beyond Entry Level; Class 2013 (6th semester): 13.4- Advanced Intermediate; Class 2014 (3rd semester): 10- In between Intermediate and Advanced Intermediate. #8 Screening Class 2012 (9th semester): 17.2- Entry Level; Class 2013 (6th semester): 11.8- In between Intermediate and Advanced Intermediate; Class 2014 (3rd semester): 7.1- In between Advanced Beginner and Intermediate. #12 Plan of Care Class 2012 (9th semester): 17.2- Entry Level; Class 2013 (6th semester): 12.3- In between Intermediate and Advance Intermediate; Class 2014 (3rd semester): 7.3- In between Advanced Beginner and Intermediate. #16 Outcomes Assessment Class 2012 (9th semester): 17.1- Entry Level; Class 2013 (6th semester): 11.9- In between Intermediate and Advance Intermediate; Class 2014 (3rd semester): 7- In between Advanced Beginner and Intermediate. #17 Financial Resources Class 2012 (9th semester): 17.1- Entry Level; Class 2013 (6th semester): 11.6- In between Intermediate and Advance Intermediate; Class 2014 (3rd semester): 6.7- In between Advanced Beginner and Intermediate. #18 Direction and supervision of personnel Class 2012 (9th semester): 17.2- Entry Level; Class 2013 (6th semester): 11.5- In between Intermediate and Advance Intermediate; Class 2014 (3rd semester): 6.9- In between Advanced Beginner and Intermediate.

M 4: Research Project (O: 3, 5, 8, 9, 10, 11, 12)

Source of Evidence: Capstone course assignments measuring mastery

Target for O12: Practice Management Expectations

Clinical instructors will assess students’ professional behaviors at the completion of the 3rd, 6th, and 9th semesters. Students will score at or above advanced beginner performance, intermediate performance, and entry level performance on Clinical Performance Instrument (CPI) performance criteria, respectively that relate to professional behavior.

Findings 2011-2012 - Target: Met

Target for O3: Professional Practice Expectation: Integrity

Completed program requirement of student-driven research project progressing over three semesters resulting in a manuscript and/or poster/platform for peer-review and presentation.

**Target for 05: Professional Practice Expectations: Communication**

Completed program requirement of student-driven research project progressing over three semesters resulting in a manuscript and/or poster/platform for peer-review and presentation.

**Findings 2011-2012 - Target: Met**

**Target for 08: Professional Practice Expectation: Clinical Reasoning**

Completed program requirement of student-driven research project progressing over three semesters resulting in a manuscript and/or poster/platform for peer-review and presentation.

**Findings 2011-2012 - Target: Met**

For the period 2011-2012 all 3rd year DPT Students completed research projects under the direct supervision of faculty as required for graduation from the program. Results of this research included 18 poster or platform presentations and one accepted manuscript for publication. Manuscripts published: Sawyer, A.M., S.K. Martinez, and G.L. Warren. Impact of yoga on low back pain and function: a systematic review and meta-analysis. J. Yoga Phys. Ther. 2:120, 2012. doi:10.4172/2157-7595.1000120 Presentations at the 2012 American College of Sports Medicine meeting (San Francisco, CA): Brown, L.B., B.
Target for O9: Professional Practice Expectations: Evidence-Based Practice

Completed program requirement of student-driven research project progressing over three semesters resulting in a manuscript and/or poster/platform for peer-review and presentation.

Findings 2011-2012 - Target: Met

Target for O10: Professional Practice Expectation: Education  

Findings 2011-2012 - Target: Met  

Target for O11: Patient/Client Management Expectation  

Findings 2011-2012 - Target: Met  

Completed program requirement of student-driven research project progressing over three semesters resulting in a manuscript and/or poster/platform for peer-review and presentation.
M 5: Comprehensive Exams (O: 1, 3, 4, 7, 8, 9, 10, 11, 12)

A comprehensive examination will be administered at the completion of each year for each class.

**Source of Evidence:** Comprehensive/end-of-program subject matter exam

Our program expectation is for our graduates to score the curriculum and clinical experience criteria as met or well met >90%

#### Findings 2011-2012 - Target: Met
2012 graduates of the DPT program ranked 80 curriculum criteria based on accreditation requirements as met or well met at 99%. 2012 graduates of the DPT program ranked 80 clinical experience criteria based on accreditation requirements as met or well met at 97%.
2012 graduates of the DPT program ranked 80 curriculum criteria based on accreditation requirements as met or well met at 99%. 2012 graduates of the DPT program ranked 80 clinical experience criteria based on accreditation requirements as met or well met at 97%.

### M 7: Employer Survey (O: 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12)

Employers of GSU DPT graduates 2009-2011 were surveyed and asked to grade the competence of the graduates on a scale from 5 to 1 (Strongly Agree- Strongly Disagree) on the following characteristics: Communication, Cultural competence, Professionalism, Critical thinking. They were also asked if our graduates would rank in the top 10% of their employees.

Source of Evidence: Employer survey, incl. perceptions of the program

#### Target for O1: Professional Practice Expectation: Accountability

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O2: Professional Practice Expectation: Compassion/Caring

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O3: Professional Practice Expectation: Integrity

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O4: Professional Practice Expectations: Professional Duty

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O5: Professional Practice Expectations: Communication

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O7: Professional Practice: Cultural Competence

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O8: Professional Practice Expectation: Clinical Reasoning

Our program expects a overall employer survey score to equal or exceed 4 (agree) and >80% response for employee rank of 10%.

**Findings 2011-2012 - Target: Met**

Employer survey revealed 11 responses with an average score of 4.3 on all criteria. 91% scored graduates in the top 10%.

#### Target for O9: Professional Practice Expectations: Evidence-Based Practice

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assistant to ACCE**

A Graduate Assistant has been assigned to the ACCE and has been ample to assist in all duties of the position.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 04/2012
- **Responsible Person/Group:** Division Head
- **Additional Resources:** Budget considerations

**Core Faculty Positions**

By the end of Spring 2013 fill two open core faculty positions with qualifications to include: PhD, DSc, DPT with knowledge and teaching experience in acute care, neuro-rehab, pediatrics, and/or geriatrics.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Both positions approved by university and applications are being accepted.
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** Division Head

**Opening Faculty Clinic**

By the end of Spring 2013 open the University approved faculty clinic to serve as a rehabilitation center for the University population and surrounding community, education site for current student population and to advance research opportunities within the division and as promoted by the University Strategic Plan.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** GSU Faculty clinic approved by the University July 2011 and Board of Regents January 2012.
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** Division Head
- **Additional Resources:** Site Determination Clinic Director Finances for start up
- **Budget Amount Requested:** $50,000.00 (one time)

**Student Evaluation Tool**

Develop an advanced student evaluation tool to monitor each students progress as it related to required accreditation criteria and expected outcomes which will be linked with each class and established objective.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** High

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Based on measurement criteria all outcomes for the program were achieved despite only one component of the action plan being accomplished.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Our students continue to score above mean average of national testing upon graduating. We are planning to develop a new measurement tool to allow for improved outcome measures for all criteria with our students throughout the program as to better understand program strengths and/or weaknesses to address advanced learning including critical thinking.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
We are planning to develop a more detailed outcome tool to monitor our students progress through the program including linking all outcomes to current classes and related objectives. This will allow us to identify program strengths and or weaknesses and more importantly assist the students with any specific areas which are in deficit and in need of improvement.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
It has been a good tool to maintain a pulse on the program and the outcome of our students immediate and future success. The established outcomes allow the faculty to reflect back on future needs and/or improvements to consider for the program and student learning. Our current accreditation body requires an annual update on program status which is assisted with this process through our established program objectives and outcome measures.

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No changes this year. Future changes include: Develop an advanced student evaluation tool to monitor each students progress as it related to required accreditation criteria and expected outcomes which will be linked with each class and established objective.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The impact will be one of continuation of a program that is strong in relation to the outcome of our students. As an advanced measurement tool is put in place, we will look forward to the opportunity to further benefit the advancement of our students learning experience. We are considering a curriculum change more in relation to timing of graduation and not effected by the results of this assessment.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
Last years assessment and results were crucial in demonstrating program effectiveness in measuring outcomes of our students in relation to our recent accreditation visit and subsequent re-accreditation status. Based on this 10 year accreditation assessment we learned that we need to better organize how we measure the outcome of our students current progress and transition through the program. The accreditation team felt we had the appropriate measurement tool in place but better organization and planning to demonstrate the use and implementation was recommended and will be implemented.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?
We have a strong program that continues to assist in producing a qualified entry level physical therapist which is our ultimate goal. In consideration of our accreditation process we also realize that we can do a better job organizing, planning and implementing outcome measures to evaluate our students and program.

ADMINISTRATIVE DEPT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
Our current findings will serve to remind our program and faculty of the areas we are successful in and to continue maintaining this high standard. Our goals to improve the program are in hiring faculty for our two open positions, open the approved faculty clinic which will serve to advance student critical thinking skills, and implement a more detailed and organized outcome tool to monitor student and program success. All of these goals should serve to further strengthen and improve the programs status including our most important goal of graduating competent physical therapists.
## Mission / Purpose

The Department of Physics and Astronomy teaches a number of courses in the University Core. Introductory physics and astronomy courses may be either terminal sequences or preparation for additional courses or professional degree programs. The mission of the department in introductory science courses is to provide the students with the ability to understand and analyze their world by making use of the theoretical and practical tools of science, in particular physics and astronomy. The mission of these courses is to:

- a) provide foundational knowledge of the workings of the physical world,
- b) allow students to develop the ability to perform reasoning and analysis from a scientific perspective,
- c) teach both conceptual and practical knowledge of physical processes, and
- d) enhance the students abilities in applying mathematical or technological tools in their analysis.

Where these courses serve as prerequisites to upper division courses or professional degree programs the department also seeks to give the students the content knowledge and skills required to succeed in those courses or programs.

## Goals

### G 1: University Learning Outcome - Critical Thinking

Among the skills developed in introductory science sequences such as those taught in the department of physics & astronomy are those identified by the university as important in all areas of study and fields of preparation. The department supports those learning outcomes by integrating them into the goals of its Area D science courses. One of these learning outcomes is critical thinking. As applied to the introductory science courses, critical thinking is closely related to the ability to understand and apply the scientific process.

### G 2: Area D GenEd Learning Goal

Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

## Student Learning Outcomes/Objectives

### SLO 1: Critical Thinking (G: 1) (M: 2)

A student that complete an Area D laboratory science sequence should be able to:

- a. formulate appropriate questions and testable hypotheses for research;
- b. effectively collect appropriate (empirical) evidence;
- c. apply and integrate principles and concepts to analyze problems within specific core areas;
- d. appropriately evaluate and interpret claims, arguments, evidence and hypotheses;
- e. use the results of analysis to appropriately construct new arguments or alternate hypotheses and formulate new questions.

### SLO 2: Understanding of Mechanics Concepts (G: 2) (M: 3)

Students in Phys1111 and Phys2211 will demonstrate a competent understanding of mechanics, in particular, forces and Newton's Laws.

#### General Education/Core Curriculum Associations

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

### SLO 3: Understanding of Electricity & Magnetism Concepts (G: 2) (M: 4)

Students in Phys1112 and Phys2212 will demonstrate a competent understanding of electricity & magnetism, in particular, charges, electric fields and forces, electric potential and potential energy, currents, magnetic fields and forces and electromagnetic induction.

#### General Education/Core Curriculum Associations

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

## Measures, Targets, and Findings

### M 2: Multiple Choice Questions on Astronomy Final Exams (O: 1)

A set of core questions is included on final exams in every section. These questions stressed physical, spatial, and quantitative reasoning. A sample of the multiple choice questions used can be found at Astr1010.

Source of Evidence: Academic direct measure of learning - other

#### Target for O1: Critical Thinking

The critical thinking questions on the exams are routinely the most difficult. Since they are based in the astronomy taught in the course, they require understanding of the concepts as well as the critical thinking skills being tested here. For this reason, we have set target performance level of an average score of 50% on each question.

**Findings 2011-2012 - Target: Not Reported This Cycle**

No data reported in this cycle.

### M 3: Mechanics Diagnostic Test (O: 2)
Within the lab portion of the courses, students in Phys1111K and Phys2211K take a widely-used multiple choice mechanics diagnostic test at the beginning of the course and again near the end of the course. This test has been developed using the most widely held misconceptions.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target for O2: Understanding of Mechanics Concepts

For the diagnostic test used, published literature in the field gives a score of 60% as a competent understanding of mechanics concepts and 80% as mastery. We have therefore set a goal of 60% for the post test for both Phys1111K and Phys2211K. In addition, physics education researchers often use normalized gain to gauge the success of introductory mechanics courses. Normalized gain for each student is the increase in score from pre-test to post-test divided by the largest gain that student could have achieved. A student who gets the same post-test score as pre-test score has a normalized gain of 0.00. A student who scores a perfect post-test will have a gain of 1.00. A student who increases their score from 30% to 65% will have a normalized gain of 0.50 since their increase was half of their maximum possible increase. Most introductory physics courses show average normalized gains of about 0.25. Courses which integrate interactive engagement techniques often do better. Average normalized gains of 0.40 or higher are labeled in the literature as moderately successful and gains of 0.70 are extremely successful (and rare). The target set for our courses is to improve to moderately successful range of 0.40 or higher.

Findings 2011-2012 - Target: Not Met

For Fall 2011 and Spring 2012, Phys1111K students scored an average of 23% on the pre-test and 41% on the post-test. The average normalized gain was 0.24. Phys2211K students scored an average of 35% on the pre-test and 56% on the post-test. The average normalized gain was 0.32.

M4: Electricity & Magnetism Diagnostic Test (O: 3)

Within the lab portion of the courses, students in Phys1112K and Phys2212K take a multiple choice diagnostic test of electricity & magnetism conceptual understanding. Since the language is often unfamiliar to the students at the beginning of the course and published research indicates there is no value in giving it as a pre-instruction test, it is given only once near the end of the course.

Source of Evidence: Standardized test of subject matter knowledge

Target for O3: Understanding of Electricity & Magnetism Concepts

Only limited data has been published for performance on this diagnostic. In that work at an institution comparable to GSU, post-instruction scores were reported of 44% for a Phys1112 equivalent course and 47% for a Phys2212 equivalent course. We have adopted these values as our initial targets for this measure.

Findings 2011-2012 - Target: Not Met

For the Fall 2011 and Spring 2012, students in Phys1112 scored 32% while students in Phys2212 scored 36%. However, there are still some issues with the timing of the exam compared to the coverage of material in the lecture portion of the course that may have resulted in lower scores than would represent the actual student learning in the courses.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Department Assessment Committee Review

The Departmental Assessment Committee will meet and review the results from the previous three years. They will discuss ways to address the few areas in which targets were not met for Critical Thinking in General Education courses. Among the possible actions discussed will be 1) changes in measurement tools, 2) changes in implementation of measurement tools, and 3) curriculum changes to improve instruction in critical thinking. In addition, the department assessment committee with interact with the IMPACT (Improving Physics & Astronomy Curriculum & Teaching) group so that critical thinking remains a significant factor in the consideration of curricular or pedagogical changes.

Established in Cycle: 2007-2008
Implementation Status: Planned
Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Multiple Choice Questions on Astronomy Final Exams
- Outcome/Objective: Critical Thinking

Implementation Date: September 30, 2008
Responsible Person/Group: Brian Thoms/Department Assessment Committee

Phys1111/Phys1112 Redesign

The first year of data using the new Area D learning outcome and using the diagnostic tests has shown that both the initial scores and the learning outcomes are lower than many scores reported in the literature. We have therefore embarked on some curricular and pedagogical review of one of our course sequences, Phys1111 and Phys1112, the algebra-based introductory physics. Over the course of this process we will standardize the course content over all sections. In addition, we are moving some content to be taught in the laboratory only so that the lecture will be able to concentrate on a smaller core of material. The laboratory portion will then be redesigned to accommodate this material in a stand-alone fashion. This course redesign is expected to take all of the 2011-2012 academic year and be implemented in the 2012-2013 academic year. The department is considering a similar re-examination of the Phys2211/Phys2212 sequence beginning in Fall of 2012.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Implementation Date: Revisions and redesign will be worked out over the course of the 2011/2012 academic year. Revised course content and new laboratory portion will be implemented in the 2012/2013 academic year.
Projected Completion Date: 04/2013
Responsible Person/Group: Brian Thoms

Astr1010/1020 New Assessment

A assessment for the new Area D outcome for the Astr1010/1020 courses will be completed and implemented. First assessment data should be forthcoming in Spring 2013.
Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Projected Completion Date: 06/2013
Responsible Person/Group: Brian Thoms

**Lab/lecture changes in Phys2211/2212**
In 2012-2013 we will plan changes to Phys2211/2212 classes to improve student learning. We will seek funding for significant changes.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Projected Completion Date: 06/2013
Responsible Person/Group: Brian Thoms

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have assessed the new Area D outcome in core physics classes for the second time. The assessment process in core astronomy courses is not functioning and needs to be revised. The transition to assessing the new outcomes was not completed. Revision of the astronomy assessment procedure will be completed in the next cycle. In addition, it has become clear that the timing of our physics assessments in electricity and magnetism results in assessment being done before some material is completed. This is particularly true in Phys2212. In the next cycle we will determine the extent of the problem and devise a solution for more accurate assessments.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The scores on standard assessment instruments in physics core courses are below our targets and are behind benchmarks established for successful reformed courses. We are examining changes to our courses, particularly in Phys2211/2212, the introductory calculus based physics sequence. In the next cycle we will work on planning course changes.

---

**Georgia State University**
**Assessment Data by Section**
**2011-2012 Physics BS**
*(As of 12/12/2016 04:42 PM EST)*
*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**
The Department of Physics and Astronomy offers a bachelor of science in physics. In addition to the standard program in physics, concentrations in Applied Physics, Astronomy, Pre-Medicine, Biophysics, Geology, and Computer Science are available. All bachelor degrees are constructed around a core of upper division physics and math courses which cover the core subject matter for a degree in physics. All physics majors also complete upper division lab and research requirements. In addition to the physics content, instruction in scientific reasoning, scientific writing, and technology are emphasized. The mission of the program is quite broad since students go on to many different career paths. Half of physics majors nationally go to graduate school in some field including physics, math, chemistry, engineering, medicine and law. The other half pursue careers which include research & development, business, technical sales or support, K-12 education, and many others. Due to the rigor of a physics degree program, the overwhelming feature of a student with a physics degree should be the ability to think clearly and apply scientific reasoning. The mission of the B.S. in physics program is to prepare students for a wide variety of fields and activities which require analysis, critical thinking, and the application of physical principles and scientific critical thinking to new situations.

**Goals**

**G 1: Physics Content Knowledge and Application Skills**
Students receiving a B.S. in physics should understand the core principles of physics, usually divided into the areas of classical mechanics, electricity & magnetism, statistical & thermal physics, and quantum physics. In addition students should be able to apply appropriate mathematical tools to set-up and solve quantitative problems using those core principles.

**G 2: Skills of a scientist**
Students receiving a B.S. in physics should demonstrate the skills and abilities needed to use their scientific knowledge and problem-solving skills in a collaborative, technological environment.

**Student Learning Outcomes/Objectives**

**SLO 1: Classical Mechanics (G: 1) (M: 1)**
Students demonstrate a knowledge and understanding of core principles in classical mechanics and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.
**SLO 2: Electricity & Magnetism (G: 1) (M: 1)**
Students demonstrate a knowledge and understanding of core principles in electricity & magnetism and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 3: Statistical & Thermal Physics (G: 1) (M: 1)**
Students demonstrate a knowledge and understanding of core principles in statistical & thermal physics and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 4: Quantum Physics (G: 1) (M: 1)**
Students demonstrate a knowledge and understanding of core principles in quantum physics and effectively apply their knowledge in the above areas to solve problems using advanced mathematical tools where appropriate.

**SLO 5: Scientific Collaboration (G: 2) (M: 2, 3)**
Students collaborate effectively with other students in a laboratory setting as they perform physics experiments.

**SLO 6: Research Implications (G: 2) (M: 3)**
Students effectively evaluate the implications and applications of research and technology and express them in laboratory reports.

**SLO 7: Scientific Critical Thinking (G: 2) (M: 2, 3)**
Students apply the basic scientific process as they perform and report laboratory experiments. That is, they develop research questions appropriate for research, appropriately collect experimental or theoretical data to address identified research questions, analyze and interpret data to evaluate research questions, and use results of data analysis to formulate new research questions.

**SLO 8: Scientific Communication (G: 2) (M: 2, 3)**
Students communicate effectively orally and in writing in a context relevant to scientific research using appropriate formats and styles.

**SLO 9: Scientific & Research Technology (G: 2) (M: 2, 3)**
Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature research and scientific writing in laboratory and research settings.

**SLO 10: Critical thinking through writing (G: 2) (M: 4)**
Students in Phys4900 Research Project course write a long research report over the course of the semester. They write the report in sections with feedback from instructor and other students followed by revisions. The final report is evaluated using the physics CTW rubric.

### Measures, Targets, and Findings

**M 1: Evaluations in Content Courses (O: 1, 2, 3, 4)**
Physics Majors take a number of required courses in their junior and senior years that cover the content in the Physics and Math Core. The core content courses are Phys3401 (Modern Physics I), Phys3850 (Statistical and Thermal Physics), Phys4600 (Classical Mechanics), and Phys4700 (Electricity and Magnetism). The outcomes are assessed by the instructors for each of the core courses by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty. The criteria for each course are in the Document Repository and are linked below.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Classical Mechanics**
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2011-2012 - Target:** Not Reported This Cycle

Not reported in this cycle.

**Target for O2: Electricity & Magnetism**
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2011-2012 - Target:** Not Met

Eleven physics majors completed Phys4700, Electricity Magnetism, in the Fall 2011 semester. According to the criteria given above, the average evaluation for their knowledge and understanding of core principles in this area was 3.6 out of 5.0. The average evaluation for their ability to use mathematics to solve problems in this area was 3.0 out of 5.0.

**Target for O3: Statistical & Thermal Physics**
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

**Findings 2011-2012 - Target:** Not Reported This Cycle

Not reported in this cycle.
### Target for O4: Quantum Physics
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

#### Findings 2011-2012 - Target: Met

Twenty three physics majors completed Phys3401, Modern Physics I, in Fall 2011 semester. According to the criteria given above, the average evaluation for their knowledge and understanding of core principles in this area was 4.0 out of 5.0. The average evaluation for their ability to use mathematics to solve problems in this area was 4.3 out of 5.0.

### M 2: Laboratory Reports in Advanced Physics Lab (O: 5, 7, 8, 9)
Physics Majors are also required to take a junior-level laboratory course, Phys3300 (Advanced Physics Laboratory). This course is designed to bring the student from the level of the introductory physics labs (where goals and procedures are mostly given to them) up to a level where they are prepared to do a Research Project (more independent and open-ended project, collaborating with graduate students and professors in a research lab). The development of critical thinking skills and appropriate written communication (lab notebooks and lab reports) are emphasized. In this lab course the students work both independently and collaboratively. They also use computers and other specialized laboratory apparatus. The outcomes are assessed by the instructor by rating each student on each outcomes with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and have been placed in the Document Repository and linked below.

Source of Evidence: Academic direct measure of learning - other

#### Target for O5: Scientific Collaboration
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

#### Findings 2011-2012 - Target: Not Reported This Cycle
Not reported in this cycle.

#### Target for O7: Scientific Critical Thinking
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

#### Target for O8: Scientific Communication
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

#### Target for O9: Scientific & Research Technology
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

### M 3: Senior Research Project (O: 5, 6, 7, 8, 9)
The capstone of the physics bachelor's degree program for catalog years prior to Fall 2009 is Phys4950, Senior Research. In this course students work in the research lab of a professor (within Physics and Astronomy or another department) to perform a research project. The project is one that is integrated with the ongoing research done in that group and may lead to the student being part of a presentation at a scientific conference or an article in a scientific journal. It is meant to prepare students for graduate work or a career in corporate research and development or basic research. The student participates in research group interaction (e.g. group meetings) over the course of the project. At the conclusion of the project, the student presents his/her results as a written and oral report. The outcomes are assessed by the faculty mentor overseeing the students senior research project by rating the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty. Criteria for assessment have been placed in the Document Repository and are also linked below. Beginning with the Fall 2009 catalog, physics majors will be required to complete a 3 credit hour CTW course, Phys4900, Research Project, instead of the 1 credit hour Senior Research. This course will be taught each spring semester and possibly also in the summer.

Source of Evidence: Capstone course assignments measuring mastery

#### Target for O5: Scientific Collaboration
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

#### Findings 2011-2012 - Target: Not Met
Three physics majors were assessed for Senior Research projects, Phys4950, in 2011-2012. According to the criteria given above, the average evaluations were 3.7 out of 5.0 for scientific collaboration.

#### Target for O6: Research Implications
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.

#### Findings 2011-2012 - Target: Not Met
Three physics majors were assessed for Senior Research projects, Phys4950, in 2011-2012. According to the criteria given above, the average evaluations were 3.7 out of 5.0 for research implications.

#### Target for O7: Scientific Critical Thinking
Target performance is an average score of 4.0 out of 5.0 where 4.0 corresponds to substantial understanding and 5.0 corresponds to mastery. See attached rubric for more detailed information.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Implementation of Assessment in CTW courses

The program's two CTW courses are being taught for the first time this year. These two courses replace courses previously used as major parts of our assessment of student learning outcomes. The assessments are being migrated over to the new courses. The interplay between CTW assessments and learning outcomes assessment is being worked out. Phys3300, the new lab course, is being taught for the first time in the Fall of 2009. Phys4900, the new research class, is being taught for the first time in Spring 2010. Since most of our upperclassmen are under the older catalogs, many will still complete the older research class (fewer credit hours and less externally supervised written work). Since the program is relatively small, the performance of the assessments while students are split between two different research requirements creates some unknowns in our assessment which will only be revealed in the spring term.

Established in Cycle: 2008-2009

Implementation Status: In-Progress

Priority: High

Relationships (Measure | Outcome/Objective):

- Measure: Laboratory Reports in Advanced Physics Lab | Outcome/Objective: Scientific & Research Technology
- Scientific Collaboration | Scientific Communication | Scientific Critical Thinking
- Measure: Senior Research Project | Outcome/Objective: Research Implications
**Implementation Description:** New courses are being taught for the first time over the 2009-2010 academic year. Phys3300 is being taught in Fall 2009 and Phys2900 in Spring 2010.

**Projected Completion Date:** 04/2010

**Responsible Person/Group:** Brian Thoms

---

**Curriculum Evaluation**

Physics BS Curriculum will be re-evaluated in light of assessment data. New courses are needed (such as Relativity and Computational Physics). Some change to math preparation requirements has been proposed as has introduction of new upper division lab courses.

**Established in Cycle:** 2011-2012

**Implementation Status:** In-Progress

**Priority:** Medium

**Projected Completion Date:** 05/2014

**Responsible Person/Group:** Brian Thoms

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In 2011-2012, our capstone research requirement was in transition from the one credit hour Senior Research (Phys4950) to the three credit hour Research Project-CTW (Phys4900). The amount of research required along with the writing involved was increased.

The new research project was assessed using the CTW rubric which focuses on critical thinking as expressed through the written research report. This transition is continuing and in 2012-2013 we expect a larger number of students completing the Research project.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Our assessment data shows us that we are doing pretty well in the research outcomes but not as well in some content areas. However, since we are lacking data in some required courses we have difficulty drawing conclusions. In the coming year we will be making an increased effort to collect assessment data in these classes.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Physics MS**

(As of: 12/12/2016 04:42 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

---

**Mission / Purpose**

Coming Soon

---

**Goals**

G 1: Coming Soon

G 2: Research Skills

Students receiving a M.S. in physics should demonstrate the skills and abilities needed to use their scientific knowledge and problem-solving skills in a collaborative, technological environment.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Collaboration in Scientific Research (M: 2, 3)**

Students collaborate effectively with colleagues including other students, postdoctoral researchers, committee members, faculty advisor, and outside research collaborators.

**SLO 2: Motivations and Implications of Research (M: 4, 5, 6)**

Students effectively evaluate the implications and applications of research and technology.

**SLO 3: Scientific Critical Thinking (M: 4, 5, 6)**

Students apply the basic scientific process as they perform and report their research. That is, they develop research questions appropriate for research, appropriately collect experimental or theoretical data to address identified research questions, analyze and interpret data to evaluate research questions, and use results of data analysis to formulate new research questions.
**SLO 4: Scientific Communication (M: 2, 3, 4, 5, 6)**

Students communicate effectively orally and in writing in a context relevant to scientific research using appropriate formats and styles for scientific journals, meetings, conferences, or colloquia.

**SLO 5: Physics & Astronomy Knowledge and Math Skills (M: 1, 4, 6)**

Students demonstrate knowledge of core principles, and an ability to apply that knowledge, in advanced classical mechanics, advanced electromagnetic theory, and quantum mechanics. Astronomy concentration students will instead demonstrate knowledge of core principles, and an ability to apply that knowledge, in at least two of the above areas, as well as in the fundamentals of astrophysics.

**SLO 6: Scientific & Research Technology (M: 2, 3, 5)**

Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature research and scientific writing in laboratory and research settings.

### Measures, Targets, and Findings

**M 1: Astronomy Qualifying Exam I (O: 5)**

As part of the astronomy concentration, each astronomy graduate student takes a first qualifying exam, consisting of an extensive written exam on the broad scope of astronomy and astrophysics and the essential skills required to apply the relevant physical and mathematical reasoning. Students are counseled at this point on their preparedness for further study. The learning outcomes related to core principles and math skills are assessed by the exam committee by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty which can be found at Astronomy Qualifying Exam I Assessment Form.

Source of Evidence: Academic direct measure of learning - other

**Target for O5: Physics & Astronomy Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**M 2: Astronomy Advisor (O: 1, 4, 6)**

Physics M.S. with Astronomy Concentration (non-thesis option) students work in close collaboration with their research advisor and committee throughout the course of their M.S. program. The advisor has the opportunity to observe and evaluate the student’s progress in collaboration, knowledge content, and technology. The learning outcomes are assessed by the advisor at the completion of M.S. degree requirements by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty which can be found at Astronomy MS Advisor Evaluation Form.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Collaboration in Scientific Research**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O6: Scientific & Research Technology**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**M 3: Physics Advisor (O: 1, 4, 6)**

Physics M.S. (non-thesis option) students work in close collaboration with their research advisor and committee throughout the course of their M.S. program. The advisor has the opportunity to observe and evaluate the student’s progress in collaboration, knowledge content, and technology. The learning outcomes are assessed by the advisor at the completion of M.S. degree requirements by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty which can be found at Physics MS Advisor Evaluation Form.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Collaboration in Scientific Research**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O6: Scientific & Research Technology**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**M 4: Physics Committee Research Paper (O: 2, 3, 4, 5)**

Physics M.S. (non-thesis option) students work in close collaboration with their research committee throughout the course of their M.S. program. Students write a research paper which is reviewed by a committee of faculty members. The learning outcomes related to the research paper are assessed by the committee at the completion of degree requirements by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty which is part of the Physics MS Committee Evaluation Form.

**Target for O3: Scientific Critical Thinking**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O5: Physics & Astronomy Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**M 6: Physics Presentation and General Examination (O: 2, 3, 4, 5)**

Physics M.S. (non-thesis option) students work in close collaboration with their research committee throughout the course of their M.S. program. Students take a general examination (typically an oral examination) administered by a committee of faculty members. The learning outcomes related to the general examination are assessed by the committee at the completion of degree requirements by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are part of the Physics MS Committee Evaluation Form.

Source of Evidence: Presentation, either individual or group

**Target for O2: Motivations and Implications of Research**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O3: Scientific Critical Thinking**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**Target for O5: Physics & Astronomy Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 maximum for each learning outcome.

**M 7: Astronomy Thesis Defense**

Physics M.S. with Astronomy concentration (thesis option) students present their research in a general colloquium which is followed by a defense in front of their committee of three to five faculty members. The learning outcomes related to the defense are assessed by the committee at its completion by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are part of the Physics MS with Astronomy Concentration Committee Evaluation Form.

Source of Evidence: Presentation, either individual or group

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assessment Committee Review and Report**

The departmental assessment committee will present the results for this past year (along with the previous 3 years) to the faculty to keep them informed on the performance of the M.S. students in both the physics and the astronomy track. The assessment shows
very high achievement of learning goals for students in both tracks of the MS in Physics program. In past years there have been occasional low scores in some areas but all results were very good this year. Therefore, the departmental assessment committee will not be recommending any changes in either the assessment methods or the curriculum at this time.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):

Coming Soon

**Student Learning Outcomes/Objectives**

**SLO 1: Collaboration in Scientific Research (M: 2)**
Students collaborate effectively with colleagues including other students, postdoctoral researchers, committee members, faculty advisor, and outside research collaborators.

**SLO 2: Motivations and Implications of Research (M: 3, 4)**
Students effectively evaluate the implications and applications of research and technology.

**SLO 3: Scientific Critical Thinking (M: 3, 4)**
Students apply the basic scientific process as they perform and report their research. That is, they develop research questions appropriate for research, appropriately collect experimental or theoretical data to address identified research questions, analyze and interpret data to evaluate research questions, and use results of data analysis to formulate new research questions.

**SLO 4: Scientific Communication (M: 2, 3, 4)**
Students communicate effectively orally and in writing in a context relevant to scientific research using appropriate formats and styles for scientific journals, meetings, conferences, or colloquia.

**SLO 5: Physics Knowledge and Math Skills (M: 1, 3, 4)**
Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Students demonstrate knowledge of core principles, and an ability to apply that knowledge, in advanced classical mechanics, advanced electromagnetic theory, advanced quantum mechanics, and advanced statistical mechanics. Students in the applied physics or biophysics options shall be able to demonstrate and apply knowledge in certain alternative areas appropriate to their specialties. Students demonstrate and apply appropriate mathematical skills in the context of their specialization, including matrix algebra, vector and tensor analysis, Fourier series and boundary value problems, and complex analysis.

**SLO 6: Scientific & Research Technology (M: 2)**
Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature research and scientific writing in laboratory and research settings.
# Measures, Targets, and Findings

## M 1: Physics Qualifying Exam (O: 5)

Normal Students take a number of required courses during their first three semesters that cover the physics and math content for their particular area of research. Following their third semester they take a Qualifying Examination (Q-exam) in the areas applicable to their area of research. The learning outcomes related to core principles and math skills are assessed by the exam committee by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and can be found in the Physics Qualifying Exam Evaluation Forms for Classical Mechanics, Electricity & Magnetism, Statistical Mechanics, and Quantum Mechanics.

Source of Evidence: Academic direct measure of learning - other

### Target for O5: Physics Knowledge and Math Skills

Target performance is 4.0 out of 5.0 for each learning outcome.

### Findings 2011-2012 - Target: Not Reported This Cycle

No results were reported for this cycle.

## M 2: Research Advisor Evaluation (O: 1, 4, 6)

The students work in close collaboration with their research advisor throughout the course of their Ph.D. program. The advisor has the opportunity to observe and evaluate the student’s progress in collaboration and technology. The learning outcomes are assessed by the research advisor following the student’s successful dissertation defense. The advisor rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are the first section of the advisor evaluation form.

Source of Evidence: Academic direct measure of learning - other

### Target for O1: Collaboration in Scientific Research

Target performance is 4.0 out of 5.0 for each learning outcome.

### Target for O4: Scientific Communication

Target performance is 4.0 out of 5.0 for each learning outcome.

### Target for O6: Scientific & Research Technology

Target performance is 4.0 out of 5.0 for each learning outcome.

## M 3: Committee Evaluation of Dissertation (O: 2, 3, 4, 5)

In the dissertation and oral defense, the student presents the motivation, methods, results, and implications of their research. When the student has finished the dissertation, and successfully defended it, the members of the dissertation committee produce a final assessment. Based on the written dissertation, the committee assesses the learning outcomes related to motivation and implications, the scientific process, written communication skills, and physics, astronomy, and math knowledge and application. The committee rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are sections of the documents available in the committee member evaluation form and advisor evaluation form.

Source of Evidence: Senior thesis or culminating major project

### Target for O2: Motivations and Implications of Research

Target performance is 4.0 out of 5.0 for each learning outcome.

### Target for O3: Scientific Critical Thinking

Target performance is 4.0 out of 5.0 for each learning outcome.

### Target for O4: Scientific Communication

Target performance is 4.0 out of 5.0 for each learning outcome.

### Target for O5: Physics Knowledge and Math Skills

Target performance is 4.0 out of 5.0 for each learning outcome.

## M 4: Committee Evaluation of Doctoral Defense (O: 2, 3, 4, 5)

In the dissertation and oral defense, the student presents the motivation, methods, results, and implications of their research. When the student has finished the dissertation, and successfully defended it, the members of the dissertation committee produce a final assessment. Based on the oral presentation and defense, the committee assesses the learning outcomes related to motivation and implications, the scientific process, communication skills, and physics, astronomy, and math knowledge and application. The committee rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are sections of the documents available in the committee member evaluation form and advisor evaluation form.

Source of Evidence: Presentation, either individual or group

### Target for O2: Motivations and Implications of Research

Target performance is 4.0 out of 5.0 for each learning outcome.

### Target for O3: Scientific Critical Thinking
Target performance is 4.0 out of 5.0 for each learning outcome.

**Target for O4: Scientific Communication**
Target performance is 4.0 out of 5.0 for each learning outcome.

**Target for O5: Physics Knowledge and Math Skills**
Target performance is 4.0 out of 5.0 for each learning outcome.

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Political Science Assessment of Core**

*As of: 12/12/2016 04:42 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**
The mission of the Department of Political Science’s undergraduate program and its central role in the University core curriculum is to increase substantive knowledge, analytical skills and communication skills by educating students about governmental institutions and processes in the state of Georgia, the United States and the World.

**Goals**

**G 1: Substantive Knowledge**
The department seeks student learning outcomes of substantive knowledge and understanding about American and Georgian government commensurate with the performance of duties of citizenship and maintenance of stable and effective civil society, and to recognize the universality of politics in human experience, an appreciation of political issues from a global perspective, and an appreciation of global issues from a political perspective.

**G 2: Analytic skills**
The department seeks to improve basic analytic skills through the core curriculum courses.

**G 3: Communication Skills**
The department seeks student learning in oral and written communications.

**Student Learning Outcomes/Objectives**

**SLO 1: Substantive Knowledge in American and Global Politics (G: 1) (M: 1)**
First learning outcome: Students should demonstrate understanding of the structures and processes of American government commensurate with the performance of citizenship duties and the stability of an effective civil society. Specifically, students should have a fundamental knowledge of constitutionalism, federalism, separation of powers, civil liberties, and the electoral process.
Second learning outcome: Students should demonstrate recognition of the universality of politics in human experience and understanding of major global issues, an appreciation of political issues from a global perspective, and an appreciation of global issues from a political perspective.
Measures, Targets, and Findings

M 1: Measures of Substantive Knowledge (O: 1)
Concerning the first learning outcome (American government), students should be able to pass exams involving these concepts. The department uses ten (10) common questions that all sections of POLS 1101 administer to students as part of various quizzes and examinations. These questions assess students on, among other objectives, the acquisition of substantive knowledge. student scores on these questions are compiled to show passing rate on these questions as a measure of learning outcomes for the course. In addition the department collects data involving the overall pass rate for these classes. Concerning the second learning outcome (Global Issues), students should be able to pass exams demonstrating the political nature of global issues. The department uses fifteen (15) common questions that all sections of POLS 2401 administer to students as part of various quizzes and examinations. These questions assess students on, among other objectives, the acquisition of substantive knowledge. student scores on these questions are compiled to show passing rate on these questions as a measure of learning outcomes for the course. In addition the department collects data involving the overall pass rate for these classes.

Target for O1: Substantive Knowledge in American and Global Politics
The department assesses student learning outcome in this area by two measures for each of the two courses (POLS 1101 & POLS 2401). For POLS 1101 The department seeks a pass rate of 75% for each individual common question. In addition the department also seeks to achieve a target of 75% of students earning a grade of C or higher in the course. For POLS 2401 The department seeks a pass rate of 60% for each individual common question. In addition the department also seeks to achieve a target of 75% of students earning a grade of C or higher in the course. The goal is to eliminate use of grades for learning assessment in the next reporting cycle.

Findings 2011-2012 - Target: Met
Please see attached report of learning outcomes in both POLS 1101 and POLS 2401 FY 2011-2012.

M 2: Measures of Analytic Skills (O: 2)
The assessment of this goal is the same for both learning outcomes listed above (an understanding of the difference between normative and descriptive explanations of political behavior, and an ability to assess evidence using principles of logical analysis and be able to apply that evidence when making conclusions).

Target for O2: Analytic Skills in Introductory Political Science
For POLS 1101 student responses to the 10 common questions many of which involve use of analysis are used to measure analytic skills. The department aims at achieving a passing rate of 75% on the 10 common questions for assessment. For POLS 2401 student performance on various exercises designed to elicit use of analytic skills are used for assessment. Faculty are...
asked to assign a score ranging from 0 to 4 for each student’s performance on this exercise. 4= Excellent, 3= Very Good, 2= Satisfactory, 1= Passing and 0= Failing. A sample exercise used for this is attached below. The achievement target for the objective is an average score of 2.25 on the above scale.

**Findings 2011-2012 - Target: Met**

Please see attached report of learning outcomes in both POLS 1101 and POLS 2401 Analytic Skills FY 2011-2012.

**M 3: Measures of Communication Skills (O: 3)**

Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Instructors POLS 2401 were asked to assess each student’s performance on a written assignment and rate it on a scale of 1 to 4 as follows - Sophisticated 4, Competent 3, weak 2, Poor 1 See written assignments attached.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Communication Skills in Political Science**
The department seeks an average score of 2.5 or higher on the four point assessment of the written assignment

**Findings 2011-2012 - Target: Met**

Please see attached report of learning outcomes in POLS 2401 Communications Skill FY 2011-2012.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Electronic text for Global Issues POLS 2401**

One of the major challenges of teaching the Global Issues course POLS 2401 has been the absence of a text which would cover all the core issues discussed at an appropriate level and the outdated nature of much material in traditional texts. It was decided that the best way to solve these issues was to develop an electronic text to be used in the course.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** The department (in conjunction with a major publisher) has developed an electronic text which will be used starting spring 2011. This will enable us to select appropriate material from a variety of different sources as well as to update the material more rapidly.
- **Projected Completion Date:** 07/2010

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Political Science BA**

As of: 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The Department of Political Science is committed to preparing undergraduate majors to think critically, to communicate ideas and arguments effectively, to make informed choices, and to engage in creative problem-solving. The Department’s mission also includes grounding its students in the methodology of social science as well as preparing students for the practical and professional application of their course of study. Moreover, the Department strives to create an important experiential component to the BA program in Political Science, encouraging study abroad, discipline-oriented internships, and participation in competitive academic teams (Mock Trial, Model United Nations, Model Arab League). The Department of Political Science seeks to fulfill the above mission by offering undergraduate students education in the five major sub-fields of the discipline: American Politics, Comparative Politics, International Relations, Political Theory, and Public Administration/Policy. We offer specific concentrations in prelaw education and in International Relations. The BA program in Political Science endeavors to ensure that students get broad exposure to these fields. The Department is exceptionally well placed to help realize the University’s mission of producing responsible citizens who can contribute to the ideals of an open, democratic and global society. The Department seeks to enhance student participation outside the classroom, to stimulate and award academic excellence, and to stimulate general awareness throughout the University community of the nature and impact of the field of Political Science.

**Goals**

**G 1: Understanding of US and global political institutions and behavior**

All students in the BA program in Political Science will demonstrate basic understanding of political institutions and behavior both in the United States and globally.

**G 3: Developing critical thinking skills appropriate to the discipline**

All students in the BA program in Political Science will demonstrate critical thinking skills appropriate to the discipline.

**G 4: Effective written and oral communications**

All students in the BA program in Political Science will demonstrate effective writing and oral presentation skills.

**G 2: Methodological and analytical skills**

All students in the BA program in Political Science will demonstrate a competence in methodological and analytical skills.
**Student Learning Outcomes/Objectives**

**SLO 1: Appropriate methodological and analytical skills (G: 2) (M: 1)**

Students will demonstrate methodological skills appropriate to the Major. Specifically students will demonstrate basic knowledge of the use of social statistics. Students will demonstrate an ability to understand data reported in various forms. Students will demonstrate an ability to conduct research using traditional and new technological resources. Students will demonstrate an understanding of the scientific method, including the formulation of hypotheses and the role of independent, control and dependent variables.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 2: Critical thinking (G: 3) (M: 2)**

Students will demonstrate competence in six critical thinking skills identified as central to the discipline of political science - identification of question or issue, consideration of assumptions and/or context, formulation of a testable hypothesis, collection and presentation of facts/data, analysis of facts and data, and integration and synthesis of other perspectives.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 3: Effective Communication (G: 4) (M: 3)**

Students will demonstrate the ability to write a paper or make an oral presentation with a clear thesis statement or question, support this statement or address this question in a logical manner, and draw logical conclusions from findings.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 4: Substantive Knowledge- US structures and processes (G: 1) (M: 4)**

Students will demonstrate understanding of the structures and processes of the institutions of government and the behavior of governmental and non governmental actors in the United States. Specifically, students will demonstrate a fundamental knowledge of constitutionalism, federalism, knowledge of the key institutions of government and the key actors as well as separation of powers, civil liberties, and the electoral process for American Government.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 5: Substantive knowledge -Global structures and processes (G: 1) (M: 5)**

Students will demonstrate understanding of the structures and processes of international institutions and the government and the behavior of governmental and non governmental actors in the international system. Students will demonstrate understanding of political issues from a global perspective, and an appreciation of global issues from a political perspective. Specifically students will demonstrate an understanding of comparative perspectives and the international system.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Measures, Targets, and Findings**

**M 1: Methodological Skills (O: 1)**

The department uses assessments from a number of courses to assess learning outcomes for this objective. 1. Instructors for POLS 3800 - Introduction to political research (a required course for all majors) are asked to assess student learning in several methodological skills using a rubric (see attached rubric). Assessment scores from the first three items on the rubric are used to assess learning outcome for this objective. 2. Instructors in POLS 3200, POLS 3400 (required courses for International Affairs Concentration) and POLS 3140 (Required course for pre-law concentration) are asked to evaluate student learning outcomes in use of methodological skills in written assignments and papers submitted as part of the course. This measure uses a five (5) point scale to assess students. A score of five (5) representing the highest level of learning outcomes and one (1) the lowest. The scale is as follows: 1. Demonstrates an absence of methodological skills 2. Demonstrates basic understanding and use of methodological skills 3. Demonstrates competency in methodological skills 4. Demonstrates mastery of methodological skills 5. Demonstrates sophistication in methodological skills.

Source of Evidence: Academic direct measure of learning - other.

**Target for O1: Appropriate methodological and analytical skills**

On the POLS 3800 rubric the department expects 80% of students to score 1 or better out of two on the three items of the rubric used to measure achievement of this objective. On the assessments from POLS 3200, POLS 3400 and POLS 3140 The department seeks a learning outcome score of three (3) or better in methodological skills appropriate to the major.

**Findings 2011-2012 - Target: Met**

286 students took POLS 3800 in the Fall and Spring Semesters of 2011-2012. 14 sections of the course were taught during the period. The three assessment scores (on the first 3 items of the rubric) used to assess outcomes for this objective yielded the following. On the Identification of Research Question assignment 69.0% of our students scored a 2 (competent). 33.2% scored a 1 (Developing) 1.4% scored a 0 (Absent). On the Formulation of Testable Hypothesis assignment 62.6% of our students scored a 2 (competent), 34.3% scored a 1 (Developing) 2.8% scored a 0 (Absent). Percentage figures are rounded off. On the Analysis of Data/Facts assignment 58.7% of our students scored a 2 (competent), 38.5% scored a 1 (Developing) 2.8% scored a 0 (Absent). Percentage figures are rounded off. Instructor scores on assessments of student methodological skills in the other courses were as follows - POLS 3200 - 4.50; POLS 3400 - 3.90 and POLS 3140 - 3.65.
M 2: Critical Thinking measures (O: 2)

This measure evaluates student achievement in terms of critical thinking skills identified by the department as critical thinking skills appropriate to the major. The department uses learning assessments from POLS 4900 (CTW course) to measure achievement in this objective. The course uses a rubric for this assessment (Please see attached rubric). The first six items of the POLS 4900 Assessment rubric are used to assess learning outcomes for critical thinking.

Source of Evidence: Academic direct measure of learning - other

Target for O2: Critical Thinking

We expect 80% of our students to score a 3 or better on each of the six items on the rubric (the first six) being used to measure critical thinking learning outcomes.

Findings 2011-2012 - Target: Met

On the effective formulation of the research question portion of the rubric (items 1-3) the scores were as follows 1. Identification of question or issue - 29.3% of our students scored a 5 (Sophisticated), 59.8% scored 3-4 (Competent) 11% scored 1-2 (Developing). 2. Consideration of assumptions and/or context - 23.2% of our students scored a 5 (Sophisticated), 58.5% scored 3-4 (Competent) 18.3% scored 1-2 (Developing). 3. Formulation of a testable hypothesis - 18.3% of our students scored a 5 (Sophisticated), 64.6% scored 3-4 (Competent) 18.3% scored 1-2 (Developing). On the effective collection and use of data portion of the rubric (items 4-5) the scores were as follows 4. Collection and presentation of facts/data - 32.9% of our students scored a 5 (Sophisticated), 51.2% scored 3-4 (Competent) 15.9% scored 1-2 (Developing). 5. Analysis of facts/data - 26.8% of our students scored a 5 (Sophisticated), 59.8% scored 3-4 (Competent) 13.4% scored 1-2 (Developing). On the Integration and synthesis of other perspectives - 26.8% of our students scored a 5 (Sophisticated), 54.7% scored 3-4 (Competent) 18.7% scored 1-2 (Developing). Percentage figures are rounded off. Percentage figures are rounded off.

M 3: Effective Communication (O: 3)

Normal 0 false false false EN-US X-NONE X-NONE The assessment of effective communications skill was carried out using two courses (Both of them CTW courses and required of all majors) POLS 3800 and POLS 4900. Both these courses use rubrics to assess learning (Please see attached rubrics). The last items on each of these rubrics deal with communication skills and are used to assess learning for this objective.

Source of Evidence: Academic direct measure of learning - other

Target for O3: Effective Communication

On the POLS 3800 assessment Rubric we expect 80% of our students to score 1 or higher out of a possible score of 2 on Item four (4) of the rubric. On the POLS 4900 assessment rubric we expect 80% of our students to score 3 or higher out of a possible score of 5 on item seven (7) of the rubric.

Findings 2011-2012 - Target: Met

On the Effective Presentation of Conclusions Skill On the POLS 3800 assessment rubric 63.6% of our students scored 2 (Competent), 33.9% scored 1 (Developing) and 2.4% scored 0 (Absent). On the Presentation of conclusions skill on the POLS 4900 Assessment Rubric 25.2% of our students scored a 5 (Sophisticated), 55.4% scored 3-4 (Competent) 19.4% scored 1-2 (Developing). On the Integration and synthesis of other perspectives - 26.8% of our students scored a 5 (Sophisticated), 54.7% scored 3-4 (Competent) 18.7% scored 1-2 (Developing). Percentage figures are rounded off.

M 4: Measure of substantive knowledge US structures and processes (O: 4)

Source of Evidence: Academic direct measure of learning - other

Target for O4: Substantive Knowledge- US structures and processes

The department seeks a learning outcome score of three (3) or better in substantive knowledge of American political structures and processes.

Findings 2011-2012 - Target: Met

In the period Fall 2011 to Spring 2012 187 students took POLS 3140. The learning outcome score for substantive knowledge in this course during the period was 4.01

M 5: Measure substantive knowledge global structures and processes (O: 5)

The Department offers three concentrations in the major, General Political Science, Pre Law and International Relations with different course requirements for each concentration. Students must earn 27 credit hours in the major to graduate and must take at least one course in three of the five subject areas in political science, to wit, American Government, Comparative Politics, International Relations, Public Administration and Political Theory. Currently the only courses that all majors must take are PolS 3800, Introduction to Political Research and POLS 4900 (starting incoming class Fall 2009). Capstone Seminar. Students in International Affairs take PolS 3200, Comparative Politics and PolS 3400, International Relations, while student in Pre Law take the introductory course of PolS 3140, Judicial Politics and Process. POLS 3200 and 3400 instructors were asked to evaluate learning outcomes in substantive knowledge in the area of American government and processes for each student using results of exams and quizzes as well as written work turned in for the course. They used the following five (5) point scale, with five (5) representing the highest level of learning outcomes and one (1) the lowest. The instructors rated each student in the following subject area: overall knowledge/mastery of the subject matter. The scale is as follows: 1. Demonstrates an absence of knowledge 2. Demonstrates basic knowledge 3. Demonstrates competency 4. Demonstrates mastery 5. Demonstrates sophistication See examples of attached projects and quizzes used in POLS 3200 and POLS 3400

Source of Evidence: Academic direct measure of learning - other

Target for O5: Substantive knowledge -Global structures and processes

The department seeks a learning outcome score of three (3) or better in substantive knowledge of global political structures and processes.

Findings 2011-2012 - Target: Met

In the period from Summer 2011 to Spring 2012 225 students took POLS 3200. The learning outcome score for substantive
knowledge this course during the period was 3.50. In the period from Summer 2010 to Spring 2011, 215 students took POLS 3400. The learning outcome score for substantive knowledge this course during the period was 3.94.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Improved Advising
The Department of Political Science continues to prioritize improvements in undergraduate advising. Working in tandem with the A&S Office of Academic Assistance, Political Science has developed a system of assigning faculty advisors to all majors. Early and sustained interaction with advisees should yield improvements in students' ability to navigate the major, course selection, and exposure to extracurricular opportunities (internships, study abroad, and the like).

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Additional Resources:** The Department's approved Action Plan (2008) provides for the hiring of a staff academic advisor. Funds for that position have not, however, been released.

#### Development of assessment tools
The department plans to devote resources to development of more sophisticated and nuanced assessment tools to be used to assess learning outcomes for this objective.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** On-Hold
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Measure of substantive knowledge US structures and processes | **Outcome/Objective:** Substantive Knowledge- US structures and processes

- **Projected Completion Date:** 08/2012
- **Responsible Person/Group:** Instructors in American Politics and pre-law
- **Additional Resources:** Summer Money 2011
- **Budget Amount Requested:** $6,000.00 (one time)

#### Development of Assessment tools
The department plans to devote resources for assessment tools to allow for a more comprehensive assessment program for this outcome.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** Measure substantive knowledge global structures and processes | **Outcome/Objective:** Substantive knowledge - Global structures and processes

- **Implementation Description:** No action due to lack of funding
- **Projected Completion Date:** 08/2012
- **Responsible Person/Group:** Instructors in international and comparative politics courses
- **Additional Resources:** Summer money
- **Budget Amount Requested:** $12,000.00 (one time)

---

**Georgia State University**

### Assessment Data by Section

**2011-2012 Political Science MA**

*(As of 12/12/2016 04:42 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

#### Mission / Purpose
The Department of Political Science offers comprehensive programs leading to the Master of Arts degree. Covering all of the discipline's major fields - American politics, Comparative Politics, International Relations, and Political Theory - the programs are designed to produce scholars and practitioners who are experts in their substantive field of study and who are able to combine theoretical sophistication with methodological rigor. MA students can pursue a general program in Political Science or specialize in American Politics, Comparative Politics/International Relations, or Professional Political Practices. The Department's mission is to simultaneously (1) fill a much-needed niche in the Atlanta area and in the region for a strong terminal Master's program and (2) provide the proper research foundation for those excellent students who wish to continue on for a PhD.

#### Goals

**G 1: Strong Analytical Skills**
MA candidates are skilled at analysis and possess analytical skills commensurate with their area of specialization.

**G 2: Deepening of Substantive Knowledge**
MA candidates are informed scholars with advanced substantive knowledge of the research literature in political science.

**G 3: Deepening of Method Skills**
MA students are knowledgeable researchers with demonstrable social scientific methods skills, both quantitative and qualitative.
### Student Learning Outcomes/Objectives

#### SLO 1: Use of Appropriate Research Skills (G: 1) (M: 1)

MA students demonstrate research skills commensurate with their area of specialization.

#### Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

#### SLO 2: Mastery of Relevant Research Literature (G: 2) (M: 1)

Masters students demonstrate substantive knowledge of the research literature in their area of specialization.

#### Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

#### SLO 3: Effective Reporting of Research Findings (G: 3) (M: 1)

Masters students demonstrate their ability to formulate research questions, synthesize such questions with appropriate literature, utilize appropriate research methods to answer the question(s), and analyze data so as to answer the question(s) and raise additional questions.

#### Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).
5.5 Other efforts in support of Goal 5 (Globalizing the University).

### Measures, Targets, and Findings

#### M 1: Review of Thesis and Non-Thesis Projects (O: 1, 2, 3)

The members of each MA thesis committee or of a non-thesis paper will individually assess the student’s achievement in terms of the program's stated learning objectives. Students are assessed as to the degree to which the thesis or non-thesis demonstrates the student's achievement of each learning goal; the scale ranges from 1, very little degree, to 5, very high degree of achievement.

Source of Evidence: Written assignment(s), usually scored by a rubric

#### Target for O1: Use of Appropriate Research Skills

All completed and approved MA thesis and non-thesis projects should demonstrate mastery of the appropriate, relevant research skills and methods.

**Findings 2011-2012 - Target: Partially Met**

Eleven thesis projects and five non-thesis projects were completed this year (fall 2011 through summer 2012), up from eight thesis projects and four non-thesis projects last year. These projects were evaluated by the respective thesis committees to determine the degree to which the department’s stated learning objectives were met, ranging from 1, very little degree, to 5, very high degree. The department considers a score of 3.5 or higher on the relevant question(s) to indicate achievement of the objective. With respect to whether the project demonstrated research skills commensurate with the student’s area of specialization, all of thesis projects evaluated received a 3.5 or higher on this learning outcome goal. One non-thesis project was evaluated, and it did not meet this goal; this project received a score of a 3, indicating a solid level of research skills, but not a high or very high level of research skills.

#### Target for O2: Mastery of Relevant Research Literature

All completed and approved MA thesis and non-thesis projects should demonstrate knowledge of the relevant research literature in the student's area of specialization.

**Findings 2011-2012 - Target: Partially Met**

Eleven thesis projects and five non-thesis projects were completed this year (fall 2011 through summer 2012), up from eight thesis projects and four non-thesis projects last year. These projects were evaluated by the respective thesis committees to determine the degree to which the department’s stated learning objectives were met, ranging from 1, very little degree, to 5, very high degree. The department considers a score of 3.5 or higher on the relevant question(s) to indicate achievement of the objective. With respect to whether students demonstrated knowledge of the relevant research literature in their area of specialization, all but one of the thesis projects evaluated met the department's stated objective of receiving a score of 3.5 or higher. The one thesis project that did not meet this standard received a score of a 3, indicating a solid mastery of the relevant literature, but not a high or very high degree of mastery of the relevant literature. The one evaluated non-thesis paper project also did not meet the departmental target for mastery; however, this project did receive a score of 3, suggesting a solid mastery of the literature.
All completed and approved MA thesis and non-thesis projects should demonstrate the ability to write a professional research paper in the student’s area of specialization, including the ability to (1) formulate research questions, (2) locate those questions within the appropriate literature, (3) utilize appropriate research methods to answer the question(s); analyze data to answer the question(s), and (5) raise additional questions based on the student’s interpretation of his/her research findings.

Eleven thesis projects and five non-thesis projects were completed this year (fall 2011 through summer 2012), up from eight thesis projects and four non-thesis projects last year. These projects were evaluated by the respective thesis committees to determine the degree to which the department’s stated learning objectives were met, ranging from 1, very little degree, to 5, very high degree. The department considers a score of 3.5 or higher on the relevant question(s) to indicate achievement of the objective. To evaluate students’ ability to effectively report their research findings, five separate areas (each evaluated 1-5) are assessed, and then the results are averaged to create a composite score. Of the thesis and non-thesis projects evaluated, all of them met the department’s stated objective of averaging 3.5 or more on the learning outcomes scale. Among these theses were some that were described as among the best that faculty members had seen in their time at GSU, including three that received a perfect 5.

2-draft requirement

Last year we implemented a two-draft requirement for all non-thesis papers, requiring the first draft to be turned in just after mid-semester, at the same time as the defense date for thesis papers. Based, admittedly, on a limited amount of data, we think this has helped improve the quality of the non-thesis papers and will continue this requirement.

Pre- and post-tests for methods sequence

For next year, we plan to strengthen our assessment capacity for the graduate programs by implementing a pre-test and post-test for students in our required methods sequence, POLS 8800 (fall) and POLS 8810 (spring). 8800 teaches research design, while 8810 is intermediate applied statistics. Because we must do this in order, the first pre-test will be given in Fall 2010, and the first results will not be reported until June 2011. The Graduate Director will work with the instructors of these two courses to come up with appropriate pre- and post-tests and ensure inter-coder reliability. Normally the same person teaches 8800 on a regular basis, and the same is true for 8810.

"C" grade minimum

The department voted this spring that no course grade under "C" could be used for credit towards the MA or PhD, and the graduate catalog has now been updated to reflect the change.

Admissions procedure reform

Last spring the department adopted a "single meeting" approach to evaluating our MA and PhD applicants in lieu of the rolling procedure of the past. This new approach allowed us to rationalize our admissions decisions and to make better use of our scarce assistantship resources.

Elimination of Public Policy and Administration

The department voted last month to eliminate "Public Policy and Administration" as a major comprehensive exam and course
**Expanded required methods sequence**
Beginning in Fall of 2013, we have revised and expanded our research methods requirement to better train our students in research design and data analysis. We have already begun offering on an elective basis a new advanced quantitative methods course, as well as a qualitative research methods course, to better aid our students in learning the tools and methods necessary to answer their proposed research questions. Beginning in Fall 2013, all MA students will have to complete a three-course sequence: (a) a standalone research design course; (b) an introductory course on basic quantitative analysis; and (c) either an intermediate quantitative analysis course or a qualitative research methods course. We believe implementing this new sequence of courses will ensure that all of our students are able to demonstrate a high degree of mastery of the major research skills we wish to impart to all graduates of our program.

**Elimination of Spring Intake**
We have eliminated spring intake for our MA program. We were finding that students who entered our program in January were (1) having trouble following their courses because they had not yet taken POLS 8800, and (2) having trouble socially fitting into their cohorts.

Expanded required methods sequence

Beginning in Fall of 2013, we have revised and expanded our research methods requirement to better train our students in research design and data analysis. We have already begun offering on an elective basis a new advanced quantitative methods course, as well as a qualitative research methods course, to better aid our students in learning the tools and methods necessary to answer their proposed research questions. Beginning in Fall 2013, all MA students will have to complete a three-course sequence: (a) a stand-alone research design course; (b) an introductory course on basic quantitative analysis; and (c) either an intermediate quantitative analysis course or a qualitative research methods course. We believe implementing this new sequence of courses will ensure that all of our students are able to demonstrate a high degree of mastery of the research skills commensurate with their area of specialization.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):

Implementation Description: The necessary classes have already been designed and added to the curriculum; the necessary catalog changes have been submitted for approval for the 2013-2014 Graduate Catalog.
Projected Completion Date: 08/2013
Responsible Person/Group: The Department of Political Science
Additional Resources: None; faculty capable of teaching these courses are already currently on the faculty.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No major changes to the assessment process were made this past year. Rather, we focused on program changes targeted at improving student outcomes, such as revising and expanding our required methods sequence; this new sequence will be formally implemented in Fall 2013.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We plan to implement a revised and expanded required methods sequence beginning in Fall of 2013. Students currently must complete a two-course methods sequence. The new required sequence will consist of three courses: (1) a stand-alone research design course; (2) a stand-alone introduction to quantitative analysis course and (3) a choice of either an intermediate quantitative analysis course or a qualitative methods course. We believe these changes will increase the training our students receive, and aid them in better achieving mastery of the necessary research skills we seek to impart to our students.

Georgia State University
Assessment Data by Section
2011-2012 Political Science PhD
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Department of Political Science at Georgia State University recognizes that a research department at a research university needs a genuinely strong doctoral program. As such, the PhD program aims to provide students with a comprehensive grounding in the methodology and philosophy of social science as well as specific training in multiple fields and subfields of the discipline. The PhD program focuses on producing high quality researchers and teachers. The Department strives to develop graduates who are successful at publishing and teaching, and who obtain tenure-track positions in the southeast and nationally. The training students receive in seminars should equip them to pursue their own research, present it at conferences, and secure publication of their work. The program aims to provide doctoral students with varied opportunities to develop research records and skill sets attractive to potential employers.

Goals

G 5: Teaching Effectiveness
Doctoral candidates are effective teachers with the ability to teach courses in their primary field and sub-fields of the discipline.

G 4: Research Enterprise and Professional Socialization
Doctoral candidates are effective researchers with a full understanding of the research enterprise, including the ability to critique others' work and to be a contributing scholar by producing original research.

G 3: High Level of Competency in Research Methods
Doctoral candidates are effective researchers with a high level of competency in research skills appropriate to their research endeavors and a familiarity with a broad range of methodologies, including quantitative and qualitative approaches.

G 2: Competency in Second Field or Subfield
Doctoral candidates are knowledge scholars with demonstrable competency in at least a second substantive area of political science.
**G 1: Comprehensive Understanding of Major Field**
Doctoral candidates are knowledge scholars with demonstrable familiarity with the breadth and diversity of models, approaches, and intellectual traditions within that student’s major field of expertise.

**Student Learning Outcomes/Objectives**

**SLO 1: Comprehensive Understanding of Major Field (G: 1) (M: 1, 2, 3)**
The student demonstrates familiarity with the breadth and diversity of models, approaches, and intellectual traditions within that student’s major field of expertise.

**Strategic Plan Associations**
- 2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
- 3.1 Enhance a research culture.
- 3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 2: Competency in Second Field or Subfield (G: 2) (M: 1)**
Students must demonstrate competency in at least a second substantive area of political science.

**Strategic Plan Associations**
- 2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
- 3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 3: High Level of Competency in Research Methods (G: 3) (M: 2, 3)**
Students have a high level of competency in research skills appropriate to their research endeavors and a familiarity with a broad range of methodologies, including quantitative and qualitative approaches.

**Strategic Plan Associations**
- 2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
- 3.1 Enhance a research culture.
- 3.4 Enhance supporting infrastructure for the conduct of research.
- 3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
- 3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 4: Research Enterprise and Professional Socialization (G: 4) (M: 2, 3)**
Students have a full understanding of the research enterprise, including the ability to critique others’ work and to be a contributing scholar by producing original research.

**Strategic Plan Associations**
- 2.1 Expand support for doctoral programs.
- 2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
- 3.1 Enhance a research culture.
- 3.4 Enhance supporting infrastructure for the conduct of research.
- 3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
- 3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 5: Teaching Effectiveness (G: 5) (M: 4)**
Students possess the ability to effectively teach courses in their primary fields and sub-fields of the discipline.

**Strategic Plan Associations**
- 2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
- 3.6 Other efforts in support of Goal 3 (Leading Public Research University).
- 5.4 Enhance the global competency of students, faculty and staff.
- 5.5 Other efforts in support of Goal 5 (Globalizing the University).

**Measures, Targets, and Findings**

**M 1: Comprehensive exam assessments (O: 1, 2)**
Based on the program’s learning outcomes, the lead reader for each field or sub-field doctoral comprehensive committee shall write an assessment of the degree to which the answers provided by the students indicate success in achievement of the outcomes.

**Source of Evidence:** Comprehensive/end-of-program subject matter exam

**Target for O1: Comprehensive Understanding of Major Field**
The Department’s performance target is for all doctoral students taking comprehensive exams to pass those exams at the first sitting. If not, then the Department aims for students to pass the exams on their second and final sitting. Comprehensive exams test students’ knowledge of, at minimum, two fields in the discipline.

**Findings 2011-2012 - Target: Partially Met**
Comprehensive exams are offered twice a year; they were previously offered in December and May but we began...
implementing a move this academic year to offering the exams in September and February. Thus, exams were offered in December 2011, and then again in February 2012. This academic year, a total of 10 students took comprehensive exams, and 8 passed all three of their exams (80%). This represents a strong increase from last academic year's pass rate of 64%, and the pass rate from two years ago, which was 50%. Of those passing their exams, four passed on their first try. The other four passed on their second tries. One student received a "high pass," with the evaluation committee finding that the exam "demonstrates a real mastery of the literature, as well as the ability to apply theoretical literature and empirical examples in fruitful ways." However, two students failed exams. One failed for the second time, and the two exams the student retook both showed serious deficiencies; this student has since been terminated from the program. One potential thing of note is that this particular student returned after being gone for a number of years and their struggles likely reflected that separation. The other student who failed exams failed on the first attempt and went on in September of 2012 to pass their exams, receiving a "high pass" on one of them. Last year not only reflected a change in when comprehensive exams were offered but also in how they were administered and graded. Previously, students took a written exam and receive a grade on that exam, and if the exam was rated as at least a "pass," sat for an oral exam conducted by one member of each exam committee. The oral exam committee would then decide whether the student passed in total. The Department revised the process such that students, beginning in February, only sit for an oral exam if requested by a specific exam committee. In other words, students take a written exam and receive a grade of either high pass, pass, request an oral exam, or inadequate. This change means that rather than oral exams performing a rather perfunctory function (and faculty finding it rather difficult to rate a student as "inadequate" when they successfully passed their written examinations), they now are used when students' written exams are on the border between pass and fail, and provide an opportunity for the student to demonstrate orally their mastery of the literature as well as for the exam committee to closely question the student on this literature. Initial reports are that this system is working well.

**Target for O2: Competency in Second Field or Subfield**

The Department's performance target is for all doctoral students taking comprehensive exams to pass those exams at the first sitting. If not, then the Department aims for students to pass the exams on their second and final sitting. Comprehensive exams test students' knowledge of, at minimum, two fields in the discipline.

**Findings 2011-2012 - Target: Partially Met**

Comprehensive exams are offered twice a year; they were previously offered in December and May but we began implementing a move this academic year to offering the exams in September and February. Thus, exams were offered in December 2011, and then again in February 2012. This academic year, a total of 10 students took comprehensive exams, and 8 passed all three of their exams (80%). This represents a strong increase from last academic year's pass rate of 64%, and the pass rate from two years ago, which was 50%. Of those passing their exams, four passed on their first try. The other four passed on their second tries. One student received a "high pass," with the evaluation committee finding that the exam "demonstrates a real mastery of the literature, as well as the ability to apply theoretical literature and empirical examples in fruitful ways." However, two students failed exams. One failed for the second time, and the two exams the student retook both showed serious deficiencies; this student has since been terminated from the program. One potential thing of note is that this particular student returned after being gone for a number of years and their struggles likely reflected that separation. The other student who failed exams failed on the first attempt and went on in September of 2012 to pass their exams, receiving a "high pass" on one of them. Last year not only reflected a change in when comprehensive exams were offered but also in how they were administered and graded. Previously, students took a written exam, received a grade on that exam, and if the exam was rated as at least a "pass," sat for an oral exam conducted by one member of each exam committee. The oral exam committee would then decide whether the student passed in total. The Department revised the process such that students, beginning in February, only sit for an oral exam if requested by a specific exam committee. In other words, students take a written exam and receive a grade of either high pass, pass, request an oral exam, or inadequate. This change means that rather than oral exams performing a rather perfunctory function (and faculty finding it rather difficult to rate a student as "inadequate" when they successfully passed their written examinations), they now are used when students' written exams are on the border between pass and fail, and provide an opportunity for the student to demonstrate orally their mastery of the literature as well as for the exam committee to closely question the student on this literature. Initial reports are that this system is working well.

**M2: Assessment of Doctoral Dissertations (O: 1, 3, 4)**

The members of each doctoral dissertation committee will individually provide to the Director of Graduate Studies a written assessment stating the degree to which the dissertation and its defense indicate success in achievement of the program's stated learning outcomes.

Source of Evidence: Performance (rectal, exhibit, science project)

**Target for O1: Comprehensive Understanding of Major Field**

It is the Department's target that all successfully defended doctoral dissertations demonstrate a comprehensive understanding of the student's major subfield, that all demonstrate a high level of competency in research methods appropriate to the discipline, that all demonstrate the ability to critique others' work, and that all demonstrate the ability to be a contributing scholar by producing original research. On a 5-point performance scale (with 5 representing the top performance level), the department seeks scores of 3.5 or better.

**Findings 2011-2012 - Target: Partially Met**

Six doctoral dissertations were successfully defended this year (from fall 2011 through summer 2012). Based on averaging the assessments completed by each student's dissertation committee members, five of the six dissertations met the department's goal of scores of 3.5 or better on the 5 point performance scales established for each of the five learning objectives. On the positive side, the two highest ranked dissertations (receiving scores of 5 and 4.9) were outstanding, and met or exceeded all of the department's learning goals. Two of the dissertations received an average score of 4 and were described as "clearly meeting the department's learning goals." The weakest dissertation received an average score of 3.5; however, the student was rated very highly as to his/her ability to teach and accepted a tenure-track job at a teaching oriented college. On the negative, the one dissertation that did not meet the department's goal received an average score of 2.7 from the three committee members. The dissertation was described as "minimally acceptable," and one committee member noted that "the student displayed somewhat limited willingness and/or ability to write a really strong dissertation."

**Target for O3: High Level of Competency in Research Methods**

It is the Department's target that all successfully defended doctoral dissertations demonstrate a comprehensive understanding of the student's major subfield, that all demonstrate a high level of competency in research methods appropriate to the discipline,
that all demonstrate the ability to critique others' work, and that all demonstrate the ability to be a contributing scholar by producing original research. On a 5-point performance scale (with 5 representing the top performance level), the department seeks scores of 3.5 or better.

**Findings 2011-2012 - Target: Partially Met**

Six doctoral dissertations were successfully defended this year (Fall 2011 to Summer 2012). Five of the six dissertations met the department’s goal of a score of 3.5 or above on the assessment asking about the student’s ability to utilize the appropriate research methods. Three of the five students received a perfect score of 5, indicating a very high degree of competency in the use of research methods. One dissertation did not meet the department’s goal, receiving an average score of 2.7.

**Target for O4: Research Enterprise and Professional Socialization**

It is the Department’s target that all successfully defended doctoral dissertations demonstrate a comprehensive understanding of the student’s major subfield, that all demonstrate a high level of competency in research methods appropriate to the discipline, that all demonstrate the ability to critique others’ work, and that all demonstrate the ability to be a contributing scholar by producing original research. On a 5-point performance scale (with 5 representing the top performance level), the department seeks scores of 3.5 or better.

**Findings 2011-2012 - Target: Partially Met**

Six dissertations were successfully defended this year (Fall 2011-Summer 2012). Four of the six dissertations met the department’s stated goal of averaging 3.5 or higher on an assessment of the student's ability to demonstrate a full understanding of the research enterprise. Two students received a perfect score of 5, while two others received a score of 4, suggesting they have a high degree of understanding of the research enterprise. Two students did not meet the department’s stated goal, receiving scores of 3 and 2.7, respectively.

**M 3: Conference presentations, publications and grants (O: 1, 3, 4)**

This measure gauges research competency and professional socialization by assessing the success of graduate students in placing their work at conferences and in publishing outlets and in attracting funding to support their research.

Source of Evidence: Presentation, either individual or group

**Target for O1: Comprehensive Understanding of Major Field**

Doctoral students should present their work at at least one professional conference each year. Doctoral should students regularly submit work for publication and for grant competitions.

**Findings 2011-2012 - Target: Met**

At least 10 doctoral students presented their work at professional conferences this year (based on student reports of last year’s accomplishments). These conferences range from small gatherings to the most prestigious (and competitive) in the discipline. For example, two of our PhD students presented a paper or poster at the 2011 American Political Science Association Convention, a conference with an acceptance rate well under 50% (including for faculty). Four students presented at the 2011 Midwest Political Science Association Conference, another highly prestigious conference in the discipline. In addition, both doctoral and masters student members of the Political Science Graduate Student Association organized their third annual conference at Georgia State on building political institutions, attracting scholars from around the country and even from abroad to Georgia State. Seven of our PhD students were published this year, in a variety of outlets. Most notable, one of our students had a solo-authored paper accepted for publication in Comparative Political Studies, the top-ranked journal in the field of Comparative Politics, and a journal within the top 10 in the discipline. Numerous other students also submitted their work for publication in peer-reviewed journals. We also had a number of our students apply for grants. One student received a grant to attend the 2012 Inter-University Consortium for Political and Social Research (ICPSR) Summer program while another was a Visiting Research Fellow at the Institute of Foreign Policy Studies in Calcutta, an autonomous research institute associated with the University of Calcutta.

**Target for O3: High Level of Competency in Research Methods**

Doctoral students should present their work at at least one professional conference each year. Doctoral should students regularly submit work for publication and for grant competitions.

**Findings 2011-2012 - Target: Met**

At least 10 doctoral students presented their work at professional conferences this year (based on student reports of last year’s accomplishments). One student received a grant to attend the 2012 Inter-University Consortium for Political and Social Research (ICPSR) Summer program while another was a Visiting Research Fellow at the Institute of Foreign Policy Studies in Calcutta, an autonomous research institute associated with the University of Calcutta.

**M 4: Teaching Effectiveness (O: 5)**

Utilizing syllabi and data from student evaluations of graduate students teaching courses, the Director of Graduate Studies shall assess the competence of the doctoral graduate students in teaching courses.

Source of Evidence: Student course evaluations on learning gains made

**Target for O5: Teaching Effectiveness**

The Department wants all syllabi in courses taught by doctoral students to be in conformity with departmental, College, and University standards. The Department also seeks overall teaching effectiveness scores of at least 4.0 on Question 17 of the student course evaluations.

**Findings 2011-2012 - Target: Met**

The department finds that this goal was met this year. Twenty-three instructors taught a total of 40 sections in Fall, Spring and Summer of 2011-2012 (up from 13 instructors teaching 21 sections last year). This almost doubling of graduate student instructors reflects both the increase in incoming freshmen, necessitating more sections of both POLS 1101 and 2401, and the need for full-time faculty to teach our departmental CTW courses. Fourteen instructors taught 14 sections in fall 2011 (and a fifteenth taught the first six weeks of two upper-division courses while a professor was on maternity leave), fourteen instructors taught 16 sections in spring 2012 (including three upper-division courses), and seven instructors taught 10 sections in summer 2012. Seven instructors taught 18 sections of POLS 1101 (Introduction to American Politics) and thirteen instructors taught 19 sections of POLS 2401 (Global Issues). Ten of these 40 sections were over-100 students (an unfortunate increase in over-100 sections over last year in which only 6 were taught). More unfortunately, none of the sections taught contained less than 48 students (last year 9 sections were capped at 25 or less), and 20 of the sections contained between 60 and 75 students. Syllabi were examined by the 2401 and 1101 coordinators and found to be substantially in compliance with departmental, College and University standards. In addition, these coordinators have developed a set of common learning outcomes for 2401 and 1101. The average score for overall teaching effectiveness (question 17) was 4.5 for 1101 and 4.2 for 2401 (the relevant numbers were 4.4 and 4.3 last year); it ranged from 3.8 to 4.9 for 1101 and from 3.2 to 4.8 for 2401. These numbers are quite impressive for graduate instruction in introductory courses, and show clearly that our graduate students are providing high quality instruction. Indeed, instructors in nineteen of the 40 sections, almost half, received evaluations of 4.5 or higher. Nevertheless, several instructors received lower marks than we would like on question 17. That said, of the eight instructors receiving evaluations under 4.0, seven were teaching for the first time, and one of those moved from 3.2 to 4.2 the following semester, indicating that learning is happening. The department has also instituted an in-house teacher training course in May 2010 targeted to political science instruction. We believe this course has helped us maintain high teach standards, especially in the face of a greatly increased need for graduate student instructors.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continue to fund grad student conference travel**

Budget permitting, the department will continue to offer financial support to students for travel to conferences to present their work. Last year, we were able to offer students $250 per conference for a total of two conferences per student per year. This year we had to cut that back to one per student per year at $250.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Conference presentations, publications and grants
- **Outcome/Objective:** Comprehensive Understanding of Major Field
- **Outcome/Objective:** High Level of Competency in Research Methods
- **Outcome/Objective:** Research Enterprise and Professional Socialization

**Responsible Person/Group:** Graduate director, department chair

**In-house teaching prep course for grad student instructors**

The department will develop an in-house course required of all PhD students and open to MA students, before they are assigned a course of their own to teach. The course will cover basic pedagogical topics as well as techniques for effective teaching of some of the substantive material in POLS 1101 and POLS 2401, the two courses most often taught by graduate students.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Teaching Effectiveness
- **Outcome/Objective:** Teaching Effectiveness

**Implementation Description:** Maymester

**Projected Completion Date:** 04/2010

**Responsible Person/Group:** Grad director, course instructor

**Additional Resources:** Ideally, we could have funds dedicated for this course to be taught each Maymester.
Pre- and post-tests in required methods sequence
To strengthen our ability to assess and teach competency in research methods, we will implement pre- and post-tests in our two required methods courses, POLS 8800 (Elements of Research Design) and POLS 8810 (Applied Intermediate Statistics). These courses are taught each fall and spring respectively. The Graduate Director will work with the two instructors (each course is normally taught regularly by the same instructor) to come up with appropriate tests and ensure inter-coder reliability. Because it makes sense to collect data following the course sequence, we will implement this measure in August 2010 and report first results in June 2011.

- Established in Cycle: 2008-2009
- Implementation Status: On-Hold
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Assessment of Doctoral Dissertations
  - Outcome/Objective: High Level of Competency in Research Methods
- Implementation Description: Because it makes sense to collect data following the course sequence, we will implement this measure in August 2010 and report first results in June 2011.
- Projected Completion Date: 07/2010
- Responsible Person/Group: Graduate director, graduate committee, instructors of 8800 and 8810.

"C" Grade Limit
The department voted this spring that no course grade under "C" could be used for credit towards the MA or PhD, and the graduate catalog has now been updated to reflect the change.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Implementation Description: Added to the graduate catalog and enforced by the college graduate office and the department graduate director.
- Projected Completion Date: 02/2010
- Responsible Person/Group: Graduate Director.
- Additional Resources: None.

Admission reform
Last spring the department adopted a "single meeting" approach to evaluating our MA and PhD applicants in lieu of the rolling procedure of the past. This new approach allowed us to rationalize our admissions decisions and to make better use of our scarce assistantship resources.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Implementation Description: Graduate director and graduate committee organizes a single meeting to discuss applicants and assistantships.
- Projected Completion Date: 02/2010
- Responsible Person/Group: Graduate Director

Elimination of Public Policy and Administration
The department voted last month to eliminate "Public Policy and Administration" as a major comprehensive exam and course distribution field. This change reflects the current lack of faculty in that field as well as the growth of the public management and policy department in the Andrew Young School and brings the official rules into line with the current scholarly emphasis of the department.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Implementation Description: Added to graduate catalog and enforced by graduate director and college graduate office.
- Projected Completion Date: 09/2010
- Responsible Person/Group: Graduate Director

Faculty advisors
The department has decided to resuscitate our advisement program for incoming graduate students. This semester, all new graduate students were assigned a faculty advisor in their area who can provide them with advice until they can choose their own thesis or dissertation advisors.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Implementation Description: Graduate director assigns advisors
- Projected Completion Date: 08/2010
- Responsible Person/Group: Graduate Director

Methods Sequence Reform
The department plans to add a third course to the required methods sequence for PhD students. This is partially in response to data gathered through the assessment process that shows that some of our PhD students do not have adequate methodological skills. The specific details of the proposal are as follows:

1. The 8800 and 8810 requirements would be maintained as they exist now, such that students must take 8800 in their first semester and 8810 in their second. 2. PhD students (not MA students) would be required to take a third methods course, either “Advanced Quantitative Methods” or “Advanced Qualitative Methods”, as they prefer. 3. “Advanced Qualitative Methods” would be offered every other spring semester and could be taken at the same time as 8810. This sequence would allow students to take the course within two years of beginning the program. 4. “Advanced Quantitative Methods” would be offered every other fall semester and would have to be taken after completion of 8810. Students entering the program in the year it is not offered could take it the following fall. Those entering in the year it is offered would have to wait until the first semester of their third years to take the course. For this reason it would be better to offer the course every year, but if resources (or enrollment concerns) make that impossible, we can allow students in this position to go forward with comps at the end of their second year even without having taken the course. That way, their progress would not be slowed. 5. “Advanced Quantitative Methods” would cover the most commonly used statistical methods not fully discussed in 8800 or 8810, as determined by the instructor. These could include, for example, maximum likelihood estimation, duration models, panel models, and hierarchical models. The focus of the
course would be on giving students a practical, applied knowledge of these techniques. 6. “Advanced Qualitative Methods” would cover the most used qualitative techniques not fully discussed in 8800 and 8810, as determined by the instructor. These could include greater depth on case selection and process tracing as well as discussion of QCA, content analysis, elite interviewing, and other topics. 7. Students would be required either to complete a fourth methods course or to pass a foreign language exam, with students of comparative politics required to choose the latter option. 8. The new course would count as a methods course for the purposes of the distribution requirement, such that students would only need to complete courses in two other subfields of political science (IR, CP, AP, or Theory) to fulfill that requirement. This would allow students to fulfill the distribution requirement and the requirement to complete three courses per comp field without exceeding the required 30 hours of coursework and extending the length of the program. 9. Students wishing to take the comprehensive exam in methods would need to complete one methods course beyond the newly required course. Justification 1. The large majority of political science departments at peer and aspirational universities require three methods courses (see other attachment). 2. Methods training, whether qualitative or quantitative, is increasingly central to placing our graduates in tenure track positions. At the moment, many of our students are not adequately trained in the most common techniques. 3. While we do sometimes offer methods courses beyond 8810, these tend to cover very specific topics. As a result, these courses often have difficulty attracting enough students to make, and they still leave our PhD students with no formal way of learning many of the most common methodological approaches out there. Students have sought to plug these gaps in their education by taking directed readings (such as reminder’s multilevel modeling directed reading this semester, which was almost large enough to make as an actual class). As we all know, directed readings courses are time consuming for faculty and offer few rewards; implementing this proposal would likely reduce the demand for them while simultaneously expanding our coverage of methods. Our more specific methods courses could continue to be offered to allow students without foreign language skills to complete their fourth methods requirement and to prepare students for coping in methods. 4. At the moment, students who wish to expand their knowledge of methods (especially qualitative methods) are often forced to take courses at Emory. As a full service PhD granting department, we should be offering this training in-house. 5. There would be no concern about the new methods courses attracting enough students to make as they would be required. In addition, implementing the proposal would only require that we offer one new course per year. 6. In my conversations with current graduate students this semester, our limited methods offering was the single most common complaint I received.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Implementation Description: We need a new faculty member to offer one of the courses, and we are hiring the position now. The graduate director and chair will cooperate in implementing the new policies.
Projected Completion Date: 08/2011
Responsible Person/Group: Graduate director and chair.
Additional Resources: New faculty member

Teaching Course for Graduate Students
The department introduced a new teacher training course for our graduate instructors in May 2010. This course targets political science instruction and allows students multiple opportunities to practice their teaching, and we believe that it will further improve our already good graduate student teaching evaluations.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: This course was introduced in May
Responsible Person/Group: Dr. Rashid Naim is teaching the course.

Expanded Recruitment
The department will begin reaching out to metro Atlanta schools more fully to recruit new graduate students. We will also continue with our expanded recruitment efforts, which last year included purchasing GRE scores, emailing minority APSA scholars, and contacting faculty at a number of Georgia and southern undergraduate institutions.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: See above
Projected Completion Date: 04/2012
Responsible Person/Group: Director of Graduate Studies

Creation Major Area Paper requirement
The Department voted to implement, beginning in Fall of 2013, a new requirement whereby students must write a “major area” paper in lieu of taking a third written sub-field comprehensive exam. The goal of this new requirement is to aid students in progressing from the comprehensive exam stage of the doctoral program to the dissertation stage. The Department believes that having students write a paper targeted at their dissertation topic area, and focused on identifying the major research questions, findings and gaps in the relevant literature, will serve as the necessary bridge to helping students design and write better dissertations.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure|Outcome/Objective):

Implementation Description: The Department voted on this change in August 2012, and the necessary changes to the graduate catalog have been submitted for the 2013-2014 Graduate Catalog.
Responsible Person/Group: Dr. Rashid Naim
Additional Resources: None

Implementation presentation requirement
The Department recently voted to require that all doctoral students present a paper at the GSU Political Science Graduate Student Conference by the end of their second year. This requirement is aimed at socializing doctoral students into the practice of preparing work for presentation, and then presenting that work publicly. The hope is that students will then revise these papers for presentation at a national conference and/or for submission to a peer-reviewed journal for publication.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Academic Program Question 1: Revision of required methods sequence

Methods teaching & lab assistants

Beginning in 2011-2012, we allocated at least one advanced graduate student with superior methods skills to serve as a methods teaching and lab assistant. These students hold weekly office hours in the Political Science graduate computer lab, and their job is to answer student questions about research methods, including data management, data analysis and the proper estimation techniques.

By providing additional support for students taking the required research methods sequence, our aim is to ensure all of our graduates have a very high degree of competency in utilizing the proper research methods.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Revision comprehensive exam process

In the middle of the academic year, the department changed how comprehensive exams were administered and graded. Previously, students took a written exam, received a grade on that exam, and if the exam was rated as at least a “pass,” sat for an oral exam conducted by one member of each exam committee. The oral exam committee would then decide whether the student passed in total. The Department revised the process such that students, beginning in February, only sit for an oral exam if requested by a specific exam committee. In other words, students take a written exam and receive a grade of either high pass, pass, request an oral exam, or inadequate. This change means that rather than oral exams performing a rather perfunctory function (and faculty finding it rather difficult to rate a student as “inadequate” when they successfully passed their written examinations), they now are used when students’ written exams are on the border between pass and fail, and provide an opportunity for the student to demonstrate orally their mastery of the literature as well as for the exam committee to closely question the student on this literature. Initial reports are that this system is working well.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Revision of required methods sequence

Beginning in Fall 2013, the Department has revised and expanded its required methods sequence to address concerns about the level of preparation and competency shown by our students with regards to research methods. Previously, all students were required to take a two-course sequence. Now, all doctoral students will be required to take a required four-course sequence: (1) a stand-alone research methods course and an introductory course on quantitative analysis; (3) an advanced quantitative analysis course; and (4) either an advanced quantitative analysis course or a qualitative methods course. The expectation is that increasing students’ training in basic research design and data analysis will lead to better quality dissertations.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report (e.g., revised learning outcomes, measures, targets, etc.)? Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since last year, the coordinator for 1101 has developed a common set of learning outcomes for 1101 students, and ensured that all
1101 instructors are pursuing these outcomes; this already existed for 2401 and was found to be quite useful in ensuring consistency and a high level of quality across the different sections. In the coming academic year, we will be instituting a new 1st and 2nd year review process for all doctoral students. Currently, most of our assessments are done at the comprehensive exam stage and dissertation stage of the program. However, we believe that in order to increase the quality of our graduates, we need to assess their performance at earlier points in their graduate career. We will therefore begin evaluating all students at the end of their 1st and 2nd years as to their performance to date, with the intent of identifying any potential areas of concern.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

A number of changes are in the process of being implemented. First, beginning in Fall 2013, the department is implementing a revised and expanded research methods sequence for all doctoral students. The aim of this revised sequence is to help our students meet the department's learning outcome goals for all successfully defended dissertations. Second, the department has revised the comprehensive exam process: students will now take two field written field exams (as opposed to three field exams or two fields and one sub-field exam) and then write a "major area" paper. The aim of this change is to help students move more successfully from the comprehensive exam stage to the dissertation stage of the program. Third, all students will now be required by the end of their second year in the doctoral program to present an original research paper at the GSU Graduate Student Conference. Fourth, we are instituting a 1st and 2nd year review process for all doctoral students to better monitor their progress through the program and ensure that all students are on-track and/or aware of potential concerns and areas for improvement prior to the taking of comprehensive exams.
### Measures, Targets, and Findings

**M 1: Financial reporting skills: Interpret and Predict (O: 1, 2)**  
Performance on assignments in Acct 8410  
Source of Evidence: Academic direct measure of learning - other  
**Target for O1: Financial reporting skills: Develop**  
Exam mean of 75%  
**Findings 2011-2012 - Target: Met**  
NCI exam questions for the previous year had only 48% correct responses. For the current year, NCI exam questions reached 86.6% for correct responses.

**M 2: Financial Reporting Skills - Develop (O: 1, 2)**  
Performance on exam questions in 8410.

**Target for O2: Financial reporting skills: Interpret and Predict (Final)**  
Mean score of 80% or above  
**Findings 2011-2012 - Target: Not Met**  
Action plan needs to be developed to replace the outdated, theoretical 8410 class that meets for 1 credit hour per semester over 3 semester, with a more robust, current course that is a regular 3 credit hour course per semester.

**M 3: Analytical Skills (O: 3, 4)**  
Performance on assignments in Acct 8700  
Source of Evidence: Academic direct measure of learning - other  
**Target for O3: Assurance Skills**  
Exam mean of 90% or better  
**Findings 2011-2012 - Target: Partially Met**  
Mean score on exam questions was 81% on the question related to strengths and weaknesses of current and proposed financial accounting standards. Mean score on exam questions was 80% on the question related to why and how managers manage earnings (however, the how of managing earnings scored 74%). Mean score on exam questions related to the effect of accounting results on stock prices was 76%, up from 74% last year.

**Target for O4: Analytical Skills**  
10/13/2008 Related Action Plan(s): (details in Action Plan Tracking) Assurance skills 2005-2006 0: Analytical skills (O:0) (Final)  
Performance on assignments in Acct 8700  
**Findings 2011-2012 - Target: Partially Met**  
Target was met on 4 of the 6 relevant questions in spring 2012, except for: (1) Interpreting the valuation implications from asset impairment (73%), and (2) analyzing profit margins and asset turnover (73%)

**M 4: Assurance Skills (O: 3, 4)**  
Performance on assignments in Acct 8610  
Source of Evidence: Academic direct measure of learning - other  
**Target for O3: Assurance Skills**  
The students performance on the midterm exam was 79 out of 100 points. Given the difficulty of the exam, this score is reasonable and comparable to the 2006 results (mean of 76 out of 100 points). In addition, in 2007 students completed a term paper on a subject matter that dealt with assurance services and related topics. Overall, the scores on the term papers were as expected.

**Target for O4: Analytical Skills**  
Exam question mean of 80% or better

**M 5: Communication Skills (O: 6)**  
At least 90% of students exited course with a B-level grade  
Source of Evidence: Academic direct measure of learning - other  
**Target for O6: Communication Skills**  
At least 90% of students exited course with a B-level grade
M 6: Collaboration Skills (O: 5, 6)
Evaluation by student peers of contributions to team projects in Acct 8030 and Acct 8410
Source of Evidence: Academic direct measure of learning - other

**Target for O5: Collaboration Skills**
Instructor meeting with each student project group and with individual students to discuss progress on project and any problems with group interaction. Submission of group project on or before the deadline. Target Performance Level for Program: No unresolved complaints regarding the performance of a group member and all projects submitted with all group member names All group projects submitted on or before deadline

**Target for O6: Communication Skills**
Mean score on research project of 85% in Tx 8120.

**Findings 2011-2012 - Target: Not Met**
Scores improved, but not to the desired level.

M 7: Technology Skills (O: 7, 8)
Grading rubric used to evaluate the technology skills component of a group project in ACCT8410
Source of Evidence: Academic direct measure of learning - other

**Target for O7: Assurance Skills**
Target is mean of 85% on exam questions.

**Target for O8: Technological Skills**
A mean score of 80% or above on the technology skills component of the group project

M 8: Apply tax law: Apply tax law to individuals and entities (O: 8)
Apply tax law to individuals and entities. Target of mean of 85% on exam questions.
Source of Evidence: Academic direct measure of learning - other

**Target for O8: Technological Skills**
Research Project Mean score of 85% or above for the class.

**Findings 2011-2012 - Target: Met**
Mean score on research project was 88.57% for the spring 2012 students and 91.72% for the summer 2012 students.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Action plan for Financial Reporting - Develop**
Test this objective using cases and financial accounting standards database.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Financial Reporting Skills - Develop
  - **Outcome/Objective:** Financial reporting skills: Develop
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Siva Nathan
- **Additional Resources:** Department subscription to FASB Accounting Standards Codification: Professional View. Annual subscription is $150 for department allowing free access to students and faculty. SOA Director has agreed to subscribe to this database.

**Include tax research written assignment.**
Include a tax research written assignment as one-fourth of the students’ grades to permit the students to convey their knowledge through another means besides exam testing.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Include a tax research written assignment as one-fourth of the students’ grades to permit the students to convey their knowledge through another means besides exam testing.
- **Projected Completion Date:** 07/2011
- **Responsible Person/Group:** Lucia Smeal
- **Additional Resources:** Faculty time

**Outside research project.**
Incorporate outside research project that includes two tax returns, one for corporations and one for partnerships as well as a research component consisting of a client letter and a tax file memorandum, using the unique Master of Tax writing website.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Incorporate outside research project that includes two tax returns, one for corporations and one for partnerships as well as a research component consisting of a client letter and a tax file memorandum, using the unique Master of Tax
Reallocate testing and class time
For the FastTrackMPA, reallocate course material across the three one-hour courses. Administer the exam in the first two hours on the last class day and cover additional material in the next two hours, which will be tested with a take-home exam. For the FlexMPA, spend additional class time discussing the application of the efficient markets theory.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Responsible Person/group: Siva Nathan
Additional Resources: Faculty time

Reallocate testing and class time
For the FastTrackMPA, reallocate course material across the three one-hour courses. Administer the exam in the first two hours on the last class day and cover additional material in the next two hours, which will be tested with a take-home exam. For the FlexMPA, spend additional class time discussing the relationship between various theories.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 01/2012
Responsible Person/group: Siva Nathan

Reallocate testing and class time
For the FastTrackMPA, reallocate course material across the three one-hour courses. Administer the exam in the first two hours on the last class day and cover additional material in the next two hours, which will be tested with a take-home exam. For the FlexMPA, spend additional class time discussing how an accounting standard affects parties other than preparers.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Responsible Person/group: Siva Nathan
Additional Resources: Faculty time

Reallocate testing and coverage time
Reduce the number of quizzes to allow more time for coverage of materials and eliminate the dropped quiz.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 01/2012
Responsible Person/group: Usha Ramachandran
Additional Resources: Faculty time

Reconfigure graded work
While the traditional cohort exceeded the target, the new Fast-Track MPA (FT-MPA) cohort did not. For the FT-MBA, an out-of-class written assignment will be developed to afford students another way to demonstrate their mastery of tax rules.
Reconfigure last class meeting.
Give students a reason for being attentive to the second two hours of the 4-hour course. Announce and give a quiz over NCI concepts for extra points on the exam just taken.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Responsible Person/Group: Lucia Smeal

Redesign integration of class and testing time
Redesign class meetings to integrate class and test time, e.g., test content of last class meeting in a take-home exam.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 01/2012
Responsible Person/Group: Tad Ransopher

Apply concepts to financial statements in class teams
Use financial statements of fortune 500 companies to illustrate, explain, and understand the concepts of analysis.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Analytical Skills | Outcome/Objective: Analytical Skills

Develop new course in new format to replace 8410.
Replace 8410 with a new course that is more topical, and is packaged as a regular 3 credit hour course per semester instead of being dispersed over 3 semesters.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Financial Reporting Skills - Develop | Outcome/Objective: Financial reporting skills: Interpret and Predict (Final)
Implementation Description: Implement new course.
Projected Completion Date: 09/2013
Responsible Person/Group: Siva Nathan

Emphasize judgment in applying standards.
Class time will be spent emphasizing that accounting is not black and white, that there are grey areas that involve judgment in applying accounting standards, which leads to earnings management.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Analytical Skills | Outcome/Objective: Assurance Skills
Implementation Description: Class time will be spent emphasizing that accounting is not black and white, that there are grey areas that involve judgment in applying accounting standards, which leads to earnings management.
Projected Completion Date: 07/2012
Responsible Person/Group: Siva Nathan
Additional Resources: Faculty time

Enhance focus in class by disallowing use of laptops in classroom.
Ensure greater focus on the lectures by banning the use of laptops that students were using to check email and other research other topics on the internet.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Collaboration Skills | Outcome/Objective: Communication Skills
**Implementation Description:** Ensure greater focus on the lectures by banning the use of laptops that students were using to check email and other research topics on the internet.

**Projected Completion Date:** 07/2013

**Responsible Person/Group:** Tad Ransopher

**Include tax research written assignment as 1/4 of students’ grade**

Include a tax research written assignment as one-fourth of the students’ grades to permit the students to convey their knowledge through another means besides exam testing under a compressed schedule (8 weeks). Project score should raise overall average.

**Established in Cycle:** 2011-2012

**Implementation Status:** Finished

**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Apply tax law
- **Outcome/Objective:** Technological Skills

**Implementation Description:** Include a new tax research written assignment.

**Projected Completion Date:** 01/2013

**Responsible Person/Group:** Lucia Smeal

**Use examples in class.**

Use several examples in class to provide guidance to students as to how to think about the effect of accounting results on stock prices and critically analyze current and proposed financial accounting standards to identify their strengths and weaknesses.

**Established in Cycle:** 2011-2012

**Implementation Status:** Planned

**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Analytical Skills
- **Outcome/Objective:** Assurance Skills

**Implementation Description:** Use several examples in class to provide guidance to students as to how to think about the effect of accounting results on stock prices and critically analyze current and proposed financial accounting standards to identify their strengths and weaknesses.

**Assessment Data by Section**

**2011-2012 Psychology Assessment of Core**

(As of: 12/12/2016 04:42 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

---

**Mission / Purpose**

The Department of Psychology at Georgia State University has a long history of offering both undergraduate and graduate degree programs for both traditional and non-traditional students. Psychology is an extraordinarily broad field and the departmental curriculum reflects the diversity of our discipline. Psychology can be broadly defined as the study of behavior, and of those biological, psychological and socio-cultural factors that which create and influence behavior. It also encompasses the application of basic knowledge to improve the human condition. Psychology has links to numerous other disciplines (e.g., biology, sociology), and also a long tradition of interdisciplinary interaction and collaboration (e.g., education, medicine) based on shared goals in both basic and applied endeavors. The department offers a general undergraduate degree program that is integrated with the broader liberal arts education goals of the College of Arts and Sciences. It also contributes to the core curriculum for all undergraduates in the College.

---

**Goals**

**G 1: Area D: Natural and Computational Sciences**

Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**G 2: Area E: Social Science**

Students effectively analyze the complexity of human behavior, and how historical, economic, political, and/or spatial relationships develop, persist, and change.

---

**Student Learning Outcomes/Objectives**

**SLO 2: Knowledge Base of General Psychology (G: 2) (M: 2)**

Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

---

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
O/O 1: Knowledge Base of Physiological Mechanisms of Behavior (G: 1) (M: 1)

Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings and historical trends in the physiological basis of behavior.

General Education/Core Curriculum Associations

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

Measures, Targets, and Findings

M 1: PSYC1100 (Intro to Biopsychology) - Learning Survey 2010-11 (O: 1)

Students are asked to rate on a scale of 1-5 their own knowledge in 8 different areas of the course once at the beginning of the semester, and once at the end. The course areas are listed below. A copy of the learning survey can be found in the document repository. General Knowledge of Psychology 1) What biological psychology is about 2) The theory of evolution through natural selection Knowledge in Specific Areas of Psychology 3) Neurons and how they work 4) The brain and the nervous system 5) Vision 6) Audition 7) Learning and memory 8) Schizophrenia 9) Language

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target for O1: Knowledge Base of Physiological Mechanisms of Behavior

Our target for this measure is significant improvement in the average, total score on the survey, with a moderate or better effect size.

Findings 2011-2012 - Target: Not Reported This Cycle

The course coordinator for PSYC1100 left the department this year. As a result, PSYC1100 instructors collected pre (but not post) data in both semesters. We are not able to report findings for this measure this year. The new course coordinator has asked all instructors to perform the pre/post tests.

M 2: PSYC1101 Mastery Test (O: 2)

In all sections of PSYC1101, Introduction to Psychology, instructors are asked to include twenty questions on their final exam. These twenty questions constitute a mastery test which we use to measure progress toward outcome 1, Knowledge Base. A copy of the mastery test can be found in the document repository.

Source of Evidence: Academic direct measure of learning - other

Target for O2: Knowledge Base of General Psychology

Our target is that 70% of students will pass the mastery test with a score of 70% or better.

Findings 2011-2012 - Target: Met

At least 70% of students received a score of 70% or better on our mastery test questions this year, N=438.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Implement PSYC1100 measure under new course coordinator

The previous course coordinator supervising the measures of learning outcomes is no longer with GSU. As a result, none of the instructors in the past year collected data for our PSYC1100 measurement of the natural sciences Core learning objective. The new course coordinator is making sure that all PSYC1100 instructors are recording these data.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: enforce measurement of core natural sciences objectives
Responsible Person/Group: Chris Goode (Course Coordinator for PSYC1100)
Additional Resources: none

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The major change regarding the core curriculum was replacement of the outgoing course coordinator for PSYC1100, who is no longer with GSU. We hope to improve response from our PSYC1100 instructors with a new course coordinator.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have no data for the natural sciences core curriculum measure; we plan to collect those data in the coming year. For the social sciences core measure, we met our target, but we haven't done this regularly in the past few reporting periods. The course coordinator for PSYC1101 will continue to strengthen and standardize the curriculum for this course, to work with incoming instructors (many for this course are visiting or GTA instructors), and to increase the use of technology in the classroom that benefits instructors (e.g. clickers).
Georgia State University
Assessment Data by Section
2011-2012 Psychology BA, BS
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The department offers a general undergraduate degree program aligned with the American Psychological Association's guidelines for a baccalaureate in psychology and that is integrated with the broader liberal arts education goals of the College of Arts and Sciences. The department's undergraduate mission is to teach scientific thinking about behavior, the skills related to the conduct of research and the values that reflect psychology as both a science and an applied discipline, and to convey knowledge, skills, and values consistent with liberal arts education that are further developed in psychology.

Goals

G 1: Knowledge Skills and Values Specific to Psychology
[Comment for reviewers: As a member of the Undergraduate Assessment Committee I have reviewed Weave reports from several departments and have noticed that many reporters use the level of Assessment Goals as established in the Weave system differently. I thought it would be useful to say a bit about how we in the Psychology Department are using Weave and how this aligns with American Psychological Association standards for undergraduate degree program learning outcomes. The APA Guidelines for the Undergraduate Psychology Major (see document repository) outline ten learning objectives, each of which falls under one of two broad categories: Knowledge, skills and values consistent with the science and application of psychology; and knowledge, skills and values consistent with a more general liberal arts education that are further developed in psychology.] The first category represents objectives that provide hallmarks of psychology education. The general goal is to foster knowledge, skills and values consistent with the science and application of psychology, specifically. Five specific objectives are associated with this broad goal.

G 2: Knowledge, Skills, and Values Consistent with Liberal Arts Education that are Further Enhanced by Psychology
This broad goal describes specific outcomes that are usually a part of a general education program or liberal arts education, and which are enhanced by the discipline of Psychology. Conversely, liberal arts training in these areas contributes to a better understanding of the scientific study of behavior.

Student Learning Outcomes/Objectives

SLO 1: Knowledge Base of Psychology (G: 1) (M: 1, 2)
Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

General Education/Core Curriculum Associations
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: Research Methods in Psychology (G: 1) (M: 7, 8)
Students will understand and apply basic research methods in psychology, including research design, data analysis and interpretation.

SLO 3: Critical Thinking Skills in Psychology (G: 1) (M: 6)
Students will respect and use critical and creative thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes.

SLO 4: Application of Psychological Principles (G: 1)
Students will understand and apply psychological principles to personal, social, and organizational issues.

SLO 5: Values in Psychology (G: 1)
Students will be able to weigh evidence, tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a discipline.

SLO 6: Information and Technological Literacy (G: 2) (M: 5)
Students will demonstrate information competence and the ability to use computers and other technology for many purposes.

SLO 7: Communication Skills (G: 2) (M: 6)
Students will be able to communicate effectively in a variety of formats.

SLO 8: Sociocultural and International Awareness (G: 2)
Students will recognize, understand, and respect the complexity of sociocultural and international diversity.

**SLO 9: Personal Development (G: 2) (M: 3)**

Students will develop insight into their own and others' behavior and mental processes and apply effective strategies for self-management and self-improvement.

**SLO 10: Career Planning and Development (G: 2)**

Students will emerge from the major with realistic ideas about how to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

### Measures, Targets, and Findings

**M 1: PSYC1100 Learning Survey (O: 1)**

Students are asked to rate on a scale of 1-5 their own knowledge in 8 different areas of the course once at the beginning of the semester, and once at the end. The course areas are listed below. A copy of the learning survey can be found in the document repository.

- General Knowledge of Psychology
  1) What biological psychology is about
  2) The theory of evolution through natural selection
- Knowledge in Specific Areas of Psychology
  3) Neurons and how they work
  4) The brain and the nervous system
  5) Vision
  6) Audition
  7) Learning and memory
  8) Schizophrenia
  9) Language

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Knowledge Base of Psychology**

Our target for this measure is significant improvement in the average, total score on the survey, with a moderate or better effect size.

**Findings 2011-2012 - Target: Not Reported This Cycle**

The course coordinator for PSYC1100 left the department this year. Instructors for PSYC1100 collected pre, but not post data for this survey.

**M 2: PSYC1101 - Mastery Test (O: 1)**

In all sections of PSYC1101, Introduction to Psychology, instructors are asked to include twenty questions on their final exam. These twenty questions constitute a mastery test which we use to measure progress toward outcome 1, Knowledge Base. Our performance target for this measurement is greater than 70% average score. A copy of the mastery test can be found in the document repository.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Knowledge Base of Psychology**

Our achievement target is that 70% of students pass the mastery test (70% or better).

**Findings 2011-2012 - Target: Met**

At least 76.9% of students scored 70% or better on the mastery test questions this year, N=438.

**M 3: PSYC3110 - Behavioral Observation (O: 9)**

Students in PSYC3110 - Interpersonal Behavior are asked to learn 3 interpersonal skills (listener, evaluator and talker) and perform a randomly selected skill for an instructor. Behavior is rated by a trained observer (not the instructor). The students are evaluated on their ability to display each of five listening and six talking skills at least once during the role-play. The behavioral measure is administered during the last week of class.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O9: Personal Development**

Demonstrate at least 80% of both listening and talking skills.

**Findings 2011-2012 - Target: Met**

All students demonstrated at least 80% of listening and talking skills, N=187.

**M 5: PSYC3530 - PORT Quiz (O: 6)**

The Psychology Online Research Tools tutorial was developed by Kim Darnell, Lyn Thaxton and Chris Goode as an online tutorial to introduce students to the computer-based library research tools available for psychology. Students taking PSYC3530 - Advanced Research Design and Analysis take the tutorial near the beginning of the semester. A 20 point quiz is given to assess the effectiveness of the tutorial. A copy of the quiz can be found in the document repository.

Source of Evidence: Academic direct measure of learning - other

**Target for O6: Information and Technological Literacy**

Seventy-five percent passing with a grade of 75% or better.

**Findings 2011-2012 - Target: Partially Met**

Only 73.8% of students passed the PORT Quiz with a score of 75% or better. The average score was 80.75, N=261.

**M 6: PSYC3530 and 4800 (CTW) Final Papers (O: 3, 7)**

PSYC 3530 provides psychology majors with experience in research design, data analysis, and scientific communication needed for higher-level understanding in 4000-level courses, the development and writing of senior-year theses, and graduate study. Topics include the structure and style of scientific writing in psychology, experimental design, statistical techniques, and the preparation of a
formal research paper in APA style. The form of the final paper varied across terms: Students who took the course in Fall 2010 completed an APA-style research project proposal, including Introduction, Method, and Projected Results sections, with 10 recent peer-reviewed articles as primary sources; students who took the course in Spring 2011 completed an APA-style literature review based on 4-10 recent peer-reviewed articles as primary sources. A copy of the rubric can be found in the document repository. PSYC 4800 is a senior seminar; each section focuses on a different topic. As such, the types and topics of the CTW posttest writing assignments vary across sections. Below, a brief description of the different assignments for which student examples have been provided, organized by section. PSYC 4800, Section 1 (4800-1) Each student will complete a weekly short reaction essay (approximately two well-formed paragraphs) on the article or chapter assigned for discussion. These essays should evaluate the theoretical arguments and evidence presented and/or compare and contrast the assigned article(s) with other points made in class. At the end of the essay, each student should list a question to discuss during class. Though brief, these submissions should use appropriate organization, style, and grammar. PSYC 4800, Section 2 (4800-2) The Case: In 1996 Oprah Winfrey had a guest on her show from the Human Society who discussed the practice of feeding cows ground-up meat from dead livestock. This practice, now banned by the Food and Drug Administration in the United States, is believed to have contributed to the spread of bovine spongiform encephalopathy, commonly known as “mad cow disease”. Oprah, after hearing of the risks associated with this practice, pronounced on her show that she would not eat another burger. The resultant “Oprah Crash” of 1996 sent beef prices and cattle futures tumbling downward by nearly 10%. Cattle ranchers were convinced that Oprah’s comments contributed to the decline in prices, the public’s concerns regarding the safety of beef, and the heightened fear of mad cow disease. Oprah Winfrey was sued in 1998 by the cattle industry for $12 million in damages and losses. The ranchers sued under a Texas law, the False Disparagement of Perishable Food Products Act of 1995. The Assignment: Act as a trial consultant for jury selection and (based on research) suggest two characteristics that should be used to determine who you would select for the jury or two characteristics that should be used to remove people from the jury. Remember to write scientifically and do not use the word “I”. You can take the side of the prosecuting attorney or the defense attorney. PSYC 4800, Section 3 (4800-3) As a final project, each student must prepare a synthesis paper in which he/she describes and evaluates the various theories of the psychology of war discussed in the course, reflecting on their similarities and differences and the connections the student sees between the various theories and the data about the psychology of war discussed over the semester. Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Critical Thinking Skills in Psychology

Findings 2011-2012 - Target: Met

For the PSYC3530 assignments: The median score for Organization and Logic was 3, which is in the ‘developing’ range, and 97% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. The median score for Use of Evidence was 3, which is in the ‘developing’ range, and 96% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. The median score for Position and Balance was 3, which is in the ‘developing’ range, and 99% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. The median score for Use of Evidence was 3, which is in the ‘developing’ range, and 98% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. The median score for Use of Evidence was 4, which is in the ‘mastering’ range, and 79% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Use of Evidence was 4, which is in the ‘mastering’ range, and 73% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. For the PSYC4800 assignments: The median score for Organization and Logic was 4, which is in the ‘mastering’ range, and 77% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Use of Evidence was 4.5, which is in the ‘mastering’ range, and 73% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Use of Evidence was 4.5, which is in the ‘mastering’ range, and 77% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Position and Balance was 4, which is in the ‘mastering’ range, and 67% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher.

Findings 2011-2012 - Target: Partially Met

For PSYC3530: The median score for Grammar and Mechanics was 3, which is in the ‘developing’ range, and 94% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. The median score for Content and Development was 3, which is in the ‘developing’ range, and 96% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. The median score for Organization and Use of Sources was 4, which is in the ‘mastering’ range, and 96% of the students were rated a score of 2 (the lower end of the ‘developing’ range) or higher. For PSYC4800: The median score for Grammar and Mechanics was 3, which is in the ‘developing’ range, and 46% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Content and Development was 4, which is in the ‘mastering’ range, and 60% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Position and Balance was 4, which is in the ‘mastering’ range, and 73% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher.

M7: PSYC4760 - Research Practicum Science Self-efficacy survey (O: 2)

A modified version of Chemers’ (2010) Scientific Self-Efficacy Scale was administered to students in PSYC4760 at the beginning and end of the semester. This scale measures students’ belief in their own ability to use scientific skills to solve real problems, e.g. “use technical science skills,” and “generate a research question to answer.” A complete version of the survey can be found in the documents repository.

Source of Evidence: Academic direct measure of learning - other

Target for O2: Research Methods in Psychology

Significant increase in Science Self-Efficacy, between pre- and post- measurements, with moderate or greater effect size.
already exists in this new course. Occupational pursuits in a variety of settings. Emerge from the major with realistic ideas about how to implement their psychological knowledge, skills and values in PSYC3110 - we will not change our existing measure for this goal. Others' behavior and mental processes and apply effective strategies for self-management and self-improvement. Course: PSYC3530 Quantitative Methods Questions (O: 2) We developed a series of questions to assess mastery of quantitative methods to be delivered in sections of PSYC3530 as part of exams, quizzes or other assignments. The full list of questions can be found in the document repository. Source of Evidence: Standardized test of subject matter knowledge. Target for O2: Research Methods in Psychology Our target for this measure is that 75% of students answer 75% or more of these questions correctly. Findings 2011-2012 - Target: Not Met Scores increased from pre (M=37.97, SD=7.27) to post (M=39.79, SD=7.41), however this difference was not significant, t(32)=-3.7, p=.32. Remap measures to outcomes. At the review of last year’s learning outcomes assessment, it was suggested we make some changes to our outcomes and the measures we use to assess them. Specifically, it was recommended that we have fewer objectives - at the time we were reporting on 11 learning objectives. It was also recommended we have fewer objectives being measured by a single outcome. To address these suggestions we have developed the following plan. The 11 objectives we were monitoring were based on ten learning objectives recommended for undergraduate programs in psychology by the American Psychological Association in a 2000 report, plus our university core objective (Contemporary Issues). As the ten learning goals outlined by the APA are so well-suited for our undergraduate program, we feel strongly that we should monitor each goal. Our subcommittee has identified courses with measures already in place that we can use to track progress toward these goals. We could not find sufficient justification for eliminating any of the ten. We do not, however, see the necessity of reporting on our core objective along with our undergraduate program objectives, as we report on it separately. While the goals themselves will remain very much the same, our mapping of measurements to goals will undergo a major revision. We anticipate it will take at least two years before we are measuring progress toward each goal with the new measures, but we have identified from which courses we will be collecting measurement data. For some of these courses we have already identified a specific measure, that is already being taken as part of the course, that we can use to track progress toward specific goals. Our planned map of courses to goals is as follows: 1. Knowledge Base of Psychology - Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings and historical trends in psychology. Course: PSYC1100. Measure: We already have a mastery test in place that we can use to measure progress toward this goal. 2. Research Methods in Psychology - Students will understand and apply basic research methods in psychology, including research design, data analysis and interpretation. Course: PSYC3510 (2˚ measure PSYC3530) - we will need to find an existing measure in the course - this is the first semester it is being taught. 3. Critical Thinking Skills in Psychology - Students will respect and use critical and creative thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes. Course: PSYC4800 - We have a two sample writing analysis in the course already - we will use an existing CTW rubric to compare pre/post writing samples. 4. Application of Psychology - Students will understand and apply psychological principles to personal, social, and organizational issues. Course: PSYC2040, PSYC2101 - We need to identify an existing measure in these courses to serve as 1˚ and 2˚ measurements for this goal. 5. Values in Psychology - Students will be able to weigh evidence, tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a discipline. PSYC3510 - We need to identify an existing measure in these courses to serve as a measurement toward this goal. 6. Information and Technological Literacy - Students will demonstrate information competence and the ability to use computers and other technology for many purposes. We have a measure in place that is perfect for this goal - the library works with our department to offer a quiz on the Psychology Online Research Tutorial. 7. Communication Skills - Students will be able to communicate effectively in a variety of formats. PSYC3110 - we will not change our existing measure for this goal. 8. Sociocultural and International Awareness - Students will recognize, understand, and respect the complexity of sociocultural and international diversity. Course: PSYC3570 - Multicultural Psychology - We need to identify and existing measure in this course to serve as a measurement for this goal. 9. Personal Development - Students will develop insight into their own and others' behavior and mental processes and apply effective strategies for self-management and self-improvement. Course: PSYC3110 - we will not change our existing measure for this goal. 10. Career Planning and Development - Students will emerge from the major with realistic ideas about how to implement their psychological knowledge, skills and values in occupational pursuits in a variety of settings. Course: PSYC2030 - Careers in Psychology - We will identify a measurement that already exists in this new course.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: We plan to implement new measures of learning outcomes over the next two years.
Projected Completion Date: 07/2011
Responsible Person/Group: Chris Goode, Kim Darnell, Sarah Cook, Rachelle Cohen.
Additional Resources: Two Graduate Student Assistants to help analyze data.

Establish Peer Tutoring Centers for Writing and Statistics
We received an internal grant to fund graduate student tutors for writing and statistics. The funding period ended, but we continued the model as a volunteer, peer-based tutoring center, which is now housed in Kell Hall.

Established in Cycle: 2009-2010
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** Peer Tutoring Center for Writing and Statistics - Undergraduate peers tutor students who need help with writing and statistics, primarily in our quantitative core (PSYC3510/3530).  
**Responsible Person/Group:** Marika Lamoreaux, Liz Sheehan

**Schedule Tracking of APA Learning Outcomes**
In response to feedback from the UAC we have decided not to try to measure progress toward all 10 APA learning objectives every year. Rather, we will measure progress toward select objectives with rotation to try to cover the most relevant APA-mandated objectives regularly. Over the coming year, our UPC will work together to develop a schedule of which objectives we will measure progress toward, and what measures we will use for those objectives.

- **Established in Cycle:** 2011-2012  
- **Implementation Status:** Planned  
- **Priority:** High  
- **Implementation Description:** schedule measures of APA learning objectives  
- **Responsible Person/Group:** Chris Goode/UPC  
- **Additional Resources:** none

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Most of the changes were to address ever-growing demand for courses required for the major. These changes were not made based on learning outcomes data, but on data from the Office of Institutional Research. We have, however, revised our learning outcomes tracking strategy to focus on fewer of the APA-recommended learning objectives for an undergraduate Psychology major, and these were based in part on feedback we received from the UAC.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

In addition to the change in assessment strategy based on feedback from the UAC (see previous answer) we have aligned our CTW-related measures (which are also reported here for objective 3) to match the definitions specified by our accreditation body the American Psychological Association. Again, most of the other major changes to courses/curricula were based on the increasing number of psychology majors here at GSU.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Psychology PhD**

As of: 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
The mission of the PhD program in the Department of Psychology is to educate graduate students in various areas of psychology and provide specific training in scholarship, research, clinical, and other skills, consistent with the expertise of the current faculty. Five programs are represented: Clinical Psychology, Community Psychology, Cognitive Sciences, Development Psychology, and Neuropsychology and Behavioral Neuroscience. Our graduate students seek entry to our program hoping to become licensed clinical psychologists; psychologists in community, non-profit, or governmental organizations; college teachers in undergraduate institutions; and researchers in research settings including research universities. Our mission is to provide the appropriate education and training for a PhD psychologist in such settings.

**Goals**

**G 1: Psychological Science**
To train graduate students to be scientists (e.g., empiricists, critical thinkers) across domains (e.g., applied, theoretical).

**G 2: Knowledge in Psychology**
To train graduate students to be well-versed broadly in psychology (e.g., history of the field, research methodology) as well as experts in specific areas of concentration (e.g., clinical, child clinical, specific research program).

**G 3: Applied Skills in Psychology**
To train graduate students to be able to apply their skills across settings (e.g., research, instruction, applied) and within specific areas of individualized interest and concentration (e.g., community center for disadvantaged populations).

**Student Learning Outcomes/Objectives**

**SLO 1: Theory and Content (G: 2) (M: 1, 2, 3, 4, 5, 6, 7, 8, 12, 15, 16)**
Students will develop expertise with major concepts, theoretical perspectives, empirical findings, and historical trends in the field of Psychology, the program area, and the research specialty area.
Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 2: Research Methods (G: 1, 3) (M: 1, 2, 3, 4, 5, 6, 7, 8, 11, 12, 15, 16)**

Students will understand and appropriately apply research methods including research design, data analysis, and interpretation.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

3.1 Enhance a research culture.

3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**SLO 3: Communication and Collaboration Skills (G: 3) (M: 1, 2, 3, 5, 6, 7, 8, 12, 13, 14, 15, 16)**

Students will communicate and collaborate effectively in a variety of formats and settings.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

5.4 Enhance the global competency of students, faculty and staff.

**SLO 4: Application (G: 3) (M: 4, 13, 14, 15, 16)**

Students will apply psychological principles in professional activities.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

5.4 Enhance the global competency of students, faculty and staff.

**SLO 5: Critical Thinking Skills (G: 1) (M: 1, 2, 3, 4, 5, 6, 7, 8, 13, 14, 15, 16)**

Students will respect and use critical and creative thinking, skeptical inquiry, and the scientific approach.
### General Education/Core Curriculum Associations

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

### SLO 6: Personal Development (G: 3) (M: 13, 14, 15, 16)

Students will show insight into their own and others’ behavior and mental processes and apply effective strategies for self-management and self-improvement.

### SLO 7: Information and Technology Literacy (G: 3) (M: 1, 2, 3, 5, 6, 7, 8, 15, 16)

Students will demonstrate information technology competence and the ability to use computers and other technology for relevant purposes.

### SLO 8: Values in Psychology (G: 1, 3) (M: 3, 4, 8, 9, 12, 13, 14, 15, 16)

Students will weigh evidence, tolerate ambiguity, act ethically, and reflect other values underpinning psychology.

### SLO 9: Sociocultural and International Awareness (G: 2, 3) (M: 1, 2, 5, 6, 7, 10, 12, 15, 16)

Students will incorporate knowledge of sociocultural and international diversity in their work.
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

5.4 Enhance the global competency of students, faculty and staff.

**SLO 10: Career Planning and Development (G: 2, 3) (M: 13, 14, 15, 16)**

Students will emerge from graduate school with ideas about how to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.

Relevant Associations: American Psychological Association (APA) accreditation of the Clinical Program

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**Measures, Targets, and Findings**

**M 1: MA Thesis Proposal GLOE (O: 1, 2, 3, 5, 7, 9)**

During the oral presentation of the Master’s proposal, committee members are given a Graduate Learning Outcome Evaluation Form to complete. Each member assigns a rating of 1 (Did not meet expectations), 2 (Met expectations), or 3 (Exceeded expectations)

Source of Evidence: Presentation, either individual or group

**Target for O1: Theory and Content**

The average score should be between a 2 ("Met Expectations") and 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**

The average score was 2.19.

**Target for O2: Research Methods**

The average score should be between a 2 ("Met Expectations") and 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**

The average score was 2.13.

**Target for O3: Communication and Collaboration Skills**

The average score should be between a 2 ("Met Expectations") and 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**

The average score was 2.34.

**Target for O5: Critical Thinking Skills**

At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**

100% of students received a score of 2 or 3.

**Target for O7: Information and Technology Literacy**

At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**

100% of students received a score of 2 or 3.

**Target for O9: Sociocultural and International Awareness**

At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**

100% of students received a score of 2 or 3.

**M 2: MA Thesis Defense GLOE (O: 1, 2, 3, 5, 7, 9)**

During the oral presentation of the Master’s defense, committee members are given a Graduate Learning Outcome Evaluation Form to complete. Each member assigns a rating of 1 (Did not meet expectations), 2 (Met expectations), or 3 (Exceeded expectations)

Source of Evidence: Presentation, either individual or group
Target for **O1: Theory and Content**
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
93% of students received a score of 2 or 3.

Target for **O2: Research Methods**
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Not Met**
88% of students received a score of 2 or 3.

Target for **O3: Communication and Collaboration Skills**
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
95% of students received a score of 2 or 3.

Target for **O5: Critical Thinking Skills**
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Not Met**
86% of students received a score of 2 or 3.

Target for **O7: Information and Technology Literacy**
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
98% of students received a score of 2 or 3.

**M 3: MA Thesis (Pass or Fail) (O: 1, 2, 3, 5, 7, 8)**
Evaluated by faculty committee and defended orally in committee meeting
Source of Evidence: Senior thesis or culminating major project

**Target for O1: Theory and Content**
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

**Target for O2: Research Methods**
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

**Target for O3: Communication and Collaboration Skills**
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

**Target for O5: Critical Thinking Skills**
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

**Target for O7: Information and Technology Literacy**
At least 90% of students should pass on first attempt.

### Findings 2011-2012 - Target: Met
More than 90% of students passed on first attempt.

**Target for O8: Values in Psychology**

At least 90% of students should pass on first attempt.

### Findings 2011-2012 - Target: Met
More than 90% of students passed on first attempt.

### M 4: General Exam (Pass or Fail) (O: 1, 2, 4, 5, 8)

Doctoral examination scored by committee of faculty

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Theory and Content**

A minimum of 90% of students should pass on first attempt

### Findings 2011-2012 - Target: Met
More than 90% of students passed on first attempt.

**Target for O2: Research Methods**

A minimum of 90% of students should pass on first attempt

### Findings 2011-2012 - Target: Met
More than 90% of students passed on first attempt.

**Target for O4: Application**

A minimum of 90% of students should pass on first attempt

### Findings 2011-2012 - Target: Met
More than 90% of students passed on first attempt.

**Target for O5: Critical Thinking Skills**

A minimum of 90% of students should pass on first attempt

### Findings 2011-2012 - Target: Met
More than 90% of students passed on first attempt.

### M 5: General Exam GLOE (O: 1, 2, 3, 5, 7, 9)

During the oral defense of the General Exam, committee members are given a Graduate Learning Outcome Evaluation Form to complete. Each member assigns a rating of 1 (Did not meet expectations), 2 (Met expectations) or 3 (Exceeded expectations)

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Theory and Content**

At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

### Findings 2011-2012 - Target: Met
92% of students received a score of 2 or 3.

**Target for O2: Research Methods**

At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

### Findings 2011-2012 - Target: Met
100% of students received a score of 2 or 3.

**Target for O3: Communication and Collaboration Skills**

At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

### Findings 2011-2012 - Target: Met
100% of students received a score of 2 or 3.

**Target for O5: Critical Thinking Skills**  
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

### Target for O1: Theory and Content
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
96% of students received a score of 2 or 3.

### Target for O2: Research Methods
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
92% of students received a score of 2 or 3.

### Target for O3: Communication and Collaboration Skills
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
96% of students received a score of 2 or 3.

### Target for O5: Critical Thinking Skills
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
98% of students received a score of 2 or 3.

### Target for O7: Information and Technology Literacy
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
98% of students received a score of 2 or 3.

### Target for O9: Sociocultural and International Awareness
At least 90% of students should receive a score of 2 ("Met Expectations") or 3 ("Exceeded Expectations").

**Findings 2011-2012 - Target: Met**
98% of students received a score of 2 or 3.

### M 8: PhD Dissertation (Pass or Fail) (O: 1, 2, 3, 5, 7, 8)
Evaluates by faculty committee and defended orally in committee meeting.

Source of Evidence: Senior thesis or culminating major project

#### Target for O1: Theory and Content
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

#### Target for O2: Research Methods
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

#### Target for O3: Communication and Collaboration Skills
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

#### Target for O5: Critical Thinking Skills
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**
More than 90% of students passed on first attempt.

#### Target for O7: Information and Technology Literacy
At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**

More than 90% of students passed on first attempt.

**Target for O8: Values in Psychology**

At least 90% of students should pass on first attempt.

**Findings 2011-2012 - Target: Met**

More than 90% of students passed on first attempt.

### Target for O3: Communication and Collaboration Skills

At least 90% of students should meet or exceed expectations on a major assignment that assesses teaching expertise.

### Findings 2011-2012 - Target: Met

100% of students met or exceeded expectations on a major assignment that assesses teaching expertise.

### Target for O4: Application

At least 90% of students should meet or exceed expectations on a major assignment that assesses teaching expertise.

### Findings 2011-2012 - Target: Met

100% of students met or exceeded expectations on a major assignment that assesses teaching expertise.

### Target for O5: Critical Thinking Skills

At least 90% of students should meet or exceed expectations on a major assignment that assesses teaching expertise.

### Findings 2011-2012 - Target: Met

100% of students met or exceeded expectations on a major assignment that assesses teaching expertise.

### Target for O6: Personal Development

At least 90% of students should meet or exceed expectations on a major assignment that assesses teaching expertise.

### Findings 2011-2012 - Target: Met

100% of students met or exceeded expectations on a major assignment that assesses teaching expertise.

### Target for O8: Values in Psychology

At least 90% of students should meet or exceed expectations on a major assignment that assesses teaching expertise.

### Findings 2011-2012 - Target: Met

100% of students met or exceeded expectations on a major assignment that assesses teaching expertise.

### Target for O10: Career Planning and Development

At least 90% of students should meet or exceed expectations on a major assignment that assesses teaching expertise.

### Findings 2011-2012 - Target: Met

100% of students met or exceeded expectations on a major assignment that assesses teaching expertise.

### M 14: Teaching performance (O: 3, 4, 5, 6, 8, 10)

Review of student-instruction course evaluations.

Source of Evidence: Student course evaluations on learning gains made

### Target for O3: Communication and Collaboration Skills

At least 85% of GTAs should have good to excellent teaching evaluations (e.g., score on item 17 above 3.9, generally positive comments) per semester, as determined by the Director of Graduate Studies.

### Findings 2011-2012 - Target: Partially Met

78% of GTAs received a rating of good to excellent on teaching evaluations (i.e., score on item 17 above 3.9).

### Target for O4: Application

At least 85% of GTAs should have good to excellent teaching evaluations (e.g., score on item 17 above 3.9, generally positive comments) per semester, as determined by the Director of Graduate Studies.

### Findings 2011-2012 - Target: Partially Met
78% of GTAs received a rating of good to excellent on teaching evaluations (i.e., score on item 17 above 3.9).

**Target for O5: Critical Thinking Skills**

At least 85% of GTAs should have good to excellent teaching evaluations (e.g., score on item 17 above 3.9, generally positive comments) per semester, as determined by the Director of Graduate Studies.

**Findings 2011-2012 - Target: Partially Met**

78% of GTAs received a rating of good to excellent on teaching evaluations (i.e., score on item 17 above 3.9).

**Target for O6: Personal Development**

At least 85% of GTAs should have good to excellent teaching evaluations (e.g., score on item 17 above 3.9, generally positive comments) per semester, as determined by the Director of Graduate Studies.

**Findings 2011-2012 - Target: Partially Met**

## Target for O4: Application

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Target for O5: Critical Thinking Skills

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Target for O6: Personal Development

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Target for O7: Information and Technology Literacy

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Target for O8: Values in Psychology

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Target for O9: Sociocultural and International Awareness

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Target for O10: Career Planning and Development

At least 95% of student evaluations should indicate that they are meeting or exceeding expectations.

**Findings 2011-2012 - Target:** Not Reported This Cycle

The annual evaluations are not consistently written in a way to allow for extraction of this information.

## Details of Action Plans for This Cycle (by Established cycle, then alpha)

### Discuss with Graduate Program Committee

The Director of Graduate Studies (DGS) will bring these results to the Graduate Program Committee (GPC; Chairs of the 5 program) to determine whether the achievement target is reasonable or the training is adequate in this domain.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Publications and presentations | Outcome/Objective: Critical Thinking Skills
- **Responsible Person/Group:** DGS and GPC

### Discuss with Graduate Program Committee

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

This year we revised the learning outcomes, measures, and target. These were minor changes made. We are content with our 3 broad goals. However, in the coming academic year, we plan to discuss our 10 objectives, 16 measures, and 59 targets in order to select the most important objectives, measures, and targets. It was determined that our larger number of objectives, measures, and especially targets complicates the assessment process and makes it difficult to discern important training information. Thus, we aim to have approximately 4 key objectives, 5 measures, and 5 targets for the coming academic year.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Psychology is a large department with 5 unique concentrations (i.e., Clinical, Developmental, NBN, Community, and Cognitive Sciences) and 2 dual-degree concentrations (i.e., Clinical - NBN, Clinical-Community). Each of the 5 concentrations has a Chair and a committee that conducts individualized training evaluations and changes to curriculum and courses. Thus, the data obtained at the department-level (i.e., this WEAVE report) has little impact. The findings are typically taken to the concentration level for consideration for changes to training. The Graduate Program Committee will meet to discuss how to best use the WEAVE reporting system to impact department-level training decisions.

**Assessment Data by Section**

**2011-2012 Public Administration MPA**

As of: 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Master of Public Administration (MPA) program of the Andrew Young School of Policy Studies prepares students to become leaders as executives, managers, analysts, and policy specialists in public and nonprofit sectors.

**Goals**

**G 1: Understanding disciplinary and conceptual foundations of public or nonprofit administration**

Students learn major disciplinary and conceptual foundations of public or nonprofit administration. This includes theories of organization and bureaucracy, administrative behavior and management, politics and administration, and public policy-making.

**G 2: Understanding basic methods and statistics for applied research**

Students learn basic methods and statistics for research in the public and nonprofit sectors. These include the scientific method in applied research, elementary research design, measurement, qualitative research, computer-assisted data analysis, and beginning statistics including descriptive statistics, crosstabulation, introductory inferential statistics, and graphical presentations.

**G 3: Understanding intermediate methods and statistics**

Students understand intermediate methods and statistics in applied research in the public and nonprofit sectors. These include survey research, experimental and quasi-experimental designs, sampling, and intermediate statistical techniques including analysis of variance, correlation and regression, and time-series analysis.

**G 4: Understanding basic principles of microeconomics applied to public or nonprofit sectors**

Students will understand basic principles of microeconomics as applied to public and nonprofit sectors.

**G 5: Understanding practice and problems of budgeting and finance in public or nonprofit organizations**

Students understand the practice and problems of budgeting and finance in the public or nonprofit organizations. This includes fiscal management in government and nonprofits with special emphasis on budgetary procedures and the means of budgetary analysis.

**G 6: Understanding approaches to management systems and strategies in nonprofit and public organizations**

Students understand the approaches to the management of systems and strategies in public and nonprofit organizations, focusing primarily on problem-solving strategies and techniques for use at the executive and operating levels.

**G 7: Understanding legal issues relevant to public and nonprofit organizations**

Students understand basic legal issues relevant to the managers of public and nonprofit organizations.

**G 8: Understanding theories and practice of leadership and organizational behavior**

Students understand theories and practice of leadership and organizational behavior relevant to public and nonprofit organizations. This includes communication, motivation, group dynamics, organizational change, leadership and decision making in public organizations.

**G 9: Analyze problems, develop solutions, and communicate about policy and management issues**

Students understand how to critically assess public or nonprofit policy and management issues and to develop solutions through research and analysis. Students understand how to effectively communicate verbally and through writing about public or nonprofit policy and management issues, problems, and solutions.

</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 12: Apply basic theoretical and empirical tools of economic analysis to public and nonprofit policy issues (G: 4) (M: 12)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to apply basic theoretical and empirical tools of economic analysis to policy issues affecting the public and nonprofit sectors.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 13: Demonstrate understanding of market failure and the potential role of the public and nonprofit sectors (G: 4) (M: 13)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students demonstrate an understanding of the effects of market failure and the potential role of the public and nonprofit sectors.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 14: Describe the technical nature and process of public and nonprofit budgeting (G: 5) (M: 14)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students describe and explain the technical nature of public or nonprofit budgeting in the U.S., including the timetable and rules of the process that are typical of the three levels of government or typical of the nonprofit sector. Students should be able to conduct a budget analysis and demonstrate an understanding of key indicators of financial health.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 15: Compare politics of budgeting with rational methods of resource allocation in public or nonprofit organizations (G: 5) (M: 15)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to assess, explain, and compare the political aspects of budgeting with rational methods of resource allocation in the U.S or explain how organizational characteristics and external sources of regulation and funding affect nonprofit organizations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 16: Demonstrate ability to identify key components of results oriented management frameworks (G: 6) (M: 16)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to identify key components of results oriented management frameworks.</td>
</tr>
</tbody>
</table>
Students demonstrate the ability to identify key components of results oriented management frameworks as they apply in the public and nonprofit sectors.

**SLO 17: Demonstrate understanding of models of organizational structure and design (G: 6) (M: 17)**

Students demonstrate the ability to understand the advantages and disadvantages of various models of organizational structure and design.

**SLO 18: Demonstrate knowledge of contract and administrative law in public sector or nonprofit law (G: 7) (M: 18)**

Students able to demonstrate knowledge of contract law and administrative law, including rulemaking, adjudication of administrative action, and judicial review of administrative action or demonstrate knowledge of nonprofit law in the areas of charitable giving, advocacy, lobbying, commercial activity, fundraising, and employee compensation.

**SLO 19: Evaluate the legal rights and responsibilities of public or nonprofit managers and employees (G: 7) (M: 19)**

Students able to evaluate the legal rights and responsibilities of public or nonprofit managers and employees.

**SLO 20: Demonstrate understanding of administrative, adjudicatory, and alternative dispute resolution (G: 7) (M: 20)**

Students demonstrate ability to understand administrative, adjudicatory, and alternative dispute resolution avenues to resolve conflict and grievances.

**SLO 21: Ability to evaluate major theories of leadership and organizational behavior (G: 8) (M: 21)**

Students able to identify and evaluate the major theories of leadership and organizational behavior.

**SLO 22: Demonstrate how organizational and leadership theories are applied in public and nonprofit organizations (G: 8) (M: 22)**

Students able to demonstrate how specific organizational and leadership theories are applied in public and nonprofit organizations.

**SLO 23: Demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies (G: 8) (M: 23)**

Students demonstrate how to use organizational theories and related tools to solve practical management problems in a public and nonprofit agency.

**SLO 24: Demonstrate ability to effectively analyze problems and develop solutions (G: 9) (M: 24)**

Students will demonstrate an ability to use critical thinking skills to analyze problems and develop solutions to these problems.

**SLO 25: Effective verbal and written communication skills related to public or nonprofit issues (G: 9) (M: 25)**

Students will demonstrate an ability to communicate clearly and concisely through written or oral communication. Different classes will emphasize different aspects of communication skills depending on the nature of the material to be covered.

**Measures, Targets, and Findings**

**M 1: Describe and analyze the key models of government and administrative reform (O: 1)**

In policy memos and on the final exam students will be able to describe and analyze the key models of government and administrative reform or demonstrate knowledge of important contemporary organizational and environmental challenges faced by leaders and managers of nonprofit organizations and the policy and management issues that now confront the sector (PMAP 8111 or PMAP 8210)

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Demonstrate understanding of models of government and administrative reform**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students at least partially meet this objective. In policy memos and on the final exam students will be able to describe and analyze the key difference between models of government and administrative reform driving public policy.

**Findings 2011-2012 - Target: Met**

100% at least partially met objective.

**M 2: Identify major ethical issues that arise in public or nonprofit sector (O: 2)**

In an ethics memo and on the final exam students will be able to identify the major ethical issues that arise in public or nonprofit organizations.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Identify major ethical issues that arise in public or nonprofit sector**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of...
the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students at least partially meet the objective. In an ethics memo and on the final exam students will be able to identify the major ethical issues that arise in public or nonprofit organizations.

Findings 2011-2012 - Target: Met
100% at least partially met objective.

M 3: Describe the nature and function of the public or nonprofit sector (O: 3)
On papers, policy memos, and the final exam students will describe the nature and function of the public sector or demonstrate an understanding of the scope and significance of the nonprofit sector in the U.S. and abroad (PMAP 8111 or PMAP 8210)

Source of Evidence: Academic direct measure of learning - other

Findings 2011-2012 - Target: Met
96% at least partially met objective.

M 4: Apply basic concepts of measures and using data sets (O: 4)
Students complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.

Source of Evidence: Academic direct measure of learning - other

Findings 2011-2012 - Target: Met
88% at least partially met this objective.

M 5: Demonstrate skills using the computer to perform basic statistical analysis (O: 5)
Students do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

Source of Evidence: Academic direct measure of learning - other

Findings 2011-2012 - Target: Met
88% at least partially met this objective.

M 6: Demonstrate ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results (O: 6)
The students’ final examination and final paper provide evidence of their ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results.

Source of Evidence: Academic direct measure of learning - other

Findings 2011-2012 - Target: Met
M 7: Demonstrate ability to apply introductory statistical techniques to analyze questions facing public managers (O: 7)

The students' final paper and the midterm and final examinations measure their ability to apply introductory statistical techniques to analyze questions facing public managers.

Source of Evidence: Academic direct measure of learning - other

Target for O7: Demonstrate ability to apply introductory statistical techniques to analyze questions facing public and nonprofit managers

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. The students' final paper and the midterm and final examinations measure their ability to apply introductory statistical techniques to analyze questions facing public managers.

Findings 2011-2012 - Target: Met
92% at least partially met this objective.

M 8: Demonstrate understanding of principles of research design methods appropriate to public administration and policy (O: 8)

Students use examinations and the final paper to demonstrate their understanding of basic principles of research design methods appropriate for research in public administration and policy.

Source of Evidence: Academic direct measure of learning - other

Target for O8: Demonstrate understanding of principles of research design methods appropriate to public and nonprofit administration and policy

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. Students use examinations and the final paper to demonstrate their understanding of basic principles of research design methods appropriate for research in public administration and policy.

Findings 2011-2012 - Target: Met
96% at least partially met this objective.

M 9: Ability to interpret regression coefficients on interval-level and dummy independent variables (O: 9)

Students skills of being able to interpret regression coefficients on interval-level and dummy independent variables are measured by examinations and the final paper.

Source of Evidence: Academic direct measure of learning - other

Target for O9: Ability to interpret regression coefficients on interval-level and dummy independent variables

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8131 will at least partially meet this objective. Students skills of being able to interpret regression coefficients on interval-level and dummy independent variables are measured by examinations and the final paper.

Findings 2011-2012 - Target: Met
90% at least partially met this objective.

M 10: Ability to demonstrate master-level writing skill in policy-relevant research (O: 10)

Students must produce a final research design paper to demonstrate master-level writing skill in policy-relevant research.

Source of Evidence: Academic direct measure of learning - other

Target for O10: Ability to demonstrate graduate-level writing skill in policy-relevant research

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. Students must produce a final research design paper to demonstrate master-level writing skill in policy-relevant research. 82% of students enrolled in PMAP 8131 will at least partially meet this objective.

Findings 2011-2012 - Target: Met
98% at least partially met this objective.

M 11: Demonstrated understanding of microeconomic principles and the public sector (O: 11)
Students will demonstrate their understanding of microeconomic principles and the public sector on a midterm examination and written assignments.

Source of Evidence: Academic direct measure of learning - other

**Target for O11: Demonstrate understanding of microeconomic principles**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141, Microeconomics for Public Policy, will at least partially meet this objective. Students will demonstrate their understanding of microeconomic principles and the public sector on a midterm examination and written assignments.

**Findings 2011-2012 - Target: Met**

83% at least partially met this objective.

**M 12: Ability to apply basic theoretical and empirical tools of economic analysis to public policy issues (O: 12)**

Students will demonstrate the ability to apply basic theoretical and empirical tools of economic analysis to public policy issues on the midterm and final examinations and the final paper.

Source of Evidence: Academic direct measure of learning - other

**Target for O12: Apply basic theoretical and empirical tools of economic analysis to public and nonprofit policy issues**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141 will at least partially meet this objective. Students will demonstrate the ability to apply basic theoretical and empirical tools of economic analysis to public policy issues on the midterm and final examinations and the final paper.

**Findings 2011-2012 - Target: Met**

83% at least partially met this objective.

**M 13: Demonstrated understanding of the effects of public expenditures programs (O: 13)**

On the final examination and course paper students will demonstrate their understanding of the effects of public expenditures programs.

Source of Evidence: Academic direct measure of learning - other

**Target for O13: Demonstrate understanding of market failure and the potential role of the public and nonprofit sectors**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141 will at least partially meet this objective. On the final examination and course paper students will demonstrate their understanding of the effects of public expenditures programs.

**Findings 2011-2012 - Target: Met**

83% at least partially met this objective.

**M 14: Demonstrated ability to describe the technical nature and process of public budgeting (O: 14)**

Students demonstrate the ability to describe the technical nature and process of public budgeting on assignments 1-4, the midterm and final examinations, and the final project.

Source of Evidence: Academic direct measure of learning - other

**Target for O14: Describe the technical nature and process of public and nonprofit budgeting**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8161, Public Budgeting and Finance, will at least partially meet this objective. Students demonstrate the ability to describe the technical nature and process of public budgeting on assignments 1-4, the midterm and final examinations, and the final project.

**Findings 2011-2012 - Target: Met**

85% at least partially met this objective.

**M 15: Demonstrated ability to compare political aspects of budgeting with rational methods of resource allocation (O: 15)**

All of the course requirements consisting of four written assignments, a midterm exam, a final exam, and a final project will document the students' ability to compare political aspects of budgeting with rational methods of resource allocation.

Source of Evidence: Academic direct measure of learning - other
Target for O15: Compare politics of budgeting with rational methods of resource allocation in public or nonprofit organizations

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students in PMAP 8161 will at least partially meet this objective. All of the course requirements consisting of four written assignments, a midterm exam, a final exam, and a final project will document the students’ ability to compare political aspects of budgeting with rational methods of resource allocation.

Findings 2011-2012 - Target: Met
85% at least partially met this objective.

Findings 2011-2012 - Target: Met
85% at least partially met this objective.

M 16: Demonstrated ability to identify key components of results oriented management frameworks (O: 16)

On two examinations and a final paper students demonstrate their ability to identify key components of results oriented management frameworks.

Source of Evidence: Academic direct measure of learning - other

Target for O16: Demonstrate ability to identify key components of results oriented management frameworks

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8171, Public Management Systems and Strategies, will at least partially meet this objective. On two examinations and a final paper students demonstrate their ability to identify key components of results oriented management frameworks.

Findings 2011-2012 - Target: Met
97% at least partially met this objective.

M 17: Demonstrated understanding of models of organizational structure and design (O: 17)

Students will demonstrate understanding of models of organizational structure and design on a midterm and final exam as well as a final paper.

Source of Evidence: Academic direct measure of learning - other

Target for O17: Demonstrate understanding of models of organizational structure and design

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students in PMAP 8411 or PMAP 8203 will at least partially meet this objective. All of the course requirements consisting of four written assignments, a midterm exam, a final exam, and a final project will document the students’ ability to demonstrate understanding of models of organizational structure and design on a midterm and final exam as well as a final paper.

Findings 2011-2012 - Target: Met
97% at least partially met this objective.

M 18: Demonstrated knowledge of contract and administrative law or nonprofit law (O: 18)

The research proposal and research paper will allow the student to demonstrate knowledge of contract law and administrative law, including rulemaking, adjudication of administrative action, and judicial review of administrative action, or demonstrate knowledge of nonprofit law in the areas of charitable giving, advocacy, lobbying, commercial activity, fundraising and employee compensation.

Source of Evidence: Academic direct measure of learning - other

Target for O18: Demonstrate knowledge of contract and administrative law in public sector or nonprofit law

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8411 or PMAP 8203 will at least partially meet this objective. The research proposal and paper will allow students to demonstrate knowledge of contract law and administrative law, including rulemaking, adjudication of administrative action, and judicial review of administrative action, or demonstrated knowledge of nonprofit law in the areas of charitable giving, advocacy, lobbying, commercial activity, fundraising and employee compensation.

Findings 2011-2012 - Target: Met
100% fully met this objective.

M 19: Evaluated the constitutional rights and responsibilities of public and nonprofit managers and employees (O: 19)

The three exercise assignments will measure the ability of students to evaluate the constitutional rights and responsibilities of public and nonprofit managers and employees.

Source of Evidence: Academic direct measure of learning - other
Target for **O19**: Evaluate the legal rights and responsibilities of public or nonprofit managers and employees

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8411 will at least partially meet this objective. On the homework assignments and the final examination students demonstrate their understanding of administrative, adjudicatory, and alternative dispute resolution.

**Findings 2011-2012 - Target: Met**

100% fully met this objective.

**M 20: Demonstrated understanding of administrative, adjudicatory, and alternative dispute resolution (O: 20)**

On the homework assignments and the final examination students demonstrate their understanding of administrative, adjudicatory, and alternative dispute resolution.

Source of Evidence: Academic direct measure of learning - other

**Target for **O20**: Demonstrate understanding of administrative, adjudicatory, and alternative dispute resolution**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8411 will at least partially meet this objective. On the homework assignments and the final examination students demonstrate their understanding of administrative, adjudicatory, and alternative dispute resolution.

**Findings 2011-2012 - Target: Met**

100% fully met this objective.

**M 21: Demonstrated ability to evaluate major theories of leadership and organizational behavior (O: 21)**

On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

Source of Evidence: Academic direct measure of learning - other

**Target for **O21**: Ability to evaluate major theories of leadership and organizational behavior**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8431, Leadership and Organizational Behavior, will at least partially meet this objective. On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

**Findings 2011-2012 - Target: Not Met**

69% at least partially met this objective.

**M 22: Demonstrated how organizational and leadership theories are applied in public and nonprofit organizations (O: 22)**

On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

Source of Evidence: Academic direct measure of learning - other

**Target for **O22**: Demonstrate how organizational and leadership theories are applied in public and nonprofit organizations**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in PMAP 8431 will at least partially meet this objective. On a midterm and final essay as well as a case study students demonstrate their ability to evaluate major theories of leadership and organizational behavior.

**Findings 2011-2012 - Target: Met**

97% at least partially met this objective.

**M 23: Demonstrated how to use organizational theories to solve management problems in public and nonprofit agencies (O: 23)**

On the midterm essay, the final essay, and the case study students demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies.

Source of Evidence: Academic direct measure of learning - other

**Target for **O23**: Demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students in PMAP 8411 will at least partially meet the objectives. The three exercise assignments will measure the ability of students to evaluate the constitutional rights and responsibilities of public and nonprofit managers and employees.

**Findings 2011-2012 - Target: Met**

100% fully met this objective.
and nonprofit agencies
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students in PMAP 8431 will at least partially meet this objective. On the midterm essay, the final essay, and the case study students demonstrate how to use organizational theories to solve management problems in public and nonprofit agencies.

Findings 2011-2012 - Target: Met
94% at least partially met this objective.

M 24: Demonstrate ability to analyze problems effectively and develop solutions (O: 24)
Students will demonstrate an ability to use critical thinking skills to analyze problems and develop solutions to these problems. Students will demonstrate an ability to analyze problems and develop solutions using written, analytical or quantitative skills depending on the nature of the material to be covered.

Target for O24: Demonstrate ability to effectively analyze problems and develop solutions
Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2011-2012 - Target: Met
94% at least partially met this objective.

M 25: Effective verbal and written communication on public or nonprofit issues (O: 25)
Students will demonstrate an ability to communicate clearly and concisely through written or oral communication. Different classes will emphasize different aspects of communication skills depending on the nature of the material to be covered.

Target for O25: Effective verbal and written communication skills related to public or nonprofit issues
Faculty teaching all core courses are asked to rate the performance of students on the learning objectives at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2011-2012 - Target: Not Reported This Cycle
PMAP is altering its data collection process on this objective. We are not ready to evaluate whether we are meeting this goal at this time.

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Faculty review of curriculum in progress
In response to the WEAVE reporting process, the faculty who teach courses in the MPA program are engaged in an on-going process of curriculum review. During the past year several issues have been discussed and actions are pending. For example, the two-course sequence in research methods and statistics was a problem in the initial WEAVE report. Faculty met and examined the content of the two courses, variations in material covered by different instructors, and ways to make sections more consistent. This change was implemented during the past academic year, and progress made in better student learning outcomes. During the current academic year (2009-10), the issue has shifted to the discussion of two issues—the law course (PMAP 8411 Law for Public and Nonprofit Managers) and a potential capstone course. There is concern over the content and learning outcomes of the law course. It is under review, and new content related to contract law is under development for next year. There is also consideration of the issue of developing a capstone course for students in the MPA curriculum. A pilot version of the course was scheduled for the spring semester 2010, but not offered. The design and content of the course is under review for next year.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 04/2011
Responsible Person/Group: MPA Committee and full faculty of the PMAP Department

Theories of Leadership and Organizational Behavior
This is a reasonably new problem. Students met the objective in Fall 2011, though barely, and only fell well below the mark in Spring 2012. The professor is assessing whether this is a continuing problem that will require a long-run response.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Low
Implementation Description: Professor will meet with department chair after end of fall semester to see whether problem persists and whether action is needed.
Projected Completion Date: 05/2013
Responsible Person/Group: John Thomas
Additional Resources: None.
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The department appointed a committee last year to study the learning objectives and WEAVE measures in the core courses in the MPA program. Faculty will incorporate these new learning objectives in their Spring 2013 syllabi, and the Spring 2013 WEAVE reports. Beginning Fall 2012, WEAVE spreadsheets are due on the same date that grades are due, so that information will be available for the first faculty meeting in the spring. Beginning Summer 2013, instructors teaching core courses in the summer will also submit WEAVE spreadsheets. The department’s academic specialist is going back through all available WEAVE Excel sheets to combine data into a single spreadsheet, so that it will be easier to track changes over time.

Georgia State University
Assessment Data by Section
2011-2012 Public Health MPH
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Institute of Public Health has the mission of advancing health through leadership, scholarship, research, and service to better the human condition and promote the common good. The most significant application of that mission is to prepare students through the Master of Public Health (MPH) degree program to apply multi-disciplinary skills in public health practice and research and to assume leadership roles to address contemporary public health problems. The mission of the Institute of Public Health complements the stated mission of its administrative college home, the College of Health and Human Sciences, which is “to engage in teaching, scholarly endeavors, and service activities that improve health and well-being and address social justice issues within a multi-cultural society.” With a focus on scholarship and research in urban health and health disparities, the Institute supports the mission of Georgia State University “to achieve a front-rank position among the nation’s premier state-supported universities located in an urban setting.” The Institute’s mission is strengthened by the objective of the University System of Georgia, through its Strategic Plan for Public Health Education, Research and Service, “to ensure that the System becomes one of the national leaders in public health education, research and service.”

Note: The Master of Public Health program began in the Fall of 2004 and currently has 120 graduate students enrolled. The first students graduated in Spring 2006.

Goals
G 1: IPH Program Goal
The goal of the GSU IPH is to uphold the overarching goal of the Council on Education for Public Health [CEPH], which is to ‘enhance health in human populations through organized community effort’. The IPH focus is to prepare students to enter the public health workforce so that health problems of local communities, and the world, can be identified, addressed, and/or prevented.

Student Learning Outcomes/Objectives
SLO 1: Understand Core Public Health Concepts (M: 1)
Understand Core Public Health Concepts Articulate and utilize an understanding of core public health concepts from the five divisions of public health: biostatistics, epidemiology, social and behavioral sciences, health services administration, and environmental health.
Relevant Associations: Council on Education for Public Health [CEPH]

SLO 2: Demonstrate Planning, Implementation, Evaluation (M: 1)
Demonstrate the ability to plan, implement and evaluate programs and services designed to address public health conditions of a population(s).

SLO 3: Understand an Ecological Approach to Public Health (M: 1)
Understand and employ an ‘ecological approach’ to public health, with emphasis on linkages and relationships among the multiple determinants of health, to assure conditions that protect and promote the health of populations.

SLO 4: Demonstrate Communication and Research Skills (M: 1)
Demonstrate Communication and Research skills consonant with the academic and professional field of Public Health.

SLO 5: Apply Critical Thinking Skills (M: 1)
Apply critical thinking skills within the context of public health practice and research.

Measures, Targets, and Findings
M 1: Final Thesis or Special Capstone Project (O: 1, 2, 3, 4, 5)
Each MPH Student has the option of completing either a thesis or special capstone research project. Both culminating experiences are designed to test the student's competency in core public health knowledge, skills and abilities and to ensure proficiency in the student's area of specialization. Students must present their thesis or capstone project in writing and defend it orally, to a faculty committee. Evaluation of the thesis/capstone was conducted through a pilot evaluation program that included a 4 point, 5 item rubric that links to IPH SLOs. The rubric is attached as a connected document to this Measure.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Understand Core Public Health Concepts**

75% of student sample will score a 3 or higher (4 point scale) on the following Thesis/Capstone Assessment rubric item: "Writing shows understanding of Core Public Health Concepts relevant to chosen topic of thesis/capstone." Student sample will consist of at least 50% of students who have completed either a Thesis or Capstone project at the end of the academic year (Spring Semester).

**Findings 2011-2012 - Target: Met**

8 out of 9 students (89%) received a 3 or higher on this rubric item. The average score for this item is 3.44.

**Target for O2: Demonstrate Planning, Implementation, Evaluation**

75% of student sample will score a 3 or higher (4 point scale) on the following Thesis/Capstone Assessment rubric item: "The thesis/capstone demonstrates planning, implementation, and evaluation of a program(s) designed to address public health conditions of a population(s)." Student sample will consist of at least 50% of students who have completed either a Thesis or Capstone project at the end of the academic year (Spring Semester).

**Findings 2011-2012 - Target: Met**

8 out of 9 students (89%) received a 3 or higher on this rubric item. The average score for this item is 3.22.

**Target for O3: Understand an Ecological Approach to Public Health**

75% of student sample will score a 3 or higher (4 point scale) on the following Thesis/Capstone Assessment rubric item: "The thesis/capstone shows understanding of an Ecological Approach to Public Health, emphasizing linkages and relationships among multiple determinants of health." Student sample will consist of at least 50% of students who have completed either a Thesis or Capstone project at the end of the academic year (Spring Semester).

**Findings 2011-2012 - Target: Met**

9 out of 9 students (100%) received a 3 or higher on this rubric item. The average score for this item is 3.56.

**Target for O4: Demonstrate Communication and Research Skills**

75% of student sample will score a 3 or higher (4 point scale) on the following Thesis/Capstone Assessment rubric item: "Writing demonstrates Communication and Research skills consonant with the academic and professional field of Public Health." Student sample will consist of at least 50% of students who have completed either a Thesis or Capstone project at the end of the academic year (Spring Semester).

**Findings 2011-2012 - Target: Met**

7 out of 9 students (78%) received a 3 or higher on this rubric item. The average score for this item is 3.22.

**Target for O5: Apply Critical Thinking Skills**

75% of student sample will score a 3 or higher (4 point scale) on the following Thesis/Capstone Assessment rubric item: "Writing demonstrates application of critical thinking skills to problems relevant to Public Health." Student sample will consist of at least 50% of students who have completed either a Thesis or Capstone project at the end of the academic year (Spring Semester).

**Findings 2011-2012 - Target: Met**

9 out of 9 students (100%) received a 3 or higher on this rubric item. The average score for this item is 3.44.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Complete Doctoral Program Application**

We are developing a proposal to initiate a PhD program within the IPH. We will continue to seek support and approval throughout the upcoming years.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Ongoing

**Enhancing Alumni Communications**

Due to the APR Self-Study, we were able to enhance our alumni response rate to the alumni survey this academic year. We want to maintain our exposure and contact with this very important stakeholder group as we move forward.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Implementation Description:** Ongoing
Mission / Purpose
The mission of the Bachelor of Science in Public Policy degree is to prepare students for roles as effective citizens and people who work in the public service. Students should develop the knowledge, skills and values required to become responsible and visionary leaders in a wide range of settings. Students will understand development, implementation, and evaluation of policies in a variety of settings. While many students choose to enter a career in the public sector or in nonprofit agencies, others make contributions to the community, state, and nation as active citizens in the civic and public arenas.

Goals
G 1: Understand citizenship, community and public service
Citizenship is a basic component of a democratic society. Students learn the structure of the federal system as well and citizenship requirements for each level. The role of the individual as part of the larger community is also considered. Students become active participants in public service. This has been a CTW (Critical Thinking through Writing) course; however, this past year the faculty voted to change the CTW designation from this course to PMAP 3311, Critical Policy Issues. The change will take effect next year, removing the CTW designation from PMAP 3021.

G 2: Understanding leadership in a variety of policy settings
Students learn from leaders representing the range of policy settings—public, for-profit, and not-for-profit. Emphasis is upon leadership to produce change in organizations. Students also learn theoretical perspectives on leadership and organizational change. They compare practical views on leadership to theoretical perspectives.

G 3: Understand the policy process and critical public policy issues
Students describe the public policy process and understand critical policy issues.

G 4: Understanding policy data analysis using statistical methods
Students learn policy data analysis using quantitative research methods applicable to the study of public policy. Students use descriptive statistics as well as the development and testing of empirical hypotheses using basis inferential statistical methods.

G 5: Understanding the evaluation of public policy
Students learn to evaluate public policy using appropriate research methods for program evaluation. Inductive and deductive methods are used as well as the advantages of using evaluation as a mechanism for program improvement. This is a CTW course (Critical Thinking through Writing).

G 6: Understand principles of policy analysis
Students will understand principles of policy analysis including concepts such as market failure, public goods, and externalities, as well as other justifications for government involvement.

Student Learning Outcomes/Objectives
SLO 1: Demonstrate how citizens can shape public policy (G: 1) (M: 1)
Students will demonstrate the variety of ways in which citizens can help to shape public policy.

SLO 2: Participate in public and community affairs (G: 1) (M: 2)
Through service learning students participate in public and community affairs. The students become active citizens of the community.

SLO 3: Develop writing skills appropriate to public policy (G: 1) (M: 3)
As a CTW course, students develop writing skills appropriate to the field of public policy.

SLO 4: Demonstrate how leaders make change in their organizations (G: 2) (M: 4)
Students learn from leaders from all three sectors of society and how these leaders make changes within their organizational settings.

SLO 5: Demonstrate understanding of key theoretical issues on leadership (G: 2) (M: 5)
Students must demonstrate their understanding of important issue in leadership theory.

SLO 6: Compare leadership theory and practice (G: 2) (M: 6)
Students must demonstrate their ability to compare theoretical aspects of leadership with practical applications.

SLO 7: Demonstrate knowledge of main policy issues under debate (G: 3) (M: 7)
Student must demonstrate the ability to describe the major contemporary public policy issues under debate in our society.

SLO 8: Apply knowledge of public policy process to current policy issues (G: 3) (M: 8)
Students must demonstrate their ability to apply knowledge of the public policy process to current policy issues. This is measured by
the final class presentation and examinations.

**SLO 9: Demonstrate critical thinking about policy process and policy outcomes (G: 3) (M: 9)**
Students must demonstrate critical thinking about the public policy process and policy outcomes. This is measured by the final class presentation.

**SLO 10: Apply introductory statistical techniques to public policy (G: 4) (M: 10)**
Students demonstrate the application of introductory statistical techniques to analyze important questions in public policy.

**SLO 11: Demonstrate skills using computer to perform basic statistical analysis (G: 4) (M: 11)**
Students demonstrate skills using the computer to perform basic statistical analysis.

**SLO 12: Apply scientific method to policy issues (G: 5) (M: 12)**
Students must demonstrate their ability to apply the scientific method to policy issues.

**SLO 13: Demonstrate use of appropriate techniques for evaluation research (G: 5) (M: 13)**
Students must demonstrate the ability to use appropriate techniques for evaluation research.

**SLO 14: Demonstrate ability to write an evaluation research design (CTW) (G: 5) (M: 14)**
Students must demonstrate the ability to write an evaluation research design paper as a CTW (Critical Thinking through Writing) assignment.

**SLO 15: Demonstrate understanding of legal and political frameworks that underlie market economy (G: 6) (M: 15)**
Students demonstrate their understanding of the legal and political frameworks that underlie the market economy.

**SLO 16: Demonstrate understanding of cost-benefit analysis to evaluate government intervention (G: 6) (M: 16)**
Students demonstrate understanding of the use of cost-benefit analysis to evaluate government intervention in the economy.

**Measures, Targets, and Findings**

**M 1: Students demonstrate how citizens shape public policy (O: 1)**
Students demonstrate how citizens can help to shape public policy. This is demonstrated on the writing assignments for the course (weekly memos), the ULearn discussion board sessions, and final report.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Demonstrate how citizens can shape public policy**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet the objective. This will be measured by weekly memos, ULearn discussion board sessions, and the final report.

**Findings 2011-2012 - Target: Met**
93% at least partially met the objective.

**M 2: Participate and report on public and community affairs through service learning (O: 2)**
Students participate in service learning and report on activities in their agencies that demonstrate how citizens work in public and community affairs. This is measured using weekly memos and hours logged using Volunteer Solutions. Also, class presentations at end of semester.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O2: Participate in public and community affairs**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet the objective. This will be measured by using weekly memos and hours logged using Volunteer Solutions. Also, class presentations at end of semester.

**Findings 2011-2012 - Target: Met**
91% at least partially met this objective.

**M 3: Demonstrate writing skills appropriate to public policy (O: 3)**
Students will demonstrate writing skills appropriate to the field of public policy. This is demonstrated through weekly policy memos and a final paper that meet the CTW requirements of the course.

Source of Evidence: Written assignment(s), usually scored by a rubric
Target for O3: Develop writing skills appropriate to public policy
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in the Citizenship course will at least partially meet this objective. Students will demonstrate writing skills appropriate to the field of public policy. This is demonstrated through weekly policy memos and a final paper that meet the CTW requirements of the course.

Findings 2011-2012 - Target: Met
82% at least partially met this objective.

M4: Students demonstrate how leaders from all sectors lead organizational change (O: 4)
On a midterm and final examination, students demonstrate their ability to understand how leaders from all three sectors lead change in their organizations.

Source of Evidence: Academic direct measure of learning - other
Students demonstrate understanding of important theories of leadership on midterm and final examinations as well as a final paper.

Target for O4: Demonstrate how leaders make change in their organizations
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet this objective. On a midterm and final examination, students demonstrate their ability to understand how leaders from all three sectors lead change in their organizations.

Findings 2011-2012 - Target: Met
88% at least partially met this objective.

M5: Students answer test questions on midterm and final exams on leadership theory (O: 5)
Students demonstrate understanding of important theories of leadership on midterm and final examinations as well as a final paper.

Source of Evidence: Academic direct measure of learning - other
Students demonstrate understanding of important theories of leadership on midterm and final examinations as well as a final paper.

Target for O5: Demonstrate understanding of key theoretical issues on leadership
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet this objective. Students demonstrate understanding of important theories of leadership on midterm and final examinations as well as a final paper.

Findings 2011-2012 - Target: Met
89% at least partially met this objective.

M6: Students compare theoretical approaches to practical applications of leadership (O: 6)
Students write paragraphs after each class period describing practical applications of leadership with theoretical perspectives. This is also measured in the final application paper assignment.

Source of Evidence: Written assignment(s), usually scored by a rubric
Students write paragraphs each week showing their ability to apply theoretical perspectives on leadership to their roles as emerging leaders. This is also measured in the final application paper assignment.

Findings 2011-2012 - Target: Met
89% at least partially met this objective.

M7: Demonstrate knowledge of main current policy issues (O: 7)
Measure knowledge of main policy issues currently under debate using exams and classroom policy debates.

Source of Evidence: Academic direct measure of learning - other
Students will demonstrate knowledge of main policy issues currently under debate using exams and classroom policy debates.

Target for O7: demonstrate knowledge of main policy issues under debate
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in PMAP 3311, Critical Policy Issues, will meet this objective. Measure knowledge of main policy issues currently under debate using exams and classroom policy debates.

Findings 2011-2012 - Target: Met
93% at least partially met objective.

**M 8: Apply knowledge of public policy process to current policy issues (O: 8)**

Apply knowledge of the public policy process to current policy issues. This is measured by the final class presentation as well as the examinations.

**Source of Evidence:** Presentation, either individual or group

**Target for O8: Apply knowledge of public policy process to current policy issues**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet this objective. Students must demonstrate their ability to apply knowledge of the public policy process to current policy issues. This is measured by the final class presentation and examinations.

**Findings 2011-2012 - Target: Met**

89% at least partially met objective.

**M 9: Demonstrate critical thinking about policy process and policy outcomes (O: 9)**

Students will exhibit critical thinking about the public policy process and policy outcomes. This is measured by the final class presentation.

**Source of Evidence:** Presentation, either individual or group

**Target for O9: Demonstrate critical thinking about policy process and policy outcomes**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students will at least partially meet this objective. Students must demonstrate critical thinking about the public policy process and policy outcomes. This is measured by the final class presentation.

**Findings 2011-2012 - Target: Met**

80% at least partially met objective.

**M 10: Application of statistical techniques to analyze public issues (O: 10)**

Students apply introductory statistical techniques to analyze public policy issues. This is measured by performance on examinations.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O10: Apply introductory statistical techniques to public policy**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in the course will at least partially meet this objective. Students apply introductory statistical techniques to analyze public policy issues. This is measured by performance on examinations.

**Findings 2011-2012 - Target: Not Met**

67% at least partially met objective.

**M 11: Develop skills using computer to perform basic statistical analysis (O: 11)**

Students develop skills in using the computer to perform basic statistical analysis using SPSS. This is demonstrated using examinations and class assignments.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O11: Demonstrate skills using computer to perform basic statistical analysis**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in PMAP 4041, Policy Data Analysis, will at least partially meet this objective. Students develop skills in using the computer to perform basic statistical analysis using SPSS. This is demonstrated using examinations and class assignments.

**Findings 2011-2012 - Target: Not Met**

65% at least partially met objective.

**M 12: demonstrate ability to apply scientific method to policy issues (O: 12)**

Students demonstrate their ability to apply scientific method to the evaluation of public policy issues. This is measured through examinations.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O12: Apply scientific method to policy issues**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students enrolled in PMAP 4041, Policy Data Analysis, will at least partially meet this objective. Students develop skills in using the computer to perform basic statistical analysis using SPSS. This is demonstrated using examinations and class assignments.
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students enrolled in PMAP 4051, Evaluating Public Policy, will at least partially meet this objective. Students demonstrate their ability to apply scientific method to the evaluation of public policy issues. This is measured through examinations.

**Findings 2011-2012 - Target: Met**
97% at least partially met objective.

**M 13: Demonstrate ability to use appropriate techniques for evaluation research (O: 13)**

Students demonstrate ability to use appropriate techniques for evaluation research. These techniques include experiments, survey research, qualitative field research, and others. This will be measured using examinations and the major policy evaluation writing assignment.

**Source of Evidence: Academic direct measure of learning - other**

**Target for O13: Demonstrate use of appropriate techniques for evaluation research**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students will at least partially meet this objective. Students demonstrate ability to use appropriate techniques for evaluation research. These techniques include experiments, survey research, qualitative field research, and others. This will be measured using examinations and the major policy evaluation writing assignment.

**Findings 2011-2012 - Target: Met**
97% at least partially met objective.

**M 14: Demonstrate ability to write an evaluation research proposal as a CTW assignment (O: 14)**

Students will complete a written evaluation research proposal to demonstrate how they would design an evaluation project for a public policy. This is measured by the major CTW (Critical Thinking through Writing) assignment.

**Source of Evidence: Written assignment(s), usually scored by a rubric**

**Target for O14: Demonstrate ability to write an evaluation research design (CTW)**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students will at least partially meet this objective. Students will complete a written evaluation research proposal to demonstrate how they would design an evaluation project for a public policy. This is measured by the major CTW (Critical Thinking through Writing) assignment.

**Findings 2011-2012 - Target: Met**
97% at least partially met objective.

**M 15: Demonstrate understanding of legal and political frameworks that underlie market economy (O: 15)**

Students demonstrate understanding of legal and political frameworks that underlie the market economy. This is measured by examinations and class assignments.

**Source of Evidence: Academic direct measure of learning - other**

**Target for O15: Demonstrate understanding of legal and political frameworks that underlie market economy**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of the students enrolled in PMAP 4061, Introduction to Policy Analysis, will at least partially meet this objective. Students demonstrate understanding of legal and political frameworks that underlie the market economy. This is measured by examinations and class assignments.

**Findings 2011-2012 - Target: Not Met**
67% at least partially met this objective.

**M 16: Demonstrate understanding of the use of cost-benefit analysis to evaluate government intervention in the economy (O: 16)**

Students demonstrate understanding of the use of cost-benefit analysis to evaluate government intervention in the economy. This is measured through a final written assignment.

**Source of Evidence: Written assignment(s), usually scored by a rubric**

**Target for O16: Demonstrate understanding of cost-benefit analysis to evaluate government intervention**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 80% of students will at least partially meet this objective. ### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Action Plan

Public management and policy faculty approved the creation of a committee to review instructor assessment scores for PMAP 4061. The committee met several times and developed the following recommendations: The Department of Public Management and Policy should work with the Office of Academic Assistance in the Andrew Young School of Policy Studies to assure that students complete the micro and macro economics prerequisites for the 4061 course. The Department of Public Management and Policy should do more to educate faculty about the WEAVE process and their role in helping us to meet our learning objectives. We have made some progress toward a culture change, but this is a long-term process. Faculty members do not always understand that the role extends beyond teaching the students as best they can; we must be improving learning and retention, and this is one of their responsibilities. In this case, we recommend revising the e-mail sent to faculty as a part of the ratings process. We caution against providing more information than faculty can absorb, but the e-mail should explain the purpose of the ratings and departmental goals and expectations. Instructors should be required to provide a brief explanation of WEAVE scoring when developing their assessment reports. It would be easy to provide a space for comments at the bottom of the spreadsheets that are used to collect the instructor ratings. Indeed, faculty could be required to comment when their average score is less than 85%. It is essential to understand the thinking of the instructors as they are giving the low scores. Of course, they might also be encouraged to comment on high scores.

#### Basic Tools of Government Intervention

Public management and policy faculty approved the creation of a committee to review instructor assessment scores for PMAP 4061. The committee met several times and developed the following recommendations: The Department of Public Management and Policy should work with the Office of Academic Assistance in the Andrew Young School of Policy Studies to assure that students complete the micro and macro economics prerequisites for the 4061 course. The Department of Public Management and Policy should do more to educate faculty about the WEAVE process and their role in helping us to meet our learning objectives. #### Implementation Status

- **Established In Cycle:** 2008-2009
- **Priority:** High
- **Implementation Status:** Planned

#### Findings

- **2011-2012:** 65% at least partially met objective

#### Priority

- **High**
secrets of success, etc. The Department of Public Administration and Policy should create a committee to outline the content expectations for the 4061 course. There has been some tension about the role of economics in this course, and it would be a good time to resolve this matter. Economics and public administration faculty defined policy analysis differently, and instructors of this course definitely need additional guidance. If we determine that students need detailed economic knowledge to complete this course, then we might think of creating a support system of some sort. We have many graduate students able to provide assistance, for example. There should be no reason why our excellent students should be getting unsatisfactory assessment scores. In fact, an electronic filing system could provide easy access to short course guideline documents. (Faculty committees could ultimately develop guidelines for every course.) See above, the spreadsheet rating form could remind faculty about these guidelines and even ask them to indicate that they have reviewed them. It has become routine to review past course syllabi, but we need to go further. The course guidelines can provide tips about teaching strategies and outline departmental expectations for each individual course. This would be much better than relying on hearsay or developing expectations in some random way that faculty members are likely to forget about.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Demonstrate understanding of the use of cost-benefit analysis to evaluate government intervention | Outcome/Objective: Demonstrate understanding of cost-benefit analysis to evaluate government intervention

**Market Economy & Policy Analysis**

Public management and policy faculty approved the creation of a committee to review instructor assessment scores for PMAP 4061. The committee met several times and developed the following recommendations: The Department of Public Management and Policy should work with the Office of Academic Assistance in the Andrew Young School of Policy Studies to assure that students complete the micro and macro economics prerequisites for the 4061 course. This would be much better than relying on hearsay or developing expectations in some random way that faculty members are likely to forget about.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

**Improve MATH skills of students in lower division courses**

The drop in the percentage of students who did not at least partially meet this objective from the 2008-09 academic year was steep. Last year, xx% at least partially met this objective, compared to only 70.16% who at least partially met this same objective this year. There is other evidence to support the observation that some PMAP students are weak in basic math skills. The rate of D, F, and W grades in the PMAP 4041 course (Policy Data Analysis) was 34% during the fall 2009 semester, compared to a 13% DFW rate for all lower division MATH courses 1101 or 1111 course during the fall semester 2010. The second step of the Action Plan is to establish in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Application of statistical techniques to analyze public issues | Outcome/Objective: Apply introductory statistical techniques to public policy

Implementation Description: Faculty will approve a change in lower division MATH requirements, so that students must have grades of C or higher in MATH 1101 or 1111. Students will also be required to make a grade of C or higher in MATH 1070, as a prerequisite for taking PMAP 4041.  
Projected Completion Date: 11/2010
Responsible Person/Group: PMAP faculty approval.
Additional Resources: N/A

**Improve MATH skills of students taking PMAP 4041**

The drop in the percentage of students who did not at least partially meet this objective from the 2008-09 academic year was steep. Last year, xx% at least partially met this objective, compared to only 70.16% who at least partially met this same objective this year. There is other evidence to support the observation that some PMAP students are weak in basic math skills. The rate of D, F, and W grades in the PMAP 4041 course (Policy Data Analysis) was 34% during the fall 2009 semester, compared to a 13% DFW rate for all
the PMAP core courses. At present, students can take the upper division Policy Data Analysis course with only a grade of D in the lower division MATH courses 1101 or 1111. The two step Action Plan calls for changing the requirement to a minimum grade of C in either lower division MATH 1101 or 1111 course during the fall semester 2010. The second step of the Action Plan is to require all students to take and earn a minimum grade of C in MATH 1070, Elementary Statistics as a prerequisite for taking PMAP 4041. This prerequisite should improve the math skills of students taking PMAP 4041.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Develop skills using computer to perform basic statistical analysis | Outcome/Objective: Demonstrate skills using computer to perform basic statistical analysis

Implementation Description: Faculty will approve a change in lower division MATH requirements, so that students must have grades of C or higher in MATH 1101 or 1111. Students will also be required to make a grade of C or higher in MATH 1070, as a prerequisite for taking PMAP 4041.
Projected Completion Date: 11/2010
Responsible Person/Group: PMAP faculty approval
Additional Resources: N/A

Core sequence: 4041-4061
WEAVE has identified weaknesses in the statistical methods, research design/evaluation, and policy analysis sequence in the core curriculum. These courses have traditionally been taught by doctoral students or part-time instructors rather than tenure-track faculty. We have probably not provided enough guidance or support for these mostly first-time teachers. This year, the School provided training for all new instructors in August and PMAP provided some classroom observations, feedback, and one-on-one counseling. The department will appoint a committee to study long-run improvements, which may involve assigning tenure-track faculty to teach the courses once a year, with prospective GTAs attending and assisting, and/or to provide more substantial support to GTAs through repeated observations and meetings.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Chair will appoint committee to discuss options.
Projected Completion Date: 03/2013
Responsible Person/Group: Greg Lewis

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Beginning Fall 2013, WEAVE spreadsheets are due on the same date that grades are due, so that information will be available for the first faculty meeting in the spring. The department’s academic specialist is going back through all available WEAVE Excel sheets to combine data into a single spreadsheet, so that it will be easier to track changes over time. During Spring 2013, the new director of the undergraduate program will convene a committee to update the learning objectives and WEAVE measures in the core courses. We expect the faculty to approve them by the end of the semester, and to begin incorporating them in Summer 2013.

Georgia State University
Assessment Data by Section
2011-2012 Public Policy MPP
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Master of Public Policy (MPP) is an interdisciplinary degree program designed to provide students with an understanding of policy analysis as well as methods of generating new knowledge about specific policy areas.

Goals
G 2: Understanding of basic methods and statistics for applied research
Students learn basic methods and statistics for research in the public and nonprofit sectors. These include the scientific method in applied research, elementary research design, measurement, qualitative research, computer-assisted data analysis, and beginning statistics including descriptive statistics, crosstabulation, introductory inferential statistics, and graphical presentations.

G 1: Understanding the policy process
Students understand the development of policy through the policy process framework as well as through other policy models. Students are introduced to different actors and factors likely to influence public policy.

G 3: Understanding advanced research methods and statistics
Students understand advanced methods and statistics in applied research in the public and nonprofit sectors. These include survey research, experimental and quasi-experimental designs, sampling, and intermediate statistical techniques including analysis of variance, correlation and regression, and time-series analysis.

G 4: Understanding basic principles of microeconomics applied to public policy
Students will understand basic principles of microeconomics applied to public administration and policy.

**G 6: Understanding the principles of policy analysis**
Understand how to identify public policy problems, some of the characteristics of different policy alternatives, and how to choose among different policy options.

**G 5: Understanding the principles of policy evaluation**
This course is designed to introduce students to the conceptual methods used to analyze the need for change in the public sector.

</tr>
<tr>
<td>Students will be able to apply basic theoretical and empirical tools of economic analysis to public policy issues.</td>
</tr>
<tr>
<td><strong>SLO 12: Demonstrate understanding of the effects of public expenditures programs (G: 4) (M: 12)</strong></td>
</tr>
<tr>
<td>Students demonstrate an understanding of the effects of public expenditures programs on the distribution of income and its role in public sector decision-making.</td>
</tr>
<tr>
<td><strong>SLO 13: Identify Causes of Bias in Regression Analysis (G: 5) (M: 13)</strong></td>
</tr>
<tr>
<td>Students will be able to identify the causes of bias in regression analysis.</td>
</tr>
<tr>
<td><strong>SLO 14: Identify Major Threats to Validity in Evaluation Studies (G: 5) (M: 14)</strong></td>
</tr>
<tr>
<td>Students will demonstrate the ability to identify major threats to validity in evaluation studies.</td>
</tr>
<tr>
<td><strong>SLO 15: Select Appropriate Evaluation Design for a Particular Evaluation Domain (G: 5) (M: 15)</strong></td>
</tr>
<tr>
<td>Students will be able to select the research design appropriate for a particular evaluation domain.</td>
</tr>
</tbody>
</table>
### SLO 16: To understand how to identify policy problems (G: 6) (M: 16)
Students understand how to identify attributes of problems that may be addressed through public policy.

### SLO 17: To understand the characteristics of different policy alternatives (G: 6) (M: 17)
Students learn to understand the characteristics of different policy alternatives and in which circumstances it may be appropriate to use them.

### SLO 18: To understand how to construct a policy memo (G: 6) (M: 18)
Students understand how to construct a policy memo for a potential client.

#### Measures, Targets, and Findings

**M 1: Students understand different ways of categorizing public policies (O: 1)**
Students demonstrate understanding of different ways of categorizing public policies. This is measured on the students’ examinations in PMAP 8011, Politics and Policy.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O1: Understand different ways of categorizing policies**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students will at least partially meet this objective.

**Findings 2011-2012 - Target: Met**
100% at least partially met this objective.

**M 2: Understand how different actors are likely to influence policies (O: 2)**
Students demonstrate understanding of how different actors are likely to influence policy decisions. This is measured by in-class policy debates and on written assignments.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O2: Understand how different actors are likely to influence policies**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students will at least partially meet this objective.

**Findings 2011-2012 - Target: Met**
100% at least partially met this objective.

**M 3: Students understand different models of policy making (O: 3)**
Students understand different models of policy making such as the policy process model, as well as other models drawn from the public policy literature. This is measured by examinations and written assignments.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O3: Understand different models of policy-making**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.

**Findings 2011-2012 - Target: Met**
100% at least partially met this objective.

**M 4: Students must demonstrate the ability to apply basic concepts of measures and data sets (O: 4)**
Students in PMAP 8121 complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.

**Source of Evidence:** Academic direct measure of learning - other

**Target for O4: Apply basic concepts of measures and data sets**
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students complete problem sets, as well as, the midterm and final exams in order to measure their ability to apply basic concepts of measurements and data sets.
**M 5: Demonstrate skills using the computer to perform basic statistical analysis (O: 5)**

Students in PMAP 8121 do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

Source of Evidence: Academic direct measure of learning - other

**Target for O5: Demonstrate skills using the computer to perform basic statistical analysis**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. Students do problem sets and complete a final paper to show evidence of skills using the computer to perform basic statistical analysis with SPSS.

**Findings 2011-2012 - Target: Met**

88% at least partially met objective.

---

**M 6: Demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results (O: 6)**

The students’ final examination and final paper provide evidence of their ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results.

Source of Evidence: Academic direct measure of learning - other

**Target for O6: Demonstrate the ability to develop hypotheses, choose appropriate statistics to test them, and correctly describe the results**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. **Findings 2011-2012 - Target: Met**

100% at least partially met objective.

---

**M 7: Demonstrate ability to apply introductory statistical techniques to analyze questions facing public managers (O: 7)**

The students’ final paper and the midterm and final examinations in PMAP 8121 measure their ability to apply introductory statistical techniques to analyze questions facing public managers.

Source of Evidence: Academic direct measure of learning - other

**Target for O7: Demonstrate ability to apply introductory statistical techniques to analyze questions facing public analysts**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8121 will at least partially meet this objective. The students’ final paper and the midterm and final examinations measure their ability to apply introductory statistical techniques to analyze questions facing public managers.

**Findings 2011-2012 - Target: Met**

92% at least partially met objective.

---

**M 8: Demonstrate understanding of principles of research design methods appropriate to public administration and policy (O: 8)**

Students in PMAP 8131 use examinations and the final paper to demonstrate their understanding of basic principles of research design methods appropriate for research in public administration and policy.

Source of Evidence: Academic direct measure of learning - other

**Target for O8: Demonstrate understanding of principles of research design methods appropriate to public administration and policy**

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8131, Applied Research Methods and Statistics II, will at least partially meet this objective. Students use examinations and the final paper to demonstrate their understanding of basic principles of research design methods appropriate for research in public administration and policy.
Students enrolled in PMAP 8141, Microeconomics for Public Policy, will at least partially meet this objective. Students will demonstrate their understanding of microeconomic principles and the public sector on a midterm examination and written assignments.

Findings 2011-2012 - Target: Met
82% of students enrolled in PMAP 8141 will at least partially meet this objective.

Target for O10: Demonstrate understanding of microeconomic principles and the public sector
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141, Microeconomics for Public Policy, will at least partially meet this objective. Students will demonstrate their understanding of microeconomic principles and the public sector on a midterm examination and written assignments.

Findings 2011-2012 - Target: Met
83% at least partially met objective.

Target for O11: Apply basic theoretical and empirical tools of economic analysis to public policy issues
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141 will at least partially meet this objective. Students will demonstrate the ability to apply basic theoretical and empirical tools of economic analysis to public policy issues on the midterm and final examinations and the final paper.

Findings 2011-2012 - Target: Met
83% at least partially met objective.

Target for O12: Demonstrate understanding of the effects of public expenditures programs
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141 will at least partially meet this objective. On the final examination and course paper students will demonstrate their understanding of the effects of public expenditures programs.

Findings 2011-2012 - Target: Met
83% at least partially met objective.

Target for O13: Identify Causes of Bias in Regression Analysis
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8141 will at least partially meet this objective. On the final examination and course paper students will demonstrate their understanding of the effects of public expenditures programs.
Target for O13: Identify Causes of Bias in Regression Analysis

Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8521 will at least partially meet this objective. Students skills of being able to identify major threats to validity in evaluation studies are measured by examinations and the final project.

Findings 2011-2012 - Target: Not Met
72% at least partially met objective.

M 14: Identify Major Threats to Validity in Evaluation Studies (O: 14)
Students enrolled in PMAP 8521 will demonstrate the ability to identify major threats to validity in evaluation studies.
Source of Evidence: Academic direct measure of learning - other

Target for O14: Identify Major Threats to Validity in Evaluation Studies
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8521 will at least partially meet this objective. Students skills of being able to identify major threats to validity in evaluation studies are measured by examinations and the final project.

Findings 2011-2012 - Target: Met
100% at least partially demonstrate this skill.

M 15: Select Appropriate Evaluation Design for a Particular Evaluation Domain (O: 15)
Students enrolled in PMAP 8521 can select the appropriate evaluation design for a particular evaluation domain.
Source of Evidence: Academic direct measure of learning - other

Target for O15: Select Appropriate Evaluation Design for a Particular Evaluation Domain
Faculty teaching the course are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of students enrolled in PMAP 8521 will at least partially meet this objective. Students skills of being able to select the research design appropriate for a particular evaluation domain are measured by examinations and the final project.

M 16: Understand how to identify policy problems (O: 16)
The students enrolled in PMAP 8531 will demonstrate that they can identify policy problems. This is measured by the students' papers.
Source of Evidence: Academic direct measure of learning - other

Target for O16: To understand how to identify policy problems
Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2011-2012 - Target: Met
100% fully met this objective.

M 17: Understand the characteristics of different policy alternatives (O: 17)
Students enrolled in PMAP 8531 will demonstrate their understanding of the characteristics of different policy alternatives. This is measured by their performance of papers and two examinations.
Source of Evidence: Academic direct measure of learning - other

Target for O17: To understand the characteristics of different policy alternatives
Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2011-2012 - Target: Met
100% fully met this objective.

M 18: Understand how to construct a policy memo (O: 18)
Students in PMAP 8531 demonstrate how to construct a policy memo. This is done on several policy memo assignments and a final
Target for O18: To understand how to construct a policy memo

Faculty teaching all core courses are asked to rate the performance of students on the learning objective at the end of the semester. There is a five point scale with 5 representing excellent, exceeding expectations by a substantial margin demonstrating mastery of the knowledge or skill; 4 representing fully demonstrating the knowledge or skill; 3 representing partially demonstrating the knowledge or skill; 2 representing barely demonstrating the knowledge or skill; and 1 representing a poor demonstration of the knowledge or skill. 82% of the students enrolled in core courses will at least partially meet this objective.

Findings 2011-2012 - Target: Met
100% fully met this objective.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Identifying Sources of Bias in Regression
This is a relatively new problem. The instructor and department chair will meet after the end of this semester to determine whether this is an ongoing problem and to discuss possible solutions.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Responsible Person/Group: Greg Lewis and Jesse Lecy

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The department appointed a committee last year to study the learning objectives and WEAVE measures in the core courses in the MPA program. Three of those courses are also core courses in the MPP program. Faculty will incorporate these new learning objectives in their Spring 2013 syllabi, and the Spring 2013 WEAVE reports. During Spring 2013, the MPP faculty will reconsider the learning objectives and WEAVE measures in the core courses to determine whether they need to be updated. Beginning Fall 2012, WEAVE spreadsheets are due on the same date that grades are due, so that information will be available for the first faculty meeting in the spring. Beginning Summer 2013, instructors teaching core courses in the summer will also submit WEAVE spreadsheets. The department's academic specialist is going back through all available WEAVE Excel sheets to combine data into a single spreadsheet, so that it will be easier to track changes over time.

Georgia State University
Assessment Data by Section
2011-2012 Public Policy PhD
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
To combine the resources of two excellent schools of public policy to create a top doctoral program. To produce high-quality researchers capable of making contributions to the academic study of public policy and to the public policy process. To produce high-quality teachers, knowledgeable in the field and capable of conveying their knowledge to others.

Goals
G 1: Knowledge of Theoretical Frameworks
Students will have an in-depth understanding of the theoretical frameworks used to study public policy.

G 2: Analytical methods of public policy
Students will acquire an in-depth understanding of the analytical methods used to study public policy.

G 3: Field of Specialization
Students will acquire an in-depth understanding of one major field of specialization in public policy.

G 4: Original Research in Public Policy
Students will apply their understanding of the theories and analytical methods of public policy to a particular sub-field specialization to produce original research.

Outcomes/Objectives
O/O 1: Demonstrate understanding of public policy theory (M: 1)
Students will demonstrate an in-depth understanding of the theoretical frameworks used to study public policy.

</tbody>
</table>

| **M 2: Analytical Methods Section of Comprehensive Exam (O: 2)** |
| Students will demonstrate their understanding of analytical methods on the methods section of the core comprehensive examination. |
| Source of Evidence: Comprehensive/end-of-program subject matter exam |
| **Target for O2: Students apply analytical methods to public policy** |
| The achievement target for the core portion of the comprehensive examination is 67% of students passing this portion of the exam. |
| **Findings 2011-2012 - Target: Met** |
| Seven students took core comprehensives; five of them passed the quantitative methods section, for a passage rate of 71%. |

| **M 3: Major Field Comprehensive Examination (O: 3)** |
| Students will demonstrate their understanding of a major field on the comprehensive examination. |
| Source of Evidence: Comprehensive/end-of-program subject matter exam |
| **Target for O3: Demonstrate Understanding of Major Field** |
| The achievement target for the major field portion of the comprehensive examination is 67% of students passing this part of the exam. |
| **Findings 2011-2012 - Target: Met** |
| Five students took field comprehensives in 2011-12; four passed. The student who failed went on to pass his field comp with flying colors this semester. |

| **M 4: Dissertation and Original Research (O: 4)** |
| Students will produce and defend a dissertation proposal, produce conference papers and journal manuscripts, and produce a doctoral dissertation. |
| Source of Evidence: Senior thesis or culminating major project |
| **Target for O4: Produce Original Public Policy Research** |
| All candidates will successfully propose and defend a dissertation proposal. By the end of the third year in the doctoral program, all students will present a conference paper and submit at least one manuscript for review as a journal article. All students will produce and successfully defend their doctoral dissertations. |
| **Findings 2011-2012 - Target: Partially Met** |
| During the past year, four students received their doctorates in public policy. One had already taken a job abd at Sam Houston State University and one continued in her professional analyst position at the U.S. Government Accountability Office. In Fall 2012, the other two began tenure-track positions at George Washington University and Arizona State University. Records are incomplete, but among the students who did not graduate, at least 7 students presented conference papers and at least 5 were co-authors on journal submissions (resulting by the end of the year in two forthcoming articles and one revise-and-resubmit). Conference papers and journal submissions appear to be down, but this may be due more to poor record-keeping than to a real drop-off. |

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**
Revised methods courses and core comprehensive exam
In the 2007-08 WEAVE report this was among the stated objectives in the PhD Program in Public Policy: Students will demonstrate their understanding of the analytical methods used to study public policy through the core comprehensive examination. 90% will pass the comprehensive exam. After seeing that we did not meet this objective, the doctoral program committee met to review the content of the two required methods courses and the procedures used to measure the students’ performance which is the percentage who pass the methods section of the comprehensive examination. The content of the two course sequence was revised by the committee and the staffing changed. As a result of this process, the student performance improved during the 2008-09 academic year, but this turnaround is a long-term process since students take the courses in their first year in the PhD program and the comprehensive exams are taken in year three. The doctoral program committee is continuing to monitor the progress of students in the two research methods classes and their performance as measured by the methods section of the comprehensive examination.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** This has been implemented.  
**Projected Completion Date:** 04/2012  
**Responsible Person/Group:** Doctoral Program Committee of the Joint PhD Program in Public Policy

Doctoral Program Committee developed 3-part action plan
The Doctoral Program Committee developed a three-part Action Plan to improve students' performance on the major field portion of the comprehensive examinations. First, faculty members will update the reading list for students in each major field. Next, the Doctoral Program Committee will review admission criteria against performance on the comprehensive examinations. Perhaps some students were admitted in the past who should not have been. Finally, each major field advisor will conduct tutorial sessions for those students preparing for the examination. A special focus will be placed on the students who failed this year's field exams.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** High  
**Relationships (Measure | Outcome/Objective):**  
  **Measure:** Major Field Comprehensive Examination  
  **Outcome/Objective:** Demonstrate Understanding of Major Field  
**Implementation Description:** Faculty will complete these action plan steps prior to the beginning of the new academic year.  
**Projected Completion Date:** 08/2010  
**Responsible Person/Group:** Doctoral Program Committee

Revised dissertation colloquium
Beginning Fall 2012, the program requires all first- and second-year doctoral students to attend bi-weekly sessions on research. Sessions include lessons on the responsible conduct of research, as well as socialization into the academic enterprise -- submitting conference paper proposals and journal articles, responding to reviewers’ comments, developing a cv, etc. All second-year and later students are regularly encouraged to submit conference proposals. The department subsidizes the first $800 of travel to submit at an academic conference, and presenters must give practice presentations in the research series in advance of the conference.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** High  
**Implementation Description:** Doctoral program director Christine Roch began the program this semester.  
**Responsible Person/Group:** Doctoral program director Christine Roch  
**Additional Resources:** She is getting a partial course buy-out to run the program

---

**Georgia State University**  
**Assessment Data by Section**  
**2011-2012 Reading Specialist (p-12) MEd**

**Mission / Purpose**
The mission of the Master of Education Reading Specialist (RLL) is to prepare educators to become reading specialists who are informed by research, knowledge and reflective practice.

**Goals**

**G 1:** G-1 have a strong content knowledge of literacy theories and instruction  
Candidates are informed educators who have a strong content knowledge of literacy theories and instruction.

**G 2:** G-2 have pedagogical knowledge and dispositions needed to design culturally responsive literacy environments  
Candidates are professional educators with pedagogical knowledge and dispositions needed to design culturally responsive literacy environments and practices.

**G 3:** G-3 have knowledge of literacy practices and assessments that impact students' literacy growth and development  
Candidates have knowledge of literacy practices and assessments that impact student growth and development in literacy.

**Student Learning Outcomes/Objectives**
SLO 1: Demonstrates knowledge of the foundations of reading and writing processes (G: 1) (M: 1, 2)
Candidates will demonstrate knowledge of the linguistic, psychological, and sociological foundations of reading and writing processes and instruction.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 2: Demonstrates knowledge of SBRR principles (G: 1, 2) (M: 2)
Candidates will demonstrate knowledge of the SBRR principles (phonemic awareness, phonics, vocabulary, fluency, and comprehension) as related to literacy development.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 3: Incorporates a wide range of curricular materials (G: 2) (M: 3)
Candidates incorporate a wide range of curricular materials in effective reading instruction for learners at different stages of literacy development and from different cultural and linguistic backgrounds.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 4: View professional development as a career long responsibility (G: 2) (M: 3)
Candidates view professional development as a career long effort and responsibility.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 5: Incorporates a variety of assessment tools to plan effective instruction (G: 3) (M: 4)
Candidates use a variety of assessment tools and practices to plan effective instruction which have impact on students' literacy growth and development.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 6: Evaluates self and others' teaching practices (G: 2) (M: 3)
Candidates work with colleagues to observe, evaluate, and provide feedback on each other's practice.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

Measures (Key Assessments), Targets, and Findings

M 1: Portfolio Rating Standard 1: History (O: 1)
Candidates are assessed using a language and literacy portfolio rubric. A rating will be determined using standards one and two.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Demonstrates knowledge of the foundations of reading and writing processes
Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met
Based on the literacy rubric submissions for 2011-2012, eight students scored in the advanced level (5), while 14 students scored in the proficient level (4). Therefore, students met the target goals and assessments in demonstrating content knowledge in reading and writing, and reading research and histories of reading.

M 2: Portfolio Rating Standard 2: Foundations (O: 1, 2)
Candidates are assessed using a language and literacy portfolio rubric. A rating will be determined using standards one, two, and three.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Demonstrates knowledge of the foundations of reading and writing processes
Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric. Established in Cycle: 2009-2010

Findings 2011-2012 - Target: Met
Based on the literacy rubric submissions for 2011-2012, eight students scored in the advanced level (5), while 14 students scored in the proficient level (4). Therefore, students met the target goals and assessments in demonstrating content knowledge and foundations in reading and writing.
Target for O2: Demonstrates knowledge of SBRR principles

Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met

Students demonstrated the following: four students scored in the advanced level (5) while seven students scored in the proficient level (4). Therefore, students met the target goals for 2011-2012.

M 3: Pedagogical Skills and Dispositions (O: 3, 4, 6)

Candidates are assessed using a language and literacy portfolio rubric. A rating will be determined using standards four, five, six, and eight.

Source of Evidence: Portfolio, showing skill development or best work

Target for O3: Incorporates a wide range of curricular materials

Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met

According to students' understanding and knowledge in pedagogical skills and dispositions in incorporating a wide range of curricular materials, three students scored in the advanced level (5), while eight students scored in the proficient levels (4). Therefore, students met the requirements as measured on the rubric.

Target for O4: View professional development as a career long responsibility

Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met

According to students' understanding and knowledge in pedagogical skills and dispositions in incorporating a wide range of curricular materials, three students scored in the advanced level (5), while eight students scored in the proficient levels (4). Therefore, students met the requirements as measured on the rubric.

Target for O6: Evaluates self and others' teaching practices

Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met

Based on the outcome of how students evaluated themselves and other's teaching practices, two students scored in the advanced level (5), while nine students scored in the proficient levels (4). Therefore, students met the requirements as measured on the rubric.

M 4: Impact on students (O: 5)

Candidates are assessed using a language and literacy portfolio rubric. A rating will be determined using standards four and seven.

Source of Evidence: Portfolio, showing skill development or best work

Target for O5: Incorporates a variety of assessment tools to plan effective instruction

Students will average 4.0 or higher, with 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured on the rubric.

Findings 2011-2012 - Target: Met

In examining the impacts on students and how they incorporate assessment tools to plan effective instruction, six students scored in the advanced level (5), while 27 students scored in the proficient levels (4). Therefore, students met the requirements as measured on the rubric.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Redesigned Portfolio

Portfolio will be re-designed with professional standards aligned with courses.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 04/2010
Responsible Person/Group: Lori Elliott
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Redesigned Portfolio

The MEd faculty are in the process of redesigning the exit portfolio for the MEd students. The framework will be drawn from the 2010 International Reading Standards for reading specialists. Students will create a video document that provides opportunities for synthesis and analysis of the reading process, diagnosis, and instructional decision making.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Video Portfolio
The MEd students currently submit video portfolios that are based on the IRA standards (2004). There are new standards (2010) that will be utilized in the future based on acceptance from the PSC. Candidates continue to refine their process and create video portfolios that demonstrate their knowledge and understanding of the reading process, instructional practices, and assessments.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Projected Completion Date: 08/2010

video refinement
MEd Reading Specialists candidates do well on the video portfolio. However, as the video portfolio becomes more established we are going to require candidates to demonstrate more synthesis across the standards so that it is clear to the viewer that the candidate has a deep knowledge of the reading/writing process, how to design and implement strategies based on this knowledge, and how to effectively assess children's literacy progress. Additionally, with future changes to the program to better reflect the trends in the field, the candidate will also add information related to home/community literacy practices and response to intervention information to their video presentation.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Portfolio Rating Standard 2: Foundations | Outcome/Objective: Demonstrates knowledge of the foundations of reading and writing processes
Projected Completion Date: 08/2012

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
For our program, we have made minimum changes to our assessment report to demonstrate effective and rigorous learning outcomes and target goals for our students. We will assess our student progress and determine what kinds of changes and improvements need to be added for the upcoming academic year.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
Our program has demonstrated great improvement and impact on our assessment finding of over 25% of students scoring a 5 and no more than 10% of students scoring a 3 or lower when measured for each assessment component. The students in our program have met the proficient requirements in our degree program. We will assess our student progress and determine what kinds of changes and improvements need to be added for the upcoming academic year.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your

2011-2012 Reading, Language, Literacy (ESOL) Online TEEMS MAT

*As of: 12/12/2016 04:42 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

Note: This program should be listed as Reading, Language and Literacy ESOL - Online MAT Degree Program (Georgia On My Line). The M.A.T. major in Reading, Language, and Literacy Education provides initial teacher preparation in ESOL for individuals holding bachelor's degree and who have an interest in English to speakers of other languages in K-12 settings. The Master of Arts in Teaching (M.A.T.) enables ESOL paraprofessional or provisional teachers to earn initial certification. The course of study meets the requirements for professional certification at the initial level in ESOL and the requirements for a Reading Endorsement. The M.A.T. teacher education program for English for Speakers of Other Languages (ESOL) is one of the five distance learning programs and two non-degree endorsements offered by the College of Education at Georgia State University through Georgia OnmyLine (GOML).

Georgia ONmyLINE provides access to a full array of online and distance education offerings from the 35 colleges and universities in the University System of Georgia. This M.A.T. in Reading, Language and Literacy Education (ESOL) at Georgia State University ("GSU") is a collaborative program between GSU, Valdosta State University ("VSU"), and North Georgia College and State University ("NGCSU"), institutions of the Board of Regents of the University System of Georgia.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. In this online program, we strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

### Goals

**G 1: Content Knowledge**

Candidates are informed educators who have expert knowledge of the content needed to teach English to Speakers of Other Languages in grades PreK-12.

**G 2: Professional and pedagogical knowledge, skills, and dispositions**

Candidates are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching English to Speakers of Other Languages in Grades PreK-12.

**G 3: Impact on student learning**

Candidates are highly effective educators whose teaching practices have a measurable impact on the English to Speakers of Other Languages learning of their students.

### Student Learning Outcomes/Objectives

**SLO 1: Demonstrate Content Knowledge (G: 1) (M: 1, 7)**

Candidates have knowledge and understanding of the major concepts, theories, methods, and research related to language acquisition and historical knowledge of theories, methods, and research on language acquisition (Goal 1). (Key Assessment - Content Knowledge: GACE II scores and Content Knowledge section of Final Teaching Evaluation rubric Overall Assessment Score for Content Curriculum).

**SLO 2: Demonstrate Professional and Pedagogical Skills (G: 1, 3) (M: 2, 3)**

Candidates create learning environments which support ESOL students' cultural identities, language and literacy development, and content area achievement through planning and implementation of a wide range of instructional methods, and curriculum materials; view teacher-researcher models of inquiry, professional development, collaboration with colleagues as career-long efforts and responsibilities; and advocate for ESOL students and their families (Goal 2). (Key Assessment- Planning: Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction); Key Assessment- Clinical Practice: Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric)

**SLO 3: Demonstrate Professional Dispositions (G: 1, 2) (M: 5)**

Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision (Goal 2). (Key Assessment - Dispositions: Unit-wide Dispositions Rubric)

**SLO 4: Uses a variety of assessments for impact on PreK-12 students (G: 3) (M: 4, 6)**

Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes...
and products, and to monitor student learning. (Goal 3) (Key Assessment - Impact on Student Learning: Teacher Work Sample rubric (Section on Analysis of Student Learning))

### Measures (Key Assessments), Targets, and Findings

#### M 1: Content Knowledge via Coursework (O: 1)
Final Teaching Evaluation Rubric: Section on Overall Assessment Score for Content Curriculum (EDCI 7680)
Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O1: Demonstrate Content Knowledge</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. This level is expected by the end of student teaching/final internship, indicating readiness for certification.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of candidates in 2011-12 scored an adequately proficient (Score 3) level of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric.</td>
</tr>
</tbody>
</table>

#### M 2: Planning Performance (O: 2)
Teacher Work Sample rubric: Sections on Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction (EDCI 7680).
Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O2: Demonstrate Professional and Pedagogical Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% of candidates will demonstrate an acceptably proficient (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of planning as shown in their Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction). These levels are expected by the end of student teaching/final internship, indicating readiness for certification.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of candidates in 2011-12 scored an adequately proficient (Score 3) level and 70% of candidates in 2011-12 scored a proficient level (4 or higher) of knowledge in the area of planning as shown in their Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction).</td>
</tr>
</tbody>
</table>

#### M 3: Clinical Practice at Midpoint (O: 2)
Midpoint Teaching Evaluation Instrument (EDCI 7660)
Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O2: Demonstrate Professional and Pedagogical Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Midpoint Teaching Evaluation Instrument. This level is expected by the midpoint of the practicum internship.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of candidates in 2011-12 scored an adequately proficient (Score 3) level in the area of clinical practice as shown on their scores of the Midpoint Teaching Evaluation Instrument.</td>
</tr>
</tbody>
</table>

#### M 4: Clinical Practice at Endpoint (O: 4)
Student Teaching Evaluation Rubric (EDCI 7680)
Source of Evidence: Professional standards

<table>
<thead>
<tr>
<th>Target for O4: Uses a variety of assessments for impact on PreK-12 students</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Final Teaching Evaluation Instrument. This level is expected by the end of student teaching/final internship, indicating readiness for certification.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of candidates in 2011-12 scored an adequately proficient (Score 3) level in the area of clinical practice as shown on their scores of the final Teaching Evaluation Instrument.</td>
</tr>
</tbody>
</table>

#### M 5: Dispositions (O: 3)
Unit-wide Dispositions Rubric
Source of Evidence: Written assignment(s), usually scored by a rubric

<table>
<thead>
<tr>
<th>Target for O3: Demonstrate Professional Dispositions</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% of candidates will demonstrate an acceptable level of performance (Score 3) or higher levels and 40% of candidates will demonstrate an exceptional level (Score 4) in the area of dispositions as shown in their Unit-Wide Dispositions rubric. These levels are expected by the end of student teaching/final internship, indicating readiness for certification.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% of candidates in 2011-12 scored an adequately proficient (Score 3) level in the area of clinical practice as shown on their scores of the final Teaching Evaluation Instrument.</td>
</tr>
</tbody>
</table>
100% of candidates in 2011-12 scored a proficient level (4 or higher) in the area of dispositions as shown in their Unit-Wide Dispositions rubric.

**M 6: Effects on P-12 Student Learning (O: 4)**
Teacher Work Sample rubric: Section on Analysis of Student Learning (EDCI 7680).
Source of Evidence: External report

**Target for O4: Uses a variety of assessments for impact on PreK-12 students**
90% of candidates will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of effects on P-12 Student Learning as shown on their scores of the Teacher Work Sample rubric (Section on Analysis of Student Learning). This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target: Met**
100% of candidates in 2011-12 scored an adequately proficient (Score 3) level and 75% of candidates in 2011-12 scored a proficient level (4 or higher) in the area of effects on P-12 Student Learning as shown on their scores of the Teacher Work Sample rubric (Section on Analysis of Student Learning).

**M 7: Content Knowledge: GACE II Scores (O: 1)**
Candidate performance on GACE tests for English to Speakers of Other Languages (forms 119 and 120). * * Data for students who pursued a certification only is included.
Source of Evidence: Certification or licensure exam, national or state

**Target for O1: Demonstrate Content Knowledge**
100% of candidates will pass the GACE 1 and 2 tests by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target: Met**
GACE Scores for 2011-2012 are still pending as of 10/16/2012. I am still waiting on Berlinda's response about it. However, our passing rate for GACE tests has been 100% over the past two years (2009-2011), which indicates that our students are able to take and pass the content tests.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Portfolio support**
We will work with those students who will be completing their portfolios throughout the upcoming year of data collection.
- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Time for complete implementation
- **Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Frances Howard
- **Additional Resources:** 0
- **Budget Amount Requested:** $0.00 (no request)
Projected Completion Date: 09/2010
Responsible Person/Group: Frances Howard
Additional Resources: 0
Budget Amount Requested: $0.00 (no request)

**Strengthening Professional Standard**
Compared to other standards in the portfolio, the reading endorsement standard 10, “students view professional development as a career long effort and responsibility” has been ranked the lowest. This result indicates that students need to be better prepared to address this standard in the course work as well as in the program. Therefore, the coordinator of the program will communicate with each of the students and course instructors to encourage the students to participate in various professional development opportunities and to document their activities throughout the program.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High
Responsible Person/Group: Jayoung Choi

**improving clinical practice**
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their teaching performance. This means that candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure (Key Assessment) | Outcome/Objective): Measure (Key Assessment): Clinical Practice at Midpoint | Outcome/Objective: Demonstrate Professional and Pedagogical Skills
Implementation Description: Candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

**improving clinical practice at endpoint**
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their teaching performance. This means that candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Relationships (Measure (Key Assessment) | Outcome/Objective): Measure (Key Assessment): Clinical Practice at Endpoint | Outcome/Objective: Uses a variety of assessments for impact on PreK-12 students
Implementation Description: Candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.
Responsible Person/Group: Jayoung Choi & other MSIT faculty

**Improving content knowledge**
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in this content knowledge. This means that we set our expectations from the outset clearly and we maintain closer monitoring of candidates’ obtaining content knowledge.

Established in Cycle: 2010-2011
Implementation Status: Planned
Improving content knowledge: GACE
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their GACE scores. This means that candidates’ content knowledge learning is monitored through course work and additional support to prepare for the tests is provided in their last semester of the program by the program coordinator.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Content Knowledge via Coursework | Outcome/Objective: Demonstrate Content Knowledge

Implementation Description: As we were successful in attaining this target, we will continue with our implementation plan of effective monitoring of our students and effective teaching.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & MSIT Faculty

Improving dispositions
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving dispositions. This means that expectations are clearly stated and delivered to the candidates at the outset and their work is consistently monitored throughout the program.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Dispositions | Outcome/Objective: Demonstrate Professional Dispositions

Implementation Description: Expectations are clearly stated and delivered to the candidates at the outset and candidates’ work is consistently monitored throughout the program by the program coordinator.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

Improving effects on P-12 student learning
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their impact on learners’ learning. This means that candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Effects on P-12 Student Learning | Outcome/Objective: Uses a variety of assessments for impact on PreK-12 students

Implementation Description: Candidates’ teaching performance will be closely monitored through course work and through internship, which will be supervised by the university supervisor and the mentor teacher.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

Improving planning
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving planning. This means that candidates will be requested to plan rigorous lessons taking into account multiple factors through course work and through internship, which will be supervised by the university supervisor and the mentor teachers.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Planning Performance | Outcome/Objective: Demonstrate Professional and Pedagogical Skills

Implementation Description: Candidates will be requested to plan rigorous lessons taking into account multiple factors through course work and through internship, which will be supervised by the university supervisor and the mentor teachers.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been
able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We have not made any major change in the assessment process; however, we have emphasized phasing portfolio assessment into the course throughout the program so that we have been able to see the progress of our candidates learning throughout the program. In doing so, our students have received feedback on their portfolio narratives each semester from their instructors.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The findings indicate that we are doing well in general, but we would like to improve our program. Our scores in assessment reflected some weaknesses with some of our candidates (e.g., we found that only 70% of the students scored at the effective level for Professional and Pedagogical Skills). So, this is an area which we have targeted for more specific instructional emphasis. I, the program coordinator, have discussed all ESOL faculty members who teach for GOML in order to reinforce this area in their respective courses.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?
N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
N/A

Georgia State University
Assessment Data by Section
2011-2012 Reading, Language, Literacy (ESOL) Online MEd
Ac-f. 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Reading, Language and Literacy M.Ed. with ESOL Concentration - Online Degree Program (Georgia On My Line) is to prepare educators who are expected to be advocates for their students through the example of our teaching, research, mentoring and service in the fields of literacy and ESOL education.

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development. In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice. In this online program, we strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

Goals

G 1: Content Knowledge
Students will have knowledge of reading and ESOL.

G 2: Professional and pedagogical knowledge, skills, and dispositions
Students are professional educators with advanced knowledge, skills, and dispositions needed to succeed in teaching reading and English to Speakers of Other Languages in their base certifications (Grades PreK-12).
**G 3: Impact on student learning**
Students are highly effective educators whose teaching practices have a measurable impact on reading and the English to Speakers of Other Languages learning of their students.

### Student Learning Outcomes/Objectives

</table>
**M 4: Clinical Practice (O: 3)**

Students’ effectiveness of lessons drawing on the learning theories and approaches is assessed in course work and clinical practice.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O3: Demonstrate Professional and Pedagogical Skills**

90% of students will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of clinical practice.

**Findings 2011-2012 - Target: Met**

100% of candidates in 2011-12 scored an effectively proficient (Score 4) level in the area of clinical practice, ESOL, as shown on their scores of the course, TSLE 7440 spring 2012 rubric. 100% of candidates in 2011-12 scored an effectively proficient (Score 4) level in the area of clinical practice, Reading, as shown on their scores of the course, EDRD 7630 fall 2011 rubric.

**M 5: Dispositions (O: 4)**

Unit-wide Dispositions Rubric

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O4: Demonstrate Professional Dispositions**

90% of candidates will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of dispositions using the unit-wide dispositions rubric.

**Findings 2011-2012 - Target: Partially Met**

100% of candidates in 2011-12 scored a proficient level (4 or higher) in the area of dispositions, ESOL, as shown in their Unit-Wide Dispositions rubric (which was administered in TSLE 7440 in spring 2012). 88% of candidates in 2011-12 scored at an adequately proficient level (Score 3) and 53% of candidates in 2011-2012 scored at an effectively proficient level (score 4) in the area of dispositions, reading, as shown in their Unit-Wide Dispositions rubric (which was administered in Summer Semester 2011 - EDRD 7600 & Spring Semester 2012 - EDRD 7600).

**M 6: Effects on P-12 Student Learning (O: 5)**

Effects on P-12 Student Learning are assessed through course work and clinical practice.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O5: Uses a variety of assessments for impact on PreK-12 students**

90% of students will demonstrate an acceptable level (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of effects on P-12 Student Learning.

**Findings 2011-2012 - Target: Partially Met**

82% of candidates in 2011-12 scored an adequately proficient (Score 3) level and 70% of candidates in 2011-12 scored a proficient level (4 or higher) in the area of effects on P-12 Student Learning in regards to ESOL as shown on their scores of the advocacy rubric administered in the course, TSLE 7260 in summer 2011. 100% of candidates in 2011-12 scored an effective proficient (Score 4) level in the area of effects on P-12 Student Learning in regards to reading as shown on their scores of the impact rubric administered in the course, EDRD 7650 fall 2011.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Embed**

Although the portfolio standards are presently embedded in the various courses through required course work and projects, the plan is to draw more attention to the standard(s) by requiring a draft of the narrative for that standard as one of the course requirements. It will be the instructor’s responsibility to read and respond to the narrative(s) until their quality warrants at least a 3 on the portfolio grading scale of 1-5, a 3 being necessary to pass the standard.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Time for complementation
- **Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Frances Howard
- **Additional Resources:** 0
- **Budget Amount Requested:** $0.00 (no request)

Strengthening Professional Standard

Compared to other standards in the portfolio, the reading endorsement standard 10, “students view professional development as a career long effort and responsibility” has been ranked the lowest. This result indicates that students need to be better prepared to address this standard in the course work as well as in the program. Therefore, the coordinator of the program will communicate with each of the students and course instructors to encourage the students to participate in various professional development opportunities and to document their activities throughout the program.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Responsible Person/Group: Jayoung Choi

Improving clinical practice

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their teaching performance. This means that candidates’ teaching performance will be closely monitored through course work.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High
- Relationships (Measure (Key Assessment) | Outcome/Objective):
  - Measure (Key Assessment): Clinical Practice
  - Outcome/Objective: Demonstrate Professional and Pedagogical Skills
- Implementation Description: Candidates’ teaching performance will be closely monitored through course work.
- Projected Completion Date: 06/2012
- Responsible Person/Group: Jayoung Choi & other MSIT faculty

Improving content knowledge

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their content knowledge in ESOL. This means that expectations for them to learn content knowledge are high in the courses and their learning will be closely monitored throughout course work.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High
- Relationships (Measure (Key Assessment) | Outcome/Objective):
  - Measure (Key Assessment): Content Knowledge in ESOL

Responsible Person/Group: Jayoung Choi & other MSIT faculty

improving effects on P-12 student learning

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their impact on learners' learning in P-12. This means that candidates will successfully learn content knowledge, on which they plan and implement rigorous lessons, which are followed by critical reflection on their teaching.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Effects on P-12 Student Learning | Outcome/Objective: Uses a variety of assessments for impact on PreK-12 students

Implementation Description: Continue our plan of effective monitoring and teaching
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

improving planning

While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in improving planning. This means that candidates will be requested to plan rigorous lessons taking into account multiple factors through course work. This will be closely monitored by program coordinator.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Planning Performance | Outcome/Objective: Demonstrate Professional and Pedagogical Skills

Implementation Description: Candidates will be requested to plan rigorous lessons taking into account multiple factors through course work. This will be closely monitored by program coordinator.
Projected Completion Date: 06/2012
Responsible Person/Group: Jayoung Choi & other MSIT faculty

closely monitoring students' progress in the EDRD 7600 course in terms of dispositions

In the course work, EDRD 7600, 88% of candidates in 2011-2012 scored at an adequately proficient level (Score 3) and 53% of candidates in 2011-2012 scored at an effectively proficient level (score 4) in the area of dispositions as shown in their EDRD 7600 course work. It is close to 90% and given that as high as 53% received a high score as a 4, the results are positive. Nevertheless, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their dispositions as teachers and leaders. This means that expectations for them to develop positive dispositions are high in the courses and their learning will be closely monitored throughout course work as well as in the program level.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Dispositions | Outcome/Objective: Demonstrate Professional Dispositions

Implementation Description: Expectations for them to develop positive dispositions as teachers and leaders are high in the courses and throughout the program and their learning will be closely monitored throughout course and program work.
Projected Completion Date: 06/2013
Responsible Person/Group: Program Coordinator & EDRD reading faculty for GOML

closely monitoring students' progress in the ERD 7600 course

In the course work, ERD 7600, 88% of candidates in 2011-2012 scored at an adequately proficient level (Score 3) and 59% of candidates in 2011-2012 scored at an effectively proficient level (score 4) in the area of reading theories and pedagogy as shown in their ERD 7600 course work. It is close to 90% and given that as high as 59% received a high score as a 4, the results are positive. Also, 100% students in the final exit portfolio on the reading content received a score of 3. Nevertheless, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their content knowledge in Reading. This means that expectations for them to learn content knowledge are high in the courses and their learning will be closely monitored throughout course work.

Established in Cycle: 2011-2012
closely monitoring students' progress in the TSLE 7260 course in terms of effects on K-12 student learning.

In the course work, TSLE 7260, 82% of candidates in 2011-12 scored at an adequately proficient level (Score 3) and 70% of candidates in 2011-2012 scored at an effectively proficient level (score 4) in the area of effects on P-12 Student Learning in regards to ESOL. It is close to 90% and given that as high as 70% students received a high score as a 4, the results are positive. Nevertheless, we will work harder to ensure that most if not all of our students attain a higher overall score in improving their effects on K-12 students and advocacy work for ELLs. This means that expectations for them to develop the knowledge and skills are high in the courses and their learning will be closely monitored throughout course work as well as at the program level.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium
Relationships (Measure (Key Assessment) | Outcome/Objective):
  - Measure (Key Assessment): Content knowledge in Reading | Outcome/Objective: Demonstrate Content Knowledge in Reading
  - Measure (Key Assessment): Effects on P-12 Student Learning | Outcome/Objective: Uses a variety of assessments for impact on PreK-12 students

Projected Completion Date: 06/2013

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have not made any major change in the assessment process; however, we have emphasized phasing portfolio assessment into the course throughout the program so that we have been able to see the progress of our candidates learning throughout the program. In doing so, our students have received feedback on their portfolio narratives each semester from their instructors.

ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The findings indicate that we are doing well in general, but we would like to improve our program. Our scores in assessment reflected some weaknesses with some of our candidates in the following areas: 1. Only 88% of candidates in 2011-12 scored at an adequately proficient level (Score 3) and 59% of candidates in 2011-2012 scored at an effectively proficient level (score 4) in the area of reading theories and pedagogy as shown in their EDRD course work. 2. Only 88% of candidates in 2011-12 scored at an adequately proficient level (Score 3) and 53% of candidates in 2011-2012 scored at an effectively proficient level (score 4) in the area of dispositions, reading, as shown in their Unit-Wide Dispositions rubric (which was administered in Summer Semester 2011 - EDRD 7600 & Spring Semester 2012 - EDRD 7600) 3. Only 82% of candidates in 2011-12 scored an adequately proficient (Score 3) level and 70% of candidates in 2011-12 scored a proficient level (4 or higher) in the area of effects on P-12 Student Learning in regards to ESOL as shown on their scores of the advocacy rubric administered in the course, TSLE 7260 in summer 2011. Thus, these are the areas which we have targeted for more specific instructional emphasis. I, the program coordinator, have discussed all ESOL and REading faculty members who teach for GOML in order to reinforce these areas in their respective courses.

ADMINISTRATIVE DEPT QUESTION 1:

Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
N/A

ADMINISTRATIVE DEPT QUESTION 2:
**What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?**

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:**
How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

<th><strong>Mission / Purpose</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>The exact title of this degree program should be: Reading, Language and Literacy TEEMS ESOL MAT. Our TEEMS-ESOL program is a nontraditional approach to teacher education at the graduate level and leads to certification in Pre-K-12. It is built upon cutting edge research and best practices in preparing teachers to work in urban environments with students who are linguistically and culturally diverse. Our mission is to prepare teachers who are leaders in the field in their knowledge, teaching and dispositions so as to enable their students to attain the highest standards in their literacy, language and emotional development. Our faculty are committed to preparing educators who are expected to be advocates for their students through the example of our teaching, research, mentoring and service.</td>
</tr>
</tbody>
</table>

The mission of the Professional Education Faculty (PEF) is to provide scholarship and leadership for the betterment of education and human development.

In our department, Middle-Secondary Education and Instructional Technology (MSIT), our mission is to engage in research, teaching, and service in urban environments with people from multiple cultural, ethnic, and linguistic backgrounds. We work collaboratively with people in schools, communities, and organizations in metropolitan Atlanta and around the world. We are committed to innovation and creativity and to pushing the boundaries of knowledge and practice.

We strive to realize our vision of pluralism, equity, and social justice where individuals have equal access to meaningful learning opportunities throughout their lives and the chance to apply their knowledge and skills for the greater good.

<tr>
<td><strong>SLO 1: Demonstrate Content Knowledge (M: 1, 2)</strong> Candidates have knowledge and understanding of the major concepts, theories, methods, and research related to language acquisition and historical knowledge of theories, methods, and research on language acquisition (Goal 1). (Key Assessment - Content Knowledge: GACE II scores and Content Knowledge section of Final Teaching Evaluation rubric Overall Assessment Score for Content &amp; Curriculum).</td>
</tr>
</tbody>
</table>

---

**SLO 2: Demonstrate Professional and Pedagogical Skills (M: 3, 4, 5)**
Candidates create learning environments which support ESOL students’ cultural identities, language and literacy development, and content area achievement through planning and implementation of a wide range of instructional methods, and curriculum materials; view teacher-researcher models of inquiry, professional development, collaboration with colleagues as career-long efforts and responsibilities; and advocate for ESOL students and their families (Goal 2). (Key Assessment- Planning: Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction); Key Assessment- Clinical Practice: Midpoint Teaching Evaluation Instrument and Student Teaching Evaluation Rubric)

**SLO 3: Demonstrate Professional Dispositions (M: 6)**
Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision (Goal 2). (Key Assessment - Dispositions: Unit-wide Dispositions Rubric)

**SLO 4: Uses a variety of assessments for impact on PreK-12 students (M: 7)**
Candidates use a variety of formal and informal assessment tools and practices to plan effective instruction, to evaluate processes and products, and to monitor student learning. (Goal 3) (Key Assessment - Impact on Student Learning: Teacher Work Sample rubric (Section on Analysis of Student Learning)

### Measures (Key Assessments), Targets, and Findings

**M 1: Content Knowledge: GACE II Scores (O: 1)**
Candidate performance on GACE tests for English to Speakers of Other Languages (forms 119 and 120). Data for students who pursued a certification only is included.

**Target for O1: Demonstrate Content Knowledge**
GACE Scores are still pending as of 5/10/2011.

**Findings 2011-2012 - Target: Met**
GACE Scores for 2011-2012 are still pending as of 6/01/2012. However, our passing rate for GACE tests has been 100% over the past four years (2007-2011), which indicates that our students are able to take and pass the content tests.

**M 2: Content Knowledge via Coursework (O: 1)**
Final Teaching Evaluation Rubric: Section on Overall Assessment Score for Content Curriculum (EDCI 7680)

**Target for O1: Demonstrate Content Knowledge**
90% of candidates will demonstrate an adequately proficient (Score 3) or higher levels and 40% of candidates will demonstrate an effectively proficient level (Score 4) of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. This level is expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target: Met**
100% of candidates in 2011-12 met the target of demonstrating adequately proficiency (Score 3) or higher levels of knowledge in the English to Speakers of Other languages content area as shown in their Content Knowledge section of Final Teaching Evaluation rubric. On the four categories for content knowledge, a minimum of 62% and a maximum of 75% of candidates scored at the effectively proficient level (Score 4).

**M 3: Planning Performance (O: 2)**
Teacher Work Sample rubric: Sections on Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction (EDCI 7680).

**Target for O2: Demonstrate Professional and Pedagogical Skills**
90% of candidates will demonstrate an acceptably proficient (Score 3) or higher levels and 40% of candidates will demonstrate a proficient level (Score 4) in the area of planning as shown in their Teacher Work Sample rubric (Sections on Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction). These levels are expected by the end of student teaching/final internship, indicating readiness for certification.

**Findings 2011-2012 - Target: Met**
The following results are for each area: (1) Contextual Factors: 100% scored at the acceptable level (Score 3 or higher) and a minimum of 88.4% scored at the proficient level (Score 4 or higher), (2) Learning Goals: 89.5% scored at the proficient level (Score 4 or higher), (3) Assessment Plan: 97% scored at the acceptable level (Score 3 or higher) and a minimum of 91% scored at the proficient level (Score 4 or higher), (4) Design for Instruction: 100% scored at the acceptable level (Score 3 or higher) and a minimum of 92.5% scored at the proficient level (Score 4 or higher).

**M 4: Clinical Practice at Midpoint (O: 2)**
Midpoint Teaching Evaluation Instrument (EDCI 7660)

**Target for O2: Demonstrate Professional and Pedagogical Skills**
90% of candidates will demonstrate an adequate level (Score 3) or higher levels and 40% of candidates will demonstrate an effective level (Score 4) in the area of clinical practice at midpoint as shown on their scores of the Midpoint Teaching Evaluation Rubric.
Increase Collaboration and Communication

The PSC/NCATE review of our program indicated a need for increased involvement by public school partners. In addition, faculty have noted a need to increase communication between faculty, supervisors, and cooperating teachers. In 2005-2006, efforts will be made to have at least 2 meetings with all faculty and all supervisors to discuss, evaluate, and redesign when necessary program design, syllabi, and supervision practices. In addition, all supervisors will visit practicum/supervision sites prior to the arrival of student teachers to meet with cooperating teachers and provide an overview of the program and expectations. We expect this initiative to strengthen the overall success of our interns when in the field.

Established in Cycle: 2005-2006
Implementation Status: In-Progress
Priority: Medium
Implementation Description: 2006-2007 school year
Responsible Person/Group: TEEMS RLL-ESOL Faculty and Supervisors: Amy Flint, Gertrude Tinker Sachs, Yan Wang and Eudes Aoulou
Increased Focus on Assessment
Candidates in the TEEMS RLL-ESOL Program performed moderately well on "Understanding and using assessment for learning." Evidence for demonstrating this standard was revealed in their electronic student teaching notebooks, supervisor observations and portfolio standards. To that end the TEEMS faculty will more systematically address issues of authentic assessment, rubric creation, and how assessment drives instruction. The faculty will do this in courses and in student teaching seminars.

Established in Cycle: 2007-2008
Implementation Status: In-Progress
Priority: High
Implementation Description: 2008-2009 School year
Responsible Person/Group: TEEMS RLL-ESOL faculty and supervisors: Gertrude Tinker-Sachs, Amy Flint, Teresa Fisher,

Increasing content knowledge as well as professional and pedagogical skills
(1) Though 95 % of candidates in 2010-11 met the target of demonstrating adequately proficiency (Score 3) or higher levels of knowledge in the English to Speakers of Other languages (ESOL) content area, a minimum of 24% and a maximum of 33% of candidates scored at the effectively proficient level (Score 4) on the four categories for content knowledge. In order for our candidates to meet higher levels of knowledge (Score 4 or 5) in the ESOL content area, we plan to integrate more various kinds of learning tasks, assignments, and activities into ESOL content area courses. For instance, from fall 2010, both TSLE 7240 and 7250 have already incorporated research and practice readings and in-depth discussions about the role and use of multimodality and technology to classes. In TSLE 7250, a group of students (a cooperative learning team) are asked to make a presentation about weekly readings in a multimodal and creative manner (e.g., critiquing readings and presenting discussion questions for the class, showing video clips that are related to weekly readings, and preparing activities to learn abstract and difficult theoretical concepts). In addition, TSLE classes plan to hold a mini-conference about students’ final projects or papers at the last class. By doing so, our candidates will have an opportunity to share their academic interests and experiences with the entire classmates, increase theoretical and practical knowledge about the learning and teaching of ESOL, and will be more likely to become an active member in an academic community. (2) 100 % of candidates in 2010-11 met the target of demonstrating adequately proficiency (Score 3) in professional and pedagogical skills through the “Clinical Practice at Midpoint”; however, a minimum of 19% and a maximum of 38% of candidates scored at the effectively proficient level (Score 4 or higher). Thus, in order to help our candidate increase their professional and pedagogical skills, ESOL faculty members plan to provide our candidates with more opportunities to engage in discussions and reflections about four areas, (a) knowledge of students and learning, (b) learning environments, (c) assessment, and (d) planning and instruction. More specifically, in TSLE classes, our candidates are asked to observe and interview English language learners about their language acquisition, to analyze interviews for a brief report, and to investigate the context where learning may take place. In addition, in EDRD reading classes, our candidates are asked to assess pre-K-12 students’ English language and literacy (especially reading) skills and conduct lessons based on their assessment of students’ language and literacy skills. By doing so, our candidate are likely to increase their knowledge of professional and pedagogical skills in ESOL.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Implementation Description: ESOL faculty members plan to provide our candidates with more opportunities to engage in various kinds of learning tasks, assignments, and activities into TSLE content area courses and EDRD reading courses. Detailed descriptions are seen in the section "Description" above.
Projected Completion Date: 05/2011
Responsible Person/Group: Dr. Tinker Sachs, Co-ordinator MEd and Dr. Yi, Co-ordinator of our MAT-ESOL
Additional Resources: All ESOL faculty.
Budget Amount Requested: $0.00 (no request)

Improving dispositions
While 100% of our students attained this target, we will work harder to ensure that most if not all of our students attain a higher overall score in dispositions. This means that expectations are clearly set at the outset of the program and their overall progress is closely monitored throughout the program.

Established in Cycle: 2011-2012

Measure (Key Assessment): Dispositions | Outcome/Objective: Demonstrate Professional Dispositions

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
N/A

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We have not made any major change in the assessment process; however, we have emphasized phasing portfolio assessment into the course throughout the program so that we have been able to see the progress of our candidates learning throughout the program. In doing so, our students have received feedback on their portfolio narratives each semester from their instructors.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The findings indicate that we are doing well in general, but we would like to do better. Our scores in assessment reflected some weaknesses with some of our candidates (e.g., we found that only 64% of the students scored at the effective level for understanding a “learning environment”. So, this is an area which we have targeted for more specific instructional emphasis. All ESOL faculty members have reinforced this area in their respective courses.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

**2011-2012 Real Estate BBA**

*As of: 12/12/2016 04:42 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

The BBA real estate major is designed for individuals entering careers in the real estate industry. It provides the student with the real estate knowledge and analytical skills necessary to support real property decisions in business environments as well as the requisite skills to effectively communicate them. The primary objectives of the program are for students to develop 1) sufficient industry knowledge to support real estate decision making; 2) analytical skills leading to sound equity investment recommendations, value enhancing project funding strategies, effective project development plans; and 3) persuasive business communication skills.

**Student Learning Outcomes/Objectives**

**SLO 1:** To develop creative decision-making skills (M: 1, 2, 3)

To develop creative decision-making skills associated with the real estate industry. 1) The student should be able to apply knowledge of real estate analytical tools to produce sound equity investment recommendations. 2) The student should be able to evaluate appropriate real estate financing methods in varying circumstances. 3) The student should be able to use knowledge of real estate development to layout efficient project development plans.

**SLO 2:** To develop business communication skills (M: 4)

The student should be able to formulate and communicate soundly-constructed analyses and recommendations relating to real estate decisions.

**Measures, Targets, and Findings**

**M 1: Apply knowledge of real estate analytical tools to produce sound equity investment recommendations (O: 1)**

Measure 1: Apply knowledge of real estate analytical tools to produce sound equity investment recommendations

Criteria 1: Understand investment principles. (RE4160) Criteria 2: Apply knowledge of investment analysis techniques to real property. (RE4160)

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: To develop creative decision-making skills**

2.0

**Findings 2011-2012 - Target: Met**

Student average of 2.0 over the two criteria.
M 2: Evaluate appropriate real estate financing methods in varying circumstances (O: 1)

Measure 2: Evaluate appropriate real estate financing methods in varying circumstances Criteria 1: Understand the methods of financing real estate. (RE4150) Criteria 2: Effectively compare the types of financing instruments (RE4150)

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: To develop creative decision-making skills

Findings 2011-2012 - Target: Met
Student average on C1 and C2: 2.52

M 3: Use knowledge of real estate development to layout efficient project development plans (O: 1)

Measure 3: Use knowledge of real estate development to layout efficient project development plans Criteria 1: Understand design, construction, and analysis procedures (RE4050) Criteria 2: Appreciate the impact of changing technical and economic activities on space needs and the form and design of physical structures (RE4050)

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: To develop creative decision-making skills

Findings 2011-2012 - Target: Met
Student average C1: 2.38 C2: 2.31

M 4: Formulate and communicate soundly-constructed analyses and recommendations relating to real estate decisions (O: 2)

Measure 1: Formulate and communicate soundly-constructed analyses and recommendations relating to real estate decisions Criteria 1: Identify, evaluate and assemble arguments based around real estate problems (RE4700) Criteria 2: Persuasively communicate interpretations and solutions to real estate problems (RE4700)

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: To develop business communication skills

Findings 2011-2012 - Target: Met
Student average C1: 2.57 C2: 2.77

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Grading by some professors
We have an instructor who graded higher than we would normally expect. Chair has addressed this issue with the instructor and will monitor progress.

Established in Cycle: 2006-2007
Implementation Status: Finished
Priority: Medium
Implementation Description: 8/15/07
Responsible Person/Group: Department Chair
Additional Resources: None

CTW assessment development plan
Develop RE4700 as a CTW course and plan to implement assessment of students in 2010-2011.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Medium
Projected Completion Date: 05/2011
Responsible Person/Group: Paul Gallimore

Further exposition of learning outcomes
The Department will identify the mission and general program goals. The Department will undertake a review to facilitate clarification of the locus of the learning outcomes and their articulation with the courses in which they are assessed. The use of percentage targets for learning outcome measured achievement will be reviewed.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 05/2011

New Learning Outcome Framework
BBA (Major in Real Estate) - Student Learning Outcome Matrix Assessment conducted using embedded examination questions or project work. Outcome Measures Criteria Assessed within (course) Outcome 1. Develop creative decision-making skills M1 Apply knowledge of real estate analytical tools to produce sound equity investment recommendations Understand investment principles. M2 Evaluate appropriate real estate financing methods in varying circumstances Understand the methods of financing real estate. Effectively compare the types of financing instruments, M3 Use knowledge of real estate development to layout efficient project development plans. 1. Understand design,
2. Appreciate the impact of changing technical and economic activities on space needs and the form and design of physical structures. RE4050 Outcome 2 Develop business communications skills M1 Formulate and communicate soundly-constructed analyses and recommendations relating to real estate decisions. Identify, evaluate and assemble arguments based around real estate problems. Persuasively communicate interpretations and solutions to real estate problems. RE4700

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium
Implementation Description: Adopt new framework for assessment and recording of learning outcomes with progressive implementation during 2011-2012.
Projected Completion Date: 06/2012
Responsible Person/Group: Paul Gallimore

### M 3: The real estate system and the production cycle (O: 1)

M3 Understand the real estate system and the production cycle

**Criteria (and course location of assessment):**
- Understand the key theories that describe and explain the functioning and evolution of real estate markets (RE8060)
- Understand the economic forces that affect demand, supply, equilibrium and disequilibrium in real estate markets (RE8060)
- Comprehend the contributions of different components in the real estate development process, and the design and production dimensions of real estate development (RE8050)

**Source of Evidence:** Writing exam to assure certain proficiency level

**Target for O1: Understand the real estate framework**

2.0

**Findings 2011-2012 - Target: Met**

Averages on this measure: C1: 2.10 RE8060 C2: 2.30 RE8060 C3: 2.27 RE8050.

### M 4: Application to real estate investment problems (O: 2)

M1 Select and apply appropriate techniques to the analysis and solution of real estate investment problems

**Criteria (and course location of assessment):**
- Identify, evaluate and assemble key data for use in real estate asset investment analysis (RE8090). (years prior to AY2012 course location of assessment was RE8020).
- Select and apply appropriate techniques/tools to investigate real estate investment decisions and issues (RE8090). (years prior to AY2012 course location of assessment was RE8020)
- Select and apply appropriate techniques/tools to support real estate market-studies. (RE8060)

**Source of Evidence:** Writing exam to assure certain proficiency level

**Target for O2: Apply theoretical principles and skills**

2.0

**Findings 2011-2012 - Target: Met**

### M 5: Application to real estate financing problems (O: 2)

M2 Select and apply appropriate techniques to the analysis and solution of real estate financing problems

**Criteria (and course location of assessment):**
- Identify, evaluate and assemble key data for use in analysis of real estate finance decisions (RE8030)
- Select and apply appropriate instruments and techniques to support real estate finance decision-making (RE8030)
- Critically review techniques and data issues in real estate finance (RE8030)

**Source of Evidence:** Writing exam to assure certain proficiency level

**Target for O2: Apply theoretical principles and skills**

2.0

**Findings 2011-2012 - Target: Met**

Average on this measure: C1 2.75 RE8030 C2 2.50 RE8030 C3 2.75 RE8030.

### M 6: Application to real estate development problems (O: 2)

M3 Select and apply appropriate techniques to the analysis and solution of real estate development problems

**Criteria (and course location of assessment):**
- Identify, evaluate and assemble key data for use in analysis of real estate development decisions (RE8050)
- Select and apply appropriate techniques to support real estate development decision-making at project planning and project implementation stages (RE8050)
- Critically review techniques and data issues in real estate project planning and real estate development (RE8050)

**Source of Evidence:** Project, either individual or group

**Target for O2: Apply theoretical principles and skills**

2.0

**Findings 2011-2012 - Target: Met**

Averages on this Measure C1 2.75 C2 2.50 C3 2.75 C4 2.75 C5 2.75.

### M 7: Skills in investigation design and organization (O: 3)

M1 Demonstrate effective skills in the design and organization of investigations to support the solution of real estate problems

**Criteria (and course location of assessment):**
- Identify appropriate investigations in response to real estate decision problems (RE8070)
- Produce coherent and articulated analyses targeted at a range of quantitative and qualitative real estate problems (RE8070)

**Source of Evidence:** Project, either individual or group

**Target for O3: Organize and communicate effectively**

2.0

**Findings 2011-2012 - Target: Met**

C1 8050 2.53 C2 8050 2.40 C3 8050 2.27

### M 8: Skills in the presentation of findings (O: 3)

M2 Demonstrate effective skills in the presentation of findings

**Criteria (and course location of assessment):**
- Develop arguments to support analysis and recommendation relating to real estate decisions (RE8090)
- Assemble and deliver arguments and
recommendations so as to achieve desired outcomes (RE8090)

Source of Evidence: Project, either individual or group

Target for O3: Organize and communicate effectively

2.0

Findings 2011-2012 - Target: Met
Averages on this measure. C1: 2.50 RE8090. C2: 2.50 RE8090.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continuation of new framework implementation plan
Review achievement targets. At present target is expressed as an average. The Department will review whether this should be modified to encompass a minimum percentage of students attaining target. This was signaled in last year's Action Plan but not fully pursued because for a number of courses last year was the first implementation of the new framework. Support instructors in interpreting and implementing new criteria. This continues to be an action point and is considered particularly relevant where instructors are new to teaching the course.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium
Implementation Description: During session
Projected Completion Date: 05/2011
Responsible Person/Group: Paul Gallimore/Department

Georgia State University
Assessment Data by Section
2011-2012 Rehabilitation Counseling MS
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

The Department of Counseling and Psychological Services and the graduate rehabilitation program are committed to excellence in the vocational preparation of individuals in a wide variety of rehabilitation and health care settings. The department prepares students for careers in human service and physical and mental health settings such as governmental agencies, rehabilitation centers, non-profit community based residential and non-residential programs, educational institutions, and private for-profit businesses. The department also prepares professionals who will provide service in managed care, case management, vocational rehabilitation, and related areas. Graduates will also have knowledge and understanding of gender, cultural, ethnic, and physical issues as they relate to people with disabilities. In addition, graduates are expected to have a service and research mission to enhance and advance the field of rehabilitation and health care for people with disabilities. Established in Cycle: 2005-2006 Active Through: 2011-2012 Entry Status: Final

Goals

G 1: Successfully obtain employment
Students, upon graduation, will obtain employment or continue their education in areas of their professional interests related to assisting people with disabilities. Disability is broadly defined to include people with physical, cognitive, and/or emotional diagnoses.

G 2: Certification and/or licensing
Students, upon graduation and within the time frames as established by regulation or protocol, will successfully achieve relevant licensing and/or certification(s) if applicable. In Georgia, typical licensing is as a professional counselor. Certification is typically Certified Rehabilitation Counselor (national).

G 3: Work with clients with disabilities
Students, upon graduation, if applicable, will be employed in settings which benefit people with cognitive, emotional and/or physical disabilities. Note: Other acceptable options are that some graduates may (1) select to continue their education, (2) delay entry into the workforce to raise a family, or (3) work in settings which may indirectly benefit people with disabilities (e.g., employment with policy or regulatory setting agencies or boards, educational institutions, etc.).

Outcomes/Objectives

O/O 1: Demonstration of rehab counseling competence (G: 1, 2, 3) (M: 1, 2, 3)
Students will demonstrate competence in applying the foundations of rehabilitation counseling to their field work, including knowledge of rehabilitation counseling history, professional identify, the rehabilitation practice setting, medical and psychological aspects of disabilities, barriers and enhancements to case management and job placement, and ethical and legal considerations.

Relevant Associations: Council on Rehabilitation Education

O/O 2: Certification and licensing ethical code practice (G: 2) (M: 1, 2)
Practice ethical codes consistent with Certified Rehabilitation Counselor (CRC) requirements and state of Georgia licensing.
O/O 3: Work with clients with disabilities (G: 3) (M: 2, 3, 4)
Demonstrate competence in rehabilitation counseling with individuals and with groups of clients with physical, cognitive and/or emotional disabilities.
Relevant Associations: Council on Rehabilitation Education

O/O 4: Counsel and consult with diverse populations (G: 1, 3) (M: 2, 3, 4)
Students will demonstrate effective counseling and consulting with diverse population including disability, culture, ethnicity, gender, race, and other relevant special issues.
Relevant Associations: Council on Rehabilitation Education

O/O 5: Successfully secure employment (or continue educ) (G: 1)
80 per cent of students will successfully located relevant employment within six month of graduation. Others may choose to continue their education or delay entry to the work force in order to parent children.
Relevant Associations: Council on Rehabilitation Education

Measures, Targets, and Findings

M 1: Certification tests and major exams (O: 1, 2)
a) Passing the national certification exam (CRC) by students/graduates, and b) passing master's comprehensive exams
Source of Evidence: Comprehensive/end-of-program subject matter exam

Target for O1: Demonstration of rehab counseling competence
90 % pass rate on first attempt is expected

Target for O2: Certification and licensing ethical code practice
90 % of students will pass the comprehensive exam and 85% will pass the CRC exam on the first attempt

M 2: Reviews and assessments of ethical conduct (O: 1, 2, 3, 4)
Reviews during classes CPS 6050, 6450, 7430, 7660, 7680 as assessed by taped samples, site supervisor evaluation, forms 1005, 1006, comprehensives and CRC.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Demonstration of rehab counseling competence
Successfully complete the internship sequence as judged by faculty and site supervisor.

Target for O2: Certification and licensing ethical code practice
Students will demonstrate knowledge about psychological diagnosis.

Target for O3: Work with clients with disabilities
All students will select an internship site that provides services to people with disabilities

Target for O4: Counsel and consult with diverse populations
Ethical conduct foundation will be accomplished through coursework associated with the introductory class (6050). All student will pass this class.

M 3: Evaluation of work with clients with disabilities (O: 1, 3, 4)
Demonstration will be examined by (a) At least 90% of students will successfully complete an assessment of rehabilitation potential of a "real" client, and they will have adequate grades for term papers on topics of disabilities in CPS 8410 and 8420. They will also achieve satisfactory written review of performance with clients in their practicum/internship sites by the faculty instructor and on-site supervisors. (b) Written evaluation and group evaluation experiential interaction in self-disclosure and core conditions, as well as CPS 7660 (form 1005) and 6410, (c) CPS 7430 assessment project, and (e) 80% of internship supervisors will rate students as good or better.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Demonstration of rehab counseling competence
Successfully complete the practicum and internship

Target for O3: Work with clients with disabilities
Successful completion by all students of helping skills, group and internship classes

Target for O4: Counsel and consult with diverse populations
Evaluation will occur through site practicum/internship classe supervisors and faculty. All students will successfully accomplish this goal.
M 4: Counsel and consult with diverse populations (O: 3, 4)
Students will demonstrate effective counseling and consulting with diverse populations including disability, culture, ethnicity, gender, race, etc.

Source of Evidence: Performance (recital, exhibit, science project)

Target for O3: Work with clients with disabilities
Students will engage in rehabilitation counseling with "clients" who receive services from community providers.

Target for O4: Counsel and consult with diverse populations
Students will obtain the foundation for this measure by taking and passing at least one class relating to cultural and diversity. Additionally, practice will be accomplished through role play in helping skills related classes and practicum/internship classes.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continued accreditation
The program will meet accreditation requirements and a community board of advisors will be included in the rehabilitation program planning.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):
  - Measure: Certification tests and major exams | Outcome/Objective: Certification and licensing ethical code practice
  - Implementation Description: Continued accreditation by CORE and participation by board of advisors. This is an on-going process.
  - Responsible Person/Group: Roger Weed

Ethics class/DSM Training
The program evaluation from the past year has detected that the ethics training in infused in several classes and several areas of overlap exist. We have also noted that diagnostic training (DSM) could be enhanced. This issue was discussed with the rehabilitation advisory board and over the next year there are plans to enhance ethics training in the introductory class (6050), eliminate the "stand alone" ethics class and require the DSM training class.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High
Relationships (Measure | Outcome/Objective):
  - Measure: Reviews and assessments of ethical conduct | Outcome/Objective: Certification and licensing ethical code practice
  - Implementation Description: Initiate the application to academic affairs.
  - Projected Completion Date: 07/2009
  - Responsible Person/Group: Roger Weed, Lindy Parker, Debbie Berens

Reviews of student competence
The coordinator of the program will solicit information from faculty of classes designed for demonstration of competence and site supervisors for internships.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Medium
Projected Completion Date: 05/2009
Responsible Person/Group: Roger Weed

Reviews of student competence with clients
The assessment project and internship evaluations will be reviewed for adequacy of practical application of educational outcomes.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Implementation Description: "Real" clients for assessment project and internship sites.
Responsible Person/Group: Roger Weed and Joe Hill

Georgia State University
Assessment Data by Section
2011-2012 Religious Studies BA
As of: 12/13/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
In the aftermath of September 11th, the importance of Religious Studies as a discipline has become strikingly evident. Educated students need to learn about religious beliefs, practices, and motivations in a scholarly and dispassionate setting, and they need to gain this knowledge not from those who already are committed to a particular set of beliefs but from scholars who are trained in the
Measures, Targets, and Findings

Other Outcomes/Objectives

Student Learning Outcomes/Objectives

Goals

G 1: Knowledge of the Academic Study of Religion
It is expected that students majoring in Religious Studies will acquire appropriate knowledge in the following areas: 1) Religious Traditions of the World (Hinduism, Buddhism, Confucianism, Taoism, African Religion, Judaism, Christianity, Islam) 2) Foundational Thinkers in the World Religions (Laozi, Confucius, Buddha, Abraham, Jesus, Paul, Mohammed) 3) Major Religious Thinkers (Gandhi, Suzuki, Maimonides, Buber, Augustine, Aquinas, Luther, Malcolm X, King, Nagarjuna, Shankara, etc.) 4) Major Theorists in the Study of Religion (Eliaide, W.C. Smith, Freud, James, Durkheim, Marx, Weber, Daly, Douglas, JZ Smith, etc.) 5) Representative Critical Theories and Methods (historical, anthropological, philosophical, sociological, psychological, ethical, feminist, etc.) 6) Fundamental Technical Categories (sacred space and time, cosmology, mythology, ritual, sacrifice, scripture, hermeneutics, ethics, deities, etc.) 7) Common Comparative Themes (ethics, mysticism, gender issues, death, politics, festivals, war and violence, etc.) 8) Historical Role in Religion in Culture (non-textual expression, popular religion/culture, pluralism and exclusivism, syncretism, art and music, etc.)

G 2: Technical Skills in the Academic Study of Religion
It is expected that students majoring in Religious Studies will acquire appropriate technical skills in the following areas: 1) Reading Critically (outlining arguments, identifying conclusions, contextualizing author and text, detecting vagueness/ambiguity, etc.) 2) Thinking and Writing Critically (establishing premises and reaching conclusion, avoiding fallacies, utilizing proper grammar/diction/usage, etc.) 3) Conducting Effective Research in Religious Studies (using libraries and on-line resources, evaluating scholarship, synthesizing, etc.)

SLO 1: Knowledge of General Religious History (M: 2, 4)
Ability to extrapolate a general working knowledge of the great historical religious traditions, e.g., Judaism, Christianity, Islam, Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Daoism, Shinto.

SLO 2: Knowledge of Major Religious Thinkers (M: 1, 2, 4)
Ability to understand, contextualize, and explain the thought of major religious thinkers.

O/O 3: Skills in Critical Thinking and Expression (M: 3, 4)
Ability to think critically and write persuasively within the academic study of religion.

O/O 4: Ability to Conduct Research in Religion (M: 3, 4)
Ability to conduct effective research in religious studies.

Measures, Targets, and Findings

M 1: Evaluating Capstone Papers (Theoretical) (O: 2)
Each graduating major is solicited to submit a capstone paper from an upper-level Departmental course from his or her final semester in residence. Each paper is subsequently evaluated blindly by each member of the Assessment Committee (consisting of three tenured/tenure-track faculty members) with regard to theoretical content, i.e., knowledge of critical theory in the study of religion, scholarly categories, comparative method, etc.

Source of Evidence: Capstone course assignments measuring mastery

Target for Q2: Knowledge of Major Religious Thinkers
87% of graduating seniors submitted capstone papers in this cycle. 100% of these papers received a score of 2.7 or higher from the Assessment Committee, and 66% received a score of 3.3 or higher.

M 2: Evaluating Capstone Papers (Historical) (O: 1, 2)
Each graduating major is solicited to submit a capstone paper from an upper-level Departmental course from his or her final semester in residence. Each paper is subsequently evaluated blindly by each member of the Assessment Committee (consisting of three tenured/tenure-track faculty members) with regard to historical content, i.e., knowledge of religious history, religion in its social and cultural contexts, comparative data, etc.
Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Knowledge of General Religious History**
75% of faculty evaluations for historical content ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for historical content ranking 3.3 or higher.

**Target for O2: Knowledge of Major Religious Thinkers**
75% of faculty evaluations for historical content ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for historical content ranking 3.3 or higher.

**M 3: Evaluation of Capstone Papers (Technical Skills) (O: 3, 4)**
Each graduating major is solicited to submit a capstone paper from an upper-level Departmental course from his or her final semester in residence. Each paper is subsequently evaluated blindly by each member of the Assessment Committee (consisting of three tenured/tenure-track faculty members) with regard to technical skills.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O3: Skills in Critical Thinking and Expression**
75% of faculty evaluations for technical skills ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for technical skills ranking 3.3 or higher.

**Target for O4: Ability to Conduct Research in Religion**
75% of faculty evaluations for technical skills ranking 2.7 or higher on a 4.0 scale. 33% of faculty evaluations for technical skills ranking 3.3 or higher.

**M 4: Evaluating Student Exit-Surveys (Numerical) (O: 1, 2, 3, 4)**
Each graduating major is solicited to fill out and submit an exit survey, where the respondent was asked to assess the effectiveness of the Religious Studies major with regard to specific learning outcomes, i.e., understanding the nature and varieties of religion, familiarity with critical theory and major theorists, ability to conduct research and write critically, etc. Students ranked goals on a five-point scale, with 1 being the lowest, 5 being the highest ranking.

Source of Evidence: Exit interviews with grads/program completers

**Target for O1: Knowledge of General Religious History**
90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

**Target for O2: Knowledge of Major Religious Thinkers**
90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

**Target for O3: Skills in Critical Thinking and Expression**
90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

**Target for O4: Ability to Conduct Research in Religion**
90% of student rankings on relevant survey questions scoring 4.00 or higher. Mean student rankings on relevant questions scoring 4.25 or higher.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Long-Range Curricular Planning**
With the addition of several new faculty over the last two years, and more likely forthcoming, the Department will develop a comprehensive, but flexible plan for curricular offerings over the next several years.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 12/2010
- **Responsible Person/Group:** Kathryn McClymond, Jonathan Herman, Curriculum Committee

**Modifying Assessment Criteria**
The Assessment Committee will modify the existing Assessment procedure so that individual measures match more precisely with specific learning objectives.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 02/2010
- **Responsible Person/Group:** Jonathan Herman, Assessment Committee

**Research and CTW Courses**
The Department will take deliberate steps to provide a significant research component in at least one of the required CTW courses.
Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 07/2010
Responsible Person/Group: Tim Renick

**Comparative Religion**

Reviewing curriculum to determine if sufficient comparative courses are offered within each cycle.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Low
Projected Completion Date: 04/2011
Responsible Person/Group: Kathryn McClymond

**Research in Religious Studies**

Continued monitoring that majors have sufficient exposure to research methods in department’s signature courses; continued integration of research component into CTW courses.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Evaluating Student Exit-Surveys (Numerical)
- Outcome/Objective: Ability to Conduct Research in Religion

Projected Completion Date: 09/2011
Responsible Person/Group: Kathryn McClymond

**More Targeted Submissions**

The Assessment Committee will explore ways to enable closer to 100% compliance with submission requests, and the Curriculum Committee will examine ways in which students may be encouraged to situate every thinker and/or theoretical approach in its historical context.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

---

**Mission / Purpose**

In the aftermath of September 11th, the importance of Religious Studies as a discipline has become strikingly evident. Educated students need to learn about religious beliefs, practices, and motivations in a scholarly and dispassionate setting, and they need to gain this knowledge not from those who already are committed to a particular set of beliefs but from scholars who are trained in the histories, languages, and practices of religions. Universities are one of the few venues in which such education about religion (rather than “religious education”) currently takes place. Given this fact, it is perhaps not surprising that Religious Studies has enjoyed incredible national growth since September 11th. Time Magazine (9/11/2002), the Atlanta Journal Constitution (8/6/2002) the Associated Press (9/11/2002), and the London Times (9/6/2002) each recently reported on this phenomenon. But it is important to note that the field has been growing for decades, with new degrees (either graduate or undergraduate) in Religious Studies being established during the last twenty years at such schools (to use the Southeast as an example) as the University of Georgia, Florida State University, Florida International, Duke, and UNC-Greensboro. Georgia State’s diverse student body and emphasis on international and multi-cultural education makes its Religious Studies Program absolutely essential to its larger projects. When the College of Arts and Sciences organized a lecture series in the aftermath of September 11th, Religious Studies provided as many speakers as any other program in the University. When CNN broadcast one of its first reports on the brand of Islam that may have inspired the September 11th attacks, it was a Georgia State Religious Studies faculty member who appeared live on prime time to explain the issues. Although it might be an overstatement to say that University projects like the new programs in Middle East Studies, Jewish Studies, and Asian Studies would not exist without Religious Studies participation, it is safe to say that these programs would be far weaker. Religious Studies is an integral part of the intellectual life of this University.

**Goals**

**G 1: Fluency in the Academic Study of Religion**

It is expected that students majoring in Religious Studies achieve fluency in the academic study of religion, so that they may go on to doctoral work in the field, teach religious studies in a community college or high school, or bring what they learned here to bear on whatever field they pursue. This entails basic knowledge of the religious traditions of the world (Hinduism, Buddhism, Confucianism, Taoism, Shinto, African Religion, Judaism, Christianity, Islam), fundamental historical religious figures (Laozi, Confucius, Buddha, Abraham, Jesus, Paul, Mohammed) major religious thinkers (Gandhi, Suzuki, Maimonides, Buber, Augustine, Aquinas, Luther, Malcolm X, King, Ngeruji, Shankara, etc.), major theorists in the study of religion (Eliahu, W.C. Smith, Freud, James, Durkheim, Marx, Weber, Daly, Douglas, JZ Smith, etc.) representational critical theories and methods (historical, anthropological, philosophical, sociological, psychological ethical, feminist, etc.), fundamental technical categories (sacred space and time, cosmology, myth, ritual, sacrifice, scripture, hermeneutics, ethics, deities, etc.), common comparative themes (ethics, mysticism, gender issues, death, politics, festivals, war and violence, etc.), and the historical role of religion in culture (non-textual expression, popular religion/culture, pluralism and exclusivism, sectarianism, art and music, etc.).
### Student Learning Outcomes/Objectives

**SLO 1: Knowledge of History of Religions (M: 1, 5)**
Ability to understand the role religion plays historically in both popular and elite culture, to extrapolate a general working knowledge of at least four religious traditions and to synthesize a detailed knowledge of two traditions, e.g., Judaism, Christianity, Islam, Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Daoism, Shinto.

**SLO 2: Knowledge of Theories of Religion (M: 2, 5)**
Ability to explain, critique, and apply principles of at least three theorists or thinkers in the academic study of religion, and to demonstrate fluency in major terms and concepts in the field.

**SLO 3: Methodological Approaches to Religion (M: 4, 5)**
Ability to understand and apply at least two critical and methodological approaches to the study of religion.

**SLO 4: Comparative Approaches to Religion (M: 5)**
Ability to compare two or more traditions with regard to at least one specific theme.

**SLO 5: Reading Scholarly Texts (M: 3, 5)**
The ability to read scholarly texts critically and with comprehension.

**SLO 6: Research in Religious Studies (M: 1, 5)**
The ability to conduct effective scholarly research in religious studies.

### Other Outcomes/Objectives

**O/O 7: Critical Thought and Expression (M: 3, 5)**
The ability to construct clearly written arguments and commentary.

### Measures, Targets, and Findings

**M 1: Historical Content Evaluation of M.A. Theses (O: 1, 6)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee assigns each thesis a numerical grade (4.0 scale) on mastery of historical content. Moreover, each faculty member makes specific written comments evaluating the student's command of this content.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Knowledge of History of Religions**
75% of faculty evaluations scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**Target for O6: Research in Religious Studies**
75% of faculty evaluations of historical content scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 2: Theoretical Content Evaluation of M.A. Theses (O: 2)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee assigns each thesis a numerical grade (4.0 scale) on mastery of theoretical content. Moreover, each faculty member makes specific written comments evaluating the student's command of this content.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O2: Knowledge of Theories of Religion**
75% of faculty evaluations of theoretical content scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 3: Critical Reading/Writing Evaluation of M.A. Thesis (O: 5, 7)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee produces written comments detailing the extent to which the thesis demonstrates the student’s ability to engage in critical reading, thinking, and writing in the academic study of religion. Moreover, each faculty member makes specific written comments evaluating the student's command of these skills.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O5: Reading Scholarly Texts**
75% of faculty evaluations on critical skills scoring 3.3 or higher. No comments indicating significant problem with any of the
Target for **O7: Critical Thought and Expression**
75% of faculty evaluations scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 4: Methodological Evaluation of M.A. Thesis (O: 3)**
For each graduating student, the masters thesis is read by at least three faculty members. Before reading a thesis, the faculty members review the learning goals for the M.A. in Religious Studies. Each member of the committee assigns each thesis a numerical grade (4.0 scale) on the ability to apply different methodological approaches to the study of religion. Moreover, each faculty member makes specific written comments evaluating the student's command of these skills.
Source of Evidence: Capstone course assignments measuring mastery

Target for **O3: Methodological Approaches to Religion**
75% of faculty evaluations on methodological issues scoring 3.3 or higher. No comments indicating significant problem with any of the stipulated learning outcomes.

**M 5: Evaluating Student Exit-Surveys (O: 1, 2, 3, 4, 5, 6, 7)**
Each graduating MA student is solicited to fill out and submit an exit survey, where the respondent was asked to assess the effectiveness of the Religious Studies masters degree with regard to specific learning outcomes, i.e., understanding the nature and varieties of religion, familiarity with critical theory and major theorists, ability to conduct research and write critically, etc. Students ranked goals on a five-point scale, with 1 being the lowest, 5 being the highest ranking. Moreover, students were asked to offer comments specifically addressing the strengths and weaknesses of the program, advise for future graduate students, and so forth.
Source of Evidence: Exit interviews with grads/program completers

Target for **O1: Knowledge of History of Religions**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O2: Knowledge of Theories of Religion**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O3: Methodological Approaches to Religion**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O4: Comparative Approaches to Religion**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O5: Reading Scholarly Texts**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O6: Research in Religious Studies**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

Target for **O7: Critical Thought and Expression**
100% of student answers to relevant survey questions scoring 4.0 or higher. Mean score of student answers to relevant questions totaling 4.50 or higher. No significant evidence of student dissatisfaction with particular issue.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Monitoring Thesis Research**
The Graduate Committee will implement changes in the process by which students conceptually research their theses, mandating more familiarity with research techniques, library resources, and alternative methodologies.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 02/2010
- **Responsible Person/Group:** Vincent Lloyd, Curriculum Committee

**New Assessment Criteria**
The Assessment Committee will modify the existing Assessment procedure so that individual measures match more precisely with specific learning objectives.

- **Established in Cycle:** 2008-2009
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 03/2010
Responsible Person/Group: Jonathan Herman, Vincent Lloyd, Curriculum Committee

Scheduling Graduate Seminars
The Department will develop a long-range plan for developing and staffing a diverse range of appropriately configured graduate-only seminars.
Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Projected Completion Date: 02/2011
Responsible Person/Group: Kathryn McClymond, Vincent Lloyd, Curriculum Committee

Theory and Method
Continue integrating theoretical and methodological components into graduate-only seminars, in addition to the required course in advance theory and method.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Theoretical Content Evaluation of M.A. Theses | Outcome/Objective: Knowledge of Theories of Religion
  Projected Completion Date: 04/2011
  Responsible Person/Group: Kathryn McClymond

Theory and Method
Implementation of more theory-methodology oriented courses.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Historical Content Evaluation of M.A. Theses | Outcome/Objective: Research in Religious Studies
  Measure: Methodological Evaluation of M.A. Thesis | Outcome/Objective: Methodological Approaches to Religion
  Projected Completion Date: 04/2011
  Responsible Person/Group: Molly Bassett

Thesis Timeline
Establish a prospectus/thesis timeline, with specific benchmarks, clarification of methodology, research plan, etc.
Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Critical Reading/Writing Evaluation of M.A. Thesis | Outcome/Objective: Reading Scholarly Texts
  Responsible Person/Group: Molly Bassett

Georgia State University
Assessment Data by Section
2011-2012 Research Measurement and Statistics MS
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Research, Measurement, and Statistics program is to cultivate and develop future educational researchers who are capable of investigating complex problems of the 21st century.
This is in keeping with the university's overarching goal to be recognised as a dynamic academic community where teaching and research combine to produce leaders and create solutions to conquer the challenges of the 21st century.

Goals
G 1: Doctoral students or employees as researchers in the field
Graduates of the RMS master's program will be doctoral students in the unit's RMS program or at other universities.

G 2: Employed in research related jobs
Graduates of the RMS master's program will be employed in research related jobs.

G 3: knowledgeable educational researcher
The students who graduate from the RMS master's program will be knowledgeable educational researchers.
### Student Learning Outcomes/Objectives

<table>
<thead>
<tr>
<th>SLO 1: Form a clear, useful, and practical research query (G: 1, 2, 3) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Develop a research idea into a query that is clearly stated, that has a useful place in the extant literature, and that can be practically addressed through research.</td>
</tr>
</tbody>
</table>

**Strategic Plan Associations**

- 2.1 Expand support for doctoral programs.
- 2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
- 3.1 Enhance a research culture.

<table>
<thead>
<tr>
<th>SLO 2: Review and critique the research literature (G: 1, 2) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Be able to write a review literature related to their field of study and the various methodological approaches.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 3: Design a research study (G: 1, 2) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to: (1) select an appropriate design for addressing a research query; (2) to choose an appropriate population from which to sample; (3) choose an appropriate sampling technique for the intended level of generalizability; (4) operationalize all variables of interest, including, as applicable, the selection of measurement instruments intended to gather data on said variable(s); (5) craft an appropriate procedure for data collection; (6) write a professional-level Method section of a research report, describing the above aspects of a design.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SLO 4: Analyze data and report the results (G: 1, 2) (M: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to: (1) recognize an appropriate technique for analyzing data, given the research query and the design used to collect the data; (2) conduct the analysis(es) appropriate for the research query and the design used to collect the data; (3) interpret and to report on the results of the analysis(es) appropriate for the research query and the design used to collect the data.</td>
</tr>
</tbody>
</table>

### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: Master's project/thesis (O: 1, 2, 3, 4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The final project for master’s students is a major paper or a thesis. In this assessment, faculty will be able to evaluate a student’s overall understanding of research and the research process, thereby providing a summative assessment of the student’s research capabilities. Master’s projects/theses are assessed by the project advisor or the thesis committee.</td>
</tr>
<tr>
<td>Source of Evidence: Senior thesis or culminating major project</td>
</tr>

**Target for O1: Form a clear, useful, and practical research query**

- 85% of the students will meet the expectations
- 15% will exceed

**Target for O2: Review and critique the research literature**

- 85% of the students will meet the expectations
- 15% will exceed

**Target for O3: Design a research study**

- 85% of the students will meet the expectations
- 15% will exceed

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Incorporate LOA-relevant assessments into courses**

Although several of our doctoral courses have one or more of the assessments for evaluating students on the learning objectives, these assessments are scarce in our master’s level courses. We will incorporate them into our master’s courses for 2006-2007 and update the report when we have data.

- **Established in Cycle:** 2005-2006
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Some already in FA06, more to come in SP06
- **Projected Completion Date:** 01/2013
- **Responsible Person/Group:** RMS Faculty

**Put more emphasis on analysis & reporting results**

Our students need to have superior skills at analyzing data and reporting on the results of those analyses. Expectations at the master’s level are not quite as high as at the doctoral level, but we still have high standards for our master’s students in this area, and those standards were not met by all students this year. We will therefore provide more emphasis on instruction on the analysis of data, the interpretation of the results, and the communication of both the results and the interpretation.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** RMS Faculty

**Redesigning measures**

There has been a change in leadership and subsequent changes in reporting officers in the unit. The unit has begun creating
measures - rubrics and analytic guidelines to evaluate the learning outcomes and objectives of the program.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Data will be collected at the end of the academic year 2012-2013 using the new measures designed.
Projected Completion Date: 05/2013

Georgia State University
Assessment Data by Section
2011-2012 Research, Measurement, Statistics (GOML) MS

As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The mission of the Research, Measurement, and Statistics program is to cultivate and develop future educational researchers who are capable of investigating complex problems of the 21st century.
This is in keeping with the university's overarching goal to be recognised as a dynamic academic community where teaching and research combine to produce leaders and create solutions to conquer the challenges of the 21st century.

Goals

G 1: Doctoral students
Graduates of the RMS online master's program will be doctoral students in Georgia State University or other programs in the field.

G 2: Employed in research related fields
Graduates of the RMS master's program will be employed in research related jobs in their field.

Student Learning Outcomes/Objectives

SLO 1: Form a clear, useful, and practical research query (G: 1, 2) (M: 1, 2)
Students will be able to develop a research idea into a query that is clearly stated, that has a useful place in the extant literature, and that can be practically addressed through research.

Strategic Plan Associations

3.1 Enhance a research culture.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
5.4 Enhance the global competency of students, faculty and staff.
5.5 Other efforts in support of Goal 5 (Globalizing the University).

SLO 2: Review and critique the research literature (G: 1, 2) (M: 1)
Students will able to write a review and critique the literature related to a study and the various methodological approaches.

Strategic Plan Associations

2.1 Expand support for doctoral programs.
3.1 Enhance a research culture.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).
5.4 Enhance the global competency of students, faculty and staff.
5.5 Other efforts in support of Goal 5 (Globalizing the University).

SLO 3: Design a research study (G: 1, 2) (M: 1)
Students will be able to: (1) select an appropriate design for addressing a research query; (2) to choose an appropriate population from which to sample; (3) choose an appropriate sampling technique for the intended level of generalizability; (4) operationalize all variables of interest, including, as applicable, the selection of measurement instruments intended to gather data on said variable(s); (5) craft an appropriate procedure for data collection; (6) write a professional-level Method section of a research report, describing the above aspects of a design.

Strategic Plan Associations

2.1 Expand support for doctoral programs.
3.1 Enhance a research culture.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
5.4 Enhance the global competency of students, faculty and staff.

SLO 4: Analyze data and report the results (G: 1, 2) (M: 1)
Students will be able to: (1) recognize an appropriate technique for analyzing data, given the research query and the design used to collect the data; (2) conduct the analysis(es) appropriate for the research query and the design used to collect the data; (3) interpret and report on the results of the analysis(es) appropriate for the research query and the design used to collect the data.

Strategic Plan Associations

2.1 Expand support for doctoral programs.
3.1 Enhance a research culture.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
5.4 Enhance the global competency of students, faculty and staff.
5.5 Other efforts in support of Goal 5 (Globalizing the University).

**Measures, Targets, and Findings**

**M 1: Committee/Advisor evaluation of master’s thesis/project/product (O: 1, 2, 3, 4)**
All faculty will use a 3 point scaled rubric and analytic guide as the tool to measure students’ performance on the final master’s research thesis/project/product.

Source of Evidence: Project, either individual or group

**Target for O1: Form a clear, useful, and practical research query**
85% of the students will meet the expectations 15% will exceed

**Target for O2: Review and critique the research literature**
85% of the students will meet the expectations 15% will exceed

**Target for O3: Design a research study**
85% of the students will meet the expectations 15% will exceed

**Target for O4: Analyze data and report the results**
85% of the students will meet the expectations 15% will exceed

**M 2: Thesis/Project (O: 1)**
This outcome will be evaluated using a rubric and analytic guide.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Plans for data collection**
This program will officially begin its implementation process in Spring 2013. Plans for its evaluation are being put in place for this the first cohort of students who have enrolled in the program.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** The members of the department are coming together to create and design rubric and analytical frameworks that can be used to evaluate the outcomes of the program.
- **Projected Completion Date:** 05/2015
- **Responsible Person/Group:** Dr. Chris O'Shima

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Respiratory Therapy BS**

*As of: 12/12/2016 04:42 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**
The Bachelor of Science Program in Respiratory Therapy major is designed for students entering the respiratory therapy profession. Our mission is to provide a rigorous and comprehensive undergraduate education in the science of respiratory care that results in graduates who have the knowledge and analytical skills necessary to deliver respiratory care to patients who have breathing or other cardiopulmonary disorders.

**Goals**

**G 1: Critical and Ethical Thinkers**
To develop a deep and broad understanding of respiratory care content based on sound clinical decision making.

**G 2: Professional Issues in Respiratory Care**
To be aware of and concerned about being well-informed regarding the issues and factors affecting the professional practice of respiratory care.

**G 3: Positions of Leadership**
Students are prepared for leadership positions in healthcare settings where respiratory care is practiced

**Student Learning Outcomes/Objectives**
### SLO 1: Communication Skills (G: 1) (M: 1, 2)

In order to discern that our students are critical and ethical thinkers, students will be able to: 1. communicate orally by presenting a patient case study to the faculty and their peers at least once while in the program which is logically organized and based on data found in medical records and/or oral interviews. 2. communicate in writing using medical terminology by addressing patient care plans to improve patient outcomes.

#### General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

#### Institutional Priority Associations

1. Student retention
2. Student promotion and progression
3. Timely graduation

#### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of educational support services (3.3.1.3)

#### Strategic Plan Associations

1.1 Increase the level of scholarship support for undergraduate students.
1.2 Establish a Student Success Center.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

### SLO 2: Critical Thinking in Respiratory Therapy (G: 1, 2, 3) (M: 1, 3, 4)

Students are to think logically and in meaningful ways so that their actions reflect their critical thinking.

#### General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

#### Institutional Priority Associations

1. Student retention
2. Student promotion and progression
3. Timely graduation

#### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

#### Strategic Plan Associations

1.1 Increase the level of scholarship support for undergraduate students.
1.2 Establish a Student Success Center.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.
SLO 3: Registry Credential (G: 3)

To prepare for leadership positions in healthcare settings, students will demonstrate mastery of advanced level respiratory care knowledge.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

General Education/Core Curriculum Associations

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4 Outcomes of research (3.3.1.4)

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.4 Enhance supporting infrastructure for the conduct of research.
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

Measures, Targets, and Findings

M 1: Case Presentation (O: 1, 2)

Case presentations allow students to actively learn in their discipline while solving problems similar to ones they will encounter in the real world when they graduate. This requires students to draw upon their abilities to manage time while synthesizing information by organizing relevant information and discarding information that is not useful. To demonstrate mastery of this goal, all students will successfully orally present a case study to the faculty and students at least once during the clinical seminar as part of their clinical practice rotations.

Source of Evidence: Presentation, either individual or group

Target for O1: Communication Skills

80% of students will achieve a minimum grade of 90% on their assigned oral case presentation based on a standard rubric used by the faculty.

Findings 2011-2012 - Target: Partially Met

During fall semester 2011, 15 students were evaluated during clinical seminar. Grades ranged from 71% to 98%. 70 is the highest score based on rubric used by faculty but is calibrated to 0 to 100% score for grading purposes. Average score was 91% with 10 out of 15 (66%) meeting the target score. For spring semester 2012, 16 students out of 21 (76%) achieved 90% or higher. Scores ranged from 75% to 98% with the average score = 92%. During summer 2012, 20 students were evaluated during clinical seminar. Grades ranged from 70% to 100%. 17 students out of 20 (85%) scored 90% or higher with the average score =94%.

M 2: Capstone Course (O: 1)

RT 4085 is a critical thinking through writing capstone course that concentrates on a series of reflective assignments designed to allow the senior student to demonstrate improvement in critical thinking and writing skills.

Source of Evidence: Capstone course assignments measuring mastery

Target for O1: Communication Skills

Students will achieve a passing grade on a written assignment of a professional issue during RT 4085 based on approved rubric by CTW.

Findings 2011-2012 - Target: Met

Student initial scores on a professional issue paper ranged from 60 to 100. After three revisions allowed lowest grades improved from 60 to 90.

M 3: NBRC Entry Level CRT (O: 2)
All students must successfully pass the National Board for Respiratory Care (NBRC) Certified Respiratory Therapist exam to demonstrate cognitive mastery of entry level skills. This exam allows for licensure in the State of Georgia. Provided in web-based format. For this assessment, evidence will focus on one competency from the exam which on the test matrix is: Maintain Records and Communicate Information. This competency includes the following: record therapy and results using conventional terminology as required by the health care setting and/or regulatory agency; specify therapy administered which includes date, time, frequency of therapy, medication, and ventilatory data; note and interpret patient’s response to therapy, effects of therapy, adverse reactions, patient’s subjective and objective response to therapy; verify computations and note erroneous data, auscultatory findings, cough and sputum production and characteristics, vital signs, and pulse oximetry, heart rhythm, capnography readings.

Source of Evidence: Certification or licensure exam, national or state

**Target for O2: Critical Thinking in Respiratory Therapy**

90% of students will score 80% or higher on this competency.

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>29 of 29 students (100%) passed the CRT on first attempt. From review of the score report, national first-time passing rate is 79% and % of national average for this program is 129%. RT students average score on this competency was 4.07 while the national average was 3.59. The highest possible scores was 5.0. 27 of 29 (93%) students scores were 80% or higher. GSU average score for this exam is 86%, national mean score is 80%.</td>
</tr>
</tbody>
</table>

**M 4: NBRC Written Registry Exam (O: 2)**

All students must successfully pass the National Board for Respiratory Care (NBRC) Written Registry Exam to demonstrate cognitive mastery of advanced-level skills. Provided in web-based format. For this assessment, evidence will focus on one competency from the exam which on the test matrix is: Maintain Records and Communicate Information. This competency includes the following: record therapy and results using conventional terminology as required by the health care setting and/or regulatory agency; specify therapy administered which includes date, time, frequency of therapy, medication, and ventilatory data; note and interpret patient’s response to therapy, effects of therapy, adverse reactions, patient’s subjective and objective response to therapy; verify computations and note erroneous data, auscultatory findings, cough and sputum production and characteristics, vital signs, and pulse oximetry, heart rhythm, capnography readings.

Source of Evidence: Standardized test of subject matter knowledge

**Target for O2: Critical Thinking in Respiratory Therapy**

90% of students will score 80% or higher on the WRRT matrix item III.A. as determined by the National Board of Respiratory Care.

<table>
<thead>
<tr>
<th>Findings 2011-2012 - Target: Partially Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>28 of 29 or 97% passed the WRRT on the first attempt. From review of the score report, the average score on this competency was 3.17 with the national average at 2.75. For this competency, 4.0 was the highest possible score. Two students scored 1, 5 students score 2. All other students scored 3 or above. 22 of 29 (76%) students scored 80% or higher.</td>
</tr>
</tbody>

GOOD 9 Points Fair 8 Points POOR 7 Points Power Point Presentation Score Presentation is clear, concise and easily follows oral presentation. Does not deviate from content. Follows PowerPoint presentation majority of the time with minimal deviation from content. Follows PowerPoint presentation most of the time with some deviations from content. Fails to follow PowerPoint presentation with excessive deviation from content. Visual Aids Score — All illustrations such as diagrams, tables, charts, x-rays, and other illustrations are appropriate for content presentation. Most illustrations such as diagrams, tables, charts, x-rays, and other illustrations are appropriate for content presentation. Some are inappropriate. Most illustrations such as diagrams, tables, charts, x-rays or illustrations were inappropriate for content presentation. Organization Score — Excellent flow and transition from topic to topic. Very organized and refers to slides or other notes appropriately. Does not read slides verbatim. Good flow and transition from one topic to topic. Organized and refers to slides or other notes appropriately. Does not read from slides most of the time. Some difficulty with flow and transition from topic to topic. Disorganized and refers to notes inappropriately. Reads verbatim from the slides most of the time. Poor flow from topic to topic. Very disorganized and reads constantly from notes or slides. Reads verbatim from the slides all the time. Content Knowledge Score — Demonstrates full understanding of the topic. Answers questions appropriately. Demonstrates good understanding of the topic. Answers majority of questions correctly. Demonstrates some understanding of parts of the topic. Answers most questions correctly. Does not seem to understand the topic very well. Unable to answer questions correctly. Presentation and Professionalism Score — Is professional in delivery; looks confident; establishes eye contact. Presents with clear voice and excellent pronunciation. Everyone can hear the presentation. Well dressed. Slightly nervous and less confident. Establishes eye contact. Presents with clear voice and excellent pronunciation. Everyone can hear the presentation. Well dressed. Seems nervous. Establishes eye contact but not confident. Some difficulty with precise pronunciation and
hearing presentation. Well dressed. Very nervous, does not make eye contact and lacks confidence. Difficult to understand presentation with imprecise pronunciation and cannot hear presentation. Inappropriate dress.

NBRC WRRT Exam
Review this section of the exam in RT 4075/7075 which is a review course for the WRRT. New written computer tests purchased. Also have students take computer tests and identify areas of weakness. Tests allow students to test over specific areas of weakness. Students take computer WRRT exam and review these questions with the students in class.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: NBRC Written Registry Exam | Outcome/Objective: Critical Thinking in Respiratory Therapy

Projected Completion Date: 04/2013

Student case presentation activity
Prior to students presenting oral case study they will meet with assigned faculty to review the case study and faculty will identify any needs by the student. Power point slides will be reviewed for errors that would reduce the overall score of the case study presentation as well as any errors in data reporting and formatting. The faculty will also offer guidance by showing the student an example of a case study with a high grade and one with a lower grade and point out the inconsistencies to cause the lower grade. Further assistance can be obtained from senior students and provide examples of case studies that were previously presented.

Director of Clinical Education and Medical Director will continue to present lecture on how to present a case study at the beginning of the semester for new students.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium
**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process have your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

For Measures and Findings-Case Presentation, Target Change: 90% of students will achieve a minimum grade of 90% on their assigned oral case presentation based on a standard rubric used by the faculty to: Current: 80% of students will achieve a minimum grade of 90% on their assigned oral case presentation based on a standard rubric used by the faculty. This target was changed because after reviewing the outcome of this target since 2009 the target was seldom achieved although close in some cases. It is difficult to see first year students presenting a complex medical case study and have 90% of the students achieve 90% or better. Student's presenting for the first time are nervous and are unsure of themselves in front of a large class with faculty and physicians in attendance. Some students achieved between 85 and 89% on the first case study which is very good. We will monitor for this next year. The faculty will review the grading rubric for the clinical case study and make changes as necessary.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data obtained from assessment findings indicate there is no need for curriculum revision, course changes or sequencing. The program has one of the highest passing rates on national exams in the country.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

A rubric was developed and revised for case study presentation over the past 3 years. Each faculty member had input into this process. Also each faculty member is given a student that will be presenting a case study in order to help the student in his/her presentation. This has improved the scores of the case study and made the student feel more comfortable in the presentation. Reviewing the complex nature of the clinical case study and letting the student know what is most important during the presentation has given the student a more confident presentation and presence. No other changes were made.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

We keep close observation on many of the assessments found in this report and the faculty will make changes from semester to semester as needed. Changes that were made have a positive effect on the student (case study presentations). Change were made to help students feel more confident taking national exams with purchase of more sample exams and reviewing the exams especially areas that the student failed. This resulted in a higher passing rate for the class. The departments changes when needed were effective in either achieving or partially achieving targets.

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

We will monitor the passing scores for student case study evaluations. Our goal is to meet our target for this measure and finding for this year and to continue to refine the case study presentation process. We anticipate we will meet the set target for case studies and for the NBRC national exams.
respiratory care.

**G 3: Leadership and educational positions**
Students are prepared for leadership positions in health care settings or for educational positions in academic institutions.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Communication in respiratory care (M: 1, 2)**
In order to discern that our students are critical and ethical thinkers, our students will be able to: 1) communicate orally by presenting a patient case study to the faculty and their peers at least once while in the program which is logically organized and based on data found in medical records and/or oral interviews OR through debates on issues affecting the practice of respiratory care. 2) communicate in writing to improve critical thinking skills in the discipline through problem solving by addressing issues affecting the practice of respiratory care.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Institutional Priority Associations**
1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
3 Outcomes of educational support services (3.3.1.3)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 2: Critical thinking in the application of research (M: 2)**
An entry-level understanding and interdisciplinary approach to the design, interpretation and ethical conduct of research.

**SLO 3: Understanding Health Policy in the United States (M: 3)**
Evaluate contemporary principles in health policy in the US and other countries to better understand the essential components of delivering health services.

---

**Measures, Targets, and Findings**

**M 1: Understanding advanced topics in respiratory care (O: 1)**
Students will be able to demonstrate their knowledge through debates, case presentations or projects presented orally or through end-of-semester writing assignments in the core master’s curriculum (RT 7030).

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Communication in respiratory care**
All graduate students must complete oral presentation and written presentation assignments in core master's curriculum (RT 7030).

**Findings 2011-2012 - Target: Met**
All current entry-level integrated master’s students have completed oral presentations and written presentations as required in RT 7030.

**M 2: Demonstrate appreciation for the research process (O: 1, 2)**
Either through thesis or graduate project, oral communication and writing skills competence by faculty evaluation during thesis defense or presentation of project.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Communication in respiratory care**
Successful oral defense of thesis study to thesis committee members or directed study project to directed study project committee members.

**Findings 2011-2012 - Target: Met**
Seven students completed thesis research successfully.

**Target for O2: Critical thinking in the application of research**
Graduate students will complete either a thesis or project.

**Findings 2011-2012 - Target: Met**
Of total of 10 MS students in 2011-2012 academic year, 5 completed thesis and 5 complete a project.

**M 3: Understanding Health Policy in the US (O: 3)**
Students will show mastery of contemporary concepts by participation is class discussions, debates, and successful completion of final written exam in HHS 8000 - Trends affecting Health Policy.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Understanding Health Policy in the United States**
Master’s students will complete the final exam in HHS 8000 which is a comprehensive assessment of Health Policy in the US with at least a score of 80% or higher.

**Findings 2011-2012 - Target: Met**
Six students successfully completed HHS 8000 with scores higher than 80%.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Rubric Development**
Continue development of rubric for evaluation of thesis proposals.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Demonstrate appreciation for the research process
- Outcome/Objective: Critical thinking in the application of research

Projected Completion Date: 06/2012
Responsible Person/Group: RT Faculty

**Thesis option**
At least 75% of graduate students will choose thesis option as opposed to project option for completion of master's degree.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Demonstrate appreciation for the research process
- Outcome/Objective: Critical thinking in the application of research

Projected Completion Date: 07/2010
Responsible Person/Group: RT Faculty
Additional Resources: Will track for need for additional faculty member to assist with thesis advisement and course work.

**Appreciation of the thesis process**
Thesis advisement can be time consuming. Many of the MS students are international students in which English is not their first language. Faculty are reviewing GRE scores to determine if higher verbal scores should be required. Along with the newly required statistics course, students will be advised starting in the first term of study with the literature course being moved from summer semester (3rd semester of program) to spring semester (2nd semester of program) to provide more time for topic development and literature review. Will also monitor for the need for an additional graduate courses and the need for an additional faculty member in respiratory care to assist with thesis advisement and teaching of master's courses.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Demonstrate appreciation for the research process
- Outcome/Objective: Critical thinking in the application of research

Responsible Person/Group: Robert Harwood

**HHS 8000**
Will continue to monitor. Consider another method of measurement since instructor in respiratory therapy no longer teaching course.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Understanding Health Policy in the US
- Outcome/Objective: Understanding Health Policy in the United States

Responsible Person/Group: Robert Harwood
Thesis research and project advisement
A new statistics course was developed and offered for the first time during spring semester 2011. Students who express interest in thesis research are required to take this course in order to complete thesis option. Students who plan to complete the project option are not required but are advised to consider completing course.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Demonstrate appreciation for the research process | Outcome/Objective: Communication in respiratory care
  Measure: Critical thinking in the application of research

Responsible Person/Group: Robert Harwood

Understanding advanced topics in respiratory care
Oral and written communication will continue to be a high priority. Faculty assigned to core curriculum courses will continue to assign patient case studies, literature reviews, and debates that require a higher level of problem solving and discernment of ideas.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Demonstrate appreciation for the research process | Outcome/Objective: Communication in respiratory care
  Measure: Understanding advanced topics in respiratory care | Outcome/Objective: Communication in respiratory care

Implementation Description: Will continue to monitor
Responsible Person/Group: Robert Harwood
Additional Resources: none

Development of thesis and project rubic
Develop a rubric thesis and project so as to be consistent in grading and importance of project.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Demonstrate appreciation for the research process | Outcome/Objective: Communication in respiratory care

Projected Completion Date: 12/2012

Evaluate rubic for oral and written assignment in RT 7030
Continue to have students complete an oral presentation and a written assignment in RT 7030 and be graded with developed rubics. We will evaluate the rubics to assure consistency in the oral and written assignments and assure the student is achieving the stated goal.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Understanding advanced topics in respiratory care | Outcome/Objective: Communication in respiratory care

Projected Completion Date: 05/2012

SNHP 8000
Plan this year is to meet with faculty to discuss another course to meet this finding.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Understanding Health Policy in the US | Outcome/Objective: Understanding Health Policy in the United States

Projected Completion Date: 05/2012

Georgia State University
Assessment Data by Section
2011-2012 Risk Management & Insurance (Mathematical Risk Management) MS

Mission / Purpose
The MS RMI degree with a Specialization in Mathematical Risk Management (MRM program) prepares students for careers in quantitative risk management and financial engineering positions emphasizing risk management. Graduates will be qualified for positions in a variety of organizational settings including financial institutions, risk management consultancies, and in the treasury departments of non-financial corporations. The program achieves these goals by emphasizing the application of mathematics in economics and finance to address contemporary risk management problems through the appropriate diagnosis, analysis, pricing,
and customization of solutions to risk management problems and opportunities broadly defined to include both financial and operational risk exposures. The MRM program differentiates itself from an MBA with a concentration in Risk Management and Insurance through: More rigorous coverage of mathematical and statistical theory, The development of programming skills in a variety of programming languages and econometric software, and Specific emphasis on the development of modeling skills of the financial and operational risk exposures of both of traded and non-traded assets and liabilities, asset-backed securities, and other complex financially engineered assets.

**Goals**

**G 1: Students will develop technical expertise in specified areas**
Students will develop an adequate level of technical expertise in the areas of financial economics, insurance economics, actuarial science and modern risk management theory.

**G 2: Students will quantify and analyze stochastic risk exposures**
Students will be able to quantify and analyze a variety of stochastic risk exposures.

**G 3: Students will determine value of assets and liabilities**
Students will be able to determine the value of assets and liabilities and document various associated risks.

**G 4: Students will develop integrated risk management models**
Students will be able to develop firm-wide integrated risk management models and identify and manage the limitations associated with the models.

**Student Learning Outcomes/Objectives**

**SLO 1: Mathematical and statistical theory expertise (G: 1, 2) (M: 1, 2)**
The MS-RMI (MRM) graduate will have the technical expertise in mathematical and statistical theory to quantify and analyze various financial and operational stochastic risk exposures.

**General Education/Core Curriculum Associations**

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

**Institutional Priority Associations**

3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

**SLO 2: Economic and financial theory expertise (G: 1, 3) (M: 3)**
The MS-RMI (MRM) graduate will have the technical expertise in economic and financial theory to determine the value of traded and non-traded assets and liabilities and to document the risks associated with the securities.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

**Institutional Priority Associations**

3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

**SLO 3: Development of firm-wide integrated risk management models (G: 1, 2, 4) (M: 4, 5)**
The MS-RMI (MRM) graduate will be able to draw upon theory from financial economics, insurance economics, actuarial science and modern risk management to develop firm-wide integrated risk management models capable of analyzing the costs and opportunities of a firm's various risk exposures. Students will be able to: 1. Recommend the risks that should be managed and the tools available that will most efficiently achieve the firm's objectives 2. Identify the limitations of the models and therefore the associated risks of those limitations along with strategies to manage these exposures.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
Measures, Targets, and Findings

### M 1: Exams in MRM 8320 (O: 1)

Each student will demonstrate expertise in the quantification and analysis of operational stochastic risk exposures through responses to selected questions from course exams in MRM 8320 Introduction to Stochastic Risk Management Models.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Mathematical and statistical theory expertise**

A 2.0 average on all criteria. Measurement will be done by applying the Measure One Rubric to a random sample of student exams submitted during each evaluation period.

**Findings 2011-2012 - Target: Met**

To measure this objective, we used the results of exams and projects evaluated in MRM 8320. The Midterm exam and Project grades are used to measure Criteria No. 1 (Demonstrate Mathematical Expertise to Quantify Operational Stochastic Risk Measures), and the Final exam grades are used to measure Criteria No. 2 (Demonstrate Mathematical Expertise to Analyze Operational Stochastic Risk Exposures). It must be noted that the data for MRM8320 and MRM8610 is based on an entire class sample, which aside from MRM majors includes AS majors. The results, based on criteria related to the Measure One Rubric are as follows: Fall 2011: Criterion No. 1: 3.03% of students failed to meet the standard (score = 1.0); 12.12% of students met the standard (score = 2.0); 84.85% exceeded the standard (score = 3.0) Criterion No. 2: 3.03% of students failed to meet the standard (score = 1.0); 9.09% of students met the standard (score = 2.0); 87.88% exceeded the standard (score = 3.0) Fall 2010 Criterion No. 1: 3.03% of students failed to meet the standard (score = 1.0); 21.12% of students met the standard (score = 2.0); 75.76% exceeded the standard (score = 3.0) Criterion No. 2: 0% of students failed to meet the standard (score = 1.0); 3.03% of students met the standard (score = 2.0); 96.97% exceeded the standard (score = 3.0)

**SUMMARY:** The majority of students met the criteria, and the tendency is increasing. Insofar as MRM8320 contributes to the overall objectives of the program, we do not think further action is required.

### M 2: Selected student projects in ECON 8780 (O: 1)

Through performance on selected projects in ECON 8780 Financial Econometrics, each student will demonstrate technical expertise in mathematical and statistical theory to quantify and analyze various financial stochastic risk exposures.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Mathematical and statistical theory expertise**

A 2.0 average on all criteria. Measurement will be done by applying the Measure Two Rubric to a random sample of student projects submitted during each evaluation period.

**Findings 2011-2012 - Target: Met**

Findings, as follow, are based on criteria related to the Measure Two Rubric: Criterion No. 1: Demonstrate mathematical expertise to quantify financial stochastic risk exposures 2010: 10% of students failed to meet the standard (score = 1.0); 70% of students met the standard (score = 2.0); 20% of students exceeded the standard (score = 3.0) 2011: 10% of students failed to meet the standard (score = 1.0); 75% of students met the standard (score = 2.0); 15% of students exceeded the standard (score = 3.0) 2012: 5% of students failed to meet the standard (score = 1.0); 80% of students met the standard (score = 2.0); 15% of students exceeded the standard (score = 3.0) Outcomes are measured by the students' performance on the homework assignments and the in-class, closed-book exam. The exam verifies the students' understanding of econometric theory and methods used to model financial risks. In particular, the exam covers the modeling of univariate and multivariate distributions, copulas, basic time-series models, and time-varying conditional and correlation modeling. Criterion No. 2: Demonstrate mathematical expertise to analyze financial stochastic risk exposure 2010: 0% of students failed to meet the standard (score = 1.0); 90% of students met the standard (score = 2.0); 10% of students exceeded the standard (score = 3.0) 2011: 5% of students failed to meet the standard (score = 1.0); 85% of students met the standard (score = 2.0); 10% of students exceeded the standard (score = 3.0) 2012: 0% of students failed to meet the standard (score = 1.0); 85% of students met the standard (score = 2.0); 15% of students exceeded the standard (score = 3.0) Outcomes are measured according to the final project, which consists of developing, estimating, and backtesting practical models for financial risk forecasting. Specifically, the students are asked to develop a methodology that describes the time-varying conditional dependence structure among financial asset returns. The resulting models are used to forecast tail-risk measures associated with portfolios of those assets. The empirical performance of these forecasts is analyzed and backtested using formal statistical procedures. **SUMMARY:** The majority of the students meet the criteria, and the tendency not decreasing. Insofar as ECON8780 contributes to the overall objectives of the program, we do not think further action is required.

### M 3: Projects and exams in MRM 8610 (O: 2)

Through performance on selected projects and exam questions in MRM 8610 Financial Engineering, each student will demonstrate the technical expertise in economic and financial theory to determine the value of traded and non-traded assets and liabilities and to document the risks associated with the securities.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O2: Economic and financial theory expertise**

A 2.0 average on all criteria. Measurement will be done by applying the Measure Three Rubric to a random sample of projected
and selected exam responses submitted during each evaluation period.

**Findings 2011-2012 - Target: Partially Met**

Findings are based on criteria from the Measure Three Rubric as follows: The assessment of Criterion 1 (“Value Non-Traded Assets and Liabilities”) is based on Question 2a/b of the Spring 2012 final project. The assignment is to evaluate a long term asset-linked insurance contract with option feature. Residual risks are studied in Question 2c/d of the Spring 2012 final project. Thus, these results are used for evaluating Criterion 2 (“Document Risks Associated with Non-Traded Assets and Liabilities”). Criterion No. 1: 11% of students failed to meet the standard (score = 1.0); 32% of students met the standard (score = 2.0); 57% of students exceeded the standard (score = 3.0) Criterion No. 2: 35% of students failed to meet the standard (score = 1.0); 46% of students met the standard (score = 2.0); 19% of students exceeded the standard (score = 3.0) Criterion 3 (“Value Traded Assets and Liabilities”) is evaluated based on Question 1a/c of the Spring 2012 final project. The focus here is on valuing derivatives in complete securities markets managing exposures via Delta and Delta/Vega-Hedging. Criterion No. 3: 24% of students failed to meet the standard (score = 1.0); 54% of students met the standard (score = 2.0); 22% of students exceeded the standard (score = 3.0) Criterion 4 (“Document Risks Associated with Traded Assets and Liabilities”) is based on Question 1b of the Spring 2012 final project. Here, students analyze the impact of volatility risk on the profit/loss distribution. Criterion No. 4: 11% of students failed to meet the standard (score = 1.0); 51% of students met the standard (score = 2.0); 38% of students exceeded the standard (score = 3.0) SUMMARY: While the number of students failing Criterion 3 appears high, this is primarily a result of the complexity of problem 1c (Vega-hedging). If the assessment were based solely on question 1a, all students would meet the standard. Therefore, we believe the concept was well understood and no action is required. For Criterion 2, 36% of students failing to meet the standard is excessive. The instructor will emphasize the role of other risk factors in non-traded beyond market risk the next time he teaches the class in the Spring of 2013.

**Target for O3:** Development of firm-wide integrated risk management models

**M 4: Selected student case work in RMI 8370 (O: 3)**

Through performance on selected case work in RMI 8370 Financial Risk Management, each student will demonstrate the ability to recommend appropriately the risks that should be managed and the tools available that will most efficiently achieve the firm's objectives.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Development of firm-wide integrated risk management models**

A 2.0 average on all criteria. Measurement will be done by applying the Measure Four Rubric to a random sample of student case work submitted during each evaluation period.

**Findings 2011-2012 - Target: Met**

This assessment is based on a review of exams and cases relating to the two criteria: (1) Identify appropriate risks to be managed and (2) recommend appropriate tools of the Measure Four Rubric. The second criteria is tested in exams, in which students are asked to assess the hedging suitability of different derivative instruments in different situations. The first is tested more extensively in cases. In particular, groups of students are given extensive risk identification exercises in the United Grain Growers case and the Enron case, and all of the other cases feature risk identification at some level. The assessment is based on a review of student performance on exams and cases in 2011 and 2012. For the two criteria, approximately 16% of RMI 8370 students failed to meet the standard (score = 1.0); 21% met the standard (score = 2.0); and 53% exceeded the standard (score = 3.0). The majority of the students meets or exceeds the standards. Insofar as ECON8780 contributes to the overall objectives of the program, we do not think action is required.

**Target for O3: Development of firm-wide integrated risk management models**

**M 5: Selected projects in MRM 8620 (O: 3)**

Through performance on selected projects in MRM 8620 Quantitative Financial Models, each student will demonstrate the ability to identify the limitations of the risk management models and therefore the associated risks of those limitations along with strategies to manage these exposures.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Development of firm-wide integrated risk management models**

A 2.0 average on all criteria. Measurement will be done by applying the Measure Five Rubric to a random sample of projects submitted during each evaluation period.

**Findings 2011-2012 - Target: Met**

Findings are based on criteria related to the Measure Five Rubric as follows: Criterion 1 (“Identify the Limitations of Risk Management Models”) is evaluated based on Projects 1, 2, and 3. Project 1 deals with portfolio selection in the presence of parameter uncertainty, Project 2 discusses the estimation of asset pricing models (CAPM and extensions) based on different econometric approaches, and Project 3 asks students to estimate risk-neutral densities based on different Vanilla option prices. All three projects demonstrate the level of parameter and model risk. All students met the standard and the vast majority exceeded the standard. Average percentage scores are listed below: Spring 2010: 93% of students met the standard (score of 2.0 or greater); Spring 2011: 91% of students met the standard (score of 2.0 or greater) Spring 2012: 98% of students met the standard (score of 2.0 or greater) Project 2 (“Recommend Appropriate Strategies to Manage Identified Limitations of Risk Management Models”) is evaluated based on Project 4. Here, a complex (Asian) option is hedged using the underlying as well as a simple vanilla option in a model with stochastic volatility. It demonstrates that alternative instruments can be used to safeguard against risks in more general frameworks. All students met the standard and the vast majority exceeded the standard. Average percentage scores are listed below: Spring 2010: 88% of students met the standard (score of 2.0 or greater) Spring 2011: 91% of students met the standard (score of 2.0 or greater) Spring 2012: 94% of students met the standard (score of 2.0 or greater) SUMMARY: All students met the criteria, and the tendency is not decreasing. Insofar as MRM8620 contributes to the overall objectives of the program, we do not think action is required.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continue retention of exams/projects**

Continue to retain selected student exams and projects for four years. Aggregate increasing collection of annual data until achieve four-year data sample. Maintain rolling four-year data sample thereafter.
Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since we have not completed an assessment report last year and the format changed since the previous assessment, the first part of the question is not applicable. In view of changes to the assessment process in the following year, after going through this assessment round, the program directors will ask the course instructors to better monitor the criteria while teaching their classes (rather than assessing them ex-post).

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have an annual internal assessment of our program where we discuss of whether our courses are up to date. From this assessment, we identified two potential aspects of the curriculum where action may be required: Programming Boot Camp: Programming skills have become increasingly important for placing our graduates. While some students enter the program with basic (or even advanced) programming knowledge, others have little experience in this direction. To ascertain that all students are familiar with programming basics, we intend to offer a programming boot camp and make it mandatory for all students entering the program. We believe this will add tremendously to their education and will also allow us to teach our classes more effectively (since we can focus on algorithms rather than implementation details). We are already in the process of implementing this change, and we hope the first boot camp will take place in the summer of 2013. Should we replace MRM8620? MRM8620 ("Quantitative Financial Risk Modeling") was intended as a hands-on class that is taught in lockstep with MRM8610 ("Financial Engineering") and focuses on the implementation of the theoretical models there. However, since MRM8610 is also mandatory for our MAS students (who in fact present the majority of students in MRM8320, MRM8600, and MRM8610), a proper coordination proved difficult in the past since (1) implementation basics also need to be covered in MRM8610 and (2) partly as a consequence, important theoretical concepts for implementation from MRM8610 (e.g. changes of measure/risk-neutral pricing) are not introduced till relatively late in the semester. Furthermore, the programming boot camp will acquaint students with programming. Therefore, we question whether MRM8620 contributes to the program in an effective fashion. Instead, we propose to adjust the suggested course sequence by moving RMI8370 ("Financial Risk Management") to the Spring semester instead of MRM8620, but in turn offering MRM8620 in the (second) Fall in a restructured fashion. One possibility is to have MRM8620 and MRM8630 as separate classes on interest rate and credit risk, respectively. Currently, both aspects should be covered in MRM8630 although the limited time does not allow for a detailed treatment of credit risk. A separate class will allow to not only discuss conventional material such as such as the pricing of credit derivatives but to also discuss issues related to counterparty credit risk that are gaining increasing significance in the marketplace. Alternatively, we could leave MRM8630 as is but offer MRM8620 as a capstone seminar class with varying topics (akin to AS8810 in the MAS program). Possible topics include counterparty credit risk, calculation of capital requirements, or banking Economic capital models.
### Mission / Purpose
A substantially revised version of this program is in the midst of the approval process. An appropriate assessment plan will be prepared and implemented once the program revisions have been approved and implemented.

### Goals
G 1: See Mission/Purpose

### Student Learning Outcomes/Objectives
SLO 1: See Mission/Purpose (M: 1)

### Measures, Targets, and Findings
M 1: See Mission/Purpose (O: 1)
Source of Evidence: Academic direct measure of learning - other

**Target for O1: See Mission/Purpose**
Complete approval of revisions to program. Revise assessment plan in light of revised program. Implement revised assessment plan.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
**Program Revision Approval**
Achieve approval of program revisions. Revise assessment plan to match revised program. Begin implementation of revised plan.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** See Mission/Purpose
  - **Outcome/Objective:** See Mission/Purpose
- **Projected Completion Date:** 08/2010
- **Responsible Person/Group:** Richard Phillips and Marty Grace
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

---

### Georgia State University
**Assessment Data by Section**
**2011-2012 Risk Management & Insurance BBA**

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

### Mission / Purpose
BBA-RMI PROGRAM MISSION: The BBA in Risk Management and Insurance (RMI) is designed to prepare students to: (1) Apply quantitative models to the measurement of business risks, (2) Assess the hazard risks that are common to business organizations, (3) Apply the enterprise risk management process to managing risk in business organizations.

### Goals
**G 1: Quantify business risk using modeling tools**
Students will be able to quantify business risk by applying appropriate modeling tools.

**G 2: Assess common business risks**
Students will be able to assess the common property, liability and personnel risks of a business organization.

**G 3: Apply forecasting techniques to loss data**
Students will be able to apply forecasting techniques to loss data to project the future impact of risks on a business organization.

**G 4: Apply cash flow analysis to risk financing options**
Students will be able to apply cash flow analysis to risk financing options as an aid in decision-making.

**G 5: Explain and apply enterprise risk management process**
Students will be able to explain the enterprise risk management process and apply it to actual business situations through case
Student Learning Outcomes/Objectives

SLO 1: Identification and structuring of risky situations (G: 2, 3) (M: 1)
Students will be able to recognize risk and uncertainty and their impact on individual, business, and societal decision making. Pertinent risks include those related to the person and property, leverage, longevity, securing future consumption, and asset transfer. Students will be able to take an uncertain situation and determine the nature of the problem(s) to be solved.

SLO 2: Modeling risk using quantitative tools (G: 1, 2, 3, 4) (M: 1)
Students will be able to take an uncertain situation, and: (1) recognize mathematical, financial and/or statistical tools to be used in solving; and (2) use quantitative tools to model risks and craft alternatives to address them.

SLO 3: Comprehension of the business risk management process (G: 1, 2, 3, 4) (M: 2)
Students will have technical comprehension of the business risk management process, including the identification and evaluation of loss exposures, the analysis of the various risk control and financing techniques available to manage the exposures, decision making under conditions of uncertainty, control mechanisms to monitor the results of the risk management program.

SLO 4: Technical knowledge of the Enterprise Risk Management process (G: 1, 5) (M: 3)
Students will have theoretical and technical knowledge of the Enterprise Risk Management (ERM) process. Students will be able to identify and critically analyze the strategies that firms use to enhance corporate value through their risk management function.

Measures, Targets, and Findings

M 1: Performance on selected Projects in RMI 3750 (O: 1, 2)
Each student will demonstrate through performance on selected projects in RMI 3750 Probability Theory and Simulation Analysis in Risk Management an understanding of the sources of uncertainty in a business application.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O1: Identification and structuring of risky situations
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

Target for O2: Modeling risk using quantitative tools
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

M 2: Selected Projects and identified exam questions in RMI 4300 (O: 3)
Students will be given the task of identifying and prioritizing the hazard risks of a given business organization through the use of a Risk Mapping approach to risk assessment.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O3: Comprehension of the business risk management process
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of students during each 4-year evaluation period.

M 3: Selected case studies and exam questions in RMI 4350 (O: 4)
Each student will demonstrate through performance on selected case studies and exam questions in RMI 4350 Enterprise Risk Management theoretical and technical knowledge of the Enterprise Risk Management (ERM) process and the ability to identify and critically analyze the strategies that firms use to enhance corporate value through their risk management function.
Source of Evidence: Performance (recital, exhibit, science project)

Target for O4: Technical knowledge of the Enterprise Risk Management process
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category 1. Measurement will be done by applying the MEASURE THREE RUBRIC to a random selection of students during each 4-year evaluation period.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Assignments to include added focus on making recommendations and conclusions
RMI 4350 is a CTW course. Course assignments will be revised to focus more on providing the student with practice and feedback on making recommendations and conclusions.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective): Measure:Selected case studies and exam questions in RMI 4350 | Outcome/Objective: Technical knowledge of the Enterprise Risk Management process
Mission / Purpose

The Mission of the Bachelors of Business Administration (BBA) program is to provide broad general education and the core business knowledge and skills to prepare both traditional and non-traditional students for entry-level position in public, private, and not-for-profit organizations and to stimulate in students a desire for life-long learning.

This was actually established as the mission of the BBA program in the 2004-2005 cycle.

In the 2010-2011 AY the Robinson College undertook the development of a new strategic plan for the College that builds on the GSU strategic plan. In the Summer of 2011 a task force, building on the RCB strategic plan, began developing a set of recommendations to be made to the College Executive Committee that will significantly update the BBA program. It is anticipated that as a result of this larger process a new Mission Statement will emerge for the BBA program.

It is now expected that this process will be completed in the 2012-2013 Assessment cycle.

Goals

G 2: Communications Capabilities
Students graduating from the Robinson College of Business with a BBA degree will be effective business communicators.

G 1: Analysis Capabilities
Students graduating from the Robinson College of Business with a BBA degree will be effective and efficient business problem analysts in their major.

G 3: Team Work Capabilities
Students graduating from the Robinson College of Business with a BBA degree will be able to function effectively as team members.

G 4: Life-long Learning
Students graduating from the Robinson College of Business with a BBA degree will demonstrate a desire for life-long learning.

Student Learning Outcomes/Objectives

SLO 1: Effective Analytical Skills (G: 1) (M: 6)
Students will demonstrate analytical skills in solving business problems.

Relevant Associations:

General Education/Core Curriculum Associations
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 2: Effective Communication Skills (G: 2) (M: 4, 5, 7)
Students will demonstrate effective oral and written communication skills.

Relevant Associations:

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 3: Effective Use of Computer Technology (G: 1, 2) (M: 7)
Students will show the ability to effectively use and manage technology of business related purposes.

Relevant Associations:

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
Other Outcomes/Objectives

O/O 6: Ethics and Social Responsibility (G: 1, 4) (M: 8)
Students will incorporate dimensions of ethics and social responsibility in their decision making. Ethics and social responsibility captures a values concept that may be defined differently by different people. However, it is always part of an overall system of values that is grounded in an understanding of the beneficial role of business organizations in a society and the complementarities of ethical and social responsible action and the achievement of that role.

SLO 4: Effective Team Membership (G: 3) (M: 2, 3)
Students will show the ability to function as effective members of a team.

SLO 5: Appreciation of Life-long Learning (G: 4) (M: 1)
Students will exhibit a positive attitude toward continual learning upon completion of the BBA program.

Measures, Targets, and Findings

M 1: Further Education – Self Report (O: 5)
This measure reports the number of students anticipating continuing formal education after completion of their BBA degree.

Target for O5: Appreciation of Life-long Learning
Over 60% of students show an interest in continuing their formal education in some form in the future. Measurement will be done by looking at self report data entered for the Educational Testing Service's Business Test, which is administered to graduating seniors in their final semester.

Findings 2011-2012 - Target: Met
The seniors graduating in the Summer of 2011, Fall of 2011 and Spring of 2012 we all asked about their desire to continue their education. 791 out of the 1248 students graduating indicated a specific formal education goal beyond their BS degree. At 63.4% we have hit this goal for the first time based only on students who had made decisions about their future education. (This percentage does include in the denominator those students who did not respond to this question on the exit exam.) Another 7.8% of the students graduating indicated that they were undecided.

M 2: Ability to Work on Teams (O: 4)
Category for Evaluation Possible Scores 1 2 3 4 5 Quality of Work: Consider the degree to which the student team member provides work that is accurate and complete. Produces unacceptable work, fails to meet minimum group or project requirements. Occasionally produces work that meets minimum group or project requirements. Meets minimum group or project requirements. Regularly produces work that meets minimum requirements and sometimes exceeds project or group requirements. Produces work that consistently exceeds established group or project requirements. Timeliness of Work: Consider the student team member's timeliness of work. Fails to meet deadlines set by group. Occasionally misses deadlines set by group. Regularly meets deadlines set by group. Consistently meets deadlines set by group and occasionally completes work ahead of schedule. Consistently completes work ahead of schedule. Task Support: Consider the amount of task support the student team member gives to other team members. Gives task support to other members. Occasionally gives task support to other members. Occasionally provides task support to other group members. Consistently provides task support to other group members. Consistently gives more task support than expected. Measure 3 Interaction: Consider how the student team member relates and communicates to other team members. Behavior is detrimental to group. Behavior is inconsistent and occasionally distracts group meetings. Regularly projects appropriate team behavior including: listening to others, and allowing his/her ideas to be criticized. Consistently demonstrates appropriate team behavior. Consistently demonstrates exemplary team behavior. Attendance: Consider the student team member's attendance at the group meetings. (This includes in class meetings.) Failed to attend the group meetings. Attended 1%-32% of the group meetings. Attended 33%-65% of the group meetings. Attended 66%-99% of the group meetings. Attended 100% of the group meetings. Responsibility: Consider the ability of the student team member to carry out a chosen or assigned task, the degree to which the student can be relied upon to complete a task. Is unwilling to carry out assigned tasks. Sometimes carries out assigned tasks but never volunteers to do a task. Carries out assigned tasks but never volunteers to do a task. Consistently carries out assigned tasks and occasionally volunteers for other tasks. Consistently carries out assigned tasks and always volunteers for other tasks. Measure 2 Involvement: Consider the extent to which the student team member participates in the exchange of information (does outside research, brings outside knowledge to group). Fails to participate in group discussions and fails to share relevant material. Sometimes participates in group discussions and rarely contributes relevant material for the project. Takes part in group discussions and shares relevant information. Regularly participates in group discussion and sometimes exceeds expectations. Consistently exceeds group expectations for participation and consistently contributes relevant material to project. Leadership: Consider how the team member engages in leadership activities. Does not display leadership skills. Displays minimal leadership skills in team. Occasionally assumes leadership role. Regularly displays good leadership skills. Consistently demonstrates exemplary leadership skills. Overall Performance Rating: Consider the overall performance of the student team member while in the group. Performance significantly fails to meet group requirements. Performance fails to meet some group requirements. Performance meets all group requirements. Performance meets all group requirements consistently and sometimes exceeds requirements. Performance consistently exceeds all group requirements.

Target for O4: Effective Team Membership
We will have at least 80% of students achieving a 4.0.
M 3: Ability to Function in a Team Environment (O: 4)

Category for Evaluation Possible Scores 1 2 3 4 5 Quality of Work: Consider the degree to which the student team member provides work that is accurate and complete. Produces unacceptable work, fails to meet minimum group or project requirements. Occasionally produces work that meets minimum group or project requirements. Meets minimum group or project requirements. Regularly produces work that meets minimum requirements and sometimes exceeds project or group requirements. Produces work that consistently exceeds established group or project requirements. Timeliness of Work: Consider the student team member's timeliness of work. Fails to meet deadlines set by group. Occasionally misses deadlines set by group. Regularly meets deadlines set by group. Consistently meets deadlines set by group and occasionally completes work ahead of schedule. Consistently completes work ahead of schedule. Task Support: Consider the amount of task support the student team member gives to other team members. Gives no task support to other members. Sometimes gives task support to other members. Occasionally provides task support to other group members. Consistently provides task support to other group members. Consistently gives more task support than expected. Measure 3 Interaction: Consider how the student team member relates and communicates to other team members. Behavior is detrimental to group. Behavior is inconsistent and occasionally distracts group meetings. Regularly projects appropriate team behavior including: listening to others, and allowing his/her ideas to be criticized. Consistently demonstrates appropriate team behavior. Consistently demonstrates exemplary team behavior. Attendance: Consider the student team member's attendance at the group meetings. (This includes in class meetings.) Failed to attend the group meetings. Attended 1%-32% of the group meetings. Attended 33%-65% of the group meetings. Attended 66%-99% of the group meetings. Attended 100% of the group meetings. Responsibility: Consider the ability of the student team member to carry out a chosen or assigned task, the degree to which the student can be relied upon to complete a task. Is unwilling to carry out assigned tasks. Sometimes carries out assigned tasks but never volunteers to do a task. Carries out assigned tasks but never volunteers to do a task. Consistently carries out assigned tasks and occasionally volunteers for other tasks. Consistently carries out assigned tasks and always volunteers for other tasks. Measure 2 Involvement: Consider the extent to which the student team member participates in the exchange of information (does outside research, brings outside knowledge to group). Fails to participate in group discussions and fails to share relevant material. Sometimes participates in group discussions and rarely contributes relevant material for the project. Takes part in group discussions and shares relevant information. Regularly participates in group discussion and sometimes exceeds expectations. Consistently exceeds group expectations for participation and consistently contributes relevant material to project. Leadership: Consider how the team member engages in leadership activities. Does not display leadership skills. Displays minimal leadership skills in team. Occasionally assumes leadership role. Regularly displays good leadership skills. Consistently demonstrates exemplary leadership skills. Overall Performance Rating: Consider the overall performance of the student team member while in the group. Performance significantly fails to meet group requirements. Performance fails to meet some group requirements. Performance meets all group requirements. Performance meets all group requirements consistently and sometimes exceeds requirements. Performance consistently exceeds all group requirements.

Source of Evidence: Student course evaluations on learning gains made

Target for O4: Effective Team Membership
We will have at least 80% of students achieving a 4.0.

M 4: Oral Communications Skills (O: 2)

This measure contains three sub-parts that respectively look at the alignment of the material and method of the presentation with the audience, the synthesis and arrangement of the content presented, and the overall effectiveness of the student's oral presentation style and behavior. Measurement will be done by applying the Measure 4 Rubric to the final oral student presentations done as part of the BBA program's capstone course, BUSA 4980.

Source of Evidence: Presentation, either individual or group

Target for O2: Effective Communication Skills
On all three subs-parallel criteria we will have at least 80% of students achieving a 3.0. Measurement will be done by applying the Measure 4 Rubric to the final oral student presentations done as part of the BBA program's capstone course, BUSA 4980.

Findings 2011-2012 - Target: Not Met
Assessment was done on 127 graduating seniors presenting in their capstone BUSA 4980 class. A grid showing the raw number and percentage in each cell is linked here. The students were significantly below the target of 80% scoring at or above the 3.0 level on all three measures. Totals were 52.8%, 54.0% and 37.8% respectively. Please see grid for details on all cells.

M 5: Written Communication Skills (O: 2)

The rubric for this item was modified in the 2010-2011 cycle. The prior rubric as well as the current rubric are linked in the Document Repository. For this item the rubric titled "New Rubric of Assessment of CTW papers on Assessment Criteria for Written Communications" was used. For this item 33 students papers produced for the CTW classes in the Spring Semester of 2011 in the RCB were selected. Of these papers 32 were assessable using the rubric developed for this and other questions in assessment. The results of that assessment with the names removed are included in the results matrix for the 2010-2011 cycle and are linked here in the Document Repository.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Effective Communication Skills
On the effective writing criterion we will have at least 80% of students achieving a 3.0. Measurement will be done by applying the Rubric on Assessment Criteria for Written Communications to Critical Thinking through Writing assignments collected from the second (i.e. senior level) CTW designated class in each major in the Robinson College of Business.

Findings 2011-2012 - Target: Not Met
A total of 50 assignments were used in this assessment. 10 papers each were randomly drawn from 5 different senior-level CTW classes in 5 different departments of the RCB. 3 of the papers were deemed not usable for this purpose leaving 47 to be evaluated with the rubric. 9 papers, or 19.1% of the sample, were rated a 4, 25 papers, or 53.2% of the sample were rated 3. Thus, 72.3% of the papers were rated a 3 or higher. This is below the target of 80% for this measure. Another 11 papers or 23.4% were rated a 2 and 2 papers or 4.3% were rated a 1.

M 6: Effective Analytical Skills (O: 1)

The rubric for this item was modified in the 2010-2011 cycle. The prior rubric as well as the current rubric are linked in the Document Repository. For this item only the measure "Systematically & Logically Interpret Data" were used. For this item 32 students papers
produced for the CTW classes in the Spring Semester of 2011 in the RCB were selected. Of these papers 30 were assessable using the rubric developed for this and other questions in assessment. The results of that assessment with the names removed are included in the results matrix for the 2010-2011 cycle and are linked here from the Document Depository.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Effective Analytical Skills**

We will have at least 80% of students achieving a 3.0 on both sub-parts of the Assessment Criteria for Decision Making rubric first used in the 2010-2011 cycle.

**Findings 2011-2012 - Target: Not Met**

A total of 50 assignments were used in this assessment. 10 papers each were randomly drawn from 5 different senior-level CTW classes in 5 different departments of the RCB. Two dimensions are used in this rubric. The first looks at the student's ability to systematically and logically interpret data. On that dimension 6 students, or 12% were rated a 4 and 28 students or 56% were rated a 3. Thus, 68% of the students were rated a 3.0 or higher. This is below the 80% target for this measure. 14 of the remaining students, or 28% were rated a 2, and 2 students, or 4% were rated a 1. The second dimension of the rubric looks at the student's ability to reach conclusions that lead to recommendations. On this second dimension 3 students or 6% were rated a 4 and 23 students or 46% were rated a 3. Thus we had 52% of the students scoring at 3.0 or higher. This is below the target of 80%. Of the remaining students 18, or 36% of the total scored a 2 and 6 students, or 12% of the total scored a 1.

**M 7: Ability to Use Technology (O: 2, 3)**

To what extent did the BBA program enhance students’ ability to use technology? This will be measured by the students’ self-reported ability on the two questions of the Use and Manage Technology Factor on the Educational Benchmarking exit survey. Q 68 To what extent did the Business program enhance your Ability to use technology Q 68 To what extent did the Business program enhance your Ability to manage technology

Source of Evidence: Student satisfaction survey at end of the program

**Target for O2: Effective Communication Skills**

To earn a higher than average performance rating on the Educational Benchmarking exit survey when measured against ratings by students of all three groups of peer schools and improvement in absolute rating over prior year.

**Target for O3: Effective Use of Computer Technology**

On both of these questions students should score above the mean for the classifications of Select Six Peer Institutions, Carnegie Class Institutions, and All Participating Institutions. On both of these questions student scores will improve year-on-year.

**M 8: Ethics and Social Responsibility (O: 6)**

The students’ use of ethical and social responsibility considerations in the analysis and recommendations associated with a business problem will be assessed on the dimensions of the Ethics and Social Responsibility rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O6: Ethics and Social Responsibility**

80% of students will be at or above the "B" level on the rubric scoring of the case analysis. Grading Rubric for Ethics and Social Responsibility Dimension of Citic Pacific case. A = 5 = Integrated, comprehensive, and dynamic analysis; one that is rationally supported and effective. B = 4 = Working toward "A," but incomplete, some inconsistencies or misunderstandings; analysis has gaps, could be more effective. C = 3 = Working toward "B," but with weaknesses in many areas, major inconsistencies, or failure to properly address items needed for assignment completion. D = 2 = Case Analysis turned in, little else; poor or no analysis of merit, lacking rationale or analysis; poor understanding of corporate governance mechanisms and little or no effective effort to remedy. F = 1 = Failure to do assignment at threshold level. This is the old rubric as of 2012. Please see the new rubric loaded in the Document Repository.

**Findings 2011-2012 - Target: Partially Met**

Twenty-five papers were selected for this review in the Spring Semester of 2012. Five each were randomly taken from five different BUSA 4980 classes. All of these sections assign a common case for analysis, Citi Pacific. The assignment is on corporate governance. For this evaluation the evaluation was done along four measures in the new rubric.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Law and Ethics**

In the 2008-2009 AY the Undergraduate Steering Committee recommended the addition of a law and ethics component to the Learning Outcomes of the Undergraduate degree program and the Assessment process. In the next assessment cycle the following will be done: A Learning Outcome, Measurement Rubric, and Target Performance level will be established for the Undergraduate program Elements of law and ethics will be infused in the material in the capstone strategic management course, BUSA 4980. A case with significant law and ethics issues will be woven into the materials in the capstone strategy management course, BUSA 4980. An assessment of students’ performance on the law and ethics infused case will be made and based on the results the next set of steps will be taken to establish law and ethic orientations throughout the undergraduate curriculum.

**Established in Cycle: 2008-2009**

**Implementation Status:** Planned

**Priority:** High

**Relationships (Measure | Outcome/Objective):**

**Measure:** Ethics and Social Responsibility | **Outcome/Objective:** Ethics and Social Responsibility

**Projected Completion Date:** 04/2010

**Responsible Person/Group:** BUSA 4980 faculty, RCB Assessment committee, UG Steering Committee

**Additional Resources:** None

**Budget Amount Requested:** $0.00 (no request)
Communication Skills
The assessment process of 2008-2009 showed that Communication skills were not being effectively assessed. This was traced to two areas of concern 1) The quality of the activates, written and oral, being assessed were not of a high enough quality in terms of their suitability for being assessment vehicles, and 2) the rubrics developed for the assessments were not adequate. In the recommendations to the RCB Executive Committee communications initiatives that would significantly change the development of communication skills in RCB were presented under the charge that RCB students are “ready to execute.” Specifically the sub-committed recommended curricular changes that would: Develop, use, receive feedback on, and be evaluated on their oral presentation skills across the entire curriculum, not just in selected and isolated classes, Develop, use, receive feedback on, and be evaluated on their prose writing (not outlining or bullet-pointing) skills across the entire curriculum, not just in selected and isolated classes.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Ability to Use Technology | Outcome/Objective: Effective Communication Skills
- Measure: Oral Communications Skills | Outcome/Objective: Effective Communication Skills
- Measure: Written Communication Skills | Outcome/Objective: Effective Communication Skills

Implementation Description: Beginning in the 2009 -2010 cycle the RCB undertook the process of developing a new strategic plan, which included reviewing the undergraduate program as a whole. Existing action plans were subsumed in this effort and new thrusts proposed. The Summer 2011 report from the undergraduate sub-committee to the RCB Exec. Committee is attached here.

Projected Completion Date: 04/2017
Responsible Person/Group: BUSA 4980 Instructors, RCB Assessment Committee, RCB Undergraduate Steering Committee, RCB Executive Committee, RCB Dean’s Office
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Technology Skills
The College will initiate a new focus on the undergraduate Students’ Skill in the use of Technology. The current assessment mechanisms were found to be wanting in terms of telling the College Assessment Committee the level of skills on different software packages, i.e. spreadsheets, database, word processing. Specifically the sub-committee recommend an initiative to: Develop, use, receive feedback on, and be evaluated on their applied business technology skills (e.g. Excel) across the entire curriculum, not just in selected and isolated classes.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Georgia State University
Assessment Data by Section
2011-2012 Robinson College of Business MBA
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The goal of the Robinson College MBA program is to enhance the student's general management abilities and provide an opportunity to place emphasis on a functional area of expertise.

The RCB was asked to replace the prior mission statement, which was little more than a marketing tag line. The current entry is a statement of the RCB's goal, which was adapted from its introductory web page. It is only intended to be a temporary Mission statement. In the 2010-2011 AY the Robinson College undertook the development of a new strategic plan for the College that builds on the GSU strategic plan. In the Summer of 2011 a task force, building on the RCB strategic plan, began developing a set of recommendations to be made to the College Executive Committee that will significantly update the MBA program. It is anticipated that as a result of this larger process a new Mission Statement will emerge for the MBA program.

Goals
G 1: Analytical Decision Makers
Graduates of the Robinson College of Business will be analytically skilled decision makers

G 2: Perspectives
Graduates of the Robinson College of Business MBA Programs will be decision makers who effectively incorporate global, ethical, and culturally diverse perspectives.
**G 3: Leadership**
Graduates of the Robinson College of Business MBA Programs will be effectively leaders.

**G 4: Teamwork**
Graduates of the Robinson College of Business MBA Programs will be effective as members of teams.

**Student Learning Outcomes/Objectives**

**SLO 1: Students can Analyze Relevant Questions (G: 1, 2) (M: 1, 2)**
The student should be able to identify, prioritize and focus on critical success factors for a business unit and to analyze an organization's resources, capabilities, and competitive environment.

**Relevant Associations:**

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 2: Students can Propose Alternative Solutions (G: 1, 2, 3) (M: 3)**
The student should be able to develop viable competitive strategies, present a reasoned analysis, and justify recommendations that integrate functional, global, legal and ethical dimensions in the business decision process.

**Relevant Associations:**

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

**SLO 3: Effective Team Membership (G: 3, 4)**
Students will be able to perform as effective members of multi-functional teams in executive problem solving and solution implementation situations.

**Measures, Targets, and Findings**

**M 1: Critical Success Factor Analysis (O: 1)**

Normal 0 false false false EN-US X-NONE X-NONE This measure contains three sub-parts that respectively look at the level of sophistication in a student's ability to identify, prioritize, and focus on critical success factors in decision making. Measurement will be done by applying the Measure 1 Rubric to common mid-term and final exam questions in the MBA program's final strategy courses, MBA 8820, PMBA 8820 and EMBA 8710. For analysis, answers will be randomly selected from across sections and courses. In the 2011-2012 and 2012-2013 cycles a more detailed analysis was conducted as part of the College and University level monitoring of this program, which is being conducted at the request of SACS. The program was assessed as a whole as in years past. In addition the program was assessed based on location and on format. In this cycle all programs offered a capstone strategic management course. In all locations where a version of this class was offered the assessment was done with the exception of the Alpharetta location, which will be included in the 2012-2013 assessments. A grid showing the sections included in the 2011-2012 and 2012-2013 assessment of student learning outcomes is linked here. All sections were given the same material, used very similar Harvard cases as exams and asked the same questions on the exam. The same instructor taught all the sections. One person in all cases did assessment. Exams analyzed were selected from each section. A total of twelve exams from each section were selected as follows: The section enrollment was divided by twelve. The resulting number was rounded down to find the ratio of students that need to be included in the sample from that section. A die was then thrown to determine where in the alphabetical roster selection should begin. From that starting point students were selected based on the ratio of exams needed.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Students can Analyze Relevant Questions**
On all three sub-parts’ criteria we will have at least 80% of students achieving a 3.0.

**Findings 2011-2012 - Target: Not Met**

Students again did not meet this goal. The first item scores at about 70% for the top two categories, which is close to where it has been historically. The second item showed marked improvement and actually reached 73% in the top two categories. While this was still below the goal of 80%, it showed dramatic improvement. The third item, however, did not show such improvement with only 62% of the students reaching the top two categories. A detailed breakdown of raw scores and percentages is in the Rubric Analysis document attached for the academic year 2011-2012.

**M 2: Environmental Opportunity Analysis (O: 1)**

This measure contains two sub-parts that respectively look at the level of sophistication in a student's ability to understand and analyze a firm's resources and capabilities in the context of a competitive environment. Measurement will be done by applying the Measure 2 Rubric to common mid-term and final exam questions in the MBA program's final strategy courses, MBA 8820, PMBA 8820 and EMBA 8710. For analysis, answers will be randomly selected from across sections and courses. In this cycle a more detailed analysis was conducted as part of the College and University level monitoring of this program, which is being conducted at the request of SACS. The program was assed as a whole as in years past. In addition the program was assessed based on location and
on format. In this cycle all programs offered a capstone strategic management course. In all locations where a version of this class was offered the assessment was done with the exception of the Alpharetta location, which will be included in the 2012-2013 assessments. A grid showing the sections included in the 2011-2012 and 2012-2013 assessment of student learning outcomes is linked here. All sections were given the same material, used very similar Harvard cases as exams and asked the same questions on the exam. The same instructor taught all the sections. One person in all cases did assessment. Exams analyzed were selected from each section. A total of twelve exams from each section were selected as follows: The section enrollment was divided by twelve. Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Students can Analyze Relevant Questions**

On both sub-parts' criteria we will have at least 80% of students achieving a 3.0.

**Findings 2011-2012 - Target: Not Met**

Students showed mixed results this year relative to the past on these measures. On the first item students continued their improvement with 70% of the sample showing performance in the top two classifications. This upward trend was not reflected, however, in the second measure where the scores dipped a bit to show only 59% of students in the same top two classifications.

**M 3: Student Ability to Develop Corporate Strategies (O: 2)**

This measure contains four sub-parts that respectively look at the level of sophistication in a student's ability to develop viable corporate strategies that integrate functional, global, legal and ethical dimensions. Measurement will be done by applying the Measure 3 Rubric to common mid-term and final exam questions in the MBA program's final strategy courses, MBA 8820, PMBA 8820 and EMBA 8710. For analysis, answers will be randomly selected from across sections and courses. In this cycle a more detailed analysis was conducted as part of the College and University level monitoring of this program, which is being conducted at the request of SACS. The program was given as a whole as in years past. In addition the program was assessed based on location and format. In this cycle all programs offered a capstone strategic management course. In all locations where a version of this class was offered the assessment was done with the exception of the Alpharetta location, which will be included in the 2012-2013 assessments. A grid showing the sections included in the 2011-2012 and 2012-2013 assessment of student learning outcomes is linked here. All sections were given the same material, used very similar Harvard cases as exams and asked the same questions on the exam. The same instructor taught all the sections. One person in all cases did assessment. Exams analyzed were selected from each section. A total of twelve exams from each section were selected as follows: The section enrollment was divided by twelve. The resulting number was rounded down to find the ratio of students that need to be included in the sample from that section. A die was then thrown to determine where in the alphabetical roster selection should begin. From that starting point students were selected based on the ratio of exams needed.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Students can Propose Alternative Solutions**

On all four sub-parts' criteria we will have at least 80% of students achieving a 3.0.

**Findings 2011-2012 - Target: Not Met**

This year showed similar outcomes to past years and many of the reasons are likely the same. The first item again was rather well mastered. Students were in the top two categories in 66% of the papers reviewed. While below the target, this is well above the other scores in this section. The second item incorporating globalization was at 29% This was not something prompted in the question asked, but should have been incorporated by the students. The same could be said for the legal and ethical considerations. Once again the question did not prompt these areas specifically. The goal was to see the extent to which students would explicitly mention that these items were considered in their answers. Only about 5% of students did so. These remain highly disappointing results.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Law and Ethics

The assessment process of 2008-2009 showed very low scores in the area of law and ethics. Two possible interpretations of this result are possible. One is that the measurement was flawed; the second is that the measurement was fine and the learning objective was not being attained. Upon review it seems that the answer is a mix of the two items. Some of the alternative exercises that students could choose from in the assessed assignment did not have clear legal or ethical issues for discussion. However, on the options that did have such concerns the level of discussion was below target levels. In the short term the assignments for the assessment will be more carefully vetted to see that opportunities for discussion of legal and/or ethical issues are clearly set out. In the longer term the leadership of the College will work with Department toward increased consideration of legal and ethical issues in decision making throughout the core curriculum, not just in the Legal Environment course.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High  
**Projected Completion Date:** 04/2010  
**Responsible Person/Group:** RCB MBA Steering Committee; RCB Assessment Committee  
**Additional Resources:** None  
**Budget Amount Requested:** $0.00 (no request)

### Leadership and Team Skill Measurement

The assessment process on the measures of Leadership and Group Participation was not helpful in terms of providing results to the College that will enable them to target specific aspects of both skill sets for improvement. Analysis of the rubric used for these measurements indicated a sophisticated measure embedded in a good measurement devise for both measures. Analysis of the data collected from students indicates, however, that students were using the measurement instruments in a very elementary way. For the 09-10 assessment cycle it would be preferable if the assessment instrument can be retained. The challenge is to elicit more thoughtful and reflective responses from students in their completion of the assessment instrument. The College will work with the faculty members in the Strategic Management class to try to improve participation quality in this class.
Established in Cycle: 2008-2009

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The College has begun to capture more detailed data on the performance of students in the three different formats of the MBA program and across the different locations at which the program is offered. This will continue on through the next cycle at least. With this data the College will be able to see if there are patterns of performance that indicate more or less effectiveness along any of those dimensions. These data will primarily be used for the detailed monitoring reports requested by SACS with respect to these different formats and locations. It will, however, allow for valuable insights on within program variations that can inform the feedback loops and action plans of the College with respect to this program.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The College is going to re-think how it measures the social, ethical and global dimensions. Our approach has been to not have these issues specifically prompted in the case that is being analyzed by the students and measured for these learning outcomes. The idea is that students should, without prompting, incorporate these dimensions into an analysis. Clearly this is not happening on any significant level. This may be due to the nature of business writing which puts a premium on succinctness. Because these issues are not brought to the fore they are crowded out by the issues that are given the premium on space and time in much of business communication. In that scenario the issues will emerge in a fuller vetting of the problem. That is what happens subsequent to an initial analysis in the business world. An alternative may be to change the content of the case being analyzed so that the issues are relevant. With that a measure of how well the students handle it when presented may be meaningfully measured.
The candidate will be actively engaged with the community of scholars in the discipline.

**Other Outcomes/Objectives**

**O/O 2: Competency in research (G: 1) (M: 1, 7)**

Students should be able to critically evaluate and discuss theoretical developments and the results of original research.

**O/O 5: Placement in research-oriented institutions**

Successful placement of graduates is contingent on many factors. Admissions committees in each academic unit must seek applicants who are interested in research (as well as academically qualified). Students must be actively engaged in research from the outset of their studies and should be actively mentored by a research-active faculty member. Students should attend conference and present papers in order to gain recognition of faculty from other research universities. Students are expected to produce a thoughtful and well-researched dissertation. Once placed, alumni should remain active researchers.

**Measures, Targets, and Findings**

**M 1: Rubric - Research Paradigm (O: 2)**

Criteria #1 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.

Source of Evidence: Senior thesis or culminating major project

**Target for O2: Competency in research**

80% of students will achieve a 4 or 5 on the five dimension rubric.

**Findings 2011-2012 - Target: Met**

86.6% of 15 students were rated as performing at a 4 or 5 level on the rubric.

**M 2: Rubric - Contexts (O: 1)**

Criteria #2 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Comprehensive understanding of subject**

80% of students will achieve a 4 or 5 on the five dimension rubric.

**Findings 2011-2012 - Target: Met**

80% of students were rated as a 4 or 5 on the rubric.

**M 3: Rubric - Creates knowledge (O: 3)**

Criteria #3 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.

Source of Evidence: Senior thesis or culminating major project

**Target for O3: Creates new knowledge**

80% of students will achieve a 4 or 5 on the five dimension rubric.

**Findings 2011-2012 - Target: Met**

86.7% of 15 students were rated at a 4 or 5 on this dimension of rubric.

**M 4: Rubric - Knowledge of literature (O: 1)**

Criteria #4 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Comprehensive understanding of subject**

80% of students will achieve a 4 or 5 on the five dimension rubric.

**Findings 2011-2012 - Target: Met**

86.7% of 15 students were rated as a 4 or 5 on this dimension of rubric.

**M 5: Rubric - Cognate knowledge (O: 1)**

Criteria #5 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Comprehensive understanding of subject**

80% of students will achieve a 4 or 5 on the five dimension rubric.
Findings 2011-2012 - Target: Not Met
71.4% of 15 students were rated as a 4 or 5 on this dimension of rubric.

M 6: Rubric - Involvement in community (O: 4)
Criteria #6 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.
Source of Evidence: Senior thesis or culminating major project

Target for O4: Professional Engagement
80% of students will achieve a 4 or 5 on the five dimension rubric.

Findings 2011-2012 - Target: Not Met
69.3% of 14 students were rated as a 4 or 5 on this dimension of the rubric.

M 7: Rubric - Use of technology (O: 2)
Criteria #7 on the rubric will be applied to the students work at the time of the dissertation defense. Rubric can be found in the document repository.
Source of Evidence: Senior thesis or culminating major project

Target for O2: Competency in research
80% of students will achieve a 4 or 5 on the five dimension rubric.

Findings 2011-2012 - Target: Met
84.6% of 13 students were rated as a 4 or 5 on this dimension of rubric.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Monitoring student mastery of body of knowledge
Academic units will continue to evaluate students with the comprehensive examination. Units are being encouraged to have a formal review of students at the end of the first year. Students will be evaluated through the preliminary dissertation defense and the final oral defense of the dissertation.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: High
- Responsible Person/Group: Ph.D. coordinators in each academic unit

Pedagogical training
All students who are slated to teach must take the Teaching Seminar course. Student evaluations from the courses taught by doctoral students are reviewed by the academic unit and discussed with the student. Each academic unit has a teaching mentor who works with students concerning all aspects of teaching, including course preparation and classroom management.

- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: High
- Responsible Person/Group: Ph.D. unit coordinator and department chair

Placement of graduates in research institutions
Successful placement of graduates is contingent on many factors. Admissions committees in each academic unit must seek applicants who are interested in research (as well as academically qualified). Students must be actively engaged in research from the outset of their studies and should be actively mentored by a research-active faculty member. Students should attend conferences and present papers in order to gain recognition of faculty from other research universities. Students must produce a thoughtful and well-researched dissertation. Once placed, alumni should remain active researchers.

- Established in Cycle: 2008-2009

- Responsible Person/Group: Ph.D. unit coordinator, Ph.D. Program Office

Georgia State University
Assessment Data by Section
2011-2012 School Counseling EdS
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Ed. S. School Counseling Program is designed to produce educationally oriented professional school counselors with broadly based, multi-disciplinary backgrounds whose over arching goal is to help all P-12 students be successful in school. Graduates are equipped to counsel students in P-12 settings as well as parents and teachers; to consult with parents, teachers and other school and community personnel; to advocate for students and parents; to evaluate school counseling programs, and to coordinate the
resources of the school and the community in order to meet the developmental needs of the students. The role calls for facilitating, nurturing persons knowledgeable of educational objectives and accustomed to working with others in providing leadership and expertise in child growth and development, assessment, group process facilitation, interviewing and consultation skills, classroom intervention techniques, interpersonal dynamics, program evaluation, advocacy and the curriculum of the school.

**Goals**

**G 1: P-12 Student Learning and Development**

School counselors are committed to their students and to their learning, growth and development. To this end, school counselors use their skills to assist students in individual, small group, and classroom guidance settings. School counselors also monitor and evaluate student learning and development to provide the most effective school counseling programs.

**G 2: Professional Practice/Experience**

School counselors reflect on their practice and learn from that experience.

**G 3: Learning Communities**

School counselors are participating members of learning communities. This participation allows them to share their expertise and to gain valuable ideas from other practicing school counselors.

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrates Counseling Knowledge and Skills (G: 1) (M: 1)**

School counselors understand and practice effective counseling skills that contribute to P-12 student learning and development.

Relevant Associations: American School Counselor Association

**SLO 2: Monitors and Evaluates P-12 Student Learning & Dev (G: 1) (M: 2)**

In order to assist all P-12 students in school success, school counselors must monitor, manage, and evaluate student learning and development. Student learning and development as assisted by school counselors takes place through school counselors' leadership in individual and small group counseling, classroom guidance activities, parent and teacher consultation, using community resources, and advocating for students.

Relevant Associations: American School Counselor Association

**SLO 3: Professional Reflection and Learning (G: 2) (M: 3)**

School counselors reflect continually on their professional practice. This reflection allows them to learn from their experiences, including those practices that are effective and those that need to be revised.

Relevant Associations: American School Counselor Association

**SLO 4: Participates in Learning Communities (G: 3) (M: 4)**

School counselors participate in learning communities, including classroom groups, mentoring relationships, feeder school groups, and other appropriate learning groups. In this way, school counselors can share their expertise with others, as well as learn from other school counselors.

Relevant Associations: American School Counselor Association

**Measures, Targets, and Findings**

**M 1: Audio Tape of Counseling Skills (O: 1)**

Students will provide direct services (demonstrate effective individual and small group counseling, classroom guidance and consultation skills) to students, parents and teachers in the school setting. An audio tape of one such session will be critiqued by the class to indicate effective counseling skills that will promote student/parent/teacher learning and development. Students must also complete a tape critique form that provides the purpose of the session, a summary of the session, their strengths and what they learned from the experience.

Source of Evidence: Video or audio tape (music, counseling, art)

**Target for O1: Demonstrates Counseling Knowledge and Skills**

At least 90% of the students will earn a Satisfactory grade on the tape presented.

**Findings 2011-2012 - Target: Met**

100% of the students earned a Satisfactory grade on the tape presented.

**M 2: Action Research Project (O: 2)**

Students will implement a selected accountability protocol following the ASCA National Model. Students will be required to plan and implement an intervention, evaluate the effectiveness of the intervention using the ASCA Guidance Curriculum Results Report template, complete the Guidance Curriculum Results Report, and evaluate the original plan. This last evaluation should include and explain the rationale for the lesson plan and describe the process, lessons learned and implications for your school counseling program. The finished product will be an easy to understand program evaluation manual to evaluate Academic, Personal/Social, and Career Preparedness interventions used when working with individual students, small groups of students, and in classroom guidance at the elementary, middle and high school levels.

Source of Evidence: Project, either individual or group

**Target for O2: Monitors and Evaluates P-12 Student Learning & Dev**

At least 90% of the students will earn a Satisfactory grade on the action research project.
Findings 2011-2012 - Target: Met
100% of the students earned a Satisfactory grade on the action research project

Findings 2011-2012 - Target: Met
100% of the students earned a Satisfactory grade on the action research project

M 3: Supervision Session Summary Form (O: 3)
After completing a supervision session with another school counselor, students must complete a Session Summary Form that includes information about the supervisee, a session analysis, a description of the supervisor's (student) strengths and weaknesses, and plans for the next session.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Professional Reflection and Learning
At least 90% of the students will earn a Satisfactory grade on the supervision session summary forms submitted.

Findings 2011-2012 - Target: Met
100% of the students earned a Satisfactory grade on the supervision session summary forms submitted

M 4: Small Group Feedback of Audio Tapes (O: 4)
Students in CPS 8480 and CPS 8661 meet in small groups to analyze and critique each other’s audio-taped supervision or counseling sessions. Students use a standard form and provide both written and oral feedback to their peers, following a peer consultation model.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O4: Participates in Learning Communities
At least 90% of the students will earn a Satisfactory grade on the feedback provided to their peers.

Findings 2011-2012 - Target: Met
100% of the students earned a Satisfactory grade on the feedback provided to their peers.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Maintain and Monitor
The School Counseling Faculty will monitor student’s grades on projects and other measures used to assess competence. In addition, this faculty will consider other ways to assess competence with regard to the outcomes and objectives.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Action Research Project | Outcome/Objective: Monitors and Evaluates P-12 Student Learning & Dev
- Measure: Audio Tape of Counseling Skills | Outcome/Objective: Demonstrates Counseling Knowledge and Skills
- Measure: Small Group Feedback of Audio Tapes | Outcome/Objective: Participates in Learning Communities
- Measure: Supervision Session Summary Form | Outcome/Objective: Professional Reflection and Learning

Implementation Description: The School Counseling faculty will monitor the outcomes/objectives.
Projected Completion Date: 09/2013
Responsible Person/Group: School Counseling Faculty
Additional Resources: At least one additional school counseling faculty member.

Maintain and Monitor
The School Counseling Faculty will monitor students’ grades on projects and other measures used to assess competence. In addition, this faculty will consider other ways to assess competence with regard to the outcomes and objectives.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
All students met all standards during the past academic year.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes have been made in the assessment process. The assessment process is very specific and comprehensive because of new requirements by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP 2009). Students are assessed on standards in eight core areas: professional orientation and ethical practice; social and cultural diversity; human growth and development, career development; helping relationships; group work; assessment; and research and program evaluation. Students seeking the Ed.S. in School Counseling must demonstrate that they have the knowledge, skills and practices necessary to promote the academic, career, and personal/social development of all P-12 students. School Counseling Program standards require assessment of knowledge, skills and practices in the areas of foundations; counseling, prevention and interventions; diversity and advocacy; assessment; research and evaluation; academic development; collaboration and consultation; and leadership. Assessment in these areas will occur during the internship as well as in school counseling specific classes that students are required to complete. The assessment process itself is monitored to determine if it is effective for assessing student progress. The School Counseling faculty will continue to examine the goals and objectives for the Education Specialist Program in School Counseling. If revisions are made in the goals and objectives, the methods for assessing them also will change. In addition, the rubrics used for assessment will be examined for possible changes. Currently no changes have been made in the assessment process.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Students are meeting the goals set by the School Counseling faculty for the Ed. S. program. This indicates that the data obtained from the assessment findings support continuing the current curriculum. 100% of Ed.S.-seeking students are meeting the goals set by the School Counseling faculty for the Ed. S. program. This indicates that the data obtained from the assessment findings support continuing the current curriculum.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

No operational changes have been made. The students met the standards set by the program; therefore, changes were not needed.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

All standards were met by the students this year; thus, we view our curriculum and teaching effectiveness as high. No operational improvements are called for at this time.

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

All the standards set for the program were met. There are some changes that can be made to help students complete graduation requirements in a timely manner. We have an orientation (attendance optional) for the Ed. S. program. We will begin using a form that states that the student attended/did not attend the orientation. If they did not attend, we will ask them to state that they read and understood the handbook. In this way, we can underscore the importance of being familiar with administrative graduation requirements. We believe this will aid in the improvement of students graduating in a timely manner.

Georgia State University
Assessment Data by Section
2011-2012 School Counseling MEd
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

The School Counseling program within the Department of Counseling and Psychological Services at Georgia State University is dedicated to training professional school counselors who are prepared to use school data to design, implement, and evaluate developmentally appropriate school counseling programs that promote academic, vocational and personal/social success for all K-12 students. Student learning occurs in the following areas: student data collection in diverse K-12 schools, delivery of counseling and guidance services, collaboration and consultation with parents and other educators, and the design, implementation, and evaluation of a comprehensive K-12 school counseling program. Our model for school counselor preparation is based on the American School Counselor Association’s (ASCA) National Model for School Counseling Programs and the Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards for School Counseling Programs.

Goals

G 1: Foundations of School Counseling
Foundations of school counseling include the history and philosophy of the school counseling profession, professional roles and credentialing, current models of school counseling programs (ASCA National Model) and ethical and legal standards related to the profession.

G 2: Counseling Interventions
Counseling interventions include individual, small and large group and school-wide approaches to intervention.

G 3: Social Justice: Diversity, Leadership and Advocacy
Diversity includes the cultural, ethical, economic, legal, and political issues surrounding community, environmental and institutional opportunities that enhance, as well as barriers that impede, the academic, career and personal/social development of all P-12 students. Diversity pertains to the effects of ability levels, stereotyping, family, socioeconomic status, gender and sexual identity and their effects on student achievement. Working as leaders, school counselors promote student success by closing existing achievement gaps, and influencing systemwide changes for school reform. School counselors advocate for students’ educational needs and work proactively to remove barriers to learning.

G 4: Assessment
Assessment includes selecting appropriate assessment strategies that can be used to evaluate the academic, career and personal/social development of all P-12 students and analyzing assessment information to determine needs as well as the effectiveness of educational programs.

G 5: Research and Evaluation
Research and evaluation includes knowing basic strategies for evaluating counseling outcomes and methods of using data to inform decision making and accountability. In addition it includes developing measurable outcomes for school counseling programs, activities, interventions and experiences.

G 6: Academic Development
To promote academic development, school counselors work to close achievement gaps and use differentiated instructional strategies to teach counseling and guidance related material to promote the achievement of all students.

G 7: Consultation and Collaboration
Consultation and collaboration includes empowering parents, guardians and families to act on behalf of their children, locating and coordinating community resources to improve student success, and working with teachers and other education professionals to create an environment that promotes academic, career, and person/social development of all students.

**Student Learning Outcomes/Objectives**

**SLO 1: Knowledge of Foundations of School Counseling (G: 1) (M: 1)**

Students will demonstrate an understanding of the foundations of school counseling including history and philosophy, professional identity, roles and credentialing, and ethical and legal standards related to the profession on a comprehensive exam in CPS 6020/6030.

Relevant Associations: Council for Counseling and Related Educational Programs (CACREP)

**SLO 2: Demonstrates Skills in Counseling and Guidance (G: 2) (M: 2)**

During CPS 7661 and CPS 7681 (practicum and internship) students must demonstrate individual and small group counseling skills. Individual counseling skills include understanding counseling theories related to the school setting, using a consistent model to conceptualize student concerns and selecting appropriate counseling interventions, structuring the session, establishing and maintaining open and honest communication, responding empathetically, using appropriate questioning techniques, reflecting content and feelings, allowing silence when appropriate, identifying and disclosing mistaken goals of behavior, offering alternatives when appropriate, summarizing and using appropriate closure techniques. In addition, interns must demonstrate their effective use of peer facilitation and their ability to deal with specific issues such as abuse, eating disorders, drug abuse, and suicide risk, etc. Small group counseling skills include understanding the theoretical and experiential aspects of group purpose, development, dynamics, counseling theories, group counseling methods and skills, using group process observations within the group setting to facilitate student growth and development, using a consistent theoretical model or approach when planning group strategies, effectively structuring group sessions, establishing the establishment of group norms/clear ground rules and consequences, maintaining an open/relaxed atmosphere, reflecting content and feelings of group members, inviting and/or encouraging all group members to participate, using appropriate summary/closure techniques, and effectively terminating the group experience. Students use individual counseling and small group counseling to promote academic development, career development and personal/social development.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 3: Demonstrates Interpersonal Skills used in Counseling (G: 2) (M: 3)**

Students demonstrate interpersonal skills learned during CPS 6410 including building rapport, reflecting feeling and content, summarizing, setting goals, planning interventions, and closure.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 4: Demonstrates Knowledge of Diversity (G: 3) (M: 4)**

Research indicates that a significant contributor to multicultural competencies is experience with culturally diverse individuals. Towards this end, students enrolled in CPS 7340 will create a field experience plan that will allow opportunities to combine theory with practice, extend learning and reinforce concepts gained through reading, lectures, and class participation. Students must attend a social event or cultural happening focusing on a group whose race, ethnicity, gender, or sexual orientation differs from their own. Students must observe verbal and non verbal behaviors and initiate social interactions. In addition, students will read journal articles or book chapters that relate to the cultural group identified in the field project. The experience will be described in a paper.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 5: Demonstrates MC Awareness, Advocacy, Ldrship (G: 3) (M: 5)**

Interns must demonstrate their ability to respect students as individuals with differing personal and family backgrounds and with different skills, talents, and interests. Interns must be sensitive to school, community and cultural norms, understand the counselor’s role in social justice, advocacy, and conflict resolution, and effectively use knowledge of culture, advocacy, and social justice to create academic, personal/social, and career development programs that meet the needs of diverse populations.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 6: Knowledge of Indiv & Group Approaches to Appraisal (G: 4) (M: 6)**

In CPS 7450 students demonstrate their understanding of appraisal concepts by writing a case study that includes a definition of...
appraisal, how appraisal relates to the counseling process, intake questions and anticipated responses, issues that need to be addressed and evaluated further, selected instruments and rationale for their selection, legal, ethical and moral issues, resolutions, and multicultural considerations.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 7: Demonstrates Advocacy, Ldrshp, Action Research (G: 3, 5, 6) (M: 7)**

Work on the Targeted Intervention Project (TIP) is begun during CPS 8260 and completed during CPS 7661/7681. Students analyze the demographic data from their school and determine where gaps exist between demographic groups in achievement, access to classes, or other services, formulate a plan that is academically and developmentally appropriate to close the gap, and implement that plan. A research method is selected to evaluate the results of the plan. A paper is written describing their efforts.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 8: Demonstrates Classroom Guidance Skills (G: 6) (M: 8)**

Students must demonstrate the following classroom guidance skills: defining session goals, structuring the group, using age appropriate materials, using a variety of activities, keeping the group on task, employing effective classroom management skills, pacing the lesson appropriately, and using appropriate summary/closure techniques.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 9: Knowledge of Consultation & Collaboration (G: 7) (M: 9)**

Students must demonstrate their knowledge of consultation and collaboration, including theories of consultation, methods of working with parents, families, teachers, and communities to empower them and build partnerships, and conducting programs to enhance students’ development needs.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**SLO 10: Demonstrates Consultation & Collab. Skills (G: 7) (M: 10)**

Students must demonstrate the following consultation and collaboration skills: establishing rapport, structuring the interview, responding empathetically, reflecting content, providing encouragement/support, identifying mistaken goal of behavior, defining and focusing on problem areas, helping to develop a plan of action or treatment strategy, helping the consultee learn to advocate for self as appropriate, planning for follow-up session, and using appropriate closure techniques.

Relevant Associations: Council for Accreditation of Counseling and Related Educational Programs (CACREP)

**Measures, Targets, and Findings**

**M 1: Comprehensive Exam (O: 1)**

CPS 6020/6030 provides an overview of the foundations and unique issues of school counseling, including history and philosophy, professional roles and credentials, and ethical and legal standards related to the profession. The comprehensive test covers all aspects of the course to assess student knowledge.

Source of Evidence: Academic indirect indicator of learning - other

**Target for O1: Knowledge of Foundations of School Counseling**

At least 90% of the students will earn a B or better on the comprehensive exam.

**Findings 2011-2012 - Target: Met**

100% of the students earned a B or better on the comprehensive exam.

**M 2: Site Supr. Eval of Indiv & Small Group Counseling (O: 2)**

Site supervisors for CPS 7661/7681 evaluate their intern’s skills in individual and small group counseling. Evaluation consists of case consultation, listening to tape recorded sessions and/or direct observation.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O2: Demonstrates Skills in Counseling and Guidance**

At least 80% of the students will be rated at the novice/independent level or higher on the over-all area for individual counseling. At least 80% of the students will be rated at the novice/independent level or higher on the over-all area for small group counseling. Site supervisors will provide the ratings.

**Findings 2011-2012 - Target: Met**

100% of the students were rated at the novice/independent level or higher on the over-all area for individual counseling and for small group counseling.

**M 3: Final Video Tape (O: 3)**

Students are evaluated on their effective use of counseling skills via a final video tape role play in CPS 6410. This tape should reflect skills learned during the semester, including building rapport, reflecting feeling and content, summarizing, setting goals, planning interventions and closure.

Source of Evidence: Video or audio tape (music, counseling, art)

**Target for O3: Demonstrates Interpersonal Skills used in Counseling**

At least 90% of the students will earn a score at or above the cut-off score of 25.

**Findings 2011-2012 - Target: Met**

100% of the students earned a score above the cut-off score of 25.
Site supervisors for CPS 7661/7681 evaluate the students on the following classroom guidance skills: uses needs assessment to promote academic success, career development and personal/social development; implements strategies and activities to lesson according to student needs; effectively processes activities; uses appropriate summary/closure techniques; utilizes classroom materials; uses a variety of activities to achieve lesson goals; keeps group on task; uses effective classroom management skills; paces data to develop lessons/units; clearly defines session goals; effectively structures the group; uses age appropriate activities and addresses and evaluates further development, health and wellness, language, ability level, multicultural issues and factors of resiliency on student learning and development; respect students as individuals with differing personal and family backgrounds and with different skills, talents, and interests; sensitivity to school, community and cultural norms; help students feel valued and learn to value each other; understand the counselor's role in social justice, advocacy, and conflict resolution; be culturally self-aware and understand the impact of biases, prejudices, processes of intentional and unintentional oppression and discrimination on the student's academic, personal/social, and career development; effective use of knowledge of culture, advocacy, and social justice to create academic, personal/social and career development programs that meet the needs of the diverse population; and other aspects of multicultural awareness, advocacy, and leadership in the school setting.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Demonstrates Knowledge of Diversity**

At least 80% of the students will earn a B or better on the multicultural experience activity.

**Findings 2011-2012 - Target: Met**

100% of the students earned a B or better on the multicultural experience activity.

**M 5: Site Supr. Eval. of MC Awareness, Advocacy, Ldrshp (O: 5)**

Site supervisor's for CPS 7661/7681 evaluate students on their ability to articulate, model and advocate for an appropriate school counselor identity and program; demonstrate a commitment to helping all students excel; appreciate and value human diversity; show respect for students' varied talents and perspectives by designing and implementing prevention and intervention plans related to the effects of atypical growth and development, health and wellness, language, ability level, multicultural issues and factors of resiliency on student learning and development; respect students as individuals with differing personal and family backgrounds and with different skills, talents, and interests; sensitivity to school, community and cultural norms; help students feel valued and learn to value each other; understand the counselor's role in social justice, advocacy, and conflict resolution; be culturally self-aware and understand the impact of biases, prejudices, processes of intentional and unintentional oppression and discrimination on the student's academic, personal/social, and career development; effective use of knowledge of culture, advocacy, and social justice to create academic, personal/social and career development programs that meet the needs of the diverse population; and other aspects of multicultural awareness, advocacy, and leadership in the school setting.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O5: Demonstrates MC Awareness, Advocacy, Ldrship**

At least 80% of the students will be rated at the novice/independent level or higher on the overall area rating for multicultural awareness, advocacy and leadership.

**Findings 2011-2012 - Target: Met**

100% of the students were rated at the novice/independent level or higher on the overall area rating for multicultural awareness, advocacy and leadership.

**M 6: Appraisal Case Study (O: 6)**

In CPS 7450 students demonstrate their understanding of appraisal concepts by writing a case study that includes a definition of appraisal, how appraisal relates to the counseling process, intake questions and anticipated responses, issues that need to be addressed and evaluated further, development instruments and the rational for their selection, legal, ethical and moral issues, resolutions, and multicultural considerations. Case studies are evaluated based on the previously stated issues as well as on organization, written expression, appropriate use of citations and references and on integration of course material.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O6: Knowledge of Indiv & Group Approaches to Appraisal**

At least 90% of the students will earn a B or better on the case study.

**Findings 2011-2012 - Target: Met**

100% of the students earned a B or better on the case study.

**M 7: Targeted Intervention Project (TIP) (O: 7)**

Work on the Targeted Intervention Project (TIP) is begun during CPS 8260 and completed during CPS 7661/7681. Tudents analyze the demographic data from their schools and determine where gaps exist between demographic groups in achievement or in access to classes and other activities and services, formulate a plan that is academically and developmentally appropriate to close the gap, and implement that plan. A research method is selected to evaluate the results of the plan. A paper is written describing their efforts.

Source of Evidence: Project, either individual or group

**Target for O7: Demonstrates Advocacy, Ldshp, Action Research**

At least 90% of the students will earn 80% or better on the Targeted Intervention Project.

**Findings 2011-2012 - Target: Met**

100% of the students earned 80% or better on the Targeted Intervention Project.

**M 8: Site Supr. Eval. of Classroom Guidance Skills (O: 8)**

The site supervisors for CPS 7661/7681 evaluate the students on the following classroom guidance skills: uses needs assessment data to develop lessons/units, clearly defines session goals, effectively structures the group, uses age appropriate activities and materials, uses a variety of activities to achieve lesson goals, kept group on task, uses effective classroom management skills, paces lesson according to student needs, effectively processes activities, uses appropriate summary/closure techniques, utilizes classroom guidance to promote academic success, career development and person/social development, implements strategies and activities to
prepare students for home-to-school, school-to-school, and school-to-work transitions and for a full range of postsecondary options and opportunities.

Source of Evidence: Field work, internship, or teaching evaluation

Target for O8: Demonstrates Classroom Guidance Skills
At least 80% of the students will be rated at the novice/independent level or higher on the overall area rating for classroom guidance skills.

Findings 2011-2012 - Target: Met
100% of the students were rated at the novice/independent level or higher on the overall area rating for classroom guidance skills.

M 9: Consultation Quizzes (O: 9)
Two quizzes in CPS 7550 allow students to demonstrate their knowledge of consultation, including theories of consultation, methods of working with parents, families and communities to empower them and conducting programs to enhance students’ development needs.

Source of Evidence: Academic indirect indicator of learning - other

Target for O9: Knowledge of Consultation & Collaboration
At least 80% of the students will earn a B or better (80% or higher) on Quiz 1 and 2 combined.

Findings 2011-2012 - Target: Met
95% of the students earned a B or better on Quiz 1 and 2 combined.

M 10: Site Supr. Evaluation of Consultation Skills (O: 10)
The site supervisors for CPS 7661/7681 evaluate the students on the following consultation skills: understands strategies and methods of working collaboratively with parents, guardians, families, communities, teachers, administrators, and other school personnel, establishes effective working relationship with consultee(s), knows a general framework for understanding and practicing consultation, effectively structures the interview, responds empathetically, reflects content, gives encouragement/support, clearly identifies goal for consultation, defines and focuses on problem areas, helps develop a plan of action or treatment strategy, helps consultee learn to advocate for self as appropriate, plans for follow-up session, and uses appropriate closure techniques.

Source of Evidence: Field work, internship, or teaching evaluation

Target for O10: Demonstrates Consultation & Collab. Skills
At least 80% of the students will be rated at the novice/independent level or higher on the overall area rating for consultation and collaboration skills.

Findings 2011-2012 - Target: Met
100% of the students were rated at the novice/independent level or higher on the overall area rating for consultation and collaboration skills.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Maintain and Monitor
The School Counseling faculty members meet regularly (twice per month - or more) in order to assess other issues that may arise that are not currently being addressed in our training program. This is a portion of our continuous improvement plan that we implement in accordance with our national accrediting bodies: NCATE and CACREP. As we maintain and monitor our training program, we make decisions collectively, and in accordance with our national standards, when courses or other training experiences need to be altered.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High
Projected Completion Date: 09/2011
Responsible Person/Group: School Counseling Faculty

Maintain and Monitor
The School Counseling faculty members meet regularly (twice per month - or more) in order to assess other issues that may arise that are not currently being addressed in our training program. This is a portion of our continuous improvement plan that we implement in accordance with our national accrediting bodies: NCATE and CACREP. As we maintain and monitor our training program, we make decisions collectively, and in accordance with our national standards, when courses or other training experiences need to be altered.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Projected Completion Date: 09/2013

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

All students are met all program requirements and standards.
**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process is very specific and comprehensive because of new requirements by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP 2009). Students are assessed on standards in eight core areas: professional orientation and ethical practice; social and cultural diversity; human growth and development, career development; helping relationships; group work; assessment; and research and program evaluation. Students seeking the M.Ed. in School Counseling must demonstrate that they have the knowledge, skills and practices necessary to promote the academic, career, and personal/social development of all P-12 students. School Counseling Program standards require assessment of knowledge, skills and practices in the areas of foundations; counseling, prevention and interventions; diversity and advocacy; assessment; research and evaluation; academic development; collaboration and consultation; and leadership. Assessment in these areas will occur during the internship as well as in school counseling specific classes that students are required to complete. The assessment process itself is monitored to determine if it is effective for assessing student progress. The School Counseling faculty will continue to examine the goals and objectives for the Master in Education Program in School Counseling. If revisions are made in the goals and objectives, the methods for assessing them also will change. In addition, the rubrics used for assessment will be examined for possible changes. Currently no changes have been made in the assessment process.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The assessments indicate that our students are performing effectively. We will continue to provide the instructions and experiences that we now provide.

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

Although the students continue to meet the standards set by the program regarding the practicum/internship, several operational improvements have been made that the School Counseling faculty think will improve the practicum/internship experience. The practicum/internship orientation will be held earlier in the academic year so that placements can occur earlier. This is important so that the students can meet with the on-site supervisor before the previous school year ends to make plans for the beginning of the next school year when the student will be placed at that school. Current on-site supervisors have stated that it is extremely important for the internship student to be at the school during pre-planning. The application deadline was moved from November 15 to November 30.

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

The students met all of the assessment requirements set by the program; thus, we believe our program curriculum is meeting the needs of M.Ed. students effectively. From informal evaluations, it was found that the students wanted their site placements earlier so that they could become familiar with their school site during the summer before their placement began. In this way they could more easily satisfy the requirements that are based on school data.

**Georgia State University**

**Assessment Data by Section**

**2011-2012 School Psychology EdS**

*(As of: 12/13/2016 04:45 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

---

**Mission / Purpose**

The goal of the Masters/Ed.S. program in School Psychology is to train school psychologists to become certified for work in the schools. By successfully completing the courses, practica and internships in this program, the graduating school psychologists are prepared to continue to provide and evaluate effective school psychological services that include consultation, preventive intervention, counseling as well as data-based decision making and psycho-educational diagnosis targeted to students, teachers, parents, administrators and community members affiliated with public schools. In addition, graduates develop advanced knowledge and skills in using research methodology and statistics, in planning, implementing, and evaluating school-based evaluation research, in understanding current trends in the field of school psychology, in ethical issues relevant to the practice of psychology in educational settings and in using technology to facilitate practice in school settings.

**Goals**

**G2: Understands School Psychology Practice**
Students will understand the foundations and practice of school psychology.

**G1: Professionalism**
To ensure that our graduates are prepared to work in a diverse society. In addition, our graduates are informed about and committed to legal and ethical practices.

**G3: Scientific and Research Foundations for Professional Practice**
To ensure that our graduates are sufficiently grounded in the basic science of psychology and that they can use research findings to properly conduct research, particularly in educational settings.

**G4: Professional Strategies Targeted to the Needs of Learners, Their Parents, and Their Schools**
To ensure that our graduates are proficient at providing intervention, consultation, and psychoeducational assessments.
### Student Learning Outcomes/Objectives

| SLO 1: | Understand Development of Wellness, Socialization and Life Competencies (G: 4) (M: 1, 2, 3) |
|--------|-------------------------------------------------------------------------------------------------

Findings 2011-2012 - Target: Met
All 2011-2012 interns (100%) earned a rating of "3" or higher for this area of competency.

M 2: Practicum Portfolio (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11)
Practicum Portfolio is a compilation of psychological reports, consultation reports, assigned activities, the site-based supervisors' rating, and the university-based supervisors' rating of the student that demonstrates the graduate student's acquisition of required skills and competency in targeted areas.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Understand Development of Wellness, Socialization and Life Competencies
100% of MEd practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O2: Develops Cognitive and Academic Skills
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O3: Promotes System-Based Service Delivery Through Collaboration
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O4: Implements Data Based Decision Making
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O5: Understand Professional, Legal, Ethical Responsibilities
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O6: Effectively utilizes technological applications
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 Practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O7: Understand diversity, development, & learning
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
During the 2011-2012 academic year all practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O8: Effective at Consultation & Collaboration
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O9: Understands School Organizations, Policy, & Climate
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 practicum students (100%) earned a rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O10: Understands Prevention & Crisis Intervention
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.
Findings 2011-2012 - Target: Met
All 2011-2012 practicum students (100%) earned a rating of "3" or higher for this area of competency.

Target for O1: Understand Research and Program Evaluation
100% of Ed.S. practicum students will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 practicum students (100%) earned a rating of "3" or higher for this area of competency.

M 3: Supervisor Ratings (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11)
Practicum and Internship site-based supervisor's rate the students' skill and acquisition of school psychology knowledge and skills across the identified objectives of the EdS program.
Source of Evidence: Performance in subsequent schooling feedback

Target for O1: Understand Development of Wellness, Socialization and Life Competencies
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O2: Develops Cognitive and Academic Skills
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O3: Promotes System-Based Service Delivery Through Collaboration
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O4: Implements Data Based Decision Making
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O5: Understand Professional, Legal, Ethical Responsibilities
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O6: Effectively utilizes technological applications
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O7: Understand diversity, development, & learning
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O8: Effective at Consultation & Collaboration
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.
Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O9: Understands School Organizations, Policy, & Climate
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O10: Understands Prevention & Crisis Intervention
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

Target for O11: Understands Research and Program Evaluation
100% of internship and practicum students will receive a rating of "3" or higher from their field-based supervisor for this area of competency.

Findings 2011-2012 - Target: Met
All 2011-2012 interns and practicum students (100%) earned a rating of "3" or higher on this competency.

M 4: PEF Disposition Survey (O: 5)
Students complete the Professional Education Faculty's unit-wide Student Disposition Survey at multiple points in the program (prior to practicum, at the conclusion of practicum, exit from the program, and 1 year post-graduation).
Source of Evidence: Student course evaluations on learning gains made

Target for O5: Understand Professional, Legal, Ethical Responsibilities
Student survey responses will demonstrate an understanding of their professional, legal, and ethical responsibilities as school psychologists.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Administration of PEF Student Disposition Survey
This survey is currently being finalized by the appropriate PEF committees.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Measure | Outcome/Objective:
---|---
PEF Disposition Survey | Understand Professional, Legal, Ethical Responsibilities

Implementation Description: We hope to implement this during Spring 2012.
Responsible Person/Group: School Psychology Faculty
Additional Resources: Administrative support for moving assessment materials and data to LiveText

Annual Report Section Responses

Most Important Accomplishments for Year—Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.
Graduated 6 students! Placed 6/7 students on APA/APPIC internships, which are highly competitive. Maintained about 50% student diversity. Got funding to replace one faculty member. Placed 2 students in academic/research positions. Many publications and presentations. Reduced course load. Applied for 4 grants, 2 successful, 1 no, 1 yet to be determined.

University-wide Committee Participation—Use this space to document any staff participation on University-wide committees (e.g., University Senate).
Cadenhead and Varjas on University Senate

Academic Teaching Activities—If the staff participated in teaching (or assisted in the teaching of) academic courses as part of their responsibilities to the department, please note that here.
all faculty teach classes.

Georgia State University
Assessment Data by Section
Mission / Purpose
The GSU school psychology PhD is an innovative program that seeks to develop and amplify the role of the school psychologist beyond their traditional roles and functions. Training is oriented toward developing students who are proficient practitioners and researchers. Students refine their knowledge and skills in assessment, prevention/intervention, and consultation. Students develop a cognate that reflects their particular interests and intended area of specialization. PhD school psychology students are also trained to be producers of research.

Goals
G 1: Goal 1: Professionalism
To prepare our graduates to ground his/her practice in basic science and to conduct legal and ethical practices in a pluralistic, diverse society.

G 2: Goal 2: Scientific and Research Foundations for Professional Practice
To ensure that our graduates can use research findings and properly conduct research, particularly research regarding the practice of psychology in educational settings.

G 3: Goal 3: Professional Strategies Targeted to the Needs of Learners, Their Parents, and Their Schools
To ensure that our graduates are proficient at intervention, consultation, and assessment.

G 4: Goal 4: Area of Sub-Specialization
To ensure that our graduates, in addition of professional preparation as a school psychologist, has a subspecialty.

Student Learning Outcomes/Objectives
SLO 2: Follow the tenets of legal, ethical, and social responsibility in practice (G: 1) (M: 3, 5)
To ensure that our graduates are informed about and committed to legal and ethical practices
Relevant Associations: APA & NASP

SLO 3: Understand the practice of psychology (G: 1) (M: 5)
To ensure that our graduates practices are sufficiently grounded in the basic science of psychology.
Relevant Associations: APA & NASP

Strategic Plan Associations
3.1 Enhance a research culture.

SLO 4: Understand the principles of psychology and school psychology (G: 2) (M: 3, 5)
Graduates demonstrate knowledge of advanced principles of psychology and school psychology.
Relevant Associations: APA & NASP

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.

SLO 5: Use and conduct research (G: 2) (M: 1, 2, 3, 5)
To ensure that our graduates can use research findings and properly conduct research, particularly regarding the practice of psychology in educational settings.
Relevant Associations: APA & NASP

Strategic Plan Associations
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.

SLO 6: Intervention (G: 3) (M: 3, 5)
To ensure that our graduates are proficient at providing preventative and remedial intervention.
Relevant Associations: APA & NASP

Strategic Plan Associations
4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

SLO 7: Consultation (G: 3) (M: 3, 5)
To ensure that our graduates are proficient at providing consultation.
Relevant Associations: APA & NASP
**Strategic Plan Associations**

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

**SLO 8: Psychoeducational Assessment (G: 3) (M: 3, 5)**

To ensure that our graduates are proficient at providing psychological assessment.

Relevant Associations: APA & NASP

**SLO 9: Develops skills in one or more subspecialization (G: 4)**

Graduates acquire and demonstrate adequate mastery of a subspeciality that strengthens their skills as psychologists.

Relevant Associations: APA & NASP

**Strategic Plan Associations**

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

**Other Outcomes/Objectives**

**O/O 1: Diversity Awareness & Sensitive Service Delivery (G: 1) (M: 5)**

To ensure that our graduates are prepared to work as professional school psychologists in a pluralistic, diverse society.

Relevant Associations: APA & NASP

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

5.4 Enhance the global competency of students, faculty and staff.

**Measures, Targets, and Findings**

**M 1: Successful completion of pre-dissertation research (O: 5)**

PhD students must completed a pre-dissertation research project as part of the program and prior to taking the comprehensive exam.

Source of Evidence: Project, either individual or group

**Target for O5: Use and conduct research**

100% of students will successfully complete their pre-dissertation.

**Findings 2011-2012 - Target: Met**

6 students completed predissertation during 2011-2012 academic year.

**M 2: Successful completion of dissertation research (O: 5)**

A doctoral dissertation that represents independent scholarly research is required.

Source of Evidence: Senior thesis or culminating major project

**Target for O5: Use and conduct research**

100% of students who defend their dissertation will be successful.

**Findings 2011-2012 - Target: Met**

6 students defended dissertation in 2011-2012 academic year. None attempted and was unsuccessful.

**Findings 2011-2012 - Target: Met**

6 students defended dissertation in 2011-2012 academic year. None attempted and was unsuccessful.

**M 3: Successful completion of comprehensive examination (O: 2, 4, 5, 6, 7, 8)**

A comprehensive examination that assesses knowledge of advanced principles of psychology, school psychology, ethics, and professional practice must be passed prior to graduation.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O2: Follow the tenets of legal, ethical, and social responsibility in practice**

As part of their comprehensive examination, at least 90% of students will demonstrate the ability to follow tenets of legal, ethical, and social responsibility in practice.

**Findings 2011-2012 - Target: Met**

1/1 person took and passed comprehensive exam in 2011-2012

**Target for O4: Understand the principles of psychology and school psychology**

As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of the principles of psychology and school psychology.
### Findings 2011-2012 - Target: Met
1/1 person took and passed the comprehensive exam in 2011-2012

#### Target for O5: Use and conduct research
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of the use and conduct of research.

Findings 2011-2012 - Target: Met
1/1 person took and passed the comprehensive exam in 2011-2012

#### Target for O6: Intervention
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of effective intervention practices.

Findings 2011-2012 - Target: Met
1/1 person took and passed the comprehensive exam in 2011-2012

#### Target for O7: Consultation
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of effective consultation practices.

Findings 2011-2012 - Target: Met
1/1 person took and passed the comprehensive exam in 2011-2012

#### Target for O8: Psychoeducational Assessment
As part of their comprehensive examination, at least 90% of students will demonstrate an understanding of psychoeducational assessment.

Findings 2011-2012 - Target: Met
1/1 person took and passed the comprehensive exam in 2011-2012

M 5: Readiness for Entry into Practice (O: 1, 2, 3, 4, 5, 6, 7, 8)
Our graduates are assessed evaluating all program goals during his/her pre-doctoral internship. Licensed site supervisors are asked to evaluate each student utilizing a 5 point likert scale. 5= Student demonstrates outstanding and/or advanced performance on this objective and competency. 4= Student demonstrates satisfactory performance on this objective and competency. 3= Student’s performance on this objective and competency is developing. 2= Student’s performance on this objective needs improvement; remediation plan may be required. 1= Student’s performance on this objective and competency is unsatisfactory; remediation required.

Source of Evidence: Field work, internship, or teaching evaluation

#### Target for O1: Diversity Awareness & Sensitive Service Delivery
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for diversity and cultural awareness.

#### Target for O2: Follow the tenets of legal, ethical, and social responsibility in practice
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for ethics and professional behavior

#### Target for O3: Understand the practice of psychology
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

#### Target for O4: Understand the principles of psychology and school psychology
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for readiness to enter practice

#### Target for O5: Use and conduct research
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

Findings 2011-2012 - Target: Met
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for use of research
### Target for O6: Intervention
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2011-2012 - Target: Met**
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for intervention skills

### Target for O7: Consultation
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2011-2012 - Target: Met**
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for consultation

### Target for O8: Psychoeducational Assessment
100% of doctoral interns will receive a rubric rating of "3" or higher for this area of competency.

**Findings 2011-2012 - Target: Met**
100% of 2011-12 interns received a score of "3" or higher on supervisors rating for assessment

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Consider modification of comprehensive examination process
The school psychology faculty will review student performance on previous and upcoming administrations of our doctoral comprehensive examination. Based on our review, revisions may be made to the examination structure and/or scoring process.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Review of comprehensive examination results; discuss and possible development of alternate comp procedures.
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** School Psychology Faculty

#### continue emphasizing research completion
Faculty should continue emphasizing research completion and examining opportunities to decrease coursework requirements

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Successful completion of dissertation research | Outcome/Objective: Use and conduct research
- **Responsible Person/Group:** Truscott & Faculty
- **Additional Resources:** none

#### modify program materials to reflect changes in course requirements
all materials need to be modified to reflect increased research and elimination of the core.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** handbook and web-based materials
- **Projected Completion Date:** 01/2013
- **Responsible Person/Group:** Truscott
- **Additional Resources:** GA time

### Analysis Questions and Analysis Answers

#### CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
We continue to graduate large numbers of PhD students. This should continue for 2 more years until we are at a more reasonable number of students.

#### CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Publications and presentations continue to occur at high levels, which indicates we are making good progress on research emphasis.

#### CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
We have reduced courses overall by eliminating the requirement for a cognate and some other COE core courses, while increasing research requirements.
Mission / Purpose
The mission of the MEd. Online Program in Science Education is to provide an opportunity for certified teachers to build capacity in science teaching by expanding their content knowledge and pedagogical practices. Candidates develop knowledge, teaching expertise, and dispositions that will enable them to become educators who are: informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and local and global communities.

Goals
G 1: Goal/Purpose Statement
Candidates who are admitted to this program have basic science knowledge; therefore the goals of the program divided into three areas: Planning, effects on P-12 learners and content. 1. Planning: Candidates will expand their content and pedagogical knowledge of the natural sciences by excelling in science courses that will enable them to plan and implement lessons that demonstrate their understanding of science concepts and principles. Effects on P-12 Learners Candidates will enlarge their content base and pedagogical practices through application where they demonstrate their knowledge and skills of advanced topics in the natural sciences and pedagogical practices that include teaching science as inquiry with emphasis on the nature of science, working with diverse student populations, developing assessment strategies that will target the academic development of the learner in the area of science. Candidates will engage in reflective practice to improve their instructional practices. Content Candidates will expand their content knowledge of the natural sciences by excelling in science courses that they will enable them to plan and implement lessons that are interdisciplinary in which they teach learners how to show respect for science, each other, the school and the community.

Student Learning Outcomes/Objectives
SLO 1: Planning (Pedagogical Knowledge and Skills) (M: 1)
Aligned with Goal 1; Key Assessment - Professional and Pedagogical Knowledge and Skills: Exit Portfolio Standard – Skills of Science Candidates will be able to: Utilize their content and pedagogical knowledge of science to develop a variety of teaching actions, strategies, and methodologies including interactions with students that promote learning and achievement in their instructional plans.

SLO 2: Effects on P-12 Student Learning (M: 2)
Aligned with Goal 2; Key Assessment – Effects on P-12 Learners: Exit Portfolio Assessment and Impact on Student Learning Candidates will be able to: Use a variety of contemporary and traditional assessment strategies to evaluate the academic, social, and personal development of the learner in all aspects of science, and engage in reflective practice by using outcome data to guide and change instruction.

Other Outcomes/Objectives
O/O 3: Content Knowledge (M: 3)
Aligned with Goal 3; Key Assessment – Content Knowledge; Exit Portfolio Standard: Content Candidates will be able to: Develop lessons that utilize concepts and processes in science in order to teach science as an interdisciplinary unit; as inquiry with the inclusion of the nature of science, and in relationship to the personal, historical, and social perspectives of life. Candidates will also incorporate the use of technology in their teaching.

Measures (Key Assessments), Targets, and Findings
M 1: Measure for Planning (Pedagogical Knowledge and Skills) (O: 1)
Candidates will develop lesson plans using a variety of teaching actions, strategies, and methodologies including interactions with students that promote learning and achievement in their instructional plans. Candidates must achieve a rating of at least "3" out of "5" for this measure.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Planning (Pedagogical Knowledge and Skills)
1. Candidates will develop lesson plans using a variety of teaching actions, strategies, and methodologies including interactions with students that promote learning and achievement in their instructional plans. Candidates must achieve a rating of at least "3" out of "5" for this measure.

Findings 2011-2012 - Target: Met
All of the candidates scored at the "4" out of "5"on this target indicating that they have knowledge of when to engage students in inquiry projects and how to link these instructional practices to things that are taking place in the lives of their students. In addition, data indicate that students have a good understanding of how to assess their students and use this data to improve instruction.
**M 2: Measure for Effects on P-12 Student Learning (O: 2)**

Measure for Effects on P-12 Student Learning: Candidates will use a variety of contemporary and traditional assessment strategies to evaluate the academic, social, and personal development of the learner in all aspects of science, and engage in reflective practice by using outcome data to guide and change instruction. Students must achieve a rating of at least “2” out of a possible “3” for this measure.

Source of Evidence: Portfolio, showing skill development or best work

**Findings 2011-2012 - Target: Met**

All of the candidates (100%) received a good rating for this measure. Fifty percent of the students scored a rating of “3” out of “3” and 50 percent scored a rating of “2” out of “3”. This indicates that the candidates have a good understanding of how to develop assessment instruments that are aligned with their teaching goals and objectives in order to determine the impact that their teaching had on students’ performance.

**M 3: Measure for Content Knowledge (O: 3)**

Candidates will develop lessons that utilize concepts and processes in science in order to teach science as an interdisciplinary unit; as inquiry with the inclusion of the nature of science, and in relationship to the personal, historical, and social perspectives of life. Candidates will also incorporate the use of technology in their teaching. Students must achieve a rating of at least “2” out of a possible “3” for this measure.

Source of Evidence: Portfolio, showing skill development or best work

**Findings 2011-2012 - Target: Met**

All of the candidates (100%) met by scoring a rating of “2” out of “3”. This implies that the candidates have a good understanding of how teach science content and make it meaningful to real life situations.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Clinical Practice**

Linked to Clinical Practice (Pedagogical Knowledge) Data show that 33% of the students scored at the far exceeds expectation level, 33% scored at the exceeds expectation level, and 33% scored at the exceeds level. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing course work. Several students had to resubmit their work more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content for EDSC 7550, EDSC 8600, EDSC 8430, and EDSC 8400.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High

Relationships (Measure (Key Assessment) | Outcome/Objective):
Measure (Key Assessment): Measure for Content Knowledge | Outcome/Objective: Content Knowledge

Implementation Description: Plan should be fully implemented at the end of the fall semester 2010.
Projected Completion Date: 11/2010
Responsible Person/Group: All faculty teaching in the MEd. Online Program in Science.
Additional Resources: No additional resources needed.
Budget Amount Requested: $0.00 (no request)

**Effects on P-12 Learning**

Linked to the Effects on P-12 Learning Data show that 50% of the students scored at the far exceeds expectation level and 50% scored at the meets level. The portfolio standards were not assigned as a part of any course requirement; therefore, the students received feedback for their portfolios after completing course work. Several students had to resubmit their work more than twice to receive an acceptable rating. Portfolio standards will be embedded in the course content for EDSC 7550, EDSC 8600, and EDSC 8400.

**Projected Completion Date:** 11/2010  
**Responsible Person/Group:** All faculty teaching in the MEd. Online Program in Science.

**Additional Resources:** None  
**Budget Amount Requested:** $0.00 (no request)

### Content Knowledge

Linked to Content Knowledge: Data show that 37.5% of the students scored at the far exceeds expectation level and 62.5% scored at the exceeds expectation level. The portfolio standards were assigned as part of course requirements for EDSC 7550, EDSC 8600, EDSC 8430, and EDSC 8400. Several students had to resubmit their work more than once to receive an acceptable rating. The minimum number of submissions was two and the maximum was 27. In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**  
Measure (Key Assessment): Measure for Content Knowledge | Outcome/Objective: Content Knowledge

**Implementation Description:** In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio. Students will be notified of the sessions through email.

**Projected Completion Date:** 12/2011  
**Responsible Person/Group:** All Science Education Faculty.

**Additional Resources:** No additional resources are needed.  
**Budget Amount Requested:** $0.00 (no request)

### Effects on P-12 Learning

Linked to the Effects on P-12 Learning Data show that 37.5% of the students scored at the far exceeds expectation level, 12.5% at the exceeds level, and 50% scored at the meets expectation level. The portfolio standards were assigned as part of course requirements for EDSC 7550, EDSC 8600, and EDSC 8400. Several students had to resubmit their work more than once to receive an acceptable rating. The minimum number of submissions was 2 and the maximum was 27. In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**

**Implementation Description:** In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio. Students will be notified of the sessions through email.

**Projected Completion Date:** 12/2011  
**Responsible Person/Group:** All Science Education Faculty.

**Additional Resources:** No additional resources are needed.  
**Budget Amount Requested:** $0.00 (no request)

### Planning (Pedagogical Knowledge and Skills)

Linked to Planning (Pedagogical Knowledge and Skills) Data show that 37.5% of the students scored at the far exceeds and exceeds expectation levels and 25% scored at the meets expectation level. The portfolio standards were assigned as a part of the course requirement for EDSC 7550 and EDSC 8400 which meant that the students completed the portfolio requirement while enrolled in a methods course. Several students had to resubmit their work more than once to receive an acceptable rating. The minimum number of submissions was two and the maximum was 27. In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio in order to minimize the number of revisions to obtain an acceptable document.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**  
Measure (Key Assessment): Measure for Planning (Pedagogical Knowledge and Skills) | Outcome/Objective: Planning (Pedagogical Knowledge and Skills)

**Implementation Description:** In addition to support in the classes, special virtual tutoring sessions will be offered to students to help them with the development of the exit portfolio in order to minimize the number of revisions to obtain an acceptable document.

**Projected Completion Date:** 12/2011  
**Responsible Person/Group:** All Science Education Faculty.

**Additional Resources:** None  
**Budget Amount Requested:** $0.00 (no request)
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
NA

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
NA

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
NA

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
NA

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Students were asked to complete an exit portfolio which was not completely aligned with the Key Assessments. Faculty worked with the Associate Department Chair to aligned the National Science Teacher Standards with the Key Assessments. This alignment allows the evaluator of the portfolio to identify areas of improvement for both the students and the program.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Inquiry is presently taught in the EDSC 8400 Strategies of Science Instruction, however, in the upcoming year, the course will be modified to engage candidates in mini inquiry projects that can be used in their science classroom. Also in EDSC 8400, the focus has been on one aspect of the learning environment which is safety, but in the future a more holistic approach will be used which focus on the total learning environment inclusive of psychological, social, emotional, and instructional settings.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?
NA

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?
NA

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
NA

Georgia State University
Assessment Data by Section
2011-2012 Science Education--TEEMS MAT
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Master of Art in Teaching (MAT) in Secondary Science is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MAT Secondary Science program is to prepare educators who are: informed by research, knowledge and reflective practice; empowered to serve as change agents; committed to and respectful of all learners; and engaged with learners, their families, schools, and local and global communities.

Goals
G 1: Content Knowledge
1. Candidates will be seen as more knowledgeable than others in their classrooms, in their schools, and in their communities with regard to their understandings of the content and ways of knowing within the disciplines of science

G 2: Professional and pedagogical knowledge, skills, and dispositions
2. Candidates will be skilled craftspeople with the appropriate dispositions for translating their content knowledge into meaningful learning experiences for a diverse set of learners in grades 6 - 12 science classrooms.
G 3: Impact on student learning
3. Candidates will be reflective professionals with the capacity to analyze the effect that their teaching practices have on the learning of the students in their grades 6 - 12 science classes.

Student Learning Outcomes/Objectives

SLO 1: Content Knowledge (G: 1) (M: 1)
Candidates will possess and use research-based, discipline-specific knowledge and pedagogy to facilitate learning for all.

SLO 2: Professional and Pedagogical Knowledge (G: 2) (M: 2)
Candidates will be able use their knowledge of child, adolescent, and adult development and theories of learning to design meaningful educational opportunities for all learners.

SLO 3: Pedagogical Skills and Learning Experiences (G: 2) (M: 3)
Candidates will be able to coordinate time, space, activities, technology and other resources to provide active and equitable engagement of diverse learners in real world experiences.

SLO 6: Impact on Student Learning and Assessment (G: 3) (M: 6)
Candidates will be able to design and utilize a range of formal and informal assessment strategies to evaluate and ensure the continuous development of all learners and support learners in engaging in the process of self-assessment.

SLO 7: Impact on Student Learning and Reflection (G: 3) (M: 7)
Candidates will be able to reflect critically upon data as part of a recursive process when planning, implementing and assessing teaching, learning, and development.

Other Outcomes/Objectives

O/O 4: Pedagogical Skills and Learning Environments (G: 2) (M: 4)
Candidates will be able to create engaging learning environments where the diverse perspectives, opinions, and beliefs of others are acknowledged and respected.

O/O 5: Professional Dispositions (G: 2) (M: 5)
Candidates will be able to exhibit ethically-appropriate behavior towards students, colleagues, administrators, and community members and will be able to commit to continuing personal and professional development.

Measures (Key Assessments), Targets, and Findings

M 1: Objective 1 - Content Knowledge (O: 1)
There will be three sources of data for determining the extent to which a candidate has met this objective: 1. The candidates' performance on the GACE Broadfield and / or discipline-specific content exams. 2. Supervisor ratings on the Standard 1: Content Knowledge components of the Mid-term and Final Evaluation Key Assessments. 3. Reviewer ratings on the content and curriculum standard in the final e-portfolio.

Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Content Knowledge
1. For the GACE tests, the target is for 100% of the candidates to pass both sections of the Broad Field Science Exam (024 and 025). 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 3.25 rating, with no more than 15% of the candidates receiving ratings of Beginner level or below.

Findings 2011-2012 - Target: Met
1. We had a 100% pass rate on the GACE broadfield exam by our candidates during the reporting period. Thus, it is clear that our candidates have successfully met this proficiency area associated with the program. 2. More than 80% of the candidates were rated at the "Effectively Demonstrated" level and 15% at the "Acceptable" level on the Mid-term and Final Evaluation. No candidates scored at the "Basic" level which means that the candidates exceeded the expectation for this assessment. 3. INTASC Standards 1 (Content Knowledge) and 7 (Curriculum Decisions) were used to document the content knowledge of candidates in the portfolio. Candidates did extremely well on this segment of the key assessment. For Standard 1, 51% of them were rated at the Advanced level, 42% at the Proficient level, and 7% of the candidates did not complete this standard. Standard 7 revealed that 35% of the candidates were rated at the Advanced level, 57% at the proficient level, and 7% of the candidates did not complete this segment of the portfolio. The measure for this target indicate that the candidates far exceeded the expected performance.

M 2: Objective 2 - Professional and Pedagogical Knowledge (O: 2)
There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Learning Goals and Design for Instruction assignments in the Teacher Work Sample 2. Ratings by supervisors on the Mid-term and Final Evaluation related to this area 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work
Target for O2: Professional and Pedagogical Knowledge

1. For the Learning Goals assignment, the target is for the candidates to average a score of 17 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 25% of the candidates receiving a rating of Beginner or below.

Findings 2011-2012 - Target: Met

Overall the ratings attained by the candidates on the different assignments that comprised this larger assessment area indicate that our candidates have developed effective capacities in the areas addressed by the assignment elements. This assertion is supported by the fact that the mean average for the candidates was above a 4 (out of 5) on all 25 elements. However, one can identify a couple of elements for which there is room for improvement. For instance, in the category 'Multiple Modes and Approaches', more candidates were rated 'Proficient' (the 2nd highest rating) than were rated 'Exemplary' (the highest rating) prior to 2012; however, the data for 2012 show that more students scored exemplary than proficient. This improvement may be accounted for by the increased efforts to help students develop and apply these skills. It was also true of the categories 'Activities, Assignments and Resources', 'Implications for Instructional Planning and Assessment', and 'Use of Contextual Information'. Mid-term and Final Evaluation Rubrics show that more than 80% of the students scored at the "Effectively Demonstrated" level and 15% at the "Acceptable" level. All of the candidates scored above the "Needs Improving" level. 3. INTASC Standards 2 (Student Learning and Development) was used to document Professional and Pedagogical Skills in the portfolio. Candidates did extremely well on this segment of the key assessment. Data revealed that 40% of the candidates were rated at the Advanced level, 24% at the Proficient level, 29% at the Basic level and 7% did not complete this section of the portfolio. The measure for this target indicates that it was met since only 7% of the candidates did not complete the portfolio.

M 3: Objective 3 - Pedagogical Skills and Learning Experiences (O: 3)

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Design for Instruction and Instructional Decision Making assignments in the Teacher Work Sample. 2. Ratings by the supervisor on this element in the Mid-term and Final Evaluation Key Assessment. 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work

Target for O3: Pedagogical Skills and Learning Experiences

1. For the Design for Instruction assignment, the target is for the candidates to average a score of 27 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements; for the Instructional Decision Making assignment, the target is for the candidates to average a score of 13 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 25% of the candidates receiving a rating of Beginner or below.

Findings 2011-2012 - Target: Met

Target 1: All of the candidates did extremely well on this target. The data for the Design for Instruction showed that 86% of them scoring at the Exemplary level, 12% at the Proficient level, and 2% at the Acceptable level. The ratings for Instructional Decision Making revealed that 87% of the students received a rating Exemplary and 13% Proficient. This data confirms that the candidates exceeded the expectation of the target in that none of the candidates scored at an unacceptable level. Target 2: Candidates were rated very high on the Mid-term and Final Evaluation rubrics. Seventy percent of the candidates scored at the Exemplary level, 29% at the Proficient level and 1% at the Partially Demonstrated level. Candidate performance exceeded the expectation for this target. Target 3: INTASC Standards 3 (Student Diversity) and 4 (Instructional Variety) were used to document Pedagogical Skills and Learning Experiences in the portfolio. Candidates did extremely well on this segment of the key assessment. For Standard 4, 40% of them were rated at the Advanced level, 35% at the Proficient level, 18% at the Basic level and 7% of the candidates did not complete this standard. Standard 3 revealed that 40% of the candidates were rated at the Advanced level, 31% at the proficient level, 22% at the Basic level and 7% of the candidates did not complete this segment of the portfolio. The measures for this target indicate that the candidates met the expected performance since 7% of them scored at the Beginner level or below.

M 4: Objective 4 - Pedagogical Skills and Learning Environments (O: 4)

There will be two separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluations of the Contextual Factors assignment within the Teacher Work Sample. 2. Ratings by the supervisor on this element in the Mid-term and Final Evaluation Key Assessments. 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work

Target for O4: Pedagogical Skills and Learning Environments

1. For the contextual factors assignment, the target is for the candidates to average a score of 21 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 25% of the candidates receiving a rating of Beginner or below.

Findings 2011-2012 - Target: Met

Target 1: Candidates demonstrated their knowledge of Contextual Factors by scoring a rating of 81% at the Exemplary level and 19% at the Proficient level. None of the students scored at the unacceptable level. Disaggregation of the data indicated that the candidates need more support in the use of a variety of approaches to support their instructional practices. Target 2: Candidates were rated very high on the Mid-term and Final Evaluation rubrics. More than seventy percent of the candidates scored at the Effectively Demonstrated level and 29% at the Adequately Demonstrated level. Candidate performance exceeded the expectation for this target. Target 3: INTASC Standard 5 (Learning Environment) was used to document Pedagogical Skills and Learning Environment in the portfolio. Candidates did extremely well on this segment of the key assessment based on the following ratings: 22% of them were rated at the Advanced level, 60% at the Proficient level, 18% at...
M 7: Objective 7 - Impact on Student Learning and Reflection (O: 7)

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Reflection & Self-Evaluation assignment within the Teacher Work Sample. 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments. 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work

Target for O7: Impact on Student Learning and Reflection

1. For the Reflection & Self-Evaluation assignment, the target is for the candidates to average a score of 22 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates being rated at the Beginner level or below.

Findings 2011-2012 - Target: Met

Target 1: The data related to this Assessment Plan instrument indicate that the candidates have a good understanding of how to assess students as well as how to use assessment data to guide instruction. The average rating for the instrument showed that 87% of the students were rated Exemplary and 13% proficient. None of the students received a rating less than 3. Target 2: There are three areas of this Assessment Plan instrument which will be focused upon because they are unique to this instrument: Knowledge of Students and Learning, Learning Environments, and Planning and Instruction. An overall analysis of the ten elements related to these areas suggests that our candidates are leaving the program being able to use their knowledge of their students and their learning styles to both create a learning environment conducive to productive interactions and to plan and implement instruction that takes these factors into account. This assertion is supported by the fact that the mean average for each of these ten elements was above a 3 (out of a possible 4). As with other assessment instruments, a more fine-grained analysis of the data points to a couple of areas for improvement. For instance, 42% of them were rated at the Advanced level, 46% at the Proficient level, and 11% at the Basic level. The measures for this target indicate that the candidates exceeded the expected performance of this standard.

M 6: Objective 6 - Impact on Student Learning and Assessment (O: 6)

There will be three separate sources of data for determining the extent to which a candidate has met this objective: 1. Evaluation of the Assessment Plan assignment, the target is for the candidates to average a score of 22 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. 3. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates being rated at the Beginner level or below.

Findings 2011-2012 - Target: Met

Target 1: The Reflection and Self-Evaluation assignment within the Teacher Work Sample. 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments. 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work

Target for O6: Impact on Student Learning and Assessment

1. For the Assessment Plan assignment, the target is for the candidates to average a score of 22 overall, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. 2. For the Mid-term and Final Evaluation rubrics, the target is for the candidates to average a 3.5 rating, with no more than 10% of the candidates receiving ratings of 2 or 1. For the corresponding section of the Electronic Portfolio, the target is for the candidates to average a 4.25 rating, with no more than 15% of the candidates being rated at the Beginner level or below.

Findings 2011-2012 - Target: Met

Target 1: The Reflection and Self-Evaluation assignment within the Teacher Work Sample. 2. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments. 3. Evaluation by reviewers of the section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work

Target for O5: Professional Dispositions

1. For the Disposition Key Assessment rubric, the target is for the candidates to average an overall rating of 18, with no more than 25% of the candidates receiving a rating of 2 or 1 on any of the rubric elements. Ratings by the supervisor on the Mid-term and Final Evaluation Key Assessments 3. Evaluation by reviewers of this section of the e-portfolio dedicated to this domain.

Source of Evidence: Portfolio, showing skill development or best work

Findings 2011-2012 - Target: Met

Target 1: The number of features of the candidates' dispositions which were examined by this instrument. In general, the data suggests that students are leaving the program with the proper dispositions to be an effective secondary school teacher as indicated by the fact that the averages on each of the elements was above a 3 (out of 4). This assertion is supported by the fact that by spring 2012 92% of the candidates scored at the Exceptional level and none of the candidates received a rating less than 3. This target was met.
the needs of diverse populations of students. In these areas, more candidates scored "Adequately Demonstrated" (2nd highest rating) or "Partially Demonstrated" (3rd highest rating) as scored "Effectively Demonstrated" (highest rating). Target 3: INTASC Standards 9 (Reflective Practitioner) was used to document impact on Student Learning - Reflection in the portfolio. Candidates did extremely well on this segment of the key assessment. For this standard, 35% of them were rated at the Advanced level, 53% at the Proficient level, and 11% at the Basic level. The measure for this target indicates that the candidates exceeded the expected performance for this standard.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Extended Practica**
Specific findings will be shared with faculty members who teach in the MAT Science Program. Faculty have recommended that practica experiences be lengthened to provide for additional practice time under the supervision and guidance of their mentor teachers.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- **Measure (Key Assessment):** Objective 4 - Pedagogical Skills and Learning Environments
- **Outcome/Objective:** Pedagogical Skills and Learning Environments

- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** Lisa Martin-Hansen

**Extended Practicum**
Specific findings will be shared with faculty members who teach in the MAT Science Program. Faculty have recommended that practica experiences be lengthened to provide for additional practice time under the supervision and guidance of their mentor teachers.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** Lisa Martin-Hansen

**Related Action Plan(s):**
Faculty members teaching in the MAT science program will revisit standard #6 and revise the activities targeting these areas.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- **Measure (Key Assessment):** Objective 1 - Content Knowledge
- **Outcome/Objective:** Content Knowledge

- **Implementation Description:** Faculty member teaching in the MAT science program will revisit standard #6 and revise the activities targeting these areas
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** MAT Science Ed Unit

**Concern over issues in the community and its assessment**
Even though the portfolio data indicates that this objective has been met, there was conflicting data coming from the observations. The issue seemed to be that if a supervisor did not see direct evidence of this objective in the lesson observed, the candidate was given a low score on the observation. In the portfolios, the candidates were able to show evidence in the artifacts they provided of meeting this objective. The point needs to be communicated to the supervisors that this objective needs to be assessed in the larger context of the whole practicum experience and not within the thin slice of a few observations.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure (Key Assessment) | Outcome/Objective):**
- **Measure (Key Assessment):** Objective 6 - Impact on Student Learning and Assessment
- **Outcome/Objective:** Impact on Student Learning and Assessment

**Implementation Description:** Certainly, the supervisors and faculty need to continue to emphasize this area of teaching practice. However, it seems important that the supervisors need to be given some guidance in how to think about assessing this objective. This guidance will be communicated by science education faculty, particularly the program coordinator.

- **Projected Completion Date:** 07/2011
- **Responsible Person/Group:** MAT Science Ed Unit

**Additional Resources:** None
Pedagogical Skills and Learning Experiences: Assistance with Teacher Work Sample

A. Pedagogical Skills and Learning Experiences: The results of the Teacher Work Sample (TWS) indicate that students need additional assistance in the following areas: Instructional design and planning and assessment. Data showed that students needed clearer explanations of the TWS and the integrated nature of the assignments. The following actions will be taken to help students improve their knowledge and skills in assessment, instructional planning and instructional design. Students will receive more assistance with the TWS assignment in the methods courses and the methods course assignments will be aligned with the TWS. During Professional Advisement Week, students will also receive help with the TWS.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure Objective 3 - Pedagogical Skills and Learning Experiences | Outcome/Objective: Pedagogical Skills and Learning Experiences

Implementation Description: Students will receive more assistance with the TWS assignment in the methods courses and the methods course assignments will be aligned with the TWS. During Professional Advisement Week, students will also receive help with the TWS.

Projected Completion Date: 04/2012
Responsible Person/Group: All science education faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Using Assessment Data

Impact on Student Learning and Assessment: Students showed acceptable performance on this standard; however, closer examination of the data revealed that there are some minor deficiencies with the interpretation of student assessment data. In the methods courses more emphasis will be placed on assessment, specifically how to use assessment data to improve instruction. A section of the assessment unit will cover data interpretation, particularly as it relates to different sub-groups of students within a class.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Projected Completion Date: 04/2012
Responsible Person/Group: All science education faculty
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Improvement of Assessment Strategies

The content of the courses and the nature of the assignments throughout the program are helping prepare our candidates to use a variety of assessment tools and to effectively develop these with instructional goals in mind, observational data and data obtained by supervisors through interactions with candidates hint that there is still room for improvement in this area. For instance, our candidates seem unwilling or unable to integrate non-traditional summative assessments (e.g. performance-based problems) with more traditional strategies. Our plan to continue to evolve the program in this area is to use assessment more as a thread throughout the methods courses so that whenever candidates engage in an activity designed to develop understanding of a particular pedagogical practice (e.g. using model-building to support conceptual understanding), there is an appropriate assessment tool tied to it. In addition, candidates will be asked to reflect on their assessment strategies and submit an assessment plan as a part of the Teacher Work Sample assignment. This process will be monitored and if necessary, a course in assessment may be offered in the future.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure Objective 7 - Impact on Student Learning and Reflection | Outcome/Objective: Impact on Student Learning and Reflection

Implementation Description: Faculty will help students develop assessment tools for performance based objectives which will also include authentic assessment.
Responsible Person/Group: All faculty teaching methods courses.
Additional Resources: None

Improving Classroom Management

Related to the standard of Pedagogical Skills and Learning Environments, the element on which candidates scored the lowest was related to learning environment. Faculty will place more emphasis on classroom management, particularly as it lays the foundation for other aspects of the classroom experience. Some format of classroom management will be included in the three methods classes.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure Objective 4 - Pedagogical Skills and Learning Environments | Outcome/Objective: Pedagogical Skills and Learning Environments

Implementation Description: Faculty will identify areas of classroom management that should be addressed in all methods classes.
Methods classes will be modified to include some format of classroom management.

**Responsible Person/Group:** All professors teaching the science methods courses.

**Additional Resources:** None at this time.

### Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements** - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

NA

**CTW Reflection 2: Assessment** - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

NA

**CTW Reflection 3: Needs** - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

NA

**CTW Reflection 4: Overall Reflection** - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

NA

### ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process for the M.A.T. Program in Science Education is reviewed every year in order to meet the needs of the candidates in the program. Efforts have been made during this academic year to streamline some of the more intense assignments such as the Teacher Work Sample Unit. Students are still required to do the unit, but more support is given to the candidates in the three Methods Classes, and the process of developing the unit is extended over two semesters with the candidate finishing the unit during the last semester of Practicum III. In addition, it was found that there was some repetition in the practicum assignments, so these assignments have been overhauled such that they remain challenging without any overlapping. The Key Assessments have not changed, but the assignments have been modified in order to improve the performance of candidates in every domain of each standard.

### ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

While there were no major areas of concern brought to light by an analysis of the data obtained from assessment instruments, there were some elements of the candidates' proficiencies which indicated areas where there is room for improvement. The assessment instruments associated with the Planning standard suggested that some candidates still need to work on being able to vary their instructional strategies and being able to tune those strategies to appeal to multiple modalities. There are two possible reasons for this: Either the candidates 'apprenticeship of observation' in science classrooms has made it difficult for them to break free from the classic transmissive mode of teaching or that an over-emphasis on inquiry has not allowed candidates to think about whether practices related to this kind of teaching are varied enough to meet the needs of all learners. This is something that must be explored further by those teaching and supervising in this program. Related to the standard of Clinical Practice, the element on which candidates scored the lowest was related to classroom environment. It is not surprising that, with all of the things a science teacher has to attend to, they might not give as much attention to the overall classroom environment as those evaluating them would like. Recently we have begun to place more emphasis in this area, particularly as it lays the foundation for other aspects of the classroom experience, so we will see if this makes a difference in future iterations of this program.

### ADMINISTRATIVE DEPT QUESTION 1:

Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

NA

### ADMINISTRATIVE DEPT QUESTION 2:

What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

NA

### ADMINISTRATIVE DEPARTMENT QUESTION 3:

How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

NA
**Mission / Purpose**

MISSION: The master's degree in Social Foundations of Education expands and deepens students' critical understandings that challenge traditional educational authority and accepted practices for advanced graduate work and professional lives.

**Goals**

**G 1: Designs and Conducts Research**
The student demonstrates the ability to design a major research study, appropriate at the Masters level.

**Student Learning Outcomes/Objectives**

**SLO 1: The student will complete a thesis or project (G: 1) (M: 1, 2)**
The student has completed a thesis or project advancing an original point of view as a result of Social Foundations research.

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

**Measures, Targets, and Findings**

**M 1: Masters Scoring Activity (O: 1)**
A faculty advisor and two committee members are responsible for directing the master's thesis research or master's projects. During the last academic term of coursework, each student will be required to complete an oral examination. The candidate's committee will administer the oral examination, which is not to exceed two hours. The committee will complete the scoring rubric after the oral exam (see Document Repository). The criteria are: 1. Understands the concepts and tools of inquiry in foundational disciplines

2. Demonstrates knowledge of previous research or literature in the field

3. Makes normative or critical judgments that are insightful and detailed

4. Provides evidence of quality written work (see Analytical Writing Guide)

5. Conducts a quality oral defense

Source of Evidence: Senior thesis or culminating major project

**Target for O1: The student will complete a thesis or project**
95% of MS Social Foundations students will meet or exceed expectations as outlined in the scoring rubric.

**Findings 2011-2012 - Target: Met**
Two students completed a thesis or project during the review period.

**M 2: Thesis or Project Completed (O: 1)**
Graduate committee completed assessment according to grading rubric.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: The student will complete a thesis or project**
The program graduated 2 students with thesis/project that met the requirements.

**Findings 2011-2012 - Target: Met**
The unit found the rubric satisfactory for assessment purposes in this cycle.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**MS thesis and project options**
Monitor the quality of students who select the thesis or project option.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Masters Scoring Activity | Outcome/Objective: The student will complete a thesis or project

Projected Completion Date: 05/2012
Responsible Person/Group: MS Program Coordinator
Additional Resources: 0

**New assessment summary**
The unit will implement a new student assessment summary for the next cycle.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Thesis or Project Completed | Outcome/Objective: The student will complete a thesis or project
Responsible Person/Group: Unit coordinators
Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We evaluated our assessment of learning outcomes through the APRC process. As a result we will create a new data collection instrument and analysis techniques as to achievement of performance milestones.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We will create and implement an annual student report that will be used for assessment purposes.

Annual Report Section Responses

**Most Important Accomplishments for Year—**Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.

We completed an APR review in Fall of 2012.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Social Studies Education MEd**

As of: 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The mission of the Master of Education (MED) in Social Studies is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MED Social Studies program is to prepare educators (i.e., teachers and other professional school personnel) who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and • engaged with learners, their families, schools, and local and global communities.

**Goals**

**G 1: Goal: Leadership**
1) Leaders in their Social Studies communities;

**G 2: Goal: Pedagogical Content Knowledge**
2) Creators of democratic, socioconstructivist learning environments for diverse students using appropriate pedagogical content knowledge and innovative technology; and,

**G 3: Goal: Scholarship**
3) Scholars of educational theory and research as applied to social studies education.

**Student Learning Outcomes/Objectives**

**SLO 1: Content Knowledge (G: 1, 2) (M: 1)**
1) Content Knowledge Standards: Candidates demonstrate deep subject knowledge in a minimum of two social studies content areas: 1) multiculturalism (required) and 2) one of the following: history, world geography, economics, civics, sociology, and/or psychology (Goal 1, 2 / Key Assessment: Portfolio)

**SLO 2: Curriculum Standards (G: 1, 3) (M: 1)**
2) Curriculum Standards: Candidates demonstrate knowledge of major concepts, issues, and processes of inquiry relevant to social studies as well as articulates major theories, debates, and issues in social studies education (Goal 1, 3 / Key Assessment: Portfolio)

**SLO 3: Learning Environment (G: 2, 3) (M: 1)**
3) Learning Environment: Candidates establish a positive and engaging learning environment for all students within the field of social studies education (Goal 2, 3 / Key Assessment: Portfolio)

**SLO 4: Knowledge of Students (G: 2, 3) (M: 1)**
4) Knowledge of Students: Candidates posses deep knowledge of students and adaptations to their individual situations to provide for optimal learning (Goal 2, 3 / Key Assessment: Portfolio)
SLO 6: Disposition (G: 1, 2, 3) (M: 2)

6) Disposition: Candidates demonstrate empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision. (Goal 1, 2, 3 / Key Assessment: Unit-wide Dispositions Rubric)

Measures (Key Assessments), Targets, and Findings

M 1: Professional Portfolio (O: 1, 2, 3, 4, 5)

Portfolio Instructions Provided for Each Key Assessment Below: Overview The portfolio for the Master of Education in Social Studies serves as an exit requirement for this program. Each fall and spring semester, portfolio development seminars will be held during MSIT’s Professional Advising Week (PAW). During these seminars, faculty and students collaboratively discuss the standards for the program, relevant artifacts, and how to compile the program portfolio. As a Master of Education in Social Studies, expertise in the following standards (adapted from National Council on the Social Studies and the Georgia Professional Growth Plan based on the Extended Georgia Framework for Teaching) must be demonstrated through the portfolio which consists of at least three (3) artifacts demonstrating proficiency in each standard. Evaluation of the Portfolio Formal evaluation of each students' portfolio takes place at the final semester of the program; it is suggested you submit a draft well prior to the due date for feedback from your advisor. The final evaluation will be based on an examination of the submitted portfolio. All portfolio standards must be met by a minimum rating of a “3” for candidates to be recommended to graduate. If you have questions, you can go to the HELP BUTTON at the top of the screen, or contact your advisor for assistance. Guidelines for Creating your Portfolio: 1. Read each standard carefully. Each standard contains multiple elements. Be sure to address each element explicitly. 2. Read the assessment rubric carefully: The criteria for each standard indicate the way each narrative and its corresponding artifacts will be evaluated. 3. Write thorough but concise narrative essay: Be sure that your narratives are well-developed, but not excessively wordy. Narratives should be focused on the standard and should be well-organized, clear, and coherent. 4. Explain how each artifact relates to the standard: Each carefully chosen artifact should be introduced in the narrative along with an explanation of how the artifact demonstrates how you have met the standard. As a general rule, artifacts should be those you (or your students) have created during your degree program. 5. Use other professionals as resources: Seek feedback on your writing and artifacts from your peers and other professional colleagues. Share your work with others prior to submitting your portfolio for review. 6. Consider feedback from a colleague: The feedback you receive from your draft evaluation will guide your revisions for the final portfolio. 7. Proofread carefully: Consider the portfolio as a representation of your professionalism. You may be asked to revise narratives if your writing does not meet expected standards for writing at the graduate level. Consider visiting the UniversityWritingCenterfor assistance, if needed: http://www2.gsu.edu/~wwwwcr/services.html. Compiled by Teresa Fisher, Mary Ariail, and Dana Fox

Source of Evidence: Project, either individual or group

Target for O1: Content Knowledge

All students will achieve an exemplary or accomplished level of portfolio performance as indicated on the rubric.

Findings 2011-2012 - Target: Partially Met

Rubric: CONTENT KNOWLEDGE: Social Studies Content Exemplary (4 pts) Accomplished (3 pts) Advanced (2 pts) Basic (1 pt) No Evidence (0 pts) Mean Mode Stdev Cultural Studies/Diversity - Overall Assessment of Content Knowledge 4 (100%) 0 0 0 4.00 4.00 0.00 Overall Assessment of Learning 3 (75%) 1 0 0 0 3.75 4.03 Overall Assessment of Effects on Student Learning 3 (75%) 1 0 0 0 3.75 4.03 Overall Assessment of Clinical Practice 2 (50%) 0 0 0 3.50 3.00 Overall Assessment of Professionalism 4 (100%) 0 0 0 4.00 4.00 Cultural Studies/Diversity - Required 2 (50%) 1 (25%) 0 1 (25%) 0 3.00 4 1.22 Historical Inquiry - Option 1 2 (66%) 1 0 0 0 3.67 4.07 Civic Action - Option 2 2 (66%) 1 0 0 0 3.67 4.07 Geographic Perspectives - Option 3 1(50%) 1 0 0 0 3.50 3.50 Society & Technology & Economics - Option 4 1 (50%) 1 0 0 0 3.50 3.50

### M 2: Unit-Wide Dispositions Rubric (O: 6)

Faculty evaluate candidates on demonstration of empathy, a positive view of self and others, authenticity of interactions with others, and a long-range and meaningful purpose and vision.

Source of Evidence: Evaluations

#### Target for O6: Disposition

All students will achieve a (4= Strength, that means that the disposition is a pervasive trait of the student or 3 = Developing that means the student is aware of and values that trait.)

#### Findings 2011-2012 - Target: Met

All students assessed received either a 4, or 3 on all portions of the dispositions rubric indicating a met target.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### M.Ed. Collaboration

MSIT is in the process of combining the master’s degree programs in the department with the Educational Leadership department to create an innovative master’s degree program highlighting the social studies as well as urban teaching and leadership with a coaching and / or leadership endorsement.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 09/2010
- **Responsible Person/Group:** Ad Hoc Committee
- **Additional Resources:** n/a
- **Budget Amount Requested:** $0.00 (no request)

#### Recruitment

We need to look at how students are recruited for this program and work on some materials and/or processes to increase enrollment.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 04/2009
- **Responsible Person/Group:** Social Studies Faculty
- **Additional Resources:** n/a
- **Budget Amount Requested:** $0.00 (no request)

#### Revise Portfolio Assessment

We need to look at the portfolio assessment plan and revise it to better meet the GA frameworks and students' coursework.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 04/2010
- **Responsible Person/Group:** Social Studies Faculty
- **Additional Resources:** n/a
- **Budget Amount Requested:** $0.00 (no request)

#### Content Knowledge - Action Plan

All students did not achieve the exemplary or accomplished level of Content Knowledge. This is demonstrated in the program portfolio and program faculty should revisit this section of the portfolio to clarify the guidelines governing this section. Additionally, this M.Ed. is being collapsed into a more comprehensive M.Ed. program which will better address the issue of diversity. This new M.Ed. is expected to begin in Spring 2012.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure (Key Assessment) | Outcome/Objective):**
  - Measure (Key Assessment): Professional Portfolio | Outcome/Objective: Content Knowledge
- **Responsible Person/Group:** COE Program Faculty / SS Program Faculty
- **Additional Resources:** n/a

#### Create New MED Degree Program

1. **Content knowledge:** As a result of data analysis, faculty determined that students require more support in demonstrating their knowledge and ability to work with diverse cultures. The program faculty have determined that this is a function of the program portfolio, and not necessarily an indicator of a lack of knowledge or inability to accomplish this standard. 2. **Professional and pedagogical knowledge, skills, and dispositions:** Program faculty have determined that Social Studies M.Ed. students need more opportunity to engage in connecting theory and practice in the classroom. The new M.Ed. currently in the final approval process
accomplishes this task by adding a field work component that is especially important for graduate students who are not currently working in the school system. 3. Impact on student learning: Program faculty have determined that Social Studies M.Ed. students need more opportunity to engage in connecting theory and practice in the classroom to see firsthand their impact on student learning. The new M.Ed., which is currently in the final stages of the approval process, accomplishes this task by adding a field work (“practicum”) component that is especially important for graduate students who are not currently working in the school system.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** High  
**Projected Completion Date:** 10/2013  
**Responsible Person/Group:** Caroline Sullivan

### Analysis Questions and Analysis Answers

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

The students maintained strong results and accomplishments. In addition, faculty worked to create the new M.Ed., which is currently in the final stages of the approval process.

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Our graduate level M.Ed. students already exhibit high levels of critical thinking and frequently enroll in doctoral level classes. One faculty member commended the critical thinking of the M.Ed. students.

**CTW Reflection 3:** Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

N/A

**CTW Reflection 4:** Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

N/A

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

N/A

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

N/A

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A

---

**2011-2012 Social Studies Education--TEEMS MAT**  
As of: 12/13/2016 04:42 PM EST  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

The mission of the Masters of Education in Teaching (MAT) in Social Studies is aligned with the mission of the GSU Professional Education Faculty (PEF), which represents a joint enterprise within an urban research university between the College of Arts and Sciences and the College of Education, working in collaboration with P-16 faculty from diverse metropolitan schools. Grounded in these collaborations, the mission of the MAT Social Studies program is to prepare educators who are: • informed by research, knowledge and reflective practice; • empowered to serve as change agents; • committed to and respectful of all learners; and •
engaged with learners, their families, schools, and local and global communities.

Goals

G 1: Content and Pedagogical Knowledge
Candidates in social studies initial teacher education programs will be experts in their knowledge of the multiple contexts, purposes, and ends of education as well as specific pedagogical aims and interests.

G 2: Professional and Pedagogical Knowledge, Skills, and Dispositions
Candidates in social studies initial teacher education programs will be experts in the knowledge, skills, and dispositions needed to develop an understanding of the purposes and history of the field of social studies.

G 3: Student Learning
Our candidates will be effective educators who create learning environments that have a positive impact on student learning.

Student Learning Outcomes/Objectives

SLO 1: Content and Curriculum (G: 1) (M: 1)
The teacher candidate demonstrates content knowledge; adapts content and teaching to meet observed learner needs; builds teaching on a strong and current foundation in the content area(s) they teach; makes content relevant to students; uses available resources, including technology, to learn more about content area(s); and, follows state and local curriculum.

SLO 2: Planning (G: 2) (M: 2)
The teacher candidate locates, comprehends, and builds rationales from curriculum guides, other applicable documents, and experienced colleagues; plans and carries out instruction based on state and local performance standards; selects and varies instructional strategies, assessing their impact on student engagement and learning; observes students closely and acknowledges how adjustments in teaching can impact learning; explores teaching roles to discover appropriate approaches for assigned students; assesses individual learners’ needs and seeks resources to improve instruction and increase student achievement; learns to work and plan productively as part of a team, grade level, and/or department group.

SLO 3: Clinical Practice (G: 2) (M: 3)
The teacher candidate creates a learning environment in which students can learn both independently and collaboratively; organizes and manages time, space, activities, technology, software, and other resources; understands the importance of and builds a functional classroom management plan; seeks, uses, and refines strategies for motivating learners; creates a culturally responsive classroom; learns about and uses resources specific to the school, district, and community; develops appropriate verbal, nonverbal, and media communication techniques to foster supportive learning-based interactions in the classroom.

SLO 4: Dispositions (G: 2) (M: 4)
The teacher candidate learns basic information about the history, ethics, organization, and practices of education; learns about, locates resources for, and follow laws related to rights and responsibilities of students, educators, and families; adheres to state and local Codes of Ethics, and models ethical behavior for students; reflects on teaching practice and examines the connections to student learning; self-assesses teaching strengths and areas for improvement, seeking and using guidance from mentors and instructional leaders; works through appropriate channels to seek answers to questions, voice concerns, explore ideas, and speak out about issues that matter to them and their students; accepts entry-level leadership roles (e.g., clubs, special topics, coaching) with support of identified mentors, administrators, coaches, and facilitators.

SLO 5: Impact on Student Learning (G: 3) (M: 5)
The teacher candidate will have a basic understanding of assessment and measurement theory; collect and use pre-assessment data to select student learning goals; use formative and summative assessments at appropriate points in the learning process; identify students' learning needs and provide students with goals for learning; develop and implement consistent, fair, and accurate grading procedures; report student progress to students, families, and administrators; use required resources to keep accurate and up-to-date records and reports of student work and behavior; examine ways to identify student strengths and weaknesses through various assessment processes and methods.

Measures (Key Assessments), Targets, and Findings

M 1: Content and Curriculum (O: 1)
Data for the objective of Content Knowledge are taken from the Final StudentTeaching Evaluation Instrument. The final evaluation takes place at or near the end of Practicum II/III (student teaching). Students are evaluated on their command of Content Knowledge by their university supervisor, who observes and confers with students and considers feedback from the student's mentor teacher. Candidates are not given specific instructions for this assessment; rather, they demonstrate their content knowledge through their teaching performance and ongoing conversations with mentor teachers and university supervisors.

Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Content and Curriculum
100% of students will score at the level of Adequately Demonstrated and 80% of students will score at the level of Effectively Demonstrated on this standard.

Findings 2011-2012 - Target: Met
For the 2011-2012 target, 100% of the students scored at the level of adequately demonstrated and 95% of the students scored at the highest level of effectively demonstrated.
**M 2: Planning (O: 2)**

The key assessment for planning is contained in the rubrics for the Teacher Work Sample. Students are evaluated on their ability to plan a four-week unit based on contextual factors of the school setting, appropriate learning goals that they establish based on their knowledge of the context, an assessment plan that addresses the learning goals, and a design for instruction that includes at least four weeks of lesson plans. The instructions relevant to the assessment for planning are provided for the candidates in the students’ course template in the sections for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction. Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate’s TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Planning with the rubrics for Contextual Factors, Learning Goals, Assessment Plan, and Design for Instruction in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O2: Planning**

100% of students will score at the level of Proficient and 80% of students will score at the level of Exemplary on this standard.

**Findings 2011-2012 - Target: Met**

For the 2011-2012 target, 100% of students scored at the level of proficient and 95% of students scored at the level of exemplary.

**M 3: Clinical Practice (O: 3)**

Candidates are assessed for Clinical Practice with the use of rubrics contained in the Midpoint Teaching Evaluation Instrument (taken prior to students’ clinical practice) and the Final Teaching Evaluation Instrument (taken near the end of students’ clinical practice). Rubrics in these two instruments are based on the Georgia GSTEP standards and are used to assess students on Standard 2: Knowledge of Students and Learning, Standard 3: Learning Environments, Standard 4: Assessment, Standard 5: Planning and Instruction, and Standard 6: Professionalism. The first key assessment for Clinical Practice is given at or near the end of Practicum I. The emphasis in Practicum I is to familiarize candidates with the school through immersion in a middle school setting. Candidates are encouraged to observe a wide variety of settings within the school and to learn as much as possible about the school context, including classroom culture, policies, procedures, and protocols. Candidates plan and teach a limited number of lessons (5-10). At least three of these lessons are observed by the university supervisor, who uses an observation tool based on the Georgia Framework for Teaching. The university supervisor provides immediate feedback to the candidate after the lesson. Near the end of the Practicum semester, the university supervisor completes the Midpoint (Practicum) Teaching Evaluation Instrument, using knowledge of the candidate’s teaching performance gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate. The second assessment for Clinical Practice is done at or near the end of the candidates’ semester of student teaching. During this semester, which is typically spent in a high school (grades 9-12), the teacher candidates gradually take on an increasing amount of responsibility until they eventually assume the full role of the classroom teacher. During this semester, the candidates are required to teach a minimum of four weeks of lessons during which they plan, teach, reflect upon, and evaluate their praxis. The university supervisor conducts a minimum of three formal observations, providing feedback and support to the teacher candidate. Near the end of the student teaching semester, the university supervisor completes the Final Student Teaching Evaluation Instrument, using knowledge of the student gained through formal observations, oral and written feedback from the mentor teacher, and informal conversations and encounters with the candidate.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O3: Clinical Practice**

100% of students will score at the level of Adequately Demonstrated and 60% of students will score at the level of Effectively Demonstrated on this standard.

**Findings 2011-2012 - Target: Met**

For the 2011-2012 target, 100% of students scored at the level of adequately demonstrated and 71% of students scored at the level of effectively demonstrated.

**M 4: Dispositions (O: 4)**

The assessment for Dispositions is entitled “Dispositions of Effective Education Professionals” and is used in all programs in the Professional Education Unit. Each program in the unit administers the assessment at approximately midpoint and end of program. For Social Studies MAT programs, the Dispositions assessment is completed by the university supervisor at the end of Practicum I and at the end of student teaching.

Source of Evidence: Existing data

**Target for O4: Dispositions**

100% of students will score at the level of Acceptable and 70% of students will score at the level of Exceptional on this standard.

**Findings 2011-2012 - Target: Met**

For the 2011-2012 target, 100% of students scored at the level of acceptable and 86% of students scored at the level of exceptional.

**M 5: Impact on Student Learning (O: 5)**

The key assessment for Effects on Student Learning is contained in the rubrics for the Teacher Work Sample. Students are evaluated on their ability to analyze the results of a four-week unit that they teach during the semester of student teaching. A key component of the Teacher Work Sample project is the design and implementation of an assessment plan, which includes a pre-test and a post-test as a part of the teaching unit. The instructions relevant to the assessment for Effects on Student Learning are provided for the candidates in the students’ course template in the sections for Analysis of Student Learning and Reflection and Self-Evaluation (See PDF file for Teacher Work Sample attached below). Students complete the Teacher Work Sample project during the semester of their clinical practice. Working with their mentor teacher and their university supervisor, each candidate begins work on the project during the first week of the semester and continues until the unit is complete. The candidate’s TWS project is assessed by the university supervisor, who gives feedback to the candidate on areas of strength and areas that need improvement. Students are assessed for Effects on Student Learning with the rubrics for Analysis of Student Learning and Reflection and Self-Evaluation in the Teacher Work Sample Assessment Instrument.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O5: Impact on Student Learning**

100% of students will score at the level of Adequately Demonstrated and 60% of students will score at the level of Effectively Demonstrated on this standard.

**Findings 2011-2012 - Target: Met**

For the 2011-2012 target, 100% of students scored at the level of proficient and 95% of students scored at the level of exemplary.
Target for O5: Impact on Student Learning

100% of students will score at the level of Proficient and 80% of students will score at the level of Exemplary on this standard.

Findings 2011-2012 - Target: Met
For the 2011-2012 target, 100% of students scored at the level of proficient and 89% of students scored at the level of exemplary.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Maintain Performance
Although candidates performed exceptionally well on all outcomes, social studies would like to continue to achieve 100% competency on all standards. Social studies faculty will meet regularly and identify areas for improvement to promote 100% competency.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: At the completion of the upcoming cohorts of teacher candidates' MAT TEEMS SS initial teacher preparation program.
Projected Completion Date: 05/2010
Responsible Person/Group: Program Coordinator and Faculty affiliated with the MAT TEEMS SS program.
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
N/A
ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

To improve the assessment process for our program, we have included the Teacher Work Sample. This assessment is designed to address the overall program goals and serve as one of the program's key assessments. It was necessary to provide a clear and concise assessment that would directly align with the state and national standards for Social Studies and Teacher Education. As we continue to review and streamline the assessment process, modifications or additions to the Teacher Work Sample, and overall program course of study will be implemented. We understand the need to constantly evaluate the effectiveness of our assessments in hopes of providing quality educational experiences for all of our aspiring Social Studies teachers. We also have incorporated portions of the Teacher Work Sample in our Social Studies Methods courses as well. This has allowed for more consistency between the assessment process within the practicum experiences and also overall program coursework.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The assessment data indicated that our program efforts to impact pre-service teachers content knowledge and planning have been successful. Our Social Studies pre-service teachers performed at adequate and proficient levels on their evaluations in regards to planning and content knowledge. These results indicate that our increased and focused efforts within the coursework and practicum on content and planning of instruction were well received. We will continue to emphasize these areas within our courses, and in addition, provide more instruction on effective classroom management skills for our students. Also, in our EDSS 7560 course, a focus on the use of primary source documents, historical landmarks, and artifacts in the teaching and learning of social studies has been added. This new emphasis addresses the GA Common Core Standards for Literacy in the Social Studies and allows our students to have specific instruction and experiences in this area of teaching.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle's (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

N/A

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

N/A

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

N/A
**SLO 1: Professional Boundaries (G: 1) (M: 1)**
Students will be able to understand the context of their practice, and how their behavior embodies the values of the social work profession. This is especially critical within their relationship with clients and professional colleagues.

**SLO 2: Manage personal values (G: 2) (M: 2)**
Students will be able to recognize and manage personal values in a way that allows professional values to guide practice.

**SLO 3: Appraise and Integrate Knowledge (G: 3) (M: 3)**
Students will be able to distinguish, appraise, and integrate multiple sources of knowledge, including research-based knowledge, and practice wisdom.

**SLO 4: Use Research Evidence (G: 4) (M: 4)**
Students will be able to use research evidence to inform practice.

**SLO 5: Critique and Apply Knowledge (G: 5) (M: 5)**
Students will be able to critique and apply knowledge to understand person and environment.

---

**Measures, Targets, and Findings**

**M 1: SW 4950 Log on Professional Boundaries (O: 1)**
Students prepare a 4 pages log on their interactions with clients and colleagues at their internship site. They have to assess their ability to uphold their social work professional boundaries; that is, be able to act in a professional manner that represents the mission and auspice of their internship site.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Professional Boundaries**
90% of students will receive 24 out of 30 points (80%) on the rubric for the assignment

**Findings 2011-2012 - Target: Met**
The average grade on this log was 28 out of 30 points. Students met this target.

**M 2: SW 3700 Self Reflection Paper (O: 2)**
Students prepare a self reflection paper on their experience of doing role plays and tapes on working as a counselor with various client issues.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Manage personal values**
80% of students will receive 8 points for the paper (80%).

**Findings 2011-2012 - Target: Met**
The average score for this paper was 8.85.

**M 3: SW 3200 Historical Biography (O: 3)**
Students research a historical figure in social work / social justice and prepare a summary of that person’s life and impact on social work. Multiple sources are used to look comprehensively at the contribution and impact of the individual on the field.

Source of Evidence: Project, either individual or group

**Target for O3: Appraise and Integrate Knowledge**
80% of students will receive 64 points (80%) or more on the assignment

**Findings 2011-2012 - Target: Met**
The average score for this measure was 83%.

**Findings 2011-2012 - Target: Met**
The average score for this measure was 83%.

**M 4: SW 3500 Library Assignment (O: 4)**
Library assignment on research

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Use Research Evidence**
90% of students will achieve at least 8 out of 10 possible points on the paper

**Findings 2011-2012 - Target: Partially Met**
The average score on this assignment was 7.9. This goal was not quite met.

**M 5: SW 3330 Case Review Paper (O: 5)**
Case review paper where students must complete a literature review and synthesize material to apply findings to a case study

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O5: Critique and Apply Knowledge

80% of students will receive 80% of points on the assignment

Findings 2011-2012 - Target: Met
Students earned an average score of 80.5% on this assignment so the goal was met.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

TheoryEarlyLife
This course is the first CTW offering for students within the major. Additional opportunities to submit paper drafts and rewrite the assignment will be included. In addition, writing consultants will be used in all sections to provide additional one-on-one consultation for student support with their papers.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High

Orientation
Orientation to major

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium
Implementation Description: The orientation process for majors is being refined. This will help students make decisions about sequencing courses and expectations about progression of programs of study. At this point, we have developed a new model that is a hybrid of individual and group formats. This seems to be working well
Responsible Person/Group: BSW Program Committee

CTW Revision
During spring semester when this course is offered, students were required to enroll in two CTW courses. We received feedback, and analyzed CTW assignment grades, and made the decision to eliminate one of the Spring semester CTW courses. That leaves one CTW requirement in Fall, and only one in Spring. The SSW is also doing some additional training of CTW instructors around requirements.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Assessment Data by Section
2011-2012 Social Work MSW
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the MSW program is to prepare students for social work leadership roles in the effort to solve, in partnership with others, the existing and developing challenges that confront communities and the people within these communities.

Goals

G 1: Critical Thinking
Students will be able to apply critical thinking to inform and communicate professional judgments

G 2: Community Partnerships
Students will engage in community partnership practices that are responsive to diversity and difference

G 3: Social and Economic Justice
Students will develop skills to advance human rights and social and economic justice.

G 4: Context that shape social work practice
Students will develop skills to assess and shape macro contexts that influence the practice of social work

G 5: Intervention Skills with Communities
Students will develop skills to be effective social work practitioners within community settings
### Student Learning Outcomes/Objectives

**SLO 1: Evaluate & Integrate Multiple Sources of Knowledge (G: 1) (M: 1)**

Students will be able to evaluate and integrate multiple sources of knowledge, including research-based knowledge and practice-generated knowledge.

**SLO 2: Theory and Practice with Communities (M: 2)**

Students will read a book that describes a case example of an urban area that is undergoing transformation. They will write a paper that integrates theory and practice concepts with this case example.

**SLO 3: Power and Privilege (M: 3)**

Students will analyze ways which differential power and privilege shape communities and society.

**SLO 4: Leadership in Community Change (M: 4)**

Students will develop leadership skills in promoting changes to improve community well being.

**SLO 5: Community Collaboratives (M: 5)**

Students will develop skills to develop, monitor, and strengthen collaborative relationships that build healthy communities.

### Measures, Targets, and Findings

**M 1: Eval prop (O: 1)**

Students will construct and submit an evaluation proposal that integrates learning from their evaluation course with experiences that they are having in their internship site.

- **Source of Evidence:** Project, either individual or group
- **Target for 01: Evaluate & Integrate Multiple Sources of Knowledge**
  - The class average for the proposal will be 90% or higher on SW 8200, Evaluation & Technology course.

**Findings 2011-2012 - Target: Met**

Class average was 92 for the proposal on the activity.

**M 2: Common Ground (O: 2)**

Students read a book on gentrification and community change titled, Common Ground, and write a paper that integrates concepts from community theories and practice to understand this experience.

- **Source of Evidence:** Written assignment(s), usually scored by a rubric
- **Target for 02: Theory and Practice with Communities**
  - The class average for the integrative paper on Common Ground will be 90% or higher

**Findings 2011-2012 - Target: Met**

95% of student received a B or higher on the paper on this required reading and analysis.

**M 3: Power & Privilege (O: 3)**

Students write a reflection paper that analyzes how concepts of power and privilege within organizations, communities, and society within SW 8300, Leadership & Management.

- **Source of Evidence:** Written assignment(s), usually scored by a rubric
- **Target for 03: Power and Privilege**
  - The class average for the power and privilege paper will be 90% or higher in the Leadership & Management course.

**Findings 2011-2012 - Target: Met**

92% of students received 90% or higher on this assignment.

**M 4: Dissemination of Community Project (O: 4)**

Students do presentation and associated final paper about their experience working with a community partner on a service learning project.

- **Source of Evidence:** Capstone course assignments measuring mastery
- **Target for 04: Leadership in Community Change**
  - The class average for the paper and oral presentation on the community projects will be 90% or higher

**Findings 2011-2012 - Target: Met**

100% students received a B or higher on the presentation and paper of the community projects.

**M 5: Community Skills (O: 5)**
Students will write a paper on skills development for social work practice at the community level.

Source of Evidence: Written assignment(s), usually scored by a rubric

### Findings 2011-2012 - Target: Met

The class average for the paper that outlines community practice skills in SW 8100 Skills and Techniques of Community Partnerships course, will be 90% or higher

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**SurveyAssessment**
This item was rated low compared to the target, and had 6% reporting minimal confidence. The MSW program committee will review ways to enhance this content within the program.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**SurveyConfidence**
In leadership and management class, include additional time to discuss leadership outcome with graduating students

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**SurveyFacilitation**
Provide an additional opportunity with the field internship seminar to discuss learning on this skill.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**SurveyPolicy**
Student complete the policy course during the first year of the graduate program. Clearly, they are stating that they need additional opportunities to develop this skill during the second year, and integrating the content. The MSW program committee will review ways to "boost" this content during the second year of the program.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**SurveyTechnology**
This course is a candidate to be restructured as a hybrid course (50% on line). The advantage to this structure is that students can self pace and go through content in a slower pace, if the content seems to difficult. The School has tried that approach with other content areas, and has achieved good success.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**Georgia State University**
**Assessment Data by Section**
**2011-2012 Sociology Assessment of Core**
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Goals

**G 3: Critical Analysis**
Students will learn to critically analyze the complexity of social behavior, and how historical, economic, political, and/or spatial relationships develop, persist, and/or change.

### Student Learning Outcomes/Objectives

**SLO 1: critical understanding (G: 3) (M: 1)**
Common embedded questions on objective exams are designed to allow students to demonstrate their critical understanding of key sociological concepts and theories, and about social conditions and problems.

### General Education/Core Curriculum Associations
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

**SLO 2: Analysis of Contemporary Problems (G: 3) (M: 1)**

Through common embedded questions on objective exams, students demonstrate their ability to identify, analyze, and suggest solutions to pressing social problems, both locally and globally.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

**Strategic Plan Associations**

5.4 Enhance the global competency of students, faculty and staff.

**Measures, Targets, and Findings**

**M 1: SOCI 1101 and SOCI 1160 embedded exam questions (O: 1, 2)**

SOCI 1101 and soci 1160 exam questions The goal assessment categories here are "Sociological Perspective," "Multicultural Issues," and "Global/International Issues." Five multiple-choice questions were designed to assess competence in each goal area. Instructors in all sections of Soci 1101 and Soci 1160 were requested to select at least one multiple choice in each of the three section and to embed the questions in their final exams. Instructors were free to select more than one question as long there was at least one question to assess each of the three goals. The total number of students who were assessed in this area was 963 students from 9 sections of 1101 (418 students), and 11 sections of 1160 (545 students). In the area of "Sociological Perspective," 92% of students in 1101 and 93% of students in 1160 answered questions correctly; in the area of "Multicultural Issues," 78% of students in 1101 and 93% of those in 1160 answered questions correctly; and in the area of "Global/International Issues correctly," 91% of students in 1101 and 94% in 1160 answered questions correctly. Edit Finding Add Action Plan Related Action Plan(s): (details in Action Plan Tracking) 1. 2007-2008 Help

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: critical understanding**

At least 80% of students should answer questions correctly.

**Findings 2011-2012 - Target: Met**

The target was met, over all.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**maintain current level of success**

Most of our targets were more than surpassed, with the majority of students in most cases considered answering embedded questions correctly. Our plan is to maintain the current level of success.

Established in Cycle: 2011-2012

Implementation Status: Planned

Priority: High

Implementation Description: Continue as we have been doing.

Responsible Person/Group: Adia Harvey Wingfield, new Assessments Coordinator

**Assessment Data by Section**

**2011-2012 Sociology BA**

As of: 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Department of Sociology at Georgia State University is committed to excellence in the advancement of knowledge about social forces, social behavior, and social change. Through dedicated research, teaching, and service, the Department's work benefits students, colleagues, policy makers, and the public. Established in Cycle: 2007-2008 Active Through: 2007-2008 Entry Status: Final Established By: Migration Tool on 10/13/2008 Help

**Goals**

**G 8: critical analysis**

Students will learn to critically analyze the complexity of social behavior, and how historical, economic, political, and/or spatial relationships develop, persist, and/or change.
### Student Learning Outcomes/Objectives

#### SLO 2: Data Collection and Data Analysis (G: 8) (M: 3)
- A. Students acquire the skills to collect data
- B. Students demonstrate appropriate computer skills
- C. Students are able to read and understand sociological research reports/articles

#### SLO 3: Analysis of Social Problems (G: 8) (M: 2, 4)
Faculty assessment of students' ability to:
- A. To identify, analyze, and suggest solutions to pressing social problems
- B. Analyze contemporary multicultural, global, or international questions

**General Education/Core Curriculum Associations**
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

#### SLO 4: Communication Skills (G: 8) (M: 2)
Students develop effective written communication and editing skills
- B. Students show appropriate writing conventions and formats

**General Education/Core Curriculum Associations**
- 1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Other Outcomes/Objectives

#### O/O 1: Acquisition of Knowledge (G: 8) (M: 1, 2, 3, 4)
Faculty assessments of students' abilities to:
- A. Articulate key sociological concepts and theories
- B. Apply the most up-to-date facts and information about social conditions and problems
- C. Utilize key data sources that provide sociological information and research findings

**General Education/Core Curriculum Associations**
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

#### O/O 5: Critical Thinking Skills (G: 8) (M: 2, 3)
- A. Students formulate research questions and formulate testable hypotheses
- B. Students are able to analyze and interpret data (hypothesis testing, drawing inferences, formulating conclusions)
- C. Students demonstrate how to use results of analysis to formulate new research questions

**General Education/Core Curriculum Associations**
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Measures, Targets, and Findings

#### M 1: Sociological Theory (SOCI 3030) Final Exam or Paper (O: 1)
This measure is derived from professors' evaluations of how well students articulated key sociological concepts or theories in their final exams or course papers. 200 students in five sections were evaluated (on a four-point scale). Professors judged that 29% of their students were doing work they considered excellent (a score of 4); that 27% were doing work they evaluated as very good (a score of 3); that 18% were doing work they saw as good (a score of 2), and that 19% were doing work they considered to be poor (a score of 1).

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Acquisition of Knowledge**
- 70% of the students will score "excellent" or "very good" in their demonstration of knowledge acquisition in the paper.

**Findings 2011-2012 - Target: Not Met**
- 55% were assessed as "excellent" or "very good."

#### M 2: SOCI 3020 (Sociological Methods) Paper and/or Exam (O: 1, 3, 4, 5)
Assessment is based on professors' evaluations of: students' course papers (in which they develop research proposals) and/or final exams. Students' work is assessed on each outcome/objective measure. 99 students (in four sections) were assessed based on their course papers or final exams. In terms of demonstrating "analytic skills," professors assessed 24% of students' papers as excellent; 39% as very good; 22% as good; and 15% as poor. In terms of demonstration of "critical thinking," the professor assessed 31% of students' papers as excellent; 36% as very good; 19% as good, and 14% as poor. In terms of "communication skills," the professor assessed 23% of students' papers/exams as excellent; 36% as very good; 27% as good, and 14% as poor. Three of the professors (the fourth omitted this measure) evaluated 74 students' papers in terms of their demonstration of "acquisition of knowledge": 26% of these papers/exams as excellent (a score of 4); 36% were judged to be "very good" (a score of 3) in this area; 23% were judged to be "good" (a score of 2) and 15% were judged to be poor (a score of 1).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Acquisition of Knowledge**
- 70% of the students will score "excellent" or "very good" in their demonstration of knowledge acquisition in their papers/exams.
### Findings 2011-2012 - Target: Partially Met

62% were assessed as "excellent" or "very good" at demonstrating their knowledge acquisition.

### Target for O3: Analysis of Social Problems

70% of the students will score "excellent" or "very good" in their analysis of social problems.

### Findings 2011-2012 - Target: Partially Met

63% of students were assessed as "excellent" or "very good" in their analysis of social problems.

### Target for O4: Communication Skills

70% of the students will score "excellent" or "very good" in their communication skills.

### Findings 2011-2012 - Target: Partially Met

59% of students were assessed as "excellent" or "very good" in their communication skills.

### Target for O5: Critical Thinking Skills

70% of the students will score "excellent" or "very good" in their critical thinking.

### Findings 2011-2012 - Target: Partially Met

67% of students were assessed as "excellent" or "very good" in their demonstration of critical thinking skills.

### M 3: SOCI 3010 (Social Statistics) student performance (O: 1, 2, 5)

This measure is based on professors' evaluations of students' analytic skills and critical thinking skills in Statistics courses. Professors evaluate students on a 4-point scale. 234 students (in six sections) were evaluated. The professors assessed 30% of students to be excellent (a score of four) in their demonstration of analytic skills (appropriate computer skills); 34% were assessed as very good, 29% as good, and 7% as poor in this area. The professors judged 29% to be excellent in their demonstration of critical thinking skills (able to analyze and interpret data). They assessed 35% of students as very good; 30% as good; and 6% as poor in this area.

Source of Evidence: Academic direct measure of learning - other

### Target for O2: Data Collection and Data Analysis

70% of the students will score "excellent" or "very good" in their demonstration of analytic skills (appropriate computer skills) on their final exams.

### Findings 2011-2012 - Target: Partially Met

64% of students were assessed as "excellent" or "very good" in their demonstration of analytic skills.

### Target for O5: Critical Thinking Skills

70% of the students will score "excellent" or "very good" in their critical thinking.

### Findings 2011-2012 - Target: Partially Met

64 of students were assessed as demonstrating "excellent" or "very good" critical thinking skills.

### M 4: SOCI 3201 (Inequalities) Final Exam or Paper (O: 1, 3)

This measure is based on professors' evaluations (using a 4-point scale) of students' demonstration of "acquisition of knowledge"; their ability to identify, analyze, and suggest solutions to pressing social problems; and their ability to analyze contemporary multicultural, global, or international issues, based on their performance on their final exams or papers. The work of 293 students (in five sections) was assessed. In the area of "acquisition of knowledge," professors judged 18% of students' work to be excellent; 43% to be very good; 42% to be good, and 7% to be poor. In terms of demonstrating an ability to analyze (and suggest solutions to) contemporary problems, professors judged 18% of students' work to be excellent; 43% to be very good; 43% to be good; and 6% to be poor. In the second (global) measure, professors judged 18% of students' work to be excellent; 44% to be very good; 42% to be good, and 6% to be poor.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

### Target for O1: Acquisition of Knowledge

70% of the students will score "excellent" or "very good" in their acquisition of knowledge.

### Findings 2011-2012 - Target: Partially Met

62% of students were assessed as "excellent" or "very good" in their acquisition of knowledge.

### Target for O3: Analysis of Social Problems

70% of the students will score "excellent" or "very good" in their analysis of social problems.

### Findings 2011-2012 - Target: Partially Met

61% of students were assessed as demonstrating "excellent" or "very good" analytic skills.
focus on students’ abilities to demonstrate knowledge acquisition

Professors will continue to focus on helping students to articulate their acquired knowledge and to their analyses. We are not far below our target, in these areas. The variation from year to year of professors' assessments of student work may have more to do with changes in evaluators than with any significant change in quality of students.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: SOCI 3010 (Social Statistics) student performance | Outcome/Objective: Data Collection and Data Analysis

- Measure: Sociological Theory (SOCI 3030) Final Exam or Paper | Outcome/Objective: Acquisition of Knowledge

monitor student performance

Faculty assessment of students' work as "excellent" or "very good" has decreased (but is only slightly less than our target in this category -- 67% instead of 70% achieving assessment as "excellent" or "very good" in critical thinking). The Undergraduate Director, in concert with the Undergraduate Committee, may wish to consider whether there are ways to discern whether student performance is truly declining or not. And then, if there are ways to discern this (which is really not clear to me), they may wish to consider ways that student performance may be improved.

**monitor student performance**

In the past, we have stated that our goal is to have 70% of students assessed as demonstrating that they are doing an "excellent" or "very good" job in meeting learning goals, as demonstrated through professors' assessment of performance on papers and/or exams (in the four upper-level required courses we assess). This year, we met this goal.

**established in cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High

**monitor student performance**

Student performance in this area has improved, based on collected data, over the past two years. The Assessments Coordinator should continue to monitor student performance, and may wish to take up with the Undergraduate Committee whether our target is too high.

---

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

We continue to offer a wide diversity of courses as CTW courses, as per our original plan.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

I do not think that our data are a clear indication of changes from one year to the next; the data seem to increase each year -- that is, more students are assessed -- but the criteria by which they are assessed can be interpreted in a wide way by different faculty members. There has not been a great deal of consistency among the group assessing each year. This may be why results vary a great deal from one year to another.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

We have trouble offering all the CTW courses we need, because of the bottleneck of majors who now need them.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your program?**
academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

There haven't been many changes; we were lucky from the outset that we already stressed critical thinking through writing in our courses. Our initiative has not changed since last year's report.

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We haven't made changes from last year. Next year, there will be a new Undergraduate Director (& Assessment Coordinator) collecting our data.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Our data collection has always been capturing a moving target of sorts. Different faculty members participate in assessment; results can vary a great deal depending on who the assessors are. I suspect their collective judgment varies more than the general quality of student work being assessed. In any case, we have not changed our curriculum, courses, or sequence of courses as a result of assessment data collected last year.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

No changes were made in the past year.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

The data vary. We set an arbitrary goal of having at least 70% of students assessed (by professors) as excellent or very good. This year we fell short of this goal, but I do not think this in an indication that we need to make curricular or pedagogical changes. I am not sure what it means. It may be that faculty are evaluating students more harshly as they become comfortable with doing these evaluations; it may be that the quality of student work is declining. (Or it may be a combination of these factors.) The changes in data are similar to other variations from year to year, and cannot yet, in my view, be called meaningful. Nor do they demand any substantive action.

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

My goal will be to communicate to the incoming director of undergraduate studies (and assessment) the vagaries of the assessment process. I am not sure if there is a way to make these data more meaningful. In general, I feel that they demonstrate that we are doing a pretty effective job of stressing the Social Sciences area learning outcome that "students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change. We also promote the BOR learning outcomes related to "understanding . . . the U.S and its related political, social, and/or institutional developments," and "understanding . . . of political, social, economic, and/or institutional developments across the globe."

Annual Report Section Responses

Most Important Accomplishments for Year—Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.

We continue to offer courses that contribute to students' analytic skills in sociology. More assessment data were collected this year than in past years (rather than reporting on data collected during one semester, I report on data collected during two semesters.)

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.

Next year, a new Undergraduate Director (and Assessment Coordinator) will be in charge; my goal is conveying to her the changes both in the assessment monitoring systems that have been in effect these past several years, and an understanding of the general issues she will need to take into account.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

I changed the "Goals" to reflect the newly articulated General Education Goals distributed by the people who run the assessment program. All our outcomes and measures apply to this general goal, so no changes were made to these.

Georgia State University
Assessment Data by Section
2011-2012 Sociology MA

As of 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)
### Mission / Purpose

The Department of Sociology at Georgia State University provides graduate students with a broad exposure to the discipline of Sociology as well as in-depth study in special areas of expertise. The broad knowledge of Sociology comes through coursework in a variety of substantive areas, as well as through training in research methodologies, statistics, and theory. The goals of the Department are to provide a general intellectual foundation that supports the student's analytical understanding of social life, a sound methodological background that prepares the student for social research and policy evaluation, and a rich and specialized body of knowledge that equips the student for the practice of Sociology in both the public and private sectors.

### Goals

**G 1: Analytical Skills**  
Students are expected to master appropriate analytical skills.

**G 2: Critical Thinking Skills**  
Students are expected to possess appropriate critical thinking skills.

**G 3: Communication Skills**  
Students are expected to evidence appropriate written communication skills.

**G 4: Acquisition of Knowledge Skills**  
Students are expected to appropriately use sociological concepts, theories, information, and data sources.

**G 5: Analysis of Contemporary Questions Skills**  
Students are required to possess the ability to appropriately analyze pressing social problems.

### Student Learning Outcomes/Objectives

Georgia State University
Assessment Data by Section
2011-2012 Sociology PhD
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
The Department of Sociology at Georgia State University provides graduate students with a broad exposure to the discipline of Sociology as well as in-depth study in special areas of expertise. The broad knowledge of Sociology comes through coursework in a variety of substantive areas, as well as through training in research methodologies, statistics, and theory. The goals of the
The Department is to provide a general intellectual foundation that supports the student's analytical understanding of social life, a sound methodological background that prepares the student for social research and policy evaluation, and a rich and specialized body of knowledge that equips the student for the practice of Sociology in both the public and private sectors.

### Goals

**G 1: Analytical Skills**
Students are expected to master appropriate analytical skills.

**G 2: Critical Thinking Skills**
Students are expected to possess appropriate critical thinking skills.

**G 3: Communication Skills**
Students are expected to evidence appropriate written communication skills.

**G 4: Acquisition of Knowledge Skills**
Students are expected to appropriately use sociological concepts, theories, information, and data sources.

**G 5: Analysis of Contemporary Questions Skills**
Students are required to possess the ability to appropriately analyze pressing social problems.

### Student Learning Outcomes/Objectives

- **SLO 1: Data Collection (G: 1) (M: 1, 3)**
  The student should demonstrate that he/she has acquired the skills to collect data.

- **SLO 2: Analytical Techniques (G: 1) (M: 1, 3)**
  The student has demonstrated appropriate analytical skills.

- **SLO 3: Research Reports (G: 1) (M: 1)**
  The student is able to explain how to read and understand sociological research reports/articles.

- **SLO 4: Formulating Hypotheses (G: 2) (M: 1, 3)**
  The student can formulate research questions and/or formulate testable hypotheses.

- **SLO 5: Data Analysis (G: 2) (M: 1, 3)**
  The student is able to analyze and interpret data.

- **SLO 6: New Research Questions (G: 2) (M: 1)**
  The student demonstrates how to use results of analysis to formulate new research questions.

- **SLO 7: Written Communication (G: 3) (M: 1)**
  The student has developed effective written communication and editing skills.

- **SLO 8: Writing Conventions (G: 3) (M: 1)**
  The student shows appropriate writing conventions and formats.

- **SLO 9: Concepts and Theories (G: 4) (M: 1, 2)**
  The student articulates key sociological concepts and theories.

- **SLO 10: Facts and Information (G: 4) (M: 1, 2)**
  The student applies the most up-to-date facts and information about social conditions and problems.

- **SLO 11: Use of Data Sources (G: 4) (M: 1)**
  The student utilizes key data sources that provide sociological information and research findings.

- **SLO 12: Social Problems (G: 5) (M: 1, 2)**
  The student has developed the ability to identify, analyze, and suggest solutions to pressing social problems.

- **SLO 13: Global Questions (G: 5) (M: 1, 2)**
  The student analyzes contemporary multicultural, global, or international questions.

### Measures, Targets, and Findings

**M 1: Doctoral Dissertation (O: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13)**
The student's original Doctoral Dissertation and Dissertation Defense are used for assessment by the Dissertation Chair.

### Findings 2011-2012 - Target: Met

56% of students passed the qualifying examination in this area, as rated by a committee of faculty.

#### Details of Action Plans for This Cycle (by Established cycle, then alpha)

##### Statistics/Methods Instruction

The department decided last year (to go into effect August 2011) to change its doctoral examinations from qualifying examinations in statistics, methods, and theory to a specialty examination. This past year (2010-2011) we offered the last two exams in the old, qualifying exam, format. The new, specialty exam, format will go into effect in August 2011; it represents a major change in our doctoral instruction that will bring our requirements more in-line with our peer institutions. Although there were six attempts at the qualifying exam in methods/statistics, that represents just three students. Three students took the exam in January 2011, and all three failed the exam. The students retook the exam in May. Of those three students, one failed the methods/statistics exam for a second time (and is being scholastically terminated from the program, per College rules) and the other two passed. Although the department decided last year to change the doctoral examinations, we continue to take very seriously our instruction in sociological statistics and methods. The department has also agreed and affirmed to all instructors that methodological content should be increased in all substantive graduate courses, and not leave methods/statistics instruction to just the specific courses in those topics. Thus, we are also taking steps to improve our instruction in this area. We also added an additional course requirement on methods/statistics.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Methods Component of Doctoral Exam  
- **Outcome/Objective:** Analytical Techniques  
- **Label:** Data Analysis  
- **Label:** Data Collection  
- **Label:** Formulating Hypotheses

**Implementation Description:** The new exams go into effect next month, in August. The increased instruction in methods/statistics (and the increased emphasis on these topics in other courses) went into effect this past academic year, 2010-2011.

**Responsible Person/Group:** Dawn Baunach

##### Theory Instruction

The department decided last year (to go into effect August 2011) to change its doctoral examinations from qualifying examinations in statistics, methods, and theory to a specialty examination. This past year (2010-2011) we offered the last two exams in the old, qualifying exam, format. The new, specialty exam, format will go into effect in August 2011; it represents a major change in our doctoral instruction that will bring our requirements more in-line with our peer institutions. Although there were five attempts at the qualifying exam in theory, that represents just three students. Three students took the exam in January 2011. Of those three, two failed and one passed. The two students who failed the exam in January retook the exam in May. Of those two students, one failed the theory exam for a second time (and is being scholastically terminated from the program, per College rules) and the other is rewriting a conditional pass answer in August. Although the department decided last year to change the doctoral examinations, we continue to take very seriously our instruction in sociological theory. Just this week a group of faculty has decided to hold a working, discussion group to discuss our two theory courses. The department has also agreed and affirmed to all instructors that theoretical content should be increased in all substantive graduate courses, and not leave theory instruction to just two specific courses. Thus, we are also taking steps to improve our theory instruction in the two theory courses and in all substantive courses.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Theory Component of Doctoral Exam  
- **Outcome/Objective:** Concepts and Theories  
- **Label:** Facts and Information  
- **Label:** Global Questions  
- **Label:** Social Problems

**Implementation Description:** The new exams are going into effect next month. The increased theoretical standards of all courses went into effect this past academic year. The working theory group will begin having meetings next month.

**Responsible Person/Group:** Dawn Baunach

---

**Georgia State University**  
**Assessment Data by Section**  
**2011-2012 Spanish BA**  
As of: 12/12/2016 04:42 PM EST  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

The mission of the Department is, through the study of modern and classical languages, cultures and literatures, 1. to provide students the opportunity to improve their critical thinking skills; 2. to better appreciate universal humanistic values; 3. to encourage them to acquire an international perspective; 4. to equip them to function as global citizens; 5. to prepare them, through the various majors in modern languages, for future careers as teachers, translators and interpreters, as well as for important positions in international business.

### Goals

**G 1: Knowledge of Hispanic Literature**  
Student will understand the particularities of Hispanic literature.
G 2: Outcomes for the current period
After consultation with GSU's Director of Academic Assessment, it was decided to focus on a single goal, General Goal 6, for the current period. The assessment was made in the Introduction to Literature course, a requirement for all majors in Spanish. The new rubric for this goal was redesigned by departmental faculty skilled in the science of assessment. It includes 4 weighted criteria of a literary text: Focus on Topic (35%), Literary Lens Use (35%), Organization (15%) and Accuracy of Grammar and Spelling (15%).

Student Learning Outcomes/Objectives

SLO 6: Knowledge of Hispanic Literatures (M: 1)
The student shall demonstrate a general acquaintance with target language literatures and the ability to critically analyze and interpret the literary, cultural and historical content of literary texts.

Measures, Targets, and Findings

M 1: Paper (O: 6)
In Spanish 3307 (Introduction to the Study of Literary Texts), students wrote a paper whose purpose was to demonstrate their ability to critically analyse and interpret the literary, cultural and historical content of a literary text. They were evaluated for their appropriate focus on the topic (35%), their literary lens use (35%), the clear and succinct organization of their paper (15%), and the correctness of their grammar and spelling (15%).

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O6: Knowledge of Hispanic Literatures
We hope that students will be able to achieve a score of 8.0-8.4 in their assessment for literature.

Findings 2011-2012 - Target: Partially Met
The BA programs in MCL have a new reporter/director of undergraduate studies. During this reporting cycle the new reporter is using the resources, methods, and results given to him by his predecessor. During this period, 4 courses of Spanish 3307 (Introduction to the Study of Literary Texts) were taught. Students majoring in Spanish achieved the results of 7.8, 8.7, 8.2, and 8.1. All courses but one met their targeted score in their assessment for literature.
Students are able to read and understand research, acquire skills to collect data and utilize key data sources that provide literary and linguistic information and research findings.

**SLO 2: Critical Thinking Skills (M: 1)**

Students demonstrate competence in the analysis of literary texts and the evaluation of critical thinking in literature.

**SLO 3: Acquisition of Knowledge (M: 1)**

Students articulate key literary and philosophical concepts and theories, apply the most up-to-date facts and information in resolving literary and linguistic issues and demonstrate appropriate literary, linguistic, historical and cultural knowledge.

**SLO 4: Effective writing, communication and editing (M: 1)**

Students demonstrate communicative competence in written and oral Spanish.

**Measures, Targets, and Findings**

**M 1: Direct and indirect assessment (O: 1, 2, 3, 4)**

Direct Assessment: 1. M.A. Thesis: The thesis must be original work by the student. The proposal must be approved by faculty members. 2. M.A. Research paper: The aim of this project is for the candidate to apply theoretical concepts to her or his present or future professional practices (integration). Candidates will present the results of their research in a 12-20 page paper. Candidates have a choice to write the project in either their target language or in English, under the direction of their graduate advisor. 3. M.A. General Examination: After completing all course work for the degree, candidates are required to pass a written and an oral General Examination based on a reading list. Candidates in the literature concentration must be prepared to discuss all the works listed in their chosen areas both individually and in relation to each other and to the period in which they are written. The written exam requires candidates to choose three fields from Spanish reading list. 4. Oral Exam: For the oral examination Spanish candidates are responsible for one additional area of their choice from the reading list, one additional area based on course work taken in culture or literature, and the three areas covered in the written exam. This examination is scheduled 7 to 10 days following successful completion of the written exam. It lasts a minimum of one hour and is conducted by an M.A. Committee. Indirect Assessment: Student evaluations, annual reports, and teaching portfolios are evaluated by the Department’s executive committee.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Research and Data Collecting Skills**

Students were rated on a scale of 1-4 1=Fails to meet standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard Target= 90% of students receiving a rating of a 2 or higher

**Findings 2011-2012 - Target: Met**

Students were rated as follows: 4=8 3=27 2=16 1=2 96% of students met or exceeded the standard

**Target for O2: Critical Thinking Skills**

Students were rated on a scale of 1-4 1=Fails to meet standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard Target= 90% of students receiving a rating of a 2 or higher

**Findings 2011-2012 - Target: Met**

Students were rated as follows: 4=1 3=30 2=18 1=4 92% of students met or exceeded the standard

**Target for O3: Acquisition of Knowledge**

Students were rated on a scale of 1-4 1=Fails to meet standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard Target= 90% of students receiving a rating of a 2 or higher

**Findings 2011-2012 - Target: Met**

Students were rated as follows: 4=8 3=56 2=35 1=7 93% of students met or exceeded the standard

**Target for O4: Effective writing, communication and editing**

Students were rated on a scale of 1-4 1=Fails to meet standard 2 = Meets standard 3 = Exceeds Standard 4 = Far Exceeds Standard Target= 90% of students receiving a rating of a 2 or higher

**Findings 2011-2012 - Target: Met**

Students were rated as follows: 4=12 3=97 2=47 1=14 92% of students met or exceeded the standard

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Encourage Scholarship**

Supervise student work that can be presented at professional meetings.

**Established in Cycle:** 2008-2009

**Implementation Status:** Planned

**Priority:** Medium

**Implementation Description:** Planned

**Responsible Person/Group:** Graduate Spanish Faculty
Mentoring
Mentor M.A. candidates who express a desire to continue graduate work at the doctoral level.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Planned
Responsible Person/Group: Graduate Spanish Faculty

Professional Activities
Encourage and oversee M.A. candidates’ initiatives (such as the graduate conference) that contribute to student growth and institution visibility.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium
Implementation Description: Planned
Responsible Person/Group: Graduate Spanish Faculty

Georgia State University
Assessment Data by Section
2011-2012 Speech BA
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
Speech communication explores the construction, diffusion, analysis, and impact of messages as they occur among individuals, groups, organizations, and cultures in the media age. Students will learn major theories and concepts within this discipline that they will then use to create, perform, and critique the effectiveness of various types of communicative acts.

Goals
G 1: Communication Development/Strategy
Students understand the development and strategic aspects of human communication.

G 2: Communication Research
Students understand the communication research tradition.

G 3: Communication Competence
Students utilize communication competence and critical thinking skills.

Student Learning Outcomes/Objectives
SLO 1: Human Communication Models (G: 1)
Students can identify competing models of human communication.

General Education/Core Curriculum Associations
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 2: Communication Variations (G: 1) (M: 1)
Students can describe variations in communication across age, gender, race, culture, and/or disability.

General Education/Core Curriculum Associations
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

Strategic Plan Associations
5.4 Enhance the global competency of students, faculty and staff.

SLO 3: Use of Power (G: 1)
Students can explain the use of power in various human communication situations.

General Education/Core Curriculum Associations
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 4: Communication Competence Requirements (G: 1) (M: 2)**

Students can explain various requirements for communication competence.

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 5: Research Models/Paradigms (G: 2)**

Students can identify different research paradigms/models of research in the field of communication.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Strategic Plan Associations**

3.1 Enhance a research culture.

**SLO 6: Scholarly Publication Summarization (G: 2) (M: 3)**

Students can effectively summarize scholarly publications of various kinds.

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Strategic Plan Associations**

3.1 Enhance a research culture.

**SLO 7: Research Process/Results Comprehension (G: 2)**

Students can appropriately critique the research process and arguments/conclusions presented in scholarly publications.

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Strategic Plan Associations**

3.1 Enhance a research culture.

**SLO 8: Verbal/Nonverbal Presentation Skills (G: 3) (M: 4)**

Students demonstrate effective verbal and nonverbal delivery skills.

**General Education/Core Curriculum Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 9: Writing Skills (G: 3) (M: 5)**

Students demonstrate effective writing skills.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 10: Adaptation to Diversity (G: 3) (M: 6)**

Students demonstrate competent adaptation to diverse audience and communication situation.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience,
Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 11: Message Critique (G: 3) (M: 7)**

Students appropriately critique the content, structure, and style of oral, written, and mediated messages in a variety of contexts.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Measures, Targets, and Findings**

**M 1: Intercultural Paper (O: 2)**

Students studied intercultural concepts throughout the semester. During the last half of the semester, we read an article on glocalization—the mixing of the local culture with Western influences to create a hybrid culture. Students were asked to view a foreign film and analyze it for evidence of glocalization. In order to do this, student needed to be able to exhibit an awareness of Western culture as well recognizing variations from this culture. The rubric assesses students’ ability to understand the variations between cultures as evidenced in the mass media. The rubric assess students on two things: 1) the ability to identify intercultural concepts discussed in the course in the mass media examples and 2) the ability to then apply those concepts in a meaningful way to analyze the cultural episode. Each of these categories is rated from 1 to 5 with 1 being Poor, 2 being Fair, 3 being Good, 4 being Excellent, and 5 being Superior. Please see attached rubric for additional information. The students were given a score in each of the categories and then the scores were averaged to get a score out of 5.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Communication Variations**

Average of 4 (out of 5) for majority of the students.

**Findings 2011-2012 - Target: Met**

Thirty student papers were assessed using the Situational/Demographic Communication Variations Rubric. Of the 30 papers assessed, 16 scored a 4 or above. Fourteen students scored below a 4.

**M 2: Intercultural Communication Competence Training Module (O: 4)**

Students in SPCH 3750 were asked to create a training module targeted toward a specific audience about a specific cultural group. The module included training sessions, a cartoon, case studies, quizzes, and handouts. Each of the student modules was assessed using the Intercultural Knowledge and Competence VALUE Rubric from the American Association of Colleges and Universities. The rubric measures 6 categories: Cultural Self-Awareness, Cultural Worldview Frameworks, Empathy, Verbal and Nonverbal Communication, Curiosity, and Openness. However, because the “Openness” category refers to actual interaction, it was excluded from this assessment because the data did not measure this category. The rubric assesses each category from 1 to 4 with 1 being the Benchmarch, 4 being the Capstone, and 2 and 3 being the Milestones. For more information, please see attached rubric. The students were given a score in each of the five categories and then the scores were averaged to get a score out of 4.

Source of Evidence: Project, either individual or group

**Target for O4: Communication Competence Requirements**

Average of 3 (out of 4) by majority of students.

**Findings 2011-2012 - Target: Met**

Using the Intercultural Knowledge and Competence VALUE Rubric, 28 student projects were assessed. Seventeen students scored a 3 or higher. Eleven students scored below a 3.

**M 3: Comm & Diversity Annotated Bibliography (O: 6)**

This rubric has three items and was applied to an annotated bibliography assignment. The three items include: clear writing style (lack of grammar, spelling and typographical errors), concise explanation of the research, and informative. Each item was measured on a 1-5 Likert Type Scale; see attached rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O6: Scholarly Publication Summarization**

Average of 4 (out of 5) by the majority of the students.

**Findings 2011-2012 - Target: Met**

2012 Results

**M 4: Persuasion Oral Presentation (O: 8)**
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Develop Measure for Objective #3: Power

One of our objectives is for students to be able to explain the use of power in various human communication situations. For this cycle, we did not collect data to measure this objective. For the next cycle, we need to identify specific courses and assignments that could give us the necessary data to measure this objective.

Established in Cycle: 2010-2011
Develop Measure for Objective #5: Research Paradigm Identification

One of our objectives is to teach students to identify different research paradigms in the field of communication. For this cycle, we did not collect data to measure this objective. For the next cycle, we need to identify specific courses and assignments that could give us the necessary data to measure this objective.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: Medium
- Implementation Description: Meet with faculty teaching SPCH 3050 and potentially larger SPCH faculty to brainstorm measures/assignments that could give us data for this objective. Develop a plan for data retrieval.
- Responsible Person/Group: Assessment Coordinator and Speech Faculty

Develop Measure for Objective #7: Research Critique

One of our objectives states that we want students to be able to appropriately critique the research process and arguments/conclusions presented in scholarly publications. For this cycle, we did not collect data to measure this objective. For the next cycle, we need to identify specific courses and assignments that could give us the necessary data to measure this objective. Also, we will discuss the annotated bibliography assignments with faculty teaching upper division/research courses. We will encourage faculty to move beyond having these be summary assignments to having them require research critique.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: Medium
- Implementation Description: Meet with Speech Area faculty to discuss classes and assignments that will give us the necessary measures.
- Responsible Person/Group: Assessment Coordinator and Speech Area Faculty

Develop Rotation for Measuring Objectives

This year, we completely revised our mission, goals, and learning objectives. So, this was our first effort at measuring our new goals and learning objectives. In this cycle, we measured 8 of the 11 objectives set forth in our new Assessment Plan. For the upcoming cycle, we need to measure the 3 objectives not measured in the cycle. Also, we need to develop a rotation for when objectives will be measured so that the 11 objectives are measured consistently over time.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High
- Implementation Description: The Assessment Coordinator will develop a rotation for objective measurement.
- Responsible Person/Group: Assessment Coordinator

Gather additional data

One of the goals of the Speech Major is equip students to summarize scholarly research. The target was not met for this objective. To better understand whether this an ongoing and/or widespread issue with our students, we should gather more data from additional assignments.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High
- Implementation Description: Have discussion with faculty teaching upper division, especially research courses, which assignments best assess ability to summarize research and make a plan to gather student work to analyze for next year's assessment. Also have discussion about assigning annotated bibliographies as first-round assignments in classes that require a term paper.
- Responsible Person/Group: Assessment Coordinator and Speech Faculty

Writing Rubric Design

I would like to revise the writing rubric scale. The current scale ranges from 1 to 3. Revising the scale will allow it to more accurately reflect the range of students' current ability levels. Also, this will allow the assessor to understand in which areas students need further training. Further, the rubric should also assess the content of the paper to see that the content is accurately and thoroughly explained. The current rubric does not assess content.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High
- Implementation Description: Assessment Coordinator for Speech will research potential writing rubrics to use in writing courses and decide upon one to use for next year's assessment data.
- Responsible Person/Group: Assessment Coordinator for Speech

Broader Data

The data for verbal and nonverbal presentation skills was collected for one class. Because our major is Speech Communication, several classes require formal presentations. Additional data should be collected from a variety of classes to determine whether the current data is reflective of a small sample size or a skill gap in our majors.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Implementation Description: Meet with SPCH 3050 and potentially larger SPCH faculty to discuss classes and assignments that will give us the necessary measures.
- Responsible Person/Group: Assessment Coordinator and Speech Faculty
**Responsible Person/Group:** Speech Area Faculty

**Rubric Adjustment**
The AACU's Critical Thinking VALUE Rubric was used to analyze student papers for message critique. The rubric should be examined to see if the general critical thinking rubric is an appropriate assessment tool for this measure or if another tool should be used. Another option is to use this tool with some minor adjustments.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Persuasion Final Paper
- **Outcome/Objective:** Message Critique

**Responsible Person/Group:** Speech Assessment Contact Person

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Sports Administration MS**

*As of: 12/12/2016 04:42 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**
The Master of Science in Sports Administration degree seeks to prepare graduates with professional skills and knowledge for careers in the $800-plus billion dollar sports business industry through an exceptional program inspired by excellence, vision, scholarship, leadership, and entrepreneurship.

**Goals**

**G 2:** Students will be knowledgeable of the discipline of sport business management.

Students will gain a focused knowledge of the discipline of sports business management

**G 1:** Students will be successful professionals working in the sport business industry.

Students will be successful professionals in the sports business industry.

**Student Learning Outcomes/Objectives**

**SLO 1:** Students will demonstrate an understanding of the managerial aspects of sport organization. (G: 2) (M: 1, 5)

Students will be able to demonstrate an understanding of the managerial aspects of sport organization, specifically the organizational processes of planning, staffing, leading, and controlling by developing an organizational manual as team project.

Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management; Sport Marketing Association.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of research (3.3.1.4)

**SLO 3:** Students will demonstrate an understanding of sport marketing. (M: 2, 5)

Students will demonstrate an understanding of sport marketing and the ability to apply this information by creating a marketing plan.

**SLO 4:** Students will demonstrate their understanding of core principles of budget and finance (G: 1, 2) (M: 1, 5)

Students will be able to demonstrate their understanding of the core principles of budget and finance in sport by creating an investment portfolio and performing a financial analysis of a sport organization.

Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management; Sport Marketing Association; COSMA

**Standard Associations**

1. Outcomes of administrative support services (3.3.1.2)

**SLO 6:** Students will demonstrate their knowledge and understanding of the legal process (M: 1, 4, 5)

Students will be able to demonstrate their understanding of the legal process and be able to identify potential legal issues related to sport business by drafting case briefs, presenting case summaries, and participating in a student-run mock trial.

**SLO 7:** Students will demonstrate the ability to analyze and apply sport business concepts (M: 5)

Students will be able to demonstrate their ability to analyze and apply sport industry concepts by completing an internship with a sport organization and a comprehensive exam or by writing a thesis.
### Other Outcomes/Objectives

**O/O 2:** Students will demonstrate the ability to identify and analyze a sport organization’s problems (M: 1, 5)

Students will demonstrate the ability to identify, research, and critically analyze a current sport organization’s problems by developing a case study with solutions.

Relevant Associations: Sport Management Program Review Council (SMPRC); North American Society for Sport Management (NASSM); Commission on Sport Management Accreditation (COSMA)

**O/O 5:** Students will demonstrate an understanding of the cultural issues associated with sport (M: 3, 5)

Students will be able to identify the role and significance of sport in a contemporary society and the cultural issues (race, gender, sexual orientation, age, disability) by writing a research paper.

### Measures, Targets, and Findings

#### M 1: Major Projects (O: 1, 2, 4, 6)

The student will demonstrate conceptual understanding of unique aspects of sport business in major projects in courses. Projects will be evaluated with an emphasis on the accuracy of the application of course content to the project; organization of the project; discussion of the materials and information presented; use of appropriate grammar and spelling; and accuracy of research material used for the project.

Source of Evidence: Project, either individual or group

**Target for O1: Students will demonstrate an understanding of the managerial aspects of sport organization.**

Students will develop an organization manual and will score a 70 or higher on the rubric developed for evaluation in the program.

**Findings 2011-2012 - Target: Met**

55 students met the target goal

**Target for O2: Students will demonstrate the ability to identify and analyze a sport organization’s problems**

Students will develop a case study and provide solutions to the problems identified for the organization; students will score a 70 or higher on the rubric developed for evaluation in the program.

**Findings 2011-2012 - Target: Partially Met**

56 out of 58 met the target goal

**Target for O4: Students will demonstrate their understanding of core principles of budget and finance**

Students will create an investment portfolio and perform a financial analysis of a sport organization; students will score a 7 or higher on the rubric developed for evaluation in the program.

**Findings 2011-2012 - Target: Partially Met**

51 out of 58 students met the target

**Target for O6: Students will demonstrate their knowledge and understanding of the legal process**

Students will develop legal briefs and perform at an acceptable level or higher as stated on the rubric associated with this project.

**Findings 2011-2012 - Target: Partially Met**

54 out of 58 students met the stated criteria

#### M 2: Students will create a marketing plan (O: 3)

Students will demonstrate an understanding of sport marketing and the ability to apply this information by creating a marketing plan.

Source of Evidence: Project, either individual or group

**Target for O3: Students will demonstrate an understanding of sport marketing.**

Students will score at least 70 points on the project using a rubric established for evaluation

**Findings 2011-2012 - Target: Met**

54 out of 54 met the specified target level of performance

#### M 3: Papers (O: 5)

Students will write a research paper on a contemporary issue in society related to sport. Students will discuss at least one cultural issue (race, gender, sexual orientation, age, disability) in the paper.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O5: Students will demonstrate an understanding of the cultural issues associated with sport**

Students will write a research paper on a cultural issue related to sport and will score a 70 or higher on the rubric developed for evaluation in the program.
### Findings 2011-2012 - Target: Met

68 out of 68 students met the specified target.

#### M 4: Presentations (O: 6)

Students will participate in a mock trial and will score a 70 or higher on the rubric developed for the project.

Source of Evidence: Presentation, either individual or group.

**Target for O6: Students will demonstrate their knowledge and understanding of the legal process**

Students will score 19 or higher on the rubric developed for evaluation of the mock trial.

**Findings 2011-2012 - Target: Partially Met**

53 out of 58 students met the identified target level of performance.

**Findings 2011-2012 - Target: Partially Met**

53 out of 58 students met the identified target level of performance.

#### M 5: Comprehensive Exam (O: 1, 2, 3, 4, 5, 6, 7)

Normal.dotm 0 0 1 18 106 Georgia State University 1 1 130 12,256 0 false 18 pt 18 pt 0 0 false false false

Students will complete a culminating essay comprehensive exam that covers all required course content.

Source of Evidence: Comprehensive/end-of-program subject matter exam.

**Target for O1: Students will demonstrate an understanding of the managerial aspects of sport organization.**

The student must score 7.0 or higher on each question completed. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**

35 students completed the exam question and met the criterion of scoring 7 or higher. Results are as follows: 15 students scored 7 12 students scored 8 5 students scored 9 3 students scored 10.

**Target for O2: Students will demonstrate the ability to identify and analyze a sport organization's problems**

The student must score 7.0 or higher on the exam to pass. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**

35 students completed the exam question and met the criterion of scoring 7 or higher. Results are as follows: 15 students scored 7 12 students scored 8 5 students scored 9 3 students scored 10.

**Target for O3: Students will demonstrate an understanding of sport marketing.**

The student must score 7.0 or higher on the exam to pass. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**

55 students completed the exam and met the criterion of scoring 7 or higher. Results are as follows: 13 students scored 7 10 students scored 8 19 students scored 9 13 students scored 10.

**Target for O4: Students will demonstrate their understanding of core principles of budget and finance**

The student must score 7.0 or higher on the exam to pass. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**

36 students completed the exam question and met the criterion of scoring 7 or higher. Results are as follows: 4 students scored 7 17 students scored 8 11 students scored 9 4 students scored 10.

**Target for O5: Students will demonstrate an understanding of the cultural issues associated with sport**

The student must score 7.0 or higher on the exam to pass. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**

51 students completed the exam question and met the criterion of scoring 7 or higher. Results are as follows: 11 students scored 7 4 students scored 8 15 students scored 9 21 students scored 10.

**Target for O6: Students will demonstrate their knowledge and understanding of the legal process**

The student must score 7.0 or higher on the exam to pass. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**

19 students completed the exam question and met the criterion of scoring 7 or higher. Results are as follows: 1 student scored 7 5 students scored 8 10 students scored 9 3 students scored 10.

**Target for O7: Students will demonstrate the ability to analyze and apply sport business concepts**

The student must score 7.0 or higher on the exam to pass. A rubric is used to evaluate the exam question.

**Findings 2011-2012 - Target: Met**
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Program goals: to improve writing skills, personal accountability when working with others, application of legal knowledge

The program will address three major concerns over the next year. 1. Place more emphasis on research-supported writing. To address this concern, the program has revised the comprehensive exam rubric to specifically state the number of references required to complete each comprehensive exam question. The rubric should inform students about the level of quality needed to pass the question and thus improve the overall quality of the student responses. 2. Incorporate more accountability on individuals when doing group projects. Currently some of the projects do not have this accountability built into the assessment. The accountability for individual performance will be added to the assessment. 3. Increase emphasis on the application of legal issues rather than a focus on the conceptual knowledge.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
Implementation Description: Revision of comprehensive exams and addition of a rubric. Addition of accountability measures on group projects. A description of these will be added to the syllabi Change of content for KH 7610. Textbook will not be used. Instructor will identify appropriate legal cases to be used in delivering the class.
Projected Completion Date: 12/2013
Responsible Person/Group: Comprehensive exam revisions: All Sport Administration faculty members Revision of grading for group projects: All Sport Administration faculty members who use group projects Changes to KH 7610: Dr. Brison

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Sport Administration is a graduate program and this question is not applicable.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Sport Administration is a graduate program and this question is not applicable.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Sport Administration is a graduate program and this question is not applicable.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
Sport Administration is a graduate program and this question is not applicable.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

A rubric has been developed for scoring the responses to comprehensive exam questions. Students now receive a copy of the rubric when the questions are distributed and faculty members use the rubric for scoring the exams. The changes were made to improve reliability when scoring the exams. We will add a specific requirement of number of resources to use when completing the exam because students are not supporting their statements with sufficient references.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Data showed that students were not using research to document their statements on comprehensive exams. There will be more emphasis on writing in classes and deliberate instruction in including references to papers submitted during program completion. An issue of group accountability was raised. To address this, instructors will add a requirement to group projects that will require students to not rely on the work of others when completing group projects. KH 7610 has discontinued the use of a textbook for the class and substituted case studies for course reading materials. This change puts more emphasis on application of knowledge rather than acquisition of knowledge.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

The major changes in the assessments used for program evaluation involved the comprehensive exam. After looking at the data, several students were barely passing the exam even though they had done well on writing assignments in their classes. The change was the development of a rubric that all faculty members used for grading the exam.

ADMINISTRATIVE DEPT QUESTION 2: What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

Students seem to do well on projects and presentations used during the program. Based on assessment results, the program is delivering the content knowledge that students will need once they enter the workforce.
ADMINISTRATIVE DEPARTMENT QUESTION 3:
How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

The comprehensive exam and mock trial assignment will be monitored to see if there is a change in performance in next year's results. By focusing on including research to support papers submitted by students, they should be better prepared to write their comprehensive exam questions. The mock trial rubric will change to focus more on application of knowledge and to see if students are able to generalize knowledge from class as they fulfill the various roles for the mock trial.

Georgia State University
Assessment Data by Section
2011-2012 Sports Medicine MS
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The program for the major in sports medicine prepares students for career opportunities in the field of athletic training. The program includes course work and laboratory experiences in the areas of prevention, management, evaluation, and rehabilitation of athletic injuries. The program also includes a research project in which findings will be presented at a graduate student symposium prior to graduation. The purpose of this program is to provide qualified candidates with in-depth experiences beyond entry-level athletic training expectations. Additionally, all students must complete a minimum of 400 hours of clinical experience in an approved setting as part of the degree program requirements.

Goals
G 1: Demonstrates effective Sports Medicine Administration
Students through daily participation, demonstrate administrative functions in a variety of athletic settings. Measured through evaluations given every semester on a 1-5 scale.

G 2: Understands and applies therapeutic Modalities
Students will demonstrate both practical and cognitive knowledge of therapeutic modalities

G 3: Understands importance of professional Development and service to the profession
Students will demonstrate an understanding of professional development, responsibilities, and its importance to their continued growth in their chosen field

G 4: Knows orthopedic Assessment and injury rehabilitation
Students demonstrate knowledge in orthopedic assessment and injury rehabilitation

G 5: Understanding and utilizing Evidenced Based Practice as related to athletic training practice
Students will learn how to obtain, synthesize, and conduct research.

Outcomes/Objectives
O/O 1: Understanding and utilizing Evidenced Based Practice as related to athletic training practice (G: 5) (M: 1, 3, 6)
Students demonstrate knowledge and understanding of current research methods, including evidenced based practice, and are able to read and interpret current research in their field.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression

Standard Associations
4 Outcomes of research (3.3.1.4)

Strategic Plan Associations
3.1 Enhance a research culture.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
### O/O 2: Is proficient in acute Injury and Illness Care (G: 1, 2, 3, 4, 5) (M: 2, 4, 6, 7, 8)

Students develop advanced proficiency in the acute care and management of activity related injury and illness

**General Education/Core Curriculum Associations**

1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
3. Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
4. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student promotion and progression
2. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2. Leverage our national reputation in professional degree programs for the development of societal leaders.
3. Enhance a research culture.
4. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

### O/O 3: Demonstrates effective Sports Medicine Administration (G: 1, 3) (M: 4)

(Draft/In Progress) Students through daily participation, demonstrate administrative functions in a variety of athletic settings

**General Education/Core Curriculum Associations**

1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
3. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student promotion and progression
2. Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

2. Leverage our national reputation in professional degree programs for the development of societal leaders.
3. Enhance a research culture.
4. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

### O/O 4: Understands and applies therapeutic Modalities (G: 1, 2, 4, 5) (M: 4, 6, 7, 8)

Students will demonstrate both practical and cognitive knowledge of therapeutic modalities

**General Education/Core Curriculum Associations**

1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
3. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student promotion and progression
2. Timely graduation
3. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Standard Associations**

2. Leverage our national reputation in professional degree programs for the development of societal leaders.
3. Enhance a research culture.
4. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

### O/O 5: Understands importance of professional development and service to the profession (G: 1, 3) (M: 1, 6)

Students will demonstrate an understanding of professional development, responsibilities, and its importance to their continued growth in their chosen field

**General Education/Core Curriculum Associations**

1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
3. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student promotion and progression
2. Timely graduation
3. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Standard Associations**

2. Leverage our national reputation in professional degree programs for the development of societal leaders.
3. Enhance a research culture.
4. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
5. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
### General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Institutional Priority Associations

2 Student promotion and progression

### Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### Strategic Plan Associations

3.1 Enhance a research culture.

### O/O 6: Knows orthopedic Assessment and injury rehabilitation (G: 1, 2, 3, 4, 5) (M: 4, 6, 7, 8)

Students demonstrate knowledge in orthopedic assessment and injury rehabilitation

### Measures, Targets, and Findings

#### M 1: Professional Presentations (O: 1, 5)

To gain full understanding of professional issues, students must present a minimum of twice annually in a peer setting on a relevant professional issue. All will submit an abstract for poster or oral presentation at a scientific conference.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Understanding and utilizing Evidenced Based Practice as related to athletic training practice**

Students will present twice a semester utilizing evidence based research and will be graded on presentation.

**Findings 2011-2012 - Target: Met**

All 27 students successfully presented 2-3 times each semester providing relevant research.

**Target for O5: Understands importance of professional development and service to the profession**

All students will complete 4 "shadows" of various sports medicine professionals. Also complete 2 volunteer sports coverages in the state.

**Findings 2011-2012 - Target: Met**

All 27 students completed 4 "shadows" of various sports medicine professionals. Also, all 27 students completed 2 volunteer sports coverages in the state.

#### M 2: Acute Care Certifications (O: 2)

Students will obtain American Red Cross Professional CPR certification and Emergency Responder Certification

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Is proficient in acute Injury and Illness Care**

Certification cards for Emergency Response, First Aid and NATA BOC certifications

**Findings 2011-2012 - Target: Met**
All 27 students are currently certified by the American Red Cross in Emergency Response, CPR, and First Aid. All 27 students are currently certified by the NATA BOC.

### M 3: Thesis or Research Project (O: 1)

Students must complete a thesis or research project prior to graduation

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Understanding and utilizing Evidenced Based Practice as related to athletic training practice**

Completion of satisfactory research project

**Findings 2011-2012 - Target: Met**

100% (11) of graduating students completed acceptable research projects including IRB approval, data collection, data analysis, and a presentation of their findings.

### M 4: Clinical Site Evaluation (O: 2, 3, 4, 6)

Site evaluations are performed twice yearly. Meetings are held between student and clinical supervisors to discuss strengths and challenges within clinical setting and profession.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Is proficient in acute Injury and Illness Care**

Students must receive a 3/5 or better on end of semester evaluation by clinical supervisor.

**Findings 2011-2012 - Target: Met**

100% of students received a 3.75/5 or better on end of semester evaluation by clinical supervisor.

**Target for O3: Demonstrates effective Sports Medicine Administration**

Students must receive a 3/5 or better on end of semester evaluation by clinical supervisor.

**Findings 2011-2012 - Target: Met**

100% of students received a 3.75/5 or better on end of semester evaluation by clinical supervisor.

**Target for O4: Understands and applies therapeutic Modalities**

Students must receive a 3/5 or better on end of semester evaluation by clinical supervisor.

**Findings 2011-2012 - Target: Met**

100% of students received a 3.75/5 or better on end of semester evaluation by clinical supervisor.

**Target for O6: Knows orthopedic Assessment and injury rehabilitation**

Students must receive a 3/5 or better on end of semester evaluation by clinical supervisor.

**Findings 2011-2012 - Target: Met**

100% of students received a 3.75/5 or better on end of semester evaluation by clinical supervisor.

### M 6: Case Study (O: 1, 2, 4, 5, 6)

Students will demonstrate proficiency in completing all aspects of the case study by the end of the graduate program. The case study was designed to incorporate all aspects of health care charting, teaching the various means of initial injury evaluation, (all five essential components), the main components of treatment planning, and then the primary components of treatment and rehabilitation progression. The template was also designed to meet both collegiate setting requirements and state and federal reporting mandates.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Understanding and utilizing Evidenced Based Practice as related to athletic training practice**

All students must complete a case study every semester and re-work it until a 80% or higher is achieved.

**Findings 2011-2012 - Target: Met**

90% of students received an 80% or better on case study assignment on the first try. The last 10% of students received an 80% or better on case study assignment on the second try, for a total completion rate of 100%.

**Target for O4: Understands and applies therapeutic Modalities**

All students must complete a case study every semester and re-work it until a 80% or higher is achieved.

**Findings 2011-2012 - Target: Met**

90% of students received an 80% or better on case study assignment on the first try. The last 10% of students received an 80% or better on case study assignment on the second try, for a total completion rate of 100%.

**Target for O5: Understands importance of professional development and service to the profession**

All students must complete a case study every semester and present it to peers.

**Findings 2011-2012 - Target: Met**
100% of students completed a case study and presented it to their peers. Three students presented their research at a Regional Athletic Training Conference. Two students presented their research at a National Athletic Training Conference.

Target for **O6**: Knows orthopedic Assessment and injury rehabilitation
All students must complete a case study every semester and re-work it until a 80% or higher is achieved.

**Findings 2011-2012 - Target: Met**
90% of students received an 80% or better on case study assignment on the first try. The last 10% of students received an 80% or better on case study assignment on the second try, for a total completion rate of 100%.

**M 7: Proficiency Exam (O: 2, 4, 6)**
Students must demonstrate clinical proficiency in all areas of sports medicine.
Source of Evidence: Academic direct measure of learning - other

Target for **O2**: Is proficient in acute Injury and Illness Care
Students must receive a B for their final grade.

**Findings 2011-2012 - Target: Partially Met**
80% (12 out of 15) of students received a B or better on their final grade. 20% (3 out of 15) students received a B- as their final grade.

Target for **O4**: Understands and applies therapeutic Modalities
Students must receive a B or better for their final grade.

**Findings 2011-2012 - Target: Not Reported This Cycle**
This course was not offered.

Target for **O6**: Knows orthopedic Assessment and injury rehabilitation
Students must receive a B or better for their final grade.

**Findings 2011-2012 - Target: Partially Met**
82% (9 out of 11) of students received a B or better for their final grade. 18% (2 out of 11) students received a B- for their final grade.

**M 8: Final Competency Exam (O: 2, 4, 6)**
Students will demonstrate comprehensive knowledge of curricular material
Source of Evidence: Academic direct measure of learning - other

Target for **O2**: Is proficient in acute Injury and Illness Care
All students pass the sports medicine portion of the comprehensive exam with a 3.5 or better on two injury based case studies.

**Findings 2011-2012 - Target: Met**
All students passed the sports medicine portion of the comprehensive exam with a 3.5 or better on two injury based case studies.

Target for **O4**: Understands and applies therapeutic Modalities
All students pass the sports medicine portion of the comprehensive exam with a 3.5 or better on two injury based case studies.

**Findings 2011-2012 - Target: Met**
All students passed the sports medicine portion of the comprehensive exam with a 3.5 or better on two injury based case studies.

Target for **O6**: Knows orthopedic Assessment and injury rehabilitation
All students pass the sports medicine portion of the comprehensive exam with a 3.5 or better on two injury based case studies.

**Findings 2011-2012 - Target: Met**
All students passed the sports medicine portion of the comprehensive exam with a 3.5 or better on two injury based case studies.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Maintain and Monitor**
Program faculty will maintain the current design and implementation of the program, and continue to monitor the stated student learning outcomes during the 2008-2009 academic year

**Established in Cycle:** 2008-2009
**Implementation Status:** Planned
**Priority:** High
More hands on-experience
Students will have a greater opportunity than previously to practice with and demonstrate proficiency with a wider variety of rehabilitation tools.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Proficiency Exam | Outcome/Objective: Knows orthopedic Assessment and injury rehabilitation

Implementation Description: Designated time during class for hands-on experience.
Projected Completion Date: 12/2012
Responsible Person/Group: Cheryl Appleberry
Additional Resources: None, due to receiving research funds from the dean.

Updated material and added clinical experience
Due to the advances in evaluation techniques a new textbook will be introduced. Furthermore, more information was gleaned from two practicing experts at a national convention and will be included into the material presented.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Proficiency Exam | Outcome/Objective: Knows orthopedic Assessment and injury rehabilitation

Projected Completion Date: 05/2013
Responsible Person/Group: Cheryl Appleberry
Additional Resources: None

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The changes we made include changing 2 of our outcome measures of a final exam grade of B or better to a final course grade of B better. This change was made in order to better track learning over time rather than on just one day. In the upcoming year, the final proficiency exam will be removed. This will occur because of the large demands required for completion of the research project.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Due to 80-82% of students receiving a B or better in our Evaluation and Rehabilitation classes improvements to each class have been proposed. The Evaluation class will have new techniques and new textbook introduced. The Rehabilitation class will have a wider variety of hands-on experiences with the addition of new rehabilitation tools available for practice.

Annual Report Section Responses

Most Important Accomplishments for Year—Briefly describe the major things you accomplished over the past year. Be sure to note previous Action Plans that were executed this year, plus any accomplishments that are not otherwise mentioned in your outcomes reporting.
We have maintained our 100% placement rate following graduation. Three students have earned professional sports team positions. A course change was proposed and accepted to offer KH 7820 instead of EPRS 7900 in order to better align the students' research goals with applicable research methods. A course change was proposed and accepted to offer only one biomechanics class in order to better align the students' clinical and research needs.

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.
Removal of clinical faculty with 15 years of experience and hiring a new tenure track faculty member for the 2013-2014 academic year.

year. We will still be limited in expansion with only two faculty members. During the upcoming year students’ research interests will still be limited due to the presence of only one research faculty. To increase access to cadaver lab experience for the graduate anatomy course.

**Publications and Presentations**—Note in this section any articles published or presentations made at professional conferences by staff.

One article was published by Shelley W. Linens. One presentation was made by Shelley W. Linens at National Athletic Trainers’ Association Annual Meeting and Clinical Symposia.

**Academic Teaching Activities**—If the staff participated in teaching (or assisted in the teaching of) academic courses as part of their responsibilities to the department, please note that here.

Shelley W. Linens taught 3 courses (KH 8820, KH 8900, KH 7530) Cheryl Appleberry taught 3 courses (KH 7680, KH 7580, KH 8300)

**International Activities**—Note here any international activities of the department or its staff.

One faculty member, Shelley W. Linens, submitted an abstract for presentation at the 4th Annual International Ankle Symposium.

**Service to the External Community**—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

100% of students volunteered at least twice, serving as part of the sports medicine team for events such as football games for Atlanta Public Schools, the Georgia Games and the Peachtree Road Race.

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Sports Science PhD**

*As of: 12/12/2016 04:42 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

---

**Mission / Purpose**

Recognizing that physical activity is vital for all people, the Department of Kinesiology and Health at Georgia State University seeks to: 1. Discover new knowledge and advance the understanding of the role of physical activity in attaining optimal health and well-being, 2. Educate members of society and prepare future professionals, and 3. Promote healthy lifestyles through life-long activity and learning. The Ph.D. major in Kinesiology is designed to prepare students for research and teaching careers at colleges and universities and for health, physiological performance, rehabilitative science, and related fields. Three concentration areas, Biomechanics and Physical Rehabilitation, Exercise Physiology, and Exercise Psychology are available within this program.

**Goals**

**G 1: Knowledge**

Students will gain knowledge in Kinesiology and advanced knowledge in their area of research focus

**G 2: Problem solving**

Students will become better problem-solvers

**G 3: Skills**

Students will gain skills necessary to be successful in research, scholarship, and teaching

**Outcomes/Objectives**

**O/O 1: Prepare for careers as professors and researchers (G: 1, 2, 3) (M: 1, 2)**

Prepare graduates for careers as professors and researchers in higher education and research institutions

**O/O 2: Understanding of research (G: 1, 2, 3) (M: 2, 3)**

Graduates understand the concepts and applications of exercise physiology, biomechanics, and exercise psychology research methodology

**O/O 3: Specialization (G: 1, 2, 3) (M: 4)**

Graduates of the program will have a subspecialty that strengthens their skills in their major concentration

**O/O 4: Grant writing and management (G: 1, 2, 3) (M: 5)**

Graduates are prepared for careers that involve grant writing and management skills

**O/O 5: Cultural sensitivity (G: 3) (M: 6)**

Graduates are prepared to work with individuals who are culturally and individually different

**Measures, Targets, and Findings**

**M 1: Comprehensive exams and dissertation (O: 1)**

Students pass comprehensive exams and write dissertations that contribute to the body of research literature in the exercise**

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Annual review of doctoral students**
Kinesiology faculty members will meet once in the late Spring (or early summer) semester to review the progress of their doctoral students toward course, residency, and research completion.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Summer 2009
- **Projected Completion Date:** 04/2017
- **Responsible Person/Group:** Kinesiology faculty

**Review and/or revise outcomes and measures**
Kinesiology faculty have developed a policy involving the annual review of doctoral students. This meeting is held in the spring semester and each doctoral student is required to submit a current curriculum vitae, progress report on course work and residency requirements, with special attention to research/scholarship projects. This meeting essentially addresses all aspects of the learning outcomes assessment outcomes/objectives and measures, as well as other issues related to the program.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** Medium

**Research presentations**
Kinesiology faculty need to review research programs to insure that doctoral students are participating and presenting research prior to dissertation.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium

**PETE concentration**
Meeting to discuss the management of the outcome assessments for the new Physical Education Teacher Education (PETE) concentration in Kinesiology.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Although not reflected in the assessment or action plan, the College of Education’s change core and course requirements in Doctoral programs will allow enhanced matriculation through the program with fewer course requirements and greater emphasis on research experience. The department changed its program of study course requirements (change in college core and reduced total number of credit hours) and added a concentration in Physical Education Teacher Education (PETE) to the existing concentrations of Exercise Physiology, Biomechanics and Physical Rehabilitation, and Exercise Psychology within the Kinesiology program. This change in the college requirement is in line with our department’s philosophy of greater emphasis on research experiences of doctoral students throughout their entire program and not just limited to their dissection project. The program continues to meet our goals related to professional placement of our graduates and comprehensive exam pass rates. In addition, our matriculation rate continues to improve with our latest students taking 4-4.3 years to complete their degrees. We will maintain our policies and procedures related to annual review of doctoral students, which addresses nearly all aspects of the assessment plan. In addition, this meeting serves as the main discussion venue for questions and discussion related to Learning Outcomes Assessment for the Kinesiology program.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
Review of the data indicates that although all students are participating in research related activities on an annual basis, a small percentage of the students are not always presenting their research findings at local, national, or international professional meetings every year. Faculty will meet to discuss this finding and explore whether budgetary restrictions contribute to this observation.

Georgia State University
Assessment Data by Section
2011-2012 Taxation MTX
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
The Master of Taxation (M.Tx.) program offers a variety of courses that provide students with opportunities to develop research, technical and communication skills that tax professionals need to excel in their careers.

**Goals**

**G 1: Tax Research**
Students will be competent tax law researchers.

**G 2: Technical Tax Knowledge for Practice**
Students will be knowledgeable in the technical areas of tax law for professional practice.

**G 3: Strong Communications Skills**
Students will be effective communicators both in written communications and in oral presentations and will be able to document their research conclusions.

**Student Learning Outcomes/Objectives**

**SLO 1: To develop ability to conduct tax research (M: 1, 2, 3)**
Expected outcomes of above stated program objectives: (1) The student should be able to identify tax issues; (2) The student should be able to locate relevant authority for resolving tax issues; and (3) The student should be able to correctly evaluate primary tax authority. The assessment method for this learning objective is performance on projects in Tax Research (Tx 8030).

**SLO 2: Acquisition of substantive tax knowledge (M: 4, 5)**
Students will demonstrate technical knowledge of tax law in the key areas of corporations and partnerships.

**SLO 3: Demonstrate professional communications skills.**
Students will demonstrate the ability to correctly and effectively document and cite research conclusions in writing and in oral presentations.

**Measures, Targets, and Findings**

**M 1: Identifying Tax Issues (O: 1)**
Students complete self-tests on an electronic self-assessment website developed by Georgia State University. The assessments consist of four self-tests related to questions of fact and law and identifying issues in various areas of tax law. Assessment takes place in TX 8030. Target Average score of 70 on questions of Identifying Issues.
Source of Evidence: Project, either individual or group

**Target for O1: To develop ability to conduct tax research**
Average score of 70 on questions of Identifying Issues.

**Findings 2011-2012 - Target: Partially Met**
Fall 2011: 69.52 Spring 2012: 76.53

**M 2: Locating Tax Authority (O: 1)**
Students are given a take-home exam in Tx 8030 which requires them under time pressure to perform independent tax research focused on locating the correct authority to support their answers.
Source of Evidence: Project, either individual or group

**Target for O1: To develop ability to conduct tax research**
The target is a score of 85% on the final research exam in Tx 8030.

**Findings 2011-2012 - Target: Met**
Fall 2011: 86.05 on Final Research Exam Spring 2012: 88.17 on Final Research Exam
M 3: Evaluating Tax Authority (O: 1)

Students complete self-tests on an electronic self-assessment website developed by Georgia State University. The assessments consist of questions related to evaluating tax authority located during research and to properly reconciling conflicting authorities. Assessment takes place in TX 8030. Target Average score of 70 on Evaluating Authority self-tests.

Source of Evidence: Project, either individual or group

Target for O1: To develop ability to conduct tax research

Average score of 70 on Evaluating Authority self-tests.

Findings 2011-2012 - Target: Met

Fall 2011: 83.11 Spring 2012: 79.90

M 4: Knowledge of Corporate Tax Law (O: 2)

Performance is measured by class average on multiple examinations covering detailed elements of forming, operating, and liquidating a corporation.

Source of Evidence: Project, either individual or group

Target for O2: Acquisition of substantive tax knowledge

Class average of 85%.

M 5: Knowledge of Partnership Taxation (O: 2)

Performance is measured by class average on several exams which test the rules for creating a partnership entity, determining outside basis of partners, and applying the distribution rules to determine proper tax treatment.

Source of Evidence: Project, either individual or group

Target for O2: Acquisition of substantive tax knowledge

Class average of 85%.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Tx 8120

Since there is insufficient time to cover all current topics, consider eliminating the corporate tax return project or providing it as an additional exercise for students desiring the compliance experience.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: Medium
Projected Completion Date: 08/2010
Responsible Person/Group: Course Instructor.
Additional Resources: None.
Budget Amount Requested: $0.00 (no request)

Locate Authority -- Change Measurement

Old Locating Authority tests used strict boolean logic requiring the students to use connectors and specific syntax to formulate searches. Most professional research systems now allow "natural language" searching and a less rigid boolean logic. Our previous instrument did not allow the flexibility that is now found in professional research systems, so we have changed the measurement to incorporate modern research methods.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Implementation Description: Developed the instrument in Fall 2011. Revised the questions in Spring 2012.
Projected Completion Date: 05/2012
Responsible Person/Group: Lucia Smeal

Substitute Boolean Logic self-tests with Final Exam Research Questions

The Locating Authority tests used Boolean logic requiring the students to use connectors and specific syntax to formulate searches. However, most students now use "natural language" or Google-type searches. Thus, while the students were performing adequately on in-class research assignments, they did not do well with purely Boolean searching. As of Fall 2011, we no longer use the Locating Authority website self-tests to assess the students. Instead, we are developing a final examination questions with research questions that will allow the students to use more updated methods of locating tax authority.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High
Implementation Description: We will develop a final, take-home exam for TX 8030 which requires the students under time pressure to perform independent research incorporating the elements of each of the first three learning objectives with a focus on locating authority. The target score for the exam is 85%. The exam will function as the Locating Authority assessment in conjunction with continued use of the MTX writing websites for the other two assessments.
Projected Completion Date: 07/2011
Responsible Person/Group: Tx 8030 Professor

Issue ID Score Improvement

In Summer and Fall 2011, the students' did not meet the targeted score on the Identifying Issues assessments. As a result, we will incorporate more in-class practice exercises into the curriculum. The students will be given more issue identification homework assignments which will be reviewed in class with the students working in small groups. This additional practice of this skill should help
raise their assessment scores going forward.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Identifying Tax Issues | Outcome/Objective: To develop ability to conduct tax research

Implementation Description: Add Issue ID practice problems to curriculum with in-class discussion
Projected Completion Date: 01/2012
Responsible Person/Group: Lucia Smeal

Tx 8120
College registration system does not prevent MTx students from taking courses out of sequence. Hence, when pre-req's are not taken class averages suffer. We hope to have implemented in the next year registration blocks on all courses with pre-req's.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High
Implementation Description: Registration programing.
Responsible Person/Group: College of Business

---

Mission / Purpose
The mission of the Doctor of Philosophy (Ph.D.) degree program is to prepare researchers, scholars, and teacher educators in the fields of language and literacy to work in diverse national and international academic settings, with a special focus on urban education. As part of this degree, graduates engage fully and deeply in the language and literacy research and scholarship, theory and practice. Graduates of this program understand the Ph.D. as a lifelong engagement with research, scholarship, teaching and service in language and literacy.

Goals
G 1: G-1 have expert knowledge of language and literacy education theory and research.
Candidates have expert knowledge of language and literacy education theory and research.

G 2: G-2 have expert knowledge, skills, and dispositions needed to be teacher educators and scholars of language and literacy.
Candidates have expert knowledge, skills, and dispositions needed to be teacher educators and scholars of language and literacy.

G 3: G-3 are active contributors to professional organizations at international, national, and local levels
Candidates are active participants and contributors to professional organizations at international, national, and local levels in language and literacy education.

Student Learning Outcomes/Objectives
SLO 1: Demonstrates Research Knowledge (G: 1) (M: 1)
Candidates demonstrate knowledge of histories and theories of language, reading, and writing research, as well as methodologies specific to language and literacy education research.

Institutional Priority Associations
2. Student promotion and progression

Strategic Plan Associations
3.1 Enhance a research culture.

SLO 2: Demonstrates Professional and Pedagogical Skills for Teacher Education (G: 2) (M: 2)
Candidates create and implement research- and evidence-based pedagogies for teaching future teachers, working teachers, and future leaders and scholars in language and literacy education.

Strategic Plan Associations
3.1 Enhance a research culture.

SLO 3: Demonstrates Professional Service and Engagement (M: 3)
Candidates participate in and contribute to professional organizations in language and literacy education through the publication of manuscripts, presentations at conferences, leadership roles, review of manuscripts and proposals for publications, presentations, and grants.
SLO 4: Demonstrates Engagement with Technology (M: 4)
Candidates access, develop, and promote the use of technology in their research, teaching, and service contributions to the field of language and literacy education.

M 1: Research Knowledge (O: 1)
Candidates are assessed using a language and literacy education unit-wide rubric. A rating will be determined using Standards 1 and 2 from the rubric.
Source of Evidence: Academic direct measure of learning - other

Target for O1: Demonstrates Research Knowledge
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

Findings 2011-2012 - Target: Met
All students of students have met this target.

M 2: Pedagogical Skills for Teacher Education (O: 2)
Candidates are assessed using a language and literacy education unit-wide rubric. A rating will be determined using Standards 3 and 4 from the rubric.
Source of Evidence: Academic direct measure of learning - other

Target for O2: Demonstrates Professional and Pedagogical Skills for Teacher Education
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

Findings 2011-2012 - Target: Met
All students have met this target.

M 3: Professional Service and Engagement (O: 3)
Candidates are assessed using a language and literacy education unit-wide rubric. A rating will be determined using Standards 5 and 6 from the rubric.
Source of Evidence: Academic direct measure of learning - other

Target for O3: Demonstrates Professional Service and Engagement
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

Findings 2011-2012 - Target: Met
All students have met this target.

M 4: Engagement with Technology (O: 4)
Candidates are assessed using a language and literacy education unit-wide rubric. A rating will be determined using Standard 7 from the rubric.
Source of Evidence: Academic direct measure of learning - other

Target for O4: Demonstrates Engagement with Technology
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

Findings 2011-2012 - Target: Met
All students have met this target.
Increased International Visibility
Students will begin to work within and/or with international projects and educational spaces.

- **Established in Cycle:** 2011-2012

Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements -** What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

We admitted four full-time students into our program. We also recruited international students, one of whom was awarded a Dean's fellowship.

**CTW Reflection 2: Assessment -** What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Students are prepared to go on international and national searches. This demands a high degree of critical thinking that is expected across each course in the program. Students are prepared to discuss and extend solutions for literacy issues.

**CTW Reflection 3: Needs -** What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

N/A

**CTW Reflection 4: Overall Reflection -** What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

N/A

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

N/A

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

N/A

**ADMINISTRATIVE DEPT QUESTION 1:** Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

N/A

**ADMINISTRATIVE DEPT QUESTION 2:** What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department's effectiveness?

N/A

**ADMINISTRATIVE DEPARTMENT QUESTION 3:** How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

Georgia State University
Assessment Data by Section
2011-2012 Teaching & Learning PhD--Music Education
As of: 12/13/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
This post-master's degree emphasizes development of research skills and high levels of practice in the teaching and learning of music, particularly in school settings. Applicants must demonstrate strong potential for conducting successful research and a record of exemplary teaching. Students pursue studies in research methodology, music education, and a cognate area consistent with background and interests. This program is intended for those who wish to teach in colleges and universities or to work in the education programs of cultural and arts organizations.
### Goals

**G 1: MusEd Goal #1 (Ph.D.)**
1. Our graduates will be informed teachers who know the content in music needed for teaching students in P-12 schools.

**G 2: MusEd Goal #2 (Ph.D.)**
2. Our graduates will be informed teachers who know the content in music teacher education needed for teaching undergraduate students in teacher preparation programs.

**G 3: MusEd Goal #3 (Ph.D.)**
3. Our graduates will be informed researchers who know how to identify research problems, pose appropriate research questions, employ methodologies sufficient to answer the questions, and draw meaningful implications for music teaching and learning.

**G 4: MusEd Goal #4 (Ph.D.)**
4. Our graduates will be informed theorists and philosophers who are able to articulate current theories and philosophies related to music education pedagogy both in the United States and worldwide.

### Student Learning Outcomes/Objectives

**SLO 1: MusEd Objective #1 (Ph.D.) (M: 1)**
(1.) Our graduates will be able to teach P-12 students while demonstrating mastery-level musicianship skills, research-supported pedagogical techniques, and appropriate assessment practices.

**SLO 2: MusEd Objective #2 (Ph.D.) (M: 2)**
(2.) Our graduates will be able to teach undergraduate students, develop coherent syllabi, evaluate student work, provide model lessons, and institute appropriate assessment practices.

**SLO 3: MusEd Objective #3 (Ph.D.) (M: 3)**
(3.) Our graduates will be able to conduct rigorous research projects that hold the potential for meaningful impact on either P-12 music education or undergraduate teacher preparation programs.

**SLO 4: MusEd Objective #4 (Ph.D.) (M: 4)**
(4.) Our graduates will be able to demonstrate the application of theory and philosophy to the decisions made during pedagogy and assessment.

### Measures (Key Assessments), Targets, and Findings

**M 1: MusEd Assessment Measure #1 (Ph.D.) (O: 1)**
Assessment Measure: Ph.D. students will teach P-12 students on many occasions during their program of study at Georgia State University. They will do so either in their own teaching positions, or through the school-university collaborations facilitated by our Center for Educational Partnerships. Rubric: "MusEd - Clinical Practice (Ph.D.)." Minimum Score: 3 of 4.
Source of Evidence: Field work, internship, or teaching evaluation

**Target for O1: MusEd Objective #1 (Ph.D.)**
3 of 4 points.

**Findings 2011-2012 - Target: Met**
Two students completed internships in 2011-12. Both scored 4.0 of 4.0.

**M 2: MusEd Assessment Measure #2 (Ph.D.) (O: 2)**
Assessment Measure: Ph.D. students will teach an undergraduate course at least once during their program of study at Georgia State University. Rubric: "MusEd - Undergraduate Teaching (Ph.D.)." Minimum Score: 3 of 4.
Source of Evidence: Field work, internship, or teaching evaluation

**Target for O2: MusEd Objective #2 (Ph.D.)**
3 of 4 points.

**Findings 2011-2012 - Target: Met**
Three students taught undergraduate courses during 2011-12. The average rubric score was 3.8 of 4.0.

**M 3: MusEd Assessment Measure #3 (Ph.D.) (O: 3)**
Source of Evidence: Senior thesis or culminating major project

**Target for O3: MusEd Objective #3 (Ph.D.)**
Rating of "Pass" by consensus vote of committee.

**Findings 2011-2012 - Target: Met**
No student presented their thesis or dissertation before a committee during 2011-12.

**M 4: MusEd Assessment Measure #4 (Ph.D.) (O: 4)**

Assessment Measure: Ph.D. students will teach an undergraduate course at least once during their program of study at Georgia State University. They will assess their teaching and student learning throughout the course and will recommend final course grades to the faculty supervisor. Rubric: "MusEd - Effect on Student Learning (Ph.D.).” Minimum Score: 3 of 4.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O4: MusEd Objective #4 (Ph.D.)**

3 of 4 points

**Findings 2011-2012 - Target: Met**

Three students taught undergraduate courses in 2011-12. On this measure, students scored an average of 3.3 of 4.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Faculty oversight**

2011-12 was the first year in which Ph.D. students taught undergraduate courses. The instructors (Ph.D. students) requested that the schedule be configured so that they team teach similar content. We are accomplishing this in two ways: Spring 2013: The two courses (MUS 3310 and MUS 3350) will meet consecutively on Monday nights, and undergraduate students will be required to enroll in both. Fall 2013: We have submitted a curriculum change to fold the content of MUS 3350 into the content of MUS 3310, creating a single course that will be team-taught by two Ph.D. students.

**Established in Cycle: 2011-2012**

**Implementation Status: Planned**

**Priority: High**

**Implementation Description: Curriculum change as identified above.**

**Projected Completion Date: 08/2013**

**Responsible Person/Group: Patrick Freer, Coordinator of Music Education**

**Redefinition of Comprehensive Examinations**

Our comprehensive examination process has been revised for an initial administration of November 2012. The wording below is contained in our new handbook for Ph.D. students in music education (for Ph.D.): "Each Ph.D. student will engage in the comprehensive examination during the final semester of course work as determined by the faculty academic advisor. The comprehensive examination occurs over a period of at least three weeks. The first two weeks involve written projects, and the final week includes the oral portion of the exam. All parts of the exam are to be completed at least one month (30 days) before the final day of classes for that semester. This will allow time for the completion of any additional work requested by the Doctoral Advisory Committee. Detailed information about the Doctor of Philosophy (Ph.D.) requirements in Georgia State University's College of Education can be found in the current edition of the university Graduate Catalog. The relevant section is Section 4320. This section includes information about the Comprehensive Examination, assembling the appropriate faculty committee, and registering for courses after successful completion of the Comprehensive Examination. The catalog is online, and can be accessed through: http://www.gsu.edu/enrollment/catalogs.html Scheduling. The first step is to schedule the date for the oral comprehensive examination (see Week Three below). This must be done in consultation with the faculty academic advisor.**

**Week One: Written Project (Research Methodology, Analysis & Interpretation) 2500 minimum words (approximately 8 pages) in strict accordance with the current edition of the Publication Manual of the American Psychological Association. The above minimum word count does not include the required title page and references. The paper topic will be assigned by Friday at noon and due via email by Monday at 11:59 PM. Week Two: Written Project (Music Education Pedagogy and Research) 2500 minimum words (approximately 8 pages) in strict accordance with the current edition of the Publication Manual of the American Psychological Association. The above minimum word count does not include the required title page and references. The paper topic will be assigned by Friday at noon and due via email by Monday at 11:59 PM. Week Three: Oral Examination Duration: 90 minutes Part One: Prepared Responses o The Ph.D. student will be assigned to answer four questions, one related to each of the four semesters of MUS 8960 (Proseminar in Music Education). The student will be assigned to speak to each question for ten minutes each (40 minutes total). For each question, the student may prepare a single side of a 3x5 index card (4 cards total) for reference during the presentation. o The four questions will be presented to the Ph.D. student seven days prior to the scheduled oral examination. - Part Two: Identification o The Ph.D. student will be asked to identify 25 items discussed in MUS 8960. These may include terms, people, movements, publications, philosophies, studies, and all manner of related topics within music education. Following successful completion of the Comprehensive Examination, Ph.D. students are required to form their Dissertation Advisory Committee. Instructions can be found online at the website of the College’s Office of Academic Assistance and Graduate Admissions (see “Graduate Forms” and scroll down to “Dissertation Advisory Committee”).**

**Established in Cycle: 2011-2012**

**Implementation Status: In-Progress**

**Priority: High**

**Implementation Description: Implementation will be in the Fall 2012 semester.**

**Projected Completion Date: 11/2012**

**Responsible Person/Group: Patrick Freer, Coordinator of Music Education**

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The CTW courses are not housed within the music education program.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

The CTW courses are not housed within the music education program.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the
The CTW courses are not housed within the music education program.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

There is no change in the assessment process prior to the final comprehensive examination. The revisions to the comprehensive examination are detailed in the previous section of this report ("Action Plan").

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

As described earlier, we have opted to include team-teaching in our new requirement for undergraduate teaching. This will require a series of curriculum and scheduling changes that will begin in Spring 2013 and become final in Fall 2013.

ADMINISTRATIVE DEPT QUESTION 1: Explain how your department used the results from the previous cycle’s (2010-2011) assessment. What actions did you take this past year based on the results from the previous cycle? What changes did you make as a result?

We do not have assessment data from 2010-11 and cannot answer this question.

ADMINISTRATIVE DEPT QUESTION 2:
What have you learned from your assessment findings this year (2011-2012)? What do they reveal about your department’s effectiveness?

As previously addressed, we have instituted several curriculum changes and revised the final comprehensive examination process. In addition, we compiled all policies and advising documents into a new departmental "Ph.D. Handbook in Music Education." The handbook is available both in hard copy and on our website. We did not find any problems with our assessment findings for 2011-12, but we did note that students were occasionally confused about where to find information. We hope we have addressed that issue.

ADMINISTRATIVE DEPARTMENT QUESTION 3: How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?

Beginning in Spring 2013 we will have aligned the two undergraduate courses that our Ph.D. students instruct. We hope to see improvements in the student overall ratings (Question 17) as a result of this change. We also hope to see improvements in the teaching self-efficacy of the Ph.D. students as they begin team-teaching. We will measure this, initially, through informal conversations. We hope to see improvements, specifically, in the assessment titled "Effect on Student Learning."

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Teaching & Learning PhD--Science Education**

As of: 12/12/2016 04:42 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The mission of the Ph.D. degree program in Teaching and Learning with emphasis in Science Education is to prepare accomplished graduates who demonstrate advanced expertise in research and scholarship of teaching and learning in science education to work in diverse national and international academic settings.

**Goals**

**G 1: have expert knowledge of science education theory and research.**
Candidates have expert knowledge of science education theory and research

**G 2: have expert knowledge, skills, and dispositions needed to be teacher educators and scholars of science education**
Candidates have expert knowledge, skills, and dispositions needed to be teacher educators and scholars of science education.

**G 3: are active contributors to professional organizations at international, national, and local levels**
Candidates are active participants and contributors to professional organizations at local, national, and international levels in science education.

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrates Research Knowledge of Science Education (M: 1)**
Candidates demonstrate knowledge of historical perspectives and prominent theories of science education research, as well as methodologies specific to science education research.

**Institutional Priority Associations**
2 Student promotion and progression

**Strategic Plan Associations**
3.1 Enhance a research culture.

**SLO 2: Demonstrates Professional and Pedagogical Skills for Science Teacher Education (M: 2)**
Candidates create and implement research- and evidence-based pedagogies for teaching future teachers, working teachers, and future leaders and scholars in science education.

**Strategic Plan Associations**
3.1 Enhance a research culture.

**SLO 3: Demonstrates Professional Service and Engagement in Science Education (M: 3)**
Candidates participate in and contribute to professional organizations in science education through the publication of manuscripts, presentations at conferences, leadership roles, review of manuscripts and proposals for publications, presentations, and grants.

**Strategic Plan Associations**
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.

**SLO 4: Demonstrates Engagement with Technology in Science Education (M: 4)**
Candidates access, develop, and promote the use of technology in their research, teaching, and service contributions to the field of science education.

**Strategic Plan Associations**
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.

**Measures (Key Assessments), Targets, and Findings**

**M 1: Research Knowledge (O: 1)**
Candidates are assessed using a science education unit-wide rubric. A rating will be determined using Standards 1 and 2 from the rubric.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Demonstrates Research Knowledge of Science Education**
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2011-2012 - Target: Met**
All students of students have met this target.

**M 2: Pedagogical Skills for Teacher Education (O: 2)**
Candidates are assessed using a science education unit-wide rubric. A rating will be determined using Standards 3 and 4 from the rubric.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Demonstrates Professional and Pedagogical Skills for Science Teacher Education**
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2011-2012 - Target: Met**
All students of students have met this target.

**M 3: Professional Service and Engagement (O: 3)**
Candidates are assessed using a science education unit-wide rubric. A rating will be determined using Standards 5 and 6 from the rubric.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Demonstrates Professional Service and Engagement in Science Education**
100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher).

**Findings 2011-2012 - Target: Met**
All students of students have met this target.

**M 4: Demonstrates Engagement with Technology (O: 4)**
Candidates are assessed using a science education unit-wide rubric. A rating will be determined using Standard 7 from the rubric.

Source of Evidence: Academic direct measure of learning - other

**Target for O4: Demonstrates Engagement with Technology in Science Education**

100% of program completers will demonstrate a basic level of knowledge and skill (Score 3) need to achieve this standard through independent and collaborative research projects in courses and internships and 40% will demonstrate a proficient level of knowledge and skill (Score 4 or higher)

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**
We admitted one more full-time international students into our program.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**
Students are prepared to go on international and national searches. This demands a high degree of critical thinking that is expected across each course in the program. Students are prepared to discuss and extend solutions for science education issues.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**
N/A

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**

**Georgia State University**
**Assessment Data by Section**

**2011-2012 Teaching & Learning PhD--Social Studies Education**
*As of: 12/12/2016 04:42 PM EST*

*Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request*

**Mission / Purpose**
The mission of the Doctor of Philosophy (Ph.D.) degree program is to prepare researchers, scholars, and teacher educators in the
fields of social studies education to work in diverse national and international academic settings. As part of this degree, graduates engage fully and deeply in social studies education research and scholarship, theory and practice. Graduates of this program understand the Ph.D. as a lifelong engagement with research, scholarship, teaching and service in social studies education.

**Goals**

**G 2: Competent Researchers in Social Studies Education**
G-1: have expert knowledge of social studies education theory and research.

**G 1: Knowledge and skills of teacher educators and scholars**
G-2 have expert knowledge, skills, and dispositions needed to be teacher educators and scholars of social studies education.

**G 3: Contributors to professional organizations**
G-3 are active contributors to professional organizations at international, national, and local levels.

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrates Professional and Pedagogical Skills for Teacher Education (G: 1) (M: 1, 3)**
Candidates create and implement research- and evidence-based pedagogies for teaching future teachers, working teachers, and future leaders and scholars in social studies education.

**SLO 2: Demonstrates Research Knowledge (G: 2) (M: 1, 2)**
Candidates demonstrate knowledge of histories and methodologies of social studies education research.

**Strategic Plan Associations**

3.1 Enhance a research culture.

**SLO 3: Demonstrates Professional Service and Engagement (G: 3) (M: 3)**
Candidates participate in and contribute to professional organizations in language and literacy education through the publication of manuscripts, presentations at conferences, leadership roles, review of manuscripts and proposals for publications, presentations, and grants.

**Measures (Key Assessments), Targets, and Findings**

**M 1: Comprehensive Exam (O: 1, 2)**
The comprehensive exam is comprised of four questions. It is given by the professors on the students' committee. Assessment is qualitative and feedback is given by each of the professors. Results are Pass or Fail.

Source of Evidence: Senior thesis or culminating major project

Target for O1: Demonstrates Professional and Pedagogical Skills for Teacher Education

75% of program completers will pass the comprehensive examination on their first try. 90% will pass the examination within no more than two attempts.

**Findings 2011-2012 - Target: Met**
100% of program completers passed the comprehensive examination on their first try. Target met.

Target for O2: Demonstrates Research Knowledge

75% of program completers will pass the examinations on their first attempt. 90% will pass within no more than two tries. An advanced level of knowledge (Pass) need to achieve this standard through independent and collaborative research projects in courses and internships and 20% will demonstrate an exceptional level of knowledge (High Pass).

**Findings 2011-2012 - Target: Met**
100% of program completers passed the examinations on their first attempt. Target met.

**M 2: Doctoral Dissertation and Defense (O: 2)**
The measure for Research Knowledge is the doctoral dissertation and defense. Evaluation of students' work is qualitative. Professors respond to the dissertation project and provide feedback. Results are measured by Pass or Fail.

Source of Evidence: Comprehensive/end-of-program subject matter exam

Target for O2: Demonstrates Research Knowledge

100% of program completers will demonstrate an advanced level of research knowledge by achieving a pass on the dissertation defense from all faculty members on the dissertation committee. 20% will demonstrate an exceptional level of knowledge (high pass) by achieving a high pass from all faculty members on the doctoral dissertation committee.

**M 3: Professional Service and Engagement (O: 1, 3)**
Candidates are assessed by their attendance and presentation at professional organizations and conferences, as well as residency plans.

Source of Evidence: Presentation, either individual or group
**Target for O1: Demonstrates Professional and Pedagogical Skills for Teacher Education**

Candidates are assessed using a written dissertation and oral defense. 100% of program completers will demonstrate a advanced level of knowledge (Pass) need to achieve this standard through independent and collaborative research projects in courses and internships and 20% will demonstrate an exceptional level of knowledge (High Pass).

**Findings 2011-2012 - Target: Met**

Target met. 100% of program completers demonstrated an advanced level of knowledge.

---

**Target for O3: Demonstrates Professional Service and Engagement**

100% of candidates will demonstrate attendance and presentations at professional organizations (pass) and 20% will demonstrate exceptional presentation and professional service skills.

**Findings 2011-2012 - Target: Met**

Target met. 100% of candidates demonstrated attendance at professional organizations and 20% demonstrated exceptional presentation and professional service skills.

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continue monitoring the degree program**

Given that all completers met/exceeded the target, there are no specific action plans except to monitor the degree program.

How will you use your findings from this year? What strategies for improvement will you use over the coming year? What degree of improvement do you anticipate?
**Mission / Purpose**

The UACM is a rigorous program that seeks to serve the needs and aspirations of elementary students schooled in urban contexts by eradicating deficit perspectives through the development of pedagogically competent, equity-oriented, empowered teachers who are change agents inside and outside the classroom.

The UACM beliefs:

- We believe that teachers have the ability and power to provide experiences in which children succeed. This success provides the confidence and competence for children to continue to succeed.

- We believe that in order to foster these successful experiences, teachers must engage and connect with students. This connection is demonstrated by treating children with respect, by having high standards and by helping children to believe that they can achieve.

- We believe that in order to foster successful experiences, teachers must be knowledgeable about the child's culture and must actively integrate this into the best practices of teaching and learning.

- We believe that from structure comes freedom. The teacher must create a purposeful, structured environment in which children are free to explore, experiment, and learn.

- We believe that teachers need to establish an environment in their classrooms where children are respectful of each other, their environment and the adults in their lives.

- We believe that teachers should respect the language of their children and have knowledge of its background and principles. We also believe that teachers should model and expect mastery of mainstream American English for their students.

**Goals**

**G 1: Content and Pedagogical Knowledge, Skills and Dispositions**

Master's candidates will have the content and pedagogical knowledge, skills and dispositions to be able to plan and implement effective, culturally responsive instruction.

**G 2: Teaching as a Profession**

Master's candidates will develop as reflective and collaborative professionals.

**Student Learning Outcomes/Objectives**

**SLO 1: Shows commitment to student learning & development (G: 1) (M: 1)**

Educator is committed to students and their learning and/or development.

Relevant Associations: NBPTS, NAEYC, NCTM, IRA, NCSS, NSTA

**SLO 2: Applies expertise for learning and development (G: 1) (M: 2)**

The educator is an expert in his/her field and can effectively apply that expertise to promote learning/development.

Relevant Associations: NBPTS, NAEYC, NCTM, IRA, NCSS, NSTA

**SLO 3: Manages and monitors student learning/development (G: 1) (M: 3)**

The educator is responsible for managing and monitoring student learning/development.

Relevant Associations: NBPTS, NAEYC, NCTM, IRA, NCSS, NSTA
**SLO 4: Engages in scholarship about teaching and learning (G: 2) (M: 4)**
The educator thinks systematically about his/her practice and learns from professional experience.
Relevant Associations: NBPTS, NAECY, NCTM, IRA, NCSS, NSTA

**SLO 5: Participates in professional learning communities (G: 2) (M: 5)**
The educator is a member of one or more learning communities.
Relevant Associations: NBPTS, NAECY, NCTM, IRA, NCSS, NSTA

### Measures, Targets, and Findings

**M 1: Faculty Rating 1 - Committed to Student Learning (O: 1)**
Scores for candidates on the following assessment are aggregated and entered into the UACM MEd database for Standard 1: Disposition Assessment.
Source of Evidence: Academic direct measure of learning - other

**Target for O1: Shows commitment to student learning & development**
90% of program completers will demonstrate an intermediate or higher level of dispositions needed to achieve this standard through independent and autonomous reflection, planning, and action.

**Findings 2011-2012 - Target: Met**
100% of UACM Master's candidates met expectations for this assessment with a 3.96 mean score on a 4.0 scale. Although all candidates overall score met expectations, candidates that fell below satisfactory on any element of the assessment were required to redo that element of the unit to meet a minimum score of satisfactory. We will continue to monitor and maintain candidates' ability to meet the standards assessed by this assessment. (See attached detailed aggregated data).

**M 2: Faculty Rating 2- Expertise for Learning & Develop (O: 2)**
Scores for candidates on the following assessment are aggregated and entered into the UACM MEd database for Standard 2: Field Experience Observation Assessment.
Source of Evidence: Academic direct measure of learning - other

**Target for O2: Applies expertise for learning and development**
90% of program completers will demonstrate an intermediate or higher level of knowledge, skills and dispositions needed to achieve this standard through independent and autonomous planning and action.

**Findings 2011-2012 - Target: Met**
100% of UACM Master's candidates met expectations for this assessment with a mean score of 3.57 on a 4.0 scale. Although all candidates overall score met expectations, candidates that fell below satisfactory on any element of the assessment were required to redo that element of the unit to meet a minimum score of satisfactory. We will continue to monitor and maintain candidates' ability to meet the standards assessed by this assessment. (See attached detailed aggregated data).

**M 3: Faculty Rating 3-Manage & monitor student learning (O: 3)**
Scores for candidates on the following assessment are aggregated and entered into the UACM MEd database for Standard 3: Teaching and Learning Project.
Source of Evidence: Academic direct measure of learning - other

**Target for O3: Manages and monitors student learning/development**
90% of program completers will demonstrate an intermediate or higher level of knowledge and skills needed to achieve this standard through independent and autonomous planning and action.

**Findings 2011-2012 - Target: Met**
100% of UACM Master's candidates met expectations for this assessment with a mean score of 3.87 on a 4.0 scale. Although all candidates overall score met expectations, candidates that fell below satisfactory on any element of the assessment were required to redo that element of the unit to meet a minimum score of satisfactory. We will continue to monitor and maintain candidates' ability to meet the standards assessed by this assessment. (See attached detailed aggregated data).

**M 4: Faculty Rating 4 - Engaging in Scholarship (O: 4)**
Scores for candidates on the following assessment are aggregated and entered into the UACM MEd database for Standard 4: Action Research Project.
Source of Evidence: Academic direct measure of learning - other

**Target for O4: Engages in scholarship about teaching and learning**
90% of program completers will demonstrate an intermediate or higher level of knowledge and skills needed to achieve this standard through studying the effectiveness of one's pedagogy.

**Findings 2011-2012 - Target: Met**
100% of UACM Master's candidates met expectations for this assessment with a mean score of 3.68 on a 4.0 scale. Although all candidates overall score met expectations, candidates that fell below satisfactory on any element of the assessment were required to redo that element of the unit to meet a minimum score of satisfactory. We will continue to monitor and maintain candidates' ability to meet the standards assessed by this assessment. (See attached detailed aggregated data).
Start Fall Mentorship Earlier

We plan to start the mentorship experience the first week students (PreK-5) are in school. This will help our Master's candidates into the teaching profession. Mentors guide our Master's candidates in the area of lesson planning, classroom management, assessment, organization, and school politics. As currently implemented, when the orientation is done on the first day of school, candidates become overwhelmed with all of the information they receive as they negotiate being a first-year teacher.

Established in Cycle: 2008-2009
Implementation Status: Terminated
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Faculty Rating 1 - Committed to Student Learning | Outcome/Objective: Shows commitment to student learning & development
- Measure: Faculty Rating 2 - Expertise for Learning & Develop | Outcome/Objective: Applies expertise for learning and development
- Measure: Faculty Rating 3 - Manage & monitor student learning | Outcome/Objective: Manages and monitors student learning/development
- Measure: Faculty Rating 4 - Engaging in Scholarship | Outcome/Objective: Engages in scholarship about teaching and learning

Budget Amount Requested: $0.00 (no request)

Monitor and Maintain

The Early Childhood Education UACM MEd (GATAPP) Program has met all of its objectives. Program faculty will continue to maintain the effective components of the program, assess all outcomes/objectives, and monitor students’ performance on each objective.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Faculty Rating 1 - Committed to Student Learning | Outcome/Objective: Shows commitment to student learning & development
- Measure: Faculty Rating 2 - Expertise for Learning & Develop | Outcome/Objective: Applies expertise for learning and development
- Measure: Faculty Rating 3 - Manage & monitor student learning | Outcome/Objective: Manages and monitors student learning/development
- Measure: Faculty Rating 4 - Engaging in Scholarship | Outcome/Objective: Engages in scholarship about teaching and learning
- Measure: Faculty Rating 5 - Professional Learning Communities | Outcome/Objective: Participates in professional learning communities

Projected Completion Date: 09/2011
Responsible Person/Group: Program Faculty
Additional Resources: N/A
Budget Amount Requested: $0.00 (no request)

Start Fall Mentorship Earlier

As a part of the UACM MEd (GATAPP) mentorship course, university mentors initially spend an entire day to help induct our new Master's candidates into the teaching profession. Mentors guide our Master's candidates in the area of lesson planning, classroom management, assessment, organization, and school politics. The earlier this experience is in the fall the quicker candidates are able to negotiate the learning curve of being a new teacher. We plan to start the mentorship experience the first week students (PreK-5) report back to the GSU classes.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Faculty Rating 1 - Committed to Student Learning | Outcome/Objective: Shows commitment to student learning & development
- Measure: Faculty Rating 2 - Expertise for Learning & Develop | Outcome/Objective: Applies expertise for learning and development
Once a Week Classes
We have adjusted the program schedule to better meet the needs of our student. All of our students are first year teachers, and previously our program required them to come to GSU twice a week for classes. Our students now only come to GSU on Mondays for a longer period of time relieving them some of their burden. We will interview students on the effectiveness of this new schedule.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: Medium

Assess and Revise Assessment Rubrics
The UACM MEd (GATAPP) program is assessing and revising our assessment rubrics to improve the effectiveness of the data collected. First, the assessment rubrics are being adapted to a 5-point scale in the hopes of getting more refined data. Second, the assessment rubrics are being aligned with the new COE conceptual framework.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Implement New Assessment System
In the 2011-2012 academic year, the UACM MEd (GATAPP) program will implement a new assessment system called Livetext for program assessment storage and reporting. The program is now moving to using Livetext for all key assessments with the new cohort beginning in fall 2011. All program faculty have been trained in Livetext.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Restructure ECE 6415 Literacy/Social Studies Integration
The UACM MEd (GATAPP) program is an unique approach to teacher certification and graduate school. After an accelerated certification process, candidates continue their graduate studies into their first year as a teacher of record. In order to meet the demands of a first-year teacher who is also attending graduate school, courses need to be structured to bridge the gap between theory and practice. Currently, ECE 6415 is a traditional graduate course with many of its requirements not related to the lived experiences of our candidates. The UACM faculty is committed to analyzing and restructuring this course to facilitate candidates' critical thinking in order to improve their pedagogy.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

ECE 6415 and ECE 6416 Course Change
The UACM Faculty have decided to change the name and some of the focus of ECE 6415 and ECE 6416 to Curriculum and
Field-Based Approach
From analyzing our program data and student feedback, we believe that the UACM Master’s Program would be more effective if there was a tighter theory to practice focus. We are currently in the planning stages for how this might be implemented. We will start with faculty planning meeting to continue to analyze program data, student feedback, and research literature to determine the approach.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Faculty Rating 1 - Committed to Student Learning | Outcome/Objective: Shows commitment to student learning & development
- Measure: Faculty Rating 2 - Expertise for Learning & Develop | Outcome/Objective: Applies expertise for learning and development
- Measure: Faculty Rating 3 - Manage & monitor student learning | Outcome/Objective: Manages and monitors student learning/development
- Measure: Faculty Rating 4 - Engaging in Scholarship | Outcome/Objective: Engages in scholarship about teaching and learning
- Measure: Faculty Rating 5 - Professional Learning Communities | Outcome/Objective: Participates in professional learning communities

Projected Completion Date: 08/2012
Responsible Person/Group: UACM Program Director
Additional Resources: None

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since the last assessment report, the following changes have been made: LiveText Assessment System now is being used for all assessment data collection and analysis. Rubrics have been refined to be more sensitive to student learning. This will allow for more detailed and reliable data with which to analyze the program effectiveness. For the upcoming academic year, key assessments may need to be aligned with the goal of a closer link between theory and practice as we look to develop a field-based program (See Action Plan).

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The Early Childhood Education UACM MEd Program has met all of its objectives. Program faculty will continue to maintain the effective components of the program, assess all outcomes/objectives, and monitor candidates’ performance on each objective. Although all objectives were met, a closer analysis of the data revealed that candidates tend to score lower in greater numbers around their ability to apply their teaching knowledge into practice. Specifically candidates scored lower on the following elements: a.) Utilizes students’ identified needs to create developmentally appropriate lessons and to increase student achievement; b.) Develops and uses a variety of strategies to accommodate individual student needs; c.) Uses effective management strategies to engage and motivate students in purposeful learning activities; d.) Provides opportunities for successful collaborative and independent learning; and e.) Uses varied assessment techniques to identify students’ strengths, needs, and learning processes. This has led the UACM faculty to conclude that there is still a need to restructure parts of the program in order to scaffold candidates’ ability to apply theory to practice. The overall structure of the UACM was developed to address this issue. Specifically, the UACM MEd program's approach to teacher certification and graduate school involves an accelerated certification process in the first year of the program, followed by candidates continuing their graduate studies into their first year as teacher of record so that they can be guided in the application of theory to practice. Program faculty have made improvement to the structure of the program in bridging the gap between theory and practice, including: a.) university mentors increasing observation time to the entire day for the first visit to help induct our new Master’s candidates into the teaching profession; b.) faculty examining and testing different approaches to ECE 6415/ECE 6416 Curriculum and Assessment courses. Although these changes did improve our outcomes, the faculty feels that there is still room to make the Master’s program a more powerful experience for our candidates. As such, we are currently in the planning stages for how this might be implemented. We will start with monthly faculty planning meeting to continue to analyze program data, candidate feedback, and research literature to determine the best approach supporting candidates’ growth in their ability to be effective teachers. We had our first meeting in June 2012. At this meeting we decided to start the mentorship process earlier in the candidates first year as teacher of record. As a result, we have scheduled and implemented (July 2012) a mentorship orientation for candidates moving into the
second year of the program. This will allow university field mentors to start visits earlier in the school year, which should help candidates get off to a successful start.

Georgia State University
Assessment Data by Section
2011-2012 Urban Teacher Leadership MEd
As of: 12/12/2016 04:42 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The M.Ed. Urban Teacher leadership program prepares practicing educators for an initial certification as a teacher leader and a coaching endorsement. The program is based on current research in teacher education and education leadership and supports data-based planning, exemplary teaching and supervision in areas of concentration, and reflection with colleagues who are committed to excellence in education.

Goals
G 1: M.Ed Urban Teacher Leader Program
The goal of the M.Ed Urban Teacher Leader program is to prepare teacher leaders (a) who exhibit exemplary practice in a content concentration area, (b) who are effective mentors of colleagues across the P-12 levels, and (c) who are advocates of excellence in urban education.

Student Learning Outcomes/Objectives
SLO 1: Objective 1 (M: 1, 2, 3, 4, 5)
A teacher leader completing our program will facilitate the design and implementation of sustained, intensive, and job-embedded professional learning based on identified student and teacher needs.
Relevant Associations:

SLO 4: Objective 4 (M: 2, 3)
A teacher leader completing our program model best practices in pedagogy and serve as a mentor and coach for other educators

SLO 5: Objective 5 (M: 2, 3)
A teacher leader completing our program will work with others to design and implement assessment practices and analyze data for monitoring and improving teaching and learning through data-informed decision making.

SLO 6: Objective 6 (M: 5)
A teacher leader completing our program will access and conduct research, and apply research findings to improve teaching and learning

SLO 7: Objective 7 (M: 4, 5)
A teacher leader completing our program will demonstrate the ability to collaborate with stakeholders to improve student learning and to guide positive change.

Other Outcomes/Objectives
O/O 2: Objective 2 (M: 4, 5)
A teacher leader completing our program will work with stakeholders to promote the development of a school culture that fosters excellence and equity in teaching and learning and focuses on continuous improvement creating a sense of belonging and building a collaborative work environment

O/O 3: Objective 3 (M: 1)
A teacher leader completing our program demonstrates a comprehensive understanding of curriculum and apply this knowledge to the alignment of curriculum, instruction, and assessment to standards.
Relevant Associations:

Measures, Targets, and Findings
M 1: Content-Based Professional Development Curriculum Module (O: 1, 3)
M 2: Planning: Teacher Leader Work Sample (O: 1, 4, 5)

Strategies are varied over time to account for the student teachers’ learning styles and demonstrate knowledge of how mentoring is created and developed for assessment and evaluation. Outcomes are clearly stated in behavioral forms.

Standard 4 and 5 provide evidence to evaluate the teaching and learning of your student teacher. You will provide written feedback on your student teacher’s final TWS project. You should focus on identifying multiple sources of assessment plan alignment with learning goals and provide students with constructive feedback on their learning.

The Teacher Leader Work Sample (TLWS) assignment is part of EDCI 7680. EDCI 7680 is a field-based course where the M.Ed. students (teacher leaders) host a preservice student teacher from GSU for their student teaching experience. The TLWS from EDCI 7680 is designed to parallel an Teacher Work Sample (TWS) assignment given to preservice teachers to complete during their student teaching experience in their teacher leader’s classroom. The purpose of this TWS project is to provide opportunities for student teachers to show how they use information about the learning-teaching context and students’ individual differences to set learning goals and plan instruction and assessment. The teacher leader’s TLWS assignment happens at the same time and engages teacher leaders in planning, enacting, and reflecting upon their role as a mentor who is supporting their student teachers’ work on the TWS. Copy of the assignment as given to students: Teacher Leader Work Sample (Total project = 25%). Your student teacher will be completing a Teacher Work Sample this semester. The purpose of this project is to provide opportunities for student teachers to show how they use information about the learning-teaching context and students’ individual differences to set learning goals and plan instruction and assessment.

Areas covered will be knowledge of community, school, and classroom factors, knowledge of characteristics of students, knowledge of students’ varied approaches to learning, knowledge of students’ skills and prior learning, and implications for instructional planning. At the same time, you will be completing a Teacher Leader Work Sample as you plan, enact, and reflect upon your role as a mentor who is supporting your student teachers’ work on their work sample. As your student teacher works on their teacher work sample assignment, you will be guiding them through the process while creating your own teacher leader work sample. The content of the Teacher Leader Work Sample will include: You will list the learning goals (not the activities) that will guide the planning, delivery, and assessment of your mentoring/coaching plan. These goals should reflect the goals you expect your student teacher to know and be able to do at the end of your work together. The goals should be significant (reflect the big ideas or structure of the discipline) challenging, varied, and appropriate. Assessment/Evaluation plan: You will design an assessment plan to monitor your student teacher’s progress toward your learning goal(s). You should describe why your assessments are appropriate for monitoring learning. Describe for your student teacher what you will do and how you will provide feedback. Describe for your student teacher how you will provide feedback on what you observe. You will provide written feedback on your student teacher’s final TWS project. You should focus on identifying multiple sources of evidence to evaluate the teaching and learning of your student teacher. 

Teacher Leader Standards: 1.01, 1.05, 1.07, 1.10, all of standard 4 and 5 and Teacher Leader Work Sample: Planning Rubric Teacher Leader Work Sample: Planning Rubric Unacceptable (1 pt) Developing (2 pts) Acceptable (3 pts) Proficient (4 pts) Exemplary (5 pts) Clarity of Learning Goals (1, 25%) GA-GSU-COE-CF.1.1 GA-GSU-COE-CF.3.1 Goals are vague or not in evidence. Goals are not stated clearly and are activities rather than learning outcomes Some of the goals are clearly stated as learning outcomes Most of the goals are clearly stated as learning outcomes Goals are clearly stated in behavioral forms Assessment plan alignment with learning goals (1, 25%) GA-GSU-COE-CF.1.3 Minimal plans for assessment and evaluation Methods of assessment and evaluation lack congruence with learning goals or lack complexity Some learning goals are assessed through assessment plan, but many are not congruent with learning goals Each of the learning goals is addressed through learning goals are assessed by the assessment plan All learning goals are assessed by the assessment plan All learning goals are assessed by the assessment plan The mentoring plan does not demonstrate knowledge of how mentoring is created and developed The activities and meetings are not logically organized The activities and meetings have some logical organization and appear to be somewhat useful Most activities and meetings appear to be useful in moving students toward achieving learning goals All activities and meetings are useful and relevant to student teachers’ learning and reflection Use of a variety of activities, assignments, etc. (1, 25%) GA-GSU-COE-CF.1.3 Only one method of mentoring is used Little variety of mentoring is used. Heavy reliance on one type of activity, reflection, and/or method of feedback Some variety of mentoring is used Significant variety of mentoring is used and this variety makes a clear contribution to learning Mentoring strategies are varied over time to account for the student teachers’ learning style.
Reflection Journal

How this assignment is used in the program

This assignment is used during the residency experience in EPEL

Source of Evidence: Academic direct measure of learning - other
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**EPEY 8250**
Because of transitioning of program faculty, this course (psychology of the inner city child) is no longer offered. As a result, students in the program are encouraged to take sociology of the inner city child in order to have experiences related to the challenges faced by inner city children.

*Established in Cycle:* 2008-2009
*Implementation Status:* Finished
*Priority:* High

**Practicum (EPEL 7680A and 7680B) Requirements**
Because of changes to programs in the educational leadership unit, the requirements and assignments for EPEL 7680A and EPEL 7680B were modified to better support the roles required of school leaders and teacher leaders. EPEL 7680A now focuses on preparing students better understand data. EPEL 7680B now focuses on action research and specifically, research designed to give educators a stronger understanding of their own cultural proficiency.

*Established in Cycle:* 2008-2009
*Implementation Status:* Finished
*Priority:* High

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Women’s Studies Assessment of Core**

*As of: 12/12/2016 04:42 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*
**Mission / Purpose**

Women's Studies at Georgia State University contributes to the university's broader mission of encouraging critical thinking through a focus on feminist and womanist interdisciplinary scholarship, teaching, and community participation. Women's Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. We therefore make explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct our understandings of the world. Furthermore, we analyze the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. In order to explore these issues, we emphasize the following: race, globalization, sexuality, and social change. We promote transformative thinking and activism toward ending oppression and working for freedom and justice.

**Goals**

**G 1: 1) Develop Critical Thinking Skills**
Students should develop critical thinking skills, which include the ability to read and write clearly and carefully, and they should be able to evaluate and analyze claims presented in various textual sources.

**G 3: Feminist/Womanist Perspectives**
Students should develop a basic understanding of broad feminist/womanist interdisciplinary perspectives.

**G 2: Develop writing skills**
Demonstrates the ability to analyze concepts through writing clear, concise, well-argued and well-organized papers.

**Student Learning Outcomes/Objectives**

**SLO 1: Critical Reading Skills (G: 1) (M: 1)**
Demonstrates critical reading skills through the ability to grasp the main point(s) and supporting arguments of an academic or narrative text.

**SLO 2: Thesis Development (G: 1, 2) (M: 1, 2, 4)**
Shows the ability to develop a clear and coherent thesis that directs the entire paper or exam response.

**SLO 4: Feminist/Womanist Perspectives (G: 3) (M: 2, 3, 4)**
Apply feminist/womanist perspectives to contemporary sociocultural issues

**Other Outcomes/Objectives**

**O/O 3: Writing skills (G: 1, 2) (M: 1, 2, 3, 4)**
Demonstrates appropriate writing skills through the ability to develop sufficient evidence, organize the material carefully, and utilize appropriate grammatical conventions for clear and concise writing.

**Measures, Targets, and Findings**

**M 1: Reading Response papers (O: 1, 2, 3)**
Critical responses will enable you to expand upon your general reading of a text and delve deeper to more fully develop your own interpretive and critical voice. While you will demonstrate your understanding of the reading in your critical response, you will do so by crafting an argument about some element of the article or book. In other words, each critical response paper will have a thesis statement that you prove using evidence from the reading itself. Critical response papers should be typed and double-spaced, and should be 2-3 pages in length. In order to get a more nuanced measurement, we collected a set of reading responses from both the beginning and end of 2 classes (random selection, choosing specific students with both papers) in order to see what sorts of progress are made throughout the class. In the 2010-2011 cycle, we decided to look only at a sample of the final papers, because we are measuring writing skills in general, and not only those developed in a single class. We also switched the number system so that 5 is high because the old way of doing it confused members of the committee.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Critical Reading Skills**
On the first set of papers from early on in the semester, we expect that students will have about 1/2 with a score of at least 3, and 1/3 with a score of 2 or higher. On the second set of papers from later in the semester, we hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. This time, we only looked at the final assignment, and we switched the scale so that 5 is excellent, and 1 is unacceptable, in the interests of clarity.

**Findings 2011-2012 - Target: Met**
For this year, we found that 100% of students scored at least a 3, suggesting they come in with competent reading skills. In terms of scoring a 4 or 5, we found that students went from 84% to 100%, suggesting that the papers from the end of the semester demonstrating more "excellence" in reading skills than the ones earlier in the semester, suggesting clear student improvement and meeting our target.

**Target for O2: Thesis Development**
On the first set of papers from early on in the semester, we expect that students will have about 1/2 with a score of at least 3, and 1/3 with a score of 2 or higher. On the second set of papers from later in the semester, we hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. In terms of our action plan, instead of reworking our targets, we decided to focus only on the later papers this year, in order to measure what they know after they have been in the class.

**Findings 2011-2012 - Target: Partially Met**

On the first set of papers, we found that 84% received at least a 3, and 16% received a 4 or 5. For the second batch, we found that all students scored a 4 or 5, suggesting substantial improvement during the semester. Although we did not technically meet our target for the first set of papers, we more than made up for it in the second, suggesting high teaching effectiveness.

**Target for O3: Writing skills**

We measured writing skills here with 2 elements on a rubric -- the first involves evidence, organization, and development, and the second involves writing skills on the level of the sentence, such as syntax, grammar, and punctuation. On the first set of papers from early on in the semester, we expect that students will have about 1/2 with a score of at least 3, and 1/3 with a score of 2 or higher. On the second set of papers from later in the semester, we hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. Once again, on this target, we also only had samples from the final paper, and we had continued to use the altered scale.

**Findings 2011-2012 - Target: Met**

For the earlier papers, we found 100% of students received at least a 3, and 50% received a 4 or 5 in terms of organization and development. In terms of basic clarity of writing, we found that 100% received at least a 3, and 84% received a 4 or 5. For the later papers, we found that 100% received a 4 or 5 on both aspects of this rubric, suggesting that, in terms of low-stakes writing assignments, the students are definitely improving throughout the semester.

**M 2: Analysis Papers (O: 2, 3, 4)**

The analytic paper should develop a clear and persuasive argument, with a focused, specific thesis statement, solid organization and development, clear and sufficient evidence; it should also demonstrate appropriate grammar and syntax. The paper should also display students' knowledge of and ability to apply feminist/womanist knowledge and perspectives to their chosen topic.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Thesis Development**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. We have now included a revision component in this assignment. Therefore, our target is that students should both show improvement, and meet our target by the revised paper. We have also switched the scale for clarity, so that 5 is high and 1 is low; so we hope 3/4 of our students score a 3, and 1/2 score a 4 or 5.

**Findings 2011-2012 - Target: Met**

For thesis development, we found that on the first draft, 80% of students scored at least a 3, and 40% scored a 4 or 5. For the revised paper, we found that 85% scored at least a 3, and 50% scored a 4 or 5, suggesting some degree of improvement and that we (barely) met our target.

**Target for O3: Writing skills**

In terms of the first rubric measuring organization, evidence, and development, we found that on the original papers, 85% scored at least a 3, and 25% scored a 4/5. On the revised papers, 90% scored a 3, and 65% scored a 4/5, suggesting substantial improvement, particularly in terms of students demonstrating skills that are above basic competence. In terms of the second rubric measuring writing skills on the sentence level (basic clarity), we found that, on the drafts, 75% of students scored a 3, and 30% scored a 4/5. On the revised papers, 100% scored at least a 3, and 80% scored a 4/5, suggesting once again that revision contributed to substantial improvement, particularly in achieving excellence. Since these numbers echo each other, it seems useful to continue to keep this rubrics together.

**Findings 2011-2012 - Target: Met**

In terms of both aspects of this rubric: one involves evidence, development, and organization, and the second involves writing on the level of the sentence, including syntax, grammar, and punctuation.

**Target for O4: Feminist/Womanist Perspectives**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. We have now included a revision component in this assignment. Therefore, our target is that students should both show improvement, and meet our target by the revised paper. We have also switched the scale for clarity, so that 5 is high and 1 is low; so we hope 3/4 of our students score a 3, and 1/2 score a 4 or 5.

**Findings 2011-2012 - Target: Partially Met**

On this aspect of the rubric, we found that, on the original papers, 85% scored at least a 3, and 25% scored a 4/5. On the revised paper, we found that 85% scored at least a 3, but only 30% scored a 4/5, suggesting that revision is much less effective in terms of contributing to students’ ability to demonstrate their knowledge of feminist/womanist theoretical perspectives. Not only was there very little difference, but students also seem to be showing that they have basic competence but are not as likely to be excelling in this aspect.

**M 3: Final Exams (O: 3, 4)**
For this assessment session, we used a final essay exam, in which students responded to one of two essay questions in a clear and coherent fashion. We thought that this style of exam would more accurately assess the learning outcomes that we have in women’s studies, and the results might contribute to our overall assessment more coherently.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Writing skills**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. We have also switched the scale for clarity, so that 5 is high and 1 is low; so we hope 3/4 of our students score a 3, and 1/2 score a 4 or 5. For this measure, we also used two separate rubrics: one measured the development of the argument, and the other measured the clarity of the writing, so that one looked at writing skills from a macro perspective, whereas the other focused on sentence-level skills.

**Findings 2011-2012 - Target: Partially Met**

For the rubric that measures argument development, we found that 86% received at least a 3, and 72% received a 4 or 5, so that met our target in terms of overall argument. In terms of writing skills, we found that 86% received at least a 3, and 43% received a 4 or 5, suggesting that although we came close, we did not quite meet our target in terms of the clarity of sentence structure.

**Target for O4: Feminist/Womanist Perspectives**

We hope that 3/4 of the students score at least a 3 (on a scale from 1-5, where 1 is excellent and 5 is unacceptable), with 1/2 the students scoring at least a 2. We have also switched the scale for clarity, so that 5 is high and 1 is low; so we hope 3/4 of our students score a 3, and 1/2 score a 4 or 5.

**Findings 2011-2012 - Target: Met**

In terms of students demonstrating their knowledge of feminist/womanist perspectives, we found that 86% received a 4/5, suggesting that we met our target, and almost all our students did quite well in terms of this particular aspect on this measure.

**M 4: Personal Narrative Paper (O: 2, 3, 4)**

Dr. Julie Kubala WST 2010 First Paper Assignment Summer 2011 This handout will outline not only the requirements for the paper, but also give you some guidelines for peer review. 1) Your paper assignment is to write a personal narrative exploring your relationship with gender and/or feminism (identity and/or politics). 2) Although it is a personal narrative, it is important that you include analysis. 3) In order to facilitate the inclusion of sufficient analysis, be sure you can find a clear and focused main point (thesis statement) in your own and others' papers. 4) One way to accomplish this goal is to choose a specific experience to describe and then analyze in the context of its relationship to your identity. 5) One thing to be careful of is to avoid being too broad – you cannot cover your entire life or identity in a relatively short paper!!! 6) Even though the assignment is to write narrative, storytelling should not take up more than half the paper. 7) As with any other essay, it should be concise, organized, and well-written. 8) Because it is a personal narrative, you might not adhere strictly to grammar rules; one way to check whether your writing is sufficiently clear is to ask your peer group to pay particular attention to your sentence structure. 9) In the peer group process, be sure to offer constructive criticism – while it is nice to begin with emphasizing the positive aspects of the paper, simply telling the writer that “this is good” does not really help them.

Part of the benefit of peer review involves increasing your own reading skills; ideally, this process should help the reviewer as well as the author of the paper. 11) Your paper should be approximately 4-6 pp. long, typed, double-spaced, 12 point font. You do not need a title page (although you do need a title) – simply put your name and course title at the top. 12) You should bring enough copies of your paper to class for your group on June 27. Rubric: 1 2 3 4 5 Clear, focused, analytic main point 1 2 3 4 5 Engaging and significant narrative; relevant to important class topics 1 2 3 4 5 Sufficient and specific evidence; well developed 1 2 3 4 5 Organization – in this, the narrative and analytic sections should be nicely integrated 1 2 3 4 5 Clearly written

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Thesis Development**

In terms of developing a thesis, we realistically believe that 75% of students should receive at least a 3, with 50% scoring a 4 or 5.

In other words, we expect 3/4 to demonstrate basic competence, with half performing well in terms of writing a thesis.

**Findings 2011-2012 - Target: Met**

In terms of this rubric, we found that 100% received at least a 3, and 70% received a 4/5, suggesting that we have exceeded our expectations, and that our focus on thesis development has been proving effective!

**Target for O3: Writing skills**

In terms of writing skills, we realistically believe that 75% of students should receive at least a 3, with 50% scoring a 4 or 5. In other words, we expect 3/4 to demonstrate basic competence, with half showing that they have strong writing skills. In terms of this particular aspect, we measure it using two rubrics: one measures evidence, organization, and development, and the other focuses on basic writing clarity.

**Findings 2011-2012 - Target: Met**

In terms of organization/evidence/development, we found that 93% received at least a 3, and 64% received a 4/5. In terms of sentence level writing skills, such as basic clarity, we found that 100% received at least a 3, and 79% received a 4/5, showing that we also met our target quite handily here as well.

**Target for O4: Feminist/Womanist Perspectives**

In terms of demonstrating the mastery of feminist/womanist perspectives, we realistically believe that 75% of students should receive at least a 3, with 50% scoring a 4 or 5. In other words, we expect 3/4 to demonstrate basic competence, with half showing that they have a strong ability to apply their knowledge of content to a particular project.

**Findings 2011-2012 - Target: Met**

In terms of this rubric, we found that 93% of students scored at least a 3, and 85% scored a 4/5, so that we have exceeded our target here.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The major effective change that we have made in the assessment process is to directly focus on comparing papers by the same student. We have done this in two ways: first, in terms of short low-stakes papers, we have collected a sample early paper and late paper from the same student in order to evaluate their progress, and in terms of analytic papers, we have collected both a draft and a finished paper in order to evaluate improvement. Both of these collected samples suggests that the revision process is being extremely effective in terms of increasing students’ critical thinking through writing skills. In particular, students ability to organize, develop and provide evidence for their papers increased substantially. They also performed better in terms of developing a thesis, and basic sentence structure skills. I would also like to note that we would be unable to include as much revision without the invaluable help of WAC trained graduate students in our introductory classes. These students are really able to help students in a one-on-one fashion, which seems to really be helping their writing skills. The other change that we have made to the assessment process is that we have collected a different sort of exam to assess. Instead of collecting exams that have students answer a variety of essay questions, we collected exams that focus on a 3 page answer to a single question, which allows us to assess thesis statements, organization and development of arguments much more clearly. We still need to focus on the connecting theory to lived experience rubric. We should add that in for next year as a specific rubric in the upcoming year.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

What we found through this year’s assessment primarily confirms what we have been working on in terms of the process; namely, that increasing revision is key to increasing student writing skills. We are therefore do not see the need for major changes in the upcoming year. In general, we would like to extend the success of the revision process; we have been focusing primarily on revision in terms of writing skills, but this year, we saw the need for improvement in terms of demonstrating appropriate feminist/womanist theoretical perspectives. Therefore, we will work to include more content-based revision in the process this year, since we had not been focusing on that aspect previously. We will also continue to work on developing clear writing skills in terms of student performance on examinations.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Women's Studies BA**

*(As of: 12/12/2016 04:42 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

Women's Studies at Georgia State University contributes to the university's broader mission of encouraging critical thinking through a focus on feminist and womanist interdisciplinary scholarship, teaching, and community participation. Women's Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. We therefore make explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct our understandings of the world. Furthermore, we analyze the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. In order to explore these issues, we emphasize the following: race, globalization, sexuality, and social change. We promote transformative thinking and activism toward ending oppression and working for freedom and justice.

**Goals**

**G 1: New and innovative ideas**

To develop innovative approaches to relevant issues and debates within the field.

**G 2: Critical Thinking through Writing**

To be able to display critical thinking through writing skills, such as organizing material clearly, developing ideas clearly and carefully, and providing sufficient evidence for claims.

**G 3: Demonstrate knowledge of field**

Demonstrate the knowledge of and ability to use appropriate interdisciplinary theoretical perspectives within the fields of feminist/womanist scholarship.

**Student Learning Outcomes/Objectives**

**SLO 1: Research Questions (G: 1) (M: 3)**

Students should demonstrate their ability to formulate new research questions, providing innovative approaches to existing feminist/womanist scholarship.
SLO 2: Evidence (G: 2) (M: 3, 4)
Students should demonstrate their critical thinking through writing skills by providing sufficient evidence for claims and developing their arguments clearly and carefully.

SLO 3: Organization (G: 2) (M: 2, 3)
Students should demonstrate their critical thinking through writing skills by organizing their papers, both in terms of structuring their paragraphs as well as structuring the entire paper in a clear and coherent fashion.

SLO 4: Theoretical Perspectives (G: 3) (M: 1, 2, 3, 4)
Students should be able to demonstrate their knowledge of appropriate interdisciplinary feminist/womanist theoretical perspectives in their written work.

SLO 5: Application of skills (G: 3) (M: 1, 2, 3)
Students should be able to demonstrate their ability to apply the theoretical perspectives and interdisciplinary skills that they have learned in the field, in both written and other types of work.

SLO 6: Critical thinking through writing skills (G: 2) (M: 1, 3, 4)
This outcome measures general writing skills, syntax, grammar, punctuation; it focuses on the clear and coherent expression of ideas.

### Measures, Targets, and Findings

**M 1: Final Exam (O: 4, 5, 6)**
In this final exam, students should demonstrate their knowledge of and ability to use feminist/womanist theoretical perspectives. Furthermore, we scored sample exams on their ability to develop and argue their responses, as well as their ability to express ideas clearly and coherently.

Source of Evidence: Academic direct measure of learning - other

**Target for O4: Theoretical Perspectives**
We hope that all students will achieve at least a 3 on our rubric, and over 1/2 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

**Target for O5: Application of skills**
We hope that all students will achieve at least a 3 on our rubric, and over 1/2 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

**Target for O6: Critical thinking through writing skills**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

**M 2: Creative Project (O: 3, 4, 5)**
The basic idea is for you to further develop an idea from class that you want to in a creative fashion. Presenting the creative project is an important point of the project; be sure you can talk about why you chose what you did in a way that makes sense in terms of the class. 1) Be sure to consult with me about your individual topic! 2) You may use any variety of artistic or creative means to present the project; however, be sure you can communicate clearly their relevance to the class. 3) I am not qualified to grade you on artistic merit; therefore the grade will focus mainly on organization and contribution to the ideas of the class. 4) Be sure to include an analysis of the complexity of these ideas. It should be approximately 5-7 pages. 5) Be sure that your analysis is focused and coherent.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Organization**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor).

**Target for O4: Theoretical Perspectives**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor).

**Target for O5: Application of skills**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 2 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor).

**M 3: Final Paper (O: 1, 2, 3, 4, 5, 6)**
Students shall write a final paper, on a topic that they will determine that is relevant to the class and approved by the professor, that utilizes the knowledge and applies the skills learned in the class in order to develop an innovative approach to a particular question in the interdisciplinary fields of feminist/womanist scholarship. Additionally, students will demonstrate their critical thinking through writing
skills in this assignment; these skills include thesis development, organization, support for claims, and clear, concise writing, following appropriate grammar and syntax. We are including in this measure not only final seminar papers, but senior research papers as well. The senior research papers have similar requirements, although the standards are higher since they involve a semester long project.

**Findings 2011-2012 - Target: Partially Met**
For this measure, we found that 94% received at least a 3, and 50% received a 4 or 5. Once again, while we have not met our target, we have come quite close to it, so we will continue to work on improving this particular aspect.

**Target for O6: Critical thinking through writing skills**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

**Findings 2011-2012 - Target: Met**
We had a very small sample for this particular measure, suggesting that we might not use it in the future. For this sample, 100% received a 4 or higher, meeting our target.

**M 4: Interview/Film Critique (O: 2, 4, 6)**
I'm not sure if I should even include this assignment, because I didn't get a copy of the actual assignment. I'll try to fix this as soon as I can.

**Target for O2: Evidence**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as excellent and 5 as poor). In the 2010-2011 assessment year, we switched the 1-5 of the scale, because the committee said it was clearer that better scores should be represented by higher numbers.

**Findings 2011-2012 - Target: Met**
We had a very small sample for this particular measure, suggesting that we might not use it in the future. For this sample, 100% received a 4 or higher, meeting our target.
Target for **O4: Theoretical Perspectives**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as poor and 5 as excellent).

**Findings 2011-2012 - Target: Met**
Again, with such a small sample size, it is hard to tell what it shows, but 100% scored a 4 or higher, meeting our target.

Target for **O6: Critical thinking through writing skills**
We hope that all students will achieve at least a 3 on our rubric, and over 3/4 will receive a 4 or higher (the rubric runs from 1-5, with 1 as poor and 5 as excellent).

**Findings 2011-2012 - Target: Partially Met**
For this measure, we found that 100% received at least a 3, but we did not have any that received a 4 or 5, so we met the basic competence aspect of this measure, but not the doing well in terms of clarity of writing.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Improve rubrics**
Consider implementing more explicit criteria to define rubrics for student assignments. To do so, we should collectively decide as a faculty what rubrics we would use to evaluate student assignments.

- **Established in Cycle:** 2005-2006
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Ongoing
- **Projected Completion Date:** 05/2010
- **Responsible Person/Group:** Core faculty
- **Additional Resources:** Time

**Modify assessment**
Departmental Conversation about evaluators’ interpretations of measures and/or the measures themselves

- **Established in Cycle:** 2005-2006
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Ongoing
- **Projected Completion Date:** 05/2010
- **Responsible Person/Group:** Core faculty
- **Additional Resources:** Time

**Early intervention**
We are designating our 3010 course, Feminist Theories, as a Critical Thinking Through Writing Course, which should focus attention on student writing earlier in the program.

- **Established in Cycle:** 2006-2007
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Final Paper
  - **Outcome/Objective:** Research Questions
- **Implementation Description:** Fall 2007
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Core Faculty (Many of us teach WSt 3010)

**Increase critical thinking through writing skills**
Given that our assessment targets were not met in two particular areas: organization and evidence, it appears that our students are having the most difficulty in terms of critical thinking through writing skills. Hopefully, given that students will need to take a CTW course earlier in their careers, that will help students improve in these areas. Until the CTW is fully operational, we can work to increase writing instruction throughout our upper-level courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** Low
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Final Paper
  - **Outcome/Objective:** Research Questions
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Core Faculty

**Increased writing instruction**
We need to develop a plan that will implement early intervention (perhaps a professor approval) of research questions.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Final Paper
  - **Outcome/Objective:** Research Questions
Collect final paper drafts
As a pilot program, we are going to collect drafts in an upper-level course in order to see if that helps students with the various aspects of assessment, especially those focused on writing.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** We are beginning this semester to collect rough drafts and compare them to final drafts.
- **Projected Completion Date:** 08/2013
- **Responsible Person/Group:** core faculty
- **Additional Resources:** more time

### Analysis Questions and Analysis Answers

#### ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Last year, we have been able to complete two of our assessment plans: gain 100% participation and systematize assessment. These two are related plans, since they both involve ensuring that all faculty cooperate with the collection of data. We are happy to report that this is becoming easier, as everyone has become more accustomed to collecting samples of work. We are also streamlining the assessment process. One of the recurrent problems we have had is that, while most faculty assign some sort of written assignment as the major assignment for the class, we have had to collect other sort of assignments, depending on the professor’s organization of the class. At first, we thought assessment would be stronger with a wider variety of assignments, but we have found that process to be counter-productive for a number of reasons. First of all, we don’t have enough examples of alternative assignments to contribute meaningfully to a discussion of our pedagogical strategies. Secondly, since so many of our learning outcomes involve critical thinking through writing, we still find the seminar paper to be the most consistent and reliable indicator of student learning. Therefore, we are no longer trying to increase the sorts of assignments we assess, because that seemed contrived. We are now almost wholly focusing on substantial analytical papers. We also, as an earlier action plan indicated, had decided to add an element to the rubric called “demonstrating skills.” Since the scores on that rubric were almost exactly the same as on the rubric that emphasizes demonstrating knowledge and ability to use feminist/womanist perspectives, we decided that it was not really contributing anything to the process to measure the same thing twice. Therefore, we have decided to cut that rubric from future assessment. We are still working on the action plans that involve early intervention in the writing process to increase critical thinking through writing skills. While one thing we are doing successfully is having students turn in proposals for their final papers, so that they can have feedback before writing their final papers for classes, we have also decided to increase this particular process. Therefore, we are developing a pilot program this semester through which students should turn in a complete rough draft of a seminar paper three weeks before the end of the semester. This change will hopefully enable students to both develop more carefully their papers earlier, and to allow them to receive clear feedback on a complete draft before finishing their paper. We hope that this change will increase students writing skills more directly than general writing instruction, as it will allow them to have individual feedback. We are worried, however, that this process will prove too work-intensive to be carried out throughout all the classes.

#### ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have, as of yet, not decided to make any significant changes to the educational degree program. While there are still areas for improvement, we still feel like we are on the right path for addressing these issues, and so we do not need any significant changes. We have been considering more 3000 level courses, as students frequently jump from Introduction to Women’s Studies to upper-level courses, but we do not have the number of majors required to make that change, even though our credit hours have improved. I also think I mostly answered this question in the previous answer.

---

**Georgia State University**

**Assessment Data by Section**

**2011-2012 Women's Studies MA**

(As of: 12/12/2016 04:42 PM EST)

**Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.**

---

**Mission / Purpose**

Women’s Studies contributes to the university's broader mission of encouraging critical thinking through a focus on feminist and womanist interdisciplinary scholarship, teaching, and community participation. Women’s Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. The field therefore makes explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct one’s understandings of the world. Furthermore, women’s studies analyzes the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. In order to explore these issues, Women’s Studies classes emphasize the following: race, globalization, sexuality, and social change.

**Goals**

**G 1: Interdisciplinarity**

WSI MA graduates will be interdisciplinary scholars; this means that they will be conversant in feminist epistemologies (i.e., they will understand and be able to articulate a critique of masculinist forms of knowledge, and to critique the power dynamics inherent to the production of knowledge). They will also be able to ask broad questions that transverse traditional disciplines.

**G 2: Knowledgable in the field of WGSS**

WSI MA graduates will be conversant in the field of Women's, Gender, and Sexuality Studies (i.e., they will understand, and be able
to synthesize, a range of feminist and/or womanist theories and frameworks.)

G 3: Successful scholars/practitioners
WSI MA graduates will be successful scholars and practitioners in fields and/or career placements relevant to the core concerns of Women’s, Gender, and Sexuality Studies.

## Student Learning Outcomes/Objectives

### SLO 1: Research Questions (M: 1)
Students will demonstrate their ability to formulate new research questions, providing innovative approaches to existing feminist and/or womanist research.

### SLO 2: Overall Critical Thinking through Writing (M: 1, 2, 3)
Students will demonstrate critical thinking skills through innovative, well-organized arguments that are publication-ready. This means that students will structure their papers and thesis proposals in a clear and coherent fashion and that students will demonstrate proficiency in overall writing and grammar skills, including syntax, punctuation, and citation.

### SLO 3: Theoretical Frameworks (M: 1, 2)
Students will demonstrate their knowledge and understanding of key feminist and/or womanist theoretical perspectives and apply them in their own work.

### SLO 4: Feminist Epistemology (M: 2)
Students will be conversant in feminist epistemologies (i.e., they will understand and be able to articulate a critique of masculinist forms of knowledge, and to critique the power dynamics inherent to the production of knowledge).

### SLO 5: Placements (M: 4)
Students will get accepted to PhD programs (either in WGSS or a field related to their research) or they will achieve placement in a desired career path.

## Measures, Targets, and Findings

### M 1: Thesis (O: 1, 2, 3)
Students will complete a thesis project that demonstrates interdisciplinary thought as well as mastery of some of the key theoretical frameworks of Women’s, Gender, and Sexuality Studies. Theses are either research-based, action research projects (i.e., interning with a community organization and working to supplement and/or transform it positively), or creative writing projects. All require a section (literature review or documented essay) that explains the significance to the field of WGSS.

Source of Evidence: Senior thesis or culminating major project

**Target for O1: Research Questions**

Our target is for all of our students to receive at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Findings 2011-2012 - Target: Met**

Our students received an average of 4.4 on this measure, with the lowest score being 4 and the highest being 5.

**Target for O2: Overall Critical Thinking through Writing**

Our target is for all of our students to receive at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Findings 2011-2012 - Target: Met**

Our students received an average score of 3.8 on this measure, with most of them receiving a score of 3 and the rest a score of 5.

**Target for O3: Theoretical Frameworks**

Our target is for all of our students to receive at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Findings 2011-2012 - Target: Partially Met**

Our students received an average score of 3.4 on this measure, with two of them falling below the target (at 2), one receiving a 3, and the rest at 5.

### M 2: Comprehensive exams (O: 2, 3, 4)

Students are required to take comprehensive exams after completing the four core academic courses in the MA program. The comprehensive exams consist of two questions; one measures their ability to synthesize major feminist theories and methodologies and the other measures their ability to apply feminist theories to globalization.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O2: Overall Critical Thinking through Writing**

Our target is for all of our students to receive at least a score of 3 (on a scale of 1-5, 5 being the highest).

**Findings 2011-2012 - Target: Partially Met**

Our students received an average score of 3.75, with one falling significantly below target (1.33), three in the 3 range, four in
Target for O3: Theoretical Frameworks

Our target is for all of our students to receive at least a score of 3 (on a scale of 1-5, 5 being the highest).

Findings 2011-2012 - Target: Partially Met

Our students received an average score of 3.7 on this measure, with one falling significantly below the target (1.67), four in the 3 range, two in the 4 range, and one receiving a 5.

Target for O4: Feminist Epistemology

Our target is for all of our students to receive at least a score of 3 (on a scale of 1-5, 5 being the highest).

Findings 2011-2012 - Target: Partially Met

Our students received an average score of 3.65 on this measure, with one student falling significantly below target (1.33), four in the 3 range, two in the 4 range, and one receiving a 5.

M 3: Annual Evaluations/Student CVs (O: 2)

Students are required to turn in CVs for the annual evaluation process. From these data, we will collect information about how many conferences students are attending in order to present their own research, how many publications they have succeeded in getting accepted and/or published.

Source of Evidence: Student course evaluations on learning gains made

Target for O2: Overall Critical Thinking through Writing

At least half of our students will attend one conference and at least 15% will have a publication accepted.

Findings 2011-2012 - Target: Not Met

Our students delivered ten total conference presentations in 2011-2012, and they participated in six total panels or brown bags (as presenters), which were not at conferences. For the overall student body (15), this averages to .75 conference papers per student and .40 panel or brown bag presentations per student. The actual number of students presenting at conferences was 5, which is a third of our student body. Our students had one article accepted for publication and one article published during the 2011-2012 year. In terms of percentages, that means that 7% of our students had an article accepted for publication and 7% of our students had an article published.

M 4: Exit Interviews (O: 5)

Student placement will be measured and evaluated based on their exit interviews, at which time they usually know what their future plans are.

Source of Evidence: Exit interviews with grads/program completers

Target for O5: Placements

At least 80% of our MA graduates will go on to a PhD program or be placed in a job relevant to their professional goals.

Findings 2011-2012 - Target: Not Met

Two out of five graduating students last year went on to pursue PhDs in Women’s, Gender, and Sexuality Studies. As far as we know, none of the rest have been placed in jobs relevant to their degree. Therefore, 40% of our students went on to pursue a PhD. However, one graduate was a participant in the “GSU at 62” program, so she did not have the goal of obtaining a PhD degree or gaining employment after graduation. Adjusting for this, 50% of our graduates last year went on to pursue PhD programs or otherwise directly use their MA degrees.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

early intervention

We have found that some of our students come in to the program with poor grammar skills, but it is not until they begin to write their thesis proposal or later that they finally seek out support from outside sources, like the Writing Studio.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Comprehensive exams | Outcome/Objective: Overall Critical Thinking through Writing

Implementation Description: We will identify students who have particular problems with grammar in the first year, and preferably the first semester of the program, and refer them to the Writing Studio in the first semester.

Responsible Person/Group: core faculty in Women’s Studies
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

increased focus in proseminar on RQ

Last year we implemented a major change in our program in order to respond to many of the problems our students had been having progressing through the program in a timely manner. We added a required proseminar course in which they receive training and support about how to put together a thesis proposal. The proseminar spent a lot of time on the literature review and on writing abstracts, but not as much time on defining a research question.

Established in Cycle: 2009-2010
Implementation Status: Finished
more focus on writing skills
Last year we implemented a major change in our program in order to respond to many of the problems our students had been having progressing through the program in a timely manner. We added a required proseminar course in which they receive training and support about how to put together a thesis proposal. The proseminar focused more on the basics of putting a proposal together than on the mechanics of writing.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Comprehensive exams | Outcome/Objective: Overall Critical Thinking through Writing

Implementation Description: The proseminar will incorporate more peer review with more focus on writing skills and organization. Core classes will also provide more feedback on writing skills and organization.
Responsible Person/Group: instructor for proseminar and WSI core faculty
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

emphasis on core courses
Like the "evaluating arguments" outcome, in this area first years collectively scored lower than second years (with first years achieving an average of 3.84 compared to second years who achieved an average of 4.56). It makes sense, then, to focus on the core courses, all of which are offered (and required) in the first year. These are already the courses in which students are expected to gain a solid understanding of feminist and womanist theoretical frameworks. Instructors of these courses will be advised to emphasize the theoretical frameworks with our first year students.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Comprehensive exams | Outcome/Objective: Feminist Epistemology
  | Theoretical Frameworks
  Measure: Thesis | Outcome/Objective: Theoretical Frameworks

Implementation Description: Instructors will implement the action plan in a way that makes sense in the context of their course.
Responsible Person/Group: All core course instructors.
Additional Resources: NA
Budget Amount Requested: $0.00 (no request)

focus on reading for graduate school in core courses
While the first year students collectively met the goal of achieving a 3.5, it is clear when looking at the separated results that the weakness in this area lies in the first year class (second years scored very high -- 4.75) and could be attributed to the fact of just having entered graduate school. Our plan to address this, then, will be focused on the core classes (WST 8001 Feminist Theories), WST 8002 (Globalization and Gender), WST 8003 (New Directions in Feminism), and WST 8004 (Feminist Methodologies). These are required courses for all first year students, and are the classes in which the largely acclimate to the program and to graduate school. Instructors of these core courses will put a greater focus on teaching strategies for reading at the graduate level, possibly including assignments such as critical responses, in which students must summarize the argument before providing analysis.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: Comprehensive exams | Outcome/Objective: Feminist Epistemology
  | Theoretical Frameworks
  Measure: Thesis | Outcome/Objective: Theoretical Frameworks

Implementation Description: Instructors for each of the courses will implement this action plan in whatever way makes the most sense for their class, given the structure of their assignments.
Responsible Person/Group: All instructors of the WST core classes.
Additional Resources: NA
Budget Amount Requested: $0.00 (no request)

focus on proseminar
The exit interviews and annual evaluations (specifically the CVs) are designed to measure the main goal of fostering successful scholars and practitioners of Women's Studies. These skills (presenting at conferences, applying to PhD schools, publishing papers, etc.) are desired outcomes of the Women's Studies Proseminar, which we instituted a few years ago to accommodate a variety of needs among our students (including helping them move more quickly through the program). Therefore, when we don't meet these goals, it makes sense that we would re-evaluate the structure of the WS proseminar to see if it can adjust to fit the needs of the students. So far, the feedback from students in exit interviews is that the Proseminar is extremely helpful, and they don't suggest any changes in it. From the perspective of the faculty, we also think that it is achieving its main goals (progress toward graduation seems to have improved significantly). We will wait another cycle to see what the findings are next year, since these set of data have a significant number of students who did not take the Proseminar (about 1/3). If the target remains unmet next year, we will re-evaluate to see if we should adjust the expectation or if we should revise the Proseminar.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High
