Mission / Purpose

The mission of the Bachelors of Business Administration, Accountancy Major is to provide the technical and analytical accounting knowledge to become a professional in accounting and to pursue a fifth (graduate) year of professional study.

Goals

G 1: Technical Accounting Knowledge

G 2: Analytical Accounting Knowledge and Skills

Student Learning Outcomes/Objectives

SLO 1: Principles of Accounting (ACCT 2101 and 2102) (G: 1) (M: 1, 2, 3)
Students demonstrate technical accounting knowledge of the principles of managerial and financial accounting

SLO 2: Financial Accounting (ACCT 4111, 4112 and 4113) (G: 2) (M: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17)
Students display knowledge of financial accounting

SLO 3: Managerial Accounting (ACCT 4210) (G: 2) (M: 18, 19, 20)
Students demonstrate technical and analytical accounting knowledge in cost and managerial accounting

SLO 4: Accounting Information Systems (ACCT 4310) (G: 2) (M: 21, 22, 23, 24)
Students demonstrate technical and analytical accounting knowledge in accounting information systems

SLO 5: Taxation (ACCT 4510) (G: 2) (M: 25, 26, 27)
Students demonstrate technical and analytical accounting knowledge in personal and corporate taxation

SLO 6: Audit and Assurance (ACCT 4610) (G: 2) (M: 28, 29, 30, 31, 32)
Students display knowledge of Audit and Assurance

Measures, Targets, and Findings

M 1: Translate business activities into accounting information (ACCT 2101 and 2102) (O: 1)
Translate activities related to essential business processes into accounting information reflected in the accounting information system

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Principles of Accounting (ACCT 2101 and 2102)
Mean of 70% or higher

Findings 2012-2013 - Target: Met

The mean score for five final exam assessment questions was 74.83%. There were some discrepancies between acct 2101 sections (approximately 2,000 students take the course each year) so we are moving to a model that adds a third large section in the fall to reduce the number of different instructors teaching the course. Students struggled with journal entries and calculations involving budgets. Both require significant student time outside of class

M 2: Solve operating problems using accounting information (ACCT 2101 and 2102) (O: 1)
Solve operating problems by identifying relevant information from the accounting system and using appropriate tools

**Target for O1: Principles of Accounting (ACCT 2101 and 2102)**
Mean score of 70% or higher

**Findings 2012-2013 - Target: Met**
The mean score for five final exam assessment questions was 71.37%. Coverage of material appears to be appropriate with the exception of relevant variable analysis. Students need more guided learning experiences specific to this topic. There were some discrepancies between acct 2101 sections so we are moving to a model that adds a third large section in the fall to reduce the number of different instructors teaching the course.

**M 3: Comprehend the usefulness of accounting information (ACCT 2101 and 2102) (O: 1)**
Comprehend the usefulness of accounting information to stakeholders making business decisions

**Target for O1: Principles of Accounting (ACCT 2101 and 2102)**
Mean score of 70% or higher

**Findings 2012-2013 - Target: Met**
The mean score for five final exam assessment questions was 71.18%. The weak link in this learning objective is revenue recognition. More practice is needed to counteract what students “think they know” when they enter acct 2101. There were some discrepancies between acct 2101 sections so we are moving to a model that adds a third large section in the fall to reduce the number of different instructors teaching the course.

**M 4: Identify, analyze and record journal entries (ACCT 4111) (O: 2)**
Identify, analyze and record journal entries for business transactions, including adjusting and closing entries

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**
Mean of 65% or higher

**Findings 2012-2013 - Target: Met**
Mean score ranged from 76% to 85%.

**M 5: Prepare financial statements (ACCT 4111) (O: 2)**
Prepare the financial statements of a business with no complex transactions

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**
Mean score of 65% or higher

**Findings 2012-2013 - Target: Met**
Mean score ranged from 80% to 94%.

**M 6: Recognize Revenue (ACCT 4111) (O: 2)**
Recognize revenue for a variety of business models

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**
Mean score of 65% or higher

**Findings 2012-2013 - Target: Met**
Mean score ranged from 73% to 81%.

**M 7: Time Value of Money (ACCT 4111) (O: 2)**
Apply time value of money concepts to financial accounting measurements

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**
Mean score of 65% or higher

**Findings 2012-2013 - Target: Met**
Mean score ranged from 65% to 79%.

**M 8: Current Assets (ACCT 4112) (O: 2)**
Identify, analyze and record the current assets of an enterprise

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**
Mean score of 65% or higher

**Findings 2012-2013 - Target: Met**
Mean score ranged from 65% to 79%.
**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 80% or higher

**Findings 2012-2013 - Target: Met**

The mean student score of 83% has increased from the previous period's 77%. It is difficult to pinpoint any changes that contributed to this improvement. It may be because of a small increase in class time associated with teaching about inventory cost flow assumptions.

**M 9: Operational Assets (ACCT 4112) (O: 2)**

Identify, analyze and record the operational assets of an enterprise

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 80% or higher

**Findings 2012-2013 - Target: Met**

The mean student score of 84% has decreased from the previous period's 92%. The cause of the decrease in scores associated with operational assets is likely due to the removal of a significant group problem that was previous done during class (1.5 hours) that has now become optional outside of class due to classroom time constraints. Student performance continues to be at acceptable levels.

**M 10: Investments (ACCT 4112) (O: 2)**

Identify, analyze and record the investments of an enterprise

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 80% or higher

**Findings 2012-2013 - Target: Not Met**

The mean student score of 69% has increased from the previous period's 64%. The assessment questions are not robust enough to make a definitive statement.

**M 11: Liabilities (ACCT 4112) (O: 2)**

Identify, analyze and record the current and long-term liabilities of an enterprise

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 80% or higher

**Findings 2012-2013 - Target: Met**

The mean student score of 81% has stayed the same as the previous period's 81%. No significant changes have been made to these sections and students continue to perform adequately.

**M 12: Recording Lease Contracts (ACCT 4112) (O: 2)**

Identify, analyze and record the lease contracts of an enterprise

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 80% or higher

**Findings 2012-2013 - Target: Met**

The mean student score of 87% has increased from the previous period's 81%. The assessment questions are not robust enough to make a definitive statement.

**M 13: Record deferred tax assets and liabilities (ACCT 4113) (O: 2)**

Record the deferred tax assets and liabilities of a business using professional accounting standards

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean of 70% or higher

**Findings 2012-2013 - Target: Met**

Mean score on exam questions was 77%. As a result of implementation of action plan from 2011-12, student performance on loss carrybacks and carryforwards improved to 72%.

**M 14: Record Pensions (ACCT 4113) (O: 2)**

Record the pension expense and liability of a business using professional accounting standards

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**
### Findings 2012-2013 - Target: Not Met

As a result of shifting of lease chapter to ACCT 4112, the pensions chapter was now covered. Mean score on exam questions was 65%. Students had difficulty calculating the balances in Net Gain or Loss – AOCI. Mean score on questions related to this concept was 60%. Students also had difficulty calculating pension expense (mean score 62%).

### M 15: Record Shareholders Equity (ACCT 4113) (O: 2)

Record the journal entries and prepare the shareholders equity section of a balance sheet

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean of 70% or higher

**Findings 2012-2013 - Target: Met**

Mean score on exam questions was 80%

### M 16: Advanced Statement of Cash Flows (ACCT 4113) (O: 2)

Prepare an advanced level statement of cash flows with complex transactions

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 70% or higher

**Findings 2012-2013 - Target: Not Met**

Mean score was 68.6%. Data is only from one out of two instructors. The other instructor was not able to cover the chapter in class due to lack of time.

### M 17: Apply theory, standards and judgment (ACCT 4113) (O: 2)

Apply financial accounting theory, professional standards and judgment to record business transactions

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Financial Accounting (ACCT 4111, 4112 and 4113)**

Mean score of 70% or higher.

**Findings 2012-2013 - Target: Met**

Mean score on case was 80%. Facts of the case needed explanation in class. Students knowledge of the operations of a business was lacking. Also knowledge about where to find basic accounting and stock price information about a company was lacking.

### M 18: Develop performance measures (ACCT 4210) (O: 3)

Develop appropriate financial and non-financial performance measures for effective planning, evaluation and control of organizations' business processes.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Managerial Accounting (ACCT 4210)**

Mean score of 65% or higher

**Findings 2012-2013 - Target: Met**

Mean score was 66%.

### M 19: Evaluate the appropriateness of alternative costing systems (ACCT 4210) (O: 3)

Evaluate the appropriateness of alternative costing systems and methods by considering the unique context of specific product and service organizations.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Managerial Accounting (ACCT 4210)**

Mean score of 73% or higher

**Findings 2012-2013 - Target: Not Met**

Mean score was 69%.

### M 20: Structure and model business problems (ACCT 4210) (O: 3)

Structure and model business problems to evaluate alternatives, conduct sensitivity analysis on assumptions, and analyze outcomes to determine causes and variances.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O3: Managerial Accounting (ACCT 4210)**

Mean of 65% or higher

</tbody>
</table>
Findings 2012-2013 - Target: Met
Mean score was 76%

M 27: Make Investment Decisions using Tax Law (ACCT 4510) (O: 5)
Make investment decisions requiring knowledge of the tax law and its effect
Source of Evidence: Writing exam to assure certain proficiency level

Target for 05: Taxation (ACCT 4510)
Mean score of 75%

Findings 2012-2013 - Target: Met
Mean score was 77%.

M 28: Differentiate among the various types of auditing (ACCT 4610) (O: 6)
Differentiate among the various types of auditing and the procedures applied on the financial statements audits and audits of Internal Controls over Financial Reporting
Source of Evidence: Writing exam to assure certain proficiency level

Target for 06: Audit and Assurance (ACCT 4610)
Mean of 75% or higher

Findings 2012-2013 - Target: Met
Mean score was 93%. Prior rate was 82.62%; therefore there was an 18% increase. The mean is above the target. Two new approaches likely led to the improvements observed. First, professors now dedicate some class time to modeling how to analyze questions and share time management strategies on exams. Second, we have adopted a new textbook, which provides effective explanations for the homework exercises and problems. In particular the text explains why the incorrect objective responses are not accurate. These explanations help students to develop their critical and analytical thinking skills. We plan to continue modeling solution strategies and analytical thinking during class sessions.

M 29: Evaluate the components of audit risk (ACCT 4610) (O: 6)
Evaluate the components of audit risk and the appropriate audit approach to address the risks identified
Source of Evidence: Writing exam to assure certain proficiency level

Target for 06: Audit and Assurance (ACCT 4610)
Mean score of 75% or higher

Findings 2012-2013 - Target: Met
Mean score was 92%. Prior rate was 76.19%; therefore there was a 17% increase. The mean is above the target. Two new approaches likely led to the improvements observed. First, professors now dedicate some class time to modeling how to analyze questions and share time management strategies on exams. Second, we have adopted a new textbook, which provides effective explanations for the homework exercises and problems. In particular the text explains why the incorrect objective responses are not accurate. These explanations help students to develop their critical and analytical thinking skills. We plan to continue modeling solution strategies and analytical thinking during class sessions.

M 30: Apply the opinion formulation process (ACCT 4610) (O: 6)
Apply the opinion formulation process to specific attestation engagements and clearly communicate the results of procedures performed as part of the opinion formulation process
Source of Evidence: Writing exam to assure certain proficiency level

Target for 06: Audit and Assurance (ACCT 4610)
Mean of 75% or higher

Findings 2012-2013 - Target: Not Met
Mean was 61%. Prior rate was 54.84%; therefore there was a 6% increase. The mean is below the target. We note some improvement in achievement of this objective; however, we recognize that substantial improvement on this objective is still required. We will add in-class activities to model problem solving on this objective. We expect that use of the new textbook that models critical and analytical thinking for audit issues will also contribute to continued improvement on the learning objective.

M 31: Understand and evaluate the auditor’s responsibility (ACCT 4610) (O: 6)
Understand and evaluate the auditor’s responsibility on the audit engagement and determine whether that responsibility was adequately fulfilled
Source of Evidence: Writing exam to assure certain proficiency level

Target for 06: Audit and Assurance (ACCT 4610)
Mean score of 75% or higher

Findings 2012-2013 - Target: Met
Mean score was 77%. Prior rate was 58.81%; therefore there was an 18% increase. The mean is above the target. Two new approaches likely led to the improvements observed. First, professors now dedicate some class time to modeling how to analyze questions and share time management strategies on exams. Second, we have adopted a new textbook, which provides effective explanations for the homework exercises and problems. In particular the text explains why the incorrect objective responses are not accurate.
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### ACCT 4310
Develop better thinking models to help students evaluate internal control.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** A. Faye Borthick

#### ACCT2101 and ACCT2102
In ACCT 2101 one of the most challenging aspects of the course has been our inability to get students to attend the teaching assistants' office hours. Fewer than 5% of the students take advantage of this resource. For 2009/2010 we will change the name from "office hours" to "tutoring sessions" and make them more "user friendly" by including some mini-tutorials along with the more common question & answer format for office hours. The teaching assistants will also be required to post weekly to the discussion boards in the hopes of involving more acct 2101 students in critical thinking topics and tips for succeeding in the course. Finally, we will try and remedy that issue by having a brief tutorial in class on navigating the iTunesU site and give the videos a second year to "catch on". In ACCT2102, one of the challenges that we face in this course is getting more students to attend the Teaching Assistants' office hours. In an average week, roughly 10% of students will attend office hours with one of the four teaching assistants. During 2009-2010, we are renaming the "office hours" to "tutoring sessions" and make them more "user friendly" by including some mini-tutorials along with the more common question & answer format for office hours. Although the course digital tutors have wide acceptance among the students, these tutorials will be introduced during the first week of class during the lecture or Friday breakout session so that students see the value of the digital tutors right from the beginning of the course. Last, additional practice problems will be incorporated into both the lecture and the homework that require the integration of multiple financial statements to solve the problem, with special focus on the cash flow chapter.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Kris Clark and Cathy Patridge

#### ACCT2102 and ACCT2102
See Action Plan for Measure 1.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Kris Clark and Cathy Patridge

#### ACCT4210
We improved the assessment process by providing a standard set of questions to be included on exams in all sections effective Fall 08. The result of the new, standardized approach is that the question sets used for assessing learning objectives are not directly comparable to 07-08. Thus, changes in means may reflect more rigor in the questions (prior questions included subjective evaluations and partial credit). Going forward the standardization will allow us to better assess how changes to the program affect student performance. We adopted a new text beginning in Fall 2008 to return to a more traditional approach. We had tried a text that

#### Target for O6: Audit and Assurance (ACCT 4610)
Mean score of 75% on Alchemy case. Student scores on memorandum. Improvement of 5% in mean score for CTW quizzes.

<table>
<thead>
<tr>
<th>Findings 2012-2013 - Target:</th>
<th>Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mean score was 99% Alchemy Assignment: Student scores on the memorandum. Improvement in CTW as demonstrated by quizzes: Comparison of performance on the 1st CTW quiz (taken during the 5th/6th week of the semester) vs. the 2nd CTW quiz (taken in the 14th week of the course). Summer sessions use the date equivalent of the 5th/6th week and 14th week. Quiz questions are equivalent in difficulty. (Target rate of 5%). Actual improvement rate was 13%. We will continue to emphasize the importance of critical thinking and writing in auditing and accounting. We will model effective critical analytical thinking strategies for students.</td>
<td></td>
</tr>
</tbody>
</table>
emphasized ambiguity; however, this hindered the students' learning of technical concepts. We will focus in 09-10 on improving students’ abilities to model business problems and analyze causes of variances as student performance in these areas lags expectations. Instructors will devote more class time and develop additional assignments in these two areas in order to help students master these concepts.

Responsible Person/Group: Chris Fenn

Delete Course and Revise Curriculum
In ACCT4410, students performed below target in a significant number of sub-learning outcomes pertaining to Measures #26 and #27. ACCT4410 relies a lot on the material learnt in ACCT4110. You cannot analyze certain parts of the financial statements if you don’t know how to prepare or understand those parts of the financial statements. Since ACCT4110 omitted many important topics, students were ill-prepared for ACCT4410 on these topics and performed poorly on them. The above two issues indicate an urgent need to revise the curriculum to include more financial accounting. Given that there is a course similar to ACCT4410 at the graduate level (ACCT8700) we plan to eliminate ACCT4410 and replace it with an additional 3 credit class in financial accounting.

Established in Cycle: 2008-2009  
Implementation Status: Finished  
Priority: High  
Projected Completion Date: 07/2009  
Responsible Person/Group: Siva Nathan

Responsible Person/Group: Siva Nathan
**Emphasis on selected topics**
Revenue theory, analysis of discontinued operations, cash flow statement, cash versus accrual basis, revenue recognized using installment method, and using PV/FV will be emphasized during 2010 since those were the lowest percent correct on the cumulative final exam. Instruction will include providing more homework in these areas and spending more class time on these topics. A "Digital Tutor" (short instructional video) will be added on Installment Method Accounting to improve the learning outcomes for this harder topic. Further, students will be given more guidance on how to get started on Jag & Elk to help them get a quick start on the project.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished

- **Projected Completion Date:** 08/2010

**Shift lease chapter to ACCT 4112**
Shift lease chapter to ACCT 4112 so that the pensions chapter can be covered in ACCT 4113.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 08/2012
- **Responsible Person/Group:** Nathan

**Add in-class activities**
Prior rate was 54.84%; therefore there was a 6% increase. The mean is below the target. We note some improvement in achievement of this objective; however, we recognize that substantial improvement on this objective is still required. We will add in-class activities to model problem solving on this objective. We expect that use of the new textbook that models critical and analytical thinking for audit issues will also contribute to continued improvement on the learning objective.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 08/2013
- **Responsible Person/Group:** Smith

**Case facts need explanation**
Facts of the case needed explanation in class. Students knowledge of the operations of a business was lacking. Also knowledge about where to find basic accounting and stock price information about a company was lacking. Continue to explain the facts of the case in class and guide students on where to find accounting and finance information about a company.

- **Established in Cycle:** 2012-2013

Measure: Design Business Processes (ACCT 4310) | Outcome/Objective: Accounting Information Systems (ACCT 4310)
Projected Completion Date: 08/2013
Responsible Person/Group: Borthick

Develop practice questions
The case on which the exam is based has two parts, one for improved spreadsheet skills and one for distinguishing between spreadsheets and databases for specific analytical applications as it develops students’ querying skills. The case was enhanced this year with the addition of quizzes on all activities leading up to the exam. Students responded well to the quizzes and asked for practice quizzes.

Instructor collaboration
Collaborate with all 4112 instructors to create a more robust set of assessment questions for all objectives

Established in Cycle: 2012-2013
Implementation Status: Finished
More HW, video tutorials

We adopted a new textbook starting in AY 2012-2013. This is the only systematic change from AY 2011-2012. It does not seem to have had a significant impact on the first two assessment objectives; however, it may have contributed to the significant increase in performance on the last objective. We will prepare Excel versions of the homework that uses random numbers so that students can get plenty of practice with the homework and with Excel. We will start preparing video tutorials that focus on the more procedural components of the course so that we can spend more time in class on developing problem formulation and critical thinking skills.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: High
Projected Completion Date: 08/2013
Responsible Person/Group: Ron Guymon

More practice problems

Make up more sample problems with different permutations and combinations of Gain or Loss on AOCI.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
  Measure: Record Pensions (ACCT 4113) | Outcome/Objective: Financial Accounting (ACCT 4111, 4112 and 4113)

Projected Completion Date: 08/2013
Responsible Person/Group: Siva Nathan

More robust set of assessment questions

Collaborate with all 4112 instructors to create a more robust set of assessment questions for all objectives.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: High
Projected Completion Date: 08/2013
Responsible Person/Group: Blunck, Swenson, Fang

More sample problems

Make up more sample problems with different permutations and combinations

Established in Cycle: 2012-2013

  Measure: Structure and model business problems (ACCT 4210) | Outcome/Objective: Managerial Accounting (ACCT 4210)
Georgia State University
Assessment Data by Section
2012-2013 Accountancy PhD
As of: 12/12/2016 05:58 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
Develop in graduates a high level of confidence in conducting research and in teaching business disciplines by requiring (1) training in theory, (2) training in general research techniques as well as research techniques specific to a discipline, (3) research experience with faculty members on contemporary research problems and issues, and (4) training on teaching methodology reinforced with active classroom teaching experience.

Goals
G 1: Discipline knowledge - evaluate research
Students should be able to critically evaluate and discuss theoretical developments and the results of original research.

G 2: Discipline knowledge - conduct research
Students should be able to conduct and present original research in collaboration with faculty.

G 3: Research competence
Students should be able to conduct original research individually.

G 4: Placement
Most graduates will accept positions at institutions where the research skills learned in the program will be used and developed further.

G 5: Teaching competency
Develop a high level of competence in conducting university level teaching.

Student Learning Outcomes/Objectives
SLO 1: Comprehensive exams (G: 1) (M: 1)
Successful completion of comprehensive examinations as judged by a committee of appropriate faculty members.

SLO 2: Critical evaluation of research (G: 1) (M: 2)
 Demonstrate the ability to critically evaluate research by providing comments to presenters at internal workshops.

SLO 3: Collaborative research activity (G: 2) (M: 3)
Students will conduct research with faculty in order to develop their research skills and experience with the publication process.
SLO 4: Research presentations (G: 2) (M: 4)
Students will present their research at internal workshops and professional meetings.

SLO 5: Dissertation defense (G: 3) (M: 5)
Successful defense of the dissertation conducted before a faculty committee.

SLO 6: Initial placements - research (G: 4) (M: 6)
Students will accept positions at research institutions, preferably at schools offering doctoral degrees in accounting.

SLO 7: Teaching - training (G: 5) (M: 7)
Successful completion of 9200, Seminar in University Teaching.

SLO 8: Teaching - competency (G: 5) (M: 8)
Students will develop their teaching competency by teaching and obtaining feedback via SEIPs.

SLO 9: Placement - teaching (G: 5) (M: 9)
Students will place in institutions where the teaching skills learned in the program will be used and developed further.

Measures, Targets, and Findings

M 1: Comprehensive exams (O: 1)
Successful completion of comprehensive examinations as judged by a committee of appropriate faculty members.
Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Comprehensive exams**

70% of students will pass comprehensive exams on their first attempt. Of those failing and allowed to retake the exam, 50% will pass on their second attempt.

**Findings 2012-2013 - Target: Met**

Of the students taking comprehensive exams in the past five years, 83.3% have passed.

M 2: Critical Analysis Seminar and workshops (O: 2)
All students in their first three years of the program will attend Critical Thinking Seminar to critically evaluate workshop papers. All students beyond the first year will provide comments to presenters during workshops.
Source of Evidence: Academic direct measure of learning - other

**Target for O2: Critical evaluation of research**

All students in their first three years of the program will take the Critical Analysis seminar to gain skill in critically evaluating working papers. All students beyond the first year will provide comments to presenters during research workshops.

**Findings 2012-2013 - Target: Met**

All current students have taken Critical Analysis seminar in each year of the first three years of their programs. Workshop participation has increased since we adopted the policy of having students sit in the first row and presenters call on them first. We also initiated a procedure during the Spring 2013 semester to have students formally (written before the seminar) vet their questions in Critical Analysis seminar - this has resulted in a better quality of questions from the students, which in turn suggests improved confidence and ability in performing critical analysis of research.

M 3: Research with faculty (O: 3)
Source of Evidence: Portfolio, showing skill development or best work

**Target for O3: Collaborative research activity**

Seventy-five percent of students will have a project with faculty member(s) by their third year in the program. Fifty percent will have a paper published or in the publication process by the end of their program.

**Findings 2012-2013 - Target: Partially Met**

Of the six students currently beyond their third years, 3 have active research projects with faculty. 50% is below our target of 75%. Of the six graduates in the past six years, three have had research in the publication process - this represents 50%, which is at target. Two students had these papers published before graduation, and the third student's paper was published within a year of graduating.

M 4: Research presentations (O: 4)
Students will present their research at internal workshops and professional meetings.
Source of Evidence: Presentation, either individual or group

**Target for O4: Research presentations**

All students beyond the second year will have presented their research at internal workshops. 50% of graduating students will have presented a research paper at a research conference.
Findings 2012-2013 - Target: Met
All students beyond the second year have presented their research projects internally. Of the six students who have graduated in the past six years, 4 (67%) have presented research at conferences. This exceeds our target of 50%.

M 5: Dissertation Defense (O: 5)
Successful defense of the dissertation conducted before a faculty committee.
Source of Evidence: Senior thesis or culminating major project

Target for O5: Dissertation defense
100% of students who attain ABD status will successfully defend their dissertations before a faculty committee; 75% on their first attempt.

Findings 2012-2013 - Target: Partially Met
100% of the graduates in the past six years have defended their dissertations in the first attempt. Of the six students currently on ABD status, five on track to defend their proposals and final defense. One student has delayed her final defense and is in peril of not completing her dissertation.

M 6: Initial placements - research (O: 6)
Students will accept positions at research institutions, preferably at schools offering doctoral degrees in accounting.
Source of Evidence: Job placement data, esp. for career/tech areas

Target for O6: Initial placements - research
At least 50% of graduating students will place at research institutions.

Findings 2012-2013 - Target: Met
Of the six students who graduated in the past six years, four have placed at research institutions. At 67%, this is above our target.

M 7: Teaching - training (O: 7)
Successful completion of 9200, Seminar in University Teaching.
Source of Evidence: Academic direct measure of learning - other

Target for O7: Teaching - training
100% of students will complete the seminar on teaching (9200) in their first year of the program.

Findings 2012-2013 - Target: Met
All students who have entered the program in the past five years have completed the teaching seminar in their first semester, before teaching their first course.

M 8: Teaching - competency (O: 8)
Students will develop their teaching competency by teaching and obtaining feedback via SEIPs.
Source of Evidence: Student course evaluations on learning gains made

Target for O8: Teaching - competency
All students will teach during their programs. 50% will teach an upper division course before graduating. All students will achieve a minimim average overall effectiveness rating of 4.0 in semesters beyond the first one that they teach. 60% of students will achieve overall effectiveness ratings of at least 4.2 before graduating.

Findings 2012-2013 - Target: Met
All graduates in the past six years have taught at least one upper-level course. Of the six students at ABD status, five have taught an upper level course. This is above our target of 50%. All students who have taught beyond their first course have attained an overall effectiveness rating of 4.2; in fact all have mean effectiveness scores of at least 4.2 for this reporting year. This exceeds our target for 60% of students to achieve that target.

M 9: Placement - teaching (O: 9)
Students will place in institutions where the teaching skills learned in the program will be used and developed further.
Source of Evidence: Job placement data, esp. for career/tech areas

Target for O9: Placement - teaching
80% of graduates will place at institutions with AACSB accreditation.

Findings 2012-2013 - Target: Met
Of the six students who graduated in the past six years, all have placed at institutions with AASCB accreditation. This exceeds our target of 80%.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Improve Teaching Effectiveness
International students tend to have the most challenge with SEIPs. All students, especially international students, are encouraged to
**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have not changed our learning outcomes, measures or targets since the last report.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on our analysis in last reporting cycle, the SOA actively sought to recruit two new senior faculty members and four-five junior faculty. The current competitive state of the accounting market left us short of these goals. We will continue to actively pursue faculty who have left SOA have committed to continue their teaching-related target (set at 60% of the students) to attain an overall mean of 4.2 on their SEIPs. This suggests that our efforts to encourage mentorship and early intervention are paying off. Second, we have improved the research collaboration with faculty for our first and second year students. A continuing concern we've been trying to address is how to improve student/faculty research collaboration. Our efforts to stimulate research early on appear to be paying off: of our six first and second year students, four have active projects with faculty that should be in the publication process before the enter the job market. At 67%, this is a higher proportion than our current ABD status students (at 50%).

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

We had two major achievements this year. First, continuing with the trend from last year, ALL our students are now meeting our teaching-related target (set at 60% of the students) to attain an overall mean of 4.2 on their SEIPs. This suggests that our efforts to encourage mentorship and early intervention are paying off. Second, we have improved the research collaboration with faculty.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

Students continue to be more active and confident in the research workshops. The requirement to formally vet written questions in Critical Analysis Seminar, in conjunction with the procedure that students are called on first, has resulted in much higher quality and volume of student participation. We placed one student this year. Although he opted for Florida International for family reasons, he had an offer from Nanyang Polytechnic University - this indicates that our students are being very well trained and are in demand by some of the best institutions.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

A continuing challenge has been getting students more involved in research. We have made great strides this year! Unfortunately, we will have some attrition of senior faculty next year. As a result of this, three of our first and second year students decided to pursue other options. Evidence of the quality of students and the training they have received is that the ones who decided to pursue other programs all placed very well: University of Florida, Georgia Institute of Technology, and Nanyang Polytechnical University.

**Improve initial pass rate on comprehensive exams**

The initial pass rate is slightly lower than our target rate of 70%. However, our pass rate on the second attempt is above our target rate. The net effect is an overall pass rate consistent with our expectations given our desire to place students at research institutions. Therefore, we are not concerned about the overall pass rate. To improve the initial pass rate, we have restructured our assistantship funding effective in 2011-2012 such that students will not be required to teach during the summer session while studying for their comprehensive exam. This should allow them more time to prepare for the exam.

**Improve research collaborations**

Although we are meeting our target of 50% published/submitted papers by graduation, we are below our target in terms of stimulating collaborative research.
Assessment Data by Section
2012-2013 Actuarial Science BBA
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

**BBA-AS PROGRAM MISSION:** The BBA in Actuarial Science is designed to prepare students to: (1) Have a broader foundation of business courses and quantitative analytical training; (2) Have introductory-level knowledge on actuarial valuation of insurance liabilities and financial valuation of assets, integrating the actuarial contingencies and the time value of money; and (3) Pass the first two professional exams offered by the Society of Actuaries/Casualty Actuarial Society.

**RMI DEPARTMENT MISSION:** To enhance social well being by developing knowledge and providing education in risk and its management.

**RMI DEPARTMENT VISION:** To be the world’s leader in risk management scholarship and education.

### Goals

**G 1: Broader foundation and quant. analysis skills**

Upon completion of the BBA-AS program, students will have a broader foundation of business courses and quantitative analytical training.

**G 2: Introductory-level actuarial science knowledge**

Upon completion of the BBA-AS program, students will have introductory-level knowledge on actuarial valuation of insurance liabilities and financial valuation of assets, integrating the actuarial contingencies and the time value of money.

**G 3: Pass the first two SOA/CAS professional exams**

Upon completion of the BBA-AS program, students will pass the first two professional exams offered by the Society of Actuaries/Casualty Actuarial Society.

### Student Learning Outcomes/Objectives

**SLO 1: Structure and solve problems (G: 1, 2, 3) (M: 1, 2)**

BBA-AS graduates will be able to structure and solve actuarial and related business problems with sound analytical techniques.

**SLO 2: Comprehension of theoretical & technical materials (G: 1, 2, 3) (M: 1, 2)**

BBA-AS graduates will be able to comprehend the theoretical and technical material in appropriate actuarial journals.

**SLO 3: Mastery of life contingencies (G: 1, 2, 3) (M: 1, 2, 3)**

BBA-AS graduates will demonstrate the technical mastery of life contingencies and risk theory. The student will also demonstrate a mastery of actuarial modeling techniques.

**SLO 4: Completion of first two actuarial exams (G: 1, 2, 3) (M: 4)**

To be recognized as a professional actuary, a person must become a member of the Society of Actuaries or the Casualty Actuarial Society by passing a series of examinations. By graduation, our BBA-AS students will have passed the first two professional exams: Exam P – Probability and Exam FM – Financial Economics.

### Measures, Targets, and Findings

**M 1: Selected and Identified Quiz Questions in AS 4340 (O: 1, 2, 3)**

Each student will demonstrate through performance on selected and identified quiz questions in AS 4340 Life Contingencies an understanding of the concepts of insurance liabilities, including “interest discounting” and “survival discounting” of actuarial valuation.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Structure and solve problems**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

**Target for O2: Comprehension of theoretical & technical materials**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

**Target for O3: Mastery of life contingencies**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of students during each 4-year evaluation period.

**M 2: Selected Projects in RMI 3750 (O: 1, 2, 3)**

Each student will demonstrate through performance on selected projects in RMI 3750 Probability Theory and Simulation Analysis in
Risk Management an understanding of the sources of uncertainty in a business application.

Source of Evidence: Project, either individual or group

**Target for O1: Structure and solve problems**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of students during each 4-year evaluation period.

**Target for O2: Comprehension of theoretical & technical materials**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of students during each 4-year evaluation period.

**Target for O3: Mastery of life contingencies**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of students during each 4-year evaluation period.

**M 3: Identified Exam Questions in AS 4230 (O: 3)**
Each student will demonstrate through performance on identified exam questions in AS 4230 Theory of Interest and understanding of the basic concept of compound theory of interest and the term structure of interest rates.
Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Mastery of life contingencies**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE THREE RUBRIC to a random selection of students during each 4-year evaluation period.

**M 4: Completion of first 2 professional actuarial exams (O: 4)**
BBA-AS graduates will have passed the first two professional exams offered by the Society of Actuaries and the Casualty Actuarial Society: Exam P – Probability and Exam FM – Financial Economics.
Source of Evidence: Certification or licensure exam, national or state

**Target for O4: Completion of first two actuarial exams**
70% of our BBA-AS graduates will have taken and passed both Exam P – Probability and Exam FM – Financial Economics by the time they finish the program.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Course revision to improve instruction across relevant items**
The course will be revised to improve instruction on random variable distributions, recursion formulas and interest conversion formulas.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Selected and Identified Quiz Questions in AS 4340
  - **Outcome/Objective:** Comprehension of theoretical & technical materials
  - **Outcome/Objective:** Mastery of life contingencies
  - **Outcome/Objective:** Structure and solve problems

- **Projected Completion Date:** 12/2010
- **Responsible Person/Group:** Eric Ulm

**Mission / Purpose**

MAS PROGRAM MISSION: The MS in Actuarial Science is designed to prepare students to: (1) Undertake actuarial valuation of liabilities and financial risk modeling of assets for insurance companies, financial institutions and consulting firms; (2) Develop integrated thinking and communication skills; and (3) Pass the early professional actuarial exams offered by the Society of Actuaries and the Casualty Actuarial Society. RMI DEPARTMENT MISSION: To enhance social well being by developing knowledge and providing education in risk and its management. RMI DEPARTMENT VISION: To be the world’s leader in risk management scholarship and education. Through the collaboration of experts in multiple disciplines, we will be recognized internationally as leaders in: a) the development of integrated applications of economics, law, mathematics, and probability theory to the quantitative and qualitative measurement of risks; b) the selection and design of individual, organizational, and societal strategies for the efficient management of risk; and c) the dissemination of this knowledge.

**Goals**
### Student Learning Outcomes/Objectives

**SLO 1: Explanation of technical concepts (G: 1, 2, 3) (M: 3)**

The MAS graduate will be able to explain technical concepts to non-actuarial associates or clients.

### Other Outcomes/Objectives

**O/O 2: Concepts of Investment Risk Evaluation (G: 1, 2, 3) (M: 1, 2)**

The MAS graduate will have the basic conceptual knowledge and technical skill in evaluating major types of risks for a typical insurance company’s investment portfolio.

**O/O 3: Concepts of Liability Risk Evaluation (G: 1, 2, 3) (M: 1, 2, 3)**

The MAS graduate will have the basic conceptual knowledge and technical skills in evaluating major types of risks for a typical insurance company’s liability portfolio.

**O/O 4: Enterprise Risk and Integration (G: 1, 2, 3) (M: 3)**

The MAS graduate will have an appreciation of broader enterprise-wide risks and their integrations in insurance companies.

### Measures, Targets, and Findings

**M 1: Case studies from current events (AS 8810) (O: 2, 3)**

Each student will demonstrate through performance on case studies from current events in the AS 8810 Graduate Seminar an understanding of the following: (1) Concepts and tools in calculating market risks (stocks, real estate); (2) Concepts and tools in calculating credit risks (bond yield spreads, Credit Default Swaps, rating transition matrix); (3) Basic shapes of the yield curve and interest rate risk measures (duration and convexity); and (4) Standard products offered by life insurance companies and property-casualty companies.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O2: Concepts of Investment Risk Evaluation**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of student performances on case studies from current events in AS 8810 Graduate Seminar during each 4-year evaluation period.

**Target for O3: Concepts of Liability Risk Evaluation**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE ONE RUBRIC to a random selection of student performances on case studies from current events in AS 8810 Graduate Seminar during each 4-year evaluation period.

**M 2: Case examples using real company balance sheets (O: 2, 3)**

Each student will demonstrate through performance on a project and case studies in the AS 8810 Graduate Seminar an understanding of the following: (1) Concepts and tools in calculating market risks (stocks, real estate); (2) Concepts and tools in calculating credit risks (bond yield spreads, Credit Default Swaps, rating transition matrix); (3) Basic shapes of the yield curve and interest rate risk measures (duration and convexity); (4) Standard products offered by life insurance companies and property-casualty companies; and (5) Concepts and tools in calculating property-casualty loss reserves.

Source of Evidence: Project, either individual or group

**Target for O2: Concepts of Investment Risk Evaluation**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of student performances on case examples using real company balance sheets in AS 8810 Graduate Seminar during each 4-year evaluation period.

**Target for O3: Concepts of Liability Risk Evaluation**

A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE TWO RUBRIC to a random selection of student performances on case examples using real company balance sheets in AS 8810 Graduate Seminar during each 4-year evaluation period.

**M 3: Performance on project (AS 8810 Graduate Seminar) (O: 1, 3, 4)**
Each student will demonstrate through performance on a project in the AS 8810 Graduate Seminar an understanding of the following:
(1) Standard products offered by life insurance companies and property-casualty companies; (2) The regulatory environment, the role of rating agencies and investors; and (3) Different accounting (financial reporting) requirements (statutory, GAAP and fair value). Further, graduates will have the ability to explain technical concepts to non-actuarial associates or clients.

Source of Evidence: Project, either individual or group

**Target for O1: Explanation of technical concepts**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE THREE RUBRIC to a random selection of student performances on a project in AS 8810 Graduate Seminar during each 4-year evaluation period.

**Target for O3: Concepts of Liability Risk Evaluation**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE THREE RUBRIC to a random selection of student performances on a project in AS 8810 Graduate Seminar during each 4-year evaluation period.

**Target for O4: Enterprise Risk and Integration**
A 2.0 average on all criteria, with no more than 20% of any criteria falling in category. Measurement will be done by applying the MEASURE THREE RUBRIC to a random selection of student performances on a project in AS 8810 Graduate Seminar during each 4-year evaluation period.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Continue retention of exams/projects**
Continue retention analysis of applicable selected student work until targeted 4-year database is achieved. Maintain rolling 4-year database thereafter.

**Established in Cycle:** 2008-2009
**Implementation Status:** Terminated
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Case examples using real company balance sheets | **Outcome/Objective:** Concepts of Investment Risk Evaluation
- **Measure:** Case studies from current events (AS 8810) | **Outcome/Objective:** Concepts of Investment Risk Evaluation
- **Measure:** Performance on project (AS 8810 Graduate Seminar) | **Outcome/Objective:** Concepts of Liability Risk Evaluation
- **Measure:** Enterprise Risk and Integration | **Outcome/Objective:** Explanation of technical concepts

**Projected Completion Date:** 08/2012
**Responsible Person/Group:** Shaun Wang and MAS Assessment Group
**Additional Resources:** None

**Georgia State University**
**Assessment Data by Section**
**2012-2013 African American Studies Assessment of Core**
*As of: 12/12/2016 05:58 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

The mission of the Department of African American Studies (DAAS) at Georgia State University is the advancement of knowledge of people of African descent and their empowerment within the local, national, and international arena. As an interdisciplinary field of concentration, the department offers an interdisciplinary approach to the study of African people nationally and globally. The department's guiding philosophy is African-centered in that we believe that an understanding of the specific cultural and historical experiences of a people must guide and inform any productive analysis and interpretation of that people's past and present, and must guide any viable directives that are offered for their future.

### Goals

**G 1: To develop Critical Thinking**
At the bachelors-level, African American Studies contributes to the university's broader mission of encouraging critical thinking by understanding and communicating how the experience and trajectory of African-descended people is influenced by historical, cultural, geographical, and political factors. In so doing, we prepare our students to identify forms and mechanisms of oppression and apply strategies of advocacy and social change that advance social and economic justice.

### Student Learning Outcomes/Objectives

**SLO 2: Communication (G: 1) (M: 1)**
Students will be able to communicate effectively in writing.
Other Outcomes/Objectives

O/O 1: Analytic (G: 1) (M: 1)
Students will be able to make connections between the African American experience and larger events in the community and world.

Measures, Targets, and Findings

M 1: Service Learning Papers (O: 1, 2)
Students engaged in community service activity and wrote reflection papers based on their experience. The reflection paper assesses student learning based on their ability to analyze and communicate core course concepts. The analytic rubric is a five-item scale where a rating of 5 indicates that the paper reflects a careful reading and understanding of the material. Additionally, the paper focuses on a careful critique of the material, as opposed to a restatement of what the author has stated; 4= Same as 5 above, but paper lacks a careful critique of the material; 3= Same as 4 above, but paper over generalizes and/or does not use material from the reading to support conclusions; 2= Paper simply restates what the author has said, but ignores careful critique of the material; and 1= Paper relies primarily on rhetoric (personal expression) and generalized arguments. The communication rubric is also a five-item scale where a score of 5 reflects a paper that is clearly written with appropriate punctuation, grammar and syntax. Paper is typed, no greater than 12 point font, double-spaced, no more than one-inch margins, and minimum three full pages of text. Reference cited page is included if sources other than those assigned are used; 4) Same as 5 above with some minor (2 – 4) punctuation, grammatical or syntax mistakes; 3) Same as 4 above with no more than 6 punctuation, grammatical or syntax mistakes; 2) Paper has some lack of clarity as well as several punctuation, grammatical or syntax mistakes; and 1) Paper is confusing or unclear in structure and includes several punctuation, grammar and syntax mistakes. Reference cited page is not included when sources other than those assigned were used.

Source of Evidence: Academic indirect indicator of learning - other

Target for O1: Analytic
Target: 80% of the students will receive a rating of 3 or above.

Findings 2012-2013 - Target: Met
Analytic skills. Target met. From the sample presented 100% the students reached the benchmark. Students demonstrated a careful reading and understanding of the material. Their papers provided a careful critique of the material, as opposed to a restatement of what the author stated.

Target for O2: Communication
Target: 80% of the students will receive a score of 3 or higher.

Findings 2012-2013 - Target: Met
Target met. From the sample presented 100% of the students reached the benchmark. Students communicated clearly in writing with appropriate punctuation, grammar and syntax. Papers were typed, using 12-point font, double-spaced, no more than one-inch margins, with a minimum of three full pages of text. References were cited appropriately.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

2010 Action Plan
No action planned required as benchmarks were exceeded or nearly met.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

No action
No action will be taken since the target was nearly met and the findings could be a sampling error.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Service Learning Papers | Outcome/Objective: Communication

Implementation Description: N/A
Responsible Person/Group: N/A

Monitor current outcomes for trends
The instructor will monitor the current outcomes to assess if there are trends based on student demographics (e.g. major, minor, gender, age, etc).

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Low

Implementation Description: Enrollment data will be exported from class into SPSS for descriptive analysis.
Projected Completion Date: 12/2012
Responsible Person/Group: Instructor
Additional Resources: None
Budget Amount Requested: $0.00 (no request)
**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

This course was writing intensive with students receiving ongoing feedback and support to produce an exemplary outcomes in both analytic and communication skills. The department will evaluate if all sections of this course should incorporate this standard. These accomplishments fulfill last years action plans.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

Unable to answer, the instructor for the course assessed is no longer employed by the university.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

Unable to answer.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?**

CTW has reduced the number of course deliverables in favor of increasing the quality of student performance. No changes have been made since last year's CTW report.

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?  
No changes have been made since last year’s report. Core faculty will be meeting with affiliate and adjunct faculty teaching 2010 to standardize key student learning outcomes and assessments.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.  
No changes have been made since last year’s report. Core faculty will be meeting with affiliate and adjunct faculty teaching 2010 to standardize key student learning outcomes and assessments.
Measures, Targets, and Findings

M 1: Final Research Paper (O: 1, 2, 3)

The final research paper in each course (AAS 3975 - Research Methods and AAS 3980 Concepts and Theories) is used as the assignment for assessing student learning outcomes. Each course assignment requires students to integrate, synthesize, and interpret concepts relevant to theory and research. The assessment rubric for each of the three areas is as follows:

Analytical Skill: 5) Paper reflects skillful collection of data required for research. The paper reflects a careful reading and understanding of social science and humanities research. Paper includes a strong critique of ideas and theories and their application to social, cultural, political and economic lives of African American people. Paper reflects an understanding and application of interdisciplinary scholarship; 4) As 5 above but paper lacks a critique of ideas and theories and application to social, cultural, political, and economic lives of African American people; 3) As 4 above but paper overgeneralizes and / or fails to organize data to support conclusions; 2) Paper reflects collection of data, but ignores critique and application of interdisciplinary scholarship; and 1) Paper relies primarily on rhetoric and generalized arguments. Communications Skills. 5. Paper is clearly written with appropriate punctuation, grammar and syntax. Paper is free of and uses appropriate (APA) writing style required for course. Citations are appropriately included to leave no room for charges of plagiarism. References are included appropriately according to required style; 4) As 5 above with some minor (2 – 4) punctuation, grammatical or syntax mistakes) 3 As 4 above with no more than 6 punctuation, grammatical or syntax mistakes; 2) Paper has some lack of clarity as well as several punctuation, grammatical or syntax mistakes and does not properly make citations or references; 1) Paper is confusing or unclear in structure and includes several punctuation, grammar and syntax mistakes. Paper does not use appropriate writing style and / or does not include citations or references. Acquisition of Knowledge. 5. Paper articulates key concepts and theoretical stance that informs the research. Paper includes a clearly stated hypothesis. Paper reflects use of multiple levels of data acquisition (primary, secondary, etc.). Paper demonstrates an understanding of relationship between the lived experiences of African Americans and the Global African community. Paper applies an application of data to understanding the impact of societal, economic and political factors on the life chances of people of African descent; 4) As 5 above but the paper does not include a clearly stated hypothesis; 3) As 4 above but the paper does not reflect us of multiple levels of data acquisition; 2) Paper is overly focused on personal opinion and generalizations. No data is included to support thesis and / or no application is made to the lived experiences of people of African descent; 1) Paper has no clear hypothesis and no clear articulation of conceptual / theoretical stance informing research. Data is not applied appropriately to the lived experience of people of African descent.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Analytic skills

80% of the students will receive a rating of 3 or higher.

Findings 2012-2013 - Target: Partially Met

AAS 3975: Target met. 100% of the students’ papers reflected a skillful collection of data required for research. The paper reflected a careful reading and understanding of social science and humanities research. Papers included a strong critique of ideas and theories and their application to social, cultural, political and economic lives of African American people. The papers reflected a general understanding and application of interdisciplinary scholarship. AAS 3980: Partially met – 72% of students scored 3 or better. A majority of the students’ were able to analyze key theoretical concepts that inform the research, clearly state a hypothesis, demonstrate an understanding of relationship between the lived experiences of African Americans and the Global African community, and apply data to understand the impact of societal, economic and political factors on the life chances of people of African descent.

Target for O2: Communication skills

80% of the students will receive a score of 3 or higher on communication.

Findings 2012-2013 - Target: Met

AAS 3975: Target met. 100% of the papers sampled were clearly written with appropriate punctuation, grammar and syntax. Papers generally used appropriate (APA) writing style required for course. Citations were appropriately included to leave no room for charges of plagiarism and references were included appropriately according to required style. AAS 3980: Target met – 81% of students scored 3 or better. A majority of the students’ were able to produce a clearly written paper with appropriate punctuation, grammar and syntax, use appropriate (APA) writing style required for course; cite appropriately leaving no room for charges of plagiarism with minor grammatical or syntax mistakes.

Target for O3: Acquisition of knowledge

80% of the students will receive a score of 3 or higher on acquisition of knowledge.

Findings 2012-2013 - Target: Partially Met

AAS 3975: Target met. 100% of the papers sampled clearly articulated key concepts and theoretical views that informed the research. Papers included clearly stated hypotheses. Papers reflected use of multiple levels of data acquisition (primary, secondary, etc.). Papers demonstrated an understanding of the relationship between the lived experiences of African Americans and the Global African community. Papers applied an application of data to understanding the impact of societal, economic and political factors on the life chances of people of African descent. AAS 3980: Target not met – While a majority of the student (63%) of students scored 3 or better, the benchmark was not met. A majority of the students were able to articulate key concepts and theoretical positions and clearly state a hypothesis. However, students struggled to provide multiple levels of data acquisition (i.e. primary, secondary, etc.).

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Acquisition of knowledge

This outcome is being met with graduating seniors (AAS 4980) but not students still matriculating at the junior level and below. Consider compartmentalizing the process of synthesizing information to create more manageable and sequential steps for students to follow.

Established Cycle: 2008-2009
Implementation Status: Finished
Priority: Medium
Overall, in analytic reasoning students are performing well with 88% and 75% meeting the achievement goal. Consider additional exercises to improve student performance in AAS 3975.

Communication skills
This outcome is not being met well with lowest performance rate at 66% and 37% for both courses. Consider consulting with the English department to obtain recommendations on how best to improve student writing and grammar.

Action
The assignment will incorporate a purpose or relevance statement which is designed to help students apply the findings of their research to a larger body of work in the field.

Monitor trends
The instructor will monitor the current outcomes to assess if there are trends based on student demographics (e.g. major, minor, gender, age, etc).

Re-write
Students who score 3 or lower on the pre-midterm assignments will be given the option of re-writing the assignment under the supervision of the writing lab or a WA consultant if applicable.

Applied Mid-term Examination
Action taken. The instructor is considering offering an applied mid-term examination where students apply the key terms of the
course to a research topic. This will allow students to improve their analytic skills and demonstrate their acquisition of research knowledge.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Final Research Paper | Outcome/Objective: Acquistion of knowledge

Implementation Description: Instructor will create an on-line mid-term.
Projected Completion Date: 12/2013
Responsible Person/Group: Instructor

Applied Mid-term Examination
Action taken. The instructor will offer an applied mid-term examination where students apply the key terms of the course to a research topic. This will allow students to improve their analytic skills and demonstrate their acquisition of research knowledge.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Final Research Paper | Outcome/Objective: Analytic skills

Implementation Description: The instructor will create an online mid-term exam.
Projected Completion Date: 12/2013
Responsible Person/Group: Instructor

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Students demonstrated mastery in analysis, communication, and acquisition skills in AAS 3975 - Theories and Concepts. These outcomes affirm last years' action plan.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern from the entry level to the exit class?
Students are better able to grasp theories and apply them to the lived experiences of people of African descent.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Students' ability to analyze empirical research and identify new areas of research needs improvement. Assistance in alternative instruction methods would be useful.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
CTW has given our program a systematic method for identifying successful and unsuccessful pedagogical practices. No changes have been made since last year's CTW report.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No changes have been yet. However, a curriculum committee has been formed to discuss student learning outcomes and assessment.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
No changes have been made to the educational degree program. The curriculum committee will convene to reflect on the existing student learning outcomes in the context of the curriculum.

Georgia State University
Assessment Data by Section
2012-2013 African American Studies MA
As of: 12/12/2016 05:58 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Goals

G 1: Theory and Application
At the master’s level, African American Studies contributes to the university’s broader mission of encouraging theoretical and applied inquiry by engaging in original research that examines ways in which ethnicity and racial identity affects historical, social, and cultural
experiences of African-descended people. In so doing we prepare our students to engage in culturally relevant scholarship that improves the life circumstances of African-descended people.

**Student Learning Outcomes/Objectives**

**SLO 2: Communication (G: 1) (M: 1)**

Students will be able to articulate verbally and writing emergent areas of research in the field of African American studies.

**Other Outcomes/Objectives**

**O/O 1: Analytic (G: 1) (M: 1)**

Students will be able to systematically analyze and critique empirical research.

**Measures, Targets, and Findings**

**M 1: Research Proposal (O: 1, 2)**

AAS 6010 Research Methods teaches first year graduate students how to critically analyze, synthesize, and deconstruct empirical literature to communicate the central tenets of a research problem/opportunity as it pertains to a social issue affecting the African American community. The Mock Review of the research proposal is the experience by which student learning outcomes are assessed for this course. Students’ research proposals are rated by two external reviewers. External reviewers are AAS faculty and/or researchers in a related discipline. Two external reviewer conduct a blind review of a single research proposal. Each reviewer critiques the proposal on its strengths and weaknesses in seven areas relevant to research methodology: The abstract, introduction, literature review, theory/concept, significance, methodology and human subjects. Each proposal also receives an overall impact rating. All ratings range of 1 to 9, where 1=exceptional and 9=poor (see Table 1). The goal of this assignment is to give students constructive feedback on the primary components of the research proposal and its merit in advancing the body of knowledge in the field of African American Studies. This output is related to the following course objectives and student learning outcomes: CO1, CO2, CO4 and SLO2, SLO3, SLO5. Students are assessed on their ability to communicate and analyze research concepts. These learning outcomes are linked to the following components of the proposal: Communication /Literature Review and Analytic /Theory and Concepts. Table 1. AAS 6010 Mock Review Rating Rubric

Source of Evidence: Presentation, either individual or group

**Target for O1: Analytic**

AAS 6010: 80% of the students will score 3 or better on the student learning outcomes.

**Findings 2012-2013 - Target: Partially Met**

Partially met: 77% of students were able to explain and appropriately apply a theory/concept to their proposed research, state its relevance to topic, and discuss potential contributions to African American Studies.

**Target for O2: Communication**

AAS 6010: 80% of the students will score 3 or better on the student learning outcomes

**Findings 2012-2013 - Target: Met**

Met: 88% of the students were able to summarize the germinal and seminal literature related to their research, identify major themes, discuss strengths and weaknesses, highlight gaps in the body of knowledge, and state a clear hypothesis.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Mock Review**

The instructor will establish an external Mock Review process to determine student final research proposals scores increase

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: External reviewers will be enlisted to review and assess graduate research proposals. Results will be given in a Mock Review setting.
Projected Completion Date: 12/2012
Responsible Person/Group: Instructor
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

**Revised Thesis Checklist**

Review committee to establish relevant competencies for multidisciplinary program.

Established in Cycle: 2011-2012
Implementation Status: Planned
Concept Paper (non-graded)
Action taken: A one-page concept paper (non-graded) has been added to the course to help students operationalize and integrate the theoretical tenets and methodological choices into their research proposal (see Research Proposal Concept Paper Guidelines). APPENDIX A: Research Proposal Concept Paper Guidelines Write a Concept Paper based upon a synthesis of the annotated bibliography assignment. The more descriptive information you provide to the questions below the better feedback you will receive in developing your proposal. For the concept paper, please limit the concept paper to 1 page. Research Purpose: Briefly, state the purpose of your study. Specific Aims: What are the specific aims of the research? What will you accomplish/know? Problem/Background: Explain why the literature leads you to think this topic needs study. Research Questions/Hypotheses: Derived from the background literature, what model will guide your hypotheses and what hypotheses will you test? Theory/Concept: What theory/concept will guide your hypotheses/ research question? Why is it most appropriate? Significance: What is the payoff to African American Studies? Study Design/Approach: What is the study design that will enable testing your hypotheses/ research question? Exploratory/ Descriptive/ Explanatory? Sample (N, age range, gender, race, inclusion/exclusion criteria), measures, procedures, etc. Analysis: What analytic approach will ensure a fair test based on your hypotheses/research question? What are the power considerations (e.g., expected sample size, power, expected effect sizes, etc.)? Human Subjects: What are the primary human subject issues or concerns?

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Students have shown improvement in their ability to critique empirical research. This outcome supports the communication student learning outcome from last year’s report.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Student’s have improved in their ability to identify major themes, discuss strengths and weaknesses in the body of knowledge and articulate a clear research hypothesis.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Areas of improvement in application of theoretical concepts in research and develop appropriate research plans. A one-page concept paper (non-graded) has been added to the course to help students operationalize and integrate the theoretical tenets and methodological choices into their research proposal (see Research Proposal Concept Paper Guidelines). No assistance needed.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
CTW has allowed our program to identify critical areas in student learning and create areas of support, both in and outside of the classroom. For example, we have added a Thesis Bootcamp as a annual activity to prepare students for the thesis production process.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No changes have been made to the assessment process.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
Several changes have been made to the program, as a result of the assessment findings. For example, the Mock Review assignment in AAS 6010 Research Methods uses AAS faculty as external reviewers to help students hone in on discipline specific objectives.

Georgia State University
Assessment Data by Section
2012-2013 Anthropology Assessment of Core
As of: 12/12/2016 05:58 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)
**Mission / Purpose**
The Anthropology Department participates in the general education core curriculum by offering its signature course, Anth 1102: Introduction to Anthropology. The course elucidates the comparative study of humanity across time and space by offering (1) a holistic understanding of human diversity that requires the study of biological, archaeological, social/cultural, and linguistic anthropology; (2) a cross-cultural and comparative study of humanity; and (3) a consideration of human problems within historical, environmental, political-economic, and sociocultural contexts. Students are given an overview of anthropological research strategies, theories, and practices. Topical foci include human evolution, primate behavior, human variation, prehistory and complex societies, global-local articulations, ideology and power, migrants, immigrants, and refugees in the world system, urban processes and populations, identity politics in multicultural societies, and social reform. The course is an option to satisfy Area E of the core curriculum because contemporary and past cultures and societies, and their precursors, are covered in global and local contexts.

**Goals**

**G 2: Application of anthropological perspectives on contemporary social phenomena**
Students should understand the applicability and application of the holistic, biocultural anthropological approach to complex phenomena and contemporary issues among human societies, with particular attention to human diversity.

**G 1: Biocultural evolution of humans**
Students are expected to understand the linkages between human biology and culture in an evolutionary framework. This is a core element of the anthropological perspective on humanity and a main orientation of the Department of Anthropology at GSU.

**Student Learning Outcomes/Objectives**

**SLO 1: Natural Selection (G: 1, 2) (M: 1)**
Students demonstrate understanding of the mechanism of natural selection in evolutionary change. This is significant in understanding human evolution and apprehending the role of adaptation in modern human variation, allowing students to critically engage with issues of human biology and their historical and social implications.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Institutional Priority Associations**

2 Student promotion and progression

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

5.4 Enhance the global competency of students, faculty and staff.

**SLO 2: Critique of the race concept (G: 1, 2) (M: 2)**
Students are able to critique the concept of race as a biological category, utilizing the multifaceted anthropological approach. Race is a major factor in a multitude of contemporary social problems. Through the application of the scientific method and both the natural and social history of humans and human variation, students problematize the race concept from a biological, historical and sociocultural perspective. This outcome is aligned with a number of institutional priorities including learning about the global and cultural reality of human variation, and positioning the self with respect to human cultural and biological diversity.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.1 Increase the level of scholarship support for undergraduate students.
5.4 Enhance the global competency of students, faculty and staff.

**Measures, Targets, and Findings**

**M 1: Natural selection inventory (O: 1)**
Students respond to a standardized inventory on natural selection. See attached document.

**Target for O1: Natural Selection**

**Findings 2012-2013 - Target: Met**

M 2: Identifying Major Elements of the Anthropological Critique of Race (O: 2)

Students respond to standardized examination questions on the anthropological critique of race, focusing on the non-biology of the concept and the relationship between race and ethnicity.

Source of Evidence: Standardized test of subject matter knowledge

Target for O2: Critique of the race concept

80% of the students correctly identify the non-biology of race, and demonstrate understanding of the cultural construction of race.

Targets: 0% unsatisfactory 80% satisfactory or superior

Findings 2012-2013 - Target: Met

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Streamlining Instruction, Evaluation and Mentorship

- The faculty will move forward in developing and implementing streamlined rubrics on the critique of the race concept from a biological and cultural standpoint.
- The faculty will continue discussion on whether to implement a similar strategy for the teaching of biocultural evolution in humans.
- The faculty will monitor student performance.
- The faculty will mentor and encourage students to complete related assignments.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Identifying Major Elements of the Anthropological Critique of Race | Outcome/Objective: Critique of the race concept

Implementation Description: We target the next assessment cycle
Project Completion Date: 09/2010

Integrating Instructional and Testing Tools

- The faculty will continue to develop an integrated approach to the teaching of the anthropological critique to race. This will include:
  1. Further collaborating on instructional techniques and tools and assessments.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Identifying Major Elements of the Anthropological Critique of Race | Outcome/Objective: Critique of the race concept

Instructional emphasis on cultural construction

While the target was barely missed on one question, the result indicates that both the critique of the race concept and the notion of cultural construction are both important and challenging, and should remain central foci of core instruction in anthropology. The faculty has discussed these results and jointly decided to emphasize this issue in the classroom.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Identifying Major Elements of the Anthropological Critique of Race | Outcome/Objective: Critique of the race concept

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Measures were revised, in accordance with review suggestions. In the next cycle, the department will maintain the focus on the anthropological critique of race, and consider another topical focus of foundational importance for assessment.

ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data reinforce current practices and emphasis on the biocultural approach.

Georgia State University
Assessment Data by Section
Mission / Purpose
The Bachelor of Arts in Anthropology focuses the comparative and holistic study of humanity across space and time. Undergraduate education in the Department of Anthropology is committed to: 1. A holistic and comparative understanding of human diversity derived from the anthropological 4-field approach. Students are exposed to biological, linguistic, cultural and archaeological anthropology, their intersections, and their application. 2. A solid grounding in anthropological theory and methodology, including both quantitative and qualitative components. 3. The combination of academic rigor with global social awareness, and community engagement and praxis. The Department fosters politically responsible and ethically sound applications of empirical knowledge that will serve undergraduate in professional fields, spanning medicine, education, environment, forensics, cultural resource management, business and economics.

Goals

G 1: Holistic and Comparative Curriculum
Upon graduation, students are grounded in four-field, holistic and comparative anthropology. This means that they demonstrate an understanding of the interconnections between biology and culture among humans in the past and present, and distinguish the social and historical processes involved in the intersections of biology, society and culture in human diversity.

G 2: Command and application of content: concepts, methods and theory
Students demonstrate command of key anthropological concepts, issues and perspectives, and apply critical anthropological theory as well as key research methods pertinent to the field.

G 3: Communication skills
Students communicate effectively and as appropriate to the field in speech and writing.

Student Learning Outcomes/Objectives

SLO 1: Competence in Fundamental Anthropological Methods (G: 1, 2, 3) (M: 1, 2)
Students apply key concepts and methods relevant to each anthropological subfield by conducting specialized methodological exercises. Under the premise that learning is best achieved through application, students identify, utilize and/or critique fundamental anthropological concepts, theory and methodology in cultural, biological, and archaeological anthropology, through conducting original research and/or critically evaluating current, peer-reviewed research in the field.

Institutional Priority Associations
1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 2: Content knowledge (G: 1, 2, 3) (M: 1, 3)
Students identify, apply and critique anthropological theory, methods and knowledge, appropriate to the subfield.

General Education/Core Curriculum Associations
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
2 Student promotion and progression
3 Timely graduation

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

SLO 3: Competence in oral and written communication (G: 2, 3) (M: 1, 2, 3)
Students interpret and produce competent and discipline-appropriate communication in speech and writing.
### Measures, Targets, and Findings

#### M 1: Archaeological Methods - Garbology project (O: 1, 2, 3)

Students apply fundamental archaeological concepts and methods by conducting a mini archaeological investigation of garbage. Students describe, classify and analyze material evidence, through which to reconstruct a profile of daily practice and its agents. Students report on their data collection and analysis culminates in a report in which they critically interpret the data to support or disprove their hypotheses. Evaluation is based on the quality of the content of the report (collection and analysis methods), the quality of the interpretation of findings (testing hypotheses through data), and the quality of writing in terms of organization and competent, academic English prose. See attached document for details.

Source of Evidence: Project, either individual or group

### M 2: Cultural Anthropology - Ethnographic Fieldwork Project (O: 1, 3)

Students in ANTH 2020 - Introduction to Cultural Anthropology formulate and conduct a short ethnographic project, in which they a. Demonstrate understanding of the concept of culture and its study b. Identify, design and conduct one instance of ethnographic data collection c. Produce an ethnographic narrative The work is holistically evaluated in terms of the following criteria. These axes are unequally weighted and are listed in order of decreasing significance. A. Topic: The student identifies an appropriate topic and formulates a research question, contextualizing it in the culture concept B. Methodology: The student correctly utilizes ethnographic methods C. Approach and Development: The student includes evidence through ethnographic detail and effectively addresses the initial topic or question D. Writing: The student writes in correct English prose. The narrative is clear, organized and grammatically correct. See attached document for details Ranking: 1. Unsatisfactory: major flaws in conception, execution and/or communication of project. Scores below 25 2. Fair: acceptable conception and execution of project, moderate stylistic problems in communication. Scores between 25 and 30 3. Good: competent conception and execution of project, minor style or mechanics problems in communication: Scores between 30 and 45 4. Excellent: superior conception and execution of project, fully competent communication. Scores between 45 and 50

### Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Standard Associations**

- 0 unsatisfactory submissions
- 80% score Good or Excellent, demonstrating ethnographic ability
- 80% score Good or Excellent, demonstrating competency in data collection and analysis
- 80% score Good or Excellent, demonstrating superior critical analysis and interpretation of material remains, to reconstruct lived experience
- All submissions show competency in communicating archaeological knowledge

**Ranking**: 1. Unsatisfactory: major flaws in conception, execution and/or communication of project. Scores below 30 2. Fair: acceptable conception and execution of project, moderate stylistic problems in communication. Scores between 30 and 40 3. Good: competent conception and execution of project, minor style or mechanics problems in communication: Scores between 40 and 45 4. Excellent: superior conception and execution of project, fully competent communication. Scores between 45 and 50 (max)
acceptable conception and execution of project, moderate stylistic problems in communication. Scores between 25 and 30. 3. Good: competent conception and execution of project, minor style or mechanics problems in communication. Scores between 30 and 35. 4. Excellent: superior conception and execution of project, fully competent communication. Scores between 35 and 37.5 (max) Target: 0 unsatisfactory submissions - 80% score Good or Excellent, demonstrating superior ability to construct an ethnographic narrative in proper English prose.

Findings 2012-2013 - Target: Met

n=25 Unsatisfactory: 0 Fair: 0 Good: 24 Scores ranged from 36 to 37.5 demonstrating ability to communicate in solid English prose, appropriate to the discipline.

M 3: Capstone Seminar Paper (O: 2, 3)
The Senor Seminar is the capstone course for the department of anthropology and is a CTW course. Assessment, therefore, is based on writing. The measure chosen to assess student learning is a reflective research assignment in which students draw on literature, synthesize, critically analyze and reflect on the nature of anthropological knowledge. Papers are evaluated according to a rubric which measures outcomes on a scale from 1 to 5: 1=poor, 2=fair, 3=good, 4=excellent, and 5=outstanding.

Source of Evidence: Written assignment(s), usually scored by a rubric.

Target for O2: Content knowledge
All students should score 3 and above, and 75% should receive a 4 or better Normal 0

Findings 2012-2013 - Target: Partially Met
1. Poor - 0 students 2. Fair - 7% 3. Good - 14% 4&5. Excellent/Outstanding - 79%

Target for O3: Competence in oral and written communication
The department CTW rubric outlines specific writing quality targets for its ratings of 1 (poor), 2 (fair), 3 (good), 4 (excellent), and 5 (outstanding). The target for writing quality is that all students will score 3 and above, and 75% of students will score 4 or better.

Findings 2012-2013 - Target: Partially Met
1. Poor - 0 students 2. Fair - 7% 3. Good - 14% 4&5. Excellent/Outstanding - 79%

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Clarify objectives through discussion and examples
Most students performance indicated that they successfully assimilated and applied the targeted concepts and methods. The two biggest challenges that require improvement however were a. to properly contextualize and formulate a research question out of the cultural topic students identified and b. to properly present data to support their conclusions. This will be addressed by a. explicitly discussing these issues in class and b. offering examples of proper use of evidence to support argumentation in an ethnographic context.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Cultural Anthropology - Ethnographic Fieldwork Project | Outcome/Objective: Content knowledge

Implementation Description: I will explicitly draw students' attention to these issues and use examples to illustrate the proper use of evidence to support argumentation in an ethnographic context.
Responsible Person/Group: Instructor
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Identifying intended audience
The instructor will focus on clarifying to the students the intended audience for each writing assignment.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Capstone Seminar Paper | Outcome/Objective: Competence in oral and written communication

Responsible Person/Group: Instructor
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)

Relating theory to empirical evidence
The instructor has identified and will adopt a new text for the purpose of helping students identify and relate anthropological concepts and theory to both contemporary academic work and their own daily life and experience.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Capstone Seminar Paper | Outcome/Objective: Content knowledge

Responsible Person/Group: Instructor
Additional Resources: n/a
Budget Amount Requested: $0.00 (no request)
**Writing assistance**
Students will be given access to the pamphlet-format grammar and style guide presenting the most common grammatical errors GSU students make. They will be encouraged to utilize the writing studio as well as to share drafts of their work with the instructor and/or the teaching assistant for review.

Established in Cycle: 2010-2011  
Implementation Status: Planned  
Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Cultural Anthropology - Ethnographic Fieldwork Project | Outcome/Objective: Competence in oral and written communication

Implementation Description: Students will be given access to the handout presenting the most common grammatical errors GSU students make. They will be encouraged to seek assistance over drafts of their work.

Responsible Person/Group: Instructor  
Additional Resources: n/a  
Budget Amount Requested: $0.00 (no request)

---

**Advisement**
The instructor will monitor performance and individually advise students to address specific areas of concern.

Established in Cycle: 2011-2012  
Implementation Status: Planned  
Priority: Low

---

**Monitoring and advisement**
Failure to fully meet the goal was a result of a student failing to turn in the exercise. Faculty will monitor and advise students closely.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Archaeological Methods - Garbology project | Outcome/Objective: Content knowledge

---

**Monitoring and modification**
The target for Excellent and Outstanding students was achieved, however 2% fell below the target ranking of 3 for all students. This is a very small percentage, and may be circumstantial, however the faculty will monitor and advise students closely in this cycle. The faculty is also considering modifications to the assignment to promote student success.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Capstone Seminar Paper | Outcome/Objective: Content knowledge

---

**Writing consultation**
The target for Excellent and Outstanding students was achieved, however 2% fell below the target ranking of 3 for all students. Students will be monitored and directed to writing and communication resources, including the writing center and writing consultants.

Established in Cycle: 2012-2013  
Implementation Status: Planned  
Priority: Low

Relationships (Measure | Outcome/Objective):
- Measure: Capstone Seminar Paper | Outcome/Objective: Competence in oral and written communication

---

### Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Measures and targets were refined in accordance to review suggestions. An integrated rubric was utilized for ANTH 2020, ANTH 2030 and ANTH 2010.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on
your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

A new course on linguistic anthropology will be added to the BA curriculum. Measures and outcomes will be constructed for the 2013-2014 cycle.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Anthropology MA**

As of: 12/12/2016 05:58 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The Department of Anthropology offers a Master of Arts in Anthropology. Graduate education in anthropology emphasizes research and teaching on urban contexts, processes, and populations. Students receive rigorous training in local, regional, and global transformations, quantitative and qualitative research methods, and theories of nature, society, and culture. In addition to intellectual maturity, students gain practical skills, including proposal writing, project development, field research, ethnography and ethnographic needs-assessments, community development, and program evaluation. Graduate students are trained in theories, methods, topics, and skills within the discipline and each of its sub-fields. They are encouraged to write a thesis based on independent empirical research, or in collaboration with faculty. Alternatively, students may complete a practicum, in a variety of contexts and human service organizations. Students who obtain a MA in anthropology pursue doctoral studies, or seek employment as professional anthropologists with museums, CRM firms, the CDC, and various NGOs.

---

**Goals**

**G 1: Content and Method Competency**

Students firmly ground their research in a broad and relevant body of anthropological knowledge in their field of study. They demonstrate competence in a) theory, b) field/area of study and c) appropriate methodologies.

**G 2: Contributing to Anthropological Knowledge and Practice**

Students produce original research in their specific subfield, demonstrating competence in the practice of anthropology.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Synthesizing knowledge (G: 1) (M: 1)**

Students collect, synthesize, analyze and effectively communicate a broad body of anthropological knowledge, theory and methodology framing their particular research interests.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 2: Producing Original Research (G: 1, 2) (M: 2)**

Students design, conduct, analyze and present original research in writing and orally. The work of design, data collection in the field, analysis and write-up is conducted in close interaction with the student's adviser and evaluated by the adviser, and members of the student's thesis committee, selected for their expertise in the relevant field of interest.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

---

**Measures, Targets, and Findings**

**M 1: MA comprehensive exam (O: 1)**

The graduate students are assessed individually by their committees, which consist of three regular university faculty members, two of whom must be Department faculty members. The comprehensive exam is tailored to each graduate student's interest and is written by the student's major advisor. The three questions include (1) the field of inquiry, (2) theory pertaining to the research, and (3) method to be employed in the research. The graduate students are asked to write 7-10 pages for each question, and to return the completed exam to each committee member within two weeks. The exam is then evaluated; the advisor, in consultation with the committee, rates the exam as a pass, contingent pass or fail. The Anthropology Graduate Program Director was consulted to obtain data on the number students who took the comprehensive exam. Data recorded included (1) the number of students who took the comprehensive exam, (2) the number of students who successfully passed the exam on the first attempt, (3) the number of students who encountered problems with passing the exam, and (4) the number of students who ultimately passed the comprehensive exam.

**Source of Evidence:** Writing exam to assure certain proficiency level

**Target for O1: Synthesizing knowledge**

Students in their third semester of graduate study at the Department of Anthropology will successfully synthesize, analyze and critically apply anthropological knowledge relevant to their graduate research through a comprehensive examination, which consists of a topical, a theoretical and a methodological segment. The comprehensive examination is evaluated by the faculty
In the 2012-2013 cycle, 12 third semester graduate students passed all three portions of their comprehensive examinations demonstrating a. Ability to synthesize and analyse theoretical approaches relevant to their research interests b. Command of anthropological research relevant to the area and topical concerns of their research c. Command of methodological issues, techniques, and ethics relevant to their research project. 11 students passed at the first attempt. 1 student was required to improve on a portion of the exam by rewriting, and successfully completed it on the second attempt.

M 2: MA thesis or practicum paper (O: 2)

In their theses and practicum papers, students demonstrate the ability to design and conduct original research, along with an in-depth understanding of the field of inquiry, theory and methods pertaining to the research, and proficiency in the writing conventions and formats of the discipline. Students' theses and practicum papers are evaluated by a committee consisting of three regular university faculty members, at least two of whom must be Department faculty members. Students must orally defend the thesis or practicum paper before their committee. The advisor, in consultation with the committee, rates the thesis or practicum paper as a pass, contingent pass or fail. Data recorded included (1) the number of students who wrote and defended a thesis or practicum paper, (2) the number of students who successfully passed the oral defense on the first attempt, (3) the number of students who encountered problems with passing the defense, and (4) the number of students who ultimately passed the defense and graduated.

Source of Evidence: Project, either individual or group

Target for O2: Producing Original Research

At graduation, all students will produce a satisfactory thesis, conduct revisions and successfully defend their thesis or practicum demonstrating competence in their subfield.

Findings 2012-2013 - Target: Met

In the 2012-2013 cycle, a total of 7 students reached their final semester in the program. All 7 successfully completed their research projects, and defended their thesis or practicum, completing the study program.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Improving comprehensive examination outcomes

Faculty, and particularly faculty advisers are discussing mechanisms to enhance student assessment throughout the course of study, in order to further student success. A newly created professionalization seminar course will serve as a hands-on, practical forum in which students will be introduced to, discuss and share experiences regarding the rationale, requirements and strategies of the comprehensive examination process in the first two semesters of study.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: MA comprehensive exam | Outcome/Objective: Synthesizing knowledge

Implementation Description: The department's new Professionalization seminar course will enhance student preparation for their comprehensive exams.
  Responsible Person/Group: faculty
  Additional Resources: no
  Budget Amount Requested: $0.00 (no request)

Refining learning outcome assessment of comprehensive exam

Anthropology is a highly diverse discipline, encompassing biology and culture in the past and present. This precludes a homogenous approach to learning outcomes assessment. While the format of the comprehensive exam is the same for all students, the nature of the questions and the particular foci they address are highly particular to the subdiscipline (biological, archaeological, cultural or linguistic anthropology), and to the research interests of each student. In order to render student learning assessment in more detail, therefore, the faculty will discuss other potential reporting options in this cycle.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Low

Relationships (Measure | Outcome/Objective):
  Measure: MA comprehensive exam | Outcome/Objective: Synthesizing knowledge

Refining learning outcome assessment of MA papers

Anthropology is a highly diverse discipline, encompassing biology and culture in the past and present. This precludes a homogenous approach to learning outcomes assessment as research and writeup varies considerably in both form and content for each subdiscipline (biological, archaeological, cultural or linguistic anthropology), and according to the research interests of each student. In order to render student learning assessment in more detail, therefore, the faculty will discuss other potential reporting options in this cycle.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Low

Relationships (Measure | Outcome/Objective):
  Measure: MA thesis or practicum paper | Outcome/Objective: Producing Original Research

While the format of the comprehensive exam is the same for all students, the nature of the examination process in the first two semesters of study.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
  Measure: MA comprehensive exam | Outcome/Objective: Synthesizing knowledge

Implementation Description: The department's new Professionalization seminar course will enhance student preparation for their comprehensive exams.
  Responsible Person/Group: faculty
  Additional Resources: no
  Budget Amount Requested: $0.00 (no request)
Georgia State University

Assessment Data by Section

2012-2013 Applied Linguistics BA

As of: 12/12/2016 05:58 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

Normal 0 false false false EN-US X-NONE X-NONE The B.A. in Applied Linguistics provides a thorough grounding in the study of language structure, use, and acquisition to prepare students for a variety of options for employment or further study in fields in which the scientific study of language is significant, e.g: language teaching (including English as a second/foreign language), anthropology, speech and hearing science, psychology, cognitive science, lexicography, and text and discourse analysis.

Student Learning Outcomes/Objectives

SLO 1: Core Areas of Linguistics (M: 1)
Students demonstrate understanding of the core areas within linguistic study: phonetics, phonology, morphology, syntax, and semantics.

SLO 2: Awareness of Bias (M: 2)
Students demonstrate awareness that different theoretical and cultural perspectives, their own included, are value-laden and prejudicial.

SLO 3: Analysis of Linguistic Structure (M: 3, 4)
Students acquire the skills to analyze language and/or interlanguage structures (e.g., sound structure, word structure, sentence structure, and discourse structure).

SLO 4: Reporting on Primary Research (M: 5)
Students demonstrate competency in making credible claims about data they have collected and analyzed themselves.

SLO 5: Written Communication and Editing Skills (M: 6)
Students develop effective written communication and editing skills.

Measures, Targets, and Findings

M 1: Final examinations in foundational course, AL 3021 Introduction to Linguistics (O: 1)
The final examination in AL 3021 is comprehensive and assesses student understanding of core areas of linguistics through analyzing language data and answering open-ended or selected response questions.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target for O1: Core Areas of Linguistics
80% of students will exhibit mastery of the core areas of linguistic study by achieving a passing score of at least 70% on the final exam in AL 3021.

Findings 2012-2013 - Target: Not Met
Our data for this measure is incomplete, as we are missing data from one section of the relevant course (AL 3021) taught by a GTA in this cycle. However, based on the data that we do have, on 76.4% of the students in Introduction to Linguistics performed well enough on the final examination to exhibit mastery of core areas of linguistic study. The target for this measure was not met, and this objective is addressed in an action plan for this cycle.

M 2: Final Papers in AL 3031 Language in Society and AL 4151 Communication across Cultures (O: 2)
Findings 2012-2013 - Target: Met
Throughout the year, across the various sections offered of AL 3031 Language in Society, 91% of students were judged "competent" or "sophisticated" on their final papers in the area of "Identifies values and assumptions that underlie different perspectives", and 95.7% met the target for "Shows awareness of prejudicial aspects of the problem". In AL 4151 Communication across Cultures, 90.6% of all students scored at least competent on both "Demonstrates an honest awareness of one's feelings/thoughts about cultural difference" and "Shows awareness that oneself is a cultural being". The target was met across all criteria in this measure.

M 3: Performance on language analysis problems (O: 3)
The final examinations in AL 4011 Phonetics & Phonology and AL 4012 Morphology & Syntax consist primarily of language analysis problems. The number of students demonstrating competency in linguistic analysis on these examinations will be tabulated.

Target for O3: Analysis of Linguistic Structure
80% of students will demonstrate competence in linguistic analysis by scoring at least 70% on the final examinations in AL 4011 and AL 4012.

Findings 2012-2013 - Target: Partially Met
In AL 4012 Morphology & Syntax, 80% of students met the target for this measure by demonstrating competence in linguistic analysis on their final exams. In AL 4011 Phonetics & Phonology, however, only 22 out of 30 students, or 73%, scored above a 70 on the final. This target has been partially met, and the correlating objective will be addressed in an action plan for this cycle.

M 4: Performance on language analysis papers (O: 3)
In AL 3041 Second Language Acquisition, students write papers critically examining the characteristics of written or oral language samples produced by non-native speakers (i.e., interlanguage). The number of students successfully completing competent interlanguage analysis papers will be tabulated.

Target for O3: Analysis of Linguistic Structure
80% of students will demonstrate competence in linguistic analysis by scoring at least 70% on interlanguage papers in AL 3041.

Findings 2012-2013 - Target: Met
Across all sections of AL 3041 Second Language Acquisition during this cycle, 92% of students scored 70% or higher on a written assignment demonstrating linguistic analysis skills. Note that students who did not turn in a paper and received a zero on the assignment are not included in this calculation. However, if they were, the target would still be met with more than 80% of students demonstrating competence.

M 5: Final Papers in CTW Courses (O: 4)
The final papers in CTW courses (e.g., AL 3031 Language in Society, AL 4151 Communication across Cultures, and AL 4241 Senior Seminar in Applied Linguistics) are graded on a 4 point rubric that includes the following categories: (C) demonstrates an honest awareness of one's feelings/thoughts about cultural difference; (B) shows awareness of oneself as a cultural being. The percentage of students scoring at least "competent" on these areas on the final CTW papers in these course will be tabulated.

Target for O4: Reporting on Primary Research
On final papers in CTW courses, at least 80% of students will be judged "competent" or "sophisticated" on all relevant criteria on the rubric.

Findings 2012-2013 - Target: Met
For the rubric item "Presents convincing arguments based on data", 85.1% of students in all AL 3031 classes scored either "competent" or "sophisticated", and 90.6% of AL 4151 students scored at least competent. For the rubric item "Draws reasonable conclusions", 89.4% of students in AL 3031 and 90.6% of AL 4151 students demonstrated competency. This target was met across all criteria.

M 6: Writing assignments in CTW courses (O: 5)
The final papers in CTW courses (e.g., AL 3031 Language in Society, AL 4151 Communication across Cultures, and AL 4241 Senior Seminar in Applied Linguistics) are rated on a 4 point rubric in five areas, including (E) presents ideas clearly and in a well-organized fashion. The number of students who score "competent" or "sophisticated" in this area on the final papers for these courses will be tabulated.

Target for O5: Written Communication and Editing Skills
On final papers in CTW courses, at least 80% of students will be judged "competent" or "sophisticated" on all relevant criteria on the rubric.
80% of students will be judged as competent or sophisticated in the area of "presents ideas clearly and in a well-organized fashion" on CTW final papers.

**Findings 2012-2013 - Target: Met**

In AL 3031 Language in Society, 41 out of 47, or 87.2% of students across all sections, demonstrated competency on the rubric item "Presents ideas clearly and in a well-organized fashion". In AL 4151 Communication across Cultures, 30 out of 32, or 93.8% of students across all sections, earned ratings of either "competent" or "sophisticated" on their final papers in this area. This target was met across all criteria.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Increasing research-related activities in courses**

It is not clear from our assessment that students are gaining sufficient experience in reading published applied linguistics research and carrying out their own research. The undergraduate committee will investigate options for increasing such opportunities within courses and/or within the department in general.

- **Established in Cycle:** 2007-2008
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** With primary research now required in all AL CTW courses, the second aspect of this action plan has been implemented. With regard to exposure to published research, syllabi for all required AL major courses will be solicited and examined for incorporation of foundational and current publications in course readings. Findings will be reported in the next cycle.
- **Responsible Person/Group:** Kris Acheson-Clair

**CTW course student retention**

The number of students who fail to complete CTW courses is lowering the percentage of students judged competent on final papers because the students who stop coming to class and do not turn in final writing assignments are automatically judged less than competent. CTW courses are reading and writing intensive, and as such it is not surprising that the withdrawal rate is higher than other courses. The problem lies with students who do not withdraw by mid-semester but still fail to complete the course. A plan will be made by CTW course instructors during this cycle to decrease the failure rate of CTW courses.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Responsible Person/Group:** Kris Acheson-Clair

**Add an AL course to the Core**

The department of Applied Linguistics does not currently have a lower level course that counts in areas A-E of the university core curriculum, despite the applicability of several of our introductory courses to these areas. Our goal is to propose to the faculty senate the addition of AL 2102 Languages of the World or another of our 2000 level courses to the university core, in order to better serve the undergraduate student body (by offering a variety of electives to meet core requirements) and to recruit more students to study languages and Applied Linguistics (in support of the Strategic Initiative to globalize the university and our department goal of an increased local footprint).

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Responsible Person/Group:** Kris Acheson-Clair

**Scaffolding for Linguistic Analysis Courses**

Over the past few years, our faculty has noticed an increasing level of unpreparedness in our linguistic analysis courses, starting with the first AL 3021 Introduction to Linguistics and progressing through AL 4011 Phonetics & Phonology and AL 4012 Morphology & Syntax. Some years, the targets for measures related to Objective 1: Knowledge of Core Areas of Linguistics and Objective 3: Analysis of Linguistic Structure are barely met. During the 2012-2013 cycle, Measure 1 (Objective 1) was Not Met and Measure 3 (Objective 3) was Partially Met. To address this issue, faculty decided this year to add a prerequisite to AL 3021 Introduction to Linguistics in order to provide much needed background knowledge that some students are missing in this course. In this way, scaffolding can be provided for the students, with information and skills can be introduced in the new sophomore level course AL 2021 Introduction to English Linguistics, reinforced in the junior level AL 3021 Introduction to Linguistics, and further developed in the senior level courses AL 4011 and 4012. Students should be more successful in the later courses as a result of this scaffolding, and the Measures 1 and 3 should reflect this improvement over the next couple of cycles.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** The curriculum for the new AL 2021 Introduction to English Linguistics course has been developed and will be implemented for the first time in the fall of 2013. An exemption exam has also been developed so that more competent or knowledgeable students may skip AL 3021 and move straight into AL 3021. 
- **Responsible Person/Group:** Kris Acheson-Clair

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Last year our faculty made quite a few revisions to the assessment process, including new and updated learning outcomes that align better with our undergraduate curriculum and related measures with more validity. No new changes were made this year, as we are waiting to see the results of the recent changes before making additional revisions.
**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on unsatisfactory achievement on Student Learning Outcome #1, on Core Areas of Linguistics across the past four years (with the target met on the measure for this outcome only one out of the four years), the faculty decided to restructure the curriculum in several major courses to provide more scaffolding and allow students time to gradually build knowledge and skills over multiple semesters. Previously, with little or no preparation, students began their area G coursework with a junior level course called AL 3021 Intro to Linguistics. This course had no prerequisites, and many students struggled to master the highly technical content of the curriculum. Beginning in the next cycle (2013-2014), there is a new sophomore level prerequisite to prepare students for AL 3021, as well as an exemption exam to allow students with sufficient background knowledge to waive the new required class and move straight into AL 3021. We hope that better preparing students to study the core areas of linguistics by providing a basic introduction in a lower level course will increase success on the associated student learning outcome and allow the target to be met for this measure in the future. Now, students who already have the necessary groundwork will not be held back by students lacking background knowledge in AL 3021, and many students who would have failed AL 3021 will be supported with additional training before entering this "gateway" course. Farther down the road, as students take upper level analysis courses like AL 4011 Phonetics & Phonology and AL 4012 Morphology & Syntax, this new scaffolding system should continue to positively affect student performance on Student Learning Outcome #1.

---

**2012-2013 Applied Linguistics MA**

Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.

<table>
<thead>
<tr>
<th>Mission / Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Master's degree in Applied Linguistics integrates the study of linguistic theory with practical applications and focuses on the language acquisition needs of the adult or near-adult learner of an additional language. Students receive the theoretical and practical foundational knowledge needed to teach language at the postsecondary level and progress to doctoral work in applied linguistics or other language-study or language-teaching related areas.</td>
</tr>
</tbody>
</table>

**Goals**

**G 1: Students become effective teachers of adult language learners.**

Students will become effective teachers of adult language learners, informed by relevant linguistic theory and knowledge of current conceptions of best classroom practices.

**G 2: Students become critical consumers of linguistic and pedagogical theory and research.**

Students will have the foundational knowledge of linguistic and pedagogical theory and research needed to critically assess their value and usefulness for the students' own professional growth as applied linguists in language learning settings.

**Student Learning Outcomes/Objectives**

**Measures, Targets, and Findings**
M 1: Oral presentation of Master's paper (O: 4, 5)
During their final semester, students make a formal oral presentation of their Master's paper. Two faculty members rate the paper for clarity, organization, effective use of visual aids, and overall presentation.
Source of Evidence: Presentation, either individual or group
Target for O4: Technology
90% of students will score "good" or "excellent" on their use of technology in presentations.

Findings 2012-2013 - Target: Met
95% of students scored good or excellent on their use of technology in presentations.

Target for O5: Communication
90% of students will score "good" or "excellent" on the overall scores for their presentations.

Findings 2012-2013 - Target: Met
91% of the students scored good or excellent on the overall scores for their presentations.

M 2: Teaching performance and videotapes (O: 2, 5)
Students are videotaped teaching a lesson to their peers in AL 8900: Practicum, a required course in the program. The instructor rates the students on a rubric evaluating teaching effectiveness (outcome 1) and oral communication (outcome 5).
Source of Evidence: Performance (recital, exhibit, science project)
Target for O2: Teaching methodology
90% of students will meet or exceed expectations for their videotaped teaching performance.

Findings 2012-2013 - Target: Met
100% of students met or exceeded expectations for their videotaped teaching performance.

Target for O5: Communication
90% of students will meet or exceed expectations for their videotaped teaching performance.

Findings 2012-2013 - Target: Met
100% of students met or exceeded expectations for their videotaped teaching performance.

M 3: Survey of graduating students (O: 1, 2, 3, 4, 5, 6, 7)
Students who graduated between Summer 2008 and Spring 2009 were asked to complete a web-based survey investigating their perceptions of how confident they feel about the areas covered in the learning outcomes.
Source of Evidence: Alumni survey or tracking of alumni achievements
Target for O1: Knowledge of linguistic systems of English
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome "knowledge of linguistic systems of English".

Findings 2012-2013 - Target: Met
100% of students reported confidence levels of 4 or 5 on knowledge of linguistic systems of English.

Target for O2: Teaching methodology
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome "teaching methodology".

Findings 2012-2013 - Target: Met
100% of students reported confidence levels of 4 or 5 on teaching methodology.

Target for O3: Professional development
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome "professional development".

Findings 2012-2013 - Target: Partially Met
86% of students reported confidence levels of 4 or 5 on professional development.

Target for O4: Technology
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome "technology".

Findings 2012-2013 - Target: Met
100% of students reported confidence levels of 4 or 5 on technology.

Target for O5: Communication
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome “communication”.

**Findings 2012-2013 - Target: Met**
100% of students reported confidence levels of 4 or 5 on communication.

**Target for O6: Connecting theory and practice**
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome “connecting theory and practice”.

**Findings 2012-2013 - Target: Partially Met**
86% of students reported confidence levels of 4 or 5 on connecting theory and practice.

**Target for O7: Cultural knowledge**
90% of graduating students will report confidence levels of 4 or 5 on a 5-point scale, five being highest for the outcome “cultural knowledge”.

**Findings 2012-2013 - Target: Met**
100% of students reported confidence levels of 4 or 5 on cultural knowledge.

**M 4: Master’s papers (O: 5, 6)**
Two faculty members evaluate each graduating student's master’s papers in four areas: (a) connecting theory with practice; (b) scholarship; (c) writing; (d) appropriate formatting/referencing.

Source of Evidence: Senior thesis or culminating major project

**Target for O5: Communication**
90% of students will be rated “excellent” or “good” in writing and formatting/referencing (Outcome 5).

**Findings 2012-2013 - Target: Met**
96% of students were rated excellent or good in writing and formatting/referencing.

**Target for O6: Connecting theory and practice**
90% of students will be rated “excellent” or “good” in connecting theory to practice and scholarship (Outcome 4).

**Findings 2012-2013 - Target: Met**
91% of students were rated excellent or good in connecting theory to practice and scholarship.

**M 5: Classroom-based experience forms and reflections (O: 2, 6)**
Students are required to complete 90 hours of classroom-based experience (CBE) during their program. Advisors certify that their advisees have completed this requirement by submitting two documents each semester: a form signed by the student’s supervisor certifying that the CBE has been completed, and a reflective essay in which the student draws connections between the CBE and what has been learned in coursework.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O2: Teaching methodology**
100% of students will complete this requirement.

**Findings 2012-2013 - Target: Met**
100% of students completed this requirement.

**Target for O6: Connecting theory and practice**
100% of students will complete this requirement.

**Findings 2012-2013 - Target: Met**
100% of students completed this requirement.

**M 6: Professional development activities (O: 3)**
Students are required to participate in two professional development (PD) activities each semester they are in the program. They document this experience by submitting a reflective essay about each PD activity to their advisor.

Source of Evidence: Academic indirect indicator of learning - other

**Target for O3: Professional development**
100% of students will complete the PD requirement.

**Findings 2012-2013 - Target: Met**
100% of students completed this requirement.
## Connecting theory and practice: Confidence level

MA advisors will encourage students to reflect on and explicitly discuss in their MA portfolio reflective overview how they have learned to link theory and practice. The MA Committee will begin looking at three-year trends rather than just the limited survey responses obtained in any single year to determine how well the program is helping students make theory/practice connections.

- **Established in Cycle:** 2009-2010  
- **Implementation Status:** In-Progress  
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Survey of graduating students | Outcome/Objective: Connecting theory and practice

**Implementation Description:** MA advisors and MA Paper readers will oversee and support students’ written discussions of connections between theory and practice. The MA Committee will analyze relevant survey responses over a three-year span.

**Projected Completion Date:** 04/2011  
**Responsible Person/Group:** MA advisors

## Professional development: Presentations and publications

Graduate faculty will encourage and offer more scaffolding, in the form of workshops, for conference participation. "Conference participation" itself will be re-conceptualized by the graduate faculty to be more inclusive of a number of relevant professional activities, such as training sessions for fellow teachers, that graduate students may engage in as novice professionals.

- **Established in Cycle:** 2009-2010  
- **Implementation Status:** Finished  
- **Priority:** High

**Implementation Description:** Graduate faculty will offer workshops for MA students. The "conference participation" measure will be reconceptualized and rephrased.

**Projected Completion Date:** 04/2011  
**Responsible Person/Group:** Department graduate faculty

## MA paper scholarship and theory/practice connections enhancement

The two faculty readers of each MA paper will be urged to give feedback specifically on scholarship and theory and practice connections on an early draft of the MA paper and work more closely with students who have difficulty in these areas. Additional drafts will be required if the student continues to struggle in these areas.

- **Established in Cycle:** 2010-2011  
- **Implementation Status:** Finished  
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Master’s papers | Outcome/Objective: Connecting theory and practice

**Implementation Description:** The Director of Graduate Studies will send queries to graduate faculty each semester regarding the status of in-progress MA papers and will meet with faculty who wish to discuss further intervention needed for individual students.

**Responsible Person/Group:** Director of Graduate Studies

## Theory and practice reflection component will be added to MA portfolio.

An explicit discussion of theory and practice connections will be added to the reflective overview in the MA portfolio.

- **Established in Cycle:** 2011-2012  
- **Implementation Status:** Finished  
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Survey of graduating students | Outcome/Objective: Connecting theory and practice

**Implementation Description:** MA advisors will oversee completion of the theory and practice connections reflection component in the reflective overview included in the MA portfolio.

**Responsible Person/Group:** MA advisors

## Classroom-based experience

The completion “classroom-based experience forms and reflections” measure will be replaced by a classroom-based experience supervisor evaluation. Using a rubric, teaching supervisors will observe and evaluate classroom performance.

- **Established in Cycle:** 2012-2013  
- **Implementation Status:** Planned  
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Classroom-based experience forms and reflections | Outcome/Objective: Teaching methodology

**Implementation Description:** A rubric has been created and distributed to current students, who will request classroom observation/evaluations from their teaching supervisors.

## Classroom-based experience

The completion “classroom-based experience forms and reflections” measure will be replaced by a classroom-based experience supervisor evaluation. Using a rubric, teaching supervisors will observe and evaluate classroom performance.

- **Established in Cycle:** 2012-2013  
- **Implementation Status:** Planned  
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**  
Measure: Classroom-based experience forms and reflections | Outcome/Objective: Connecting theory and practice

**Implementation Description:** A rubric has been created and distributed to current students, who will request classroom observation/evaluations from their teaching supervisors.
Connecting theory and practice: Confidence level

All efforts to encourage connections between theory and practice appear to have not been quite successful enough in heightening confidence in making such connections. The MA Committee is planning to add a teaching philosophy statement to the MA portfolio as a required component. Students will be asked to explicitly state how theory informs their language teaching philosophy.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Survey of graduating students | Outcome/Objective: Connecting theory and practice

Professional development activities

This completion measure will be replaced by an evaluation of student professional development reflections. The eight professional development activity reflections that students write will be holistically evaluated by MA advisors using a rubric to rate ability to connect engagement in professional activities with current or future professional practice.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Professional development activities | Outcome/Objective: Professional development

Professional development confidence

Workshops are planned on professional development topics such as writing up research, giving poster presentations, and writing conference proposals.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Survey of graduating students | Outcome/Objective: Professional development

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have decided to eliminate two measures: number of presentations/publications and syllabi, both of which tell us little about what students actually learn. We have also decided that this most recent completed cycle, 2012-2013, will be the last for which we report “completion” data, percentage of students who completed their classroom-based experience and professional activity requirements. For the next cycle, students will need to obtain teaching supervisor evaluations of their classroom performance as teachers. Professional activity reflections will be rated by MA advisors, who will assess students’ ability to articulate how their engagement in particular professional activities helps them develop as applied linguists.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The capstone project for the MA degree, an MA portfolio, will now include a teaching philosophy statement, in which students will be expected to connect linguistic and other relevant theory to their evolving notions of the type of teacher they hope to be. Our teaching practicum course, a core course in the program, will offer guidance in the development of teaching philosophy statements.

Georgia State University
Assessment Data by Section
2012-2013 Applied Linguistics PhD
As of 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

The Department of Applied Linguistics and English as a Second Language at Georgia State University, one of the few departments of its kind in the United States, offers a PhD in applied linguistics to prepare students to conduct research on adult language learning and teaching and to function as graduate-level educators in programs training language education professionals. Students in the program have an opportunity to work with graduate faculty who specialize in various areas of applied linguistics. The faculty are committed to teaching and research productivity, and are especially interested in mentoring and collaborating with novice members of the profession.

Student Learning Outcomes/Objectives

SLO 1: Theory and content knowledge (M: 1, 2, 4)
Graduates of the program will have expertise with major concepts, theoretical perspectives, empirical findings, and historical trends in the field of Applied Linguistics and their research specialty area.

**SLO 2: Research methodology competence (M: 1, 2, 4)**

Graduates will understand and apply methods that are appropriate to different kinds of research in applied linguistics, including research design, data collection, data analysis, and interpretation.

**SLO 3: Communication skills (M: 1, 2, 4)**

Graduates will communicate effectively in speech and writing.

**SLO 4: Career planning and development (M: 1, 3, 4)**

Graduates will have relevant experience, documented success in disseminating their research, and plans for their career paths.

**SLO 5: Teaching expertise (M: 5)**

Graduates will be experienced teachers who demonstrate pedagogical and content knowledge for teaching a variety of courses.

### Measures, Targets, and Findings

<tbody>
<tr>
<td><strong>M 1: Qualifying exams (O: 1, 2, 3, 4)</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| The purpose of the Qualifying Exam is for the PhD student to demonstrate theory and content knowledge, research and methodology competence, and communication skills, as well as to develop a plan of study. It consists of a Qualifying Paper and a meeting with a faculty committee (the 'exam' proper). The Qualifying Paper is an empirical paper that is completed in a course during their first year in the program. The goals of the meeting with the faculty are to discuss the paper and to advise the student on a plan for the rest of their program.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Theory and content knowledge**

Students’ Qualifying Exams are evaluated using a rubric. Theory and content knowledge as demonstrated in the Paper is rated as "Does not meet expectations" (The paper suggests an incomplete understanding of the literature assigned for the course for which the paper was written; it may have frequent lapses and/or substantial gaps in coverage), "Meets expectations" (The paper demonstrates a solid understanding of the literature assigned for the course for which the paper was written, but may not go substantially beyond that literature), or "Exceeds expectations" (The paper demonstrates an excellent understanding of the relevant literature and goes beyond the readings for the course for which the paper was written). At least 90% of students will score "Meets expectations or "Exceed expectations" for theory and content knowledge.

**Findings 2012-2013 - Target: Met**

100% of students (2 total) scored "exceeds expectations" for theory and content knowledge.

**Target for O2: Research methodology competence**

Students’ Qualifying Exams are evaluated using a rubric. Research methodology competence as demonstrated in the Paper is rated as "Does not meet expectations" (The methodology is not clearly explained or is inappropriate with respect to the research question(s), or the paper lacks a clear research question), "Meets expectations" (The study addresses a clear research question using appropriate methodology, which is explained clearly in the paper), or "Exceeds expectations" (In addition to the criteria for meeting expectations, the paper demonstrates awareness of alternative methodologies for investigating related questions). At least 90% of students will score "Meets expectations or "Exceed expectations" for methodology competence.

**Findings 2012-2013 - Target: Met**

100% of students (2 total) scored "meets expectations" for research methodology competence.

**Target for O3: Communication skills**

Students’ Qualifying Exams are evaluated using a rubric. Written communication skills are evaluated in the Paper and speaking communication skills are evaluated in the Exam proper. Written communication skills as evaluated in the Paper are rated as "Does not meet expectations" (The paper has problems with clarity and/or organization), "Meets expectations" (The paper is generally well written and organized), or "Exceeds expectations" (The paper is well written and organized; in terms of writing it could be publishable with revisions). Speaking communication skills are evaluated in the Exam as "Does not meet expectations" (The student has difficulty answering questions about their research or their future), "Meets expectations" (The student responds to questions convincingly and appears to be prepared to answer challenging questions). At least 90% of students will score at least "Meets expectations" for both the written and speaking components of their Qualifying Exam.

**Findings 2012-2013 - Target: Met**

100% of students (2 total) scored at least "meets expectations" for both the written and speaking components of their Qualifying Exam. (One student scored "exceeds expectations" on the written component and the other did on the spoken component.)

**Target for O4: Career planning and development**

Students’ Qualifying Exams are evaluated using a rubric. Career planning and development as demonstrated in the Exam is rated as "Does not meet expectations" (The student has unrealistic or poorly thought out plans for the future), "Meets expectations" (The student has generally feasible short-term (during the PhD program) and long-term career plans), or "Exceeds expectations" (The student has well-articulated, specific short-term and long-term career plans). At least 90% of students will score "Meets expectations or "Exceed expectations" for career planning and development.

**Findings 2012-2013 - Target: Met**

100% of students (2 total) scored at least "meets expectations" for career planning and development.
### Findings 2012-2013 - Target: Met

100% of students (2 total) scored "meets expectations" for career planning and development.

### M 2: Comprehensive examinations (O: 1, 2, 3)

The Comprehensive Exam (CE) consists of three examination questions, which the student has three weeks to answer. The questions require the student to address issues in theory, research methodology, research topics of importance in the field, and/or topics related to the student's intended dissertation research. At least one of the topics requires consideration of issues that overlap the boundaries between language, cognition and communication and language teaching and language teacher development.

**Source of Evidence: Comprehensive/end-of-program subject matter exam**

#### Target for O1: Theory and content knowledge

Students' answers to each of the three questions of the comprehensive exam are evaluated using a rubric. Theory and content knowledge for each question is rated as "Does not meet expectations" (The paper suggests an incomplete understanding of the literature; it may have frequent lapses and/ or substantial gaps in coverage), "Meets expectations" (The paper demonstrates a solid understanding of the relevant literature, but may have minor lapses or minor gaps in breadth or depth of coverage), or "Exceeds expectations" (The paper demonstrates an exceptional understanding of the relevant literature and addresses all parts of the question in depth). At least 90% of students will score "Meets expectations or "Exceed expectations" for theory and content knowledge on all questions of their comprehensive exam.

**Findings 2012-2013 - Target: Met**

100% of students achieved a score of at least "Meets expectations" for theory and content knowledge on all questions of their comprehensive exam.

#### Target for O2: Research methodology competence

Students' answers to each of the three questions of the comprehensive exam are evaluated using a rubric. Research methodology competence for each question is rated as "Does not meet expectations" (The paper demonstrates insufficient understanding of research methodology, suggesting that the student is not ready to conduct research without substantial guidance), "Meets expectations" (The paper demonstrates sufficient understanding of research methodology, suggesting readiness to conduct research with guidance), or "Exceeds expectations" (The paper demonstrates thorough understanding of research methodology as appropriate to the task, suggesting readiness for independent research). At least 90% of students will score "Meets expectations or "Exceed expectations" for research methodology competence on all questions of their comprehensive exam.

**Findings 2012-2013 - Target: Met**

100% of students achieved a score of at least "Meets expectations" for research methodology competence on all questions of their comprehensive exam.

#### Target for O3: Communication skills

Students' answers to each of the three questions of the comprehensive exam are evaluated using a rubric. Communication skills for each question is rated as "Does not meet expectations" (The paper demonstrates a level of writing that is not yet publishable), "Meets expectations" (The paper is well written and organized; in terms of writing it could be publishable with revisions), or "Exceeds expectations" (The paper demonstrates a level of writing that would be ready or nearly ready to send to a journal). At least 90% of students will score "Meets expectations or "Exceed expectations" for communication skills on all questions of their comprehensive exam.

**Findings 2012-2013 - Target: Met**

100% of students achieved a score of at least "Meets expectations" for communication skills on all questions of their comprehensive exam.

### M 3: Conference presentations (O: 4)

Graduate students are expected to begin presenting regularly at conferences.

**Source of Evidence: Academic indirect indicator of learning - other**

#### Target for O4: Career planning and development

In the past year, at least 75% of graduate students beyond their second year will have presented at least one paper at a conference.

**Findings 2012-2013 - Target: Met**

88% of graduate students beyond their second year presented at least one paper at a conference, with nearly all of those presenting multiple papers (76% of all graduate students beyond their second year presented two or more papers).

### M 4: Publications (O: 1, 2, 3, 4)

Graduating students are expected to have published at least one scholarly paper.

**Source of Evidence: Academic indirect indicator of learning - other**

#### Target for O1: Theory and content knowledge

By graduation, at least 80% of students will have a refereed scholarly paper either published or accepted for publication.

**Findings 2012-2013 - Target: Not Met**

33% of the students (i.e., one of the three) who graduated during the year had a published or in-press refereed scholarly paper; the one student had published multiple papers.
Target for O2: Research methodology competence
By graduation, at least 80% of students will have a refereed scholarly paper either published or accepted for publication.

Findings 2012-2013 - Target: Not Met
33% of the students (i.e., one of the three) who graduated during the year had a published or in-press refereed scholarly paper; the one student had published multiple papers.

Target for O3: Communication skills
By graduation, at least 80% of students will have a refereed scholarly paper either published or accepted for publication.

Findings 2012-2013 - Target: Not Met
33% of the students (i.e., one of the three) who graduated during the year had a published or in-press refereed scholarly paper; the one student had published multiple papers.

Target for O4: Career planning and development
By graduation, at least 80% of students will have a refereed scholarly paper either published or accepted for publication.

Findings 2012-2013 - Target: Not Met
33% of the students (i.e., one of the three) who graduated during the year had a published or in-press refereed scholarly paper; the one student had published multiple papers.

M 5: Teaching experience (O: 5)
Students will graduate with substantial teaching experience in the Intensive English Program and in undergraduate courses in Applied Linguistics.

Source of Evidence: Academic indirect indicator of learning - other

Target for O5: Teaching expertise
100% of students will teach at least 4 semesters at GSU. 90% of students will teach at least one undergraduate course.

Findings 2012-2013 - Target: Met
100% of students who graduated had taught at least 4 semesters at GSU; 100% had taught at least one course in the undergraduate program.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

revisiting/revamping PhD assessment
mission outcomes goals
- Established in Cycle: 2008-2009
- Implementation Status: In-Progress
- Priority: High

add teaching expertise measure(s)
We will explore the possibility of adding a more direct measure of teaching expertise, such as teaching evaluations.
- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High

change teaching target
Since some students have funding through fellowships or assistantships outside the department, it may not be practical for all (or nearly all) graduate students to teach two courses in our undergraduate program. Therefore we are changing the target to 100% of students will have taught 4 semesters and 90% will have taught at least one course in our undergraduate program.
- Established in Cycle: 2011-2012
- Implementation Status: Finished
- Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Teaching experience | Outcome/Objective: Teaching expertise

develop dissertation assessment rubric
In order to have more assessment of students exiting the program, we will develop a rubric to assess the dissertation according to our desired outcomes and add the dissertation as an additional measure.
- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High

monitor & increase student publication opportunities
The new system for monitoring student progress includes information about publications, allowing the PhD committee chair and PhD advisors to see which students have not published any papers. This will be used to encourage faculty to mentor students in publishing and possibly to co-author with them.
- Established in Cycle: 2011-2012
revise QP measure to reflect new program requirement
The Qualifying Paper is now a Qualifying Exam (which includes a Qualifying Paper). We will change the measure and add a rubric to assess the Qualifying Exam to more directly measure learning outcomes.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have changed one of our measures from a qualifying paper to a qualifying exam to match our changes to program requirements. In addition, the old measure was simply the percentage of students who passed the exam (as measures of theory & content knowledge as well as of research methodology competence). The new measure is a rubric, with assessments of the students' performance on those two outcomes plus written & oral communication skills and career planning & development. The rubric scores provide much more specific information on the students' actual strengths and weaknesses in various areas. We have also changed one target. Formerly we had a target that 90% of our students would teach at least two undergraduate courses in applied linguistics. However, since some students have funding through fellowships or assistantships outside the department, it was not practical for all (or nearly all) graduate students to teach two courses in our undergraduate program. Therefore we changed the target to (still 90%) teaching at least one course in our undergraduate program. (We have maintained the target of having 100% of students teach at least 4 semesters at GSU.) In the coming year, we will develop a rubric to assess the dissertation so that we have more specific information about our students at that stage.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

In the last two years we have not met our target for students having at least one peer-reviewed article or book chapter published or in press at the time of graduation, and we are now monitoring students' publications pre-graduation. Thus, we now know that 58% of students (including first year students; 68% excluding them) have one such paper already. This year we will try additional advising and opportunities to co-author in order to help the other students gain relevant experience.
Knowledge of art criticism and theory and facility in applying theory and critical thinking to visual analysis. In accordance with our goals, this outcome works to measure students' sophisticated critical thinking and visual literacy skills.

SLO 2: Contemporary contextual knowledge (M: 1, 3)
Informed of contemporary art and its relationship to the history of the discipline. In accordance with our goals, we use this measure to understand students' understanding as practitioners, scholars and advocates of the visual arts.

SLO 3: Advanced research skills (M: 1, 3)
Ability to thoroughly investigate and critically analyze research results.

SLO 4: Professional practice (M: 1, 3)
Professional presentation of studio work, polished representation of self on paper, fluency in discussing own work, demonstration of self-assessment skills. In concert with our stated goals, we use this outcome to judge how prepared students are to be competitive in an increasingly technological, interdisciplinary and theoretical art world and how prepared students are to engage and collaborate with local state, regional, national and global institutions and communities.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

Measures, Targets, and Findings

M 1: Thesis Paper (O: 1, 2, 3, 4)
Written paper detailing multiple aspects of studio practice.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Theoretical and critical thinking
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

Findings 2012-2013 - Target: Met
Assessments were available for five students. Two were rated as exemplary (4/4), 3 were rated as accomplished (3/4). On average, the student data available shows that the goal of 3.5 for this outcome was met.

Target for O2: Contemporary contextual knowledge
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

Findings 2012-2013 - Target: Met
Assessments were available for five students. Two were rated as exemplary (4/4); three were rated as accomplished (3/4). On average, the goal of 3.5 for this outcome was met.

Target for O3: Advanced research skills
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

Findings 2012-2013 - Target: Partially Met
Five records were available for assessment. Two students were rated exemplary (4.4), two were rated accomplished (3/4), and one was rated developing (2/4). On average, the goal of 3.5 for this outcome was only partially met. The weakness of the student rated developing skewed the overall number lower. Given the small sample size for this reporting period, it is difficult to draw strong conclusions about larger outcome patterns.

Target for O4: Professional practice
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

Findings 2012-2013 - Target: Partially Met
Five records were available for analysis this period. Two students achieved a rank of exemplary (4/4), two achieved a rank of accomplished (3/4), and one was rated developing (2/4). On average, the desired score of 3.5 for this outcome was partially met. The ranking of one student as developing prevented the full execution of this outcome goal. Given the small sample size for this reporting period, however, it is difficult to draw meaningful conclusions from this data.

M 3: MFA Solo Exhibition with Statement and Resume (O: 1, 2, 3, 4)
A solo exhibition of work done in last two semesters of graduate study accompanied by an artist statement and resume.
Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Theoretical and critical thinking
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

Target for O2: Contemporary contextual knowledge
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

Target for O3: Advanced research skills
With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

**Target for O4: Professional practice**

With possible scores of 1 = beginning, 2 = developing, 3 = accomplished, and 4 = exemplary, the achievement target is 3.5.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Formation of 3-D program**
The Ceramics area and Sculpture area will join to form a 3-D program. This will allow students from both disciplines to enroll in the same Directed Study and Graduate Seminar course under the direction of one faculty member. By forming a larger critical mass of students, they will experience richer and more diversified feedback in their group critiques as well as more exposure to the possibilities of creative problem solving in their studio practice.

**Established in Cycle:** 2008-2009
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Thesis Paper | **Outcome/Objective:** Theoretical and critical thinking

**Implementation Description:** Ceramics and Sculpture faculty are in the process of refining the details of a 3-D program yet are moving forward by joining the two disciplines in one Directed Study course this semester. By Fall 2010 all details should be resolved and in full operation.

**Projected Completion Date:** 07/2010
**Responsible Person/Group:** Mark Burleson, Christina West, Ruth Stanford, George Beasley

**Graduate Program Review**
A Graduate Program review is scheduled for 2009 - 2010. A committee has been formed and will be chaired by Graduate Program Director Joe Peragine. Topics for consideration are: increasing cross disciplinary interaction and instruction among studio disciplines, expanding attendance and participation in graduate studio critiques to include faculty and students from all studio disciplines, reducing the isolation of graduate students in their respective studio areas and increasing their experience of other graduate students’ research activities, and devising program opportunities for graduate students to have greater exposure to practicing contemporary artists excelling in the field.

**Established in Cycle:** 2008-2009
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Thesis Paper | **Outcome/Objective:** Theoretical and critical thinking

**Implementation Description:** The review of the Graduate Program will take place throughout this academic year with the intent of implementing any changes in Fall 2010.

**Projected Completion Date:** 07/2010
**Responsible Person/Group:** Graduate Program Director Joe Peragine

**Professional Practice in Higher Education**
The graduate studio faculty is going to consider whether making Professional Practice in Higher Education (AE 6100) mandatory for all students (it is currently only required of graduate assistants who are teaching) will improve student achievement in the area of Professional Practice.

**Established in Cycle:** 2011-2012
**Implementation Status:** Planned
**Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- **Measure:** MFA Solo Exhibition with Statement and Resume | **Outcome/Objective:** Professional practice
- **Measure:** Thesis Paper | **Outcome/Objective:** Professional practice

**Implementation Description:** Spring 2013
**Responsible Person/Group:** Stan Anderson

**Seminar Reorganization**
In order to improve the performance of our students in regard to Theoretical and Critical Thinking and Contemporary Contextual Knowledge, we are planning to restructure the way MFA seminars are taught and rotated, including involving the art history faculty to a greater degree.

**Established in Cycle:** 2011-2012
**Implementation Status:** Planned
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** MFA Solo Exhibition with Statement and Resume | **Outcome/Objective:** Contemporary contextual knowledge | Theoretical and critical thinking
- **Measure:** Thesis Paper | **Outcome/Objective:** Contemporary contextual knowledge | Theoretical and critical thinking

**Responsible Person/Group:** Stan Anderson

**Graduate Program Review**
As the needs and expectations of students and the university change, it is clear that our MFA graduate program needs to change to meet new demands. We have begun this process by streamlining internal processes and are working toward a redesign of the graduate program. The School of Art is scheduled for a faculty retreat Spring 2014 in which we will discuss seminar structures, new classes (e.g. professional practices, thesis writing).
Georgia State University
Assessment Data by Section
2012-2013 Art and Design Assessment of Core
As of: 12/12/2016 05:58 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
As part of the core curriculum in Area C, AH survey courses seek to impart knowledge, values and skills to undergraduates through the study of global art and visual cultures. Through analytical, historical, critical and appreciative methods of learning, students develop skills applicable to any major, but particularly those in fine arts, social sciences and humanities. It is the mission of the department that AH courses increase intellectual curiosity and initiate a continuing interest in the arts.

Goals
G 1: Critical thinking
Students will gain broad knowledge of World art history and demonstrate critical-thinking relative to the study of the visual arts.

Student Learning Outcomes/Objectives
SLO 1: Critical thinking in core (G: 1)
"Critical Thinking" outcomes in Art History Core Courses: students develop critical thinking skills through the evaluation and analysis of visual and textual material. The following discipline-specific critical thinking outcomes relate to the General Education "Critical Thinking" outcomes: 1. Students formulate pertinent questions relevant to the evaluation of a work of art or an art historical problem (Gen Ed "Critical Thinking" Outcome #1). 2. Students discern differences and similarities between works of art through the application of aesthetic, contextual and historical knowledge (Gen Ed "Critical Thinking" Outcomes #1 and #2). 3. Students formulate informed opinions about the value of an art historical interpretation (Gen Ed "Critical Thinking" Outcome #3). 4. Students apply knowledge read in their course book and learned in class to solve art-historical problems associated with material not explicitly covered in lectures (Gen Ed "Critical Thinking" Outcome #4).

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Critical thinking in Core Action Plan
Continue to: 1) include 15-20 CT questions on every exam and 2) include class discussion of critical thinking in test format.
Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: Low
Responsible Person/Group: AH faculty

Analysis Questions and Analysis Answers
ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We did not make any changes to our assessment process since last year's report. We are not planning to make any changes in the coming academic year.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
The data tells us that we are continuing to incorporate critical thinking in the core courses, and that we are basically on target with our goals. We have not made any revisions to the courses since last year. We have a long term goal of using TAs to lead smaller classes and/or discussion groups that might enable us to introduce different types of critical thinking assignments into the core courses. However, until that goal is achieved, we do not plan to make any changes to the curriculum.

Annual Report Section Responses
Most important accomplishments for year-- briefly describe the major things you accomplished over the past year.
We have no major accomplishments to report, other than the fact that we have stayed on track with the goals we previously
Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.
We have no anticipated challenges facing us next year.

Georgia State University
Assessment Data by Section
2012-2013 Art Education BFA
As of: 12/12/2016 05:58 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Art Education BFA Program within the School of Art and Design is to provide a rigorous, comprehensive, and accessible undergraduate education in the visual arts, art education, and art history to a diverse urban constituency. This mission extends to the University at large, to the community, and beyond, with the recognition that visual literacy is essential to imagination, creativity, and the articulation of ideas in all fields.

Goals
G 1: Visual Arts Literacy
Provide students with sophisticated critical thinking and visual literacy skills so that they may effectively relay ideas and responses in visual, oral, and/or written communication as they relate to the visual arts.

G 2: Visual Arts Advocacy
Expand students' understanding as practitioners, scholars, and advocates of the visual arts who engage and collaborate with local, state, regional, national, and global institutions and communities to provide enhanced visual arts opportunities to students and the community.

G 3: Technology and Media
Prepare students to be competitive in an increasingly technological, interdisciplinary, and theoretical art world through awareness of and facility with a wide range of media and state-of-the-art technologies.

Student Learning Outcomes/Objectives
SLO 1: Learning Environment (G: 1, 2, 3) (M: 1)
Student understands the close connections between motivation and engagement and knows how to develop learning experiences using effective teaching strategies including technology that build learner self-direction and ownership of learning. Student is able to clearly describe expectations for student behavior and design and carry out a plan for rewards and consequences. Student is highly organized and manages materials, equipment, and the labeling and storage of student work effectively. Student demonstrates the ability to communicate effectively both verbally and in writing, with colleagues, students, and other stakeholders regarding expectations. [Related to the Interstate Teacher Assessment and Support Consortium (InTASC) Standard #3: The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.]

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

SLO 2: Instruction (G: 1, 2, 3) (M: 1)
Student is able to plan and assess developmentally appropriate lessons for pre-K through 12 students, including those in need of accommodation. Student demonstrates competency in a variety of art mediums and has broad knowledge of the history and criticism of art, informed by cultural understandings. Students use appropriate vocabulary and is able to discuss and write about artworks and art processes from an informed perspective and communicate information about art to students through a variety of pedagogical strategies. Student is reflective about their teaching practice and revises strategies based on assessments of student learning. [Related to the Interstate Teacher Assessment and Support Consortium (InTASC) Standard #8: The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.]

General Education/Core Curriculum Associations
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

SLO 3: Instructional Resources (G: 1, 2, 3) (M: 1)
Student can create and utilize teaching tools such as PowerPoint presentations, demonstrations, displays, critiques, and performance-based assessments to communicate and document expectations, objectives, procedures, outcomes, and progress to learners. Student is able to utilize technology effectively in preparing and presenting lessons to students, and in empowering students to utilize technology in their own creative endeavors. Student responds critically to readings and organizes final portfolio to
highlight his/her competencies and growth. [Related to the Interstate Teacher Assessment and Support Consortium (InTASC) Standard #8: The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.]

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**SLO 4: Professionalism (G: 2) (M: 1)**

Student has demonstrated an understanding of the professional role of the teacher through appropriate, positive dispositions, including ethical conduct and responsiveness to diverse student needs. Student has articulated a thoughtful teaching philosophy and understands the importance of advocacy and participation in professional development opportunities. [Related to the Interstate Teacher Assessment and Support Consortium (InTASC) Standard #9: The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.]

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**Measures, Targets, and Findings**

**M 1: Student Teaching Portfolio + (O: 1, 2, 3, 4)**

Learning outcomes for undergraduate Art Majors with a Concentration in Art Education are evaluated on the basis of: final student teaching portfolios, which consist of measures for content knowledge, lesson planning, classroom management, instructional strategies, classroom and student behavior management, assessment skills, and professional attributes; summative evaluation of student teaching internships; and supervisor observations in the field. Checklists and rubrics are utilized to assess particular aspects of student performance, such as lesson planning, use of technology, professional dispositions, and final portfolio. The degree of student mastery of each learning objective is also evaluated by assigning points to final course grades for each seminar covering the above described content, then determining an average score for all students enrolled in each course. The following ranking system is used: 1-Poor, 2-Fair, 3-Good, 4-Very Good, 5-Excellent.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Learning Environment**

The minimum score for successful completion of this objective is 3/5 (Good). The aim is for an average score of 4/5 (Very Good).

**Findings 2012-2013 - Target: Partially Met**

Students in AE 4750 were assessed for this objective. Number of students evaluated for this goal: 20 Number of those students who achieved the goal: 19 Minimum score for successful completion of goal: 3/5 We are aiming for an average score of: 4/5 Average score for this goal this academic year: 4.37/5

**Target for O2: Instruction**

The minimum score for successful completion of this objective is 3/5 (Good). The aim is for an average score of 4/5 (Very Good).

**Findings 2012-2013 - Target: Partially Met**

Students in AE 4760 were assessed for this objective. Number of students evaluated for this goal: 20 Number of those students who achieved the goal: 19 Minimum score for successful completion of goal: 3/5 We are aiming for an average score of: 4/5 Average score for this goal this academic year: 4.26/5

**Target for O3: Instructional Resources**

The minimum score for successful completion of this objective is 3/5 (Good). The aim is for an average score of 4 (Very Good).

**Findings 2012-2013 - Target: Partially Met**

Students in AE 4770 were assessed for this objective. Number of students evaluated for this goal: 20 Number of those students who achieved the goal: 19 Minimum score for successful completion of goal: 3/5 We are aiming for an average score of: 4/5 Average score for this goal this academic year: 4.6/5

**Target for O4: Professionalism**

The minimum score for successful completion of this objective is 3/5 (Good). The aim is for an average score of 4 (Very Good).

**Findings 2012-2013 - Target: Partially Met**

Students in AE 4780 were assessed for this objective. Number of students evaluated for this goal: 20 Number of those students who achieved the goal: 19 Minimum score for successful completion of goal: 3/5 We are aiming for an average score of: 4/5 Average score for this goal this academic year: 4.54/5

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Use of video technology**

Video taping of student teachers and student presentations for critical review by faculty in order to ease the time consuming aspects of student placements in K-12 schools and other non-profit settings.
Increase student field experience hours
Increasing student field-experience hours prior to student teaching not only allows more hands-on experience for students, but also gives faculty more insight into student "readiness." We have already implemented another pre-student teaching field experience during the semester immediately prior to student teaching to better assess student readiness. Faculty members also work with different local community art programs to provide pre-service art teachers with teaching practice. The Art Education faculty has implemented an additional pre-student teaching field experience under the supervision of Dr. Hsieh in order to better assess student readiness. This process has helped faculty gain insight into student performance and identify students who may need extra coursework or field experiences to prepare for student teaching. However, this opportunity is optional for students and is not required by the Art Education program. The Art Education program is planning to submit a catalog change in Fall 2013 (for official implementation in Fall 2014) so that teaching practice before official student teaching will be required for all pre-service art teachers. By doing so, the Art Education faculty can examine Art Education majors' professionalism, instruction, and instructional resources. These three domains are still the focus for the art education program.

Student Data
We need to streamline the collection and maintenance of student records (particularly those pertaining to the evaluation of student teachers while they are taking student teaching courses) for assessment purposes.

Lesson Planning Skills
While we have already implemented more field experience hours to allow students greater opportunities to practice what they are learning -- and to give faculty more insight into student "readiness" -- we recognize the need to reinforce lesson planning skills in the methods coursework prior to student teaching.

Refining Goals for Student Learning
Learning goals will be refined to align with the mission statement of the School of Art and Design, which is currently being modified, and to better illustrate what we would like our students to be once they complete the program.

Revision of Average Score Goal for All 4 Learning Objectives
As the average score goal of 4/5 has been surpassed for all 4 learning objectives in each of the last 3 years, we need to consider whether that average score goal needs to be raised.
Mission / Purpose

The mission of the Art Education MFA Program within the School of Art and Design is to provide a rigorous, comprehensive and accessible graduate education in the visual arts, art education and art history to a diverse urban constituency. This mission extends to the University at large, to the community and beyond, with the recognition that visual literacy is essential to imagination, creativity and the articulation of ideas in all fields. We address this mission in the following ways: •Provide students with sophisticated critical thinking and visual literacy skills •Expand students understanding as visual artists, art educators, scholars and advocates of the visual arts •Prepare students to be competitive in an increasingly technological, interdisciplinary and theoretical art world •Engage and collaborate with local state, regional, national and global institutions and communities to provide enhanced visual arts opportunities to students and the community.

Student Learning Outcomes/Objectives

SLO 1: Research skills in gathering evidence (M: 1)

Thesis evaluation: Ability to gather evidence to support thesis statement

SLO 2: Research skills in critically analyzing evidence (M: 1)

Thesis evaluation: ability to provide a critical analysis of research material as evidence in support of thesis statement

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 3: Written Communication Skills (M: 1)

Thesis evaluation: effective and persuasive writing in support of thesis statement

Measures, Targets, and Findings

M 1: Thesis (O: 1, 2, 3)

The written thesis is assessed for providing a scholarly background with theoretical justification, purpose and need for the study. The thesis requires students to collect and analyze data, discuss and synthesize conclusions, and present recommendations for further research.

Source of Evidence: Senior thesis or culminating major project

Target for O1: Research skills in gathering evidence

Minimum score for successful completion of goal: 3 Aim for average score: 4.0

Findings 2012-2013 - Target: Met

Though the sample size for this measure was low (3 students) and we cannot draw significant statistical data from it, we exceeded our stated goal. Our goal for this outcome was 4 and all three students scored 5.

Target for O2: Research skills in critically analyzing evidence

Minimum score for successful completion of goal: 3 Aim for average score: 4.0

Findings 2012-2013 - Target: Met

As with Goal 1, the sample size for this outcome is too small to draw statistically significant findings. That said, our stated goal was 4 and the three students assessed for this year scored 5, exceeding our expectations.

Target for O3: Written Communication Skills

Minimum score for successful completion of goal: 3 Aim for average score: 4.0

Findings 2012-2013 - Target: Met

As noted in goals 1 and 2, the sample size for this outcome is too small to draw statistically significant conclusions. As with the other two goals, our stated target was 4 and all three students exceeded that by scoring 5s.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Low Residency with Online Course Offerings

We have restructured the MAEd program to operate as a low-residency program with 40% of the courses now offered online.
Summer triad of courses
In order to engender greater cross disciplinary activity in our students classrooms, we are focusing on integrating the three required summer courses that address contemporary issues in art education, postmodern art history and a studio mixed media course.

Survey of cohort program
Having initiated a cohort aspect to the MAED program this year, we will survey the students at the end of the academic year to understand the effectiveness of this change and address any deficiencies cited in the survey.

Develop extended support network
Although all of those evaluated above met our expectations for completion of the Master's degree, this evaluation includes students who were admitted into the MAE prior to the development of the new cohort program. We will be interested to see how ratings for the cohort groups compare to those for students who made their way through the program individually, without that extended support network and a more structured curriculum. Based upon comparative data with next year's completers, we will re-evaluate the cohort program to ensure that it is serving the needs of our students.

Greater structure in curriculum
Although all of those evaluated above met our expectations for completion of the Master's degree, this evaluation includes students who were admitted into the MAE prior to the development of the new cohort program. We will be interested to see how ratings for the cohort groups compare to those for students who made their way through the program individually, without that extended support network and a more structured curriculum. Based upon comparative data with next year's completers, we will re-evaluate the cohort program to ensure that it is serving the needs of our students.

New cohort formation evaluation
Although all of those evaluated above met our expectations for completion of the Master's degree, this evaluation includes students who were admitted into the MAE prior to the development of the new cohort program. We will be interested to see how ratings for the cohort groups compare to those for students who made their way through the program individually, without that extended support network and a more structured curriculum. Based upon comparative data with next year's completers, we will re-evaluate the cohort program to ensure that it is serving the needs of our students.

Analysis Questions and Analysis Answers
ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and
improvements in the assessment process will you make in the coming academic year?

No changes in assessment but we have followed our action plan and have carefully monitored, and will continue to monitor, our MAEd candidate's progress and encourage them toward completion.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data appear to indicate that the changes brought about by our action plan last year are bearing fruit.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Art History BA**

As of: 12/12/2016 05:58 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The mission of the Art History BA Program within the School of Art and Design is to provide a rigorous, comprehensive, and accessible undergraduate education in art history to a diverse urban constituency. This mission extends to the University at large, to the community, and beyond, with the recognition that visual literacy is essential to imagination, creativity, and the articulation of ideas in all fields.

---

**Goals**

**G 1: Visual Arts Literacy**

Provide students with sophisticated critical thinking and visual literacy skills so that they may effectively relay ideas and responses in visual, oral, and/or written communication as they relate to the visual arts.

**G 2: Visual Arts Advocacy**

Expand students' understanding as practitioners, scholars, and advocates of the visual arts who engage and collaborate with local, state, regional, national, and global institutions and communities to provide enhanced visual arts opportunities to students and the community.

**G 3: Technology**

Prepare students to be competitive in an increasingly technological, interdisciplinary, and theoretical art world through awareness of a wide range of media and state-of-the-art technologies.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Knowledge of Content (G: 1, 2) (M: 1)**

Student is able to recall pertinent art historical facts (i.e., artist, title, date), can identify artworks as belonging to specific cultures, periods, and places, and can define art historical vocabulary.

**General Education/Core Curriculum Associations**

- 4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
- 8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

**Strategic Plan Associations**

- 4.2 Highlight the arts and media.
- 5.4 Enhance the global competency of students, faculty and staff.

**SLO 2: Critical Thinking Skills (G: 1, 2, 3) (M: 1)**

Student is able to apply a range of art historical methods (i.e., formal analysis, semiotics, criticism, etc.), to apply appropriate methods to the analysis of particular works of art, and to make reasoned judgements about the validity of rival claims about art.

**General Education/Core Curriculum Associations**

- 3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
- 4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
- 9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**SLO 3: Research Skills (G: 1, 2, 3) (M: 1)**

Student is able to design and carry out an independent research project culminating in a substantial written document. Student is able to acquire, evaluate, and critique the scholarship relevant to an art historical problem, and to propose solutions or contribute new insights into that problem.
**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**SLO 4: Written Communication Skills (G: 1, 2) (M: 1)**

Student is able to explain art historical principles, and to use art historical terms in their proper context to explain and/or describe works of art or art historical problems. Student can effectively communicate the results of research and critical thought in a well-written formal essay.

### Measures, Targets, and Findings

#### M 1: Graduation portfolio (O: 1, 2, 3, 4)

Students are evaluated on the basis of a graduation portfolio assembled by graduating seniors in connection with AH 4990: Art History Capstone or in consultation with their principal advisers in the course of their final semester (or last 15 credit hours of study). This year, the portfolio consisted of a CAPP form, a copy of a test from an upper-level Art History course, an advanced writing project involving art historical research, a research response paper, a critical analysis paper, and an art history experience paper. The portfolio requires students to submit a paper from the beginning of their Art History studies and one from the end, and this "book-ending" approach provides us with a solid grasp of each student's improvement, or lack thereof, across time. Knowledge of Content is evaluated based on analysis of performance in 1000-level art-history survey classes, and a review of the content-based sections of tests submitted with the graduation portfolio. Critical Thinking Skills are evaluated based on review of exam essay questions and the writing project(s) submitted with the graduation portfolio. Research Skills are evaluated based on review of any research-based exam questions and the writing project(s) submitted with the graduation portfolio. Written Communication Skills are evaluated based on review of exam essay questions and the writing project(s) submitted with the graduation portfolio. The degree of student mastery of each Learning Objective is evaluated according to the following scheme: 1-Poor, 2-Fair, 3-Good, 4-Very Good, 5-Excellent.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Knowledge of Content**

Evaluation is based on analysis of performance in 1000-level art-history survey classes, and a review of the content-based sections of tests submitted with the graduation portfolio. The minimum score for successful completion of this goal is 3/5 (Good), while our aim is an average score of 4.5/5 (Very Good-Excellent).

**Findings 2012-2013 - Target: Met**

Number of students evaluated for this goal: 15 Number of those students who achieved the goal: 15 Minimum score for successful completion of goal: 3 We are aiming for an average score of: 4.5 Average score for this goal this academic year: 4.33 (Prev. Year: 3.91) The outcome score for Objective 1, Knowledge of Content, saw 100% student achievement, and an increase average from last year's 3.91 to 4.33. This increase reflects the Art History area's continued insistence on more rigor in its course work. For Art History, Knowledge of Content includes the ability to identify information like artist, title, and date with 100% accuracy as well as knowledge of art historical terms. In early classes (such as the surveys) student often struggle with learning how to memorize and report this information. As the Art History area increases its expectations regarding student performance, it places more weight on this foundational information and demands higher performance from students, especially majors. The Art History area's target for this objective is unchanged – we are working toward 100% student achievement and an average score of 4.5.

**Target for O2: Critical Thinking Skills**

Evaluation based on review of exam essay questions and the writing project(s) submitted with the graduation portfolio. The minimum score for successful completion of this goal is 3/5 (Good), while our aim is an average score of 4.5/5 (Very Good-Excellent).

**Findings 2012-2013 - Target: Partially Met**

Number of students evaluated for this goal: 15 Number of those students who achieved the goal: 14 Minimum score for successful completion of goal: 3 We are aiming for an average score of: 4.5 Average score for this goal this academic year: 4.2 (Prev. Year: 3.65) The outcome score for Objective 2, Critical Thinking Skills, also saw an increase from last year's 3.65 to 4.2, along with a 93% achievement rate (last year's achievement rate was 88%). The increase may be the result of the area's emphasis on critical thinking in each of its 3000- and 4000-level courses. As with our other statistics, we lack sufficient longitudinal data to perform in-depth analysis. The Art History area's target for this objective is unchanged – we are working toward 100% student achievement and an average score of 4.5.

**Target for O3: Research Skills**

Evaluation based on review of any research-based exam questions and the writing project(s) submitted with the graduation portfolio. The minimum score for successful completion of this goal is 3/5 (Good), while our aim is an average score of 4.5 (Very Good-Excellent).

**Findings 2012-2013 - Target: Partially Met**
Number of students evaluated for this goal: 15 Number of those students who achieved the goal: 14 Minimum score for successful completion of goal: 3 We are aiming for an average score of: 4.5 Average score for this goal this academic year: 3.76 (Prev. Year: 3.74) The outcome score for Objective 3, Research Skills, increased slightly from the previous year’s score of 3.74 to 3.76, with a 93% achievement rate (last year’s achievement rate was 88%). This still falls well short of our goal. As part of our continuing effort to improve our students’ Research Skills, we require an undergraduate methodology course (AH 3000) and have been working with the Fine Arts Library Liaison, Nedda Ahmed, to provide students with more access to research materials and instruction. Based on the increase in outcomes for Objective 2, it appears that this has a positive effect, and we are optimistic that it will also increase the outcome for Goal 3 going forward. The Art History area’s action plan for this objective is unchanged – we are working toward 100% student achievement and an average score of 4.5.

**Target for O4: Written Communication Skills**

Evaluation based on review of exam essay questions and the writing project(s) submitted with the graduation portfolio. The minimum score for successful completion of this goal is 3/5 (Good), while our aim is an average score of 4.5/5 (Very Good-Excellent).

**Findings 2012-2013 - Target: Partially Met**

Number of students evaluated for this goal: 15 Number of those students who achieved the goal: 14 Minimum score for successful completion of goal: 3 We are aiming for an average score of: 4.5 Average score for this goal this academic year: 3.95 (Prev. Year: 3.66) The outcome score for Objective 4, Written Communication Skills, climbed from last year’s 3.66 to 3.95. While the increase is encouraging, we are still disappointed given our focus in recent years on improving our students’ writing. We hope to see greater improvement. Art History area’s action plan for this objective is unchanged – we are working toward 100% student achievement and an average score of 4.5.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**AH 4990 as new capstone course for the major**

The outcomes for Objectives 1 and 2 (Knowledge of Content and Critical Thinking Skills) were unchanged from the previous academic year. The students we evaluate are meeting our goals in both those areas, and we see no need for changes in our program with respect to these particular goals. One concern that we do have is that these scores may be somewhat inflated, since they are based only on the graduation portfolios submitted, and -- since submission of the graduation portfolio is still essentially voluntary -- the portfolios submitted may not be a representative sample. This problem should be solved in coming years, as more and more of our graduating majors will be required to pass through the new capstone course (AH 4990), and thus be required to submit a graduation portfolio. As we get a more truly representative sample of work, however, we may find that our average scores go down.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Graduation portfolio
- **Outcome/Objective:** Critical Thinking Skills
- **Outcome/Objective:** Research Skills
- **Outcome/Objective:** Written Communication Skills

**Implementation Description:** AH 4990 has been adopted as the capstone course for the major, though it will be sometime before we have a critical mass taking completing the course. Therefore, we project that within two years we can effectively use it as a measure.

Projected Completion Date: 07/2010
Responsible Person/Group: Glenn Gunhouse, John Decker, Kimberly Cleveland, Maria Gindhart, Melinda Hartwig, Susan Richmond, Akela Reason

**AH 3000 - Intro to Art History Methodology**

We have added a new course to our program (AH 3000 - Introduction to Art History Methodology), which we hope will improve the research skills of our majors by giving them training in art-historical methods early in their course of study. As more and more of our graduates are required to take this course as part of their program, we hope to see improvement in these scores for the Research Skills objective. In addition, our students now have the opportunity for instruction in library research skills under the guidance of Nedda Ahmed, the new library instructor in the fine arts area. We plan to take more advantage of this opportunity in the future, with the expectation that it will further improve our students’ research skills.

Established in Cycle: 2008-2009
Implementation Status: Finished
Priority: High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Graduation portfolio
- **Outcome/Objective:** Critical Thinking Skills
- **Outcome/Objective:** Research Skills
- **Outcome/Objective:** Written Communication Skills

**Implementation Description:** This course addition will have increased enrollment in the fall 2009 as a new requirement for the major.

Projected Completion Date: 07/2009
Responsible Person/Group: Glenn Gunhouse, Maria Gindhart, Melinda Hartwig, Kimberly Cleveland, John Decker, Susan Richmond, Akela Reason

**AH 3000 and AH 4990 as CTW courses**

Now that AH 3000 and AH 4990 have been taught for multiple years and by multiple instructors, the effectiveness of these courses needs to be assessed, with the subsequent implementation of ways to improve them.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Graduation portfolio
- **Outcome/Objective:** Critical Thinking Skills
- **Outcome/Objective:** Research Skills
- **Outcome/Objective:** Written Communication Skills

Projected Completion Date: 12/2014
Responsible Person/Group: Faculty in the Art History Area who have taught AH 3000 and AH 4990.
Content Knowledge and Critical Thinking Skills
The outcomes for Objective 1 (Knowledge of Content and Critical Thinking Skills, 3.85 and 3.58 respectively) are lower from the previous academic year. While the students we evaluated are meeting most of our goals, the faculty and course content is more rigorous, requiring more out of students. Our goal is to turn out art history graduates who could go on to any top graduate program in the US. Our concern last year was the somewhat inflated scores based only on the graduation portfolios submitted, which -- since submission of the graduation portfolio was essentially voluntary -- the portfolios submitted were not be a representative sample. This year we solved the problem by offering graduating majors a new capstone course (AH 4990), and required all to submit a graduation portfolio. This resulted in a more representative sample of work that included a CAPP form, a copy of a test from an upper-level Art History course, and an advanced writing project involving art-historical research, a research response paper, a critical analysis paper, an art analysis paper, and an art history experience paper. We also believe that the relatively low scores for Objectives 1 and 4 were in part the result of the greater breadth of assessment material, which gave us the opportunity to target more precisely areas that need improvement. Furthermore, many of the students who took AH 4990 Art History Capstone, did not take AH 3000 - Introduction to Art History Methodology. By taking AH 3000, students receive greater attention in their content, critical thinking, research and written communication skills early in their career resulting in better papers and tests.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Graduation portfolio | Outcome/Objective: Critical Thinking Skills

Written Communication Skills
The outcomes for Objective 4 (Written Communication Skills) dropped from the previous academic year (from 4.1 to 3.58). This was a disappointing result, given our focus in recent years on the need to improve the quality of our students' writing. We hope that with increased attention to writing in our designated CTW courses (AH 3000 and AH 4990), we will see improvement in the scores for this objective. We also believe that the relatively low scores for Objectives 1 and 4 were in part the result of the greater breadth of assessment material, which gave us the opportunity to target more precisely areas that need improvement. Furthermore, many of the students who took AH 4990 Art History Capstone, did not take AH 3000 - Introduction to Art History Methodology. By taking AH 3000, students receive greater attention in their content, critical thinking, research and written communication skills early in their career resulting in better papers and tests.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Graduation portfolio | Outcome/Objective: Critical Thinking Skills

Research Plan
The scores for Objective 3 (Research Skills) were quite a bit lower than we'd like to see. The average of 3.75 was considerably below our goal of 4.5, and lower than the results for the other three objectives. We recognize that this is a continuing area of focus for the faculty. We have already added a new course to our program (AH 3000 - Introduction to Art History Methodology), which we hope will improve the research skills of our majors by giving them training in art-historical methods early in their course of study. As more and more of our graduates are required to take this course as part of their program, we hope to see improvement in the scores for the Research Skills objective. In addition, our students now have the opportunity for instruction in library research skills under the guidance of Nedda Ahmed, the new library instructor in the fine arts area. We plan to take more advantage of this opportunity in the future, with the expectation that it will further improve our students’ research skills.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Graduation portfolio | Outcome/Objective: Critical Thinking Skills

3000-Level Courses
We want to develop more robust 3000-level courses, which will provide students with intermediary critical thinking and writing skills. These courses would be a firm foundation and would better prepare students to perform at higher levels in the 4000-level courses.

Established in Cycle: 2011-2012
Implementation Status: Planned
Establishing BA in Art History

We are in the process of proposing a BA in Art History, as our current program is a BA in Art with a Concentration in Art History. A self-standing major should be more appealing to students interested in art history and will carry more weight when our art history students apply for jobs and graduate school.

- Established in Cycle: 2011-2012
- Implementation Status: In-Progress
- Priority: High
- Responsible Person/Group: Art History Faculty

Undergraduate Seminars

We would like to see all undergraduate majors take at least one seminar class. For this, we would need to make 4900-level classes "undergraduate seminars," with a lower cap on class size to ensure greater one-on-one instruction. Such a seminar would better prepare our students for the rigors of graduate school and would offer them an opportunity to perform more focused research and writing. We need, however, to consider how this will affect such things as RPG and credit-hour generation.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Graduation portfolio
  - Outcome/Objective: Critical Thinking Skills
  - Knowledge of Content
  - Written Communication Skills
- Responsible Person/Group: Art History Faculty

1000-Level Survey Experimentation

In order to increase Knowledge of Content (Objective 1) in our 1000-level survey courses (AH 1700, AH 1750, and AH 1850), which serve as the foundation for our upper-level classes, we would like to experiment with smaller sections for the FLCs and for Honors students to see if more personal attention translates to better student performance. We would also like to explore whether we could assign GTAs to those courses to work with students.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Graduation portfolio
  - Outcome/Objective: Knowledge of Content
- Implementation Description: The Art History area will discuss the best course of action and discuss it with the Associate Director and Director of the School of Art and Design.
- Projected Completion Date: 10/2014
- Responsible Person/Group: Art History area
- Additional Resources: We may need more funding for PTIs and/or GTAs.

Fine Arts Library Liaison

Students in AH 3000, AH 4990, and many of our 4000-level classes have library sessions with Fine Arts Library Liaison Nedda Ahmed, and we want to continue to facilitate our students' access to research materials and instruction.

- Established in Cycle: 2012-2013
- Implementation Status: In-Progress
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Graduation portfolio
  - Outcome/Objective: Research Skills
- Implementation Description: The Art History faculty, or representatives thereof, will meet with Nedda Ahmed to discuss strategies to best tailor library sessions to the abilities and needs of our students.
- Responsible Person/Group: Art History area

Refining Goals for Student Learning

Learning goals will be refined to align with the mission statement of the School of Art and Design, which is currently being modified, and to better illustrate what we would like our students to be once they complete the program.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
- Priority: High

WAC Classes

Due to the success we have had with our two CTW classes (AH 3000 and AH 4990), we want to explore whether offering more WAC courses in Art History would further improve Critical Thinking Skills, Research Skills, and Written Communication Skills. Several Art History faculty currently offer WAC courses, but we want to consider whether doing so more systematically would improve student achievement.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Graduation portfolio
  - Outcome/Objective: Critical Thinking Skills
**Research Skills**

**Mission / Purpose**

The mission of the Art History MA Program within the School of Art and Design is to provide a rigorous, comprehensive and accessible graduate education in the visual arts and art history to a diverse urban constituency. Students who graduate from the program come away with sophisticated critical thinking and visual literacy skills that prepare them for Ph.D. work, careers in college teaching, in museums, and in related areas such as publishing, galleries, and auction houses.

**Goals**

**G 4: Written Communication**

Students will be able to explain art-historical principles, and to use art-historical terms in their proper context to explain and/or describe works of art or art-historical problems. Student can effectively communicate the results of research and critical thought in a well-written formal essay.

**G 1: Knowledge**

Students will demonstrate knowledge of artistic traditions across a range of times and places. Student will be able to recall pertinent art-historical facts (i.e., artist, title, date), can identify artworks as belonging to specific cultures, periods, and places, and can define art historical vocabulary.

**G 2: Critical Thinking**

Students will demonstrate the ability to apply a range of art historical methods (i.e., formal analysis, semiotics, criticism, etc.), to apply appropriate methods to the analysis of particular works of art, and to make reasoned judgments about the validity of rival claims about art.

**G 3: Research Skills**

Students will demonstrate ability to design and carry out an independent research project culminating in a substantial written document. Student is able to acquire, evaluate, and critique the scholarship relevant to an art-historical problem, and to propose solutions or contribute new insights into that problem.

**Student Learning Outcomes/Objectives**

**SLO 1: Knowledge (G: 1) (M: 1)**

Demonstrated knowledge of the field.

**SLO 2: Critical Thinking (G: 2)**

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4 Outcomes of research (3.3.1.4)

**Strategic Plan Associations**
2.1 Expand support for doctoral programs.
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
2.4 Enhance a research culture.
2.5 Enhance supporting infrastructure for the conduct of research.
2.6 Other efforts in support of Goal 3 (Leading Public Research University).
4.2 Highlight the arts and media.
5.4 Enhance the global competency of students, faculty and staff.
5.5 Other efforts in support of Goal 5 (Globalizing the University).

SLO 3: Research Skills (G: 3) (M: 2, 3)

Relevant Associations: National Association of Schools of Art and Design (NASAD)

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
2.1 Expand support for doctoral programs.
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
2.4 Enhance a research culture.
2.5 Enhance supporting infrastructure for the conduct of research.
2.6 Other efforts in support of Goal 3 (Leading Public Research University).
4.2 Highlight the arts and media.
5.4 Enhance the global competency of students, faculty and staff.
5.5 Other efforts in support of Goal 5 (Globalizing the University).

SLO 4: Written Communication skills (G: 4) (M: 4)

Relevant Associations: National Association of Schools of Art and Design (NASAD)

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
2.1 Expand support for doctoral programs.
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
2.4 Enhance a research culture.
2.5 Create a Georgia State Faculty Fellowship Program.
2.6 Enhance supporting infrastructure for the conduct of research.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).
4.2 Highlight the arts and media.
5.4 Enhance the global competency of students, faculty and staff.
5.5 Other efforts in support of Goal 5 (Globalizing the University).

Measures, Targets, and Findings

M 1: Knowledge of content (O: 1)
Faculty review of knowledge as indicated in thesis and coursework, using the attached rubric.

Source of Evidence: Senior thesis or culminating major project

M 2: Research (O: 3)
Faculty assessment of research using attached rubric.

Source of Evidence: Senior thesis or culminating major project

Target for O3: Research Skills
We are aiming for an average score of: 4.5

Findings 2012-2013 - Target: Partially Met
The sample size for this metric (Gathering of Evidence) was small, only 5 students, which is not particularly useful for establishing significant statistical trends. These students achieved an average of 4.4 for this measure -- we were aiming for 4.5. While we did not meet our goal exactly, our students did meet our minimum standard for this outcome/objective, which was 3.
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Instituted Graduate Methodology and Historiography (AH8010)

The 2010/11 outcomes for Art History graduate students are significantly better than the previous year. The 2009/10 outcomes reflected the work of two graduates, one a high achiever and the other a low achiever. The sample size for this year’s analysis is larger and is more reflective of the quality of graduate students graduating from the Art History program. Scores for objectives 1 and 2 exceeded our stated targets; the score for objective 3 came close to meeting our desired level. One potential reason for the rise in outcomes may be that each of the students assessed benefited from the institution of Graduate Methodology and Historiography (AH 8010). This course introduced students to graduate-level methodology and provided them with the tools needed to carry out high-level research. We plan to continue offering this class (currently we are only able to offer it every other year because of the College's minimum enrollment requirement). In keeping with our recent NASAD review, we also began offering graduate only seminars. Previously, our graduate students have taken only mixed classes and this has negatively impacted their performances. We are hopeful that the seminars will have continued positive effects on our students, noted in this goal.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Continue AH 8010 course  
**Projected Completion Date:** 06/2011  
**Responsible Person/Group:** John Decker, Susan Richmond, Melinda Hartwig, Maria Gindhart, Glen Gunnthouse, Kimberly Cleveland

### Graduate-Only Opportunities

We are trying to increase enrollment and/or have the College's minimum enrollment requirement waived in order to offer Methodology and Historiography of Art (AH 8010) every fall. This course, which introduces graduate students to graduate-level methodology and provides them with the tools needed to carry out high-level research, should ideally be taken by graduate students in their first semester. Also, in keeping with our recent NASAD review, we plan to offer at least one graduate-only seminar every semester, but meeting the College's minimum enrollment requirement is proving problematic.

**Established in Cycle:** 2011-2012  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Critical Thinking  
- **Outcome/Objective:** Research Skills

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Research  
- **Outcome/Objective:** Research Skills

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Written Communication Skills  
- **Outcome/Objective:** Written Communication skills

**Responsible Person/Group:** Art History Faculty

### Curriculum Redesign/Rethink

Given the outcomes for 2013, the area will need to meet and determine what changes to sequence as well as content and level are necessary to bring outcomes in line with stated goals.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Area meeting to assess needed program changes and implement as necessary.
Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We increased our targets from last year (from 4 to 4.5). As we have had only partial success in these goals, we will keep them at 4.5 for the coming academic year. We plan to follow our post NASAD action plan and offer more graduate only courses to help our students with their research and writing skills. Starting 2015, we also plan to use our methodology course (AH 8010) as part of screening students to identify potential weaknesses in research and writing abilities. This should allow us to identify students in need of remedial training and get them up to speed before the thesis is underway. One potential downside to this is that, due to course minimum requirements (i.e. 12 MA students to "make" a class), we are currently only able to offer the methods class every other year, which means that some students will go longer without intense diagnoses. We are teaching methods Fall 2013 but had not compiled this data in time to build such assessment into the course -- we will have to wait until 2015.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

This data has shown us that our students have weaknesses in their research and writing skills. The move toward more graduate only courses (currently underway) should help as should using our methods class to assess student ability (in 2015). To that end, we will need to rethink and revise our curriculum to take this into account.

Georgia State University
Assessment Data by Section
2012-2013 Art Studio BFA
As of: 12/12/2016 05:58 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The mission of the Studio Art BFA Program within the School of Art and Design is to provide a rigorous, comprehensive, and accessible undergraduate education in the visual arts and art history to a diverse urban constituency. This mission extends to the University at large, to the community, and beyond, with the recognition that visual literacy is essential to imagination, creativity, and the articulation of ideas in all fields.

Goals
G 1: Visual Arts Literacy
Provide students with sophisticated critical thinking and visual literacy skills so that they may effectively relay ideas and responses in visual, oral, and/or written communications as they relate to the visual arts.

G 2: Visual Arts Advocacy
Expand students' understanding as practitioners, scholars, and advocates of the visual arts who engage and collaborate with local, state, regional, national, and global institutions and communities to provide enhanced visual arts opportunities to students and the community.

G 3: Technology and Media
Prepare students to be competitive in an increasingly technological, interdisciplinary, and theoretical art world through awareness of and facility with a wide range of media and state-of-the-art technologies.

Student Learning Outcomes/Objectives
SLO 1: Technical skills (G: 1, 3) (M: 1, 2)
In their studio work, students demonstrate control of their medium, creative use of formal elements such as shape, line, form, texture, color, and competent use of relevant technologies.

SLO 2: Conceptual Skills (G: 1) (M: 1, 2)
Students demonstrate conceptual and critical thinking skills in their approach to their studio work. They have the ability to investigate and research their individual ideas with a focus on content. Conceptual skills are manifested in the level of sophistication in their studio work as well as in the quality of their participation in critical discussions and the critique process.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

**SLO 3: Historical and contemporary knowledge (M: 1, 2)**
Students demonstrate a knowledge of the historical development of their medium and the critical contemporary issues attached to it. This includes familiarity with movements and trends of the past that have shaped the medium and an awareness of contemporary artists and contemporary critical discourse in their field.

**SLO 4: Professional preparation (M: 1, 2)**
Students acquire refined professional skills in the presentation and exhibition of their studio work. They demonstrate the ability to represent themselves on paper, which includes writing cogent and effective artist statements, compiling a polished resume and preparing a professional packet for the submission of their work for exhibition consideration.

**Measures, Targets, and Findings**

**M 1: Gateway (Foundations) Portfolio and Statement (O: 1, 2, 3, 4)**
Gateway Portfolio of Artwork from first year foundation studio courses plus 2 upper level studio courses including written essay that details information about the student’s portfolio of art and why the student has chosen this art discipline.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Technical skills**
Target is 2.5 on a scale of 1 (Beginning), 2 (Developing), 3 (Accomplished), 4 (Exemplary).

**Findings 2012-2013 - Target: Partially Met**
Of the 113 students assessed for their technical skills in their applications to the studio major, 28 or 25% were evaluated as 1 (beginning), 54 or 48% as 2 (developing), 27 or 24% as 3 (accomplished) and 4 or 4% as 4 (exemplary). This is an average of 2.06 on a scale of 4, which is below the target of 2.5.

**Target for O2: Conceptual Skills**
Minimum target is 2.5 on a scale of 1 (Beginning), 2 (Developing), 3 (Accomplished), 4 (Exemplary).

**Findings 2012-2013 - Target: Partially Met**
Of the 113 students assessed for conceptual skills, 36 or 32% were evaluated as 1 (beginning), 56 or 50% as 2 (developing), 20 or 18% as 3 (accomplished) and 1 or <1% as 4 (exemplary). This is an average of 1.88 on a scale of 4, which is below the target of 2.5.

**Target for O3: Historical and contemporary knowledge**
Target is 2.5 on a scale of 1 (Beginning), 2 (Developing), 3 (Accomplished), 4 (Exemplary).

**Findings 2012-2013 - Target: Partially Met**
Of the 113 students assessed for historical and contemporary knowledge, 58 or 51% were evaluated as 1 (beginning), 47 or 42% as 2 (developing), 7 or 6% as 3 (accomplished) and 1 or <1% as 4 (exemplary). This is an average of 1.57 on a scale of 4, which is below the target of 2.5.

**Target for O4: Professional preparation**
Target is 2.5 on a scale of 1 (Beginning), 2 (Developing), 3 (Accomplished), 4 (Exemplary).

**Findings 2012-2013 - Target: Partially Met**
Of the 113 students evaluated for professional preparation, 44 or 39% were assessed as 1 (beginning), 43 or 38% as 2 (developing), 21 or 19% as 3 (accomplished) and 5 or 4% as 4 (exemplary). This is an average of 1.88 on a scale of 4, which is below the target of 2.5.

**M 2: Final Portfolio, Artist’s Statement, Resume and BFA Senior Exhibition (O: 1, 2, 3, 4)**
Final Portfolio submitted containing 15-20 examples of studio work done in 4500 courses and in capstone classes 4940 and 4950 including artist’s statement evidencing knowledge and understanding of one’s own artistic practice. Artist Statement and Resume further evidence students’ competence in writing and communication skills.

Source of Evidence: Portfolio, showing skill development or best work

**Target for O1: Technical skills**
Final Portfolio Reviews and Assessments are conducted by Faculty committee within each discipline. Student generated portfolios of studio work are evaluated in four categories: Technical skills, conceptual skills, historical and contemporary knowledge and professional preparation. Possible scores are: 1 = beginning, 2 = developing, 3 = accomplished, 4 = exemplary. Target for technical skills is 3.5.

**Findings 2012-2013 - Target: Partially Met**
Of the 85 graduating students assessed for their technical skills, 0 or 0% were evaluated as 1 (beginning), 14 or 16% as 2 (developing), 44 or 53% as 3 (accomplished) and 27 or 32% as 4 (exemplary). This is an average of 3.15 on a scale of 4, which is below the target of 3.5.

**Target for O2: Conceptual Skills**
Final Portfolio Reviews and Assessments are conducted by Faculty committee within each discipline. Student generated portfolios
of studio work are evaluated in four categories: Technical skills, conceptual skills, historical and contemporary knowledge and professional preparation. Possible scores are: 1 = beginning, 2 = developing, 3 = accomplished, 4 = exemplary. Target score for conceptual skills is 3.5.

**Findings 2012-2013 - Target: Partially Met**

Of the 85 graduating students assessed for their conceptual skills, 0 or 0% were evaluated as 1 (beginning), 21 or 25% as 2 (developing), 37 or 44% as 3 (accomplished) and 27 or 32% as 4 (exemplary). This is an average of 3.07 on a scale of 4, which is below the target of 3.5.

**Target for O3: Historical and contemporary knowledge**

Final Portfolio Reviews and Assessments are conducted by Faculty committee within each discipline. Student generated portfolios of studio work are evaluated in four categories: Technical skills, conceptual skills, historical and contemporary knowledge and professional preparation. Possible scores are: 1 = beginning, 2 = developing, 3 = accomplished, 4 = exemplary. Target score for historical and contemporary knowledge is 3.5.

**Findings 2012-2013 - Target: Partially Met**

Of the 85 graduating students assessed for their historical and contemporary knowledge, 2 or 2% were evaluated as 1 (beginning), 15 or 18% as 2 (developing), 47 or 55% as 3 (accomplished) and 21 or 25% as 4 (exemplary). This is an average of 3.02 on a scale of 4, which is below the target of 3.5.

**Target for O4: Professional preparation**

Final Portfolio Reviews and Assessments are conducted by Faculty committee within each discipline. Student generated portfolios of studio work are evaluated in four categories: Technical skills, conceptual skills, historical and contemporary knowledge and professional preparation. Possible scores are: 1 = beginning, 2 = developing, 3 = accomplished, 4 = exemplary. Target score for professional preparation is 3.5.

**Findings 2012-2013 - Target: Partially Met**

Of the 85 graduating students assessed for their professional preparation, 0 or 0% were evaluated as 1 (beginning), 20 or 24% as 2 (developing), 32 or 38% as 3 (accomplished) and 33 or 39% as 4 (exemplary). This is an average of 3.15 on a scale of 4, which is below the target of 3.5.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**CTW ART 3910 and CTW 4950 Portfolio II in all 7 studio disciplines**

As of Fall 2009, BFA majors will be required to take the new gateway CTW course ART 3910 Critical Issues in Contemporary Art as they begin the foundation level studio courses in Area G. They will also be required to take the newly designated CTW 4950 Portfolio II course as the capstone course for the major.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** Fall semester 2009
- **Projected Completion Date:** 06/2011
- **Responsible Person/Group:** All Studio faculty in 7 discipline areas of Photography, Textiles, Interior Design, Graphic Design, Sculpture, Drawing/Painting/Printmaking, Ceramics
- **Additional Resources:** As demand for our CTW gateway course ART 3910 Critical Issues in Contemporary Art increases after 2010, additional faculty may be needed to cover this demand.

**Course "Tracking"**

We are exploring having "tracks" when more than one section of a 3000-level course is offered in any given semester. This would allow potential BFA majors in the course area in question to be "tracked" into one section, while potential BFA majors from other areas, as well as potential BA in Art with a Concentration in Art, Art Education, and all other majors would be "tracked" into the other section.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Gateway (Foundations) Portfolio and Statement | Outcome/Objective: Conceptual Skills
  - Historical and contemporary knowledge | Professional preparation | Technical skills
- **Implementation Description:** Spring 2013
- **Projected Completion Date:** 12/2013
- **Responsible Person/Group:** Associate Director and Area Coordinators in consultation with relevant faculty

**Course Sequencing**

The associate director and foundations coordinator will meet with relevant area coordinators and faculty to reconsider the sequencing of courses in some studio areas.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Final Portfolio, Artist’s Statement, Resume and BFA Senior Exhibition | Outcome/Objective: Conceptual Skills
  - Technical skills
- **Implementation Description:** Spring 2013
- **Projected Completion Date:** 12/2013
Responsible Person/Group: Associate Director and Foundations Coordinator

**Staffing of Courses**
We are investigating whether we need to have more regular faculty (rather than GTAs and PTIs) teaching Foundations-level courses and 3000-level courses that are "tracked" for potential majors in a given course area.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- **Measure:** Gateway (Foundations) Portfolio and Statement
- **Outcome/Objective:** Conceptual Skills
  - Historical and contemporary knowledge
  - Professional preparation
  - Technical skills

- **Implementation Description:** Spring 2013
- **Projected Completion Date:** 12/2013
- **Responsible Person/Group:** Associate Director and Foundations Coordinator in consultation with relevant faculty

**Refining Goals for Student Learning**
Learning goals will be refined to align with the mission statement of the School of Art and Design, which is currently being modified, and to better illustrate what we would like our students to be once they complete the program.

- **Established in Cycle:** 2012-2013

Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 Astronomy Ph.D. students demonstrate knowledge of core principles, and an ability to apply that knowledge. Areas of required knowledge are: i. at least two of the core physics areas, classical mechanics, advanced electromagnetic theory, advanced quantum mechanics, and advanced statistical mechanics. ii. fundamental astrophysics and astronomical instrumentation and techniques. iii. stellar atmospheres, stellar structure and evolution, the interstellar medium, extragalactic astronomy, and relativistic astrophysics and cosmology. All Ph.D. students shall be able to demonstrate and apply appropriate mathematical skills in the context of their specialization, including matrix algebra, vector and
Students effectively use specialized scientific equipment for data collection and effectively use computers for data analysis, literature research and scientific writing in laboratory and research settings.

### Measures, Targets, and Findings

**M 1: Qualifying Exam 2 (O: 5)**

Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 As part of the M.S. program, each astronomy graduate student takes a first qualifying exam, consisting of an extensive written exam on the broad scope of astronomy and astrophysics and the essential skills required to apply the relevant physical and mathematical reasoning. Students are counseled at this point on their preparedness for further study. Each Ph.D. student takes a second qualifying exam, consisting of an extensive written exam on graduate level astronomy and astrophysics, followed by an oral exam with a committee of four faculty members. Students are advised on their degree progress, and for Ph.D. students, on their preparedness for independent research. The learning outcomes related to core principles and math skills are assessed by the exam committee by rating each student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are available in the Qualifying Exam 2 Evaluation Form.

Source of Evidence: Academic direct measure of learning - other

**Target for O5: Astronomy Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Met**

Four students were rated by the exam committee after completing Qualifying Exam 2. The average rating for Astronomy Knowledge and Math Skills was 3.9 out of 5.0.

**M 2: Research Advisor Evaluation (O: 1, 4, 6)**

Normal 0 false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 The students work in close collaboration with their research advisor throughout the course of their Ph.D. program. The advisor has the opportunity to observe and evaluate the student's progress in collaboration and technology. The learning outcomes are assessed by the research advisor following the student’s successful dissertation defense. The advisor rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are the first section of the advisor evaluation form.

**Target for O3: Scientific Critical Thinking**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

**Target for O5: Astronomy Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

### M 4: Committee Evaluation of Doctoral Defense (O: 2, 3, 4, 5)

Normal false false false EN-US X-NONE X-NONE MicrosoftInternetExplorer4 In the dissertation and oral defense, the student presents the motivation, methods, results, and implications of their research. When the student has finished the dissertation, and successfully defended it, the members of the dissertation committee produce a final assessment. Based on the oral presentation and defense, the committee assesses the learning outcomes related to motivation and implications, the scientific process, oral communication skills, and physics, astronomy, and math knowledge and application. The committee rates the student on each outcome with a score scaled from 1 to 5. The criteria for these scores are set by the assessment committee in consultation with the faculty and are sections of the documents available in the committee member evaluation form and advisor evaluation form.

**Source of Evidence:** Presentation, either individual or group

**Target for O2: Motivations and Implications of Research**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

**Target for O3: Scientific Critical Thinking**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

**Target for O4: Scientific Communication**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

**Target for O5: Astronomy Knowledge and Math Skills**

Target performance is 4.0 out of 5.0 for each learning outcome.

**Findings 2012-2013 - Target: Not Reported This Cycle**

No students were evaluated at the time of their PhD defense in 2012-2013.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Assessment Committee Review and Report**

The departmental assessment committee will present the results for this past year (along with the previous 3 years) to the faculty to keep them informed on the performance of the Ph.D. students in astronomy. The assessment shows very high achievement of learning goals for students in the PhD in Astronomy program. In past years there have been occasional low scores in some areas but all results were very good this year. Therefore, the departmental assessment committee will not be recommending any changes in either the assessment methods or the curriculum at this time.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

*Measure: Committee Evaluation of Dissertation | Outcome/Objective: Astronomy Knowledge and Math Skills*

*Measure: Committee Evaluation of Doctoral Defense | Outcome/Objective: Astronomy Knowledge and Math Skills*

*Motivations and Implications of Research | Scientific Communication | Scientific Critical Thinking*
**Measure:** Qualifying Exam 2 | **Outcome/Objective:** Astronomy Knowledge and Math Skills

**Measure:** Research Advisor Evaluation | **Outcome/Objective:** Collaboration in Scientific Research

**Scientific & Research Technology**

**Scientific Communication**

**Implementation Description:** Assessment Committee will present results at a faculty meeting in the Fall of 2009, at the chairman’s discretion.

**Projected Completion Date:** 05/2012

**Responsible Person/Group:** Brian Thoms

---

**Revise Assessment Data Collection**
In 2012-2013 we will revise the collection of assessment data to remedy the data gaps.

**Established in Cycle:** 2011-2012

**Implementation Status:** Planned

**Priority:** High

**Responsible Person/Group:** Brian Thoms

---

**New Assessment and Reporting System**
Collection and reporting of assessment data for the program has been irregular and inefficient leading to incomplete assessment data and reports. Newly re-formed department standing committee on assessment will re-evaluate the assessment and reporting system. Greater involvement from graduate directors will be sought in new assessment plan.

**Established in Cycle:** 2012-2013

**Implementation Status:** Planned

**Priority:** High

**Responsible Person/Group:** John Wilson

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Collection and reporting of assessment data for the program has been irregular and inefficient leading to incomplete assessment data and reports. Newly re-formed department standing committee on assessment will re-evaluate the assessment and reporting system. Greater involvement from graduate directors will be sought in new assessment plan.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Since data has been irregularly collected in the past year, no significant data-driven changes have been made to the degree program.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Behavior and Learning Disabilities Certification**

*As of: 12/12/2016 05:58 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
Through a focus on teacher education as an area of excellence and research, the BLD Program in the Department of Educational Psychology and Special Education is committed to preparing special educators who can make decisions that enable them to provide high quality instruction and support services consistent with the diverse needs and abilities of individuals with disabilities and their families. Because there is a critical shortage of teachers for students with mild disabilities in Georgia, the members of the BLD Faculty are committed to attracting and retaining highly qualified students who will become new special education teachers. The members of the BLD Faculty recognize that the personnel we prepare must have the flexibility to adapt to the changing role of the special educator, the changing patterns regarding how special education services are delivered, and the changing social and economic context in which individuals with disabilities will live. The growing availability of technology tools, improvements in field-based learning experiences, implementation of research-supported practices in special education, a focus on effective communication, and working collaboratively with other special educators, general educators, parents, and support personnel all have bearing on the enhancement of student learning. The BLD certification program is a post-baccalaureate program giving students initial teacher certification in Special Education General Curriculum: Consultative. A new program plan was developed and approved during 05-06 for this certification. During 06-07, the BLD certification program had approximately 130 students in the certification program; approximately 40 of them completed the program. During 07-08, the BLD certification program had approximately 111 students in the certification program; approximately 48 of them completed the certification program. During the current 08-09 academic year, the BLD certification program had approximately 90 students in the certification program; 31 of them completed the certification program. During the current 09-10 academic year, the BLD certification program had approximately 123 students in the certification program; 44 of them completed the certification program.

**Goals**

G 1: Demonstrates content pedagogical knowledge.
Demonstrates content pedagogical knowledge.
G 2: Understands student development regarding learning.
Understands student development regarding learning.

G 3: Can effectively teach diverse groups of learners.
Can effectively teach diverse groups of learners.

G 4: Can effectively plan and assess instruction.
Can effectively plan for and assess instruction.

**Student Learning Outcomes/Objectives**

**SLO 1: Demonstrates content pedagogical knowledge. (G: 1) (M: 1)**
The teacher demonstrates an understanding of the central concepts, tools of inquiry, and structures of the discipline he or she teaches and creates learning experiences that make these aspects of subject matter meaningful for students.
Relevant Associations: Council for Exceptional Children Standards.

**SLO 2: Demonstrates understanding of how children learn. (G: 2) (M: 2)**
The teacher demonstrates understanding of how children learn and develop over a period of time, and provides learning opportunities that demonstrate a child's intellectual, social, and/or behavioral development/growth.
Relevant Associations: Council for Exceptional Children Standards.

**SLO 3: Effectively teaches diverse groups of children. (G: 3) (M: 3)**
The teacher demonstrates understanding of how students differ in their approaches to learning and uses effective communication and professional behavior while differentiating instruction based on student need.
Relevant Associations: Council for Exceptional Children Standards.

**SLO 4: Effectively plan and assess instruction. (G: 4) (M: 4)**
The teacher plans for and uses assessment in instruction based upon knowledge of subject matter, student needs, the community and curriculum goals.
Relevant Associations: Council for Exceptional Children standards.

**Measures, Targets, and Findings**

**M 1: Teaching Sequence (O: 1)**
EXC 7190 Teaching Sequence using a rubric of 1-4 with 4 being the strongest to include: Rationale and design, lesson plans and continuous assessments and post-assessments and discussion of findings.
Source of Evidence: Project, either individual or group

**Target for O1: Demonstrates content pedagogical knowledge.**
90% of students will score at or above a 3 out of 4 on the EXC 7190 Teaching Sequence Rubric.

**M 2: Pupil change project. (O: 2)**
P-12 change project using a rubric of 1-4 with 4 being the strongest to include a description of the behavior to be changed, a treatment for change, baseline and treatment data, and analysis and discussion of the results.
Source of Evidence: Project, either individual or group

**Target for O2: Demonstrates understanding of how children learn.**
90% of students will score at or above a 3 out of 4 on the P-12 rubric.

**M 3: Performance Evaluation (O: 3)**
Performance Evaluation Rubric of 1-4 with 4 being the strongest to include indicators based on the Georgia Framework.
Source of Evidence: Performance (recital, exhibit, science project)

**Target for O3: Effectively teaches diverse groups of children.**
90% of students will score at or above a 3 out of 4 on the performance evaluation rubric.

**M 4: Lesson Plan (O: 4)**
Lesson Plan Rubric of 1-4 with 4 being the strongest to include lesson title and description, primary learning outcomes, procedures, technology, assessment, modifications, extension, and reflection.
Source of Evidence: Project, either individual or group

**Target for O4: Effectively plan and assess instruction.**
90% of students will score at or above a 3 out of 4 on the lesson plan rubric.
Data for the Initial Certification program in BLD were collected again on the new measures established for the 08-09 academic year as recommended in our APR plan. The data indicate that student performance was met for three measures and was at 86% for the other measure; target for all was 90%. The faculty have indicated that the student's performance on these measures is adequate since they were within 4% points of the target. We will explore increasing reliability in the future. The faculty members are now using the new rubric for performance (mentioned in the 08-09 report) that aligns with the Georgia Framework for Teaching in order to better establish alignment with state standards.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Medium  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Lesson Plan  
- **Outcome/Objective:** Effectively plan and assess instruction.

**Projected Completion Date:** 05/2012  
**Responsible Person/Group:** BLD Coordinator and BLD faculty

**Explore reliability of teaching sequence rubric**  
BLD faculty will discuss teaching sequence rubric and set up trainings for part time instructors and/or graduate teaching assistants as needed to increase the reliability of the instrument.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Low  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Teaching Sequence  
- **Outcome/Objective:** Demonstrates content pedagogical knowledge.

**Implementation Description:** The current instructors using the teaching sequence rubric will meet with any new instructors in order to train new instructors on the use of the rubric. They will determine if further training is warranted.

**Projected Completion Date:** 11/2011  
**Responsible Person/Group:** BLD Coordinator and faculty

**Revise rubric**  
After discussion, the BLD faculty decided to use the same rubric for the P-12 change project across programs.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Low  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Pupil change project  
- **Outcome/Objective:** Demonstrates understanding of how children learn.

**Projected Completion Date:** 05/2012  
**Responsible Person/Group:** Susan Easterbrooks and BLD faculty

**Sample plans will be provided for students to review**  
Faculty will provide samples of previous pupil change projects as they review their expectations for assignments with the students.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Planned  
**Priority:** Low  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Pupil change project  
- **Outcome/Objective:** Demonstrates understanding of how children learn.

**Implementation Description:** Students will be provided sample projects connected with scoring rubrics so they will better understand what is expected of them.

**Projected Completion Date:** 08/2011  
**Responsible Person/Group:** BLD Coordinator and course instructor

---

**Georgia State University**  
**Assessment Data by Section**  
**2012-2013 Behavior and Learning Disabilities MEd**  
*As of: 12/12/2016 05:58 PM EST*  
*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**  
Through a focus on teacher education as an area of excellence and research, the Behavior and Learning Disorders Program in the Department of Educational Psychology and Special Education is committed to preparing advanced special educators who can make decisions that enable them to provide high quality instruction and support services consistent with the diverse needs and abilities of individuals with disabilities and their families. The M.Ed. program in Behavior and Learning Disabilities provides students who already hold certification in special education with the depth of knowledge and the breadth of skills in educating students with mild disabilities required of a "master teacher."

**Goals**  
**G 1: Understands student development regarding learning**  
The student demonstrates understanding of how children learn.
The student demonstrates understanding of how children learn.

G 2: Can effectively teach diverse learners.
Can effectively teach diverse groups of learners.

G 3: Demonstrates content pedagogical knowledge.
Demonstrates content pedagogical knowledge.

**Student Learning Outcomes/Objectives**

**SLO 1: Student demonstrates understanding of learning. (G: 1) (M: 1)**
The student demonstrates understanding of how children learn and develop over a period of time, by providing learning opportunities that demonstrate a child's intellectual, social, and/or behavioral development/growth.
Relevant Associations: Council for Exceptional Children Standards.

**SLO 2: Effectively teaches diverse groups of learners. (G: 2) (M: 2)**
The teacher plans for and uses assessment in instruction based upon knowledge of subject matter, student needs, the community and curriculum goals.
Relevant Associations: Council for Exceptional Children Standards.

**SLO 3: Demonstrates content pedagogical knowledge. (G: 3) (M: 3)**
The teacher demonstrates understanding of the central concepts, tools of inquiry, and structures of the discipline he or she teaches and creates learning experiences that make these aspects of subject matter meaningful for students.
Relevant Associations: Council for Exceptional Children Standards.

**Measures, Targets, and Findings**

**M 1: Performance Evaluation (O: 1)**
Final grade in EXC 7941 (Practicum in Special Education) using a rubric of 1-4 with 4 being the strongest. Note that A = 4, B = 3, C = 2, D or F = 1.
Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Student demonstrates understanding of learning.**
90% of students will score at or above a 3 out of 4.

**Findings 2012-2013 - Target: Met**
For Fall 2012-Summer 2013 with an N of 5, 100% scored at or above 3 out of 4 on the rubric with a range and mean of 4.

**M 2: Assessment for Instruction (O: 2)**
Final grade in EXC 7130 (Assessment for Instructional Planning) using a rubric of 1-4 with 4 being the strongest. Note that A = 4, B = 3, C = 2, D or F = 1.
Source of Evidence: Performance (recital, exhibit, science project)

**Target for O2: Effectively teaches diverse groups of learners.**
90% of students will score at or above 3 out of 4.

**Findings 2012-2013 - Target: Met**
For Fall 2012-Summer 2013 with an N of 11, 100% scored at or above 3 out of 4 on the rubric with a range of 3-4 and a mean of 3.82.

**M 3: Comprehensive Exams (O: 3)**
Up to Spring 2013: To demonstrate mastery of the critical content in the M.Ed. program, a case study will be used to assess student competencies. The case study will contain formal and informal assessment information. Students will be asked to a) make a categorical eligibility recommendation with an explanation and rationale; b) select annual goals, short-term objectives, and instructional objectives for the subject of the case study; and, c) describe a general classroom behavior management system to support academic and social/emotional development. Exams are scored with a rubric with a scale of 1-4, with 4 representing the highest score. Students must earn “3” or “4” on all but one of the items within each section (an average score of 3 or above) to pass the section. Students are allowed one “2” rating in a section. A rating of “1” in any section will result in a failing evaluation for that section. From Summer 2013 - present: To demonstrate mastery of the critical content in the M.Ed. program, students will be asked to respond about the academic and/or behavioral difficulties that pupils with learning disabilities, emotional disturbance, or mild intellectual disabilities commonly experience across a variety of educational settings throughout their P-12 career. Specifically, for these pupils, students will be asked to: describe the population; describe academic, behavioral, or secondary transition/education intervention/strategy/method to improve outcomes for specific characteristics and/or skill deficits/excesses that might be exhibited by pupils; synthesize the research literature (minimum of 2 studies) on the effectiveness of the intervention/strategy/method; describe how a teacher would implement this intervention/strategy/method in a school environment, including the infusion of technology, collaborations with other teachers and/or family members, and effects on the learning environment; describe how a teacher would monitor the effectiveness of the intervention/strategy/method from baseline through intervention phases; and describe how the teacher may differentiate (change their instruction) this intervention/strategy/method for a non-responder. Exams are scored with a
rubric with a scale of 0 (did not meet) to 2 (met). Students must meet 16 out 20 indicators (80%) to pass the exam.

The Target for O3: Demonstrates content pedagogical knowledge.

90% of students will score at or above 3 out of 4.

**Findings 2012-2013 - Target: Partially Met**

For Fall 2012-Spring 2013: with an N of 12 total students, 10 (or 83.3%) scored at or above 3 out of 4. For Summer 2013, with an N of 3, 100% scored at 80% or better on the rubric with a range of 16 indicators met. Taken all together, 13 out of 15 (87%) of students met this target, which is approaching our goal of 90%

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Monitoring Student Progress**

Data for the Masters Program in BLD are being collected using new rubrics for two goals a) performance evaluation - student demonstrates understanding of learning (goal 90%; achieved 100%), and (b) assessment for instruction - effectively teaches diverse groups of learners (goal 90%; 93% achieved). Both targets were met and data will be monitored on these two goals to determine whether changes are needed. Per earlier data and action plans, the BLD faculty continue to address student data on the third goal - comprehensive exam - demonstrates content pedagogical knowledge. This year, the goal was partially met (goal 90%; 83% achieved). Based on previous student data, the BLD faculty have created a new comprehensive exam format, questions, and rubric which will be rolled out, as an option in Spring 2013 and permanently in Fall 2013 or Spring 2014 which is more reflective of the curricula changes and updates which have been made. The new exam format and questions will better assess the student's pedagogical knowledge of the content in the program. In addition, a comprehensive literature list will be made available to all students taking comprehensive exams as a study tool.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** Medium
- **Implementation Description:** New comprehensive exam format, question, rubric, and study tool
- **Projected Completion Date:** 09/2014
- **Responsible Person/Group:** BLD faculty
- **Additional Resources:** None

**Analysis Questions and Analysis Answers**

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

N/A

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

N/A

**CTW Reflection 3:** Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

N/A

**CTW Reflection 4:** Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

N/A

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Beginning in Summer 2013, the program instituted a new comprehensive exam format, questions, and rubric that is more reflective of the curricula changes and updates which have been made. Three students took the exam in Summer 2013, and all three passed. Program faculty will continue to monitor students' responses to the new exam format during 2013-2014, and modify the questions and rubric as needed.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Although the data from those students who have taken the new comprehensive exam is promising, it is preliminary at best. We will continue to monitor students' responses to the new exam format during 2013-2014, and modify the questions and rubric as needed.
Goals

G 1: Area D
Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

Student Learning Outcomes/Objectives

SLO 1: Content in Biology (M: 1, 2)
Students will be able to recall basic content in Biology, including but not limited to: history, conventional metabolic pathways, structure/function of cells, structure/function of human physiology, and how these topics pertain to real-world applications.

SLO 2: Communication
Students will be expected to be able to express ideas about biological content both orally and in writing.

SLO 3: Application of the Scientific Method (M: 3, 4)
Students will be able to apply the scientific method to critically analyze problems in biology. Inherent in these skills are the ability to formulate a hypothesis, perform background research, design appropriate experiments to address biological questions, and analyze the results of the experiment.

SLO 4: Analysis (M: 4)
Students will be able to execute basic problem solving skills and data analysis in biology.

SLO 5: Basic field/lab techniques
Students will be able to perform basic techniques used in biological research which are applied in a laboratory setting and, in some cases, in outdoor settings such as data collection.

Measures, Targets, and Findings

M 1: Content in Bio 2200 (O: 1)
The skin is an effective barrier to pathogens in which of the following ways? A. The salt content of the skin is high. B. The surface cells continually fall off making it difficult for pathogens to gain a foothold. C. Sebum and sweat contain substances that inhibit the growth of most pathogens. D. All of above
Source of Evidence: Standardized test of subject matter knowledge

Target for O1: Content in Biology
80% of students

Findings 2012-2013 - Target: Met
93% answered correctly

M 2: Microbiology BIO2300 content (O: 1)
Which is true regarding the three central metabolic pathways? A. They form high energy bonds that can be used to synthesize ATP. B. They form intermediates that can be oxidized to generate reducing power. C. They form precursor metabolites. D. All of the choices are correct.
Source of Evidence: Standardized test of subject matter knowledge

Target for O1: Content in Biology
75%

Findings 2012-2013 - Target: Met
76%

Findings 2012-2013 - Target: Met
76%

M 3: Analysis in BIO2200 (O: 3)
Removing rats from urban European areas has been one strategy for reducing bubonic plague. Which is the best reason for this strategy being effective?
Source of Evidence: Standardized test of subject matter knowledge

Target for O3: Application of the Scientific Method
75%

Findings 2012-2013 - Target: Met
89%
**Mission / Purpose**
To critically think about and communicate Biology. Students will be able to recall basic concepts in Biology, think critically and evaluate Biological claims, and communicate these concepts both in writing and orally.

**Goals**

**G 1: Area D**
Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Student Learning Outcomes/Objectives**

**SLO 1: Content in Biology (M: 1, 2, 3, 4, 6, 7, 8)**
Students will be able to recall basic content in Biology, including but not limited to: history, conventional metabolic pathways, structure/function of cells, structure/function of human physiology, and how these topics pertain to real-world applications.

**SLO 5: Basic field/lab techniques (M: 5, 11)**
Students will be able to perform basic techniques used in biological research which are applied in a laboratory setting and, in some cases, in outdoor settings such as during data collection.

**Other Outcomes/Objectives**

**O/O 2: Communication**
Students will be expected to be able to express ideas about biological content both orally and in writing.

**O/O 3: Application of the Scientific Method (M: 5, 10)**
Students will be able to apply the scientific method to critically analyze problems in biology. Inherent in these skills are the ability formulate a hypothesis, perform background research, design appropriate experiments to address biological questions, and analyze the results of the experiment.

**O/O 4: Analysis (M: 2, 4, 9, 10, 11)**
Students will be able to execute basic problem solving skills and data analysis in Biology.

**Measures, Targets, and Findings**

**M 1: Animal Biology MP Question (O: 1)**
Multiple choice question on the final exam. Students were asked to evaluate the correct order of appearance of different traits in vertebrate evolution.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Content in Biology**
70% answer question(s) correctly

**Findings 2012-2013 - Target: Met**
70% for one section and 84% for another section
M 2: Animal Biology MP Question (O: 1, 4)
Multiple choice question on the final exam. Students were asked to evaluate the key features of life on land for amphibians.
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Content in Biology**
70% of students get the answer correct

**Findings 2012-2013 - Target: Met**
Section 1: 72% answered the question correctly Section 2: 83% answered the question correctly

**Target for O4: Analysis**
70% of students answer correctly

**Findings 2012-2013 - Target: Met**
Section 1: 72% answered the question correctly Section 2: 83% answered the question correctly

M 3: Animal Biology MP Question (O: 1)
Multiple choice question on the final exam. Students were asked to indicate the function of the secondary palate in crocodiles.
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Content in Biology**
70% of students answer correctly

**Findings 2012-2013 - Target: Partially Met**
Section 1: 69% answered the question correctly Section 2: 98% answered the question correctly

M 4: Animal Biology MP Question (O: 1, 4)
Multiple choice question on the final exam. Students were asked to compare characteristics of avian and non-avian reptiles.
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O1: Content in Biology**
70% of students answer correctly

**Findings 2012-2013 - Target: Partially Met**
Section 1: 75% answered the question correctly Section 2: 62% answered the question correctly

**Target for O4: Analysis**
70% of students answer correctly

**Findings 2012-2013 - Target: Partially Met**
Section 1: 75% answered the question correctly Section 2: 62% answered the question correctly

M 5: Animal Biology MP Question (O: 3, 5)
Students designed and conducted an experiment investigating the behavior of terrestrial isopods. Working in groups of up to 4, students listed different cues that might be used by isopods to remain within the leaf litter. All of the groups then worked together under the guidance of their TA to design an experiment to test the importance of one of these cues for determining where isopods are found. As part of this exercise they generated hypotheses, designed methods for testing their hypotheses, identified and implemented appropriate controls, predicted outcomes for the experiment, and collected and analyzed the data.
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

**Target for O3: Application of the Scientific Method**
80%

**Findings 2012-2013 - Target: Met**
All of the groups across three sections of the lab course (13/13 groups) successfully designed and completed their experiments within the lab session.

**Target for O5: Basic field/lab techniques**
80%

**Findings 2012-2013 - Target: Met**
All of the groups across three sections of the lab course (13/13 groups) successfully designed and completed their experiments within the lab session.

M 6: General Biology Final (O: 1)
Which of the following experimental requirements was necessary for Pasteur to disprove spontaneous generation?
Source of Evidence: Faculty pre-test / post-test of knowledge mastery
<table>
<thead>
<tr>
<th>Target for O1: Content in Biology</th>

</table>

**Target for O5: Basic field/lab techniques**
Findings 2012-2013 - Target:  Met
90% of students were able to correctly determine if a sample had DNA or protein

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action Plan Biology Fall 2009
One issue in our curricula that was identified from assessment data collection was the discontinuity of topics covered in the same courses. We realized that in Cell & Molecular Biology, for example, instructors varied more from topic to topic than expected. This is a problem since our courses constitute components of a building, continuous degree program. Our dept. is holding subcommittee meetings with instructors that teach the same courses to form a concrete consensus on what topics must be covered in major courses. This will standardize the degree program so that students receive similar material in the same courses regardless of the instructor.

- Established in Cycle: 2008-2009
- Implementation Status: Planned
- Priority: High
- Projected Completion Date: 04/2010
- Responsible Person/Group: Frank Cruz, Therese Poole

Curriculum Assessment
At a recent faculty retreat it was realized that the Biology Department has grown large enough to re-examine the content overlap and gaps between required courses. The first step will be to form an Assessment Committee. The committee will decide how to best assess the curricula in consideration of our departmental goals (which are also being clarified).

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: High

Plan to more efficiently collect data from faculty
The Biology Dept. has formed an Assessment Committee to evaluate the structure, content and direction of our curricula. Collection of data from faculty has been difficult. The committee has decided that it appoint 5 faculty members to collect assessment data from various courses. These faculty members will then forward all of their data to Frank Cruz who will submit this data onto the Weave site. This Spring we will collect the data and submit that data onto Weave.

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High

Create activity on avian/non-avian reptiles
Animal biology instructors will meet to discuss how to better teach the characteristics of avian and non-avian reptiles

- Established in Cycle: 2012-2013
- Implementation Status: In-Progress
- Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Animal Biology MP Question
- Outcome/Objective: Content in Biology

- Responsible Person/Group: Amy Horner

Annual Report Section Responses

Most important accomplishments for year-- briefly describe the major things you accomplished over the past year.
We have made some great accomplishments from last year. Primary is the addition of several new CTW courses that will fulfill the second CTW requirement. We have added the following courses: BIOL4250 Cell Cycle and Cancer - CTW BIOL4282 Tumor Immunology - CTW BIOL4280 Immunology and Infectious Diseases - CTW This has provided the department to offer almost enough senior level CTW courses to be able to allow most of our graduating students to finish with their degree in a timely fashion.

Challenges for Next Year--Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.
Our biggest challenges are making sure we can accommodate all of the students for their second CTW course. With the increase in enrollment, we face a conundrum in the sense that we have a difficult time offering enough CTW courses. It is projected that we have over 600 graduating seniors per academic year, which means that we need 24 sections of each CTW per academic year. Currently, we offer 18 sections, 432 students, of the first CTW class BIOL3810 but only about 144 seats in the upper level CTW per academic year. We do not want students to be unable to graduate only because of not being able to get into the second CTW.
Modifications in Measurement Methods—If you modified any of the measures or methods you use in the measurement process, please note those here.

We have a good measurement system for the first CTW but because we have several upper division CTW, we don't have a standardized assessment of these courses. This is a goal we have started working on.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

We have begun to clearly emphasize communication. This was something that was not delineated originally but now is becoming more clear for each CTW class.

University-wide Committee Participation—Use this space to document any staff participation on University-wide committees (e.g., University Senate).

Therese M. Poole has been on the CTW leadership team. She is also on the Signature experience committee. It is the committee's hope that many of the signature experiences can also be CTW classes.

International Activities—Note here any international activities of the department or its staff.

The Biology Department offers several Study Abroad programs: 1. Argentina (virology), 2. Italy (Environmental Science), 3. Taiwan (Microbiology). We also have students from China or Taiwan come for the Summer Institute (4 weeks in summer) and now have two Chinese professors working with our students this semester (BIOL1110 and 1120). In addition, we have a 2+2 program with several universities in China. Currently, we have graduated 4 of these students and have 3 more students in progress. We hope to continue these interactions and increase them to other countries.

Contributions to Student Retention—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

We have several initiatives towards major/minor courses starting in their freshman year. We use the new DegreeWorks system as well as looking at "red flags" on a student's evaluation. The department is reaching out to the newly formed advisement center to make sure that we are all on the same page and that these advisers are aware of opportunities for biology majors. We have been able to secure funding, either through the Dean's Office or through RPG funds, to get more Supplemental Instruction (SI) for several of our "at-risk" classes. We feel that many students have been helped by the SI sessions.

Service to the External Community—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

We have several initiatives to outreach to the community. 1. BioBus - mobile biology laboratory that goes to elementary, middle, and high school students, providing guided experiments in science. 2. FOCUS (Fostering Our Communities Understanding of Science) - students spend 4-8 hours per week at middle or high schools conducting demonstrations or experiments in biology. In addition, they spend 2 hours per week learning teaching pedagogy with teachers in the College of Education. 3. This is not an official GSU-affiliated partnership, but many of our students volunteer at Grady Hospital.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Biology MS**

(Assessment Data as of 12/12/2016 05:58 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Mission of the Department is: a. to provide students with a foundation of scientific literacy in biology necessary to be successful in relevant in academic and professional schools as well as occupations in private industry; b. to increase the understanding of biological processes through innovative research programs.

**Goals**

**G 1: Scientific Professionals**

There are two tracks: 1) non-thesis, which emphasizes scientific literacy and course content; and 2) thesis, which emphasizes scientific literacy, course content and research. Successful students in both tracks will be scientifically literate and possess the ability to synthesize information and formulate logical arguments that can be communicated through written and oral presentations. In addition, successful thesis students will formulate hypotheses, design and perform experiments and analyze and interpret their results. This research will be performed in the laboratories of graduate faculty members.

**G 2: Critical Thinkers**

Students will be able to reason and think critically.

**Student Learning Outcomes/Objectives**

**SLO 1: Scientific Literacy (G: 1, 2) (M: 1, 2)**

Students will demonstrate a knowledge of scientific content as it pertains to their chosen area of concentration in biology.

**Institutional Priority Associations**

- 1 Student retention
- 2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

2.1 Expand support for doctoral programs.
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.2 Establish University-Level Research Centers.
3.4 Enhance supporting infrastructure for the conduct of research.
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

3.1 Enhance a research culture.
3.2 Establish University-Level Research Centers.
3.4 Enhance supporting infrastructure for the conduct of research.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

4 Enhance the global competency of students, faculty and staff.

---

**SLO 2: Conduct Research (G: 1) (M: 1)**

Demonstrating skills of scientific professionals, students will be able to apply scientific principles via performance of a laboratory or literary based paper.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1. Student retention
2. Student promotion and progression

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**

2.1 Expand support for doctoral programs.
3.1 Enhance a research culture.
3.2 Establish University-Level Research Centers.
3.4 Enhance supporting infrastructure for the conduct of research.
3.5 Enhance Georgia State's contributions to the sciences, and health and medical research and education.

5.4 Enhance the global competency of students, faculty and staff.

---

**Measures, Targets, and Findings**

**M 1: Thesis (O: 1, 2)**

The thesis is the capstone assignment. These capstone provides a measure of the accomplishments of thesis students in scientific content, inquiry, and communication. Students will demonstrate the ability to comprehend the current scientific literature; form hypotheses, design experiments, collect data, and evaluate results; place reports of new discoveries into the context of previous scientific progress; and develop an understanding of the impact of these discoveries on science and society. Students will demonstrate a knowledge of scientific content as it pertains to their chosen area of concentration in biology. Students will be able to present their findings and the findings of others in written and/or oral formats.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Scientific Literacy**

90% of the thesis proposals are expected to be approved for continuation on the thesis track.

**Target for O2: Conduct Research**

100% of students conducting laboratory research should complete certification online course.

**Findings 2012-2013 - Target: Met**

100% of students successfully completed the course.

**M 2: Non-thesis (O: 1)**

For non-thesis track students must exhibit satisfactory completion of the non-thesis report. The non-thesis report is the capstone assignment. These capstone provides a measure of the accomplishments of M. S. students in scientific inquiry, scientific content and written communication. Students will demonstrate comprehension of current scientific literature; place reports of new discoveries into the context of previous scientific progress; and describe the impact of these discoveries on science and society.

Source of Evidence: Written assignment(s), usually scored by a rubric
**Student Learning Outcomes/Objectives**

**Mission / Purpose**

The Ph.D. program in the Department of Biology is firmly committed to the twin goals of Excellence and Distinctiveness set forth in the University's Strategic Plan. The Mission of the Department is: a. to provide students with a basic core of scientific literacy in biology that is essential for success in the society of tomorrow; b. to increase the understanding of biological processes through cutting edge research programs, thereby providing students with the opportunity to explore exciting new frontiers through biological research; and c. to work with others in the University system and the state of Georgia in reaching out to the public and communicating the many ways in which new discoveries in biology impact our daily lives and affect the future of our community. To accomplish the mission the Ph.D. program is divided into four concentrations: Applied and Environmental Microbiology, Cell and Molecular Biology and Physiology, Molecular Genetics and Biochemistry, and Neurobiology and Behavior.

**Goals**

**G 1: Scientific Professionals**

Successful students will be effective and efficient scientific professionals. There are four disciplines: Applied & Environmental Microbiology, Cell Biology & Immunology, Molecular Genetics Pathogenesis & Immunity, and Neurobiology & Behavior. Each discipline seeks to provide core fundamental skills that are relatable to specific scientific research areas.

**Student Learning Outcomes/Objectives**

**Target for O1: Scientific Literacy**

60% of students are expected to achieve a score of 4 or higher on a 5 point scale on rubric component assessing synthesizing and evaluating future research directions.

**Annual Report Section Responses**

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

As enrollment numbers increase, the faculty may have more capstone reports to review in addition to current workloads.

**University-wide Committee Participation**—Use this space to document any staff participation on University-wide committees (e.g., University Senate).

Directors and/or staff are to partipate on the University's Graduate Council Committee.

**Publications and Presentations**—Note in this section any articles published or presentations made at professional conferences by staff.

March 31, 2012, the very first Center for Diagnostics and Therapeutics (CDT) Conference was held. Two students participated in the event as follows: Vaishali Pannu (Ritu Aneja, Advisor) "Generation of High-Grade Spindle Multipolarity by Centrosome Hyperamplification and Declustering: a Novel Chemotherapeutic Approach" and Morgan Cook (Julia Hilliard, Advisor) "Design of a Therapeutic Target that Alters p38 Regulation of Cellular Factors are Important for B Virus Infection." Also, a Biotech Symposium was held February 2013, which collaborated with Nanjing University of China. The following GSU professors held scheduled presentations for the event: Yuan Li "Inflammation Research and Collaboration for Funding Leverage", Tim Bartness "Bidirectional Communication between the Brain and Adipose Tissue", Susanna Greer "Control of Gene Transcription and Epigenetic Regulation", Didier Merlin "Intestinal Inflammation and Drug Delivery Design", and Jiang-Dong Li "Regulation of Inflammation and Development of Novel Anti-inflammatory Therapy".

**International Activities**—Note here any international activities of the department or its staff.

Collaborative research efforts are in progress with Nanjing University of China. Such research efforts are to aid in the University’s strategic plan via international collaborations as well as provide grant and academia related opportunities. In addition to research, study abroad programe provide cultural and academic advancements, as students learn concepts in other countries. Some internationally taught classes consists of students that are international students and current University students, which allots for communication from different perspectives.

**Contributions to Student Retention**—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

The MS program provides assistantship opportunities that fund tuition and provide a stipend for many of the students that are enrolled in the program. Assistantships are in areas such as research, teaching, and community educational endeavors. Students must maintain a certain gpa and number of credit hours; this promotes retention, progression, and graduation of students.

**Service to the External Community**—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

The Biology Graduate Student Association actively provides promotes community services via events such as the Atlanta Food Bank service event. Also, collaborative laboratory research is conducted in conjunction with the Centers for Disease Control, other universities, and area hospitals.

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Biology PhD**

(Include those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The Ph.D. program in the Department of Biology is firmly committed to the twin goals of Excellence and Distinctiveness set forth in the University’s Strategic Plan. The Mission of the Department is: a. to provide students with a basic core of scientific literacy in biology that is essential for success in the society of tomorrow; b. to increase the understanding of biological processes through cutting edge research programs, thereby providing students with the opportunity to explore exciting new frontiers through biological research; and c. to work with others in the University system and the state of Georgia in reaching out to the public and communicating the many ways in which new discoveries in biology impact our daily lives and affect the future of our community. To accomplish the mission the Ph.D. program is divided into four concentrations: Applied and Environmental Microbiology, Cell and Molecular Biology and Physiology, Molecular Genetics and Biochemistry, and Neurobiology and Behavior.

5.4 Enhance the global competency of students, faculty and staff.
Measures, Targets, and Findings

M 2: PhD Qualifying Exam (O: 1, 2, 3)

Students must prepare, submit and orally defend an NIH-style research proposal. The examination process follows a specific timeline:

1. Students must submit a pre-proposal in which they state the nature of the problem, present their hypothesis, and briefly describe their experimental design. The pre-proposal is evaluated by a 3-member faculty committee who either grant their approval or make suggestions.
2. After the pre-proposal or a revised pre-proposal has been approved, students have two months to complete the full proposal. During this time period, they receive mentoring from their Committee in the form of 1-2 meetings in which they present their progress on developing the proposal and receive suggestions from the Committee.
3. Students submit their completed proposals and orally defend them before their Committees. The Committee then makes one of the following assessments of student performance:
   a) Pass (satisfactory performance on both the written and oral parts of the examination);
   b) Qualified Pass (satisfactory performance on the written proposal, but deficiencies noted in the oral defense);
   c) Conditional Pass (certain parts of the written proposal must be revised); or
   d) Fail (unsatisfactory performance on both the proposal and the oral defense). Students who Fail the examination twice are subject to expulsion from the Ph.D. program.

Target for O1: Experimental Design

Achievement Target: 75% of students are expected to receive a Pass on their first attempt, and 90% are expected to receive a Pass, Qualified Pass, or Decision Pending. Of those who receive a Qualified Pass or a Conditional Pass, 80% are expected to meet the conditions stipulated by their Committee within 30 days.

Findings 2012-2013 - Target: Partially Met

Findings (2011-2012) - Achievement Target: Partially Met 10 students took the Ph.D. qualifying examination in the 2011-2012 academic year. Of these 10 (70%) received a Pass on their first attempt. 1 passed on the 2nd attempt. Of those 2 students remaining who did not pass, 1 is retaking the examination during the Fa13 semester and the third has left the program.

Findings (2010-2011) - Achievement Target: Partially Met 9 students took the Ph.D. qualifying examination in the 2010-2011 academic year. Of these 9 (67%) received a Pass on their first attempt. Of those students who did not pass, 2 are retaking the examination during the Fa12 semester, and the third has left the program.

Findings (2008-2009) - Achievement Target: Met 19 students took the Ph.D. qualifying examination in the 2008-2009 academic year. Of these 15 (79%) received a Pass on their first attempt, while 3 (16%) received either a Qualified Pass or Decision Pending and one student (5%) failed the exam for the second time. Those students receiving a Qualified Pass or Decision Pending subsequently satisfied the conditions required to pass the examination.

Findings (2007-2008) - Achievement Target: Partially Met Seventeen students took the Ph.D. qualifying examination in the 2007-2008 academic year. Of these 10 (59%) received a Pass on their first attempt, while 7 (38%) received either a Pass, Qualified Pass or Decision Pending. Those students receiving a Qualified Pass or Decision Pending subsequently satisfied the conditions required to pass the examination. Of those students who did not pass, three are retaking the examination during the Fa08 semester, and the fourth has left the program.

Findings (2006-2007) - Achievement Target: Met Sixteen students took the Ph.D. qualifying examination in the 2006-2007 academic year. Of these 12 (75%) received a Pass on their first attempt, while 15 (94%) received either a Pass, Qualified Pass or Decision Pending. The student who received the Decision Pending has satisfied the conditions required for a Pass. The two students who received a Qualified Pass took their examinations in the Sp07 semester; therefore, six months have not yet elapsed since the date of their evaluation.

Findings (2005-2006) - Achievement Target: Met Eighteen students took the Ph.D. qualifying examination in the 2005-2006 academic year. Of these, 15 (83%) received a Pass, and 17/18 (94%) received a Pass, Qualified Pass, or Decision Pending. Both of the two who received a Qualified Pass met the conditions of their qualified status within six months.

Target for O2: Scientific Inquiry and Research

Achievement Target: 75% of students are expected to receive a Pass on their first attempt, and 90% are expected to receive a Pass, Qualified Pass, or Decision Pending. Of those who receive a Qualified Pass or a Conditional Pass, 80% are expected to meet the conditions stipulated by their Committee within 30 days.

Findings 2012-2013 - Target: Partially Met

Findings (2011-2012) - Achievement Target: Partially Met 10 students took the Ph.D. qualifying examination in the 2011-2012 academic year. Of these 10 (70%) received a Pass on their first attempt. 1 passed on the 2nd attempt. Of those 2 students remaining who did not pass, 1 is retaking the examination during the Fa13 semester, and the third has left the program.

Findings (2010-2011) - Achievement Target: Partially Met 9 students took the Ph.D. qualifying examination in the 2010-2011 academic year. Of these 9 (67%) received a Pass on their first attempt. Of those students who did not pass, 2 are retaking the examination during the Fa12 semester, and the third has left the program.

Findings (2008-2009) - Achievement Target: Met 19 students took the Ph.D. qualifying examination in the 2008-2009 academic year. Of these 15 (79%) received a Pass on their first attempt, while 3 (16%) received either a Qualified Pass or Decision Pending and one student (5%) failed the exam for the second time. Those students receiving a Qualified Pass or Decision Pending subsequently satisfied the conditions required to pass the examination.

Findings (2007-2008) - Achievement Target: Partially Met Seventeen students took the Ph.D. qualifying examination in the 2007-2008 academic year. Of these 10 (59%) received a Pass on their first attempt, while 7 (38%) received either a Pass, Qualified Pass or Decision Pending. Those students receiving a Qualified Pass or Decision Pending subsequently satisfied the conditions required to pass the examination. Of those students who did not pass, three are retaking the examination during the Fa08 semester, and the fourth has left the program.

Findings (2006-2007) - Achievement Target: Met Sixteen students took the Ph.D. qualifying examination in the 2006-2007 academic year. Of these 12 (75%) received a Pass on their first attempt, while 15 (94%) received either a Pass, Qualified Pass or Decision Pending. The student who received the Decision Pending has satisfied the conditions required for a Pass. The two students who received a Qualified Pass took their examinations in the Sp07 semester; therefore, six months have not yet elapsed since the date of their evaluation.

Findings (2005-2006) - Achievement Target: Met Eighteen students took the Ph.D. qualifying examination in the 2005-2006 academic year. Of these, 15 (83%) received a Pass, and 17/18 (94%) received a Pass, Qualified Pass, or Decision Pending. Both of the two who received a Qualified Pass met the conditions of their qualified status within six months.

Target for O3: Scientific Communication

Achievement Target: 75% of students are expected to receive a Pass on their first attempt, and 90% are expected to receive a Pass, Qualified Pass, or Decision Pending. Of those who receive a Qualified Pass or a Conditional Pass, 80% are expected to meet the conditions stipulated by their Committee within 30 days.

Findings 2012-2013 - Target: Partially Met

Findings (2011-2012) - Achievement Target: Partially Met 10 students took the Ph.D. qualifying examination in the 2011-2012 academic year. Of these 10 (70%) received a Pass on their first attempt. 1 passed on the 2nd attempt. Of those 2 students remaining who did not pass, 1 is retaking the examination during the Fa13 semester, and the third has left the program.

Findings (2010-2011) - Achievement Target: Partially Met 9 students took the Ph.D. qualifying examination in the 2010-2011 academic year. Of these 9 (67%) received a Pass on their first attempt. Of those students who did not pass, 2 are retaking the examination during the Fa12 semester, and the third has left the program.

Findings (2008-2009) - Achievement Target: Met 19 students took the Ph.D. qualifying examination in the 2008-2009 academic year. Of these 15 (79%) received a Pass on their first attempt, while 3 (16%) received either a Qualified Pass or Decision Pending and one student (5%) failed the exam for the second time. Those students receiving a Qualified Pass or Decision Pending subsequently satisfied the conditions required to pass the examination.

Findings (2007-2008) - Achievement Target: Partially Met Seventeen students took the Ph.D. qualifying examination in the 2007-2008 academic year. Of these 10 (59%) received a Pass on their first attempt, while 7 (38%) received either a Pass, Qualified Pass or Decision Pending. Those students receiving a Qualified Pass or Decision Pending subsequently satisfied the conditions required to pass the examination. Of those students who did not pass, three are retaking the examination during the Fa08 semester, and the fourth has left the program.

Findings (2006-2007) - Achievement Target: Met Sixteen students took the Ph.D. qualifying examination in the 2006-2007 academic year. Of these 12 (75%) received a Pass on their first attempt, while 15 (94%) received either a Pass, Qualified Pass or Decision Pending. The student who received the Decision Pending has satisfied the conditions required for a Pass. The two students who received a Qualified Pass took their examinations in the Sp07 semester; therefore, six months have not yet elapsed since the date of their evaluation.

Findings (2005-2006) - Achievement Target: Met Eighteen students took the Ph.D. qualifying examination in the 2005-2006 academic year. Of these, 15 (83%) received a Pass, and 17/18 (94%) received a Pass, Qualified Pass, or Decision Pending. Both of the two who received a Qualified Pass met the conditions of their qualified status within six months.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action Plan for Qualifying Exam
Related Action Plans: Evaluation of Revised Doctoral Examination Format During the 2011-2012 academic year our goal was partially met. In addition there was frustration among faculty regarding systematic areas of weakness and consistency of the evaluations. We are instituting a grading rubric that will be completed by all of the examiners. (see appendix 2). During the 2010-2011 academic year, the format for the Ph.D. examination was modified in a way that decreases the complexity of the proposal-based format and limits faculty input into the process. Compared with the 2009-2010 year, a lower percentage of students passed the exam on the first attempt. This may be due to the need for both students and faculty to adjust to the new format. The Department has decided to use the new format for another year and, should the trend toward low pass percentages continue, re-evaluate the exam format at that time. For more information, see the Action Plan Details section of this report. M 2: Time to receipt of degree Students are expected to complete their degrees in a timely fashion. The current median time to receipt of degree in the biological disciplines that form the research focus in our department is approximately 6-6.5 years. Achievement Target: 50% of students who receive their Ph.D.s will have spent 6.5 years or less in the doctoral program.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

**Related Action Plans**: Evaluation of Revised Doctoral Examination Format During the 2011-2012 academic year our goal was partially met. In addition there was frustration among faculty regarding systematic areas of weakness and consistency of the evaluations. We are instituting a grading rubric that will be completed by all of the examiners. (see appendix 2). During the 2010-2011 academic year, the format for the Ph.D. examination was modified in a way that decreases the complexity of the proposal-based format and limits faculty input into the process. Compared with the 2009-2010 year, a lower percentage of students passed the exam on the first attempt. This may be due to the need for both students and faculty to adjust to the new format. The Department has decided to use the new format for another year and, should the trend toward low pass percentages continue, re-evaluate the exam format at that time. For more information, see the Action Plan Details section of this report. M2: Time to receipt of degree Students are expected to complete their degrees in a timely fashion. The current median time to receipt of degree in the biological disciplines that form the research focus in our department is approximately 6-6.5 years. Achievement Target: 50% of students who receive their Ph.D.s will have spent 6.5 years or less in the doctoral program.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The data has revealed areas where the program may be strengthened and improved. We are instituting a rubric that will be completed by all of the examiners. (see appendix 2).

**Annual Report Section Responses**

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

As the number of students increase, the funding may not be present to support all of the students.

**Modifications in Intended Outcomes**—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

Instructional Learning has been modified to include 7 core courses available to all candidates of the PhD program. Previously, there were only 2 core curriculum courses for students to select per discipline. However, some students needed background coursework from other areas in order to be more productive in the PhD program.

**University-wide Committee Participation**—Use this space to document any staff participation on University-wide committees (e.g., University Senate). Program Directors and/or Staff may attend Graduate Council Meetings.

**Publications and Presentations**—Note in this section any articles published or presentations made at professional conferences by staff.

March 31, 2012, the very first Center for Diagnostics and Therapeutics (CDT) Conference was held. Two students participated in the event as follows: Vaishali Pannu (Ritu Aneja, Advisor) "Generation of High-Grade Spindle Multipolarity by Centrosome Hyperamplification and Declustering: a Novel Chemotherapeutic Approach" and Morgan Cook (Julia Hiliard, Advisor) "Design of a Therapeutic Target that Alters p38 Regulation of Cellular Factors are Important for B Virus Infection." Also, a Biotech Symposium was held February 2013, which collaborated with Nanjing University of China. The following GSU professors held scheduled presentations for the event: Yuan Li "Inflammation Research and Collaboration for Funding Leverage", Tim Bartness "Bidirectional Communication between the Brain and Adipose Tissue", Susanna Greer "Control of Gene Transcription and Epigenetic Regulation", Didier Merlin "Intestinal Inflammation and Drug Delivery Design", and Jiang-Dong Li "Regulation of Inflammation and Development of Novel Anti-inflammatory Therapy".

**International Activities**—Note here any international activities of the department or its staff.

Collaborative research efforts are in progress with Nanjing University of China. Such research efforts are to aid in the University’s strategic plan via international collaborations as well as provide grant and academia related opportunities. In addition to research, study abroad programs provide cultural and academic advancements, as students learn concepts in other countries. Some
internationally taught classes consists of students that are international students and current University students, which allots for communication from different perspectives.

**Contributions to Student Retention**—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

Currently, the PhD program supports doctoral students for more than 5 years which aids in the retention of students.

**Service to the External Community**—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

The Biology Graduate Student Association actively provides promotes community services via events such as the Atlanta Food Bank service event. Also, collaborative laboratory research is conducted in conjunction with the Centers for Disease Control, other universities, and area hospitals.

---

**Mission / Purpose**

The Master of Science degree is designed for students who wish to work as Business Analysis practitioners. A typical student would have an undergraduate business degree, strong functional experience, or exceptional interest in Business Analysis. The program blends the elements of the Business Analysis (problem solving, information technology and analytical methods) so that every graduate will have a foundation in the Business Analysis discipline. The emphasis is on a deeper understanding of the concepts and techniques used. Graduates of the program will ideally enter a career path requiring analysis and decision support in any functional area of business, or across functional areas.

This Mission was formulated in 2005-2006. It was not moved to this cycle when WEAVE was updated.

**Goals**

**G 1: Goal of the MS in Business Analysis**

The goal of the MS in Business Analysis program is to provide students seeking a degree with a singular focus on business analyses tools, techniques and frameworks with the theory, method, and rational for understanding, selecting, and utilizing those tools, techniques, and frameworks over a wide range of applications used in for-profit and not-for-profit organizations in the 21st century.

**Student Learning Outcomes/Objectives**

**SLO 1: Qualitative Analysis of Business Situation (M: 1)**

Normal 0 false false false EN-US X-NONE X-NONE Students should be able to qualitatively state the key issues clearly and accurately the issues in a business problem.

**SLO 2: Model Building Ability (M: 2)**

Normal 0 false false false EN-US X-NONE X-NONE Students will be able to clearly identify the dependent variable(s) and the appropriate metrics in a given business problem.

**SLO 3: Understanding of Techniques (M: 3)**

Normal 0 false false false EN-US X-NONE X-NONE Students will understand when and how to perform problem solving techniques for business problems and how to interpret the results.

**SLO 4: Software Skills (M: 4)**

Students will acquire expertise in the selection and use of key decision making software packages.

**Measures, Targets, and Findings**

**M 1: Qualitative Analysis of Business Situation (O: 1)**

Normal 0 false false false EN-US X-NONE X-NONE Students will be measured on their ability to a) understand the business goals, b) identify the key variables that need to be analyzed, c) analyze the potential relationships among the variables and d) interpret the results of their analysis.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Qualitative Analysis of Business Situation**

80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 1 is to be used in scoring on assignments and projects from courses across the curriculum. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in every course where it is applicable during the academic year Learning Outcome 1. Rubric Qualitative Analysis of Business Situation Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Understanding of the business goal / issues is able to state the key issues clearly and accurately Either clarity or accuracy can be improved Both clarity and accuracy are below expectation It is clear that the student does not understand the issues is identifying Key variables that need to be analyzed Knows clearly what variables must be used to represent the key issue(s) Some lack of clarity in expressing the key variables Unsure or incomplete understanding of what needs to be analyzed. Does not understand
the key variable that relate to the issues. iii. Analysis potential relationships among variables Accurate and thorough qualitative analysis of the situation Some lack of clarity in expressing the relationships Weak understanding of relationships among concepts/variables Very little understanding of how variables/concepts are related. iv. Interpretation of results Can clearly relate the results of model building and quantitative analysis back to the main issue Can make the connection of model results to situation most of the time Some errors in interpretation of results in the context of the situation Inability to connect the results of model with the situation at hand.

## Findings 2012-2013 - Target: Met

The average score was 3.50. The target was met. Our program is very practical in nature and we are generally successful in helping students relate the subject matter to real business issues.

### M 2: Model Building Ability (O: 2)

In developing a model students will be measured on their ability to a) identify the dependent variable(s) and the appropriate metrics, b) identify key independent variables and their metrics, c) manage data collection, cleaning and transformation, and d) develop and validate a model.

Source of Evidence: Written assignment(s), usually scored by a rubric

### Target for O2: Model Building Ability

80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 2 is to be used in scoring on assignments and projects from MGS 8150. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in MGS 8150 each time the class is offered. Learning Outcome 2 Model Building Ability Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Identifying the dependent variables and appropriate metrics Can clearly identify the dependent variable(s) and the appropriate metrics Can identify the variables, but unsure about measurement Unsure about the dependent variable Does not understand the connection between the issue at hand and the dependent variable ii. Identifying Key independent variables and their metrics Can clearly identify the independent variable(s) and the appropriate metrics Can identify the variables, but unsure about measurement Unsure about the independent variables Does not understand the connection between the dependent and the independent variables iii. Dealing with Data – collection, cleaning, transformations Accurate and thorough preliminary analysis of the data Most parts of preliminary analysis done well Skipped or misunderstood some aspects of data preparation Poor understanding of the need to examine data carefully before modeling. iv. Model Development and validation Clear demonstration of a viable model and results from a validation. Possibly accurate model, not validated sufficiently Some errors in model building Model inappropriate or has too many errors

## Findings 2012-2013 - Target: Met

The average score was 3.70. As with the previous year, we believe that MS students who are quantitatively strong tend to choose this area, and do well as a result. We can make the curriculum a little more challenging for them, but must do so without at the same time expecting the same of MBA students.

### M 3: Understanding of Techniques (O: 3)

Students will show skills using a) regression analysis, b) time-series forecasting, c) factor and cluster analysis, and d) discriminant analysis and/or logistic regression.

Source of Evidence: Written assignment(s), usually scored by a rubric

### Target for O3: Understanding of Techniques

80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 3 is to be used in scoring on assignments and projects from across the curriculum. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in every course where it is applicable during the academic year Learning Outcome 3 Understanding of Techniques Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Regression Analysis Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied. ii. Time Series Forecasting Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied. iii. Factor/Cluster Analysis Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied. iv. Discriminant Analysis or Logistic Regression Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied.

## Findings 2012-2013 - Target: Met

The average score was 3.40, meeting the target. Once again, we believe the depth of mathematical treatment can be increased for the MS program.

### M 4: Software Skills (O: 4)

This measure evaluates the students' expertise in using key software in business decision analysis and problem solving situations. It will be assessed during the completion of projects and assignments across the curriculum.

Source of Evidence: Project, either individual or group

### Target for O4: Software Skills

Inaccurate work. Needs constant help to perform expected tasks.

**Findings 2012-2013 - Target: Met**

The average score was 3.30. While students do well typically, SAS is a difficult software package to learn for most students. Some lab sessions can perhaps be added as an aid. Ideally, there should be a course in programming for MS students.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Continual Improvement Actions**

The assessment data show that both the programs are currently meeting or exceeding expectations, and have shown improvement over the data in 2008. With this in mind, the key elements of the action plan are as follows: 1. To continue the efforts made over the past few years in keeping the course material current, updating cases and examples to reflect industry practices today. 2. To add more resources online to aid in software competency. 3. To encourage students to engage in collaborative learning. Students post projects on the web and learn from each others’ work. This strategy has over the years yielded very positive results.

**To Hire New Faculty**

Two trends have been noted in this area: 1. Analytics skills are increasingly used in business, and new techniques are being developed to analyze data. 2. Enrollment in our courses is going up. We need new faculty to meet the demand for existing courses as well as to offer new ones.

<table>

**Consider options for fast track MS in Business Analysis**

Given the increasing need for students with Business Analytics skills in organizations, a fast track program can be developed to achieve the following: 1. Create a cohort of just MS students in courses, so that the courses may be tailored to have more mathematical depth than is possible in an MBA class. 2. Create a program that goes across departments within the college. Analytics skills are applied in all areas of an organization, and expertise from various departments will make it a stronger program.

<table>

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The assessment process remains the same.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on
your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The associate dean led a committee of faculty from various departments in the college to design a research focused MS in Analytics that would add more depth in the program for MS students, addressing the need identified over the past few years. The multidisciplinary program would add more programming, mathematics, and application datasets for students to gain mastery over the subject.

---

**Georgia State University**

**2012-2013 Chemistry Assessment of Core**

As of: 12/12/2016 05:58 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

---

**Mission / Purpose**

The chemistry department has long supported the University mission. We work to create an environment that provides for the education of students from all walks of life, traditional, non-traditional and people of all races, creeds and genders without bias. We adhere to the principle of liberal arts education with our faculty interacting with our students both inside and outside the classroom on a routine basis. Our goals are to deliver a high quality instructional program both at the undergraduate and graduate levels to prepare our students for productive careers in post-graduate studies and the job market. We endeavor to have both our faculty and our students participate actively in scholarly pursuits, including oral presentations, submission of grant proposals, internships, graduate and undergraduate stipends, and fellowships. A unique characteristic of the chemistry department is our affiliation with the American Chemical Society (ACS). The ACS affiliation provides national standards of learning outcomes and assessment for the professional training of chemists for real life work in the chemical sciences. This includes industrial settings, government work, and academic areas. The intent is to determine what knowledge and skills are needed by practitioners in the field, what is currently taught to undergraduates, and how successful our teaching is. The ACS endeavors to encourage national improvements in curriculum and instruction through the various activities of its Division of Chemical Education and through its certification program. Faculty members are encouraged to attend seminars given by this division at the two national society meetings and at regional meetings each year. The chemistry department is certified by the ACS. This involves a full program review by the ACS every 5 years with a short annual review of senior research reports (our capstone courses) and student certifications. Course syllabi, including content and the number and types of courses taught, undergraduate research reports, and the professional quality of the instrumentation used in our laboratories are of prime consideration in the certification process. Additional benefits of our association with the ACS are the access to standardized tests that allow us to assess our students learning outcomes compared to national standards. In order to graduate with a B.S. in chemistry and be successful in careers after college, the students should show proficiency on these exams as a measure of their obtaining fundamental knowledge of the prescribed chemistry curriculum compared to national standards. Because these tests measure fundamental knowledge, we also employ an extensive laboratory curriculum that encourages analytical thought processes and concludes with development of extensive writing skills leading to final reports and oral presentations in our capstone courses. In conjunction with our use of ACS exams, we also employ an internal review and revision process. We have committees in place for evaluation of each major area of the undergraduate curriculum. This includes freshmen chemistry (all first and second semester core courses), organic chemistry (second year chemistry), biochemistry (third and fourth year chemistry), physical chemistry (third and fourth year chemistry), analytical chemistry (third and fourth year chemistry), and review of senior research theses. A review of student outcomes and their assessment is conducted by each committee with appropriate feedback given to individual instructors to enhance our courses and continue to let them evolve to a better level. Since critical thinking is so important to the discipline this is the measure that we will be addressing in the core.

**Goals**

**G 1: Critical Thinking Assessment in the Core**

Area D Critical Thinking Assessment for Chemistry Critical thinking skills center on applying, analyzing, synthesizing, and evaluating information and methods. Students need thorough practical training in research techniques. These must include not only mastery of instrumentation and the calibration of same, but the design of the relevant control experiments. Overall, they need to gain mastery with the techniques that chemists use to measure data, and the conventions that chemists use to express data. Students must learn to evaluate their data, looking in detail for statistical significance. Students not only have to know facts, they should also be able to design experiments to ascertain if these facts are true. It is vital that the skills learned in one situation be transferable to related situations. One of the key aspects of teaching critical thinking is developing the higher order cognitive skills of decision making and problem solving. It is vital to create an atmosphere where students grow in their ability to reason. 1) The American Chemical Society provides national-level exit exams for all the area D courses within the chemistry program. A representative faculty committee for area D was formed in 2004 and 8 questions from each test were chosen as questions that would require critical thinking. The faculty voted that a 2/8 would demonstrate appropriate critical thinking skills. The expected outcomes were based on the Department of Chemistry Learning Outcome rubric submitted to the Provost’s office prior to Fall 2004. 2) A rubric was developed to assess critical thinking skills demonstrated in the laboratory reports required for these courses.

**G 2: The Nature of Science**

The core area D deals with the nature of science.

**Student Learning Outcomes/Objectives**

**SLO 2: Using critical thinking skills to interpret data (G: 1) (M: 5)**

Laboratory reports are used in order to assess students’ ability to interpret data. A rubric was developed based on American Chemical Society Guidelines to assess the laboratory reports. The department goal is for 85% of students to receive an adequate or better. The rubric is in the document repository.

**SLO 3: ACS questions (G: 2)**

Specific questions from the ACS exams for 1151, 1152 1211 and 1212 were used to determine the students knowledge of the nature
General Education/Core Curriculum Associations

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Other Outcomes/Objectives

O/O 1: Solving Problems related to chemistry (G: 1) (M: 1, 2, 3, 4)
Specific questions from the ACS exit examination for each course were chosen by the faculty. The national mean and medium for these questions is known and the department uses this as an indicator of students' critical thinking skills. The national mean for all exams is between 2.5 and 3.1 questions correct. (Nationally for this subset of questions the average student answers 2.5 - 3.1 of the 8 questions correct) The departmental goal is 4 out of the 8 questions correct.

Measures, Targets, and Findings

M 1: ACS exam questions for 1151 (O: 1)
These questions are copyrighted and can not be placed in report. 
Source of Evidence: Standardized test of subject matter knowledge

Target for O1: Solving Problems related to chemistry
Goal was 4 out of 8. Students averaged 6.2 out of 8.

Findings 2012-2013 - Target: Met
Students averaged 6 out of 8

M 2: ACS exam in 1152 (O: 1)
ACS results of 8 critical thinking questions off of Chem 1152 exam
Source of Evidence: Standardized test of subject matter knowledge

Target for O1: Solving Problems related to chemistry
Goal was 4/8

Findings 2012-2013 - Target: Met
Students averaged 4.1 out of 8.

M 3: ACS Exit exam in 1211 (O: 1)
Students got 4/8 on 1211 ACS exit exam on critical thinking problems
Source of Evidence: Standardized test of subject matter knowledge

Target for O1: Solving Problems related to chemistry
Goal was 4/8

Findings 2012-2013 - Target: Met
Students averaged 4.3 out of 8

M 4: ACS result in 1212 (O: 1)
Students should receive at least a 4/8 on critical thinking questions on the ACS exam
Source of Evidence: Standardized test of subject matter knowledge

Target for O1: Solving Problems related to chemistry
Goal was 4 out of 8.

Findings 2012-2013 - Target: Met
Students averaged 5 out of 8

M 5: Laboratory Reports in 1211 and 1212 (O: 2)
Assessment of Critical thinking in laboratory report for 1211 and 1212 students via rubric.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Using critical thinking skills to interpret data
85% of students should receive an adequate or better.

Findings 2012-2013 - Target: Met
87.2 % were adequate
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Pre-lab lecture**

Improve the understanding of what is taking place in this particular laboratory with clearer theory during pre-lab lecture.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**

- **Measure:** ACS Exit exam in 1211
- **Outcome/Objective:** Solving Problems related to chemistry

**Emphasize quantitative skills**

Students who enter these course tend to have weak practical mathematical skills.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** More practical math problems on worksheets and pre test materials

### Mission / Purpose

The chemistry department has long supported the University mission. We work to create an environment that provides for the education of students from all walks of life, traditional, non-traditional and people of all races, creeds and genders without bias. We adhere to the principle of liberal arts education with our faculty interacting with our students both inside and outside the classroom on a routine basis. Our goals are to deliver a high quality instructional program both at the undergraduate and graduate levels to prepare our students for productive careers in post-graduate studies and the job market. We endeavor to have both our faculty and our students participate actively in scholarly pursuits, including oral presentations, submission of grant proposals, internships, graduate and undergraduate stipends, and fellowships. A unique characteristic of the chemistry department is our affiliation with the American Chemical Society (ACS). The ACS affiliation provides national standards of learning outcomes and assessment for the professional training of chemists for real life work in the chemical sciences. This includes industrial settings, government work, and academic areas. The intent is to determine what knowledge and skills are needed by practitioners in the field, what is currently taught to undergraduates, and how successful our teaching is. The ACS endeavors to encourage national improvements in curriculum and instruction through the various activities of its Division of Chemical Education and through its certification program. Faculty members are encouraged to attend seminars given by this division at the two national society meetings and at regional meetings each year. The chemistry department is certified by the ACS. This involves a full program review by the ACS every 5 years with a short annual review of senior research reports (our capstone courses) and student certifications. Course syllabi, including content and the number and types of courses taught, undergraduate research reports, and the professional quality of the instrumentation used in our laboratories are of prime consideration in the certification process. Additional benefits of our association with the ACS are the access to standardized tests that allow us to assess our students learning outcomes compared to national standards. In order to graduate with a B.S. in chemistry and be successful in careers after college, the students should show proficiency on these exams as a measure of their obtaining fundamental knowledge of the prescribed chemistry curriculum compared to national standards. Because these tests measure fundamental knowledge, we also employ an extensive laboratory curriculum that encourages analytical thought processes and concludes with development of extensive writing skills leading to final reports and oral presentations in our capstone courses. In conjunction with our use of ACS exams, we also employ an internal review and revision process. We have committees in place for evaluation of each major area of the undergraduate curriculum. This includes freshmen chemistry (all first and second semester core courses), organic chemistry (second year chemistry), biochemistry (third and fourth year chemistry), physical chemistry (third and fourth year chemistry), analytical chemistry (third and fourth year chemistry), and review of senior research theses. A review of student outcomes and their assessment is conducted by each committee with appropriate feedback given to individual instructors to enhance our courses and continue to let them evolve to a better level.

### Goals

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Chemistry BS**

(As of: 12/12/2016 05:58 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
G 1: Critical Thinking
Critical thinking skills center on applying, analyzing, synthesizing, and evaluating information and methods. Students need thorough practical training in research techniques. These must include not only mastery of instrumentation and the calibration of same, but the design of the relevant control experiments. Overall, they need to gain mastery with the techniques that chemists use to measure data, and the conventions that chemists use to express data. Students must learn to evaluate their data, looking in detail for statistical significance. Students not only have to know facts, they should also be able to design experiments to ascertain if these facts are true. It is vital that the skills learned in one situation be transferable to related situations. One of the key aspects of teaching critical thinking is developing the higher order cognitive skills of decision making and problem solving. It is vital to create an atmosphere where students grow in their ability to reason. Upon Graduation students will be able to take and analyze real world data to develop a knowledge base and the ability to draw conclusions from this knowledge base. Thought processes should be rational, logical and consequential. Conclusions should grow directly from the data and accepted fundamental chemical principles. In addition, students should not only arrive at conclusions, but be aware that they are expected to defend these conclusions. It is also important to realize that data may be interpreted in more than one way, and that science moves forward as these difference data interpretations clash with one another, and are then resolved. Students must therefore learn to deal with open ended questions, deciding which data and variables are important, and which can safely be ignored in creating a picture of the system under study. The ability to think critically about scientific content and processes is key to these students' futures. Critical thinking over time should become an internal skill, transferable to the rest of the student's life and career.

G 2: Analytical Skills
Analytical Skills center on mathematically analyzing information that relates to the chemical sciences. Students need a thorough mathematical background in calculus, statistics and algebra and be able to apply these skills to chemical problems.

G 3: Instrumental Skills
Students who graduate need to be familiar with many different instruments and proficient in understanding not only how to use basic techniques (GC, HPLC, IR, UV-Vis and NMR) but also what information these techniques would allow the user access to.

Student Learning Outcomes/Objectives

SLO 1: Oral and Written Communication Skills (M: 2)
Full Description: Each graduate shall develop oral and written communication skills. The written communication skills will be evidenced by 1a and/or 1b. The oral communication skills will be evidenced by 1c and/or 1d. 1a) At least six reports based on laboratory experiments which will comply with current American Chemical Society guidelines. 1b) A term paper, grant proposal, literature review or research paper on a current topic in chemistry. 1c) An oral examination or an oral presentation in class. 1d) Presentation of a poster or oral talk at a Georgia State, local, regional or national meeting.
Relevant Associations: American Chemical Society

SLO 2: Critical Thinking in Chemistry (M: 1, 2)
Each graduate will develop critical thinking skills as relates to Chemistry. 2a Each student will develop high order problem solving skills. 2b. Each graduate will be able to ask pertinent questions and develop logical experimental procedures to answer these questions. 2c Each graduate will learn to interpret original data.
Relevant Associations: American Chemical Society

SLO 3: Technology (M: 2)
Students will demonstrate the ability to 1. Use computer graphics. 2. Access chemical databases 3. Access chemical literature 4. Conduct molecular modeling of chemical structures 5. Use normal word processing skills 6. Use state of the art instrumentation in order to solve novel problems in chemistry
Relevant Associations: American Chemical Society

Other Outcomes/Objectives

O/O 4: Quantitative skills (M: 1, 2)
Students will demonstrate the ability to 1. Use mathematical skills from algebra, trigonometry and calculus to solve problems and understand theory in chemistry. 2. Understand error analysis to validate experimental results. 3. Translate problem situations into symbolic representations for the purpose of solving problems.
Relevant Associations: American Chemical Society

Measures, Targets, and Findings

M 1: ACS exit exams (O: 2, 4)
Many chemistry courses have national exit exams. Specific questions from these exams will be used to target different outcomes.
Source of Evidence: Standardized test of subject matter knowledge

Target for O2: Critical Thinking in Chemistry
Out of 8 questions related to critical thinking students should answer 4 correct. (National average is 3.9 correct)

Findings 2012-2013 - Target: Met
Average of 4.2/8.

Target for O4: Quantitative skills
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Action Plan

The Department of Chemistry serves not only students who have declared chemistry as their major but also students in biology, for which general chemistry is a prerequisite for the first course in the biology major (Principles of Biology), physics, for which chemistry is a required minor and pre-medical students. In addition any major can use chemistry 1151/1152 or 1211/1212 as the laboratory sequence required by the University for graduation. This report addresses the efforts to increase retention in the courses which are used by both chemistry and non-chemistry majors as part of the core curriculum (1151/1152, 1211/1212) and courses by persons wishing to minor in chemistry (2400/3410). The second part of the report addresses the efforts to improve the retention, progression and graduation of persons who major in chemistry. Introductory Courses “Many introductory science courses are responsible for driving off many students either from a science major or from taking science courses.” (Reform in Undergraduate Science Teaching in the 21st Century, ) Because of the “turn off” factor of these 1000 and 2000 level courses one of the key factors that will affect retention is the number of students who receive a D, F or withdraw from the course. These students either are turned off by science and change majors or are forces to retake the course causing the department to offer more sections both of which are unfavorable outcomes. Over the past four years the department has placed a priority in improving the retention of students in the 1211/1212 sequence believing those courses will affect the most people. These efforts have been supported by the University System of Georgia’s RPG initiative and STEM initiative. A three year grant based on the RPG initiative allowed the department to attack the retention problem in three ways; the implementation of peer tutorials, weekly meetings between faculty members who teach the courses in order to discuss ideas, methods and problems in the various units and a redesign in the courses. Peer Led Tutorials Peer led tutorials are an effective way to allow students to receive help and ask questions in a small group setting (25 as opposed to 100 – 200). Students enrolled in 1211, 1212, 2400 or 3410 can register for a tutorial which is led by either an undergraduate student who has recently excelled in one of the courses or a graduate student. The grade for the course is based on class attendance and participation by the student. We have found that the tutorials have been moderately effective in the 1211 and 1212 sequence but less effective in the 2400 and 3410 sequence. The department is currently modifying the tutorials so that they are more interactive and students are required to work out problems on the board as the peer leader circulates throughout giving help where needed. We believe that this activity will more actively engage the student allowing him/her to work the problem on their own with hints from the leader. In addition the department is developing a book of “worked out” problems which students can download. Weekly Communication Weekly meetings between the faculty members who teach introductory courses were started initially with a senior faculty member who facilitated discussion on what materials in the text were more important and what topics should be less emphasized. Since most persons teaching the general chemistry sequence come in as visiting faculty and very little experience teaching except as a TA we found that there is a preconceived notion that everything in the text must be taught. Through these meetings the general chemistry faculty has been able to increase the depth of student knowledge rather than go for complete “coverage” of the text. In addition the faculty have exchanged ideas on how to teach different topics, discussed student misconceptions and developed slides which we can use as needed. It is often difficult to schedule these meetings around teaching schedules so this part of the action plan has been waning over the past semester, but we hope that we can continue this as part of the upcoming year’s action plan. Course Redesign In the eight sections of CHEM1211 and CHEM1212, General Chemistry I and II in Spring 2009, 151 out of 255 of students enrolled are biology majors (59%) and 28 are chemistry majors (18%). After the General Chemistry series, the biology majors go on to take BIOL3800 – Molecular Cell Biology, which requires students to have a strong background in key chemistry concepts. Both chemistry and biology majors are then required to complete a course in Biochemistry. In addition, much of the research performed in the chemistry department at Georgia State University is biologically oriented with most of

M 2: laboratory reports (O: 1, 2, 3, 4)

The senior level analytical courses (4000, 4010 and 4190) use laboratory reports to assess different outcomes.

Out of 8 questions that relate to quantitative skills students should receive 4/8 (national average 3.8)

Source of Evidence: Written assignment(s), usually scored by a rubric
Finding new delivery methods for increasingly larger classes

With the class size growing in almost every course new methods of instruction will need to be discussed.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Projected Completion Date: 11/2009

Annual Report Section Responses

Most important accomplishments for year-- briefly describe the major things you accomplished over the past year.

More SI/help sessions are being offered

Challenges for Next Year--Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.

Growth

University-wide Committee Participation--Use this space to document any staff participation on University-wide committees (e.g., University Senate).

UAC
### Mission / Purpose

The Chemistry Department has long supported the University’s mission. The Department of Chemistry has active research programs in each of the five traditional areas (analytical, biochemistry, biophysical, chemical education, and organic/medicinal) and a bioinformatics option is available in each. Our students have the opportunity to conduct cutting edge research at the interface of chemistry and biology under the guidance of our dynamic faculty. The Department is committed to and has the ability to maintain outstanding facilities to support research efforts. Our goal is to deliver a high quality instructional program at the graduate level to prepare our students for productive careers in academia, industry and government. While the emphasis of our graduate program is in the training of scientists, we offer both a thesis and non-thesis master’s degree.

### Goals

**G 1: MS Program Goals**

The M.S. program’s goal is to produce well trained professionals who possess a high level of proficiency in modern chemical techniques and knowledge of modern chemical problems.

### Student Learning Outcomes/Objectives

**SLO 1: Communication (M: 1)**

Students will demonstrate the ability to 1. Communicate effectively in written and oral forms. 2. Read and demonstrate an understanding of scientific literature for content. 3. Critically analyze claims made in the scientific literature. 4. Demonstrate an understanding of scientific terminology. 5. Work effectively in group situations. 6. Students in the masters program must perform research and write a thesis or a non-thesis paper detailing their work.

**SLO 3: Technology (M: 1)**

Students will demonstrate the ability to 1. Use computer graphics. 2. Access chemical databases. 3. Access chemical literature. 4. Conduct molecular modeling of chemical structures. 5. Use normal word processing skills. 6. Use the internet and online resources. 7. Use state of the art instrumentation in order to solve novel problems in chemistry.

### Other Outcomes/Objectives

**O/O 2: Critical Thinking (M: 1)**

Students will demonstrate the ability to 1. Construct reasonable hypotheses while asking scientific questions. 2. Design and conduct investigations about a variety of chemical problems. 3. Understand and analyze experimental results. Formulate and defend explanations of theory in chemistry. 4. Solve unique problems based on learned factual matter. 5. Effectively perform laboratory operations to collect appropriate experimental evidence in conjunction with 2.1 - 2.5. 6. Students will be able to apply theory learned in lecture courses to original research performed under the supervision of a faculty member.

### Measures, Targets, and Findings

**M 1: Thesis / Project (O: 1, 2, 3)**

All thesis-based master’s students will successfully defend a thesis, and all other master’s students must write a non-thesis paper.

**Source of Evidence:** Senior thesis or culminating major project

**Target for O1: Communication**

All master's students are required to write and defend a thesis of original cutting edge research which they have performed under the direction of a faculty member or if they are in the non-thesis master's program, they are required to write a non-thesis paper under the direction of a faculty member.

**Findings 2012-2013 - Target: Met**

5 thesis students were eligible and 5 students successfully defended their thesis in 2012-2013.

**Target for O2: Critical Thinking**

All master's students are required to write and defend a thesis of original cutting edge research which they have performed under the direction of a faculty member or if they are in the non-thesis master's program, they are required to write a non-thesis paper under the direction of a faculty member.

**Findings 2012-2013 - Target: Met**

5 thesis students were eligible and 5 students successfully defended their thesis in 2012-2013.

**Target for O3: Technology**

100% will successfully write thesis and upload using the internet to digital archive following specific college guidelines and will use overhead projectors, computers, and other equipment during presentation or write and submit a non-thesis paper.
Findings 2012-2013 - Target: Met

5 thesis students were eligible and 5 students successfully defended their thesis in 2012-2013. 7/7 students successfully submitted a non-thesis paper.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Action Plan**
The masters plan meets all our objectives. Our plan is to continue this excellence with continued growth.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Responsible Person/Group:** Giovanni Gadda, Ph.D. (Graduate Director) Donald Hamelberg, Ph.D.

Georgia State University
Assessment Data by Section
2012-2013 Chemistry PhD
As of: 12/13/2016 05:58 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Chemistry Department has long supported the University's mission. The Department of Chemistry has active research programs in each of the five traditional areas (analytical, biochemistry, biophysical, chemical education, and organic/medicinal) and a bioinformatics option is available in each. Our students have the opportunity to conduct cutting edge research at the interface of chemistry and biology under the guidance of our dynamic faculty. The Department is committed to and has the ability to maintain outstanding facilities to support research efforts. Our goal is to deliver a high quality instructional program at the graduate level to prepare our students for productive careers in academia, industry and government. The emphasis of our graduate program is in the training of scientists.

Goals

**G 1: Knowledge of Chemistry**
The Department of Chemistry administers a doctoral program designed to endow its graduates with the ability to approach fundamental scientific questions from both a biological and a chemical perspective and to be able to successfully employ scientific methodology to solve real life problems.

Student Learning Outcomes/Objectives

**SLO 1: Communication Skill (M: 1, 2)**
Students will demonstrate the ability to 1. Communicate effectively in written and oral forms. 2. Read and demonstrate an understanding of scientific literature for content 3. Critically analyze claims made in the scientific literature. 4. Demonstrate an understanding of scientific terminology 5. Work effectively in group situations. 6. Students must perform and analyze and be able to relate experiments which address a current problem in the chemical sciences. This is demonstrated in a number of ways and includes oral presentations given during group meetings, poster presentations, and end of semester reports which summarize research progress using the ACS style research paper guidelines. These guidelines are consistent with the following format:
Title:Abstract:Introduction:Experimental Details or Theoretical Analysis:Results:Discussion:Conclusion:References. Our students are also encouraged to attend local, regional, national, and international conferences to present their research through poster and oral presentations.

**SLO 2: Critical Thinking (M: 1, 2)**
Students will demonstrate the ability to 1. Construct reasonable hypotheses while asking scientific questions. 2. Design and conduct investigations about a variety of chemical problems. 3. Understand and analyze experimental results Formulate and defend explanations of theory in chemistry 4. Solve unique problems based on learned factual matter. 5. Effectively perform laboratory experiments. Additionally, students are required to submit an end of semester report on their research which requires the student to formally go through the critical thinking process by providing a detail analysis of their research (each semester) using the ACS research format. All Ph.D. students are required to submit a dissertation proposal where they provide background and significance of their research, present preliminary data, and propose and develop future experiments to test several hypothesis they propose in their dissertation proposal.

**SLO 3: Technology (M: 2)**
Students will demonstrate the ability to 1. Plan and conduct experiments using top of the line research instrumentation. 2. Use computer and computer graphics for data analysis. 3. Use computers and online resources to access chemical databases 4. Access chemical literature. 5. Use computer-based software to conduct molecular modeling of chemical structures 6. Use word processing software applications. 7. Use the internet and online resources. 8. Use state of the art instrumentation in order to solve problems in chemistry.

**SLO 4: Quantitative Skills (M: 1, 2)**
1. Use complex and advanced mathematical models and equations to solve complex problems to understand theory in chemistry, such as, for example, fitting of pH profiles of kinetic isotope effects and quantum mechanical tunneling of hydride ions in enzymatic
and chemical reactions. 2. Understand error analysis to validate experimental results. 3. Translate problem situations into symbolic representations for the purpose of solving problems.

SLO 5: Contemporary Issues (M: 1, 2)
Students will demonstrate the ability to 1. Know how chemistry can help solve problems in society, for example, how the study of chemical structures and interactions create or solve disease states such as cancer and other diseases. 2. Understand chemical safety and waste control - and there impact on society. 3. Students must perform and analyze experiments which address a current problem in the chemical sciences.

Measures, Targets, and Findings

**M 1: Qualifying Exam (O: 1, 2, 4, 5)**
All Ph.D. students must take both a written and an oral qualifying exam within the first two years of enrollment in the program. The written exam is administered using the ACS national exam in the student’s concentration or an equivalent exam. The Department of Chemistry specializes in research in the following chemistry areas: analytical, biochemistry, chemical education, organic/medicinal and computational/physical chemistry. The exam is graded by the faculty on a pass/fail basis based on the achievement of a minimum percentage score (minimum score varies by area of specialization, but no student will pass who scores below the 80th percentile). Once the written exam is complete a committee administers the oral portion of the exam. The oral committee consists of two faculty members from the student’s concentration and one from outside the concentration. The student must give a presentation of his/her research and the committee evaluates the student’s expertise and knowledge by asking questions which may be general in nature or very specific and related to the student’s research. If the student passes the oral exam, he/she is advanced to the level of doctorate candidate having passed the General Exam.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O1: Communication Skill**
The target would be 85% of all Ph.D. students will achieve a score in the 80th percentile or better. Students are advised in their first year of enrollment to take specific core classes in their area of specialization. These core courses are designed to provide the requisite knowledge necessary to continue in advanced research methods and prepares the students for success on the qualifying exam. Additionally, students may elect to take one practice exam before the formal administration of the Qualifying Exam.

**Findings 2012-2013 - Target: Met**
December 2012 and June 2013 Administration of Written Qualifying Exam: 16 students took the exam in December and 3 took the exam in June as retakes (total test takers = 19). Of the 16 December test takers, 2 failed the first attempt of the exam and rescheduled for 6 months (June test takers). December test takers: 16/2 = ~87.5% passed the exam on first try. June test takers: 2/2 = 100 % passed on second try.

**Target for O2: Critical Thinking**
The target would be 85% of all Ph.D. students will achieve a score in the 80th percentile or better. Students are advised in their first year of enrollment to take specific core classes in their area of specialization. These core courses are designed to provide the requisite knowledge necessary to continue in advanced research methods and prepares the students for success on the qualifying exam. Additionally, students may elect to take one practice exam before the formal administration of the Qualifying Exam.

**Findings 2012-2013 - Target: Met**
December 2012 and June 2013 Administration of Written Qualifying Exam: 16 students took the exam in December and 3 took the exam in June as retakes (total test takers = 19). Of the 16 December test takers, 2 failed the first attempt of the exam and rescheduled for 6 months (June test takers). December test takers: 16/2 = ~87.5% passed the exam on first try. June test takers: 2/2 = 100 % passed on second try.

**Target for O4: Quantitative Skills**
The target would be 85% of all Ph.D. students will achieve a score in the 80th percentile or better. Students are advised in their first year of enrollment to take specific core classes in their area of specialization. These core courses are designed to provide the requisite knowledge necessary to continue in advanced research methods and prepares the students for success on the qualifying exam. Additionally, students may elect to take one practice exam before the formal administration of the Qualifying Exam.

**Findings 2012-2013 - Target: Met**

M 2: Dissertation Defense (O: 1, 2, 3, 4, 5)
All Ph.D. students are required to write and defend a dissertation of original cutting edge research which they have performed under the direction of a research faculty member.
Source of Evidence: Senior thesis or culminating major project

Target for O1: Communication Skill
100% of all PhD students who graduate will write and defend a dissertation successfully. In order to receive the PhD degree, the candidate must undergo a rigorous process of research, literature reviews, and writing before the dissertation defense can be scheduled. Each semester, the student is expected to make satisfactory research progress and under the guidance and at the direction of the research advisor, the candidate will write an updated progress report of his/her research for a grade. Additionally, the final portion of a student's academic work is spent in the laboratory where research is conducted and through weekly group meetings the student must communicate to advisor and peers his/her research. The student must also meet with his/her dissertation committee once each academic year to provide an overview of research project and to report and discuss research progress. When the student schedules the dissertation defense, it is at the approval of the research advisor and dissertation committee.

Findings 2012-2013 - Target: Met
12 out of 12 students have successfully defended their dissertation in 2012-2013.

Target for O2: Critical Thinking
100% will write and defend a dissertation successfully.

Findings 2012-2013 - Target: Met
12 out of 12 students have successfully defended their dissertation in 2012-2013.

Target for O3: Technology
100% will successfully write their dissertation following specific college guidelines and will use overhead projectors, computers, and other equipment during the dissertation defense presentation.

Findings 2012-2013 - Target: Met
12 out of 12 students have successfully defended their dissertation in 2012-2013.

Target for O4: Quantitative Skills
Ability to perform analyses on chemical data (i.e., such as chemical reactivity, solubility, molecular weight, melting point, radiative properties) and to apply that analyses to real life problems. Must develop skill at using modern computer and communication techniques applied to chemistry. Write technical papers or reports Work with research advisor to conduct analyses of research projects, interpret test results, or develop nonstandard tests.

Findings 2012-2013 - Target: Met
All PhD students will be required to submit technical reports at the end of each semester that provide a technical summary of research findings. 100% of all actively enrolled students met this requirement in 2012-2013 each semester.

Target for O5: Contemporary Issues
All PhD students are encouraged

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continued Quality
Our goal is to continue excellence with our program’s growth.
- Established in Cycle: 2005-2006
- Implementation Status: Planned
- Priority: High
- Implementation Description: Fall 12
- Responsible Person/Group: Giovanni Gadda, Ph.D.

Continued Quality and Growth
The department has met all its goals and will continue to grow while keeping the quality of the program.
- Established in Cycle: 2006-2007
- Implementation Status: Planned
- Priority: High
- Responsible Person/Group: Giovanni Gadda, Ph.D.

Action Plan
The PhD program meets all our objectives. Our plan is to continue this excellence with continued growth.
- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
Georgia State University
Assessment Data by Section
2012-2013 Communication Assessment of Core
As of 12/12/2016 05:58 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

Speech Communication explores the construction, diffusion, analysis, and impact of messages as they occur among individuals, groups, organizations, and cultures in the media age.

The Department of Communication is firmly committed to the goals of academic excellence, strong research programs and international relevance set forth in the Georgia State University's Strategic Plan. The Department encompasses multiple professional, creative and research traditions, all of which are organized around the idea that central to the human experience is the use of symbols for the purpose of making and understanding meaning. As an academic unit, the Department is committed to cultivating a deeper appreciation of the creative and intellectual traditions of communication by providing students with critical thinking and media literacy skills, enhancing students' oral, written and visual communication processes through participation in cutting edge scholarly and artistic programs and collaborating with and enhancing the local, state, regional, national and global communities related to communication.

Goals

G 1: effective communicators
Students become effective consumers and producers of communicative acts in various contexts.

Student Learning Outcomes/Objectives

SLO 1: critical thinking (G: 1) (M: 4)
At the end of the semester, students will be able to…1. Explain the various components of human communication. 2. Apply major principles of human communication to specific instances. 3. Create and deliver a public speech. 4. Analyze, evaluate, and provide convincing reasons in support of conclusions. 5. Consider opposing points of view when appropriate.

General Education/Core Curriculum Associations

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings

M 2: Personal Report of Communication Apprehension
In fall 2010 and spring 2011, all sections of Speech 1000 were selected for data interpretation using the PRCA-24 measure, producing 949 scores in fall 2010 and 728 scores in spring 2011. As indicated in the four tables above, the overall mean score showed an slight decrease in students' communication apprehension: from 60.19389 to 58.56832 in fall 2010; and from 61.68956 to 59.60308 in spring 2011.
More specifically, these sections demonstrated a slight decrease in apprehension for the public communication scale: dropping from 18.451 to 17.43366 in fall 2010; and from 18.56593 to 17.38536 in spring 2011. The PRCA-24 measurement also showed a statistically smaller, but notable decrease in student communication apprehension in group, meeting and dyad situations. The results from the assessment measurement indicate stronger support for the hypothesis that Speech 1000 strengthens students' oral competency by enhancing their confidence in a variety of communication situations.
Source of Evidence: Faculty pre-test / post-test of knowledge mastery

M 3: Willingness to Communicate
In fall 2010 and spring 2011, all sections of Speech 1000 were selected for data interpretation using the WTC measure, producing 949 scores in fall 2010 and 728 scores in spring 2011. As shown in the above tables, the fall 2010 mean score indicated an overall increase in students' willingness to communicate in the various situations, from 181.4056 pre-test to 196.3284 post-test. In fall 2010, the public communication score and communication with a stranger score both increased (from 21.66178 to 23.36701 and from 51.25136 to 57.24465 respectively) and logic suggests that the public speaking assignment in Speech 1000 is partly (but not wholly) responsible for these results. In fall 2010, all other situations showed an increase in students' willingness to communicate. As the data above indicates, the spring 2011 results showed an increase in the willingness to communicate measure, from 181.2584 in the pre-test to 197.2571 in the post-test, as well as slight increases in all other measures.
Source of Evidence: Faculty pre-test / post-test of knowledage mastery

M 4: Cornell Critical Thinking Exam (O: 1)
In order to assess “critical thinking” among students who have taken SPCH1000, we define critical thinking as: “reasonable and reflective thinking on deciding what to believe or do” (Ennis, Millman, & Tomko, 2005). We have adopted the Cornell Critical Thinking
Exam Z as the means by which to measure critical thinking as it was designed to test critical thinking among advanced high school students, college students, and graduate students. Exam Z is a general-content critical thinking measure, which uses content from a variety of subject matter familiar to our target group. Exam Z provides both an overall score, and subtest scores for each type of critical thinking skill. For this reason, it promises to provide more detailed data than other similar measures. As the summer 2013 term was the first time we have assessed SPCH1000 under Area B (critical thinking), our sample is extremely small, and only shows post-test results. We will pilot a full course assessment across all SPCH1000 sections, with a pre-test / post-test format, in fall 2013.

Source of Evidence: Standardized test of subject matter knowledge

### Target for O1: critical thinking

Based on the meta-summaries collected by Ennis et al., we expect to find the above results among our SPCH1000 students. Earlier findings of the Cornell Critical Thinking Exam Z at various academic institutions show that the mean score for upper division undergraduates is 31.7, the mean score for lower division undergraduates is 28.4, and the mean score for remedial undergraduates is 20.8. In these initial attempts at assessing critical thinking in the Core Curriculum, we predict that the percentage of SPCH1000 students will breakdown as shown in Table 1.

### Findings 2012-2013 - Target: Partially Met

In our initial sample of 28 SPCH1000 students, we found that 25% scored 31 or above, 18% scored between 26-30, 36% scored between 21-25, and 21% scored below 21. See Table 2 for details. These results indicate that SPCH1000 students fall generally within the expected parameters for college students on the Cornell Critical Thinking Exam Z. The 2013-2014 data promises to be more illuminating as we will collect a much larger sample (approximately 1000-1200 students per semester), compare pre-test & post-test scores, and break the overall critical thinking score into various skill sets.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Full Pilot of Critical Thinking Assessment

In the 2013-2014 academic calendar year, we plan to engage a full-fledged pilot of the Critical Thinking Assessment across all SPCH1000 sections (approximately 1000-1200 students per semester), compare pre-test & post-test scores, and break the overall critical thinking score into various skill sets.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 09/2014
- **Responsible Person/Group:** Dr. Davin Grindstaff, SPCH1000 Course Director

#### Analysis Questions and Analysis Answers

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

In the 2012-2013 academic calendar year, we made significant changes to the SPCH1000 Core Curriculum Assessment Report. First, we updated the Mission Statement to reflect the specific purpose of the Speech Area Major rather than the Communication Department as a whole. Second, we revised the Goal Statement into a single statement of what we want students to BE; and subsequently, Student Learning Outcomes were narrowed slightly and incorporated our new status as Area B (Critical Thinking) within the Core Curriculum. Third, we introduced a new measure (the Cornell Critical Thinking Exam Z), new targets, and a pilot of the new findings based on a small sample of SPCH1000 students (N = 28). In the 2013-2014 academic calendar year, we plan to engage a full-fledged pilot of the Critical Thinking Assessment across all SPCH1000 sections (approximately 1000-1200 students per semester), compare pre-test & post-test scores, and break the overall critical thinking score into various skill sets.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

At this point, more data needs to be collected in order to assess the capability of SPCH1000 to enhance Georgia State students’ critical thinking faculties, and thus, recommend substantive changes to the course. The 2012-2013 data is promising, but limited in its scope.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Communication Disorders MEd**

*(As of: 12/12/2016 05:58 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

**Mission / Purpose**

The Communication Disorders (CD) Program is a unit of the Educational Psychology & Special Education Department. Our mission is to offer a high quality graduate program, which educates students to implement evidence-based services across the scope of practice in speech-language pathology. We will accomplish this by providing state of the art instruction and cutting-edge research that maximizes interdisciplinary collaboration across the university.

**Goals**
G 1: Meet Certification Requirements
CD Program graduates will meet national certification and state licensure requirements to be fully-certified.

G 2: Evidence Based Practice
CD Program graduates will be able to implement evidence-based services across the scope of practice in speech-language pathology.

Student Learning Outcomes/Objectives

SLO 1: Apply Prerequisite Knowledge (G: 1, 2) (M: 1, 9)
The student can apply the basic principles of biological science, physical science, and the behavioral/social sciences to communication sciences and disorders.

SLO 3: Discuss Communication & Swallowing Disorders (G: 1, 2) (M: 3, 4, 5, 6, 11)
The student can discuss the etiologies and characteristics of speech, language, hearing, and communication disorders and differences and swallowing disorders including anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates.

SLO 4: Discuss Principles of Assessment and Intervention (G: 1, 2) (M: 3, 4, 5, 6, 7, 12)
The student can discuss the principles and methods of prevention, assessment, and intervention for people with communication and swallowing disorders including consideration of anatomic/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates.

SLO 5: Apply Standards of Ethical Conduct (G: 1, 2) (M: 8, 13)
The student can discuss and apply the standards of ethical conduct.

SLO 6: Evaluate Research Relevance (G: 1, 2) (M: 8, 14)
The student can critically evaluate published theory and research to determine its relevance and application to clinical practice in communication disorders.

SLO 14: Understand Linguistic & Cultural Diversity (G: 1, 2) (M: 2, 22)
The student demonstrates knowledge of linguistic and cultural issues related to communication and swallowing disorders and adapts assessment, treatment, and prevention plans and procedures to meet the individual needs as well as the linguistic and cultural differences of each client.

Measures, Targets, and Findings

M 1: Praxis II Exam (Total Score) (O: 1)
All students take the Praxis II Exam in speech-language pathology for national certification and state licensure prior to graduation.
Source of Evidence: Certification or licensure exam, national or state

Target for O1: Apply Prerequisite Knowledge
90% of students will pass the Praxis II exam (score of 600 or higher) on their first attempt.

Findings 2012-2013 - Target: Met
100% of students passed the Praxis II exam on their first attempt by scoring 600 or better.

M 2: Praxis II Exam Category I Score (Comm Process) (O: 14)
Score for Category I Basic Human Communication Processes.
Source of Evidence: Certification or licensure exam, national or state

Target for O14: Understand Linguistic & Cultural Diversity
90% of students will score within the national average range or above.

Findings 2012-2013 - Target: Met
93% of the students for which there was data scored within the national average or above on this section of the Praxis II exam. Five students scored above the national average, 1 student below, 8 scored within the range.

M 3: Praxis II Exam Category II Score (Phon/Lang Dis) (O: 3, 4)
Score for Category II Phonological and Language Disorders.
Source of Evidence: Certification or licensure exam, national or state

Target for O3: Discuss Communication & Swallowing Disorders
90% of students will score within the national average range or above.
### Findings 2012-2013 - Target: Not Met

86% of the students for which there is data scored within the national average or above on this section of the Praxis II exam. Eleven students scored within the average range, 1 scored above, and two scored below.

### Target for O4: Discuss Principles of Assessment and Intervention

90% of students will score within the national average range or above.

#### Findings 2012-2013 - Target: Not Met

86% of the students for which there is data scored within the national average or above on this section of the Praxis II exam. Eleven students scored within the average range, 1 scored above, and two scored below.

### M 4: Praxis II Exam Category III Score (Spch Disord) (O: 3, 4)
Score for Category III Speech Disorders.
Source of Evidence: Certification or licensure exam, national or state

#### Target for O4: Discuss Principles of Assessment and Intervention

90% of students will score within the national average range or above.

#### Findings 2012-2013 - Target: Not Met

71% of the students for which there was data scored within or above the national average range. Nine students scored within the range, one student scored above, and four students scored below.

### M 5: Praxis II Exam Category IV Score (Neuro Disord) (O: 3, 4)
Score for Category IV Neurogenic Disorders.
Source of Evidence: Certification or licensure exam, national or state

#### Target for O3: Discuss Communication & Swallowing Disorders

90% of students will score within the national average range or above.

#### Findings 2012-2013 - Target: Not Met

100% of students for which there is data scored within or above this section of the exam. Six scored above the national average range and 8 scored within the range.

### M 6: Praxis II Exam Category V Score (Aud/Hrg) (O: 3, 4)
Score for Category V Audiology, Hearing.
Source of Evidence: Certification or licensure exam, national or state

#### Target for O4: Discuss Principles of Assessment and Intervention

90% of students will score within the national average range or above.

#### Findings 2012-2013 - Target: Not Met

100% of students for which there is data scored within or above this section of the exam. Six scored above the national average range and 8 scored within the range.

### M 7: Praxis II Exam Category VI Score (Clin Managemt) (O: 4)
Score for Category VI Clinical Management.
Source of Evidence: Certification or licensure exam, national or state

#### Target for O4: Discuss Principles of Assessment and Intervention

Due to the small number of exam questions in this area (4-6), ETS does not calculate the national average performance range. The program has targeted an overall program performance score of 70% or higher.

#### Findings 2012-2013 - Target: Not Met

The average performance score for students for which there is data is 65%.
<table>

</tr>
</thead>
<tbody>
<tr>
<td>90% of students will score within the national average range or above.</td>
</tr>
</tbody>
</table>

**Findings 2012-2013 - Target: Not Met**

86% of students were within the national average performance range for this section of the exam. Five students scored above the national average, two scored below, and 7 scored within the range.

### M 8: Praxis II Exam Category VII Score (Prof Issues) (O: 5, 6)

Score for Category VII Professional Issues, Psychometrics, Research.
Source of Evidence: Certification or licensure exam, national or state

### Target for O5: Apply Standards of Ethical Conduct

90% of students will score within the national average range or above.

**Findings 2012-2013 - Target: Met**

100% of students for which there is data performed within or above the national average performance range. Three scored above and 11 scored within the range.

### Target for O6: Evaluate Research Relevance

90% of students will score within the national average range or above.

**Findings 2012-2013 - Target: Met**

100% of students for which there is data performed within or above the national average performance range. Three scored above and 11 scored within the range.

### M 9: Portfolio Section 1 (Prereq Knowledge) (O: 1)

All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they have met the prerequisite requirements of the program.
Source of Evidence: Portfolio, showing skill development or best work

### Target for O1: Apply Prerequisite Knowledge

Average rating of 3.0 or higher (on a rating scale of 1-4) for this section of the portfolio.

**Findings 2012-2013 - Target: Met**

Students achieved a 4.0 on this section of the portfolio.

### M 10: Portfolio Section 2 (Comm & Swallow Process)

All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can describe the normal communication and swallowing processes.
Source of Evidence: Portfolio, showing skill development or best work

### Target for O3: Discuss Communication & Swallowing Disorders

Average rating of 3.0 or higher (on a rating scale of 1-4) for this section of the portfolio.

**Findings 2012-2013 - Target: Met**

Students achieved a 4.0 on this section of the portfolio.

### M 12: Portfolio Section 4 (Prin Assess & Interv) (O: 4)

All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can discuss the principles and methods of prevention, assessment, and intervention.
Source of Evidence: Portfolio, showing skill development or best work

### Target for O4: Discuss Principles of Assessment and Intervention

Average rating of 3.0 or higher (on a rating scale of 1-4) for this section of the portfolio.

**Findings 2012-2013 - Target: Met**

Students achieved a 3.63 on this portion of the portfolio.

### M 13: Portfolio Section 5 (Stds Ethical Conduct) (O: 5)
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can discuss and apply the standards of ethical conduct.

**Target for O5: Apply Standards of Ethical Conduct**
Average rating of 3.0 or higher (on a rating scale of 1-4) for this section of the portfolio.

**Findings 2012-2013 - Target: Met**
Students achieved a 3.75 on this section of the portfolio.

**M 14: Portfolio Section 6 (Eval Research) (O: 6)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can critically evaluate published theory and research.

**Target for O6: Evaluate Research Relevance**
Average rating of 3.0 or higher (on a rating scale of 1-4) for this section of the portfolio.

**Findings 2012-2013 - Target: Met**
Students achieved an average rating of 4.0 on this section of the portfolio.

**M 15: Portfolio Section 7 (Prof Issues)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can describe and discuss contemporary professional issues related to clinical standards, practice guidelines, and practice management.

Source of Evidence: Portfolio, showing skill development or best work

**M 16: Portfolio Section 8 (Prof Credentials)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must outline the requirements for national and state certification and licensure.

Source of Evidence: Portfolio, showing skill development or best work

**M 17: Portfolio Section 9 (Comm Skills)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must document that they have appropriate oral and written communication skills.

Source of Evidence: Portfolio, showing skill development or best work

**M 18: Portfolio Section 10 (Clin Skills Assess)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must document that they can accurately assess clients with communication disorders and differences and swallowing disorders.

Source of Evidence: Portfolio, showing skill development or best work

**M 19: Portfolio Section 11 (Clin Skills - Interven)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can develop and implement functional and effective intervention programs.

Source of Evidence: Portfolio, showing skill development or best work

**M 20: Portfolio Section 12 (Interpersonal Qual)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must document that they have appropriate collaborative and interpersonal skills and are able to self-evaluate clinical performance.

Source of Evidence: Portfolio, showing skill development or best work

**M 21: Portfolio Section 13 (Apply Technology)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must document that they can use appropriate technology for assessment, intervention, and professional productivity.

Source of Evidence: Portfolio, showing skill development or best work

**M 22: Portfolio Section 14 (Ling & Cult Diversity) (O: 14)**
All master's degree students complete a portfolio to document their acquisition of knowledge and skills specified in the student learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate that they can discuss and apply the standards of cultural competence and diversity.

**Target for O14: Apply Cultural Competence**
Average rating of 3.0 or higher (on a rating scale of 1-4) for this section of the portfolio.

**Findings 2012-2013 - Target: Met**
Students achieved a 3.75 on this section of the portfolio.
learning outcomes for the CD Program. Each section aligns with one outcome and is rated on a scale of 1-4. For this section of the portfolio students must demonstrate their knowledge of linguistic and cultural issues related to communication and swallowing disorders.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Monitor student performance

Two students scored below the national average on the Clinical Management subtest of the Praxis II exam. This was surprising for two reasons: both students performed well in their clinical experiences, and the program graduates have met or exceeded the national average on this subtest every year since 2006-2007. The program faculty do not believe any action is needed at this time; however, the scores for this subtest will be monitored during the next two years for potential trends in student performance. During the 2011-12 cycle 100% of our students met this goal (Clinical Management); however, during the current cycle (2012-13) 86% met this goal. The fluctuation exists historically as well (2010-11, 87.5%; 2009-10, 100%). We will continue to monitor our students’ ability to achieve our stated goal for another two years.

- Established in Cycle: 2010-2011
- Implementation Status: In-Progress
- Priority: Low
- Relationships (Measure | Outcome/Objective):
  - Measure: Praxis II Exam Category VI Score (Clin Management) | Outcome/Objective: Discuss Principles of Assessment and Intervention
  - Measure: Praxis II Exam Category VII Score (Prof Issues) | Outcome/Objective: Apply Standards of Ethical Conduct
- Implementation Description: Students’ scores for this subtest will be monitored during the next two years for potential trends in student performance.
- Projected Completion Date: 05/2015
- Responsible Person/Group: Program coordinator.
- Additional Resources: None

#### Reduction of Outcomes & Measures

Assessment process will be streamlined in 2012-2013.

- Established in Cycle: 2011-2012
- Implementation Status: Finished
- Priority: High
- Implementation Description: The number of outcomes for the assessment has been reduced to 6.
- Projected Completion Date: 05/2013
- Responsible Person/Group: Dr. Jacqueline Laures-Gore, Program Coordinator

#### PRAXIS Category III Score

During the current cycle (2012-13) 71% met this goal. This is surprising given that our students met this goal (over 90%) during the previous three cycles. We will continue to monitor our students’ ability to achieve our stated goal for another two years. Additionally, we will hire new faculty and ensure no missing data points from PRAXIS reports.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
- Priority: Low
- Relationships (Measure | Outcome/Objective):
  - Measure: Praxis II Exam Category III Score (Spch Disord) | Outcome/Objective: Discuss Communication & Swallowing Disorders
  - Measure: Praxis II Exam Category III Score (Spch Disord) | Outcome/Objective: Discuss Principles of Assessment and Intervention
- Responsible Person/Group: Program Coordinator and Faculty Members

#### PRAXIS II Category V Scores

During the current cycle (2012-13) 65% met this goal. This is surprising given that students met the goal of 70% during the previous three cycles. We will continue to monitor our students’ ability to achieve our stated goal for another two years. Additionally, we will hire new faculty and ensure no missing data points from PRAXIS reports.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
- Priority: Low
- Relationships (Measure | Outcome/Objective):
  - Measure: Praxis II Exam Category V Score (Aud/Hrg) | Outcome/Objective: Discuss Communication & Swallowing Disorders
  - Measure: Praxis II Exam Category V Score (Aud/Hrg) | Outcome/Objective: Discuss Principles of Assessment and Intervention
- Projected Completion Date: 05/2015
- Responsible Person/Group: Program Coordinator and Faculty Members

#### PRAXIS Scores Category II

During the current cycle (2012-13) 86% met this goal. We will continue to monitor our students’ ability to achieve our stated goal for another two years. Additionally, we will hire new faculty and ensure no missing data points from PRAXIS reports.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
### Mission / Purpose

The MA Program in Communication trains students to be innovative actors in the communications sectors--whether journalism, film and media making, public relations, international communication--while at the same time providing theoretical and methodological grounding for students wishing to pursue the doctorate.

### Goals

**G 1: Scholarly or creative excellence**

Our highly diverse cohort of MA students can nonetheless be divided into two broad categories: those whose work is centered on scholarship and research, and those whose work is centered on the creative production of media work (films, videos, images, etc.). Students in the creative tracks are expected to develop a strong personal aesthetic vision as evidenced in their work, as well as a solid mastery of the technical demands of media production. Students in the research tracks are expected to produce a methodologically sound and theoretically rigorous scholarly exploration of a question central to the sub-field of communication which they are working in.

**G 2: Broad understanding of communications fields**

The MA in Communication trains students in a number of different sub-fields in our discipline, ranging from rhetorical studies to quantitative studies of media messages, from humanistic approaches to film and media to digital moving image production. Nevertheless, all students receiving the MA in Communication are expected to have a broad understanding of the various disciplines and interdisciplinary traditions that comprise the field of communication.

### Student Learning Outcomes/Objectives

**SLO 1: Understanding of scholarly and creative traditions (G: 2) (M: 1, 5, 6)**

Students should demonstrate a command of the key texts in their area of specialization. These include theoretical and scholarly literature in the area; additionally, for the Film/Video specialization, it includes a breadth of knowledge of the important artistic works, styles, and movements that comprise the film canon.

**SLO 2: Written, oral, and media-making competencies (G: 1, 2) (M: 3, 5, 6)**

Writing: the student is able to effectively present research in writing, cogently and effectively orchestrating his/her knowledge of the literature and theory to present a well-organized, clearly written, and effective argument. Production students are expected to write proposals that clearly convey the aesthetic qualities of the proposed work, as well as situate the work within larger aesthetic traditions. (film production track) Aesthetic and Technical: Students in the film production track are expected to have a thorough knowledge of the history of cinematic forms of expression; are expected to develop an original artistic voice in which to express themselves; and are expected to produce works that have a solid technical command of the components of filmmaking (cinematography, editing, sound).

**SLO 3: Understanding of research methods (G: 1, 2) (M: 2, 5, 6)**

Research and Method: Students are expected to be able to formulate a research problem which poses a significant and original intervention in the field. They are able to select both the appropriate objects of study and the appropriate theoretical tools pertinent to addressing this problem.

**SLO 4: Engagement with New Media (G: 2)**

Given that our department's mission is centrally connected to the scholarly study of media in all its forms, and is also engaged in the production of works of media art [film and video], we believe that all MA students should actively engage themselves at some point in their tenure as graduate students with new media. For creative MA students, this would entail engagement with new media as an exhibition/distribution venue, or with development of moving-image productions which mobilize new media in creative new ways. For scholarly MA students, this would entail some exposure to new, online modes of critical engagement with media and image-making cultures.
Measures, Targets, and Findings

M 1: Assessment in Core Seminars: Literature and Theory (O: 1)

Background: In the academic year 2010-11, we piloted an online system of end-of-course assessment for all graduate courses in the department. While some important information was gathered with this system, the data parsing and analysis proved to be an extreme burden on the limited number of faculty able to do it, and at the same time, we were getting lots of extraneous or irrelevant information. In light of this, last year's action plan included a complete rethinking of the graduate assessment in the department. In the Fall, the graduate director (Restivo) met with Marti Singer to discuss ways to implement a new assessment for a very complex graduate program with many areas of specialization. The grad director then mapped out some preliminary sets of rubrics and measures. Early in the Spring of 2012, the grad director met with each area of the doctoral and MA faculties, and worked with them to devise clear relevant learning outcomes, rubrics, and measures for each of the tracks of the MA and PhD programs. We decided to designate key core courses in each area of the MA and PhD programs as those in which student performance would be measured. We developed learning outcomes which, while parallel throughout the various tracks, nevertheless are able to measure learning outcomes specific to the tracks, as well as learning outcomes which are expected across all the tracks. (See associated appended documents.) For the Mass Comm and Human Comm MA tracks, the core courses for assessment will be Issues and Perspectives in Communication, and Research Methods in Communication. New rubrics are being designed for both these courses, to more accurately pinpoint student performance across a variety of areas. For the Film-Media Studies area, the core courses for assessment will be Advanced Film Theory and Media History. The rubrics have been developed for Advanced Film Theory and are in the process of being developed for Media History. For the Film Production area, the core courses for assessment will be Advanced Film Theory and Media Expression. These rubrics have been developed.

Target for O1: Understanding of scholarly and creative traditions

Because the new assessment forms for the MA are still in development, targets in some areas cannot be set yet. In the film MA, we would like to see students performing at level 3.0 in Advanced Film Theory. We have not yet devised the assessment form for Media History, the other core Film MA course. In the other MA tracks, we have not yet developed the assessment form for Issues and Perspectives in Communication, which measures competence in literature and theory.

Findings 2012-2013 - Target: Not Met

In the core Issues and Perspectives area that showed highest incidence of level-2 performance (25%) was breadth of knowledge of major theories of communication. Film: Theory We separate out studies students from production students, as expected outcomes are different for the 2 cohorts. Studies: The 2 areas where we see the lowest level of aggregate performance are: a/ knowledge of the major aesthetic traditions of the cinema; and b/ knowledge of post-classical film theory. The first has to do with variable undergraduate preparation of our admitted students; the second has to do with the inherent difficulty of the subject matter. Production: Production students are showing unacceptably low levels of performance in 3 areas: knowledge of major aesthetic traditions of cinema; and knowledge of both classical and postclassical film theory. Thus, across the board, we can identify as a problem area the students' overall breadth of knowledge in the field.

M 2: Assessment in Core Seminars: Research and Method (O: 3)

For background narrative, see Description of Measure #1. For the Mass Comm and Human Comm MA tracks, the core courses for assessment will be Issues and Perspectives in Communication, and Research Methods in Communication. New rubrics are being designed for both these courses, to more accurately pinpoint student performance across a variety of areas. For the Film-Media Studies area, the core courses for assessment will be Advanced Film Theory and Media History. The rubrics have been developed for Advanced Film Theory and are in the process of being developed for Media History. For the Film Production area, the core courses for assessment will be Advanced Film Theory and Media Expression. These rubrics have been developed.

Target for O3: Understanding of research methods

Because the new assessment forms for the MA are still in development, targets in some areas cannot be set yet. For two of the MA tracks, the assessment form has been developed (for the core course Research Methods in Communication). We still need to calibrate the rubrics so as to achieve meaningful assessments in this area. For the MA Film track, one question in the core Advanced Film Theory class assesses method. Here the target is 3.0 or higher for all students.

Findings 2012-2013 - Target: Partially Met

The one methodological issue that we found in the assessments was the students' ability to find objects of analysis that connected in a meaningful and imaginative way to the research question being posed. This may have to do, to some extent, with the other finding in the area of knowledge of literatures: if the students' knowledge of the aesthetic traditions or the theoretical body of work in the field is low, this can likely impact how imaginative they can be in connecting objects to research questions. Action item is suggested here.

M 3: Assessment in Core Seminars: Writing (O: 2)

For Background Narrative, see the description in Measure #1. Rubrics for writing are incorporated into both the core seminar assessments and the assessments of prospectus and thesis. The rubrics are as follows: 5 - the final paper would be an effective writing sample for admission to a distinguished doctoral program. 4 - the final paper is quite effective, and could be used as a writing sample for doctoral admission 3 - the paper is good, but requires a significant reconceptualization of the thesis, or a major reorganization of the argument, and/or a reconceptualization of the theoretical groundwork 2 - the paper is weak in more than one of the areas in (3) above 1 - the paper is not of graduate-seminar quality

Target for O2: Written, oral, and media-making competencies

Given that core seminars are generally taken in the first year of the MA program, we expect the outcomes to be lower than we would see for the thesis prospectus and thesis. The target is 80% of the students performing at 3 or higher, with 25% of the students performing at 4 or higher.

Findings 2012-2013 - Target: Partially Met

In general, writing in the core seminars was assessed to be at level 3 in about 75% of the students. This pretty much accords with our expected target, though we may want to begin aiming for a higher targeted outcome here.
### M 5: Quality of thesis prospectus and defense (O: 1, 2, 3)

Earlier versions of the thesis prospectus assessments were too vague, so we have developed new assessment forms which will measure competencies that correspond to those being measured in the core-seminar assessments. See appended documents.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

#### Target for O1: Understanding of scholarly and creative traditions

All students should score a 3 or higher; 40% of the students should score 4 or higher.

**Findings 2012-2013 - Target: Not Met**

Only a tiny fraction of the prospectuses produced this year were assessed. This is probably due to a misunderstanding among area faculty. Clearly, the prospectus is a key assessment document, insofar as it allows us to see the extent to which coursework has prepared the student for developing a thesis project. Thus, we need to devise a system which will allow graduate directors to make sure all prospectus defenses are assessed.

#### Target for O2: Written, oral, and media-making competencies

Ideally, all students should score a 3 (good) or higher score on this measure. However, given that the prospectus is by definition a roadmap toward a finished project rather than the project itself, it is to be expected that a certain percentage of students will score 2 (fair to barely passing) on some measures of the prospectus evaluation, with the idea that it is only through the process of the defense that some difficult issues can be sorted out to the point where the thesis can proceed. Thus, an acceptable target here would probably be more like 75% scoring good or higher.

**Findings 2012-2013 - Target: Not Met**

Only a tiny fraction of the prospectuses produced this year were assessed. This is probably due to a misunderstanding among area faculty. Clearly, the prospectus is a key assessment document, insofar as it allows us to see the extent to which coursework has prepared the student for developing a thesis project. Thus, we need to devise a system which will allow graduate directors to make sure all prospectus defenses are assessed.

#### Target for O3: Understanding of research methods

All students should score a 3 or higher; 40% of the students should score 4 or higher.

**Findings 2012-2013 - Target: Not Met**

Only a tiny fraction of the prospectuses produced this year were assessed. This is probably due to a misunderstanding among area faculty. Clearly, the prospectus is a key assessment document, insofar as it allows us to see the extent to which coursework has prepared the student for developing a thesis project. Thus, we need to devise a system which will allow graduate directors to make sure all prospectus defenses are assessed.

### M 6: Quality of creative or research thesis (O: 1, 2, 3)

Earlier versions of the thesis assessments were too vague, so we have developed new assessment forms which will measure competencies that correspond to those being measured in the core-seminar assessments. See appended documents.

**Source of Evidence:** Senior thesis or culminating major project

#### Target for O1: Understanding of scholarly and creative traditions

All students should score a 3 or higher; 40% of the students should score 4 or higher.

**Findings 2012-2013 - Target: Partially Met**

Among the 7 research theses assessed, competence in most areas that assessed knowledge of traditions averaged at a 3.3 to 3.5 level, thus evidencing that we did indeed see 40% performing at levels of 4 or higher. The one area that showed up as a potential problem area (in theory and in method) was the choice of appropriate objects of analysis in relation to the research question posed. This coincides with findings in the doctoral program as well, and an action item should be developed here. The 8 creative theses scored consistently in the 4 to 5 range, with the exception of 2 students who returned to the program after a hiatus of many years.

#### Target for O2: Written, oral, and media-making competencies

Here, the target should be 100% of theses at level 3 or level 4.

**Findings 2012-2013 - Target: Partially Met**

In both the research theses and the creative theses, writing and technical media production skills were both assessed at acceptable levels.

#### Target for O3: Understanding of research methods

All students should score a 3 or higher; 40% of the students should score 4 or higher.

**Findings 2012-2013 - Target: Partially Met**

Among the 7 research theses assessed, competence in most areas that assessed knowledge of traditions averaged at a 3.3 to 3.5 level, thus evidencing that we did indeed see 40% performing at levels of 4 or higher. The one area that showed up as a potential problem area (in theory and in method) was the choice of appropriate objects of analysis in relation to the research question posed. This coincides with findings in the doctoral program as well, and an action item should be developed here. The 8 creative theses scored consistently in the 4 to 5 range, with the exception of 2 students who returned to the program after a hiatus of many years.
Incorporate more opportunities for revisions in core courses

In the core theory-oriented courses (6010 and 6020) we should incorporate more opportunities for revisions of written work. These can be connected to shorter written assignment which focus on specific analytic or research skills.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

- Measure: Assessment in Core Seminars: Writing | Outcome/Objective: Written, oral, and media-making competencies
- Measure: Quality of creative or research thesis | Outcome/Objective: Written, oral, and media-making competencies
- Measure: Quality of thesis prospectus and defense | Outcome/Objective: Written, oral, and media-making competencies

**Projected Completion Date:** 03/2010  
**Responsible Person/Group:** Graduate Committee, Graduate Faculty

Post-defense writing assignment for prospectuses rated "fair"

Since a prospectus which passes, even with fair evaluations by the committee, does not need to be rewritten, we should begin to encourage chairs of committees, in cases where the committee evaluation of the prospectus was 'fair' in any category, to assign the student the task of writing a several page summary of the issues raised by the committee and the steps the student will take to address those issues.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Terminated  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

- Measure: Quality of creative or research thesis | Outcome/Objective: Written, oral, and media-making competencies
- Measure: Quality of thesis prospectus and defense | Outcome/Objective: Written, oral, and media-making competencies

**Responsible Person/Group:** Graduate Faculty

Annual reports submitted by all grad students

While our MA students are highly active in their participation in film festivals, engagement with new media, and in other creative and scholarly activities, we do not consistently gather information here. Typically, we only see the cv's of MA students if they have a teaching assignment. Thus, beginning this year, we will require all MA students to complete a questionnaire in which they describe in detail the various outside activities, recognitions, and so forth that they have been involved in. These can include film festival participation; new media work; conferences or publications; etc. After this is in place, we can develop a measure and a target for these activities.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Planned  
**Priority:** High

**Projected Completion Date:** 03/2012  
**Responsible Person/Group:** Graduate Committee.

Begin new assessment system based on data collected 2010-11

Background: Last year, the department implemented an online evaluation system with six rubrics, for all MA and doctoral students in the program, for every course that they took. The results were aggregated by year-in-program, program of study, and were averaged for each student across all the seminars the student took. The results have been reported throughout this WEAVE report as finding; in addition, the raw data and the interpretation of that data has been deposited in the document repository. The amount of data collected has given us valuable information with which to move forward in assessment (see below); while at the same time, it would be overkill to collect all this data every semester. (For one thing, it required that two tenure-track faculty spend over 50 hours of work during summer research time crunching data; this is clearly not something we can do on a regular basis.) Thus, we plan to redo this assessment in 7 years; in the meantime we plan to use the results to focus on targeted areas for assessment, in order to come up with more concrete revisions of curriculum, assignments, and so on. To this end, a subcommittee of the Graduate Committee will devise a system of rubrics that begins at the thesis and prospectus. Then we will target two courses during coursework which will serve as assessment courses, so that we can measure student progress at each stage of the program. Because there are several very different tracks in the Communications MA program, we have not decided yet whether we will develop separate rubrics for each track, or whether we can have common rubrics. (However, we definitely will need a separate set of rubrics for the creative work done in the film production area.) The data gathered from last year should help us determine this. Once the grad committee has drafted the new integrated set of rubrics, then they will be given to the faculty in each area, where further revisions will be done. We expect the entire set of rubrics to be ready by the end of Spring semester 2012.

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**

- Measure: Assessment in Core Seminars: Literature and Theory | Outcome/Objective: Understanding of scholarly and creative traditions
- Measure: Assessment in Core Seminars: Research and Method | Outcome/Objective: Understanding of research methods
- Measure: Assessment in Core Seminars: Writing | Outcome/Objective: Written, oral, and media-making competencies

**Projected Completion Date:** 03/2012  
**Responsible Person/Group:** Graduate committee; all graduate faculty

Review the content of the Advanced Film Theory course

Because the Film-Video program mixes students who are doing production with students who are doing critical studies, and because we accept students into the program with varied undergraduate majors and backgrounds, it is expected that there would be unevenness in knowledge of the canon. However, it would make sense to call an area meeting of production and film theory faculty to address how the course might more effectively get students up to speed.

**Established in Cycle:** 2011-2012

Implementation Description: Series of area meetings of those faculty who teach film theory, and the production faculty.
Projected Completion Date: 12/2012
Responsible Person/Group: Angelo Restivo

Revise new rubrics for the Research Methods course
Addendum 2013: This course will no longer be part of MA assessment. We are paring down the number of core assessment courses for efficiency. The findings for student performance in the Research Methods course were unusually high, and were not in sync with either previous years' findings or with the findings from this year's film-video track assessments. Thus, the area faculty who teach this course need to develop a set of measures and rubrics that will give more nuanced results of student performance here.

Established in Cycle: 2011-2012
Implementation Status: Terminated
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Assessment in Core Seminars: Research and Method | Outcome/Objective: Understanding of research methods

Implementation Description: Meetings with relevant area faculty.
Projected Completion Date: 12/2012
Responsible Person/Group: Angelo Restivo; graduate committee.

Institute BA/MA program in media production
We are currently in the process of implementing a BA/MA program. We feel that this will address some of the issues that have come up in the past with the film production MA, where some of the MA cohort were not adequately trained in film aesthetics before coming into the program.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Responsible Person/Group: Chair; production faculty

Monitor Prospectus Defenses
The prospectus will be a key benchmark for assessing progress of MA student before completion of the thesis, and after taking the key core course. We have not been tracking prospectus defenses as vigorously as we should.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Responsible Person/Group: Grad Directors.

Georgia State University
Assessment Data by Section
2012-2013 Communication Studies PhD
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Graduate Program in Communication offers its students a multi-disciplinary curriculum leading to the Ph.D. degree. The program is designed to prepare students for research and teaching in one of three primary areas of emphasis: Rhetoric and Politics, Media and Society, and Moving Images Studies. The curriculum is designed to provide students with in depth training in communication pedagogy and the professional expectations of the discipline, as well as mentored experiences in both teaching and research.

Goals
G 1: To produce PhDs highly skilled in research
The areas of Rhetoric/Politics, Media and Society, and Moving Image Studies are all highly interdisciplinary, drawing on a broad range of theoretical and intellectual traditions. We would like our PhDs to frame research questions with full understanding of their positioning within this broad discursive matrix, while at the same time having highly developed research skills specific to their research questions.

G 2: To produce excellent undergraduate teachers
We seek to produce PhDs with demonstrated teaching excellence in the undergraduate classroom, both at the level of the introductory or survey course and in higher-level courses related to their research projects.

G 3: To foster academic professionalism
We strive to produce PhDs with significant professional experience, including presentation at conferences in their area (Rhetoric and Politics, Media and Society, or Moving Image Studies), professional interaction with leading scholars in their areas of research, publication in journals, and service activities in the graduate student caucuses of the professional organizations in their area.
Student Learning Outcomes/Objectives

SLO 1: Knowledge of Literatures (G: 1) (M: 1, 6, 7, 8)

Because all three of our doctoral tracks are highly interdisciplinary, the students in each track are expected to have solid mastery of the diverse literatures informing their particular area of study. Background: In the academic year 2010-11, we piloted an online system of end-of-course assessment for all graduate courses in the department. While some important information was gathered with this system, the data parsing and analysis proved to be an extreme burden on the limited number of faculty able to do it, and at the same time, we were getting lots of extraneous or irrelevant information. In light of this, last year’s action plan included a complete rethinking of the graduate assessment in the department. In the Fall, the graduate director (Restivo) met with Marti Singer to discuss ways to implement a new assessment for a very complex graduate program with many areas of specialization. The grad director then mapped out some preliminary sets of rubrics and measures. Early in the Spring of 2012, the grad director met with each area of the doctoral and MA faculties, and worked with them to devise clear and relevant learning outcomes, rubrics, and measures for each of the tracks of the MA and PhD programs. We decided to designate key core courses in each area of the MA and PhD programs as those in which student performance would be measured. We developed learning outcomes which, while parallel throughout the various tracks, nevertheless are able to measure learning outcomes specific to the tracks, as well as learning outcomes which are expected across all the tracks. (See uploaded documents.) For the doctoral programs, we developed new, and much more nuanced, rubrics for measuring performance on the comprehensive exams, specific to each area. Thus, measurements of outcomes on the comprehensive exams are now directly tied to measurements of learning outcomes of specific core seminars. (See uploaded documents.) In this way, we will be able to track over time how students are performing from coursework to comprehensive exams. If, for example, we identify an area of consistently weak performance in one of the area core courses, we can then add this area as a measure in the comprehensive exams, and thus be able to ascertain what kinds of curricular change would be warranted, given the particularities of the area. At the doctoral level, after the comprehensive exam assessment, we will use common forms for assessing dissertation prospectuses and dissertations. These will tie in to the learning outcomes which are common throughout all the tracks of the PhD program. (Assessment forms uploaded in documents.)

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

SLO 2: Research and Method (G: 1) (M: 3, 6, 7, 8)

Research and Method: Students are expected to be able to formulate a research problem which poses a significant and original intervention in the field. They are able to select both the appropriate objects of study and the appropriate theoretical tools pertinent to addressing this problem. Background: In the academic year 2010-11, we piloted an online system of end-of-course assessment for all graduate courses in the department. While some important information was gathered with this system, the data parsing and analysis proved to be an extreme burden on the limited number of faculty able to do it, and at the same time, we were getting lots of extraneous or irrelevant information. In light of this, last year’s action plan included a complete rethinking of the graduate assessment in the department. In the Fall, the graduate director (Restivo) met with Marti Singer to discuss ways to implement a new assessment for a very complex graduate program with many areas of specialization. The grad director then mapped out some preliminary sets of rubrics and measures. Early in the Spring of 2012, the grad director met with each area of the doctoral and MA faculties, and worked with them to devise clear and relevant learning outcomes, rubrics, and measures for each of the tracks of the MA and PhD programs. We decided to designate key core courses in each area of the MA and PhD programs as those in which student performance would be measured. We developed learning outcomes which, while parallel throughout the various tracks, nevertheless are able to measure learning outcomes specific to the tracks, as well as learning outcomes which are expected across all the tracks. (See uploaded documents.) For the doctoral programs, we developed new, and much more nuanced, rubrics for measuring performance on the comprehensive exams, specific to each area. Thus, measurements of outcomes on the comprehensive exams are now directly tied to measurements of learning outcomes of specific core seminars. (See uploaded documents.) In this way, we will be able to track over time how students are performing from coursework to comprehensive exams. At the doctoral level, after the comprehensive exam assessment, we will use common forms for assessing dissertation prospectuses and dissertations. These will tie in to the learning outcomes which are common throughout all the tracks of the PhD program. (Assessment forms uploaded in documents.)

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

SLO 3: Proficiency in communication theory (G: 1) (M: 2, 6, 7, 8)

Demonstrated ability to comprehend and engage the full range of communication theories in the student’s area (Rhetoric/Politics, Media/Society, or Moving Image Studies), including an understanding of the intellectual contexts in which these theories evolved, and the specific problems they attempt to address.

SLO 4: Proficiency in writing (G: 1) (M: 4, 7, 8, 9, 10)

Writing: the student is able to effectively present research in writing, mobilizing the skills assessed in items 1, 2, and 3 above: that is, once an appropriate research problem is identified, the student is able to cogently and effectively orchestrate his/her knowledge of the literature and theory to present a well-organized, clearly written, and effective argument.

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 5: Strong oral presentation and advocacy skills (G: 3)

The doctoral student is expected to be able to present orally both analytical summaries of the work of others in the field, and their own research. They are also expected to be able to make pointed interventions in discussions and question/answer sessions, both in relation to their own work and the work of colleagues.

Strategic Plan Associations
3.1 Enhance a research culture.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 6: Teaching excellence (G: 2)**
Demonstrated excellence in teaching courses in both the introductory courses in the field and in the student’s areas of specialization.

**Other Outcomes/Objectives**

**O/O 7: Professional development (G: 3) (M: 9, 10)**
Students are expected to regularly present their work at the professional conferences in the field, and to regularly submit written work for publication. Students are also encouraged to take an active role in the graduate student caucuses of the professional organization in their area.

**Measures, Targets, and Findings**

**M 1: Assessment in Core Seminars: knowledge of the literature (O: 1)**
Several rubrics on our new assessment forms measure knowledge of the literature in core courses. The standards set forth are as follows: Course content: overall literature: 5 – student has read and mastered a good deal of the literature in the field over and above the material on the course reading list. The student fully understands the intellectual contexts within or against which the various developments within the field have positioned themselves. You could comfortably recommend that the student would be able to teach this material in a graduate seminar. 4 – student demonstrates a clear mastery of the literature in the field, largely from the course readings but with significant areas of reading outside the required material. The student likely received an ‘A’ in the course. The student is not yet an expert in the area covered in the seminar; or the student—given her/his research interests—may not need to become an expert in the area. 3 – student has a good mastery of the literature of the area, with few if any major gaps. Much of the student's knowledge of the area comes from the readings required in the course. 2 – there are some significant gaps in the student's knowledge of the literature of the area. 1 – there are wide gaps in the student's knowledge of the literature of the area.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Knowledge of Literatures**
Target: 25% perform at level 4 or 5; 75% perform at level 3.

**Findings 2012-2013 - Target: Met**
The target was met in knowledge of the literatures.

**M 2: Assessment in Core Seminars: Theory (O: 3)**
Several rubrics on our new assessment forms measure knowledge of the literature in core courses. The standards set forth are as follows: Course content: theory: 5 - sophisticated knowledge of theoretical issues pertaining to the course, going well beyond the required readings, with an understanding of the historical and intellectual contexts of all major theoretical positions, and most importantly, evidence that the student can make theoretical interventions of some degree of originality. 4 - excellent knowledge of theoretical issues pertaining to the course, going somewhat beyond the required readings, and evidencing some degree of historical and intellectual contexts of debates. The student feels comfortable making theoretical interventions, though there might be some awkwardness of execution. 3 - student evidences a good command of theoretical groundings of the course, and can accurately summarize them, but is insecure in making theoretical interventions, and needs to understand the intellectual contexts of theoretical developments more clearly. 2 – the student has shown some difficulty in accurately summarizing theoretical arguments, in commanding theoretical vocabulary, and in making theoretical interventions. 1 – the student’s knowledge of theory is inadequate to do doctoral-level research.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Proficiency in communication theory**
Target: 80% perform at level 3 or higher; 40% perform at levels 4 or 5.

**Findings 2012-2013 - Target: Not Met**
The one area in which students underperformed in relation to targets was in the ability to mobilize theory in the analysis of media texts (or political texts); this was the case in all doctoral tracks.

**M 3: Assessment in Core Seminars: Research and Method (O: 2)**
Two questions assess in this area: one question assesses ability to formulate a significant research question, and the second assesses the ability to select appropriate objects of study and theoretical discourses suitable to the research question.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Research and Method**
Target: 80% perform at level 3 or higher; 40% perform at levels 4 or 5.

**Findings 2012-2013 - Target: Not Met**
In both MIS and Public Comm tracks, two areas were found to be areas of underperformance in the seminars: 1. the ability to select appropriate objects or texts to analyze in relation to the theoretical argument one is making; and 2. (related) the ability to mobilize theory in performing a textual analysis. Both areas should be subject to action items.

**M 4: Assessment in Core Seminars: Writing (O: 4)**
Two questions in the assessment measure writing skills, with the rubrics as follows: Overall writing effectiveness: 5 - the final paper can with very minor revisions be submitted to a journal 4 - the final paper is quite effective, but would require some substantial
In the newly adopted assessment plan put in place in Spring of 2012, we decided to begin assessing doctoral dissertation prospectuses and dissertations, which had not been assessed. Because only a very small number of prospectuses were defended in the period between the development of the measure and the end of the cycle, it is too early to develop targets or report findings here. Dissertation assessments will be aggregated with those defended in the current academic year, and results will be reported in the period between the development of the measure and the end of the cycle, it is too early to develop targets or report findings here.

Source of Evidence: Senior thesis or culminating major project

**Findings 2012-2013 - Target: Met**
In the theory portions of the comps, the students consistently performed at level 3 or higher, with a fairly equal division between performance at levels 3, 4, and 5.
Target for O1: Knowledge of Literatures
All students should achieve at least a level 3 in assessment of knowledge of literatures. The rubrics are designed so that very few will score at level 5. The average aggregate performance should be 3.5.

Findings 2012-2013 - Target: Met
All dissertations scored 3, 4, or 5 in areas related to knowledge of literatures.

Target for O2: Research and Method
Average aggregate performance on dissertations in this area should be 3.5, with the occasional exceptional dissertation receiving a 5.

Findings 2012-2013 - Target: Met
All dissertations scored 3, 4, or 5 in areas related to research and methodology.

Target for O3: Proficiency in communication theory
Average aggregate performance on dissertations in this area should be 3.5, with the occasional exceptional dissertation receiving a 5.

Findings 2012-2013 - Target: Met
All dissertations scored 3, 4, or 5 in areas related to theory.

Target for O4: Proficiency in writing
Average aggregate performance on dissertations in this area should be 3.5, with the occasional exceptional dissertation receiving a 5.

Findings 2012-2013 - Target: Not Met
In the area of writing, a significant difference was seen between performance in the Moving Image Studies area, and performance in the Public Communication areas. In MIS, we saw consistently lower scores in the writing, with 2 to 3.2 being the range. In Public Comm areas, the writing was assessed at an average 4.5, exceptionally high. Given that these high scores in public were seen in all other areas of the dissertation, it could be that Public had an exceptionally strong pool of dissertators, and that MIS dissertators were not the strongest in the program. Whether an action item should be developed for writing should be considered by the area faculty in MIS.

M 9: Presentation of work at conferences (O: 4, 7)
Students are expected regularly to present conference papers at both the international professional organizational conferences in their area, and at smaller, boutique conference related to their specific line of research. In our annual review meetings we now do an annual credential check, requiring CV submission, and those are carefully discussed so that ongoing plans of study are matching actual accomplishment. (Note: we are splitting a current measure, “Conferences and Publications,” into two separate measures, as achievements are significantly different in the two areas.)

Source of Evidence: Presentation, either individual or group

Target for O7: Professional development
All doctoral students are expected to present, minimally, one conference paper per year (after the first year in the program), and to publish at least one article before defending the dissertation.

Findings 2012-2013 - Target: Met
In the academic year 12-13, our doctoral students presented a total of 88 conference papers: 14 at international conferences, 42 at national conferences, 20 regional and 12 local.

M 10: Publication in peer reviewed journals (O: 4, 7)
While this is an indirect measure, we feel that it is very important that we measure and report the number and types of publications and conference presentations of the doctoral students. Several years ago, we instituted the doctoral writing proseminar expressly to allow students to turn seminar papers into papers ready to send out for journal review. We want to track over time whether or not this results in increased publication among the doctoral students.

Source of Evidence: Academic indirect indicator of learning - other

Target for O4: Proficiency in writing
The aggregate number of publications among the doctoral students should increase to reflect a 50% annual publication rate: ie, the number of publications accepted in any given year should rise to 50% of the doctoral cohort.

Findings 2012-2013 - Target: Met
This year saw an upswing in the number of publications among the doctoral students, perhaps evidence that our continued emphasis on getting their seminar work out to journals is now leading to results. Our students have 10 journal articles either in press or published, and 5 book chapters in press or published. In addition, they published 3 online articles, 6 book reviews/review essays, and 2 encyclopedia entries. We can thus marked our target as having been met, while realizing that we need to keep reminding doctoral students to stay active in this area.

Target for O7: Professional development
We will not adopt a rigid target percentage on this, except that all students should have at least one article accepted in a peer-reviewed journal or collection by the final year of dissertation writing (as they prepare to go on the job market). The reasons for this flexibility are that, first, there is legitimate disagreement among graduate educators whether doctoral students should take time away from dissertation writing to produce journal articles; and second, the time-frames of academic journal publishing (ie,
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Institute prospectus writing workshop**
In Fall 2009, we began to offer a prospectus writing workshop for all students who had completed coursework (whether or not they had taken comps yet). We believe that this workshop will not only help doctoral students avoid the post-comprehensive-exams "doldrums," which often drags out the period during which the prospectus is written; but that it will also help the student in the publication process, as the completed prospectus can serve as a kind of template for planning which areas of the dissertation would be best suitable for sending out for publication during the writing process.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Finished
- **Priority:** High

**Revised doctoral proseminar curriculum**
At the initiative of the Graduate Committee, and with the approval of the entire faculty, we have initiated a new prosemin format which is focused on faculty and student presentation of research in progress. Students will now be required to present work in prosemin at least twice during their doctoral residence, once before comprehensive exams, and once in the dissertation-writing period. We believe that this shift in focus in the prosemin will help bring the students more quickly up to speed in the theoretical foundations of the field, and in their oral and written proficiency.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Bring top doctoral applicants to department in mid February**
Now that we have moved the application deadlines up to December 1, we are planning to bring to the department our top doctoral applicants in mid February; we believe that we can significantly improve our yield in doctoral student recruitment by exposing them to the faculty and grad students in the department.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High

**Continue annual manuscript workshops with senior scholars**
The first workshop with Dudley Andrew from Yale was a great success, and the upcoming workshop with Ernesto Laclau promises to be the same. By continuing the bring the highest-level scholars to our department, we expect to increase departmental visibility both nationally and internationally, and thus increase the quality of our doctoral applicant pool.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High

**Continue the Moving Image Studies conference**
Currently, the Moving Image Studies conference set for Feb 2011 promises to bring a highly visible group of scholars together under the theme of "Rendering the Visible." The area should consider continuing this conference, perhaps biennially given the vast time from the time of submission, to 'revise-resubmit,' to final acceptance) vary so widely that one cannot set expectations that are tied to academic years.

**Findings 2012-2013 - Target: Met**
This year saw an upswing in the number of publications among the doctoral students, perhaps evidence that our continued emphasis on getting their seminar work out to journals is now leading to results. Our students have 10 journal articles either in press or published, and 5 book chapters in press or published. In addition, they published 3 online articles, 6 book reviews/revision-essays, and 2 encyclopedia entries. We can thus marked our target as having been met, while realizing that we need to keep reminding doctoral students to stay active in this area.
Institute earlier application deadlines for graduate application

Because the Grad Committee discovered that we were losing our best applicants to other programs in part because our application deadlines were so late in the cycle, we moved the doctoral application deadlines to Dec 1 (Feb 1 for no GTA consideration); and the MA deadlines to Feb 1 / Mar 15. This is in keeping with other, competitive departments’ deadlines.

Investigate option for non-thesis MA

The Graduate Committee has charged a subcommittee with investigating the possibility of a non-thesis MA, for those students coming out of a BA program who want to move quickly into the PhD track. We may be losing some of the best applicants to doctoral programs in our areas because of we cannot provide a faster track toward the doctorate. This policy (which is currently only under consideration, and would need to be approved by the Executive Committee and eventually the entire faculty) is in keeping with the practices of many graduate departments in our field (especially in the moving image studies area).

Revamp end-of-semester online assessment of doctoral students

Given the described problems in the current set of data generated by the pilot assessment year, the following recommendations have been presented to the Graduate Committee: 1. Aggregate data by student for each semester; 2. Assign semester-in-program numbers to each student and generate data spreads under that variable. 3. Revise the evaluation questionnaire both to a/ eliminate redundancies; and b/ eliminate categories that will not lead to identification of actionable issues; and most important, c/ revise assessment rubrics to produce a wider spread in the results, to be accomplished by adopting standards of the profession and not expectations of a graduate student. 4. Establish coherent methods of reporting and presenting data, as well as a deadline for each semester’s data.

Add writing requirement to Prosem

Beginning Fall 2011, the department is requiring that all students who present papers at proseminar (and they are required to present at minimum two papers during their doctoral studies) distribute beforehand the written version of the paper to the faculty and doctoral students. This is designed not only to produce better discussion in the proseminar after the paper is delivered, but also to serve as another opportunity for doctoral students to revise and polish written work for an audience.

Annual reports submitted by all grad students

We already track doctoral student publications and conference presentations during the academic year in the course of our year-end meetings with each doctoral student. However, we want to institute a form for them to fill out (as opposed to the current CV), so that we can gather more information on other activities that we want to track, such as extent and types of engagement with New Media, creative work in film production (for the MA students), and other information.

Begin new assessment system based on data collected 2010-11

Background: Last year, the department implemented an online evaluation system with six rubrics, for all MA and doctoral students in the program, for every course that they took. The results were aggregated by year-in-program, program of study, and were averaged for each student across all the seminars the student took. The results have been reported throughout this WEAVE report as finding: in addition, the raw data and the interpretation of that data has been deposited in the document repository. The amount of data collected has given us valuable information with which to move forward in assessment (see below); while at the same time, it would be overkill to collect all this data every semester. (For one thing, it required that two tenure-track faculty spend over 50 hours of work during summer research time crunching data; this is clearly not something we can do on a regular basis.) Thus, we plan to redo this assessment in 7 years; in the meantime we plan to use the results to focus on targeted areas for assessment, in order to come up with more concrete revisions of curriculum, assignments, and so on. To this end, a subcommittee of the Graduate Committee will devise a system of rubrics that begins at the dissertation and moves backward through the prospectus and comprehensive exams. Then we will target two courses during coursework which will serve as assessment courses, so that we can measure student progress at every stage of the program.

decided yet whether we will develop separate rubrics for each track, or whether we can have common rubrics. The data gathered from last year should help us determine this. Once the grad committee has drafted the new integrated set of rubrics, then they will be given to the faculty in each area, where further revisions will be done. We expect the entire set of rubrics to be ready by the end of Spring semester 2012.

Established in Cycle: 2010-2011

Relationships (Measure | Outcome/Objective):
Measure: Comprehensive doctoral examinations | Outcome/Objective: Proficiency in communication theory

Projected Completion Date: 03/2012

Fine tune the new assessment system begun Spr2012
2013: Feedback we received from assessment experts suggested that we were doing too much early assessment in course work; thus we are going to phase out course assessment and assess at important end points: comprehensive exams, prospectus, dissertation prospectuses. 2012: Because the new assessment of core courses in the PhD tracks is much more nuanced than previous assessment systems, it is going to take a while before all 3 doctoral tracks are being assessed consistently in relation to one another. Thus, when we see large discrepancies in performance from one doctoral track to another, we first need to determine whether the rubrics and measures are consistent across the areas, before taking further action.

Established in Cycle: 2011-2012

Monitor Prospectus Defenses
The prospectus defense is extremely important benchmark to assess student progress in the program, and yet this is the one area where our assessment has been extremely uneven. Thus, we are making a concerted effort to vigorously enforce the assessment of dissertation prospectuses. This is going to be especially valuable for the Rhetoric and Politics area; in 2011, they added two additional courses (in theory and method) to the already required 2 courses, in response to measured performance on comps to be below expectation. This year marks the year in which the first cohort under the new core curriculum will be comping and writing prospectuses; thus we will be able to find out how effective the new curriculum in Rhetoric and Politics is.

Measure: Assessment of Dissertation Prospectus | Outcome/Objective: Knowledge of Literatures

Revise comps film reading list for Moving Image Studies
Our current comps reading list in film studies is not only out of date, but it is too diffuse and thus does not allow us to ask the kinds of questions we need to in order to assess students’ overall knowledge of the field. This manifests itself, for example, in sometimes poor performance on prospectus writing/defense, when we should have identified the problem area at an earlier stage. Thus, we plan to revise the film studies reading list in order to organize it around a small number of key ideas in the field that we feel all the students must have complete mastery over.

Mission / Purpose

In today's highly competitive global environment, the effective deployment of information technology has become the key to organizational success. There is a continuing shortage of individuals with the combination of business and technology skills needed to develop and manage information systems that provide competitive advantage in the global marketplace. New applications of information technology strike at the heart of what management does and how organizations are structured and compete. In many respects these applications are redefining the nature of work and its organization. The mission of the M.B.A. concentration and major in information systems is to produce graduates able to fill this need. Students will learn how to combine their general business knowledge with contemporary and emerging information systems concepts to enable organizations to compete strongly in the global marketplace. The courses to constitute a concentration (12 semester hours) in information systems are chosen from the 8000-level offerings of the Department of Computer Information Systems or IB 8680. This flexibility enables students to select courses that provide the best foundation for their career advancement. The M.B.A. IS enrollment over the 2008-2009 academic year was used to identify the specific courses for this assessment. Based on highest registration, the selected courses were CIS 8000 IT Project Management, CIS 8010 Business Process Innovation & Organizational Change Management, CIS 8020 Systems Integration, and CIS 8080 Security and Privacy. Indeed, these are logical extensions of the overall MBA program. Businesses need to continually innovate. This typically requires employing IT enabled business process reengineering and careful management of organizational change and of the overall innovation project. Finally, security and privacy are evermore important to maintain integrity and trust in this highly connected business environment.

Outcomes/Objectives

O/O 1: Build and renew business via technology and process (M: 1)
Students will be able to identify and diagnose problems in business process, to design improved configurations enabled by information technology, and to manage the organizational changes required to implement the new processes.

O/O 2: Manage projects and balance resources (M: 2)
Students will be able to translate a set of project requirements and resources into a workable plan. Students will be able to work with intellectual tools for selecting among competing projects and to choose appropriate solutions to meet project objectives.

O/O 3: Identify security and privacy circumstances and required controls (M: 3)
Students will be able to articulate security and privacy circumstances and to propose appropriate controls.

O/O 4: Employ strategies and methods to blend interdependent systems into a unified whole to accomplish business goals (M: 4)
The student will be able to employ strategies and methods to blend interdependent systems into a unified whole to accomplish business goals. This includes: Define the objectives of and issues associated integration of information systems applications. Explain alternative strategies for systems integration. Identify commonly used tools for integrating information systems, describing the benefits of using each. Explain how Web services can aid in systems integration, identifying the underlying tools and technologies that facilitate the creation of such services. Discuss the characteristics of systems integration projects, emphasizing the management issues and practices associated with them. Identify information systems application and organization characteristics that are most likely to cause an organization to employ a systems integration company to carry out the project work.

Measures, Targets, and Findings

M 1: Identify and diagnose problems in business process, design improved configurations enabled by IT, and manage the required change (O: 1)
Students will be able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the required organizational changes.

Source of Evidence: Writing exam to assure certain proficiency level
### Mission / Purpose

The application of information technology to organizational functions has shifted from supplanting basic operational tasks to the evolution of an intelligent information infrastructure which supports knowledge-workers within the organization as well as customers of the organization. Underlying these changes is an ever more rapidly developing technology with dramatically changing economics,

---

### Target for O1: Build and renew business via technology and process

75% of students will be rated at or above 2.0. Measurement will be done by applying the following Rubric to the written assignments in CIS 8010. Learning Objective: Identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were not able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes.

---

### Target for O2: Manage projects and balance resources

75% of students will be rated at or above 2.0. Measurement will be done by applying the following Rubric to the written assignment(s), usually scored by a rubric. Source of Evidence: Written assignment(s), usually scored by a rubric. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes.

---

### Target for O3: Identify security and privacy circumstances and required controls

75% of students will be rated at or above 2.0. Measurement will be done by applying the following Rubric to the written assignment(s), usually scored by a rubric. Source of Evidence: Written assignment(s), usually scored by a rubric. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes.

---

### Target for O4: Employ strategies and methods to blend interdependent systems into a unified whole to accomplish business goals

75% of students will be rated at or above 2.0. Measurement will be done by applying the following Rubric to the written assignment(s), usually scored by a rubric. Source of Evidence: Written assignment(s), usually scored by a rubric. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes. Students were able to accurately identify and diagnose problems in business process, design improved configurations enabled by information technology, and manage the organizational changes required to implement the new processes.

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

---

**Mission / Purpose**

The application of information technology to organizational functions has shifted from supplanting basic operational tasks to the evolution of an intelligent information infrastructure which supports knowledge-workers within the organization as well as customers of the organization. Underlying these changes is an ever more rapidly developing technology with dramatically changing economics,
pushing the envelope of what is possible and desirable. In this environment of dynamic and pervasive technology development and diffusion, the mission of the BBA-CIS program is to produce graduates who are able to combine their general business and technical knowledge with the latest software development tools and techniques to create information systems that will meet the needs of tomorrow's organizations. Number of graduates from this BBA CIS degree program this academic year: Summer 2011 37 Fall 2011 57 Spring 2012 59 The number of students in this program major: Summer 2011 347 Fall 2011 659 Spring 2012 673 Previous academic year graduates: Summer 2010 21 Fall 2010 37 Spring 2011 48 The number of students in this program major during previous academic year: Summer 2010 297 Fall 2010 562 Spring 2011 586 General approach As part of the ongoing assessment of our CIS BBA program, the CIS department has leveraged the CIS 4980 "Capstone" course project. Students in this required course are assigned to real world organizations for the purpose of exercising the full range of topics from the CIS undergraduate core courses. Since these are real world environments, the needs of specific organizations may not cover all topics. See the CIS assessment plan at http://education.gsu.edu/ctl/outcomes/RCB/CIS_BBA_Assessment_Plan-8-04.htm. CIS has developed a survey to gain structured and free form feedback from individuals involved with CIS 4980 "Capstone" projects. Use of this survey began in Spring 2005 (although we have project materials from several earlier semesters as well as informal feedback and observations from students and faculty). The form used in this Capstone survey is attached. At the end of each semester, the CIS 4980 teams present their projects to fellow students, faculty, and clients. Each of these viewers (excluding students) is asked to complete a survey for each team's presentation. Students' are asked to complete the survey to comment on their own performance and on their level of preparation to perform within each of the areas on the survey. And, there are areas for "open" comments. Clients may complete the survey based on their observations of the team's work and their presentation at the client's site. The survey's areas cover the full range of primary objectives of the courses within the CIS undergraduate core (and also within most electives). In particular, we can map the areas back to the CIS courses and measure whether scores are increasing (hopefully reflecting continuing improvement in the conduct of the associated courses and the in resulting student learning).

Goals

G 1: CIS BBA Program Goals
Students will become better problem-solvers; students will demonstrate clearer critical-thinking; students will gain broad knowledge of the discipline; students will be well prepared for positions in the discipline.

Student Learning Outcomes/Objectives

SLO 1: Students will be proficient in systems analysis (G: 1) (M: 1, 2, 3, 4, 11)
Students will be able to investigate, define, document and analyze an existing information system including the capability to solve complex organizational problems. Within the context of a capstone course, the ability of students to analyze real-world organizational needs will be evaluated by the client organizations. The ability of students to analyze real-world organizational needs will be evaluated by a faculty panel. Students will be able to specify requirements for a replacement system. Within the context of a capstone course, the ability of students to develop program specifications will be evaluated by the client organizations. The quality of specifications developed by students will be evaluated by a faculty panel.

SLO 2: Students will be proficient in systems design (M: 5, 6, 9)
Students will be able to read a system specification and analyze user data requirements within the context of a three-tier architecture. Within the context of a capstone course, the ability of students to design current systems architectures will be evaluated by a faculty panel. Students will be able to present tier, business tier, and data tier abstractions. Within the context of a capstone course, the ability of students to develop current system architectures will be evaluated by the client organizations. The ability of students to develop program specifications, procedures, test plans and implementation plans. Within the context of a capstone course, the ability of students to develop program specifications, procedures, test plans and implementation plans for real-world applications will be evaluated by the client organizations. The ability of students to develop program specifications, procedures, test plans and implementation plans for real-world applications will be evaluated by a faculty panel. Students will be able to model and develop a design for a web-based application. Within the context of a capstone course, the ability of students to write object-oriented programs will be evaluated by the client organizations. The ability of students to write object-oriented programs will be evaluated by a faculty panel.

SLO 3: Object Oriented Programming Proficiency (M: 7, 8, 10)
Students will be able to read a program specification using unified modeling language. Within the context of a capstone course, the ability of students to develop object-oriented software that conforms to specifications will be evaluated by the client organizations. The ability of students to develop object-oriented software that conforms to specifications will be evaluated by a faculty panel. Students will be able to design, code, test and document an object-oriented program in an object-oriented programming language. Within the context of a capstone course, the ability of students to write object-oriented programs will be evaluated by the client organizations. The ability of students to write object-oriented programs will be evaluated by a faculty panel.

Measures, Targets, and Findings

M 1: Identified User Requirements (O: 1)
Acquired and scoped the system and user requirements
Source of Evidence: Capstone course assignments measuring mastery

Target for O1: Students will be proficient in systems analysis

4.0 on a scale of 1 though 5 with 5 being outstanding / strongly agree for an average end of the capstone project survey given to clients, observing faculty, and students.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Object-Oriented Concept Use**
Need to assess whether this miss is a result of programming not being required or the result of projects not requiring Object-Orientation.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: Medium
- Relationships (Measure | Outcome/Objective):
  - Measure: Used Object-oriented concepts and notation | Outcome/Objective: Students will be proficient in systems analysis
- Implementation Description: The CIS UPC will assess whether this miss is a result of programming not being required or the result of projects not requiring Object-Orientation. Student interpretation of questions seems to be an ongoing problem.
- Projected Completion Date: 01/2012
- Responsible Person/Group: CIS UPC Chair

**Use of database concepts**
Teams did not use database concepts well enough to meet goal.

- Established in Cycle: 2010-2011
- Implementation Status: Planned
- Priority: Medium
- Relationships (Measure | Outcome/Objective):
  - Measure: Appropriately used database concepts | Outcome/Objective: Object Oriented Programming Proficiency
- Implementation Description: Assess change in assessment rating of database concept use. Take appropriate action to correct or to clarify.
- Projected Completion Date: 01/2012
- Responsible Person/Group: CIS UPC
Recommend self-paced programming course
Students are not able to program are now strongly advised to complete an e-training self-paced Java programming course. The survey will also emphasize that responses to this question should be N/A if no programming is required by the student’s project.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Appropriately used an object-oriented programming | Outcome/Objective: Object Oriented Programming Proficiency

Implementation Description: Students are not able to program are now strongly advised to complete an e-training self-paced Java programming course. The survey will also emphasize that responses to this question should be N/A if no programming is required by the student’s project.

Projected Completion Date: 01/2013
Responsible Person/Group: CIS 4980 instructor

Recommend self-paced programming course
Students who have not taken programming will be (and are now) strongly advised to complete an e-training self-paced Java programming course if they have not taken a CIS programming course.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Coded and Developed | Outcome/Objective: Object Oriented Programming Proficiency

Implementation Description: Strongly recommend self-paced programming course when programming not an existing knowledge

Projected Completion Date: 01/2013
Responsible Person/Group: CIS 4980 instructor

Require self-paced programming course
While students are not required to take a programming course, many projects include some programming. Even when the student does not have to program, they seem to feel inadequate. Students who have not taken programming are now strongly advised to complete an e-training self-paced Java programming course.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Used Object-oriented concepts and notation | Outcome/Objective: Students will be proficient in systems analysis

Projected Completion Date: 01/2013
Responsible Person/Group: CIS 4980 capstone instructor

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:  What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The CIS BBA assessment process has generally been successful. During this last year, the survey form used for feedback from project sponsors was modified to focus on the higher level objectives and measures rather than the very fine grained questions used in the past. The main motivation for this change was that the great diversity in projects and the related activities. This meant that for many of these very detailed questions the answer should have been NA, not applicable. This focus on the higher level objectives and measures will be finalized this year. The assessment process management for the CIS BBA will also pass to new personnel.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The assessment data including free form responses (some written and some oral) from students and project sponsors indicate the need to put programming back into the required part of the CIS BBA curriculum. This change has been approved by the CIS Undergraduate Program Committee (UPC) and the CIS faculty. The formal proposal for the change was submitted to the Robinson College of Business (RCB) Undergraduate Program Council and is under discussion with approval anticipated. A second change is to require that more hours of CIS courses be completed before students may take the capstone course. The capstone course provides an opportunity for students to use the CIS curriculum body of knowledge in the context of a real world project. The previous prerequisites allowed CIS majors to enroll in the capstone if they had completed the three required CIS core courses. Since an additional three elective CIS courses must be completed along with the CIS capstone course (which finishes out the required 7 CIS courses), some students were taking four CIS courses (including the capstone course) in their final semester. It is difficult for the capstone project to give the students that opportunity to use the full body of knowledge of the CIS courses when students are just starting three of these courses. Changing the prerequisite for the CIS capstone course to completion of 15 semester credit hours including the three CIS core courses was approved by the CIS UPC, the CIS faculty, and the RCB UPC. We anticipate approval by the full RCB faculty at the next faculty meeting this fall.
**Mission / Purpose**

The effective deployment of information technology is one of the keys to business success. New applications of information technology strike at the heart of what management does and how organizations are structured and compete in an increasingly interconnected global economy. In many respects these applications and technologies are redefining the nature of work and its organization. The CIS Graduate Program aims to develop specialists and managers with the combination of business and technology skills needed to continue competitive advancement of American industry. The mission of the CIS major in the Master of Science program is to produce graduates who are able to combine their general business knowledge with the latest software engineering tools and techniques to create and manage information systems that allow organizations to compete in the global marketplace.

**Student Learning Outcomes/Objectives**

SLO 1: Identify business needs and challenges that may be facilitated through information technology (M: 1)

Students will be able to specify the requirements for an information system that meets user needs. This objective is not met in the core courses. In lieu of this, a surrogate objective will be used: Students will be able to select appropriate contemporary and leading-edge tools and techniques and to correctly use these tools and techniques to specify the requirements for an information system. The student should be able to analyze an organization’s performance by assessing its resources, capabilities, and competitive environment.

SLO 2: Create environments for programs and systems (M: 2)

Students will be proficient in design and implementation of information infrastructure.

SLO 3: Manage an information technology project (M: 3, 4)

Students will be able to translate a set of project requirements and resources into a workable plan. Students will be able to work with intellectual tools for selecting among competing projects and to choose appropriate solutions to meet project objectives.

SLO 4: Build and renew business via technology & process (M: 5, 6, 7)

Students will be able to identify business opportunities associated with emerging technology. Students will be able to identify and diagnose problems in business process, to design improved configurations enabled by information technology, and to manage the organizational changes required to implement the new processes.

For each of the core courses the departmental evaluation committee developed a survey instrument (c.f., http://www2.cis.gsu.edu/cis/program/assessment/graduate/CIS_MS_Assessment_Report_9_16_2005.htm). While this document primarily addresses specific course-level assessment of our departmental programs, it is but part of a larger assessment and curricular improvement activities engaging the energy of CIS faculty for two compelling reasons. The first arises from the core nature of our discipline and the second arises from purely economic realities. 1) The disciplinary core. Our discipline is at the nexus of Information and Communications Technology (ICT) and Social Organizations. The modern business, governmental and Nonprofit organization is increasingly dependent upon these technologies to compete in a globally interconnected and interdependent world. Both these technologies and the organizational settings in which they are embedded are highly dynamic, and emergent settings. As such our discipline, and our curricula, must necessarily address those principles and skills that are stable over time, but also to anticipate where changing technical and social/political realities may lead. 2) Economic necessity. The triple-whammy of the dot com implosion, the economic downturn of post 9/11 economy and the accelerated global sourcing of digital work have conspired to reverse a 15 year trend of enrollment growth to a period of contraction and rebuilding. The net result of these continuous and dramatic underlying technological and social changes is that the content of virtually all CIS courses and the curriculum itself is in constant flux. Thus, by technical and economic necessity, the CIS faculty are confronted with compelling reasons for constant improvement of our programs, course offerings and course content. We offer these examples as evidence of this attention to continuous curricular improvement. The first is that in the past 5 years the curriculum has undergone two major revisions at each the undergraduate and graduate programs and is in the stages of yet another substantial revamping. Secondly, three times in the past five years faculty have engaged Chief Information Officer and other leaders from major Atlanta Metropolitan business and service industry organizations in group discussion covering the nature and content of our programs and course offerings. A fourth such process is in the offing for early 2007. And thirdly, CIS faculty hold leadership positions in the Association of Computing Machinery (ACM) special interest group on computer personnel research (SIG CPR) and make a specific study of study the changing technical skill sets required of our graduates in the workforce. Our faculty are represented on Microsoft's academic advisory board and routinely engage with CIO and CTO level personnel in other industry and academic venues, which coupled with an active field research agenda provides a view of the changing skill-sets needed by our students. Thus, at both holistic and detailed levels of analysis, CIS faculty attempt to keep abreast of societal and technical changes requiring curricular adjustment. This document is, however, largely concerned with course-level assessment. It depends on direct measures of curricular competence, i.e., student exams, projects and presentations. Because it is an analysis of the artifacts of the curriculum and instructional activity, it is also an indirect assessment exercise. This assessment exercise addresses the fidelity by which the core course set in our CIS major meets a set of stated learning objectives. Those objectives and the mapping of those objectives to specific courses in our core are represented below. Figure 1 (Napier, Johnson, Stuckc, 2006) Course-level Assessment method As is typical student performance was measured by means of direct and indirect measures of exam, homework, projects and presentations, adjudicated by the principal instructor, and in many cases, with the participation of other faculty and industry representatives as outside adjudicators. The course level assessment provided herein was arrived at by indirect means; that is, via the evaluation of static artifacts. Those assessments were based on the learning objectives as stated in the course syllabus and according to the departments overall learning objectives. For each of the core courses the departmental evaluation committee developed a survey instrument (c.f., http://www2.cis.gsu.edu/cis/program/assessment/graduate/index.asp). The draft instrument was created from published course documents reviewed by instructional staff to access the efficacy of the instrument and the completeness of the courses learning objectives. At the conclusion of the Fall and Spring term instructional faculty were asked to provide a sampling representing 15% of the student's work, with the provision that there should be a minimal sub-set of work representing all the stated learning objectives. For continuous curricular improvement activities engaging the energy of CIS faculty are represented on Microsoft's academic advisory board and regularly engage with CIO and CTO level personnel in other industry and academic venues, which coupled with an active field research agenda provides a view of the changing skill-sets needed by our students. Thus, at both holistic and detailed levels of analysis, CIS faculty attempt to keep abreast of societal and technical changes requiring curricular adjustment. This document is, however, largely concerned with course-level assessment. It depends on direct measures of curricular competence, i.e., student exams, projects and presentations. Because it is an analysis of the artifacts of the curriculum and instructional activity, it is also an indirect assessment exercise. This assessment exercise addresses the fidelity by which the core course set in our CIS major meets a set of stated learning objectives. Those objectives and the mapping of those objectives to specific courses in our core are represented below. Figure 1 (Napier, Johnson, Stucke, 2006) Course-level Assessment method As is typical student performance was measured by means of direct and indirect measures of exam, homework, projects and presentations, adjudicated by the principal instructor, and in many cases, with the participation of other faculty and industry representatives as outside adjudicators. The course level assessment provided herein was arrived at by indirect means; that is, via the evaluation of static artifacts. Those assessments were based on the learning objectives as stated in the course syllabus and according to the departments overall learning objectives. For each of the core courses the departmental evaluation committee developed a survey instrument (c.f., http://www2.cis.gsu.edu/cis/program/assessment/graduate/index.asp). The draft instrument was created from published course documents reviewed by instructional staff to access the efficacy of the instrument and the completeness of the courses learning objectives. At the conclusion of the Fall and Spring term instructional faculty were asked to provide a sampling representing 15% of the student's work, with the provision that there should be a minimal sub-set of work representing all the stated learning objectives. These materials were made available to the assessment team of faculty, and PhD students. Those evaluating review all documents and the course syllabi and relevant assignment materials then completed the assessment questionnaire. The summary results herein and the overall picture may be evaluated for: (To Be Completed for 2006, 2007). A fuller description of the assessment process is represented by the diagram above (except figure 1 here) and may be found in Napier, Johnson, Stucke, 2006 from which we excerpted this diagram.
Measures, Targets, and Findings

M 1: I.1: Specify the requirements for an information system (O: 1)
Students will be able to specify the requirements for an information system that meets user needs.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Identify business needs and challenges that may be facilitated through information technology
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the standard”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the standard”), according to the evaluation rubric.

M 2: II: Design and implementation of information infrastructure (O: 2)
Students will be proficient in design and implementation of information infrastructure.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O2: Create environments for programs and systems
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the standard”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the standard”), according to the evaluation rubric.

M 3: III.1: Translate project requirements and resources into a workable plan (O: 3)
Students will be able to translate a set of project requirements and resources into a workable plan.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O3: Manage an information technology project
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the standard”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the standard”), according to the evaluation rubric.

M 4: III.2: Manage an ongoing project using project control tools and techniques (O: 3)
Students will be able to manage an ongoing project using project control tools and techniques.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O3: Manage an information technology project
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the standard”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the standard”), according to the evaluation rubric.

M 5: IV.1: Identify business opportunities associated with available information technologies (O: 4)
Students will be able to identify business opportunities associated with available information technologies.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O4: Build and renew business via technology & process
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the standard”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the standard”), according to the evaluation rubric.

M 6: IV.2: Diagnose problems in business processes to design improved configurations (O: 4)
Students will be able to identify and diagnose problems in business processes to design improved configurations enabled by information technology.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O4: Build and renew business via technology & process
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the target”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the target”), according to the evaluation rubric.

M 7: IV.3: Formulate an implementation plan to manage organizational changes associated with introduction of new technology (O: 4)
Students should be able to formulate an implementation plan to manage organizational changes associated with introduction of new technology.
Source of Evidence: Writing exam to assure certain proficiency level

Target for O4: Build and renew business via technology & process
Three facets of assessing achievement: 1) the average score for all students assessed will be 2.0 or above on a 3-point scale 2) 80% of students will achieve “level 2” (“meets the standard”), according to the evaluation rubric. 3) 25% of students will achieve “level 3” (“exceeds the standard”), according to the evaluation rubric.
### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Course instructor should follow assessment procedures

Course instructor responsible for teaching CIS 8030 must assign individual-level projects that reflect the course objectives. In addition, the course instructor must save copies of all M.S. individual student deliverables and make them available to the assessment coordinator.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: I.1: Specify the requirements for an information system | Outcome/Objective: Identify business needs and challenges that may be facilitated through information technology

- **Projected Completion Date:** 03/2010
- **Responsible Person/Group:** Course instructor for CIS 8030

#### Offer all core courses yearly; require course instructors to assign student projects that reflect course objectives.

There are 3 components of the action plan related to this learning objective. 1) Offer all required core courses on a yearly basis (to remedy the problem that CIS 8050 has not been offered for more than two years, and that faculty assisting in the assessment process have had to assess materials from a different course that students were permitted to substitute for CIS 8050). 2) All instructors who teach courses related to this learning objective must assign individual-level student assignments that reflect the course objectives. 3) All instructors who teach courses related to this learning objective must save all M.S. student deliverables from their courses.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: II: Design and implementation of information infrastructure | Outcome/Objective: Create environments for programs and systems

- **Projected Completion Date:** 03/2010
- **Responsible Person/Group:** Course instructors who teach CIS 8040, 8050, and 8070.

#### Train assessors to allow for greater variability in student scores

The only portion of the target goal that was not achieved for objective III.1 was the last part, which specifies a goal of having 25% or more of assessed students scoring at the level of "3" ("exceeds the standard"). In this case, all of the assessed students (n=8) were scored as "2" (which means that 0% of students were assessed as scoring a "3"). One contributing factor may be that course assessors have not been trained to discriminate between higher or lower scores. The Assessment coordinator will provide additional detailed criteria for participating assessors to use when performing the assessment. With the exception of this detail, all other target objectives were met.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: III.1: Translate project requirements and resources into a workable plan | Outcome/Objective: Manage an information technology project

- **Projected Completion Date:** 06/2010
- **Responsible Person/Group:** Assessment coordinator

#### Re-engineer the MS IS Assessment Process

The previous MS IS assessment process proved to be infeasible due mostly to its labor intensive nature. A Computer Information Systems assessment coordinator made one set of changes simplifying the process. The subsequent process also proved infeasible and no tangible assessment results are seen for recent years. During this period, our MS IS program has moved to a cohort format which now requires a capstone project / field study. Given these three circumstances, the CIS MS (actually MS IS) assessment is being re-engineered and re-initiated during this 2013-2014 academic year.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** The CIS GPC will review and renew the course objectives, student artifacts for assessment, and associated rubrics and measures for two CIS MS IS core courses each year for the next three years. This will cover the six courses in the CIS MS IS core. The CIS GPC will also evaluate the best means to utilize the capstone course for including in assessing the overall CIS MS IS degree program.

- **Responsible Person/Group:** The CIS Graduate Program Committee

---

**Georgia State University**  
**Assessment Data by Section**  
**2012-2013 Computer Science Assessment of Core**  
(As of: 12/13/2016 05:59 PM EST)  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)
It is critical for all students to master a basic understanding of computing due to its pervasiveness. Also, due to its rapidly changing nature it is imperative students learn the concepts that underlie this discipline. One of the missions of the Department of Computer Science is to provide high quality instruction in the CSC 1010 course that incorporates computing fundamentals and the latest technologies.

**Goals**

**G 1: Student productivity**
- Students will be comfortable and competent in a setting which requires the use of computers.
- Students will be productive using various computer applications, for example, they will be able to produce reports, graphs, spreadsheets, charts, and slide shows.

**Student Learning Outcomes/Objectives**

**SLO 1: Computer Components -- Hardware and Software (M: 4)**
Students will learn about the various components that make up a computer.

**SLO 2: Word Processing Application Software (M: 3)**
Students will learn the necessary components of word processing that will enable them to write term papers, reports, and research papers.

**SLO 3: Spreadsheet Application Software (M: 1, 3)**
Students will learn the necessary components of spreadsheet applications that will enable them to enter, calculate, manipulate, and analyze data.

**SLO 5: Web Development (M: 5)**
Students will learn how to use the language of the Internet (HTML) in order to create web pages. This includes creating links so that users can navigate from one page to another.

**Other Outcomes/Objectives**

**O/O 4: Presentation Application Software (M: 2)**
Students will learn the necessary components of presentation applications and presentation techniques that will enable them to effectively deliver information, findings, and projects to others.

**Measures, Targets, and Findings**

**M 1: Chart drawing (O: 3)**
Students are to extract data from a spreadsheet and use this to draw charts for various functions. This includes formatting the charts as well.

Source of Evidence: Academic direct measure of learning - other

**Target for O3: Spreadsheet Application Software**
Proper curves should be generated for charts with appropriate labels.

**Findings 2012-2013 - Target: Met**
Most of the students were able to do this correctly.

**M 2: Formatting slides (O: 4)**
Students should create slides to demonstrate some functions. This includes labeling the slides appropriately.

Source of Evidence: Presentation, either individual or group

**Target for O4: Presentation Application Software**
The presentation should include multiple number of slides with appropriate titles. Each slide importing figures or text accordingly.

**Findings 2012-2013 - Target: Met**
A majority of students could generate the slides accordingly but imported figures were not always formatted as well as expected.

**M 3: Generate documents (O: 2, 3)**
Students should generate a document that imports charts from a spreadsheet. The document should include comparisons as well as a variation in formats for headers and the text body.

Source of Evidence: Academic direct measure of learning - other

**Target for O2: Word Processing Application Software**
The documents would not only include text, but also charts from a spreadsheet. The charts should be easy to read and the description/comparisons should be detailed and formatted nicely.

**Findings 2012-2013 - Target: Met**

Most often the charts were imported properly.

**Target for O3: Spreadsheet Application Software**

The documents would not only include text, but also charts from a spreadsheet. The charts should be easy to read and the description/comparisons should be detailed and formatted nicely.

**M 4: Comparison shopping for computer systems (O: 1)**

Students are asked to shop for computer systems for four different purposes. Each task has different requirements for the hardware and software components. Students should be able to justify why each system they chose meets the demand of the corresponding tasks.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Computer Components -- Hardware and Software**

For each environment described, the students should be able to select the appropriate components that follow:

1) motherboard/cpu; 2) memory/hard disk space/ram; 3) adapter cards; 4) video/sound; 5) application software

**Findings 2012-2013 - Target: Met**

The students did well with this objective. Occasionally, they were not able to justify their choices clearly. This could be tied back to critical thinking or writing objectives

**M 5: Website design (O: 5)**

Students are to design a website using HTML as the programming language. Their design has certain specifications required, such as linking pages, format, and headers.

Source of Evidence: Academic direct measure of learning - other

**Target for O5: Web Development**

Students should be able to directions for a website design. There should be multiple pages linked together including tags. The formats should adhere to specifications and include headers.

**Findings 2012-2013 - Target: Met**

Most of the students do not have difficulty with the syntax of HTML. Tags were not always included properly. Linking pages tended to cause problems for some students so that the intended flow was not achieved.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Additional examples and quizzes**

With additional examples being provided during the lectures, students will see how to create charts and then import them into other software for presentations and documents. Additional quizzes will require students to work more closely with the material to gain better understanding. For more information, see the Action Plan Details section of this report.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: Generate documents | Outcome/Objective: Spreadsheet Application Software

**Additional examples and quizzes**

Coordinate 1010 sections
Establish a coordinator for the CSC 1010 course. They will be responsible for meeting with all instructors teaching sections of the CSC 1010 course in order to ensure that there is consistency among each of the sections offered.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Projected Completion Date: 07/2010
Responsible Person/Group: Undergraduate Curriculum Committee

Georgia State University
Assessment Data by Section
2012-2013 Computer Science BS
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
MISSION Within the Georgia State mission of research, education, and public service, the mission of the Department of Computer Science encompasses the following areas: - Research: To make leading contributions to basic and applied science by conducting broadly based research in both theoretical and applied areas of computer science and collaborating on interdisciplinary efforts with other departments in the institution. - Educational Programs: To provide the next generation of leaders and capable lifelong learners in computer science. - Service: To support other programs at Georgia State by offering rigorous training in basic computer science to non-majors and to support collaboration with colleagues in other disciplines. The Department of Computer Science B.S. Program provides students with the underpinnings of computation and the basic computer science for today's applications in industry, science, government, and business and prepares the foundation for tomorrow's applications in ubiquitous computing, medical cures for diseases, and instant access to information by every one.

Goals
G 1: Computer Science BS goals
students will become better problem-solvers; students will demonstrate clearer critical thinking, students will gain knowledge of the discipline; students will gain skills necessary to be successful in the discipline

Outcomes/Objectives
O/O 1: Computer Systems Development (G: 1) (M: 3, 5)
Students should be able: 1) to describe the principles, processes, and life cycles of computer systems development 2) to apply modeling techniques and tools for specification of systems under development and of computer systems project team management.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

O/O 2: Programming Skills (G: 1) (M: 4, 5)
Students should be able: 1) to describe the current, best-practices programming paradigms 2) to apply high-level programming languages to implement the programming paradigms.

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

O/O 3: Algorithm Design and Analysis (G: 1) (M: 4, 5)
Students should be able: 1) to describe the principles and methods of analyzing algorithms 2) to analyze complexity of problems and algorithms 3) to formulate optimization problems 4) to apply algorithmic techniques to optimization problems

Strategic Plan Associations
1.5 Other efforts in support of Goal 1 (Undergraduate Education).

O/O 4: Discrete Mathematics (G: 1) (M: 4, 5)
Students should be able: 1) to describe the principles of discrete math 2) to formulate problems and theorems 3) to construct and
evaluate the validity of proofs 4) to apply discrete structures for solving problems in computer science

**Strategic Plan Associations**

1. Other efforts in support of Goal 1 (Undergraduate Education).

**O/O 5: Hardware Systems (G: 1) (M: 3)**

Students should be able: 1)to describe the principles and processes of hardware systems development 2)to apply modeling techniques and tools for implementing the phases of hardware development.

**Strategic Plan Associations**

1. Other efforts in support of Goal 1 (Undergraduate Education).

### Measures, Targets, and Findings

#### M 1: Alumni Surveys

An alumni survey will be mailed to alumni via the departmental newsletter on an annual basis. Survey will solicit input from alumni on job promotions, success in graduate schools, job satisfaction, etc. Results will be provided to the Assessment Committee for review.

Source of Evidence: Alumni survey or tracking of alumni achievements

#### M 2: Senior Level Course Surveys and Exit Interviews

A senior level course survey and exit interview will be conducted each term to solicit input from graduating seniors on a self-assessment of their education, on their concerns with the department, and their ideas for possible curricular improvements. The undergraduate coordinator will administer the survey in conjunction with the graduation audit check out.

Source of Evidence: Exit interviews with grads/program completers

#### M 3: Senior Oral and Written Presentations

Copies of selected presentations and oral reviews will be collected from individual faculty for future inspection by Assessment Committee. (each semester) Students are encouraged to participate in external design competitions where they are judged relative to their peers from other institutions. (ongoing)

Source of Evidence: Presentation, either individual or group

#### Target for O1: Computer Systems Development

The average samples should demonstrate mastery of the subject domains as well as competent presentation skills sufficient for them to be successful in the work force. The best samples should demonstrate excellent mastery and a thorough understanding of subject domain as well as excellent presentation skills. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results

**Findings 2012-2013 - Target: Met**

The best samples demonstrated excellent mastery and a thorough understanding and overall the samples showed that the students demonstrated mastery of the subject domain basics.

#### Target for O5: Hardware Systems

The average samples should demonstrate mastery of the subject domains as well as competent presentation skills sufficient for them to be successful in the work force. The best samples should demonstrate excellent mastery and a thorough understanding of subject domain as well as excellent presentation skills. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results

#### M 4: Written Assignments and Reports

Each outcome can be mapped to a particular required course in our curriculum: 1-CSc 4520, 2-CSc 2510, 3-CSc 4530, 4-CSc 2310, and 5-CSc 4210. In each of the courses listed above, instructors include questions on assignments and projects targeting specific components of the corresponding outcome. Each outcome will be measured via the quality of the students’ answers to selected questions on the assignments and projects in the corresponding courses. Copies of selected written class assignments, lab reports, and research reports will be collected from individual faculty members for future inspection by the Assessment Committee. (each semester)

Source of Evidence: Written assignment(s), usually scored by a rubric

#### Target for O2: Programming Skills

Students should demonstrate the ability to work independently on relevant problems, assignments and projects. The average samples should demonstrate mastery of basic skills and the best samples should demonstrate excellent mastery of the skills as well as presentation. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results

**Findings 2012-2013 - Target: Met**

Students demonstrated mastery and a thorough understanding and overall the samples showed that the students demonstrated mastery of the subject domain basics.

#### Target for O3: Algorithm Design and Analysis

Students should demonstrate the ability to work independently on relevant problems, assignments and projects. The average samples should demonstrate mastery of basic skills and the best samples should demonstrate excellent mastery of the skills as well as presentation. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results
Target for O4: Discrete Mathematics

Students should demonstrate the ability to work independently on relevant problems, assignments and projects. The average samples should demonstrate mastery of basic skills and the best samples should demonstrate excellent mastery of the skills as well as presentation. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

M 5: Examinations (O: 1, 2, 3, 4)

Each outcome can be mapped to a particular required course in our curriculum: 1-CSc 4520, 2-CSc 2510, 3-CSc 4530, 4-CSc 2310, and 5-CSc 4210. In each of the courses listed above, instructors include questions on exams targeting specific components of the corresponding outcome. Each outcome will be measured via the quality of the students’ answers to selected questions on exams in the corresponding courses.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Computer Systems Development

The average samples should demonstrate mastery of the subject domain basics and the best samples should demonstrate excellent mastery and a thorough understanding of subject domain. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

Findings 2012-2013 - Target: Met

Students demonstrated excellent mastery and a thorough understanding and overall the samples showed that the students demonstrated mastery of the subject domain basics.

Target for O2: Programming Skills

The average samples should demonstrate mastery of the subject domain basics and the best samples should demonstrate excellent mastery and a thorough understanding of subject domain. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

Target for O3: Algorithm Design and Analysis

The average samples should demonstrate mastery of the subject domain basics and the best samples should demonstrate excellent mastery and a thorough understanding of subject domain. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

Target for O4: Discrete Mathematics

The average samples should demonstrate mastery of the subject domain basics and the best samples should demonstrate excellent mastery and a thorough understanding of subject domain. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Coordinate lower level classes

Establish a coordinator for each of the lower level classes. They will be responsible for meeting with all instructors of the course they are assigned to in order to ensure that there is consistency among each of the sections offered.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
Measure: Examinations | Outcome/Objective: Programming Skills
Projected Completion Date: 08/2010
Responsible Person/Group: Chair of Undergraduate Curriculum Committee
Additional Resources: none

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
No changes were made and none anticipated. We think that as is, we are doing fine so we will continue as is.

Georgia State University
Assessment Data by Section
2012-2013 Computer Science MS

As of: 12/12/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
MISSION Within the Georgia State mission of research, education, and public service, the mission of the Department of Computer Science encompasses the following areas: - Research: To make leading contributions to basic and applied science by conducting broadly based research in both theoretical and applied areas of computer science and collaborating on interdisciplinary efforts with other departments in the institution. - Educational Programs: To provide the next generation of leaders and capable lifelong learners in computer science. - Service: To support other programs at Georgia State by offering rigorous training in basic computer science to non-majors and to support collaboration with colleagues in other disciplines. The Department of Computer Science M.S. Program provides students with the underpinnings of computation and the basic computer science for today's applications in industry, science, government, and business and prepares the foundation for tomorrow's applications in ubiquitous computing, medical cures for diseases, and instant access to information by every one.

Goals
G 1: Computer Science MS Goals
Students will become better solvers of advanced computational problems; Students will improve abilities to develop advanced computational models of real world problems; Students will gain advanced knowledge of computer science; Students will gain skills necessary for a successful career applying advanced computer science methods.

Outcomes/Objectives
O/O 1: Computer Science Foundations (G: 1) (M: 2, 3, 4, 5)
Students should be able to: 1. Describe the principles and methods of (a) discrete mathematics, (b) best-practices programming paradigms, (c) algorithm analysis, (d) computer & hardware systems development, and (e) advanced network-oriented software engineering. 2. Develop models and corresponding optimization problem formulations. 3. Apply (a) discrete structures for solving problems in computer science, (b) algorithmic techniques to optimization problems, (c) high-level programming languages to implement the programming paradigms, and (d) advanced software engineering and modeling techniques for specification of computer systems and implementing the phases of hardware development.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

O/O 2: Research and Critical Thinking (G: 1) (M: 1, 3, 5)
Students should be able to: 1) study related work and approaches; 2) formulate relevant questions for research; 3) justify and evaluate claims, arguments, evidence and hypotheses; and 4) provide a theoretical and/or practical (hardware or software) solution to their research problem

O/O 3: Collaboration (G: 1) (M: 3)
Students participate effectively in collaborative activities

O/O 4: Communication (G: 1) (M: 1, 3, 5)
Students communicate effectively using appropriate writing and oral conventions and formats.

O/O 5: Bioinformatics (for students with concentration) (G: 1) (M: 2, 3, 4, 5)
Students should be able to: (a) analyze, correlate and extract information from biological and chemical databases with emphasis on the sequence and structure of proteins and nucleic acids, and (b) apply computational tools, techniques and models to analysis of protein and nucleic acid sequences.

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

Measures, Targets, and Findings
M 1: Research Publications (O: 2, 4)
Research publications in journals and conference proceedings produced by M.S. graduate students will be catalogued and made available to the Assessment Committee (on going).

Source of Evidence: External report

Target for O2: Research and Critical Thinking

Findings 2012-2013 - Target: Met
M.S. students have co-authored many publications that have appeared in peer-reviewed conferences and journals during the reporting period. A number of these were published in conferences with very low acceptance rates.

The average samples should demonstrate mastery of advanced topics of the subject domain and the best samples should demonstrate excellent mastery and a thorough understanding of advanced topics within the subject domain. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

### Target for O5: Bioinformatics (for students with concentration)

The average samples should demonstrate mastery of advanced topics of the subject domain and the best samples should demonstrate excellent mastery and a thorough understanding of advanced topics within the subject domain. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

### M 5: Thesis/Project Reports and Defenses (O: 1, 2, 4, 5)

Copies of M.S. theses and project reports and defense presentation slides will be available for inspection by the Defense Committee and the Assessment Committee (on going).

Source of Evidence: Benchmarking of learning outcomes against peers

### Target for O1: Computer Science Foundations

The average samples should demonstrate mastery and a thorough understanding of the advanced subject domains as well as competent presentation skills sufficient for professional meetings. The best samples should demonstrate excellent mastery of subject domain, excellent presentation skills suitable for Ph.D. student candidates, and sufficient quality for acceptance at leading conferences. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

### Target for O2: Research and Critical Thinking

The average samples should demonstrate mastery and a thorough understanding of the advanced subject domains as well as competent presentation skills sufficient for professional meetings. The best samples should demonstrate excellent mastery of subject domain, excellent presentation skills suitable for Ph.D. student candidates, and sufficient quality for acceptance at leading conferences. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

### Target for O4: Communication

The average samples should demonstrate basic research skills, mastery and a thorough understanding of the advanced subject domains, and competent presentation skills sufficient for professional meetings. The best samples should demonstrate advanced research skills, excellent mastery of subject domain, excellent presentation skills suitable for M.S. students, and sufficient quality for acceptance at leading conferences. The assessment of mastery will be completed by Defense Committees and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

### Target for O5: Bioinformatics (for students with concentration)

The average samples should demonstrate mastery and a thorough understanding of the advanced subject domains as well as competent presentation skills sufficient for professional meetings. The best samples should demonstrate excellent mastery of subject domain, excellent presentation skills suitable for Ph.D. student candidates, and sufficient quality for acceptance at leading conferences. The assessment of mastery will be completed by course instructors and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Consider Course Only Master's Degree Option

Consider offering a third option for obtaining the Master's Degree. Specifically, a course only option instead of a thesis or project option.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Director of Graduate Studies and Graduate Faculty

#### Consider Course Only Master's Degree Option

Consider offering a third option for obtaining the Master's Degree. Specifically, a course only option instead of a thesis or project option.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 07/2010
- **Responsible Person/Group:** Director of Graduate Studies and Graduate Faculty

#### Consider foundation courses for graduate program

We plan to present the results to the computer science curriculum committee and show the areas(discrete mathematics and computer organization)that may need improvement. For more information, see the Action Plan Details section of this report.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Written Assignments and Reports | **Outcome/Objective:** Computer Science Foundations
Dispatch alumni surveys
Prepare a survey questionnaire to send out to alumni from the Master's program.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** Low  
**Projected Completion Date:** 07/2010  
**Responsible Person/Group:** Ms. Tammie Dudley  
**Budget Amount Requested:** $1,000.00 (recurring)

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Computer Science PhD**

As of: 12/12/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

### Mission / Purpose

**MISSION** Within the Georgia State mission of research, education, and public service, the mission of the Department of Computer Science encompasses the following areas: - Research: To make leading contributions to basic and applied science by conducting broadly based research in both theoretical and applied areas of computer science and collaborating on interdisciplinary efforts with other departments in the institution. - Educational Programs: To provide the next generation of leaders, educators and capable lifelong learners in computer science. - Service: To support other programs at Georgia State by offering rigorous training in basic computer science to non-majors and to support collaboration with colleagues in other disciplines. The Department of Computer Science Ph.D. Program provides students with the underpinnings and advanced topics of computation and computer science for today's applications in industry, science, education, government, and business and prepares the foundation for tomorrow's applications in ubiquitous computing, medical cures for diseases, and instant access to information by every one.

### Goals

**G1: Computer Science PhD Goals**

Students will become better solvers of open computational problems; Students will improve abilities to develop novel computational models of real world problems; Students will gain advanced knowledge of computer science; Students will gain skills necessary for a successful career as computer scientists.

### Outcomes/Objectives

**O/O 1: Computer Science Foundations (G: 1) (M: 2, 3, 4)**

Students should be able to: 1. Describe the principles and methods of (a) discrete mathematics, (b) best-practices programming paradigms, parallel and distributed computing (c) algorithm analysis, theory of computation, and complexity analysis, (d) computer & hardware systems development, (e) advanced network-oriented software engineering, and (d) deductive databases and logic programming. 2. Develop models and corresponding optimization problem formulations, analyze computational complexity of problem formulations and applicable algorithmic approaches. 3. Apply (a) discrete structures for solving problems in computer science, (b) algorithmic techniques to optimization problems, (c) high-level programming languages, parallel and distributed computing to implement the programming paradigms, and (d) advanced software engineering and modeling techniques for specification of computer systems and implementing the phases of hardware development.

### Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

**O/O 2: Teaching (G: 1) (M: 1)**

Students should be able to teach and/or assist in undergraduate/beginning graduate courses.

**O/O 3: Communication (G: 1) (M: 4)**

Students communicate effectively using writing and oral conventions and formats appropriate to the research area in computer science.

**O/O 4: Research and Critical Thinking (G: 1) (M: 3, 4)**

Students should be able to: 1) Achieve understanding of the frontier research literature, emerging technologies, and current research approaches and methods in computer science; 2) Formulate questions for research that are recognized by the broad community computer scientists as advancing knowledge; 3) Justify and evaluate claims, arguments, evidence and hypotheses to the standards of computer science scholarship; 4) Construct new arguments and formulate new relevant questions based on the results of analysis; and 5) Provide novel theoretical and practical (hardware or software) solutions to formulated problems.

**O/O 5: Collaboration (G: 1)**

Students participate effectively in collaborative activities appropriate to the research area in computer science.

**O/O 6: Bioinformatics (for students with concentration) (G: 1) (M: 2)**
Students should be able to: (a) analyze, correlate and extract information from biological and chemical databases with emphasis on the sequence and structure of proteins and nucleic acids, (b) apply computational tools, techniques and models to analysis of protein and nucleic acid sequences, and (c) develop new bioinformatics tools, techniques and models.

**Measures, Targets, and Findings**

**M 1: Student evaluations (O: 2)**
Student evaluations will be assessed to monitor the quality of teaching by our Ph.D. students
Source of Evidence: Student course evaluations on learning gains made

**Target for O2: Teaching**
Ph.D. students should receive positive written comments for a majority of the responses. Additionally, we expect that the average of the answers for Question #17 on the evaluation to be above a 4.0.

**Findings 2012-2013 - Target: Met**
When selecting the recipient(s) for the Outstanding Teaching by a Graduate Student award, the Honors Committee has found that most students receive high marks and comments on their evaluations.

**M 2: Qualifying exam (O: 1, 6)**
The Ph.D. qualifying exam covers a breadth of the foundation material for the Computer Science curriculum. All Ph.D. students are required to pass this exam within the first three semesters of entry into the program.
Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O1: Computer Science Foundations**
The average samples should demonstrate mastery of advanced topics of the subject domain and the best samples should demonstrate excellent mastery and a thorough understanding of advanced topics within the subject domain. The assessment of mastery will be completed by Qualifying Examination Committee.

**Findings 2012-2013 - Target: Met**
The students demonstrated appropriate mastery of the subject domains. The best students showed excellent mastery.

**Target for O6: Bioinformatics (for students with concentration)**
The average samples should demonstrate mastery of advanced topics of the subject domain and the best samples should demonstrate excellent mastery and a thorough understanding of advanced topics within the subject domain. The assessment of mastery will be completed by Qualifying Examination Committee.

**M 3: Dissertation Manuscripts and Defenses (O: 1, 4)**
Copies of Ph.D. manuscripts and defense presentation slides will be available for inspection by the Defense Committee and the Assessment Committee (on going).
Source of Evidence: Senior thesis or culminating major project

**Target for O4: Research and Critical Thinking**
The average samples should demonstrate basic research skills, mastery and a thorough understanding of the advanced subject domains, and competent presentation skills sufficient for professional meetings. The best samples should demonstrate advanced research skills, excellent mastery of subject domain, excellent presentation skills suitable for faculty candidates, and sufficient quality for acceptance at leading conferences. The assessment of mastery will be completed by Defense Committees and the Department’s Learning Outcomes and Assessment Committee will evaluate the results.

**M 4: Research Publications (O: 1, 3, 4)**
Research publications in journals and conference proceedings produced by Ph.D. graduate students will be catalogued and made available to the Assessment Committee (on going).
Source of Evidence: External report

**Target for O1: Computer Science Foundations**
Research publications should appear in highly selective journals and/or conferences, preferably supported by renowned professional societies (ACM, IEEE).

**Target for O3: Communication**
Research publications should appear in highly selective journals and/or conferences, preferably supported by renowned professional societies (ACM, IEEE).

**Target for O4: Research and Critical Thinking**
Research publications should appear in highly selective journals and/or conferences, preferably supported by renowned professional societies (ACM, IEEE).

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**
Consider foundation material for graduate courses
The curriculum committee is currently evaluating the coursework at the graduate level in order to assess its relevance and currency to the state of the art in computer science. For more information, see the Action Plan Details section of this report.

**Established in Cycle:** 2008-2009  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Qualifying exam  
- **Outcome/Objective:** Bioinformatics (for students with concentration)  
- Computer Science Foundations

### Dispatch Alumni Survey

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High

**Review qualifying exam format**

Review the format of the PhD qualifying examination to consider an option of replacing one mandatory foundation subject exam with a subject exam chosen by the student based upon their focus of research.

**Established in Cycle:** 2008-2009  
**Implementation Status:** Planned  
**Priority:** High  
**Projected Completion Date:** 07/2010  
**Responsible Person/Group:** Graduate Director and Graduate Faculty

---

**Georgia State University**  
**Assessment Data by Section**  
**2012-2013 Concentration in Accounting MBA**  
(As of: 12/12/2016 05:59 PM EST  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

#### Mission / Purpose

For students to develop and integrate: (1) skills for analyzing organizational performance that incorporate global and ethical dimensions, (2) skills in developing financial reporting systems, (3) skills in interpreting and predicting choices in financial reporting systems, (4) assurance skills, (5) skills for collaborative work in teams, (6) and communication skills.

#### Goals

**G 1: Develop financial reporting systems**

Develop financial reporting systems.

**G 2: Interpret and predict choices in financial reporting systems**

Interpret and predict choices in financial reporting systems.

**G 3: Apply taxation law to business entities**

Apply taxation law to business entities

#### Student Learning Outcomes/Objectives

**SLO 1: Financial reporting skills: Develop (G: 1) (M: 2)**

To develop financial reporting systems for decision-making by applying professional standards, financial information tools, and professional judgment.

**SLO 2: Financial reporting skills: Interpret and Predict (G: 2) (M: 1)**

To interpret and predict choices in financial reporting systems by applying economic, financial, and psychological theories.

**SLO 3: Assurance Skills (G: 2) (M: 6)**

Assurance skills. That students provide assurance services in a variety of organizational contexts.

**SLO 4: Analytical Skills (G: 2) (M: 5)**

To present sound analyses of financial performance that incorporate global and ethical dimensions.

**SLO 5: Collaboration Skills (G: 3) (M: 3)**

To collaborate and contribute to achieve team results.

**SLO 6: Communication Skills (M: 4)**

That students demonstrate the communication skills needed for thriving as a professional accountant.
### SLO 7: Technological skills (M: 7)

To demonstrate the technology skills needed for thriving as a professional accountant.

### Measures, Targets, and Findings

| M 1: Financial reporting skills: Interpret and Predict (O: 2) |
|-----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O2:** | Financial reporting skills: Interpret and Predict |
| **Exam mean score 80% on three questions:** | (1) inter-company transaction concepts in the equity method of accounting; (2) reporting subsidiary income in consolidated financial statements; (3) consolidated reporting rules for assets. |
| **Findings 2012-2013 - Target:** | Not Met |
| Mean score of 72% in question 1, 43% on question 2, and 63% on question 3. |

| M 2: Financial Reporting Skills - Develop (O: 1) |
|----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O1:** | Financial reporting skills: Develop |
| Mean score of 80% or above. |

| M 3: Collaboration Skills (O: 5) |
|----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O5:** | Collaboration Skills |
| Mean score of 85% in Tax 8120 |
| **Findings 2012-2013 - Target:** | Not Reported This Cycle |
| Since the implementation of the action plan in summer 2013, the results will be known later in the calendar year. |

| M 4: Communication Skills (O: 6) |
|----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O6:** | Communication Skills |
| At least 90% of students exited course with a B level grade. |

| M 5: Analytical Skills (O: 4) |
|----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O4:** | Analytical Skills |
| Mean of 75% on relevant quiz questions. |
| **Findings 2012-2013 - Target:** | Met |
| Mean score of 75% for valuation implications from asset impairments and a mean score of 84% for analyzing profit margins and asset turnover. |

| M 6: Assurance Skills (O: 3) |
|----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O3:** | Assurance Skills |
| Exam mean of 80% |
| **Findings 2012-2013 - Target:** | Met |
| The students performance on the midterm exam was 79 out of 100 points. Given the difficulty of the exam, this score is reasonable and comparable to the 2006 results (mean of 76 out of 100 points). In addition, in 2007 students completed a term paper on a subject matter that dealt with assurance services and related topics. Overall, the scores on the term papers were as expected. |

| M 7: Apply tax law (O: 7) |
|----------------|---------------------------------------------------------------|
| **Source of Evidence:** | Academic direct measure of learning - other |
| **Target for O7:** | Apply tax law to individuals and entities. |
**Target for O7: Technological skills**

Research project mean of 85% or above for class.

**Findings 2012-2013 - Target: Met**

Mean score on research project was 94.21% for spring 2013 students.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Apply concepts to financial statements in class teams

Use financial statements of Fortune 500 companies to illustrate, explain, and demonstrate the concepts of financial analysis.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Analytical Skills
  - **Outcome/Objective:** Analytical Skills

#### Implement team project in Acct. 8700

Organize class into five teams to apply the concepts of financial statement analysis (acct 8700) to the 2011 financial statements of Fortune 100 companies in Georgia: Coca-Cola, UPS, Home Depot, Delta Airlines, Time Warner (CNN). Students analyze financial statements for buy/sell/hold investor decisions. Collaboration will be tested by team member evaluation of other team members.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Collaboration Skills
  - **Outcome/Objective:** Collaboration Skills

#### Apply concepts to financial statements in class teams

Use financial statements of fortune 500 companies to illustrate, explain, and understand the concepts of analysis.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Analytical Skills
  - **Outcome/Objective:** Analytical Skills

#### Assign homework problems for class participation credit.

The concepts under assessment are challenging and significant practice is required to master the concepts. Beginning fall 2013, questions will be assigned for homework and will be collected and reviewed in class for class participation credit.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Financial reporting skills: Interpret and Predict
  - **Outcome/Objective:** Financial reporting skills: Interpret and Predict

---

**Assessment Data by Section**

**2012-2013 Concentration in Business Analysis MBA**

(As of: 12/12/2016 05:59 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

To enable students to identify the need for and effectively use analytical techniques - with an emphasis on quantitative techniques - for improved decision making in business.

**Goals**
### Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: Qualitative Analysis of Business Situation (O: 1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be measured on their ability to a) understand the business goals, b) identify the key variables that need to be analyzed, c) analyze the potential relationships among the variables and d) interpret the results of their analysis.</td>
</tr>
</tbody>
</table>

**Source of Evidence:** Written assignment(s), usually scored by a rubric

#### Target for O1: Qualitative Analysis of Business Situation

**Achievement Target:** 80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 1 is to be used in scoring on assignments and projects from courses across the curriculum. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in every course where it is applicable during the academic year. Learning Outcome 1. Rubric Qualitative Analysis of Business Situation Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Understanding of the business goal / issues is able to state the key issues clearly and accurately Either clarity or accuracy can be improved Both clarity and accuracy are below expectation It is clear that the student does not understand the issues ii Identifying Key variables that need to be analyzed Knows clearly what variables must be used to represent the key issue(s) Some lack of clarity in expressing the key variables Unsure or incomplete understanding of what needs to be analyzed Does not understand the key variable that relate to the issues. iii. Analysis potential relationships among variables Accurate and thorough qualitative analysis of the situation Some lack of clarity in expressing the relationships Weak understanding of relationships among concepts/variables Very little understanding of how variables/concepts are related. iv. Interpretation of results Can clearly relate the results of model building and quantitative analysis back to the main issue Can make the connection of model results to situation most of the time Some errors in interpretation of results in the context of the situation Inability to connect the results of model with the situation at hand.

**Findings 2012-2013 - Target: Met**

The average score was 3.44. The target was met. MBA students usually find this objective easy to meet.

<table>
<thead>
<tr>
<th>M 2: Model Building Ability (O: 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>In developing a model students will be measured on their ability to a) identify the dependent variable(s) and the appropriate metrics, b) identify key independent variables and their metrics, c) manage data collection, cleaning and transformation, and d) develop and validate a model.</td>
</tr>
</tbody>
</table>

**Source of Evidence:** Written assignment(s), usually scored by a rubric

#### Target for O2: Model Building Ability

80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 2 is to be used in scoring on assignments and projects from MGS 8150. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in MGS 8150 each time the class is offered. Learning Outcome 2 Model Building Ability Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Identifying the dependent variables and appropriate metrics Can clearly identify the dependent variable(s) and the appropriate metrics Can identify the variables, but unsure about measurement Unsure about the dependent variable Does not understand the connection between the issue at hand and the dependent variable ii Identifying Key independent variables and their metrics Can clearly identify the independent variable(s) and the appropriate metrics Can identify the variables, but unsure about measurement Unsure about the independent variables Does not understand the connection between the dependent and the independent variables iii. Dealing with Data – collection, cleaning, transformations Accurate and thorough preliminary analysis of the data Most parts of preliminary analysis done well Skipped or misunderstood some aspects of data preparation Poor understanding of the need to examine data carefully before modeling. iv. Model Development and validation Clear demonstration of a viable model and results from a validation. Possibly accurate model, not validated sufficiently Some errors in model building Model inappropriate or has too many errors.

**Findings 2012-2013 - Target: Met**

The average score was 3.44. The target was met. MBA students usually find this objective easy to meet.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

On-Growing Improvement

The assessment data show that both the programs are currently meeting or exceeding expectations, and have shown improvement over the data in 2008. With this in mind, the key elements of the action plan are as follows: 1. To continue the efforts made over the past few years in keeping the course material current, updating cases and examples to reflect industry practices today. 2. To add more resources online to aid in software competency. 3. To encourage students to engage in collaborative learning. Students post projects on the web and learn from each others’ work. This strategy has over the years yielded very positive results.

Established in Cycle: 2008-2009
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 05/2011
Responsible Person/Group: BA Faculty Members
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

To Hire New Faculty

The business analysis area is showing increasing enrollment, and there is unfilled demand for our courses in the PMBA programs as well. The analytics field is growing quickly in industry, and additional courses in this area can be offered to keep up with the demand. However, with the loss of faculty to retirements, new hiring is necessary to grow the area to its potential.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

M 3: Understanding of Techniques (O: 3)

Students will understand when and how to perform problem solving techniques for business problems and how to interpret the results.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Understanding of Techniques

Achievement Target: 80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 3 is to be used in scoring on assignments and projects from across the curriculum. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in every course where it is applicable during the academic year. Learning Outcome 3 Rubric Understanding of Techniques Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Regression Analysis Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied. ii. Factor/Cluster Analysis Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied. iii. Discriminant Analysis or Logistic Regression Clear understanding of when and how to perform the technique and interpret the results. Occasional uncertainty about the application of the technique or interpretation of results. Makes some errors in applying the technique, or in the way the results are interpreted. Poor understanding of why, when and how the technique is applied.

Findings 2012-2013 - Target: Met

The average score was 3.00. This was barely adequate to meet the requirements. As the popularity of Business Analysis grows a bit among MBA students, more take the courses, including a few students that perhaps lack the quantitative background to truly do well.

M 4: Software Skills (O: 4)

This measure evaluates the students’ expertise in using key software in business decision analysis and problem solving situations. It will be assessed during the completion of projects and assignments across the curriculum.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O4: Software Skills

80% of students will receive a score of 3.0 or higher on the 4.0 scale. Rubric 4 is to be used in scoring on projects from across the curriculum. Because of the small number of students in the MS Business Analysis program each student in the program will be evaluated on this rubric in every course where it is applicable during the academic year. Learning Outcome 4 Rubric Software Skills Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Microsoft Excel Expert use of software. Has ability to perform all required tasks. Well designed spreadsheets. Can perform most tasks well. Needs help with some tasks. Needs more than occasional help to accomplish tasks, or spreadsheet design is lacking in some aspects Inaccurate spreadsheets, sloppy work. Needs constant help to perform expected tasks. ii. SPSS Expert use of software. Has ability to perform all required tasks. Can perform most tasks well. Needs help with some tasks. Needs more than occasional help to accomplish tasks. Inaccurate work. Needs constant help to perform expected tasks. iii. SAS Expert use of software. Has ability to perform all required tasks. Can perform most tasks well. Needs help with some tasks. Needs more than occasional help to accomplish tasks. Inaccurate work. Needs constant help to perform expected tasks.

Findings 2012-2013 - Target: Met

The average score was 3.10. Once again, as with the previous objective, just enough to meet the target, but the lower scores compared to previous years may be due to more students hearing about Analytics in the business world and wanting to take the classes without being prepared for it.
Implementation Description: Non-tenure track positions in Business Analysis were announced, and the recruitment process is currently in progress.
Responsible Person/Group: Recruitment committee chaired by Dr. Subhashish Samaddar

Faculty Hiring
Hired one more faculty member to start in Fall 2013.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: Medium
Implementation Description: Hired one full time NTT faculty member who will start in Fall 2013.
Projected Completion Date: 04/2013
Responsible Person/Group: The department.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
The assessment process remains the same.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
With the added faculty member, we will possibly be able to offer all the core courses in the area on a schedule that will help students have better choice. Our inability to offer sufficient classes may have discouraged some students in the past. If the MS program students can be separated into different sections it can help us tailor the classes better for MBA students only.

Assessment Data by Section
2012-2013 Concentration in Entrepreneurship MBA
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of the Concentration in Entrepreneurship is to integrate knowledge gained through core subjects such as finance, accounting and marketing with a fundamental understanding of key principles of entrepreneurship such as opportunity recognition, business idea development and analysis, resource acquisition, innovation and growth/exit strategies. Entrepreneurship students are prepared for engagement in either new business formation or management within dynamic corporate settings that demand innovation and strategic renewal.

Goals
G 1: Deep reflective thinking
Students will be reflective thinkers.

G 2: Conscious Experimentation
Students will be conscious experimenters.

G 3: Experience transformation
Students will be equipped to transform their experience into new knowledge.

Student Learning Outcomes/Objectives
SLO 1: Tranformative Reflection (G: 1, 3) (M: 1, 2)
Students will transform experiences with entrepreneurs into knowledge connecting personal and professional development; entrepreneurship principles, and their futures.

SLO 2: Conscious Experimentation (G: 2, 3)
x

Measures, Targets, and Findings
M 1: Reflection Paper (O: 1)
Field study students (MGS8590) will spend the semester working closely with an entrepreneur on a large scale strategic project. From this experience, students will write a reflection/action plan paper reflecting upon their experience and describing a personal
development plan for using the newly acquired knowledge in their career.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Transformative Reflection**

Student average on criteria will be 2.5 on a 5.0 scale

**Findings 2012-2013 - Target: Not Met**

Average was 2.12 with one student scoring above a 3.0 (3.3) and two students below a 2.0.

**M 2: Vicarious experience reflection (O: 1)**

Entrepreneurship students (MG8500/8050) will interview and observation of an entrepreneur. Findings from this experience are compiled in a reflection paper. The content of the paper will reflect on their vicarious learning experience and will include a personal development plan for integrating and using their new knowledge moving forward.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

*Develop measure for objective #2*

conscious experimentation

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 05/2014

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Entrepreneurs require two types of knowledge to succeed: (1) industry or market-specific domain knowledge and (2) tacit knowledge of "how to be an entrepreneur" (Minniti and Bygrave 2001). Tacit knowledge of "entrepreneuring" is best attained experientially through direct hands-on experience or vicariously through indirect observation of the actions and outcomes of others (Politis 2005; Holcomb, Ireland et al. 2009). Entrepreneurship students gain direct apprenticeship experience through a field study course and vicarious experience through case studies, guest speakers and a major project in which they observe and study a successful entrepreneur. Reflection and experimentation are key components within the process of constructing tacit knowledge by "grasping and transforming experience" (Kolb 1984, pg. 41). Given this, we have changed our assessment plan to focus on the development of tacit knowledge within the concentration of Entrepreneurship as it is critical in utilization of the industry knowledge gained in the core MBA courses. The MBA program assesses students business knowledge.

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Concentration in Finance MBA**

(As of: 12/12/2016 05:59 PM EST)

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

The MBA degree program with a concentration in Finance is designed for individuals seeking a professional business management degree with advanced knowledge oriented towards finance. The goal of the program is to provide students with the skills necessary to understand issues in the context of the rapidly evolving business environment particularly as relates to finance. The program provides graduates a thorough understanding of advanced issues in finance as well as with the analytical, conceptual and integrative skills needed to achieve a high degree of success in their careers in finance.

**Goals**

**G 1: Knowledge of finance and general management practices**

Students will become knowledgeable about the discipline of finance as well as general knowledge of the core management areas of business practice.

**G 2: Conceptual and technical skill development**

Students will become conceptually and technically skilled for financial model building and analysis.

**G 3: Problem-solving skills for real world application**

Students will develop problem-solving skills used in the analysis of commonly encountered issues in the practice of finance.

**G 4: Development of critical thinking skills**

Students will become critical thinkers while analyzing complex financial issues.

**G 5: Managerial leadership preparation**
Students will become equipped for senior management levels in financial and non-financial organizations.

**Student Learning Outcomes/Objectives**

**SLO 1: Development and application of foundation knowledge (G: 1) (M: 1, 2)**

MBA-Finance concentration students will be able to: (i) Apply principles of macro-financial theory and policy. (ii) Apply principles of microfinancial theory of the firm. (iii) Acquire a general knowledge of business and management practices outside of the area of finance.

**SLO 2: Development and application of technical skills (G: 2, 4) (M: 1, 2, 3)**

Technical skills that MBA-Finance concentration students will develop and apply include: (i) Proficiency in capabilities in information technology as they relate to finance. (ii) Technical capabilities for analyzing the financial condition and performance of a corporation, investment portfolio or other financial entity. (iii) The necessary conceptual and technical skills to be proficient in financial model building. (iv) Computer and technology skills, including (but not limited to) spreadsheet capabilities, familiarity with those software packages employed in analyzing financial issues, and general operating procedure capabilities.

**SLO 3: Development and application of analytical and conceptual skills (G: 3, 5) (M: 1, 2, 3)**

MBA-Finance concentration students will: (i) Possess knowledge and capability in various subareas of finance such as corporate finance, investments, financial institutions and markets, and international finance. (ii) Be proficient in assessing the impact of financial transactions on a corporation, investment portfolio or other financial entity. (iii) Be able to identify and assess the valuation and risk of real and financial assets. (iv) Be capable of applying models for analyzing financial strategies and alternatives for purposes of solving real world financial problems. (v) Be exposed to educational and career development opportunities resulting from the globalization of finance.

**Measures, Targets, and Findings**

**M 1: Representative questions from courses (O: 1, 2, 3)**

To examine student performance in select courses from various subareas of finance (FI 8020, FI 8200, and FI 8310), the course instructors selectively chose five representative questions from various assessment instruments for their courses during the semester that together represent core learning in these courses. The questions are briefly described indicating how the questions fulfill learning objectives of the course. Each instructor has also indicated student performance on these five selected, representative questions using the median and maximum score attainable. In the Document Repository see "Exhibit 1-2013:Direct Assessment of Course Performance (Spring 2013)" for findings from Spring 2013. This measure has 3 related learning outcome objectives as indicated in "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment" (in which course level questions Q1 through Q5 are cross-referenced to learning outcomes), also included in the Document Repository.

Source of Evidence: Administrative measure - other

**Target for O1: Development and application of foundation knowledge**

Median scores shall be at least 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2012-2013 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that our MBA-Finance students are continuing to learn at least at or above the expected level of performance and that their foundation knowledge meets our targets.

**Target for O2: Development and application of technical skills**

Median scores shall be at least 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2012-2013 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that our MBA-Finance students are continuing to learn at least at or above the expected level of performance and that their technical skills meet our targets.

**Target for O3: Development and application of analytical and conceptual skills**

Median scores shall be at least at or above 70 percent, which we believe indicates a sufficient level of proficiency to effectively engage in financial decision-making.

**Findings 2012-2013 - Target: Met**

Findings are reported in the attached documents on performance on direct measures in courses. These findings indicate that our MBA-Finance students are continuing to learn at least at or above the expected level of performance and that their analytical and conceptual skills in finance meet our targets.

**M 2: Alignment of student learning outcomes (O: 1, 2, 3)**

In the Document Repository, see "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment" for details showing how learning outcomes of representative courses (FI 8020, FI 8200, and FI 8310) align with program learning outcomes. This alignment indicates that the representative questions testing student learning outcomes are well aligned with overall program learning outcomes.

Source of Evidence: Administrative measure - other

**Target for O1: Development and application of foundation knowledge**
The course level questions which examine student learning outcomes should align completely with the program learning outcomes (see "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment" for details showing how learning outcomes of representative courses (FI 8020, FI 8200, and FI 8310) align with program learning outcomes).

**Findings 2012-2013 - Target: Met**

As indicated in "Exhibit 2-2013: MBA-Finance Assessment and Alignment" the representative questions align completely with the program learning outcomes.

**Target for O2: Development and application of technical skills**

The course level questions which examine student learning outcomes should align completely with the program learning outcomes (see "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment" for details showing how learning outcomes of representative courses (FI 8020, FI 8200, and FI 8310) align with program learning outcomes).

**Findings 2012-2013 - Target: Met**

The questions which examine student learning outcomes are aligned completely with the program learning outcomes as indicated in "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment".

**Target for O3: Development and application of analytical and conceptual skills**

The course level questions which examine student learning outcomes should align completely with the program learning outcomes (see "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment" for details showing how learning outcomes of representative courses (FI 8020, FI 8200, and FI 8310) align with program learning outcomes).

**Findings 2012-2013 - Target: Met**

The questions which examine student learning outcomes are aligned completely with the program learning outcomes as indicated in "Exhibit 2-2013: MBA-Finance Assessment Plan and Alignment".

**M 3: Enhance student practical training (O: 2, 3)**

To enable students to engage in the practicum of finance, we partner with Atlanta area corporations to offer field study experiences to students. These field study assignments, offered in conjunction with FI 8391 "Field Studies in Finance," allow students to gain course credit as well as the opportunity to work with senior managers on real world projects that are of implementable interest to these organizations. Feedback over the last several years indicates high levels of satisfaction of employers and high levels of applied learning on the part of student participants.

Source of Evidence: Administrative measure - other

**Target for O2: Development and application of technical skills**

To ensure the development and application of technical skills in the world of practice, we should have at least 20 students doing field studies in finance courses every semester.

**Findings 2012-2013 - Target: Met**

Consistent with the need to develop and apply technical skills in the world of practice, we do have more than 20 students doing field-studies in finance courses every semester.

**Target for O3: Development and application of analytical and conceptual skills**

To ensure the development and application of analytical and conceptual skills in the world of practice, we should have at least 20 students doing field studies in finance courses every semester.

**Findings 2012-2013 - Target: Met**

Consistent with the need to develop and apply analytical and conceptual skills in the world of practice, we do have more than 20 students doing field studies in finance courses every semester.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Curriculum**

The Department continues to review its curriculum to identify new courses that will help better prepare students to succeed in the changing marketplace. In response, we have most recently added two courses: FI 8350 "Corporate Restructuring and Workouts" and FI 8260 "Hedge funds and their trading strategies." These two courses have been successfully taught now for 2 cycles and are among our most popular courses. Looking forward to the 2013-2014 academic year, we will continue to review the curriculum and identify potential new courses that will provide students with important skill sets relevant to their professional development.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** Medium

**Relationships (Measure | Outcome/Objective):**
- Measure: Alignment of student learning outcomes | Outcome/Objective: Development and application of analytical and conceptual skills
  - Development and application of foundation knowledge | Development and application of technical skills

**Implementation Description:** continuous

**Responsible Person/Group:** Professors Milind Shrikhande and Gerry Gay

**Practical Training and Field Study Experience**

Our experience in developing and offering the field-study in finance course FI 8391 continues to prove highly useful for providing MBA-Finance students with real-world experience in independent project management (in both financial services firms and non-
financial global business organizations). We will continue to identify additional corporate partners for purposes of expanding opportunities for students to participate. Our goal is to eventually have the field study course become an integral part and distinguishing aspect of the program.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium
Implementation Description: continuous
Responsible Person/Group: Professors Milind Shrikhande and Richard Fendler

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The 2011-2012 academic year was the first year for the MBA-Finance assessment, thus there were no changes made in the assessment process from the prior year. During the 2012-2013 academic year, we were able to select courses in the MBA finance program that were largely populated by MBA students and less by MS students. This is because most of the MS-Finance students are now required to participate in the cohorted fast track MS-Finance classes. Also, going forward, with each academic year, there is the likelihood that new and/or different faculty will instruct the graduate courses in which much of the assessment of student learning is embedded. While the courses remain relatively the same from semester to semester, the instructors may change from one year to the next. As a result, these new faculty are trained to enable their participation in the assessment process.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

First, based on feedback from students, we continue to seek ways to innovate the curriculum. Recent examples include new courses on the topics of hedge funds and on corporate restructuring and workouts. These courses have been successively launched. We will continue to review the curriculum for improvements. Second, in response to earlier feedback from students, we continue to seek participation from leading industry executives in our MBA courses to enhance student learning in the classroom. We will seek to continue this practice. Third, with the growing success of the College’s Professional MBA program, the Finance Department will continue to seek ways to offer finance classes to those PMBA students seeking specialized training in finance.

Georgia State University
Assessment Data by Section
2012-2013 Concentration in Human Resource Management MBA
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Master of Business Administration in Human Resource Management program prepares students for general business management careers with an emphasis on using Human Resources practices and procedures to increase workforce efficiency and effectiveness. Students receive detailed knowledge of selected functional areas of Human Resources to aid them in formulating legal, motivational, and cost-effective Human Resources policies or to prepare them for Human Resources generalist practices.

This Mission was established in 2006-07. It was not moved forward when the WEAVE version was updated.

Goals

G 1: Basic functions of HRM
To graduate students from the MBA program in HRM with an understanding of the role of the basic functions of Human Resources Management in a variety of organizations.

G 2: Ability to solve HR problems
To graduate students from the MBA in HRM program with the ability to solve Human Resources Management problems.

G 3: Linkage of HR actions and corporate strategy
To graduate students from the MBA in HRM program with an understanding of the importance of the role and interface of the HR functions with organizational strategies.

G 4: Understanding of employment legal issues
To graduate students from the MBA in HRM program with an understanding of the basic employee-related legal issues in organizations.

G 5: Workforce Diversity
To graduate students from the MBA/HRM program with the ability to identify and react to the issues and challenges of workforce diversity and cross-cultural HR.

G 6: Global HR Management
To graduate students from the MBA/HRM program with the ability to identify issues and react to issues and challenges of global HR.

G 7: HR in Mergers and Acquisitions
To graduate students from the MBA/HRM program with the ability to manage the role of HR in mergers and acquisitions.
### G 8: Unions and employment relations

To graduate students from the MBA/HR program with the ability to manage complex relationships with unions and to deal with employee relations issues

#### Student Learning Outcomes/Objectives

**SLO 1: The Role of HR in Organizations (G: 1, 2) (M: 1, 2)**

The MBA-HRM graduate will be able to understand and effectively apply the appropriate job analysis, job description, job evaluation, performance appraisal, dispute resolution, and HR policy formulation techniques in a variety of settings.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 2: Problem Solving (G: 1, 2) (M: 3, 4, 8, 10, 11, 12)**

The MBA-HRM graduate will be able to identify, evaluate, and effectively react to issues in the areas of employee relations and performance management.

**SLO 3: Links with Business Strategy (G: 2, 3) (M: 5)**

The MBA-HRM student will be able to define, select, and defend specific business strategies and the appropriate HR policies for each of those strategies.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 4: HR Law (G: 1, 4) (M: 6, 7)**

The MBA-HRM graduate will be able to identify and address potential legal issues, relevant laws, and appropriate policies to address.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 5: Workforce Diversity and Cross-Cultural Issues (G: 2, 5) (M: 8, 9)**

Identify issues and challenges of workforce diversity and cross-cultural HR management.

**General Education/Core Curriculum Associations**

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2. Student promotion and progression

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 6: Global Issues in HR (G: 2, 5, 6) (M: 10, 11)**

Identify issues and reaction to global issues in HR.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 7: Manage HR in Mergers and Acquisitions (G: 7) (M: 12)**

Understand the role of HR in mergers and acquisitions, including functions, legal considerations, and actions to be taken.

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points
of view when appropriate.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 8: Union and employee relations (G: 8) (M: 13, 14)**

Understand the complex relationships and interpersonal and legal issues in dealing with unions and employee relations.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Measures, Targets, and Findings**

**M 1: General Understanding of HR in Organizations (O: 1)**

Students will understand the role and usage of job analysis, job description, job evaluation, and performance appraisal techniques and can apply the appropriate method in a variety of settings.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: The Role of HR in Organizations**

80% of HR students will meet or exceed a 2.0 average on all criteria. Measurement will be done by applying the MBA Concentration in HR Measure 1 Rubric to randomly selected project reports.

**Findings 2012-2013 - Target: Met**

Average faculty rating of 1.85/3.0. 86% of MBA/HR students met or exceeded 2.0 on all criteria.

**M 2: HR Formulation Techniques (O: 1)**

The MBA-HRM graduate will be able to identify, evaluate, and effectively react to issues in the areas of employee relations and performance management.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: The Role of HR in Organizations**

80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 2 Rubric to randomly selected exam questions in MGS 8300, 8360, and 8390. Learning Outcome 1: Understand and apply job analysis, description, evaluation, and performance appraisal. Fails to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 Measure 2: Accurate description and usage guides for dispute resolution and HR policy formulation techniques. Student cannot accurately describe and explain usage of dispute resolution and HR policy formulation techniques. Student can accurately and in detail describe and explain usage of dispute resolution and HR policy formulation techniques.

**Findings 2012-2013 - Target: Met**

Average faculty rating of 2.0/3.0. 83% of MBA/HR students met or exceeded 2.0 on all criteria.

**M 3: Identify and evaluate critical HR problem issues. (O: 2)**

Students can identify and evaluate critical HR problem issues.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Problem Solving**

80% of HR students will meet or exceed a 2.0 average on all criteria. Measurement will be done by applying Measure 3 Rubric to randomly selected project reports.

**Findings 2012-2013 - Target: Met**

Average faculty rating of 2.17/3.0. 100% of MBA/HR students met or exceeded 2.0 on all criteria.

**M 4: Resource Identification in HR (O: 2)**

Students can find and apply appropriate resources to address critical HR issues and solve HR problems.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Problem Solving**

80% of HR students will meet or exceed a 2.0 average on all criteria. Measurement will be done by applying Measure 4 Rubric to randomly selected project reports.

**Findings 2012-2013 - Target: Met**

Target was met last year.

**M 5: Links with Business Strategy (O: 3)**
Students will show the ability to select appropriate business strategies and accompanying HR strategies and policies in case analyses in MGS 8300, MGS 8390, and MGS 8395.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Links with Business Strategy**

80% of HR students will meet or exceed a 2.0 average on all criteria. Measurement will be done by applying Measure 5 Rubric to randomly selected case analyses.

**Findings 2012-2013 - Target: Met**

Average faculty rating of 2.25/3.0. 100% of MBA/HR students met or exceeded 2.0 on all criteria.

**M 6: Law and Issue Identification (O: 4)**

This measure will capture the students’ ability to identify and address legal issues and relevant laws and policies to address legal issues in compensation, selection, and other HR areas.

Source of Evidence: Written assignment(s), usually scored by a rubric

**M 7: Understanding and Interpreting Case Law (O: 4)**

This measure will capture the students' ability to understand and translate into appropriate HR policies case law concerning HR issues.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: HR Law**

80% of students will be rated at or above 2.0. Measurement will be done by applying Measure 7 Rubric to randomly selected case analyses. Learning Outcome 4: Understand the role of legal constraints on HR activities and policies. Fails to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 Measure 7: Understand and translate into appropriate HR policies case law concerning HR issues. Can discuss some implications of HR case law and can apply to some HR legal issues. Can discuss most implications of HR case law and can apply to most HR legal issues. Can discuss all implications of HR case law and can apply to all HR legal issues.

**Findings 2012-2013 - Target: Met**

Average faculty rating of 2.0/3.0. 100% of MBA/HR students met or exceeded 2.0 on all criteria.

**M 8: Diversity Issues (O: 2, 5)**

Students can identify relevant issues in workforce diversity and cross-cultural HR management

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O2: Problem Solving**

80% of students will meet or exceed 2.0 average on all criteria. Measurement will be done by applying Measure 8 Rubric to randomly-selected MGS 8360 projects. Identify advantages and challenges of diversity 1 = students can identify 1-2 issues 2 = students can identify 3-4 issues 3 = students can identify more than 4 issues

**M 9: Adaptation to Workforce Diversity (O: 5)**

Students can react to issues in workforce diversity and cross-cultural issues to solve problems in HR management

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O5: Workforce Diversity and Cross-Cultural Issues**

80% of students will meet or exceed 2.0 average on all criteria. Measurement will be done by applying Measure 9 Rubric to randomly-selected projects in MGS 8360. Adapt to workforce diversity issues 1 = Students can react to 1-2 issues 2 = Students can react to 3-4 issues 3 = Students can react to more than 4 issues

**M 10: Global HR Issues (O: 2, 6)**

Students can identify issues in HR global management

Source of Evidence: Project, either individual or group

**Target for O6: Global Issues in HR**

80% of MBA/HR students will meet or exceed 2.0 average on all criteria. Measurement will be done by applying Measure 10 Rubric to randomly-selected projects in MGS 8360. Identify issues relevant to global HR management 1 = Students can identify 1-2 issues 2 = Students can identify 3-4 issues 3 = Students can identify more than 4 issues

**M 11: Reaction to Global HR Issues (O: 2, 6)**

Students can react to issues and challenges in global HR management

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O6: Global Issues in HR**

80% of MBA/HR students will meet or exceed 2.0 average on all criteria. Measurement will be done by applying Measure 11 Rubric to randomly-selected projects in MGS 8360. React to global HR issues 1 = Students can react to 1-2 issues in a superficial way 2 = Students can react to 3-4 issues in an adequate way 3 = Students can react to more than 4 issues in a highly-effective way

**M 12: Role of HR in Merger and Acquisitions (O: 2, 7)**

Identify expectations and role of HR in mergers and acquisitions

Source of Evidence: Written assignment(s), usually scored by a rubric
### Target for O7: Manage HR in Mergers and Acquisitions

80% of students will meet or exceed 2.0 average on all criteria. Measurement will be done by applying Measure 12 Rubric to randomly-selected case analyses in MGS 8300. Identify expectations and actions of HR in mergers and acquisitions 1 = Students can give incomplete or inappropriate identification of 1-2 HR roles 2 = Students can give complete and adequate identification of 3-4 HR roles 3 = Students can give complete and detailed identification of more than 4 HR roles

### M 13: Union and employee relations (O: 8)

MBA/HRM students will be able to identify cultural, legal, and ethical issues related to union and employee relations

Source of Evidence: Performance (recital, exhibit, science project)

### Target for O8: Union and employee relations

80% of MBA/HR students will meet or exceed 2.0 on all criteria. Measurement will be done by applying Measure 13 Rubric to randomly-selected cases in MGS 8300. Identify issues related to unions and employee relations 1 = Student can identify 1-2 issues 2 = Student can identify 3-4 issues 3 = Student can identify more than 4 issues

### M 14: Address union and employee relations issues (O: 8)

80% of MBA/HR students will meet or exceed 2.0 on all criteria. Measurement will be done by applying Measure 14 Rubric to randomly-selected cases in MGS 8300. Identify issues and give reactions to issues in union and employee relations 1 = Students can address 1-2 issues 2 = Students can address 3-4 issues 3 = Students can address more than 4 issues

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### HR Strategy and Communication

With respect to the third learning outcome, the student's ability to understand and effectively communicate how HR strategies support employer business strategies, two actions will be taken: · Add a short reading about problem statement to the MGS 8300 class. Reevaluate after next offering. · Spend an additional 30 minutes in MGS 8390 on business strategies and appropriate HR strategies for each. Reevaluate after next offering.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Projected Completion Date: 11/2009
- Responsible Person/Group: HR Faculty
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

#### Lecture Changes Integrating Law and Policy

Review in more detail written assignments in MGS 8320 and MGS 8300 concerning the linkages between HR law and policies. Discuss in class and compare student products, giving feedback and analysis. Reevaluate after next offering.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: High
- Relations (Measure | Outcome/Objective):
  - Measure: Understanding and Interpreting case Law | Outcome/Objective: HR Law
- Projected Completion Date: 12/2010
- Responsible Person/Group: Lucy McClurg
- Additional Resources: None
- Budget Amount Requested: $0.00 (no request)

#### Lecture Modifications on Concepts

Add a 30 minutes to the lecture on differences among, importance of, and usage of job descriptions, analysis, and performance measures. Reevaluate after next offering.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Relations (Measure | Outcome/Objective):
  - Measure: General Understanding of HR in Organizations | Outcome/Objective: The Role of HR in Organizations
- Projected Completion Date: 12/2010
- Responsible Person/Group: Lucy McClurg
- Additional Resources: None

#### Reading Changes in MGS 8360

Assign readings to MGS 8360 and require students to explain conclusions and implications in their own words. Discuss in class. Reevaluate after next offering.

- Established in Cycle: 2009-2010
- Implementation Status: Finished
- Priority: High
- Relations (Measure | Outcome/Objective):
  - Measure: Resource Identification in HR | Outcome/Objective: Problem Solving
- Projected Completion Date: 12/2010
- Responsible Person/Group: Lucy McClurg
Add additional in-class activity on job analysis
Continue to use 30 additional minutes of class time on job analysis, job descriptions, and performance measures. Add an in-class activity in MGS 8390.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Instructor will write and administer in-class activity and give feedback in class.
- **Projected Completion Date:** 12/2012
- **Responsible Person/Group:** Lucy McClurg
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

Add additional time for strategy in MGS 8300
Add 30 minutes to the presentation in MGS 8300 devoted to linkage between corporate strategy and HR strategy.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Develop a concise lecture and handouts on corporate strategies and appropriate HR strategies for each.
- **Projected Completion Date:** 12/2012
- **Responsible Person/Group:** Instructor of MGS 8300
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

Add in-class activities on performance measures and job analysis
Add to both MGS 8360 and MGS 8390 classes in-class activities on job analysis, job descriptions, and performance measurement, and the linkages among them. Spend additional class time reviewing and critiquing.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Instructors will write short hands-on cases to illustrate appropriate usage of job methods and performance measures.
- **Projected Completion Date:** 05/2012
- **Responsible Person/Group:** Instructors of MGS 8360 and MGS 8390.
- **Additional Resources:** None

Add in-class activity to MGS 8300
A short in-class activity in MGS 8300 will be designed to illustrate the linkage between case law and HR policy. Feedback for improvement will be given in class.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** A short in-class activity using a case that will then be used to have students practice writing rules and regulations.
- **Projected Completion Date:** 12/2012
- **Responsible Person/Group:** Instructor of MGS 8300
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

Coordinate terminology and usage across all HR instructors
Continue to use extra class time to go into more detail on the differences among job analysis, job descriptions, and job specifications and how they are related. Coordinate among all HR instructors to be sure they are all using the terms consistently.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Finished
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** General Understanding of HR in Organizations
  - **Outcome/Objective:** The Role of HR in Organizations
- **Implementation Description:** Coordinate with instructors over terminology and usage.
- **Responsible Person/Group:** All HR instructors
- **Additional Resources:** None

Add MGS 8300 case on unions and employee relations
Add a case in MGS 8300 to cover problem solving concerning unions and employee relations, including identification of issues and appropriate and legal reactions. 6/1/2014

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** Medium
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Address union and employee relations issues
  - **Outcome/Objective:** Union and employee relations
- **Implementation Description:** Add case to MGS 8300
- **Responsible Person/Group:** Instructor of MGS 8300
- **Additional Resources:** None
Additional lecture in MGS 8300
Add an additional 30-minute lecture in MGS 8300 to supplement textbook information on business strategies and appropriate HR response for each. Continue to monitor and check for reinforcement in MGS 8390.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Resource Identification in HR | Outcome/Objective: Problem Solving

Implementation Description: Add strategy lecture in MGS 8300
Responsible Person/Group: Instructor of MGS 8300
Additional Resources: None

Mergers case added to MGS 8300
Add a case to MGS 8300 concerning HR roles and constraints in mergers and acquisitions

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Role of HR in Mergers and Acquisitions | Outcome/Objective: Manage HR in Mergers and Acquisitions

Implementation Description: Add case to MGS 8300
Projected Completion Date: 06/2014
Responsible Person/Group: Dr. Dimotakis
Additional Resources: None

MGS 8360 case on global HR issues
Add a case to MGS 8360 concerning issues and reaction to global HR issues.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Reaction to Global HR Issues | Outcome/Objective: Global Issues in HR
| Problem Solving

Implementation Description: Case concerning global HR management will be added to MGS 8360
Projected Completion Date: 06/2014
Responsible Person/Group: Instructor of MGS 8360
Additional Resources: None

Workplace diversity and cross-cultural issues in HR
Add a case study in MGS 8360 to address workforce diversity and cross-cultural issues.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Implementation Description: Add a case student concerned with diversity and cross-cultural issues. Grade based on identification of issues and appropriate responses.
Projected Completion Date: 06/2014
Responsible Person/Group: Instructor of MGS 8360
Additional Resources: None

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? 
(e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have several few faculty members in HR. We met several times early in the year to review our goals and action plans and our new and existing faculty made adjustments to the courses based on these. At the end of the year, the new faculty took an active role in assessing the programs. As a result, many of our goals were met and new ones developed. We see this as largely attributable to having qualified FT faculty teach the classes.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Our new faculty members took an enthusiastic approach to designing activities and content that help students achieve the goals of our program. As a group, we discussed grading, overlap in content (where appropriate and helpful and where inefficient), and integration and reinforcement from one course to another. This was the first time in several years we had a critical mass of faculty working together on specific targets. We feel we have tightened up the program and made our students more attractive to employers.

Annual Report Section Responses

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.
The increasing competition in our market from other state schools, for-profit and on-line schools, and other programs, in addition to the growth of our own PMBA degree program at the expense of the MBA program, will mean increased attention to class sizes and offerings and sequencing. The classroom interface between MBA students with high-level HR jobs and extensive work experience and MS students with little or no work experience will mean more challenges for covering material at the appropriate level.

**Modifications in Measurement Methods**—If you modified any of the measures or methods you use in the measurement process, please note those here.
We quantified a number of measures in our rubrics, so instead of saying something such as "identified a number of outcomes" we now have "identified 1-2 outcomes" and more specific wording in many cases. This move led to very fruitful discussion among faculty members which helped to clarify expectations of students a great deal.

**Modifications in Intended Outcomes**—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

With additional FT faculty, more of our goals were met and new ones designed. We tried to take into account more employer feedback on what qualities in our students they find most important. We have shifted to a more hands-on, skill-building approach.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Concentration in Operations Management MBA**

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

**Mission / Purpose**

The mission of the MBA Concentration in Operations Management is to provide students pursuing a broader MBA degree (vs. the MS in Operations Management) with a moderate level of breadth and depth of understanding with respect to the major operations management issues confronting organizations of all types today. Students will be able to deal with operational issues in both a manufacturing, as well, service environment.

**Goals**

**G 1: Most Up-to-date Courses and Materials**

Our focus for the MBA Concentration in Operations Management program is to offer students the most contemporary offering through continual revision and improvement of the curriculum. In the Fall 2011 and again Fall 2012, the faculty reworked the course content and project for MGS 8710 Operations Planning making it more relevant regarding national and global supply chain planning. Curriculum for the 2012-2013 includes Operations Planning (focus on logistics & supply chain management; working capital deployment), Operations Strategy, Project Management, Quality Management, Service Operations Management, and Operations Management. This course continues to be reviewed for contemporary content as supply chain management and logistics subject matter evolves.

**G 2: Attract Top Talent Students**

The MBA Concentration in Operations Management program is meant to attract students from the upper half of the MBA program who appreciate and understand the importance of operations, logistics and supply chain management for both manufacturing and service operations. In so doing, the operations management faculty is able to facilitate better learning through increased quality of classroom discussions and provide the best quality projects for the students.

**Student Learning Outcomes/Objectives**

**SLO 1: A Strategic view of OM (G: 1, 2) (M: 1, 2, 3)**

The courses in this concentration will develop in the student a strategic view of Operations Management. That means that students will not only know the particulars of a topic in Operations Management, but will also be able to understand how they integrate with other perspectives in an organizational setting. Analysis conducted and recommendations made by a student completing this concentration will include Operations Management insights, frameworks, and tools, along with those from other functional disciplines, in order to formulate and implement effective strategic actions.

**Strategic Plan Associations**

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

**SLO 2: Develop Decision Making Abilities (M: 4)**

The Student should be able to identify critical success factors in operations management activities of an organization. This includes the ability to correctly identify, analyze and select the appropriate decision in terms of the operations management functions and incorporate the operations management function into the decision process of the organization. This objective is accomplished through the use of group projects and independent writings on various operations management topics. The project also requires collaboration and teamwork among the team members.

**SLO 3: Develop an Environmental Sustainability Viewpoint (M: 5)**

The student should become aware of the impact that OM and Supply Chain decisions have on the environment and industrial sustainability. They should be able to select the appropriate solutions to OM problems in the environmental/sustainability framework. Outside speakers are engaged to bring this perspective to life and create a desire to better understand the implications going forward.
Other Outcomes/Objectives

O/O 4: Become a Strong Team Member (M: 6)
The students should develop and enhance their team skills in the completion of completing project work in the Operations Management area. This includes positive participation in group activities and the completion of work that is needed for the group's progress on a timely basis. Focus is placed on identifying a specific OM problem, defining the problem, setting criteria for measuring alternatives/solutions, selecting alternatives, measuring the alternatives against the selected criteria, implementation of the alternative, KPIs for measuring the success/failure of each alternative, and risk assessment of the selected alternative.

Measures, Targets, and Findings

M 1: Reasoned Analysis (O: 1)
Evaluation of individual MS student's case and/or homework analyses will be completed. Individual readings and the students write-up on the reading will be reviewed and turned back to the student with comments on the relevancy of the write-up.

Target for O1: A Strategic view of OM
80% of students should pass each outcome/objective with a faculty evaluation of 2.5 on the Rubric for Measure One. Leaning Objective 1: Strategic View of OM Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 1: Reasoned Analysis The student is not able to complete a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student cannot determine the effect that firm specific dimensions have on a selected topic. The student is able to complete a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student can determine the effect that firm specific dimensions have on a selected topic. The student exceeds at completing a reasoned analysis by identifying and studying a firm's OM application both within the firm or industry. The student excels at determining the effect that a firm's specific dimensions have on a selected topic.

Findings 2012-2013 - Target: Met
Our case studies and article analysis both require rational and reasoned analysis for a clear understanding of the essential elements of the homework assignment. Our students are being asked to read, assess, and differentiate what is critical to the success of the entity and what is not. Change is occurring at a faster rate in operations, logistics and supply chain management than before and our students are being ask to appreciate the ability to reason, direct, develop and deploy solutions at a faster rate. The student responses are demonstrating the ability to master this type of reasoning and responding with rational, logical, and analytical responses at a 90%+ level.

M 2: Integration of Recommendations (O: 1)
Students should be able to determine the effect that the OM dimensions have on a selected topic and integrate recommendations on a firm's OM applications both within the firm and/ or industry.

Target for O1: A Strategic View of OM
80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Rubric for Measurements of Learning Outcome 1 Leaning Objective 1: Strategic View of OM Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 2 Integration of recommendations The student is not able to integrate recommendations on a firm's OM applications both within the firm or industry. The student cannot determine the effect that the OM dimensions have on a selected topic. The student is able to integrate recommendations on a firm's OM applications both within the firm or industry. The student determines the effect that the OM dimensions have on a selected topic. The student exceeds at integrating recommendations on a firm's OM applications both within the firm or industry. The student easily determines the effects that the OM dimensions have on a selected topic.

M 3: Performance (O: 1)
This item measures the students' ability to analyze or understand how the firm's operations process performance is affected by the competitive environment through their ability to identify the critical success factors of an OM application and the assessment of available resources and capabilities.

Target for O1: A Strategic view of OM
80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Rubric for Measurements of Learning Outcome 1 Leaning Objective 1: Strategic View of OM Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 3 Performance The student is not able identify critical success factors of an OM application. The students are not able to assess performance through an assessment of available resources and capabilities. Students are not able to analyze or understand how the firm's operations process performance is affected by the competitive environment. The student is able identify critical success factors of an OM application. The students are able to assess performance through an assessment of available resources and capabilities. Students are able to analyze or understand how the firm's operations process performance is affected by the competitive environment. The student excels at identifying critical success factors of an OM application. The students are able to easily assess performance through an assessment of available resources and capabilities. Students excel at analyzing or understanding how the firm's operations process performance is affected by the competitive environment.

M 4: Critical Thinking (O: 2)
Evaluation of individual MS student's work as completed in the required OM course. The accumulation of this type of knowledge will be received through the application of exam questions that will be measured overtime.

Target for O2: Develop Decision Making Abilities
An adequate number of written questions are used on each exam among the various course requirements to determine the critical thinking capabilities of the student. Case analysis adds an additional dimension for assessing critical thinking through writing. Students are expected to comprehend and offer alternative solutions that adequately (85%) resolve the problem statement and satisfy the criteria for a reasonable solution.

**M 5: Environmental Impact Evaluation Skills (O: 3)**
Will develop a focus and will highlight the effects that OM decisions have on the environmental and aspects of industry.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Develop an Environmental Sustainability Viewpoint**
80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Leaning Objective 3: Develop a Environmental/Sustainability Viewpoint Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3

**Measure 5 Environmental Impact Evaluation**
The student is not able to complete and deliver a project that shows an understanding of the environment impact of OM decisions or are able to contribute their functional expertise to the solution. The student is able to complete and deliver a project that shows an understanding of the environment impact of OM decisions or are able to contribute their functional expertise to the solution. Evaluate after next offering.

**Findings 2012-2013 - Target: Meets standards=2**
Our findings indicate a greater appreciation for environmental and sustainability issues. These findings are based on classroom discussions and written assignments. We find that 90% of our students are well versed on these topics.

**M 6: Team Skills (O: 4)**
The students should develop and enhance their team skills in the completion of completing project work in the Operations Management area. This includes positive participation in group activities and the completion of work that is needed for the group’s progress.

Source of Evidence: Student course evaluations on learning gains made

**Target for O4: Become a Strong Team Member**
80% of students should pass each outcome/objective with a faculty evaluation of 2 on the Rubric. Objective 4: Become a Strong Team Member Fail Fails to meet standards=1 Meet Meets standards=2 Exceed Exceeds standards=3 Measure 6 Team Skills The student did not develop team skills by indicated by poor returns on peer evaluations. The student develops team skills by indicated by average returns on peer evaluations. The student develops strong team skills by indicated by very positive returns on peer evaluations.

**Findings 2012-2013 - Target: Meets standards=2**
Our findings reflect that the majority of our students (95%+) appreciate the value of a collaborative work environment engaged in divergent/ convergent thinking. Our students understand and appreciate the value of establishing criteria for problem solving and assessing alternatives against these criteria in a team setting.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**A strategic view of OM**
With respect to the first learning outcome, to develop a strategic view of OM, two actions will be taken: · Add several readings from Business Week, New York Times or Wall Street Journal about aspects in which companies use operations management knowledge from a strategic perspective. Evaluate after next offering. · Add an in-class exercise based on a case about operations making significant difference for a company’s long term shareholder value. The case can be either a Harvard case or one that is created by the OM faculty members in the department. Evaluate after next offering.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: The implementation will be continued to have enough results for further analysis
Projected Completion Date: 12/2014
Responsible Person/Group: Operations Management Faculty Members
Additional Resources: None

**An Environment Sustainability Viewpoint**
With respect to the third learning outcome, develop an environment/sustainability viewpoint, two actions will be taken: · Add a class project that connects OM theory and applications. Evaluate after next offering. · Add an in-class exercise to let students discuss the impact of OM and supply chain decisions on the environment and industrial sustainability. Evaluate after next offering.

Established in Cycle: 2008-2009
Implementation Status: Planned
Priority: High
Implementation Description: OM faculty will continue to implement these actions. We have seen more and more companies aware of the initiative.
Projected Completion Date: 12/2013
Responsible Person/Group: Operations Management Faculty Members
Additional Resources: None

**Decision Making Abilities**
With respect to the second learning outcome, to develop decision-making abilities, three actions will be taken: · Require students to add more analysis in students’ group project and include numbers in their report. Evaluate after next offering. · Add an in-class exercise to let students discuss various measures in supply chain and revenue management analysis in accordance with the current globalizing business environment. Evaluate after next offering. Add a couple of quiz to make students to make better preparations and improve learning outcomes. Evaluate after next offering.
Annual Report Section Responses

**Modifications in Measurement Methods**

Outcomes.

**Challenges for Next Year**

Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's performance.

Modified the Operations Planning course (MGS 8710) to Logistics and Operations Planning with additional focus on supply chain management and logistics. 3) Each of the six courses include a comprehensive team project which focuses on the course topic and includes process analysis, critical path analysis, risk assessment, supply chain event management, human resource issues and some financial analysis. In addition, the assignment includes a class presentation made at the senior management level. Both components of the assignment represent a significant component of the grade for the course. In most cases there are articles and cases that are a component of the final grade. Each case and/or article must be analyzed and written up with specific issues to be addressed for the course.

**Team Membership**

With respect to the fourth learning outcome, to become a strong team member, three actions will be taken: 1) Incorporate lessons on effective teams into teaching material. 2) Require team members in the group project to create a team charter indicating an emphasis on the importance of cooperation and fairly distributed individual contributions. Evaluate after next offering. 3) Ask each team to evaluate other teams' performance to emphasize the importance of teamwork. Evaluate after next offering.

**Critical Thinking**

The Operations Management faculty members will develop a measurement mechanism, including targeted assignments and exams, as well as a measuring rubric, for the assessment of the use of critical thinking skills in the solving of problems in operations management.

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Among the six courses, and six instructors, we have made no significant changes in the assessment process. Minor changes to MBA 8155 case study (Marriott Case) has been dropped and an updated IKEA case added.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The elective course MGS 8710 title has been changed from Operations Planning to Logistics and Operations Planning. This change better reflects the course curriculum and student needs in this area of study.
process, please note those here.

We have no plans to modify the measurement.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

As our current outcomes are good, we do not plan to change them.

University-wide Committee Participation—Use this space to document any staff participation on University-wide committees (e.g., University Senate).

Peter Zhang is on the university-wide research proposal review committee and Walter Wallace is on the Critical Thinking through Writing task force committee and is one of the original Ambassadors representing the Managerial Sciences Department.

Publications and Presentations—Note in this section any articles published or presentations made at professional conferences by staff.

International Activities—Note here any international activities of the department or its staff.

Walter L. Wallace spend two summers (2010 & 2011) at Sichuan University, Suzhou Institute teaching four MBA courses in Operations Management, Operations Strategy, Service Operations, and Logistics and Supply Chain Management. In 2012, Walter accompanied 20 PMBA students to Hong Kong and mainland China, visiting a variety of U.S. companies headquartered in Shanghai and Beijing, as well as Chinese based companies.

Contributions to Student Retention—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

To increase retention rate, the faculty in the area has regularly talked to students for future job opportunities and let students know skills for job search. The Global Logistics Roundtable which is a component of the Managerial Sciences Department invites graduate students from our MS and MBA program to attend monthly programs and meet senior executives from member companies. In the past several years the Roundtable has been instrumental in placing five students into member companies.

Service to the External Community—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

The Global Logistics Roundtable which is a component of the Managerial Sciences Department invites graduate students from our MS and MBA program to attend monthly programs and meet senior executives from member companies. We feel this outreach with corporate organizations in the Southeast has been instrumental for our student involvement as well as our operations management faculty to engage in research and consulting opportunities.

Georgia State University
Assessment Data by Section
2012-2013 Concentration in Organization Management MBA
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The manager in today’s business environment deals with a variety of complex concerns including structural and organizational design, people issues and managing people, power and politics, and cultural dimensions. The Master of Business Administration in Organization Management prepares managers to analyze issues, events, problems, resource constraints, and change from the vantage point of each of these concerns and to consider each as they make decisions to chart the organization’s future. Organizations are composed of people, and people bring unique challenges to the workplace. These challenges include working with people as individuals, people in work groups, and people collectively in organizations.

Goals

G 1: Diagnose Organizational Events and Problems
Goal 1: To graduate students from the MBA in Organizational Management with the ability to diagnose the basic causes of organizational events, issues, and problems.

G 2: Recommendations for Org. Events & Problems
Goal 2: To graduate students from the MBA in Organizational Management with the ability to recommend appropriate responses to organizational events, issues, and problems.

G 3: Understand Impact of Power & Politics
Goal 3: To graduate students of the MBA program in Organization Management with an understanding of the impact that power, influence, and political behavior have on general organizational success and upon the success of specific initiatives in organizations.

Student Learning Outcomes/Objectives

SLO 1: Analyze Organizational Situations (G: 1) (M: 1)
Outcome/Objective 1: Analyze a variety of organizational situations and identify the causes of effective and ineffective movement toward meeting the organization's agenda. Full Description: Organizational issues, events, and problems have causes that
simultaneously emanate from structural, human, political, and cultural roots. Therefore, most significant issues, events, and problems must be viewed from multiple perspectives to obtain a reasonably complete understanding. Graduate should be able to simultaneously see issues, events, and problems from multiple perspectives. Related Measures Case assignments and exam questions in MBA 8165, MGS 8435, and MGS 8440.

**Strategic Plan Associations**

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

**SLO 2: Specify Courses of Action (G: 2) (M: 2)**
Outcome/Objective 2: Review a variety of organizational events, issues, and problems and specify appropriate courses of action the organization should take as a response. Full Description: Organizational issues, events, and problems have causes that simultaneously emanate from structural, human, political, and cultural roots. Graduate should be able to simultaneously see issues, events, and problems from multiple perspectives and to formulate responses that reflect an understanding of these multiple roots. Related Measures Case assignments and exam questions in MBA 8165, MGS 8435, and MGS 8440.

**SLO 3: Analyze Political Realities (G: 3) (M: 3)**
Outcome/Objective 3: Effectively analyze political realities in organizational situations. Full Description: The MBA graduate will be able to identify the effect of power and politics on resource allocations, personnel decisions, and other decisions that organizations make. Related Measures Exam questions, cases, and projects in MGS 8355.

**Measures, Targets, and Findings**

**M 1: Find Four-Perspective Causes of Events /Problems (O: 1)**
M1: Students can examine organizational events, issues, and problems and identify structural, human, political, and cultural elements in the cause of situation.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Analyze Organizational Situations**
A 2.0 average on all criteria. Measurement will be done by applying the Measure 1 Rubric to randomly selected case assignment and exam questions.

**Findings 2012-2013 - Target: Not Met**
Average rating of 1.65. 25% of students achieved 2.0 threshold on all criteria.

**M 2: Recommend Responses Incorporating Four-Perspective Analysis (O: 2)**
M2: Students can recommend organizational responses to problems that are cognizant of structural, human, political, and cultural dimensions to the situation.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Specify Courses of Action**
A 2.0 average on all criteria. Measurement will be done by applying the Measure 2 Rubric to randomly selected case assignments and exam questions.

**Findings 2012-2013 - Target: Partially Met**
Average faculty rating of 1.63 on all criteria. 50% of students achieved 2.0 threshold on all criteria.

**M 3: Identify Political Dimensions of Decisions (O: 3)**
M3: Students can identify political dimensions of organizational decisions.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Analyze Political Realities**
A 2.0 average on all criteria. Measurement will be done by applying Measure 3 Rubric to randomly selected exams, cases, and projects.

**Findings 2012-2013 - Target: Not Met**
Average of 1.7 on all criteria. 33% of students achieved the 2.0 threshold on all criteria.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Add case for recommendations**
Add an in-class case discussion just before mid-term that requires students to analyze organizational situations and provide recommendations for action.

- **Established in Cycle**: 2011-2012
- **Implementation Status**: In-Progress
- **Priority**: High

**Relationships (Measure | Outcome/Objective):**
Measure: Recommend Responses Incorporating Four-Perspective Analysis | Outcome/Objective: Specify Courses of Action

- **Implementation Description**: Case is being implemented.
- **Projected Completion Date**: 05/2014
**Additional Case for Analysis of Causes**

Add an in-class case discussion just before mid-term that requires students to provide analysis of organizational causes of events, issues and problems.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Find Four-Perspective Causes of Events /Problems | Outcome/Objective: Analyze Organizational Situations

Implementation Description: Additional case was introduced. Case will be changed for the next iteration.
Projected Completion Date: 05/2014
Responsible Person/Group: MBA 8165 instructors

**Additional feedback on political aspects of decisions**

Change the in-class activity to provide more feedback for students concerning their decision making regarding the political aspects of those decisions.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Identify Political Dimensions of Decisions | Outcome/Objective: Analyze Political Realities

Implementation Description: First iteration was not ideal. Will adjust in the next iteration.
Projected Completion Date: 05/2014
Responsible Person/Group: MGS 8435 instructors

**Add group decision-making activity**

In order to put increased emphasis on group-level decision-making, we will add a group-level in-class activity. This will be the "Towers Market" exercise. The debrief of this activity is intended to provide focus on group decisions when no apparent coalitions are present.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Find Four-Perspective Causes of Events /Problems | Outcome/Objective: Analyze Organizational Situations

Projected Completion Date: 05/2014
Responsible Person/Group: MBA 8165 instructors

**Change the case for recommendations**

In the previous cycle, we added a case to improve students insights into how to recommend and organize recommendations based on their diagnosis of organizational problems. While this addition has helped, the instructors are not sufficiently pleased with the selected case once it was used in class. Therefore, we will be implementing a new case for this purpose.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Recommend Responses Incorporating Four-Perspective Analysis | Outcome/Objective: Specify Courses of Action

Projected Completion Date: 05/2014
Responsible Person/Group: MBA 8165 instructors

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have maintained the outcomes, measures, and targets. Our focus has been on making individual adjustments within the individual courses in order to increase performance as measured against the stated targets.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

In the coming year, we plan to revise the curriculum to reduce the number of elective courses and increase the number of required courses. Also, we intend to narrow the list of approved elective courses. In general, this strategy is intended to provide more focus and a more common experience within the program for the graduates.
Mission / Purpose
The MBA degree program is designed for individuals with work experience who aspire to organizational or entrepreneurial leadership positions. The program enhances general management abilities and provides an opportunity to place emphasis on a functional area of expertise. The mission of the concentration in real estate is to provide that expertise in the area of real estate.

Goals
G 1: Business skills required to lead by pursuing ethical, innovative and value-enhancing strategies in real estate organizations
Graduate students with the business skills required to lead by pursuing ethical, innovative and value-enhancing strategies in real estate organizations in a culturally diverse and technologically advanced world.

Student Learning Outcomes/Objectives
SLO 1: Apply theoretical principles and skills to the analysis and solution of a range of real estate problems (G: 1) (M: 1)
Apply theoretical principles and skills to the analysis and solution of a range of real estate problems

SLO 2: Understand how real estate can contribute to achieving the overall goals of the firm (G: 1) (M: 2, 3, 4)
Understand how real estate can contribute to achieving the overall goals of the firm

Measures, Targets, and Findings
M 1: Evaluate corporate real estate organizational and operational structures using material from both real estate & MBA core classes (O: 1)
Evaluate corporate real estate organizational and operational structures using material from both real estate and MBA core classes. Criterion: Identify key criteria and evaluate alternative structures in an exam question. (RE8100)
Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Apply theoretical principles and skills to the analysis and solution of a range of real estate problems
MBA students score a minimum average 2.0 on 3.0 scale on measure with 1= fails to meet standard; 2=meets standard; 3=exceeds standard.

Findings 2012-2013 - Target: Not Met
Average on Criteria 1: 1.6 29% students met standard.

M 2: Understand real estate as a contributor to achieving human resources goals (O: 2)
Understand real estate as a contributor to achieving human resources goals Criterion 1: Understand the process for estimating workplace demand in an exam question. (RE8100) Criterion 2: Understand the changing intersection of workers, space, and technology in designing workplaces in an exam question. (RE8100)
Source of Evidence: Writing exam to assure certain proficiency level

Target for O2: Understand how real estate can contribute to achieving the overall goals of the firm
MBA students score a minimum average 2.0 on 3.0 scale on measure with 1= fails to meet standard; 2=meets standard; 3=exceeds standard.

Findings 2012-2013 - Target: Met
Average on Criteria 1: 2.4 71% students met standard. Average on Criteria 2: 2.6. 100% students met standard.

M 3: Evaluate corporate real estate strategies in relation to core business strategies (O: 2)
Evaluate corporate real estate strategies in relation to core business strategies using material from both real estate and MBA core classes. Criterion: Identify key criteria and evaluate alternative real estate strategies to support common business strategies in an exam question. (RE 8100)
Source of Evidence: Writing exam to assure certain proficiency level

Target for O2: Understand how real estate can contribute to achieving the overall goals of the firm
MBA students score a minimum average 2.0 on 3.0 scale on measure with 1= fails to meet standard; 2=meets standard; 3=exceeds standard.

Findings 2012-2013 - Target: Met
Average on Criteria 1: 2.0. 40% students met standard.
**M 4: Evaluate alternative locations and sites (O: 2)**
Evaluate alternative locations and sites Criterion: Identify key criteria and evaluate alternative locations and sites to support core business strategies in an exam question. (RE8100)

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O2: Understand how real estate can contribute to achieving the overall goals of the firm**
MBA students score a minimum average 2.0 on 3.0 scale on measure with 1= fails to meet standard; 2=meets standard; 3=exceeds standard.

**Findings 2012-2013 - Target: Met**
Average on Criteria 2: 2.1. 86% students met standard.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Review course materials and exercises for O1.M1.C1.**
Review course materials and exercises on related topics to examine why target not met this year, but has been met in previous years. (O1.M1.C1.)

- Established in Cycle: 2011-2012
- Implementation Status: In-Progress
- Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Evaluate alternative locations and sites | Outcome/Objective: Understand how real estate can contribute to achieving the overall goals of the firm
- Measure: Evaluate corporate real estate organizational and operational structures using material from both real estate & MBA core classes | Outcome/Objective: Apply theoretical principles and skills to the analysis and solution of a range of real estate problems
- Measure: Evaluate corporate real estate strategies in relation to core business strategies | Outcome/Objective: Understand how real estate can contribute to achieving the overall goals of the firm

Responsible Person/Group: Instructor

The instructor changed the required readings, replacing some articles with chapters from a book. Students seemed to have difficulty incorporating theoretical materials from the new reading in situations designed to test their ability to apply theoretical concepts in specific situations.

- Established in Cycle: 2011-2012
- Implementation Status: Finished
- Priority: Medium

Implementation Description: The instructor will re-evaluate the readings to ensure they are providing the content in a way that students can transfer theory to practice.
- Projected Completion Date: 05/2013
- Responsible Person/Group: Instructor

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes since last year. No changed planned in the coming academic year.

**ACADEMIC PROGRAM QUESTION 2:**
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

No changes to program or curricular design arose from this year’s assessment.

---

**Georgia State University**
Assessment Data by Section
2012-2013 Counseling Psychology PhD
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
The Counseling Psychology PhD Program, a unit of the Department of Counseling and Psychological Services, subscribes to a scientist-practitioner model designed to integrate science with practice and advocacy. Students are prepared to generate and apply psychological knowledge to human development, adaptation, and adjustment issues.
Goals

**G 1: Clinical Competence**
Students are competence in understanding and applying theoretical knowledge in ethical clinical practice while being sensitive to multicultural issues.

**G 2: Research Competence**
Students are competent in both understanding and applying research methods.

Student Learning Outcomes/Objectives

**SLO 1: Clinical effectiveness with diverse groups of clients (M: 1, 2)**
Students are prepared to work with clients who are individually and culturally different from themselves.
Relevant Associations: American Psychological Association Accreditation Domain D.

**SLO 2: Knowledgeable about the tenets of ethical clinical practice (M: 3, 4, 5)**
Students are knowledgeable about the tenets and principles of ethical practice
Relevant Associations: American Psychological Association Accreditation Domain B

**SLO 3: Is proficient in key clinical areas of the profession (M: 6, 7)**
Students are proficient in diagnosis, prevention, remedial interventions, psychotherapy, consultation, supervision, and psycho-educational interventions.
Relevant Associations: American Psychological Association Accreditation Domain B

**SLO 4: Understands relevant clinical theories (M: 8, 9)**
Students understand theories of psychological development, psychopathology, counseling process, and behavior change.
Relevant Associations: American Psychological Association Accreditation Domain B

**SLO 5: Use and conduct research (M: 10)**
Students can use and conduct empirical research.
Relevant Associations: American Psychological Association Accreditation Domain B

Measures, Targets, and Findings

**M 1: Evaluation by practicum supervisor (O: 1)**
Evaluation by practicum supervisor. Supervisors complete formal written evaluations of students using quantitative and qualitative items. On a 5-point scale, students must score a 3 or above on all quantitative items to be satisfactory.
Source of Evidence: Field work, internship, or teaching evaluation

**Target for O1: Clinical effectiveness with diverse groups of clients**
90% of students meet evaluation target on evaluation.

**Findings 2012-2013 - Target: Met**
100% of students met target.

**M 2: Performance in Advanced Multicultural Course (O: 1)**
Performance in Advanced Multicultural Counseling Course (i.e., CPS 8340)
Source of Evidence: Academic direct measure of learning - other

**Target for O1: Clinical effectiveness with diverse groups of clients**
90% of students receive satisfactory evaluation (4 or higher on 5 point scale) by course instructor.

**Findings 2012-2013 - Target: Met**
100% of students received satisfactory evaluation (4 or higher on 5 point scale) by course instructor.

**M 3: Evaluation by practicum supervisor (O: 2)**
Evaluation by practicum supervisor. Supervisors complete formal written evaluations of students using quantitative and qualitative items. On a 5-point scale, students must score a 3 or above on all quantitative items to be satisfactory.
Source of Evidence: Field work, internship, or teaching evaluation

**Target for O2: Knowledgeable about the tenets of ethical clinical practice**
90% of students score a 3 or above on practicum evaluation items.
Findings 2012-2013 - Target: Met
100% of students met target of scoring 3 or above on practicum evaluation items.

**M 4: Performance in ethics course (O: 2)**
Performance in Advanced Ethics course (i.e., CPS 8530)
Source of Evidence: Academic direct measure of learning - other

**Target for O2: Knowledgeable about the tenets of ethical clinical practice**
90% of students receive satisfactory evaluation (4 or higher on 5 point scale) by course instructor.

**Findings 2012-2013 - Target: Met**
100% of students received rating of 4 or higher on evaluation by instructor.

**M 5: Comprehensive examination question on ethics (O: 2)**
Ethics comprehensive examination question evaluation. Students write a 12-page answer to this question to demonstrate their knowledge of professional ethics and their application. Answers are evaluated by a two-person faculty committee who determine whether the student receives a grade of pass or fail.
Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O2: Knowledgeable about the tenets of ethical clinical practice**
80% of students receive passing grade on ethics comprehensive area question.

**Findings 2012-2013 - Target: Met**
100% of target met.

**M 6: Performance in didactic courses (e.g., Assessment) (O: 3)**
Performance in assessment didactic courses (e.g., PSY 8020, PSY 8030, CPS 9420)
Source of Evidence: Academic direct measure of learning - other

**Target for O3: Is proficient in key clinical areas of the profession**
90% of students receive satisfactory evaluation (4 or higher on a 5 point scale) in courses related to key areas of the profession (e.g., Assessment).

**Findings 2012-2013 - Target: Met**
100 percent of students received satisfactory evaluations in courses.

**M 7: Written practicum evaluation from supervisors (O: 3)**
Written practicum evaluation from supervisors. Supervisors complete formal written evaluations of students using quantitative and qualitative items. On a 5-point scale, students must receive a score of 3 or higher on all quantitative items to be satisfactory.
Source of Evidence: Field work, internship, or teaching evaluation

**Target for O3: Is proficient in key clinical areas of the profession**
90% of students will receive a score of 3 or higher on related practicum evaluation items.

**Findings 2012-2013 - Target: Met**
100% of students met target of receiving score of 3 or higher on evaluation items.

**M 8: Performance in theories courses (O: 4)**
Performance in theories related courses (e.g., CPS 8450, CPS 8650, CPS 8370, PSYC 8660)
Source of Evidence: Academic direct measure of learning - other

**Target for O4: Understands relevant clinical theories**
90% of students will receive satisfactory evaluation (4 or higher on 5 point scale) by instructors of theory related courses.

**Findings 2012-2013 - Target: Met**
100% of students received grades satisfactory evaluations in theory related courses.

**M 9: Comprehensive examination question on theory (O: 4)**
Theory comprehensive examination question evaluation. Students write a 12-page answer to the question to demonstrate their knowledge of counseling theories and applications. Answers are evaluated by a two-person faculty committee who determine whether the students receives a grade of pass or fail.
Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O4: Understands relevant clinical theories**
80% of students will receive passing grade on theory area comprehensive question.

**Findings 2012-2013 - Target: Met**
100% of students received passing grades on theory comprehensive questions.
**M 10: Performance in research courses (O: 5)**
Performance in courses about research methods and their application (e.g., EPRS 8530, EPRS 8540, EPRS 9820, CPS 9920)
Source of Evidence: Academic direct measure of learning - other

**Target for O5: Use and conduct research**
90% of students will receive satisfactory evaluation (4 or higher on 5 point scale) by instructors in research related courses.

**Findings 2012-2013 - Target: Met**
100% of students receives satisfactory evaluation (4 or higher on 5 point scale) by course instructors in research related courses.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Comprehensive Examination Orientation
Present an orientation the the comprehensive examination to enhance students' preparation for the theories portion of the comprehensive examination.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Comprehensive examination question on theory | Outcome/Objective: Understands relevant clinical theories

- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Program Director

### Comprehensive Examination Orientation
To offer an orientation to the comprehensive examination process so that students can focus their preparation for the examination more effectively.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Comprehensive examination question on ethics | Outcome/Objective: Knowledgeable about the tenets of ethical clinical practice

- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Director of the program

### Monitor Program Strengths
All outcome objectives were fully met. Program faculty will work to maintain positive program characteristics, and will continue to monitor and assessment stated learning outcomes.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Comprehensive examination question on ethics | Outcome/Objective: Knowledgeable about the tenets of ethical clinical practice
- Measure: Comprehensive examination question on theory | Outcome/Objective: Understands relevant clinical theories
- Measure: Performance in Advanced Multicultural Course | Outcome/Objective: Clinical effectiveness with diverse groups of clients
- Measure: Performance in didactic courses (e.g., Assessment) | Outcome/Objective: Is proficient in key clinical areas of the profession
- Measure: Performance in ethics course | Outcome/Objective: Knowledgeable about the tenets of ethical clinical practice
- Measure: Performance in research courses | Outcome/Objective: Use and conduct research
- Measure: Performance in theories courses | Outcome/Objective: Understands relevant clinical theories
- Measure: Written practicum evaluation from supervisors | Outcome/Objective: Is proficient in key clinical areas of the profession

**Implementation Description:** Use Spring Faculty meeting to review objectives and program strengths and weaknesses.
- **Responsible Person/Group:** Counseling Psychology Faculty

### Return Assessment Courses to Dept.
Offer psychological assessment courses in the department rather than having students take courses in psychology department to allow for tailored instruction to Counseling Psychology students.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Comprehensive examination question on ethics | Outcome/Objective: Knowledgeable about the tenets of ethical clinical practice
- Measure: Comprehensive examination question on theory | Outcome/Objective: Understands relevant clinical theories
- Measure: Performance in didactic courses (e.g., Assessment) | Outcome/Objective: Is proficient in key clinical areas of the profession

**Implementation Description:** Courses are being offered Fall 2013 and Spring 2014.
- **Responsible Person/Group:** Counseling Psychology Faculty
Mission / Purpose

The Counselor Education and Practice Ph. D. program is designed to prepare students to work as counselor educators, supervisors, and advanced practitioners in academic, public schools, and clinical settings. The program accepts as a primary obligation extending the knowledge base of the counseling profession in a climate of scholarly inquiry. The doctoral program subscribes to a scientist-practitioner model and as such is designed to prepare students to be both consumer and producer of research.

Goals

G 1: Teaching
Students will be skilled and knowledgeable teachers at the University level.

G 2: Research
Students will become proficient in critiquing and conducting research related to the counseling profession.

G 3: Clinical Skills
Students will be able to demonstrate advanced counseling skills.

G 4: Supervision
Students will be knowledgeable and skilled clinical supervisors.

Student Learning Outcomes/Objectives

SLO 1: Teaching (M: 1, 2, 3)
1. Students will demonstrate the ability to develop course syllabi. 2. Students will be able to provide formative and summative feedback to their students. 3. Students will demonstrate the ability to effectively teach a course. 4. Students will articulate a personal philosophy of teaching.

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

SLO 2: Research (M: 4, 5)
1. Students will demonstrate the ability to critique a research manuscript. 2. Students will demonstrate the ability to design and implement a research project.

SLO 3: Clinical Skills (M: 6)
1. Students will demonstrate knowledge of counseling theory and concepts. 2. Students will demonstrate professional and ethical behavior in clinical practice. 3. Students will demonstrate knowledge, skills, and attitudes appropriate for working in diverse settings with clients from various cultural backgrounds. 4. Students will demonstrate the ability to integrate social advocacy/social justice in the treatment of clients.

SLO 4: Supervision (M: 7)
1. Students will demonstrate knowledge of supervision and counseling theories and concepts. 2. Students will demonstrate professional and ethical behavior in the practice of clinical supervision. 3. Students will demonstrate knowledge, skills, and attitudes appropriate for working in diverse settings with supervisees from various cultural backgrounds.

Measures, Targets, and Findings

M 1: Teaching (O: 1)
Students will receive a passing on the teaching section of their professional portfolio which is one of the assignments in their CPS 9963 course. In order to pass the teaching section of the portfolio, the students must submit a copy of a sample course syllabi that they developed for a course they have taught or are currently teaching. The syllabi will be assessed based on the following criteria: 1) does the syllabi clearly state the purpose of the course; 2) does the syllabi contact the mission of the CPS program; 3) does the syllabi contact criteria for evaluation; and 4) does the syllabi contact a tentative outline of the course.

Source of Evidence: Portfolio, showing skill development or best work

Target for O1: Teaching
Target is passing the teaching section of the portfolio. Students must receive 2 out of 3 points. 1 point equates to does not meet standards; 2 points equates to competent; 3 points equate to exemplary.

Findings 2012-2013 - Target: Met
All students (N=6) completing the teaching portfolio received either a 2 or 3 on the final assessment.

**M 2: Teaching (O: 1)**

On the question "the instructor was well prepared" of the teaching evaluation form, students will receive at least a 3 (5 point scale; 1 is low and 5 is the highest) with 80% receiving a 4 or 5.

*Source of Evidence: Student course evaluations on learning gains made*

**Target for O1: Teaching**

On the question "the instructor was well prepared" of the teaching evaluation form, students will receive at least a 3 (5 point scale; 1 is low and 5 is the highest) with 80% receiving a 4 or 5.

**Findings 2012-2013 - Target: Met**

The range of scores for this question was 4.6 to 5.0 with a mean of 4.8. Therefore, 100% (N=5) met this target.

**M 3: Teaching (O: 1)**

On the teaching effectiveness question of the teaching evaluation form (please note depending on the version this question is a different number), students will receive at least a 3 (5 point scale; 1 is low and 5 is the highest) with 80% receiving a 4 or 5.

*Source of Evidence: Student course evaluations on learning gains made*

**Target for O1: Teaching**

On the teaching effectiveness question of the Teaching Evaluation Form students will receive at least a 3 out of 5 with 80% receiving either a 4 or 5.

**Findings 2012-2013 - Target: Met**

The range of scores on this question was 4.4 to 5 with a mean of 4.7. 100% (N=5) met this target.

**M 4: Research (O: 2)**

Students will complete and submit their predissertation project. All students in the CEP program must successfully complete the predissertation study, this is a milestone project and students cannot advance until they have successfully completed the predissertation study.

*Source of Evidence: Project, either individual or group*

**Target for O2: Research**

Students will complete and submit their predissertation study.

**Findings 2012-2013 - Target: Met**

Four students successfully completed their predissertation study during 2012-2013 cycle.

**M 5: Research (O: 2)**

Students will receive a Passing on the research portion of their comprehensive examination. The comprehensive examination is a requirement of the College of Education and the CEP program. All students must pass the comprehensive examination before becoming a doctoral candidate. Students have two opportunities to successfully pass the comprehensive examination. After two unsuccessful attempts at passing the comprehensive examination, students may not continue with their program of study.

*Source of Evidence: Comprehensive/end-of-program subject matter exam*

**Target for O2: Research**

Students will receive a pass on the research portion of their written comprehensive examination.

**Findings 2012-2013 - Target: Met**

During the 2012-2013 cycle, we only had one student take their comprehensive examination and she successfully passed the research portion of the comprehensive examination.

**M 6: Clinical Skills (O: 3)**

Students will receive at least a 3 (5 point scale; 1-needs considerable improvement; 5-demonstrates exceptional ability) with 80% receiving 4 or 5 on the following questions of the supervisee evaluation form: 1. demonstrates knowledge of counseling theory and concepts. 2. demonstrates knowledge, skills, and attitudes appropriate for working in diverse settings with clients from various cultural backgrounds. 3. understands the role of social advocacy in the treatment of clients. 4. demonstrates awareness of professional, legal, and ethical issues in the counseling profession.

*Source of Evidence: Field work, internship, or teaching evaluation*

**Target for O3: Clinical Skills**

Students will receive at least 3 out of 5 on the relevant questions on the Supervisee Evaluation Form.

**Findings 2012-2013 - Target: Met**

100% (N=2) of the students who took advanced practicum received at least a 3 or higher on the relevant questions. 1= needs considerable improvement in this area. 2= needs improvement in this area. 3= demonstrates minimal competency in this area. 4= demonstrates competency in this area. 5= demonstrates exceptional ability in this area. NA= not applicable More specifically the means were: 1. demonstrates knowledge of counseling theory and concepts (mean =5). 2. demonstrates knowledge, skills, and attitudes appropriate for working in diverse settings with clients from various cultural backgrounds (mean=5). 3. understands the role of social advocacy in the treatment of clients (mean=5). 4. demonstrates awareness of professional, legal, and ethical issues in the counseling profession (mean=5).
M 7: Supervision (O: 4)

Students will receive at least a 3 (5 point scale; 1-needs considerable improvement; 5-demonstrates exceptional ability) with 80% receiving 4 or 5 on the following questions of the supervisee evaluation form: 1. demonstrates knowledge of supervision and counseling theory and concepts. 2. demonstrates knowledge, skills, and attitudes appropriate for working in diverse settings with supervisees from various cultural backgrounds. 3. demonstrates awareness of professional, legal, and ethical issues in the counseling/supervision profession and utilizes supervision to clarify ethical challenges faced with supervisees.

Source of Evidence: Field work, internship, or teaching evaluation

Target for O4: Supervision

Students will receive at least a 3 on the relevant questions of Supervisor in Training Evaluation Forms, with 80% receiving at least a 4 or 5.

Findings 2012-2013 - Target: Met

1. The range of scores for the theory question was 4 to 5 with a mean of 4.5; 100% (N=2) passing this criteria. 2. Both students received a 5 on the diversity question; 100% (N=2) passing on this criteria. 3. Both students received a 5 on the ethics question, 100% (N=2) passing on this criteria.

Development of the Clinical Rehabilitation Counseling Track
We will investigate the possibility of having a clinical rehabilitation counseling track as a part of the CEP program.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Implementation Description: We will work with the Rehabilitation Counseling Program coordinator to work out the details.
Projected Completion Date: 05/2014
Responsible Person/Group: Dr. Chang
Additional Resources: none
Mission / Purpose

The mission of the Ph.D. in Criminal Justice and Criminology is to prepare students for careers in research and teaching in Criminal Justice and Criminology. We anticipate that our students will become academics or applied researchers and our mission is to provide them with training and mentoring that will help them achieve these goals.

Goals

G 1: Researchers
Students will be capable of producing high quality research in Criminal Justice & Criminology.

G 2: Teachers
Students will be high quality instructors in undergraduate courses in Criminal Justice & Criminology.

G 3: Critical Thinkers
Students will be able to think critically about crime and justice issues.

Student Learning Outcomes/Objectives

SLO 5: Critical Thinkers (G: 3) (M: 5)
Students will be able to critically analyze crime and justice issues and/or information utilizing theoretical, methodological, and statistical skill bases, in written form.

Other Outcomes/Objectives

O/O 1: Presentations (G: 1) (M: 1)
Students will present research at regional and national conferences in Criminal Justice and Criminology.

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

O/O 2: Publications (G: 1) (M: 2)
Students will publish research in peer-reviewed journals in Criminal Justice and Criminology.

Strategic Plan Associations

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

O/O 3: Teaching Excellence (G: 2) (M: 3, 4)
Graduate student instructors will demonstrate teaching excellence.

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

Measures, Targets, and Findings

M 1: Presentations (O: 1)
We will count the number of presentations, given by Ph.D. students who have reached candidacy, at regional and national conferences in Criminal Justice and Criminology, based on a review of the student's Curriculum Vitae.

Source of Evidence: Activity volume

Target for O1: Presentations

100% of students will have presented at least once at a regional or national conference by the time they graduate. 60% of students will have presented at least twice at a regional or national conference by the time they graduate. 20% of students will have presented 3 or more times (at least 2 national presentations) by the time they graduate.

Findings 2012-2013 - Target: Met

Of the three students who have advanced to candidacy, all have presented 3 or more times, including at least 2 at national conferences.
meetings. The average student presented 8 papers at professional conferences.

**M 2: Publications (O: 2)**

We will count the number of peer-reviewed publications, by Ph.D. students in Criminal Justice and Criminology who have advanced to candidacy, based on a review of the student's Curriculum Vita.

Source of Evidence: Activity volume

**Target for O2: Publications**

100% of students will have submitted an article to a peer-reviewed journal by the time they graduate. 60% of students will have published a peer-reviewed journal article by the time they graduate. 20% of students will have published two or more peer-reviewed articles by the time they graduate.

**Findings 2012-2013 - Target: Met**

All three of the students who have advanced to candidacy have published a peer-reviewed journal article (100%). Two of the three students have published two or more peer-reviewed journal articles (66.6%). The average for the three students was 2.33 peer reviewed articles.

**M 3: Student Evals (O: 3)**

End of course evaluations will be used to measure undergraduate perceptions of teacher effectiveness based on the item "Considering both the limitations and possibilities of the subject matter, how would you rate the overall teaching effectiveness of this instructor?"

Source of Evidence: Student course evaluations on learning gains made

**Target for O3: Teaching Excellence**

100% of students will score a 3.5 or higher (out of 5) on this item. 60% of students will score 4.0 or higher (out of 5) on this item. 20% of students will score a 4.5 or higher (out of 5) on this item.

**Findings 2012-2013 - Target: Met**

Of the 13 course sections instructed by graduate students, 100% were scored over a 3.5 on this item. Of the 7 course sections instructed by graduate students, 84.6% were scored at 4.0 or higher on this item. Of the 7 course sections instructed by graduate students, 61.5% were scored at 4.5 or higher on this item.

**M 4: Faculty Evals (O: 3)**

A summary score of the 12 items on the Classroom Observation Form, filled out by faculty will be used to measure the faculty evaluation of teaching effectiveness by Ph.D. students in CJ&C.

Source of Evidence: Evaluations

**Target for O3: Teaching Excellence**

100% of students will have an average score of 3 or higher on the 12-item faculty-rated classroom observation form. 50% of students will attain an average score of 4.0 or higher on the 12-item faculty-rated classroom observation form. 25% of students will attain an average score of 4.5 or higher on the classroom observation form.

**Findings 2012-2013 - Target: Met**

Faculty rated all 4 students observed in the classroom above a 3.0 average (100%). Faculty rated all 4 students observed in the classroom above a 4.0 average (100%). Faculty rated 2 of the 4 students observed in the classroom above a 4.5 average (50%).

**M 5: Comps Rubric (O: 5)**

We will develop a rubric to assess critical thinking as displayed in written form on the Comprehensive Examinations that all students must take in order to advance to the dissertation stage of the program.

Source of Evidence: Comprehensive/end-of-program subject matter exam

**Target for O5: Critical Thinkers**

Target to be developed after the rubric is developed.

**Findings 2012-2013 - Target: Not Reported This Cycle**

Not Reported this cycle.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Develop Rubric**

We will develop a rubric to assess critical thinking on the written comprehensive examination.

- Established in Cycle: 2011-2012
- Implementation Status: In-Progress
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Comps Rubric | Outcome/Objective: Critical Thinkers
- Projected Completion Date: 10/2013
- Responsible Person/Group: Graduate Committee
- Additional Resources: None
**Comps**

The graduate committee will meet this year to assess the comps process and propose revisions to the existing comprehensive exam structure.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 03/2014
- **Responsible Person/Group:** Graduate Committee / Full Faculty

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:**
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We combined two student outcomes, because they were redundant and poorly worded - as noted by the Graduate Assessment Committee's review. We created targets for some of the measures this year that we had not created last year. We collected data for the first time, since the Ph.D. program is so new. We are in the process of revising our comprehensive examinations structure and the assessment of the comps as a measure of critical thinking.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We plan to implement changes to our comprehensive examination process and how we assess critical thinking through the comps via a rubric.

**Annual Report Section Responses**

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

We lost three key tenured or tenure track faculty members this year (20% of the faculty). Implementation of the existing program and especially the comprehensive examination structure has been critically compromised by these losses.

**Modifications in Intended Outcomes**—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

Two of the outcomes proposed last year were redundant and poorly worded, so they have combined into a single outcome with two measures.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 Criminal Justice Assessment of Core**

(Also includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The Department of Criminal Justice emphasizes issues of crime and justice occurring in urban environments from a multicultural, interdisciplinary perspective to inform science, policy, and practice. The mission of the Department is to produce students who are critical and ethical thinkers, knowledgeable about the issues of crime and justice, and prepared for criminal justice leadership positions in public and private agencies. This report provides an assessment of student learning for the 2012-2013 academic year.

**Goals**

**G 1: Students should be critical thinkers**

Students are critical thinkers in the context of contemporary issues in crime and criminal justice.

**G 2: Students should be analyzers of crime and criminal justice**

Students should be analyzers of the complexity of crime and criminal justice system considering historical trends, social and/or spatial relationships, and how these relationships develop, persist and/or change.

**Student Learning Outcomes/Objectives**

**SLO 1: Analyze Contemporary Crime/Criminal Justice Issues (G: 1) (M: 1)**

Students effectively analyze a wide range of contemporary crime and justice issues to which they are exposed using a social science perspective.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

### SLO 2: Analyze Contemporary Multicultural Issues (G: 1) (M: 1)

Students effectively analyze a wide range of contemporary multicultural issues, including race, class, age, and gender, and their relationship to crime and justice in America.

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### SLO 3: Analyze Contemporary Global & International Issues (G: 1, 2) (M: 1)

Students effectively analyze contemporary global and international crime and criminal justice issues, including comparing crime rates in a number of countries (such as Europe, the Middle East, Asia, Japan, and America).

**General Education/Core Curriculum Associations**

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### Measures, Targets, and Findings

**M 1: Embedded examination questions (O: 1, 2, 3)**

Multiple sections (N=7) of CRJU 2200 were offered during both the Fall 2012 (n=4) and Spring 2013 (n=3) semesters. Of the seven sections offered, four were taught by full-time tenure track faculty members, and one was taught at a branch campus with a very small class size. The examinations in the course sections included in this assessment covered approximately one-third (1/3) of the course, for a total of three exams in each of these sections. Multiple choice, fill-in-the-blank, or true/false questions for each objective were embedded on each of the three exams in each of the sections to be included in this assessment. All students in these sections were required to answer each assessment question. Instructors had the discretion of what questions to include; some of the questions included were similar across sections, other questions differed. Reporting this period focuses on three sections, one taught in the Fall 2012 and two taught in the Spring 2013, all by full-time, tenure-track faculty.

Source of Evidence: Standardized test of subject matter knowledge

**Target for O1: Analyze Contemporary Crime/Criminal Justice Issues**

Each instructor included questions assessing students' knowledge of contemporary crime/criminal justice issues on one or more exams in each section taught. The target achievement goal was an 80% pass rate for each question. The questions by instructor are provided in the attached document entitled Assessment Measures by Instructor Core Fall 2012 2013.

**Findings 2012-2013 - Target: Partially Met**

A total of 190 students (N=119 for Instructor 1; N=6 for Instructor 2; N=65 for Instructor 3) were enrolled in the three CRJU 2200 sections assessed during the evaluation period. The percentages of students correctly answering the embedded examination questions by instructor and section are reported below:

- Instructor 1: Q1 Pass Rate: 79%; Q2 Pass Rate: 90%. Overall for Instructor 1, 84% pass rate (Overall: Partially met target goal)
- Instructor 2: Q1 Pass Rate: 83%; Q2 Pass Rate: 83%. Overall for Instructor 2, 83% Pass Rate (Overall: Met target goal).
- Instructor 3: Q1 Pass Rate: 79%; Q2 Pass Rate: 97%. Overall for Instructor 3, 85% (Overall: Partially met target goal).

Overall: Met target.

**Target for O2: Analyze Contemporary Multicultural Issues**

Each instructor included questions assessing students' knowledge of contemporary multicultural issues on an exam in each section taught. The target achievement goal was an 80% pass rate for each question. The questions by instructor are provided in the attached document entitled Assessment Measures by Instructor by Semester_2011_2012.

**Findings 2012-2013 - Target: Met**

A total of 190 students (N=119 for Instructor 1; N=6 for Instructor 2; N=65 for Instructor 3) were enrolled in the three CRJU 2200 sections assessed during the evaluation period. The percentages of students correctly answering the embedded examination questions by instructor and section are reported below:

- Instructor 1: Q1 Pass Rate: 91%; Q2 Pass Rate: 78%. Overall for Instructor 1, 84% pass rate (Overall: Partially met target goal).
- Instructor 2: Q1 Pass Rate: 100%; Q2 Pass Rate: 100%. Overall for Instructor 2, 100% Pass Rate (Overall: Met target goal).
- Instructor 3: Q1 Pass Rate: 95%; Q2 Pass Rate: 84%. Overall for Instructor 3, 90% (Overall: Met target goal).

Overall: Met target goal.

**Target for O3: Analyze Contemporary Global & International Issues**

Each instructor included two questions assessing students' knowledge of contemporary global and international issues on an exam in each section taught. The target achievement goal was an 80% pass rate for each question. The questions by instructor are provided in the attached document entitled Assessment Measures by Instructor by Semester_2010_2011.
**Findings 2012-2013 - Target: Partially Met**

A total of 190 students (N=119 for Instructor 1; N=6 for Instructor 2; N=65 for Instructor 3) were enrolled in the three CRJU 2200 sections assessed during the evaluation period. The percentages of students correctly answering the embedded examination questions by instructor and section are reported below:

- **Instructor 1**: Q1 Pass Rate: 90%; Q2 Pass Rate: 99%.
  - Overall for Instructor 1, 95% pass rate (Overall: Met target goal).

- **Instructor 2**: Q1 Pass Rate: 100%; Q2 Pass Rate: 67%.
  - Overall for Instructor 2, 83% Pass Rate (Overall: Partially met target goal).

- **Instructor 3**: Q1 Pass Rate: 84%; Q2 Pass Rate: 42%.
  - Overall for Instructor 3, 63% (Overall: Partially met target goal).
  - Overall: Partially met target.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Review of course content and assessment measures**
See plan for contemporary criminal justice issues.

- **Established in Cycle**: 2008-2009
- **Implementation Status**: Finished
- **Priority**: Low
- **Implementation Description**: Fall 2010
- **Projected Completion Date**: 08/2010
- **Responsible Person/Group**: Undergraduate Committee and CrJu 2200 teaching faculty.
- **Additional Resources**: None
- **Budget Amount Requested**: $0.00 (no request)

**Review of course content and assessment measures**
See plan for contemporary criminal justice issues.

- **Established in Cycle**: 2008-2009
- **Implementation Status**: In-Progress
- **Priority**: Low
- **Implementation Description**: Fall 2010
- **Projected Completion Date**: 08/2009
- **Responsible Person/Group**: Undergraduate Committee and CrJu 2200 teaching faculty.
- **Additional Resources**: None
- **Budget Amount Requested**: $0.00 (no request)

**Review of course content and assessment measures**
Consistent with last year’s action plan, the Undergraduate Committee (UC) will meet with teaching faculty at the beginning of Fall semester 2009 to discuss course content and evaluate the effectiveness of current assessment measures used in CrJu 2200. The UC will assist faculty to implement such changes as they deem necessary.

- **Established in Cycle**: 2008-2009
- **Implementation Status**: In-Progress
- **Priority**: Low
- **Implementation Description**: Fall 2010
- **Projected Completion Date**: 08/2009
- **Responsible Person/Group**: Criminal Justice Undergraduate Committee and CrJu 2200 teaching faculty.
- **Additional Resources**: None
- **Budget Amount Requested**: $0.00 (no request)

**Review new core and course requirements**
Review course learning outcomes and measure to ensure that new core outcome is appropriately reflected and assessed and to streamline reporting in the coming year.

- **Established in Cycle**: 2009-2010
- **Implementation Status**: Finished
- **Priority**: High
- **Projected Completion Date**: 11/2010
- **Responsible Person/Group**: instructors and undergraduate committee

**Review new core and course requirements**
Review course learning outcomes and measure to ensure that new core outcome is appropriately reflected and assessed and to streamline reporting in the coming year.

- **Established in Cycle**: 2009-2010
- **Implementation Status**: Finished
- **Priority**: High
- **Projected Completion Date**: 11/2010
- **Responsible Person/Group**: instructors and undergraduate committee

**Training on assessment for PhD Instructors**
With implementation of Ph.D. Program the department has added a number of Teaching Assistants and as a part of this implementation, the department has developed a teaching seminar. As part of this seminar, students will be subjected to assessment issues and questions as a part of this conference. With this implementation, a section of the seminar will be consistently oriented to ensure that curriculum of the department and assessment issues are considered in course development. As well, required data collection elements will be discussed and collected as a part of this course.

- **Established in Cycle**: 2010-2011
- **Implementation Status**: In-Progress
- **Priority**: High

**Relationships (Measure | Outcome/Objective):**
- **Measure**: Embedded examination questions
- **Outcome/Objective**: Analyze Contemporary Global & International Issues
Assessment of course materials
Instructors will be queried regarding their teaching of materials related to questions to determine links between material coverage, how material is covered, and reinforcement strategies related to outcomes not or partially met.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Embedded examination questions | Outcome/Objective: Analyze Contemporary Global & International Issues
Projected Completion Date: 12/2012
Responsible Person/Group: Undergraduate Committee

Evaluation of assessment items considering goal.
Continued evaluation of assessment items utilized to ensure applicability of goal will occur.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Embedded examination questions | Outcome/Objective: Analyze Contemporary Global & International Issues
Responsible Person/Group: Undergraduate Committee

Begin Assessing Ph.D. student instructors for CRJU 2200
Our Ph.D. program is in its fourth year. We occasionally have Ph.D. students teach CRJU 2200. Assessment is covered in their required teaching seminar course. As such, we will not begin assessing CRJU 2200 when taught by Ph.D. students. Doing so will allow us to compare not only within and across objectives, but also across types/levels of instructors.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Embedded examination questions | Outcome/Objective: Analyze Contemporary Global & International Issues
Implementation Description: Assess CRJU 2200 when taught by Ph.D. students to compare across type/level of instructor
Responsible Person/Group: Undergraduate Coordinator/Committee
Additional Resources: none

Annual Report Section Responses
Most important accomplishments for year-- briefly describe the major things you accomplished over the past year.
Change requirements for Area F, additional courses added to area J. Will be piloting grammarly.com in Fall 2013-Spring 2014, which should give us valuable feedback on student writing. We performed evaluations of all part-time instructors, which should enable us to ensure that course content is matching course objectives and learning outcomes are being met in those courses. We have spoken with faculty who teach CRJU 2200 to ensure that course content is matching course objectives and that assessments are designed to assess (at least in part) higher-order thinking.

Challenges for Next Year-- Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.
We are having turnover in the undergraduate program coordinator position this Fall. We also are implementing a new assessment of our undergraduates that should prove valuable for next year's reporting cycle.

Georgia State University
Assessment Data by Section
2012-2013 Criminal Justice BS
As of: 12/13/2016 05:39 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Department of Criminal Justice emphasizes the development of understanding about issues of crime and justice, particularly within urban environments using multicultural, interdisciplinary perspectives that inform science, policy, and practice. The educational mission of the undergraduate program is to encourage critical analysis of information that is theoretically driven and policy relevant within the fields of criminal justice and criminology. We aim to produce students who are critical and ethical thinkers, knowledgeable about the issues of crime and justice, and prepared for criminal justice positions in public and private agencies through education, training and research experiences.

Goals
G 2: Be critical thinkers
Students should be critical thinkers, specifically concerning crime and justice issues.

**G 4: Be effective writers**
Students will be effective writers, with a specific focus on communication about issues of crime and justice, necessary to excel in public and private sector criminal justice positions.

**G 1: Students should be knowledgeable about the criminal justice system**
Students should be knowledgeable about the functions and structures of the criminal justice system and issues related to crime and justice responses.

**G 3: Be appliers of ethical frameworks**
Students will be effective appliers of ethical frameworks when considering issues in criminal justice decision-making.

**G 5: Be effective oral communicators**
Students will be effective oral communicators, with a specific focus on their ability to orally communicate about issues in crime and justice, in order to excel in in professional positions.

---

### Student Learning Outcomes/Objectives

**SLO 2: Demonstrate knowledge and ability to synthesize information (G: 1) (M: 1)**
Students will demonstrate their retention of knowledge about the criminal justice system and salient topical issues in the field in written form. Students will effectively communicate facts about an issue and apply theoretical frameworks to demonstrate the depth of both their knowledge and their ability to critically synthesize relevant information about that specific topic.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 3: Application and analysis (G: 1, 2) (M: 1, 2)**
Students will develop and/or enhance skills in applying theoretical frameworks to contemporary issues in criminal justice. Students will be able to not only synthesize and interpret extant information, but also identify patterns within extant information, be able to compare and contrast different sides of a problem, and/or generate new predictions through their presentation in a written form.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 5: Written communication skills (G: 4) (M: 1)**
Students will be able to effectively communicate their knowledge and analytical skills in written form (paper). Students will demonstrate the ability to effectively identify issues, develop and organize subtopics, and generate streamlined presentations of information. In addition, students will utilize appropriate grammar and syntax, as well as the ability to adhere to APA style guidelines.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 6: Oral communication skills (G: 5) (M: 2)**
Students will demonstrate the ability to communicate effectively through oral presentations about criminal justice issues and processes using the spoken word. Students should be able to orally develop and present material that is organized, flows smoothly, and is engaging in a manner that is smooth and uses good grammar.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 7: Identification and evaluation of ethical frameworks (G: 3) (M: 3)**
Students should be able to identify and evaluate ethical issues that arise within the criminal justice system.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

---

### Measures, Targets, and Findings

**M 1: Capstone Seminar: Analysis of Criminological/Criminal Justice (CJ) Issue Essay (O: 2, 3, 5)**
CRJU 4930: Seminar in Criminal Justice is a key assessment course for the department. It is a capstone and the second of a two bookend courses designated as CTW. The CTW assignment, referenced as the Analysis of Criminological/Criminal Justice (CJ) Issue Essay, is designed to test student's ability to critically evaluate an issue in criminology or criminal justice. The assignment, included as an attached document, requires students to identify a single issue from the internship experience, identify a relevant theory (criminological, sociological, psychological, organizational, or legal) that can be utilized to enhance understanding of the issue, and prepare a position paper that addresses policy implications and recommendations. The assessment rubric is attached, and includes the different sections for the separate learning outcomes.

**Target for O2: Demonstrate knowledge and ability to synthesize information**
Our goal is that 80% of student papers will be rated as a 4 or 3 in their ability to comprehend and synthesize information by the
end of the senior seminar. In addition, we aim for 50% of students to be rated as a 4 on this rubric dimension (Comprehend & Synthesize). Finally, we expect 50% of students to achieve increased scores, as possible, between first and final draft submissions (where possible). The provided assessment rubric identifies dimensions represented by scores.

**Findings 2012-2013 - Target: Partially Met**

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data” contains data for these 89 students. At the end of the year, 81% (n=72) of the students scored a 3 or 4 on a 1-4 scale on the Comprehend and Synthesis of Knowledge rubric dimension. Forty-six percent (n=41) of students received the highest score of 4 on this dimension. These scores correspond to the final draft of the paper and consistently show significant improvement over the first draft numbers in that 69% (n=61) exhibited an increase in the Comprehend and Synthesis of Knowledge rubric or remained at the highest score (4 of 4) between the first and final submission. Only 4% (n=4) exhibited a decrease and 28% (n=25) showed no improvement in the rubric score where improvement was possible (see attached rubric for skill levels associated with each rubric point). We almost met this goal, with the only dimension we missed on was that 46% of students as opposed to 50% were rated as a 4 on the rubric dimension.

**Target for O3: Application and analysis**

Our goal is that 80% of student papers will be rated as a 4, 3, or 2 in their ability to apply knowledge and tools and analyze criminal justice subject matter at the end of the senior seminar. In addition, we aim for 50% of students to be rated as a 4 or 3 in this rubric dimension and at least 25% should rate as a 4. Finally, we desire that 50% of students will achieve increased scores (where possible) on the application and analysis dimension of the rubric between first and final draft submissions.

**Findings 2012-2013 - Target: Met**

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data” contains data for these 89 students. Overall, 95% (n=85) of the students enrolled in CRJU 4930 during the Fall 2012 or Spring 2013 semesters earned a score of 2, 3 or 4 on a 1-4 scale for the Application and Analysis rubric dimension. Eighty-two percent (n=73) of students received a score of 3 or 4, and one-third (n=29) of these students earned a score of 4 on this dimension. These scores correspond to the final draft of the paper and show improvement over the first draft numbers in that 58% (n=52) either maintained the best possible score of 4 or showed improvement in their scores across the two submissions of the paper. Only 3% (n=3) exhibited a decrease and 36% (n=32) showed no improvement in the Application & Analysis rubric dimension score where improvement was possible (see attached rubric for skill levels associated with each rubric point).

**Target for O5: Written communication skills**

Our goal is that 80% of student papers will be rated as a 4 or 3 in their ability to use excellent written communication skills to convey ideas about criminal justice subject matter by the end of the senior seminar. In addition, we aim for 50% of students to be rated as a 4 in this rubric dimension. Finally, we desire that 50% of students will achieve increased scores (where possible) on the written communication dimension of the rubric between first and final draft submissions.

**Findings 2012-2013 - Target: Partially Met**

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data” contains data for these 89 students. At the end of the year, 91% (n=81) of the students enrolled in CRJU 4930 during the Fall 2012 or Spring 2013 semesters earned a score of 3 or 4 on the Writing Quality & Style dimension of the rubric. Forty percent of the students earned a score of 4 on this dimension. These scores correspond to the final draft of the paper and consistently show significant improvement over the first draft numbers in that 48% (n=43) either maintained the best possible score of 4 or showed improvement in their scores across the two submissions of the paper. Only 9% (n=8) exhibited a decrease and 40% (n=36) showed no improvement in the Writing Quality & Style rubric dimension score where improvement was possible (see attached rubric for skill levels associated with each rubric point).

**M 2: Capstone Seminar: Oral Presentation Assignment (O: 3, 6)**

CRJU 4930: Seminar in Criminal Justice is a key assessment course for the department. In this course, students are required to provide an oral presentation, utilizing PowerPoint based on their Analysis of Criminological/Criminal Justice (CJ) Issue Essay, which evaluates an issue in criminology or criminal justice. The assignment, included in the syllabus, requires students to identify a single issue from the internship experience, identify a relevant theory (criminological, sociological, psychological, organizational, or legal) that can be utilized to enhance understanding of the issue, and prepare a presentation based on their position paper that addresses policy implications and recommendations.

**Target for O3: Application and analysis**

80% of student presentations will be rated as a 4 or 5 on a five point assessment scale utilized on a rubric (with 1 representing a poorly identified topic, lack of linkage between course/program content and internship experiences and 5 representing an achievement of excellence, with a timely and important topic relevant to internship agency functioning identified and analyzed using appropriate course and program materials and information).

**Findings 2012-2013 - Target: Not Reported This Cycle**

We did not assess outcomes using this measure this year.

**Target for O6: Oral communication skills**

80% of student presentations will be score at least an 80% on oral communication skills rubric (with low values representing a poorly developed and organized presentation, without a logical flow, that is not engaging and uses poor grammar and a 100% representing excellence – well organized, logical flow, engaging with excellent grammatical skills, clear).

**Findings 2012-2013 - Target: Met**

Two sections of the capstone seminar were used to assess oral communication skills (section A N=14, section B N=22). For section A, 100% of students scored an 80% or higher on the rubric to assess oral communication skills. In section B, 95% of
students scored an 80% or higher on the rubric to assess oral communication skills.

**M 3: Ethical Issues in Criminal Justice Assignment (O: 7)**

CRJU 4060: Ethics in Criminal Justice was moved into the position of an early bookend CTW course for the department. In this course, students are presented with a variety of ethical frameworks and strategies and in a series of assignments are expected to select and apply these frameworks. This writing assignment occurs in two parts, and students are expected to identify an ethical issue that occurs in the criminal justice system, then to locate extant literature and evaluate research findings concerning the issue. The same assignment was used in all 6 of the sections taught by the department in Fall 2012 and Spring 2013. Assignment 1 occurs at the beginning of the term. This assignment requires students to identify and select an ethical issue for study. Second, they must identify three scholarly resources that examine the issue. Student must then create and justify criteria that they will apply to assess the quality of their sources. At the end of the term, after exposure to ethical frameworks and assessments critically steeped in different ethical approaches, students revisit this assignment, thinking critically about the criteria they applied and their success and application of these criteria to the issue. This set of assignments measures not only students’ ability to assess and apply ethical frameworks, but also their written communication skills.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O7: Identification and evaluation of ethical frameworks**

Our goal is that 50% of student papers will yield increased overall scores, as possible, in for the total rubric score across the initial assignment (Assignment 1) and the revision of this assignment after content coverage in the course (Assignment 4).

**Findings 2012-2013 - Target: Met**

Of the 154 students who were enrolled in CRJU 3060 in the Fall 2012 or Spring 2013 semesters, 58% had an increase in their overall total rubric score across the initial and revised assignment for the Learning to Think Critically about Ethical Issues assignment (see attached rubric data for CRJU 3060).

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Review all learning outcomes**

Review syllabi and curriculums to ensure that all basic learning outcomes are relevant, measurable and achievable.

- **Established in Cycle:** 2005-2006
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Fall 2006
- **Responsible Person/Group:** Undergraduate Committee

**Improve data collection efforts**

The Department will make a concerted effort to collect and analyze appropriate data for academic assessment purposes.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Capstone Seminar: Analysis of Criminological/Criminal Justice (CJ) Issue Essay
  - **Outcome/Objective:** Written communication skills
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** Undergraduate Committee and CTW teaching faculty

**Improve data collection efforts**

The Department will make a concerted to improve data collection efforts.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** The department has reviewed all syllabi in the undergraduate curriculum with a focus on determining alignment of course learning outcomes with departmental learning outcomes. The next step will be to review the assessment approaches within courses to determine usefulness for departmental assessment across sections.
- **Projected Completion Date:** 07/2014
- **Responsible Person/Group:** Undergraduate Committee and CTW teaching faculty

**Objective assessment measures**

The CTW Ambassador will meet with faculty to discuss the need to use objective assessment measures that are independent of grades.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 08/2009
- **Responsible Person/Group:** CTW Ambassador

**Continued data collection**

As a discipline, we believe that cross sectional data may yield findings that are not accurate, particularly given that contextual factors may enter into any particular course during any particular semester. Because we value examining a greater breadth of data, we will continue to monitor results over the next two years to determine whether our goals are being consistently met before we move on to address another question.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
Priority: High
Implementation Description: Continued data collection
Projected Completion Date: 06/2012
Responsible Person/Group: UG committee and program faculty.

Expanded gathering of data
We will work to expand collection of data across sections of the capstone seminar next semester to collect a wider range of data relevant to assessment of oral presentation requirements and outcomes in the coming two years.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Capstone Seminar: Oral Presentation Assignment | Outcome/Objective: Application and analysis
  Measure: Continued data collection

Implementation Description: This year the committee reviewed departmental syllabi to determine the degree to which oral presentations are required in the curriculum. The coming year the committee will assess the viability of inclusion of this as a learning outcome seen as important by the faculty. If the outcome is continued, then the committee will work to ensure that curriculum structure leads in a linear manner to ensure that students develop requisite skills for success.
Responsible Person/Group: Undergraduate coordinator/committee.

Continued Monitoring
The department will continue monitoring outcomes annually to ensure that new cohorts continue to demonstrate success in achieving this learning outcome.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Capstone Seminar: Analysis of Criminological/Criminal Justice (CJ) Issue Essay | Outcome/Objective: Application and analysis
  Measure: Ethical Issues in Criminal Justice Assignment | Outcome/Objective: Application and analysis
  | Demonstrate knowledge and ability to synthesize information | Written communication skills
  | Identification and evaluation of ethical frameworks | Written communication skills

Responsible Person/Group: Brenda Blackwell and undergraduate committee

Continued Monitoring
The department will continue monitoring to ensure that future cohorts continue to demonstrate success.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Responsible Person/Group: Brenda Blackwell and undergraduate committee

Data Collection
The department will cycle in data collection for determining achievement of this target in the upcoming year.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium
Relationships (Measure | Outcome/Objective):
  Measure: Capstone Seminar: Oral Presentation Assignment | Outcome/Objective: Application and analysis

Responsible Person/Group: Brenda Blackwell and undergraduate committee

Improve data collection efforts
The Department is reviewing the evaluation rubric to further enhance evaluation and data collection.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 07/2012
Responsible Person/Group: CTW Ambassador

Pilot Grammarly.com
We will be piloting Grammarly.com in CRJU 3060 this fall in the 2013-14 school year for use with at least one of the assignments in CRJU 3060. The instructor will have students submit their assignments first to Grammarly.com with the requirement of reaching a particular threshold before being able to submit the assignment for a grade. The same instructor will use the same assignment in another section of CRJU 3060 without the aid of Grammarly.com and compare rubric scores on the Mechanics dimension to assess writing improvement with the help of Grammarly.com. This same instructor is one of the instructors for CRJU 4930 Capstone Seminar. If the instructor experiences positive results from Grammarly.com, then the department will consider adoption for CRJU 4930 as well.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Relationships (Measure | Outcome/Objective):
  Measure: Capstone Seminar: Analysis of Criminological/Criminal Justice (CJ) Issue Essay | Outcome/Objective: Application and analysis
  | Written communication skills

Implementation Description: Pilot Grammarly.com in CRJU 3060 during 2013-2014 school year for possible use in CRJU 4930 in future years.
Responsible Person/Group: Instructor in CRJU 3060
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
See CTW report

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
See CTW report

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
See CTW report

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
See CTW report

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
See CTW report

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
See CTW report

Annual Report Section Responses

Most important accomplishments for year-- briefly describe the major things you accomplished over the past year.
Change requirements for Area F, additional courses added to area J. Will be piloting grammarly.com in Fall 2013-Spring 2014, which should give us valuable feedback on student writing. We performed evaluations of all part-time instructors, which should enable us to ensure that course content is matching course objectives and learning outcomes are being met in those courses.

Challenges for Next Year-- Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.
We are having turnover in the undergraduate program coordinator position this Fall. We also are implementing a new assessment of our undergraduates that should prove valuable for next year's reporting cycle.
G 2: Preparation for leadership positions
Students will be prepared for leadership positions in public and private sector agencies that address crime and justice issues.

Student Learning Outcomes/Objectives

SLO 1: Critically analyze crime & justice issues/data (G: 0) (M: 1, 2)
Students will be able to critically analyze crime and justice issues and/or information, utilizing theoretical, methodological, and statistical skill bases.

SLO 2: Apply research and statistical skills (G: 0) (M: 1, 2)
Students will be able to apply acquired research and statistical skill bases to evaluate the quality of scholarly products and their contribution to the field of criminology and criminal justice.

SLO 3: Understand theory (G: 1) (M: 1, 2)
Students will demonstrate an understanding of the theoretical knowledge base in criminology and criminal justice.

SLO 5: Understand how systems & processes interact (G: 1) (M: 1, 2)
Students will be able to provide an integrated view of crime and criminal justice systems and processes and how the components interact and intersect to provide coordinated justice administration.

SLO 6: Apply theory and terminology (G: 2) (M: 1, 2)
Students will be able to apply learned terminology and theory to real-world situations that both relate to and expand outside the fields of criminology and criminal justice.

SLO 7: Communicate effectively (G: 2) (M: 1, 2)
Students will be able to effectively communicate, in oral and written form, their understanding and analyses of crime and justice issues as they apply their knowledge to real-world problems and questions.

Measures, Targets, and Findings

M 1: Assessment Survey of Non-thesis students (O: 1, 2, 3, 5, 6, 7)
This is a 16 item faculty-rated assessment instrument used to evaluate non-thesis students' performance in the capstone course's final project. The items are rated on a 4 point scale, ranging from poor to excellent. The instrument is completed by members of the graduate committee shortly after the end of the course.

Source of Evidence: Capstone course assignments measuring mastery

Target for O1: Critically analyze crime & justice issues/data
The desired performance is to have 100% of students with an average score of 2 or better (on a 4 point scale) across the three items that measure this objective on the Assessment Survey of Non-thesis Students. 60% of students will score a 3 or better across the three items. 20% of students will score a 4 (out of 4) across the three items.

Findings 2012-2013 - Target: Met
This year, the capstone course was offered by the department of Public Management and Policy. Students worked in teams. Two teams contained CJ students. Those two projects were scored by the graduate committee using the attached rubric. One team averaged a 3.7 on the items that comprised this measure. The other team averaged a 3 on the items that comprised this measure.

Target for O2: Apply research and statistical skills
The desired performance is to have 100% of students with an average score of 2 or better (on a 4 point scale) across the two items that measure this objective on the Assessment Survey of Non-thesis Students. 60% of students will score a 3 or better across the two items. 20% of students will score a 4 (out of 4) across the two items.

Findings 2012-2013 - Target: Partially Met
This year, the capstone course was offered by the department of Public Management and Policy. Students worked in teams. Two teams contained CJ students. Those two projects were scored by the graduate committee using the attached rubric. Both teams averaged 3.0 on the items that measured this outcome.

Target for O3: Understand theory
The desired performance is to have 100% of students with a score of 2 or better (on a 4 point scale) on the two items that measure this objective on the Assessment Survey of Non-thesis Students. 60% of students will score a 3 or better on the items. 20% of students will score a 4 (out of 4) on the items.

Findings 2012-2013 - Target: Not Reported This Cycle
This year, the capstone course was offered by the department of Public Management and Policy. Since the course was not designed by a CJ faculty member, this outcome was not covered and these measures are not applicable this year.
Target for O5: Understand how systems & processes interact

The desired performance is to have 100% of students with a score of 2 or better (on a 4 point scale) across the two items that measure this objective on the Assessment Survey of Non-thesis Students. 60% of students will score a 3 or better across the two items. 20% of students will score a 4 (out of 4) across the two items.

Findings 2012-2013 - Target: Partially Met

This year, the capstone course was offered by the department of Public Management and Policy. Students worked in teams. Two teams contained CJ students. Those two projects were scored by the graduate committee using the attached rubric. Both teams averaged 3.0 on the items that measure this outcome.

Target for O6: Apply theory and terminology

The desired performance is to have 100% of students with a score of 2 or better (on a 4 point scale) across the three items that measure this objective on the Assessment Survey of Non-thesis Students. 60% of students will score a 3 or better across the three items. 20% of students will score a 4 (out of 4) across the three items.

Findings 2012-2013 - Target: Not Reported This Cycle

This year, the capstone course was offered by the department of Public Management and Policy. Since the course was not taught by a CJ faculty member and did not focus on these issues, the measures for this outcome are not applicable.

Target for O7: Communicate effectively

The desired performance is to have 100% of students with a score of 2 or better (on a 4 point scale) across the four items that measure this objective on the Assessment Survey of Non-thesis Students. 60% of students will score a 3 or better across the four items. 20% of students will score a 4 (out of 4) across the four items.

Findings 2012-2013 - Target: Partially Met

This year, the capstone course was offered by the department of Public Management and Policy. Students worked in teams. Two teams contained CJ students. Those two projects were scored by the graduate committee using the attached rubric. Both teams averaged 3.5 on the items that measure this outcome.

M2: Knowledge assessment survey of thesis students (O: 1, 2, 3, 5, 6, 7)

The Thesis knowledge assessment survey is a 21-item faculty-rated questionnaire that measures the degree to which students who defended their thesis successfully have met the student learning outcomes. The questionnaire is completed by the student's thesis supervisor. Items are based on a 4 point scale that ranges from poor to excellent. Thesis directors use the survey instrument to rate the thesis product on 21 different dimensions.

Source of Evidence: Senior thesis or culminating major project

Target for O1: Critically analyze crime & justice issues/data

The desired performance is to have at least 100% of students with an average rating score of 2 or higher, 60% of students with an average rating of 3 or higher and 20% of students with an average score of 4 (on a 4 point scale) across the items measuring this outcome.

Findings 2012-2013 - Target: Met

Of the 5 students who completed theses this year, 100% averaged a 2 or better on the items that measure this outcome. 4 of the students (80%) averaged a 3 or better across the items that measure this outcome. 2 students (40%) averaged a 4 on the items that measure this outcome.

Target for O2: Apply research and statistical skills

The desired performance is to have at least 100% of students with an average rating score of 2 or higher, 60% of students with an average rating of 3 or higher and 20% of students with an average score of 4 (on a 4 point scale) across the items measuring this outcome.

Findings 2012-2013 - Target: Met

Of the 5 students who completed a thesis this year, 100% averaged a 2 or better on the items that measure this outcome. 4 of the students (80%) averaged a 3 or better on the items that measure this outcome and 3 (60%) averaged a 4 on the items that measure this outcome.

Target for O3: Understand theory

The desired performance is to have at least 100% of students with an average rating score of 2 or higher, 60% of students with an average rating of 3 or higher and 20% of students with an average score of 4 (on a 4 point scale) across the items measuring this outcome.

Findings 2012-2013 - Target: Met

Of the 5 students who completed theses this semester, all 5 (100%) averaged a 2 or better on the items measure this outcome. 4 of the 5 (80%) averaged a 4 on the items that measure this objective.

Target for O5: Understand how systems & processes interact

The desired performance is to have at least 100% of students with an average rating score of 2 or higher, 60% of students with an average rating of 3 or higher and 20% of students with an average score of 4 (on a 4 point scale) across the items measuring this outcome.

Findings 2012-2013 - Target: Met
Of the 5 students who completed a thesis this semester, 3 out of the 3 who received scores on this item (100%) received a score of 4. Two students were scored as N/A for this item.

**Target for O6: Apply theory and terminology**

The desired performance is to have at least 100% of students with an average rating score of 2 or higher, 60% of students with an average rating of 3 or higher and 20% of students with an average score of 4 (on a 4 point scale) across the items measuring this outcome.

**Findings 2012-2013 - Target: Met**

Of the 5 students who completed a thesis this year, 5 (100%) averaged a 2 or higher on the items that measure this outcome on the thesis assessment rubric, as scored by faculty. Four of the students (80%) averaged a 4 on the items that measure this outcome.

**Target for O7: Communicate effectively**

The desired performance is to have at least 100% of students with an average rating score of 2 or higher, 60% of students with an average rating of 3 or higher and 20% of students with an average score of 4 (on a 4 point scale) across the items measuring this outcome.

**Findings 2012-2013 - Target: Met**

Of the 5 students who completed a thesis this year, all 5 (100%) scored a 2 or higher on the item that measures this outcome. 4 of the 5 (80%) scored a 4 on this item.

</tr>
</thead>
</table>

**Develop Embedded Measures in Core Courses**

The current assessment of non-thesis students in the Masters program is based solely on indicators derived from the capstone course. Later this year, we will begin to work with faculty who teach core courses to develop measures that can be embedded in at least three of these courses and ways in which these measures can be retrieved, stored and analyzed by the graduate coordinator. Data on thesis students will be collected as well.

- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Planned  
- **Priority:** Medium  
- **Implementation Description:** end of Fall semester 2010  
- **Projected Completion Date:** 11/2010  
- **Responsible Person/Group:** Graduate committee and faculty who teach statistics, methods and theory

**Develop Rubric for assessing non-thesis students**

While our students continue to meet or exceed our target levels for learning outcomes, assessment of outcomes based on the revised capstone course suggested the need for a more reliable assessment tool than what is currently being used. The rubric will focus on the same learning outcomes as have already been established, but will provide more detail for assigning numerical scores. Once the rubric has been developed multiple members of the graduate committee can assess final papers in the capstone course in order to provide increased reliability.

- **Established in Cycle:** 2008-2009  
- **Implementation Status:** Finished  
- **Priority:** High  
- **Implementation Description:** end of Spring semester 2010  
- **Projected Completion Date:** 04/2010  
- **Responsible Person/Group:** Graduate committee

**Re-design the instrument used for assessing thesis students**

Faculty have noted that the current instrument used to evaluate the thesis students does not seem to work well, leading to several items that cannot be rated (resulting in missing data for some items), and consequently low reliabilities for outcome measures. Further, the low numbers of students that we have completing theses and the low number of items that are being answered by faculty (missing data) make it difficult to reach our very high performance targets. As suggested by the GAC we have set up a tiered target and our targets are being partially met, but some of the higher targets are not being met. This may be the result of small sample sizes (low reliability and missing data). We plan to revise the thesis instrument this year, with those limitations in mind.

- **Established in Cycle:** 2009-2010  
- **Implementation Status:** In-Progress  
- **Priority:** Medium  
- **Relationships (Measure | Outcome/Objective):**  
  - Measure: Knowledge assessment survey of thesis students  
  - Outcome/Objective: Apply research and statistical skills  
  - Apply theory and terminology  
  - Critically analyze crime & justice issues/data  
  - Understand how systems & processes interact  
  - Understand theory  
- **Implementation Description:** We have revised the thesis targets. This year, we will revise and pilot the new instrument.  
- **Projected Completion Date:** 05/2012  
- **Responsible Person/Group:** Graduate committee

**Students are now writing a literature review in their first year in the program**

This is the first time in several years that we have not met our achievement target for this outcome. The analysis shows that the students were weakest on the item "The student is comfortable with his or her ability to write about crime and justice issues. Last year our required course "Crime and the Criminal Justice System" was re-vamped to require students to work extensively on writing a literature review on a criminal justice topic and I believe that this will strengthen their writing skills in this area. The two students that did not perform well on this outcome took the course before the changes were made.

- **Established in Cycle:** 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: Changes were made to the course and implemented in Fall 2010 for last year's cohort.
Projected Completion Date: 09/2010
Responsible Person/Group: Faculty teaching CRJU 7010

Course changes
Both CRJU 7010 and CRJU 8980 will have increased focus on problem identification, problem solving, identifying stakeholders, and mapping and planning CJ processes. This will help students be better prepared for the capstone experience.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Assessment Survey of Non-thesis students
Outcome/Objective: Critically analyze crime & justice issues/data
Understand how systems & processes interact

Projected Completion Date: 12/2013
Responsible Person/Group: Instructors for CRJU 7010 and CRJU 8980
Additional Resources: None

Edit Capstone Rubric
Add a not applicable option, since not all of the items are assessed for each student's project. Add an assessment of problem solving, identifying stakeholders, and planning to assess leadership. These options are required now that the capstone is no longer being offered by CJ faculty members and is instead being taught by a member of the PMAP faculty.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Assessment Survey of Non-thesis students
Outcome/Objective: Apply research and statistical skills
Apply theory and terminology
Communicate effectively
Critically analyze crime & justice issues/data
Understand how systems & processes interact
Understand theory

Projected Completion Date: 03/2013
Responsible Person/Group: Graduate Committee
Additional Resources: None

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes to the assessment process were made this year. We anticipate changes may be made to accommodate changes to our capstone course delivery. It is now being offered through a cross-listed course with PMAP, which will necessitate changes to our non-thesis capstone assessment process.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Much of the work we have done to create successful thesis track students worked as intended. The objectives for thesis students were all met this year. We plan to focus on the capstone students next. This is particularly important, since our capstone course is now cross-listed with PMAP and is being taught by a faculty member in that unit.

Georgia State University
Assessment Data by Section
2012-2013 CTW Accounting
Ac dr 12/02/2016 05:31 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The School of Accountancy offers an undergraduate major in accountancy. We seek to foster students' abilities to analyze the information, identify the relevant information and data necessary to solve complex problems, and to communicate the results of their analyses in an effective and efficient manner. We believe that effective oral and written communication are core competencies for accounting majors. CTW Application for accounting majors is as follows. All accounting students take a core business course (BUSA3000) that serves as the first CTW course an introduction to critical thinking through writing. Students take BUSA3000 in their sophomore or junior year. The second CTW course for accounting majors is ASSURANCE SERVICES-CTW (AC4610). Students enroll in the Assurance class during their senior year, typically during the last semester of their undergraduate studies.

Goals
G1: Auditing issues
The School of Accountancy would like graduates in accounting to demonstrate mastery in critical thinking through writing. The goal of
the CTW component of the course is to familiarize students with the types of higher order level thinking and analytical skills that will be expected of them in a professional career in accounting. The ability to demonstrate critical thinking skills in a time-pressure environment is an important attribute to achieve a successful career in accounting. Therefore, we would like students to be able to solve problems and communicate the results of their analysis under restricted time constraints. Analysis: Students will demonstrate an ability to analyze cases which detail actual audit failures. They will use auditing standards and knowledge of auditing procedures to identify effective audit planning, risk analysis and error detection. They will identify strong vs. weak audit approaches, develop alternative audit procedures, and make recommendations to improve governance and control conditions at audit clients. Communication: Students will demonstrate the ability to communicate their knowledge of auditing directly to their peers. They prepare oral presentations and written reports that demonstrate their analysis. They will provide theoretical support and corroborating data to support their conclusions. Research Skills: Students will learn to research the appropriate audit standards and regulatory requirements to support their analysis. Feedback Response: Students will receive feedback on their written assignments at least twice before the submission of the final product. They will learn how to address critical comments to improve their writing.

G 2: SOA Goal Definition
We seek to foster students’ abilities to analyze the information, identify the relevant information and data necessary to solve complex problems, and to communicate the results of their analyses in an effective and efficient manner. We believe that effective oral and written communication are core competencies for accounting majors. We define Critical Thinking through Writing in Accounting as the ability to identify and solve unstructured problems in unfamiliar accounting domains and effectively communicate the thinking, solution process and conclusions. Students demonstrating critical thinking skills must be able to Locate, obtain, organize, and analyze information Exercise judgment based on comprehension of a set of facts and available evidence Present, discuss and defend their views through written and spoken language Present conclusions and recommendations that are complete, plausible, and compelling, and demonstrate an understanding the accounting problem.

Student Learning Outcomes/Objectives

SLO 1: Internal Control and Fraud Risk Assignment (G: 1) (M: 1)
Auditing Alchemy Inc. is the long CTW assignment. It is worth approximately 16% of the semester grade. The objective of the assignment is have students adopt the role of an independent auditor who is responsible for reviewing the client’s production and revenue recognition process. Students must identify fraud risks and internal control weaknesses based on a simulated “walkthrough” under Section 404 of the Sarbanes Oxley Act of 2002. They identify and analyze fraud risks, identify and analyze internal control weaknesses and then prepare a memo documenting the critical issues at the client and recommendations to correct the problems that they detected. This task is similar to tasks that junior public accountants will perform at real audit clients. We use a simulated production system and video interviews between auditors and representatives of the simulated client. Students must review background materials and client prepared documents before they begin the simulation.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1. Student retention
2. Student promotion and progression

SLO 2: Audit Objectives (M: 2)
Objectives of the course are as follows: Differentiate among the various types of auditing and the procedures applied on financial statements audits and audits of Internal Controls over Financial Reporting Evaluate the components of audit risk and the appropriate audit approach to address the risks identified. Apply the opinion formulation process to specific attestation engagements and clearly communicate the results of procedures performed as part of the opinion formulation process. Understand and evaluate the auditors' responsibility on the audit engagement and determine whether that responsibility was adequately fulfilled. Evaluate, integrate, and apply different types of audit information and knowledge to form independent judgments. Present, discuss and defend their views through written and spoken language. Conclusions and critical points of view must be complete and demonstrate an understanding the audit problem.

Measures, Targets, and Findings

M 1: Quality of the Memos Prepared (O: 1)
We will evaluate the extent to which student are able to identify key control weaknesses, identify key fraud risks, develop practical solutions to the deficiencies identified and communicate the results of their findings in a logical manner in a well-organized memo.

Source of Evidence: Student course evaluations on learning gains made

Target for O1: Internal Control and Fraud Risk Assignment
At least 75% of the memos submitted should meet the criteria set forth in the measurement category.

Findings 2012-2013 - Target: Met
More than 90% of the student memos evaluated satisfactorily met the criteria established and achieved a level 4 or better in the associated rubric.

M 2: Comparision of Student Performance on CTW Quizzes (O: 2)
Students will complete two CTW quizzes during the course of the semester. The first quiz will be administered in the 5th or 6th week of the 14 week semester. The second Quiz will be administered in the 14th week of the course. (For courses taught during summer sessions the 1st and 2nd CTW quizzes will be administered on the date equivalent to the 5th/6th week and 14th week, respectively). The questions included in the quizzes will be equivalent in difficulty. We will compare performance on the two quizzes to measure improvement in critical thinking in accounting.

Source of Evidence: Faculty pre-test / post-test of knowledge mastery

Target for O2: Audit Objectives

We would like to see at least a 5% improvement in the logical and internal consistency in student's analysis across the two quizzes.

Findings 2012-2013 - Target: Met

Both the 1st and last CTW quiz had 2 questions. Each question had 2 parts: an objective evaluation and a written analysis to support the objective response selected. On the 1st CTW Quiz, only 32% of the students taking the quiz demonstrated internal and logical consistency. That is, only 32% of the students had an accurate objective response and an accompanying written analysis that was consistent with and supported the objective response selected. On the 2nd CTW Quiz, 45% of the students had logical and internal consistency in their response. Thus, we find that exposure to the CTW curriculum and feedback received from the CTW consultants contributed to an improvement (13%) in the logical consistency and internal consistency of responses that exceeded the target (5%).

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Add Action Plan

Your action plan should relate to the measure/outcome. Or, you can add a a general action plan for all of your measures/outcomes under "action plans" above in the "assessment" link.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Future plans

Improve communication with students emphasizing the importance of CT in an accounting career. Obtain baseline writing samples from each student to make an early assessment of which students should be referred to GSU's Writing Lab. to improve their written communication. Invite CTW faculty to attend seminars and workshops offered by the CTW Program. Supplement or replace one-on-one training of faculty with at least one group training session.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Measure students ability to incorporate feedback on IC and Fraud Risk Memos

We will evaluate how well students incorporated the feedback received from the CTW coaches. CTW coaches will prepare a summary list of key action items for each of the memos reviewed. CTW instructors will be asked to assess the extent to which a sample the memos being evaluated for grading purposes demonstrated that the CTW Coach's recommendation was implemented.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Quality of the Memos Prepared | Outcome/Objective: Internal Control and Fraud Risk Assignment

Responsible Person/Group: CTW Instructors

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Our most significant accomplishment was in persuading students to appreciate the benefits of the CTW application in accounting. At the beginning of the semester the majority of accounting students are focused on quantitative analysis and are quite apprehensive about completing written assignments to communicate the analysis that they perform. In an attempt to overcome the negative reaction to CTW, during the orientation to the course, we explained how critical thinking can add discipline to their analysis. We also shared comments from potential employers who indicated that they valued the written communication and analytical thinking skills. The result was a student body that was more appreciative of the value of the course.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

We observed that students demonstrate more logical consistency in their reasoning as a result of the CTW curriculum. For example, students are better able to identify the appropriate auditing standards and evidence rules to support the appropriate response on critical thinking questions. Our analysis of student performance on the first vs. last CTW quiz indicated that improvement in logical consistency and internal consistency of arguments improved by 13% overall.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the
implementation of CTW have been problematic? What assistance might you need to address those areas?
A major challenge in our program is that students never encounter assignments that emphasize the written communication skills.
While all accounting courses require analysis, the analysis required is almost exclusively quantitative. The earlier courses in the major focus more on excel spreadsheets and quantitative problem solving. As a result, when students enter the Auditing and Assurance course at the senior level, they are ill-prepared for a course that requires in-depth thinking of ill-defined problems. The students are resistant to dealing with issues that do not have clear-cut responses or for which there is no quantitative proof. Because the first CTW course is covered as part of the BBA curriculum (i.e., outside of the accounting curriculum), accounting majors are not well prepared for the senior level Auditing and Assurance course. Adding at least one writing and critical thinking analysis assignment in each of the lower level courses in the accounting major would help to prepare students for AC4610 CTW. A major challenge to implementing this suggestion would be resistance from faculty who would be reluctant to add an additional grading intensive assignment. Providing funding to the department to support hiring a TA who would be tasked with the responsibility of grading CTW type assignments in the lower level classes would help in effecting this enhancement to the curriculum.

Annual Report Section Responses

**Modifications in Measurement Methods**—If you modified any of the measures or methods you use in the measurement process, please note those here.
In the prior year assessment of learning in AC4610 CTW focused on how well students performed in the major writing assessment. For the 2012-2013 AY, we expanded our measurement to compare performance on the last CTW Quiz to performance on the 1st CTW, to measure improvement in CTW in the students enrolled in the course.

**Georgia State University**
**Assessment Data by Section**
**2012-2013 CTW Afr Am Studies**
(As of: 12/12/2016 05:59 PM ET)

**Mission / Purpose**
Through research, experiential learning and writing, AAS CTW courses will require students to engage in a "wide range of cognitive skills and intellectual dispositions needed to effectively identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do" (Basham, Nardone & Wallace, Critical Thinking: A Student's Introduction (McGraw-Hill, 2005, p 1.). Furthermore, in line with African American Studies mission of academic excellence and social responsibility through AAS CTW courses, students will engage in the "intellectually disciplined process of actively and skillfully conceptualizing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action" (http://www.criticalthinking.org/pages/defining-critical-thinking/766). While critical thinking will be valued throughout the course of the semester, specific assignments will most directly fulfill the CTW designation. CTW-designated assignments will be assessed using the attached rubrics which account for 20% of the assignment for each class.

**Goals**

**G 2: AAS CTW GOAL 2 (Final Research Report)**
Seminar and Practicum in African American Studies, AAS 4980 The objective of this course is to provide students with practical experience in research through carrying out research proposed in in their research proposal or through applying field research methods while providing service to community organization through community service learning. Students will learn the various aspects of applied research through application of skills learned in the research methods course. At each phase of the research students will engage in reflection, field entry, actual data collection, data analysis and writing and presentation of data results. The goal is that for the Final Research Paper students will exhibit, on average, CTW in the high "developing" range (as determined by the attached assignment rubrics). Further, students in AAS 4980 will demonstrate CTW strengths in the following domains: Analyzing information: data, ideas, or concepts (Interprets information (data, ideas, or concepts) accurately, appropriately and in-depth in new contexts). Drawing well-supported conclusions (Creates a detailed conclusion or complex solution that is well-supported.logically consistent, complete and often unique). Synthesizing ideas into a coherent whole (Integrates ideas or develops solutions that are exceptionally clear, coherent, and cohesive). Connecting research to community problem and civic responsibility for social change.

**G 1: AAS CTW GOAL 1 (Research Proposal)**
African American Research Methods, AAS 3980 The objectives of this course is to introduce students to quantitative and qualitative research methods with particular focus on African Americans, employing the African centered methodological approach. In this course students will learn the different aspects of social science research including: how to review literature, logico-empirical reasoning, hypothesis forming and testing, research design, various data collecting methods and research proposal development. On a weekly basis, students will engage in assignments in which they will apply various research concepts and skills. Specifically students will learn: · Various aspects of social science research · General research concepts and skills as outlined above and in the course schedule · The Afrocentric methodological approach to explore issues/problems as they relate to African Americans · How to apply research skills/ tools in resolving issues/problems in general and as they relate to African Americans in particular · How to think critically about how research expands and contributes to knowledge bases in general and in the field of African American studies specifically · How to develop and write a research proposal The major project at the completion of the course is a research proposal. Students will develop the proposal in stages and be allowed to make several revisions at each stage through out the course. By allowing students to make several revisions and submissions it is the goal that students will exhibit, on average, CTW in the high "developing" range (as determined by the attached assignment rubrics).

**Student Learning Outcomes/Objectives**

**SLO 2: CTW Objective 1 (M: 1)**
For African American Research Methods, AAS 3980 students will complete a research proposal. During the course of the semester
the proposal will be written in stages, e.g. references, statement of the problem and literature review, statement of purpose and significance of research and methods, with several revisions at each stage. The final product will be a well written and coherent research proposal, that may be used if the student chooses and the professor permits, to conduct the research in the following semester in African Seminar and Practicum, 4980. The Assignment accounts for 40% of the grade and CTW 20% of the assignment grade.

**SLO 3: CTW Objective 2 (M: 2)**
Seminar and Practicum in African American Studies, AAS 4980 will focus on applied research. Students will carry out the research proposed in their research proposal or they will provide service through service learning and apply research methods to produce a final research report. The primary outcomes of this course is experiential learning and/or applied research with a well-written research report that describes the research and for those to whom it applies reflects their experiences while working with an organization in a field setting. During the course of the semester, the students will submit a series of revisions in response to instructor comments toward the completion of their research reports. As with the assignments for AAS, 3980, this assignment will require students to "evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do" as it relates to the specific requirements of each assignment(Bassham, Irwin, Nardone & Wallace, Critical Thinking: A Student's Introduction(McGraw-Hill, 2005, p1). More specifically, these activities will center the students’ own truth claims in critical thinking.

While the assignments for AAS, 3980 encourage students to critically engage (1) the general biases they bring to the course and (2) pre-existing research that is relevant to their chosen area of interest, assignments in AAS, 4980 will require them to critically Reflect on THEIR OWN truth claims as they conduct THEIR research, and/or THEIR OWN ideas, perspectives about issues confronting communities, specifically for students who provide service and apply research methods in a organizational field setting. Further, students will apply research skills to investigate challenges confronting organizations as they attempt to tackle issues in their communities. Additionally, students will propose solutions to problems. The end product is a final research report that is coherent, thoughtful, critical and reflective. Resubmissions provide students with additional opportunities to more fully reflect on and engage their research and experiences. These assignments account for 60% of the overall grade and CTW 20% of the assignment grade.

**Measures, Targets, and Findings**

**M 1: Research Proposal (O: 2)**
This is the first time teaching the AAS 3980 course as a CTW course. Therefore an assessment was not done this year. The Assessment for next academic year will be based on the following which is expanded on in the attached CTW Rubrics. 1. Identifies, summarizes (and appropriately reformulates) the problem, question, or issue. 2. Identifies and considers the influence of the researcher. 3. Develops, presents, and communicates OWN perspective, hypothesis or position. 4. Presents, assesses, and analyzes appropriate supporting data/evidence. 5. Integrates issue using other(disciplinary) perspectives and positions.6. Identifies and assesses conclusions, implications, and consequences. 7. Communicates effectively, written, orally and technology assisted formats.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: CTW Objective 1**
Moving forward, we expect that 75% of students will have a minimum average score on each criterion of the rubric will be 4 (high developing), with a minimum overall average CTW rating of 4 (high developing) as well.

**Findings 2012-2013 - Target: Not Reported This Cycle**

**M 2: Final Research Report (O: 3)**
This is the first time teaching the AAS 3980 course as a CTW course. Therefore an assessment was not done this year. The Assessment for next academic year will be based on the following which is expanded on in the attached CTW Rubrics. FINAL RESEARCH REPORT-APPLIED RESEARCH 1. Identifies, summarizes (and appropriately reformulates) the problem, question, or issue. 2. Identifies and considers the influence of the researcher. 3. Develops, presents, and communicates OWN perspective, hypothesis or position, 4. Presents, assesses, and analyzes appropriate supporting data/evidence. 5. Integrates issue using Other (disciplinary) perspectives and positions. 6. Identifies and assesses conclusions, implications, and consequences, 7. Communicates effectively, written, orally and technology assisted OR FINAL RESEARCH REPORT-SERVICE LEARNING & APPLIED RESEARCH 1. Awareness of Purpose of Service Learning 2. Application of Theory to practice and practice to theory 3. Self-Reflection-consider assumptions, context and civic responsibility or social change 4. Evaluation and reflection of organization experience 5. Application of research methods and interpretation of data 6. Propose adequate and feasible solutions 7. Communicates effectively, written, orally and in technology assisted formats.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: CTW Objective 2**
Moving forward, we expect that the minimum average score on each criterion of the rubric will be 4 (high developing), with a minimum overall average CTW rating of 4 (high developing) as well.

**Findings 2012-2013 - Target: Not Reported This Cycle**
This is the first time teaching the AAS 3980 course as a CTW course. Therefore an assessment was not done this year.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**CTW Development**
To maintain the CTW progress evidenced during the past years, Instructor will devote time during summer to continue to explore CTW theory and application. During the semester Instructor will dedicate time in explain CTW to students in each of our CTW courses. The purpose this action is to provide students with specific examples of CTW in AAS using previously-submitted CTW assignments that best demonstrate CTW.
Implementation Status: Planned
Priority: High
Implementation Description: 1. Do more exploration on critical thinking and identify CTW assignments for students that will elucidate evidence of CTW in the selected assignments
Projected Completion Date: 08/2013
Responsible Person/Group: Patricia Dixon

Final Research Report
Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
N/A Not assessed this year. The Academic Year 2013-2014 will be first year this professor will teach the courses as CTW courses.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
N/A for reasons specified in previous questions

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
N/A-for reasons specified in previous questions.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
Since I had not been trained on CTW the course was not assessed this year. This is the first time that I am teaching the courses as CTW courses. Changes have been made according to my different approach to the Seminar and Practicum in African American Studies course 4980. I have included applied research and community service learning. The CTW rubic for the applied research is the same as the rubic for African American Research Methods, AAS 3980. The service learning component required different criteria to assess critical thinking for service learning. The Service Learning Rubric has been attached.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
N/A The course has not been assessed this year for reasons specified in previous questions.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
N/A The course was not assessed this year for reasons already specified in previous questions.

Georgia State University
Assessment Data by Section
2012-2013 CTW Anthro
As of: 12/13/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
In anthropology, critical thinking entails examining and contextualizing the multiple perspectives that inform complex social, cultural, and biological realities pertaining to the human condition in its past and present dimensions.

Goals
G 1: Goals for Anthropology majors CTW
Students will demonstrate an ability to analyze complex social, cultural, and biological realities.

Student Learning Outcomes/Objectives
SLO 1: Critical thinking in Anthropology (M: 1)
In Anth 3033, students were asked to submit 3 versions each of 4 papers—one for each course module. The third version of the fourth paper was selected for CTW score measuring. Papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to
In ANTH 4970, students were assigned 6 papers, 3 of which required multiple revisions. Papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to receive at least a 3, and for 75% to receive at least a 4. In both courses, all of the assignment reflected all of the following goals: a. Analysis: students will demonstrate an ability to analyze complex social, cultural, and biological realities. b. Draw Conclusions: students will demonstrate an ability to draw conclusions that engage current perspectives in the discipline. c. Contextualize: students will demonstrate an ability to contextualize relevant anthropological theories on the issues at hand. d. Critique: students will demonstrate an ability to critique relevant anthropological theories on the issues at hand.

### SLO 2: Critical thinking

In ANTH 3033, students were asked to submit 3 versions of papers—one on each course module. The third version of the fourth paper was selected for CTW score measuring. Papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to receive at least a 3, and for 75% to receive at least a 4. Of all the students received at least a 3, and 80% received a 4. In our two sections of ANTH 4970, students had 6 assignments, 3 of which required multiple revisions. Papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to receive at least a 3, and for 75% to receive at least a 4. For the Monday section, 76% of the students scored a 4 or 5, 12% scored a 3, 8% scored a 2. For the Wednesday section, 68.4% scored a 4 or a 5, 31.5% scored a 3. a. Analysis: students will demonstrate an ability to analyze complex social, cultural, and biological realities. b. Draw Conclusions: students will demonstrate an ability to draw conclusions that engage current perspectives in the discipline. c. Contextualize: students will demonstrate an ability to contextualize relevant anthropological theories on the issues at hand. d. Critique: students will demonstrate an ability to critique relevant anthropological theories on the issues at hand.

### SLO 3: Outcomes (M: 2, 3, 4)

Students will complete a research paper that includes relevant current perspectives.

Relevant Associations: n/a

### Measures, Targets, and Findings

#### M 1: Course projects (O: 1)

In ANTH 3033, students were asked to write papers where they reflected critically on course readings and discussions. The measure chosen for this assessment was paper #4, in which they reflected on a variety of topics drawing on discussions conducted during the whole semester. In Dr. Catey's ANTH 4970, the measure was a critical and self-reflexive paper about students' experiences as anthropology majors, for which students were required to critically draw on relevant literature in the discipline. In Dr. White’s ANTH 4970, the measure was a critical and self-reflexive paper about students' experiences as anthropology majors, for which students were required to draw on relevant literature in the discipline. In ANTH 4980 (Special Topics: Methods in Sociocultural Anthropology) students were assessed based on a semester-long assignment, which required them to conceive, design, develop, implement and present an original small-scale ethnography for 75% to receive a score of 1 to 5. In ANTH 4980 (Anthropology of Self and Emotion), students were asked to write papers where they synthesized and reflected critically on course readings and discussions the course. For papers #1 and #2, students submitted initial drafts, received peer and instructor feedback and an initial grade, and then submitted a revised version of the paper for an improved grade where appropriate. For paper #3, students received TA and peer feedback in class but did not submit the first draft to the instructor for a recorded grade; rather, they were expected to engage in the revision process more independently. The revised, graded version of paper #3 is used for this measure. For this essay assignment, students were given a broad prompt/question concerning themes in Unit 3 of the course, but they were encouraged not only to choose one of these but to narrow and refine the question and argument according to their other interests and to draw upon readings from throughout the semester where appropriate. In ANTH 4980 (Anthropology and Public Health), students were asked to write three categories of papers: (1) papers that critically engaged course readings and discussions; (2) peer reviews of these; and (3) a final paper in the form of an agency-ready grant proposal. The measure chosen for this assessment was the grant proposal. These were intended to reflect students' cumulative critical and reflexive engagement with course literature and discussion, and to improve students' technical writing skills. In ANTH 4980 (The Archaeology of Ancient Cities), students were asked to write four research papers over the course of the semester. The first paper asked them to select a lens through which to investigate ancient cities (either the built environment, economics, or politics). The second and third papers were case studies where the students selected an ancient city and investigated through their selected lens. They received feedback on each of their papers and incorporated that feedback into their fourth paper, which was a compilation of their three previous papers. The fourth paper serves as the measure for this course.

Source of Evidence: Senior thesis or culminating major project

#### Target for O1: Critical thinking in Anthropology

In ANTH 3033, papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to receive at least a 3, and for 75% to receive at least a 4. In ANTH 4970 (Dr. White’s Senior Seminar), papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to receive at least a 3, and for 75% to receive at least a 4. In ANTH 4970 (Dr. Catey’s Senior Seminar), papers were evaluated according to a rubric which measured outcomes on a scale from 1 to 5: 1=poor, 2=fair, 3=good, 4=excellent, and 5=outstanding. The target was for all students to receive at least a 3, and for 75% to receive at least a 4. In ANTH 4980 (Anthropology of Self and Emotion), papers were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding. Our target was for all students to receive at least a 3, and for 75% to receive at least a 4.

#### M 2: Measures (O: 3)

In all ANTH classes, assignments were evaluated on a rubric which measured the outcome on a scale from 1 to 5, whereby 1 was poor, 2 was fair, 3 was good, 4 was excellent, and 5 was outstanding (see rubric in the Files section.)

Source of Evidence: Written assignment(s), usually scored by a rubric
In ANTH 3033, 85% of students received at least a 3 on this assignment. Of these, 20% scored a 5; 55% received a 4, and 10% received a 3. 5% received a 2, and 10% received a 1 for not submitting the assignment. In ANTH 4970, approximately 75% of students who turned in the assignment scored a 4 or 5; 14% scored a 3; 7% had a 2; 0% scored a 1. In ANTH 4980, 8 papers were submitted. All assignments received at least a 3, while 75% (6 papers) received at least a 4. (One paper counted as a “3” was a borderline 3/4). 2 papers received a 5. In ANTH 4980 65% of the students (n=17) received at least a 3, and 46% received a 4 or 5. The remainder of the students received a 2 (n=6) or a 1 (n=3) on this final assignment.

Source of Evidence: Project, either individual or group

In ANTH 3033, requiring students to write a critical paragraph in response to the instructor's feedback turned out to be extremely productive. This requirement will continue to be implemented in the 2012-2013 cycle. The course has been fine-tuned over the last several years and no further changes are required at this time. ANTH 4980 Anthropology of Self and Emotion: Existing structure of the course seems to be effective for most students. Over the course of the semester, all students revised initial drafts based on instructor and peer feedback and received improved scores on their second drafts, suggesting that the writing workshops implemented were successful. While it is difficult, based on the small sample size, to determine whether student performance slightly below the target for paper #3 can be related to specific aspects of instruction, in the future students who score in the “3” range or below on the final draft of paper #1 will be required to meet with the professor outside of class to discuss specific challenges each faces in his/her writing, with a follow-up meeting to be scheduled if improvement is not seen on paper #2. ANTH 4980 Methods in Sociocultural Anthropology In the future, the class will focus on data collection and analysis even further and emphasize connecting and contextualizing research in grounded processes. ANTH 4970 Dr. White’s Senior Seminar This semester, a “no late grade deductions” policy for assignments was implemented that did not require revision. Students were responsible for setting their own schedule to complete most writing assignments. The idea was that if students were less pressured to complete some assignments and could set their own time and work management schedules, they might focus more on the writing and less on the deadlines. This policy did not work well for most students, however; many students postponed turning in assignments until the last two weeks of class. Some commented that they appreciated this as a lesson in responsibility and time management, but in the fall, a different policy of positive incentives will be attempted for assignments turned in by a given deadline. ANTH 4980 Race and Racism, ANTH 4980 Anthropology and Public Health and Dr. Catley’s ANTH 4970 will no longer be offered, in that Dr. Catley is leaving our department.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

planned course improvements

2012-2013

Even though the format, course materials and requirements, and teaching style of ANTH 3033 was exactly the same as in previous years, students' performance seemingly declined. This course will not be offered in Fall 13; however, in the future I intend to give students more tutoring opportunities to improve their performance. ANTH 4970: We have two similar assignments (personal statement and self-reflexive paper). I've noticed students sometimes are at a loss for what to include in the personal statement but have less trouble with the self-reflexive paper. I am considering ways to combine these two assignments or use both exercises to help students construct personal statements they can use in the future. ANTH 4980: This is the first year that this course has been offered as a CTW. Learning outcomes were achieved (and slightly exceeded) for the course, suggesting that the writing assignments and peer workshop model have been very successful. Grades assigned for paper #2 (which utilized formal peer review) were slightly higher than those for paper #3 (in which integrating peer feedback was optional), which seems to indicate that students achieve better outcomes through the peer review process. When the course is next offered, I will plan to incorporate structured peer review into all three assignments. ANTH 4980: In the future I will dedicate at least another class period to discuss what is expected from this final compilation paper and how to effectively connect the three papers into a coherent whole. I will also increase the point value of this paper to be equal to that of the other three papers. I think some students did not take the final paper as seriously because it was not worth as much as the other papers.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

We expanded our CTW offerings by piloting a new archaeology course as well as a new section of a cultural anthropology course.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

In ANTH 3033, students' performance improved considerably over the course of the semester. However, some students did not submit the last assignment. ANTH 4980 (Archaeology of Ancient Cities) had a similar problem, with students skirting the last assignment even though, according to the instructor, their critical thinking through writing skills had improved over the semester. The performance in the capstone seminar and Paticio's class was consistently satisfactory.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We are developing new CTW courses every year, though we do not have GRA funding to support all of our teaching needs. Making funding available for CTW Writing Consultants would be extremely helpful.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

Overall, the quality of students' writing has improved. Several faculty members have adopted rubrics for their non-CTW courses, and students respond well. We are offering a new CTW course this Fall, and expect to have more offerings in Spring 14.

ACADEMIC PROGRAM QUESTION 1: What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

No changes were deemed necessary.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

No changes were deemed necessary.
**Goals**

**G 1: evaluate arguments**
Students will learn to evaluate arguments and present the rationale behind the conclusions drawn.

**G 2: address personal prejudices**
Students will learn to address personal prejudices, for example as relating to language-trait-focused discrimination.

**G 3: write clearly**
Students will learn to present an argument clearly in writing.

**Student Learning Outcomes/Objectives**

**SLO 1: language in society final paper (G: 1, 2, 3) (M: 1, 3, 4, 5, 6)**
Students will write a final paper on a sociolinguistic topic of their choice, drawing on both popular sources and academic sources, or on academic sources presenting more than one viewpoint. They will demonstrate their critical thinking through writing skills in this assignment, including their ability to identify values and assumptions that underlie different perspectives, show awareness of prejudicial aspects of the problem, present convincing arguments based on linguistic principles, draw reasonable conclusions, and present ideas clearly and in a well-organized fashion.

**SLO 2: communication across cultures final paper (G: 1, 2, 3) (M: 2, 3, 4, 5, 6)**
Students will write a 17-22 page final paper on a microculture (e.g., dog breeders, massage therapists, yoga instructors, faculty members, graduate students, 1st graders). They will identify a microculture that interests them, observe members of the microculture interacting, identify an informant, take field notes, develop ethnographic interviewing skills, and collect and analyze ethnographic interview data. Finally, they will complete the written presentation of your project. All writing assignments in this course relate to and build toward this final paper. They will demonstrate their critical thinking through writing skills in this assignment, including their ability to demonstrate an honest awareness of their feelings/thoughts about cultural difference, show awareness that they are cultural beings, present convincing arguments based on data, draw reasonable conclusions, and present ideas clearly and in a well-organized fashion.

**Measures, Targets, and Findings**

**M 1: identify values and assumptions that underlie different perspectives (O: 1)**
Students will write a final paper on a sociolinguistic topic of their choice, drawing on both popular sources and academic sources, or on academic sources presenting more than one viewpoint. They will demonstrate their critical thinking through writing skills in this assignment, including their ability to identify values and assumptions that underlie different perspectives, show awareness of prejudicial aspects of the problem, present convincing arguments based on linguistic principles, draw reasonable conclusions, and present ideas clearly and in a well-organized fashion.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: language in society final paper**

The papers were evaluated on a rubric which measured this outcome on a scale from 1-4, where 1 is "fails to identify underlying values and assumptions of different perspectives", 2 is "Does not identify many underlying values and assumptions of different perspectives or addresses only one perspective", 3 is "Identifies many underlying values and assumptions of more than one perspective" and 4 is "Clearly identifies most underlying values and assumptions of more than one perspective". Our target is for 85% of students to receive at least a 3 and for at least 40% to receive a 4.

**Findings 2012-2013 - Target: Met**

In terms of this outcome, 93% of students received at least a 3 and 74% received a 4.

**M 2: demonstrates self-awareness about cultural difference (O: 2)**
Students will demonstrate their critical thinking through writing skills on their final papers for Communication across Cultures, including their ability to demonstrate an honest awareness of their feelings/thoughts about cultural difference.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: communication across cultures final paper**

The papers were evaluated on a rubric which measured this outcome on a scale from 1-4, where 1 is "Fails to demonstrate awareness of one's feelings/thoughts about cultural difference", 2 is "Does not demonstrate much awareness of one's feelings/thoughts about cultural difference", 3 is "Demonstrates much awareness of one's feelings/thoughts about cultural difference" and 4 is "Clearly demonstrates a lot of self awareness about one's feelings and thoughts about cultural difference". Our target is for 85% of students to receive at least a 3 and for at least 40% to receive a 4.

**Findings 2012-2013 - Target: Met**

In terms of this outcome, 91% of students received at least a 3 and 69% received a 4.

**M 3: shows awareness of bias (O: 1, 2)**
Students will demonstrate their critical thinking through writing skills on their final papers, including their ability to show awareness of bias.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: language in society final paper**
The papers were evaluated on a rubric which measured this outcome on a scale from 1-4, where 1 is "Fails to show awareness of prejudicial aspects of the problem", 2 is "Partially acknowledges prejudicial aspects of the problem", 3 is "Fully acknowledges prejudicial aspects of the problem; may attempt some steps to address them" and 4 is "Fully acknowledges prejudicial aspects of the problem and takes reasonable steps to address them". Our target is for 85% of students to receive at least a 3 and for at least 40% to receive a 4.

In terms of this outcome, 94% of students received at least a 3 and 72% received a 4.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**change to course requirements for Communication across Cultures**

Students had difficulty identifying cultural difference (and thus, becoming aware of their feelings and thoughts regarding such differences) and recognizing themselves as cultural beings if they were investigating a micro-culture with which they were already too familiar (e.g. Starbucks, gaming). In future offerings of Communication Across Cultures, students will be required to do their final paper on a micro-culture with which they are not at all familiar, which should help them to become more aware of cultural differences.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: demonstrates self-awareness about cultural difference | Outcome/Objective: communication across cultures final paper
  - Measure: shows awareness of bias | Outcome/Objective: communication across cultures final paper
- **Responsible Person/Group:** Instructors for communication across cultures
- **Additional Resources:** none
- **Budget Amount Requested:** $0.00 (no request)

**discuss advising students/ setting possible prerequisites with faculty**

Many students who signed up for the "senior-level" CTW course were not seniors and had not taken the junior-level course. The AL faculty will need to consider whether it is feasible to have the junior-level course (or senior status) as a prerequisite to the senior-level course. (Since the courses were only offered once per year in the past, such a requirement has made graduating in a timely fashion difficult for students.) Another possibility is just to work with advising so that students know to sign up for the junior-level course before the senior-level one if at all possible.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - Measure: demonstrates self-awareness about cultural difference | Outcome/Objective: communication across cultures final paper
  - Measure: draws reasonable conclusions | Outcome/Objective: communication across cultures final paper
  - Measure: presents convincing arguments based on appropriate evidence | Outcome/Objective: communication across cultures final paper
  - Measure: presents ideas clearly and in a well-organized fashion | Outcome/Objective: communication across cultures final paper
  - Measure: shows awareness of bias | Outcome/Objective: communication across cultures final paper
- **Implementation Description:** Information about preferred ordering of the courses is now given in multiple places on the departmental web pages. We also intend to submit a note to be added to the catalog, and will discuss whether we can put a prerequisite on the number of hours a student must have completed before taking the senior-level class. 2013: We have set 3031 as a prerequisite for the senior-level course (to be waived for students from other departments wishing to take our senior-level CTW course as an elective).

**timely data collection**

The Ambassador did not try to collect data from instructors until after the semester was over. The instructors had already returned some papers, and had not always kept rubric data separately. This likely resulted in overall lower scores on the Communication across Cultures rubrics, as students who make the effort to pick up their final papers (those whose data are missing from the current report) are often those who are likely to have done a good job to begin with. The process of doing this report has already helped clarify what is needed, but in the future the Ambassador will make sure the instructors are keeping this data; at that point we will be able to better assess whether other changes are needed.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished

  - Measure: shows awareness of bias | Outcome/Objective: communication across cultures final paper
- **Responsible Person/Group:** CTW Ambassador
Lower non-completion rates for CTW courses

Track failure rates due to non-completion of course assignments and aim for 95% completion for students still enrolled at the end of the semester. In order to increase the course completion rate among students who are still enrolled, instructors will provide more in-class advising at the beginning of the semester regarding realistic expectations of the workload for these courses, and provide plenty of early feedback so students can withdraw instead of failing.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Responsible Person/Group: CTW instructors

Assess the effectiveness of prerequisites for 4151

We have set our junior-level CTW course as a prerequisite for our senior-level course in order to strongly encourage students to take them in the right order. However, we are somewhat concerned about creating bottlenecks for graduation since the junior-level course is usually (over)full. Thus, we will monitor whether the prerequisite causes problems and how often it needs to be waived, and discuss as a faculty whether having set the prerequisite resulted in a net gain.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Responsible Person/Group: CTW faculty

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

We have continued to improve advisement of students (as added to our Action Plan in the 2010-11 cycle) so that they take the two CTW courses in the correct order. In the 2011-2012 cycle we added information about preferred ordering of the courses to multiple places on the departmental web pages, which was helpful. However, this year we have still had a few students take the courses in the wrong order or simultaneously in spite of being strongly advised otherwise; they were not very successful in the senior-level course.

This year we set a prerequisite of 90 completed hours, including the junior-level CTW class, for the senior-level class. Now the students can see these requirements in GoSOLAR, plus the information that it is “a senior capstone course” and that the prerequisites are “strictly enforced EXCEPT for students outside the Applied Linguistics major who want to take this course as an elective.” Since this is a new change, we are as yet unable to gauge its effectiveness. Thus, our new action plan is to assess the effectiveness of having set the prerequisite. Last year's action plan proposed to track the course completion rate among students who were still enrolled at the end of the semester, aiming to increase it to 95% for students still enrolled at the end of the semester. In fact, we achieved a 95% completion rate for all classes, or 94% for the junior-level course and 97% for the senior-level class (although two students in the Maymester course took incompletes and finished the course much later). In addition, only one student withdrew from each level, suggesting that the percentage increase in course completions among registered students was largely due to students finishing the course rather than withdrawing. This success may be attributed to better advising to the students on the first day of class. For example, the undergraduate director (who taught two sections of the senior-level course herself) came to the other senior-level section to talk about the class, its requirements, and its place in the program. She gave the students a clear sense of the workload, and several students chose to drop in that first week because they realized that they would not be able to handle the workload in that semester. The instructor of the course noted that “it is my belief that simply upon experiencing this level of departmental involvement, students take their roles as students more seriously.”

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Overall, we see improvement over the course of the junior-level course, which has parallel assignments that allow for comparison. Data within the senior-level course and between the two courses are more difficult to compare because of the differences in what students are asked to do. However, we see students performing at a high level from the end of the junior-level course onwards, even when they are asked to do different types of tasks. Two sections of the junior-level and three sections (including one small one in the Maymester) of the senior-level course were offered this year; data provided are averages from both or all sections of a course. In the junior-level course, students had three assignments that required them to compare and contrast public opinion with a sociolinguistic perspective. In Table 1 we can see either steadily high performance or improvement in their rubric scores from the first assignment to the third for all measures. Improvement is especially notable on “shows awareness of prejudicial aspects of the problem” and “presents convincing arguments based on linguistic principles”, although the latter could still improve. There are also a series of CTW assignments in the senior-level class, but as they each have very different foci (justification of proposed project, literature review, and analysis), it is not very meaningful to compare scores across these assignments. In terms of final papers for both courses (see Table 2), the scores for the junior-level class are already quite high, so we do not see an improvement on them in the senior-level class. However, it should be noted that both the content and methodology for the senior-level class are quite different from the junior-level class, so students are applying what they have learned about crafting an argument and organizing their writing to new tasks. Additionally, the junior-level course involves more repetition of the same type of assignment whereas the senior-level course involves a wider range of assignments. We have consistently met our targets for the last couple of years, while the percentage of students scoring “sophisticated” has increased. As we have honed the courses we have been better able to provide appropriate scaffolding for students. However, it should be noted that many of the students in the 4151 class this year were particularly strong.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

Workload and ability to offer sufficient numbers of courses continues to be an issue, although the situation was better this year with three faculty members involved in teaching five sections of CTW courses (instead of one instructor teaching all four). The additional course was offered in Maymester, which may not be a good option for the CTW course, as many students need more time to process the material. We hope to offer an additional section of the junior-level course during the summer term, which would help a great deal since it is generally full or generally open. However, this will also increase the availability of teaching staff. In the longer term we expect to need more sections of the senior-level course (or an additional senior-level course) as well.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your
department made to the CTW initiative since last year's CTW Assessment Report?

Besides the changes specifically mentioned in the action plan, this year we had a wider range of faculty involvement in the CTW initiative, with three instructors teaching five courses. We hope to continue this broader participation! In a related point, having an instructor whom the students already know and trust come to the first day of class to talk seriously to the class about the workload was very effective. It provided support for the instructor of the course (who was teaching it for the first time) as well as for the students. It also provides continuity and cohesion to the courses offered in the department. The communication among the CTW faculty about teaching that has resulted from the initiative has also been beneficial. Other notes on impact are repeated from last year’s report; they are still very relevant: The large amount of work with student writing is clearly helping students throughout both classes, as we can see in the improved rubric scores, and as has been noted by both instructor and students. Students frequently comment that the parallel assignments in the junior-level class as well as the multiple drafts and extensive feedback that are part of both classes have helped them to be better communicators, better researchers, and more critical thinkers. Clearly, while students may complain about the workload, they do appreciate its effects! In addition, we now have two CTW courses required for the major that fit particularly well with Georgia State’s global education initiative, addressing all three areas of global competence: skills, knowledge, and awareness. The overt focus on awareness of bias in both courses is also helpful, as becoming aware of biases and learning to make different choices is usually the result of a longer-term effort than can be made in a single class. While we have had courses that address bias and that fit well with the global education initiative before, the CTW initiative has ensured that this is done more systematically in courses that all students take.

Georgia State University
Assessment Data by Section
2012-2013 CTW Art Education
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

In conversations among the art education faculty since the initiation of CTW, we arrived at two operational definitions for critical thinking that are particularly relevant to students in our area. One centers upon the ability to critically analyze and interpret artworks, which is fundamental to teaching about art. The other promotes students’ capacities to think critically about pedagogy, relate educational theory to classroom practice, and become reflective practitioners. Students have opportunities to develop both aspects of critical thinking in our program. In AE 4200, the first course in the major, students conduct classroom observations and examine aspects of teaching such as: adapting curricula for students with special needs, managing space and materials, integrating technology and other subjects, utilizing diverse visual communication strategies, planning lesson content, and creating a productive learning environment. In their modules and final field experience reflection, students analyze, compare, and evaluate what they have observed and relate it both to course readings and to their own emerging teaching philosophies. They also critically analyze various popular resources available to art teachers in journal and digital formats in a second CTW assignment. In AE 4900, students engage in learning activities related to art history, art criticism, and aesthetics, and acquire familiarity with several different critical frameworks for deriving meaning from artworks. They also explore strategies for actively engaging young learners in these disciplines. The CTW assignment in this course focus upon analysis of artworks and visual culture toward the objective of developing relevant instructional plans.

As a national collaborator on the Arts Map for the Partnership for 21st Century Skills, and as a signatory to the Partnership for 21st Century Skills’ National Action Agenda, NAEA recognizes the importance of having all students leave school prepared with the skills and knowledge to address the challenges that await them. To that end, we support the following PRINCIPLES:

- That the arts, including the visual arts, dance, music, and theatre, are recognized as core subjects in the framework of the Partnership for 21st Century Learning.

- That the visual arts provide opportunities for all students to build their skills and capacity in what the Partnership for 21st Century Skills calls “Learning and Innovation Skills,” specifically Creativity and Innovation; Critical Thinking and Problem Solving; and Communication and Collaboration.

- That the visual arts provide opportunities for all students to build their skills and capacity in what the Partnership for 21st Century Skills calls “Information, Media and Technology Skills,” specifically Information Literacy, Media Literacy, and ICT (Information, Communications, and Technology) Literacy.

Goals

G 1: Critical Reflection
Art Education majors are expected to become reflective practitioners, demonstrated through personal evaluative and critical responses to course readings and activities and the ability to defend their responses.

G 2: Contextualize Information from Course Materials
Art Education majors should be able to demonstrate deep understanding of course materials and assignments and relate them to real teaching contexts through reflections, planning, and field work.

G 3: Application of Coursework
Art Education majors are expected to apply concepts and practices from course readings and activities to real-life classroom situations and demonstrate the ability to develop and defend their own ideas about appropriate strategies and content for teaching art.
**Student Learning Outcomes/Objectives**

**SLO 1: Classroom Management (G: 1, 2, 3) (M: 1)**
Art Education majors should demonstrate critical awareness of classroom management strategies, including effective communication as well as management of materials, behavior, and time. They should be able to analyze, compare, and critique strategies seen in field experiences, and develop and defend their own ideas about classroom management.

**SLO 2: Art Criticism (G: 1, 2, 3) (M: 2)**
Art Education majors should be able to 1) formulate pertinent questions and compose valid interpretations of works of art or art historical problems; 2) assess and synthesize interpretations of art and art historical claims made by others; 3) understand and evaluate the creative and cultural significance of art on both micro and macro levels. Art Education majors are expected to develop and defend interpretations of art works informed by analytical processes such as the Feldman method, and to incorporate art criticism and analysis of artworks into their lesson plans.

**SLO 3: Resource Analysis (G: 1, 2) (M: 3)**
Art Education majors are expected to demonstrate awareness of different sources of information about content and strategies for teaching art, and to demonstrate the ability to analyze and critique these sources (such as websites, journals, books) on the basis of how complete, appropriate, engaging, and relevant they are, to inform their decision-making in designing lesson plans based on available resources.

**Measures, Targets, and Findings**

**M 1: Rubric for Field Experience Reflection (O: 1)**
The associated Rubric provides descriptors of competent performance in addressing the CTW objectives of this assignment. I have streamlined the criteria and expanded upon the descriptors for different levels of performance based upon last year's results. The lowest aggregated scores on the rubric were 77% for evaluation, and 84% for interpretation, indicating that these aspects need to be addressed more fully in our CTW assignments. See Action Plan for further details.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Classroom Management**
For the Final field Experience review, we would like all students to earn 80% or better on all criteria in the rubric. The scores ranged from 84% to 98% on all items but one: the "Evaluation" criteria seemed to stymie students in this course as well, because they scored an average of 77% on this item. This will be addressed in our action plan.

**Findings 2012-2013 - Target: Partially Met**
This year, AE 4200 was offered in both Fall '12 and Spring '13 semesters. The scores reported here reflect cumulative scores for the total 19 undergraduate students enrolled in both of these sections. 100% of students scored at 80% or better on all criteria except for "Compare/Contrast" and "Develop." On these two criteria one student scored below 80%, (rated at 70%) meaning that 95% of students scored above target. This will be discussed in our action plan.

**M 2: Art Criticism assignment (O: 2)**
On the various measures in the Art Criticism Rubric, students scored between 73% and 97% of expectations. The lowest areas of student competence were Analysis and Evaluation, which are addressed in our Action plan.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Art Criticism**
Students must earn a B- or better for the course, and this assignment is an essential component. We would like for all students to achieve at least an 80% on all criteria listed for this assignment, but the average score on the "evaluation" criteria was only a 73.9%, which we will address in our action plan for next year.

**Findings 2012-2013 - Target: Met**
During the section of AE 4900 offered in Spring '13, 100% of the 9 undergraduate students enrolled met target by scoring 80% or better on this assignment. Scores ranged from 87% to 98% on rubric criteria.

**M 3: Resource Review (O: 3)**
Students were asked to select an art educational resource from print or online source and answer questions through critical analysis. Graduate students in this course were given a more challenging version of this assignment.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Resource Analysis**
Of each objective stated in the rubric for this assignment, students scored between 80 - 98%, meeting the goals earning a B- or better in all coursework. Evaluation proved once again to be the weakest criteria, with average score of 80%.

**Findings 2012-2013 - Target: Met**
Out of a total of 19 undergraduate students enrolled in AE 4200 in Fall '12 and Spring '13, 100% met the target of scoring 80% or better on all criteria. The criteria of "Interpretation" had the weakest ratings, with 26% of students earning 80%.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

Implement Rubrics and define definitions
Next fall we will be fully implementing rubrics for the CTW content in both courses, as well as refining our operational definitions of critical thinking in art education.

**Established in Cycle:** 2009-2010  
**Implementation Status:** Finished  
**Priority:** High

### Address weaknesses illustrated by scores

Data collection from all three CTW assignments in the Art Education undergraduate programs indicated that the weakest skill set among our students was in the ability to critically evaluate a resource, an artwork, or a field experience in terms of posing critical questions, suggesting improvements or opinions, and particularly, providing rationale or support for their ideas. We recognize the need to spend more time in class modeling this critical thinking skill, giving students more practice, and setting higher standards on assignments prior to the CTW assignment in order to have opportunities to give students more feedback about this skill and their efforts to achieve it.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Finished  
**Priority:** High

### Relationships (Measure | Outcome/Objective):

- **Measure:** Art Criticism assignment  
- **Outcome/Objective:** Art Criticism  
- **Measure:** Resource Review  
- **Outcome/Objective:** Resource Analysis  
- **Measure:** Rubric for Field Experience Reflection  
- **Outcome/Objective:** Classroom Management

**Implementation Description:** In both CTW courses in Art Education, the instructors will spend more time going over the expectations of the assignments, explaining each criteria more fully, modelling how to meet the criteria of "Evaluation" and offering examples of successful student work as models.

**Responsible Person/Group:** Dr. Melanie Davenport (AE 4200) Dr. Melody Milbrandt (AE 4900)

**Additional Resources:** examples of more successful assignments that address criteria of Evaluation well, to share with students.

### Expand and enrich CTW assignments in Art Education

After piloting the Resource Review as a potential second CTW assignment for AE 4200, in Fall of 2010, I made the rubric more sophisticated and added it into the syllabus as a full-fledged CTW assignment prior to their Final Field Experience review, and I believe it helped raise the outcomes of the second assignment by giving students the opportunity to get feedback on their writing.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Finished  
**Priority:** High

**Responsible Person/Group:** Dr. Melanie Davenport

### Address Weakness in Criteria described in Final Field Experience Reflection

After analyzing results from previous years’ implementation of CTW rubrics, we successfully addressed weaknesses in students’ abilities to meet the criteria associated with "Evaluation," so that all students scored 80% or better on all three assignments with this criterion. However, this year I notice some weakness in students’ ability to meet target in criteria of "Compare and Contrast" and "Develop" in the Final Field Experience Reflection. One student of 19 did not meet target, but to address this weakness I plan to spend more time and provide more examples to students when giving this assignment and explaining the rubric.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Responsible Person/Group:** Melanie Davenport

**Additional Resources:** Examples of successful student work, more thorough explanation of expectations.

### Change Course Designation

Because of curriculum changes that have been approved for our program, CTW designation will need to be moved from AE 4900, which is a course being eliminated so that the content can be rolled into AE 4300 and so that we can provide more field experience hours by adding a course, AE 4600. We plan to seek approval for CTW designation to be added to AE 4300 as we make these program changes.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

**Responsible Person/Group:** Melanie Davenport, Melody Milbrandt

---

### Analysis Questions and Analysis Answers

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

In our action plan last year, we identified the criteria of "Evaluation" as earning the lowest scores on our CTW rubrics, so we made extra efforts in AE 4200 and AE 4900 to explain expectations and provide successful examples of "evaluation" in critical thinking assignments. This proved successful, as 100% of students in both courses during this school year met target for this criteria. We will try the same strategies for other criteria in which students demonstrated less success, as described in our new action plan.

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

The Art Education faculty notes an improvement in our students' writing skills, particularly if they take advantage of the opportunity to turn in drafts and make revisions on key assignments. With the new Common Core curriculum in K-12 schools, it will be increasingly important for our students to develop their Critical Thinking through Writing skills in order to demonstrate the higher order thinking skills and knowledge base required by these new standards. In general we agree that from the first assignment in the first class through the assignment in the second class, the majority of students seem to try harder to write well, reflect deeply, and justify their conclusions. We will continue efforts to work more closely in tracking their development and adding further assignments and activities to help them reach these important goals.
CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

Communication between faculty and data collection still needs to be formalized and streamlined in order to gain more insight and ensure student success. A group workshop may be helpful in this regard.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

As noted above, we do perceive that CTW is having a positive impact on student achievement related to reflection, analysis, interpretation and evaluation, all important skills for future teachers. Although we made few changes to assignments in the past year, we did work on delivery to address weaknesses noted in last year's data, which seemed to be effective. More students scored higher on "evaluation" criteria this year because of increased emphasis and more thorough explanation and examples. We anticipate one major change to our CTW courses in the coming academic year, changing the designation from AE 4900 (which is being cut) and adding it to the Secondary Methods course, AE 4300. In line with this change, we anticipate adding a second CTW assignment to the 4300 course, in order to collect further data.

Georgia State University
Assessment Data by Section
2012-2013 CTW Art History

As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

It is the department's mission to provide Art History majors with the skills to be able to critically analyze and interpret artworks based on formal and historical knowledge, and to be able to convey that knowledge effectively through oral and written communication. Written assignments that require critical thinking in Art History may ask students to 1) formulate pertinent questions and compose valid interpretations of works of art or art historical problems; 2) assess and synthesize interpretations of art and art historical claims made by others; and 3) understand and evaluate the creative and cultural significance of art on both micro and macro levels. All of the above match the University's stated policy that CTW develops a student's ability "to identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do." In AH 3000, students are introduced to the historiography and methodologies commonly employed in the study of art and art history. They have an opportunity to apply this knowledge in a semester-long research paper on a topic of their choice. AH 4990 is designed as a summative course for students to reflect on their college careers and on the practices required of art historians in different job capacities. It students to submit a great deal of written documentation for assessment including an exhibition review assignment, interdisciplinary approach to teaching Art History assignment, conference paper abstract assignment, graduate study application statement of purpose assignment, and a revised research paper.

Goals

G 1: Inquiry
Students will be able to formulate pertinent questions about works of art or art historical problems.

G 2: Synthesis
Students will be able to synthesize interpretations of art and art historical claims made by others.

G 3: Evaluation
Students will be able to evaluate the creative and cultural significance of art and/or evaluate claims made by others about art.

G 4: Interpretation
Students will be able to compose valid interpretations of works of art or art historical problems.

G 5: Reflection
Students will be able to reflect on the validity of their own assumptions.

Student Learning Outcomes/Objectives

SLO 1: AH3000 research paper (G: 1, 2, 3, 4, 5) (M: 1)

The primary document for assessing CTW in AH 3000 is a 10-page research paper on an art historical topic. In general, this project is designed to develop students's skills in conducting art historical research and in analyzing and applying different methodologies used by art historians in the study of art or art historical problems. However, the paper requires many elements of critical thinking to occur simultaneously in order for the assignment to be a success. Therefore, we have switched to a holistic rubric to measure overall evidence of critical thinking (G1 through G5) in the paper. Measurable outcomes include: developing a clear thesis; identifying the salient issues/questions/debates about the topic (inquiry); making effective use of supporting evidence (synthesis); effectively analyzing evidence (evaluation); and posing valid interpretations (interpretation and reflection).

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: AH4990 interdisciplinary assignment (G: 1, 2, 3, 4, 5) (M: 2)

Students were asked to prepare a short lecture (with a written write-up) in which they presented on an art historical topic using material from another discipline to broaden comprehension of the social and historical context of the art. Examples could include a novel, a piece of music, a film, or a scientific discovery. Evidence of critical thinking is restricted to the written portion of this assignment. The measurable outcomes include: developing a clear topic (inquiry); identifying effective supporting material (inquiry); positing valid connections between the material and topic (synthesis and evaluation); and posing valid interpretations and assumptions (interpretation and reflection).

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings

M 1: AH 3000 research paper (O: 1)

A holistic rubric, with a scale from 0 to 6 (insufficient to excellent) allows us to measure the five goals for critical thinking in this research paper assignment: · Provides a clear thesis (G1-5) · Identifies the salient issues/questions/debates (G1 inquiry) · Make effective use of supporting evidence (G2 synthesis) · Thoughtfully analyzes evidence (G3 evaluation) Posits valid interpretations and justifies assumptions (G 4& 5 interpretation and reflection)

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: AH3000 research paper

Ideally we would like all students to meet or exceed a score of 4 or better (out of 6) on the rubric; however, a goal of 70% seems more realistic, and in line with other year-end assessment goals and outcomes for the major.

Findings 2012-2013 - Target: Met

18 out of 20 students, or 90% of the class, met the target of a score 4 or better on the rubric. 10 students, or 50% of the class, scored a 5 or better on the rubric.

M 2: AH 4990 interdisciplinary assignment (O: 2)

As with AH 3000, we have implemented a holistic rubric for use in this AH 4990 assignment.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: AH4990 interdisciplinary assignment

80% of students will score a 4 or better (out of 6) on the critical thinking component of the assignment. We feel that the percentage here should be higher than the 70% identified for AH 3000, as AH 4990 is a more advanced CTW class.

Findings 2012-2013 - Target: Met

86% of the students (13 out of 15) scored a 4 or better on rubric. 73% of the class scored in the excellent range (5 to 6).

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Course sequence

One issue we continue to run up against is that many of our students end up taking the CTW courses simultaneously.

Established in Cycle: 2009-2010

Implementation Status: Finished

Priority: Medium

Implementation Description: We have decided to offer the courses in different semesters next year to address this problem. This is a short term solution, however. We need to determine how we can catch our majors earlier on in their academic career. Most do not seek proper advisement, nor do they read through the college catalogue.

Projected Completion Date: 05/2011

Responsible Person/Group: AH faculty
AH 3000 assignment
We plan to change the research paper assignment to allow students to choose from a broader range of paper topics. The focus on a canonical work of art proved too difficult for many of them, as they were a) unable to track down a sufficient amount of research that was accessible to them as undergraduates and/or b) make the subtler distinctions between different author's arguments about the same work of art.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: AH 3000 research paper | Outcome/Objective: AH3000 research paper

Implementation Description: Consult with AH faculty to rewrite research paper assignment for AH 3000.
Projected Completion Date: 11/2011
Responsible Person/Group: CTW ambassador (Susan Richmond) in consultation with AH faculty

AH 4990 assignment
AH faculty decided in spring to change the AH 4990 assignment used in the reporting of CTW. The original assignment (a personal reflection paper) didn’t seem to meet as many of the CTW goals we have established for our majors. The new assignment (an interdisciplinary project) has several components to it, all of which add up to a more efficient demonstration of evidence of CTW in the major.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: AH 4990 interdisciplinary assignment | Outcome/Objective: AH4990 interdisciplinary assignment

Implementation Description: We implemented a new assignment this past spring, and will continue to use it next year. I've listed this as in-progress because we would like to gauge its usefulness/success over several cycles. We would also like several faculty to have the opportunity to teach this particular assignment so that we can gather more feedback at that level. Right now, only 1 professor has assigned the new project.
Responsible Person/Group: Susan Richmond and AH faculty

Rubrics
Although this was not a part of our action plan from last year, we gone ahead and revised the rubrics for both courses in response to the committee report that our rubric measurements were unclear and/or insufficient. We believe that the holistic rubrics that we are now using provide the best measurement of CTW in our assignments.

Established in Cycle: 2011-2012
Implementation Status: Finished
Priority: Medium

Implementation Description: We implemented the new rubrics this past cycle.

Data tracking of individual students
We plan to begin tracking individual students in order better to determine what, if any improvements, occur in their critical thinking skills. Ideally we would like to see improvement in the higher levels of critical thinking by the time a student completes the second course. This may take a year or two to yield any significant data, as only a handful of students complete the two courses in a given year.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
We met our target for both CTW courses. We met our targets last year too, so we did not specify an action plan for this issue.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
We have not tracked a cohort of students from the entry to the exit level class. We have identified this in our action plan as a goal for the next couple of years.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Per the action plan we've developed for next year, we would like to collect data that will allow us to track individual students' academic careers. This data will also allow us to determine which areas of critical thinking improve or stay the same as students move through the sequence of CTW courses. To date the samples of student work provided to the CTW ambassador have always been anonymous and randomly selected by the instructor to reflect three levels of accomplishment in the course.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
We have not made any major changes since the last cycle, but will continue to discuss the data collection process in order to determine how it can be more useful for instruction and student outcomes.
Mission / Purpose
The Ernest G. Welch School of Art and Design defines critical thinking through writing as: “a wide range of cognitive skills and intellectual dispositions needed to effectively identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do.” (Bassham, Irwin, Nardone & Wallace, Critical Thinking: A Student’s Introduction (McGraw-Hill, 2005, page 1.) NOTE: The Welch School of Art and Design is in the process of drafting a revised mission statement, effective fall 2013. The role of critical thinking through writing within the updated mission might result in revisions to the information on this website.

Goals

G 1: Technical Skills
Students will demonstrate competent formal writing skills in support of their chosen studio practice. Writing competency is considered a relevant technical skill for art and design students to 1) deepen the ideation of their practice, 2) participate in the intellectual discourse of their chosen field, and 3) participate in the professional activity of their chosen field.

G 3: Professional Portfolio
Graduating BFA students will have professional quality portfolio that includes digital documentation of artwork, video documentation of artwork (if appropriate), correctly formatted resume/cv, and professional statement. Competent writing skills facilitate correct materials such as the resume/cv, bio, and cover letter. Critical thinking through writing is perceived to improve the types of professional statements that artists/designers are required to produce as active participants in their chosen fields.

G 2: Unified Body of Artwork
Students will complete the BFA program with unified body of art or design work, supplemented by professional written materials such as an artist statement. Competent critical thinking through writing is perceived to have a positive impact on the coherence of students' creative work. Clear and accurate writing is perceived to increase the personal and professional usefulness of artist/designer statements.

G 4: Critical Writing Skills
Students completing the BFA program will have the critical writing skills necessary for a career in art and design.

Student Learning Outcomes/Objectives

SLO 2: Ideation (G: 1)
Critical thinking through writing used to deepen the ideation of students’ creative practice.

SLO 3: Greater Intellectual Discourse (M: 7)
Critical thinking through writing will enable students to participate in the broader intellectual discourse of their chosen field.

SLO 4: Enabled Professional Activity
Critical thinking through writing will enable students to participate more effectively in the professional activity of their chosen field.

SLO 5: Unified Body of Work
Critical thinking through writing will lead students to more informed creative practices that lead to a unified body of work. (Please note that the body of work may be unified through formal means, conceptual means, or some other means.)

SLO 6: Professional Statement (M: 6)
Critical thinking through writing leads to improved professional statements that artists/designers are routinely required to produce. (These statements may be in the form of "artist statements" used for gallery/museum publication or "design statements" used as part of project proposals.)

SLO 7: Resume/CV
Critical thinking through writing will lead to better execution of the artist/designer resume/cv, as required by individual creative disciplines.

SLO 8: Professional Bio (M: 5)
Critical thinking through writing will enable students to write effective bios for themselves as required by their respective disciplines.

SLO 9: Connecting disciplines
Critical thinking through writing will ideally produce students who can make creative associations within their own disciplines, as well as creative associations across multiple disciplines.

CTW FALL 2010 COURSE #1 Instructor: C. Drennen Class Name & Number: ART 3910 CRITICAL ISSUES IN CONTEMPORARY ART
Assignment: WRITING ASSIGNMENT- ARTIST INTERVIEW (100pts) Interview an artist with significant regional or national career accomplishment. Initiate contact with your chosen artist via email, phone, or gallery staff. Your interviews may be conducted in person, through email, or over the phone. Our prior class content should inform your questions. (No GSU professors, former professors, or grad teaching assistants allowed.) Use appropriate interview protocols and formatting. Final version must be typed and double-spaced. DUE DATE: Beginning of last class meeting Rubric (as it appears on syllabus): Criteria 1 2 3 4 Criterion #1 Identification of critical issue Critical issue not identified Critical issue identified but with no evidence of understanding context Critical issue identified with evidence of understanding social, cultural, political context Critical issue clearly identified with evidence of deep understanding of social, cultural, political context Context Criterion #2 Thorough and insightful analysis Analysis is incomplete with no indication of critical thinking Analysis is simplistic or vague with little indication of critical thinking Analysis is complete with clear use of critical thinking Analysis is thorough and insightful with sophisticated critical thinking Criterion #3 Clear and logical organization Organization is not clear and logical and does not help to support claims Organization is at times clear and logical and only partially helps to support claims Organization is clear and logical and helps to support claims Organization is very clear and logical and helps to strongly support claims Criterion #4 Proper grammar, spelling and punctuation. Many grammatical, spelling and punctuation errors with no evidence of proofreading. Several distracting grammatical, spelling or punctuation errors with little evidence of proofreading. One or two grammatical, spelling or punctuation errors that are not overall distracting. No grammatical, spelling or punctuation errors. Assessment of Student Performance: Numbers alone are fine. No student names are needed. Student # Criteria #1 Criterion #2 Criterion #3 Criterion #4 student 1 2 3 4 student 5 6 7 8 student 9 10 11 12 student 13 14 15 16
CTW FALL 2010 COURSE #2 Instructor: N. Floyd Class Name & Number: Photo 4950 Portfolio II Assignment: Artistic Critique Portfolio II is the capstone course for students completing the BFA in Studio Arts with a Concentration in Photography. As the capstone course for the major, Portfolio II is designed as a Critical Thinking Through Writing (CTW) course. This means that a component of this course requires students to engage, through writing, in critical thinking in relation to their studio work. The University defines critical thinking through writing as: “wide range of cognitive skills and intellectual dispositions needed to effectively identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do.” (Bassham, Irwin, Nardone & Wallace, Critical Thinking: A Student's Introduction (McGraw-Hill, 2005, p. 1.)
The CTW component of this course is addressed in a written artist statement that supports the final portfolio work. The CTW writings and the final artist statement count for 20% of the final grade. Your artist statement must use clear language with proper grammar, spelling and punctuation. It should convey the essential ideas of your work and how those ideas are embodied in the work. A good artist statement will provide insight into the work and further the viewers' understanding of the artist's connection to the work. You will have an opportunity to write two drafts in order to arrive at a strong statement at the end of the course… No further opportunities for improvement will be available after the third submission. Rubric for CTW Assessment of Writing for PHOTO 4950 / Portfolio II Criteria 1 2 3 4 Criterion #1 Descriptive language that effectively communicates the theme or intention of the work and how the theme or intention is embodied or applied in the work. None of the language describes the theme or intention of the work and how the theme or intention is embodied or applied in the work. Some of the language describes the theme or intention of the work and how the theme or intention is embodied or applied in the work. Most of the language describes the theme or intention of the work and how the theme or intention is embodied or applied in the work. All of the language describes the theme or intention of the work and how the theme or intention is embodied or applied in the work. Criterion #2 Individual perspective that provides personal insight into & understanding of the work in light of contemporary and historical trends Individual perspective is absent. Statement is generic and offers no insights into or understanding of the work in light of contemporary and historical trends. Individual perspective lacks specificity and offers little insight into & understanding of the work in light of contemporary and historical trends. Good articulation of an individual perspective that is informative and provides some insight into & understanding of the work in light of contemporary and historical trends. Strong articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends. Criterion #3 Clear language, void of “artspeak”, that is easily understood by a wide audience. The language is not clear and ineffectively communicates. Some of the language is clear and easily understood but a significant amount is confusing or vague. Most of the language is clear but is not effectively communicated to a wide audience. All of the language is clear, easily understood and effectively communicates to a wide audience. Criterion #4 Proper grammar, spelling and punctuation. Many grammatical, spelling and punctuation errors with no evidence of proofreading. Several distracting grammatical, spelling or punctuation errors with little evidence of proofreading. One or two grammatical, spelling or punctuation errors that are not overall distracting. No grammatical, spelling or punctuation errors. CTW SPRING/MAYMESTER 2012 COURSE #3

Instructor: C. Drennen

Class Name & Number: ART 3910 (MAYMESTER) CRITICAL ISSUES IN CONTEMPORARY ART Assignment: WRITING ASSIGNMENT: EXHIBITION REVIEW (100pts) Students will write a review of an Atlanta exhibition, due at the beginning class on the final exam date. SPECIFICATIONS: * Visit each of the following galleries in Atlanta’s West Side Arts District (https://wadatla.com/about): 1. Atlanta Contemporary Art Center http://www.thecontemporary.org/ ($3 admission with student ID; Thursday evenings are free) 2. Poem 88 (free) http://www.poem88.net/events.html 3. Get This Gallery (free) http://getthissgallery.com/ 4. Sandler Hudson Gallery (free) http://www.sandlerhudson.com/ * In addition to these Atlanta museums: 1. High Museum http://www.high.org/ 2. Museum of Contemporary Art, Georgia (MOCA) http://www.mogaga.org/Visit/MOCAGA.asp 3. Museum of Design, Atlanta http://www.museumofdesign.org/ * Collect the exhibition badges from each place you visit. They will be turned in as well. * Typed, double-spaced, 12-word minimum (approximately 4 pages). No maximum. * 12-point font Rubric (as it appears on syllabus): Criteria 1 2 3 4 Criterion #1 Identification of critical issue Critical issue not identified Critical issue identified but not with evidence of understanding Critical issue identified with evidence of understanding social, cultural, political context Criterion #2 Thorough and insightful analysis Analysis is incomplete with no indication of critical thinking Analysis is simplistic or vague with little indication of critical thinking Analysis is complete with clear use of critical thinking Analysis is thorough and insightful with sophisticated critical thinking Criterion #3 Clear and logical organization Organization is not clear and logical and does not help to support claims Organization is clear and logical and helps to support claims Organization is clear and logical and only partially helps to support claims Organization is clear and logical and helps to support claims Organization is clear and logical and helps to support claims Organization is not clear and logical and does not help to support claims Critic#3 Identification of critical issue Critical issue identified but with no evidence of understanding social, cultural, political context Criterion #2 Thorough and insightful analysis Analysis is complete with no indication of critical thinking Analysis is simplistic or vague with little indication of critical thinking Analysis is complete with clear use of critical thinking Analysis is thorough and insightful with sophisticated critical thinking Criterion #3 Clear and logical organization Organization is not clear and logical and does not help to support claims Organization is clear and logical and helps to support claims Organization is clear and logical and only partially helps to support claims Organization is clear and logical and helps to support claims Organization is clear and logical and helps to support claims Critic#4 Proper grammar, spelling and punctuation no evidence of proofreading. Anderson Class Name & Number: GD 4950 Portfolio I 1. Assignment: Artist Statement: Your ARTIST STATEMENT: Who are you at this point in your creative life. QUESTION: Why do I have to write an artist statement? If I wanted to write to express myself I would have been a writer. The whole idea of my art is to say things that people just don’t get. ANSWER: Art is not for everyone, not stupid; they are essential. And you don’t have to be a writer to write one. People already look at your art and take away whatever experiences they will. Your artist statement is about facts, a basic introduction to your art; it’s not instructions on what to experience, what to think, how to feel, how to act, or where to stand, and if it is, you’d better do a rewrite. When you’re not there, your artist statement answers for you. Or when you’re there, but you don’t like to answer questions, or you’re too busy to answer questions, or you’re too busy to answer questions, or someone’s too embarrassed to ask you questions, then, your artist statement, does the job. Just about all artists want as many people as possible to appreciate their art. A good artist statement works towards this end, and the most important ingredient of a good statement is its language. WRITE YOUR STATEMENT IN LANGUAGE THAT ANYONE CAN UNDERSTAND, not language that you understand, not language that you and your friends understand, not language that you learn in an art school, but language that you use every day things. An effective statement reaches out and welcomes people to your art, no matter how little or how much they know about art to begin with; it never excludes. Like an introduction to a book, your statement presents the fundamental underpinnings of your art; write it for people who are about to read your book,” not those who’ve already read it. In three to five paragraphs of three to five sentences each, provide basic information like WHY YOU MAKE YOUR ART, HOW YOU MAKE IT, WHAT IT’S MADE OUT OF, and perhaps briefly, WHAT YOUR ART MEANS TO YOU. Don’t be afraid to want to know more; even, but rather, as the first impression, your statement should hook and invite further inquiry, like a really good story is about to be told. Give too little, not too much. People have short attention spans. 2. Personal Voice Project. See above description Projected Time allotted is 4 weeks. Rubric (as it appears on your syllabus): (No rubric included by this faculty.) Assessment of Student Performance: No student names are needed. Student # Criterion #1 Criterion #2 Criterion #3 Criterion #4 Student 1 1 1 1 1 Student 2 1 1 1 1 Student 3 1 1 1 1 Student 4 3 3 3 2 Student 5 4 4 4 4 Student 6 4 4 3 3 Student 7 3 3 3 3 Student 8 3 3 3 3 Student 9 3 3 3 3 Student 10 4 4 4 4 Student 11 4 4 4 4 Student 12 4 3 3 3 Student 13 1 1 1 1 Student 14 4 4 4 4 Student 15 4 4 3 3 3 Student 16 3 3 3 3 Student 17 3 3 3 3 3 Student 18 3 3 3 3 3 Student 19 3 3 3 3 CTW SPRING/MAYMESTER 2012 COURSE #4 Instructor: Jess Jones Studio Discipline: Textiles Semester / Year: Spring / 2012 Artist Statement: Your ARTIST STATEMENT: EXPLAINING THE UNEXPLAINABLE. Q: Why do you have to write an artist statement? It’s stupid. If I wanted to write to express myself I would have been a writer. The whole idea of my art is to say things visually. Why can’t people just look at my art and take away whatever experiences they will? Artist statements are not stupid; they’re more like essential. You don’t have to be a writer to write one. And people already look at your art and take away whatever experiences they will. Your artist statement is about facts, a basic introduction to your art; it’s not instructions on what to experience, what to think, how to feel, how to act, or where to stand, and if it is, you’d better do a rewrite. On this planet, people communicate through language, and your artist statement introduces and communicates the language component of your art. People who don’t have your art, they ask to know more about your art, and if your art is there, your artist statement answers for you. When you’re there, they ask you and answer. When you’re not there, your artist statement, answers for you. Some students do not need a rubric. Rubric: (as it appears on your syllabus): (No rubric included by this faculty.)
someone's too embarrassed to ask you questions, then, your artist statement, does the job. Just about all artists want as many people as possible to appreciate their art. A good artist statement works towards this end, and the most important ingredient of a good statement is its language. WRITE YOUR STATEMENT IN LANGUAGE THAT ANYONE CAN UNDERSTAND, not language that you understand, not language that you and your friends understand, not language that you learn in art school, but everyday language that you use with everyday people to accomplish everyday things. An effective statement reaches out and welcomes people no matter how little or how much they know about art. Like an open book, your statement presents the fundamental underpinnings of your art; write it for people who are about to read "your book," not those who've already read it. In three to five paragraphs of three to five sentences each, provide basic information like WHY YOU MAKE YOUR ART, HOW YOU MAKE IT, WHAT IT'S MADE OUT OF, and perhaps briefly, WHAT YOUR ART MEANS TO YOU. Don't bog readers down, but rather entice them to want to know more. As with any good first impression, your statement should hook and invite further inquiry, like a really good story is about to be too short, too little, not too much. People have short attention spans. Rubric for the Assessment of Artist Statement: Student #5

Assignment of Student Performance: No student names are needed. Student # Crit#1 # Crit#2 # Crit#3 # student 1 2 3 2 3 student 2 2 2 3 3 student 3 3 3 3 3 student 4 2 2 3 3 CTW SPRING/MAYMESTER 2012 COURSE #5 Portfolio II - CTW ID 4950, CRN 16520 Spring 2012 | Instructor: Tim Nichols WRITING ASSIGNMENT This is excerpted from a larger writing called the Thesis Program Document. It is an independent directed research document based on a project type and location of the students choosing. The Thesis Problem Statement and Precedents section were chosen for the CTW exercises in writing. The thesis problem statement is a brief introduction (2-3 pages) to the basic parameters of your thesis program document including social, cultural, and environmental context, the central theme, the project type and location, general hypothesis of your design objective, and finally the anticipated outcome and result of your design solution. The precedent analysis describes the history of your project type (e.g., restaurants, bed and breakfasts, residential design, etc.) throughout history? How far back you go depends on the project type: e.g., residential, could go as far back as Neanderthal man and cave dwellings whereas speculative office development might only go back to the mid twentieth century. (8-10 pages)

GRADING RUBRIC

Crit#1

Criterion #2

Analysis is complete with clear use of critical thinking

Criterion #3

Clear language, void of "artspeak", that is easily understood by a wide audience. The language is not clear and ineffectively communicates.

Criterion #4

Proper grammar, spelling and punctuation. Many grammatical, spelling and punctuation errors with no evidence of proofreading. Several distracting grammatical, spelling or punctuation errors with little evidence of proofreading. One or two grammatical, spelling or punctuation errors that are not overall distracting. No grammatical, spelling or punctuation errors. Assessment of Artist Statement: Student #7

**Analysis:**

- **Student 1:** Good articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends. Good articulation of an individual perspective that is informative and provides little insight into & understanding of the work in light of contemporary and historical trends.
- **Student 2:**颇有 insight into & understanding of the work in light of contemporary and historical trends. Good articulation of an individual perspective that is informative and provides little insight into & understanding of the work in light of contemporary and historical trends.
- **Student 3:** Weak articulation of an individual perspective that is informative and provides little insight into & understanding of the work in light of contemporary and historical trends. Weak articulation of an individual perspective that is informative and provides little insight into & understanding of the work in light of contemporary and historical trends.
- **Student 4:** Strong articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends. Strong articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends.
- **Student 5:** Excellent articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends. Excellent articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends.

**Criteria**

- **Criterion #1:** Descriptive language that effectively communicates the theme or intention of the work and how the theme or intention is embodied or applied in the work. No grammatical, spelling or punctuation errors. Assessment of Student Performance: Student # Criternon 1
- **Criterion #2:** Criterion #2
- **Criterion #3:** Criterion #3
- **Criterion #4:** Proper grammar, spelling and punctuation. All of the language clearly describes the themes of the work and how the themes are embodied in the work. All of the language clearly describes the themes of the work and how the themes are embodied in the work. All of the language clearly describes the themes of the work and how the themes are embodied in the work. All of the language clearly describes the themes of the work and how the themes are embodied in the work.
None of the language describes the theme or intent of the work and how the theme or intention is embodied or applied in the work.

Some of the language describes the theme or intent of the work and how the theme or intention is embodied or applied in the work.

Most of the language describes the theme or intent of the work and how the theme or intention is embodied or applied in the work. All of the language describes the theme or intent of the work and how the theme or intention is embodied or applied in the work.

Criterion #2 Individual perspective that provides personal insight into & understanding of the work in light of contemporary and historical context that reflects your understanding of the work in light of contemporary and historical trends. Individual perspective lacks specificity and offers little insight into & understanding of the work in light of contemporary and historical trends. Good articulation of an individual perspective that is informative and provides some insight into & understanding of the work in light of contemporary and historical trends. Strong articulation of an individual perspective that is informative and provides clear insight into & understanding of the work in light of contemporary and historical trends. Criterion #3 Clear language, void of "artspeak", that is easily understood by a wide audience. The language is not clear and ineffectively communicates the language of the artwork or is confusing or vague. Most of the language is clear, easily understood and effectively communicates to a wide audience. All of the language is clear, easily understood and effectively communicates to a wide audience. Criterion #4 Proper grammar, spelling and punctuation. Many grammatical, spelling and punctuation errors with no evidence of proofreading. Several distracting grammatical, spelling or punctuation errors with little evidence of proofreading. One or two grammatical, spelling or punctuation errors that are not overall distracting. No grammatical, spelling or punctuation errors. Assessment of Student Performance: Numbers alone are fine. No student names are needed. Student # Criterion#1 Criterion#2 Criterion#3 Criterion#4 001665003 3 3 4 4 Source of Evidence: Capstone course assignments measuring mastery
individual perspective that is informative and provides greater insight into and understanding of the work. Criterion #3 Clear

Portfolio I. Assignment: Artist Statement YOUR ARTIST STATEMENT: Who you are at this point in your creative life. QUESTION
Why do I have to write an artist statement? If I wanted to write express myself I would have been a writer. The whole idea of my art is
beauty, why can’t I just express myself? An artist should not have to explain what ever they express. Art statements are not stupid; they are essential. And you don’t have to be a writer to write one. And people already look at your art and take away whatever experiences they will. Your artist statement is about facts, a basic introduction to your art; it’s not instructions on what to experience, what to think, how to feel, how to act, or where to stand, and if it is, you’d better do a rewrite. On this planet, people communicate through language, and your artist statement introduces and communicates the language component of your art. People who come into contact with your art and want to know more will question. When you’re there, they ask you and you answer. If it’s not a question, or if you’re not there, you’re not there. Or when you’re there, you’re not there. Or when you’re there, you’re not there. Or you’re too busy to answer questions, or someone’s too embarrassed to ask you questions, then, your artist statement, does the job. Just about all artists want as many people as possible to appreciate their art. A good artist statement works towards this end, and the most important ingredient of a good statement is its language. WRITE YOUR STATEMENT IN LANGUAGE THAT ANYONE CAN
UNDERSTAND, not language that you understand, not language that you and your friends understand, not language that you learn in
art school, but everyday language that you use with everyone people to accomplish everyday things. An effective statement
reaches out and welcomes people to your art, no matter how little or how much they know about art to begin with; it never excludes.
Like an introduction to a book, your statement presents the fundamental underpinnings of your art; write it for people who are about
to read "your book," not those who’ve already read it. In three to five paragraphs of three to five sentences each, provide a basic
information like WHY YOU MAKE YOUR ART, HOW YOU MAKE IT, WHAT IT’S MADE OUT OF, and perhaps briefly, WHAT YOUR
job. Just about all artists want as many people as possible to appreciate their art.
Why can’t people just look at my art and take away whatever experiences they will? ANSWER: Artist
statements are not stupid; they are essential. And you don’t have to be a writer to write one. And people already look at your art and
take away whatever experiences they will. Your artist statement is about facts, a basic introduction to your art; it’s not instructions on

ART 3910 CTW Instruction by Lecturers
It has proven difficult finding full-time art and design faculty whose backgrounds and availability would allow them to teach the ART 3910 course. Whenever possible, the qualification to teach CTW courses was written into the job description for new full-time lecturers. Thus far two lecturers (Ms. Jenene Nagy and Ms. Jill Frank) have been called to teach ART 3910.
Established in Cycle: 2012-2013 Implementation Status: In-Progress Priority: High

ART 3910 CTW Instruction by PTI
Due to the lack of interest and/or availability of full-time faculty to teach ART 3910, the department has experimented with hiring part-time instructors to teach the course. Thus far, one section of ART 3910 has been taught by a part-time instructor, Ms. Rachel Reese.
Established in Cycle: 2012-2013 Implementation Status: In-Progress Priority: High

Faculty Data Reporting
Since fall 2010 we have not had full participation in digital data reporting from art and design faculty teaching CTW courses. Efforts have been made to streamline the process and remind faculty multiple times during the semester. The goal is 100% participation from all faculty teaching CTW courses.
Established in Cycle: 2012-2013 Implementation Status: In-Progress Priority: High

Writing Assignment in Capstone CTW Courses
All art and design departments will use at least one final writing assignment in a capstone course to assess student achievement. The culminating assignment will be used to gauge the level of student thinking and writing competencies at the moment when they depart the program.
Established in Cycle: 2012-2013 Implementation Status: In-Progress Priority: High

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
CTW accomplishments for Welch School of Art and Design 1. More sections of ART 3910 were taught by the widest variety of faculty.
2. My spring 2013 we had the largest percentage of faculty participation in data collection thus far.
3. One section of ART 3910 was taught by a qualified part-time instructor.
4. ART 3910 student Alice Phillips (BFA DPP) had her interview with the artist Rocio Rodriguez accepted for publication in NUMBER journal.
CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

1. Anecdotal information by faculty teaching senior level Portfolio classes indicates that exiting seniors have higher reading comprehension and writing skills than their predecessors. (Please note that the numerical assessments don’t necessarily reinforce this assertion.) 2. Undergraduate students from the Welch School of Art and Design now appear with frequency as art critics in respected publications. Henry Detweiler (BFA DPP) worked for over one year as a paid staff writer for Burnaway magazine while a student. Santiago Junco (BA) and Faatima Stevens (BFA DPP) also wrote for Burnaway as contributing critics. This is a new development, and one that indicates that the best of our undergraduate students are prepared to contribute to professional publications. 3. Undergraduate students who apply to MFA programs utilize the artist statements from their Portfolio classes as part of their application materials. Two students from the past year, Summer Gray (BFA Textiles) and William Schweigert (BFA DPP) were both accepted into MFA programs at the University of Oregon and Northwestern University, respectively.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

1. The 25-student limit in the ART 3910 courses has turned out to be too large. The emphasis in the course in on more numerous smaller writing assignments. So it’s not uncommon for a class of 25 students to have 10 weekly 2+ page writing assignments, a 4-5 page exhibition review, and blue book final exam. That can mean up to 1,375 pages of graded material per class for the faculty. This could be managed much better, and with more individual writing attention, if the course limit were reduced at least to 20. 2. In the capstone Portfolio classes, the preferred writing assignment chosen for assessment has been the artist statement. It seems useful to supplement that assignment with additional writing assignments throughout the studio courses. 3. It seems clear that students in the CTW courses benefit from as much individual attention and feedback in the grading process as possible. There are moments when clear line-by-line edits are useful. 4. The demographic of incoming students at GSU means that students arrive with a wide variety of reading comprehension and writing experience. A percentage—sometimes a significant percentage—of ART 3910 students arrive on the first day of class without basic English skills. 5. Faculty participation in data submission is not yet 100%.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

1. The best BA and BFA students appear to be more articulate in critique situations. (However, this has not created a comparable change in the lower achieving students.) 2. The CTW courses create an activated “culture of success” within the department. 3. The ART 3910 course provides a true multi-disciplinary classroom environment, which has had a positive impact throughout the program. 4. Students can now more easily initiate their own participation in critical writing for professional publications.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

1. There has been no significant changes in the official learning outcomes supported by the Welch School of Art and Design. The stress has been more on the implementation of the existing outcomes. 2. The Welch School of Art and Design is in the process of drafting its first official mission statement, to be effective by fall 2013. The new mission statement will take the CTW program into account. 3. All faculty teaching CTW courses will continue to be encouraged and reminding to contribute correct data reporting.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We have been in a transitional mode in the Welch School of Art and Design, and the CTW program is being looked at very thoughtfully by the new director.

Annual Report Section Responses

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

1. It is always a challenge to get students into the ART 3910 sections at the appropriate moment in their degree pursuit. Presumably this challenge will continue. 2. It is a challenge to get qualified, interested faculty to teach the sections of ART 3910. 3. It is a challenge to teach full sections of 25 or more students in the ART 3910 sections. 4. It is a challenge to collect faculty data reporting in an efficient and timely fashion. I do not have have the authority to comment on other challenges facing the broader department.

Modifications in Measurement Methods—If you modified any of the measures or methods you use in the measurement process, please note those here.

There are no impending changes to the measurement methods.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

I have not been made aware of any intended modifications of outcomes.

University-wide Committee Participation—Use this space to document any staff participation on University-wide committees (e.g., University Senate).

My role as a junior faculty member does give me access to that information. Questions regarding faculty committee assignments may be directed to our Associate Director, Dr. Maria Gindhart (mgindhart@gsu.edu) or our director, Mr. Michael White (michaelwhite@gsu.edu).

Publications and Presentations—Note in this section any articles published or presentations made at professional conferences by staff.

The faculty and staff of the Welch School of Art and Design participate in exhibitions, publications, and presentations too numerous to mention here. More information about faculty and staff accomplishments can be seen on the Welch School of Art and Design website (http://www2.gsu.edu/~wwart/) under “People In The News”
International Activities—Note here any international activities of the department or its staff.
The faculty and staff of the Welch School of Art and Design participate in variety of international exhibitions, publications, and presentations. More information about faculty and staff accomplishments can be seen on the Welch School of Art and Design website (http://www2.gsu.edu/~wwwart/) under "People In The News".

Contributions to Student Retention—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.
This information falls outside of my role as CTW Ambassador. For information regarding retention, progression, or graduate of BA and BFA art and design students, please contact the Undergraduate Advisor for the Welch School of Art and Design, Mr. Adam Wagner (awagner@gsu.edu).

Service to the External Community—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).
N/A

Georgia State University
Assessment Data by Section
2012-2013 CTW Biology
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
Critical thinking is the human mental process of developing conclusions that proceed logically from the study of evidence. Specifically in the biological sciences, critical thinkers analyze the quality and relevance of experimental results to determine whether they meet the goals of scientific studies on life processes. Critical thinkers in biology also use conclusions drawn from empirical evidence to formulate new scientific questions and ultimately, they design and implement new experiments to answer such questions. Thus, biologists with critical thinking skills apply various forms of the scientific method appropriately. To enable students to communicate their analysis of original data in written form. Writing about scientific analysis forces students to organize their thoughts into a logical argument.

Goals
G 1: Improve writing skills
Students will become better writers by organizing complex biological concepts into written form

G 2: Improve reading skills
Students will become better critical readers as a result of improving their writing skills

Student Learning Outcomes/Objectives
SLO 1: Lab Report (M: 1, 2)
Students will organize a written report communicating their experimental findings. The reports parallel the structure that is conventionally used in professional journals.

Relevant Associations: Students in upper level CTW classes have show improvement in both critical analysis and in writing skills since taking the lower level CTW.

Measures, Targets, and Findings

M 1: Written lab report rubric (O: 1)
The following rubric will be used to grade reports. For every concept that is not included in the report, 0.1-0.5 points will be deducted (for a 10 point report). I. Introduction (2 points) a. _____Includes background b. _____Citations were appropriate c. _____Is not a summary of methods d. _____Does not read like a summary of methods e. _____Relevance of study f. _____Does not read like protocol intro g. _____Moves from a broad to specific h. _____Includes a hypothesis II. Methods (2 points) a. _____Passive past tone b. _____Appropriate detail c. _____Only mentions own experiments d. _____Does not read like a protocol or recipe e. _____No numbered lists f. _____Organized into sections III. Results (2 points) a. _____Should include text which highlight important trends/observations and are NOT a part of the captions or legends!! b. _____Figures/Tables are cited (i.e. Table 1) c. _____Considers all data sets d. _____No interpretations or conclusion IV. Discussion (2 points) a. _____Uses data to draw conclusions b. _____Each analysis states expected results c. _____Includes work cited at the end with appropriate literature d. _____All interpretations are merged into a set of overall conclusions e. _____Scientific premise to all conclusions V. Figures/Tables (2 points) a. _____Appropriate labeling (axes, descriptive titles, column headings, gel lanes) b. _____Should include original captions (communicates methodology used to generate data. Concise, not as detailed as methods) c. _____Size should be big enough to read, but not awkwardly large d. _____Should function to simplify interpretation of data e. _____Appropriate numbering scheme (i.e. Table 1, Figure 1, etc.) f. _____Contains number, title and caption g. _____Shows only relevant data that is discussed in discussion VI. General a. _____Grammatical issues GRADING (points deducted/section deducted from) Intro: Methods: Results: Discussion:

Source of Evidence: Written assignment(s), usually scored by a rubric

M 2: Scientific Report (O: 1)
Students were asked to organize a report communicating their experiments. The structure paralleled that of professional manuscripts.

Source of Evidence: Written assignment(s), usually scored by a rubric
Target for O1: Lab Report
85% of the class improved by 15% points over the course of the semester

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Standardize Rubric for all CTW faculty according to feedback
All of the CTW instructors for Cell & Mol biology are due to meet in August to discuss restructuring the rubric for the reports so that the students are more closely aligned to the course objectives (with less emphasis on grammatical corrections).

  Established in Cycle: 2010-2011
  Implementation Status: Planned
  Priority: High
  Relationships (Measure | Outcome/Objective):
    Measure: Scientific Report | Outcome/Objective: Lab Report
  Projected Completion Date: 09/2011
  Responsible Person/Group: Frank Cruz

Mandated CTW faculty help
To help nurture a communicative relationship between CTW faculty and students, 2% of the course grade will be dependent upon meeting with the CTW instructor to help with improvements on reports.

  Established in Cycle: 2011-2012
  Implementation Status: Planned
  Priority: High
  Relationships (Measure | Outcome/Objective):
    Measure: Scientific Report | Outcome/Objective: Lab Report

Mandatory student meetings
Students are going to be required to see their CTW faculty instructor at least once during the semester to receive counsel on their report.

  Established in Cycle: 2011-2012
  Implementation Status: In-Progress
  Priority: High
  Implementation Description: To prevent students from slipping through CTW courses without establishing a working relationship with their CTW instructor, 2% of their grade will be contingent upon their attendance during office hours to receive help on their report.
  Projected Completion Date: 08/2012
  Responsible Person/Group: 3810 CTW faculty
  Additional Resources: None

Georgia State University
Assessment Data by Section
2012-2013 CTW BIS
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Bachelors of Interdisciplinary Studies program combines ten university-planned programs with numerous student-developed programs that share a focus on issues, topics and areas of inquiry combining two or more disciplines to create areas of concentration not offered through any of the university's individual academic disciplines. The Bachelors of Interdisciplinary Studies program acknowledges and respects the definitions of critical thinking affirmed by the University and its individual departments. A common thread in these definitions presents critical thinking as an ability to effectively identify, formulate, analyze, and evaluate arguments, hypotheses, evidence, and truth claims or to use these skills to solve problems. Beyond that, the BIS program seeks to imbue its students with two other elements of critical thinking. These are: (a) to understand the logic, perspectives, terminology, and analytic methods of more than one academic discipline, and see how they complement, or overlap with, each other; and (b) to be able to apply the "tools" of more than one discipline (i.e., their logic, perspectives, terminologies, and methods) to draw reasonable conclusions and make sound judgments based on available information and/or empirical evidence.

Goals

G 3: Analysis
Students in BIS courses will analyze theories, concepts, facts or other information from the perspective of multiple disciplines. Students completing the CTW courses will be able to: Analyze and evaluate materials in terms of the reliability of evidence and assumptions of the authors. Synthesize materials from a variety of disciplines to determine their relevance to individual interdisciplinary programs. Formulate research questions related to individual interdisciplinary programs. Apply critical thinking skills in reporting research findings in oral and written form.

G 4: Application and Evaluation
Students in BIS courses will apply the ideas presented in their courses to new contexts in two ways: (a) by experiencing and judging how applicable and/or relevant the concepts, theories, and data from one discipline are in or for another discipline (i.e., seeing the compatibility, or lack thereof, of concepts across such fields as history, cultural anthropology, sociology, cultural geography, environmental studies, political science and law); (b) by observing or testing the "fit" between the explanations, accounts, theories,
and information gained in their classes and reading assignments and what they experience in their lives or in the research projects they engage in as part of their class.

### Student Learning Outcomes/Objectives

#### SLO 1: THEA 4070 Research Paper (M: 1, 11)
Students will demonstrate effective communication through a paper based on their research into a specific literary or historical topic. The paper will be organized around a clear thesis statement or question, support this statement or address this question in a logical manner and with an appropriate level of detail and draw logical conclusions based on an the synthesis of materials from a variety of sources and disciplines. Students will demonstrate organizational skills of presentation without distracting grammatical errors or lapses in academic language or citation mechanics.

#### SLO 7: THEA 3100 Research Paper (G: 3) (M: 7, 12)
Students will demonstrate their abilities to analyze and evaluate critical source materials by creating a concise summary of the interpretations underlying two different academic articles analyzing a specific play and then synthesize their research to create a comparison of those two interpretations. Students will demonstrate organizational skills of presentation without distracting grammatical errors or lapses in academic language or citation mechanics. Students first submit a list of the two journal articles to be used in the paper, then submit a draft for instructor review before turning in the final paper.

#### SLO 8: Entry Paper for BIS Program (G: 3, 4) (M: 9)
Students applying for acceptance to the BIS program are required to submit a writing sample in the form of a piece of expository writing submitted for a class previously taken at the college level. Papers are reviewed by a subcommittee of the BIS Council using rubrics developed by the Council in consultation with Jennifer Lawrence.

#### SLO 9: Exit Paper for BIS Program (G: 3, 4) (M: 10)
Students applying to graduate with the BIS degree are required to submit a writing sample in the form of a piece of expository writing submitted for one of their CTW classes. Papers are reviewed by a subcommittee of the BIS Council using rubrics developed by the Council in consultation with Jennifer Lawrence.

### Other Outcomes/Objectives

#### O/O 3: Museum Exhibit Critique (M: 5)
In Geog 4768-Hist 4320-Soci 4279 (Metropolitan Atlanta) students demonstrate ability to analyze, apply, and evaluate in museum exhibit critique assignment: Go to Atlanta History Center and view the "Metropolitan Frontiers" exhibit. Then write a 4-5 page paper in which you discuss and critique the content, design, and effectiveness of this exhibit, being sure to view it in light of class discussions and the book "Atlanta: An Illustrated History."

#### O/O 4: Demographic Assignment
Students in Metropolitan Atlanta class demonstrate ability to analyze data by completing a demographic assignment. The assignment requires them to obtain population, social, and economic data on Atlanta and several other metropolitan areas, and/or several counties in metropolitan Atlanta to compare/contrast them, to see how they compare to data from 20 or 30 years ago, and to draw conclusions about these changes and contrasts.

#### O/O 5: Analytical Reaction Essay (M: 4)
In Speech 3250, BIS students demonstrate analysis by completing an analytical reaction essay. Analytical Essay assignment description: Write an essay in which you demonstrate what you have learned from the textbook and apply those things elsewhere. You must make reference to the outside text (video or article) and explain its point. You must incorporate an issue or concept from the course (i.e., show how it is related to Persuasion). You must show how it connects to other things (examples from your world, something you've seen, studied, etc.). Questions to ask yourself: a. What is the author trying to say? b. What is the main idea? c. Why do you think that the article or video was assigned? d. What is the connection to the course? e. What other connections can I make? f. Do I agree or disagree with the argument? g. Is this generalizable? A strong paper will include solid analysis, will go beyond simple summary to demonstrate learning, and express a real ownership of the ideas.

#### O/O 6: Oral Presentation
In Political Science 3800, students demonstrated application in a paper and oral presentations. Assignment description: Students will demonstrate effective communication through a paper and oral presentation of conclusions of research by providing clearly stated conclusions with examination of implications or consequences of conclusions. Students will also integrate other perspectives thoughtfully and respectfully.

### Measures, Targets, and Findings

#### M 1: THEA 4070 Research Paper (O: 1)
Students complete a research paper of 10-12 pages, proving a thesis focused down from a broad research topic in theatre. The assignment requires four different submissions: 1) A one-page report (20 points) that including focused topic and proposed thesis statement, stating what the student will look for (evidence) to support his or her claim. 2) An annotated bibliography, in MLA style, with 15 sources. No more than 5 of these sources may be available exclusively as electronic media. 3) A complete first draft with a works cited page. 4) The final draft of the paper.

Source of Evidence: Writing exam to assure certain proficiency level

#### M 3: Rubric
M 4: CTW for BIS students: Speech 3250 (O: 5)

BIS students’ progress in this CTW class was assessed through their written analytical essays and application of the evaluation rubric shown here: Speech’s Definition of Critical Thinking. In Speech, “critical thinking” is the art of actively producing and analyzing arguments for particular audiences in specific cultural and historical contexts. Critical thinkers are able to construct and assess arguments in their cultural situatedness; evaluate stated or unstated claims and their supporting forms; recognize the creation of knowledge through symbolic systems; and converse and pose questions about the production of knowledge through the communicative process. Rubric to Use for CTW Assessment: Not all Extremely Recognizes the cultural context 1 2 3 4 5 Arguments clearly constructed 1 2 3 4 5 Arguments adapted to that cultural context 1 2 3 4 5 Evaluates data/supporting materials effectively 1 2 3 4 5 Evaluates claims/conclusions effectively 1 2 3 4 5

Target for O5: Analytical Reaction Essay

The expected achievement target for BIS students is that at least 80% of the students in a CTW class will obtain a grade in the two highest evaluation levels used in the course’s last CTW written (and/or oral, in some cases) project. Given the way many CTW rubrics are designed, this means, quite often, scoring a 4 or 5 on the evaluation rubric used for a particular project or assignment. The rubric used in Speech 3250’s analytical reaction essay is shown here:

M 5: CTW for BIS Students: Geog4768/His4320/Soci4279 (O: 3)

Students in this course were evaluated in CTW via several written assignments (e.g., museum exhibit critique, essay exams, demographic project, and term paper). A rubric used in CTW evaluation is shown below. CRITICAL THINKING THROUGH LEARNING Outcomes Assessment Form Metropolitan Atlanta (Geog 4768, Hist 4320, Soci 4279) Undergraduates COURSE NAME: ___________________________ Date: _____________

Rubric to Use for CTW Assessment:

HOW MANY STUDENTS IN THIS COURSE FIT INTO EACH CATEGORY? Poor Good Very Good Excellent 1 2 3 4 5

Source of Evidence: Written assignment(s), usually scored by a rubric

M 6: CTW for BIS students in Hist 3000 & Poli 3800

BIS students in these courses were few in number and were evaluated for CTW along with all non-BIS students (the vast majority) via written assignments. For a description of these assignments and the rubrics or other measures used to assess student progress please refer to the CTW reports prepared by the CTW Ambassadors from the departments that offer these courses.

Source of Evidence: Written assignment(s), usually scored by a rubric

M 7: THEA 3100 Research Paper (O: 7)

Students will choose a play from the list supplied and write a five page research paper comparing two interpretations of the play found in academic articles located in journals at the GSU Library or through an on-line journal search using Galileo. These are not to be reviews, but rather critical analyses of the works as theatrical art. The list of plays on which you may write is: David Henry Hwang—Golden Child Tony Kushner—Angels in America: Part One—Millennium Approaches Eduardo Machado—Broken Eggs Paula Vogel—How I Learned to Drive Oscar Wilde—The Importance of Being Earnest Tennessee Williams—The Glass Menagerie August Wilson—Fences

Source of Evidence: Written assignment(s), usually scored by a rubric

M 9: BIS Entry Paper (O: 8)

Early papers from BIS students graduating in 2013 were reviewed by a subcommittee of the BIS Council in consultation with Jennifer Lawrence. Eric Brown, the university advisor for BIS students solicited graduating seniors for papers and collected six early papers from students in Asian studies, classical studies, environmental studies, international studies, theatre design and production, and theatre performance. Papers came from a wide variety of classes, though some apparently were from CTW classes, which was not the goal of the measure. Ratings on a five-point scale in six rubrics (see attached spread sheet) indicated an overall rating of 3.08, with the strongest rating for knowledge (3.88) and the weakest for breadth of interdisciplinary focus (2.28). The latter is to be expected among students just starting their studies in an interdisciplinary field. For depth of interdisciplinary focus, students averaged 2.44, suggesting that though they were not yet working with a variety of disciplines, their work suggested an average understanding of the fields under consideration. For rubrics that would be applied to individual disciplines at the university, students performed well for rising sophomores, with average ratings above 3 in such areas as argumentation/critical thinking, development, grammar, knowledge and structure.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O8: Entry Paper for BIS Program

The minimum rubric scores we would like to see among students entering the BIS programs is: Argumentation/Critical Thinking: 3 Breadth of Interdisciplinary Focus: 1 Depth of Interdisciplinary Focus: 2 Development: 3 Grammar/Mechanics: 3 Knowledge: 3 Structure: 2 It is, however, virtually impossible to set up an action plan related to these targets for student work before their entry into a set of programs with minimal entry requirements. Students entering the BIS must have a minimum GSU GPA of 2.0, the same minimum required for enrollment in most other majors.
Upper-level papers from CTW courses from BIS students graduating in 2013 were reviewed by a subcommittee of the BIS Council in accordance with the rubrics developed by the Council in consultation with Jennifer Lawrence. Eric Brown, the university advisor for BIS students, solicited graduating seniors for papers and collected six early papers from students in Asian studies, classical studies, environmental studies, international studies, theatre design and production, and theatre performance. Papers came from a wide variety of classes. Ratings on a five-point scale in six rubrics (see attached spreadsheet) indicated an overall rating of 3.71, with the strongest rating for grammar/mechanics (4.3) and the weakest for breadth of interdisciplinary focus (2.61). The latter, though disappointing, reflects the fact that some students chose to submit papers from their 3000-level CTW courses rather than their 4000-level CTW courses. The slightly higher rating for depth of interdisciplinary focus (3.06) would suggest that even though students were not drawing on a variety of disciplines, they were at least dealing with the disciplines considered with an above average level of sophistication. For rubrics that would be applied to individual disciplines at the university, students performed very well for rising seniors, with average ratings above 4 in such grammar/mechanics and knowledge and approaching four in argumentation/critical thinking, development and structure. In addition, students showed improvement in all seven rubrics, with an average overall improvement of .63 and the highest improvement in grammar/mechanics (1.1). The disappointment growth in breadth of interdisciplinary focus (.33) may be the result of an inadequate sampling of work, with some entrance drawn from CTW courses. This would also account for the fact that four of the students whose work was sampled had breadth of interdisciplinary focus ratings that fell between the entrance and exit papers.

Source of Evidence: Writing exam to assure certain proficiency level

**Target for O9: Exit Paper for BIS Program**

Reasonable targets for students graduating with the B.I.S. degree would be: Argumentation/Critical Thinking: 4 Breadth of Interdisciplinary Focus: 4 Depth of Interdisciplinary Focus: 4 Development: 4 Grammar/Mechanics: 4 Knowledge: 4 Structure: 4

Given the variable nature of student preparation for the academic world, where students fall short of those targets, we would consider it acceptable to see improvement ratings as follows: Argumentation/Critical Thinking: +2 Breadth of Interdisciplinary Focus: +3 Depth of Interdisciplinary Focus: +3 Development: +2 Grammar/Mechanics: +2 Knowledge: +2 Structure: +2

**Target for O1: THEA 4070 Research Paper**

The target set after last years report was an average of 4.1 in the four key rubrics, 4 in Argumentation/Critical Thinking, 4.2 in Development, 4.75 in Knowledge and 3.5 in Structure.

**Target for O7: THEA 3100 Research Paper**

The target set after last years report was an average of 4.75 in the four key rubrics, 4.5 in Argumentation/Critical Thinking, 5 in Development, 5 in Knowledge and 4.75 in Structure.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Add Metropolitan Atlanta course**

We will work to add the Metropolitan Atlanta course to the list of BIS available courses. This class has been piloted as BIS for the last year, and we will add it officially starting in the fall.

**BIS Rubrics**

A subcommittee of the BIS Council met with Jennifer Lawrence to develop CTW rubrics for BIS students. These were presented to the BIS council and approved in fall 2012.

Source of Evidence: Writing exam to assure certain proficiency level
Evaluation of BIS Papers

Eric Brown, university advisor for BIS students, is charged with assembling sample entrance and exit papers from BIS students, which are then evaluated by a three-member sub-committee of the BIS Council using rubrics developed by the Council in consultation with Jennifer Lawrence.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** High
- **Additional Resources:** Stipend of $500/each to be awarded to each member of the three-person subcommittee.
- **Implementation Description:** The BIS Council will meet with Eric Brown, the university advisor for BIS students, to determine the most equitable means of collecting and storing entrance and exit papers for their evaluation by a subcommittee of the BIS Council.
- **Projected Completion Date:** 04/2014
- **Responsible Person/Group:** BIS Council. Eric Brown.

Refine Paper Collection for BIS Program

The first set of papers used for the CTW assessment for the BIS program in theatre were assembled by canvassing seniors graduating in 2013 to submit early and late papers written during their careers at Georgia State. From the small number of students participating (six) and the nature of the papers submitted, with some early papers selected from CTW courses and some late papers selected from 3000-level CTW courses, it would appear that the sampling was not the most reliable, as evidenced by low rubric ratings in the area of breadth of interdisciplinary focus and the fact that some people showed lower ratings for selected rubrics on their exit papers than on their entrance papers. We need to develop a better system for collecting papers, starting by requiring students to submit entrance papers when they apply to the program and exit papers at their graduation audits.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** The BIS Council will meet with Eric Brown, the university advisor for BIS students, to determine the most equitable means of collecting and storing entrance and exit papers for their evaluation by a subcommittee of the BIS Council.
- **Projected Completion Date:** 04/2014
- **Responsible Person/Group:** BIS Council. Eric Brown.

Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

Our primary accomplishment this year was setting up a subcommittee to evaluate entrance and exit papers from graduating BIS students. This gave us the chance to try the rubrics and refine the sample gathering techniques. This encompasses all three areas of the action plan. The evaluation of BIS Papers is an ongoing process that involves using the previously completed BIS Rubrics. This first foray into assessing CTW progress has also pointed out the need to add refining paper collection to the action plan.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

The first assessment process would indicate a slight overall improvement in paper quality, with the average for all seven rubrics rising from 3.08 to 3.08. The strongest improvement was in the area of grammar/mechanics, with a rise from 3.2 to 4.3, indicating that graduating seniors in the BIS program were beginning to achieve proficiency in that area. The only other area in which BIS majors moved into proficiency was knowledge, although that was only a slight improvement, indicating that students are coming into the program with high levels of achievement in that area.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

The greatest problem right now is in the assessment process. As indicated in other areas of the report, we are not yet getting an accurate sampling with which to show growth from entrance to exit papers. Because papers were only collected as students were graduated, some of the entrance papers were written after students had come into the program, with some samples coming from CTW classes. This was not the procedure originally envisioned, and we BIS Council needs to address this issue to determine a better means of gathering student work.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?**

This is the most difficult question to answer for the BIS program, which encompasses ten university-planned and several student-planned concentrations. The BIS Council does not always control the CTW courses taught in those concentrations, so any changes will require extensive dialogue with faculty in several academic departments. In addition, since this is the first attempt at assessing CTW progress among BIS students, the BIS Council has yet to meet and discuss the findings of the subcommittee evaluating papers.
ill-founded presuppositions"["personal prejudices" in the original]; to formulate and present convincing reasons in support of
conclusions; and to make reasonable, intelligent decisions about what to believe and what to do." (Bassham, Irwin, Nardone &
Wallace, Critical Thinking: A Student's Introduction (McGraw-Hill, 2005) page 1.) "Personal prejudices" in the original document has
been changed to "ill-founded presuppositions" since I doubt many of the students have "personal prejudices" in the usual sense of
the phrase about the subject matter of this course, but there will be times that initial guesses about things may need to be discarded
as students delve deeper.

**Goals**

**G 1: Critical Thinking Skills and Processes**

Students graduating with a major in Managerial Sciences in the Business Analysis concentration will be able to apply critical thing
skills and processes with addressing problems in the field.

**G 2: Effective Writing Skills**

Students graduation with a major in Managerial Sciences and a concentration in Business Analysis will be able to effectively
communicate their decision processes and conclusions on Business Analysis problems in the written format used in contemporary
organizations.

**Student Learning Outcomes/Objectives**

**SLO 1: Problem Identification (G: 1) (M: 1)**

Students will be able to identify correctly the nature of a problem that an organization is facing that is amenable to a business
analysis recommendation.

Relevant Associations:

**SLO 2: Choice of Analytical "Tools" (G: 1) (M: 1)**

Students will be able to identify the proper, established business analysis tools and skills for addressing the identified problem.

Relevant Associations:

**SLO 3: Application for Analysis (G: 1) (M: 1)**

Students will be able to apply the proper, established business analysis tools and skills to the identified problem.

Relevant Associations:

**SLO 4: Drawing Conclusions from Analysis (G: 1) (M: 1)**

Students will be able to draw a conclusion from among the identified viable alternatives that best addresses the identified problem.

Relevant Associations:

**SLO 5: Written Process Communication (G: 2) (M: 1)**

Students will be able to communicate, in writing, the process of critical thinking that they used in arriving at the recommendation made
for the identified problem.

Relevant Associations:

**SLO 6: Written Communication of Conclusions (G: 2) (M: 1)**

Students will be able to communicate, in writing, the basis for their conclusion relative to the other alternatives reasonable presented
for the identified problem.

Relevant Associations:

**Measures, Targets, and Findings**

**M 1: Problem Solving Memos (O: 1, 2, 3, 4, 5, 6)**

In this course students will be asked to write effective business memoranda addressing a problem that requires the systematic
application of the tools of analysis developed in this course. Students will do an initial analysis early in the semester. Following a
review on both the merits and the effective communication of the student's critical thinking and writing skills in the memorandum, the
student will be asked to re-write the memorandum addressing the issues raised. The second memorandum will then be resubmitted
and again, in addition to being graded on the merit of the assignment, the student will be required to attend a feedback session with
e CTW ambassador or writing consultant on how to further improve the paper. The syllabus in which these assignments are set out,
the actual assignments used, and the rubric used in assessing the assignments are set out in the Document Repository.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Problem Identification**

Students will achieve a class average that exceeds a 3.0/4.0 on the second criterion in the rubric for problem. With respect to the
distribution of scores, there will be no more than 5% of student that will be below 2.0 and no more than 30% of students will be
below 3.0 on this measure.

**Target for O2: Choice of Analytical "Tools"**

Students will achieve a class average that exceeds a 3.0/4.0 on the third criterion in the rubric for problem. With respect to the
distribution of scores, there will be no more than 5% of student that will be below 2.0 and no more than 30% of students will be
Students will achieve a class average that exceeds a 3.0/4.0 on the fourth criterion in the rubric for problem. With respect to the distribution of scores, there will be no more than 5% of student that will be below 2.0 and no more than 30% of students will be below 3.0 on this measure.

**Target for O4: Drawing Conclusions from Analysis**

Students will achieve a class average that exceeds a 3.0/4.0 on the fifth criterion in the rubric for problem. With respect to the distribution of scores, there will be no more than 5% of student that will be below 2.0 and no more than 30% of students will be below 3.0 on this measure.

**Target for O5: Written Process Communication**

Students will achieve a class average that exceeds a 3.0/4.0 on the first criterion in the rubric for problem. With respect to the distribution of scores, there will be no more than 5% of student that will be below 2.0 and no more than 30% of students will be below 3.0 on this measure.

**Target for O6: Writen Communication of Conclusions**

Students will achieve a class average that exceeds a 3.0/4.0 on the fifth criterion in the rubric for problem. With respect to the distribution of scores, there will be no more than 5% of student that will be below 2.0 and no more than 30% of students will be below 3.0 on this measure.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assignment Revision**
The assignments in the CTW exercises rely heavily on the student's use of software programs that run on the Excel spreadsheet. While Excel is an important tool in business analysis, there is very little in terms of choices that the students have to make, explain and defend in the problem solving process. This hurts both the assessment of the depth of the student's critical thinking skill and the degree to which their writing is challenged. Revisiting this assignment so that these skills are more student-dependent and less software-dependent will help enrich the assessment of both CT and W skill sets.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Measure:** Problem Solving Memos | **Outcome/Objective:** Choice of Analytical "Tools" | Written Communication of Conclusions
- **Implementation Description:** Re-wording of hte CTW assignments
- **Projected Completion Date:** 12/2011
- **Responsible Person/Group:** Jim Shi and Bill Bogner
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)

**Review and Improvement of New CTW Processes in BA**
In the 2010-1011 cycle new assignments, and a revised rubric were put in place for this course. At the end of the year these will be reviewed for how effectively they are linking the skills of a successful Business Analysis student with the skills of Critical Thinking and Writing. This review is in addition to the analysis of findings on individual learning outcomes. It is a meta-level analysis of the CTW approach in the BA concentration more oriented toward th Goals set out for BA student.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Review meetings will be held int eh early fall to discuss the effectiveness of the overall program in helping students on the two dimensions of CTW. These will be different than a review of the specific learning outcomes set out in the assessment plan.
- **Responsible Person/Group:** William Bogner, Jiim Shi, members of the BA faculty.
- **Budget Amount Requested:** $0.00 (no request)

**Rubric Update and Alignement**
In the process of recasting the Goals and Objectives the Rubric needed to align findings with the new objectives did not translate well. Other items fit but are poorly stated. This revision will be put in place for the 2011-2012 cycle.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Measure:** Problem Solving Memos | **Outcome/Objective:** Written Process Communication
- **Implementation Description:** Revise rubric.
- **Responsible Person/Group:** Jim Shi and Bill bogner
- **Additional Resources:** None
- **Budget Amount Requested:** $0.00 (no request)
<table>
<thead>
<tr>
<th>Mission / Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>The chemistry department has long supported the University mission. We work to create an environment that provides for the education of students from all walks of life, traditional, non-traditional and people of all races, creeds and genders without bias. We adhere to the principle of liberal arts education with our faculty interacting with our students both inside and outside the classroom on a routine basis. Our goals are to deliver a high quality instructional program both at the undergraduate and graduate levels to prepare our students for productive careers in post-graduate studies and the job market. We endeavor to have both our faculty and our students participate actively in scholarly pursuits, including oral presentations, submission of grant proposals, internships, graduate and undergraduate stipends, and fellowships. A unique characteristic of the chemistry department is our affiliation with the American Chemical Society (ACS). The ACS affiliation provides national standards of learning outcomes and assessment for the professional training of chemists for real life work in the chemical sciences. This includes industrial settings, government work, and academic areas. The intent is to determine what knowledge and skills are needed by practitioners in the field, what is currently taught to undergraduates, and how successful our teaching is. Critical thinking skills center on applying, analyzing, synthesizing, and evaluating information and methods. Students in the discipline get thorough practical training in research techniques. These must include not only mastery of instrumentation and the calibration of same, but the design of the relevant control experiments. Overall, they need to gain mastery with the techniques that chemists use to measure data, and the conventions that chemists use to express data. Students must learn to evaluate their data, looking in detail for statistical significance. Students not only have to know facts, they should also be able to design experiments to ascertain if these facts are true. It is vital that the skills learned in one situation be transferable to related situations. One of the key aspects of teaching critical thinking is developing the higher order cognitive skills of decision making and problem solving. It is vital to create an atmosphere where students grow in their ability to reason.</td>
</tr>
</tbody>
</table>

Upon Graduation students will be able to take and analyze real world data to develop a knowledge base and the ability to draw conclusions from this knowledge base. Thought processes should be rational, logical and consequential. Conclusions should grow directly from the data and accepted fundamental chemical principles. In addition, students should not only arrive at conclusions, but be aware that they are expected to defend these conclusions. It is also important to realize that data may be interpreted in more than one way, and that science moves forward as these difference data interpretations clash with one another, and are then resolved. Students must therefore learn to deal with open ended questions, deciding which data and variables are important, and which can safely be ignored in creating a picture of the system under study. The ability to think critically about scientific content and processes is key to these students' futures. Critical thinking over time should become an internal skill, transferable to the rest of the student's life and career.

<table>
<thead>
<tr>
<th>Goals</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>G 1: Gateway course</strong></td>
</tr>
<tr>
<td>Using the established rubric for critical thinking. Students who progress to the next course in the analytical sequence should receive a score of adequate on all sections of report 3 (adequate) by the final rewrite. On papers one and two students should demonstrate an emergence of critical thinking skills as they rewrite and resubmit papers.</td>
</tr>
</tbody>
</table>

| **G 2: Capstone Course** |
| Students will be able to score 3 (adequate) in each area of the rubric by the final revision of their laboratory reports. At least 3 areas rated as excellent (4). |

<table>
<thead>
<tr>
<th>Student Learning Outcomes/Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SLO 1: Appropriate Title that represents actual work done in lab (G: 1, 2) (M: 1, 2)</strong></td>
</tr>
<tr>
<td>Students must demonstrate the ability to think critically by choosing a title which reflects the actual experiment performed in lab based on the following from the rubric. Excellent: The title should accurately, clearly, and concisely reflect the emphasis and content of the paper. The title must be brief and grammatically correct. Adequate: Missing one key component. Not yet adequate: Title misses more than one of the key components. Poor: Not descriptive of the experiment. N/A is not an option all papers must have titles.</td>
</tr>
</tbody>
</table>

| **SLO 5: Appropriate Discussion/Conclusion (G: 1, 2) (M: 1, 2)** |
| The paper contains a Discussion/Conclusion section which demonstrates the connection between the laboratory experiment and the theory. Based on Rubric Below: Excellent: In depth analysis of data including any error analysis which cumulates in the answer to the question or problem stated in the introduction. Adequate: Error analysis not complete, minor questions about interpretation of data, improper, but minor problems applying theory. Not yet adequate: No error analysis or many errors in interpretation of data or theory. Poor: No understanding of theory, major errors in data interpretation. |

<table>
<thead>
<tr>
<th>Other Outcomes/Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>O/O 2: Appropriate Introduction (G: 1, 2) (M: 1, 2)</strong></td>
</tr>
<tr>
<td>The introduction should be judged adequate based on the rubric section below. Excellent: Includes a full statement of the problem, any background theory that will be used to answer the problem and the basic experimental design that will be used to answer the problem. Adequate: Minor errors in either experimental design, theory or unclear statement of the problem. Not yet adequate: A major error in one of the above categories or several minor errors. Poor: Major errors the experimental design, or a lack of understanding of the theory or misstatement of the problem. N/A is not an option.</td>
</tr>
</tbody>
</table>
The paper contains a materials and methods section which would allow a competent chemist to repeat the experiment. Based on the rubric section below:

**Explain: Includes the details of the experimental procedure (section titled Materials and Methods). A competent chemist should be able to reproduce the experiment using this section of the paper. Adequate: Minor details omitted that would hamper reproduction of the experiment. Not yet adequate: A competent chemist would have difficulty reproducing the experiment. Major components of experiment not described or omitted. Poor: Lack of experimental detail.**

**O/O 4: Appropriate Results section (G: 1, 2) (M: 1, 2)**

The paper contains a results section which is logical and incorporates all data in a readable format. Based on Rubric section below:

To think critically about data, it must be presented accurately, clearly and in a logical order. Excellent: Data presented fully including appropriate significant figures. Data are presented in logical order. Data format is readily available (in appropriate Tables, Figures and text) for facile assessment by the authors and readers. Adequate: One of significant figures, logical order, and efforts to make data readily accessible missing. Not yet adequate: Two of the above missing. Poor: Confusing organization of the data and/or major errors in presenting significant figures.

**O/O 6: Figures and Tables (G: 1, 2) (M: 1, 2)**

Figures and tables are added at logical places that enhance the readability of the paper and summarize data in a logical manner. Excellent: Use tables and figures when the data cannot be presented clearly as narrative, when many precise numbers must be presented, or when more meaningful interrelationships can be conveyed by the tabular format. Tables should supplement, not duplicate, text and figures. Tables should be simple and concise. It is preferable to use the Table Tool in your word-processing package, placing one entry per cell, to generate tables. Adequate: Most tables or figures have descriptive narrative (captions or titles) with minor errors which either have a lack of clarity or are not needed. Not yet adequate: Tables and figures do not add to the clarity of the paper. Poor: Tables and figures take away from the readability or clarity of the paper.

### Measures, Targets, and Findings

**M 1: Reports 1 through 3 in Major Gateway course (O: 1, 2, 3, 4, 5, 6)**

Students are required to perform a series of experiments and write laboratory reports using their data. The information given in the preliminary laboratory lecture is basic theory of the experiment. The critical thinking skills required increases with each experiment.

**Source of Evidence: Written assignment(s), usually scored by a rubric**

**Target for O1: Appropriate Title that represents actual work done in lab**

90% of students score 3 or above by the final submission.

**Findings 2012-2013 - Target: Met**

97% of students met this target. 89% were considered excellent.

**Target for O2: Appropriate Introduction**

Target was not met at first submission but was met by all students by final submission.

**Findings 2012-2013 - Target: Met**

94% of students met this target. 83% were considered excellent.

**Target for O3: Appropriate Materials and methods**

90% of students score a 3 or better by the final submission.

**Findings 2012-2013 - Target: Met**

92% of students met this target. 39% were considered excellent.

**Target for O4: Appropriate Results section**

85% of students score a 3 or above by the final submission.

**Findings 2012-2013 - Target: Met**

89% of students met this target. 19% were considered excellent.

**Target for O5: Appropriate Discussion/Conclusion**

85% of students score a 3 or above on the final submission.

**Findings 2012-2013 - Target: Met**

86% of students met this target. 11% were considered excellent.

**Target for O6: Figures and Tables**

80% of students score a 3 or above on the final submission.

**Findings 2012-2013 - Target: Not Met**

69% hit this target. 8% were considered excellent.

**M 2: Final Paper of Capstone Course (O: 1, 2, 3, 4, 5, 6)**
The capstone paper required a semester's worth of research in a laboratory. A report is compiled using the data that the student acquires throughout the semester.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Appropriate Title that represents actual work done in lab**
All students receive a 3 or better by their final submission

**Findings 2012-2013 - Target: Met**
100% of students (19) met this requirement. 95% (18/19) were rated 4 (excellent).

**Target for O2: Appropriate Introduction**
All students receive a 3 or better by the final submission

**Findings 2012-2013 - Target: Met**
100% of students met this target. 89% were rated excellent.

**Target for O3: Appropriate Materials and methods**
All students receive a 3 or better by the final submission

**Findings 2012-2013 - Target: Met**
100% of students met this target. 84% were rated excellent.

**Target for O4: Appropriate Results section**
All students receive a 3 or better by the final submission

**Findings 2012-2013 - Target: Met**
All students met this target. 79% were rated excellent.

**Target for O5: Appropriate Discussion/Conclusion**
All students receive a 3 or better by their final submission

**Findings 2012-2013 - Target: Met**
100% of students met this requirement. 53% were rated excellent.

**Target for O6: Figures and Tables**
All students receive a 3 or better by their final submission

**Findings 2012-2013 - Target: Not Met**
95% of students met this target. 26% were rated excellent.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Decrease average submission numbers in Chem 4000**
We will attempt to decrease submission numbers in Chem 4000 by adding reviews of papers as part of the course. Students will have to critically evaluate a series of papers in order to determine if the paper shows the critical thinking skills set forward by the rubric.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** Instructors will write papers that illustrate various degrees of critical thinking in the areas of the rubric.
- **Responsible Person/Group:** Barrow

**Training on Tables Figures**
More work needs to be done on expressing how to condense data into readable, logical format.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Reports 1 through 3 in Major Gateway course
  - **Outcome/Objective:** Figures and Tables
- **Responsible Person/Group:** Chem 4000 teaching group.

**Annual Report Section Responses**

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

Increasing Enrollment in Chemistry 4000 without little or no additional funding will be difficult. It will be impossible to increase the number of students per section because of a limited number of instruments.
Contributions to Student Retention—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

The Department of Chemistry serves not only students who have declared chemistry as their major but also students in biology, for which general chemistry is a prerequisite for the first course in the biology major (Principles of Biology), physics, for which chemistry is a required minor and pre-medical students. In addition any major can use chemistry 1151/1152 or 1211/1212 as the laboratory sequence required by the University for graduation. This report addresses the efforts to increase retention in the courses which are used by both chemistry and non-chemistry majors as part of the core curriculum (1151/1152, 1211/1212) and courses used by persons wishing to minor in chemistry (2400/3410). The second part of the report addresses the efforts to improve the retention, progression and graduation of persons who major in chemistry. Introductory Courses “Many introductory science courses are responsible for driving off many students either from a science major or from taking science courses.” (Reform in Undergraduate Science Teaching in the 21st Century.) Because of the “turn off” factor of these 1000 and 2000 level courses one of the key factors that will affect retention is the number of students who receive a D, F or withdraw from the course. These students either are turned off by the science and change majors or are forces to retake the course causing the department to offer more sections both of which are unfavorable outcomes. Over the past four years the department has placed a priority in improving the retention of students in the 1211/1212 sequence believing those courses will affect the most people. These efforts have been supported by the University System of Georgia’s RPG initiative and STEM initiative. A three year grant based on the RPG initiative allowed the department to attack the retention problem in three ways; the implementation of peer tutorials, weekly meetings between faculty members who teach the courses in order to discuss ideas, methods and problems in the various units and a redesign in the courses. Peer Led Tutorials Peer led tutorials are an effective way to allow students to receive help and ask questions in a small group setting (25 as opposed to 100 – 200). Students enrolled in 1211, 1212, 2400 or 3410 can register for a tutorial which is led by either an undergraduate student who has recently excelled in one of the courses or a graduate student. The grade for the course is based on class attendance and participation by the student. We have found that the tutorials have been moderately effective in the 1211 and 1212 sequence but less effective in the 2400 and 3410 sequence. The department is currently modifying the tutorials so that they are more interactive and students are required to work out problems on the board as the peer leader circulates throughout giving help where needed. We believe that this activity will more actively engage the student allowing him/her to work the problem on their own with hints from the leader. In addition the department is developing a book of “worked out” problems which students can download. Weekly Communication Weekly meetings between the faculty members who teach introductory courses were started initially with a senior faculty member who facilitated discussion on what materials in the text were more important and what topics should be less emphasized. Since most persons teaching the general chemistry sequence come in as visiting faculty and very little experience teaching except as a TA we found that there is a preconceived notion that everything in the text must be taught. Through these meetings the general chemistry faculty has been able to increase the depth of student knowledge rather than go for complete “coverage” of the text. In addition the faculty have exchanged ideas on how to teach different topics, discussed student misconceptions and developed slides which we can use as needed. It is often difficult to schedule these meetings around teaching schedules so this part of the action plan has been waning over the past semester, but we hope that we can continue this as part of the upcoming year’s action plan. Course Redesign In the eight sections of CHEM1211 and CHEM1212, General Chemistry I and II in Spring 2009, 151 out of 255 of students enrolled are biology majors (59%) and 28 are chemistry majors (18%). After the General Chemistry series, the biology majors go on to take BIOL3800 – Molecular Cell Biology, which requires students to have a strong background in key chemistry concepts. Both chemistry and biology majors are then required to complete a course in Biochemistry. In addition, much of the research performed in the chemistry department at Georgia State University is biologically oriented with most of the faculty specializing in some subfield of biochemistry (biophysical, bioanalytical, bioorganic or medicinal chemistry). Since all of the biology majors and a large number of chemistry majors will be involved in learning and researching biologically related topics, we believe that linking the common concepts in biology and chemistry together will facilitate the understanding and relevance of the topics in General Chemistry and help students better integrate the two disciplines. To facilitate this process, we are analyzing the topics covered in General Chemistry I and II in order to determine which topics have biologically relevant examples that can be easily added to the curriculum without taking away from the chemistry department’s mission as an American Chemical Society (ACS) certified program. The addition of biological examples and illustrations will help students make connections between the chemistry and biology. We hypothesize that adding biologically-related material will require the “weeding out” of some traditional topics which are no longer relevant, thus allowing a greater emphasis on the more relevant topics. This is the most recent addition to our action plan and is still in the infancy stages. Analysis of the Effect of Action Plan A ten year analysis of the 1151 course shows an increase from 239 students in 1998 to 361 students in 2008 (51% increase). During that time the class sizes have grown while DFW rates have decreased from 25.5% to 18.6%. The ACS scores are slightly higher. A ten year analysis of the 1152 course shows an increase from 208 students in 1998 to 333 students in 2008 (60% increase). During that time the class sizes have grown while DFW rates have decreased from 23.5% to 20.1% in 2007. In 2008 the department saw a spike in the DFW rate for 1152 up to 35.7%. The ACS scores are statistically the same. Most of the gains in DFW rates have occurred over the past 5 years. Below is a graph with the ACS scores for both classes over the past 10 years. Departmental goals are 50% percentile or better. A ten year analysis of the 1211 course shows an increase from 497 students in 1998 to 779 students in 2008 (57% increase). During that time the class sizes have grown while DFW rates have decreased from 44.2% to 10.5%. The ACS scores are statistically the same (1211 was first given in 2001). A ten year analysis of the 1212 course shows an increase from 319 students in 1998 to 622 students in 2008 (95% increase). During that time the class sizes have grown while DFW rates have decreased from 34.2% to 11.4% in 2008. The departmental goals in ACS scores for both classes over the past 10 years are statistically the same as in 1998. Below is a graph with the ACS scores for both classes over the past 10 years. Departmental goals are 50% percentile or better. A ten year analysis of the 2400 course shows an increase from 391 students in 1998 to 645 students in 2008 (65% increase). During that time the class sizes have grown while DFW rates have decreased from 38.2% to 31.9%. A ten year analysis of the 3410 course shows an increase from 196 students in 1998 to 564 students in 2008 (188% increase). There has
been a slight drop in ACS scores over this 10 year period. Upper Division Courses for Majors An analysis of all 4000 level courses required of majors indicates that all courses have less than a 15% DFW rate. The number of students taught in the past ten years has increased with the number of students taking four of the seven courses (4000, 4120, 4190 and 4600) was over double what was taught ten years ago. The ACS scores for the physical chemistry sequence have remained statistically the same as ten years ago and the number of sections offered has not changed. Freshman Retention Statistics In 2002 40 incoming freshman indicated that they were chemistry majors, of these 40 students 35 were still enrolled in the university in fall of 2003 (88%). After 6 years of the initial 40 students 18 (45%) had graduated with a degree (not necessarily in chemistry) and 7 (18%) were still enrolled in a program at Georgia State University. Unfortunately the university defines retention by completing a program which means there is no way to track what the students’ final major was. In fall 2007 a total of 65 students entered declaring as chemistry majors. As of Fall 2008 62 (95%) were still enrolled at Georgia State University. The 2007-2008 retention rate for freshman was the highest of any program with 10 or more majors in the College of Arts and Sciences. Again there is no way to tell if these students are still declared as chemistry majors or if they have changed majors as the University tracks only students that are retained in the University. Much of the improved retention at the Freshman level can be attributed to three programs that have been implemented in the past three years; increased opportunities for advisement, direct dialogue between the university advisors and the department, and an increase in faculty and staff that advise. The most common complaint among students in 2006 was the difficulty to schedule advisement appointments. Since 2007 there are advisement sign-up sheets outside the Undergraduate Director’s door so that students will not have to e-mail or call to make appointments. One of the major problems that the department has attempted to deal with with mixed success is the misinformation that is given to students by university advisors. This group includes the student advisement center, the FLC advisors and the Honors program advisors. Most of the problems have been solved by asking each of these groups to have students register for math and science courses based on departmental recommendations found on the web. We are still dealing with a few issues with the Honors program advisors that will hopefully be corrected during the upcoming registration for Fall 2009. The addition of an Undergraduate Coordinator has not only given the department another person capable of advisement at the Freshman level but has increased the amount of time that the Undergraduate Director can spend on advisement and other issues by shifting some of the workload.

Service to the External Community—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

Glactone Program for elementary school students, Science olympiad.

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

---

**Mission / Purpose**

Critical thinking through writing is demonstrated within Computer Information Systems by the ability to: Identify problems (and in some cases, opportunities) before they become critically important or demanding of immediate attention to ameliorate and address; typically these problems relate to organizational work processes and workflows that could best be addressed through computer-based solutions; Identify multiple, innovative, and creative solutions to these problems; typically these solutions are formulated as multiple alternative designs for computer-based solutions to the problem(s); Evaluate the possible solutions to these problems in such a way to rank order them, from best to worst, in terms of their relative efficacies and inherent costs in brokering the “best” solution; Exhibit a concern for, and appreciation of, pursuing solutions that are characterized by ethical and social responsibility; Propose an effective approach to implement the “best” solution. This CIS definition of CTW maps to the University’s definition in the following ways. A wide range of cognitive skills are required to perform the CIS behaviors. This includes identifying, analyzing, and evaluating arguments and truth claims (points 1-3); The need to recognize ethical and social responsibilities is addressed in point 4; Identifying problems, solutions, and evaluating solutions requires the formulation and expression of convincing reasons in support of conclusions; and The exhibition of reasonable, intelligent decisions is also embedded in points 1-2 and point 5 of the CIS definition.

**Goals**

**G 1: Improve Critical Thinking with a focus on Information Systems**

Improve Critical Thinking with a focus on Information Systems

**Measures, Targets, and Findings**
**M 1: CIS 4980 System Development Project Capstone (O: 1, 2, 3, 4)**

The CTW assignment captures either as a Wiki or, if non-disclosure is required, a Word document the student's analysis of the project's goal, potential solutions, ethical and social issues, and the selection of the best solution. Students also analyze and give suggested improvements to at least one team member on their draft of this assignment. The Spring 2011 instructions document is linked below. Sample solutions from previous semesters are provided.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Articulate Requirements and Constraints**

The CIS CTW Rubric Fall 2012 changed the scoring range to 1 through 5. The new targets set are an average of 4 with fewer that 20% making less than 4.

**Findings 2012-2013 - Target: Met**

Results for Fall 2012 & Spring 2013 are an overall average of 4.07 with only 14% making less than 4.

**Target for O2: Identify and Evaluate Potential Solutions**

The CIS CTW Rubric Fall 2012 changed the scoring range to 1 through 5. The new targets set are an average of 4 with fewer that 20% making less than 4.

**Findings 2012-2013 - Target: Partially Met**

The overall average was 3.9 with 32% less than 4.

**Target for O3: Consider Ethical and Social Issues**

The CIS CTW Rubric Fall 2012 changed the scoring range to 1 through 5. The new targets set are an average of 4 with fewer that 20% making less than 3.75.

**Findings 2012-2013 - Target: Not Met**

The overall average was 3.9 with 30% less than 4.

**Target for O4: Select Best Solution with Justification**

The CIS CTW Rubric Fall 2012 changed the scoring range to 1 through 5. The new targets set are an average of 4 with fewer that 20% making less than 3.75.

**Findings 2012-2013 - Target: Not Met**

The overall average was 3.9 with 31% less than 4.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Guage CIS Progress From Entry to Exit CTW Courses**

CIS needs to coordinate with BUSA 3000 to gather the information needed to evaluate progress from the entry level CTW BUSA 3000 to the CIS exit level CIS 4980 / CIS 4970.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** Medium
- **Implementation Description:** As stated above, coordinate with BUSA 3000 to gather the information needed to evaluate progress from the entry level CTW BUSA 3000 to the CIS exit level CIS 4980 / CIS 4970.
- **Projected Completion Date:** 04/2014
- **Responsible Person/Group:** CIS CTW ambassador (working with the MGS CTW ambassador).

**Analyze CTW lower scores**

The CIS 4980 enrollment has experienced a substantial increase going from 29 in Fall 2011 to 42 in Fall 2012. This substantially increased the load on our CTW GRA. During Fall 2013, student and CTW GRA interaction will be assessed to consider whether more efficient and effective methods can be employed.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** Medium
- **Projected Completion Date:** 02/2014
- **Responsible Person/Group:** CTW ambassador & faculty working with the CTW GRA(s)

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The findings were successfully captured as individual elements within the rubric rather than as a consolidated single score. The comparison of CTW growth from the first CTW to this last CTW course (CIS 4980) was not accomplished. This action item has been retained with a new completion date of spring 2014. The enrollment in the CIS CTW courses has increased by over 44% over the last two years. More observations about this circumstance will follow.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

No improvements during this assessment period.
CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

Due to the increase in enrollment in the CIS CTW sections, additional CTW consultants were allocated for a single section. Findings fell perhaps partially due to the differing guidance and assistance given by the two CTW consultants (GRAs). This fall in finding values needs to be evaluated and addressed during the coming assessment period.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

CTW continues to focus students on the critical analysis and solution identification within the capstone projects. The individual component findings within the CIS CTW rubric will allow analysis of specific areas for improvement. CIS has begun to field part-time instructors for some CIS CTW sections. While these part-time instructors typically have substantial experience and insights to bring, their involvement within CTW will need to be addressed. Even if the coming multiple sections of CIS 4980 brought by the increased student enrollment in the CIS major are taught by full-time faculty, these full-time faculty will need to ramp up on how to successfully conduct the CTW component of this course.

**Mission / Purpose**

The mission of the computer science department is to educate students in fundamental topics like programming languages, data structures, algorithms, data base systems, computer architecture, communications, and software engineering. For Computer Science, critical thinking is defined as documentation, clearly stating assumptions, explaining logic for the chosen solution (through in-code comments), and testing solutions for correctness.

The computer science CTW plans are to have students evaluate and choose between alternate solution strategies. In this major, there are multiple ways to solve a given assignment. Often, there are several equally correct methods, however, there will also be methods that are not as good due to inefficiencies (in time, space, cost, or other resource), over-complexity, fragility (non-robustness), scalability, etc. Thus, for our majors, we interpret the statement "identify, analyze, and evaluate arguments and truth claims" to mean our students should clearly state their assumptions, explain (through in-code comments) their logic for the chosen solution, and test their solutions for correctness, completeness and accuracy. Testing (debugging) will allow them to "formulate and present convincing reasons in support of conclusions", i.e., they present a series of test cases and demonstrate that their solution (most likely computer code) functions as expected. Grading can include different test cases, defined by the instructor, that reveal faults in the students' assumptions. In other words, the test cases will allow the students to "discover and overcome personal prejudices" in the sense of their preconceived assumptions.

**Goals**

G 2: For Computer Science, critical thinking is defined as documentation, clearly stating assumptions, explaining logic with regards to the chosen solution (through in-code comments), and testing solutions for correctness, completeness and accuracy.

---

**Student Learning Outcomes/Objectives**

**SLO 1: Assignments to introduce CTW to our students (M: 1, 2)**

We use assignments to educate our students about writing and critical thinking. Included are a couple of examples of student project reports and programming assignments. From these reports we see the level of documentation expected for students in a capstone class. Two of the attachments are project directions, and the other two are examples of students' work. The computer science CTW plans are to have students evaluate and choose between alternate solution strategies. In this major, there are multiple ways to solve a given assignment. Often, there are several equally correct methods, however, there will also be methods that are not as good due to inefficiencies (in time, space, cost, or other resource), over-complexity, fragility (non-robustness), scalability, etc. Thus, for our majors, we interpret the statement "identify, analyze, and evaluate arguments and truth claims" to mean our students should clearly state their assumptions, explain (through in-code comments) their logic, and test their solutions for correctness. Testing (debugging) will allow them to "formulate and present convincing reasons in support of conclusions", i.e., they present a series of test cases and demonstrate that their solution (most likely computer code) functions as expected. Grading can include different test cases, defined by the instructor, that reveal faults in the students' assumptions. In other words, the test cases will allow the students to "discover and overcome personal prejudices" in the sense of their preconceived assumptions. [Preview Formatting]

**Measures, Targets, and Findings**

**M 1: Example projects, both assignments as well as students' work, are provided in the attached files. (O: 1)**

In the first computer science CTW class, students work on assignments throughout the semester. In the second class, they must form groups to prepare a project over the course of the semester. Example homeworks and final projects are attached.

Source of Evidence: Capstone course assignments measuring mastery

**Target for O1: Assignments to introduce CTW to our students**

Getting students to be able to think through a problem and thereafter come up with a most suitable algorithm/solution. Then be...
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continue having students doing documentation for programs

Explaining algorithms used to solve the problem, then implement that algorithm. Have all pre and post conditions listed for all (or at least) most of the functions used in a program. Also, attach a user guide for executing the program. Overall, continue on the same path we have been doing over the past year with the goal of maintaining our high level of turn out.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Surveys and student specifications

Next year, we plan to achieve the same level of excellence that we have accomplished this year. The classes are working very well,
so we plan to continue as is. I think that from reading the documentation submitted by the students, they are able to explain in detail what they are doing and how they are achieving their solutions to the problems. However, a few students did complain that the CTW is a waste of time and that they should not be graded for the documentation but just the program. But this is just a few students. A majority have indicated that by doing documentation, it better help them to develop solutions to their problems.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Implementation Description: Adjust the software engineering instructions to allow students more room to make the type of decisions that project managers make.
Responsible Person/Group: The CSc 4350 instructor(s).

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
I think the students are continuing to do better when it comes to planning the solutions to their programming assignment and projects.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Maybe being able to use more accurate grammar to express themselves, especially for science based students.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
As it is, I don’t think there is any areas for massive improvements. There is a need to enforce the level we are at especially in the second class. There is always room for growth in the first class because these are new students to the program every semester.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
None.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
None.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
None.

Annual Report Section Responses

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.
Everything will hopefully remain the same, because I think we are doing fine. The only changes is that we have increased the size of the CTW classes from 24 students per class to 39. We have added an extra TA to assist the Instructor.

Modifications in Measurement Methods—If you modified any of the measures or methods you use in the measurement process, please note those here.
No.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.
No.

Georgia State University
Assessment Data by Section
2012-2013 CTW Criminal Justice
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Goals

G 2: Generate coherent descriptions of extant knowledge
Students will explore, synthesize, and evaluate extant knowledge and scientific literatures on topics of interest to the field of criminal justice.
G 4: Identify ethical dilemmas in criminal justice decision making and processing
Students will become better at identifying moral dilemmas faced by criminal justice personnel and offenders.

G 3: Critically evaluate current issues in criminal justice
Students will become familiar with research processes, and will improve their evaluation skills.

G 6: Communicate effectively
Students will enhance their abilities to communicate their knowledge, analyses, evaluations, and decisions through writing.

Student Learning Outcomes/Objectives

SLO 1: Identify and state topical issues or hypotheses (G: 3, 6) (M: 1)
Students will demonstrate their ability to generate a thesis/hypothesis/statement of the problem in the generation of a critical analysis paper on a salient issue in the field of criminal justice.

SLO 2: Demonstrate knowledge and ability to synthesize information (G: 2, 3, 6) (M: 1, 2)
Students will demonstrate their retention of knowledge about the criminal justice system and salient topical issues in the field in written form. Students will effectively communicate facts about an issue and apply theoretical frameworks to demonstrate the depth of both their knowledge and their ability to critically synthesize relevant information about that specific topic in this paper.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 3: Application and analysis (G: 3, 6) (M: 1)
Students will develop and/or enhance skills in applying theoretical frameworks to contemporary issues in criminal justice. Students will be able to not only synthesize and interpret extant information, but also identify patterns within extant information, be able to compare and contrast different sides of a problem, and/or generate new predictions through their presentation in a written form.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 4: Generation of conclusions (G: 3, 4, 6) (M: 1)
Students will be able to develop meaningful conclusions from literature reviews and/or data analyses and/or be able to identify policy implication given the evidence available.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 5: Written communication (G: 6) (M: 1, 2)
Students will be able to effectively communicate their knowledge and analytical skills in written form (paper). Students will demonstrate the ability to effectively identify issues, develop and organize subtopics, and generate streamlined presentations of information. In addition, students will utilize appropriate grammar and syntax, as well as the ability to adhere to APA style guidelines.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 6: Identification of ethical issues (G: 3, 4) (M: 2)
Students should be able to identify and evaluate the criminal justice system and issues that arise within it.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings

M 1: Analysis of Criminological/Criminal Justice (CJ) Issue Essay (O: 1, 2, 3, 4, 5)
This essay is designed to test students' ability to critically evaluate an issue in criminology and/or criminal justice. Students will identify a single issue from the internship experience that involves crime or the criminal justice system and discuss why it is of interest. Students must define and clarify the issue and provide background information describing its significance. Students also must apply a relevant theoretical framework to demonstrate their ability to more formally analyze the issue. Finally, students must assess the impact/potential impacts of the issues on the criminal justice system and/or personnel working within it and/or offenders and/or victims of crime and present potential responses/solutions.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Identify and state topical issues or hypotheses
A goal is that by the end of their senior year (e.g., for the capstone seminar), 80% of students should be rated as an 4 or 3 in their ability identify and state topic issues or hypotheses. Additionally, 50% of students should be rated as a 4. Please reference the assessment rubric to identify the specific skill level denoted by these numeric levels. A separate goal is for 50% of the students to achieve increased scores (where possible) on the ID/Summarize Issue rubric dimension from the first to the final draft submission.
Findings 2012-2013 - Target: Met

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data All” contains data for these 89 students. At the end of the year, 89% of the students (n=77) enrolled in CRJU 4930 during the Fall 2012 or Spring 2013 semesters received a score of 3 or 4 on a 1-4 rubric scale on the ID/Summarize Issue dimension. Sixty percent of the students received a 4 on a 1-4 scale on the ID/Summarize Issue dimension. These scores correspond to the final draft of the paper and consistently show significant improvement over the first draft numbers in that 63% (n=56) either maintained the best possible score of 4 or showed improvement in their scores across the two submissions of the paper. Only 6% (n=5) had a decrease in score and 20% (n=18) showed no improvement when possible on this dimension (see attached rubric for skill levels associated with each rubric point).

Target for O2: Demonstrate knowledge and ability to synthesize information

The goal is that by the end of their senior year (e.g., for the capstone seminar), 80% of students should be rated as a 4 or 3 in their ability to comprehend and synthesize information. Additionally, 50% of students should be rated as a 4 in this rubric dimension. Please reference the assessment rubric to identify the specific skill level denoted by these numeric levels. A separate goal is for 50% of the students to achieve increased scores (where possible) on the Comprehend & Synthesize Information rubric dimension from the first to the final draft submission.

Findings 2012-2013 - Target: Partially Met

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data All” contains data for these 89 students. At the end of the year, 81% (n=72) of the students scored a 3 or 4 on a 1-4 scale on the Comprehend and Synthesis of Knowledge rubric dimension. Forty-six percent (n=41) of students received the highest score of 4 on this dimension. These scores correspond to the final draft of the paper and consistently show significant improvement over the first draft numbers in that 69% (n=61) exhibited an increase in the Comprehend and Synthesis of Knowledge rubric or remained at the highest score (4 of 4) between the first and final submission. Only 4% (n=4) exhibited a decrease and 28% (n=25) showed no improvement in the rubric score where improvement was possible (see attached rubric for skill levels associated with each rubric point).

Target for O3: Application and analysis

The goal is that by the end of their senior year (e.g., for the capstone seminar), 80% of students should be rated as an 4, 3, or 2 in their ability conduct application and analysis of criminal justice subject matter. Additionally, 50% of students should be rated as a 4 or 3 on a 46% (n=41) of students received the highest score of 4 on this dimension. These scores correspond to the final draft of the paper and show improvement over the first draft numbers in that 58% (n=52) either maintained the best possible score of 4 or showed improvement in their scores across the two submissions of the paper. Only 3% (n=3) exhibited a decrease and 36% (n=32) showed no improvement in the Application & Analysis rubric dimension score where improvement was possible (see attached rubric for skill levels associated with each rubric point).

Findings 2012-2013 - Target: Met

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data All” contains data for these 89 students. At the end of the year, 95% (n=85) of the students enrolled in CRJU 4930 during the Fall 2012 or Spring 2013 semesters earned a score of 2, 3, or 4 on a 1-4 scale for the Application and Analysis rubric dimension. Eighty-two percent (n=73) of students received a score of 3 or 4, and one-third (n=29) of these students earned a score of 4 on this dimension. These scores correspond to the final draft of the paper and show improvement over the first draft numbers in that 58% (n=52) either maintained the best possible score of 4 or showed improvement in their scores across the two submissions of the paper. Only 20% (n=18) showed no improvement in the Application & Analysis rubric dimension score where improvement was possible (see attached rubric for skill levels associated with each rubric point).

Target for O4: Generation of conclusions

The goal is that by the end of their senior year (e.g., for the capstone seminar), 80% of students should be rated as a 4 or 3 in their ability to generate conclusions and implications pertaining to criminal justice subject matter. Additionally, 50% of students should be rated as a 4 in this rubric dimension. Please reference the assessment rubric to identify the specific skill level denoted by these numeric levels. A separate goal is for 50% of the students to achieve increased scores (where possible) on the Conclusions & Implications rubric dimension from the first to the final draft submission.

Findings 2012-2013 - Target: Partially Met

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data All” contains data for these 89 students. At the end of the year, 80% (n=71) of the students enrolled in CRJU 4930 during the Fall 2012 or Spring 2013 semesters received either a 3 or 4 on the ID/Summarize Issue dimension of the rubric. These scores correspond to the final draft of the paper and show improvement over the first draft numbers in that 46% (n=41) either maintained the best possible score of 4 or showed improvement in their scores across the two submissions of the paper. Only 7% exhibited a decrease and 47% showed no improvement in the Conclusions & Implications rubric dimension score where improvement was possible (see attached rubric for skill levels associated with each rubric point).

Target for O5: Written communication

The goal is that by the end of their senior year (e.g., for the capstone seminar), 80% of students should be rated as a 4 or 3 in their ability to use high quality written communication to convey ideas about criminal justice subject matter. Additionally, 50% of students should be rated as a 4 in this rubric dimension. Please reference the assessment rubric to identify the specific skill level denoted by these numeric levels. A separate goal is for 50% of the students to achieve increased scores (where possible) on the Writing Quality & Style rubric dimension from the first to the final draft submission.

Findings 2012-2013 - Target: Partially Met

There was 1 section of the capstone class (CRJU 4930) during Fall 2012 (n=43) and two sections in the Spring 2013 (n=42 and n=4). The attached file labeled “Capstone CRJU 4930 Rubric Data All” contains data for these 89 students. At the end of the year, 91% (n=81) of the students enrolled in CRJU 4930 during the Fall 2012 or Spring 2013 semesters earned a score of 3 or 4 on the Writing Quality & Style dimension of the rubric. Forty percent of the students earned a score of 4 out of 4 on this dimension. These scores correspond to the final draft of the paper and consistently show significant improvement over the first draft numbers in that 48% (n=43) either maintained the best possible score of 4 or showed improvement in their scores.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

### Continued data collection

We will continue to collect data on this component of critical thinking through the capstone seminar across instructors. We will increase our collection of data in different semesters to see if we have variance in assessment techniques across instructors. We want to determine if our overall rates are meeting our overall goals and to identify where discrepancies occur.

**Relationships (Measure | Outcome/Objective):**

- **Measurement Answer:** Analysis of Criminological/Criminal Justice (CJ) Issue Essay | Outcome/Objective: Application and analysis
- **Demonstrate Knowledge and ability to synthesize information** | Generation of conclusions | Identify and state topical issues or hypotheses | Written communication
- **Measure:** Critically Assess Ethical Issues in Criminal Justice | Outcome/Objective: Identification of ethical issues

**Projected Completion Date:** 05/2011  
**Responsible Person/Group:** Faculty involved with Capstone seminar in conjunction with CTW Ambassador.

### Emphasis on student improvement over time

Gradation was added to achievement outcomes to enhance standards. Second, a recent policy change mandating that CJ majors complete the Ethical Issues in CJ (CRJU 3060) before they are eligible to enroll in 4000 level electives raises the opportunity for linked assignments across CRJU 3060 and 4930. The department’s undergraduate committee will consider ways to introduce into CRJU 3060 an assignment that taps the Application and Analysis measure in order to allow for within and across student comparisons over a broader time frame.

---

**M 2: Critically Assess Ethical Issues in Criminal Justice (O: 2, 5, 6)**

This two-part writing assignment is designed to assess students' ability to identify an ethical issue facing the criminal justice system and then engage the extant literature to both locate and evaluate existing research on the topic. The same assignment was used in all 6 of the sections taught by the department in fall 2012 and spring 2013. Assignment #1 comes at the outset of the term. Students must identify an ethical issue of their choosing. Next, they must identify at least 3 scholarly sources that critically analyze the issue. They must create and justify criteria upon which they will assess the quality of each source and then apply these criteria. Toward the end of the term, after being exposed to various ethical thinking frameworks and critical assessments steeped in these approaches, the students revisit this assignment. They are required to think critically about the criteria and application of these criteria as applied to the same 3 sources and re-visit their assessments (see attached file named Ethical Issue Assignment). This assignment is also intended as an assessment of students' ability to express ideas in writing.

**Target for O2: Demonstrate knowledge and ability to synthesize information**

Our initial goal is for 50% of the students to achieve increased overall scores (where possible) in the Total Rubric Score across the initial (Assignment #1) and revised (Assignment #4) submissions for the Learning to Think Critically about Ethical Issues assignment (see attached Ethics in CJ Revision Assignment file for text of the two assignments).

**Findings 2012-2013 - Target: Met**

Of the 154 students who were enrolled in CRJU 3060 in the Fall 2012 or Spring 2013 semesters, 58% had an increase in their overall total rubric score across the initial and revised assignment for the Learning to Think Critically about Ethical Issues assignment (see attached rubric data for CRJU 3060).

**Target for O5: Written communication**

This is the third assignment of 3 in a junior level class, although it was only this year that the department was able to enact a policy that assures all 3000 level courses will be completed before they can proceed to register for 24 hours of 4000 level required or elective course work. The target is that 80% of student papers will be rated as a 3 (Acceptable) or 4 (Outstanding) on the Mechanics rubric dimension for the third assignment. Additionally, at least 25% should rate as a 4. Please reference the assessment rubric to identify the specific skill level denoted by these numeric levels.

**Findings 2012-2013 - Target: Not Reported This Cycle**

Instructors for CRJU 3060 did not track or collect individual rubric data for students in such a way as to measure the Mechanics rubric dimension individually. Accordingly, this measure is not assessed this year.

**Target for O6: Identification of ethical issues**

Our initial goal is for 50% of the students to achieve increased overall scores (where possible) in the Total Rubric Score across the initial (Assignment #1) and revised (Assignment #4) submissions for the Learning to Think Critically about Ethical Issues assignment (see attached Ethics in CJ Revision Assignment file for text of the two assignments).

**Findings 2012-2013 - Target: Met**

Of the 154 students who were enrolled in CRJU 3060 in the Fall 2012 or Spring 2013 semesters, 58% had an increase in their overall total rubric score across the initial and revised assignment for the Learning to Think Critically about Ethical Issues assignment (see attached rubric data for CRJU 3060).
**Oral presentation assignments**
CTW ambassador will encourage instructors to use rubric assessed oral presentation assignments to further enhance the medium through which students engage in critical thinking on topics related to ethical issues in criminal justice. The data for these rubrics will be reported for assessment purposes.

**Revision feedback in CRJU 3060**
Instructors of CRJU 3060 will be encouraged by the CTW ambassador to include a dimension of revision and resubmission for at least one of the 3 ethical issue assignments during the term.

**Develop set rubric for CRJU 3060 use**
The ad-hoc CTW committee will develop and present to the faculty a set array of rubrics to be used by all instructors teaching CRJU 3060. This will allow for more consistent feedback across all assignments but also allow for a book end assignment in CRJU 3060 and CRJU 4930.

**Add book-end assignment to CRJU 3060 and CRJU 4930**
The ad-hoc CTW committee has proposed a critical thinking writing assignment to be completed by students in CRJU 3060 and then again in CRJU 4930. Such an assignment will allow for improved within and across student tracking of progress. The assignment will be implemented in the 2013-2014 AY.

**Pilot Grammarly.com**
One instructor of CRJU 3060 will be piloting Grammarly.com in the 2013-14 school year for use with at least one of the assignments in CRJU 3060. The instructor will have students submit their assignments first to Grammarly.com with the requirement of reaching a particular threshold before being able to submit the assignment for a grade. The same instructor will use the same assignment in another section of CRJU 3060 without the aid of Grammarly.com and compare rubric scores on the Mechanics dimension to assess writing improvement with the help of Grammarly.com.
Revision to Rubric for Issue Essay in CRJU 4930
An ad-hoc CTW committee has been formed within the department to consider revisions to the rubric used for the Critical Issue Essay in CRJU 4930. We anticipate proposing to the faculty a series of more flexible rubrics that allow the assignment to be built and submitted in pieces over the course of the term as opposed to using a single complete draft submission process. This should allow for more nuanced feedback to students and make better use of CTW writing consultants.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Analysis of Criminological/Criminal Justice (CJ) Issue Essay | Outcome/Objective: Demonstrate knowledge and ability to synthesize information
- Generation of conclusions | Written communication

Implementation Description: An ad-hoc CTW committee has been formed within the department to consider revisions to the rubric used for the Critical Issue Essay in CRJU 4930. The committee is working on revisions to the rubric and hopes to have finalized changes during the 2013 school year.

Responsible Person/Group: CTW ambassador, ad-hoc CTW committee, CTW instructors

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
One of the major accomplishments was having students in CRJU 3060 meet the goal of 50% of students showing improvement across assignments. This assignment in which students complete a critical thinking assignment at the beginning of the semester and then again at the end (a "book-end" assignment) is a way for us to assess whether students are in fact better able to critically assess information as they progress in the CTW Ethics course. Having over 50% of students improving on this assignment is a true accomplishment. Further, we have developed a strategy for using this same assignment in CRJU 4930 and tracking student progress further as they are ready to exit the program. We plan to implement this process in the 2013-14 school year, which was one of our action items from last year.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
As noted, 58% of students enrolled in CRJU 3060 showed improvement in total rubric scores across the book-end assignments in that course. Further, in the CRJU 4930 Capstone course on the revision assignment, over half of all students improved on each rubric dimension except for the Writing dimension (on which 48% of students improved or received the highest score of 4 both times).

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
The writing component still seems to be the weakest element for our students. Students also seem to struggle with generating valid conclusions. In addition, we continue to try to develop and implement the most effective rubrics for both instructors and students.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
We have been more thoughtful this past year about developing and implementing a book-end assignment that is used in all sections of CRJU 3060 that can assess student improvement in a variety of dimensions from the beginning of class to the end of class. CTW has allowed us to see the importance of assessing change in student outcomes rather than assessing a single time-point. We plan to implement this same book-end assignment in the capstone course CRJU 4930 so that we can further assess improvement across dimensions. In addition, we plan on piloting the use of Grammarly.com in CRJU 3060 to assist in improving student writing as a result of CTW program assessment.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
We will be piloting Grammarly.com in CRJU 3060 in one section and comparing student outcomes on rubric scores in another section, specifically on the Mechanics/Writing dimension to see if the use of this software improves student writing ability.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
We will be piloting Grammarly.com in CRJU 3060 in one section and comparing student outcomes in another section on rubric data, especially on the Writing/Mechanics dimension to see if the software aids in improving student writing. We also will be piloting an assessment of basic math skills as well as knowledge in Criminal Justice and Criminology to be distributed to see if students are acquiring the knowledge and critical thinking skills we hope they receive in Intro to CJ (CRJU 1100) and Criminological Theory (CRJU 3410) and in their preparatory math class before enrolling in our Statistical Analysis in Criminal Justice Course (CRJU 3610).

Georgia State University
Assessment Data by Section
2012-2013 CTW Early Childhood Education
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
### Mission / Purpose

In Early Childhood and Elementary teaching, critical thinking is essential for evaluating teaching methods, advocating for "best practices," considering student assessment data, and expanding theory and practice to account for a variety of socio-cultural influences on children's development and learning. In addition to meeting the requirements of the University's CTW policy, we have aligned our CTW courses with specific American Psychological Association (APA) recommendations related to the development of critical thinking skills in the undergraduate Bachelor of Science in education (hereafter referred to as BSE) program. We operationally define and assess critical thinking as outlined by the APA, such as students' ability to "evaluate the quality of information, including differentiating empirical evidence from speculation," "use reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals," and "demonstrate an attitude...of persistence, open-mindedness, tolerance for ambiguity, and intellectual engagement" (APA, 2007, p. 15).

### Goals

**G 1: Informed teachers who evaluate information**

1. Our graduates will be informed teachers who “evaluate the quality of information, including differentiating empirical evidence from speculation” (APA, 2007, p.15).

**G 2: Informed teachers who use reasoning to recognize, develop, defend, and criticize**

1. Our graduates will be informed teachers who “use reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals” (APA, 2007, p.15).

**G 3: Informed teachers who demonstrate attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement**

1. Our graduates will be informed teachers who “demonstrate an attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement” (APA, 2007, p.15).

### Student Learning Outcomes/Objectives

**SLO 1: Demonstrate developing awareness and use of evaluation methods to think critically in hybrid learning environments**

Our graduates will be able to demonstrate developing awareness and use of evaluation methods to think critically in hybrid learning environments

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 2: Recognize, develop, defend, and criticize arguments based on experiences, readings, and conversations**

Our graduates will be able to recognize, develop, defend, and criticize arguments based on experiences, readings, and conversations.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 3: Demonstrate an attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement**

Our graduates will be able to demonstrate an attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement through writing, revision, and collaborative experiences that support the exploration of their literacy pedagogy, practice, and current trends and issues impacting education.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### Measures, Targets, and Findings

**M 1: Measure for Early Childhood Education BSE CTW Assignments (O: 1, 2, 3)**

Aligning our measure with our goals and objectives, critical thinking indicators are presented in rubric format. The rubric is broken down by objective to allow for greater instructor understanding of evidence of critical thinking. Each CTW assignment was assessed for evidence of critical thinking using this measurement scale. Please see Measurement Scale for Early Childhood Education BSE Program attached.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Demonstrate developing awareness and use of evaluation methods to think critically in hybrid learning environments**

At least 50% of students will score a 5 on the Measurement Scale for Early Childhood education BSE CTW Assignments.

**Findings 2012-2013 - Target: Met**

For each CTW assignment we exceeded our target of 50% of students scoring a 5 on the measurement scale demonstrating developing awareness and use of evaluation methods to think critically in hybrid learning environments. Assignment 1: Exploring Children's Literature. Eighty-five percent of students mastered indicator 1, aligned specifically with Outcome 1. Additionally, 90% of students mastered indicator 2, aligned specifically with Outcome 1. Assignment 2: Literacy Autobiography (Fall 2012 assignment only). Seventy-five percent of students mastered indicator 1, aligned specifically with Outcome 1. Additionally, 80% of students mastered indicator 2, aligned specifically with Outcome 1. Assignment 3: Literacy Outreach (Fall 2012 assignment only). Seventy-nine percent of students mastered indicator 1, aligned specifically with Outcome 1. Additionally, 90% of students mastered indicator 2, aligned specifically with Outcome 1. Assignment 4: Good Writes (Spring 2013 assignment only). Eighty percent of students mastered indicator 1, aligned specifically with Outcome 1. Additionally, 90% of students mastered indicator 2, aligned specifically with Outcome 1. Assignment 5: Multimodal Compositions/Freedom Composers (Spring 2013 assignment only). Ninety-five percent of students mastered indicator 1, aligned specifically with Outcome 1. Additionally, 90% of students mastered indicator 2, aligned specifically with Outcome 1.

**Target for O2: Recognize, develop, defend, and criticize arguments based on experiences, readings, and conversations**

At least 50% of students will score a 5 on the Measurement Scale for Early Childhood education BSE CTW Assignments.

**Findings 2012-2013 - Target: Met**

For each CTW assignment we exceeded our target of 50% of students scoring a 5 on the measurement scale recognizing, developing, defending, and criticizing arguments based on experiences, readings and conversations. Assignment 1: Exploring Children's Literature. Seventy percent of students mastered indicator 3, aligned specifically with Outcome 2. Assignment 2: Literacy Autobiography (Fall, 2012) 65 percent of students mastered indicator 3, aligned specifically with Outcome 2. Assignment 3: Literacy Outreach (Fall, 2012) 65 percent of students mastered indicator 3, aligned specifically with Outcome 2. Assignment 4: Good Writes (Spring, 2013) 60 percent of students mastered indicator 3, aligned specifically with Outcome 2. Assignment 5: Multimodal Compositions (Spring, 2013) 75 percent of students mastered indicator 3, aligned specifically with Outcome 2.

**Target for O3: Demonstrate an attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement**

At least 50% of students will score a 5 on the Measurement Scale for Early Childhood education BSE CTW Assignments.

**Findings 2012-2013 - Target: Met**

For each CTW assignment we exceeded our target of 50% of students scoring a 5 on the measurement scale demonstrating an attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement. Assignment 1: Exploring Children's Literature. Sixty-five percent of students mastered indicator 4, aligned specifically with Outcome 3. Assignment 2: Literacy Autobiography (Fall 2012 assignment only). Fifty-nine percent of students mastered indicator 4, aligned specifically with Outcome 2. Assignment 3: Literacy Outreach (Fall 2012 assignment only). Sixty percent of students mastered indicator 4, aligned specifically with Outcome 3. Assignment 4: Good Writes (Spring 2013 assignment only) ninety percent of students mastered indicator 4, aligned specifically with Outcome 3. Assignment 5: Multimodal Composition/Freedom Composers (Spring 2013 assignment only) eighty-eight percent of students mastered indicator 4, aligned specifically with Outcome 3.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

Change rubric to reflect two critical thinking categories.

In looking at the scores, we realize that they may skew high because two critical thinking criteria were collapsed into one rubric category. By dividing the criteria into two categories, we feel that next year's scores will be a more accurate depiction of student critical thinking development.

**Established in Cycle:** 2010-2011
**Implementation Status:** Finished
**Priority:** High
**Implementation Description:** Beginning in Fall 2010, we will create 2 categories of rubric descriptors to better capture critical thinking in our students.
**Projected Completion Date:** 05/2011
**Responsible Person/Group:** CTW ambassadors in consult with faculty
GUMS (Grammar, Usage, Mechanics, and Style) Mentoring
CTW Support for Instructors and Consultants

We plan to continue holding formal training workshops for CTW consultants. Additionally, as new faculty teach CTW courses, we plan to mentor them through the CTW process of designing assignments and providing feedback alongside the CTW consultants so the instructors and consultants may better work together.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High
Implementation Description: Formal workshops will be held at the beginning of the semester and middle of the semester. A reflection session will occur at the end of each semester to better understand the strengths and needs of consultants and instructors during the course.
Projected Completion Date: 05/2013
Responsible Person/Group: CTW ambassadors
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

GUMS (Grammar, Usage, Mechanics, and Style) Mentoring
The BSE offers voluntary supplemental instruction consisting of face-to-face one hour meetings and online modules over the course of one semester. The instruction is offered by an instructor who was also a former CTW consultant for the ECE BSE program. During these one hour sessions, the GUMS instructor supports students to meet the measures identified above with a specific focus on developing as writers and teachers of writing.
Established in Cycle: 2012-2013
Implementation Status: In-Progress
**Priority:** High

**Relationships (Measure | Outcome/Objective):**
- Measure: Measure for Early Childhood Education BSE CTW Assignments | Outcome/Objective: Demonstrate an attitude of persistence, open-mindedness, tolerance for ambiguity and intellectual engagement | Recognize, develop, defend, and criticize arguments based on experiences, readings, and conversations

**Implementation Description:** Five, one-hour face-to-face sessions in which the students continue to practice and reflect upon specific grammar, usage, mechanics, and style techniques within the context of their own writing.

**Projected Completion Date:** 05/2014

**Responsible Person/Group:** BSE Writing Support Team

---

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The ECE BSE Program was successful in securing a full-time Clinical Assistant Professor position to support our students writing development. This position was designed due to CTW work and faculty members’ reflections on how CTW consultant support was seminal to the growth of BSE students confidence and self-identity as writers. We were thrilled to transition this writing support position to a full time position to better accommodate our students’ writing development.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

Initially, students were often uncomfortable with having the freedom and space to write in a variety of genres and modalities. Because they were consistently getting feedback (audio, face-to-face, and written) on their writing, they became empowered to use writing a space for critical thinking and creative exploration.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

We need a better pool of CTW consultants to draw from. Because the BSE focuses on students as writers as well as the teaching of young student writers, we need CTW consultants who better align with our philosophy.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?**

The ECE BSE Program was successful in securing a full-time Clinical Assistant Professor position to support our students writing development. This position was designed due to CTW work and faculty members’ reflections on how CTW consultant support was seminal to the growth of BSE students confidence and self-identity as writers. We were thrilled to transition this writing support position to a full time position to better accommodate our students’ writing development. The full-time Assistant Professor has helped the BSE faculty better understand our students as critical thinkers and writers across the curriculum.

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW Early Childhood Education (Birth through Five)**

**As of:** 12/12/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The Birth to Five program in the Department of Early Childhood Education considers critical thinking to be an important aspect of teacher education. We define critical thinking as a disposition toward thoughtful consideration of detail, evaluation of evidence, analysis of broad perspectives, and synthesis determined by a careful mix of cited and subjective conclusions. In teaching young children (birth to kindergarten), critical thinking is essential for understanding children’s development and learning, evaluating teaching methods, advocating for “best practices,” considering student assessment data, and expanding theory and practice to account for a variety of socio-cultural influences on children’s development and learning. It is only through critical thinking processes that the teacher understands the impact of his or her behavior in relation to a child's behavior and development.

**Goals**

**G 2: Application of Academic Knowledge**

Application Students will utilize critical thinking skills to apply information gleaned from in-class experiences and course readings to professional and ethical situations that require thoughtful analysis, evaluation, and application.

**G 3: Develop a Personal Philosophy**

Students will utilize their personal experiences and beliefs, course lectures and readings, and previous research to generate a personal philosophy about children’s early language and literacy development. Students’ emergent literacy and language philosophies will focus on both (1) how children develop these skills as well as (2) the best ways to promote such learning. Specifically, students are encouraged to detail pedagogical approaches to assist children in achieving strong language and literacy achievement.

**Student Learning Outcomes/Objectives**
SLO 2: Language and Literacy Philosophy (G: 3) (M: 3)

Students will critically reflect on their beliefs and experiences surrounding literacy and language development and pedagogy. They will relate course material (i.e., readings, lectures, practicum experiences and in class experiences) to develop an insightful language and literacy philosophy. Full Description In order to teach literacy, teachers must be readers and writers. We need to have opportunities as professionals to examine our own lives, our own literacy practices, and to do so in a context that helps connect these experiences to our roles as teachers and learners. To help you begin making these connections, you will be observing structured learning environments in the community, reading scholarly books and articles, and adding to your understanding through course lectures and discussions. Your emergent literacy and language philosophy is a 2-5 page essay describing your philosophy about literacy and language instruction for children from birth to age five. As you write your philosophy, think about your own educational experiences, beliefs, and understanding related to the way literacy and language should be taught and the way literacy and language are best learned. Think about your beliefs related to how children become literate and support your thinking with examples and research.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
3.0 Students effectively evaluate, make decisions, and apply evidence to support stance.

Institutional Priority Associations

2 Student promotion and progression

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

1.3 Implement an Undergraduate Signature Experience.

Measures, Targets, and Findings

M 2: Professional/Ethical Quick Write Rubric

Criteria Excellent (2 points) Satisfactory (1 points) Unsatisfactory (0-5 points)

Purpose Fully reflects on the issue/critically discusses the dilemma posed Reasonably reflects on the issue/generally discusses the dilemma posed Surface treatment of the issue at hand and/or failure to address dilemma/problems posed Support & Citations Strong use of course-related texts to support stance; uses citations appropriately Statements drawn from readings are over generalized or under analyzed; uses citations haphazardly Unjustified assumptions and/or opinions; little evidence that class topics/texts are understood; lack of citations or incorrect citations Evidence Uses specific examples and/or strategies to support stance An example or strategy was provided in support of stance No examples or strategies used to support stance Communication & Reader Engagement Easy to read; avoids meaningless jargon; writer clearly wants to engage reader Some errors make it harder to read; writer sometimes shows awareness of reader Errors make reading difficult; writer shows no awareness of reader and makes no attempt to engage reader's interest Inquiry & Flexibility Considers complex alternatives; creatively applies ideas to new situations Differing views are considered; same evidence ideas are applied to new situations Other views are not understood or considered; does not apply ideas to new situations

Total Score: /10

Source of Evidence: Written assignment(s), usually scored by a rubric

M 3: Emergent Literacy and Language Philosophy (O: 2)

To teach literacy, teachers must be readers and writers. We need to have opportunities as professionals to examine our own lives, our own literacy practices, and to do so in a context that helps connect these experiences to our roles as teachers and learners. To help preservice teachers begin making these connections, they observe structured learning environments in the community, read scholarly books and articles, and participate in course lectures and discussions about literacy and language learning. The emergent literacy and language philosophy is a 2-5 page essay describing preservice teachers' language and literacy instructional philosophy for children from birth to age five. As students write their philosophy, they are encouraged to think about their own educational experiences, beliefs, and understanding related to the way literacy and language should be taught and the way literacy and language are best learned. Specifically, teachers are encouraged to think about their beliefs related to how children become literate and are asked to support their thinking by citing relevant research and personal, classroom experiences. Criteria Strong (5-6 points) Satisfactory (2-4 points) Unsatisfactory (0-1 points)

Purpose The purpose of the paper is clear. The author effectively captures and reflects on constrained and unconstrained skills argument. Clear purpose. Reflects on the constrained and unconstrained skills generally. Surface treatment of constrained and unconstrained issue. Fails to adequately identify purpose of argument. Support & Citations Strong use of course-related articles and texts to support argument; uses citations appropriately Statements drawn from readings are either under or over generalized. Citations are not consistently used. Unjustified assumptions and/or opinions; little evidence that class topics/texts are understood; lack or incorrect use of citations Evidence Examines the evidence and questions/probes its accuracy and relevance. Identifies not only the basics of the issue, but recognizes nuances of the issue or author's viewpoint. Examines the evidence in general terms but without substantial referent to research support or connection with other readings. Little understanding of the issues demonstrated. Fails to distinguish between fact, opinion, and value judgments. Communication & Reader Engagement Paper is easy to read and intent is clearly understood; avoids meaningless jargon Some errors make it harder to read; writer sometimes shows awareness of reader Errors make reading difficult; writer shows little awareness of reader and little attempt to appropriately engage reader's interest Inquiry & Flexibility Considers complex alternatives to problems posed. Creatively applies ideas to new situations or examples. Differing views are considered; same evidence ideas are applied to new situations Other views are not understood or considered; does not apply ideas to new situations

Total Score: /30

Source of Evidence: Written assignment(s), usually scored by a rubric
Emergent Language and Literacy Philosophy Evaluation

Student performance on this objective was high for the first semester of implementation. The utilization of class time and the opportunity to receive feedback on drafts assisted students in thinking and writing about their emergent literacy and language development. Additionally, scaffolds, or teacher and program supports, for students as they completed their CTW assignments. These scaffolds focus on (1) content and mechanics of their writing.

Emergent Literacy and Language Philosophy

During the 2012 academic year, we focused our attention on examining how our student outcomes (i.e., the quality of work our students were producing in their CTW courses and assignments) were related to the nature of the writing assignments, rubrics, and the time and support we gave students to revise their writing. Although we believe students were making considerable progress in their ability to use critical thinking in their writing, based upon our discussions and goals for last year, we still feel that our students should be making greater progress in their writing (in both content and form) during their two CTW courses. After meeting as a faculty and examining the CTW materials for both courses, we determined that we needed to make some changes to courses in order to ensure that our students have sufficient time and support in their writing. These changes were related to our challenges discussed in our 2011-2012 report and a result of our action plans. Specifically, we adjusted the amount of support we offered students in the summer, BRFV 4370 course, and we developed additional materials and assignments supports for the BRFV 3250 course. As a result of these changes, we believe that we have made considerable progress toward improving clarity and impact of our CTW goals during 2012-2013. We continued our re-envisioning process by fine-tuning our assignments to clearly align with course outcomes and professional standards for the Language, Literacy, and Cognition course (BRFV 4370) and the Professional Development and Ethics (BRFV 3250) courses and by providing students with additional faculty initiated supports to assist them in improving the clarity, content and mechanics of their writing. Our final accomplishment this year was to design and implement a number of additional scaffolds, or teacher and program supports, for students as they completed their CTW assignments. These scaffolds focus on (1) providing additional instruction and support to students about the mechanics of academic writing, with specific attention to how to build an argument and cite sources academically, and (2) allowing students additional opportunities to give and receive peer feedback through in class discussions and small group work.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

During the 2012 academic year, we focused our attention on examining how our student outcomes (i.e., the quality of work our students were producing in their CTW courses and assignments) were related to the nature of the writing assignments, rubrics, and the time and support we gave students to revise their writing. Although we believe students were making considerable progress in their ability to use critical thinking in their writing, based upon our discussions and goals for last year, we still feel that our students should be making greater progress in their writing (in both content and form) during their two CTW courses. After meeting as a faculty and examining the CTW materials for both courses, we determined that we needed to make some changes to courses in order to ensure that our students have sufficient time and support in their writing. These changes were related to our challenges discussed in our 2011-2012 report and a result of our action plans. Specifically, we adjusted the amount of support we offered students in the summer, BRFV 4370 course, and we developed additional materials and assignments supports for the BRFV 3250 course. As a result of these changes, we believe that we have made considerable progress toward improving clarity and impact of our CTW goals during 2012-2013. We continued our re-envisioning process by fine-tuning our assignments to clearly align with course outcomes and professional standards for the Language, Literacy, and Cognition course (BRFV 4370) and the Professional Development and Ethics (BRFV 3250) courses and by providing students with additional faculty initiated supports to assist them in improving the clarity, content and mechanics of their writing. Our final accomplishment this year was to design and implement a number of additional scaffolds, or teacher and program supports, for students as they completed their CTW assignments. These scaffolds focus on (1) providing additional instruction and support to students about the mechanics of academic writing, with specific attention to how to build an argument and cite sources academically, and (2) allowing students additional opportunities to give and receive peer feedback in their writing. We believe these two changes will allow students to more critically reflect on their writing practices.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

During the 2012-2013 academic year, improvement in student critical thinking through writing was evident in both the quality of student work, during the semester and student improvement from year to year. For example, BRFV students considerably improved the quality of their work from first drafts to final drafts on their BRFV 4370, Emergent Literacy, Language, and Philosophy paper. For example, students significantly improved their Emergent Literacy and Language Philosophies during the redrafting process with students, on average, increasing the quality of their writing by 47% points. This increase was slightly higher than last year’s increase and students’ ended the semester with higher scores than last year’s group. In BRFV 3250, learning was evident in students’ responses to the Professional and Ethical Practice Quick Write assignments. These assignments, in response to specific ethical and professional dilemma prompts, allow students opportunities to revise and redraft their work three times during a week’s time. Students made significant progress from first drafts to final drafts, as evidenced by 94% of students achieving assessment targets (a 9 out of 10) on the quick write assignments on their final drafts. This is a 4% increase from last years report. In addition to change over time in students’ performance on CTW assignments, course instructors in non CTW courses noted that students demonstrated improvement in their critical thinking and writing. Although concerns still exist about the overall quality of students' critical thinking and writing, these anecdotal data are encouraging as they help to reinforce the notion that students may be transferring what they are learning through their CTW courses into other coursework. During the last academic year, BRFV faculty met to discuss additional opportunities for students to practice critical thinking through writing in other BRFV courses. We continue to brainstorm and implement programs and supports in order to help students develop critical thinking through writing skills.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

As a result of significant changes made to CTW assignments in 2011-2012, we spent time in 2012-2013 studying these changes and discussing their impact on student learning outcomes. Because BRFV 4370: Language, Literacy, and Cognition is a summer course,
one challenge we continue to struggle with is the limited time that students have for practicing, thinking about, and revising their writing. The shortened time frame of the summer semester also makes it challenging for faculty to give quick enough feedback to students to assist them in improving their writing. To address this challenge, peer editing and feedback were incorporated into the BTFV 4370 course. Students were placed into “peer writing support” groups designed to give them additional accountability, insight, and practice into their own and other students’ writing. Peer writing support groups appeared to be effective for many students in that they demonstrated quite a bit of growth, and increased understanding of the writing process, based upon experiences they had while reviewing other students’ work and/or being able to provide feedback. Students shared with the instructor that this experience helped them consider new perspectives, provided an opportunity to consider ways to integrate emergent literacy and language theory into their writing, and allowed them to make strong personal connections between their teaching, research, and their writing. For many students, this awareness was applied to their final CTW draft via the addition of details, relevant personal experiences, and the incorporation of academic resources. Despite these experiences, not all students made considerable improvement in their CTW drafts. A few students did not appear to make a significant shift in their writing. In response to this challenge, additional class time and out-of-class writer’s workshop time & support will be offered to all students, particularly those that don’t seem to be improving considerably between CTW drafts. In addition, a checklist will be created to assist students in the peer review process. This checklist will align with the rubrics currently in use in the course to evaluate student CTW work and will give students to self-reflect on their writing as well as reflect on the quality of other students’ work. It is believed that these changes will improve the quality of students’ drafting and editing process which, in turn, should strengthen their final drafts. Different challenges face students CTW work in BRFV 3250. Professional and Ethical Practice Quick Writes (BRFV 3250). As this is the first CTW course that the majority of students take, instructors have shared concern about the quality of writing and editing that students demonstrate upon entrance to the course. Although students demonstrate considerable improvement on critical thinking through writing activities during the course, concerns remain regarding the general writing abilities of students. As a BRFV faculty, we believe that students need (1) additional attention to and instruction about college writing and (2) opportunities to align CTW assignments with coursework and field experiences. In response to these concerns, we have recently revised BRFV 3250 quickwrite prompts to more effectively address course content and students’ field experiences. In addition, we plan to address CTW related content in other courses, particularly students’ first few courses, to build student knowledge of ethical writing practices (e.g., plagiarism) and how to write for an academic audience (e.g., mechanics, APA citations, etc.).

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

The BRFV CTW courses have been essential to our implementation of pedagogical practices that contribute to the critical thinking, writing skills, and dispositions that we expect a teacher of young children to possess. CTW has impacted the way that we think about student development and achievement and has helped us reshape our assessment practices to focus on timely, explicit, and objective feedback. For example, as noted earlier in this report, we have revised assignments and faculty supports to more explicitly address CTW goals and objectives. Further, we have developed opportunities for students to use self-reflection and peer critique in their CTW writing. Although these practices require a significant investment of time from CTW instructors, as they provide additional support and out of class support to students, we believe that the impact of these practices out weigts the cost. An additional instructional/intervention support that we emphasized this academic year was to provide students with more explicit information on correct citation of sources during writing activities and additional information regarding plagiarism. This module, developed by two co-instructors from BRFV 3250 has assisted us in being more explicit regarding ethical writing practices and plagiarism considerations. This information is crucial in assisting our students in developing critical thinking skills about the nature of information and how to effectively, and appropriately, utilize such resources, particularly as they gain more access to online resources that may or may not be trustworthy. One final practice that we plan to implement in the coming year is to tie student submissions to a self-assessment of their critical thinking through writing tools. We, as a Birth through Five faculty, highly value student self-assessment practices and believe that students will improve the nature of their CTW assignments if they are given opportunities to reflect on how their writing relates to the rubrics provided them. To this end, we will provide students with self-assessment checklists that align with CTW rubrics that will help guide student writing and redrafting. We plan to study the utility of these checklists in the coming year.

Georgia State University
Assessment Data by Section
2012-2013 CTW Econ
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
Economics is the study of how best to allocate scarce resources. Economics is an academic discipline that is central to the offerings of all major universities. As at most universities, economics plays an essential role in the general education required of all undergraduates, extending well beyond our undergraduate majors to essential courses in the core curriculum required of all GSU students, especially those majoring in business. At the Andrew Young School of Policy Studies at Georgia State University, it is the fundamental mission of the Department of Economics to contribute to the advancement of knowledge in our discipline, to share that knowledge with our students, and help them develop their critical thinking skills. The CTW components, embedded in problem sets for ECON 3900 and a book review and quizzes in ECON 4999, require the students to assess and evaluate concepts in economics as they relate to the real world and to be able to recognize (1) how economic theory relates to policy and (2) how many classical assumptions in economics do not apply in reality yet can still be a useful point of departure.

Goals
G 1: relate economic theory to policy
Students will recognize how economic theory relates to policy.

G 2: relevance of classical assumptions in economics
Students will recognize the relevance of classical assumptions in economics, and how they may not apply in reality yet can still be a useful point of departure.
Student Learning Outcomes/Objectives

SLO 1: ECON 4999: Book Review (G: 1, 2) (M: 1)
Assignment The assignment is the book review in Econ 4999. Students submit the two drafts and a final book report. We give them feedback on each draft. Our fairly detailed comments (feedback) are issues we expect them to fix before the next submission cycle. The grading is based on a rubric (the same one we have used for the past several years). We maintain a copy of the comments we give on each draft. We rate the drafts and the final report based on the rubric (on a scale of 1 – 4) Assessment There two critical thinking components embedded in the book review assignment: Economic Concepts: this requires students to read a (mostly) non-economics book and be able to recognize and tie-in at least two economic concepts. For example, if a student reviews a novel where a character had to make a tough choice, the student should be able to recognize opportunity cost/trade-offs as a relevant economic concept. Another common concept relates to the role of incentives – where rewards or penalties changed behavior. Valid own opinion: the component of the assignment requires a student to provide a valid opinion about the book. This is not about whether they enjoyed reading the book, but more of “why they enjoyed or didn’t enjoy reading the book”. Students are also expected to write about any lessons we can take from the book, and how relevant the story is to contemporary life, etc.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings

M 1: ECON 4999 Book Review Rubric (O: 1)
See attached document for the rubric for the ECON 4999 book review. Each of the first 2 book review drafts is rated based on the criteria outlined on the rubric (i.e. Introduction, Book explanation, Economic Concepts, Structure of the book review, and valid opinion/conclusion). The Critical Thinking components of the assignment are mainly embedded in the "economic concepts" and "valid opinion" parts of the assignment. So we pay closer attention to these components. Our measures are based on the ratings on each of these components. A "1" is assigned for "missing information", a "2" for "incomplete or lack of clarity", a "3" for "complete but needs minor revision" and a "4" for "complete, appropriate, no changes needed". We measure progress in critical thinking (between drafts) by the changes in ratings on the Critical thinking components of the assignment (economic concepts and valid opinion) as well as overall book review grade.

Source of Evidence: Capstone course assignments measuring mastery

Target for O1: ECON 4999: Book Review
Targets (the first two of these targets are solely based on the final paper) At least 80 percent of students score a rating of 3 (out of 4) or better on the “economic concepts” component of the assignment. At least 80 percent of students score a rating of 3 (out of 4) or better on the “valid own opinion” component of the assignment. From the first draft to the final paper, there should be a significant improvement of at least 50 percent in the number of students scoring a rating of at least 3 (out of 4) on the two CTW components of the assignment – “economic concepts” and “valid own opinion”.

Findings 2012-2013 - Target: Met
Targets met? We met target 1: 90 percent of the students scored a rating of at least 3 on the “economic concepts” component of the assignment - thus exceeded the target of 80 percent. We met target 2: 86 percent of students scored a rating of 3 or better on the “own opinion” component of the assignment. We partially met target 3: We observe a significant improvement on the critical thinking components of the assignment between the first draft and the final paper. The percentage of students that scored a rating of 3 (or better) on the “economic concepts” component of the assignment increased by 47.5 percent. Although this falls short of the 50 percent target, it’s evident that the feedback provided on the first and second drafts helped students’ critical thinking through writing skills. The percentage of students scoring a rating of 3 (or better) on the “valid opinion” component of the assignment increased by 168.75 percent between the first draft and the final paper. This way exceeds the 50 percent target. See the attached file for a graphical representation of the findings.

M 2: ECON 3900 Short Assignment 1 Rubric (O: 2)
Respond to prompts about applications of macroeconomic theory. See attachment for rubric used to assess such an assignment.

Source of Evidence: Written assignment(s), usually scored by a rubric
**Target for O2: ECON 3900 Short Assignment**

Students should show improvement from the first draft to the second draft of the assignment.

**Findings 2012-2013 - Target: Not Reported This Cycle**

Coming soon! :)

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**incorporate Critical Thinking Through Writing (CTW) elements into two required major courses**

The economics department plans to incorporate Critical Thinking Through Writing (CTW) elements into the following two required major courses: ECON 3900 (Macroeconomics) and ECON 4999 (Senior Capstone in Economic Policy). The CTW components, embedded in problem sets for ECON 3900 and a book review and quizzes in ECON 4999, require the students to assess and evaluate concepts in economics as they relate to the real world and to be able to recognize (1) how economic theory relates to policy and (2) how many classical assumptions in economics do not apply in reality yet can still be a useful point of departure. All CTW assignments will be redone after students incorporate the feedback they have been given by the instructor.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High

**Set more specific targets and establish more formal assessment reporting procedures**

Formal targets were not set this year. There were many different instructors for ECON 3900, and each of them had slightly different approaches to working CTW into their course, although all of them were appropriately working it into their course in some way. The ECON 4999 has more consistency across sections in terms of which specific assignments are done and how they are reported. More discussion needs to take place to set specific targets and more formal assessment reporting procedures for the ECON 3900 course across all sections.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** Meet with all ECON 3900 instructors to discuss.
- **Projected Completion Date:** 12/2010
- **Responsible Person/Group:** CTW Ambassadors and ECON 3900 instructors

**working with CTW consultants**

Several CTW instructors have expressed concern about the ability of CTW consultants to provide good and clear feedback to students on CTW assignments. Often times their comments on assignments are not clear or are written in a way that does not encourage students’ critical thinking. But even more concerning for Economics CTW instructors is that they don’t get to keep the same CTW consultant for more than a few semesters (at best). Most of our CTW consultants are Masters students (often in their second year). So going forward, we need to think about the most effective ways to train consultants so that instructors do not have to train a new consultant every semester.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** Training workshops for CTW consultants. We are encouraged by the University CTW Office’s plans to conduct training workshops for CTW consultants.
- **Responsible Person/Group:** Economics CTW ambassadors, economics department administration, GSU CTW office

**get more assessment data for ECON 3900**

This year, we only got assessment data from one ECON 3900 instructor. In the future, we want to get more instructors actively involved in the assessment of ECON 3900.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** meet with ECON 3900 instructors to discuss plans for assessment in future
- **Projected Completion Date:** 06/2013
- **Responsible Person/Group:** undergraduate program committee, CTW ambassadors, ECON 3900 instructors

**change ECON 4999 course**

We have plans to revise the ECON 4999 course to allow for a more flexible format which should allow more instructors to teach the course. This should help with the excess demand we usually have for the course.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 06/2014
- **Responsible Person/Group:** ECON Undergraduate Program Committee

**keep working for more consistency in ECON 3900**

We have several different instructors for ECON 3900 and the quantity and quality of assessment data we get from them is highly variable. We need to work with them to gather more useful assessment data from them all on a more consistent basis.

- **Established in Cycle:** 2012-2013
- **Implementation Status:** In-Progress
- **Priority:** High
- **Projected Completion Date:** 06/2014
- **Responsible Person/Group:** ECON CTW Ambassadors
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
We had no new instructors for ECON 3900, which is helpful for the instructor turnover we have experienced in that course in the past, and was part of our action plan from last year. We still need to work on getting more consistent high quality assessment data reporting from the course instructors.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
We saw marked improvement from earlier to later drafts and final products on the book reviews in ECON 4999 this assessment cycle. See the findings section of the report for more detail.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
We still need to work with ECON 3900 instructors to get better assessment data reported for that course.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?
More students and faculty are familiar with the goals of the CTW program. We have plans to revise the ECON 4999 course so that more instructors might get involved with teaching it. While core components of the course will remain consistent across sections, we will allow each section to have a particular theme to it (e.g., poverty, urban/housing econ, behavior econ, etc.) Instructors can focus on the content in their own area of focus and students can self-select into the themes that interest them most. We are piloting this format for the first time in fall 2013.

Georgia State University
Assessment Data by Section
2012-2013 CTW English
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Department of English teaches students to read and write critically and creatively. Our Department also prepares students to pursue professional training in areas of English language studies, global and multi-ethnic literary and cultural studies, pedagogy, critical theory, creative writing, rhetoric and composition, professional and technical writing, and secondary education. Our practice of critical thinking fosters development in all of these areas. For English majors, critical thinking means reading texts from many perspectives and working towards the expression of an informed, valid, and persuasive understanding of the text.

Goals
G 1: Critical Reading
Undergraduate English majors are curious and critical readers who question what they read and test their ideas against textual evidence.

G 2: Literary and Rhetorical Knowledge
English majors understand and use a wide range of literary and rhetorical forms and conventions. They develop their own points of view within relevant literary, historical, and theoretical frameworks.

G 3: Effective Writing
English majors write clearly and persuasively and work towards judging the writing practices of others while developing their own individual voice or style.

Student Learning Outcomes/Objectives

SLO 1: Comprehends a complex literary or rhetorical text (G: 1, 2) (M: 1, 2)
Students successfully engage with the main ideas and arguments in a text and begin to think critically about the text. In the introductory CTW courses, English 3040 and 3050, students practice identifying genres, online personas, and elements of critical theory and rhetoric. This process of thinking through how writers use language and ideas in their discipline prepares students for more complex assignments, such as applying theory to literary texts or using rhetorical techniques in their own writing or podcasts.

SLO 2: Questions ideas in a text (G: 1) (M: 3)
Critical thinking means not just understanding the ideas in a text but questioning them as well. Students use evidence to test the ideas and critique the positions of other writers.

SLO 3: Demonstrates literary or rhetorical knowledge (G: 2) (M: 2)
Students demonstrate working knowledge of literary or rhetorical language and theory. Once students have practiced taking apart a text and identifying its central ideas or arguments, they work through assignments that ask them to evaluate or apply these ideas. The introductory classes ask students to identify elements of a genre or convention; in the Senior Seminars, students apply this
Measures, Targets, and Findings

**M 1: Engagement with ideas (O: 1)**

This measure is one of the key elements of our rubric. We measure engagement with ideas when students respond to a published book or on-line text, such as a blog or podcast.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Comprehends a complex literary or rhetorical text**

We expect 100% of all students to show competency with textual engagement; minimal competency means they will score a 2 or higher on our rubric scale. We expect 75% of all students to score a 3 or higher, showing strong competency and some mastery of this skill. In the senior seminars, we are working towards a greater percentage of students who score a 4 and thus prove mastery of critical thinking skills.

**Findings 2012-2013 - Target: Met**

In all courses except one, 75% or more students scored a 3 or 4 in this category. In 4330, 100% of students scored a 3 or 4. While only 70% of students scored a 3 or 4 in the 4310a course, our CTW courses saw, on average, a 7% increase in the number of 3s and 4s otherwise. In 50% of our CTW courses, students scored a higher or the same percentage of 4s. The overall trend, then, is for an increase in engagement with ideas, despite the dip in higher scores in one senior seminar. We believe this finding reflects our focus on engagement with ideas in our workshops and in the refined rubric we used this year.

**M 2: Engagement with literary and rhetorical conventions (O: 1, 3)**

We measure critical thinking about the forms and genres of our discipline using one of the key categories of our rubric: engagement with conventions. Assignments through which we measure engagement with conventions include the analysis of the generic elements of literary or rhetorical work (English 3040 and 3050); the production of an annotated bibliography (English 4330); and the review of a book of poems (English 4310a).

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Demonstrates literary or rhetorical knowledge**

We expect all students to show knowledge of and competency in using literary and rhetorical conventions; minimal competency means they will score a 2 or higher on our rubric scale. In both our introductory courses and our senior seminars, we expect 75% of students to score a 3 or higher, showing strong competency and some mastery of this skill. In the senior seminars, we are working towards a greater percentage of students who score a 4 and thus show mastery of critical thinking skills.

**Findings 2012-2013 - Target: Partially Met**

Three of our CTW courses saw an increase on average of 11% of students earning 3s and 4s. In 4330, 100% of students earned a 3 or 4 in this area. In 4310a and 4300, the percentage of students scoring 3 or 4 dropped below our target of 75%, to 63% and 72% respectively. Scores of 4 increased from last year’s cycle in 3050, 4320, and 4330. In the other courses, scores of 4 decreased slightly. While higher scores went up in our entry courses (3040 and 3050), our senior seminars saw a decrease in the percentage of students scoring 3 or 4, with an average decrease of 16% (excluding 4330 in which saw a rise of 5%). This is an area in which we saw gains and losses. We find that our revised rubric, which focused our attention on a smaller number of critical thinking categories, may have led to more rigor in assessing particular elements of critical thinking and might explain these decreases. Increased focus on conventions in the senior seminars is part of this trend.

**M 3: Judgement of ideas (O: 2)**

We measure students’ capacity to evaluate another writer’s ideas and modes of expression through one of the key categories of our rubric: judgement. Assignments through which we measure this critical thinking skill include reviews and reading responses that take account of genre, audience, and style.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Questions ideas in a text**

We expect all students to demonstrate good judgement by questioning ideas presented in a text; minimal competency means they will score a 2 or higher on our rubric scale. In both our introductory courses and our senior seminars, we expect 75% of students to score a 3 or higher, showing strong competency and some mastery of this skill. In the senior seminars, we are working towards a greater percentage of students who score a 4 and thus show mastery of critical thinking skills.

**Findings 2012-2013 - Target: Partially Met**

All of our courses met the target of reaching above 75% of students scoring 3 or 4 in this area except 4310a, which saw 65% of students reaching that goal. We see an average increase of 16% of students scoring 3 or 4 in this area in 3050 and 4300, while 4330 remained steady with 100% of students with higher scores. In our other CTW courses, we see a 9% decrease in the percentage of students earning 3 or 4 compared to last year. The number of students scoring 4 increased in 3050 and 4330 compared to last year. We see increased scores and mastery in some courses, and a slight decrease in these in others. While we have met our overall goals for this area, we would like to trend toward increased mastery for this area of assessment.
M 4: Effective Writing (O: 4)

Students communicate their ideas clearly in writing, showing an awareness of style and convention.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O4: Writes clearly, with an awareness of style and audience

We expect all students to write effectively and demonstrate an awareness of style and audience in their writing. Minimal competency means they will score a 2 or higher on our rubric scale. In both our introductory courses and our senior seminars, we expect 75% of students to score a 3 or higher, showing strong competency and some mastery of this skill. In the senior seminars, we are working towards a greater percentage of students who score a 4 and thus show mastery of critical thinking skills.

Findings 2012-2013 - Target: Met

All courses met our target of reaching 75% of students earning a 3 or 4 in this area except 4310b with 72%. We see increases of the percentage of students scoring 3 or 4 in the 3040, 3050 and 4320 by 7%, but decreases in the overall percentage of students scoring 3 or 4 in the other courses by an average of 10%. We see increases in scores of 4 in 3050 and 4320. As with conventions, we find that our narrowed rubric created more focus and rigor in the area of effective writing, perhaps leading to the overall decreases we see. While we met our overall goal, we prefer a trend toward increasing scores overall.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Design Useful CTW Workshops

In the first few years of CTW, we held workshops for all CTW faculty twice each semester, once to introduce the program and answer questions for new faculty and then to discuss problems and share ideas about how to improve the program. Last year we focused on the faculty actively teaching each semester and worked to break down their training by concentration. For 2011-12, we built on our instructors’ familiarity with the CTW initiative and used our workshops to address more substantive questions regarding teaching and the values connected with critical thinking that we hope to communicate to students. We plan to continue regular workshops for CTW instructors and will adapt their structure as needed. We will use these workshops to develop a common pool of CTW assignments that will allow us to establish a common data set for assessment.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Implementation Description: Workshops will be scheduled at the beginning of each semester for new faculty, with follow-up meetings of all faculty at the end of each semester.
- Projected Completion Date: 08/2013
- Responsible Person/Group: Elizabeth Lopez and Melissa McLeod

Maintain CTW English Website

We created and maintain a departmental CTW website. The site is for students majoring in English and for English instructors. For students, the site provides links to important information on the CTW initiative and identifies English CTW courses. For instructors, the site provides training documents such as the departmental rubric, tips on assignment design, information on assignment submission, etc. The site also contains sample syllabi and assignments. The site has been in use and maintained all year. For the coming year, we will work to transfer the website to the Red Dot platform now being used by the university.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Responsible Person/Group: Melissa McLeod

Revise Rubric

Many faculty who taught CTW courses during the past year did not find the rubric we had developed to be entirely satisfactory. Some of the categories in our rubric focused more on the outcome than the process of critical thinking, while others did not serve students in all four concentrations. Two years ago the CTW faculty proposed several alternative rubrics, and we revised our rubric to clarify the essential activities all students in the major should practice: thoughtful engagement with the ideas in a text; thorough reflection on their own position in relation to those of other readers and writers; and clear communication. While we like the structure of our current rubric, we plan to streamline it so that it serves instructors in all concentrations better and conveys our goals more clearly.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: High
- Implementation Description: We will revise and streamline the departmental rubric before Fall 2012 and distribute it to all CTW instructors before the semester begins.
- Projected Completion Date: 08/2012
- Responsible Person/Group: Elizabeth Lopez and Melissa McLeod

Focus on engagement with ideas in a text

In our workshops for the next cycle, we will continue to encourage CTW instructors to develop compatible assignments that use four key categories in the rubric as they design their courses. By focusing on particular CTW activities such as analyzing the essential concepts in a literary or rhetorical text, the instructors have directed students to engage effectively with ideas and convey their understanding in writing. While we will continue this aspect of the action plan by working to distinguish between understanding the formal and intellectual elements of a text and questioning those ideas, we have substantially met our target in this area in 3040, 4310a, 4320, 4330. We will work to improve student engagement with ideas in text in 3050 and 4310b.

- Established in Cycle: 2010-2011
- Implementation Status: In-Progress
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Engagement with ideas | Outcome/Objective: Comprehends a complex literary or rhetorical text
- Implementation Description: Co-ordinate CTW assignments and use of rubric through instructor workshops.
**Focus on engagement with literary and rhetorical conventions**

In our workshops for the next cycle, we will continue to encourage CTW instructors to develop compatible assignments that use four key categories in the rubric as they design their courses. By focusing on particular CTW activities such as engaging with literary or rhetorical conventions, the instructors have successfully directed students to identify and use the tools essential to their work in the discipline. We have met our target for this skill and will work to sustain our success in teaching it.

*Established in Cycle: 2010-2011*
*Implementation Status: In-Progress*
*Priority: High*

**Relationships (Measure | Outcome/Objective):**
- Measure: Engagement with literary and rhetorical conventions
- Outcome/Objective: Comprehends a complex literary or rhetorical text
- Demonstrates literary or rhetorical knowledge

**Implementation Description:** Encourage instructors to share assignments that teach students to use conventions effectively in CTW workshops.

*Projected Completion Date: 05/2013*
*Responsible Person/Group: Elizabeth Lopez*

**Focus on process of reflection**

In our workshops for the next cycle, we will continue to encourage CTW instructors to develop compatible assignments that use four key categories in the rubric as they design their courses, especially for instructors teaching 4310b and 4300, courses in which students scored lower on this rubric category than the others. By focusing on particular CTW activities such as cultivating awareness of the thinking process or individual biases, instructors can guide students to reflect more fully on their own positions and help them to articulate and defend their own point of view.

*Established in Cycle: 2010-2011*
*Implementation Status: In-Progress*
*Priority: High*

**Relationships (Measure | Outcome/Objective):**
- Measure: Judgement of ideas
- Outcome/Objective: Questions ideas in a text

**Implementation Description:** Coordinate workshops to help instructors design assignments that cultivate the process of reflection in each CTW course. Focus on specific assignments that structure the process of questioning a text or a writing project. Establish model assignments and develop variations for each CTW course.

*Projected Completion Date: 05/2013*
*Responsible Person/Group: Melissa McLeod and Elizabeth Lopez*

**Establish expectations**

We will establish expectations for standards of comprehension, literary or rhetorical knowledge, and process-oriented assignments in each CTW course. We will also work towards communicating these expectations clearly to students and helping them to meet targets set this cycle. Importantly, we will develop with faculty a pool of common assignments for each concentration to use for CTW assessment. Use of a standard assignment will help us to establish a more reliable data set.

*Established in Cycle: 2011-2012*
*Implementation Status: Planned*
*Priority: High*

**Implementation Description:** Continue to coordinate CTW instructors via workshops; emphasize communication with students; coordinate CTW assignments within the concentrations.

*Projected Completion Date: 05/2013*
*Responsible Person/Group: Melissa McLeod*

**CTW website**

We will continue to maintain the English department’s CTW website to use for updates on changes in the departmental implementation of CTW. We plan to expand it to include an expanded repository for CTW assignments that faculty may access to glean ideas for their own classes.

*Established in Cycle: 2012-2013*
*Implementation Status: In-Progress*
*Priority: High*

**Faculty Workshops**

We continue to offer CTW workshops to all interested faculty, focusing on those actively teaching CTW courses in any given year. These workshops have focused on rubric use, pedagogical strategies for critical thinking, and assignment sharing. We plan to continue regular workshops in the coming year, increasing our attention on assignment design, discipline-specific conventions, and norming around the rubric.

*Established in Cycle: 2012-2013*
*Implementation Status: In-Progress*
*Priority: High*

**Focus on Engagement with Ideas**

We have worked to encourage CTW instructors to focus on idea engagement as they design their courses and assignments, making this one of four areas of focus in the revised rubric. Assignments developed by instructors show robust focus on this area of critical thinking and we met our overall target for this area in the last 2 assessment cycles. In fact, we saw an increase in higher scores this year compared to last, validating the workshops and rubric focus for this year. We will continue to develop assignments in this area, particularly for the creative writing seminars which desire an increase in student mastery.

*Established in Cycle: 2012-2013*
*Implementation Status: In-Progress*
*Priority: High*
Focus on Literary and Rhetorical Conventions

Based on the revised rubric for this year's assessment cycle, we generally met our targets for conventions and expression, although we saw some lower scores particularly in the areas of literary studies and creative writing. We will focus in next year's workshops on improved mastery of conventions and the development of assignments to encourage this focus.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: High

Focus on Reflection

Based on increased focus in this area during this year's assessment cycle, teachers have developed assignments and assessments that address issues of reflection, judgment, and student point of view. While we met our target for this year, we saw small decreases in students' mastery in some courses and want to make this a key focus for the next cycle.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: High

Rubric Revision

The rubric was refined to more clearly address the aspects of critical thinking we desired to measure and was edited to contain fewer assessment criteria. This revised rubric was used for the duration of this year's CTW assessment. Our feedback from instructors indicates that the revised rubric more closely aligned with their own perceptions of critical thinking in their courses and that the editing to focus on four criteria allowed more concentrated teaching and learning on those areas. Teachers are using the streamlined rubric more often to model critical thinking skills on a day-to-day basis in these classrooms. Based on workshop feedback, we may continue in the next cycle to fine tune language for clarity, but the rubric worked well in this assessment cycle.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: High

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Our major accomplishments are two: 1) Last year, we strove to refine our assessment rubric; we wanted to continue that project into this year. We succeeded with our rubric refinement and found that faculty were generally pleased with the results, reporting that they found the rubric more closely aligned with their conceptions of critical thinking. 2) We changed our method of faculty reporting midway through last year. In all previous years, we had required faculty to assess online through the WAC assessment website. However, several faculty members have an aversion to assessing online, and the website experienced technical difficulties. The combination of faculty resistance and glitches in the technology led us to ask faculty to fill out Excel spreadsheets instead. We gave them the option to fill them out online or by hand. This change led to much greater faculty satisfaction with the reporting system, leading to greater data reporting and collection.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Because we refined the rubric, we found mixed results in our assessment of student critical thinking. Generally, we saw increases in the gateway classes (3040 & 3050), whereas in the capstone classes, we saw decreases in some categories. We attribute these results to more rigor in faculty's assessments in these capstone courses; we see this increased rigor as a positive sign. It tells us that faculty applying the rubric thoughtfully.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We need to address those mixed results that we mentioned in Reflection 2 through continued faculty support through the workshops and assignment sharing. Some faculty reported that they'd like to see more successful CTW assignments, so this is an area where we'd like to develop further.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

The greater the number of faculty who teach CTW courses, the greater an impact we see on the department as a whole. More faculty are seeing this kind of summative assessment as a valuable part of their teaching. As a result, their teaching more surgically targets those skills that students need to improve, leading to more efficient student learning.
**Mission / Purpose**

The mission of the Critical Thinking through Writing course Entrepreneurship is to develop in the student an understanding of the key roles that the use of critical thinking skills and effective written communication skills play in the implementation of any entrepreneurial effort, and to enhance the student's ability to use those skills in practice.

This Mission Statement was revised in May of 2013 to better focus on the mission of the course with respect to the CTW initiative.

**Goals**

**G 1: Writing Skills**

Students graduating with a major in managerial sciences and a concentration in Entrepreneurship will be effective writers in their field.

**G 2: Critical Thinking Skills**

Students graduating with a major in managerial sciences and a concentration in Entrepreneurship will be effective critical thinkers with respect to the problems they will confront in entrepreneurial activities.

**Student Learning Outcomes/Objectives**

**SLO 1: Effective Writing (G: 1) (M: 1)**

Measures, Targets, and Findings

M 1: The Case Analysis

The student will re-write the CTW case following feedback and work with the writing consultant. This subsequent case write up will be analyzed with the same MGS 4560 CTW rubric as the initial case write-up. Based on this, further feedback will be given to the student and comparative measures will be drawn on the CTW outcomes set out in the rubric.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Effective Writing

The targets for the first item in the rubric are to have 80% of the students scoring at "Competent" or "Excellent" with no more than 5% at the "Ineffective" level. Critical Thinking through Writing Rubric for MGS 4560 Students Can: Excellent (4) Competent (3) Less than competent (2) Ineffective (1) i. Effectively write a complete analysis of the case. Student always applies proper grammar and sentence structure. Meaning of sentences is clear throughout. The composition flows logically from start to finish. Student largely applies proper grammar and sentence structure. There is little difficulty in discerning meaning throughout and the composition has a rational if not ideal structure. Student shows difficulty with proper grammar and sentence structure. Meaning of sentences occasionally difficult to infer. The structure of the composition is not tight and integrated. Student exhibits poor skills in grammar and sentence structure. Meaning of sentences is often difficult to infer. Haphazard organization of the composition

Target for O2: Gathering and Generating Data

The targets for the second item in the rubric are to have 80% of the students scoring at "Competent" or "Excellent" with no more than 5% at the "Ineffective" level. Critical Thinking through Writing Rubric for MGS 4560 Students Can: Excellent (4) Competent (3) Less than competent (2) Ineffective (1) ii. The ability to gather and generate data. Student presents the ability to identify almost all of the relevant data within the case and generates a significant amount of additional meaningful data that is called for (e.g. ratios and similar metrics) Student presents the ability to identify much of the relevant data within the case, and generates some additional data that is called for (e.g. ratios and similar metrics) Student presents a weak ability to separate relevant data from superfluous data and often omits important relevant data. No or very little meaningful additional metrics are generated. Student shows very limited or no ability to separate relevant data from superfluous data and often omits important relevant data. No meaningful additional metrics are generated.

Target for O3: Analysis and Interpretation

The targets for the third item in the rubric are to have 80% of the students scoring at "Competent" or "Excellent" with no more than 5% at the "Ineffective" level. Critical Thinking through Writing Rubric for MGS 4560 Students Can: Excellent (4) Competent (3) Less than competent (2) Ineffective (1) iii. The ability to systematically and logically analyze and interpret the data collected and produced. Student analyzes and interprets data with a high degree of accuracy and clarity exhibiting systematic and logical thinking processes. Student analyzes and interprets data with a moderate degree of accuracy and clarity exhibiting acceptable systematic and logical thinking processes. Student presents a weak ability to analyze and interpret data with accuracy and clarity exhibiting limited systematic and logical thinking processes. Student presents a no or very limited ability to analyze and interpret data with accuracy and clarity exhibiting very limited systematic and logical thinking processes.

Target for O4: Recommendations for Action

The targets for the fourth item in the rubric are to have 80% of the students scoring at "Competent" or "Excellent" with no more than 5% at the "Ineffective" level. Critical Thinking through Writing Rubric for MGS 4560 Students Can: Excellent (4) Competent (3) Less than competent (2) Ineffective (1) iv. The ability to reach conclusions and make recommendations. Student presents the ability to use critical thinking skills and data analysis to reach clearly supportable conclusions and to make a well argued recommendation. Student presents the ability to use critical thinking skills and data to effectively to reach generally supportable conclusions and to make a consistent recommendation. Student presents a weak ability to use critical thinking skills and data to effectively to reach generally supportable conclusions and to make a consistent recommendation. Student shows very limited or no ability to use critical thinking skills and data to effectively to reach generally supportable conclusions and to make a consistent recommendation.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Development of Critical Thinking Skills

In reviewing the initial and subsequent case write-ups, and in talking with the students individually when reviewing the initial write-ups, it was clear that students had little idea as to what critical thinking exercises entailed. Although this course is situated as the senior-level CTW class, these students did not have the junior-level CTW class not did they have the core CTW exercises that have been added recently (many did not complete their freshman and sophomore course work at GSU). Thus, unlike students who we hope will matriculate through the entire undergraduate CTW sequence, these students were encountering an explicit CTW approach for the first time in their semester of graduation. Action Plan: Following the 2010-2011 assessment using a more rigorous measure of Critical Thinking skills it is clear that we need to work harder at developing these skills in the course and in the assignment feedback on the case draft. 2012-2013 Actions: In the 2012-2013 cycle Dr. Gemmell assumed responsibility for the CTW initiative in the Entrepreneurship, replacing Kelly Robinson. Dr. Gemmell, working with the CTW ambassador and the Department Chair, redeveloped the course, MGS 4550, Managing a Family Business, to be the 4000-level CTW class. To improve the critical thinking development and feedback of students the course the revised class will add a preparatory CTW case that will precede the for-credit CTW case. By using a different case for the preparatory exercise the faculty members hope to develop critical thinking skills independent of any particular situation and show students how the skills are transferable. This new course will be offered in the fall semester of 2013.

| Established in Cycle: | 2009-2010 |
| Implementation Status: | In-Progress |
| Priority: | High |
| Implementation Description: | See the addendum to the Description for details on the implementation of this Action Plan item that exceeds the space limitation here. |

| Responsible Person/Group: | Robert Gemmell |
| Additional Resources: | None |
| Budget Amount Requested: | $0.00 (no request) |

Increased Preparation for Initial Assignment

Student composition skills were disappointing in the initial draft. Students do have a course that emphasizes business writing in their junior year so the writing style needed for effective business communication should not be difficult. In talking with students when reviewing their performance on the initial case write-ups most indicated that they had not done structured writing assignments since their business communication course. Many had reverted to writing in bullet lists and simplistic outline formats. Action Plan: In the 2010-2011 offering of the course a review module will be added prior to the first case write up that will emphasize effective business writing points with particular emphasis on the importance of this skill in the Entrepreneurship context. In the 2013-2014 offerings of the 4000-level Entrepreneurship class, which will be MGS 4550 beginning that semester, a second case will be added to the syllabus that will serve as a preparatory case.

| Established in Cycle: | 2009-2010 |
| Implementation Status: | In-Progress |
| Priority: | High |
| Implementation Description: | In the Spring 2012 offering of the case the new course instructor, Kelly Robinson, added a new assignment at the front end of the course to provide an initial exercise in the use of critical thinking and effective writing. This exercise will be done prior to the first draft of the case analysis that will be done the same as in prior years. In Spring 2012 a preparatory case was added to the revised MGS 4550 class, which will be offered as the CTW class for the first time in Fall Semester 2013. |
| Projected Completion Date: | 12/2013 |
| Responsible Person/Group: | Robert Gemmell |
| Additional Resources: | None |
| Budget Amount Requested: | $0.00 (no request) |

Increased Revision Performance

Students were generally found not to be highly engaged in the revision process in spite of the relationship between the revision performance and their final grade. Action Plan For the 2010-2011 academic year two modules will be added prior to the initial paper being written. If the logic of both effective writing and critical thinking for effective entrepreneurship can be effectively increased by those modules, then the opportunity to have a better follow-up, one-on-one meeting with the students should emerge. At those meetings the opportunity to further develop critical skills will be stressed. The ability to achieve the 0.5 level improvement will be re-measured.

Transfer of 4000-level CTW Class to MGS 4550

During the 2012-2013 cycle the Entrepreneurship faculty changed significantly. Under the new leadership it was decided that the Department of Managerial Sciences could better serve students and deliver the CTW program effectively by changing the course designation from MGS 4650, Small Business Planning to MGS 4550, Managing a Family Business. This course was revised to include...
the CTW requirements. The CTW requirements were improved based on prior findings for the initial offering of MGS 4550 in the fall semester of 2013.

Established in Cycle: 2012-2013
Implementation Status: In-Progress
Priority: High
Implementation Description: This class will have its initial offering as a CTW class in the Fall Semester of 2013
Projected Completion Date: 12/2013
Responsible Person/Group: Dr. Robert Gemmell
Additional Resources: None

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

There were significant changes in the CTW offering to students in MGS that were concentrating in Entrepreneurship in the 2012-2013 cycle. In prior years the course had been offered by PTIs, while very competent, there was disappointment in the quality student improvement in both critical thinking in writing skills during the 4000-level CTW class.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

In prior years, based on the assessment findings, the ambassador proposed the addition of an additional exercise prior to the major case the students work on as their primary CTW assignment. That was done initially in the 2011-2012 cycle, following the Action Plan on this point. (In the current cycle the course was not offered.) As part of the revision that shifted the 4000-level CTW course to MGS 4550, the preparatory exercise was expanded to be a separate case write-up. This intention is to show better how critical thinking skills are transferable across contexts as an effective decision making tool. This transition will be completed in the fall of 2013 with the initial offering of this revised CTW class.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

The largest challenge in the entrepreneurship area has been faculty stability. Turn over in faculty members has led to staffing shortages that, in turn, resulted in PTIs teaching the CTW class in three of the prior cycles and no offering in the current cycle.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

In Entrepreneurship responses to the need for CTW in the undergraduate program has been well received by current faculty members. Recent hires have stabilized the faculty and there was a re-designation of the 4000-level CTW class to a more-regularly offered class. As a result there will be more offerings of the 4000-level CTW class, instruction will by a full-time faculty member, that faculty member will also become the ambassador to the CTW program, and the feedback from the class will be much more easily communicated to the other faculty members in the entrepreneurship area and the larger MGS department. Students easily see how, in their field, the twin abilities to think critically and communicate effectively are important to their success. This is an easy “sell,” it is now incumbent on the faculty to deliver improvement in student skills consistent with the initiative described in the Action Plan of this report.

Georgia State University
Assessment Data by Section
2012-2013 CTW Film
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
Students who graduate with an undergraduate degree in film should be able to participate fully in our media-intensive society as both critical consumers and informed creators of film and television. Critical thinking is crucial for this purpose. In film, “critical thinking” is defined as identifying, analyzing, and evaluating arguments and truth claims; and formulating and presenting convincing reasons in support of conclusions.

Goals
G 5: Theoretical understanding of media
Students are able to apply media theory insightfully to contemporary and historical media.

G 6: Writing effectively about media
Students are able to write clear, persuasive English prose about media.

Student Learning Outcomes/Objectives
SLO 3: Evaluating theoretical arguments about media (G: 5) (M: 2)
At the end of this program, students can identify, analyze, and evaluate theoretical arguments about media.
### SLO 4: Supporting theoretical arguments about media (G: 5) (M: 2)
At the end of this program, students can formulate and present convincing reasons in support of their own theoretical arguments about media.

### SLO 5: Writing about media (G: 6) (M: 2)
At the end of this program, students can write clear, well-organized, and grammatically correct English prose to make a persuasive argument about media.

### Other Outcomes/Objectives

**O/O 6: Development of Film Criticism Assignment Rubric (G: 5, 6) (M: 1)**
The primary CTW assignment in Film Theory and Criticism asks students to research an appropriate area in film theory and to investigate how a specific theoretical construct functions in a particular film. The skills involved in this assignment include: generating a clear, appropriate research question in film theory; finding and interpreting the relevant critical literature; applying theoretical material to a specific film text to produce critical insight into the film; supporting the student's argument with well-chosen examples; organizing the criticism into a persuasive whole; and writing the paper in clear, concise, grammatically correct prose. The CTW faculty will develop a rubric for the assignment that lays out clear grading parameters and that allows the faculty to set measurable targets for student performance.

### Measures, Targets, and Findings

**M 1: CTW Faculty Discussion (O: 6)**
At the end of each semester, the CTW faculty in Film meet to evaluate the CTW procedures both in Film Theory and Criticism and in Senior Seminar in Film. Instructors read A, B, and C papers from each class section to determine if grading procedures are comparable across instructors. Faculty discuss their experiences that semester in implementing CTW assignments, evaluating what the best practices are. Faculty arrive at a consensus about which will be the core CTW practices for each class in the future, and they will also set student performance goals for future semesters (by consensus). The CTW Ambassador will update the assignments, rubrics, and syllabi in the Weave system.

**Source of Evidence:** Discussions / Coffee Talk

**Target for O6: Development of Film Criticism Assignment Rubric**
100% of the CTW faculty will agree on a standard grading rubric for Film Theory and Criticism and on achievement targets for that rubric.

**Findings 2012-2013 - Target: Met**
100% of the CTW faculty came to a consensus agreement on a standard grading rubric for Film Theory and Criticism. Achievement targets were established for the 2013-2014 year. Student performance will be monitored and reported in the 2013-2014 Film CTW Weave report.

**M 2: Project proposal: Senior Seminar in Film (O: 3, 4, 5)**
In this assignment, students will detail a structure for their final project (either a research paper, a video production, or a website) and justify why this structure will accomplish their rhetorical goals. The skills involved in this assignment will include: generating a clear, appropriate research question/argument dealing with some aspect of authorship/reception; situating the project's approach within the critical debate about authorship and/or audiences; organizing the materials into a persuasive whole; and either writing the paper in clear, concise, grammatically correct prose or creating video that is proficient and clear.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O3: Evaluating theoretical arguments about media**
The integration of theoretical perspectives in the project proposal assignment in Senior Seminar in Film should be at the "competent" or "sophisticated" level for at least 50% of the students.

**Findings 2012-2013 - Target: Met**
64% of the student assignments were at the "competent" or "sophisticated" level.

**Target for O4: Supporting theoretical arguments about media**
The supporting evidence in the project proposal assignment in Senior Seminar in Film should be at the "competent" or "sophisticated" level for at least 50% of the students.

**Findings 2012-2013 - Target: Met**
76% of the student assignments were at the "competent" or "sophisticated" level.

**Target for O5: Writing about media**
The written expression in the project proposal assignment in Senior Seminar in Film should be at the "competent" or "sophisticated" level for at least 50% of the students.

**Findings 2012-2013 - Target: Met**
82% of the student assignments were at the "competent" or "sophisticated" level.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Grading Rubric Targets for Film Theory and Criticism
The CTW faculty will: revise the Film Theory and Criticism assignment rubric for the 2012-2013 year; implement that assessment rubric across all sections of Film Theory and Criticism; and agree on achievement targets for that new rubric in the coming year.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: CTW Faculty Discussion | Outcome/Objective: Development of Film Criticism Assignment Rubric

Responsible Person/Group: CTW Film Ambassador in coordination with CTW Film faculty.

Curriculum Revision
The CTW faculty will revise the structure of the capstone course (Senior Seminar in Film) to enable it to be taught with a broader variety of approaches and foci. The faculty will also create a theory-based course that is intended to serve as an alternative to Film Theory and Criticism in the CTW curriculum.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: CTW Faculty Discussion | Outcome/Objective: Development of Film Criticism Assignment Rubric

Implementation Description: Syllabi will be developed by subcommittees of the Film faculty. Courses will be submitted for approval by the appropriate curriculum committees. Assessment procedures and assignment structures will be developed for these courses.

Student performance targets will be set.

Responsible Person/Group: CTW Film faculty

Redesign of Project Structure Assignment
The CTW faculty will redesign the project structure assignment for Senior Seminar in Film as a Google form and will assess if the newly designed assignment structure encourages better integration of theoretical material into the writing.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Project proposal: Senior Seminar in Film | Outcome/Objective: Evaluating theoretical arguments about media

Responsible Person/Group: CTW Film faculty

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

During the 2012-2013 academic year, CTW faculty in Film taught 8 sections of Film Theory and Criticism (Film 4750) with a total enrollment of 167 students. The CTW faculty in film concluded a long process of coming to consensus on an assessment rubric for this course. Unlike Senior Seminar in Film (the other CTW course), Film Theory and Criticism is a course with a long history in our department, and the faculty who teach this course have considerable investment in their own distinctive pedagogical approaches. After several iterations, the faculty have arrived at a common rubric, and performance targets for the 2013-14 were set. This completes one portion of the action plan for curriculum development. Progress is well underway on the other portion of the curriculum development action plan item. In the fall, a subcommittee will present a new syllabus for Media Theory and Criticism to the full Film faculty for consideration for inclusion as a CTW alternative to Film Theory and Criticism. This will help "share the load" among CTW faculty, with those who are not specifically trained in the film studies tradition able to teach a CTW course grounded in television and cultural studies. During the 2012-2013 academic year, CTW faculty in Film taught 8 sections of Senior Seminar in Film (Film 4910, the capstone course in film) with a total enrollment of 147 students. 5 faculty members received CTW training and taught CTW classes for the first time.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Both CTW courses in Film are at the 4000 level, so there is not separate assessment points at entry and exit level. There was notable improvement in student performance in the writing assignments for Senior Seminar in Film. 64% of the student assignments were at the "competent" or "sophisticated" level in their integration of theoretical perspectives, up from 42% last year. 76% of the student assignments were at the "competent" or "sophisticated" level in their use of supporting evidence, up from 53% last year. 82% of the student assignments were at the "competent" or "sophisticated" level in their written expression, up from 62% last year.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
The CTW faculty remained concerned that not enough students are integrating the theoretical material from the Senior Seminar in Film into their project structure papers. After much discussion, we agreed that the problem was that the project structure paper was unlike any other assignment that students do in our program. The assignment asks students to justify their choices about how they will structure their overall final project; it is essentially a paper about how they will write their final paper (or create their final video). The current assignment simply serves too many different purposes simultaneously, and the integration of theory gets lost in the mix. The CTW faculty agreed to develop a Google form that breaks the assignment down into discrete parts and that requires students to provide a written response to prompts. One of these required prompts will ask the student to explicitly link their project to the theoretical concerns of the class. The CTW faculty hope that this newly redesigned assignment will provide clearer guidance to the student. The CTW faculty created a draft version of the prompts for the Google form, and they will implement this new assignment over the 2013-2014 year. Faculty will meet each semester to discuss the new assignment’s effectiveness and will make changes as needed, with the hope that a final version of the assignment will be approved by the end of the 2013-2014 year. Since the central assignment is being changed, the CTW faculty decided to keep the same performance targets for 2013-2014 as we used in 2012-2013.
CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

We continue to make progress in broadening and deepening our faculty's commitment to the CTW process. Those faculty who teach Film Theory and Criticism are a cohesive group, and we have been engaged in a long bottom-up process of developing an assessment rubric. While this process has been time consuming, it has produced better investment by faculty in the eventual assessment instrument (rather than implementing a top-down assessment method). Another group of faculty has been working together on the Media Theory and Criticism course, which (when adopted into our curriculum) will provide those faculty with more opportunities to take ownership in the CTW process. Students continue to respond well to the draft/feedback/final process of CTW, as the assessment of our Senior Seminar in Film course attests. We are in the process of redesigning the CTW assignment for the course, providing clearer instructions for integrating theory into that assignment.

Georgia State University
Assessment Data by Section
2012-2013 CTW Finance
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
Our mission is to teach students to go beyond merely learning finance to applying and properly demonstrating the critical thinking skills of reasonable and reflective financial analysis in order to derive creative solutions to the types of multifaceted problems commonly faced by financial managers in the real world.

Critical thinking:
- Requires intellectual discipline
- Entails rigorous reflection
- Demands open-mindedness

Those who embrace critical thinking learn to appreciate and promote:
- Intellectual humility
- Diligence
- Veracity
- Personal and social responsibility

Business leaders who exhibit these qualities are more apt to find quality solutions to difficult problems.

Upon successful completion of this class, students will know how to apply appropriate financial management theories and practices, including mathematical and statistical analysis, to identify and evaluate business strengths and weaknesses in order to structure and effectively communicate creative policies and solutions, to both lay and professional audiences.

Goals

G 1: Learn financial analysis tools and techniques
Before one can critically analyze the current financial position or forecast the future of a firm, one must first first understand the proper tools and techniques of the trade. Good financial analysis requires understanding how to construct and evaluate cash flow statements, financial ratios, and pro forma financial statements. Students must how to use these tools and they must learn which tools and/or processes to apply to different problems. Only then will they be able to understand a firm's strengths and weaknesses so they can propose viable solutions to address specific weaknesses without negatively impacting business strengths.

G 2: Critically evaluate problem areas and/or situations
Students must learn how to apply financial analysis tools and techniques to both structured as well as unstructured problems. They must consider the nature of the problem and then apply the correct process to identify and assess the most pertinent facts of a case. In addition, they must learn to question in order to discover the "what" and the "why" behind every problem area and/or business situation. We want to teach our students to learn to seek out proof and evidence, from simply verifying the source/validity of the information to determining the difference between speculation and testing to establishing and properly presenting verifiable facts. Critical thinking in finance requires that problems must be approached with an open mind and every attempt must be made to reduce biases in evaluation, assessment and proposed solutions. Critical thinking must also consider the diverse nature of today's business and management landscape. Problems must be approached from the point of view of the participants. For example, an Asian manager may not view a given problem in the same way as will an American manager. We want to teach our students to consider that although different parties may use the same problem-solving processes, techniques and tools, their different experiences and perspectives can provide valuable insights into the nature of business problems and/or opportunities.

G 3: Propose creative strategies and/or solutions
Financial management ultimately concerns determining how to allocate scarce resources (specifically, money) in order to achieve a specific goal (namely, maximizing shareholder wealth) with due and proper consideration given to all of the firm's other stakeholders (for example, creditors, customers, employees, vendors, suppliers, regulatory agencies and the community). Key in this process is making a decision. Decisions must be well thought out, creative and defensible. Critical thinking is part of the process, but in the realm of financial management, critical thinking by itself is insufficient. Unless critical thinking results in a decision that suggests a creative strategy and/or solution, the time and energy spent on critical thinking is wasted. Therefore, our primary goal in this class is to train students to use critical thinking as a process to develop creative solutions to the type of dynamic problems often encountered
### Student Learning Outcomes/Objectives

**SLO 1: In-class Exams (G: 1) (M: 1)**

In-class examinations are the main tools we will use to evaluate whether or not students have learned and understand the tools and techniques of financial analysis. Exams test knowledge of reading assignments and other material covered in class.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 2: CTW Assignment 1 - Writing for Business (G: 1) (M: 2)**

The purpose of this assignment is to encourage students to contemplate the similarities and differences between business writing and academic writing. Students read a collection of articles concerning business writing techniques and then they must draft a memo summarizing what they learned. The memo must be addressed to the instructor who taught their basic English composition course at GSU (or at the school where they took a similar class).

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 3: CTW Assignment 2 - "Case Name" Business Analysis (G: 1, 2) (M: 3)**

Assignments 2 and 3 are the same assignment applied to 3 different cases. Because this is a case based course, each individual instructor can pick the cases that he/she wants to use for these assignments. A key piece of the commercial loan process for any bank is a credit memorandum. After a potential business customer requests a loan, a credit professional will do an extensive analysis of the request. The output of the evaluation is a credit memorandum. Each bank has its own format but the basic idea is always the same. The memorandum critically evaluates the business, analyzes the funding need, recommends a proposed structure for approval, and provides a lot of technical details about the company. As you might expect, this memorandum can be lengthy and include many exhibits. Rather than do an entire memorandum, we are going to focus on one part—the business analysis.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 4: CTW Assignment 3 - "Case Name" Business Analysis (G: 1, 2) (M: 4)**

Assignments 2 and 3 are the same assignment applied to 2 different cases. Because this is a case based course, each individual instructor can pick the cases that he/she wants to use for these assignments. A key piece of the commercial loan process for any bank is a credit memorandum. After a potential business customer requests a loan, a credit professional will do an extensive analysis of the request. The output of the evaluation is a credit memorandum. Each bank has its own format but the basic idea is always the same. The memorandum critically evaluates the business, analyzes the funding need, recommends a proposed structure for approval, and provides a lot of technical details about the company. As you might expect, this memorandum can be lengthy and include many exhibits. Rather than do an entire memorandum, we are going to focus on one part—the business analysis.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**SLO 5: Group Project - Business Plan (G: 1, 2, 3) (M: 5)**
The business plan assignment involves writing a portion (mainly the financial section) of a business plan for an idea that a group of 3-5 students develop for establishing a start-up business. The business idea must solve a common problem that enough people encounter to make the business feasible. Thus, students must identify a business/market problem and propose a creative solution to the problem. One of the most important aspects of the solution (i.e., the proposed company) is that the company must be financially viable, and the viability of the company must be proved using financial methods processes and techniques learned in the course. The business must also be possible, given the knowledge, talents, etc. of the members of the group. Groups develop the plan over the entire semester in phases (a phase is due to the instructor for evaluation and feedback approximately every 3 weeks during the semester). On the last day of class, each group must present their business plan idea to the rest of the class. The class acts as a group of investors who vote whether or not to fund the project. If the project is funded, the group succeeds; if the project is not funded, the group fails. Because the total amount of capital that the class of investors is allowed to invest is limited, some (or perhaps all) groups will fail. Failure is a learning lesson in business; so, a final learning aspect of the project is that if the project fails, more work is necessary to re-craft the idea. Students are asked to brainstorm within the group, potential business ideas that best utilize the abilities, talents, and/or any other unique characteristics of the group. The selection of what business to enter requires considerable thought and involves a group-inventory of skill, knowledge, interests, aptitudes and a parallel examination of the environment to determine where opportunities may exist. Groups are encouraged to seek a good match between what they can offer as a group of entrepreneurs and the need for the good or service their company will deliver to consumers. Student groups are told to select a business that they can enjoy, that they believe they can manage, and that will be profitable for them as well as their investors. MAJOR LIMITATION: The maximum amount of money that the group can raise to start their business is $100,000.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4 Outcomes of research (3.3.1.4)

Measures, Targets, and Findings

M 1: In-class Exams (O: 1)

There are 2 exams (mid-term exam and final exam) given by instructors during the regular semester. Material learned in the first half of the course provides the foundation for material covered in the second half of the course. Thus, improvement in the class average exam score can be used to assess student progress in understanding the tools and techniques of financial analysis covered in the class.

Source of Evidence: Standardized test of subject matter knowledge

Target for O1: In-class Exams

This is the first year that we used class exams as a CTW measure. Because all instructors give separate (and unique) exams, performance between classes cannot (nor should it be) measured. Besides, we were not looking for grades on an exam, but instead evidence that student understanding improved. We are still developing a way to numerically measure this assessment vehicle.

Findings 2012-2013 - Target: Partially Met

Although we have yet to agree on a specific way to measure this item, all instructors who reported to the CTW ambassador indicated that they noticed "significant" improvement in the depth of understanding from the first exam to the comprehensive final exam.

M 2: CTW Assignment 1 - Writing for Business (O: 2)

This assignment was scored using the General Rubric for F14020 Assignments. The assignment was evaluated for items 1, 4, 6 and 7. The maximum score possible was 20 and the minimum possible score was 0. We divided the total score by 4 to derive an average score. The average score for all classes that used the assignment was 3.5. Overall, we believe that students enjoyed this assignment and it provided an excellent transition from writing for an English class to writing a good business document. As expected (after reviewing the associated readings), most students clearly identified the key ingredients of good business writing and properly contrasted the principles of good business writing with the principles of good writing that they learned in English composition.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: CTW Assignment 1 - Writing for Business

The target grade for this assignment was 3.3.

Findings 2012-2013 - Target: Met

The average grade on this assignment across all classes was 3.5. We were very happy with the overall quality of the papers submitted. Student enthusiasm about this assignment was very high and students met/exceeded our expectations in nearly every way. We consider this assignment to be very successful.

M 3: CTW Assignment 2 - "Case Name" Business Analysis (O: 3)

This assignment was graded with the associated rubric. The maximum score was 20. For many students, the first business memo was challenging, mainly because they have never been challenged to critically think in this manner before. All instructors who teach the course are encouraged to provide as much feedback and guidance when grading this assignment as possible. Many devote half of a class period to teaching students the difference between a 20 rubric score paper and a 10 rubric score paper.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Future Action Plan for All Writing Assignments

Since all of the writing assignments that we used this past year were new, we consider this past year as a learning experience for both our students as well as us. We recognize that it is possible that our target grades were overly optimistic and possibly unrealistic. In the future we will use the average grades from this year as the base standard for future years. We also recognize that perhaps our assignments need improvement. We will work together this summer to clarify the goals in our assignments and make changes as needed. As noted in CTW Reflection 2, we believe that the results from this year show that our students tend to: Struggle when faced with complex issues and "messy" data Experience difficulty when asked to critically assess their arguments or policy decisions Tend to approach every problem believing that it can be solved with a formula Answer case questions using data in the case only - that is, they do not seem to make the connection between academic cases and real world events or effects Often make biased decisions and seldom develop robust conclusions Our major action plan for the future is to determine the best way to help our students improve these critical thinking skills. One issue that we must address is how to best incorporate critical thinking exercises into this already very full and challenging class. Most of us who teach this required class for all finance majors, do not believe there is enough time in the semester to teach the skills, tools, processes and techniques needed to do good financial analysis while at the same time teaching and evaluating critical thinking through writing. Although most students write well (we do have a significant number of students in our
classes for whom English is a second language - these students need help outside of what we can do to assist them with basic writing skills, specifically spelling and grammar), since business writing is different from writing literature in an English class, we are forced to spend a significant amount of time teaching business writing skills. To also teach critical thinking through writing skills is challenging for all who teach this course. In addition, adding CTW to this course makes it very difficult to find faculty willing and able to teach the course. Nonetheless, we will continue to work as best we can to make FI 4020 an effective CTW course. We believe that we have made a good start in finding articles in our field that address some of the issues related to critical thinking in finance. Indeed, the student critical thinking struggles that we identified above are similar to those reported in these articles. We now better understand the challenge that we face and that allows us to focus on effective solutions. Finally, to increase the effectiveness of course delivery, class sizes have been reduced to 30 students.

Challenges and Plan for 2011-12

The finance department has supported the CTW initiative from the beginning. We are committed to make the CTW aspect of our designated course, FI 4020, which all finance students are required to take for the major, as effective as possible. As a case based course that focuses on the analysis of financial statements and financial based decisions within a firm and/or with regards to a firm, FI 4020 is a natural choice in our department for CTW. Even before CTW, one of the most significant learning objectives of the course was that students would develop the ability to critically analyze a firm's financial position and be able to develop solutions to address identified weaknesses. Although applying CTW to FI 4020 seems natural, in fact, implementing the program presents significant challenges. Prior to CTW, most instructors evaluated student progress in critical thinking through evaluation of student preparation, in-class case discussion (we cover nearly one new case per week), financial analysis problem sets and frequent exams. None who teach the class believe that CTW assignments are a substitute for our traditional manner of evaluating student critical thinking. Thus, CTW has added an additional burden to instructors, specifically grading and providing significant feedback on nearly 200 student papers per semester. FI 4020 is a very full and challenging course to teach without this extra burden. The cases used in the class and case assignments are constantly being changed to remain current to shifting economic and market conditions. Thus, getting faculty to implement CTW in their courses is difficult. It also complicates recruitment of faculty to teach the course. Nonetheless, we will continue to work as best we can to make FI 4020 an effective CTW course. Our chairman is supportive of the program and he continues to work with me to address the issues noted above. We are confident that the writing assignments now developed for the course are sufficiently detailed and effective. Our major challenge moving forward is to rally new faculty to support the approach that we have developed, to develop consistent scoring guidelines and to collect and efficiently evaluate assessment data. Hopefully the data and evaluation we do next year will continue to strengthen the CTW aspect of FI 4020 as well as the overall program within our department.

CTW Assignment 2

I am developing replacement assignments and grading rubrics for CTW Assignments 2, 3 and 4 this summer. The assignments will be related to readings that students will be asked to complete instead of cases that can be determined by individual instructors. We have discovered that allowing instructors to pick and choose which case they use for a given assignment and when during the course they assign the task makes evaluation of the assignment across different classes essentially impossible. I plan to have all assignments completed before the start of the fall semester. FI 4020 is a very full and challenging course to teach without this extra burden. The cases used in the class and case assignments are constantly being changed to remain current to shifting economic and market conditions. Thus, getting faculty to implement CTW in their courses is difficult. It also complicates recruitment of faculty to teach the course. Nonetheless, we will continue to work as best we can to make FI 4020 an effective CTW course. Our chairman is supportive of the program and he continues to work with me to address the issues noted above. We are confident that the writing assignments now developed for the course are sufficiently detailed and effective. Our major challenge moving forward is to rally new faculty to support the approach that we have developed, to develop consistent scoring guidelines and to collect and efficiently evaluate assessment data. Hopefully the data and evaluation we do next year will continue to strengthen the CTW aspect of FI 4020 as well as the overall program within our department.

CTW Assignment 3

I am developing replacement assignments and grading rubrics for CTW Assignments 2, 3 and 4 this summer. The assignments will be related to readings that students will be asked to complete instead of cases that can be determined by individual instructors. We have discovered that allowing instructors to pick and choose which case they use for a given assignment and when during the course they assign the task makes evaluation of the assignment across different classes essentially impossible. I plan to have all assignments completed before the start of the fall semester. FI 4020 is a very full and challenging course to teach without this extra burden. The cases used in the class and case assignments are constantly being changed to remain current to shifting economic and market conditions. Thus, getting faculty to implement CTW in their courses is difficult. It also complicates recruitment of faculty to teach the course. Nonetheless, we will continue to work as best we can to make FI 4020 an effective CTW course. Our chairman is supportive of the program and he continues to work with me to address the issues noted above. We are confident that the writing assignments now developed for the course are sufficiently detailed and effective. Our major challenge moving forward is to rally new faculty to support the approach that we have developed, to develop consistent scoring guidelines and to collect and efficiently evaluate assessment data. Hopefully the data and evaluation we do next year will continue to strengthen the CTW aspect of FI 4020 as well as the overall program within our department.

CTW Assignment 4

I am developing replacement assignments and grading rubrics for CTW Assignments 2, 3 and 4 this summer. The assignments will be related to readings that students will be asked to complete instead of cases that can be determined by individual instructors. We
have discovered that allowing instructors to pick and choose which case they use for a given assignment and when during the course they assign the task makes evaluation of the assignment across different classes essentially impossible. I plan to have all assignments completed before the start of the fall semester. In mid-August, I will meet with all instructors who will be teaching FI 4020 in the fall to discuss the new assignments and associated rubrics. I also plan to collect rubric grades throughout the semester instead of waiting to the end of the term to collect this data. If I do not receive data for an assignment from an instructor, I will meet with the instructor to stress the importance of all sections of FI 4020 giving the same CTW assignments and grading in a similar manner.

**Established in Cycle: 2011-2012**  
**Implementation Status:** Planned  
**Priority:** High

### Assessment vehicle being investigated

We are developing a rubric to measure the depth of knowledge based on question types that are similar from the mid-term to the final exam. As students learn more, they should be able to demonstrate their depth of knowledge in two ways: (1) choosing the correct process or analysis technique to apply to an unstructured problem and, (2) applying multiple analysis techniques to similar problems.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High

#### Relationships (Measure | Outcome/Objective):

- **Measure:** In-class Exams  
- **Outcome/Objective:** In-class Exams

**Implementation Description:** We plan to have this rubric in place for the 2013-14 academic year.

**Projected Completion Date:** 10/2013

### Analysis Questions and Analysis Answers

#### CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

This year we made SIGNIFICANT changes to the CTW aspect of our course. We began by rethinking our mission statement. As previously written, we realized that our statement was more of a definition than a mission. Therefore, we completely rewrote the CTW mission statement for FI 4020 as follows: Our mission is to teach students to go beyond merely learning financial tools and techniques, to apply and properly demonstrating the critical thinking skills of responsible and reflective financial analysis in order to derive creative solutions to the types of multifaceted problems commonly faced by financial managers in the real world. A more precise statement concerning our guiding CTW principle is: Critical thinking: • Requires intellectual discipline • Demands open-mindedness Those who embrace critical thinking learn to appreciate and promote: • Intellectual humility • Veracity • Social responsibility Business leaders who exhibit these qualities are more apt to find quality solutions to difficult problems. Upon successful completion of this class, students will know how to apply appropriate financial management theories and practices, including mathematical and statistical analysis, to identify and evaluate business strengths and weaknesses in order to structure and effectively communicate creative policies and solutions, both to lay and professional audiences. After rewriting our mission statement, we realized that our prior goals were no longer valid. In addition, our prior goals were too many and too vague. Moving forward, the goals of FI 4020 are to encourage and guide students to: 1. Learn financial analysis tools and techniques. 2. Critically evaluate problem areas and/or situations. 3. Propose creative strategies and/or solutions. A major outcome is that we desire to accomplish in this class is to give students the critical thinking tools in financial analysis that they need so that they can develop creative solutions and/or propose creative strategies. Although we understand the importance of critical thinking, thinking in business must go further. All individuals think in a critical manner about a problem. The depth of the critical thinking, however, often depends on the knowledge level of the individual concerning the problem. But merely using tools to think about a problem does not produce change. Critical thinking must produce some sort of proposal representing a solution to the problem. And the more creative the solution, the better – especially in the world of business, where competition is fierce and often the only true differentiator is the level of uniqueness and/or creativity of the solution. In many ways, we actually restarted our CTW initiative this year. I am confident that our new mission statement will form a solid foundation upon which we can build in future years. These annual reviews are good because our review from last year made it clear to us of some aspects of the program and course that needed attention. One of those was to have the CTW ambassador (me) teach the course during the year. Indeed, the single most important change that occurred this year was that I taught sections of the course in both the spring and summer and I am slated to teach the course at least next fall. Having me involved teaching the class keeps me also involved in working with other department faculty to experiment with and implement changes to the course that follow the CTW goals that we now have in place.

#### CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

We believe that our new mission statement, goals and assignments will lead to significant improvements in student critical thinking in our course. We observed improvements in the few assignments which we used in previous years and for which we already had rubrics. We are developing assessment rubrics and processes for the new assignments in the course that we are certain will help us better measure and monitor progress in the future. General observations from this year indicate that we are on the right track (or, at least on a better path than we travelled over the past two years). Students demonstrated improvement in the area of applying learned tools and techniques to problems as the course progressed. And our experience with the initial group business plan project is very encouraging. Students displayed a high level of enthusiasm for the entire project, but in particular for the final presentations, as well as critiques of those presentations. We are confident that we will make significant progress this summer and next fall on figuring out how to best assess student progress in critical and creative thinking as demonstrated over the entire term in the group project.

#### CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We need to develop good assessment rubrics and/or plans for the in-class exams. As stated in the explanation of this assessment vehicle being investigated, we do not want to merely think of grades on an exam as assessment of learning or critical thinking. We believe that we can extract meaningful measures of the depth of understanding and analysis from student answers, if we develop good grading rubrics. Another area that needs development is the assessment rubric and/or plans for the group project business plan. We are confident that the project itself and the instructions for the project are now well vetted. Once we have an assessment process in place, we are confident that the entire project (which spans the whole semester, culminating in a final presentation to the rest of the class) will provide us with multiple time points during the semester (in fact, about once every 3 weeks) to measure progress as well as to provide meaningful feedback and direction. In past years, my main complaint about CTW in the finance department has been that I was not teaching the course. That problem was remedied this past academic year. I taught the CTW course in the spring and I am scheduled to teach again in the fall. When I am teaching the class, I am better able to work with other instructors to develop the CTW...
CTW has had a very significant and positive impact on our program, students and faculty. As more faculty buy into the CTW initiative in the department's CTW course, there has been increased discussion about critical thinking in general. This year's rewriting of the course's CTW mission statement and goals, has encouraged significant discussions, among even non-CTW faculty, concerning the relationship between critical and creative thinking in finance. Our students are benefiting from this discussion with course and assignment revisions. Overall, all parties involved are benefiting from the CTW initiative. The main change our department made since the last CTW Assessment Report relates to faculty scheduling. I am now teaching the department's CTW course on a regular basis and the others who teach the course are being scheduled to teach the course on a more consistent basis. Stabilizing the faculty who teach the course will only make the CTW initiative in the department stronger. The group who are consistently teaching the class is now meeting and talking more frequently and we are working in a more coordinated manner on CTW assignment as well as assessment rubrics and processes.

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The changes we made to the CTW mission statement and goals are now leading to revisions in learning outcomes, measures and targets in the overall program. The changes were made in response to feedback received from the committee that reviewed last year's CTW report. We will continue to revise assignments in the course, as well as in related courses and programs, through this year in order to improve the overall assessment process during the coming academic year.

**ACADEMIC PROGRAM QUESTION 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Currently the data collected and analyzed has had little if any impact on the department's educational degree program. The main reason for this lack of impact is that we are still working on developing assessment rubrics that can be used by more faculty and for other courses. Still, because the CTW course in the department is a required course that students must take early in their degree program, the critical and creative thinking skills that students develop in FI 4020 will soon be displayed in higher level elective courses. As we develop more general and useful assessment processes, we believe other faculty will use these to continue emphasizing the importance of critical and creative thinking in their courses, particularly to those not designated as a CTW course. Our overall hope is that all courses in the finance curriculum, along with all faculty and students, will benefit from the lessons that we are learning in this annual CTW assessment process.

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW French**

As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

The mission of the Department of Modern and Classical Languages is to give students the opportunity to develop appropriate proficiencies in the modern and classical languages, to acquaint students with the literary and cultural productions of other countries, and to provide them the opportunity to acquire critical skills through literary and cultural analysis as they prepare for their future careers. In accordance with the University's regulations regarding the Critical Thinking through Writing component of courses, the French section of the MCL department has defined critical thinking in French as follows: students who demonstrate their commitment to critical thinking through writing analyses, and who improve the quality of their work through the rewriting of successive drafts, gain a better understanding of the intellectual production that has taken place among French-language writers over the past several hundred years. They learn more about French thinking processes and are better equipped to find and express their own voices in the target language. In so doing, they participate in fulfilling the mission of the MCL department, by developing language proficiency, becoming acquainted with literature and culture of France and francophone countries and by acquiring analytical skills that are specific to the French-speaking world.

**Goals**

**G1: Goal for French**

A large majority of French majors must be at least good critical thinkers when writing in the target language.

**Student Learning Outcomes/Objectives**

**SLO 1: Objective (G: 1) (M: 1, 2)**

French majors in CTW courses are able to apply their critical judgment by writing commentaries on literary texts and answering critical questions on literary and civilization topics. More specifically, the objectives when rating students who think critically about French culture and literature are related to a CTW skill: 1. They can interpret: categorize, decide significance, clarify meaning.

**SLO 2: Objective**

French majors in CTW courses are able to apply their critical judgment by writing commentaries on literary texts and answering critical questions on literary and civilization topics. More specifically, the objectives when rating students who think critically about
French culture and literature are related to a CTW skill: 2. They can analyze: examine ideas, identify arguments, analyze arguments.

**SLO 3: Objective**
French majors in CTW courses are able to apply their critical judgment by writing commentaries on literary texts and answering critical questions on literary and civilization topics. More specifically, the objectives when rating students who think critically about French culture and literature are related to a CTW skill: 3. They can evaluate: assess claims, assess arguments.

**SLO 4: Objective**
French majors in CTW courses are able to apply their critical judgment by writing commentaries on literary texts and answering critical questions on literary and civilization topics. More specifically, the objectives when rating students who think critically about French culture and literature are related to a CTW skill: 4. They can infer: query evidence, conjecture alternatives, draw conclusions.

**SLO 5: Objective**
French majors in CTW courses are able to apply their critical judgment by writing commentaries on literary texts and answering critical questions on literary and civilization topics. More specifically, the objectives when rating students who think critically about French culture and literature are related to a CTW skill: 5. They can explain: state results, justify procedures, present arguments.

**SLO 6: Objective**
French majors in CTW courses are able to apply their critical judgment by writing commentaries on literary texts and answering critical questions on literary and civilization topics. More specifically, the objectives when rating students who think critically about French culture and literature are related to a CTW skill: 6. They can self-reflect: self-examine, self-correct according to the advice and comments that were given for the first phase of the assignment and then for the second phase.

### Measures, Targets, and Findings

#### M 1: Assignments descriptions (O: 1)
In each CTW French course, two written assignments are rated. In the FREN3033 course (Introduction to the Analysis of Literary Texts), one assignment is a literary essay (usually on a text in prose), the second is a text analysis (usually a poem). In the civilization courses (FREN4103 and FREN4123), the two assignments are essays related to civilization topics; in the FREN4103 course the topics are more historical than in the FREN4123 course, where they are more related to contemporary civilization issues, including comparative components.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Objective**
The target is a rating of 4 (on a scale going from 1 to 6) for 80% of the students enrolled in the course.

**Findings 2012-2013 - Target: Partially Met**
In 2012-2013, the target was once again partially met, as only one course reached the target of 80% or more of students being rated at least 4 on the rubric (FREN 4103, spring 2013). The figures for that course are impressive: for the second assignment, 100% reached the target of a rating of 4 on the rubric. In the 3033 course, for the first assignment, 84% of the students reached the target but only 42% for the second assignment. The results are surprising because the first assignment was a text commentary, where students usually have more difficulties in writing, whereas the second was an essay question, which is usually easier for them. The instructor teaching the course explained this discrepancy: for the first assignment, the CTW rating was obtained from an entire draft (vs a detailed outline, which is what we do in French for the first phase), whereas for the second assignment, the CTW rating for the first phase was obtained from the detailed outline of the first phase only. In her report the instructor concluded that the linguistic component of the CTW penalized students who do not possess strong linguistic abilities (two sections of the rubric judge the critical thinking of students in the target language). Although those figures (see table Findings 1) seem to be unsatisfactory at first sight, when one compares the results from assignment 1 to assignment 2, the CTW improvement if students is obvious. For FREN4123 for example, 44% of students made a 4 for the first assignment whereas 81% reached that score for the second assignment, which shows the success of the CTW initiative in French. In 2012-2013 it was the first time that all instructors teaching CTW courses should report to the Ambassador with all students names, so that he could keep track of their progress throughout the CTW courses. During that time, only four students took the entire sequence of CTW courses, one in fall 2012 and one in spring 2013. See table Findings 2 listing all their ratings in those two courses: three of the four students made a real progress, one being really impressive (a major progress); this student graduated this semester and has already been accepted in our graduate program. The other student does not seem to be interested in the CTW exercise, and did not do any of the two CTW phases for the second assignment in the second course. There are still too many students that do not participate in the exercise and do not do all assignments: 2 in 2 courses, 3 in one course and 4 in another course. These students are not included within the percentages, as we decided last year.

#### M 2: Written papers (O: 1)
In civilization courses (FREN 4123 and FREN 4013): two papers, two phases for each paper. In the literature course (FREN 3033): one essay, one text commentary.

Source of Evidence: Written assignment(s), usually scored by a rubric

### CTW Reflection Questions and Analysis Answers

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**
Four CTW courses were taught: FREN3033 in fall 2012 and spring 2013, FREN4123 in fall 2012 and FREN4013 in spring 2013. Two new faculty members were trained to teach CTW courses and taught them (one in fall 2012, one in spring 2013).

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been
Student Learning Outcomes/Objectives

Goals

Mission / Purpose

Critical thinking is defined as “a wide range of cognitive skills and intellectual dispositions needed to effectively identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do.” (Bassham, G., Irwin, W. Nordone, H., & Wallace, J., 2005. Critical Thinking: A Student's Introduction. New York: McGraw-Hill, page 1.). For both geography and geology, critical thinking involves the ability to recognize and evaluate truth claims, synthesize different approaches to knowledge/scientific findings, and articulate coherent and logical arguments.

G 1: Analysis
Students should be able to engage with scholarly literature in their respective fields and analyze arguments, validity, and findings.

G 2: Communication
Students should develop communication skills to appropriately convey their analysis of texts and data.

Student Learning Outcomes/Objectives

SLO 1: Reflection paper (G: 1, 2) (M: 1)

In Urban Geography, students will complete weekly reflection papers. In at least one paragraph and not more than one page, students reflect on the readings by exploring the connections of the authors’ arguments. Students’ reflection papers may be guided by the questions posed each week in the syllabus. The purpose of reflection papers is to encourage students to read carefully, and consider critically, the literature being explored and to articulate critical thinking in a brief, organized essay. Students will complete ten response papers over the course of the semester. Two papers, one from the beginning of the semester and one from the end, will be evaluated with a rubric.
SLO 2: Synthesizing Paragraphs (G: 1, 2) (M: 1)
In Climatic Change, students are expected to summarize the topic of a day's lecture and to include outside research to support the claims and observations made in the paragraphs. Students will turn in three paragraphs during the semester and will receive detailed feedback on each submission. Rubric assessment scores will be recorded for the first and third paragraph submissions.

SLO 3: Research Project (G: 1, 2) (M: 2, 3)
The term paper will be an opportunity for students to develop an original research paper. The student will identify a topic and submit a research proposal. The instructor will give feedback to the students, and the students will develop a research project, complete with explicitly identified methods and data. The student will submit a rough draft of the paper, and the instructor will provide detailed feedback. The student will incorporate the feedback and develop a final paper, which will also be orally presented to his or her peers.

SLO 4: Group Research Project (G: 1, 2) (M: 2)
Geology of Georgia project. The purpose of this project is to analyze, synthesize, interpret, and communicate the state of knowledge regarding the sedimentary environments and stratigraphy represented by the rocks and sediment of Georgia. Each student will go through a semester-long process of building an individual paper, and then synthesizing his or her paper with those of his or her classmates.

Measures, Targets, and Findings

M 1: Paper Rubric (O: 1, 2)
Please see Rubric in attached documents.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Reflection paper
80% of our students should average 4 or better on each element of the rubric, with a total of 24 or greater on the seven elements combined. Importantly, we are looking for improvement from our students through the course of a semester. As such, we would like to see 80% of our students improve from the first response paper to the final one that is collected.

Findings 2012-2013 - Target: Met
Of the 18 students in the course, 15 students completed both assignments. Of those 15 students, 12 received an average of 4 on each element of the rubric for the final paper assignment, which is 80% of those who completed the assignment. Thirteen of the 15 demonstrated improvement between the two assignments, and two students received the same scores for the first paper to the last.

Target for O2: Synthesizing Paragraphs
80% of students should achieve a 26 or better in the seven combined elements. 80% of students should demonstrate improvement from draft 1 to draft 2.

Findings 2012-2013 - Target: Met
Sixteen students completed both the first synthesizing paragraph assigned and the final one. From the first set of assignments, 11 of the 16 students achieved a 26 or better on the seven combined elements. For the final paragraph, 16 of 19, or 84% of students achieved a 26 or better. All 16 students improved in their scoring from the first paragraph submission to the last.

M 2: Term Paper Rubric (O: 3, 4)
Please see the attached Term Paper Rubric for Geology of Georgia
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Research Project
80% of students would achieve at least a total rubric score of 20 (an average of 4 or better for each of the five elements) for draft 1 and draft 2. Ideally 80% of students would improve from draft 1 to draft 2.

Target for O4: Group Research Project
80% of students' assessment scores should equal or exceed 20, which represents working understanding of the rubric elements. 80% of students should improve from the first draft of the assignment to the final draft.

Findings 2012-2013 - Target: Met
Of the 30 students who completed the first and final drafts of the assignment, 29 achieved a score of 20 or above on the final draft. Twenty-seven of the 30 students improved from the first draft to the second; one student received the same score, and two students received lower scores on the final assignment.

M 3: Final Paper Rubric (O: 3)
Geog/Geol 4830: Senior Seminar rubric attached.
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Research Project
All students should improve from draft 1 to the final draft. 80% of students should achieve a score of 20 or better on the final assessment score.

Findings 2012-2013 - Target: Not Reported This Cycle
A new instructor taught the course for spring 2013 and did not define the specific goals associated with the assignment. He did, however, provide a rubric and a summary of the scores students achieved on the final submission of their term paper.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Refine rubric
For the literature review assignment, the instructor will refine the rubric to capture integral elements of the assignment and will include more explicit discussion of critical thinking and writing skills in the course of the class.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High

  **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Paper Rubric
  - **Outcome/Objective:** Synthesizing Paragraphs

#### Strengthen curriculum for Urban Geography
In order to facilitate meeting the CTW goals for the urban geography course, the instructor will strengthen her curriculum to include more explicit teaching on various components of writing, providing more examples to students. She will make a more demonstrated effort to articulate clearly the strengths and weaknesses of the reflection papers that the students turn in so that they may learn from their own writing experiences. Throughout the semester, she will schedule one-on-one conferences with students to discuss their writing strengths and weaknesses.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High

  **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Paper Rubric
  - **Outcome/Objective:** Reflection paper

#### Strengthen focus on structure of research paper
The instructor will focus her efforts on improving students’ understanding of the component parts of a research paper, which include identifying a problem, articulating an argument, identifying (and justifying) methods and data, and analyzing data and drawing conclusions.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** In-Progress
- **Priority:** High

  **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Final Paper Rubric
  - **Outcome/Objective:** Research Project

#### Writing skills course
The instructor plans to devote several class periods to focus on critical thinking skills with less emphasis on technical writing skills.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Terminated
- **Priority:** High

  **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Final Paper Rubric
  - **Outcome/Objective:** Research Project

#### Action plan for Urban Geography
The instructor has relied on individual feedback on reflection papers. The instructor plans to include an hour-long active learning exercise in which together the students and instructor work through a reflection paper assignment.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High

  **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Paper Rubric
  - **Outcome/Objective:** Reflection paper

  **Projected Completion Date:** 10/2011
  **Responsible Person/Group:** The CTW instructor

#### In-class demonstration of paragraph construction
In order to facilitate greater achievement, the CTW instructor will conduct an in-class session with the students to demonstrate, through active learning, how a paragraph demonstrating critical thinking skills could be constructed.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished
- **Priority:** High

  **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Paper Rubric
  - **Outcome/Objective:** Synthesizing Paragraphs

  **Projected Completion Date:** 10/2012
  **Responsible Person/Group:** The CTW instructor

#### Curriculum evaluation with the merger of geology and geography degrees
Over 2012-2013, the Department of Geosciences anticipates B.A./B.S. degrees in Geosciences (rather than a B.A. in Geography and a B.S. in Geology). This process, along with the expressed intention as outlined by the department in its active Strategic Plan, will
entail a careful curriculum analysis. This analysis may result in the creation of new CTW courses and the deactivation of existing ones.

Senior Seminar Action Plan
The CTW ambassador will conduct training sessions with the new CTW instructor (who was unavailable for training during spring 2013).

Urban geography action plan
The instructor spent more time explaining the writing process, the rubric, and the expectations for the CTW assignment during fall 2012. Students seemed to respond well and improved significantly on their assignments. The instructor will again devote similar classroom time for the fall 2013 course.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

The major achievements for 2012-2013 were that in three of the four CTW courses for the department, our CTW goals were met. Instructors spent more time in the classroom explaining assignments, offering feedback to students, and the rubric scores improved. We followed through with our action plans for these courses.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

We have not been able to discern much improvement, because often students take these courses either simultaneously or just one semester apart. What we have noted, however, is improvement during courses, as instructors are working more carefully during the semester to facilitate students' writing skills.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

The Department of Geosciences will have new B.A. and B.S. degrees in Geosciences starting fall 2013. In addition, the department has a new chair. These changes likely mean that the curriculum for the degrees will be carefully scrutinized, and along with possible curriculum changes, the CTW courses may be changed and/or streamlined. I anticipate working with the CTW coordinator and the faculty to create and implement changes to the department's CTW program.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

It is unclear to me what the impact of CTW on our academic program has been. From my understanding, most professors already included writing-intensive exercises in their courses. Now, perhaps, students are more aware of the explicit goal of developing critical thinking through writing skills. The only change to the CTW program in our department is that a new instructor taught one of the CTW courses.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have not made changes since last year--but we did implement our action plans to spend more time in the classroom discussing writing and critical thinking skills, which seems to have been effective. I plan to hold workshops with the CTW instructors during the 2013-2014 year to review the rubrics, targets, and measures with the CTW faculty.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Our new degree program will likely take precedent over CTW findings. That is, we will be reviewing carefully the curricula for the B.A. and B.S. degrees, streamlining learning outcomes and objectives for our degrees, and incorporating CTW assignments and classes in a more intentional way.
projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

Our new degree programs may pose challenges for us in terms of refining the curricula for our B.A. and B.S. degrees.

---

**Assessment Data by Section**

**2012-2013 CTW German**

*As of: 12/12/2016 05:59 PM EST*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)*

### Mission / Purpose

The mission of the Department is to give students majoring in German the opportunity to develop appropriate proficiencies in the German language, to acquaint them with the literature and culture of German speakers, to promote their interest and involvement in international exchanges through study abroad programs, and to provide them the opportunity to acquire critical skills through linguistic, literary and cultural analysis as they prepare for careers in teaching, business, translation and interpretation and other areas. Critical thinking goes hand in hand with analytical thinking. For Cottrell (1999:188) analytical thinking involves following additional processes: • Standing back from the information given • Examining it in detail from many angles • Checking closely whether it is completely accurate • Checking whether a statement follows logically from what went before • Looking for possible flaws in the reasoning, the evidence, or the way that conclusions are drawn • Comparing the same issue from the point of view of other theorists or writers • Being able to see and explain why different people arrived at different conclusions • Being able to argue why one set of opinions, results or conclusions is preferable to another • Being on guard for literary or statistical devices that encourage the reader to take questionable statements at face value • Checking for hidden assumptions. German for critical thinking = Auseinandersetzungsvermögen (Discussion/Debate/Looking into a subject + capacity/ability/assets/means). In terms more specific to the German major, the assignments in our CTW courses will enable students to gain a better understanding of literary and – more broadly – cultural and historical trends in the German-speaking world, and equip students with the tools necessary to query their intellectual and personal positions with respect to the long and complex tradition of Germanic cultural production, which at times intersects with other traditions with which students may be familiar, and at times diverges from them. Ultimately, students in our CTW courses will be able to comprehend German texts within their cultural, intellectual, and historical contexts, and engage these texts in ways that are both intellectually rigorous and personally meaningful. The challenge unique to CTW in a foreign language is the rigorous task of interpretation and evaluation in a non-native context of imperfectly mastered grammar and syntax and a lexis with sub textual subtleties. Our mission includes providing the tools necessary to use language effectively to present the line of reasoning that follows from the students’ identification and evaluation of their argument.

### Goals

**G 1: Student Goals BA German**

1. Students are competent in the language and culture of German speaking countries. 2. Students have advanced knowledge in their concentration: pedagogy, international business or literature. 3. Students acquire though course work, exchange programs and study abroad the critical skills needed for success in their chosen career, whether it be teaching, business, translation and interpretation or other supranational opportunities. 4. Students should develop the skills requisite for critical thinking, thereby enabling them to query their own intellectual and personal positions and to contextualize them in the broader scope of cultural understanding, adaptability in global settings and an aptitude in navigating diversity. 5. Students will achieve the linguistic register to demonstrate both verbally and in writing a solid understanding of core issues central to German society and culture.

**G 2: Faculty Assessment Standards**

New and current faculty to be trained to assess student writing in CTW courses, even in those courses they seldom or never teach. Essays in introductory course distributed to all faculty in our section for rating. Results discussed in section meeting. Variations in assessment analyzed and documented.

**G 3: Student CTW Improvement**

Students in Entry Level Major CTW Course will show improvement between first and last essay of semester and between entry and exit course. Rubric goal is 4.

**G 4: Arguing From a Negative Perspective**

Student will think critically about the city in which he/she lives from a negative perspective using as many forms of negation as possible (e.g. what he/she does not like). Student will justify and explain assumptions and reasons.

### Student Learning Outcomes/Objectives

**SLO 6: Undergraduate Learning Outcome Objectives (M: 4, 5, 6, 7, 8)**

1. Students will be able to write in the target language (German) with infrequent errors in grammar and syntax and in a style that does not interfere with communication. 2. Students will examine literary, cultural and historical trends in the German-speaking world through primary and secondary texts and will fair-mindedly follow the evidence, demonstrating the ability to identify relevant arguments, analyze, interpret and formulate inferences free from biased preconceptions. 3. Students will be able to comprehend German texts within their cultural, intellectual and historical contexts, and engage these texts in ways that are both intellectually rigorous and personally meaningful.

### Strategic Plan Associations

5.4 Enhance the global competency of students, faculty and staff.

**SLO 7: Analysis of Core Cultural Issue (G: 1) (M: 9)**

Students should understand, comment on and demonstrate a solid understanding of core issues central to German society and...
### General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Institutional Priority Associations

2. Student promotion and progression

### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### Strategic Plan Associations

5.4 Enhance the global competency of students, faculty and staff.

### SLO 9: CTW Improved Scores (G: 3) (M: 11)

CTW entry level course will track student progress over the course of 2 semesters from first to last semester essay. Previously individual student progress had been tracked. The objective of this study was to assess overall student performance improvement or lack of improvement by averaging all student CTW rubric scores for the 2011 and 2012 semesters. Goal for the department is 4.

### SLO 10: Thinking Critically about Personal Perspectives (G: 4) (M: 12)

Student will clearly communicate ideas in German over 2 drafts by making personal connections to a familiar place from a negative perspective. Quality of German will be at the capstone (senior) level of B2/C1 under the CEFR - Common European Framework of Reference for Languages: Learning, Teaching, Assessment.

### Other Outcomes/Objectives

O/O 8: Faculty Training and Consistency (G: 2) (M: 10)

Faculty should consistently determine that students have developed the skills requisite for critical thinking (to query their own intellectual and personal positions and to contextualize them in the broader scope of cultural understanding, adaptability in global settings and an aptitude in navigating diversity) by some mutual agreement on what these skills look like, how to assess them and how to improve the tools used to measure them.

### General Education/Core Curriculum Associations

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

### Institutional Priority Associations

2. Student promotion and progression

### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

### Strategic Plan Associations

4.3 Other efforts in support of Goal 4 (Complex Challenges of Cities).

1.1 Increase the level of scholarship support for undergraduate students.
5.4 Enhance the global competency of students, faculty and staff.

### Measures, Targets, and Findings

#### M 3: Critique/Analysis of a Cultural Ideology

**Outcome**: Student should demonstrate critical thinking through writing skills by supporting the main idea of the assignment and showing proficiency in fair-mindedly following where evidence and reasons lead. Measure: Student shall write a 350-400 word essay in German and in English which focuses on a moral concept based on a German speaking country's political and cultural philosophy of neutrality (Switzerland). Assessment of the assignment (how it is measured) is based on the ability of the student to distinguish between fact and opinion, explore relevant historical and cultural contexts and achieve a clear organization of ideas with concrete conclusions in the limited framework of a shorter essay.

**Source of Evidence**: Written assignment(s), usually scored by a rubric

#### M 4: Student Portfolio (O: 6)

Student portfolio to collect and reflect on all assignments. The central feature of portfolios is that these samples of evidence demonstrate the progress the student makes toward self-defined objectives whose attainment requires creativity, self-discipline and inter-disciplinarity. At the end of the semester the portfolio should contain: • 2 essays • 1 oral presentation • 1–2 poems or song texts • an outline of the final project • individual vocabulary lists (20–30 entries per topic) • a self evaluation

**Source of Evidence**: Portfolio, showing skill development or best work

**Target for O6: Undergraduate Learning Outcome Objectives**

This measure is a repository for student work and not a measure in the sense that there are individual findings for a specific assignment measured here. It is listed here to document how the graphs were created for the tracking of findings.

#### M 5: Speed Essay German 3301 Entry Level Course (O: 6)

**Goal 4 Objective 2 Measure Speed Essay - Nudity (German FKK or Nudist Organization)**

**Source of Evidence**: Written assignment(s), usually scored by a rubric

**Target for O6: Undergraduate Learning Outcome Objectives**

100% of Students will score at the level of 4 or higher on this measure.

#### M 6: Entry Level CTW German Semester Development (O: 6)

Graph tracking CTW development (average) from first to last CTW assignment over the course of one semester. Benchmark group consisted of 5 German students, not necessarily majors. Results (see graph): 3 out of 5 students reached the departmental average of 4 by the end of the semester. 4 out of 5 students showed improved critical thinking skills as related to the rubric averaged over all assignments which were culture based. Only 1 student remained at level below expectations and actually showed diminished skill development.

**Source of Evidence**: Benchmarking of learning outcomes against peers

**Target for O6: Undergraduate Learning Outcome Objectives**

The target for this one-semester tracking of 5 students was to determine if critical thinking skills show measured development over the course of the entry level CTW major class (German 3301) and if the introduction of a portfolio (allowing students to collect and self-evaluate their work and progress) contributed to this goal.

#### M 7: CTW Average Score Entry Level to Capstone (O: 6)

Tracking 5 students in the major (German) from entry level course (3301) through capstone (4402) to determine if CTW skill development could be tracked.

**Source of Evidence**: Benchmarking of learning outcomes against peers

**Target for O6: Undergraduate Learning Outcome Objectives**

The target for students from the entry level course to the capstone course is to score and/or maintain the departmental goal of 4.

#### M 8: Capstone Assignment German 4402 (O: 6)

Capstone CTW assignment on Death Penalty. Goal 4 Objective 2

**Source of Evidence**: Capstone course assignments measuring mastery

**Target for O6: Undergraduate Learning Outcome Objectives**

Target for each CTW assignment at the capstone level is 4 on the rubric.

#### M 9: Speed Essays (O: 7)

Speed Essays 1 and 4 to assess student progress over course of semester in entry level German 3301 course. Graded only by rubric as assignment was written in English. Only one student was chosen to track over the course of the semester.

**Source of Evidence**: Written assignment(s), usually scored by a rubric

**Target for O7: Analysis of Core Cultural Issue**

The target was a minimum of 4 on the department's rubric scale. (CTW Goals for Essay 1 and 4: Demonstrate a basic ability to analyze, interpret and formulate inferences/States or briefly includes more than one perspective in discussing literature, experiences and points of views of others)

**Findings 2012-2013 - Target: Partially Met**

The student showed progress from a 2.5 to a 3. on the rubric. There was evidence of movement away from personal
commentary on the aspects of the target culture that simply summarized the student's prejudices or rather preconceived notions and exhibited little analysis of the nature of the basic cultural differences and their possible origins, justifications or aptness in a cultural or historical context. There was, however, no real in-depth analysis of the problem of cultural "dominance." Despite the assertion that the student had converted to Islam, there was no consideration of the non-inclusive nature of religious traditions that become dominant in the culture.

**M 10: Faculty Assessment of Essays - Blind Panel (O: 8)**
One speed essay from intro course evaluated by a panel blindly and then variations, measurement techniques discussed and fine tuned.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O8: Faculty Training and Consistency**
Consistent scoring of CTW assignments by all faculty in section.

**Findings 2012-2013 - Target: Met**
Although only one essay is uploaded here, there was a remarkable consistency across the 3 faculty involved in assessing the speed essay. The presence or absence of multiple perspectives, the number and quality of examples and evidence of thinking through the core issue were noted in the margin in the blind peer evaluations. 95% of the 14 essays evaluated received the same CTW score from the rubric.

**M 11: Mirrored Essays over 2 Years (O: 9)**
Students were assigned essays on a variety of current and controversial topics based on the readings of the intro level CTW course for German majors. The CTW assessment over the course of the semester was tracked by averaging the first and last score from the rubric (essay 1 and essay 4). The students were to comment on demonstrate a solid understanding of core issues central to German society and culture with increasingly thoughtful and to sophisticated complex elements of structure and analysis. The measure was tracked over 2 semesters by averaging all of the students scores for essay 1 and essay 4 for 2011 and 2012. Previously the measure had been individual student performance over the semester. This measure was intended to qualitatively and quantitatively measure the effectiveness of new CTW assignments and the teaching of CTW skills as outlined in our action plan.
Source of Evidence: Writing exam to assure certain proficiency level

**Target for O9: CTW Improved Scores**
The target goal on each essay is a 4 on the departmental rubric, but the objective on this measure was to attain an overall class average of 4 by the end of the semester.

**Findings 2012-2013 - Target: Met**
As per the graph referenced here, the goal was met in 2012 but not in 2011. However, because the objective was to improve overall student performance on a class average from 2011 to 2012 by reevaluating the assignments used to measure CTW (see action plan) and to implement peer training and CTW skill mini-lectures, the finding is listed as target met. 2011 CTW score average 3.36 Essay 1 to 3.81 Essay 4 2012 CTW score average 3.86 Essay 1 to 4.23 Essay 4.

**M 12: Essay (O: 10)**
2 Drafts of essay on CTW topic with grammatical focus.
Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O10: Thinking Critically about Personal Perspectives**
CTW score of 4 (departmental goal) including minimal errors in grammar (German) in final draft.

**Findings 2012-2013 - Target: Met**
Excellent final draft. CTW score rose from 3.5 to 5 and extensive "coded" grammatical errors corrected by student at senior level (B2/C1 Referenzrahmen - Common European framework for language assessment).

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Action Plan for CTW 2010-2011**
The German Section has plans to meet more regularly to discuss and develop a body of thematic exercises that can be used for critical thinking writing assignments in upcoming classes. Although generic in character, these assignments can be adapted to fit the goals of any CTW class in German, whether it be a writing assignment, a 5 minute speed paragraph, or a final exam topic. This should help us codify not only the type of assignment we feel can most fairly assess student learning and achievement, but also guide us in a more reasonable expectation on each assignment by limiting which CTW aspects from the rubric are actually being assessed. The faculty will come together as a whole to discuss and compare evaluations and brainstorm broad discrepancies or variables in assessment. It is expected that these discussions will lead to further fine tuning of the rubric itself. From previous CTW classes and pilots, we have discovered as well that the type of assignments we currently use to evaluate critical thinking are very limited (traditional essays with "controversial topics"). We plan to implement more "speed" paragraphs in which comprehension of and/or reaction to a class discussion point is "tested" immediately and then used to further enlighten the topic being examined. It is hoped that from these spontaneous reactions the students can develop a greater sense of what a longer critical thinking assignment entails. A curriculum change throughout the entire major has been drafted and will focus on German Studies rather than on traditional language and literature. This should facilitate communicating expectations to students as the courses will be designed around a theme or cultural focus rather than a historically delimited body of work.

**Established in Cycle:** 2009-2010

**Priority:** High
**Implementation Description:** Action Plan implemented through German section meetings
**Responsible Person/Group:** Dr. Robin Y. Huff
**Additional Resources:** None
Action Plan for 2011-2012

Our major goals are revision of the rubric, a central repository for CTW assignments and CTW graded assignments used for measures and the switching of the CTW required course to a more appropriate one based on content. · The revision of the rubric is intended to effect improved student response to the CTW component of the course by making the rating scale more user friendly and the rating criteria more explicit as to what is needed for improvement. · The central repository will make it easier for faculty (continuing and new) to standardize assignments deemed to be most conducive to the goals of CTW and not be continually forced to draft new ideas for each semester/syllabus. The other faculty will also be aware of what is happening in that course and because many students are shared among courses, support can be given in non CTW courses in a subtle interdisciplinary way if core topics are mirrored in multiple courses. This will also prevent loss of data and student samples as occurred this past year. · The grammar capstone course has proven to be a stumbling block to CTW assignments which are perceived as onerous and contrary to the goals of mastering German grammar and syntax. The goal is to change the grammar course to a 3000 level course to ensure mastery at an earlier level, change the capstone course to a culture based interdisciplinary context course such as Literature and Film and add an advanced conversation and composition course to the entry level curriculum to facilitate the integration of CTW assignments into that more thematically based course. We anticipate a better student response to the CTW component, a clearer understanding of the goals of the initiative and subsequently better student performance. We plan to document the progress of the student for their and our edification in a portfolio format perhaps with “digication.”

Action Plan to Improve Student Performance 2012-2013

With the orientation of a new faculty member from Germany, we hope to brainstorm as a team to draw up an action plan for our learning outcomes as a whole, thereby addressing reoccurring and persistent problems that have hampered the realization of many of our goals: a) Competence in the language and how to assess that learning outcome objectively b) How to better “teach” critical thinking skills, perhaps through a peer tutoring program to ensure development over the junior/senior year c) Address the issue of CTW errors/inadequacies based on language competence and ability to express ideas in the target language d) Develop a list of skills and the corresponding best practice topics that would showcase those skills in writing assignments rather than randomly assigning topics each semester per instructor e) Revisiting the same skill sets throughout the program to better track progress

Established in Cycle: 2011-2012

New CTW Course and Rubric

Add new CTW course to supplement or replace current CTW capstone course German 4402 (Advanced Grammar).

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Implementation Description: New course would have to go through curriculum committee as it is not yet in the catalog and be
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program this academic year? How do these relate to the Action Plans that you specified last year?

With the loss of and the addition of a new faculty member, we focused on training as part of our action plan from last year. Dr. Denzel was asked to do blind assessment of essays from the intro-level CTW course and as a section his critique was compared to the CTW ambassador’s (who taught the class) and the other full-time faculty member. 95% of the essays were assigned the same CTW score by each faculty. This was a major achievement in training and fulfilled our goal a) from last year for objective and consistent assessment. Addressing CTW inadequacies based on language competence (goal c) was somewhat side-stepped by offering to the students the option to write in English or German. The stronger students were able to meet the departmental standard of 4 and the weaker ones were able to meet or approach our goals by removing the time and structural constraint of writing in a foreign language.

Because of the arbitrary nature of assigning our learning outcomes for literature classes (see learning outcomes rubric in document registry), we decided to track our students’ progress over 2 semesters solely by our own rubric. In the intro CTW class (German 3301) we were pleased to see growth in the skill sets we targeted and by the end of the semester in 2012 the departmental goal of 4 was reached in the over all averaging of the students’ scores. This was a conscious decision to track overall rather than individual performance because the class composition was not the same as in previous years, where students taking 3301 took 4401 in the same academic year and thus could be tracked on an individual basis. The same set of essay topics and skills (objectives) were used in both academic years, thus partially fulfilling our goal (d) from our action plan of consistency in assignments for tracking purposes over at least 2 semesters. This was not the case for 4402 where a faculty new to CTW taught the course for the first time and was somewhat focused on grammatical usage in assignments marked for critical thinking.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Unfortunately we were not able to track the same students as in the previous year from 3301 to 4402 (entry to exit) in German. Also a faculty new to CTW was in charge of the exit course and the documentation of growth was not thorough on an individual student basis as in the past. That being said, if improvement in critical thinking is viewed as a whole from junior to senior year, then the departmental goal of 4 was met more consistently in the exit class for German majors as a whole. The faculty in charge reported that this may be due in large part to the assignment having 1-2 drafts: “You will have the opportunity to rewrite at least one assignment based on the instructor's comments on your first version. Essays will demonstrate writing and critical thinking skills on topics as diverse as language hegemony, topical cultural issues in the German-speaking world, and literary analysis of complex texts, focusing on the interpretive implications of grammatical structures.” (Syllabus 4402) What was new this year that made the grammar course more adaptive to CTW goals was the inclusion of singular grammatical structures as a tool for interpretation, effectively combining the academic goals of the course itself with the CTW expectations by providing new tools for implementing non-native rhetorical argument.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

The administrative coordinator who was to help with our goal of developing a central repository of CTW assignments in the M drive of our departmental common folder left for a better position and we decided to hold off on our centralization of documents until the new coordinator could be trained. In addition, there is still dissatisfaction of having the CTW exit course be a grammar course where the objectives of the assignments conflict with the free expression of ideas, the continuing issue of foreign language skills being imperfect and hindering the fair assessment of the underlying evidence of critical thinking. The change in rubric scoring for literature courses in our learning outcomes module necessitates a further revision of our common MCL rubric of 1-6. The new module being considered (see document repository) would rate only 7-10 (Developing, Acceptable, Proficient, Advanced) and would include grammar and spelling for the FL component, but the descriptions are not "user friendly" and students have had a hard time understanding the terminology such as "the use of the literary lens is inaccurate.” This vagueness is counterproductive to our goal (b) from last year of making an effort to "teach" critical thinking by example. However, the notion of teaching critical thinking has been quite problematic. The cooperative learning environments of Cooper (1995) with peer and teacher feedback in group settings have been difficult to implement in our classes and students have shown more pressing need of the course content itself (e.g. grammar/structure). Project based learning is also onerous in a course where there are already so many assignments purely based on mastery of the complex subject matter. The way to overcome these problems is to expand the CTW component to more 4000-level courses, but in a section our size the chance that additional courses for majors would meet the arbitrary 15 minimum class enrollment required is slim.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

The primary impact has been to train new and/or inexperienced faculty in developing goal-oriented and concise CTW assignments and tracking the development of students throughout the semester. There has also been an initiative to develop a new course that would have a thematic that is more integrated with the goals of the CTW initiative. This course would have a more intensive writing component independent of learning grammar or being subjected to a time-intensive reading list. (sample syllabus in document repository). The use of portfolios was scaled back due to student complaints that it was too time consuming and a new version of the portfolio is being developed that eliminates word lists and focuses more on creative writing and the requisite outlines and drafts.

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The learning outcomes changes have been geared toward reducing the number of ratings from 6 to 4 as discussed elsewhere in this report. The improvement to that process will be to clarify the descriptors so that the outcomes expected and the ways the assignments are assessed are well-defined and lucid. The measures were shortened as per Angelo's suggestion (1995) to use ongoing classroom assessment as a way to monitor and facilitate students' critical thinking. An example would be to have students write a "Minute Paper" on a topic discussed that same day in class. The main reason for the change was to give the students more chances to develop and receive feedback on their emerging skill sets, especially in the entry level course. This will be improved in
ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The major impact of the findings is that, again, the current grammar course is not conducive to developing or evaluating critical thinking. The previously mentioned new course offering will be developed exclusively with CTW in mind and the readings and assignments pared down to offer more opportunities for revision, rethinking and reinvention. A possible scenario would be as follows:

An assignment sheet will be posted on Blackboard for every class period (except presentation dates). Student is expected to answer the short questions or complete other short tasks in writing before coming to class. Instructor will spot check these by requiring student to hand them in on some days. Students are expected to complete them and bring them every day! There will be short writing assignments due each week (typically between one paragraph and one page in length) marked by an “S” on the assignment sheets. These will require student to practice using various grammatical structures, vocabulary, and phrases correctly (thus removing the structural barriers before the major assignment is tackled). For each of the four thematic sections of the course, student will be assigned a three-page paper. These papers will require that student discuss critically and insightfully one or more of the themes addressed in that section. These papers can include material student has written for the shorter writing assignments (but student is expected to improve his/her writing and not to repeat old mistakes). The papers must be impeccably formatted (following the detailed instructions on the document “Rechtschreibung und Formatierung” exactly) and be very carefully proofread. They should be posted to Blackboard before class and should be brought to class in hard copy on the date posted on the syllabus.

Georgia State University
Assessment Data by Section
2012-2013 CTW History
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The history department subscribes to the definition of Critical Thinking as it was proposed to the Faculty Senate: our courses will help “students develop the 'wide range of cognitive skills and intellectual dispositions needed to effectively identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do.’” When students graduate we expect that they will be able to demonstrate historical mindedness, multidimensional analysis, knowledge of historical context, ability to analyze texts, and how to present their findings. They will also demonstrate a range of professional skills, a knowledge of historiography, an awareness of interdisciplinary methods and larger (trans-national, -regional, or global) perspectives, as well as a set of professional values. Please see the “history standards” in the document repository for further details.

Goals

G 1: Historical Thinking
Students will understand how to differentiate between different historical periods and different perspectives within history.

G 2: Historical Interpretation
Students will be able to ask relevant questions of primary and secondary texts.

G 3: Communication and Presentation
Students will be able to communicate their findings clearly and concisely

Student Learning Outcomes/Objectives

SLO 2: Historical Context (G: 2) (M: 2, 5)
Students will be asked to place primary sources within their proper temporal, geographical, political, and cultural contexts and analyze them appropriately. Students will likewise be able to judge historical arguments by their sensitivity to context.

Other Outcomes/Objectives

O/O 1: Historical Thinking (G: 1) (M: 1, 5)
Students will be given assignments that require them to understand the multiple perspectives within history and the relationships over time between causes and consequences, change and continuity, and structure and agency.

O/O 3: Interpretive Skills (G: 2) (M: 3, 5)
Students will be asked to differentiate between primary and secondary sources and identify the major points of disagreement in historical interpretation.

O/O 4: Historical Communication (G: 3) (M: 4, 5)
Students will be able to communicate findings in essay form effectively, elegantly, and concisely.
**Measures, Targets, and Findings**

**M 1: HIST 3000 Historical Thinking Rubric (O: 1)**

This rubric tracks students' ability to comprehend historical change through various levels on a zero to five point scale, from absent to advanced: Absent (0): Unable to distinguish between past, present, and future Developing (1-2): Understands history from multiple perspectives; appreciates varieties of history Competent (3-4): Comprehends relationships over time between causes and consequences, change and continuity, and structure and agency Advanced (5): Sophisticated comprehension of historical change including (when appropriate) an awareness of non-teleological transformations

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Historical Thinking**

Students in the gateway course (HIST 3000) should display competency, scoring between 3 and 4 on the rubric.

**Findings 2012-2013 - Target: Met**

Students in the gateway course scored on average 3.08 on the rubric. The mean was slightly higher: 3.5. This represents competency, and we are meeting the targets in this field. However, there was a substantial decrease in competency from our findings last year, when the average score was 4.13. This year, the percentage of students not meeting expectations also increased significantly from last year. There are several possible reasons for this decrease in scores on the historical thinking measure in the gateway course. The first is controlling for the instructor. Our instructors change every year, and some are harder assessors than others. The second is the student quality may differ significantly from one year to another. We also changed collection methods this year. Last year the instructors were asked to pick out assignments at random. This year they submitted representative samples. The result may be that we have more self-selected top and bottom performers. It is noteworthy that the percentage of students exceeding expectations did not change dramatically, for instance.

**M 2: HIST 3000 Historical Context Rubric (O: 2)**

This rubric tracks students' ability to comprehend historical context on a five point scale, from absent (0) to advanced (5). Absent (0): Unable to place events in historical context in general as well as in his/her special field of interest. Awareness of both temporal and spatial contexts. Competent (3-4): A solid grasp of temporal/spatial historical contexts. Able to place events in appropriate context, including a meaningful chronological order. Advanced (5): A superior understanding of how to place events in appropriate temporal and spatial context, including a meaningful chronological order and within larger historical trajectories.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: Historical Context**

Students in the gateway course (HIST 3000) should display competency, scoring between 3 and 4 on the rubric.

**Findings 2012-2013 - Target: Met**

Students in the gateway course scored on average 3.25 on the rubric. The mean was lower at 3. This represents competency, and we are meeting the targets in this field. However, there was a substantial decrease in competency from our findings last year, when the average score was 4.1. This year, the percentage of students not meeting expectations also increased significantly from last year. There are several possible reasons for this decrease in scores on the historical context measure in the gateway course. The first is controlling for the instructor. Our instructors change every year, and some are harder assessors than others. The second is that the student quality may differ significantly from one year to another. We also changed collection methods this year. Last year the instructors were asked to pick out assignments at random. This year they submitted representative samples. The result may be that we have more self-selected top and bottom performers. It is noteworthy that the percentage of students exceeding expectations did not change dramatically, for instance.

**M 3: HIST 3000 Interpretive Skills Rubric (O: 3)**

This rubric tracks students' ability to comprehend historical context on a five point scale, from absent (0) to advanced (5). Absent (0): Unable to differentiate between primary and secondary sources; cannot distinguish between conflicting interpretations. Developing (1-2): Able to ask relevant questions of primary and secondary sources. Able to distinguish basic interpretive differences within a literature or between two secondary works on the same subject. Competent (3-4): Able to probe various meanings in primary texts; shows a good grasp of interpretive methodologies. Able to distinguish and analyze differences (whether methodological, theoretical, or interpretive) within a body of secondary literature. Advanced (5): A superior understanding of interpretive, methodological or theoretical differences in secondary sources; Able to develop subtle readings of primary texts in order to produce knowledge about the past.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Interpretive Skills**

Students in the gateway course (HIST 3000) should display competency, scoring between 3 and 4 on the rubric.

**Findings 2012-2013 - Target: Partially Met**

Students in the gateway course scored on average 2.67 on the rubric. The mean was higher at 3. However, fully 41% of students are not showing competency in interpretive skills. This represents a decrease from reporting from the previous cycle, and as such it appears that we are at best only partially meeting this objective. At worst, we are not improving. There are, of course, potential reasons for the decrease in scores in the interpretive skills measure in the gateway course. The first is controlling for the instructor. Our instructors change every year, and some are harder assessors than others. The second is that the student quality may differ significantly from one year to another. We also changed collection methods this year. Last year the instructors were asked to pick out assignments at random. This year they submitted representative samples. The result may be that we have more self-selected top and bottom performers. It is noteworthy that the percentage of students exceeding expectations did not change dramatically, for instance.

**M 4: HIST 3000 Communication and Presentation Rubric (O: 4)**

This rubric tracks students' ability to document sources, and communicate stylistically on a five point scale, from absent (0) to advanced (5). Absent (0): Unable to identify and document sources; cannot understand concepts such as plagiarism or unable to properly attribute information and ideas. Developing (1-2): Aware of the requirements if not always the mechanisms for differentiating
his/her work from that of others. Able to communicate findings, but with serious structural or stylistic deficiencies. Competent (3-4): A clear ability to differentiate his/her work from others and the scholarly apparatus needed to make this evident; Able to communicate findings with minimal structural or stylistic deficiencies. Advanced (5): A superior ability to communicate findings through mellifluous prose and a flawless documentation system.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Historical Communication**

Students in the gateway course (HIST 3000) should display competency, scoring between 3 and 4 on the rubric.

**Findings 2012-2013 - Target: Partially Met**

Students in the gateway course scored on average 3.17 on the rubric. The mean was lower at 3. This represents competency, and we are meeting the targets in this field. However, there was a substantial decrease in competency from our findings last year, when the average score was 3.85. This year, the percentage of students not meeting expectations also increased significantly from last year. There are several possible reasons for this decrease in scores on the communication and presentation measure in the gateway course. The first is controlling for the instructor. Our instructors change every year, and some are harder assessors than others. The second is that the student quality may differ significantly from one year to another. We also changed collection methods this year. Last year the instructors were asked to pick out assignments at random. This year they submitted representative samples. The result may be that we have more self-selected top and bottom performers. It is noteworthy that the percentage of students exceeding expectations did not change dramatically, for instance.

**M 5: HIST 4990 Capstone Assignment (O: 1, 2, 3, 4)**

In History 4990, students produce a capstone project, a research paper of 15-25 pages in length. The papers are assessed according to the CTW rubric.

**Target for O1: Historical Thinking**

Students should demonstrate competency to mastery of the subject, scoring between 4 and 5 on the rubric.

**Findings 2012-2013 - Target: Met**

Students scored on average 3.96, with a mean of 4 in this category. This represents a general mastery of the subject. Competency was achieved by virtually all in the representative samples. While the scores decreased from last year, the transition to a representative sample likely affected the number of bottom performers, as with the gateway course. A comparison of scores between the gateway and capstone course reveals that students generally perform better in the capstone at both ends of the curve. That is, those that exceed expectations do so with higher scores and those who do not meet expectations nonetheless perform better than those who do. The Historical Thinking graph shows this difference.

**Target for O2: Historical Context**

Students should demonstrate competency to mastery of the subject, scoring between 4 and 5 on the rubric.

**Findings 2012-2013 - Target: Met**

Students demonstrated consistent competency and mastery of understanding historical context, scoring on average 3.93 in this category, with the mean arriving at 4. This represents a general mastery of the subject. Competency was achieved by virtually all in the representative samples. While the scores decreased from last year, the transition to a representative sample likely affected the number of bottom performers, as with the gateway course. Over the past two years, this has been one of the consistently high measures in both the gateway and the capstone course, indicating that some of the most successful teaching of the History Department is the ability to get students to understand the nuances and complexity of historical context. The related graph shows the general parity between gateway and capstone performers this year.

**Target for O3: Interpretive Skills**

Students should demonstrate competency to mastery of the subject, scoring between 4 and 5 on the rubric.

**Findings 2012-2013 - Target: Partially Met**

Students met expectations in this field, scoring on average 3.89 on the rubric with a mean of 4. Scores in this category have traditionally been lower than those which measure progress in historical thinking and historical context. While this remains true, the disparity was smaller than in previous years. Nonetheless, more work remains to be done on developing specific interpretive skills in history courses.

**Target for O4: Historical Communication**

Students should demonstrate competency to mastery of the subject, scoring between 4 and 5 on the rubric.

**Findings 2012-2013 - Target: Partially Met**

Students generally showed mastery of this field, scoring on average 3.89 on the rubric with a mean of 4. Nonetheless, more than 1/3 of the students did not meet expectations, and nearly 1/5 performed at an unacceptable level. These results are, in keeping with the rest of the report, generally lower than last year, but the change in sampling likely accounts for this. A compelling change, however, is the significant difference between the writing of students in the capstone course versus the gateway course.

---

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assignment workshop**

Hold assignment workshops for instructors of history 3000 and 4990.

Established in Cycle: 2009-2010

Implementation Status: Finished
Refine document collection strategies
Refine document collection strategies. I asked instructors to submit examples of student work that they felt demonstrated poor, adequate, and advanced critical thinking skills. In the future I plan to modify this strategy, asking instead for "representative" or "random" samples of work from instructors.

Established in Cycle: 2009-2010
Implementation Status: Finished
Priority: High
Implementation Description: Refine document collection strategies.
Projected Completion Date: 05/2011
Responsible Person/Group: Jared Poley

rubric evaluation
Self-evaluation of the rubric to see if it continues to hold meaning as an assessment instrument.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: Self-evaluation of the rubric to see if it continues to hold meaning as an assessment instrument.
Projected Completion Date: 05/2011
Responsible Person/Group: Jared Poley

Refine Capstone Course Data Collection
At present, History faculty turn in assessments from HIST 4990 to both the undergraduate studies committee and to the CTW ambassador for separate assessment. This double assessment might be combined not only to increase efficiency, but to add a level of observation. At present, for instance, the undergraduate studies committee provides an individual assessment of the 4990 capstone project. If we refine the CTW assessment instrument and add this to the list of duties of the undergraduate studies committee, we would have another level of independent assessment.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: HIST 4990 Capstone Assignment | Outcome/Objective: Historical Communication | Historical Context | Historical Thinking | Interpretive Skills
Implementation Description: I will meet with the director of undergraduate studies to determine if we can combine assessment, and then present a plan to the undergraduate studies committee.
Projected Completion Date: 06/2013

Assessing Weaknesses in Specific Analytical Skills and Communication
I will develop a pretest for piloting in both the gateway and capstone course that will seek to isolate problems in individual analytical skills. The pretest will be used to assess how successful mastery of the material is by the end of the semester.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: HIST 3000 Communication and Presentation Rubric | Outcome/Objective: Historical Communication | Interpretive Skills
Measure: HIST 3000 Interpretive Skills Rubric | Outcome/Objective: Interpretive Skills
Measure: HIST 4990 Capstone Assignment | Outcome/Objective: Historical Communication | Interpretive Skills
Implementation Description: The pilot test will be implemented in one HIST 3000 course and one HIST 4990 course. The results will be used to individuate and differentiate instruction, and then correlated against final grades to see if skills improved remarkably.
Projected Completion Date: 06/2014

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
While scores appeared to demonstrate a downturn in performance by our students in this year, likely the refined data collection methods (one of my action plans this past year) produced results which will help us specify which skills are in need of most work. This data will be helpful in formulating new teaching techniques this year.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Students consistently score better in the capstone course than in the gateway course on all measures in the rubric. This is true in both years I have collected data. The result is sometimes difficult to quantify, as the qualitative differences between senior-level communication skills and nuanced thinking are apparent in ways that do not show up on the rubric. As such, many students who score a 4 or 5 (advanced) at the gateway level will score similarly at the capstone level.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
We need to develop methods of individuating and differentiating instruction. One of the best ways to do this is to develop individual
assignments that target specific student needs. This will require piloting some pretests to assess student needs and then seeing if small exercises might help develop skills, especially in advance of putting together a final research paper (which is usually the result of both the gateway and the capstone course).

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

The model of a gateway to capstone course has been part of the History Department curriculum since before the CTW initiative. As such, most of our faculty are comfortable with the process and integrate CTW techniques into their specialized course offerings. After last year's data became available, the faculty responsible for CTW courses talked about refining data collection in order to target specific weaknesses of students. This certainly worked this year, and we now have a better bank of data from which to construct new approaches to teaching Critical Thinking through Writing.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW Hospitality Administration**

*As of: 12/12/2016 05:59 PM EST*

*Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.*

### Mission / Purpose

Students in Hospitality Strategic Management will be expected to apply the principles of strategic management in the identification and analysis of real-life business issues and problems. Students will be able to comprehensively evaluate available options and resources that would be appropriate for the involved stakeholders including guests/customers, owners/stockholders, employees and involved communities. Students will be expected to formulate and clearly communicate recommendations and implementation plans keeping in mind that the form of communication and content of the communication can vary with the involved audience/stakeholders involved. Differentiation will be made between short-term and long-term planning. Ethical considerations including social responsibility and environmental sustainability will be emphasized in the process of managing strategically.

### Goals

**G 1: Analytical Decision-Making**

Students will demonstrate analytical skills in identifying problem situations, options in maximizing business results, and the ability to delineate possible results depending on identified factors.

**G 2: Clear Communication**

Students will demonstrate the ability to clearly explain, in written form and in verbal presentations, the analyses of business problems and challenges, business operational options, anticipated results and action plans for implementation.

**G 3: Multi-functional Perspectives**

Students will demonstrate an understanding of multi-functional areas (financial, human resources, marketing, operations, legal, physical facilities, environmental) in analyzing business situations and will demonstrate an understanding of how the functional areas impact one another and do not operate in isolation.

**G 4: Understanding of internal/external business environment**

The application of analytical skills will reflect understanding of current relevant economic issues, business cycles, political/governmental issues and societal trends and issues as well as internal organizational behavior.

### Student Learning Outcomes/Objectives

**SLO 1: Effective identification and prioritization of business factors (G: 1, 2, 3) (M: 3, 4)**

This course, Hospitality Strategic Management, regularly has the opportunity for the class to undertake an applied research project involving a current industry need. The project selected for assessment, undertaken spring semester 2013, involved Stone Mountain Village and the goal of the village to increase its tourism destination capacity. The first outcome of the project was for the students, working in groups, to thoroughly collect data, analyze and evaluate these data and identify business factors that would be relevant to study in order to make recommendations of what the village should do in trying to achieve this goal. The data had to also include competitive data from a variety of surrounding businesses (hotels, restaurants, attractions, events).

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

5.4 Enhance the global competency of students, faculty and staff.

**SLO 2: Prioritization of recommended operational practices (M: 3, 4)**

The second objective of the Stone Mountain Village feasibility study was to make recommendations in five hospitality operational areas: hotel development; an existing bed and breakfast inn; restaurant and foodservice operations; event management and destination marketing. The criteria for these recommendations included sound research, thorough analysis of data, realistic evaluation of current resources and clear communication of the recommendations.

**SLO 3: Knowledge of what factors support high-level team performance (G: 2, 3, 4) (M: 3, 4)**
Each group member was required to complete an analysis of the team's functioning including an analysis of leadership, individual performance and what supported the accomplishment of the group goals as well as what prevented the group from performing to its highest level.

**Measures, Targets, and Findings**

### M 3: Feasibility Study (O: 1, 2, 3)

The project for Spring Semester 2013 was a feasibility study of Stone Mountain Village and the potential for developing this small town into a tourism destination. The students worked in groups with each group taking a focus of the hospitality industry. The project included an analysis of business factors, prioritization of strategies that had potential for building tourism capacity for the village and communicating the results to the village’s leadership team.

Source of Evidence: Project, either individual or group

#### Target for O1: Effective identification and prioritization of business factors

It was expected that each group would develop a list of three to five factors to be evaluated for each broad topic that was assigned the respective group. For Stone Mountain Village, the sectors included: hotel development; enhancing event management and marketing; increasing revenue for the local bed and breakfast inn; increasing revenue for the restaurants; and destination marketing.

**Findings 2012-2013 - Target: Met**

Each group did effectively list at least three business factors there were relevant to the leadership of Stone Mountain Village in increasing their tourism capacity. Each group had consensus on these factors and there was input from all group members on what the focus of the project. In providing feedback to each group, the Stone Mountain Village leadership team considered the identification and prioritization of the business factors to be on-target and based on sound preliminary research in interviewing the leadership team, business operators and other stakeholders. This objective was achieved by 100% of the students.

#### Target for O2: Prioritization of recommended operational practices

Each group was expected to generate recommendations for their respective topics. Although there was not an exact number of recommendations required, it was expected that the number and depth of detail offered would be sufficient to cover the initial goal of Stone Mountain Village in increasing their tourism destination capacity within the next two years. The recommendations had to be based on an analysis of factors including, but not limited to, business patterns in Stone Mountain Village, competitive data, current population and demographic data, growth projections of population, demographic information and hotel development information for a radius of 20 miles.

**Findings 2012-2013 - Target: Met**

The objective of gathering relevant data, analyzing the data, making operational recommendations that were prioritized was achieved by each group. This objective required sound research skills, analytical abilities based on knowledge of various hospitality business sectors and application of supply and demand theories in a recovering economy. Each group member contributed to the completion of this outcome. The level of effectiveness on an individual basis in what was contributed to the group's work, for this objective, ranged from 70% effective to 100% effective in meeting the criteria for these recommendations. The class, overall, delivered at least a 90% accomplishment of this objective. The Stone Mountain Village leadership team considered the results to be at a higher level than 90%. One comment from a town leader was that the class had delivered more than a consulting firm that they had paid thousands of dollars. The leadership team felt that the project results were more targeted to their needs, more comprehensive in the research completed, reflected a greater understanding of the hospitality industry and was delivered with more passion and interest.

#### Target for O3: Knowledge of what factors support high-level team performance

Each student was required to complete an in-depth analysis of their team's performance. This analysis included leadership roles, accomplishment of goals, communication patterns and a rating for each individual member in different performance areas as well as an explanation for the ratings.

**Findings 2012-2013 - Target: Met**

Each member of the class completed the individual analysis of the functioning of their respective teams. Every student demonstrated an understanding of factors that supported the achievement of their team's results. Overall, 86% of the class had a comprehensive view of the team dynamics, sufficiently described the group and individual challenges and provided thorough feedback on each member’s performance. The remaining 12% completed the assignment but at a 75% level of thoroughness in describing the team dimensions and providing a comprehensive rating for each team member.

### M 4: Strategic Written Career Plan (O: 1, 2, 3)

Each semester in HADM 4800, Hospitality Strategic Management, students are required to write an in-depth strategic career plan. This involves taking the components of a strategic plan, as would be done for a business, and adapting those components to an individual career plan.

Source of Evidence: Capstone course assignments measuring mastery

#### Target for O1: Effective identification and prioritization of business factors

The target is for 100% of the students to identify and prioritize factors that will impact their individual career plans. This is done through an environmental scan of the industry segment in which the students plans to work. The environmental scan should also be targeted to the city or cities in which the student is interested in working. The environmental scan factors should include an internal perspective of companies of interest as well as an external scan of factors that can influence a career decision. Internal scan items can include the company's culture, their current and projected growth plans, record of promotion from within, the company's diversity and at what organizational levels, financial stability and any issues of concern such as litigation history, media coverage and public perception. The external factors would encompass the economy (particularly for the city/cities of interest), stability of the particular type of business, industry forecasts and projections, governmental and regulatory issues or expected changes, sustainability/environmental issues and demographic shifts. Students can select the factors most significant to their
particular business sector and the location in which they would like to work. The students should achieve at least 75% of the allocated points for the external scan section.

**Findings 2012-2013 - Target: Partially Met**

All students did include this section in their individual strategic career plans. Of the class, 84% achieved at least 75% of the points allocated for this section.

**Target for O2: Prioritization of recommended operational practices**

For the written strategic career plan, the prioritization of the recommended operational practices include a list of defined goals related to one’s career and corresponding action plans. The identification of the goals and action plans is based on an analysis of individual strengths, weaknesses, opportunities and threats (a SWOT analysis) and the environmental scans. It is expected that 75% of the students will include delineated goals that meet the SMART criteria (Specific, Measurable, Achievable, Relevant and Time-Specific) and action plans that are clearly linked to these goals.

**Findings 2012-2013 - Target: Met**

Regarding prioritization of operational practices, 92% of the students indicated goals meeting the stipulated criteria. All students provided an action plan. The action plans were more detailed and relevant when linked to strong goals that met the expected criteria.

**Target for O3: Knowledge of what factors support high-level team performance**

In earlier classes, students completed the in-depth personality inventory, Herrmann Brain Dominance Inventory. The results from their individual preferences were discussed in class in relation to working with others on teams (informal teams and formal teams) as well as other interpersonal interactions. The goals was for 70% of the students to include the HBDI inventory information in their career plan (in the SWOT analysis or other sections) that would demonstrate knowledge of their individual preferences and the positive and negative implications of these preferences on high-level team performance.

**Findings 2012-2013 - Target: Met**

The goal was for 70% of the students to include reference to their HBDI inventory results as related to working effectively as a group for maximum results. Approximately 73% did make this connection.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Interview Outline**

An outline with suggested topics to cover will be provided. I do not want to require these topics because the students need to be empowered to ask the questions most important to them. I do expect, however, that students cover current business challenges and the realities of today's business environment.

- Established in Cycle: 2009-2010
- Implementation Status: In-Progress
- Priority: Medium
- Implementation Description: This outline will be tested summer semester 2010.
- Projected Completion Date: 06/2010

**Written communication tools**

Students in HADM 4800 will be provided, on the syllabus, a list of writing resources. Some of these will be on-line and others will be on-campus. These resources will be developed prior to the start of fall semester 2010.

- Established in Cycle: 2009-2010
- Implementation Status: Planned
- Priority: Medium
- Implementation Description: A list of resources will be provided for summer semester to see which ones will be most useful to the students. Based on this feedback, a revised list will be used for fall 2010.
- Projected Completion Date: 08/2010
- Responsible Person/Group: Debby Cannon

**Hospitality business cases**

Locate additional up-to-date hospitality business cases

- Established in Cycle: 2011-2012
- Implementation Status: Planned
- Priority: High
- Implementation Description: Will explore with publishers at annual hospitality education conference in early August
- Projected Completion Date: 08/2012

**Continuation of real-life applications of knowledge**

The continuation of projects involving real-life learning is planned. Not only did students gain experience in working with current data and business information, they had the invaluable experience of working with industry representatives as well as civic leaders. There is a possibility of the Stone Mountain Village project continuing. The elements of what this involves and the logistics of the distance from campus have to be evaluated as well as other possible projects that could be selected for the future.

- Established in Cycle: 2012-2013
- Implementation Status: Planned
- Priority: High
- Relationships (Measure | Outcome/Objective):
  - Measure: Feasibility Study | Outcome/Objective: Effective identification and prioritization of business factors
  - Prioritization of recommended operational practices
- Implementation Description: Discuss future needs (for fall semester 2013) with the Stone Mountain Village leadership team as well as
Analysis Questions and Analysis Answers

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The focus of Hospitality Strategic Management has consistently been to help prepare soon-to-graduate seniors with knowledge of the most recent trends in the hospitality and tourism industry and the most relevant issues that are facing the industry both domestically and globally. An essential part of this course is that it is not just providing information but creating a classroom environment in which each student analyzes how he or she has been prepared to handle the issues and trends as each soon begins a career position in the industry. This self-knowledge of individual strengths and weaknesses, the ability to think critically, and the understanding of working with others in achieving goals has determined the content of this course over the years. Cases have always been used along with industry guest lecturers who challenge students with real-life scenarios of operating a hospitality business. For fall 2012, while a variety of assignments were used, particular attention was put on the self-knowledge of leadership and team-building abilities with the use of the Herrmann Brain Dominance Inventory (HBDI). Used in a number of graduate business programs, including Wharton, this tool was used with discussions of personality types and how this influences job choices but also directly impacts team dynamics and business interactions. The Strategic Career Plan linked to this self-awareness information. The HBDI was also used spring semester 2013 using similar learning opportunities. The Career Strategic Plan, which has always been an assignment in this course, was used this year for assessment purposes. In getting feedback from recruiters about college students across the nation, they emphasized that students are often not focused in interviews; the interview is used as a time for career exploration and that is not their mission nor do they have time for this exploration. The Career Plan requires the student to complete the analysis of what job positions might fit best based on an analysis of individual strengths, weaknesses, and preferences. The plan also requires students to look at the business environment and analyze what opportunities will most likely be available that will best fit their qualities and goals. In spring 2013, the class completed, in addition to the career plan, a feasibility study for a small town desiring to grow their tourism capacity. This real-life experience emphasized many of the changing dynamics in the hospitality industry, helped the student analyze his/her abilities to apply knowledge and involved working with a team. The action plans of last year and previous years have emphasized current, real-life learning experiences and both the strategic career plan and the feasibility study met this goal.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

I have observed improvements in the critical thinking abilities of students. From conversations with hospitality faculty regarding how to incorporate CTW at all course levels, more of our courses include higher-level learning opportunities. We have discussed in our faculty meetings Bloom's Taxonomy and the importance of application, analysis, evaluation and the creation of new ideas and concepts. When students reach the senior course of Strategic Hospitality Management, they are better skilled in their critical thinking abilities than years ago. The communication component of these critical thinking abilities remains stronger for most student in oral communication than written communication. There are still students who have outstanding written communication skills and those who are below average.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

As the instructor for the CTW course, I feel that this course is constantly changing which is positive in terms of keeping information up-to-date and relevant. I try to incorporate team exercises, project work, cases and a variety of teaching methods. Student evaluations typically include a few comments that I did not lecture "enough." I strongly believe that group/team exercises are important in learning team dynamics. Students seem to dislike group projects. My dilemma is always what teaching methods to use in accomplishing the learning objectives based on such surprising student comments.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?**

CTW is extremely important for this academic program. Our industry recruiters place an emphasis on both critical thinking abilities and excellent communication skills. With the job market still very competitive, it is important that students mention to recruiters the emphasis placed on CTW by Georgia State. That is impressive both inside and outside the campus. As mentioned previously, more faculty are involved in the CTW approach even in courses not designated as a CTW course.

**ACADEMIC PROGRAM QUESTION 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

The hospitality program has not made major changes in the overall assessment process. We have had numerous conversations with industry representatives on the increasing importance of students understanding data and being able to apply analytical skills in working with data. The communication component is also important in being able to explain the evaluation of the data - whether it is to a hotel owner or an investor or a franchisee. This past year, we piloted a program in certifying our students in Hospitality Industry Analytics. This certification program is one of the few for undergraduate students and is sponsored by the American Hotel & Lodging Association, Smith Travel Research and the Council of Hotel, Restaurant and Institutional Education. Six students were...
certified in the fall of 2012 with this program. The same program was piloted spring 2013 with approximately five students volunteering to take the certification exam this summer. We will continue to integrate analytical data into all hospitality courses and will make the certification option available to all majors starting this fall.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The impact of the data from this, and previous, years is that the CTW emphasis needs to be incorporated, at some level, into all major courses. While this has been done in most hospitality courses, the tracking of data and the analysis of data has not been done for each course regarding the CTW-related assignments. Starting with the 2013-2014 academic year, we will endeavor to develop a more systematic way of tracking the CTW assignments throughout the junior and senior years (which is when students take their major courses in hospitality).

### Annual Report Section Responses

**University-wide Committee Participation**—Use this space to document any staff participation on University-wide committees (e.g., University Senate).

- Debby Cannon - University Senate; Sustainability Committee; Student Life and Development Committee
- Ray Ferreira - Advisory Board, Student Recreation Center

**International Activities**—Note here any international activities of the department or its staff.

- Joe Perdue - Trip in October 2012 to China to teach in a club management professional development program; Exchange student at GSU fall 2012 from the Institute for Tourism Studies in Macao; International exchange agreement to be signed this fall (2013) with Hong Kong Polytechnic University

**Contributions to Student Retention**—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

- Starting fall 2012, the School of Hospitality established a Faculty Mentor program. Every hospitality major was assigned a faculty member who would act as a mentor throughout the student’s time at Georgia State. The role of the faculty mentor is not to replace the academic assistance advisor. Instead, the faculty mentor helps with career advice, ways for the students to get involved in student organizations and other campus events and providing help in how to combine or maximize course offerings.

**Service to the External Community**—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

- School of Hospitality participated in the Panthers Care Program on Saturday, March 9 by working at the Atlanta Community Food Bank

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW Human Resources**

*(As of: 12/12/2016 05:59 PM EST)*

*(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)*

### Mission / Purpose

Critical thinking has four components: identifying consequential issues, generating alternatives, anticipating outcomes, and drawing correct conclusions. When making HR decisions that have a legal component, managers need knowledge of the law, HR practices, and strategy. Furthermore, it is important to consider all forms of risk, not just legal ones. Effective decision-makers generate of several views of a problem and alternative solutions that account for various advantages and disadvantages. This includes sensitivity to the organization’s mission, values, strategies, goals, HRM practices, performance, and reputation. The ability to conceptualize and articulate solutions is essential for convincing various stakeholders to adopt a strategic rather than legalistic view.

### Goals

**G 1: Knowledge of HR Law and Practices**

Students will be knowledgeable about the legal implications of HR policies and programs.

**G 2: Critical Thinking Skills**

Students will be good critical thinkers.

**G 3: Organizationally-sensible Decision-Making**

Students will be aware of considerations beyond just the legal when making decisions related to human resources.

### Student Learning Outcomes/Objectives

**SLO 1: Specify Relevant Facts (G: 1, 2, 3) (M: 1, 2)**

Students will differentiate important information from trivial or unrelated facts

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate...
Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1. Student retention
2. Student promotion and progression
3. Timely graduation

Standard Associations
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: Identify Pertinent Legal Issues (G: 1, 2, 3) (M: 1, 2)
Students will identify pertinent legal issues.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1. Student retention
2. Student promotion and progression
3. Timely graduation

Standard Associations
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 3: Explain Underlying Legal Principles. (G: 1, 2, 3) (M: 1, 2)
Students will be able to explain underlying legal principles associated with statutes, cases, and regulations.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1. Student retention
2. Student promotion and progression
3. Timely graduation

Standard Associations
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 4: Draw Reasonable Conclusions (G: 1, 2, 3) (M: 1, 2)
Students will draw reasonable conclusions based on relevant legal and HRM principles.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations
1. Student retention
2. Student promotion and progression
3. Timely graduation

Standard Associations
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
SLO 5: Write Persuasively (G: 1, 2, 3) (M: 1)

Students will write clearly, present ideas logically, and argue convincingly.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Standard Associations

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

Measures, Targets, and Findings

M 1: Vignette (O: 1, 2, 3, 4, 5)

Students analyze “in-class” and on-line critical incident vignettes. These “minicases” are based on actual legal findings, but written from the perspective of the management professional rather than an attorney. Vignettes often describe situations that have ambiguous legal implications. To draw reasonable conclusion and write persuasively, student must identify consequential issues, generate alternatives, and anticipate outcomes. Students learn to distinguish what is illegal from what is unethical, invalid, or pragmatic. Realistic situations improve retention and motivate interest in learning. This reduces resistance (Smith, 2003. Beyond CT and decision making: Teaching business students how to think. Journal of Management Education) and enhances transfer of learning by depicting situations that are similar to the actual work environment, providing a variety of situations, inculcating theory and concepts, and facilitating practice (Baldwin & Ford, 1988. Transfer of training: A review and directions for future research. Personnel Psychology). Students gain experience so that once they are working in organizations, their “past experiences and solution activities comes quick to mind when new situations are encountered (Smith, 2003. Beyond CT

Target for O1: Specify Relevant Facts

100% of students will score at the “Marginal” level or higher; 70% will score at the “Satisfactory” level or higher; 50% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end to the semester, all students scored at the “Marginal” level or higher. Depending on the section, between 70% and 75% scored at the “Satisfactory” level or higher and between 45% and 55% scored at the “Outstanding” level or higher. Early in the semester, I place considerable emphasis on the first three criteria of the rubric including the ability to “specify relevant facts” because it is impossible to draw reasonable conclusions (criteria four) and write persuasively (criteria five) without distinguishing relevant from trivial facts. Students have their first vignette by the second class. Some students do well immediately but most require several assignments measures before they learn to distinguish relevant from trivial facts. I return assignments quickly (usually by the next class) and provide detailed feedback. I use the rubric to discuss the vignette in class and provide “outstanding” examples.

Target for O2: Identify Pertinent Legal Issues

100% of students will score at the “Marginal” level or higher; 70% will score at the “Satisfactory” level or higher; 50% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end to the semester, all students scored at the “Marginal” level or higher. Depending on the section, between 70% and 75% scored at the “Satisfactory” level or higher and between 45% and 55% scored at the “Outstanding” level or higher. Early in the semester, I place considerable emphasis on the first three criteria of the rubric including the ability to “specify relevant facts” because it is impossible to draw reasonable conclusions (criteria four) and write persuasively (criteria five) without distinguishing relevant from trivial facts. Students have their first vignette by the second class. Some students do well immediately but most require several assignments measures before they learn to distinguish relevant from trivial facts. I return assignments quickly (usually by the next class) and provide detailed feedback. I use the rubric to discuss the vignette in class and provide “outstanding” examples.

Target for O3: Explain Underlying Legal Principles.

100% of students will score at the “Marginal” level or higher; 70% will score at the “Satisfactory” level or higher; 30% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Partially Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end to the semester, 95% of students scored at the “Marginal” level or higher. Depending on the section, between 65% and 70%
scored at the “Satisfactory” level or higher and between 25% and 35% scored at the “Outstanding” level or higher. Early in the semester, I place considerable emphasis on the first three criteria of the rubric including the ability to “specify relevant facts” because it is impossible to draw reasonable conclusions (criteria four) and write persuasively (criteria five) without distinguishing relevant from trivial facts. Students have their first vignette by the second class. Some students do well immediately but most require several assignments measures before they learn to explain the underlying legal principle. Most students can remember, understand, and apply legal principles (http://www.unco.edu/cell/sir/statute/documents/Krathwohl.pdf) after a few assignments, but many struggle with supporting their arguments. For example, a student may correctly identify discriminatory behavior as adverse impact but be unable to explain why. I return assignments quickly (usually by the next class) and provide detailed feedback. I use the rubric to discuss the vignette in class. To help students distinguish between application and analysis, I added a new activity this cycle. Students “grade” a sample of responses for extra credit.

Target for O4: Draw Reasonable Conclusions

100% of students will score at the “Marginal” level or higher; 60% will score at the “Satisfactory” level or higher; 30% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Partially Met

I taught six sections of this course during the current cycle, but the distribution was fairly consistent across the sections. By the end of the semester, about 90% of all students scored at the “Marginal” level or higher. Depending on the section, between 40% and 60% scored at the “Satisfactory” level or higher and between 20% and 25% scored at the “Outstanding” level or higher. Some students who successfully perform the first three objectives (specify relevant facts, identify pertinent legal issues, explain underlying legal principles) still draw the wrong conclusions. For example, when analyzing a vignette depicting coworker bullying, a student may do an “outstanding” job of explaining the difference between qui pro quo and hostile work environment, but incorrectly conclude that the targeted employee was sexually harassed. The tendency to draw conclusions contrary to the evidence may be the result of cognitive biases (Roehling & Wright, 2006. Organizationally sensible versus legal-centric approaches to employment decisions. Human Resource Management). To help students better understand the link between analysis and synthesis, I use the rubric to discuss the vignette in class and provide “outstanding” examples. Also, I added a new activity this cycle. Students “grade” a sample of responses for extra credit.

Target for O5: Write Persuasively

100% of students will score at the “Marginal” level or higher; 40% will score at the “Satisfactory” level or higher; 20% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Partially Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end of the semester, 90% of students scored at the “Marginal” level or higher. Depending on the section, between 25% and 35% scored at the “Satisfactory” level or higher and between 15% and 20% scored at the “Outstanding” level or higher.

M 2: Situational Judgment Test (O: 1, 2, 3, 4)

I added several situational judgment test items. I used these early in the semester to “ease” students into writing critically. Writing short (50 to 100 words) justifications still required critical thinking and knowledge of employment law but less writing. Because SJTs demand less grading time, I could offer more student assessments early in the semester. Generally, I returned assignments by the next class allowing the students to quickly build CTW abilities. Students perceived SJTs are the typical multiple-choice test. This reduced their anxiety to writing, although justifying a response required complex thinking. Based on student comments, I found SJTs fostered more positive attitudes toward performing meaningful CTW tasks and improved self-efficacy about CTW performance. Because it was possible to have more than one right answer based on the student’s reasonable interpretation, it was relatively easy to evaluate students' ability to apply domain knowledge to realistic situations. Memorizing a few key cases and reciting regulations and statutes have little value in the real world where HR situations are intricate and context-bound. For instance, context is a key factor in sexual harassment cases. An identical behavior could be illegal in a law office but legal in automobile repair shop.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Specify Relevant Facts

100% of students will score at the “Marginal” level or higher; 80% will score at the “Satisfactory” level or higher; 60% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end of the semester, 95% of students scored at the “Marginal” level or higher. Depending on the section, between 70% and 85% scored at the “Satisfactory” level or higher and between 55% and 65% scored at the “Outstanding” level or higher.

Target for O2: Identify Pertinent Legal Issues

100% of students will score at the “Marginal” level or higher; 80% will score at the “Satisfactory” level or higher; 60% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end to the semester, 95% of students scored at the “Marginal” level or higher. Depending on the section, between 70% and 85% scored at the “Satisfactory” level or higher and between 55% and 65% scored at the “Outstanding” level or higher.

Target for O3: Explain Underlying Legal Principles.

100% of students will score at the “Marginal” level or higher; 70% will score at the “Satisfactory” level or higher; 30% will score at the “Outstanding” level or higher.

Findings 2012-2013 - Target: Met

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end
to the semester, 95% of students scored at the "Marginal" level or higher. Depending on the section, between 65% and 75%
scored at the "Satisfactory" level or higher and between 25% and 35% scored at the "Outstanding" level or higher.

**Target for O4: Draw Reasonable Conclusions**

100% of students will score at the "Marginal" level or higher; 60% will score at the "Satisfactory" level or higher; 30% will score at
the "Outstanding" level or higher.

**Findings 2012-2013 - Target: Met**

I taught six sections of this course during the current cycle, but the distribution was consistent across the sections. By the end
to the semester, 95% of students scored at the "Marginal" level or higher. Depending on the section, between 50% and 65%
scored at the "Satisfactory" level or higher and between 20% and 35% scored at the "Outstanding" level or higher.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Develop New Assignments Based on Situational Judgment Test Methodology**

Over the past year, I experimented with various forms of SJT items. The items are based on actual legal findings but written from the
perspective of the management professional rather than an attorney. This is the same process I use to develop the in-class and on-line vignettes. I asked students to provide a written justification for their answers. A review of the literature indicates this format can be effective in assessing domain knowledge (Ballin, S., Case, R., Coombs, J. R., & Daniels, L. B. 1999. Common misconceptions of CT. Journal of Curriculum Studies, 31: 269-293) as well as critical thinking (Ennis, R. H. 1993. Critical thinking assessment. Theory into Practice, 32, 179-186).

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Finished
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Vignette | **Outcome/Objective:** Specify Relevant Facts

**Improve Persuasive Writing Skills**

This is an area where students show the greatest weakness. A review of the literature shows that persuasive writing is an essential skill
for business professions. The typical role of a student may be to merely demonstrate their decision-making abilities. However, managers must be informed consumers of HR information in order to evaluate the recommendations of others or persuasively challenge dubious advice. The ability to conceptualize and articulate solutions is essential for convincing various stakeholders to adopt a strategic rather than legalistic view.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Vignette | **Outcome/Objective:** Draw Reasonable Conclusions
  - **Measure:** Vignette | **Outcome/Objective:** Write Persuasively

**Implementation Description:** Clark and Fischback (2008. Writing and learning in the health sciences: Rhetoric, identity, genre, and performance. The WAC Journal) described a role-playing approach to teaching Public Health students "the performance nature of writing." I plan to develop several role-playing activities.

- **Projected Completion Date:** 05/2013

**Promote Metacognitive Awareness**

Metacognition is essential for CTW because it helps students better manage their cognitive skills, and to recognize their weaknesses. Schraw (1993) recommends that teachers start with making students aware of metacognition. The next step is to teach strategies for improving metacognition.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Situational Judgment Test | **Outcome/Objective:** Draw Reasonable Conclusions
  - **Measure:** Vignette | **Outcome/Objective:** Draw Reasonable Conclusions
  - **Measure:** Vignette | **Outcome/Objective:** Explain Underlying Legal Principles.

**Implementation Description:** Based on a review of the literature, develop strategies to improve student metacognition.

- **Projected Completion Date:** 08/2012

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

Because written assignments are returned to students with feedback, vignettes cannot be "recycled." Consequently, I created dozens
of new vignettes and SJT items based on legal rulings. I taught twelve courses including six CTW sections. Providing quick
turnaround and sufficient feedback is a challenge. The addition of SJT items was useful for time management and to reduce student
anxiety. However, I did not see much improvement in higher order thinking or persuasive writing. This spring, I added an "extra credit"
eexercise. After receiving my feedback on a 20-minute in class vignette they analyzed previously, students used the rubric to evaluate examples of "effective" and "ineffective" writing. Sadler and Good (2006) found metacognitive benefits with this type of peer-grading. My paper titled "Overcoming Resistance To Critical Thinking Through Writing, has been accepted for presentation at the 2013 Academy of Management Meeting, August 9-13, in Lake Buena Vista (Orlando), Florida. This summer I begin research on how the inverted classroom may be useful in improving critical thinking skills. Inverting the classroom is about shifting emphasis in the
CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

As in previous cycles, over the course of the semester, by comparing their first few and last few assignments, I found substantial improvement using the five rubric criteria (outcomes). Moreover, most students gained confidence in their reasoning skills and ability to write clearly and organize logically. As they were exposed to more "real-world" situations, students became more mentally agile. There was an appreciable decline in the amount of student "nagging" as the semester progressed (Dunleavy, K. N., Martin, M. M. Brann, M., Booth-Butterfield, M., Myers, S. A., & Weber, K. 2008. Student nagging behavior in the college classroom. Communication Education, 57, 1-19). While the percentage is low, I do have a few students who struggle throughout the semester.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

I continue to enjoy teaching this course despite the grading demands. I know that I am a better teacher, and I believe that my students are better prepared for the "real world" where critical thinking is essential. I hear from students and employers describing the career benefits of this course. The intrinsic rewards are enormous, especially when I encounter a student who begins the semester virtually despondent over the prospect of CTW and ends the semester wanting to "show off" his or her CTW skills.

Georgia State University
Assessment Data by Section
2012-2013 CTW International Business
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

The Institute of International Business does not offer an undergraduate major. However, it does provide a core required course for all RCB students. The course is also the gateway to the International Business Certificate. This course is the one being used for the first phase of CTW. Each department in the College will offer the higher level discipline-specific CTW course. CTW criteria are applied in the course writing assignment called the Individual Term Paper (international business proposal). This addresses basic international business functions in the context of the challenges of globalization, and involving corporate international business analysis and international data gathering.

Goals

G 1: International Business Issues

Students will become knowledgeable about different different cultural norms as well as economic and political systems recognizing their interconnectedness and understanding the consequences for international business operations. Then, within their respective majors, students will be able to critically raise questions about the adjustments to globalization required for successful operations in distinct business disciplines.

Outcomes/Objectives

O/O 1: Term Paper (G: 1) (M: 1, 2, 3)

With the CTW assignment (Country Market Report) the students will demonstrate an understanding of the requirements for making a clear and concise international business proposition. The students will also effectively support the proposition in a manner that could be persuasive for making an investment decision. In particular, students will improve skills in analysis, communication, and research as described below. Analysis: students will demonstrate an ability to analyze basic international business processes, operations, and the challenges of globalization. Communication: students will demonstrate the ability to communicate their knowledge of international business processes directly to business leaders. They will put their analysis in written form appropriate for presenting a business proposition based on their understanding of the fundamentals of the field and their research. Research Skills: students will develop research skills and an awareness of the limitations of on-line material related to international business, including the use of foreign media sources.

Measures, Targets, and Findings

M 1: Rubric for International Business (O: 1)

Grading Strategies Applied to BUSA 3000 "Globalization and Business Practices." To date, BUSA 3000 continues to not formally add rubric scores across section or across time. Using the combination of full-time and part-time instructors continues to complicated comparisons across sections. Nevertheless, we continue to use the rubrics as modified for 2010-2011 and up-dated in 2012 as a guide for both GRA/writing consultants and for the professors to better capture the nature of the writing assignment and to maintain consistency across sections as much as possible. Moving forward, we will have fewer PTIs teaching the course. Thus, it will be possible to have more consistency across sections offered by full-time, Institute faculty. As we adjust, we will be able to use the results of the new survey of 2012-13 GRAs and professors to obtain their feedback on the progress of the course. Given that the term has just ended, we await the responses of those surveyed. The survey instruments have been posted in the text box. The evaluation will include observations on using the new platform of Desire 2 Learn. In addition, it will be necessary to revisit our goals and objectives as we move to a new edition of our textbook. We have begun looking at the progress of students throughout the draft process. Using two drafts posted on D2L and then a final hardcopy for the professor, we have considered what implications are suggested by “draft/no draft” and changes in the drafts in response to the comments of the CTW grad students. Surveying 2 sections (90 students) it was clear that only around 75 percent of the students posted any drafts. Of those, the final product did show...
application of the recommendations in 60% of the cases. On the other hand, for those never submitting drafts, there was no significant difference in the final score on the assignment. We emphasize to students that the drafts are not graded. We want to encourage the students to view the CTW process and the advice as coaching and non-threatening. Thus, faculty members remain divided on the question of requiring that the drafts be posted and applying penalties if they are not.

Source of Evidence: Written assignment(s), usually scored by a rubric

### M 2: Rubric application (O: 1)

Faculty approved the change in rubrics. The new definitions of the categories now better reflect the substance of the assignment. However, it remains difficult to apply the rubric scoring to comparative analysis across sections. This is especially true due to the large number of instructors, including several PTIs, which results in a lack of consensus on using the scoring in a uniform way.

Therefore, in 2011-2012 the focus will be more on the substantive aspects of the assignment rather than the scoring by rubrics. These conclusions continue to apply in 2012.

Source of Evidence: Written assignment(s), usually scored by a rubric

### M 3: 2013 Surveys (O: 1)

BUSA 3000 Faculty Survey 2013: 1. Are most students turning in the drafts? 2. Would you suggest making the rough drafts mandatory? 3. If so, should we assign partial grades to the drafts? 4. Do you think the length of the CTW paper is appropriate? Why? 5. What would you add/change in the assignment? 6. What is your assessment of the D2L platform for managing the assignment? 7. How effective was your GRA in helping you with the CTW/D2L assignment? 8. Would you like to have this person assigned again to you in the future? 9. What are some techniques you use in your classroom to keep the students interested/motivated to complete the CTW project to their best ability? 10. If you have electronic versions of the papers, please attach an example of a very good and a very poor paper. 11. Please attach any handouts that you use to enrich the class.

GRA Survey 2013 1. Are most students turning in the drafts? 2. Would you suggest making the rough drafts mandatory? 3. If so, should we assign partial grades to the drafts? 4. What would you add/change in the assignment? 5. Did you use the D2L? 6. Were there problems for the students in getting the drafts posted on the D2L? 7. Would you recommend that we continue using the D2L? 8. The RESULTS OF THE RESPONSES from the faculty and the GRAs are posted under "Documents." There is consensus that the submission of drafts needs to be required, including consequences for the final grade. In other words, there is agreement that the draft process is valuable and thus all students need to participate. In impact of using drafts and GRA feedback can be seen in the samples of spreadsheets prepared by the GRAs. A minority of students post well developed documents at the time of the first draft. In the case of these good students, there is less improvement throughout the semester. Others do not show much improvement from draft to draft. However, the majority demonstrate responsiveness to the suggestions of the GRAs. For BUSA 3000 we have a number of measurement challenges. In the past we used a number of PTIs. Now, most of the sections are taught by full-time faculty so that moving forward, we are likely to get more consistency across sections. Having said this, these regular faculty members have expressed great concern as to what methodology should be used to evaluate the program. They do not feel that there could be a logical application of average rubric scores. There concerns include: 1. the number of sections taught by different professors 2. since all undergraduates in the College of Business must take BUSA 3000, the inputs certainly change every year, especially with increases of SAT scores for in-coming GSU students 3. the scheduling of sections brings in distinct groups of student characteristics depending on the time of day and the number of sections per week 4. the value of comparing rubric scores across sections and over time is hard to defend since the key issue is the effect of any particular class over the progress of the semester 5. conducting a fair test of either writing or critical thinking would require pre- and post testing or the use of control groups taking the class without the CTW assignment and the coaching provided by the GRAs 6. creating control groups might require "human subject" approval and would also mean that some students would miss the CTW experience 7. consequently, our faculty would like to focus on the progress of completing the assignment throughout the semester 8. improvement results most likely can be emphasized through the process of improving the assignment and its delivery. For example, the attached documents section includes a GRA recommended revised rubric. At the same time, the faculty would like to consider that recommendation combined with the writing criteria applied by our premier graduate program, the Global Partners MBA (see documents). Also, the document section includes a paper format revision that has been used by some faculty members.

Source of Evidence: Written assignment(s), usually scored by a rubric

### Details of Action Plans for This Cycle (by Established cycle, then alpha)

#### Action Plan 2010-2011, International Business

**Action Plan 2010-2011 BUSA 3000** The student response rates to the official CTW evaluations have been uneven. Thus, we intend to conduct in-class evaluations in all the sections of BUSA 3000 Evaluation across the multiple sections of the course has been difficult. Efforts will be made to ensure that all instructors use the rubric scoring system to provide more comparable data. The instructors need to reach consensus on the proposed changes to the rubrics. We will continue to urge instructors to use standard headings for the written assignment. Each semester training session will be conducted for faculty and GRAs (both continuing and new). Training sessions will include a focus faculty and GRA use of the WAC on-line evaluation system.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 04/2011

#### Action Plan 2011-2012

1. As in the past, we will conduct workshops at the beginning of each semester involving faculty and CTW GRAs, including training on the use of on-line WAC. 2. Response rates to the on-line evaluations have been low. We believe that an in-class evaluation process should be used a couple of weeks before the end of the term. 3. Rubric scoring has not been embraced by the faculty. Therefore, we propose an evaluation session with faculty/GRAs after the end of each term. Faculty will be asked to bring in examples of poor, average, and outstanding papers. Then, the faculty will be engaged in a discussion to better define the problem areas and the characteristics of excellent work. 4. The sample papers will be merged into test case papers to be made available to faculty to share with students in discussions of "best practices." 5. We will continue to stress the role of standard headings on the papers.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

#### Action Plan 2012-2013

**Action Plan 2012-2013 BUSA 3000** 1. Review the surveys conducted with the faculty and CTW GRAs (posted in "Documents"). 2. Evaluate the possibility of using partial grades to motivate students to post drafts (given recommendations of faculty and GRAs). 3.
### Analysis Questions and Analysis Answers

#### CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

The faculty teaching the course has changed substantially. As in the past, we have had to select and train a number of new GRAs each semester. In the past that also applied to faculty members as we used several PTIs. The PTIs have been reduced to a minimum. Full-time faculty are now the majority. Thus, with this new make-up we need to meet with those new instructors to rethink rubrics and processes. Some taught for the first time in Spring, 2013. Now we have them as returnees and they can add their perspectives to our goals and processes.

#### CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Improvement has been noted most across the progress of each semester as the students receive feedback from the GRAs.

#### CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We need to be assured that the majority of instructors will be our full-time faculty for the next several semesters.

#### CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

The major change is the involvement of more full-time faculty.

### ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Our department does not offer an undergraduate degree. However, we have developed a Certificate in International Business. The CTW course on globalization helps greatly to provide awareness of the Certificate and the need to take other international business courses and study abroad programs. The CTW effect is less clear.

### ACADEMIC PROGRAM QUESTION 2:

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The curriculum may be substantially revised in the near future under the leadership of a new Associate Dean for Programs and an Assistant Dean for Undergraduate Programs. The latter individual has already been involved with CTW so he will easily be able to incorporate CTW concerns as part of any curricular change.

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW Kinesiology and Health**

As of: 12/13/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

"Critical thinking is a reflective process of acquisition, analysis, and evaluation of information, ideas, and actions that leads to the
development and active implementation of reasonable and defensible solutions to problems, issues, and situations related to physical activity, exercise, and sport."

**Goals**

**G 1: Acquisitor and critical evaluator of information and data**
Students should be gatherers, organizers, classifiers, and analyzers of pertinent information, materials, data, and activities and critical evaluators of assumptions, evidence, ideas, and information.

**G 3: Integrators of information and developers of comprehensive conclusions**
Students should be integrators of new and disparate ideas, information, methods, systems, and beliefs and developers of rational, reasonable, and informed conclusions.

**G 6: Articulate presenter of conclusions and applications to new problems**
Students should be articulate presenters of conclusions, judgments, and solutions and practical applications of understanding and knowledge to new and different problems and situations.

**Student Learning Outcomes/Objectives**

**SLO 1: Original Research Evaluation (G: 1, 3, 6) (M: 3)**

Students will examine original research paper(s) in exercise physiology from a scholarly journal and write a concise summary of the important aspects of the research study. The purpose of this assignment is to examine reports of original research in exercise physiology published in scholarly journals in order to: 1) identify and understand the purpose of the research; 2) summarize the important methods and of the study and determine whether the methods and study design are appropriate to the purpose; 3) identify and analyze the important results; 4) express how this research study contributes to our knowledge in the field of exercise physiology; and 5) apply this knowledge to practical situations in physical activity, exercise, and sport. The journal articles will be provided to you in pdf format on Desire2Learn. The article summaries will be due at various times throughout the semester – please see the course schedule.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
2. Outcomes of research (3.3.1.4)

**SLO 2: Student Laboratory Assignments (G: 1, 3, 6) (M: 4)**

Students will collect, analyze and synthesize data from the laboratory and use this information to solve complex problems.

**SLO 5: Field-based facility or program evaluation (G: 1, 3, 6) (M: 2)**

Students will visit a commercial, community, corporate, or clinical fitness facility and evaluate the facility using national standards for safety, programming, equipment, personnel, space utilization and layout, etc.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Measures, Targets, and Findings**

**M 2: Fitness Facility Evaluation (O: 5)**

Percentage of students who complete the fitness facility evaluation assignment with a score of 80% or higher.

Source of Evidence: Project, either individual or group

**Target for O5: Field-based facility or program evaluation**

Achievement target was set at 85% - 85% of the students taking the course scoring 80% or higher on the written Fitness Facility Evaluation project.

**Findings 2012-2013 - Target: Met**

93.0% of students taking the course scored 80% or higher on the fitness facility evaluation project/assignment.

**M 3: Exercise Physiology Journal Article Assignment (O: 1)**

Percentage of students who each complete the journal assignments with a score of 80% or higher.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Original Research Evaluation**

Achievement target was set at 85% - 85% of students taking the course scoring 80% or higher on the journal article summary assignments.

**Findings 2012-2013 - Target: Met**

95.7% of students scored 80% or higher on Journal Article Assignments.

**M 4: Exercise Physiology Laboratory Assignments (O: 2)**

Percentage of students who complete the written laboratory assignments with a score of 80% or higher.

Source of Evidence: Written assignment(s), usually scored by a rubric
Achievement target was set at 85% - 85% of students taking the course scoring 80% or higher on the written laboratory assignments.

Findings 2012-2013 - Target: Not Met
83.0% of students scored 80% or higher on all written laboratory assignments

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Raise assessment target
Based on student performance, it appears as if the assessment target is too low. Target will be raised to 83% for the next review cycle.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
   Measure: Fitness Facility Evaluation | Outcome/Objective: Field-based facility or program evaluation

Implementation Description: Raise target.
Projected Completion Date: 08/2010
Responsible Person/Group: CTW instructors.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Raise target
It appears that the current target measure is too low. Target will be raised to 83%.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Implementation Description: Raise target measure.
Projected Completion Date: 07/2010
Responsible Person/Group: CTW instructors.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Raise target
Based on student performance it appears as if the assessment target was set too low. Target will be raised to 83% for the next review cycle.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
   Measure: Exercise Physiology Journal Article Assignment | Outcome/Objective: Original Research Evaluation

Implementation Description: Raise target.
Projected Completion Date: 08/2010
Responsible Person/Group: CTW instructors.
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Raise target
Based on student performance it appears that the assessment target was set too low. The target for the next review cycle will be set at 83%.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
   Measure: Fitness Facility Evaluation | Outcome/Objective: Field-based facility or program evaluation

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
   Measure: Fitness Facility Evaluation | Outcome/Objective: Field-based facility or program evaluation

Implementation Description: Raise target measure.
Projected Completion Date: 07/2010
Responsible Person/Group: CTW instructors.
Additional Resources: none
Budget Amount Requested: $0.00 (no request)

Raise target
It appears as if the assessment target was set too low. New target of 83% will be set for the next academic year.
  - Established in Cycle: 2009-2010
  - Implementation Status: Planned
  - Priority: High
  - Implementation Description: Raise assessment target.
  - Projected Completion Date: 08/2010
  - Responsible Person/Group: CTW instructors.
  - Additional Resources: None
  - Budget Amount Requested: $0.00 (no request)

Raise target
It appears that the assessment target was set too low. Target will be raised to 84%
  - Established in Cycle: 2009-2010
  - Implementation Status: Planned
  - Priority: High
  - Implementation Description: Raise target.
  - Projected Completion Date: 08/2010
  - Responsible Person/Group: CTW instructors.
  - Additional Resources: None
  - Budget Amount Requested: $0.00 (no request)

Raise target measure
Based on student performance, the current target of 73% appears to be low. The target for next year will be 83%.
  - Established in Cycle: 2009-2010
  - Implementation Status: Planned
  - Priority: High
  - Implementation Description: Discussion will occur that the department faculty retreat concerning raising the target measure.
  - Projected Completion Date: 08/2010
  - Responsible Person/Group: CTW instructors
  - Additional Resources: None
  - Budget Amount Requested: $0.00 (no request)

Student compliance
The students who scored below the target simply did not turn in the assignment. While this is rare, it does happen. No further action is needed.
  - Established in Cycle: 2009-2010
  - Implementation Status: Planned
  - Priority: Low
  - Implementation Description: N/A
  - Projected Completion Date: 06/2010
  - Responsible Person/Group: Course instructor
  - Additional Resources: None

Journal assignments
No anticipated changes for next year.
  - Established in Cycle: 2010-2011
  - Implementation Status: Planned
  - Priority: Medium
  - Implementation Description: Original Research Evaluation

Journal assignments

No anticipated changes.
  - Established in Cycle: 2010-2011
  - Implementation Status: Planned
  - Priority: High
Laboratory Assignments
Consider raising achievement targets.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):

Measure: Exercise Physiology Journal Article Assignment | Outcome/Objective: Student Laboratory Assignments

Implementation Description: Fall faculty meeting.
Projected Completion Date: 08/2011
Responsible Person/Group: CTW coordinator and course instructor.

Reflection Papers
Consider raising the achievement target for the reflection papers.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Implementation Description: Fall faculty retreat
Projected Completion Date: 08/2011
Responsible Person/Group: CTW coordinator and course instructor

Structured Academic Controversy
Consider raising achievement target for next year.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium
Implementation Description: Review targets with relevant faculty.
Projected Completion Date: 08/2011
Responsible Person/Group: CTW Coordinator and course instructor

Evaluate laboratory assignment scoring
Investigate students' scores on individual laboratory assignments to determine if there are any specific laboratory assignments and corresponding written reports that have a higher number (or percentage) of scores below target.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):

Measure: Exercise Physiology Laboratory Assignments | Outcome/Objective: Student Laboratory Assignments

Implementation Description: Investigate students' scores on individual laboratory assignments to determine if there are any specific laboratory assignments and corresponding written reports that have a higher number (or percentage) of scores below target. If identified, examine those individual laboratory assignments to determine the cause(es) and proposed improvements, e.g. clarity of purpose, methods, instructions, feasibility of completion, appropriateness of discussion questions, etc.
Projected Completion Date: 08/2013
Responsible Person/Group: Instructor of KH 3650 Physiology of Exercise

Annual Report Section Responses

Publications and Presentations—Note in this section any articles published or presentations made at professional conferences by staff.

Gurvitch, R.: Presentations

International Activities—Note here any international activities of the department or its staff.
Mission / Purpose
The mission of the Marketing Department, with respect to the undergraduate major, is to produce students who can analyze business situations, define problems accurately based on their analysis; evaluate the options, and make sound recommendations regarding the best decision for their organization. This will be accomplished through the use of pedagogies designed to give students hands-on experience with marketing decision-making that goes beyond a simple descriptive knowledge of marketing to build skills that will permit the student to apply their knowledge of marketing and related business concepts.

Goals
G 1: Making logical, coherent recommendations
Students need to be able to define a specific recommendation and logically defend it based on the qualitative and quantitative analysis they have conducted.

Student Learning Outcomes/Objectives
SLO 1: Situation Analysis (G: 1) (M: 1)
Students will be able to conduct a situation analysis which identifies facts related to the industry, company and trends.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 2: Problem definition (M: 2)
Students will identify the central marketing problem in a case study accurately and define the problem clearly and concisely in writing

Relevant Associations: xxx

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Other Outcomes/Objectives
O/O 3: Alternative Evaluation (M: 3)
Students will first identify all relevant alternatives and then comprehensively examine the advantages and disadvantages of each alternative using both quantitative and qualitative arguments. The quantitative analysis is a basic skill required to comprehensively evaluate the various alternatives.

Relevant Associations: XXX

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

O/O 4: Recommended Action (M: 4)
Students must select a course of action from among the relevant alternatives that they have identified and evaluated and defend their choice. They must be able to explain their recommendation both orally and in writing. They must also be able to argue for their position and explain why they consider their recommendation to be the best course of action. They should be knowledgeable of all the relevant alternatives and be able to argue for their recommendation by identifying weaknesses and strengths of other options. They must be able to effectively incorporate quantitative arguments into their recommendation.

Relevant Associations: XXX

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

Measures, Targets, and Findings
M 1: Rubric for Situation Analysis (O: 1)
The rubric for the situation analysis breaks the situation down into three dimensions: Industry, Company and Trends.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Situation Analysis
The average student score as measured by the rubric will be 3 or greater out of 4. The categories are as follows: 1 corresponds to "Poor", 2 is "Not Yet Adequate," 3 is "Adequate" and 4 is "Excellent".

**Findings 2012-2013 - Target: Met**

Student scores for the 6 sections of the course that are represented in these results averaged a 3.24 indicating that the students scored a bit higher than a 3, the target, which is defined to be "Adequate." Scores for 99 students are represented.

**M 2: Problem Definition Scores from Rubric (O: 2)**

The rubric for the problem definition assesses the student’s understanding of the problem in the case and their ability to completely and accurately define it.

**Source of Evidence: Academic direct measure of learning - other**

**Target for O2: Problem definition**

The average student score should be a 3 or more on problem definition. The rubric has 4 categories: the lowest is "Poor" which is represented by a score of 1; the next category, a 2 is defined as "Not Yet Adequate;" a 3 is "Adequate," and a 4 is "Excellent."

**Findings 2012-2013 - Target: Met**

The average score on the problem definition dimension was a 3.2 out of 4. Students in six sections of the course, Marketing Problems, are represented. Scores for 99 students that enrolled in the course are included in the analysis.

**M 3: Alternative Identification and Evaluation (O: 3)**

The rubric that measures students’ knowledge of the alternatives in the case, evaluates their understanding of the options available and their understanding of the advantages and disadvantages of each alternative.

**Source of Evidence: Academic direct measure of learning - other**

**Target for O3: Alternative Evaluation**

The target score on alternative identification and evaluation using the rubric categories is an average of 3 or greater on a four point scale. A score of three is "Adequate" and a 4 represents "Excellent."

**Findings 2012-2013 - Target: Partially Met**

The average in the six classes and 99 students on the alternative identification and evaluation dimension was a 2.89. Since the target was a 3 or greater, this average score is below what is desired. It suggests that this is an aspect of critical thinking to which more attention should be devoted by the instructors that teach the course. While the score is only slightly below the target, it is not surprising. Experience suggests that this result is consistent with a subjective perception of the instructors.

**M 4: Recommendation (O: 4)**

The rubric that assesses the students’ recommendation requires that the students select one of the alternatives and then produce a coherent and compelling set of arguments that support their recommended solution to the case problem.

**Source of Evidence: Academic direct measure of learning - other**

**Target for O4: Recommended Action**

The target score for the Recommendation portion of the case analysis process is a 3 or greater out of a maximum of 4. In other words, the desire is that students perform at an "Adequate" (a score of 3) or more where the highest score possible is a 4 which is described as "Excellent."

**Findings 2012-2013 - Target: Met**

The average score for the 99 students that took the class in the six sections or classes during the fall and spring semesters was a 3.1. The score of a 3.1 slightly exceeds the minimum score desired.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Alternative Evaluation**

Student scores averaged 72.5% which is below the 75% target. The problem is believed to reside in the depth of evaluation of the alternatives and not in the initial step of identifying the relevant alternatives. Greater attention to describing the evaluation process including enhanced examples of excellent evaluations will be provided.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Alternative Identification and Evaluation | Outcome/Objective: Alternative Evaluation

Implementation Description: Starting Summer Semester 2011 more time will be devoted to describing the case analysis process with particular attention given to the alternative evaluation portion of that discussion.

Responsible Person/Group: Hiram Barksdale
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

**Recommendation Depth and Detail**

Students scored 74.1% on the Recommendation which is below the target score of 75%. It is believed that the issue results from failing to provide sufficient detail and explanation to sufficiently justify their recommendation rather than recommending an irrelevant course of action. The case analysis pedagogy, may not be familiar to the students. To address inadequate depth and detail given to support their recommendation, an example case will be assigned and discussed prior to assigning a case to be written up for a grade.
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

A new action plan was devised to improve the dimension of “Alternative Evaluation.” The recommendation score which was slightly below the target last year has improved and it now slightly above the target. The targets for each of the dimensions has changed to reflect the rubric score system instead of a percentage so that the scores no longer appear to be grades. The faculty agreed to adopt an initiative whereby all undergraduate courses in the major would have at least one comprehensive case analysis including a significant amount of quantitative analysis. The goal is to introduce the case method earlier in the curriculum and not in their final semester. It is hoped that if the pedagogy is familiar then students will be more comfortable and perform at a higher level, especially in the capstone course which emphasizes case. To aid in implementation, the department chairman has agreed to bring up the need to faculty teaching undergraduate courses to emphasize the importance of the initiative. Unfortunately, it appears that many if not most faculty have disregarded the initiative. The annual performance review by the department chair will be used going forward to remind individuals of this requirement. Exposing students to cases earlier and more often should help improve the score on the one dimension that is below target: "Alternative Evaluation."

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Unfortunately, my perception is that students are not very serious and as a result they invest a surprisingly small amount of time and energy in their studies. Doing case analysis is demanding and they simply don’t understand the process or what is required of them to do a superior job. Students simply don’t focus or concentrate or read in the way that they did when I began my career. This means that their critical thinking abilities are often quite limited because they don’t invest the necessary time and energy into the process. The few students I encounter that have some commitment to learning seem to enjoy the case analysis process and see it as a useful method of solving problems in business and other areas as well. Most perceive the class as too demanding. A larger and larger...
CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

The biggest issue is that my colleagues have no idea about assessment or anything related to CTW. They think the two of us that handle it are suckers. The biggest problem with implementing CTW is the CTW process itself. Theoretically it is fine but the collegial, help/aid culture that once permeated it is gone. It is a chore and a burden. The WEAVEonline system is terrible. The questions we are asked to address are puzzling and unclear and when we make an honest effort to write a report we get criticized by our fellow CTW drones. Not at all fun!

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

The process has been partially responsible for the creation of a new course in the undergraduate program, Marketing Metrics. It has brought about a lot of happy talk about doing a better job by our students by getting them to write more but the reality is that even for those of us that teach CTW designated courses, it hasn't happened. I wish I was not so cynical about the departmental initiative to implement one or more cases in each and every undergraduate Marketing course but I am afraid that based on what the students are saying, nobody on the faculty has actually followed through by actually adding one or more cases. They talk a good game and agree that it is important and even say they will do it but they don’t. As a result of the last CTW Assessment Report I have changed the scoring in the document so the measures and the targets are now all tied obviously to the rubric with no percentages anywhere.

This way I can't get the criticism that percentages look too much like grades. Who really cares? Nothing has changed except the unit of measure. It is an easy conversion to make. To be criticized for using percentages strikes me as petty and ridiculous. Only two members of my department teach CTW courses. We are considered suckers by out colleagues. We spend too much time on grading papers, etc. That is not a good feeling. Everyone is happy to allow us to do the CTW tasks because then they don’t have to and when you suggest that they make their course a CTW course, they scream in agony.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Targets have changed to reflect the criticism of last year’s report that percentages look too much like grades. Now they don’t look like grades because you are not supposed to assess using grades, I get that. It is fundamental. Who cares that much about the unit of measure. It is cosmetic. The conversion is simple but it is all about appearances I guess.

ACADEMIC PROGRAM QUESTION 2:
What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

What impact? I guess it is a factor in the request to change the curriculum in several different ways but most importantly to implement one or more cases in every marketing undergraduate class so that they have some real critical thinking exercises sooner and before they arrive at the capstone course at the end of their major. The Marketing Metrics class was also added as a consequence, in part, of the Marketing Problems course and the fact that students could go through their entire major without any exposure to marketing from a quantitative analysis standpoint until they got into the capstone course. Metrics is also a hot topic in the field so it fits several criteria simultaneously not just better preparation for the capstone Marketing Problems.

Annual Report Section Responses

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.

The action plan that involves the case analysis pedagogy is dependent on the faculty actually implementing cases in their classes along with the chair checking up on them to insure they do it. So far, most people do not seem to be using cases but they seemed enthused when we adopted the idea as a faculty a year ago. The students claim that they have never seen a case before. Who’s telling the truth? The faculty who say they are using them or the students who say they are not?

Modifications in Measurement Methods—If you modified any of the measures or methods you use in the measurement process, please note those here.

I altered the targets to avoid any chance that anyone might interpret a percentage as a grade!

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.

N/A

University-wide Committee Participation—Use this space to document any staff participation on University-wide committees (e.g., University Senate).

UAC? Undergraduate Assessment Committee.

Publications and Presentations—Note in this section any articles published or presentations made at professional conferences by staff.

Does this refer to assessment related articles? I have no idea what this is asking.

International Activities—Note here any international activities of the department or its staff.

I am not sure I understand what this question is asking or why. Many of my colleagues are engaged in teaching, consulting, etc. internationally.

Contributions to Student Retention—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.

We met with the Provost a year or two ago and she told us our standards were to high and that we needed to not drive students away by having admission standards in the Business School.
### Service to the External Community—Note here any initiatives or activities of your department that impact the external community (e.g., providing assistance to needy populations).

None I am aware of

### Georgia State University

**Assessment Data by Section**

**2012-2013 CTW Mathematics**

*As of: 12/12/2016 05:59 PM EST*

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

#### Mission / Purpose

Critical thinking in math usually means (1) analyzing and evaluating mathematical arguments, (2) formulating and presenting a proof or a counterexample in support of conclusions, and, (3) deriving an abstract claim from examples and solving a problem by applying known results.

#### Goals

**G 1: Analysis**

Students will be able to analyze and evaluate mathematical arguments.

**G 2: Deductive reasoning**

Students will be able to formulate and present a proof or a counterexample in support of conclusions.

**G 3: Problem solving**

Students will be able to derive an abstract claim from examples and solve a problem by applying known results.

#### Student Learning Outcomes/Objectives

**SLO 2: Writing proofs or disproofs (G: 2, 3) (M: 1)**

Students will be able to write a proof or a disproof of a given mathematical claim.

**SLO 3: Understanding math articles (G: 1, 2, 3) (M: 2)**

Students will be able to understand the results and proofs in a mathematical article.

#### Other Outcomes/Objectives

**O/O 1: Giving proofs (G: 1, 2, 3) (M: 1)**

A proof is a complete explanation of why a claim is true. Most assignments in Math 3000 ask students to prove or disprove (i.e., give a counterexample) a mathematical claim. For example, Prove that the sum of any two odd integers is divisible by 2 but not divisible by 4. To prove this claim, students need to use a direct proof together with a proof by contradiction. In math 4991 students need to give proofs to more complicated claims (e.g. Intermediate Value Theorem in Calculus). They also need to present proofs by Latex, a high-quality typesetting system designed for scientific documentation.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**O/O 1: Solving problems by math softwares (G: 1, 3) (M: 3)**

Students will be able to solve a computation problem by using a math software, e.g. Maple.

**O/O 3: Reviewing papers (G: 1, 2, 3) (M: 2)**

In math 4991, students choose an article from an undergraduate math journal (e.g. Rose-Hulman Institute of Technology Undergraduate Mathematics Journal), write a report (20 pts) including: • Section 1 (5 pts): Introduction. Minimum 1 page. It contains a brief introduction to the problem, background, and history. You should not simply copy from the paper; you should read related textbooks, references, or online materials. • Section 2 (5 pts): Main results. Minimum 1.5 pages. It contains the main result(s) in the paper with proofs. Similarly you should present the proof in your own words, instead of copying form the paper. • Section 3 (7 pts): Remarks. Minimum 1 page. Your mathematical comments, answers to open problems, and discussion on possible generalization of the results. This section usually differentiates an excellent report from other reports. • References (3 pts) should be given at the end (but not included in the page count) and be cited.

#### Measures, Targets, and Findings

**M 1: Rubric for simple assignments (O: 1, 2)**

Excellent: Student fully understands the logic required to do the proof. Flow of logic is correct (or very nearly so). Correct notation is used throughout. Satisfactory: Student understands the logic required to do the proof, but has one major flaw in the argument.
Correct notation is used throughout the majority of the argument. Marginal: Student somewhat understands what is to be done. There are several flaws or a major hole in the argument. Notational errors may or may not occur. Poor: The argument is fundamentally incorrect and/or uses incorrect notation throughout.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Giving proofs**

60% of students score at least satisfactory based on our rubric.

**Target for O2: Writing proofs or disproofs**

88% of students will score at least Marginal on the simple assignments rubric. 66% of students will score at least satisfactory on the simple assignments rubric. 33% of students will score excellent on the simple assignments rubric.

**Findings 2012-2013 - Target: Partially Met**

In fall 2012 total 33 students took Math 3000. Among them, 12 scored Excellent, 13 did Satisfactory, 4 Marginal, and 4 did Poor. In spring 2013, total 26 students took Math 3000. Among them, 13 scored Excellent, 2 did Satisfactory, 7 did Marginal, and 4 did Poor. Overall, Excellent: 25/59= 42%, at least Satisfactory 40/59= 68%, at least Marginal: 51/59= 86.4%. Comparing with Target, only the percentage of students who scored at least Marginal does not meet the target. To improve, we will continue our action plan "Improve student scores on proofs" initiated in 2009-2010.

**M 2: Rubric for projects on reviewing articles (O: 3, 3)**

Excellent: student understands the article under review very well and writes a review with the following content: 1) detailed introduction to the problem, 2) the result(s) with main proofs, and 3) detailed references. Satisfactory: student has a reasonable understanding to the article; her/his review contains necessary content but has some flaw. Marginal: student does not fully understand the article; her/his review has several flaws or a major hole. Poor: student does not understand the article; their reviews are not complete.

Source of Evidence: Project, either individual or group

**Target for O3: Reviewing papers**

At least 70% score satisfactory or excellent.

**Target for O3: Understanding math articles**

88% of students will score at least Marginal on the simple assignments rubric. 66% of students will score at least satisfactory on the simple assignments rubric. 33% of students will score excellent on the simple assignments rubric.

**Findings 2012-2013 - Target: Met**

In fall 2012, total 22 students too Math 4991 with 20 Excellent, 1 Satisfactory, and 1 poor. In spring 2013 total 15 students with 13 Excellent, 1 Satisfactory, and 1 Poor. Altogether there were 37 students, 94.6% scored at least Marginal, the same scored at least Satisfactory, 89.2% scored Excellent. Thus the target is met.

**M 3: Rubric for Math Software problem 4991 (O: 1)**

Excellent: Student is able to solve assigned problems correctly by applying required software. Satisfactory: Student essentially solve the problems but has some minor mistake. Marginal: Student somewhat understands what is to be done but can not obtain meaningful results. Poor: does not understand the assignment or does not know how to apply the software.

Source of Evidence: Project, either individual or group

**Target for O1: Solving problems by math softwares**

88% of students will score at least Marginal on the simple assignments rubric. 66% of students will score at least satisfactory on the simple assignments rubric. 33% of students will score excellent on the simple assignments rubric.

**Findings 2012-2013 - Target: Partially Met**

In fall 2012, 22 students took Math 4991 with 12 Excellent, 5 Satisfactory, 2 Marginal, and 3 Poor. In spring 2013, 15 students took Math 4991. Among them, 11 scored Excellent, 2 Satisfactory, and 2 did Poor. Altogether, among 37 students, 86.5% scored at least Marginal, 81% scored at least Satisfactory, and 62% scored Excellent.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Improve student scores on proofs**

First I will work with the instructors of Math 3000 to learn how to improve students' scores on proof. Second the prerequisite of 3000 is Math 2420. The technique of giving proofs is mentioned but usually not emphasized in 2420. I plan to work with the department chair and 2420 instructors to make sure that this technique is covered well in 2420.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):

- Measure: Rubric for simple assignments | Outcome/Objective: Giving proofs
  - Writing proofs or disproofs

**Redesign 4991 projects**

2009-2010 some 4991 students complained about the amount of writing. 2010-2011 we redesigned 4991 projects so that they require less writing. Student have not complained about this since then.

Established in Cycle: 2009-2010
Interest of writing proofs
It is difficult but necessary for a math major to write a rigorous proof. In the recent years, we have seen the improvement from our Math 3000 students on writing proofs. We need to continue working with Math 3000 instructors such that they can help to build students’ interests of writing proofs. For example, instead of proving simple but tedious algebra equalities, they may assign more interesting practical problems, e.g. those related to games and sports.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High

Improve students performance on projects using math software
In 2012 spring, students of Math 4991 did not perform well on the project using math software. The instructor admitted that the project was a bit challenging. I will work with this instructor closely in the future to avoid this.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Rubric for Math Software problem 4991 | Outcome/Objective: Solving problems by math softwares

Analysis Questions and Analysis Answers
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
1. Thanks to higher enrollment, more students have taken CTW courses this year -- in the past we usually had one session of Math 3000 each semester, now we had two sessions each semester. 2. The students that took Math 4991 showed better writing skills. 3. The student performance of using Math software is better than previous years, due to our related action plan.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
In Math 4991, the instructor has seen the improvement of students' writing skills. This may come from several seasons: 1. Math 4991 have matured and the materials become standard (thus it is easier for students to follow). 2. Students have obtained more training on how to write from other math classes (including, but not limited to, Math 3000).

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
We still need to work on the fundamental skill of writing proofs in Math 3000. We met the target on writing proofs in 2011-2012 but partially met the target this year. All the instructors of Math 3000 (and those who teach its prerequisite Math 2420) need to work together on this action plan.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
The CTW initiative has matured in our program: faculty members and students are more familiar with it and this makes the CTW classes running more smoothly. We had more faculty teaching CTW courses this year due to the increment of our enrollment.
G 3: Candidates are Experts at Argument Development
Candidates are able to formulate and present convincing arguments for or against major theories of teaching and learning.

Student Learning Outcomes/Objectives

SLO 2: Students demonstrate the ability to think critically through written reflection (G: 2) (M: 5)
Students demonstrate critical thinking processes through written reflection. Student reflections include (1) discussions of how they make decisions about teaching and learning, (2) how they challenge assumptions and bias they come across with group members, fellow teachers or professional readings, (3) analysis of critical events that led to changes in thinking about teaching and learning, and (4) a description of what was learned (or yet to be learned) related to the teaching and how that effects their professional development.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

SLO 3: Students demonstrate the ability to formulate and present convincing arguments (G: 3) (M: 3, 4)
Students demonstrate the ability to formulate and present convincing arguments for or against major theories of teaching and learning. Students demonstrate the ability to communicate their opinions and uses of teaching and learning strategies presented in professional texts and journals. Students demonstrate the ability to use data to support or refute specific teaching and learning strategies for specific students, and write about those data findings with a critical lens. Students demonstrate an ability to analyze their own teaching as it relates to major theories of teaching and learning.

General Education/Core Curriculum Associations
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4 Outcomes of research (3.3.1.4)

Strategic Plan Associations
3.1 Enhance a research culture.

Measures (Key Assessments), Targets, and Findings

M 3: Professional Book Group Discussion Reflection Rubric (O: 3)
From EDRD 4600: Professional Book Group Discussion Reflection Rubric
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Students demonstrate the ability to formulate and present convincing arguments
100% of students will score at the "2: partially proficient" level or higher. 90% of students will score at the level of "3: proficient" level.

Findings 2012-2013 - Target: Met
100% of students will score at the "2: partially proficient" level or higher for all areas of the rubric. At least 90% of students scored at the level of "3: proficient" for all elements of the rubric that apply to critical thinking through writing (i.e, not timeliness or completeness). Our target was met.

M 4: Professional Book Group Discussion Paper Rubric (O: 3)
From EDRD 4600: Professional Book Group Discussion Paper Rubric
Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Students demonstrate the ability to formulate and present convincing arguments
100% of students will score at the "proficient" level or higher. 70% of students will score at the level of "exemplary".

Findings 2012-2013 - Target: Met
85% of students scored at the exemplary level for all components of the rubric (excluding timeliness), and 100% of students
scored at the "proficient" level or higher. This target was met.

**M 5: Social Capital Project Rubric (O: 2)**

Social Capital Project Rubric

Source of Evidence: Project, either individual or group

**Target for O2: Students demonstrate the ability to think critically through written reflection**

100% of students will score at the "partially proficient" level or higher. At least 80% of students will score at the "proficient" level or higher. At least 50% of students will score at the level of "exemplary".

**Findings 2012-2013 - Target: Met**

98% of students scored at the "proficient" level or higher for all components of the rubric. 67% of students scored at the "exemplary" level for all components of the rubric. Target was met.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Assignment Outcomes**

During Fall 2010, Dr. Yarbrough and Dr. Cross will work on fleshing out rubric descriptions and determining appropriate assignment outcomes and target goals.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Stephanie Behm Cross (CTW Ambassador and Course 2 instructor)

**CTW Course Plan to Implement Fall 2010**

The B.S.E. in Middle Grades Education is a new program in the College of Education. The first cohort of students, who started in Spring 2010, will take their first CTW course this Fall 2010 and their second CTW course in Spring 2011. Because our program is new, this action plan relates to what we have done and will continue to do related to course development. Assignment Development: During Fall 2009 and Spring 2010, our BSE MLE faculty developed course assignments for the two CTW courses. Both courses include informal writing assignments (such as journals and weekly reflections) and formal writing assignments (such as research papers and text development). Rubric Development: During Spring 2010, we developed rubrics for specific writing assignments, in addition to an overall CTW assignment rubric included in this report. Faculty Development: The CTW coordinator has met with the other CTW instructor (a reading/writing specialist) three times over the past two semesters to refine our program CTW definitions, write program goals, and create course assignments. We will continue to meet in Fall 2010 and Spring 2011 to evaluate CTW course assignments and make adjustments for future courses. Collecti/Analysis of Student Work: During Fall 2010 and Spring 2011, the CTW instructors will work to evaluate CTW assignments based on our included rubric. With student permission, we will share assignments across instructors in order to evaluate student work and the overall effectiveness of assignments.

- **Established in Cycle:** 2009-2010
- **Implementation Status:** Finished
- **Priority:** High
- **Implementation Description:** see above
- **Projected Completion Date:** 05/2011
- **Responsible Person/Group:** Stephanie Behm Cross (CTW Ambassador and CTW instructor for course 2) and Gladys Yarborough (CTW Instructor for course 1)
- **Additional Resources:** Because our first BSE Middle Level Education cohort will have 34 students, we will need the help of a graduate teaching assistant to grade CTW assignments.

**Analyzing and taking action on teaching events**

Instructors will model for students how to analyze their own teaching episodes. Instructors will also model how to develop and write about action plans based on that analysis.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Several students appeared to struggle with analyzing their critical teaching event (as reviewed on video) and developing appropriate action plans based on that analysis. Moving forward, we will suggest that instructors model what lesson plan analysis and action plan development might look like when using video (either through a whole class example of the instructors' teaching, or through the analysis of some peer teaching work from a volunteer).
- **Responsible Person/Group:** Stephanie Behm Cross

**Revise book group discussion reflection rubric**

We will revise the book group discussion reflection rubric for next year. Right now, the rubric only contains 3 levels for each element of the project (proficient, partially proficient, and incomplete). There needs to be more variability within the rubric for the student to really understand the areas that need improvement, and for the instructors to give usable feedback within the constraints of a rubric.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** This revisions of the rubric will be completed before the start of Fall 2012 (when the rubric is to be used again).
- **Responsible Person/Group:** Gladys Yarborough and Stephanie Behm Cross
Revised rubrics
We will create a new rubric to be used in 2013-14 for multiple CTW assignments and courses.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High
Implementation Description: All of our targets were met this year, but we are not happy with our rubrics across courses and assignments. These rubrics are specific to each assignment and we therefore have a hard time comparing across courses and assignments. We will develop a generic rubric to use for multiple assignments across both CTW courses.
Responsible Person/Group: Stephanie Cross, CTW ambassador
Additional Resources: None

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
We utilized the same rubrics again this year -- we wanted to have several years of the same assessments/rubrics before making any changes. Our results indicate that students are doing well on individual CTW assignments. All targets were met.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Our results indicate that students are doing well on individual CTW assignments. In fact, this year all students met all targets. They did especially well on the critical reflection component of the last assignment in their final CTW course.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Our results indicate that students are doing well on individual CTW assignments, but we are having a hard time comparing across courses and assignments. We are planning to create one generic rubric for use in 2013-14.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
The primary impact on the faculty involved in the CTW initiative has been extended conversations around what it means for preservice teachers to write and think critically. This has had a major impact on our doctoral students who serve as CTW consultants in many of our courses. We have made no changes to the CTW initiative since the last CTW report, but we plan to meet more regularly as a middle level group this upcoming year.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
N/A

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
N/A

Annual Report Section Responses

Challenges for Next Year—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.
None.

Modifications in Measurement Methods—If you modified any of the measures or methods you use in the measurement process, please note those here.
We eliminated the "critical incident video project" rubric and added the "social capital project" rubric. This is because we changed assignments and therefore needed to change rubrics. As mentioned earlier, we will be creating a generic CTW rubric that will work for all assignments moving forward.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.
No modifications were made.
Mission / Purpose
The mission of critical thinking in the School of Music is to provide students the skills to identify, interpret, analyze and evaluate arguments and claims about music. Because the School of Music offers curricula in a variety of areas of concentration in music, critical thinking has been approved as the desired method of learning and writing in the following areas: 1) the theoretical understanding of music, 2) music in historical and cultural contexts, 3) the use of technology in creating, performing and listening to music, 4) the individual and collective performance of music, 5) the composition and improvisation of music, 6) the conducting of music, 7) the processes of educating others about music, and 8) the development of careers in music. Critical Thinking through Writing (CTW) in music can be defined as the written interpretation, analysis, and evaluation of the knowledge, the performance, and the creative, technical and instructional skills associated with music.

Goals
G 1: Applicability of Music
Using creative, interpretive, and analytical methods students of music will be able to demonstrate an understanding of the applicability of music relative to its professional, social, cultural and cognitive significance. In the two world music courses (MUS 4820: Summer 2011 and Fall 2012) and the music history course (MUS 4810 Spring 2013) that are being assessed the overall goal will be achieved through the implementation of a three point method of assessment: (1) a proposal for a research paper, an outline for the paper, and an annotated bibliography, (2) a draft of the research paper, and (3) the final paper (a revision of the draft and the additional of more critical thinking). Students are provided a rubric designed specifically to accompany the draft of the research paper and a rubric to designed to accompany the final revised paper with emphasis placed on critical thinking. All three CTW instructors agreed to require the same three-part assignment so that methods of assessment would consistent and therefore the result from one semester to the next in the two courses would more accurately reflect how students where understanding the critical thinking components of the assignment and completing the required tasks based on the quality of their work. In the world music course two of the eight components of the CTW research project and rubric are discussed in this report: Analysis of Data and Synthesis of Personal Findings (referred to as Personal Findings Supported by Scholarly Research on the rubric). This research paper should be based on fieldwork conducted on some aspect of music discussed in class or on the music of a culture of the student's choice, with the instructor's approval, in the music history course the required research paper should be based on some aspect (style, composer, composition, etc.) of Western European or American art music. The instructor for the music history course created a rubric for her class based on the basic components found on the rubric used in the world music class. I will provide information on one of the four components of the CTW research project and rubric for music history. This component is Critical Thinking in the Content of the Paper and it primarily includes that which is emphasized in the Analysis of the Data and the Synthesis of Personal Findings section of the world music rubric. Therefore this report of assignments in all three classes assess essentially the same critical thinking components.

Syllabi for the Summer 2012 and Fall 2012 world music courses (MUS 4820) and the Spring 2013 music history course (MUS 4810) are located in the Document Management section of this report. Also located in the same section are the three rubrics used in the world music course, the: (1) proposal and annotated bibliography, (2) draft of the paper, and (3) final revised version of the paper. A single rubric was used in the music history course. It was designed to be used for the first version of the paper and revision.

Student Learning Outcomes/Objectives
SLO 1: Analysis of the Data (G: 1) (M: 1)
Students should be able to (1) show evidence of the analysis of music and/or song text, or historical or cultural data, or comparative research, (2) explain the synthesis of data and (3) explain the results of the analysis.

SLO 2: Synthesis of Personal Findings Supported by Scholarly Research (G: 1) (M: 1)
Students should be able to demonstrate the ability to (1) synthesize personal findings and (2) show with proper citations that cultural and/or historical research and data are supported by scholarly sources.

SLO 3: Critical Thinking in the Content of the Paper (M: 2)
This outcome/objective is specific to the Music History course. Upon the completion of this assignment students should be able to demonstrate the ability to: 1) clearly state the objective and point of view of the author (student), (2) examine musical features beyond mere description of the piece, (3) appropriately choose examples that demonstrate the primary goal of the paper, (4) connect musical observations/examples to historical or cultural observations in ways that demonstrate critical thinking, and (5) show that the analysis of music and synthesis of data are presented in a clear and logical progression from the thesis to the conclusion.

Measures, Targets, and Findings
M 1: Rubric for Research Paper (O: 1, 2)
The revised research paper is the third and final component of a three-part critical thinking through writing assignment. The two parts that precede the revised paper are (1) the research proposal with an outline and an annotated bibliography and (2) the draft of the research paper. The instructor provides comments on the research proposal, outline, and annotated bibliography concerning the scope and applicability of the proposed topic and research objective(s). The instructor provides detailed comments on drafts of the paper concerning the use (or lack thereof) of adequate supporting scholarly research, the organization of the paper, how the proposed primary objective is being addressed, the relevance of the sections on personal findings and concluding thoughts, and the use of citations in the body of the paper and the works cited section. The CTW component of the Revised (or final) Research Paper is graded on a rubric. The rubric is composed of eight components, five of which have been identified as significant to critical thinking for this assignment. These components are (1) Central Position and Primary Objective - CTW, (2) Methodology, Concepts, and Theories of Inquiry - CTW, (3) Organization of Data, (4) Context of Data and Scholarly Support, (5) Analysis of Data - CTW, (6) Personal Findings Supported by Scholarly Research - CTW, (7) Relevance and Implications in Concluding Thoughts - CTW, and (8) Writing Style and Quality of Communication. Up to twelve (12) points can be earned in each of the eight sections and up to four (4) points for an appropriate title for the paper. A maximum of one hundred points (100) can be earned for the revised critical thinking research paper. Assessment data for each of the five CTW components listed on the rubric are provided in the corresponding target/findings section. The 2012-2013 CTW report will focus on target figures for two components of the rubric: "Analysis of the Data" and "Personal Findings Supported by Scholarly Research" (referred to in this report as "Synthesis of Personal Findings Supported by Scholarly Research"). See the following attachments in the Document Management section for specific findings in each semester: 1) Comparison of Composite Scores - Fall 2011, and Summer 2012 2) World Music MUS 4820 Findings Fall 2011. 3) World Music MUS 4820 Findings Summer 2012, Central Position and Primary Objective - Differential = +0.5; Methodology, Concepts
and/or Theories of Inquiry - Differential = -1.5; Organization of Data - Differential = -1.1; Context of Data and Scholarly Support = Differential = + 0.6; Analysis of Data - Differential = +0.1 Personal Findings Supported by Scholarly Research - Differential = +0.3

Relevance and Implications of Concluding Thoughts - Differential = +0.2 Writing Style and Quality of Communication - Differential = +0.2

Sum 2010 to Fall 2011 - Overall Differential = -0.1

In conclusion, though the comparison of the findings from Fall 2011 to Summer 2012 show a differential of -0.1, a comparison of the individual components identified on the rubric demonstrate an increase in 6 of the 8 components. A comparison of the findings from Fall 2011 to Summer 2012 in the two components to be assessed for the 2012-2013 report shows an increase in the section entitled "Analysis of Data" of 0.1 and in the section on the rubric called "Personal Findings Supported by Scholarly Research" it shows an increase of 0.3. The total increase of 0.4 between the two sections is significant though not major. I think this shows some improvement on the part of the students in their area of analyzing the data (evidence of the analysis of music or historical and cultural data, and the synthesis of this data accompanied by a clear explanation) and in the area of providing personal findings to support scholarly research (evidence that personal findings and cultural/historical research and data are supported by scholarly sources with proper citations). Since target figures will be deemed as "met" if there is an increase of the of at least 0.5 when comparing finding from one semester to the next, the comparison of the Fall 2011 and Summer 2012 findings show that the target figure was missed by 0.1 points. Included in the Document Management Section is the rubric entitle Final Rubric Findings - Fall 2012 for the World Music course taught by another instructor. Because this is the first semester findings data were submitted by the instructor of this class I am including the rubric only. No comparison data is available yet for this instructor's CTW courses.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Analysis of the Data
The target score for Analysis is 11.4, representing an increase of 0.5. (Target figures will be deemed as "met" if there is an increase of at least 0.5 when comparing 2013 to 2014 findings.)

Findings 2012-2013 - Target: Partially Met
A comparison of the findings from Fall 2011 to Summer 2012 in the two components to be assessed for the 2012-2013 report shows an increase in the section entitled "Analysis of Data" of 0.1. This does not demonstrate enough improvement on the part of the students in their area of analyzing the data (evidence of the analysis of music or historical and cultural data, and the synthesis of this data accompanied by a clear explanation). Since target figures will be deemed as "met" if there is an increase of the of at least 0.5 when comparing finding from one semester to the next, the comparison of the Fall 2011 and Summer 2012 findings show that the target figure was missed by 0.4 points. The following achievements should be noted concerning the objective called "Analysis of Data" 1) 75 percent of the students (9 out of 12) demonstrated a mastery of this component. 2) 25 percent of the student (3 out of 12) demonstrated a competency of this component. (Solely based on these figures the target of 25 percent showing a mastery of the component was exceeded threefold.)

Target for O2: Synthesis of Personal Findings Supported by Scholarly Research
The target score for "Synthesis of Personal Findings" is 10.9, representing an increase of 0.5. (Target figures will be deemed as "met" if there is an increase of the of at least 0.5 when comparing 2013 to 2014 findings.)

Findings 2012-2013 - Target: Partially Met
A comparison of the findings from Fall 2011 to Summer 2012 in the two components to be assessed for the 2012-2013 report shows an increase in the section on the rubric called "Personal Findings Supported by Scholarly Research" it shows an increase of 0.3. Though this is not enough, I think this shows some improvement on the part of the students in their area providing personal findings to support scholarly research (evidence that personal findings and cultural/historical research and data are supported by scholarly sources with proper citations). Since target figures will be deemed as "met" if there is an increase of the of at least 0.5 when comparing finding from one semester to the next, the comparison of the Fall 2011 and Summer 2012 findings show that the target figure was missed by 0.4 points. The following achievements should be noted concerning the objective called "Synthesis of Personal Findings Supported by Scholarly Research": 1) 75 percent of the students (9 out of 12) demonstrated a mastery of this component. 2) 25 percent of the student (3 out of 12) demonstrated a competency of this component. (Solely based on these figures the target of 25 percent showing a mastery of the component was exceeded threefold.)

M2: Critical Thinking in the Content of the Paper (O: 3)
This measure is specific to the Music History course (MUS 4810) and is based on the completion of the following objectives. Upon the completion of this assignment students should be able to demonstrate the ability to: 1) clearly state the objective and point of view of the author (student), (2) examine musical features beyond mere description of the piece, (3) appropriately choose examples that demonstrate the primary tool of the paper, (4) connect musical observations/examples to historical or cultural observation in ways that demonstrate critical thinking, and (5) show that the analysis of music and synthesis of data are presented in a clear and logical progression from the thesis to the conclusion. It is based on data derived from a class of 39 students in which 33 students completed all three components--1) proposal-outline and annotated bibliography, 2) First version of the paper, 3) Revision of the paper). The instructor stated that a few students chose not to revise their papers. These students had an A on the first version and therefore demonstrated mastery by these standards. In the component entitled "Critical Thinking in the Content of the paper" the instructor provided the following data: 1) In the section entitled "Demonstrates Mastery" - 2 students were given this ranking in the draft and 12 (36 percent of 33 total students) were given this ranking in the revision of the paper. 2) In the section entitled "Demonstrates Competency" - 5 students were given this ranking in the draft and 16 (48 percent of 33 total students) were given this ranking in the revision of the paper. 3) In the section entitled "Demonstrates Development" - 25 students were given this ranking in the draft and 5 were given this ranking in revision of the paper. 4) In the section entitled "Insufficient" - 2 students were given this ranking. In the draft and none were given this ranking in the revision of the paper. Please see the file entitle Music History (MUS 4810) Rubric for the 1st Version of the Paper and the Revision for the complete rubric and numerical data.

Source of Evidence: Written assignment(s), usually scored by a rubric

Details of Action Plans for This Cycle (by Established cycle, then alpha)
Determining the Effectiveness and Value CTW Assignments in Music
The School of Music believes that these CTW assignments will lead to improvements in the quality and depth of student critical thinking and writing. Professors for CTW courses will collect examples of research papers exhibiting effective, less effective, and ineffective critical thinking for students to view. (Of course the anonymity of student’s work will always be maintained.) The action plan for the School of Music is to determine the effectiveness and value of the assignments and rubrics in the two CTW courses currently taught, in World Music (MUS 4820), anonymous samples of student papers of each component of the three part assignment (1, the
Emphasis on Personal Findings Supported by Scholarly Research

I will continue to report findings in these two areas because the improvement demonstrated.

I think comparisons of classes of similar sizes during the regular academic year will yield the most usable data. Plans are also to continue to discuss the assignments and rubrics with instructors teaching the same CTW world music course as well as the other CTW course in music history.

Continued Use or Rubrics and More Departmental CTW Meetings

The plan for 2013 - 2014 will be to continue using the current rubrics (draft and final revised rubrics) for the course. The components on the rubric used in the music history course may have been revised so that more specific outcomes/objectives can be measured. As the ambassador, I will continue to monitor the progress of students from one semester one year to a semester of the previous year.

Action Plan for CTW Music Courses for 2013-2014

The action plan for CTW music courses for the 2013 - 2014 year is two fold: 1) To provide further training for the three faculty members, in addition to myself, in the areas of music history and world music who will be teaching the two CTW courses offered at the School of Music. Currently, one instructor of the CTW music history course and two instructors of the CTW world music course have students do a research paper for the class. The music history instructor required that the students do the three part assignment (1. research proposal with an outline and an annotated bibliography, 2. draft of the research paper, 3. final revised paper) and provided students her own rubrics for the first version of the paper and reviewed the papers. The instructor in the second section of the world music course used the rubric I provided in her course. This instructor provided me with a final rubric showing how students ranked in each of the sections/components of the rubric. This information is now available in this report. Plans are to help this instructor compile data that can be compared to that submitted on this report so that a comparison of the students progress can be demonstrated. 2) Plans are to again compare findings in the two components areas entitled Analysis of Data and Synthesis of Personal Findings Supported by Scholarly Research. I will continue to report findings in these two areas because the improvement shown was not significant enough in one class and because this was the first time numerical data was presented for the other two CTW courses. Plans are to continue to discuss the use of the rubrics to gather student assessment information for the purpose of reporting on these two objectives for the 2013-2014 CTW report. Target figures for the Action Plan for 2013 - 2014 in the areas as Analysis, Synthesis of Personal Findings and Critical Thinking in the Content are as follows: 80% of students should exhibit at least a low level of competency (7) 40% of students should exhibit a mastery (8 to 9) 25% of students should exhibit a mastery (10 to 12 on rubric)

Emphasis on Analysis of Data

Because the target was not met, additional emphasis will be placed on the students ability to demonstrate evidence of the analysis of music or historical and cultural data, and the synthesis of this data accompanied by a clear explanation.

Emphasis on Personal Findings Supported by Scholarly Research

Because the target was only partially met, additional emphasis will be placed on the student's ability to demonstrate evidence that personal findings and cultural/historical research and data are properly synthesized and supported by scholarly sources with proper citations.
**Mission / Purpose**

To meet the requirements of the University's CTW policy, the neuroscience CTW courses are designed to develop critical thinking skills in undergraduate neuroscience majors. We define and assess critical thinking by the students' ability to evaluate the quality of information using available empirical evidence and to use logic and reasoning in recognizing, constructing, defending and critiquing scientific arguments.

**Goals**

**G 1: Critical thinking skills in neuroscience**

Use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems related to neural processes.

---

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

The major CTW accomplishment in the School of Music for the 2012-2013 academic year are as follows: 1) For the first time assessment data was submitted by each CTW instructor. 2) The first formal CTW workshop/meeting was held at the beginning of the Fall 2012 semester. As the CTW ambassador for the School of Music, I reviewed the goals and objectives of the CTW initiative as they relate to the Quality Enhancement Plan for the University. We discussed the specific three-part assignment and reviewed the rubrics and the type of data that is requested for the annual CTW report.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

Because emphasis in both music CTW courses is on the ability to analyze data, interpret it, and support personal findings with scholarly research, instructors have noticed a significant improvement in how students critique data related to music and how they express this critically from the first phase of the three-part assignment to last phase and from one semester of a CTW course to the next. Students have a better understanding of the assignment the second time they take a CTW course and do better on the assignment.

**CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?**

There are no major areas of needs concerning CTW in the School of Music. All instructors of the courses have a better understanding of the CTW initiative, the value of the assignment, and why the data is of value to the university for the report.

**CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?**

Concerning the impact of CTW, instructors of the courses generally agree that the quality of student papers has improved tremendously. The rubrics provide a more concrete guideline for students. As a result our music students are also thinking more critically about the repertoire they perform. The department as a whole has not made any additional changes to the CTW initiative since last year's CTW assessment report. There has however been more participation and support from faculty concerning the initiation.

---

**Academic Program Question 1:**

What changes in the assessment process have your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Since last year's report the CTW initiative in the School of Music has decided to focus more on the findings associated with two specific outcomes/objectives: Analysis of Data and Synthesis of Personal Findings with Scholarly Support. The report in previous years was too broad and there was an attempt to cover too much information in the report. By identifying two major objectives for the report, the data presented in the report better informs the reader/observer of progress made relative to specific learning objectives. Since this was the first year that data was reported specific to the two learning objectives more time (an additional academic year) is needed to adequately assess student improvement. This will also allow for more uniformity concerning the data which is included in future reports.

**Academic Program Question 2:**

What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

At the moment the department does not foresee the need to make changes to the curriculum based on findings of the CTW report. However, discussions have been made concerning the possibility of making other core courses CTW courses in the future.
Measures, Targets, and Findings

**Student Learning Outcomes/Objectives**

**SLO 1: Uses critical thinking effectively (M: 1, 2, 3, 4, 5)**
- a. Evaluate the quality of information, including differentiating empirical evidence from speculation and the probable from the improbable b. Identify and evaluate the source, context, and credibility of information c. Recognize and defend against common fallacies in scientific thinking d. Avoid being swayed by appeals to emotion or authority e. Evaluate popular media reports of neuroscience research f. Make appropriate connections between different facts, theories, and observations

**SLO 2: Uses reasoning to recognize, develop, defend, and criticize arguments (M: 1, 2, 3, 4, 5)**
- a. Identify components of arguments (e.g., conclusions, premises & assumptions, gaps, counterarguments) b. Distinguish among assumptions, emotional appeals, speculations, and defensible evidence c. Weigh support for conclusions to determine how well reasons support conclusions d. Identify weak, contradictory, and inappropriate assertions e. Develop sound arguments based on reasoning and evidence

**SLO 3: Approaches scientific problems creatively and effectively (M: 1, 2, 3, 4, 5)**
- a. Intentionally pursue unusual approaches to problems b. Recognize and encourage creative thinking in others c. Evaluate new ideas with an open but critical mind d. Recognize ill-defined and well-defined problems e. Articulate problems clearly f. Generate multiple hypotheses and predictions g. Match appropriate methods for testing of predictions h. Evaluate the quality of hypotheses and revise as needed

**SLO 4: Demonstrate effective writing skills in various formats and for various purposes (M: 1, 2, 3, 4, 5)**
- a. Demonstrate professional writing conventions (e.g., grammar, audience awareness, formality) appropriate to purpose and context b. Use accepted scientific writing styles in empirical reports, literature reviews, and theoretical papers

**Target for O1: Uses critical thinking effectively**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Organization and Logic on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for the majority of students to be in the Developing (2-3) range for Organization and Logic on this assignment. 0. Ideas are arranged in a chaotic way, with no logical connection between them (i.e., within sentences and/or paragraphs). 1. Ideas are arranged in an associative, digressive, elliptical, or circular manner; the logical connections between ideas are consistently unclear. 2. Ideas are arranged in a way that makes sense to the author, but is inappropriate for the purpose or audience of the assignment; the logical connections between ideas are frequently unclear. 3. Ideas are arranged with some consideration for the purpose and audience of the assignment; the logical connections between ideas are sometimes unclear. 4. Ideas are arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are almost always clear. 5. Ideas are thoughtfully and effectively arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are consistently clear. In the 2012-2013 CTW Writing Assessment Rubric, instructors rate the student's submission for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for the majority of students to be in the Developing (2-3) range for Use of Evidence on this assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims 1. Is skeptical, but is unable to explain why or support claims with evidence 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant 3. Supports most claims with evidence that is appropriate, accurate, and relevant 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

**Findings 2012-2013 - Target: Met**

The median score for Organization and Logic for both the first and last written products was 3, which is in the 'developing' range, and all but one of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Use of Evidence for both the first and last written product was 3, which are both in the 'developing' range. All of the students were rated a score of 2 (the lower end of the 'developing' range) or higher on both the first and last written assignments. The proportions of students in each performance category for both the first and last written products are
NEUR 3020 provides neuroscience majors with experience in research design, data analysis, and scientific communication needed.
for higher-level understanding in 4000-level courses, the development of writing of senior-year theses, and graduate study. Topics include the structure and style of scientific writing in neuroscience, experimental design, statistical techniques, and preparation of a formal literature review in the appropriate discipline. Course assignments focused on developing students' abilities to effectively analyze and evaluate concepts, formulate and present persuasive arguments, and describe ideas clearly and thoughtfully in writing. Using the CTW Neuroscience Rubric, CTW assessment for this course compared the student's first written product and the last written product. The first writing product was a brief paper that analyzed and reviewed an empirical neuroscience paper using twelve analytical questions from the text (e.g. “What was the “big question” of the study? What were the specific research questions of this study?”). The last written product was a longer research paper, using several peer-reviewed papers that covered a particular topic in neuroscience; assessment was on the post-feedback product.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Uses critical thinking effectively**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Organization and Logic on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for the majority of students to be in the Developing (2-3) range for Organization and Logic on this assignment. 1. Ideas are arranged in an associative manner; the logical connections between ideas are consistently unclear. 2. Ideas are arranged in a way that makes sense to the author, but is inappropriate for the purpose or audience of the assignment; the logical connections between ideas are frequently unclear. 3. Ideas are arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are sometimes unclear. 4. Ideas are arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are almost always clear. 5. Ideas are thoughtfully and effectively arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are consistently clear. In the 2012-2013 CTW Writing Assessment Rubric, instructors rate the student's submission for Use of Evidence on the scale below. A score of 0-1 is considered Developing and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for the majority of students to be in the Developing (2-3) range for Use of Evidence on this assignment. 1. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 2. Supports most claims with evidence that is appropriate, accurate, and relevant. 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

**Findings 2012-2013 - Target: Met**

The median score for Organization and Logic for both the first and last written product was 3, which is in the 'developing' range, and 85% and 100% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher, respectively. The median score for Use of Evidence for both the first and last written product was 3, which are both in the 'developing' range. 92% and 100% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher for the first and last written assignments, respectively. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 1 Figure NEUR 3020 Spring 2013.

**Target for O2: Uses reasoning to recognize, develop, defend, and criticize arguments**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Position and Balance on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for the majority of students to be in the Developing (2-3) range for Position and Balance on this assignment. 1. Does not take a consistent position on the issue; the logical connections between ideas are consistently unclear. 2. Takes a consistent position on the issue, but ignores relevant counterevidence and alternate points of view. 3. Takes a consistent position on the issue and addresses some relevant counterevidence and/or alternate points of view. 4. Takes a consistent position on the issue and addresses the relevant counterevidence and/or alternate points of view. However, claims and/or evidence could be presented more clearly and/or objectively. 5. Takes a clear and balanced position on the issue, thoroughly addressing relevant counterevidence and/or alternate points of view

**Findings 2012-2013 - Target: Met**

The median score for Position and Balance for both the first and last written product was 2 and 3 respectively, which is in the 'developing' range, and all of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 2 Figure NEUR 3020 Spring 2013.

**Target for O3: Approaches scientific problems creatively and effectively**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for the majority of students to be in the Developing (2-3) range for Use of Evidence on this assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims. 1. Is skeptical, but is unable to explain why or support claims with evidence. 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 3. Supports most claims with evidence that is appropriate, accurate, and relevant. 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

**Findings 2012-2013 - Target: Met**

The median score for Use of Evidence for both the first and last written product was 3, which are both in the 'developing' range. 92% and 100% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher for the first and last written assignments, respectively. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 3 Figure NEUR 3020 Spring 2013.

**Target for O4: Demonstrate effective writing skills in various formats and for various purposes**

In the 2012-2013 CTW Writing Assessment Rubric, instructors rate the student's submission for Grammar and Mechanics on the...
scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is for 75% of the students to be in the Developing (2-3) range for Grammar and Mechanics on this assignment. 0. The frequency and variety of errors obscures the writer's intentions completely. 1. The frequency and variety of errors is disruptive to the reader. 2. The frequency and/or variety of errors are somewhat disruptive to the reader. 3. Errors are few and generally not disruptive to the reader. 4. Errors are rare and inconsequential to the reader. 5. The reader's intentions are clearly expressed.

In the 2012-2013 CTW Writing Assessment Rubric, instructors rate the student's submission for Content and Development on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is the majority of students to be in the Developing (2-3) range for Content and Development on this assignment. 0. No details. 1. Few details, and these are generally inaccurate or irrelevant. 2. A variety of details, but these are inaccurate or irrelevant. 3. A variety of relevant and accurate details, but some relevant details are missing 4. Thorough, relevant, and accurate details, but could be more concise 5. Complete, relevant, and accurate details in an appropriately concise manner. In the 2012-2013 CTW Writing Assessment Rubric, instructors rate the student's submission for Citation and Use of Sources on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 3020, our junior/entry CTW course, the target is the majority of students to be in the Developing (2-3) range for Citation and Use of Sources. 0. The student has committed intentional plagiarism by copying and/or paraphrasing one or more sentences from a source (e.g., by changing some of the original words and/or the original word order), although a citation is provided 2. Quotes rather than paraphrases a cited source 3. Properly paraphrases all sources and provides citations for them, but has errors in citation mechanics 4. Properly paraphrases and cites all sources, but does not consistently or skillfully integrate the cited material with his/her own ideas 5. Properly paraphrases and cites all sources, while consistently and skillfully integrating the cited material with his/her own ideas

### Findings 2012-2013 - Target: Met

The median score for Grammar and Mechanics for the first written product was 2, which is in the lower end of the 'developing' range, and 62% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Grammar and Mechanics for the last written product was 3, which is in the 'developing' range, and 92% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Use of Evidence for the last written product was 3, which is in the lower end of the 'developing' range, and 92% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Content and Development for the last written product was 3, which is in the 'developing' range, and all of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Content and Development for the last written product was 3, which is in the 'developing' range, and 92% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Citation and Use of Sources was 3 for both the first and last written product, which are both in the 'developing' range. 82% and 92% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The median score for Grammar and Mechanics for the first written product was 2, which is in the lower end of the 'developing' range, and 92% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher.

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's submission for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for 75% of the students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unfamiliar with the assignment, or the assignment is inappropriate to the final assignment. 1. Is skeptical, but is unable to explain why or support claims with evidence 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant 3. Supports most claims with evidence that is appropriate, accurate, and relevant 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some evidence is incorrect or missing 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

### Target for O1: Uses critical thinking effectively

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's submission for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unfamiliar with the assignment, or the assignment is inappropriate to the final assignment. 1. Is skeptical, but is unable to explain why or support claims with evidence 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant 3. Supports most claims with evidence that is appropriate, accurate, and relevant 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some evidence is incorrect or missing 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

### Findings 2012-2013 - Target: Met

The median score for Organization and Logic for both the first and last written products are summarized in Outcome 1 Figure NEUR 4910 Fall 2012. The median score for Use of Evidence for the first written product was 4, which is in the 'mastering' range with 67% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Use of Evidence for the last written product was 4, which is in the 'mastering' range with 83% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 1 Figure NEUR 4910 Fall 2012.
**Target for O2: Uses reasoning to recognize, develop, defend, and criticize arguments**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Position and Balance on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Position and Balance on the final assignment. 0. Does not take any position on the issue. 1. Does not take a consistent position on the issue. 2. Takes a consistent position on the issue, but ignores relevant counterevidence and alternate points of view. 3. Takes a consistent position on the issue and attempts to address some relevant counterevidence and/or alternate points of view 4. Takes a consistent position on the issue and addresses the relevant counterevidence and/or alternate points of view. However, claims and/or evidence could be presented more clearly and/or objectively. 5. Takes a clear and balanced position on the issue, thoroughly addressing relevant counterevidence and/or alternate points of view.

**Findings 2012-2013 - Target: Met**

The median score for Position and Balance for the first written product was 3.5, which is in the high end of the 'developing' range with 50% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Position and Balance for the last written product was 4, which is in the 'mastering' range with 83% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 2 Figure NEUR 4910 Fall 2012.

**Target for O3: Approaches scientific problems creatively and effectively**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims. 1. Skeptical, but it is unable to explain why or support claims with evidence. 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 3. Supports most claims with evidence that is appropriate, accurate, and relevant. 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

**Findings 2012-2013 - Target: Met**

The median score for Use of Evidence for the first written product was 4, which is in the 'mastering' range with 67% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Use of Evidence for the last written product was 4, which is in the 'mastering' range with 83% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 3 Figure NEUR 4910 Fall 2012.

**Target for O4: Demonstrate effective writing skills in various formats and for various purposes**

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Grammar and Mechanics on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Grammar and Mechanics on the final assignment. 0. The frequency and variety of errors obscures the writer's intentions completely. 1. The frequency and variety of errors is disruptive to the reader. 2. The frequency and/or variety of errors are somewhat disruptive to the reader. 3. Errors are few and generally not disruptive to the reader. 4. Errors are rare and inconsequential to the reader. 5. The reader's intentions are clearly expressed. In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Content and Development on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for students to be in the Mastering (4-5) range for Content and Development on the final assignment. 0. No details. 1. Few details, and these are generally inaccurate or irrelevant. 2. A variety of details, but some are inaccurate or irrelevant. 3. A variety of relevant and accurate details, but some relevant details are missing. 4. Thorough, relevant, and accurate details, but could be more concise 5. Complete, relevant, and accurate details in an appropriately concise manner. In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Citation and Use of Sources on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Citation and Use of Sources on the final assignment. 0. Has committed unintentional plagiarism by copying and/or paraphrasing one or more sentences from a source and not using quotation marks or a citation to indicate the ideas are not his/her own 1. Has committed unintentional plagiarism by inappropriately paraphrasing one or more sentences from a source (e.g., by changing some of the original words and/or the original word order), although a citation is provided 2. Quotes rather than paraphrases a cited source 3. Properly paraphrases all sources and provides citations for them, but has errors in citation mechanics 4. Properly paraphrases and cites all sources, but doesn’t consistently or skillfully integrate the cited material with his/her own ideas 5. Properly paraphrases and cites all sources, while consistently and skillfully integrating the cited material with his/her own ideas.

**Findings 2012-2013 - Target: Met**

The median score for Grammar and Mechanics for the first written product was 3.5, which is in the higher ‘developing’ range with 50% of the students rating a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Grammar and Mechanics for the last written product was 4, which is in the ‘mastering’ range with 83% of the students rating a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Content and Development for the first written product was 3.5, which is in the higher ‘developing’ range with 50% of the students rating a score of 4 (the lower end of the ‘mastering’ range) or higher. The median score for Content and Development for the last written product was 4, which is in the ‘mastering’ range with 83% of the students rating a score of 4 (the lower end of the ‘mastering’ range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910 Fall 2012.

The median score for Citation and Use of Sources for both the first and last written product was 4, which is in the ‘mastering’ range with 83% of the students rating a score of 4 (the lower end of the ‘mastering’ range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910 Fall 2012.
### M 4: NEUR 4910-Spring 2012a: First and last written products (O: 1, 2, 3, 4)

NEUR 4910 provides neuroscience majors with more advanced experience in interpreting and analyzing research papers in a sub-discipline or topic area of neuroscience. Course assignments varied according to topic areas and instructor interest but all focused on developing students' abilities to present persuasive arguments, and describe ideas clearly and thoughtfully in writing. Using the CTW Neuroscience Rubric, CTW assessment for all sections of this course compared the student's first written product and the last written product. The nature of these written assignments was different across sections of the course, both the first and last written products were review papers that described and analyzed several peer-reviewed papers covering a particular issue within the course ("Introduction to Neural Systems"); all assessment was on the post-feedback product.

Source of Evidence: Written assignment(s), usually scored by a rubric

#### Target for O1: Uses critical thinking effectively

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Organization and Logic on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Organization and Logic on the final assignment. 0. Ideas are arranged in a chaotic way, with no logical connection between them (i.e., within sentences and/or paragraphs). 1. Ideas are arranged in an associative, digressive, elliptical, or circular manner; the logical connections between ideas are consistently unclear. 2. Ideas are arranged in a way that makes sense to the author, but is inappropriate for the purpose or audience of the assignment; the logical connections between ideas are frequently unclear. 3. Ideas are arranged with some consideration for the purpose and audience of the assignment; the logical connections between ideas are sometimes unclear. 4. Ideas are arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are almost always clear. 5. Ideas are thoughtfully and effectively arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are consistently clear. Target In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims. 1. Is skeptical, but is unable to explain why or support claims with evidence. 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 3. Supports most claims with evidence that is appropriate, accurate, and relevant. 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

#### Target for O2: Uses reasoning to recognize, develop, defend, and criticize arguments

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Position and Balance on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Position and Balance on the final assignment. 0. Does not take any position on the issue. 1. Does not take a consistent position on the issue. 2. Takes a consistent position on the issue, but ignores relevant counter-evidence and alternate points of view. 3. Takes a consistent position on the issue and addresses some relevant counter-evidence and/or alternate points of view. 4. Takes a consistent position on the issue and addresses the relevant counter-evidence and/or alternate points of view. However, claims and/or evidence could be presented more clearly and/or objectively. 5. Takes a clear and balanced position on the issue, thoroughly addressing relevant counter-evidence and/or alternate points of view

#### Target for O3: Approaches scientific problems creatively and effectively

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims. 1. Is skeptical, but is unable to explain why or support claims with evidence. 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 3. Supports most claims with evidence that is appropriate, accurate, and relevant. 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.
The median score for Use of Evidence for the first written product was 4.5, which is in the 'mastering' range with 63% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Use of Evidence for the last written product was 4, which is in the 'mastering' range with 100% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 3 Figure NEUR 4910a Spring 2013.

Target for O4: Demonstrate effective writing skills in various formats and for various purposes

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Grammar and Mechanics on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Grammar and Mechanics on the final assignment. 0. The frequency and variety of errors obscures the writer's intentions completely. 1. The frequency and variety of errors is disruptive to the reader. 2. The frequency and/or variety of errors are somewhat disruptive to the reader. 3. Errors are few and generally not disruptive to the reader. 4. Errors are rare and inconsequential to the reader. 5. The reader's intentions are clearly expressed. In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Content and Development on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Content and Development on the final assignment. 0. No details. 1. Few details, and these are generally inaccurate or irrelevant. 2. A variety of details, but some are inaccurate or irrelevant. 3. A variety of relevant and accurate details, but some relevant details are missing. 4. Thorough, relevant, and accurate details, but could be more concise. 5. Complete, relevant, and accurate details in an appropriately concise manner. In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Citation and Use of Sources on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Citation and Use of Sources on the final assignment. 0. Has committed intentional plagiarism by copying and/or paraphrasing one or more sentences from a source and not using quotation marks or a citation to indicate the ideas are not her/his own. 1. Has committed unintentional plagiarism by inappropriately paraphrasing one or more sentences from a source (e.g., by changing some of the original words and/or the original word order), although a citation is provided. 2. Quotes rather than paraphrases a cited source. 3. Properly paraphrases all sources and provides citations for them, but has errors in citation mechanics. 4. Properly paraphrases and cites all sources, but doesn't consistently or skillfully integrate the cited material with his/her own ideas. 5. Properly paraphrases and cites all sources, while consistently and skillfully integrating the cited material with his/her own ideas.

Findings 2012-2013 - Target: Met

The median score for Grammar and Mechanics for the first written product was 4, which is in the 'mastering' range with 75% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Grammar and Mechanics for the last written product was 4.5, which is in the 'mastering' range with 87% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910a Spring 2013. The median score for Content and Development for the first written product was 4, which is in the 'mastering' range with 75% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Content and Development for the last written product was 4.5, which is in the 'mastering' range with 87% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910a Spring 2013. The median score for Content and Use of Sources for both the first and last written product was 4, which is in the 'mastering' range with 75% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910a Spring 2013.

M 5: NEUR 4910-Spring 2012b: First and last written products (O: 1, 2, 3, 4)

NEUR 4910 provides neuroscience majors with more advanced experience in interpreting and analyzing research papers in a sub-discipline or topic area of neurosciences. Course assignments vary according to topic areas and instructor interest but all focused on developing students' abilities to effectively analyze and evaluate concepts, formulate and present persuasive arguments, and describe ideas clearly and thoughtfully in writing. Using the CTW Neuroscience Rubric, CTW assessment for all sections of this course compared the student's first written product and the last written product. The nature of these written assignments was different across sections of the course. For this course, the first written product was a short reaction statement based on a question done by the instructor about an assigned paper. The final written product was a "synopsis-and-critique" paper that described and analyzed a peer-reviewed paper covering a particular issue within the course ("Brain Mechanisms of Reward and Reinforcement"). The substantial difference between assignment formats precluded analyzing pre-post rubric scores for two categories: "Grammar and Mechanics" and "Citation and Use of Resources".

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Uses critical thinking effectively

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Organization and Logic on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Organization and Logic on the final assignment. 0. Ideas are arranged in a chaotic, disorganized, or circular manner; the logical connections between ideas are consistently unclear. 1. Ideas are arranged in an associative, digressive, elliptical, or circular manner; the logical connections between ideas are consistently unclear. 2. Ideas are arranged in a way that makes sense to the author, but is inappropriate for the purpose or audience of the assignment; the logical connections between ideas are frequently unclear. 3. Ideas are arranged with some consideration for the purpose and audience of the assignment; the logical connections between ideas are sometimes unclear. 4. Ideas are arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are almost always clear. 5. Ideas are thoughtfully and effectively arranged in a manner appropriate to the purpose and audience of the assignment; the logical connections between ideas are consistently clear. Target In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims. 1. Skeptical, but is unable to explain why or support claims with evidence. 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 3. Supports most
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Address rubric scoring
The assessment data indicate considerable variation in rubric scores across sections of our advanced course (NEUR 4910). This is perhaps not surprising as the entire NEUR 4910 faculty had never taught this course nor had they taught CTW courses before. Nevertheless, we will address this issue in the coming reporting period by meeting prior to each semester to confirm broad agreement on the issue and addresses the relevant counterevidence and/or alternate points of view. However, claims and/or evidence could be presented more clearly and/or objectively. 5. Takes a clear and balanced position on the issue, thoroughly addressing relevant counterevidence and/or alternate points of view.

Findings 2012-2013 - Target: Not Met

The median score for Organization and Logic for the first written product was 2, which is at the low end of the 'developing' range with none of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Organization and Logic for the last written product was 3, which is at the high end of the 'developing' range with 46% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Use of Evidence for the last written product was 3, which is at the high end of the 'developing' range with 8% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 1 Figure NEUR 4910b Spring 2013.

Target for O2: Uses reasoning to recognize, develop, defend, and criticize arguments

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Position and Balance on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Position and Balance on the final assignment. 0. Does not take any position on the issue. Does not take a consistent position on the issue. 2. Takes a consistent position on the issue, but ignores relevant evidence and alternate points of view. 3. Takes a consistent position on the issue and attempts to address some relevant counterevidence and/or alternate points of view 4. Takes a consistent position on the issue and addresses the relevant counterevidence and/or alternate points of view. However, claims and/or evidence could be presented more clearly and/or objectively. 5. Takes a clear and balanced position on the issue, thoroughly addressing relevant counterevidence and/or alternate points of view.

Findings 2012-2013 - Target: Not Met

The median score for Organization and Logic for the first written product was 2, which is at the low end of the 'developing' range with none of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The median score for Use of Evidence for the last written product was 3, which is at the high end of the 'developing' range with 23% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 2 Figure NEUR 4910b Spring 2013.

Findings 2012-2013 - Target: Not Met

The median score for Use of Evidence for the last written product was 3, which is at the high end of the 'developing' range with 8% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 3 Figure NEUR 4910b Spring 2013.

Findings 2012-2013 - Target: Not Met

The median score for Use of Evidence for the last written product was 3, which is at the high end of the 'developing' range with 8% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910b Spring 2013.

Target for O3: Approaches scientific problems creatively and effectively

In the 2012-2013 CTW Writing Assessment Rubric, the instructor rates the student's written product for Use of Evidence on the scale below. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For NEUR 4910, our advanced CTW course, the target is for the majority of students to be in the Mastering (4-5) range for Use of Evidence on the final assignment. 0. Is unquestioning of his/her acceptance of unproven or poorly supported claims. 1. Is skeptical, but is unable to explain why or support claims with evidence. 2. Supports claims with evidence, but this evidence is usually inappropriate, inaccurate, or irrelevant. 3. Supports most claims with evidence that is appropriate, accurate, and relevant. 4. Consistently supports claims with appropriate, accurate, and relevant evidence. However, some important evidence is missing. 5. Consistently and thoroughly supports claims with appropriate, accurate, and relevant evidence.

Findings 2012-2013 - Target: Not Met

The median score for Use of Evidence for the last written product was 3, which is at the high end of the 'developing' range with 8% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 3 Figure NEUR 4910b Spring 2013.

Findings 2012-2013 - Target: Not Met

The median score for Use of Evidence for the last written product was 3, which is at the high end of the 'developing' range with 8% of the students rating a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category for both the first and last written products are summarized in Outcome 4 Figure NEUR 4910b Spring 2013.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Address rubric scoring
The assessment data indicate considerable variation in rubric scores across sections of our advanced course (NEUR 4910). This is perhaps not surprising as the entire NEUR 4910 faculty had never taught this course nor had they taught CTW courses before. Nevertheless, we will address this issue in the coming reporting period by meeting prior to each semester to confirm broad agreement in rubric assessment (perhaps by mock grading of an assignment by all CTW faculty). Between these interactions and faculty re-teaching the same CTW we anticipate refinement in both specific assignments and in reporting.

Established in Cycle: 2012-2013
Address rubric scoring

The assessment data indicate considerable variation in rubric scores across sections of our advanced course (NEUR 4910). This is perhaps not surprising as the entire NEUR 4910 faculty had never taught this course nor had they taught CTW courses before. Nevertheless, we will address this issue in the coming reporting period by meeting prior to each semester to confirm broad agreement in rubric assessment (perhaps by mock grading of an assignment by all CTW faculty). Refine rubric use

The CTW program in Neuroscience is now fully operational as we offer both the junior/entry level course (NEUR 3020) and the senior/exit-level course (NEUR 4910). As in previous years, NEUR 3020 will be taught both in Fall 2013 and in Spring 2014 whereas we will offer one section of NEUR 4910 in Fall 2013 and one section of this course for Spring 2014. Different faculty will teach each of these sections of NEUR 4910, demonstrating significant faculty enthusiasm for teaching this seminar course. This number of sections will be sufficient to accommodate anticipated student demand from our small, but growing, major for 2013-2014. Nevertheless, a main goal will be to staff and train instructors for three to four sections of NEUR 4910 for the successive reporting year (2014-2015) as we anticipate demand for this course to grow with our increasing major population. To that end, the CTW Ambassador will continue to strongly encourage and work with faculty to develop new sections for the senior/exit-level CTW class. In addition, the CTW Ambassador will work with the existing CTW faculty to refine and improve their instruction. In particular, there is a need to increase the consistency in application of the rubric among NEUR 4910 instructors as evidenced by the highly divergent rubric scores across sections. The CTW Ambassador will meet with CTW faculty prior to each semester to go over the rubric and engage in mock grading exercises so that there is closer calibration of scoring/grading.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

There were several major accomplishments this year: First, we offered all of the CTW courses as well as multiple sections of each course. Second, we recruited three faculty to teach three different sections of NEUR 4910. Lastly, at the end of this reporting period, we revised our CTW rubric (for the 2013-2014 reporting period) to accommodate a diversity of topics taught in NEUR 4910. Specifically, we changed the "Position and Balance" criterion to "Position and/or Balance" to allow for grading of written work that does necessarily require a particular theoretical position to be supported.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

All but one of our courses (NEUR 4910b Spring 2013) met our rubric expectations ("Developing" for our entry level course and...
SLO 2: Integration from research to practice

Goals

G 1: Problem Solving

The students will become better problem-solvers in the care of their patients and/or work environment.

Student Learning Outcomes/Objectives

SLO 1: Critical Thinking (G: 1) (M: 3)

The students will demonstrate critical thinking skills necessary to interpret patient data and formulate appropriate nursing interventions in the care of their clinical patients.

SLO 2: Integration from research to practice (G: 1) (M: 4)
The students will integrate research information pertaining to leadership, care delivery, and staff utilization from the literature into practice.

**SLO 3: Analysis and Evaluation (G: 1) (M: 4)**
The student will be able to analyze existing leadership styles and evaluate their effectiveness.

### Measures, Targets, and Findings

#### M 3: Rubric for 2080 (O: 1)
The Critical Thinking in Patient Care: Rubric is used to assess a critical thinking paper in the 2080 course. The rubric examines completeness, critical thinking, and communication. It is constructed on a 6 point scale and utilizes the emerging, developing, and mastering terminology.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O1: Critical Thinking**

- By the third paper of the semester, 100% of students will reach the developing level on the rubric (at least a score of 3) on the critical thinking section of the Critical Thinking in Patient Care: Rubric 60% of students will reach the upper developing category or lower mastery level (between 4 and 5) on the critical thinking section of the Critical Thinking in Patient Care: Rubric 25% of students will reach the upper mastery level (between 5.5 and 6) on the critical thinking section of the Critical Thinking in Patient Care: Rubric

#### Findings 2012-2013 - Target: Partially Met

94.36% of the students reached the developing level (at least a score of 3) on the critical thinking section of the Critical Thinking in Patient Care: Rubric 88.5% of students reached the upper developing category or lower mastery level (between 4 and 5) on the critical thinking section of the Critical Thinking in Patient Care: Rubric 6.55% of students reached the upper mastery level (between 5.5 and 6) on the critical thinking section of the Critical Thinking in Patient Care: Rubric

#### M 4: Rubric for 4600 (O: 2, 3)
The Critical & Integrative Thinking Rubric is used to assess a critical thinking paper in the 4600 course. The rubric assesses students' ability to integrate research into practice and their ability to analyze existing leadership styles and evaluate their effectiveness. The rubric is constructed on a 6 point scale and utilizes the emerging, developing, and mastery terminology.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

**Target for O2: Integration from research to practice**

- 4600 is divided into two sections but they have the same assignment and utilize the same rubric. 4600 Section A & B: By the final paper 100% of the students will reach the developing level on the Critical and Integrative Thinking Rubric (at least a score of 3) on the rubric, 80% of the students will reach the upper mastery level on the Critical and Integrative Thinking Rubric (between 4 & 5) and 60% of the students will reach the upper mastery level between on the Critical and Integrative Thinking Rubric (5.5 and 6) for sections: 2, 3, 4, & 5 of the Critical and Integrative Thinking Rubric

#### Findings 2012-2013 - Target: Partially Met

Findings for 4600 Section-A:10. The findings are measured by the critical thinking sections (2, 3, 4, & 5) of the Critical & Integrative Thinking Rubric and tabulated numbers of students that fell into each category. 100% of the students reached the developing levels (at least a score of 3) on the rubric. 87% of the students reached the upper mastery level (between 4 & 5) on the rubric. 23% reached the upper mastery level between (5.5 and 6) on the rubric. Only three students came to my office for assistance after the first paper. There were several students that made minimal adjustments to their papers. Findings for 4600 Section-B: 100% of the students reached the developing level (at least a score of 3) on the critical thinking section of the Critical Thinking in Patient Care: Rubric. 98.55% of students reached the upper developing category or lower mastery level (between 4 and 5) on the critical thinking section of the Critical Thinking in Patient Care: Rubric. 50% of students reached the upper mastery level (between 5.5 and 6) on the critical thinking section of the Critical Thinking in Patient Care: Rubric.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
4600 Action Plan
Meet with the consultant prior to, during, and at the end of the course to assess grading technique and consistency of paper evaluation. Course Coordinator will provide examples of papers that the students will be able to view and in essence get a visual understanding of expectations. Course Coordinator will continue to encourage students to seek help from professor, consultant, and writing labs. Course Coordinator will have students sign a sign-in sheet to encourage and hold students accountable for taking advantage of the services the course coordinator and CTW consultant(s) offer inside and outside of the classroom setting.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Rubric for 4600 | Outcome/Objective: Analysis and Evaluation

Projected Completion Date: 05/2014
Responsible Person/Group: Course Coordinator

Action Plan 4600
Provide additional review of the assignment and rubric with students where greatest challenges occur.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Rubric for 4600 | Outcome/Objective: Integration from research to practice

Implementation Description: Ongoing review sessions will be set up
Responsible Person/Group: Course Coordinator

2080 Action Plan
The Professor will continue to review the assignment in class, provide an example paper, and hold classroom time for students to discuss the critiques to their paper. The CTW consultants will provide a time for students to come see them outside of class. Course Coordinator will have students sign a sign-in sheet to encourage and hold students accountable for taking advantage of the services the course coordinator and CTW consultant(s) offer inside and outside of the classroom setting.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Rubric for 2080 | Outcome/Objective: Critical Thinking

Projected Completion Date: 05/2014
Responsible Person/Group: The new CTW Ambassador is unknown at this time

4600 Action Plan
The Course Coordinator will continue to review the assignment in class, encourage students to seek out assistance from the professor and the CTW consultant and the writing lab. The Course Coordinator will provide an example of the paper for students to see content and visual expectations of the paper. The Course Coordinator will have students sign a sign-in sheet to encourage and hold students accountable for taking advantage of the services the course coordinator and CTW consultant(s) offer inside and outside of the classroom setting.

- | Integration from research to practice

Projected Completion Date: 05/2014
Responsible Person/Group: Course Coordinator

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
A major accomplishment in our program is that the level of critical thinking improves from entry to exit level. Last year we specified the importance of consistency within each course to ensure the data we compare from entry to exit level is the most accurate.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
A higher percentage of nursing students are in the mastery level of the rubric upon exiting the curriculum than entering the curriculum.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
The CTW program in nursing struggles with competing with the clinical aspect of nursing. Trying to relay to the students that critical thinking can be developed through writing and assist the students with implementing tactile skills has been difficult. Students do not appear to put the same value on the writing aspect of critical thinking as they do the hands-on clinical skills. Students taking advantage of the services the professors and consultants offer regarding the CTW assignments has been problematic. Some students do not make this assignment a priority. Maybe we can involve someone from the Center of Instructional Innovation to speak with the students about the importance of critical thinking through writing. This may provide another perspective for the students.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your
academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

A major change that occurred within a CTW course (2080) was that the professors changed in the middle of the academic year. The professor did schedule meetings with the oncoming professor to discuss the CTW assignment; however, this change may have affected the data collected from the fall 2012 semester to the spring 2013 semester.

Georgia State University
Assessment Data by Section
2012-2013 CTW Nutrition
As of 12/13/2016 05:59 PM 03:37
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The Division of Nutrition defines critical thinking as the ability to identify a nutrition or dietetics-related question and to select, critique, analyze, synthesize and communicate information that address the question. To function effectively as future nutrition and dietetic professionals, dietetic students must be able to access and accurately interpret the scientific literature and make practice-related decisions based on strength of evidence and evidence-based guidelines.

Goals
G 1: Interpretation
Students will demonstrate the ability to translate information from the nutrition literature without altering the intended meaning.

G 2: Analysis
Students will demonstrate the ability to access and accurately analyze the scientific literature and make practice-related decisions based on strength of evidence and evidence-based guidelines.

G 3: Evaluation
Students will be able to integrate ideas, context, assumptions, and evidence when reaching conclusions.

Student Learning Outcomes/Objectives
SLO 1: Interpretation (M: 2, 3)
Assignments: Research Paper (NUTR 3010) and Review (NUTR 4950) For NUTR 3010, students are expected to search the literature, and identify evidenc-based articles for their nutrition research paper. These articles are the foundation of their research paper. The students demonstrate their ability to identify and understand the authors' interpretation of the research interpretations and provide their independent interpretations. As the students advance through the program, they should strengthen these skills, and in NUTR 4950, their papers should reflect their ability to interpret research articles.

SLO 2: Analysis (M: 1, 2, 3)
Assignments: Research Paper (NUTR 3010) and Review or Position Paper (NUTR 4950) For NUTR 3010, students are expected to distinguish causality from correlation, analyze evidence and question its accuracy, and to determine relevance and completeness. As the students advance through the program, they should strengthen their critical thinking skills. In NUTR 4950, papers should reflect their ability to synthesize the evidence and provide analytical discussions of the study results. The papers should be discursive prose not a listing of research studies. Analysis of articles should be a review that demonstrates sophisticated and integrated thought.

Measures, Targets, and Findings
M 1: Annotated Bibliography (O: 2)
Grading Rubric for Annotations Identifies and summarizes the scope and main purpose Limited proficiency 0 -1 Some proficiency 2 Proficiency 3 High proficiency 4 Fails to identify the main purpose of the articles Does not address the argument, and fails to differentiate the established position and own views Identifies the main purpose of the articles but summarizes it in an ambiguous fashion Addresses the argument but simplistically, and only basically differentiates position from own view Successfully identifies and summarizes the main purpose of the articles in a clear manner Presents own position or hypothesis, though inconsistent with differentiation/comparison The main purpose of the articles is summarized in a succinct manner; along with identifying other peripheral issues and their impact Appropriately addresses the argument and differentiates/compares established position and own view Points:

- Presents and analyzes the major findings by using supportive evidence Limited proficiency 0 -1 Some proficiency 2 Proficiency 3 High proficiency 4 Dismisses evidence without adequate justification Confuses cause and correlation Treats the findings as absolute Does not identify any biases or does so superficially Use of evidence is appropriate Able to distinguish between cause and correlation at a minimal level Explores findings in a limited context Is able to recognize bias in sampling and results and any conflict of interest; but reports them in a routine manner Examines evidence and its source Distinguishes between cause and correlation Explores findings in the context of the real world Is able to differentiate fact from opinion and addresses bias in a thoughtful manner Examines evidence and its source; questions its relevance and accuracy Able to distinguish causality from correlation by providing evidence Major findings are presented in the context of subordination and impact Identifies the different types of biases Offers explanation of how to overcome bias Points:

- Evaluation includes and assesses conclusions, implications and consequences Limited proficiency 0 -1 Some proficiency 2 Proficiency 3 High proficiency 4 Evaluation/conclusion is simplistic Does not raise any additional questions Does not adopt a clear idea. Does not question Assesses conclusion appropriately and begins to see a connection between conclusions and implications Adopts limited ideas with little questioning. Does not integrate ideas Consider context, assumptions and evidence in reaching conclusions Asserts
own conclusions by providing evidence. Ideas are integrated, but in a rudimentary manner. Questions Implications are clearly developed and consider ambiguity. Clear integration of conclusions and implications. Fully integrates ideas and positions and clearly justifies viewpoints.

Failures include omission or inclusion of key points.  

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Target for O2: Analysis**

We expect 85% of the students to receive at least 2 on the Introduction section of the Rubric.

**Target for O1: Interpretation**

We expect 85% of the students to receive at least 2 on the Content/Body of Paper section of the Rubric.

**Target for O2: Analysis**

We expect 85% of the students to receive at least 2 on the Content/Body of Paper section of the Rubric.

**M 3: Measure of Progress from NUTR 3010 to NUTR 4950 (O: 1, 2)**

The rubric scores for the review paper for each student in NUTR 4950 are compared to their rubric scores for the research paper completed in NUTR 3010. Both rubrics use the same criteria for evaluation (Introduction, Content/Body of Paper, and Conclusion). The rating scale levels for the rubric for NUTR 4950 are Developing (1 point), Developing (2 points), and Goal Oriented (3 points). The descriptions for the criteria under Developing and Goal-Oriented are the same for both rubrics. Rubrics are located in Document Management.

Source of Evidence: Academic direct measure of learning - other

**Target for O1: Interpretation**

One-hundred percent (100%) of students receiving "Emerging" scores in the Introduction section of the rubric in NUTR 3010 progress to Developing or Goal-Oriented levels in NUTR 4950. Seventy-five percent (75%) of students in NUTR 4950 move up one level in the Introduction section of the rubric from their level on the NUTR 3010 rubric.

**Findings 2012-2013 - Target: Met**

Eighty percent (80%) of students in NUTR 4950 move up one level in the Introduction section of the rubric from their level on the NUTR 3010 rubric.

**Target for O2: Analysis**

One-hundred percent (100%) of students receiving "Emerging" scores in the Introduction section of the rubric in NUTR 3010 progress to Developing or Goal-Oriented levels in NUTR 4950. Seventy-five percent (75%) of students in NUTR 4950 move up one level in the Introduction section of the rubric from their level on the NUTR 3010 rubric.

**Findings 2012-2013 - Target: Met**

Eighty percent (80%) of students in NUTR 4950 move up one level in the Content/Body of Paper section of the rubric from their level on the NUTR 3010 rubric.

**Target for O1: Interpretation**

One-hundred percent (100%) of students receiving "Emerging" scores in the Body of Paper section of the rubric in NUTR 4950 are Developing (1 point), Developing (2 points), and Goal Oriented (3 points). The rating scale levels for the rubric for NUTR 4950 are Developing (1 point), Developing (2 points), and Mastery (3 points). The descriptions for the criteria under Developing and Goal-Oriented are the same for both rubrics. Rubrics are located in Document Management.

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Target for O2: Analysis**

The descriptions for the criteria under Developing and Goal-Oriented are the same for both rubrics. Rubrics are located in Document Management.

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Revision of Rubrics for Grading Papers**

The rubric for NUTR 4950 was revised to better evaluate student progress in CFW from the introductory course (NUTR 3010) to the capstone course (NUTR 4950). The grading rubric for 3010 has 3 levels of performance: Emerging, Developing, and Goal Oriented. The rubric scores for the review paper for each student in NUTR 4950 are compared to their rubric scores for the research paper completed in NUTR 3010. Both rubrics use the same criteria for evaluation (Introduction, Content/Body of Paper, and Conclusion). The rating scale levels for the rubric for NUTR 4950 are Developing (1 point), Developing (2 points), and Goal Oriented (3 points). The descriptions for the criteria under Developing and Goal-Oriented are the same for both rubrics. Rubrics are located in Document Management.

Source of Evidence: Written assignment(s), usually scored by a rubric.
The rubric for NUTR 4950 was changed to include performance levels: Developing, Goal-Oriented, and Mastery. Each student’s performance in NUTR 4950 (paper) is compared to his/her performance in NUTR 3010 (mini-review paper). Students are expected that will improve their performance level in NUTR 4950 from NUTR 3010 (e.g. Developing to Goal Oriented or Goal Oriented to Mastery).

**Established in Cycle:** 2010-2011  
**Implementation Status:** Finished  
**Priority:** High  
**Implementation Description:** Rubric revised August 2010 and implemented Spring semester 2011.  
**Projected Completion Date:** 08/2010  
**Responsible Person/Group:** Instructors for NUTR 3010 and NUTR 4950.

### CTW and Curriculum

Goal is to incorporate CTW strategies into other courses in the major. Currently, the first CTW course is taken the first semester in the undergraduate didactic program in dietetics (DPD) and the second course is taken during the final semester. Since the program is 4 semesters, we plan to include CTW strategies in one course the second semester and another course the third semester. Both of these courses have a heavy writing component. We (current CTW instructors and other faculty) are developing a tool to guide the instructors of the courses.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Finished  
**Priority:** High  
**Implementation Description:** NUTR 4300 (juniors) and NUTR 4400 (seniors) are the courses where the CTW strategies will be implemented. Faculty are meeting monthly to establish learning activities and evaluations tools for implementation Spring 2013.  
**Projected Completion Date:** 01/2013  
**Responsible Person/Group:** CTW instructors and faculty who teach NUTR 4300 and NUTR 4400.

### Analysis Questions and Analysis Answers

#### CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Faculty continue to discuss how to incorporate critical thinking assignments at all levels of the curriculum. Faculty continue to use the “guiding principles” documents for rubrics. Faculty continue to identify evaluation tools that allow students to see the connections between course content and assignment evaluations.

#### CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

We are able to evaluate how students progress from the entry CTW course to the capstone course. Many students progress to the goal-oriented level; some attain some components of the mastery level. More students reach the mastery level this year. This may be related to two factors: 1) faculty doing a better job with incorporating critical thinking assignments in the the courses between the entry and exit courses; 2) the type of student (higher academic achiever) accepted in the program.

#### CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We will continue to improve our rubrics and assignments. Faculty buy in and involvement has improved and those who do not teach CTW courses are more engaged in the process.

#### CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

The CTW courses help the students improve their writing and critical thinking skills. End of year program evaluations reflect this sentiment. Division faculty support CTW and continue to incorporate CTW principles a variety of courses in the curriculum.

### Academic Program Questions

1. **ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

   Two measures with corresponding targets were added. These measures better reflect what we are evaluating in our students. In addition, these measures are part of our program assessment for accreditation.

2. **ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

   Targets were met, and a greater percentage of students progressed to a higher performance level.

### Annual Report Section Responses

**Challenges for Next Year**—Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department’s outcomes.

The faculty member who has taught NUTR 3010 for the past 6 years departed at the end of the 2012-2013 academic year. Interpretation and grading of course rubric may be affected.

**Modifications in Measurement Methods**—If you modified any of the measures or methods you use in the measurement process, please note those here.

Two measurements were added for SLO Interpretation and SLO Analysis: 1) Review Paper NUTR 4950 and 2) Measure of Progress from NUTR 3010 to NUTR 4950.
**Student Learning Outcomes/Objectives**

**SLO 1: Executive Summary (G: 1) (M: 1)**

Students will decide on a service company concept, value discipline, target market and develop an "Executive Summary". This component of the eight page paper consist of two pages, states the value discipline, service concept and target market and acts as

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW Operations Management**

As of: 12/12/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

**Mission / Purpose**

Managerial Sciences adapts 1987 definition of the National Council on Excellence in Critical Thinking for the Department's different foci: Critical thinking is an intellectually disciplined process that has three main components. First is skillfully and broadly gathering or generating data. Second is analyzing, synthesizing, and/or evaluating the information in that data through the use of systematic, logical reasoning processes and the applications of relevant decision assisting tools (process analysis/ mapping). And third is the ability to reach conclusions and make recommendations for action that are logical, supported by evidence, and devoid of pre-existing individual bias or preference. Operations Managers should be able to use rational problem solving techniques and be able to express in a cogent manner what the problem is, set criteria for evaluation of potential solutions, establish alternatives to the problem and analytically evaluate the alternatives based on the established criteria.

**Goals**

**G 1: Business Plan Vision**

We expect our students to demonstrate their ability to organize, develop and advance a service operation business plan vision for a start-up business using critical thinking through writing at a business level, as opposed to an academic level. The writing exercise is a eight page paper with diagnostic tools used in the analysis as attachments.

**Student Learning Outcomes/Objectives**

**SLO 1: Executive Summary (G: 1) (M: 1)**

Students will decide on a service company concept, value discipline, target market and develop an "Executive Summary". This component of the eight page paper consist of two pages, states the value discipline, service concept and target market and acts as
the guide for the development of the balance of the paper.

**SLO 2: Execution of First Draft - Business Plan (G: 1) (M: 1)**

Contains portions of all 8 sections of the Business Plan. The Business Plan is scored based on the Syllabus Rubric and how well the student developed the eight sections of the paper with regard to appropriate facts and details, competency and sophistication.

**SLO 3: Development of Final Paper (Business Plan) (G: 1) (M: 1)**

Students will complete the eight point suggested Business Plan for the Final Paper. The final paper contains the completed Executive Summary, as well, a discussion of the other seven components of the paper. The Business Plan is scored based on the Syllabus Rubric and how well the student developed the eight sections of the paper with regard to appropriate facts and details, competency and sophistication. Additional language dealing with the "Process Analysis" was added to the CTW Business Plan to ensure a discussion of what the process chosen for the paper was attempting to achieve. The results of the discussion component added in 2012 and continued in 2013, reflects a better understanding of the "Process Analysis" by the students.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Measures, Targets, and Findings**

**M 1: Rubric for Service Operations Management (O: 1, 2, 3)**

This syllabus rubric is designed for the benefit of the student as a guide for the development of the CTW Final Paper with respect to relevant details, context, content, grammar, competency and sophistication. Students understand that the rubric scoring is an indication of how their service concept is developing over the course of the semester.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Executive Summary**

60% of student population will score in a range of "2" or better out of a "4" point rubric. This scoring is based on the four categories of the rubric.

**Findings 2012-2013 - Target: Met**

The average score for the target was 2.00. Of the 24 students who fulfilled the assignment, 16 scored a "2" or better which is 66%.

**Target for O2: Execution of First Draft - Business Plan**

80% of student population will score in a "2 or better out of a "4" on the rubric. This scoring is based on the four categories of the syllabus rubric.

**Findings 2012-2013 - Target: Met**

The average for the 1st draft exercise was 2.50. For this assessment measurement, 22 out of 24 or 92% scored a "2" or better. 12 out of the 24 scored a "3" or better, representing a 52% of the population. There were 2 students who scored a "4", the highest rubric score representing 8% of the class.

**Target for O3: Development of Final Paper (Business Plan)**

80% of student population will score a "3" or better out of a "4" on the rubric. Additionally, 50% will score a "4" out of a "4". The final paper scoring will use these two criteria to measure success on the CTW experience in this course. This scoring is based on the four categories of the syllabus rubric. (Target of 20% of students scoring a "4" out of a "4" is being changed to 50% as a result of better scoring against the rubric for this period 2012-2013.)

**Findings 2012-2013 - Target: Met**

The average for the Final Business Plan based on the 4 point rubric was a 3.50. 88% of the students who participated in the final business plan, scored a "3" or better. Interesting that this was the same percentage as the results recorded for 2011-2012 time period. This was 8 percentage points above the goal. Secondarily, 15 students scored a "4" on the final business plan or 63% of the participating students. This was a significant achievement as it was 43 percentage points above the 20% target.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Executive Summary**

Ensure that the service company selected is practical and will be appropriate for the Service Company vision. Adding additional language to Section 8 of the business plan to include a discussion of the process analysis. Todate, students have not included a discussion on what the process is attempting to achieve, nor the cycle time analysis.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Rubric for Service Operations Management | Outcome/Objective: Executive Summary

**CTW Business Plan**

On-going review of the Service Management, CTW Business Plan for MGS 4770 to ensure students understand the key components of the paper and instructions for developing the paper are clear and concise.
Mission / Purpose

Philosophy has traditionally had a central role in the liberal arts. The writings of Aristotle, Descartes, Hume, and Kant are among the greatest products of the human mind. They are worth studying for their inherent value as well as for their impact on subsequent intellectual history. Much philosophical work is concerned with abstract and fundamental questions: What is real? Can we know anything about the external world? Are there objective moral truths? Is there a God? Although some of these issues are unlikely to have practical consequences, they are no less important. In fact, it is difficult to conceive of an educated person who has not systematically grappled with these questions. At the same time, philosophy is deeply involved with practical issues, such as the nature of the good life and what constitutes a just society. In the last two decades there has been an explosion of activity in applied philosophy with the result that philosophers now work in numerous cross-disciplinary fields such as business ethics, medical ethics, philosophy of law, philosophy of science, philosophy of language and philosophy of mind. Despite its wide range of applications, philosophy as currently practiced in this country has one overarching theme: it is fundamentally concerned with good reasoning. Clearly, critical thinking and writing are central here. In philosophy, critical thinking is the skill of correctly evaluating the arguments made by others and composing good arguments of one’s own. We do this in writing and in conversation and our mission is to help students develop this skill.

Goals

G 1: Critical Thinking

Despite its wide range of applications, philosophy is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, the systematic study of what distinguishes good arguments from bad is central to the philosophical enterprise. Consequently, those who teach philosophy are as much concerned with fostering critical thinking skills and clear argumentative writing as with imparting information. We believe our major should and does do both. This first goal is, therefore, to foster critical thinking amongst our CTW students.

G 2: Writing Skills

Despite its wide range of applications, philosophy is fundamentally concerned with good reasoning. Although philosophers by no means have a monopoly on logical argumentation, the systematic study of what distinguishes good arguments from bad is central to the philosophical enterprise. Of course, especially in the contemporary world, much of this reasoning is distributed in written form, whether in books, journals, or in some digital media. Consequently, those who teach philosophy are as much concerned with fostering critical thinking skills and clear argumentative writing as with imparting information. We believe our major should and does do both. This goal, therefore, is to foster good writing skills amongst our CTW students.
Student Learning Outcomes/Objectives

SLO 1: Critical Thinking (G: 1) (M: 1)

Students in Phil 3000 and Phil 4990 write papers as part of the requirements for the course. These typically account for at least 30% of the course grade. The final papers of the semester, in particular, are likely to be a substantial portion of their grade. Students are allowed and encouraged to rewrite these papers in order to improve their critical thinking and writing skills. The instructors give detailed written feedback on the papers in order to facilitate such improvement. We assess this outcome by having our Assessment committee evaluate the final papers, scoring them for critical thinking ability. This is associated with our first goal.

Other Outcomes/Objectives

O/O 2: Writing Skills (G: 2) (M: 2)

Students in Phil 3000 and Phil 4990 write papers as part of the requirements for the course. These typically account for at least 30% of the course grade. The final papers of the semester, in particular, are likely to be a substantial portion of their grade. Students are allowed and encouraged to rewrite these papers in order to improve their critical thinking and writing skills. The instructors give detailed written feedback on the papers in order to facilitate such improvement. We assess this outcome by having our Assessment committee evaluate the final papers, scoring them for writing ability. This is associated with our second goal.

Measures, Targets, and Findings

M 1: Critical Thinking (O: 1)

Three members of the Assessment Committee score student's final papers on critical thinking. These scores are given on the A-F scales with +/- using the rubric attached. These scores are not student grades (neither grades on particular assignments nor semester grades). The scores use the same scale as course grades in order to enhance inter-grader reliability. We expect to see lower scores in Phil 3000 than in Phil 4900 as those in 3000 will be in the beginning of their philosophy studies (and again, these are not student grades). We can compare the scores merited in Phil 4900 to those merited in Phil 3000 to assess how well the Department is teaching Critical Thinking and Writing.

Source of Evidence: Academic direct measure of learning - other

Target for O1: Critical Thinking

Papers of 3000 students should, on average, be evaluated as 2.25 in critical thinking; those of 4990 students should be at 2.50.

Findings 2012-2013 - Target: Met

In this 2012-2013 cycle, the average 3000 student's critical thinking skills were assessed a 2.38 and the average 4990 student's critical thinking skills were assessed a 2.88. In both cases, then, we are exceeding our targets. It also noticeable that the scores here indicate a nice improvement, as one would expect, from a mid-level philosophy major to a senior philosophy major.

M 2: Writing Skills (O: 2)

Three members of the Assessment Committee score student's final papers on writing skills. These scores are given on the A-F scales with +/- using the rubric attached. These scores are not student grades (neither grades on particular assignments nor semester grades). The scores use the same scale as course grades in order to enhance inter-grader reliability. We expect to see lower scores in Phil 3000 than in Phil 4900 as those in 3000 will be in the beginning of their philosophy studies (and again, these are not student grades). We can compare the scores merited in Phil 4900 to those merited in Phil 3000 to assess how well the Department is teaching Writing.

Source of Evidence: Academic direct measure of learning - other

Target for O2: Writing Skills

Papers of 3000 students should, on average, be evaluated as 2.25 in writing; those of 4990 students should be at 2.5.

Findings 2012-2013 - Target: Met

In this 2012-2013 cycle, the average 3000 student's writing skills were assessed a 2.39 and the average 4990 student's writing skills were assessed a 2.93. In both cases, then, we are exceeding our targets. It also noticeable that the scores here indicate a nice improvement, as one would expect, from a mid-level philosophy major to a senior philosophy major.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Monitor, Discuss, Refine

The Department will continue to monitor the progress of the program. As teaching students to use critical thinking skills in writing is already central to the philosophy curriculum, we don't anticipate problems, but if we are not happy with the progress of the students, we will make changes as necessary. The Department is and has long been committed to responding to empirical evidence regarding teaching methods.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High
Implementation Description: We will continue to discuss the program as needed.
Responsible Persons/Groups: Andrew Jason Cohen
Additional Resources: none

New rating system proposal

Assessment Coordinator has proposed to the Department that we replace the current scale used in assessment with the following:
**Proposed Assessment Scoring Scale**

<table>
<thead>
<tr>
<th>Due</th>
<th>4990 Assignments between 7 and 10 with a target of 7.25, the 1010 Assignments to be scored between 1 and 4 with a target of 3.25, the 2010 Assignments to be scored between 3 and 6 with a target of 5.25, the 3000 Assignments between 5 and 8 with a target of 7.25, the 4990 Assignments at 7 and 10 with a target of 9.25, and the MAs between 11 and 14 with a target of 13.25. This proposal was discussed extensively at the Department’s February 2013 meeting (2/8/2013) and after some debate regarding having too many categories, was accepted as is. We realize that its implementation will cause a discontinuity with previous years’ data, but we expect that the increase in accuracy warrants the change.</th>
<th>High</th>
</tr>
</thead>
</table>

- We've added classes, removed classes, improved classes, always making use of all available data, including that derived from the assessment process.

- We've added Phil 3000 and Phil 4990, but CTW essentially is what Philosophers do.

- More years of data needed.

- Our CTW classes are fully operational and appear successful.

**Analysis Questions and Analysis Answers**

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

Our CTW classes are fully operational and appear successful.

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

More years of data needed.

**CTW Reflection 3:** Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We can always benefit from more WAC consultants.

**CTW Reflection 4:** Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

We've added classes, removed classes, improved classes, always making use of all available data, including that derived from the assessment process.

**Academic Program Question 1:**

What changes in the assessment process has your degree program made since last year’s assessment report? (e.g., revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We have now--starting in 2013-2014--a new scoring method.

**Academic Program Question 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year’s assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

We've added classes, removed classes, improved classes, always making use of all available data, including that derived from the assessment process.

**Goals**

- Prospective students majoring in Physics should be able to discern in a given class and/or over time from the entry level to the exit class.

**Mission / Purpose**

The Department of Physics & Astronomy prepares students in the B.S. in Physics program for a wide variety of career paths including scientific research, high technology commercial, military, and education. In all these paths, physics majors are expected to exhibit scientific critical thinking and to be able to communicate in writing using appropriate formats. The department incorporates these expectations in its definition of critical thinking which follows the basic scientific method:

- **a. Students develop research questions appropriate for research.**
- **b. Students appropriately collect experimental or theoretical data to address identified research questions.**
- **c. Students analyze and interpret data to evaluate research questions.**
- **d. Students use results of data analysis to formulate new research questions.**
- **e. Students choose appropriate ways to communicate information in words, graphs, and figures.**
- **f. Students communicate correct kinds of information in each section of scientific report.**
- **g. Students understand and reflect an understanding of the appropriate audience.**
**G 1: Scientific Thinking**
Students will follow the scientific process in developing and testing hypotheses, drawing conclusions, and formulating future research questions.

**G 2: Scientific Writing**
Students make appropriate decisions to communicate scientific information effectively in the accepted format. This includes the particular requirements of scientific publications such as journals. In particular, students will decide when the most effective way to communicate technical or quantitative information involves words, graphs, table, or figures.

### Student Learning Outcomes/Objectives

**SLO 1: Laboratory Experiment Reports (G: 1, 2) (M: 1)**
In Phys3300, Advanced Physics Laboratory, students write reports for three laboratory experiments. These reports follow the standard format of scientific journal articles and include a title, abstract, background, experimental methods, results, discussion, conclusion, and foot-noted references. Unlimited revisions are allowed until the end of the semester. Students are encouraged to revise one report multiple times in order to learn the scientific writing skills before working on the remaining reports.

**SLO 2: Research Project Report (G: 1, 2) (M: 2)**
In Phys4900, Research project, students write a long-form report for their research project. The report is written in sections over the course of the semester as their project proceeds. This report follows the standard format of scientific journal articles and include a title, abstract, background, experimental methods, results, discussion, conclusion, and foot-noted references. Unlimited revisions are allowed for each section until the end of the semester.

### Measures, Targets, and Findings

**M 1: Phys3300 Physics Rubric (O: 1)**
The rubric used to evaluate laboratory reports is linked. It contains four elements of critical thinking and three elements of scientific writing skills necessary to write a high-quality report. Each element is evaluated on a four point scale indicating mastery, competency, developing competency, or lack of competency.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Laboratory Experiment Reports**
Students in Phys3300 write three lab reports. They are encouraged to revise the report for their first lab until it is scoring high marks in each area before writing their remaining two reports. Our first target is that at least 80% of students in Phys3300 will achieve 3 out of 4 (competency) on each criterion of the rubric for their first laboratory report after all revisions are completed. In addition, at least 50% of the final evaluations will be 4 out 4 (mastery) for each criterion.

**Findings 2012-2013 - Target: Not Reported This Cycle**
In Fall 2012, 23 physics majors took Phys3300, Advanced Physics Laboratory. Each student in this course performed a number of advanced labs and wrote laboratory reports in the style of journal articles appropriate to physics research publications. Students were given comments and allowed to revise these reports before the final product for which they were graded. The laboratory reports were to be assessed using the Physics Rubric. At this time the assessment data has not been provided to the ambassador.

**M 2: Phys4900 Physics Rubric (O: 2)**
The rubric used to evaluate project reports is linked. It contains four elements of critical thinking and three elements of scientific writing skills necessary to write a high-quality report. Each element is evaluated on a four point scale indicating mastery, competency, developing competency, or lack of competency.

Source of Evidence: Senior thesis or culminating major project

**Target for O2: Research Project Report**
At least 80% of students will achieve 3 out of 4 (competency) on each criterion of the rubric after all revisions are completed. At least 50% of the final evaluations will be 4 out 4 (mastery) for each criterion.

**Findings 2012-2013 - Target: Partially Met**
In Spring 2013 a total of twelve students registered for Phys4900, Research Project. One student stopped attending and failed the course while two other students received grades of incomplete. Nine students completed and passed the course with high marks. Each of these students performed a research project with an existing research group in the department of physics & astronomy. Each student wrote a research proposal in the first two weeks of the term and received comments from the course coordinator and two fellow students. This research proposal then served as the starting point for a long research report in the appropriate style for scientific journals. The research report was written consecutively in sections: introduction, methods, results, discussion, abstract, and conclusion. Each section was shared and the student received feedback from the course coordinator and two other students. Final evaluations of all five students based on the completed long research report were completed by the course coordinator using the physics rubric. All nine students scored 3 (competency) or 4 (mastery) in all seven criteria in the final assessment with 30 out of 63 scores rated as 4 and the remaining 33 scores being 3. In comparison with our targets, 100% of students achieved at least 3 (competency) on each criterion in the rubric and 48% of the scores were 4 (mastery). The average score on each of the criteria in the rubric were: A. Develop research questions - 3.2 B. Collect appropriate data - 3.4 C. Analyze and interpret data - 3.6 D. Formulate new questions - 3.6 E. Appropriate communication - 3.2 F. Scientific writing - 3.6 G. Appropriate audience - 3.6.

### Details of Action Plans for This Cycle (by Established cycle, then alpha)
Adapt course to allow for higher enrollments
The BS in Physics is undergoing a much-desired increase in enrollments after sustained efforts by the department over the last few years. This has brought about growing pains for the Advanced Laboratory CTW course (Phys3300). As many as 20 students may be enrolled in this course in the Fall of 2011 after previous two years' enrollments of 9 and 15. Since this is an advanced laboratory course, space and equipment limitations have created the need for changes in the course. The probable solution will be to divide the students into two sections. There are two instructors for this course who teach different aspects of the instruction. Dividing into two sections will mean that both instructors will be teaching at all times with one section in the lab with instructor A while the other section is in the computer lab with instructor B. This should allow the instructors to give individuals and small groups the attention needed. The additional work load associated with lab reports may require some reduction in the number of lab reports scored and for which feedback is given. Possibly the number will be reduced from the 5 reports submitted in Fall 2010 back to the 3 reports submitted in Fall 2009. It was observed that the increased number of lab reports assigned in 2010 meant that the students performed fewer revisions on each report than in 2009 but about the same number of written reports overall. In Fall 2011 there were 20 students who took Phys3300, Advanced Physics Lab, which was difficult to handle. Additional computers were provided by the College of Arts & Sciences and by the Department of Physics & Astronomy to allow 20 students to be accommodated in one class. Enrollments for Fall 2012 may exceed 20 and so the class will be offered with two sections taught at the same time each meeting Mondays and Wednesdays from 2 to 4:30 PM. If total enrollment of the two sections exceeds 20, then the class will be divided in half with one group performing labs on Mondays with instructor 1 and performing computer and data analysis on Wednesdays with instructor 2. The other half of the class will do the reverse, requiring each of the two instructors to teach twice as much.

Train new instructor in CTW
In Fall 2011 a new instructor will co-teach this course and take over the evaluation of writing assignments. This instructor will be trained through one-on-one meetings with the CTW ambassador in Summer 2011 and throughout the Fall 2011 term. One on one training was performed to prepare new instructor for teaching of critical thinking and assessing using the physics rubric. Additional training will continue when course is taught again in Fall 2012.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
The major achievement for this cycle is successfully accommodating increased enrollments in the Advanced Physics Lab and the Research Project classes. The larger enrollments in the lab course were accommodated by dividing the class into two halves as we proposed in our action plan from last year.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Due to the lack of data in recent semesters from the entry class (Advanced Physics Lab), there is no way to determine the improvement in critical thinking. It has been observed that the performance of the students on the CTW assessment in the exit class was lower this year than last year. It was observed that some of the elements initially established in the entry class to develop critical thinking and writing skills were no longer being taught consistently. In the coming year, a new instructor in the entry class will bring back intentional instruction on critical thinking and writing into the Advanced Physics Lab.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
The Advanced Physics Lab needs some improvements. Elements of the original course design that explicitly taught critical thinking skills and writing were not being used. Correspondingly, the performance of students in the exit course CTW assessments was on the decline. These elements will be returned to the entrance CTW course along with redesign of space and experiments to improve critical thinking development.

New lab room and experiments in Phys3300
To accommodate growing enrollments the department is creating a dedicated room of larger capacity for upper division labs including the Advanced Physics Lab. The department has also purchased equipment to add more sophisticated, modern experiments which will require higher critical thinking skills.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
The major achievement for this cycle is successfully accommodating increased enrollments in the Advanced Physics Lab and the Research Project classes. The larger enrollments in the lab course were accommodated by dividing the class into two halves as we proposed in our action plan from last year.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Due to the lack of data in recent semesters from the entry class (Advanced Physics Lab), there is no way to determine the improvement in critical thinking. It has been observed that the performance of the students on the CTW assessment in the exit class was lower this year than last year. It was observed that some of the elements initially established in the entry class to develop critical thinking and writing skills were no longer being taught consistently. In the coming year, a new instructor in the entry class will bring back intentional instruction on critical thinking and writing into the Advanced Physics Lab.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
The Advanced Physics Lab needs some improvements. Elements of the original course design that explicitly taught critical thinking skills and writing were not being used. Correspondingly, the performance of students in the exit course CTW assessments was on the decline. These elements will be returned to the entrance CTW course along with redesign of space and experiments to improve critical thinking development.
CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

The largest impact is on the attitude of the students as they embrace the thinking and writing skills. They increasingly see these skills as part of what it means to be a professional in this field and are anxious to master these skills. There are some indications that the faculty are seeing a difference in the students doing research projects with them and more students are completing research that is close to publication quality. The only change made this last year was to accommodate more students in these courses. In the coming year a new instructor for the first CTW course will bring back some of the originally used intentional instruction in critical thinking and writing into the first CTW course.

Georgia State University
Assessment Data by Section
2012-2013 CTW Political Science
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Department endorses the definition of Critical Thinking proposed to the Faculty Senate. Political Science courses will be designed to train students to “develop the wide range of cognitive skills and intellectual dispositions needed to effectively identify, analyze, and evaluate arguments and truth claims; to discover and overcome personal prejudices; to formulate and present convincing reasons in support of conclusions; and to make reasonable, intelligent decisions about what to believe and what to do.” The political science CTW courses will be designed to develop and practice the following specific critical thinking skills - identification of a question or issue, consideration of assumptions and/or context, formulation of a testable hypothesis, collection and presentation of facts/data, analysis of facts/data, integration and synthesis of other perspectives and presentation of conclusions.

Goals
G 1: Identifying the Issue
Students will be able to identify a question or issue to investigate

G 2: Consideration of assumptions and context
Students will be able to consider assumptions and/or context of the issue

G 3: Formulation of testable hypothesis or thesis
Students will be able to formulate a testable hypothesis or clear and compelling thesis

G 4: Collection and presentation of data
Students will be able to collect, organize and present of facts/data

G 5: Analysis of Data
Students will be able to analyse facts/data

G 6: Integration of perspectives
Students will be able to integrate and synthesize of other perspectives

G 7: Presentation of Conclusions
Students will be able to effectively present conclusions of their research

Outcomes/Objectives
O/O 1: Effective Formulation of Research Question (G: 1, 2, 3) (M: 1, 2)
Students will demonstrate through a paper or oral presentation the effective formulation of a research question. The central question, embedded and subsidiary issues, as well as relationships needed for effective analysis will be clearly identified, underlying assumptions will be identified and analyzed, and a clearly stated and testable hypothesis with a clear understanding of its drawback developed

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

O/O 2: Effective collection and use of data (G: 4, 5) (M: 1, 2)
Students will demonstrate effective collection and use of data through a paper in which they will identify most relevant facts, show evidence of search, selections and source evaluation and using appropriate methodology subject the data to complete analysis including an examination of possible shortcomings of the data

Standard Associations
1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

O/O 3: Effective Communication of results (G: 6, 7) (M: 1, 2)
Students will demonstrate effective communication through a paper and/or oral presentation of conclusions of research by providing clearly stated conclusions with examination of implications or consequences of conclusions. Students will also integrate other perspectives thoughtfully and respectfully.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Measures, Targets, and Findings**

**M 1: Rubric for Political Science 3800 (O: 1, 2, 3)**

In Political Science 3800, we used a rubric which measured the following CT skills (see Rubric): 1. Identification of research question 2. Formulation of a Testable Hypothesis 3. Analysis of facts/data 4. Presentation of Conclusions Student achievement was scored on a three level scale - Absent (0), Developing (1), Competent (2) - on each of the four CT skills above. For descriptions of each level of scoring see rubric POLS 3800.

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Target for O1: Effective Formulation of Research Question**

We expect that 80% of our students score a 1 or better out of 2 on the hypothesis portion of the rubric.

**Findings 2012-2013 - Target: Met**

241 students completed POLS 3800 in the Fall and Spring Semesters of 2012-2013. 10 sections of the course were taught during the period. Two assessment scores were used to assess outcomes for this objective. On the Identification of Research Question assignment 61.1% of our students scored a 2 (competent), 30.2% scored a 1(Developing) 8.5% scored a 0 (Absent). On the Formulation of Testable Hypothesis assignment 64.6% of our students scored a 2 (Competent), 32.3% scored a 1(Developing) 2.8% scored a 0 (Absent). Percentage figures are rounded off. Data from all sections were not available at time of report.

**Target for O2: Effective collection and use of data**

We expect that 80% of our students score a 1 or better out of 2 on the analysis portion of the rubric.

**Findings 2012-2013 - Target: Met**

On the Analysis of Data/Facts assignment 56.2% of our students scored a 2 (competent), 37.5% scored a 1(Developing) 5.8% scored a 0 (Absent). Percentage figures are rounded off.

**Target for O3: Effective Communication of results**

We expect that 80% of our students score a 1 or better out of 2 on the presentation portion of the rubric.

**Findings 2012-2013 - Target: Met**

On the Effective Presentation of Conclusions Skill 62.6% of our students scored 2 (Competent), 36.0% scored 1 (Developing) and 2.1% scored 0 (Absent).

**M 2: Rubric for Political Science 4900 (O: 1, 2, 3)**

In Political Science 4900, we used a rubric which measured the following CT skills (see Rubric): 1. Identification of research question 2. Consideration of assumptions and/or context 3. Formulation of a Testable Hypothesis 4. Collection and Presentation of facts/data 5. Analysis of facts/data 6. Integration and synthesis of other perspectives 7. Presentation of Conclusions Student achievement was scored on a four level scale - Absent (0), Developing (1-2), Competent (3-4), Sophisticated (5) - on each of the four CT skills above. For descriptions of each level of scoring see rubric POLS 4900 Items 1-3 above are related to the outcome of effectively formulating a research question Items 4-5 above are related to the outcome of effective collection and use of data Items 6-7 above are related to the outcome of effective communication of results.

Source of Evidence: Written assignment(s), usually scored by a rubric.

**Target for O1: Effective Formulation of Research Question**

We expect that 80% of our students score a 3 or better out of 5 on Items 1-3 of the rubric.

**Findings 2012-2013 - Target: Met**

191 students completed POLS 4900 in the Fall and Spring Semesters of 2012-2013. 9 sections of the course were taught during the period. The following sections are based on the available data. On the effective formulation of the research question portion of the rubric (Items 1-3) the scores were as follows. 1. Identification of question or issue - 44.3% of our students scored a 5 (Sophisticated), 47.1% scored 3-4 (Competent) 8.5% scored 3-4 (Competent), 10% scored 1-2 (Developing). 2. Consideration of assumptions and/or context - 45.7% of our students scored a 5 (Sophisticated), 39.3% scored 3-4 (Competent) 5.3% scored 1-2 (Developing). 3. Formulation of a testable hypothesis - 41.4% of our students scored a 5 (Sophisticated), 38.6% scored 3-4 (Competent) 15.7% scored 3-4 (Competent), 15.7% scored 1-2 (Developing). Percentage figures are rounded off.

**Target for O2: Effective collection and use of data**

We expect that 80% of our students score a 3 or better out of 5 on the effective collection and use of data portion of the rubric.

**Findings 2012-2013 - Target: Met**

On the effective collection and use of data portion of the rubric (Items 4-5) the scores were as follows. 4. Collection and presentation of facts/data - 44.3% of our students scored a 5 (Sophisticated), 45.7% scored 3-4 (Competent) 30.2% scored 3-4 (Competent) 10% scored 1-2 (Developing). 5. Analysis of facts/data - 48.6% of our students scored a 5 (Sophisticated), 41.4% scored 3-4 (Competent) 10.0% scored 1-2 (Developing). Percentage figures are rounded off.
**Findings 2012-2013 - Target: Met**

On the Effective communication of results portion of the rubric (items 6-7) the scores were as follows: 6. Integration and synthesis of other perspectives - 45.7% of our students scored a 5 (Sophisticated), 41.4% scored 3-4 (Competent) 12.9% scored 1-2 (Developing). 7. Presentation of conclusions - 35.7% of our students scored a 5 (Sophisticated), 52.9% scored 3-4 (Competent) 11.4% scored 1-2 (Developing). Percentage figures are rounded off.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Improving CT skill in Formulation of testable hypothesis**

Though the learning outcome target for this item on the rubric was met in both POLS 3800 and POLS 4900 the assessment data shows some weakness in this CT skill. This was specially the case in POLS 4900 where students had to meet a much higher standard of sophistication to earn a score of 3 or more on this item in the rubric. In POLS 4900 student scores on the rubric were as follows - 34.4% scored 5 (Sophisticated), 40.6% scored 4 (higher end of Competent) and 21.9% scored 3 (lower end of Competent). The plan is to devote more time and learning to developing this skill in POLS 4900. In particular differences between a thesis, a hypothesis and a conclusion and developing a hypothesis that is testable and not leading to a single conclusion.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

**Improving CT skill in integration of other perspectives**

While the assessment data shows that our first CTW course POLS 3800 is comfortably meeting the CT learning outcome targets, our second CTW course POLS 4900 while meeting its learning outcome target shows clear gaps in student CT skills in the area of Integration of other perspectives into their work. Though students showed marked improvement in this area between pre-course and post-course performance and target of 80% of students scoring 3 or higher on this item on the rubric was met only 34.4% had a score of 5 (Sophisticated), whereas 37.5% scored 4 (higher end of Competency) and 21.9% scored 3 (lower end of Competency). Faculty teaching the course noted that this was a major weakness of students coming into the course. The plan is to give added stress to developing this skill in POLS 4900.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

In past years two major areas of weakness in critical thinking skills among our students had been identified; developing a testable hypothesis and integrating other perspectives in analysis. The action plans in place to deal with these weaknesses have been in place for several years. As the data from this years assessments show, the actions plans have resulted in remarkable improvements in assessments in these areas of past weakness. These higher assessment scores are especially notable because there has been a simultaneous tightening of assessment standards in CTW courses that have made high scores more difficult to achieve.

**CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?**

In addition to the discussion in Reflection One above, comparing scores of students in CTW course POLS 3800 with those in CTW POLS 4900 show consistently higher scores in all areas of critical thinking. POLS 3800 is a prerequisite for pols 4900. Since this pattern has been consistent over the years of the CTW program it is safe to assume that even though we are not tracking individual student assessment over the two courses, assessments have improved for each cohort as it has passed through the two courses. Within those sections of POLS 3800 and POLS 4900 that involved pre-testing, the end of course scores were also consistently higher.
**Mission / Purpose**

In addition to meeting the requirements of the University's CTW policy, the proposed CTW courses are designed to address recommendations by the American Psychological Association (APA) related specifically to the development of critical thinking skills in undergraduate psychology majors. For this reason, we shall operationalize define and assess critical thinking in terms outlined by the APA, such as students' ability to "evaluate the quality of information, including differentiating empirical evidence from speculation," "use reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals," "demonstrate an attitude... of persistence, open-mindedness, tolerance for ambiguity, and intellectual engagement," and "use scientific principles and evidence to resolve conflicting claims" (APA, 2007, p. 15).

**Goals**

**G 1: Critical thinking skills in psychology (APA 3.1-3.4)**
Respect and use critical and creative thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes.

**Student Learning Outcomes/Objectives**

**SLO 1: Uses critical thinking effectively (APA 3.1) (G: 1) (M: 1, 2)**

a. Evaluate the quality of information, including differentiating empirical evidence from speculation and the probable from the improbable
b. Identify and evaluate the source, context, and credibility of information
c. Recognize and defend against common fallacies in thinking
d. Avoid being swayed by appeals to emotion or authority
e. Evaluate popular media reports of psychological research
f. Demonstrate an attitude of critical thinking that includes persistence, open-mindedness, tolerance for ambiguity, and intellectual engagement
g. Make linkages or connections between diverse facts, theories, and observations

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).
3.1 Enhance a research culture.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 2: Engages in Creative Thinking (APA 3.2) (G: 1) (M: 1, 2)**

a. Intentionally pursue unusual approaches to problems
b. Recognize and encourage creative thinking and behaviors in others
c. Evaluate new ideas with an open but critical mind

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).
3.1 Enhance a research culture.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 3: Uses reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals (APA 3.3) (G: 1) (M: 1, 2)**

a. Identify components of arguments (e.g., conclusions, premises/assumptions, gaps, counterarguments)
b. Distinguish among assumptions, emotional appeals, speculations, and defensible evidence
c. Weigh support for conclusions to determine how well reasons support conclusions
d. Identify weak, contradictory, and inappropriate assertions
e. Develop sound arguments based on reasoning and evidence

**General Education/Core Curriculum Associations**

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).
3.1 Enhance a research culture.
Measures, Targets, and Findings

**M 1: 3530 Final Paper (O: 1, 2, 3, 4)**

PSYC 3530 provides psychology majors with experience in research design, data analysis, and scientific communication needed for higher-level understanding in 4000-level courses, the development and writing of senior-year theses, and graduate study. Topics include experimental and quasi-experimental design, statistical techniques for comparing multiple groups, and the structure and style of scientific writing in psychology. The form of the final paper varied across sections and consisted of an APA-style synthesis or critique paper utilizing 1-5 recent peer-reviewed articles as primary sources. The data below reflect a sample of the sections from the two terms.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Uses critical thinking effectively (APA 3.1)**

In the 2013 CTW Assessment Rubric, instructors rate the students’ submissions for effective use of critical thinking on a 0-5 scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 3530, our junior/entry CTW course, the target is for the majority of students to be at least in the Developing (2-3) range.

**Findings 2012-2013 - Target: Met**

The median score for "Uses critical thinking effectively (APA 3.1)" was 3, which is in the 'developing' range, and 98.6% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The proportions of students in each performance category are summarized in Figure 1, with mastering in greens, developing in yellows, and emerging in reds.

**Target for O2: Engages in Creative Thinking (APA 3.2)**

In the 2012-2013 CTW Assessment Rubric, instructors may -- but are not required to -- rate the students' submissions for creative thinking on a 0-5 scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 3530, our junior/entry CTW course, the target is for the majority of students to be at least in the Developing (2-3) range.

**Findings 2012-2013 - Target: Met**

The median score for "Engages in creative thinking (APA 3.2)" was 3, which is in the 'developing' range, and 99.6% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The proportions of students in each performance category are summarized in Figure 1, with mastering in greens, developing in yellows, and emerging in reds.

**Target for O3: Uses reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals (APA 3.3)**

In the 2012-2013 CTW Assessment Rubric, instructors rate the students’ submissions for use of reasoning on a 0-5 scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 3530, our junior/entry CTW course, the target is for the majority of students to be at least in the Developing (2-3) range.

**Findings 2012-2013 - Target: Met**

The median score for "Uses reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals (APA 3.3)" was 3, which is in the 'developing' range, and 98% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The proportions of students in each performance category are summarized in Figure 1, with mastering in greens, developing in yellows, and emerging in reds.

**Target for O4: Approaches problems effectively (APA 3.4)**

In the 2012-2013 CTW Assessment Rubric, instructors rate the students’ submissions for effectively approaching problems on a 0-5 scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 3530, our junior/entry CTW course, the target is for the majority of students to be at least in the Developing (2-3) range.

**Findings 2012-2013 - Target: Met**

The median score for "Approaches problems effectively (APA 3.4)" was 3, which is in the 'developing' range, and 99% of the students were rated a score of 2 (the lower end of the 'developing' range) or higher. The proportions of students in each performance category are summarized in Figure 1, with mastering in greens, developing in yellows, and emerging in reds.
PSYC 4800 is a senior seminar; each section focuses on a different topic. As such, the types and topics of the CTW posttest writing assignments vary across sections. Most students prepare some form of paper or project that requires them to synthesize information from the course and peer-reviewed research articles relevant to the topic to address a novel thesis or test a hypothesis.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Uses critical thinking effectively (APA 3.1)**

In the 2012-2013 CTW Assessment Rubric, instructors rate the students' submissions for effective use of critical thinking on a 0-5 scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 4800, our senior/exit CTW course, the target is for the majority of students to be in the Mastering (4-5) range.

**Findings 2012-2013 - Target: Met**

The median score for "Uses critical thinking effectively (APA 3.1)" was 4, which is in the 'mastering' range, and 71.5% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The proportions of students in each performance category are summarized in Figure 2, with mastering in greens, developing in yellows, and emerging in reds.

**Target for O2: Engages in Creative Thinking (APA 3.2)**

In the 2012-2013 CTW Assessment Rubric, instructors rate the students' submissions for creative thinking on a 0-5 scale. A score of 0-1 is considered Emergent and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 4800, our senior/exit CTW course, the target is for the majority of students to be in the Mastering (4-5) range.

**Findings 2012-2013 - Target: Met**

The median score for "Engages in creative thinking (APA 3.2)" was 4, which is in the 'mastering' range, and 79.1% of the students were rated a score of 4 (the lower end of the 'mastering' range) or higher. The proportions of students in each performance category are summarized in Figure 2, with mastering in greens, developing in yellows, and emerging in reds.

**Target for O3: Uses reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals (APA 3.3)**

In the 2012-2013 CTW Assessment Rubric, instructors rate the students' submissions for use of reasoning on a 0-5 scale. A score of 0-1 is considered Emerging and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 4800, our senior/exit CTW course, the target is for the majority of students to be in the Mastering (4-5) range.

**Findings 2012-2013 - Target: Met**

The median score for "Uses reasoning to recognize, develop, defend, and criticize arguments and other persuasive appeals (APA 3.3)" was 4, which is in the 'mastering' range, and 65.5% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The proportions of students in each performance category are summarized in Figure 2, with mastering in greens, developing in yellows, and emerging in reds.

**Target for O4: Approaches problems effectively (APA 3.4)**

In the 2012-2013 CTW Assessment Rubric, instructors rate the students' submissions for effectively approaching problems on a 0-5 scale. A score of 0-1 is considered Emergent and is below expectations. A score of 2-3 is considered Developing and meets basic expectations. A score of 4-5 is considered Mastering and meets advanced expectations. For PSYC 4800, our senior/exit CTW course, the target is for the majority of students to be in the Mastering (4-5) range.

**Findings 2012-2013 - Target: Met**

The median score for "Approaches problems effectively (APA 3.4)" was 4, which is in the ‘mastering’ range, and 73.7% of the students were rated a score of 4 (the lower end of the ‘mastering’ range) or higher. The proportions of students in each performance category are summarized in Figure 2, with mastering in greens, developing in yellows, and emerging in reds.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**CTW Instructor Workshops**

As the number of faculty who are teaching CTW courses within the Psychology department increases, it is becoming increasingly difficult for the CTW Ambassadors to provide one-on-one training to faculty regarding assignment design, feedback, and assessment. To address this concern, Dr. Darnell will be offering a CTW instructor training workshop before the beginning of the Fall and Spring terms, with a specific focus on the entry level CTW course, PSYC 3530. Dr. Tusher will conduct a needs assessment of faculty who have taught PSYC 4800 and work with Dr. Darnell to prepare the appropriate materials and training to respond to faculty requests regarding instructional support for the exit level CTW course.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Implementation Description:** Dr. Darnell conducted two workshops for new PSYC 3530 faculty prior to the Fall 2011 term. In addition, she and other veteran PSYC 3530 instructors gathered teaching materials on a GoogleDocs site that new instructors can easily reference and add to. Dr. Tusher is preparing a similar resource site for PSYC 4800 instructors. Drs. Darnell and Tusher will be leading a faculty orientation for all CTW instructors, new and experienced, before the Fall 2012 term.
- **Projected Completion Date:** 08/2012
- **Responsible Person/Group:** CTW Ambassadors

**Revise Rubric (Again)**
Although the CTW Ambassadors in Psychology have historically conceptualized the ability to write well in a discipline-appropriate style as manifestation of students’ ability to think critically, we continue to receive feedback that this view is not in keeping with the intentions of the CTW initiative. Instead, we have been encouraged to treat writing simply as the medium instructors use to assess students’ critical thinking. Given that a writing-related goal was the only one not fully met by our students in this year’s assessment and that the resources necessary to adequately address students’ shortcomings in this area lie far beyond the scope of what we can provide as a department, we have elected to discontinue reporting writing-related data for CTW. In conjunction with this change in reporting practice, we are removing measures from our CTW Assessment Rubric that do not directly map onto constructs of critical thinking as defined by the American Psychological Association (APA). Specifically, we are removing measures used to assess students’ ability to communicate effectively in writing (i.e., Grammar and Mechanics, Content and Development, and Citation and Use of Sources). In addition, we are rewording the measures on the rubric to make them measure the critical thinking constructs defined by the APA more directly. We hope that these changes will streamline the data collection process for CTW instructors and reduce the burden of learning outcome assessment for all of us.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Finished  
**Priority:** High  
**Implementation Description:** The revised CTW rubric will be ready for use in Summer 2012 courses and will be used thereafter.  
**Projected Completion Date:** 06/2012  
**Responsible Person/Group:** CTW Ambassadors

### Compare critical thinking outcomes for hybrid and standard versions of PSYC 3530

Since Spring 2012, several faculty have offered hybrid sections of our junior/entry level CTW course, PSYC 3530, in addition to sections taught with a traditional face-to-face approach. Because our department gathers a wide variety of learning outcome assessment data from all sections of PSYC 3530 (e.g., critical thinking, writing in the sciences, technology use, understanding and application of quantitative concepts), we plan to compare results from the two types of courses to determine if there are any differences. In particular, we are interested in determining if there are differences in students' demonstrated critical thinking skills.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** Medium  
**Implementation Description:** We will compile and analyze data across sections of PSYC 3530 using the instructional format as the independent variable and performance on the established learning outcome measures as the dependent variables.  
**Projected Completion Date:** 05/2014  
**Responsible Person/Group:** CTW Ambassadors

### Explore additional options for the exit level course

Convert existing 4000-level courses that already have the entry level CTW course as a prerequisite to exit-level CTW courses (e.g., PSYC 4100 - Cognitive Psychology) Assign each existing version of PSYC 4800 to one of the three categories for Advanced Requirement. Courses for the major (i.e., Applied Topics, Cognitive Topics, and Diversity Topics) Implement PSYC 4000 (Laboratory Experience in Psychology), the other approved senior/exit level CTW course Establish cross-listed sections of 4800 that will have instructors from two different programs with 25 students enrolled from each program (i.e., Psychology of Gender, with the Institute for Women’s, Gender, and Sexuality Studies)

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** High  
**Implementation Description:** Address the options above in the order given with the goal of reducing the substantial backlog in student demand for the exit level course while enhancing the available offerings to students and faculty.  
**Projected Completion Date:** 05/2016  
**Responsible Person/Group:** CTW Ambassadors

### Explore hybridization of PSYC 4800

Given the apparent success of the hybridization of some sections of PSYC 3530 (based on student and instructor feedback), as well as the increasing interest at the university level for more courses to be taught in a hybrid format, we are now exploring options for hybridizing some sections of our senior/exit level CTW course, PSYC 4800.

**Established in Cycle:** 2012-2013  
**Implementation Status:** Planned  
**Priority:** Medium  
**Implementation Description:** First, we will talk with faculty who teach PSYC 4800 about their interest in creating a hybrid version of their course and help them identify what kinds of resources they might need to implement their vision (e.g., technology, training, mentorship). We will then provide those faculty with the support they request and/or help them make connections with others in the department and at the Center for Instructional Innovation who can provide appropriate guidance.  
**Projected Completion Date:** 05/2014  
**Responsible Person/Group:** CTW Ambassadors

### Analysis Questions and Analysis Answers

#### CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

In keeping with the action plan on “Revise Rubric (Again),” we successfully converted our rubric to one in which the measures directly map onto the objectives for critical thinking provided by the American Psychological Association (APA). For example, we used to measure students’ ability to “use critical thinking effectively (APA 3.1)” with rubric elements regarding “Organization and Logic” and “Use of Evidence.” Now we simply ask faculty to assess each student’s performance on the exact criteria listed by the APA for this outcome. Because each outcome incorporates many different skills (e.g., there are seven different skills for APA 3.1), faculty choose which of the skills are relevant to the given assignment and provide a score between 0 and 5 for each outcome; students are not necessarily assessed on every item listed for a given outcome for a given assignment. This revision particularly streamlines the mapping of measures to objectives in that each objective is measured by a unique set of skills; no set of skills applies to more than one objective. The new rubric also separates two APA outcomes (APA 3.2 and APA 3.4) that had previously been combined. In keeping with the action plan on “CTW Instructor Workshops,” Dr. Darnell and Dr. Tusher conducted a workshop prior to the start of fall semester for all faculty teaching PSYC 3530 or PSYC 4800 during the 2012-2013 school year. In addition, both ambassadors met individually with faculty who were unable to attend the workshop or required additional support over the course of the year. The primary purposes of the workshop were to introduce and explain the scoring for the new rubric, to emphasize the importance of
enforcing the plagiarism policy, and to reinforce the necessity of reporting all CTW learning outcome assessment data. For 2012-2013, we approved and offered three new versions of PSYC 4800, including Personality, Psychopathology, Early Social and Developmental, and Family Relations. Two other versions, Neurobiology of Love and Decision Making, have been approved and will be offered for the first time in Fall 2013. These additions bring our total number of unique exit-level seminar topics to 19.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit level?

From the entry level CTW course to the exit level CTW course, students are improving in their critical thinking skills. Specifically, median scores on all measures (i.e., APA 3.1 - APA 3.4) were in the Developing category at the end of the entry-level CTW course (PSYC 3530) and in the Mastering category at the end of the exit-level CTW course (PSYC 4800). We find that the majority of students in the entry level course (52.3%) are at the developing level across all measures, whereas the majority of students in the exit level course (72.4%) are at the mastering level. This shift suggests that about half of the students in the developing range at the end of the entry-level CTW course have moved to the mastering range by the end of the exit-level CTW course. This transition is readily apparent when comparing the corresponding columns in Figure 1 (PSYC 3530) and Figure 2 (PSYC 4800) in the relative size of the yellow (developing) and green (mastering) sections.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What assistance might you need to address those areas?

Many of the problems described in our 2011-2012 report remain the same. Of greatest concern is the lack of regular faculty available to teach CTW courses. This issue limits students' progress through the major and their degree program, particularly because we have a backlog of students who need CTW courses to graduate in addition to rising juniors and seniors. Although almost every faculty member teaches at least one CTW course every year (and many teach at least one every semester), we are unable to staff all of the sections we offer with regular faculty and now have visiting lecturers teaching both our entry-level and exit-level CTW courses. As a result, it is possible for psychology majors to complete the CTW sequence without having a CTW course with a regular faculty instructor. Despite ongoing efforts to limit the number of Psychology majors, we have been unable to get approval from the College to implement any of our proposed strategies that would result in a reduction of any meaningful size. Furthermore, it is very difficult to get the College to provide the data we need to develop effective strategies even when it is the College that requests the data and uses it to motivate our proposals.

Regardless of faculty concern that offering CTW courses in the summer term is pedagogically unsound, particularly in the case of our entry-level course, our department, as well as the College, has been concerned in response to student complaints about delays in their academic progress. In short, to meet the goals of the CTW initiative as it is intended without further delaying our students' progress toward graduation, we continue to need the College to approve and fund 10 or more new regular faculty lines (TT and NTI) so that we can meet the demand for CTW courses without relying on VLS as CTW instructors. We also need the College to be timelier in providing us with the data we need and more supportive of the pedagogical decisions we make relevant to our CTW course offerings. In addition to these ongoing concerns, several new issues have arisen during this academic year. Delays in setting teaching assignments for CTW courses result in students' inability to tell what faculty member is teaching a given section (both PSYC 3530 and PSYC 4800) and the topic of the course (PSYC 4800). Considering the value that the universe places on CTW courses, it seems extremely unfair to deny students the opportunity to take these courses with the instructor of their choosing and/or on a topic that is relevant to their future plans. Forcing a student with no interest in a particular subfield of psychology (e.g., clinical) to take a challenging senior seminar in an area he or she finds counter to the goals of the CTW initiative and the department's efforts to get students to make more thoughtful, organized choices about their course of study. In addition, this situation creates animosity and frustration in the classroom for students who were looking forward to taking a course on a particular topic (e.g., psychology of language) and instead have to take it on an unrelated topic (e.g., substance abuse counseling). In the case of our entry-level CTW course, students already have a great deal of anxiety about the topic (i.e., research methods, statistics, and scientific literacy) and the likelihood they will successfully pass the course, which has a one retake limit. Uncertainty about who their instructor will be adds to this anxiety and can result in an unnecessary level of tension during the course if the students end up with an instructor whose approach is not suited to their learning style and/or someone with whom they have already had an unsuccessful classroom experience. Delays in assigning particular instructors to sections also result in students not knowing the modality of instruction (i.e., face-to-face, hybrid, or online) until after they have already registered and typically not until they arrive on the first day of class. This is because the instructor generally determines the modality of the course, and several faculty who teach CTW courses are already in the College's most innovative and technologically savvy in the department. Although we have had good success with hybrid versions of courses, some students prefer and are more likely to succeed in traditional face-to-face learning environments. Because demand for our CTW courses is so high, a student who finds himself/herself in a course on an undesirable topic or taught in an undesirable modality will not give up the space hoping to get a seat in a different section, because it is much more likely that the student will lose his/her space altogether, further delaying graduation. Instead, students bombard faculty with replacement (e.g., a student who cannot answer a question about a request for special treatment (e.g., to be “secretly” overflowed into a course with a College-mandated enrollment cap) that the faculty cannot accommodate. In both the entry-level and exit-level courses, faculty report that a substantial subset of students struggles with writing skills to a degree unexpected of students who are on the verge of graduation. Although we do not track writing skill as part of our CTW assessment any more, CTW instructors agree that students' poor writing skills present one of the greatest impediments to assessing their ability to think critically. Statistical analysis of our students' grades from ENGL 1101/1102 and our CTW courses revealed no significant correlation, suggesting that students can do well in the English courses without having mastered basic, college level writing skills. This deficit leaves them unprepared to apply these skills to critical thinking tasks in our major-specific courses.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

Although we continue to strongly support the spirit and goals of the CTW initiative, our department's inability to field a sufficient number of CTW courses may be the number one force preventing Psychology majors from graduating in a timely fashion. Because the faculty want our students to progress through the major and graduate from GSU at a reasonable pace, addressing the problems raised by the CTW initiative has become one of the primary concerns of our undergraduate program. The Undergraduate Program Committee is actively trying to find workable solutions, but is not willing to compromise the program's academic standards in the process. As CTW ambassadors, we continue to support our students and CTW faculty as much as possible. We have formal workshops to train faculty and regularly work on improving the materials and guidance we provide instructors to facilitate their success. Additionally, both ambassadors have an open-door policy that we hope encourages faculty to come to us anytime they have questions or concerns about CTW, including courses specifically or the initiative more broadly. The department's Writing Center continues to offer one-on-one tutoring for Psychology students in CTW courses although demand for individual tutoring has made it impossible for individual tutors to co-teach workshops for C-class and PSYC 1000. At an end-of-the-year faculty meeting the faculty report that they enjoy teaching CTW courses, particularly at the exit level. Even at the entry level, new instructors often comment that students are very responsive to the format and that they like working through the challenging topics in a smaller setting. New faculty have had good success teaching CTW courses and many of our incoming faculty request to teach the entry level
course during their first semester on campus. Moreover, some TT faculty who were initially very resistant to teaching the entry level CTW course have reported to the department chair that they now enjoy teaching the class a great deal and actually prefer teaching it to some other undergraduate courses.

Georgia State University

Assessment Data by Section
2012-2013 CTW Public Management and Policy

As of: 12/12/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

Critical thinking in Public Management and Policy involves evaluating arguments and making and justifying claims based on theoretical understandings and/or empirical assessment.

The Department of Public Management and Policy is committed to community service with the goal of improving government, society, and quality of life in the Atlanta area, the Southeast region, and throughout the United States and other countries.

Goals

G 2: Understand links between theory and research
Students must demonstrate the ability to connect theoretical issues involving policy with empirical assessment techniques.

G 3: Select appropriate methods for assessment
Students must be able to select appropriate methods for a policy assessment design. Options might include interviews, experiments, survey research, qualitative research, and document reviews.

G 1: Policy Process and Outcomes Paper
Exhibit critical thinking about the policy process and policy outcomes in a written policy paper.

Student Learning Outcomes/Objectives

SLO 1: Preparation of a final CTW paper (G: 2, 3) (M: 1)
PMAP 4051 Evaluating Public Policy O 3, 4: Discussion of Final Project Assignment Students will write an evaluation research proposal integrating research methods and evaluation theory into a real problem. Students will draw on information and analytical skills obtained during the course including knowledge on how to pose research questions, form hypotheses, measure concepts, and take appropriate samples and how to analyze various modes of observation: experiments, surveys, field research and unobtrusive research. Students will also draw on their learned ability to critically analyze evaluation designs and alternative approaches to evaluations.

PMAP 3311 Critical Policy Issues Final Project Assignment

SLO 2: Prepare final CTW paper (G: 1)
Students will draw on an understanding of the public policy process to examine a number of broad policy arenas as well as specific policy that is currently under debate. Students will have the opportunity to think critically about how the policy process influences policy and its outcomes and whether a given policy is delivering what it should. They will also apply their critical thinking skills to defend their positions on given policy issues.

Measures, Targets, and Findings

M 1: Rubric (O: 1)
Description of rubric. See repository.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Preparation of a final CTW paper
80% of students achieving at least the partially demonstrated skills/objectives for the final CTW paper assignment in CTW courses.

Findings 2012-2013 - Target: Met
In the 2012-2013 academic year 85% of PMAP 3311 and 80% of PMAP 4051 students achieved at least the partially demonstrated skills/objectives for the final CTW paper assignment in the respective courses.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Final CTW paper assignments
Improve student outcomes on final CTW paper assignments.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High
Projected Completion Date: 05/2014
Rubric
Better use of refined rubric(s) in scoring assignments.
Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: High
Projected Completion Date: 05/2014

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
PMAP 3311 Critical Policy Issues replaced PMAP 3021 as a CTW course. Students completed CTW related writing assignments in PMAP 3311 beginning in Fall 2011 and continuing through Spring 2013. This related to our specific action plan to make PMAP 3311 a CTW course.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
The percentage of students performing in the "Excellent" category on their final written assignment in PMAP 4051 improves significantly from the percentage of students who achieved this category in the PMAP 3311 course.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Rubrics need to be refined for both CTW courses and aligned more closely with the overall course assessment tool.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
Students' critical thinking and writing skills appear to be improving however more so it appears for those that already came into the courses with some basic skills in this area. We have switched one of the CTW designated courses from PMAP 3021 to the more appropriate PMAP 3311 Critical Policy Issues course since the last assessment report.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?
Some instructors refined the rubrics they used however no standardization or formalization of these revised rubrics was done.

ACADEMIC PROGRAM QUESTION 2:  What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
More assistance needs to be provided to those with the least critical thinking and writing skills. These students appear to be among the slowest to show progress over the period of the two CTW courses.

Annual Report Section Responses

Challenges for Next Year--Briefly describe any special challenges (related to budget, personnel, increased standards, new projects, new expectations, etc.) that you will be facing during the next reporting cycle that might affect your department's outcomes.
There is a steady increase in the number of students in our undergraduate policy degree which makes for larger CTW class sizes and more difficulty for one instructor to meet students needs even with CTW assistants.

Georgia State University
Assessment Data by Section
2012-2013 CTW Real Estate
As of: 12/13/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The BBA real estate major provides the student with the real estate knowledge and analytical skills necessary to support real property decisions in business environments as well as the requisite skills to effectively communicate them. Critical thinking through writing in Real Estate is defined as using writing to assist students in developing the ability to apply problem-solving skills to formulate and communicate convincing solutions to real estate business problems.

Goals
G 1: Problem solving
Students will be adept at solving real estate business problems.

G 2: Clear communication of real problem solutions
### Student Learning Outcomes/Objectives

**SLO 1: Data Evaluation (G: 1) (M: 1)**
Students will demonstrate the ability to organize and evaluate data and information in a real estate business context by analyzing the International Place Case (attached) as evaluated by the corresponding item “Gather, organize, and classify data” in the grading rubric (attached).

**SLO 2: Analytical skills (G: 1) (M: 1)**
Students will become better analysts of verbal and mathematical data by analyzing the International Place case (attached) as evaluated by the corresponding item in the rubric “Analyze information.”

**SLO 3: Evaluation of evidence (G: 1) (M: 1)**
Students will demonstrate the ability to critically evaluate assumptions, evidence, ideas, and information from a variety of sources by analyzing the International Place case (attached) as evaluated by the corresponding item in the rubric “Evaluate assumptions, evidence, ideas, & information”.

**SLO 4: Integration of materials (G: 1) (M: 1)**
Students will demonstrate ability to compare and integrate conflicting and competing ideas and information by analyzing the International Place case (attached) as evaluated by the corresponding item in the rubric “Synthesize ideas & information.”

**SLO 5: Conclusions (G: 2) (M: 1)**
Students will demonstrate ability to write rational, reasonable, and informed conclusions by analyzing the International Place case (attached) as evaluated by the corresponding item in the rubric “Develop rational, reasonable, and informed conclusions.”

**SLO 6: Communication (G: 2) (M: 1)**
Students will demonstrate ability to present a clear written expression of derived conclusions, judgments, and solutions by analyzing the International Place case (attached) as evaluated by the corresponding item in the rubric “Clearly communicate conclusions, judgments, and solutions.”

### Measures, Targets, and Findings

**M 1: Rubric (O: 1, 2, 3, 4, 5, 6)**
See connected rubric. Rubric will be used to score student written analysis of the case. A score on each objective will be recorded along with a total score for each student. Students can use the scores on each item to learn where they have performed well and where they can improve. Faculty can use the scores to assess how well students are performing on each facet of the assignments and make adjustments as necessary. The case does not contain specific questions that match the individual objectives or items in the rubric. The case revolves around real estate cash flow analysis, valuation, foreclosure issues, bankruptcy, and negotiation. Students are expected to summarize and organize the relevant facts, perform a cash flow analysis, compare valuations, analyze options, propose a logical recommendation supported by their analysis, and discuss the possible implications in and organized and clear fashion.

Source of Evidence: Written assignment(s), usually scored by a rubric

Students in class achieve average score of 2.0 out of 3.0 on corresponding element of the rubric.

Findings 2012-2013 - Target: Met
Average 2.67; 89% of students met standard of 2.0 out of 3.0 on International Place case.

Target for O6: Communication
Students in class achieve average score of 2.0 out of 3.0 on corresponding element of the rubric.

Findings 2012-2013 - Target: Met
Average 2.67; 89% of students met standard of 2.0 out of 3.0 on International Place case.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

Continued instructor training
In order to ensure consistency and that the rubric scoring is consistent, the Ambassador will hold 1 workshop at end of each semester with the assigned instructor for the upcoming semester to review the previous semester's experience along with the planned syllabus, CTW assignment, grading, and assessment for the upcoming semester. This will be the time to review any questions and direct instructor to CTW materials.

Established in Cycle: 2010-2011
Implementation Status: In-Progress
Priority: Medium

Relationships (Measure | Outcome/Objective):
- Measure: Rubric
- Outcome/Objective: Analytical skills
- Communication
- Conclusions
- Data Evaluation
- Evaluation of evidence
- Integration of materials

Projected Completion Date: 05/2013
Responsible Person/Group: Ambassador

Train new instructor in CTW
The previous CTW instructor is leaving GSU, so the Ambassador will share all previous reports and assignments with the newly assigned instructor and provide assistance with implementing and evaluating CTW in the course.

Established in Cycle: 2011-2012
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: Rubric
- Outcome/Objective: Analytical skills
- Communication
- Conclusions
- Data Evaluation
- Evaluation of evidence
- Integration of materials

Implementation Description: The previous instructor remained at GSU for an additional year, so the training was delayed.
Projected Completion Date: 05/2014
Responsible Person/Group: Ambassador

Add CTW designation to RE4160
Apply to the CTW leadership team, the Undergraduate Assessment Committee, and the RCB Undergraduate Program Council to add CTW designation to RE4160 Investment Analysis and Income Property Valuation to make it easier for real estate majors to fulfill the CTW requirement.

Established in Cycle: 2012-2013
Implementation Status: Finished
Priority: High

Projected Completion Date: 05/2013
Responsible Person/Group: Ambassador and Interim Department Chairman.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
Review and change of case used for revise and resubmission to assess CTW. A result of the ongoing review and discussion between the Ambassador and the instructor.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Almost all students demonstrated improved capacity to summarize key information and details. Students sharpened their analysis skills dramatically during the course of the semester. Writing styles also become more business-like and less casual during the semester. The scores on each section of the rubric improved between draft and final grading. Examples are attached. They are classified as Inferior, Satisfactory, or Superior. Inferior – Did not address most of the questions or key issues. Summary of relevant case facts was weak. No analysis of the case options provided. No improvement over the draft submission. Satisfactory – Addressed most, if not all, of the questions and key issues. Analysis of recommendation provided but no analysis of other options. Superior – Addressed most, if not all, of the key issues and questions. Analysis of all case options provided as well as an evaluation of each option and the final recommendation. Presentation format was complete.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

CTW has mainly required additional reporting. We were already employing writing in problem solving situations in our courses. Since last year, the instructor changed the assignment used for CTW assessment and we applied to have a second course given the CTW designation to give students more options to complete their degree without delaying graduation.

Georgia State University
Assessment Data by Section
2012-2013 CTW Religious Studies

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

Critical thinking as applied to the field of religious studies consists of the valid and fact-based analysis, understanding and comparison of religious phenomena in their varied contemporary and historical contexts. It emphasizes the individual's ability to grasp, assess, and comment objectively and with scholarly insight on religious texts—both primary and secondary—of theories, rituals, beliefs, and actions. Since all upper-level Religious Studies courses require significant writing and since many of our majors go to top graduate programs, the mission of our CTW program will be to hone skills introduced in other courses, generate active discussions about critical thinking and writing and help students apply their skills directly to theories and questions central to the discipline.

Goals

G 1: Thinking
In Rels 3750 (Theories) students will demonstrate competency in critical thinking about religious phenomena. In Rels 4750 (capstone seminar) students will demonstrate clear critical thinking about scholarly arguments put forward by religious studies scholars.

G 2: Writing
In Rels 3750 students will demonstrate competency in writing clearly and effectively about religious themes and topics. In Rels 4750 students will demonstrate the ability to write clear summaries of scholarly arguments and to incorporate examples and data from primary texts in a final research paper.

G 3: Evaluation
In Rels 3750 students will demonstrate the ability to understand and to compare and contrast religious claims and scholarly arguments about religious phenomena, drawing on textual evidence to support their claims. In Rels 4750 students will be able to understand and evaluate religious claims and scholarly arguments, identifying strengths, weaknesses, and implications of scholars' arguments.

Student Learning Outcomes/Objectives

SLO 1: Written Communication (G: 1, 2, 3) (M: 1, 2)
Through paper assignments, students will demonstrate clear communication skills and the ability to write without grammatical errors that detract from the clarity of the argument. In Rels 3750, students will write a paper with clear organization at the paragraph and global levels that analyzes a contemporary religious phenomenon in light of scholarly theories discussed in class. This paper will incorporate quoted material in an appropriate manner. In Rels 4750 students shall demonstrate the abilities to formulate a clear thesis statement, to support this thesis statement with appropriate facts or evidence, to consider the facts and evidence in a logical manner, and to draw appropriate conclusions from the findings. This paper will incorporate quoted material in an appropriate manner and a works cited or bibliography section. These assignments will require students to analyze religious phenomena (thinking), write clearly and effectively (writing), and assess scholarly arguments (evaluation).

Strategic Plan Associations

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

Measures, Targets, and Findings

M 1: Writing for CTW (O: 1)
Rels 3750: In a final paper, students will analyze a contemporary religious phenomenon in light of scholarly theories discussed in class. Students' papers should utilize knowledge and materials assigned in the course and that require the formulation of critical judgments and assessment by the student. The assignment will include the presentation of a clear thesis statement, organization, support for claims, clear writing, and appropriate grammar and syntax. Rels 4750: In brief response essays as well as a final paper, students will write about topics that the instructor determines are relevant to the class. Students' writing should utilize knowledge and materials assigned in the course and that require the formulation of critical judgments and assessment by the student. The assignments will include the presentation of a focused point of view (presented in the form of a thesis in the final paper), organization, support for claims, clear writing, and appropriate grammar and syntax. The final paper in Rels 3750 and the final paper and final response essay in Rels 4750 will all be assessed based on the following rubric. Each ranking will be multiplied by 5, so that each section will have a possible 25 points, with a possible total score for each assignment of 100 points. FOCUS (measures goals in thinking and evaluation) 1. Does not have a thesis 2. Thesis is unclear 3. Thesis is stated but is not sustained over the course of the
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Instructor will use the departmental CTW rubric to assess all CTW assignments in the course and will collect and preserve these. As explained above, the key players in the CTW program within Religious Studies have met and developed a plan for 2010-2011. We will continue to use the series of progressively more advanced assignments developed in the departments' CTW offering during Spring 2010 (described in detail above), and we will implement the other aspects of the existing CTW plan. Specifically: (1) the CTW instructor will use the departmental CTW rubric to assess all CTW assignments in the course and will collect and preserve these scores; (2) the CTW instructor will collect and preserve 10 randomly selected final papers from each section taught; and (3) the department assessment committee in conjunction with the CTW Ambassador and CTW instructors will assess the collected final papers based on the rubric and will use these assessments as the basis for a departmental discussion of student learning in CTW during the Spring 2011 semester.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Findings 2012-2013 - Target: Partially Met

For Rels 3750: In Spring '13 the CTW ambassador reviewed 10 final papers written for the Rels 3750 class using the rubric. 78% of the papers received a score of 18 or higher for focus; 72% of the papers received a score of 18 or higher for organization; 68% of the papers received a score of 18 or higher for ideas/content; and 65% of the papers received a score of 18 or higher for writing mechanics. Based on this finding, it appears that students completing the initial CTW course for Religious Studies majors are somewhat effective at providing an overall focus for their writing and are able to organize their papers effectively. However, they have greater difficulty demonstrating mastery of content and incorporating material from a primary or secondary source effectively, and they do not display competence in basic academic writing skills. However, they have greater difficulty demonstrating mastery of content and incorporating material from a primary or secondary source effectively, and they do not display competence in basic academic writing skills. For Rels 4750: In spring '11 the CTW ambassador reviewed 10 final responses essays written for Rels 4750 using the rubric. 68% of the papers received a score of 18 or higher for focus; 68% of the papers received a score of 18 or higher for organization; 42% of the papers received a score of 18 or higher for ideas/content; and 65% of the papers received a score of 18 or higher for writing mechanics. Based on this finding, it appears that students completing the initial CTW course for Religious Studies majors are somewhat effective at providing an overall focus for their writing and are able to organize their papers effectively. However, they have greater difficulty demonstrating mastery of content and incorporating material from a primary or secondary source effectively, and they do not display competence in basic academic writing skills.

Findings 2012-2013 - Target: Partially Met

Only 65% of Rels 4750 students were assessed at reaching a target of 85% competency or better in the capstone paper. Only 65% of Rels 4750 students were assessed at reaching a target of 85% competency or better in the capstone paper. Based on this finding, it appears that students completing the initial CTW course for Religious Studies majors are somewhat effective at providing an overall focus for their writing and are able to organize their papers effectively. However, they have greater difficulty demonstrating mastery of content and incorporating material from a primary or secondary source effectively, and they do not display competence in basic academic writing skills. Prior to submitting the final version of this document, it was proofread by Scott Smith.
**Strategy for improving idea/content, writing mechanics achievements.**

As noted in the findings, students completing Rels 3750 (the introductory Religious Studies CTW course) do not adequately demonstrate the ability to organize information at the paragraph and global levels, and they are not able to incorporate supporting data from a primary or secondary source effectively. Finally, the findings indicate that they do not display competence in basic academic writing skills. The CTW ambassador will pass this information on to the Rels 3750 instructor, suggesting that a revision step be incorporated in the capstone paper writing process. In addition, the Rels 4750 instructor will target these skills for special attention in the capstone seminar, as well as address correct citation and bibliographic skills.

**Strategy for improving Ideas/Content and Writing/Mechanics**

As noted in the findings, students completing Rels 3750 (the introductory Religious Studies CTW course) continue not to adequately exhibit mastery of content presented in the course readings, and they are not able to incorporate material from a primary or secondary source effectively. Finally, the findings indicate that they do not display competence in basic academic writing skills. The CTW ambassador will pass this information on to the Rels 3750 instructor, suggesting that more class time be spent discussing these writing issues when discussing the final paper. In addition, the Rels 4750 instructor will target these skills for special attention in the capstone seminar.

**Incorporation of revision step.**

In subsequent years, the instructor will incorporate a revision step in the Rels 3750 and 4750 capstone paper writing process in order to provide an opportunity to provide feedback on writing.

---

**Action plan in response to 2010-11 findings.**

While some of the targets were met in Rels 3750, none of the achievement targets were met in Rels 4750. The syllabus for 4750 will be adjusted to spend less time on content material (readings) and more time on writing skills.

**Strategy for improving idea/content, writing mechanics achievements.**

The Rels 4750 instructor will be encouraged to maintain the focus on writing, but also revise syllabus to restore some time to content addressing these writing/mechanical issues. The CTW ambassador will pass this information on to the Rels 3750 instructor, suggesting that more class time be spent discussing these writing issues when discussing the final paper. The CTW ambassador will meet with the CTW course instructors for 2011-12 and review the findings. Together they will adjust the syllabus for Rels 4750 in order to increase the emphasis on writing skills.

**Strategy for improving Ideas/Content and Writing/Mechanics**

The CTW ambassador will meet with Rels 3750 and 4750 instructors to discuss areas that need addressing.

---

**Incorporation of revision step.**

In subsequent years, the instructor will incorporate a revision step in the Rels 3750 and 4750 capstone paper writing process in order to provide an opportunity to provide feedback on writing.
CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?
While students demonstrate adequate thinking skills, their writing skills have not improved. The program needs to address writing issues more effectively in both the 3000- and 4000-level CTW sections.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?
Our students have demonstrated an improved ability to understand religious thinkers' views and arguments and to understand how these views and arguments are applied to specific political and cultural phenomena.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?
Students consistently fail to demonstrate adequate writing skills. This may be due in part to the fact that Rels 3750 has been taught by new faculty members in the department who are not familiar with the specific CTW writing goals and objectives. The Department will try to address this problem in 2013-14.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?
No changes have been made to the CTW initiative. The Department has tried to use the CTW course more effectively to introduce students to the application of religious studies outside of academia, highlighting the program's commitment to prepare undergraduates to contribute to the community with the skills and knowledge they have gained as Religious Studies majors, particularly in the fields of business, nonprofit work, health care, education, the media, and politics.

ACADEMIC PROGRAM QUESTION 1:
What changes in the assessment process has your degree program made since last year's assessment report?
No changes in the assessment process were made in 2012-13. In 2013-14 we plan to change the assessment process so that the objectives are more concrete in the writing area. We will also conduct assessment in "real time," as the student work is submitted and graded, rather than waiting until the spring/summer.

ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.
Based on this year's assessment data, we will incorporate more revision steps in both Rels 3750 and 4750 to give students feedback on their writing. We will also adjust the measures used to assess outcomes in order to use more appropriate measures for each goal and objective.

Annual Report Section Responses

Modifications in Measurement Methods—If you modified any of the measures or methods you use in the measurement process, please note those here.
We are adjusting our measures for next year, but the measures for 2012-13 were the same as the measures for 2011-12.

Modifications in Intended Outcomes—If you modified any of your intended outcomes since the previous reporting cycle, please note those here.
We changed a couple of the outcomes to be more specific, focusing on organizational skills at the paragraph and global levels.

University-wide Committee Participation—Use this space to document any staff participation on University-wide committees (e.g., University Senate).
We have had faculty members serve on the University Senate (Committee on Academic Programs, Admissions & Standards, ad hoc committees such as Special Talents committee). Our Director of Undergraduate Studies has served on the Undergraduate Committee and on the Undergraduate Petitions Committee.

Contributions to Student Retention—Please discuss here any direct or indirect contributions your department has made to the retention, progression, or graduation of students.
We work with the appropriate University offices to remove obstacles to student progression toward the degree. We have also permitted students to make adjustments to their B.A. program when appropriate to facilitate their progress toward degree. We are in the process of developing a dual B.A./M.A. degree to retain students who are interested in pursuing both degrees in an efficient manner. Finally, we have developed an internship program (with a critical reading and writing component) to retain students who anticipate moving directly into the work force after graduation.

Georgia State University
Assessment Data by Section
2012-2013 CTW Respiratory Therapy
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose
The Department of Respiratory Therapy will merge the principles of logical reasoning, problem solving, judgment, decision making,
reflection, and lifelong learning in respiratory therapy.

**Goals**

**G 1: Registered Respiratory Therapist**
Each student will be able to make acceptable clinical decisions to become a Registered Respiratory Therapist (RRT) by passing the national examination given by the National Board for Respiratory Care.

**G 2: Certified Respiratory Therapist**
Each student will be able to make acceptable clinical decisions to become a Certified Respiratory Therapist (CRT) by passing the national examination given by the National Board for Respiratory Care.

**Student Learning Outcomes/Objectives**

**SLO 1: NBRC-RRT (G: 1) (M: 1)**
All students will:
1. 90% of students will pass the written national registry exam on the first attempt offered by the National Board for Respiratory Care.
2. 90% of students will pass the clinical simulation national registry exam on the first attempt offered by the National Board for Respiratory Care.
3. 90% of students will graduate with a BSRT at the conclusion of the 5 semester professional program.

**General Education/Core Curriculum Associations**
1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
3. Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Institutional Priority Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**General Education/Core Curriculum Associations**
1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4. Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

**Institutional Priority Associations**
2. Student promotion and progression

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1. Other efforts in support of Goal 1 (Undergraduate Education).
2. Leverage our national reputation in professional degree programs for the development of societal leaders.
3. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**SLO 2: NBRC-CRT (G: 2) (M: 1)**
1. 90% of students will pass the national certification exam on the first attempt offered by the National Board for Respiratory Care.

**General Education/Core Curriculum Associations**
1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2. Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4. Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
5. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1. Other efforts in support of Goal 1 (Undergraduate Education).
2. Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**Measures, Targets, and Findings**

**M 1: CRT/RRT (O: 1, 2)**
100% of 2013 Graduates passed the CRT exam. 100% of 2013 Graduates passed the RRT written exam. 100% of 2013 Graduates passed the RRT clinical simulation exam.

Source of Evidence: Certification or licensure exam, national or state
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Action Plan**
CTW courses will continue to develop the critical thinking ability of our students to competently complete the course and to pass the national examinations. The goal will be to have a 90% first-time pass rate for the certification exam. The written registry and clinical simulation examinations will have a goal of 90% first-time pass rate.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High

**Respiratory Therapy CTW Action Plan**
The Division of RT will continue to develop the critical thinking ability of our students to complete both CTW courses and to pass the national examinations. The goal will be to have a 90% first-time pass rate for the certification exam. The written registry and clinical simulation examinations will have a goal of 90% first-time pass rate.

- **Established in Cycle:** 2011-2012
- **Implementation Status:** Planned
- **Priority:** High
- **Projected Completion Date:** 05/2013
- **Responsible Person/Group:** All RT Faculty

Analysis Questions and Analysis Answers

**CTW Reflection 1:** Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

All students passed both national exams achieving the credential CRT and RRT.

**CTW Reflection 2:** Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

The major goal of the respiratory therapy program is to train and graduate respiratory therapists. To do this each student must become a better critical thinker in order to pass the national exams. Since the inception of the CTW program we have had gains in first time pass rates on the national registry exam each year. As a department we feel confident that we have the correct faculty teaching students critical evaluation that we are pressuring ourselves to have a 100% first time pass rate next year. Although we did not achieve 100% first time pass on the RRT exam, all students subsequently passed.

**CTW Reflection 3:** Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We continue to assess the ongoing CTW courses. At this time we feel content with our program and outcomes.

**CTW Reflection 4:** Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

The impact of CTW, we feel is in our students' ability to critically evaluate a patient. The work done in RT 3027 (Pulmonary Disease) sets the standard for students to critically and appropriately make decisions that can be life saving. The capstone course, RT 4085 finalizes students' critical evaluation. This course integrates writing across the curriculum with CTW in an effort not only to evaluate students' critical thinking, but allow them the freedom to express themselves creatively. No changes this year to our courses or faculty.

---

Georgia State University
Assessment Data by Section
2012-2013 CTW Risk Management
As of: 12/12/2016 05:59 PM EST

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)

Mission / Purpose

The stated mission of the Department of Risk Management and Insurance (RMI) is to be the defining program advancing knowledge and educating students in the economics of measuring, managing, and allocating risk for individuals and households, organizations, and across society. For the purposes of our courses, critical thinking is defined as the ability to construct a thoughtful and discerning analysis of a risk management problem by evaluating a set of associated facts and using the facts in conjunction with appropriate theories and analytical methods to develop defensible and well-reasoned conclusions on how to address the identified problem. Specifically, the structured assignments will be designed to train the student to: 1) identify relevant facts; 2) identify relevant issues; 3) identify which approaches are good candidates to solve the problem; and 4) Identify the appropriate approach and be able to explain why this approach is superior to others.

Goals

G 1: Critical Thinking in Risk Management
Students will develop an understanding of the role of risk management within an organization and demonstrate how risk management can be used to help achieve the objectives of an organization through the use of special exercises, case studies and written examinations that will require them to apply critical thinking and writing skills.
G 2: Value of Risk Management

Students will develop an understanding of and be able to describe how risk management can help an organization achieve its objectives, such as increasing the value of a firm.

G 3: Demonstration of Critical Thinking Through Writing

Students will be able describe and apply the various elements of the risk management process through well-reasoned and articulate writing that reflects critical thinking about risk management issues and problems.

Student Learning Outcomes/Objectives

SLO 1: Goal 1 Risk Assessment Process (G: 1) (M: 1)

Three mini cases are assigned throughout the semester. Each of these mini cases require students to explore different aspects of the risk management process by conducting a critical assessment of a hypothetical risk management problem. The cases become increasingly more challenging in terms of their scope, the theories and methods that must be employed, and the nature of the risk management problem that must be "solved." The objective is to have students progressively develop their critical thinking and writing skills as they take on more challenging assignments and acquire a better understanding of what is required of them. Class discussions and feedback provided on submitted assignments are used to help students understand what is expected of them. A final case study requires students to combine all of the skills and lessons learned from the prior assignments to identify, analyze, and manage risks using a statistical simulation of the risk exposures faced by a real firm and the risk management devices available to it in developing an integrated risk management strategy for the firm. Students are required to explain each component of the case study in writing including a thoughtful discussion of the risk management strategy they ultimately developed for the firm.

SLO 2: Goal 2 Value of Risk Management (G: 2) (M: 2)

Students should develop an understanding of and be able to thoughtfully discuss the theoretical foundation for the application of risk management within organizations and how risk management can help organizations achieve their objectives, such as increasing the value of a firm.

SLO 3: Goal 3 Demonstration of Thinking through Writing (G: 1, 3) (M: 1, 2, 3)

Students should be able to conduct relatively basic analyses of different kinds of risk exposures using facts, theories and appropriate methods to develop well-reasoned approaches for solutions to manage these risk exposures. Students were given three writing opportunities (mini-cases) where they were required to write a three-page paper about each case. Students were assessed on organization, form (grammar and spelling), citation skills, use of appropriate risk management concepts and methods, combining quantitative and qualitative analyses and their ability to develop well-reasoned conclusions based on their overall analysis. An exemplar case was based on the decision-making culture and process involving the launch of the space shuttle Challenger. This is a classic case study in organizational decision making that reflects the competition between different views and interpretations of available facts on whether it was prudent to authorize the launch under adverse weather conditions. The specific case study used in the course was “disguised” as a situation in which a decision needs to be made on whether to race a car in NASCAR race that had experienced engine failures under cold weather conditions. The students were given some engineering data, some weather date, the perspectives of different members of the race team, the financial consequences of different potential outcomes (based on the decision to race or not) and a model with which to analyze the data provided to assist their analysis. The students were then asked questions about their decision to race (or not) and justify the basis of their decision. While the cases were designed for the critical thinking component of the class, we decided to make a push for organization and describing conclusions. Three essay examinations are given during the course of the semester. The course is essentially divided into three sections. The first two examinations each correspond to topics covered in their respective sections of the course. A final examination is also given which covers topics in the third section of the course but is also cumulative in the sense that it contains questions on topics covered in the first two sections of the course. Students are required to demonstrate critical thinking and writing in their answers to the questions on these exams.

Measures, Targets, and Findings

M 1: Final Case (O: 1, 3)

The final written exercise for the course is a case study of the risk management process for a German tractor company. The case requires students to use knowledge and skills acquired previously in the course to perform a full-scale risk management analysis for the firm that encompasses all of the pertinent elements of such an analysis. This assignment is based on a case study developed by Department faculty that has been presented to insurance/risk management industry professionals so it is relatively sophisticated and highly relevant to actual risk management analyses that are performed in the industry. Students are provided with documents that consist of an overview of the company and its operations and an inspection manual that provides a detailed review of its risk exposures. Students are also given an excel-based simulation model that they use to make choices re: risk management measures, insurance arrangements, and the use of various financial derivative contracts to manage the technical and financial risk exposures of the firm. After making an initial set of choices, students then run the simulation model to see how their choices affect the firm's net income and stockholder equity and how much "value" is added to the firm by the choices they have made. The assignment has four components: 1. Students are required to develop an initial risk management plan and explain how they developed the plan and the basis for their initial choices. 2. Students then must run the simulation model based on their initial risk management plan and explain the results of the simulation run. 3. Based on the results of their initial risk management plan, students are required to modify their plan, run another simulation and explain the results of their modified plan. Students also are advised to run several simulations testing the results of different risk management choices with the objective of developing a risk management plan that achieves the best results. 4. Finally, the students are required to explain how using risk management increases the value of the firm.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O1: Goal 1 Risk Assessment Process

The Department of Risk Management and Insurance expects that 90% of students will be able to describe and use the risk management process properly for the case study firm.

Findings 2012-2013 - Target: Met

We have continued to use the tractor company case study that was first introduced in 2011. The assignment requires students to develop a risk management plan for tractor manufacturer based in Germany. The case questions specifically require the students to go through a a step by step process in assessing the risk exposures of the company, develop an initial
**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Rethink Assignments**

We received a number of complaints about the mini case study assignments. One of the problems was that the students had no context in which to conduct a risk assessment. They wanted an example case. I wanted them to use their imagination to look at the materials and then come up with a rough draft of an assessment. I really didn’t want to provide them with an example (as we developed a detailed rubric). I believe they will just copy the example and not really think about the assignment. So, instead of making the students look at a number of different companies, we will make them choose one for the semester. Each of the assignments will relate to a part of the risk management process (identification of risk tolerance, risk identification, risk quantification, etc) and we will develop a new rubric for each part of the assessment and link it to an example case. Because there are no books for this subject, I am conceding the need for some written material, and I am willing to develop a handbook on risk assessment for the class which in its first draft will be an example case. We will also be using a new case with a risk management simulation model which should also tie these concepts together. I need to develop new assignments using this case too.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** In-Progress
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Exam Question
  - **Outcome/Objective:** Goal 2 Value of Risk Management
- **Projected Completion Date:** 08/2011
- **Responsible Person/Group:** M Grace

**Improving Student Performance on the Case Study**

While a high percentage of students scored well on the first question in the rubric and the average score on this assignment exceeded 90%, we still have a concern about a number of students who scored significantly below the average for the case study. We would also like to increase our standards for what is expected of students on this exercise. This is an observation that also
Rethink and revise our approach to this course and our entire curriculum

We have had several meetings with the faculty members who have taught this course to discuss their experience and to share their thoughts on what they think has worked well and what has not and what they would like to do differently. These discussions will continue throughout the summer and will lead to some interim changes for the Fall 2013 Semester and further changes beyond this fall. While we believe that we have made some progress over the several years we have been teaching this course, we also believe that we much farther to go in getting most of our students to perform at level that we would like to see them perform. Our planning will not only address this course but also how critical thinking and writing can be better integrated throughout our curriculum. To understand the motivation behind and the fundamentals of our action plan, it is helpful to briefly characterize the challenges we face in using a CTW approach in teaching this course. As mentioned earlier in the report, many of the students who take this course lack the critical thinking and writing skills that we would otherwise expect them to have when they start this course. Hence, we find ourselves in something of a catch-up mode in terms of structuring the written exercises and examinations for the course and bring students along as well as can be expected given the point where many start from. This has led us to consider short-term changes to the course that will be followed by more fundamental changes to the course and our overall curriculum. For the Fall 2013 Semester class, we are thinking of doing several things. It is likely that we will keep the current set of assignments but will tweak them to enable better student performance. The bulk of our efforts will focus on doing more things to encourage and help students develop their CTW skills. Specifically, we will: 1) make a more concerted effort early on to stress the importance of the CTW aspect of the course and what will be expected of them and why it is important; 2) bring in guest speakers to explain how to conduct research and write effectively; 3) make use of guides and primers that may be available on critical thinking and writing; 4) use a tutor that can help students with both quantitative analysis and qualitative analysis according to their needs; 5) spend more time in class in preparing students for the course exercises and exams and providing examples of good thinking and writing; and 6) experiment with the use of other devices that may help students develop their CTW skills. For the Spring 2014 Semester, we are considering a more fundamental restructuring of the course but our discussions on this are at a preliminary stage so we are reluctant to be more specific on what that restructuring might entail. Finally, in recognition of many students' lack of preparation for the CTW requirements of this course, we are working on a plan that will better expose students to and develop their critical thinking and writing skills throughout our curriculum. This plan too is in its very early stages with much more work and vetting to be done. The essence of our plan will be to set CTW and other objectives for every course we teach so that the instructors in these courses will be expected to implement consistent set of standards that students in those course will be expected to meet according to where these courses reside in our curriculum and the timeline students would normally follow in taking these courses. As students move from lower to higher level courses their CTW skills will be expected to progress accordingly.

Revisit test design and preparation

As discussed further below in our action plan for Goal 3, we have faced a significant challenge in terms of the level of most students' ability to think critically and express themselves in writing and this observation applies to our examinations and students' demonstration of their understanding of the value of risk management. Students typically take this course in their last or next to last semester and we have only a short window of time to achieve significant improvements in their CTW skills and the demonstration of those skills ideally, students would be coming to us with a much stronger foundation and we would be building on that rather than starting from much farther back. With respect to test taking, most of our students area accustomed to answering fairly well-defined questions that tend to have specific answers. If our tests were structured like we would prefer them to be, the results would be a disaster for most students. Hence, our plan is to keep pushing the envelope carefully each semester experimenting with different kinds of questions as well as providing them with more practice exercises to further develop their skills and giving them a better sense of what is expected. As discussed further in our action plan for Goal 3, our plans for examinations and student demonstration of their understanding of the value of risk management will be encompassed within a broader plan for the course and our overall curriculum.

Finally, in recognition of many students' lack of preparation for the CTW requirements of this course, we are working on a plan that will better expose students to and develop their critical thinking and writing skills throughout our curriculum. This plan too is in its very early stages with much more work and vetting to be done. The essence of our plan will be to set CTW and other objectives for every course we teach so that the instructors in these courses will be expected to implement consistent set of standards that students in those course will be expected to meet according to where these courses reside in our curriculum and the timeline students would normally follow in taking these courses. As students move from lower to higher level courses their CTW skills will be expected to progress accordingly.

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

To be honest, I am not comfortable describing anything we achieved as a "major CTW accomplishment." At best, we were successful in making further refinements to the structure and teaching of this course as outlined in the action plans specified last year. From an instructor's perspective, we improved our presentation of the case study assignments and worked harder at helping students navigate through these assignments. However, the overall improvement in student outcomes last year to this year was modest. We believe that we have reached a point of significantly diminishing returns in terms of what can be achieved with this course as it is currently structured. To achieve substantially better outcomes, we need to rethink our fundamental approach to this course and our entire curriculum. This includes gradually raising our standards for what we consider "good" critical thinking an writing. It is not realistic for us to dramatically raise our standards until most of our students are capable of meeting them. Hence, raising our standards progressively over time as we restructure our courses seems the most feasible and fair approach.
Goals

Mission / Purpose

The mission of the undergraduate social work program is to prepare students for generalist social work practice in a range of roles and services that deal with the existing and developing challenges that confront individuals, families, groups, and communities. A central feature of social work education is to support student's recognition and use of critical thinking skills to support practice behaviors.

The critical thinking initiative in the School of Social Work supports the overall mission of the social work program by fostering in undergraduate students a high level of ordered thinking and writing in the context of social work generalist practice. Critical thinking, in a social work context, is viewed as a process to assess, critique, and evaluate theories and knowledge, varying modes of practice, beliefs and attitudes, and research. Social work practitioners always consider alternative or opposing view points to reach well-reasoned solutions and conclusions to social problems. Undergraduate social work majors may demonstrate their critical thinking abilities by:
--raising important questions and problems, and articulating them concisely and precisely;
--gathering and assessing relevant information, and showing the ability to interpret it effectively;
--maintaining an open mind when considering alternative thinking/ideas, assessing and evaluating assumptions, implications and practical consequences;
--developing well-reasoned conclusions and solutions to problems, using relevant criteria and standards; and
--communicating effectively with others when articulating complex problems and possible solutions.

Goals

G 1: SW3300: Apply critical thinking skills relative to human behavior

According to the Council on Social Work Education (2008), social workers must be knowledgeable about the process involving logic and scientific inquiry. Critical thinking is central to serving clientele who are in need of supportive assessments, interventions and evaluations. NOTE: The course numbering was changed from 3330 to 3300 beginning Fall, 2011.

G 5: SW3600: Effectively apply critical thinking skills to inform and communicate understanding about public social policy

In social policy, logic and reasoned discernment are critical to understanding social problems and the necessity for a legislative response. Critical thinking is central to understanding how and why social problems exist, and what reasonable responses are required to address them in a fair and equitable manner.

G 4: SW3300: Recognize various forms of diversity in human behavior

Social workers work closely with diverse populations. There is the understanding that diversity can shape one's identity and human experience. Differences related to age, race, ethnicity, gender, sexual orientation, political ideology, etc. are characteristics of a diverse society that can impact one's worldview, and how social behavior is often defined by such differences. NOTE: The course numbering was changed from 3330 to 3300 beginning Fall, 2011.

G 6: SW3600: Engage in Policy Practice

Social workers understand that public policy impacts social service delivery. Active engagement in the political process is necessary to effectively advocate for the needs of vulnerable groups in society. The beginning of steps toward becoming social advocates is understanding how the political process works.

G 2: SW3300: Apply knowledge of human behavior and the social environment
As a course goal and a core competency of the social work education program, students learn various theoretical perspectives that support social work practice with infants, children and adolescents. Social workers must be knowledgeable about human behavior across the life span, have an understanding of various social systems and the ways in which social systems promote or deter growth and development. To support intervention, assessment, and evaluation, social workers have an understanding of biological, social, cultural, psychological and spiritual development.

### Student Learning Outcomes/Objectives

**SLO 1: SW3300: Demonstrate proficiency in writing and critical thinking relative to assessing human behavior**

<table>
<thead>
<tr>
<th>G: 2</th>
<th>M: 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Articulate position statements in written format using multiple sources of information, including research, that define the biological, psychological and social aspects of human behavior.</td>
<td></td>
</tr>
</tbody>
</table>

**SLO 3: SW3300: Apply theoretical perspectives of human behavior to support social practice**

<table>
<thead>
<tr>
<th>G: 2</th>
<th>M: 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students are directed to use conceptual frameworks to guide the process of assessment, intervention and evaluation of infants, children, and adolescents as part of social work practice. Theories of psychological development, cognitive development, sociocultural cognitive development, and emotional development are a few of the conceptual frameworks that defined and critiqued to understand social behaviors.</td>
<td></td>
</tr>
</tbody>
</table>

**SLO 4: SW3300: Recognize and communicate the importance of difference in shaping life experiences**

<table>
<thead>
<tr>
<th>G: 2</th>
<th>M: 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>In recognizing the importance and relevance of diversity in society, social work students must develop the skill to communicate how those differences are manifested in defining life experiences, which sometimes may not align with mainstream society.</td>
<td></td>
</tr>
</tbody>
</table>

**SLO 5: SW3600: Effectively analyze social policies that advance social well-being**

<table>
<thead>
<tr>
<th>G: 2</th>
<th>M: 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>To become policy advocates, social work students must learn how to analyze, formulate and advocate for the development or remission of existing social policies that advance the well-being of vulnerable population groups. Being able to critically consider how certain social problems develop and evolve, the consequences resulting from the policy, and the most feasible legislative alternatives to address the problems in an effective and efficient manner is central to the critical thinking process in this context.</td>
<td></td>
</tr>
</tbody>
</table>

### General Education/Core Curriculum Associations

| 9.0 |
| Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate. |

### Measures, Targets, and Findings

**M 1: SW3300: Biopsychosocial and Developmental Application**

<table>
<thead>
<tr>
<th>G: 3</th>
<th>M: 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>The prescribed CTW assignment is in partial fulfillment of a full term paper focusing on the novel The Other Wes Moore: One Name, Two Fates (2010). To complete the CTW requirement, students complete a biopsychosocial assessment of the main character in response to a fictitious letter of inquiry from a public child welfare agency. For the first level of measurement, students construct an ecomap that visually depicts and describes how multiple systems influenced Mr. Moore's biopsychosocial well being. This measure is valued at 4 points. The section of the letter also described the biological, psychological, and social influences on Mr. Moore's development. In addition, identification of individual, family, group, organization, and community strengths and evidence of resiliency are acknowledged. The total points for this section are 20 points.</td>
<td></td>
</tr>
</tbody>
</table>

### Target for O3: SW3300: Apply theoretical perspectives of human behavior to support social practice

Based on enrolled students in the course, a majority of the students will achieve a minimum of 14/20 points on the final paper submission related to the application of bio-psychosocial and developmental assessments of Wes Moore.

### Findings 2012-2013 - Target: Met

The total points for the biopsychosocial and developmental sections of the assignment totaled 20 points. A total of 94 students were enrolled in the course; a total of 86 (91%) students in the course received a score of 14/20, or higher on the bio-psychosocial and development assessment portion of the assignment. Upon submission of the first draft of the paper section, only 39% of the students had scored 70% or higher on that section of the assignment.

**M 2: SW3300: Acknowledgment of Audience**

Based on enrolled students in the course, a majority of the students will achieve a minimum of 14/20 points on the final paper submission related to the application of bio-psychosocial and developmental assessments of Wes Moore.
In forming the letter to the parole officer, students are evaluated on the appropriateness of the tone and voice of the letter, as well as the consistency in tone to the reader (parole officer).

**Source of Evidence:** Written assignment(s), usually scored by a rubric

### Target for O1: SW3300: Demonstrate proficiency in writing and critical thinking relative to assessing human behavior

Based on enrolled students in the course, a majority (70%) of the students will achieve a minimum of 12/16 points on the final paper submission related to the writing mechanics of the letter to the parole officer regarding Wes Moore. This represents a scoring of 75% on the assignment section.

#### Findings 2012-2013 - Target: Met

The total points for the writing mechanics of the assignment totaled 16 points. Of the 94 students enrolled in the course; a total of 73 (78%) students in the course received a minimum score of 12, or higher on writing mechanics. Based on the first draft submitted, only 18% of the students had received a score of 12 or higher for writing mechanics.

### M 3: SW3300: Mechanics of Style and Organization (O: 1)

Students letter submissions are evaluated on letter organization and style, including clear introduction and conclusion, well formed paragraphs, and logical transitions, unbiased statements, use of appropriate grammar, error free spelling, punctuation, APA formatting, as necessary. This section also included a value attributed to the student meeting with the CTW consultant for a total value of 16 points.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

### Target for O1: SW3300: Demonstrate proficiency in writing and critical thinking relative to assessing human behavior

Based on enrolled students in the course, a majority (70%) of the students will achieve a minimum of 12/16 points on the final paper submission related to the writing mechanics of the letter to the parole officer regarding Wes Moore. This represents a scoring of 75% on the assignment section.

#### Findings 2012-2013 - Target: Met

The total points for the writing mechanics of the assignment totaled 16 points. Of the 94 students enrolled in the course; a total of 73 (78%) students in the course received a minimum score of 12, or higher on writing mechanics. Based on the first draft submitted, only 18% of the students had received a score of 12 or higher for writing mechanics.

### M 4: SW3600: Legislative Brief- Problem Definition (O: 5)

Students submitted two drafts of the written sections on the Problem Description and the Legislative Analysis before the final submission. You must give background information with some indicators (social, economic and/or political) about the severity of the problem and the effects of the problem on the state, communities, or specific population groups. Describe which groups are most affected by the problem. How does the problem impact them socially or economically? Scholarly sources should be used to help define the problem. Use U.S. census data sources, state data sources, community survey results to support your problem description. Is the problem present in every community in Georgia, or certain localities? If not, where in the state is it located? Which population groups are most affected by the problem? Are all groups impacted similarly or are there differences? Again, provide national, state or local data to support your problem description. For example, compare counties or states with national data on the issue, if appropriate. A rubric was used to assess performance measures on a scale ranging from 0 (low/no competence) to 20 (very high competence). See Legislative Photo Essay Rubric for complete details.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

### Target for O5: SW3600: Effectively analyze social policies that advance social well-being

There were 98 students enrolled in SW3600 Social Welfare Policy course, consisting of 3 sections, taught by 3 different instructors. A target of 70% of the students will achieve a level of competency of 14 or higher, which is equivalent to 70% of the total measure.

#### Findings 2012-2013 - Target: Met

Based on the final submissions, A total of 69 students (70.4%) of the students enrolled in SW3600 made a final score of 14 or higher on the Problem Definition section of the paper, meeting the target for the course. Due to inconsistencies in the assessments for the drafts, the data on draft scores are not available.

### M 5: SW3600: Legislative Brief - Legislative Analysis (O: 6)

Students submitted two drafts of the legislative analysis section of the paper. This section included the following information: What solution(s) are proposed to resolve the problem? What are the goals of the legislative bill? What does it hope to achieve? What methods or service strategies (e.g., new/amended programs, extended access to services for marginalized groups, new monetary benefits, including tax credits) are proposed to address the defined problem? What specific services or benefits will come from the proposed solution? Are there any eligibility criteria for receiving benefits/services? What groups will receive services/benefits from the proposed solution, and what groups will be excluded from receiving services/benefits, and why? Is there consensus or conflict among various interested parties on what the bill proposes as a solution? What is the ultimate outcome (intended consequences) to result from the proposed solution to the problem? Are there any possible unintended consequences, and what provisions are made to address them? If the proposed solution does not eradicate the problem, then how is the bill a viable solution? A rubric was used to assess performance measures on a scale ranging from 0 (low/no competence) to 20 (very high competence). See Legislative Photo Essay Rubric for complete details.

**Source of Evidence:** Written assignment(s), usually scored by a rubric

### Target for O6: SW3600: Critically analyze and articulate legislative practices that advance social and economic justice

There were 98 students enrolled in SW3600 Social Welfare Policy course, consisting of 3 sections, taught by 3 different instructors. A target of 70% of the students will achieve a level of competency of 14 or higher, which is equivalent to 70% of the total measure.
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

As faculty continue to develop their assignments that capture CTW goals and objectives, they have become more creative in their assignment development. Students in both CTW courses are using photo essays as part of their assignment. Rather than the traditional term paper, students develop photo essays to capture their experiences in the course material, along with written text to expand on an issue. Students are able to be creative in their work while also capturing the essence of course content. For example, the legislative analysis assignment required students to describe a social problem that required legislative action. But in addition, they supplemented their work with photos, videos, audio that illustrated the problem in certain communities. Adjusting the assignment to include these formats helped some students to be more engaged with the course material. It also helped them to think about the problem in "real time", which allowed students to write about the social issues with greater understanding than in the past. Continued use of this assignment format will occur to determine impact on writing skills.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Critical thinking is an ongoing feature of social work education. As noted in previous reports, it is a core competency of the accrediting body for social work education, the Council on Social Work Education. As such, every course in the program addresses critical thinking in some way. Students are now so used to the concept of critical thinking that it is becoming second nature to them. It is presented in all their course syllabi, and at least one assignment in each course has a critical thinking focus to it. An area that illustrates students improvement in their critical thinking skills is the responses on discussion posts. Students in the past have generally made brief comments to discussion post questions, almost as if they are on a social network link. More recently, their is clear substance and relevance to their discussion posts; students use cited works to support their positions, or to raising interesting points. This has been a consistent observance with many of the social work faculty, even those who are not assigned CTW designated courses. While discussion posts are not used as CTW assignments, they do illustrate growth and maturity in their critical thinking students are taking when responding to the posts.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

As noted in this year's findings, there is still the need to work with faculty on how to use a rubric for teaching, and not just grading an assignment. Faculty must also supervise the CTW consultants on how to use the rubric to assess drafts once the CTW coordinator has provided direction. Ongoing training of how to use the rubric and help the student develop their work is an area for continued training. Although the goals were met, the ongoing training will ensure that goal attainment is based on accurate and consistent analyses.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

There have been no major changes to the structure of the academic program over the past year. There is the anticipated leadership change in CTW coordinators for the 2013-2014 year, Dr. Karen Watkins will assume leadership for CTW beginning Fall, 2013.

 Georgia State University
 Assessment Data by Section
 2012-2013 CTW Sociology
 As of 12/12/2013 05:36 PM EST
 (Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request.)
The mission of our department's CTW program is to offer a changing range of courses across our three specialty areas that develop students' analytical, interpretive, and communication skills. Students will be assessed in terms of how well they are able, through their writing, to demonstrate these components of critical thinking: a written articulation of their understanding of sociological work (research reports, articles, books and theories); the ability to analyze and interpret sociological work; and the capability to use the results of their analyses to formulate new research questions and/or to extend analyses in new directions.

**Goals**

**G 1: critical understanding**
Students will be able to articulate in writing their understanding of sociological work.

**G 2: critical writing**
Students will be able to write critically, analytically, and interpretively about sociological work.

**G 3: original critical expansion**
Students will be able to formulate new research questions and/or to extend analyses of sociological work in new directions in their writing.

**Student Learning Outcomes/Objectives**

**SLO 1: understanding (G: 1) (M: 1)**
Students should demonstrate an understanding of sociological work in their writing assignments over the course of the semester. They will be evaluated using this scale: Excellent (4), Very Good (3), Good (2), and Poor (1).

**SLO 2: writing (G: 2) (M: 2)**
Students should demonstrate their ability to critique, analyze, and interpret sociological work in their written assignments over the course of the semester, evidenced by a four-point scale: Excellent (4), Very Good (3), Good (2), and Poor.

**SLO 3: expansion (G: 3) (M: 3)**
Students should demonstrate their ability to use results of analyses to formulate new research questions and/or to extend analyses in new directions in their written assignments over the course of the semester, as evidenced by a four-point scale: Excellent (4), Very Good (3), Good (2), and Poor (1).

**Measures, Targets, and Findings**

**M 1: understanding (O: 1)**
Four professors reported on students in five CTW courses taught during the spring semester: two sections of "Sociological Methods," one section of "Birth and Parenthood," and one section of "Activism, Protest, and Revolution." Data were submitted on 120 students. For examples of assignments, please see attachments. Professors assessed 24% of students as "Excellent" in terms of their demonstration of sociological understanding in their writing assignments across the semester; they assessed 36% as "Very Good"; 26% as "Good"; and 14% as "Poor." Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: understanding**
Our goal is to have a majority of students score "excellent" or "very good" (3 or 4) on this measure; 60% did. This is very similar to the results from last year. Last year's statistics showed a significant decline from the previous year -- when 78% were assessed as "excellent" or "very good" in this measure. Last year, I suggested that the decline might be attributable to the fact that fewer students were assessed and fewer professors participated in assessment than in the previous year or that our students' higher level of success in past years may have been exaggerated. It could also be that the professors who are now participating are simply judging students differently..... In any case, our target for this year was to have a higher proportion of students show strength in this area. We did not meet this target.

**Findings 2012-2013 - Target: Met**
70% of students in 4 CTW classes (3212, 4801, 4802, and 4803) scored a 3 or 4 on metrics. This suggests an increase from the previous year, but still not at the high level of 78% reported by my predecessor.

**M 2: writing (O: 2)**
Four professors reported on students in five CTW courses taught during the spring semester: two sections of "Sociological Methods," one section of "Birth and Parenthood," and one section of "Activism, Protest and Revolution." Data were submitted on 120 students. For examples of assignments, please see attachments. Professors assessed 22% of students as "Excellent" in terms of their ability to critique, analyze, and interpret sociological material in their written work over the course of the semester; they assessed 35% as "Very Good"; 26% as "Good"; and 15% as "Poor." Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O2: writing**
Our goal is to have a majority of students score "excellent" or "very good" (3 or 4) on this measure; 57% did this year. Our target has been met, but we would like to see more students perform in these top categories in the future.

**Findings 2012-2013 - Target: Met**
72% of students scored a 3 or 4 on this measure, surpassing last year’s measure of 57%. This represents a significant increase of nearly 25%. The target has been met and we are exceeding previous reports.
Four professors reported on students in five CTW courses taught during the spring semester: two sections of "Sociological Methods," one section of "Birth and Parenthood," and one section of "Activism, Protest and Revolution." Data were submitted on 120 students. For examples of assignments, please see attachments. Professors assessed 24% of students as "Excellent" in terms of their ability to use results of their analyses to formulate new research questions and/or to extend analyses in new directions in their written work over the course of the semester. They assessed 28% as "Very Good"; 33% as "Good"; and 15% as "Poor."

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: expansion**

Our goal is to have a majority of students score "excellent" or "very good" (3 or 4) on this measure; 52% did this year. This is similar to last year's results. Though we have met our target, we would like to see more students demonstrate positive skills in this area in the future.

**Findings 2012-2013 - Target: Met**

70% of students scored 3 or 4, reflecting another sizable increase from the previous year's measure of 52%. Target has been met, with nearly 3/4 of students in these courses meeting goals.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**assessment tracking**

This academic year, faculty judged that 60% of students are either excellent or very good in terms of demonstrating an understanding, in their writing, of sociological work. Faculty judged that 57% of students are either excellent or very good in terms of demonstrating, in their writing, the ability to analyze and interpret sociological work. Faculty judged that 52% of students are either excellent or very good in terms of their analyses to formulate new research questions and/or extend analyses in new directions. This is similar, albeit with a slight decline, to last year's results. Since the statistics are based on evaluations of about half as many students as last year, I do not think the slight declines are part of a pattern. We are getting similar results, and are achieving or close to achieving our target goals of having a majority of students assessed as excellent or very good in our rubric's measures for critical thinking.

**Implementation Description:** I will communicate regularly with professors teaching CTW courses to inform them of the assessment process and to get their feedback on it.

**Responsible Person/Group:** CTW Ambassador

**CTW assignment development**

Faculty teaching CTW courses will have the opportunity to meet with me to discuss assignment development.

**development and promotion of offerings**

One goal of our CTW plan is to offer a diversity of offerings from our three specialty areas, "Gender and Sexuality," "Family, Health, and the Life Course," and "Race and Urban Studies," and general courses (in addition to our "Sociological Methods" course, which is now always a CTW course). In addition to our Methods course, this past year, we offered CTW courses in "Social Psychology," "Gender and Sexuality," and "Families and Society," broadening our offerings from the previous year, and thus achieving our goal of expanding a diversity of offerings. Our CTW courses must have different course numbers, and hence, different names, than our "regular" courses on the same subjects without the CTW component. This apparently confused students in past years. We have striven to inform them via a variety of social networking strategies, about the CTW courses, feel like we have been successful in this regard this year also.

**Implementation Description:** In concert with our Undergraduate Advisor and the Programming Committee, I will strive to diversify future offerings, and to monitor student satisfaction with the diversity of courses offered. We will also be attentive to any further confusion generated by the complexity of naming and numbering CTW courses to distinguish them from non-CTW courses.

**Responsible Person/Group:** CTW ambassador, Undergraduate Advisor, Programming Committee

**Analysis Questions and Analysis Answers**

**CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?**

Improvements in all three areas from last year. However, I am not sure to what those improvements should be attributed. It may be that the action plans my predecessor instituted are working, but I don't think we can say for sure until/unless we see continued
improvement over time.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

Most significant improvement appears in writing & expansion. Students thus seem better able to do the type of critical thinking through writing and to expand on existing questions through coursework.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

"Understanding" is the category which, while it has shown improvement, appears to show less improvement relative to the other two categories and has not yet retained its high marks it reached a few years back. I am not sure how to address this, as this is my first year in this role.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year's CTW Assessment Report?

CTW seems to be helping aid students in writing and expansion. Not sure the impact on faculty as this does not appear to be measured in the paperwork I have. As this is my first year in this role, I believe that the previous CTW ambassador has been working with faculty to ensure improvement, which seems to have paid off (especially if continued reports show the same or increased levels of success).

---

**Georgia State University**

**Assessment Data by Section**

**2012-2013 CTW Spanish**

(As of: 12/12/2016 05:59 PM EST)

(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

Following lengthy discussions among the faculty in our section, we decided on the following definition, which allows each instructor some room for customization: The writing assignments in our CTW courses will enable students to gain a better understanding of (choose one or more from the following options: commercial, financial, economic, literary, linguistic, cultural, social, historical, etc.) trends in the Spanish-speaking world, and equip students with the tools necessary to query their intellectual and personal positions with respect to the long and complex tradition of Hispanic cultural production, which at times intersects with other traditions with which students may be familiar, and at times diverges from them. Ultimately, students in our CTW courses will be able to comprehend Hispanic ______________ (see previous blank) within their cultural, intellectual, (commercial) and historical contexts, and engage these _______________ (texts... as above) in ways that are both intellectually rigorous and [personally meaningful].

**Goals**

G 1: CTW courses in the Spanish section will prepare students to engage fully with Hispanic societies and ideas.

a. Linguistic proficiency: students will demonstrate proficiency in written (both consumption and production) and spoken (both consumption and production) Spanish.
b. Contextual analysis: students will demonstrate an ability to identify and analyze cultural and historical traditions related to Hispanic culture.
c. Textual analysis: students will demonstrate an ability to understand Hispanic literary texts and to analyze them with respect to basic literary concepts.
d. Scholarly analysis: students will demonstrate an ability to analyze scholarly arguments related to Hispanic culture and literary traditions.
e. Effective written communication skills: students will demonstrate an ability to present their ideas and arguments corresponding to goals a-c in clear and persuasive prose.

**Student Learning Outcomes/Objectives**

**SLO 1: Active reading skills (G: 1) (M: 1, 2)**

SPAN 3307 Introduction to the Study of Literary Texts - One possible informal CTW assignment would require students to read all but the final paragraph of a story. Students will then be asked to write down the ending of the story as they imagine it; they will be intrigued if not shocked by the actual ending; at the very least, students will need to think of the story from an unusual vantage point and will need to pay very close attention to the story’s subtleties, including the way it engages with cultural motifs.

**SLO 2: Historical analysis (G: 1) (M: 1, 2)**

SPAN 3307 Introduction to the Study of Literary Texts - In another possible informal assignment, students would be asked to imagine writing how one of our authors (a female poet/nun from late 17th-century Mexico) would respond to a contemporary feminist treatise by a Puerto Rican writer. Doing so will require students to process and compare currents of thought expressed by authors writing in very different times and places, but who actually have much in common intellectually.

**SLO 3: Reading Comprehension (G: 1) (M: 3)**

Through the use of brief diagnostic questionnaires, instructors will assess students' reading comprehension for both lexical and contextual precision.
Measures, Targets, and Findings

M 1: Assessment Rubric (O: 1, 2)

Score of 6 – Consistently does all or almost all of the following: Accurately interprets evidence, statements, graphics, questions, etc. Identifies the salient arguments (reasons and claims) pro and con. Thoughtfully analyzes and evaluates major alternative points of view. Generates alternative explanations of phenomena or event. Justifies key results and procedures, explains assumptions and reasons. Rationally and objectively follows where evidence and reasons lead. Makes ethical judgments. Language clearly and effectively communicates ideas. Errors are minimal. Score of 4 – Does most of the following: Describes events, people, and places with some supporting details from the source. Makes connections to sources, either personal or analytic. Demonstrates a basic ability to analyze, interpret, and formulate inferences. States or briefly includes more than one perspective in discussing literature, experiences, and points of view of others. Takes some risks by occasionally questioning sources, or stating interpretations and predictions. Demonstrates little evidence of rethinking or refinement of one’s own perspective. Style is appropriate to genre of work. Score of 3 – Does most or many of the following: Responds by retelling or graphically showing events or facts. Makes personal connections or identifies connections within or between sources in a limited way. Is beginning to use appropriate evidence to back ideas. Discusses literature, experiences, and points of view of others in terms of own experience. Responds to sources at factual or literal level. Includes little or no evidence of refinement of initial response or shift in dualistic thinking. Demonstrates difficulty with organization and thinking is uneven. In general, language does not interfere with communication. Errors in grammar and syntax are not frequent; there may be some problems of style. Score of 2 – Does most or many of the following: Misinterprets evidence, statements, graphics, questions, etc. Fails to identify strong, relevant counter-arguments. Draws unwarranted or fallacious conclusions. Justifies few results or procedures, seldom explains reasons. Regardless of the evidence or reasons, maintains or defends views based on self-interest and/or preconceptions. In many places language obscures meaning. Grammar, syntax or other errors are distracting with little evidence of proofreading. Score of 1 – Consistently does all or almost all of the following: Offers biased interpretations of evidence, statements, graphics, questions, information, or the points of view of others. Fails to identify or hastily dismisses strong, relevant counter-arguments. Ignores or superficially evaluates obvious alternative points of view. Argues using fallacious or irrelevant reasons, and unwarranted claims. Does not justify results or procedures, nor explains reasons. Exhibits close-mindedness or hostility to reason. In most places language obscures meaning. Grammar, syntax or other errors are repeated with no evidence of proofreading. Goal is 4

Target for O1: Active reading skills

75% of students will score at least 4/6 on this writing assignment based on the assessment rubric.

Findings 2012-2013 - Target: Met

SPAN 3307: 76% of students scored at least 4/6 on this assignment: 16% scored 6/6, 31% scored 5/6, 29% scored 4/6 = 76%. 14% scored 3/6, 9% scored 2/6, 1% scored 1/6, 0% scored 0/6. SPAN 3310: 81% of students scored at least 4/6 on this assignment: 11% scored 6/6, 39% scored 5/6, 41% scored 4/6 = 81%. 10% scored 3/6, 7% scored 2/6, 4% scored 1/6, 0% scored 0/6.

Target for O2: Historical analysis

75% of students will score a minimum of 4/6 on this writing assignment based on the assessment rubric.

Findings 2012-2013 - Target: Partially Met

SPAN 3704 74% of students scored a minimum of 4/6 on this writing assignment: 9% scored 6/6, 26% scored 5/6, 39% scored 4/6 = 74%. attainment. 21% scored 3/6, 5% scored 2/6, 0% scored 1/6, 0% scored 0/6. SPAN 3310: 77% of students scored a minimum of 4/6 on this writing assignment: 13% scored 6/6, 28% scored 5/6, 46% scored 4/6 = 77% attainment. 17% scored 3/6, 4% scored 2/6, 2% scored 1/6, 0% scored 0/6.

M 2: Student Survey (O: 1, 2)

At the end of the spring semester 2012, I designed and distributed – for purposes internal to the Spanish section – a CTW exit student survey (please see attachment "CTW End of Semester Survey"). Beginning in the fall of 2012 I intend to distribute this survey both at the start and conclusion of the semester. Although this survey constitutes an "indirect measure," I think it will prove a valuable tool in assessing student perceptions of CTW both in terms of the Spanish section and within the broader university community, and in reinforcing and furthering the general aims of the CTW mandate. I received survey results from two SPAN 3307 classes and one SPAN 3310 class. SPAN 3307 section "A" To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement and #6 indicating strong disagreement at the other extreme, 5 students replied #1, 5 students replied #2, 3 students replied #3, 4 students replied #4, and 1 student replied #5. To the statement "I understand how this particular course fits in within the university's CTW initiative", 5 students replied #1, 5 students replied #2, 3 students replied #3, 4 students replied #4, and 1 student replied #5. To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement and #6 indicating strong disagreement at the other extreme, 4 students replied #1, 7 students replied #2, 3 students replied #3, 2 students replied #4, and 2 students replied #5. To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement and #6 indicating strong disagreement at the other extreme, 4 students replied #1, 7 students replied #2, 3 students replied #3, 2 students replied #4, and 2 students replied #5. To the statement "I believe writing can enhance my critical thinking skills" 9 students replied #1, 6 students replied #2, 2 students replied #3, 3 students replied #4, 1 student replied #5. To the statement "I believe writing can enhance my critical thinking skills" 9 students replied #1, 6 students replied #2, 2 students replied #3, 3 students replied #4, 1 student replied #5. To the statement "I believe writing can enhance my critical thinking skills" 9 students replied #1, 6 students replied #2, 2 students replied #3, 3 students replied #4, 1 student replied #5. Additional student comments: "Writing the required papers did not improve my writing or critical thinking skills, it simply made the class more stress and didn’t change the way I thought." "CTW help [sic] students to developed their [sic] knowledge." I think that the tests need to be more specific. "This course could have improved my critical thinking skills" SPAN 3307 section "B" To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement at one extreme and #5 indicating strong disagreement at the other extreme, 4 students replied #1, 7 students replied #2, 3 students replied #3, 2 students replied #4, and 2 students replied #5. To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement at one extreme and #5 indicating strong disagreement at the other extreme, 4 students replied #1, 7 students replied #2, 3 students replied #3, 2 students replied #4, and 2 students replied #5. To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement at one extreme and #5 indicating strong disagreement at the other extreme, 4 students replied #1, 7 students replied #2, 3 students replied #3, 2 students replied #4, and 0 students replied #5 To the statement "I believe writing can enhance my critical thinking skills" 11 students replied #1, 5 students replied #2, 2 students replied #3, and 1 students replied #5. To the statement "I believe writing can enhance my critical thinking skills" 11 students replied #1, 5 students replied #2, 2 students replied #3, and 1 students replied #5. Additional student comments: "Writing the required papers did not improve my writing or critical thinking skills, it simply made the class more stress and didn’t change the way I thought.""
details of action plans for this cycle (by established cycle, then alpha)

75% of students attain 4/6 on assessment rubric

Additional student comments: "A good selection of readings" "I am not clear on what exactly the university's CTW initiative is, but I do feel that this class did improve my abilities to critically analyze poetry & literature. My reading and writing in Spanish have improved since the first day of class" "This class was exactly what I expected & I got from it what I expected. I enjoyed the class discussion, through which we gained not only further critical thinking, reading & writing skills, but also speaking & discussion skills & which created a communal atmosphere" "I enjoyed the writing assignments more than the tests in this course. It gives one the opportunity to express oneself (sic) outside of right or wrong answers" "I really enjoyed this class. My ability to interpret literature definitely improved. Also, I learned how to write more clearly in Spanish. It was a lot of fun" "I will definitely attest having had a bit of a ‘reality check’ with one particular essay in this course. I knew that I grasped the story, and what point I wished to proved -- but I was pushed to observe my method of writing. Upon the revision, it was very clear to me that I had not been conveying exactly what I meant to and I explored other options of doing so. As such, I felt this course was highly beneficial, and I included enough oral communication to not leave me feeling like I was drowning" "The short answers we would have to write in response to a question presented in class was very helpful in this aspect of the course. It helped me learn to write a concise short answer in the time given and at the same time it wasn't very heavy in the sense that the questions were pertinent to us and weren't very 'abstract and philosophical'" "I really enjoyed this class. I've been exposed to hispanic literature. I really understand the richness of hispanic literature and I loved the poems!" Conclusions about the two 3307 courses: It is clear that while both courses were 3307 CTW courses and a plurality of students reported generally favorable outlooks toward the courses and CTW, there are also striking differences between sections in terms of awareness of CTW and enthusiasm toward it. SPAN 3310 To the statement "I understand the university's CTW initiative" with #1 indicating strong agreement at one extreme and #5 indicating strong disagreement at the other extreme, 8 students replied #1, 2 students replied #2, 4 students replied #3, 3 students replied #4, and 2 student replied #5. To the statement "I understand the university's CTW initiative", 6 students replied #1, 5 students replied #2, 4 students replied #3, 2 students replied #4 and 2 students replied #5. To the statement "I knew within the first few weeks of the term that this course is a CTW course", 11 students replied #1, 2 students replied #2, 1 students replied #3, 1 student replied #4, and 3 students replied #5. To the statement "I am interested in improving my critical thinking skills" 7 students replied #1, 6 students replied #2, 2 students replied #3, 1 students replied #4, and 3 students replied #5 To the statement "I believe writing can enhance my critical thinking skills" 6 students replied #1, 6 students replied #2, 4 students replied #4, and 1 students replied #5. To the statement "This course required me to write in order to engage my critical thinking skills" 7 students replied #1, 5 students replied #2, 2 students replied #3, 3 student replied #4, and 2 students replied #5. To the statement "This course improved my critical thinking skills" 5 students replied #1, 5 students replied #2, 5 students replied #3, 3 students replied #4, and 1 student replied #5. Additional student comments: "The professor has not only improved my critical thinking skills but also my writing skills and I feel that I understand the process of writing much better" "This class did a great job of presenting the facts and not using methods of persuasion. I like the eportfolios because it required us to read, but the question also required us to think critically about the material we were presented" "I think that this course was a good way to develop critical thinking skills because we were able to think for ourselves, making logical conclusions for ourselves without judgment put with positive reinforcers" "I think CTW courses are helpful to prepare for grad school & GRE exam" Source of Evidence: Exit interviews with grads/program completers

Target for O1: Active reading skills

The student survey administered at the end of the Fall 2012 semester will add a question about student perceptions on their active reading skills. The targeted goal is for at least 75% of students to report in the 1-2 range.

Target for O2: Historical analysis

The student survey administered at the end of the Fall 2012 semester will add a question about student perceptions on their historical analysis skills. The targeted goal is for at least 75% of students to report in the 1-2 range.

M 3: Reading comprehension (O: 3)

75% of students will score 75% or better on brief diagnostics given at regular intervals that determine successful reading comprehension.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O3: Reading Comprehension

75% of students will score at least 80% on brief diagnostics given at regular intervals that determine successful reading comprehension.

Findings 2012-2013 - Target: Not Met

SPAN 3307 72% of students scored a minimum of 4/6 on this writing assignment: 11% scored 6/6, 19% scored 5/6, 42% scored 4/6 = 72% attainment. 20% scored 3/6, 4% scored 2/6, 4% scored 1/6, 0% scored 0/6 = 28% no attainment. SPAN 3310: 78% of students scored a minimum of 4/6 on this writing assignment: 12% scored 6/6, 33% scored 5/6, 33% scored 4/6 = 78% attainment. 14% scored 3/6, 6% scored 2/6, 2% scored 1/6, 0% scored 0/6.

Details of Action Plans for This Cycle (by Established cycle, then alpha)

75% of students attain 4/6 on assessment rubric

Based on the CTW assessment rubric, the CTW ambassador for the Spanish section (along with other participating faculty) will continue working to educate students taking Spanish CTW classes on the various elements of said rubric and its function in measuring student gains in critical thinking. Participating faculty will place greater emphasis on the attainment of a satisfactory score (4/6) based on the rubric and may implement a series of revisions to ensure attainment of minimum standards.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Assessment Rubric | Outcome/Objective: Active reading skills

Projected Completion Date: 05/2011
Responsible Person/Group: CTW Ambassador/Spanish section (currently Rudyard Alcocer)
Budget Amount Requested: $0.00 (no request)
### 75% of students reach 4/6 based on assessment rubric
This particular assignment is more challenging to students because it calls on them to recall details of a text they read earlier in the semester. The greater difficulty is undoubtedly related to the lower percentage of students attaining a satisfactory score based on the rubric than in the other activity ("active reading skills"). Based on the CTW assessment rubric, the CTW ambassador for the Spanish section (along with other participating faculty) will continue working to educate students taking Spanish CTW classes on the various elements of said rubric and its function in measuring student gains in critical thinking. Participating faculty will place greater emphasis on the attainment of a satisfactory score (4/6) based on the rubric and may implement a series of revisions to ensure attainment of minimum standards.

### Continued efforts toward attainment of 75% goal
As the Spanish section continues its implementation of the CTW initiative, it will make greater and more concerted efforts toward student achievement of the 75% (score 4/6 or higher) goal. To this end, the ambassador for the Spanish section will notify participating faculty during the semester midpoints to clarify and underscore the presence of the 75% goal so as to encourage better student performance.

### Increased clarity and visibility of CTW assignments
The action plan for this particular measure is similar to the one on close reading skills (see below). The Spanish section has, I believe, sound CTW assignments, rubrics, and measures; at this point, the task becomes one of continuing our progress toward the desired 75% attainment goal. A central task for the 2011-12 academic year will be to increase the clarity and visibility of CTW assignments. While the Spanish section is making steady progress in its implementation of the CTW initiative, occasionally participating faculty and students are not constantly aware throughout the semester that they are part of the initiative until it becomes time to report on findings for the semester in question. Consequently, while we are making improvements toward the 75% attainment goal (72% this year vs. 70% last year), my task in the year ahead is to more regularly emphasize our work toward the desired goal.

Projected Completion Date: 05/2013
Responsible Person/Group: Rudyard Alcocer and SPAN 3310 instructors.

Georgia State University  
Assessment Data by Section  
2012-2013 CTW Speech  
As of: 12/12/2016 05:59 PM EST  
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**
In Speech “critical thinking” is the art of actively producing and analyzing arguments for particular audiences in specific cultural and historical contexts. Critical thinkers are able to construct and assess arguments in their cultural situatedness; evaluate stated or unstated claims and their supporting forms; recognize the creation of knowledge through symbol systems; and converse and pose question about the production of knowledge through the communicative process.

**Goals**

**G 1: Understand Cultural Context**
Since the cultural context of any communicative act is critical to the understanding of that act, students should be able to recognize the cultural context, construct arguments clearly, and adapt those arguments to that cultural context.

**G 2: Evaluation**
Students should be able to evaluate supporting materials and conclusions effectively in their own analyses.

**G 3: Actual Audience Adaptation**
Students should be able to produce a multi-level message (verbal and nonverbal elements) that fits a particular audience at a particular time and place. To do so requires students to understand their target audience’s communication preferences and what would be persuasive to them.

**Student Learning Outcomes/Objectives**

**SLO 3: Analytical Reaction Essays (G: 1) (M: 1)**
Students wrote several analytical reaction essays which required them to relate a specific concept from the day’s material to materials the instructor provided (articles, hand outs, or videos). Five of these papers were used in this assessment. Students were required to: clearly define the concept, clearly explain the situation, and clearly connect the concept to the situation. The assignment details (and CTW Rubric) are provided in the attached document.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**
3.1 Enhance a research culture.

**SLO 4: Targeted Health Message Explanation (G: 1, 2) (M: 2)**
Students studied a particular group all semester, and for this assignment, they completed a “targeted health message” for their group. This required identifying a specific health concern, explaining that concern and articulating how that concern was appropriate for their group; in addition, they created an actual video, a Public Service Announcement (see next objective). Students were expected to explain the format of this video (use of text, sound, and visuals) and articulate how this was appropriate to their selected group.

**General Education/Core Curriculum Associations**
1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate
comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)

**Strategic Plan Associations**

3.1 Enhance a research culture.

**SLO 5: Targeted Health Message - Actual Public Service Announcement (G: 3) (M: 3)**

Students studied a particular group all semester, and new this year, students created a video. The video was a Public Service Announcement targeting their group. This video required them to incorporate knowledge of the group’s particular health problems/vulnerabilities with knowledge of their communication preferences in order to create a persuasive message. The video required students to think critically about their use of text, visuals, and sound.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

2. Student promotion and progression

**Standard Associations**

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
4. Outcomes of research (3.3.1.4)
5. Outcomes of community/public service (3.3.1.5)

**Strategic Plan Associations**

1.5 Other efforts in support of Goal 1 (Undergraduate Education).

3.1 Enhance a research culture.

**Measures, Targets, and Findings**

**M 1: Critical Thinking Rubric 1 Revised (O: 3)**

This rubric focuses on defining the concept (scored 1-5), explaining the situation surrounding the concept (scored 1-5), and clearly connecting the concept to the situation (scored 1-5). Although these scores were components of the grade on each assignment, these scores did not constitute the entire grade; an additional 5 points focused on other academic issues not related to critical thinking and are thus, not reported here. See attached sheet “Assessed Analytical Essay Assignment and CTW Rubric Persuasion 2012.”

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O3: Analytical Reaction Essays**

scores of 4/5 by the majority of the students on each rubric item

**Findings 2012-2013 - Target: Not Reported This Cycle**

This rubric/assignment was not assessed this year; it has been replaced by the new assignment which requires students to create an actual Public Service Announcement. Rather than simply evaluate how students write about audience adaptation, evaluating the new assignment enables us to examine a produced message to determine their ability to use what they know and adapt the message to the target audience.

**M 2: Critical Thinking Rubric 2 (O: 4)**

This rubric assessed the student’s ability to adapt a message to a particular audience, requiring students to understand the cultural context and to be able to evaluate supporting materials and conclusions effectively. Students studied a particular group all semester, and for this assignment, they completed a “targeted health message” for their group. This required identifying a specific health concern, explaining that concern and articulating how that concern was appropriate for their group; in addition, they were expected to identify the format of this health message (e.g., banner ad on website, print advertisement in paper, public service announcement on the radio, etc.), explain the details of the format, and articulate how this was appropriate to their selected group. The rubric assessed their ability to do this using a 5-point Likert Type Scale. Please see attached sheet “Competent Adaptation to Audience Rubric.”

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Targeted Health Message Explanation**

The majority of students will achieve an average of 4/5, or a score of 80%, as an average across all 6 rubric items.
Details of Action Plans for This Cycle (by Established cycle, then alpha)

**Rubric Revision**

Written in summer 2010: The rubric may need to be expanded or tailored more directly to individual assignments. The speech faculty will review these results and the rubric in the fall to determine how the rubric should be revised. Written in 2011: Discussions in the Fall of 2010 resulted in the creation of the two rubrics used this past academic year, one for each CTW course in the speech major. These rubrics are tailored to the current assignments but need to be discussed further by the faculty to determine how validly these may measure "critical thinking" as the faculty have defined it. Written in 2012: The faculty briefly discussed the rubrics and revised the rubric for SPCH 3050 Persuasion modestly. The faculty also discussed whether or not the definition for critical thinking needed to be altered, more specifically to be less complex. Those discussions will continue this fall, and if the definition changes, then the rubrics will be changed accordingly. Written in 2013: First, the faculty agreed that a smaller sample should be used for assessment purposes so this limited the number of rubrics needing revision. Second, the creation of the new PSA assignment required two rubric adjustments; a new rubric had to be created for the actual PSA and the rubric for the written explanation of the PSA had to be modified. Both of these were completed and implemented in this cycle.

**Assignment Bank Development**

The speech faculty discussed in the Fall of 2010 the idea of creating a list of possible assignments to use in our CTW courses. In 2009-2010, two assignments were used in the SPCH 3250 Persuasion course, and in 2010-2011 a new assignment was used in this course. This was the first year we offered SPCH 4800, and the same assignment was used both semesters, though that assignment differed from those offered in the persuasion course. As new faculty move into the teaching rotation for these courses, it will become important to develop a bank of possible assignments that meet assessment requirements while still allowing instructors to have freedom in teaching the courses. Several assignments now exist, and it will be important to develop additional ones, as well as determine how effective any of these assignments have been for our students.

**Faculty Training**

The speech major has grown significantly over the past several years, and we will need additional sections of both CTW courses each year. This will require a more standard training procedure for the faculty.

**Target for O5: Targeted Health Message - Actual Public Service Announcement**

There are two types of targets to be achieved: 1) every student will earn 4 or 5 on one of the three dimensions; 2) the majority of students will earn 12/15 points total across all three dimensions. The first target indicates that students have an superior audience adaptation score on one dimension (text, sound, or visuals) and the second target indicates that students have an excellent audience adaptation score overall. That is, in order to achieve 12 points, students must earn an average score of 4 across the dimensions.

**Findings 2012-2013 - Target: Partially Met**

Thirteen videos were assessed from the Spring 2013 section of this course. The first target was not met; two students did not earn a 4 or 5 on any of the dimensions. Those videos did not clearly adapt to the audience with text, visuals, or sound. 11/13 students did though. For the second target, 7 of 13 students did earn 12 points or more; this is barely a majority so this target was met.

**Findings 2012-2013 - Target: Met**

Of 21 students, 16 achieved an average score of 4/5 or higher, thus meeting this target.

**Source of Evidence: Video or audio tape (music, counseling, art)**
small group meetings were impossible to schedule with the various lecturers/TT faculty assigned to the courses, and one-on-one meetings continued. This fall, training will be implemented during a speech area faculty meeting.

**Responsible Person/Group:** CTW Ambassador Jaye Atkinson

### Student Advancement

In our Capstone course (SPCH 4800 Communication & Diversity), we require the students to "describe" a targeted health message that they would create for the group they have studied all semester long. The students have managed to describe interesting, appropriate, and research-based messages, and our past assessment indicates that these have been effective (ie, our achievement targets have been met both fall and spring semesters, 2010-2011). We thought we would advance this project, to challenge the students to "create" the messages rather than merely describe them. The description will still be required, as this description is the explanation/justification that the content and format of their targeted health message is appropriate for their particular groups. When the speech faculty first discussed this assignment, their intent was that the students would actually "create" these messages, thus fulfilling part of the major's mission (not just knowing what was involved in an effective message or analyzing effective and ineffective messages but also creating effective messages). In 2011-2012 faculty kept the assignment focused on description, and this past year, the students did not meet the target achievement levels. This could be due to the one section sample size; perhaps students in other sections did manage to complete the assignment more effectively. The detailed analysis revealed that students did select an appropriate health topic, explained that topic, and selected a format for the health message; the students did not, however, explain the format in detail or why it was appropriate for their particular target audience, their group. This "targeted health message" is the very last component of a 4-paper "capstone portfolio" assignment, and it is possible that some level of fatigue factored into their ability to complete this portion of the assignment. This is also the only piece of the portfolio that has no draft reviewed; it may be essential for student advancement to provide feedback on a draft of this particular piece of the assignment.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Critical Thinking Rubric 2  
- **Outcome/Objective:** Targeted Health Message Explanation

**Implementation Description:** Instructors for SPCH 4800 will need to alter the final assignment in the course. In 2011-2012, faculty did not alter the assignment. This will be discussed at a fall speech area faculty meeting to determine two things: 1- do faculty wish to have students "create" or merely "describe" this targeted health message, and 2- if the faculty members choose "create" then how should the rubric be revised?

**Responsible Person/Group:** Jaye Atkinson, as CTW Ambassador, will alter the final assignment in her section of the course AND offer training and support to other faculty teaching SPCH 4800 this academic year.

### Student Articulation

In our SPCH 3250 course, one of our achievement targets was not met (for the first writing assignment assessed, though it was met for the second writing assignment assessed). This suggests that further instruction explaining how to connect a particular course concept to a specific situation could benefit the students earlier in the course. The experience of writing these papers does seem to improve their ability to perform, but additional instruction could enhance their performance even more. As such, the speech faculty will discuss shorter writing assignments that require students to articulate the connections between course material (e.g., theory or theoretical concept or research finding) and a particular situation (e.g., presidential campaign slogan, public service announcement, etc.). Brainstorming on these types of assignments will add to our "assignment bank" and will enable instructors to offer students further experience articulating the relationship between concepts and situations. Written in 2012: As indicated, the focus shifted toward making sure students could articulate a connection between a concept and the situation, and this was the only rubric item for which students met the achievement target. This may be an "overcorrection" on our part, and thus, we now need to be sure students can articulate clearly the basics (ie, the concept and the situation) before then making the connections between the two.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Critical Thinking Rubric 1 Revised  
- **Outcome/Objective:** Analytical Reaction Essays

**Implementation Description:** See "Implementation Notes" for further details on 2011-2012

**Responsible Person/Group:** Speech faculty to brainstorm and discuss, then instructors for SPCH 3250 will need to implement these new assignments in their courses

### Assessment Sample

This past year is the first academic year to involve such small samples for assessment purposes (one section per course). This small sample may be partially responsible for the lack of target achievement scores being met, but more importantly, it may also limit what actions need to be implemented in the upcoming academic year. New CTW faculty simply did not respond to repeated requests for assessment data, and this lack of response will be discussed at the departmental fall faculty meeting, as well as the speech area faculty meeting.

**Established in Cycle:** 2011-2012  
**Implementation Status:** Planned  
**Priority:** High

**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Critical Thinking Rubric 1 Revised  
- **Outcome/Objective:** Analytical Reaction Essays

**Implementation Description:** Of the four sections of each course offered annually, at least two sections of each course will be included in the assessment sample.

**Responsible Person/Group:** Faculty teaching CTW courses and Jaye Atkinson as CTW Ambassador

### Assignment Clarity

The PSA assignment was new this year, and the assignment description for the students may not have been clear. Specifically, students may not have understood that their semester's worth of research on their group was to inform their text, visual, and sound decisions in the creation of their videos. This may explain why some students did not perform particularly well in the creation of these videos; the importance of connecting their creations to their groups was not emphasized enough. Although target expectations for the written explanations were met, further clarity about what to include in these written descriptions could improve other students' learning, too.
Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

The first accomplishment was to decrease the sample size for assessment purposefully. Much time has been wasted in previous years trying to get assessment information from every section of both CTW courses, and the speech faculty decided that collecting assessment data from all CTW sections was unnecessary. This was one of the action plans from last year. Revising rubrics, a second accomplishment based on a previous action plan, was also completed this past year. Since one of the major assignments was altered, an entirely new rubric needed to be created for evaluating student-created Public Service Announcements. In addition, the written explanation accompanying these PSAs required a revised assignment sheet and a revised rubric. Perhaps most importantly, students finally CREATED their actual Public Service Announcement. The speech faculty have always desired to have students do this, and yet, until this year, it has not been required. iPads were awarded to one of the speech capstone sections, and this award enabled the students to complete the PSA assignment without hardship.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

The speech faculty agreed to change the assessment measures, and the current assessment measures do not clearly allow for such an analysis. Instead, the current procedures enable us to understand a difference in students’ understanding of a message and their creation of a message. That is, students were very successful in writing about what should be done in their Public Service Announcements; they could identify and explain appropriate health information for their group and use text, visuals, and sounds that would appeal to their target audiences. The creation of these PSAs, however, was a different story; most of the students were NOT able to create a PSA that truly fit their target audiences. In many communication situations, people know what to do and fail to act accordingly; this will be the new emphasis for the next school year.

CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

We used to assess early and late assignments in order to determine student progress; we may need to consider doing that again. For our 3000-level CTW course, Persuasion, we were creating a bank of assignments for various instructors to use, but new instructors are simply creating new assignments. As new instructors get scheduled for the capstone course, they are also creating new assignments, and in two cases this past year, instructors did not use the required assignment. As a result, assignment variety is becoming problematic and must be addressed with a speech-faculty-wide conversation in the fall 2013. The assignment issue may also be the result of more casual, one-on-one training sessions for new faculty teaching the CTW courses. The training needs to become more formal in 2013-2014, ensuring that requirements for the courses are being met by ALL sections of the courses. If other departments have a simple training agenda, it may be helpful to examine those.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

The primary impact on our academic program has been a revision of the speech major and its learning objectives; this resulted from CTW and the assessment of the speech major. Students are definitely getting more writing experience in the CTW courses, as well as non-CTW courses. The faculty, on the other hand, seem more frustrated by the students’ inability to write clearly and effectively. As a result, the department is creating a writing lab in order to provide further, discipline-specific support to students in these courses (though at first, the focus will be on journalism students, then expanding to the other majors in the department). The department has sought to increase the number of instructors in these courses since last year’s assessment report; this will require advanced training for these instructors to be sure that this does not decrease the quality of the CTW experience.

Georgia State University
Assessment Data by Section
2012-2013 CTW Women's Studies
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose

Women's Studies at Georgia State University contributes to the university's broader mission of encouraging critical thinking through a focus on feminist interdisciplinary scholarship, teaching, and community participation. Women's Studies began by recognizing how sex and gender inform academic disciplines and impact the politics of knowledge production. We therefore make explicit the ways in which gender and sexuality, in connection with other categories such as race, class, ability, and age, construct our understandings of the world. Furthermore, we analyze the ways public discourse relies on gender and sexuality to conceptualize such issues as war and militarism, policy, the environment, education, healthcare, economics, the media, and popular culture. These courses will help students develop cognitive and analytical skills necessary to fulfill our learning outcomes: they will be able to identify and analyze arguments, they will be able to demonstrate knowledge of theoretical perspectives pertinent to women's studies, they will be able to demonstrate their writing skills as defined by the ability to organize material, provide sufficient evidence, and formulate new research questions.
Goals

**G 1: Process of constructing arguments**
These courses will help students become strong writers; they will be able to think critically and organize material, understand and evaluate evidence and theorize new and interesting research questions.

**G 2: Demonstration of knowledge**
Students will be able to demonstrate both their knowledge of the field(s) and ability to use feminist/womanist perspectives in their work.

**G 3: Critical thinking through reading**
Students will demonstrate their ability to critically interpret texts, including finding main points and outlining arguments.

### Student Learning Outcomes/Objectives

Measures, Targets, and Findings

<table>
<thead>
<tr>
<th>M 1: In 3010, Final Paper (O: 1, 2, 3)</th>
</tr>
</thead>
</table>
| Students will prepare their own question for this assignment. Rather than answering the questions the teacher has posed, students will formulate a question that calls for an engagement with multiple authors. Learning to construct a meaningful question and then answering it will provide students with the basic skills needed to write longer research papers and reflective essays; in particular, formulating research topics and questions about which to build a strong paper. For assessment, the rubric for measuring these issues involves a ranking of 1-5 along these issues: 1) Formulating a strong question 2) Identifying the main points of the cited texts 3) Demonstrating knowledge of feminist theoretical approaches 4) Demonstrating basic writing skills, on both organizational and sentence structure levels For a more thorough explanation, I am including the CTW departmental rubric: CTW Departmental Rubric – Women's Studies 5 – Excellent: n Demonstrates an incisive understanding of the main point(s) and supporting arguments for the text n Skillfully utilizes appropriate feminist/womanist theoretical perspectives in the analysis n Applies interdisciplinarity approaches to a specific project n Fully explores the implications of their project n Fully explains all assumptions and reasoning in their argument n Provides an excellent thesis that formulates innovative ways of analyzing the topic n Thoroughly supports their claims n Logically organizes their writing n Writes clearly and concisely, with superior and elegant style 4 – Very Good n Generally grasps the main idea and supporting points of the text n Uses sufficient feminist/womanist theoretical perspectives n Utilizes some interdisciplinarity in the project n Explores many ramifications of the project n Fully explains most assumptions and reasoning n Provides a clear, well-formed thesis that provides a new approach to the topic n Supports most claims sufficiently n Logically organizes the writing n Writes clearly and concisely, with few grammatical or punctuation errors 3 – Good n Demonstrates some understanding of the main idea, although may show some confusion between main and supporting ideas n Demonstrates a basic understanding of feminist/womanist theoretical perspectives n Shows some idea of what interdisciplinarity consists of n Explores at least one major implication of the project n Shows some understanding of their own assumptions and reasons n Provides a clear thesis, even if it is not particularly new n Provides adequate support for claims n Has few logical weaknesses in their text n Has some grammar/punctuation errors, but still clearly written 2 – Needs Improvement n Has difficulty distinguishing between main and supporting ideas n Shows some confusion about theoretical perspectives n Does not really grasp the notion of interdisciplinarity n Does not think past the project enough to articulate implications n Utilizes unquestioned assumptions n Thesis simply states topic, rather than argument n Does not include sufficient support for subpoints n Includes major logical and organizational weaknesses n Includes far too many grammar/punctuation errors 1 – Unsatisfactory n Cannot find a main idea and supporting ideas in a text n Does not really understand what theoretical perspectives consist of n No concept of interdisciplinarity n Little understanding of implications n Utilizes unquestioned and unstated assumptions n No discernible thesis n Very little evidence or support for claims n Deeply problematic syntax n No discernible organizational structure n So many grammar problems that the paper is difficult to read

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Identify main points and arguments**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

This year, we found that 100% of students received at least a 3, and 83% received at least a 4, suggesting that this target was more achievable with the revised assignment.

**Target for O2: demonstrate knowledge of theoretical perspectives**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

This year, we found that 100% of students achieved at least a 4 on this aspect of the rubric, again showing both the students' acquisition of knowledge as well as perhaps a strengthened assignment.

**Target for O3: writing skills**

Again, on each item of the rubric associated with writing skills, our target is for 75% of students to achieve a 4 or 5, and for all students to receive a 3.

**Findings 2012-2013 - Target: Partially Met**

This year, we found that 83% of students achieved at least a 4 on this aspect of the rubric, reflecting a need for further improvement.
On each item of the rubric, we found that all students did receive a 3, but only 67% received a 4 or 5, suggesting that we need to continue to work to improve basic writing skills. In general, the issues that we continually face involve development; we need to help students understand how to explore topics thoroughly and provide sufficient evidence for all of their claims. Also, the same students who have trouble with these sorts of issues are also having some challenges with basic sentence structure, which suggests that the writing skills are all connected.

**M 2: In 3010, Short Papers (O: 1, 3)**

Students will write two 2-3 page papers that explore course readings and themes in greater detail. You might: 1) Use (at least 2) theorists from course readings to analyze some aspect of popular culture, daily life, or social interactions, politics, literature, art, etc. 2) take issue with a theory or theorist we have read. In this case, you will need to use other sources (in addition to the ones you critique, either from course readings or from outside sources), to back up your claims. 3) put two (or more) theorists from course readings in conversation with one another to expand on or develop a key debate within feminist theory. These are just suggestions -- as long as you have an original and clear thesis statement that is grounded in course readings, you may develop a paper about whatever you are interested in exploring further.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O1: Identify main points and arguments**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Partially Met**

This year, we found that students improved substantially over the course of the semester. In the collection of earlier papers, we found that 67% received at least a 3, and 50% received a 4 or 5, whereas in the latter papers, we found that 83% received at least a 3, and 67% received a 4 or 5, so that even though we did not reach our target, we are coming close, and it does suggest students are improving throughout the course of the semester.

**Target for O3: writing skills**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**M 3: In 4920 Final Paper (O: 4, 5, 6, 7)**

Senior Research in Women's Studies gives students an opportunity to do advanced work on a chosen topic. Both student and instructor will decide upon a project that the student will complete during the semester. The instructor is responsible for meeting with the student at agreed-upon times during the semester, for guiding and evaluating the student’s work, and for assigning a grade. The student is responsible for completing the requirements agreed upon with the instructor. The main requirement for this course is the major paper, which should be approximately 20-25 pages long, and follow appropriate academic conventions for a research paper, including a substantial, properly cited bibliography. This paper must go through a revision process to qualify it for CTW. I am including the CTW departmental rubric for clarity here: CTW Departmental Rubric – Women's Studies 5 – Excellent: n Demonstrates an incisive understanding of the main point(s) and supporting arguments for the text n Skillfully utilizes appropriate feminist/womanist theoretical perspectives in the analysis n Applies interdisciplinary approaches to a specific project n Fully explores the implications of their project n Fully explains all assumptions and reasoning in their argument n Provides an excellent thesis that formulates innovative ways of analyzing the topic n Thoroughly supports their claims n Logically organizes their writing n Writes clearly and concisely, with superior and elegant style 2 – Needs Improvement n Uses sufficient feminist/womanist theoretical perspectives n Utilizes some interdisciplinary approaches in the project n Explores many ramifications of the project n Fully explains most assumptions and reasoning n Provides a clear, well-formed thesis that provides a new approach to the topic n Supports most claims sufficiently n Logically organizes the writing n Writes clearly and concisely, with few grammatical or punctuation errors 3 – Good n Demonstrates some understanding of the main idea, although may show some confusion between main and supporting ideas n Demonstrates a basic understanding of feminist/womanist theoretical perspectives n Shows some idea of what interdisciplinary consistency consists of n Explores at least one major implication of the project n Shows some understanding of their own assumptions and reasons n Provides a clear thesis, even if it is not particularly new n Provides adequate support for claims n Has few logical weaknesses in their text n Has some grammar/punctuation errors, but still clearly written 2 – Needs Improvement n Has difficulty distinguishing between main and supporting ideas n Shows some confusion about theoretical perspectives n Does not really grasp the notion of interdisciplinarity n Does not think past the project enough to articulate implications n Utilizes ungrounded assumptions n Thesis simply states topic, rather than argument n Does not include sufficient support for subpoints n Includes major logical and organizational weaknesses n Includes far too many grammar/punctuation errors 1 – Unsatisfactory n Cannot find a main idea and supporting ideas in a text n Does not really understand what theoretical perspectives consist of n No concept of interdisciplinarity n Little understanding of implications n Utilizes unquestioned and unstated assumptions n No discernable thesis n Very little evidence or support for claims n Deeply problematic syntax n No discernable organizational structure n So many grammar problems that the paper is difficult to read

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Demonstrate writing skills through the creation of new and focused research questions**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

For the 2012-13 academic year, all students received at least a 4 on their revised paper (with an excellent average of 4.75), although the average was only 3.5 for the rough draft (which speaks to the students’ skill level when they began this work).

**Target for O5: Theoretical Perspectives**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

On the revised paper, we once again found that 100% of students received at least a 4, though on the draft, students’ average was once again closer to 3, showing that the revision process allowed for much more clarity in the student demonstration of appropriate theoretical perspectives.
Target for **O6: Apply skills**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

For this finding, students (as is becoming increasingly obvious is usual) scored the same as they did on the demonstrating knowledge of theoretical perspectives outcome, suggesting that this particular outcome works better for 4950 (Internship) than it does for 4920 (Senior Research).

Target for **O7: Connect to lived experiences**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

On this measure, we found that 100% of students received a 4, demonstrating that they are doing a good job in terms of exploring the ramifications of their research question and analysis.

### M4: Internship Paper (O: 4, 5, 6, 7)

For the internship, Interns will also write a research paper (7-10 pp.) on a topic related to the organization’s work. The paper should follow an acceptable academic style (APA, MLA, etc.) and should include academic references, such as books and articles in recognized journals. The paper might also include interviews with on-site personnel and/or publications by the organizations. The paper should be analytical and not merely report on the day-to-day activities of the intern. It must also go through a revision process, in which the advisor has the opportunity to read a complete draft before the student submits the final paper (50%). In order to measure the development of these skills, the assessor utilizes a rubric which examines such issues as formulation of new research questions, organization and development, sentence structure, theoretical perspectives, application of skills, and connection to lived experience on a 5 point scale, where 1 is poor and 5 is outstanding.

Source of Evidence: Written assignment(s), usually scored by a rubric

**Target for O4: Demonstrate writing skills through the creation of new and focused research questions**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Partially Met**

Our findings for 2012-13: Draft: 75% of students received at least a 3, and 25% of students received at least a 4. Final: 88% received at least a 3, and 75% received at least a 4. While these numbers do not quite meet our target, they definitely show that revision is helping, especially in terms of moving students from basic competence to strong writing skills, which is one of the reasons that we chose to highlight revision in our CTW initiative.

**Target for O5: Theoretical Perspectives**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

Our findings for 2013: Draft: We found that 87% of students received at least a 3, and 50% of students received at least a 4. Final: We found that 100% of students received at least a 3, and 87% received at least a 4. On this outcome, we found that revision enabled our students to all meet the target of basic competence, and it also enabled most of the students to excel in terms of demonstrating theoretical knowledge in their final papers, suggesting, again, the significance of the revision process.

**Target for O6: Apply skills**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

In terms of the outcome of application of skills, we found that for the academic year of 2012-13, Draft: 100% of students received at least a 3, and 50% received at least a 4. Revision: 100% received at least a 3, and 75% received at least a 4. On this outcome, we just barely met our target, suggesting that while the revision process is useful, we should probably direct some attention to this particular aspect when we advise the students about what to focus on in their revisions.

**Target for O7: Connect to lived experiences**

We hope that 75% of students will achieve at least a good (on a 1-5 scale where 1 is poor, 2 is needs improvement, 3 is satisfactory, 4 is good, and 5 is excellent), and all students will achieve at least a 3.

**Findings 2012-2013 - Target: Met**

For 2012-13, our findings are as follows: Draft: 100% of students received at least a 3 on this objective, and 75% received at least a 4. Revision: 100% received at least a 3 on this objective, and 87% received a 4. Again, we met our target on this objective, suggesting that the outcome that students should be able to connect what they learn in their internship to an analysis of lived experience makes particular sense in the context of the internship course. Although the improvement from draft to revision is not substantial, it does suggest that the revision is important in all contexts.
Explore ramifications and digest the information

One thing that we noticed in assessing the results of the capstone class is that students could explore the implications of their research in more detail. In particular, we would like to help students work on how to use their research to contribute to the theoretical perspectives they are utilizing, in order to increase the integration of theory and results. We found, for example, that students were more resistant to leaving sufficient time for revision, and so we need to move up the dates even earlier than we had thought to allow time for them to get behind.

We need to strengthen our emphasis on revision and on finishing tasks more quickly in order to improve students' writing in general.

Established in Cycle: 2009-2010
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: In 4920 Final Paper | Outcome/Objective: Apply skills
  | Theoretical Perspectives
- Measure: Internship Paper | Outcome/Objective: Apply skills
  | Connect to lived experiences | Theoretical Perspectives

Implementation Description: Basically, we need to continue to insist on earlier deadlines, so that we can increase the amount of early intervention.
Responsible Person/Group: Julie Kubala

Improve writing skills

We intend to try to implement more early intervention into writing skills in order to help students improve their writing skills in these courses. One of the major challenges here is that these are ungraded papers; as such, students are not particularly motivated to work hard in their writing here. On the other hand, ungraded writing assignments have proven quite useful in contributing to improving students' writing in general.

Established in Cycle: 2009-2010
Implementation Status: Terminated
Priority: High

Relationships (Measure | Outcome/Objective):
- Measure: In 3010, Short Papers | Outcome/Objective: writing skills

Implementation Description: We terminated this one as it closely resembles another action plan.
Responsible Person/Group: Julie Kubala and Amira Jarmakani

Peer Review

While we established a revisionary process for the 3010 class this year, we realized that we could strengthen the process through providing more stringent guidelines for peer review and establishing ways to hold students accountable for their participation in the process. See the document repository for our peer review guideline sheet. In the analysis section, we have considered whether or not these increased standards are proving useful. Here is the updated report from 2013: Students had to write a final paper, which was peer reviewed in small groups of three to four students. Students were given twelve days to read the papers and then assemble in their group to discuss the reviews during a class session. The assignment read as follows: Peer Review 10%: Students will meet in groups of three to four to peer review final papers. The papers must be submitted on the day assigned or no credit will be given for the assignment. Partial papers will be given partial credit. Students must prepare a hardcopy of their paper for each member of their group and one copy for me, all due on the day assigned. Students will follow a guideline for peer review and submit one copy to the student and one copy to me on the day assigned. Late reviews will be downgraded one letter grade per day late. Students will be evaluated on the thoroughness of their evaluation as well as the quality of the paper submitted for review (half-done papers will receive half credit). Some students provided their group members incomplete papers to review. Other students complained that their group members did not provide adequate feedback on their papers. Students need more training on how to provide useful feedback.

This is a difficult task since they are still learning what a good term paper looks like; they don't have adequate understanding about what the final product should achieve. Nonetheless, I find it to be a useful activity since it introduces the students to the concept of peer review even if they cannot yet fully achieve the goals of the assignment.

Responsible Person/Group: Julie Kubala, Megan Sinnott, and Amira Jarmakani

Increase time for revision

While we have been doing a good job with this in terms of the Senior Research paper, what we realized this cycle is that we do not enforce enough time for revision for the final paper for the internship. We should ensure that students turn in a complete draft of their internship paper with at least 2 weeks for revision (which we do with the Senior Research paper). We hope this would increase the demonstration of writing skills in the internship final paper. Also, this year, in the single example of senior research, the student did not allow sufficient time for revision. We need to strengthen our emphasis on revision and on finishing tasks more quickly in order to have students write a strong research paper within a single semester. We still need to work on this; we are finding that students are strongly resistant to leaving sufficient time for revision, and so we need to move up the dates even earlier than we had thought to allow time for them to get behind. As we have noticed previously, the revision process is more effective for Senior Research than for the Internship, which probably has much to do with the nature of the two different classes; it makes sense that in Senior Research, students would put all their effort into the final paper, whereas in the Internship, students put much of their effort into the actual internship.

Analysis Questions and Analysis Answers

CTW Reflection 1: Achievements - What were the major CTW accomplishments in your program for this academic year? How do these relate to the Action Plans that you specified last year?

In general, we have met more of our targets this year than we have in the past, so that progress seems promising, in that our action plans do seem to, in fact, be working. For example, in 3010, increased attention to the shorter papers earlier in the semester does seem to have strengthened student performance in the later papers. While we still have not reached our target, in terms of writing skills on these papers, we are getting closer, which suggests that there is improvement, and that more feedback and even grading does help. While we like the idea of low-stakes papers, it does seem that including grades helps increase student motivation to work harder on their papers. Furthermore, students ability to identify main points and arguments of their readings does also seem to be improving. In terms of their final paper for 3010, students met the targets in terms of demonstrating their knowledge of appropriate theoreitcal perspectives. I would say, though, that this improvement may be attributed in part to the revisioning of the assignment, which we have not included in an action plan. Last year, the assignment was for students to construct a research question that they did much better. In one calendar year, though, it is difficult to tell how much of this improvement is sheer chance and how much is due to our paying closer attention to these aspects in the drafts of their papers. In terms of the final paper for the internship, we did stress the significance of the final paper and of the revision of that paper more intensively throughout the semester, including firm deadlines for a draft, which seems to have paid off in terms of their scores in this class. Interestingly, although the students in 4920, Senior Research, did not turn in substantial drafts and so did not have as much material to work with in their revision, they did quite well in terms of their scores on their final papers. I do think, though, that this may in fact be as much because they are strong writers already, although I am sure the revision process helped somewhat.

CTW Reflection 2: Assessment - What, if any, improvement in critical thinking among students have you been able to discern in a given class and/or over time from the entry level to the exit class?

We have been able to discern improvements in both a given class and from the entry level to exit level class, which suggests, yet again, that the CTW initiative is working. In terms of the 3010 class, student performance on the shorter papers in terms of both identifying main points/arguments and writing skills is improving from the beginning of the semester to the end of the semester. In terms of the capstone classes, when we compare the scores from the draft to the revised paper, it is quite clear that revision is allowing for at least some degree of improvement in almost all cases. These sorts of direct comparisons do show most students improving in terms of their ability to construct main point, develop arguments, organize their ideas, and express them clearly. In terms of the relationships between the entry/exit classes, that is harder to show. I do think that, from the perspective of the capstone classes, the emphasis on the process of writing, perhaps the revision process especially, in all our upper level classes, has contributed to the general writing strengths that students are displaying. While we have never had much trouble with the aspects of our outcomes that emphasize demonstrating theoretical knowledge, there is still some improvement noted. In general, while we have in the past noted that many students are achieving basic competence, but we have had trouble with students excelling, we are now noticing improvements on both levels. I do think that the focus on writing in the 3000 level course is contributing to the success of the students as they get into the upper level capstone classes.
CTW Reflection 3: Needs - What areas of CTW in your program still need development? What aspects of the implementation of CTW have been problematic? What assistance might you need to address those areas?

There are three significant areas that we need to continue to work on. The first involves integrating the revision process more thoroughly in all our upper level classes, so that it becomes normalized in the CTW classes. While we have done some testing on it, by integrating graded drafts in some upper-level classes, the amount of time and grading pressure on individual teachers makes this a somewhat unworkable solution. We are continuing to think through these issues, by instituting more formal proposals and shorter drafts, in order to navigate between the benefits of revision and the real challenges to time and energy the process constitutes.

Secondly, one of our action plans involves increasing the time of revision, especially for the capstone classes. We (or rather I) have not been as successful as I would like in terms of this action plan, because it is at times hard to get students to turn their work in on time, and given pressures around RPG, I'm not willing to fail them. Therefore, I need to stress the deadlines more frequently throughout the semester, to help students stay on track. While I was more successful getting students in the internship to do a revision, they still have more trouble developing focused research questions. In the Senior Research class, students must turn in their research question fairly early on in the semester; perhaps we can learn from this that internship students should also know what their final paper will analyze by a certain date maybe midway through the semester. As it stands, I think students tend to spend most of their semester working at their internship, and then they remember their final paper when I e-mail them after midterms, instead of before. Thirdly, we have noticed that in terms of writing skills, we still need to emphasize development. Students seem to still have trouble providing sufficient evidence for their claims. We still need to think through how we can help students acquire these skills.

In terms of the ongoing reflection on the peer review process in 3010, Megan Sinnott provides the following feedback: Students had to write a final paper, which was peer reviewed in small groups of three to four students. Students were given twelve days to read the papers and then assemble in their group to discuss the reviews during a class session. The assignment read as follows: Peer Review 10%: Students will meet in groups of three to four to peer review final papers. The papers must be submitted on the day assigned or no credit will be given for the assignment. Partial papers will be given partial credit. Students must prepare a hardcopy of their paper for each member of their group and one copy for me, all due on the day assigned. Students will follow a guideline for peer review and submit one copy to the student and one copy to me on the day assigned. Late reviews will be downgraded one letter grade per day late. Students will be evaluated on the thoroughness of their evaluation as well as the quality of the paper submitted for review (half-done papers will receive half credit). Some students provided their group members incomplete papers to review. Other students complained that their group members did not provide adequate feedback on their papers. Students need more training on how to provide useful feedback. This is a difficult task since they are still learning what a good term paper looks like; they don’t have adequate understanding about what the final product should achieve. Nonetheless, I find it to be a useful activity since it introduces the students to the concept of peer review even if they cannot yet fully achieve the goals of the assignment.

CTW Reflection 4: Overall Reflection - What have been the primary changes or impact of CTW on your academic program, and on the students and faculty involved in this initiative? What changes has your department made to the CTW initiative since last year’s CTW Assessment Report?

I think I answered much of this question in the earlier questions. I would like to respond in part here to the topic of the program I received on last year’s CTW. One recommendation the reviewer made was that I should eliminate the repetition in outcomes, and I would point out that I have it twice because there are two levels of classes. In other words, one “demonstrating knowledge and use of theoretical perspectives” applies to the entry level course, and the other applies to the exit course. That is the only way I can figure out to organize my report, given the limitations of WEAVE. The primary impact of CTW has been for us to continue to think about why we think writing is so important to the critical thinking project. The changes that we have made since last year primarily involve some changes in our action plans. Mainly we streamlined some of our plans to avoid repetition and tried to think through how we would more effectively implement the ones we have, such as peer review and revision in higher level courses. In order to think through these issues carefully, we are also having a retreat in August to think through a number of issues about the undergraduate program.
O/O 4: Identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems (M: 4)

Envision and describe considerations in the analysis, design, selection, implementation, operation, and evaluation of health information systems in a variety of settings such as health systems, hospitals, and medical practices with a focus on the critical role of e-health and information systems in the planning, operation, and management of health care organizations.

Measures, Targets, and Findings

M 1: Students will understand and analyze security and privacy circumstances and will propose appropriate control decisions. (O: 1)

Students will understand and analyze security and privacy circumstances and will propose appropriate control decisions.

Source of Evidence: Writing exam to assure certain proficiency level

Target for O1: Identify security and privacy circumstances and required controls

75% of students will be rated at or above 2.0. Measurement will be done by applying the Rubric below to the midterm or final paper in CIS 8080. Learning Objective: Identify security and privacy circumstances and required controls Fails to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 Measure: Accurately analyze security and privacy circumstances and propose appropriate control decisions. Students were not able to accurately articulate security and privacy circumstances and to propose appropriate control decisions. Students were able to accurately articulate security and privacy circumstances and to propose appropriate control decisions. Students were able to accurately articulate security and privacy circumstances and to propose appropriate control decisions.

M 2: Design and appropriately employ ubiquitous and pervasive information systems (O: 2)

Students will design and appropriately employ ubiquitous and pervasive information systems.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Design and appropriately employ ubiquitous and pervasive information systems

75% of students will be rated at or above 2.0. Measurement will be done by applying the Rubric below to the midterm or final paper in CIS 8080. Learning Objective: Design and appropriately employ ubiquitous and pervasive information systems Fails to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 Measure: Accurately design and appropriately employ ubiquitous and pervasive information systems. Students were not able to accurately design and appropriately employ ubiquitous and pervasive information systems. Students were able to accurately design and appropriately employ ubiquitous and pervasive information systems. Students were able to accurately design and appropriately employ ubiquitous and pervasive information systems.

M 3: Articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources (O: 3)

Students will be able to articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O3: Articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources

75% of students will be rated at or above 2.0. Measurement will be done by applying the Rubric below to the student work in HA 8160 Health Care System. Learning Objective: Articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources. Fails to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 Measure: Accurately articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources. Students were not able to accurately articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources. Students were not able to accurately articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources. Students were not able to accurately articulate and apply the theoretical basis and practical issues in the healthcare delivery system and the comprising resources.

M 4: Identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems (O: 4)

Students will identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O4: Identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems

75% of students will be rated at or above 2.0. Measurement will be done by applying the Rubric below to the student work in HA 8670 Health Information Systems. Learning Objective: Identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems. Fails to Meet Standard = 1 Meets Standard = 2 Exceeds Standard = 3 Measure: Accurately identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems. Students were not able to accurately identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems. Students were not able to accurately identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems. Students were not able to accurately identify considerations in the analysis, design, selection, implementation, operation, and review of health information systems.
Georgia State University
Assessment Data by Section
2012-2013 Early Childhood Education MAT
(As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The mission and purpose of the Master of Arts in Teaching in Early Childhood Education program is to develop a cadre of teachers who will become change agents who will positively affect their classrooms, their schools, their communities, and their school districts as well as the national conversation about educational issues and change. Specifically, the program is designed for teachers in urban school settings who will remain in and be informed by their classrooms while assuming leadership roles in their schools, their communities, and within the larger context of the political structures that shape educative opportunities for all children.

**Mission in Action**-

Both experience in urban schools and urban research studies suggest that urban communities face unique challenges that must be addressed by teachers in those schools. In order to accomplish this mission, the program is designed to support beginning teachers of record who have not completed a traditional teacher preparation baccalaureate but who are working in their own classrooms. Coursework has been carefully constructed in order to support them as they work in urban high needs schools in the metro Atlanta area. This will help ensure that those teachers working in high needs schools without previous coursework in education are adequately prepared to meet both the needs of their students and the challenges of teaching in urban schools.

**Goals**

G 1: G1: Content Knowledge

The teacher candidate will have the content knowledge necessary to understand the content in the curriculum he or she teaches.

G 2: G2: Pedagogical Content Knowledge & Skills

The teacher candidate will possess the pedagogical content knowledge and skills to be able to effectively plan for and teach learners in grades PK-5.

G 3: G3: Student Learning

The teacher candidate will use varied instructional strategies, assessment techniques and critical reflection to document children's development and learning.

G 4: G4: Diversity

The teacher candidate will work collaboratively with diverse professionals to meet the cultural, linguistic, learning, and behavioral needs of all learners.

G 5: G5: Clinical Teaching Practice

Candidates will demonstrate the application and critical use of pedagogical and content knowledge in the context of classroom evidenced to university coaches observing in their PK-5th grade classrooms.

**Student Learning Outcomes/Objectives**

SLO 1: SLO1: Demonstrates Content Knowledge (G: 1) (M: 1)

Teacher candidates understand the central concepts, tools of inquiry, and structures of the content and curricula he or she teaches.

1. Candidates are made aware that they must take and pass the GACE Early Childhood Education I and II before being recommendation for certification. 2. Candidates’ content knowledge will be evaluated through their scores on the GACE Early Childhood Education I and II exam taken at the Clinical Exit/Program Exit.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
Institutional Priority Associations

1 Student retention
2 Student promotion and progression
3 Timely graduation

Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.
5.4 Enhance the global competency of students, faculty and staff.

SLO 2: SLO2: Plans effectively for instruction (G: 2) (M: 2)

Teacher candidates plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals. Relevant Associations:

The Assessment- Directions for the Responsive Planning Project

This project will demonstrate increased pedagogical knowledge and skills through documenting and demonstrating the evolution of instructional planning and implementation of responsive pedagogical strategies in your classroom context. Through this project, you will provide evidence of responsive instructional planning on knowledge of subject matter, students, the community, and curriculum goals across subject areas with student’s interests, funds of knowledge, and development in mind. Specifically you will utilize planning and instructional artifacts to demonstrate your development as an increasingly responsive educator across your two years of engagement in the MAT.

Specifically, you will need to attend to the following questions:

- How has your planning and instruction changed as you have gained a more complex understanding of your students, the community, and the subject matter?
- Looking back at the first unit that you planned for your class/students, how would you characterize those plans in relation to your current understandings and practices related to curriculum design and implementation?

These questions will be the basis of your self-analysis and narration of your growth in your planning and instructional practices over your two years of teaching. Through the examination of the instructional plans you have created and the type of engagements and learning opportunities you have crafted with/for students throughout the years you will use various media to demonstrate your increasing understanding and incorporation of the following key components of responsive planning and instruction:

(a) holding high expectations for excellence;
(b) valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum;
(c) recognizing and utilizing resources and partnerships on behalf of learners;
(d) enacting broader curriculum to develop a reciprocity between teaching and learning, learners and instructors;
(e) informing planning and instruction through knowledge of students, content, curriculum, learning environments, assessment, and self reflexive processes;
(f) facilitating productive learning tasks;
(g) engaging in self reflexive practice informing planning and pedagogy.

*Please see evaluative rubric for more information about each of these categories.

Description of how it is used in the program:

*Planning (pedagogical knowledge and skills)* will be assessed through the *RESPONSIVE PLANNING PROJECT,* which will be submitted by candidates for evaluation at the Clinical Exit/Program Exit transition. This project will serve to demonstrate increased pedagogical knowledge and skills through documenting and demonstrating the evolution of instructional planning and implementation of responsive pedagogical strategies in classroom contexts. Through this project, candidates will provide evidence of responsive instructional planning on knowledge of subject matter, students, the community, and curriculum goals across subject areas with student’s interests, funds of knowledge, and development in mind. At the Clinical Practice/Program Exit transitions, candidates will analyze and evaluate their instructional practices over the two years of teaching, examining the first unit plans they created and the type of engagements and learning opportunities crafted with/for students throughout the years. Specifically, candidates will attend to the following questions: How has your planning and instruction changed as you have gained a more complex understanding of your students, the community, and the subject matter? Looking back at the first unit that you planned for your class/students, how would you characterize those plans in relation to your current understandings and practices related to curriculum design and implementation?

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial
relationships develop, persist, and/or change.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
2 Student promotion and progression

**Strategic Plan Associations**
2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.
3.1 Enhance a research culture.

**SLO 3: SLO3: Uses assessment methods to document student learning (G: 3) (M: 3)**
Effects on P-12 Student Learning will be assessed at the Clinical Exit/Program Exit transition through the submission and evaluation of the IMPACT ON STUDENT LEARNING PROJECT. This project will be a demonstration of student learning and growth as well as teacher development and improvement through the analysis of qualitative and quantitative data based on formative and summative assessment practices. For example, candidates may provide evidence for student growth through the documentation and analysis of formal and informal, formative and summative assessments (such as the Developmental Reading Assessment-DRA- or other literacy assessment tools, math assessments based on the common core curriculum, or benchmark/anchor papers for writing assessment). Through this project, candidates will describe the gains made by their students and demonstrate such claims by including specific examples and artifacts of student learning and growth.

5.4 Enhance the global competency of students, faculty and staff.

**Measures, Targets, and Findings**

**M1: M1: GACE I and II Exam scores (O: 1)**

Licensure exam scores will be analyzed for progress toward content knowledge development of MAT candidates.

Source of Evidence: Certification or licensure exam, national or state

**Target for O1: SLO1: Demonstrates Content Knowledge**

Target: 95% of our students will obtain a passing score on the GACE I and II as determined by the Georgia Professional Standards Commission. A passing score on these tests is required for teacher certification/licensure in Early Childhood Education.

**Findings 2012-2013 - Target: Met**

100% of candidates completing our program in Spring 2013 took and passed the GACE I and II before beginning our program, as is required for provisional certification. Verification of these scores are collected by the College of Education Office of Academic Assistance upon request for certification and reports are sent annually to each department indicating the pass rate of all candidates. This report will be sent to the GSU COE this fall and documentation will be added for these candidates at that time.

**M2: M2: Responsive Planning Project (O: 2)**

Responsive Planning Project Directions for the Responsive Planning Project This project will demonstrate increased pedagogical knowledge and skills through documenting and demonstrating the evolution of instructional planning and implementation of responsive pedagogical strategies in your classroom context. Through this project, you will provide evidence of responsive instructional planning on knowledge of subject matter, students, the community, and curriculum goals across subject areas with student’s interests, funds of knowledge, and development in mind. Specifically you will utilize planning and instructional artifacts to demonstrate your development as an increasingly responsive educator across your two years of engagement in the MAT. Specifically, you will need to attend to the following questions: How has your planning and instruction changed as you have gained a more complex understanding of your students, the community, and the subject matter? Looking back at the first unit that you planned for your class/students, how would you characterize those plans in relation to your current understandings and practices related to curriculum design and implementation? These questions will be the basis of your self-analysis and narration of your growth in your planning and instructional practices over your two years of teaching. Through the examination of the instructional plans you have created and the type of engagements and learning opportunities you have crafted with/for students throughout the years you will use various media to demonstrate your increasing understanding and incorporation of the following key components of responsive planning and instruction: (a) holding high expectations for excellence; (b) valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum; (c) recognizing and utilizing resources and partnerships on behalf of learners; (d) enacting broader curriculum to develop a reciprocity between teaching and learning, learners and instructors; (e) informing planning and instruction through knowledge of students, content, curriculum, learning environments, assessment, and self reflectev processes; (f) facilitating productive learning tasks; (g) engaging in self reflective practice informing planning and pedagogy. *Please see evaluative rubric for more information about each of these categories. Description of how it is used in the program: *Planning (pedagogical knowledge and skills).* will be assessed through the *RESPONSIVE PLANNING PROJECT, *which will be submitted by candidates for evaluation at the Clinical Exit/Program Exit transition. analyze and evaluate their instructional practices over the two years of teaching, examining the first unit plans they created and the type of engagements and learning opportunities crafted with/students throughout the years. Specifically, candidates will attend to the following questions: How has your planning and instruction changed as you have gained a more complex understanding of your students, the community, and the subject matter? Looking back at the first unit that you planned for your class/students, how would you characterize those plans in relation to your current understandings and practices related to curriculum design and implementation?

Source of Evidence: Project, either individual or group

**Target for Q2: SLO2: Plans effectively for instruction**

A critical priority of the ECE MAT is to ensure that beginning teachers of record demonstrate increased pedagogical knowledge and skills through documenting and demonstrating the evolution of instructional planning and implementation of responsive pedagogical strategies in their classroom contexts. Through this project, candidates provide evidence of responsive instructional planning on the basis of formative and summative assessment practices across two years. You will identify six focal students and describe the ways that a range of holistic data drove instruction to support the growth trajectory of each student. The six focal students, determined through pre-assessment data, should include one student from each year who began the year as a struggling learner, one student from each year who began the year as a high achieving student. You will identify six focal students and describe the ways that a range of holistic data drove instruction to support the growth trajectory of each student. The six focal students, determined through pre-assessment data, should include one student from each year who began the year as a struggling learner, one student from each year who began the year as a high achieving student, and one student from each year who began the year as a high achieving student. Assignment Includes: Evidence for student growth through the documentation and analysis of formal and informal, formative and summative assessments (such as the Developmental Reading Assessment-DRA- or other literary assessment tools, math assessments based on the common core curriculum, or benchmark/anchor papers for writing assessment). A narrative description of the gains made by the students and support for these claims which includes specific examples and artifacts of student learning and growth. Reflection demonstrating the development and improvement of instructional planning through the analysis of qualitative and quantitative data based on formative and summative assessment practices. Description of how it is used in the classroom. Additional data indicated that the scale of Recognizing and utilizing resources and partnerships on behalf of learners had 55% of candidates scoring on the lower end of Meeting the standard, rather than exceeding it. While all candidates met or exceeded expectations on the composite scores of the Responsive Planning and Instruction Key Assessment one to two students (out of 34) did not meet expectation on one or more of the following subscales: (a) Valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum. (b) Enacting broader curriculum to develop reciprocity between teaching and learning, learners and instructors. (c) Informing planning and instruction through knowledge of assessment. (d) Informing planning and instruction through self-reflexive practice. (e) Facilitating productive learning tasks.

**Findings 2012-2013 - Target: Met**

Planning and Instruction - Spring 2013 Responsive Planning and Instruction Composite Scores Standard Exceeded (4)- 26 (76%) Standard Met (3)- 8 (23%) Standard Not Met - 0 Target was met for this standard with 100% of candidates scoring on the lower end of Meeting the standard, rather than exceeding it. While all candidates met or exceeded expectations on the composite scores of the Responsive Planning and Instruction Key Assessment one to two students (out of 34) did not meet expectation on one or more of the following subscales: (a) Valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum. (b) Enacting broader curriculum to develop reciprocity between teaching and learning, learners and instructors. (c) Informing planning and instruction through knowledge of assessment. (d) Informing planning and instruction through self-reflexive practice. (e) Facilitating productive learning tasks.

**M 3: M3: Impact on Student Learning Project (Q: 3)**

IMPACT ON STUDENT LEARNING PROJECT Directions for the Impact on Student Learning Project This project will be a demonstration of student learning and growth as well as teacher development and improvement through the analysis of qualitative and quantitative data based on formative and summative assessment practices across two years. You will identify six focal students and describe the ways that a range of holistic data drove instruction to support the growth trajectory of each student. The six focal students, determined through pre-assessment data, should include one student from each year who began the year as a struggling learner, one student from each year who began the year as a high achieving student, and one student from each year who began the year as a high achieving student. Assignment Includes: Evidence for student growth through the documentation and analysis of formal and informal, formative and summative assessments (such as the Developmental Reading Assessment-DRA- or other literacy assessment tools, math assessments based on the common core curriculum, or benchmark/anchor papers for writing assessment). A narrative description of the gains made by the students and support for these claims which includes specific examples and artifacts of student learning and growth. Reflection demonstrating the development and improvement of instructional planning through the analysis of qualitative and quantitative data based on formative and summative assessment practices. Description of how it is used in the classroom. Additional data indicated that the scale of Recognizing and utilizing resources and partnerships on behalf of learners had 55% of candidates scoring on the lower end of Meeting the standard, rather than exceeding it. While all candidates met or exceeded expectations on the composite scores of the Responsive Planning and Instruction Key Assessment one to two students (out of 34) did not meet expectation on one or more of the following subscales: (a) Valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum. (b) Enacting broader curriculum to develop reciprocity between teaching and learning, learners and instructors. (c) Informing planning and instruction through knowledge of assessment. (d) Informing planning and instruction through self-reflexive practice. (e) Facilitating productive learning tasks.

**Findings 2012-2013 - Target: Met**

Planning and Instruction - Spring 2013 Responsive Planning and Instruction Composite Scores Standard Exceeded (4)- 26 (76%) Standard Met (3)- 8 (23%) Standard Not Met - 0 Target was met for this standard with 100% of completing candidates scoring on the lower end of Meeting the standard, rather than exceeding it. While all candidates met or exceeded expectations on the composite scores of the Responsive Planning and Instruction Key Assessment one to two students (out of 34) did not meet expectation on one or more of the following subscales: (a) Valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum. (b) Enacting broader curriculum to develop reciprocity between teaching and learning, learners and instructors. (c) Informing planning and instruction through knowledge of assessment. (d) Informing planning and instruction through self-reflexive practice. (e) Facilitating productive learning tasks.

**Target for Q3: SLO3: Uses assessment methods to document student learning**

As beginning teachers of record, MAT candidates are already in classrooms and responsible for student learning and development. Therefore, attention to learning of pupils is given primacy throughout the program. Effects on P-12 Student Learning will be assessed at the Clinical Exit/Program Exit transition through the submission and evaluation of the IMPACT ON STUDENT LEARNING PROJECT. This project will be a demonstration of student learning and growth as well as teacher development and improvement through the analysis of qualitative and quantitative data based on formative and summative assessment practices across two years. You will identify six focal students and describe the ways that a range of holistic data drove instruction to support the growth trajectory of each student. The six focal students, determined through pre-assessment data, should include one student from each year who began the year as a struggling learner, one student from each year who began the year as a high achieving student, and one student from each year who began the year as a high achieving student. Assignment Includes: Evidence for student growth through the documentation and analysis of formal and informal, formative and summative assessments (such as the Developmental Reading Assessment-DRA- or other literacy assessment tools, math assessments based on the common core curriculum, or benchmark/anchor papers for writing assessment). Through this project, candidates will describe the gains made by their students and demonstrate such claims by including specific examples and artifacts of student learning and growth. Reflection demonstrating the development and improvement of instructional planning through the analysis of qualitative and quantitative data based on formative and summative assessment practices. Description of how it is used in the classroom. Additional data indicated that the scale of Recognizing and utilizing resources and partnerships on behalf of learners had 55% of candidates scoring on the lower end of Meeting the standard, rather than exceeding it. While all candidates met or exceeded expectations on the composite scores of the Responsive Planning and Instruction Key Assessment one to two students (out of 34) did not meet expectation on one or more of the following subscales: (a) Valuing and privileging the lives, histories, and inquiries of pupils through meaningful and intentional decisions about curriculum. (b) Enacting broader curriculum to develop reciprocity between teaching and learning, learners and instructors. (c) Informing planning and instruction through knowledge of assessment. (d) Informing planning and instruction through self-reflexive practice. (e) Facilitating productive learning tasks.

**Findings 2012-2013 - Target: Met**

Spring 2013: Effects on Student Learning Composite Scores Standard Exceeded (4)- 24 candidates (70%); Standard Met (3)- 10 candidates (29%); Standard Not Met (2-0)- 0 candidates This standard was met. 100% of all completing candidates from the MAT Met Standard (29%) or Exceeded Standard (70%) on the composite scores of the Impact on Student Learning Key Assessment, data indicated that 41% of candidates completing in 2013 could have presented data which demonstrated that impact on student learning in the area of mathematics, while 34% could have presented the growth in their learners as
writers more effectively. Additionally, candidates are to document the longitudinal impact on individual learners across time and 49% could have indicated that more effectively (though only 8% failed to demonstrate that adequately).

**M 4: M 4: Dispositions (O: 4)**

The new Dispositions Survey (implemented Fall 2010 and forward) called Five Dispositions of Effective Educational Professionals is a university supervisor rating of candidates’ dispositions (values and actions) as observed in clinical practice in the following areas: Empathy, Positive View of Others, Positive View of Self, Authenticity, and Meaningful Purpose and Vision. Data presents mean scores across these five areas.

**Target for O4: SLO 4: Values and displays professional and ethical dispositions**

As beginning teachers of record in urban schools, MAT candidates must demonstrate dispositions toward diversity and professionalism that will serve students in historically underserved contexts. Since the ECE MAT leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, “acceptable,” or 4, “exemplary,” on the 1-4 point Five Dispositions of Effective Educational Professionals rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of need with the goal of reaching a score of 3 (an “acceptable” rating). In cases where candidates do not achieve this target, they are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric:

- Levels 3 or 4=95%; Levels 2, 1, 0= 5%.

**Findings 2012-2013 - Target: Met**

Spring 2013 Dispositions Endpoint Exceptional (4 pts) Acceptable (3 pts) Not Met Empathy 22 12 - Positive View of Others 28 (82%) 6 (17%) - Positive View of Self 23 (67%) 11 (32%) - Authenticity 26 8 - Meaningful Purpose and Vision 27 7 - Target met- 100% of candidates completing our program have scored Exceptional (4 points) or Acceptable (3 points) on the Dispositions Rubric. While program completers seem to have well developed purpose and vision along with positive views of others and a sense of authenticity, fewer have developed a positive view of themselves or a strong sense of empathy. As second year candidate year of teaching and generally have a clear sense of their pedagogical and personal strengths and limitations. Data trends are mirrored by our midpoint candidates, who also seem to grapple more with Positive View of Self and Empathy. Spring 2013 Dispositions Midpoint Exceptional (4 pts) Acceptable (3 pts) Marginal (2 pts) Unacceptable (1 pt) Empathy Positive View of Others Positive View of Self Authenticity Meaningful Purpose and Vision

**M 5: M 5: Clinical Teaching Practice (O: 5)**

Teacher candidates in the ECE MAT program are expected to demonstrate knowledge, skills/performances and dispositions that are essential for high quality early childhood education for all student in grades prekindergarten through fifth grade. These competencies must be demonstrated in field settings with children, parents, and colleagues, as well as in university coursework. Teacher candidates in the ECE MAT have supported field based coursework throughout two academic years in the program and are full time teachers of record throughout that time. The Clinical teaching Practice Project completed at the midpoint and endpoint of the program is completed by the university coach at the end of each academic year. The evaluation is a comprehensive review of the candidate’s competencies and the rubric is aligned to the INTASC national standards for initial teacher licensure as well as the Georgia Framework for Teaching, the PSC Rules for Early Childhood Education. The rubric used to assess this project is also included: 4 (standard exceeded), 3 (standard met), 2 (approaching standard), 1 (standard minimally evidenced), and 0 (not observed). The teacher candidate is expected to receive at least ratings of 3 (standard met) on all indicators in order to complete ECE 7585 and to be recommended for certification. If a teacher candidate receives a rating lower than 3, the university supervisor works with the candidate to develop an action plan and an additional opportunity to demonstrate competency. A grade of “B” or better is required to pass all field based courses and to continue with the program in good standing. This rubric is used at the midpoint and endpoint of the program to ensure candidate progress and success. If a candidate does not meet the minimum target for clinical teaching performance, they are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric:

- Levels 3 or 4=95%; Levels 2, 1, 0= 5%.

**Findings 2012-2013 - Target: Met**

Spring 2013 Clinical Practice Assessment Endpoint- Target met in each of the six domains of Clinical Practice. Domain 1: Content and Curriculum- Proficient (4)- 21 (61%); Achieving (3)- 13 (38%); Not meeting (2-0)- NONE Domain 2: Knowledge of Students- Proficient (4)- 23 (67%); Achieving (3)- 11 (32%); Not meeting (2-0)- NONE Domain 3: Learning Environments- Proficient (4)- 28 (82%); Achieving (3)- 6 (17%); Not meeting (2-0)- NONE Domain 4: Assessment- Proficient (4)- 23 (67%); Achieving (3)- 11 (32%); Not meeting (2-0)- NONE Domain 5: Planning and Instruction- Proficient (4)- 25 (73%); Achieving (3)- 9 (26%); Not meeting (2-0)- NONE Domain 6: Professionalism: Proficient (4)- 31 (81%); Achieving (3)- 3 (8%); Not meeting (2-0)- NONE All candidates completing the ECE MAT in 2013 met (Achieving or exceeded (Proficient) each of the key domains of the Clinical Practice Assessment at the endpoint of their program. Data from these 2013 Endpoint Assessments indicate that those who complete our program meet standards for Clinical Practice across each of the six domains. Candidates are particularly strong in Professionalism (Domain 6, 91% proficient), creating Learning Environments (Domain 3, 82% Proficient), and planning and instruction (Domain 5, 73% Proficient). Content and Curriculum (Domain 1, 38% Achieving), Knowledge of Students (Domain 2, 32% Achieving), and Assessment (Domain 4, 32% Achieving) were slightly less strong across candidates completing our program in 2013. Specific subscales in which 55% of our completing candidates were rated at Proficient (the highest rating) and 44% were rated at Achieving (the second rating) are scales in which our candidates as a whole ranked slightly less strong. These included: 1.1 Demonstrates and uses accurate content and pedagogical knowledge that is appropriate for observed learner needs. 1.2 Connects content to students’ prior knowledge, everyday lives and/or other curriculum areas. 4.3 Involves learners in self-assessment and personal goal setting to increase student achievement.
Additionally, while nearly all of our candidates were rated highly in the following three subscales, one student for each of them was rated at “Developing” and did not meet these subscales (though the composite domains were met). 3.2 Uses effective management strategies to engage and motivate students in purposeful learning activities. 3.5 Incorporates verbal, nonverbal, and media communication techniques to support learning-based interactions in the classroom or to increase student achievement. 6.3 Demonstrates professional characteristics as indicated on state and local Code of Ethics and as described in the ECE Policy regarding professionalism. Clinical Practice Assessment Endpoint- Approaching target in each of the six domains of Clinical Practice, Spring 2013 Clinical Practice Assessment Midpoint Proficient (4 pts) Achieving (3 pts) Developing (2 pts) Emerging (1 pt) Domain 1: Content and Curriculum 0.5 (62%) 2 (25%) 1 (12%) Domain 2: Knowledge of Students 0 3 (37%) 3 (37%) 2 (25%) Domain 3: Learning Environments 0 5 (62%) 1 (12%) 2 (25%) Domain 4: Assessment 0 4 (50%) 2 (25%) 2 (25%) Domain 5: Planning and Instruction 0 5 (62%) 2 (25%) 1 (12%) Domain 6: Professionalism 2 (25%) 3 (37%) 1 (12%) 2 (25%) Analysis of the midpoint data for candidates who in the spring of 2013 were two semesters in to our five semester program indicate that more than half of our candidates are already Achieving (and occasionally Proficient) in Domain 1 (Content and Curriculum), Domain 3 (Learning Environments), Domain 5 (Planning and Instruction), and Domain 6 (Professionalism). Domain 2 (Knowledge of Students) and Domain 4 (Assessment) had 62% and 50% of candidates respectively who were not yet meeting those standards at the midpoint. Specifically, subscales of the Clinical Practice Rubric in which 50% or more of our candidates scored Developing or Emerging at the midpoint where and which need additional attention during their second year of the program include: 1.2 Connects content to students’ prior knowledge; 2.2 Describes how students’ interests of the learners our candidates serve. Data from subscales 1.1, 1.2, and 4.3 of the Clinical Practice Key Assessment have confirmed this need. (b) Revision of the Responsive Planning Project which is engaged in longitudinally and across time to support connections between multiple content areas and to the everyday lives of learners and connects directly with community partners and stakeholders. This revision will support candidates in both year one and year two of our program. The candidates with these lower scores on Clinical Practice Key Assessment subscales were met with by coaches and the program coordinator, an individual action plan and program of differentiated support was created with them, and substantive additional assistance and coaching was provided throughout the course of their program. Frequent meetings between coaches, faculty, and program coordinator ensure that candidates who are struggling are provided with interventions, action plans, and specific steps for improvement, along with additional support across time as they focus on targeted areas for growth. This is a practice that has been effective during the 2012-13 year and will be continued. Each of the Domains of Clinical Teaching Practice Rubric are the focus of ECE 6576, Integrative and Iterative Curriculum Design taken during the third semester of the program after the midpoint key assessment. Candidates at the midpoint had not yet enrolled in this critical course. Particular attention to the subscales midpoint candidates most needed to develop (1.2, 2.1, 3.2, 4.3, and 5.1) were attended to in the focus, design, and implementation of this course. Additional support will be offered throughout candidates second year during Monthly Support Seminars and coaching will continue to focus on these areas for specific development. Additionally, the two midpoint candidates who most frequently struggled with their pedagogy and practice have been intentionally assigned to a coach for the upcoming year who was also the instructor of the ECE 6576 course and who will be focused on assisting them through the upcoming 2013-14 academic year, working alongside them in their classroom as they implement these ideas and focusing on providing differentiated and intentional support on the sub-scales and larger domains of need that have been indicated.

**Details of Action Plans for This Cycle (by Established cycle, then alpha)**

### Clinical Practice Support Action Plan

The summer course, taken in the third semester of our program, ECE 6576, Integrative and Iterative Curriculum, addresses each of these subscales directly. Based on qualitative program evaluation surveys and meetings with candidates in our Design Team, completing their first and second years in our program, we will be addressing these needs in a range of ways: (a) Monthly workshops revisiting of curriculum design and responsibility in the context of our candidate support seminars for our second year candidates, continuing and building upon the focus of the summer course and integrating the revision of the Responsive Planning Project. Candidates have requested that these workshop opportunities will focus on use of meaningful, authentic and performance based assessments, along with learner self-assessments in order to respond in differentiated and targeted ways to the observed needs and interests of the learners our candidates serve. Data from subscales 1.1, 1.2, and 4.3 of the Clinical Practice Key Assessment have confirmed this need. (b) Revision of the Responsive Planning Project which is engaged in longitudinally and across time to support connections between multiple content areas and to the everyday lives of learners and connects directly with community partners and stakeholders. This revision will support candidates in both year one and year two of our program. The candidates with these lower scores on Clinical Practice Key Assessment subscales were met with by coaches and the program coordinator, an individual action plan and program of differentiated support was created with them, and substantive additional assistance and coaching was provided throughout the course of their program. Frequent meetings between coaches, faculty, and program coordinator ensure that candidates who are struggling are provided with interventions, action plans, and specific steps for improvement, along with additional support across time as they focus on targeted areas for growth. This is a practice that has been effective during the 2012-13 year and will be continued. Each of the Domains of Clinical Teaching Practice Rubric are the focus of ECE 6576, Integrative and Iterative Curriculum Design taken during the third semester of the program after the midpoint key assessment. Candidates at the midpoint had not yet enrolled in this critical course. Particular attention to the subscales midpoint candidates most needed to develop (1.2, 2.1, 3.2, 4.3, and 5.1) were attended to in the focus, design, and implementation of this course. Additional support will be offered throughout candidates second year during Monthly Support Seminars and coaching will continue to focus on these areas for specific development. Additionally, the two midpoint candidates who most frequently struggled with their pedagogy and practice have been intentionally assigned to a coach for the upcoming year who was also the instructor of the ECE 6576 course and who will be focused on assisting them through the upcoming 2013-14 academic year, working alongside them in their classroom as they implement these ideas and focusing on providing differentiated and intentional support on the sub-scales and larger domains of need that have been indicated.

**Implementation Description:** See description above

**Responsible Person/Group:** Program Coordinator and Field-Based Coaches

### Dispositions Action Plan- 2013-14

In order to address these aspects of disposition, all of our candidates will engage in a year-long self-study of Conscious Discipline (Bailey, 2001), engaging in this dispositions work across the academic year with coaches and colleagues and implementing these strategies with their classroom community. Additionally, individual candidates who are experiencing challenges with developing positive dispositions in their classrooms have been paired intentionally with a coach who will focus on these areas along with them during the 2013-14 year. As current students and program graduates continue to be professionalized across their induction years we are working to create systems and structures for support and continued encouragement. We are working to build structures for alumni to join with current students for the Descriptive Review of a Child or monthly gatherings, for graduates to continue to develop positive understandings and empathy for self and others.

**Established in Cycle: 2012-2013**

- **Outcome/Objective:** SLO 4: Values and displays professional and ethical dispositions
Focus on Demonstration of Student Growth in Math, Writing, and Longitudinal Impact on Individual Student Growth

In response to this evidenced need from data from the Effects on Student Learning Key Assessment and from Design Team and candidate feedback, we are reframing the monthly opportunities for candidates to document focal student growth longitudinally and increasing our focus on discussion of growth over time in math and writing. Opportunities for these formative data collection points will be embedded into field based coursework (ECE 6575, 6585 across the first year of our program, and ECE 7575 and 7585 across the second year of our program). Attention to these areas of need will also be a focus during our Monthly Coaching Check in meetings to ensure that all of the faculty supporting candidate growth are taking these ideas into consideration and offering needed support.

GACE Scores

In 2013-14 we will begin having candidates who are not provisionally certified and therefore have not taken and passed both the GACE I and GACE II before program entry. Each semester of the program, coaches and program coordinators will discuss this Key Assessment and offer support where needed.

Established in Cycle: 2012-2013
Implementation Status: Planned
Priority: Low

Responsive Planning Seminars and Project Revision Action Plan, 2013

While all completing candidates from the MAT Met Standard (23%) or Exceeded Standard (76%) on the composite scores of the Responsive Planning and Instruction Key Assessment, data indicated that the subscale of Recognizing and utilizing resources and partnerships on behalf of learners had 55% of candidates scoring on the lower end of Meeting the standard, rather than exceeding it. In response to this finding and to our candidates’ evaluations of ECE 7576, Teacher Inquiry for Critical Change, we will be focusing on these partnerships earlier and throughout the second year as candidates and their students work alongside of community members and stakeholders to consider and address a shared concern. This process, along with Critical Pedagogy, was a specific emphasis of the final semester of the program and candidates completing overwhelmingly wanted this practice to be integrated with more intention throughout the final year. Faculty are collaborating during Summer 2013 to make this a significant emphasis of our field work across classes in Fall 2013 and Spring 2014 for our second year candidates, but also to ensure that it is an emphasis of our field based coaching collaborations in ECE 6575 and 6585. Based on this data and confirmed by qualitative program evaluation surveys and meetings with candidates in our Design Team completing their first and second years in our program, we will be addressing these needs in a range of ways: (a) Monthly workshops revisiting of curriculum design and responsibility in the context of our candidate support seminars for our second year candidates, continuing and building upon the focus of the ECE 6576, Integrated and Iterative Curriculum and integrating the revision of the Responsive Planning Project. Candidates have requested that these workshop opportunities will focus on use of meaningful, performance-based learning tasks and authentic assessments, along with learner self-assessments in order to respond in differentiated and targeted ways to the observed needs and interests of the learners our candidates serve. These sessions will support candidates as they engage in continuous self-reflexive practice and focus on following the inquiries, questions, and passions of their learners while addressing the social, emotional, and cognitive needs of each learner. (b) Revision of the Responsive Planning Project which is engaged in longitudinally and across time to support connections between multiple content areas and to the everyday lives of learners and connect directly with community partners and stakeholders. This revision will support candidates in their focus on this critical area of development across both years of our program. Data from subscales of the Responsive Planning and Instruction Key Assessment have confirmed the need for these next steps.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:

What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

During the 2012-13 academic year, MAT program faculty engaged in the first full cycle of data collection and analysis based on the program design approved by the PSC. In Spring 2013, our first cohort of MAT candidates successfully completed all key assessments. Findings from these indicate that there are additional structures of support we can implement across the 5 semester program to support candidates in specific areas indicated as areas of need. (See action plans for each key assessment for specific information about implementation). All of the key assessments and rubrics used were not modified from our initial program proposal approved by the PSC.
ACADEMIC PROGRAM QUESTION 2: What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Based on analysis of candidate key assessment scores, extensive qualitative and survey based information obtained from graduates and current students, and with the guidance of a formal design team/advisory board made up of our candidates and graduates, we have made several key changes in our implementation for 2013-14. Namely, our courses have been shifted to provide more context in child development and in literacy from the first weeks of the fall semester. Seminars have been planned and scheduled to offer support that was needed early on through these novice teachers’ first months of teaching. Monthly support structures have been created to help candidates focus on the growth of their learners (individually and collectively) across all subject areas and across time, summer coursework has been tailored to expressly address aspects of candidate mid and endpoint key assessments that were indicated as needing additional support, and practices for the responsive planning project have been modified to be scaffolded developmentally across time and course engagement. Faculty instructors/coaches continue to work to develop structures for interactions and support around dispositional factors and clinical practice. MAT faculty are constantly engaged in iterative self-study and program development and are continuously shifting our practice based on the observed and stated needs of our candidates.

Georgia State University
Assessment Data by Section
2012-2013 Early Childhood Education BSED
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The purpose of the Bachelor of Science in Education Program in Early Childhood Education at Georgia State University is to prepare teacher candidates who will be qualified to direct the education of young children in diverse settings from pre-school through elementary grades, English for Speakers of Other Languages (ESOL), and special education. The theme of this program is to develop teachers as facilitators of learning. Coursework, extensive field experiences, and collaboration among school and university faculty combine to develop a program that supports the professional growth of the novice educator.

Goals

G 1: Content Knowledge
The teacher candidate is an educator who will have the content knowledge necessary to understand the curriculum he or she teaches.

G 2: Pedagogical Content Knowledge & Skills
The teacher candidate is an educator who will have the pedagogical content knowledge and skills to be able to plan and implement effective instruction.

G 3: Student Learning
The teacher candidate is an educator who will have knowledge of varied assessment techniques and will reflect critically in order to increase student achievement.

G 4: Diversity
The teacher candidate is an educator who will have dispositions and skills to meet the cultural, linguistic, learning and behavioral needs of all learners.

Student Learning Outcomes/Objectives

SLO 1: Demonstrates content knowledge (G: 1) (M: 2, 4, 5)
Teacher candidates understand the central concepts, tools of inquiry, and structures of the discipline he or she teaches and creates learning experiences that make these aspects of subject matter meaningful for students.

General Education/Core Curriculum Associations

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
2.0 Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
4.0 Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.
5.0 Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.
6.0 Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.
7.0 Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.
8.0 Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1. Increase the level of scholarship support for undergraduate students.
2. Implement an Undergraduate Signature Experience.
3. Other efforts in support of Goal 1 (Undergraduate Education).
4. Enhance a research culture.
5. Enhance the global competency of students, faculty and staff.

**SLO 2: Plans effectively for instruction (G: 2) (M: 2)**
Teacher candidates plan instruction based upon knowledge of subject matter, students, the community, and curriculum goals.

**General Education/Core Curriculum Associations**
1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**
1. Increase the level of scholarship support for undergraduate students.
2. Implement an Undergraduate Signature Experience.
3. Other efforts in support of Goal 1 (Undergraduate Education).
4. Enhance a research culture.
5. Enhance the global competency of students, faculty and staff.

**SLO 3: Applies content and pedagogy for successful clinical practice (G: 1, 2, 3, 4) (M: 2)**
Teacher candidates apply content and pedagogy for successful clinical practice. (i.e. knowledge of academic disciplines; understanding of child development and individual differences; use of differentiated instruction; use of multiple instructional strategies; development of critical thinking and problem solving; understanding of individual and group motivation and behavior; creator of positive learning environments; use of effective verbal, nonverbal, and media communication techniques; reflective practitioner; collaborative partner with students, parents and community).

**General Education/Core Curriculum Associations**
1. Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.

2. Students understand and apply mathematical concepts and reasoning using verbal, numeric, graphical and/or symbolic forms.

3. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

4. Students effectively analyze the meanings of texts and/or works of art or music, express ways that culture shapes values, and critically evaluate them.

5. Students demonstrate understanding of the physical universe, the nature of science, and the scientific method, and/or understand and apply mathematical concepts and reasoning using verbal, numeric, graphical or symbolic forms.

6. Students effectively analyze the complexity of human behavior, and how historical, economic, political, social, and/or spatial relationships develop, persist, and/or change.

7. Students demonstrate understanding of the United States and its related political, social, and/or institutional developments.

8. Students demonstrate understanding of political, social, economic, and/or institutional developments across the globe.

9. Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**
1. Student retention
2. Student promotion and progression
3. Timely graduation

**Standard Associations**
1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)
**Strategic Plan Associations**

1.1 Increase the level of scholarship support for undergraduate students.
1.3 Implement an Undergraduate Signature Experience.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 4: Uses assessment methods to document student learning (G: 3) (M: 1, 2)**

Teacher candidates understand and use formal and informal assessment strategies to evaluate and ensure the continuous intellectual, social, and physical development of the learner.

**General Education/Core Curriculum Associations**

1.0 Students produce well-organized communication that exhibits logical thinking, appropriate style for circumstance and audience, meets conventional standards of usage, and acknowledges the use of information sources when necessary. Students demonstrate comprehension of written material: purpose, message, and rhetorical situation.
3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.1 Increase the level of scholarship support for undergraduate students.
1.3 Implement an Undergraduate Signature Experience.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

**SLO 5: Values and displays professional and ethical dispositions (G: 4) (M: 2, 3, 5)**

Teacher candidates value and display professional and ethical dispositions to meet the needs of all learners. They are reflective practitioners who continually evaluate the effects of their choices and actions on others (students, parents, and other professionals in the learning community) and who actively seek out opportunities to grow professionally. They know and use ethical and professional guidelines related to educational practice. Teacher candidates foster relationships with school colleagues, parents, and agencies in the larger community to support students’ learning and well-being. They are informed advocates for sound educational practices and policies.

**General Education/Core Curriculum Associations**

3.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.
9.0 Students effectively analyze, evaluate, and provide convincing reasons in support of conclusions, considering opposing points of view when appropriate.

**Institutional Priority Associations**

1 Student retention
2 Student promotion and progression
3 Timely graduation

**Standard Associations**

1 Outcomes of educational programs, including student learning outcomes (3.3.1.1)

**Strategic Plan Associations**

1.1 Increase the level of scholarship support for undergraduate students.
1.3 Implement an Undergraduate Signature Experience.
1.5 Other efforts in support of Goal 1 (Undergraduate Education).
3.1 Enhance a research culture.
5.4 Enhance the global competency of students, faculty and staff.

**Measures, Targets, and Findings**

**M 1: Planning, Teaching, Learning Module (PTLM) Rubric (O: 4)**

Teacher candidates continuously have opportunities to impact student achievement. Through intentionally designed assignments they are required to document their use of an array of assessment tools including KWLS charts, pre and post tests, learning gains graphs, and grade books. The Planning, Teaching, Learning Module (PTLM), in the student teaching courses ECE 4661 (Dual ECE Program with special education concentration) and ECE 4662 (Traditional ECE Program with ESOL concentration), is a comprehensive, teacher work sample documenting the teacher candidate’s use of all of these assessment tools. The teacher candidate uses content knowledge to plan and implement the integrated thematic unit, motivate and manage students, and assess student learning. Throughout the project, the teacher candidate provides written reflection on student progress as well as her/his own
professional development. The rubric used to assess the PTLM highlights competencies aligned with the INTASC national standards for initial teacher licensure. A 100 point rubric is used to rate/score the candidate's project on four components: planning, implementing, assessing, and reflecting. Ratings include: 5 ("proficiently met"), 4 ("adequately met"), 3 ("partially met"), 2 ("minimally met"), and 1 ("not met"). The teacher candidate is expected to achieve at least a rating of 3 ("adequately met") on each of the components in order to demonstrate competency in all the assessing components. A grade of at least 3 ("adequately met") on the assessing components in order to demonstrate competency is using assessment methods to document student learning (outcome 4). If the teacher candidate does not demonstrate these performance standards with ratings of at least 4 for each assessing component, an action plan is developed. The university supervisor monitors the teacher candidate's progress in meeting goals outlined in the action plan prior to the completion of student teaching. (Note: The rubric was revised as follows: 4 ("proficiently met"), 3 ("adequately met"), 2 ("partially met"), 1 ("minimally met"), and 0 ("not met"). The teacher candidate is expected to receive a rating of at least 3 ("adequately met") on the assessing components in order to demonstrate competency is using assessment methods to document student learning (outcome 4). Teacher candidate mastery of the assessing components must be demonstrated prior to the completion of student teaching and the recommendation for certification.

Source of Evidence: Project, either individual or group

**Target for O4: Uses assessment methods to document student learning**

Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "adequately met," or 4, "proficient," on the revised 0-4 point rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching an adequate rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2, 1, 0 = 5%.

**Findings 2012-2013 - Target: Met**

Review of the overall performance scores obtained from the Planning, Teaching, and Learning Module: Assessment Component (Impact on Student Learning) and edTPA for 2012-2013 reveals the following aggregate pass rates for combined Early Childhood Education BSED Programs: 97% or 106/109 met or exceeded expectations. See analysis of data in edTPA results to form the additional information. On the edTPA we noted that candidate's project component, an action plan is developed. The university supervisor monitors the teacher candidate's progress in meeting goals outlined in the action plan prior to the completion of student teaching. (Note: The rubric was revised as follows: 4 ("proficiently met"), 3 ("adequately met"), 2 ("partially met"), 1 ("minimally met"), and 0 ("not met"). The teacher candidate is expected to receive a rating of at least 3 ("adequately met") on the assessing components in order to demonstrate competency is using assessment methods to document student learning (outcome 4). Teacher candidate mastery of the assessing components must be demonstrated prior to the completion of student teaching and the recommendation for certification.

**Target for O1: Demonstrates content knowledge**

Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "very good," or 4, "outstanding," on the revised 0-4 point rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching a "very good" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2, 1, 0 = 5%.

**Findings 2012-2013 - Target: Met**

Review of the overall performance scores obtained from the Final Student Teaching Evaluation instrument for 2012-2013 reveals the following: Aggregate scores for Traditional ESOL and Dual – Special Education concentration candidates show a 97% or 105/108 pass rate on the Final Student Teaching Evaluation. Across rubric levels 86% of the teacher candidates exceeded expectations, 13% met expectations (i.e. very good or satisfactory) and 1% needed improvement. All twenty-six or 72/74 and 33/34 respectively, passed the key assessment. The mean scores based upon the Overall Final Student Teaching Evaluation Rating by program are as follows: Traditional ESOL concentration – 3.85 and Dual – Special Education concentration – 3.76 on a (0-4) scale, with Traditional ESOL candidates scoring higher than Dual candidates which is the opposite outcome from the previous year. Mean scores across all learning outcomes for combined and disaggregated programs, including highest and lowest indicator scores are found in the table below. For combined programs, outcomes 1 (content knowledge) and 5 (professional dispositions) were rated the highest, while outcome 2 (planning) was rated the
lowest. Looking deeper at sub-indicators, we have noted that indicators 5 (classroom management strategies) and 8 (assessment) will continue to be monitored with current action plans (i.e., requiring the three course revised sequence in Classroom Management and revised lesson plan format targeting planning and assessment). Learning Outcomes Combined Program Scores Traditional – ESOL concentration Dual – special education concentration Highest indicators across both program concentrations (above 3.90) Lowest indicators across both program concentrations (below 3.70) Outcome 1: Demonstrates content knowledge (Standard 1) 3.85 3.84 3.86 1C: demonstrates intellectual curiosity in using multiple resources to plan for instruction Outcome 2: Plans effectively for instruction (Standard 7) 3.66 3.73 3.58 Outcome 3: Applies content & pedagogy for successful clinical practice (Standards 2 – 6) 3.79 3.80 3.77 2C: critical thinking through question & discussion techniques; 5A: Using a variety of classroom management strategies SE: Using effective management strategies for student self-motivation and engagement Outcome 4: Uses assessment methods to document student learning (Standard 8) 3.725 3.72 3.73 3.8A: Using varied formal and informal assessment strategies to monitor student progress, including self-assessment (below 3.80) 5E: Using effective management strategies – Dual – Special Education concentration 3.86 3.85 3.86 8E: Shows responsibility to punctuality and attendance 10A: Demonstrates professionalism by working cooperatively with administrators, supervisors, colleagues, parents, etc. 10B: Demonstrates exceptional poise, understanding and tact in school situations

Target for O2: Plans effectively for instruction
Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "very good", or 4, "outstanding", on the revised 0-4 point rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching a "very good" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2, 1, 0 = 5%.

Findings 2012-2013 - Target: Met
Review of the overall performance scores obtained from the Final Student Teaching Evaluation instrument for 2012-2013 reveal the following: Aggregate scores for Traditional ESOL and Dual – Special Education concentration candidates show a 97% or 105/108 pass rate on the Final Student Teaching Evaluation. Across rubric levels 86% of the teacher candidates exceeded expectations, 13% met expectations (i.e. very good or satisfactory) and 1% needed improvement. All twenty-six or 100% of the Alpharetta cohort candidates met or exceeded expectations on this key assessment. Disaggregated scores for Traditional ESOL and Dual – Special Education concentration candidates indicate 97% of the candidates from each program or 72/74 and 33/34 respectively, passed the key assessment. The mean scores based upon the Overall Final Student Teaching Evaluation Rating by program are as follows: Traditional ESOL concentration – 3.85 and Dual – Special Education concentration – 3.76 on a (0-4) scale, with Traditional ESOL candidates scoring higher than Dual candidates which is the opposite outcome from the previous year. Mean scores across all learning outcomes: Most indicators fall within the range of 3.7-3.9 with the exception of outcome 5 (content knowledge) and 5 (professional dispositions) were rated the highest, while outcome 2 (planning) was rated the lowest. Looking deeper at sub-indicators, we have noted that indicators 5 (classroom management strategies) and 8 (assessment) will continue to be monitored with current action plans (i.e., requiring the three course revised sequence in Classroom Management and revised lesson plan format targeting planning and assessment). Learning Outcomes Combined Program Scores Traditional – ESOL concentration Dual – special education concentration Highest indicators across both program concentrations (above 3.90) Lowest indicators across both program concentrations (below 3.70) Outcome 1: Demonstrates content knowledge (Standard 1) 3.85 3.84 3.86 1C: demonstrates intellectual curiosity in using multiple resources to plan for instruction Outcome 2: Plans effectively for instruction (Standard 7) 3.66 3.73 3.58 Outcome 3: Applies content & pedagogy for successful clinical practice (Standards 2 – 6) 3.79 3.80 3.77 2C: critical thinking through question & discussion techniques; 5A: Using a variety of classroom management strategies SE: Using effective management strategies for student self-motivation and engagement Outcome 4: Uses assessment methods to document student learning (Standard 8) 3.725 3.72 3.73 3.8A: Using varied formal and informal assessment strategies to monitor student progress, including self-assessment Outcome 5: Values and displays professional and ethical dispositions (Standards 9 & 10) 3.86 3.88 3.83 9E: Shows responsibility to punctuality and attendance 10A: Demonstrates professionalism by working cooperatively with administrators, supervisors, colleagues, parents, etc. 10B: Demonstrates exceptional poise, understanding and tact in school situations

Target for O3: Applies content and pedagogy for successful clinical practice
Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "very good", or 4, "outstanding", on the revised 0-4 point rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching a "very good" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2, 1, 0 = 5%

Findings 2012-2013 - Target: Met
Review of the overall performance scores obtained from the Final Student Teaching Evaluation instrument for 2012-2013 reveal the following: Aggregate scores for Traditional ESOL and Dual – Special Education concentration candidates show a 97% or 105/108 pass rate on the Final Student Teaching Evaluation. Across rubric levels 86% of the teacher candidates exceeded expectations, 13% met expectations (i.e. very good or satisfactory) and 1% needed improvement. All twenty-six or 100% of the Alpharetta cohort candidates met or exceeded expectations on this key assessment. Disaggregated scores for Traditional ESOL and Dual – Special Education concentration candidates indicate 97% of the candidates from each program or 72/74 and 33/34 respectively, passed the key assessment. The mean scores based upon the Overall Final Student Teaching Evaluation Rating by program are as follows: Traditional ESOL concentration – 3.85 and Dual – Special Education concentration – 3.76 on a (0-4) scale, with Traditional ESOL candidates scoring higher than Dual candidates which is the opposite outcome from the previous year. Mean scores across all learning outcomes: Most indicators fall within the range of 3.7-3.9 with the exception of outcome 5 (content knowledge) and 5 (professional dispositions) were rated the highest, while outcome 2 (planning) was rated the lowest. Looking deeper at sub-indicators, we have noted that indicators 5 (classroom management strategies) and 8 (assessment) will continue to be monitored with current action plans (i.e., requiring the three course revised sequence in Classroom Management and revised lesson plan format targeting planning and assessment). Learning Outcomes Combined Program Scores Traditional – ESOL concentration Dual – special education concentration Highest indicators across both program concentrations (above 3.90) Lowest indicators across both program concentrations (below 3.70) Outcome 1: Demonstrates content knowledge (Standard 1) 3.85 3.84 3.86 1C: demonstrates intellectual curiosity in using multiple resources to plan for instruction Outcome 2: Plans effectively for instruction (Standard 7) 3.66 3.73 3.58 Outcome 3: Applies content & pedagogy for successful clinical practice (Standards 2 – 6) 3.79 3.80 3.77 2C: critical thinking through question & discussion techniques; 5A: Using a variety of classroom management strategies SE: Using effective management strategies for student self-motivation and engagement Outcome 4: Uses assessment methods to document student learning (Standard 8) 3.725 3.72 3.73 3.8A: Using varied formal and informal assessment strategies to monitor student progress, including self-assessment Outcome 5: Values and displays professional and ethical dispositions (Standards 9 & 10) 3.86 3.88 3.83 9E: Shows responsibility to punctuality and attendance 10A: Demonstrates professionalism by working cooperatively with administrators, supervisors, colleagues, parents, etc. 10B: Demonstrates exceptional poise, understanding and tact in school situations
content & pedagogy for successful clinical practice (Standards 2 – 6) 3.79 3.80 3.77 2C: critical thinking through question & discussion techniques; 5A: Using a variety of classroom management strategies 5E: Using effective management strategies for student self-motivation and engagement Outcome 4: Uses assessment methods to document student learning (Standard 8) 3.725 3.72 3.73 8A: Using varied formal and informal assessment strategies to monitor student progress, including self-assessment Outcome 5: Values and displays professional and ethical dispositions (Standards 9 & 10) 3.86 3.88 3.83 9E: Shows responsibility to punctuality and attendance 10A: Demonstrates professionalism by working cooperatively with administrators, supervisors, colleagues, parents, etc. 10B: Demonstrates exceptional poise, understanding and tact in school situations

Target for O4: Uses assessment methods to document student learning
Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "very good", or 4, "outstanding", on the revised 0-4 point rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching a "very good" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2, 1, 0 = 5%.

Findings 2012-2013 - Target: Met
Review of the overall performance scores obtained from the Final Student Teaching Evaluation instrument for 2012-2013 reveal the following: Aggregate scores for Traditional ESOL and Dual – Special Education concentration candidates show a 97% or 105/108 pass rate on the Final Student Teaching Evaluation. Across rubric levels 86% of the teacher candidates exceeded expectations, 13% met expectations (i.e. very good or satisfactory) and 1% needed improvement. All twenty-six or 100% of the Alpharetta cohort candidates met or exceeded expectations on this key assessment. Disaggregate scores for Traditional ESOL and Dual – Special Education concentration candidates indicate 97% of the candidates from each program or 72/74 and 33/34 respectively, passed the key assessment. The mean scores based upon the Overall Final Student Teaching Evaluation Rating by program are as follows: Traditional ESOL concentration – 3.85 and Dual – Special Education concentration – 3.76 on a (0-4) scale, with Traditional ESOL candidates scoring higher than Dual candidates which is the opposite outcome from the previous year. Mean scores across all learning outcomes for combined and disaggregated programs, including highest and lowest indicator scores are found in the table below. For combined programs, outcomes 1 (content knowledge) and 5 (professional dispositions) were rated the highest, while outcome 2 (planning) was rated the lowest. Looking deeper at sub-indicators, we have noted that indicators 5 (classroom management strategies) and 8 (assessment) will continue to be monitored with current action plans (i.e., requiring the three course revised sequence in Classroom Management and revised lesson plan format targeting planning and assessment). Learning Outcomes Combined Program Scores Traditionally – ESOL concentration Dual – special education concentration Highest indicators across both program concentrations (above 3.90); Lowest indicators across both program concentrations (below 3.70): 7A: Demonstrates content knowledge (Standard 1) 3.85 3.84 3.86 1C: demonstrates intellectual curiosity in using multiple resources to plan for instruction Outcome 2: Plans effectively for instruction (Standard 7) 3.66 3.73 3.58 Outcome 3: Applies content & pedagogy for successful clinical practice (Standards 2 – 6) 3.79 3.80 3.77 2C: critical thinking through question & discussion techniques; 5A: Using a variety of classroom management strategies 5E: Using effective management strategies for student self-motivation and engagement Outcome 4: Uses assessment methods to document student learning (Standard 8) 3.725 3.72 3.73 8A: Using varied formal and informal assessment strategies to monitor student progress, including self-assessment Outcome 5: Values and displays professional and ethical dispositions (Standards 9 & 10) 3.86 3.88 3.83 9E: Shows responsibility to punctuality and attendance 10A: Demonstrates professionalism by working cooperatively with administrators, supervisors, colleagues, parents, etc. 10B: Demonstrates exceptional poise, understanding and tact in school situations

Target for O5: Values and displays professional and ethical dispositions
Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "very good", or 4, "outstanding", on the revised 0-4 point rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching a "very good" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2, 1, 0 = 5%.

Findings 2012-2013 - Target: Met
Review of the overall performance scores obtained from the Final Student Teaching Evaluation instrument for 2012-2013 reveal the following: Aggregate scores for Traditional ESOL and Dual – Special Education concentration candidates show a 97% or 105/108 pass rate on the Final Student Teaching Evaluation. Across rubric levels 86% of the teacher candidates exceeded expectations, 13% met expectations (i.e. very good or satisfactory) and 1% needed improvement. All twenty-six or 100% of the Alpharetta cohort candidates met or exceeded expectations on this key assessment. Disaggregate scores for Traditional ESOL and Dual – Special Education concentration candidates indicate 97% of the candidates from each program or 72/74 and 33/34 respectively, passed the key assessment. The mean scores based upon the Overall Final Student Teaching Evaluation Rating by program are as follows: Traditional ESOL concentration – 3.85 and Dual – Special Education concentration – 3.76 on a (0-4) scale, with Traditional ESOL candidates scoring higher than Dual candidates which is the opposite outcome from the previous year. Mean scores across all learning outcomes for combined and disaggregated programs, including highest and lowest indicator scores are found in the table below. For combined programs, outcomes 1 (content knowledge) and 5 (professional dispositions) were rated the highest, while outcome 2 (planning) was rated the lowest. Looking deeper at sub-indicators, we have noted that indicators 5 (classroom management strategies) and 8 (assessment) will continue to be monitored with current action plans (i.e., requiring the three course revised sequence in Classroom Management and revised lesson plan format targeting planning and assessment). Learning Outcomes Combined Program Scores Traditionally – ESOL concentration Dual – special education concentration Highest indicators across both program concentrations (above 3.90); Lowest indicators across both program concentrations (below 3.70): 7A: Demonstrates content knowledge (Standard 1) 3.85 3.84 3.86 1C: demonstrates intellectual curiosity in using multiple resources to plan for instruction Outcome 2: Plans effectively for instruction (Standard 7) 3.66 3.73 3.58 Outcome 3: Applies content & pedagogy for successful clinical practice (Standards 2 – 6) 3.79 3.80 3.77 2C: critical thinking through question & discussion techniques; 5A: Using a variety of classroom management strategies 5E: Using effective management strategies for student self-motivation and engagement Outcome 4: Uses assessment methods to document student learning (Standard 8) 3.725 3.72 3.73 8A: Using varied formal and informal assessment strategies to monitor student progress, including self-assessment Outcome 5: Values and displays professional and ethical dispositions (Standards 9 & 10) 3.86 3.88 3.83 9E: Shows responsibility to punctuality and attendance 10A: Demonstrates professionalism by working cooperatively with administrators, supervisors, colleagues, parents, etc. 10B: Demonstrates exceptional poise, understanding and tact in school situations
The new Dispositions Survey (implemented fall 2010 and forward) called Five Dispositions of Effective Education Professionals is a university supervisor rating of candidates’ dispositions (values and actions) as observed in clinical practice in the following areas: Empathy, Positive View of Others, Self, Authenticity, and Meaningful Purpose and Vision. Data presents mean scores across these five areas. The rubric levels are as follows: Level 4 (Strength or Exceptional), Level 3 (Developing or Acceptable), Level 2 (Emerging or Marginal) and Level 1 (Unsure or Unacceptable).

**Source of Evidence:** Field work, internship, or teaching evaluation

**Target for O5: Values and displays professional and ethical dispositions**

Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "acceptable", or 4, "exemplary", on the 1-4 point Five Dispositions of Effective Educational Professionals rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address areas of deficiency with the goal of reaching an "acceptable" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2 or 1= 5%.

**Findings 2012-2013 - Target: Met**

2012-2013 data indicate an overall aggregate pass rate of 97% or 102/105 total program candidates (Traditional and Dual) meeting or exceeding the target of Level 3 or higher on the Five Effective Dispositions Assessment. Disaggregate scores from 2012-2013 data show ratings for Traditional Program teacher candidates at 100% (71/71) as compared to 91% (31/34) for Dual Program candidates meeting or exceeding the target on this assessment. Of the three Dual Program candidates who received marginal ratings on one indicator of this assessment, they were monitored during Student Teaching and assessed using another measure, the Observation Field Performance Rubric (i.e., performance based assessment). All three candidates met program requirements for dispositions. All Alpharetta External Delivery program candidates passed this assessment.

**M 4: GACE Content Assessments in Early Childhood & Special Education (O: 1)**

Passing scores on the GACE Content Assessments are required for teacher certification. The following GACE Assessments are required by program: Early Childhood Education (ECE) Traditional Program: Test 001 (Language Arts, Social Studies); Test 002 (Mathematics, Science, Health, Physical Education) Early Childhood Education and Special Education, General Curriculum (ECE SPE) Dual Certification Program: Test 001 (Language Arts, Social Studies); Test 002 (Mathematics, Science, Health, Physical Education); Test 081 and 082 (Special Education)

**Source of Evidence:** Certification or licensure exam, national or state

**Target for O1: Demonstrates content knowledge**

A passing score determined by the Georgia Professional Standards Commission on initial teacher certification is required for teacher certification/licensure in Early Childhood and Special Education.

**Findings 2012-2013 - Target: Met**

All program candidates recommended for teacher certification received passing scores on the GACE. Scores are not available for 2012-2013 data, however, scores are available for 2011-2012; however, scores are available for 2011-2012. A review of 2011-2012 GACE overall scores for test 001 (Reading, English Language Arts, Social Studies) are slightly lower at 92% or 139/151; however, all sub-indicator scores are above state averages. The area rated lowest the previous year, understanding the conventions of Standard English is up by 2%. Overall rates on test 002 (Mathematics, Science, Health, Physical Education, and the Arts) remain constant at 96% or 145/151; however, the area rated lowest the previous year, understand concepts and principles of earth science is up 2%. Additionally, scores in the area of life science are also up 2%. As a result of the supplemental GUMS instruction and ISCI 2001 course changes, we expect to continue to see improvement in these three areas. Newly revised and more rigorous GACE Content Assessments will be offered to teacher candidates beginning 2013-2014. We will continue to monitor overall pass rates and sub-indicator scores on the GACE.

**M 5: Observation Field Performance Assessment Rubric (O: 1, 5)**

The Observation Field Performance In ECE Rubric is used to assess pre-service teachers during practicum (three field experiences prior to student teaching) and student teaching (clinical practice). The instrument is based on the Georgia Framework for Teaching. The assessor will enter observation ratings in LiveText, the electronic assessment management system, across all indicators and domains for the final teacher candidate observation in each of the field experiences; that is, Practicum I, Practicum II, Practicum III, and Student Teaching. Pre-service teachers are placed in the following grade levels for each experience: Practicum I: Pre-kindergarten (5 weeks) and Kindergarten (8 weeks) Practicum II: 1st grade (7 weeks) and 2nd/3rd grade (6 weeks) - Midpoint Evaluation Practicum III: 4th/5th grade (13 weeks) Student Teaching: 14 weeks (K-5; a selected grade level). Student Teaching observation performance ratings will be reviewed end program. Rubric levels are as follows: Level 4 (Proficient), Level 3 (Achieving), Level 2 (Developing), Level 1 (Emerging, Level 0 (Beginning). Ratings of "Developing" or higher are needed for recommendation for certification and to pass student teaching, although the program target has been identified at level 3 "Achieving" or higher across all six performance domains.

**Source of Evidence:** Field work, internship, or teaching evaluation

**Target for O1: Demonstrates content knowledge**

Since the ECE BSED Program leads to teacher certification/licensure at the endpoint, it is expected that most candidates, 95%, will achieve at least a rating of 3, "achieving", or 4, "proficient", on the 0-4 point rubric in the area of Content and Curriculum on the Observation Field Performance Rubric. Candidates who do not achieve these ratings work with faculty to create an action plan specifically designed to address area of deficiency with the goal of reaching an "achieving" rating. In few cases, 5% or less, candidates who do not achieve their goals are not recommended for teacher certification. The following targets have been set regarding the percentage of candidates scoring at each level of the rubric: Level 4 = 70%; Level 3 = 25%; Levels 2 or 1= 5%.

Of the 2012-2013 Traditional ESOL and Dual – Special Education concentration completers 108/108 or one hundred percent...
Details of Action Plans for This Cycle (by Established cycle, then alpha)

### Planning and Assessment; ELL & Special Education Focus

2010-2011 data from the Final Student Teaching Evaluation indicate "met" targets in all areas; however, it was noted that the lowest ratings were identified in the areas of planning and assessment for the Dual concentration program with the following mean scores: 3.44 for planning and 3.53 for assessment compared to Traditional concentration program mean scores of 3.74 in planning and 3.78 in assessment. Additionally, data from end program candidate surveys indicate that Traditional and Dual concentration program candidates rate themselves lower in confidence in working with students with special needs and/or linguistic needs. As a result faculty will provide course inputs in ESOL for Dual program candidates and continued inputs in Special Education for Traditional program candidates. Also faculty will closely monitor assessments and note any differences in data, specifically outcome 2 (plans effectively for instruction) and outcome 4 (uses assessment methods to document student learning) as identified in the Final Student Teaching Evaluation. Data from 2011-2012 data show similar results as planning and assessment are still rated the lowest areas on this assessment as follows: For planning, 3.62 Traditional Program and 3.89 Dual Program and for assessment, 3.69 Traditional Program and 3.62 Dual Program. Dual Program results for planning and assessment show a slight increase from 2010-2011 while Traditional Program results are slightly lower than the previous year’s scores. Overall scores on this evaluation for programs combined show and increase in 4% from 2010-2011 to 2011-2012. We will continue to monitor these areas and will consider the following interventions: revision of two mid-program assignments, the Guided Reading Planning Assessment and the Planning, Teaching, Learning Sample, and to see if intentional instruction mid-program increases scores by end program. Both of these assignments require our students to plan three sequential lessons and to analyze and reflect on student performance/data during and following each lesson in order to make revisions prior to teaching the next lesson. Finally, we will continue to provide ESOL and Special Education supplemental course inputs to build students’ confidence in planning and assessing students with special/linguistic needs. We will ask students to complete a survey at the end of each semester next year and note any changes in their confidence levels. We will continue to offer course inputs through 2013-2014.

**Established in Cycle:** 2010-2011  
**Implementation Status:** In-Progress  
**Priority:** High  
**Relationships (Measure | Outcome/Objective):**  
- **Measure:** Final Student Teaching Evaluation (Appendix E)  
- **Outcome/Objective:** Plans effectively for instruction  

**Implementation Description:** Course inputs in ESOL for Dual concentration program and continued course inputs in Special Education for Traditional ESOL concentration program. Revise mid program key assessments in planning and assessment, Guided Reading and Planning, Teaching, Learning Sample.  
**Projected Completion Date:** 05/2014  
**Responsible Person/Group:** BSE faculty and/or part time instructors  
**Additional Resources:** One faculty load to cover course inputs in ESOL and special education.  
**Budget Amount Requested:** $0.00 (no request)

### Technology for Student Learning

In an effort to increase pre-service teacher knowledge and skills in implementing technology for student learning, program faculty have embedded the NET Standards throughout course work, designating specific assignments that will target this area. Additionally, a day Digital Literacy Seminar for all candidates enrolled in ECE 3602: Reading and Language Arts II with a focus on creating digital literacies for student use in learning. It has been noted by university supervisors, that pre-service teachers have sufficient knowledge and skills in implementing lessons that require teacher use of technology; however, more instruction in student use of technology for learning would be beneficial. BSED faculty will expect to see higher ratings on the Final Student Teaching Evaluation for Outcome 3; specifically, Standard 6C: Communication Skills - Demonstrates competency in using technology to...
support student learning. After one year of interventions, the data reveal the following: For 2010-2011 Traditional and Dual Program candidates' mean and modal scores for Outcome 3, Standard 6C are a 3.81 mean and modal score of 4 (121/122 Traditional candidates meeting target) and 3.48 mean and a modal score of 3 (25/25 Dual candidates meeting target). For 2011-2012 Traditional and Dual Program candidates' mean and modal scores for Outcome 3, Standard 6C are a 3.66 mean and 4 mode (123/126 Traditional candidates meeting target) and 3.76 mean and 4 mode (33/33 Dual candidates meeting target). We have also reviewed data from the Observation Field Performance Assessment, Domain 3: Learning Environments, sub-indicator 3.5 (incorporate verbal, nonverbal, and media communication techniques to support learning-based interactions in the classroom or to increase student achievement) for a second measure. The data are reported for Traditional and Dual candidates combined and show, for 2011-2012, 156/157 candidates meeting target with a mean of 3.85 and a modal score of 4 as compared to 2010-2011 with 142/145 candidates meeting target with a mean of 3.81 and a modal score of 4. We will continue with the interventions in monitoring this area.

Established in Cycle: 2010-2011
Implementation Status: Finished
Priority: Medium

Relationships (Measure | Outcome/Objective):
Measure: Final Student Teaching Evaluation (Appendix E) | Outcome/Objective: Applies content and pedagogy for successful clinical practice

Implementation Description: In order to help pre-service teachers develop a student-centered approach, the BSED faculty have looked closely at the ISTE's NETS for teachers and for students. P-12 students need to use technology in the service of high level thinking and knowledge production, including the making of digital media. The BSED faculty have created a technology project bank aligning the NETS to technology projects across course and field digital. Additionally, faculty have added a second day Digital Literacy Seminar.

Projected Completion Date: 05/2013
Responsible Person/Group: BSED faculty and supervisors
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Classroom Management Strategies Focus

Data from the Final Student Teaching Evaluation sub-indicator 5A: Learning Environments and the Observations Field Performance assessment sub-indicators suggest that some of our candidates scored lower in using management strategies to engage and motivate learners. Since classroom management is an area that pre-service teachers typically need improvement in as noted in our data, we have restructured two of our classroom management courses, the first and third, for a stronger focus on "Responsive Classroom" and individual behavior management strategies. Additionally, we will begin restructuring the second management course to continue to include a study of theorists but also to increase emphasis on classroom management strategies and building community. We will continue this action plan through May 2014.

Established in Cycle: 2011-2012
Implementation Status: In-Progress
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: Final Student Teaching Evaluation (Appendix E) | Outcome/Objective: Applies content and pedagogy for successful clinical practice

Implementation Description: Course changes: Classroom Management I, II, and III for more emphasis on "Responsive Classroom" strategies

Projected Completion Date: 05/2014
Responsible Person/Group: BSED Faculty
Additional Resources: None

GUMS & Writing Mentor Program & ISCI 2001 Course Changes

Analysis of our 2010-2011 GACE Content Assessment sub-indicator percentages show that our scores are equal or above the state in all areas, except the lowest area on test 001: understand the conventions of Standard English grammar, usage, and mechanics was equivalent with the state score. In response to this outcome the program will implement supplemental instruction in grammar, usage, and mechanics, including structure (GUMS) beginning, fall 2012 for candidates who have been identified as needing further instruction in this area. Additionally, the Writing Mentor BSED Program has been developed to help students improve creative and professional writing skills. Finally, our scores on test 002 are higher than the state except for one area, again the lowest area on test 001: understand the conventions of Standard English grammar, usage, and mechanics, knowledge production, including the making of digital media. The BSED faculty have created a technology project bank aligning the NETS to technology projects across course and field digital. Additionally, faculty have added a second day Digital Literacy Seminar.

Established in Cycle: 2010-2011
Implementation Status: Planned
Priority: High

Relationships (Measure | Outcome/Objective):
Measure: GACE Content Assessments in Early Childhood & Special Education | Outcome/Objective: Demonstrates content knowledge

Implementation Description: Current BSED faculty co-teaching in ISCI 2001 will monitor course changes. GACE scores will be reviewed in May 2014. One load has been assigned to BSED faculty to implement the GUMS supplemental instruction as well as the Writing Mentor BSED Program.

Projected Completion Date: 05/2014
Responsible Person/Group: BSED Faculty
Additional Resources: None

Assessment Used for Future Instruction

Data from 2012-2013 continue to show that developing teachers need improvement in not only documenting student learning but also in using data to inform future instruction. We will continue to monitor candidates’ ability to plan for instruction and assessment as well as implement instruction and use assessments to inform future planning for all learners. The new Observation on Field Performance rubric and the edTPA national assessment will be piloted this fall and spring 2013-2014 as new measures to target learning outcomes. These measures will be included in the next year’s report.

Established in Cycle: 2012-2013
Implementation Status: Planned
**ACADEMIC PROGRAM QUESTION 1:** What changes and improvements in the assessment process will you make in the coming academic year?

In an effort to streamline reporting and review meaningful data as collected for the PSC, NCATE and the university's WEAVE online system, the BSE faculty revised program learning outcomes to clearly match key assessments aligned to national standards and the Professional Education Faculty Conceptual Framework, loaded in courses at mid and end of program in the new LiveText Course Management System. The ECE BSED Program will continue to use the LiveText course management system to document, collect, analyze, and report program data. We will maintain the established targets, and we will continue to include disaggregated data across all levels of the key assessment rubrics in order to drill down to specific areas to identify program strength and needs for program focus. In summary, we: - Moved to an electronic assessment management system, LiveText to collect, analyze and report on learning outcome results - Revised goals and learning outcomes in order to streamline the process of reporting results for state program approval and national accreditation - Revised measures to collect meaningful data aligned to the learning outcomes

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

The ECE BSED Program has reviewed teacher candidate performance scores across all five learning outcomes and candidates have met or surpassed all identified assessment targets. Improvements in student learning can be attributed to changes made in the course management system, revisions in course design and content, identification of clear goals and learning outcomes, and development of stronger measures including clear and concise rubrics. The following three areas of teacher preparation, associated with goals and learning outcomes, are identified with key changes. Assessment data indicate improvements in student learning across some of the targeted areas: written communication, content knowledge – early/life science, classroom management, technology, planning and assessment. We will continue to monitor teacher candidates' growth in these areas and identify ways to improve the ECE BSED Program.

1. **Content knowledge:** *Improvement in student learning noted in written communication; we will continue to monitor improvements in early/life science for results in 2013-2014. Key changes: 2010-2011 GUMS - Grammar, Usage, Mechanics, and Style Writing Program; 2011-2012 ISCI 2001 course changes; 2013-2014 will incorporate a new measure, Observation on Field Performance; and a revised three-course sequence ECE 3661, ECE 3662, ECE 3663 - Classroom Management; designed new comprehensive lesson plan format; offered multi-media digital media seminars and revised ECE 3602: Digital Composing as Literacy Learning, offered ECE 3021 as a hybrid course; 2013-2014 will incorporate a new Observation of Field Performance measure aligned to the Teacher Assessment on Performance Standards - TAPS, the new standards as included in the new Teacher Keys Evaluation System (TKES) in Georgia and aligned to national standards, InTASC Model Core Teaching Standards.

2. **Professional and pedagogical knowledge, skills, and dispositions:** *Improvement in student learning noted across some performance indicators of classroom management, but we will continue to monitor this area; improvement noted in using technology for student learning.* Key changes: revised three-course sequence ECE 3661, ECE 3662, ECE 3663 - Classroom Management; designed new comprehensive lesson plan format; offered multi-media digital media seminars and revised ECE 3602: Digital Composing as Literacy Learning, offered ECE 3021 as a hybrid course; 2013-2014 will incorporate a new Observation of Field Performance measure aligned to the Teacher Assessment on Performance Standards - TAPS, the new standards as included in the new Teacher Keys Evaluation System (TKES) in Georgia and aligned to national standards, InTASC Model Core Teaching Standards.

3. **Effects on student learning:** *Some improvement in student learning noted in the area of assessment; however, we will continue to look at all performance indicators for improvement in planning, implementing and assessing student learning.* Key changes: 2010-2011 embedded the ESOL Endorsement; incorporated methods of assessment across specific content area course work and added a focus on pupil self-assessment; will incorporate new measure, the edTPA, and signature course assignments across ECE 3021: Child Development, ECE 3661, 3662, 3663 – Classroom Management, ECE 3607: Math Methods, ECE 3661: Reading Methods, ECE 3660: Assessment Additionally, improvements have been made in the educational program (e.g., revised curriculum, adding/dropping courses, revising course content, etc.) as a result of what of the assessment process? - The ECE BSED Program embedded the ESOL (English for Speakers of Other Languages) Endorsement in the undergraduate Early Childhood Education degree program so that all teacher candidates would be proficient in meeting the needs of all learners, including English Language Learners. The BSE program was revised beginning fall 2010 to require the ESOL Endorsement for all "Traditional – non Dual Certification" Program students. This decision was made in an effort to address the changing demographics and pupil needs in metro Atlanta as noted in the ECE strategic plan and to improve preparation of pre-service teachers in the areas of plantational instructional strategies to improve assessment. - With the addition of the assessment course to the Program of Study in Area G in 2006-2007, teacher candidates are no longer failing in the Needs Improvement or Unsatisfactory range of the Final Student Teaching Evaluation on INTASC 8 Assessment of Student Learning. However, results from 2011-2013 data from this assessment and the Observation Field Performance assessment reveal that it is still an area that pre-service teachers struggle with and is typically rated the lowest. The Observation Field Performance assessment shows assessment as one of the lowest scored for a few candidates. The role of instructional assessment as it relates to teaching and learning is a major focus of the Assessment course, ECE 3360, as well as methods for documenting student learning. Candidates examine various teacher-constructed and standardized instruments used to assess student learning and strategy for selecting and using assessment methods. A focus on pupil self-assessment was added to course instruction around lesson planning. Finally, based on feedback from this data and University Supervisors' ratings, course instructors have become more intentional in incorporating methods of assessment across specific content area course work. In order to continue to be responsive to the climate of accountability for P-5 student learning and to improve our candidates' competencies in assessing P-5 student learning, this is a continued focus in the content area course work. - We learned from program data, specifically the Observation Field Performance – media communication sub-indicator that teacher candidates are avid users of technology in their personal lives and for teacher directed instruction; however, they need improvement in using technology for student learning. In response, the program revised and renamed ECE 3602: Reading and Language Arts in Early Childhood Education II to ECE 3602: Digital Composing as Literacy Learning. One change in course content included a new focus on digital literacy for student learning. Teacher candidates are given opportunities to learn and design multimedia digital literacy compositions themselves and with K-12 students and their teachers. Additionally, in order to give teacher candidates more experience working and communicating in a learning community online, we offered ECE 3021: Child Development as a hybrid course. - The program revised the three-course sequence, ECE 3661, ECE 3662, ECE 3663: Classroom Management and Field Experiences I, II, III in Early Childhood Education, emphasizing lesson plan development and Responsive Classroom.
Management strategies in order to target classroom management, an area rated as one of the lowest on key assessments across the five years. Classroom Management is an area that is typically a struggle for new teachers. · Our scores are equal or above the state in all areas on the GACE Content Assessment with the lowest area on test 001: understand the conventions of Standard English grammar, usage, and mechanics was equivalent to the state score. In response to this outcome the program continues to implement supplemental instruction in grammar, usage, and mechanics, and style (GUMS) for candidates who have been identified as needing further instruction in this area. We expect to see improvement in teacher candidates’ GACE scores in this area in 2013-2014. · Our scores on the GACE Content Assessment test 002 are higher than the state except for one area, again the lowest state rated outcome: understand concepts and principles of earth science. The program continues to implement course changes in ISCI 2001 with an increased emphasis on content development in earth and life sciences, a collaborative effort by the College of Arts & Sciences and the College of Education faculty who implement co-teaching models of delivery. We expect to see improvement in teacher candidates’ GACE scores in earth science in 2013-2014.

Assessment Data by Section
2012-2013 Early Childhood Education BSED (B-5)
As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

Mission / Purpose
The mission of Birth Through Five (B-5) is to provide an exemplary, interdisciplinary teacher preparation program for early care and education professionals, in order to positively impact the quality of programs for very young children in the urban metropolitan Atlanta region. The program prepares new teachers, current teachers or career changers for employment in varied settings with very young children (birth through Kindergarten) both typically developing and those with special education needs. Graduates of the program are well prepared for jobs as certified teachers, administrators, or early education specialists in the Birth Through Five and Preschool Special Education fields. Our program is committed to principles and practices that are respectful of the unique characteristics of the children, families, and teacher candidates with whom we work.

The B-5 program provides a unique collaboration with the Georgia System of Technical Colleges. A system-wide articulation agreement allows a pathway to the B-5 bachelor’s degree completion for students with an Associates Degree in Early Care and Education from an accredited technical college program. As of September, 2012 sixty-six (69) students have declared the B-5 major, with 24 graduates during the 2010-2011 and 2011-2012 academic years.

Goals
G 1: Content Knowledge
The teacher candidate will possess the content knowledge necessary to understand the content in the curriculum they teach.

G 2: Pedagogical Knowledge and Skills
The teacher candidate will possess the pedagogical content knowledge and skills to plan and teach effectively.

G 3: Student Learning
The teacher candidate will use varied instructional strategies, assessment techniques and critical reflection to document children’s development and learning.

G 4: Professional Dispositions
The teacher candidate will work collaboratively with diverse professionals and display professional and ethical behaviors.

Student Learning Outcomes/Objectives
SLO 1: Demonstrates content knowledge (G: 1) (M: 1)
The teacher candidate understands child development and learning and the central concepts of the subject areas she/he teaches and creates learning experiences that are developmentally appropriate.

SLO 2: Plans effectively for development and learning (G: 2) (M: 2)
The teacher candidate plans for the educational progress of children based upon knowledge of the individual student, curriculum and behavioral goals, family goals and community.

SLO 3: Uses assessment methods to document student learning (G: 3) (M: 3)
The teacher candidate understands the goals and benefits of assessment and uses formal and informal strategies to evaluate the development and learning of the child.

SLO 4: Values and exhibits professional and ethical dispositions (G: 4) (M: 4)
The teacher candidate knows and uses the ethical guidelines of the profession. She/he uses reflection to improve practice and displays interpersonal and communication skills with diverse learners, families and colleagues.

Measures, Targets, and Findings
M 1: Evaluation of Field Performance (Clinical Practice) (O: 1)
This measure rates the candidate's overall professional performance in the early childhood classroom. The measure/rubric is based on the 15 professional standards of the early care and education profession (NAEYC and CEC). At the completion of student
teaching (clinical practice), teacher candidates must receive a rating from the university supervisor of "meets" or "exceeds" on each standard/element of the rubric. If a candidate does not receive a minimum rating of "meets," s/he will be required to extend or repeat student teaching with additional coaching and action plans until mastery of standards is demonstrated.

Source of Evidence: Field work, internship, or teaching evaluation

**Target for O1: Demonstrates content knowledge**

85% of candidates will receive ratings of "meets standard" or "exceeds standard" for all standards demonstrating content knowledge in the field.

**Findings 2012-2013 - Target: Met**

94% of teacher candidates (15/16) received ratings of "meets standard" or "exceeds standard" for all indicators demonstrating knowledge of content and pedagogy in the field. The highest mean ratings for candidates (2.8/3.0) were in the areas of "promoting child development and learning," and "becoming a professional." Candidates also received strong ratings for standards focused on working with families and communities (2.75 - 2.81/3.0), which is an improvement from prior assessment cycles. Lower mean ratings were noted for "uses a broad repertoire of developmentally appropriate approaches" (2.56) and "engaging in advocacy for children in the profession." (2.62). One teacher candidate received ratings of "does not meet standard" on three (3) performance standards. This student was required to extend her student teaching internship by two weeks with a focused professional development plan on these standards. The candidate did re-mediate areas of weakness and passed student teaching with a grade of "C". [Please note: the LiveText data table linked to this finding shows only 11 candidates in the overall summary; instead of the 16 actual candidates. This error is due to one of the raters completing all ratings except "overall rating." ]

**M 2: IEP/ IFSP Project (O: 2)**

This measure rates the teacher candidate's ability to plan for a young child with special needs by completing a sample IEP or an IFSP. An IEP is the formal plan that teachers, parents and specialists develop to meet the educational needs of a student age 3-21 who is eligible for special education services. An IFSP is the formal plan that describes a child's and family's needs and the services to be provided for children with disabilities from birth through age three. Candidates develop the formal plan in a methods course for exceptional children EXC 4530. A 32 point rubric aligned with professional standards (NAEYC and CEC) is used to rate the candidate's project on eight (8) indicators. Ratings include: mastery (4), accomplished (3), developing (2), and beginning (1). Candidates are expected to receive a rating of at least "developing" on each indicator at mid-point in the program since it may be their first exposure to the IEP/IFSP process and the project proceeds their full-time student teaching experience. Birth-Five candidates will receive the Preschool Special Education Endorsement upon program completion.

Source of Evidence: Project, either individual or group

**Target for O2: Plans effectively for development and learning**

85% of candidates will obtain a rating of at least "developing" for all eight indicators demonstrating their ability to plan effectively for children's development and learning.

**Findings 2012-2013 - Target: Met**

90% (9/10) candidates received a rating of at least "developing" on all eight indicators of the IEP/IFSP project. In fact, seven (7) students received the highest rating of "mastery," and two received ratings of "accomplished." Only 1 candidate received a rating of "beginning" which is below the target. Candidates with a rating below target are able to re-mediate their skills in the second methods course for working with children with disabilities. Therefore, candidates have three chances to demonstrate mastery of all indicators, in EXC 4520, EXC 4530 or BRFV 4661 (final internship).

**M 3: Portfolio (Documentation of Learning) (O: 3)**

This measure rates the teacher candidate's performance against national standards through a professional portfolio. The portfolio includes artifacts and reflective narratives. Examples of artifacts are lesson plans, child case studies, research reviews, and photo documentation of children's learning. Candidates organize the portfolio based on the standards of the National Association for the Education of Young Children (NAEYC) and the Council for Exceptional Children (Division of Early Childhood DEC/CEC). Candidates submit assigned artifacts and rationales each semester for progress monitoring. The final portfolio evaluation is completed at the end of student teaching. One key component of the portfolio is the Documentation of Learning (DOL) Project that measures the candidate's impact on student learning. This project requires the candidate to document children's learning during a 10 day thematic unit implemented during student teaching. The portfolio rubric element that rates the candidate's performance on the DOL project is titled "impact on student learning." Rubric ratings are "exceeds expectations," "satisfactory," and "unsatisfactory." 

Source of Evidence: Portfolio, showing skill development or best work

**Target for O3: Uses assessment methods to document student learning**

85% of teaching candidates will obtain "satisfactory" or "exceeds expectations" on the portfolio rubric rating for "impact on student learning." This rating includes scores on the Documentation of Learning (DOL) Project from 73 - 92 (satisfactory) or 93 - 100 (exceeds).

**Findings 2012-2013 - Target: Met**

100% of candidates (16/16) received ratings of “satisfactory” or “exceeds expectations” on the Documentation of Learning Project. This project is embedded in the B-5 professional portfolio and is rated under the indicator, “Impact on Student Learning.” Eight (8) candidates received ratings of "exceeds expectations" with scores between 93-100 points. Seven (7) candidates received ratings of "satisfactory" with scores ranging between 73 - 92. The overall project average was 82/100. Several candidates received ratings of "partially met" or "not met" on individual components of the project. These lower ratings were not due to lack of knowledge or skill, but typically omissions of the component or technology problems encountered by candidates with uploads into LiveText.

**M 4: Dispositions Survey (O: 4)**

The College of Education administers an online survey to assess all teacher candidate's professional dispositions. The measure is called "Five Dispositions of Effective Educational Professionals." Candidates receive a rating from program faculty mid program and end of program. Ratings are as follows: Exceptional (4 pts), Acceptable (3 pts), Marginal (2 pts), Unacceptable (1pt).

Source of Evidence: Academic indirect indicator of learning - other
Details of Action Plans for This Cycle (by Established cycle, then alpha)

Report data for "completers" only or revise schedule of assigned standards
This is a new program with no current "completers." The data for this outcome is for 12 candidates who are "in progress," rather than "completers." These candidates were not assigned standards for demonstrating professional and ethical practices in this assessment cycle. This is an unintended design flaw in this assessment; our attempts to provide "formative" data in Weave are incomplete. In the future, the program will report measures for "completers" only. Completers will have addressed all standards by the end of student teaching. Another possible solution would be to modify the schedule of assigned standards so that all outcomes have some data from the e-portfolio in the assessment cycle.

Established in Cycle: 2009-2010
Implementation Status: Planned
Priority: Medium
Implementation Description: Data for the e-portfolio measure will be presented for program completers when all standards have been assigned to meet learning outcomes.
Projected Completion Date: 06/2010
Responsible Person/Group: B-5 Program Coordinator
Additional Resources: None
Budget Amount Requested: $0.00 (no request)

Report data for "completers" only or revise schedule of assigned standards
This is a new program with no current "completers." The data for this outcome is for 12 candidates who are "in progress," rather than "completers." These candidates were not assigned standards for demonstrating their competence in family and community relations this assessment cycle. This is an unintended design flaw in this assessment; our attempts to provide "formative" data in Weave are incomplete. In the future, the program will report measures for "completers" only. Completers will have addressed all standards by the end of student teaching. Another possible solution would be to modify the schedule of assigned standards so that all outcomes have some data from the e-portfolio in the assessment cycle.

Course assignment will be redesigned
There are three indicators on the IEP/IFSP project rubric where more than 85% of candidates received ratings of "beginning," which is below the achievement target. These indicators are: "provides statement of environments other than natural or general education classroom," "identifies the person responsible for implementation," and "provides for transition planning." Among these three indicators, over half of the candidates (61%) scored below expectation in "provides for transition planning." An analysis of the student work and rubric ratings revealed that students did not follow the specific guidelines in the assignment or use the rubric to insure that all indicators/elements were included in the project. It was determined that the lower ratings did not result from students lack of knowledge of these indicators. The course instructor has determined that a suitable action plan will be to give students a specific
There are three indicators on the IEP/IFSP project rubric where more than 85% of candidates received ratings of “beginning,” which is below the achievement target. These indicators are: “provides statement of environments other than natural or general education classroom,” “identifies the person responsible for implementation,” and “provides for transition planning.” An analysis of the student work and rubric ratings revealed that students did not follow the specific guidelines in the assignment or use the rubric to insure that all indicators/elements were included in the project. It was determined that the lower ratings did not result from students lack of knowledge of these indicators. The course instructor has determined that a suitable action plan will be to give students a specific template with all indicators/elements to be filled in. This template, along with the assignment instructions and rubric, should assist the candidates in providing all required project components. Additionally, the students will have two courses to work on the IEP/IFSP (EXC 4530/EXC 4520). It is expected that their scores will improve in the second course, although assessment data will only be reported from one course EXC 4530 (these courses are not required to be taken sequentially).

**Rubric revised to clarify minimum level of performance**

Going forward from fall, 2012, the IEP/IFSP rubric will be revised to reflect clearer levels of proficiency and passing scores: Mastery (29-32 points); Accomplished (25-28 points); Developing (24 points); Beginning (23 points or fewer). If a student receives 23 points or fewer, they will need to redo and resubmit the assignment until a passing score is obtained.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Prior assessment data from one of our measures, the End Program Evaluation of Field Performance, revealed that candidates in their final student teaching internship received relatively lower ratings from cooperating teachers and university supervisors on standards related to working with families and communities. At our program advisory meetings, we discussed this finding and possible additions/assignments to one course, BRFV Family and Community Relations in Birth Through Five. Candidate's 2012-2013 ratings on these standards is improved over the 2011-2012 assessment. In fact, some of the highest mean ratings are in this cluster of three standards, ranging from 2.75 - 2.81/3.0. This outcome could be influenced by the course changes or a function of the candidates or school contexts for the reporting year. We will continue to monitor candidate performance on this cluster of professional standards focused on family/community relations during the final field evaluation.

---

**Analysis Questions and Analysis Answers**

**ACADEMIC PROGRAM QUESTION 1:** What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

We observed and reported that one of our measures, the IEP/IFSP project, was using a rubric that was ineffective in reporting expectations and unclear to students. The rubric was revised and recent data reveal fewer candidates receiving ratings below target. We will continue to use this revised rubric and monitor student performance.

**ACADEMIC PROGRAM QUESTION 2:** What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Prior assessment data from one of our measures, the End Program Evaluation of Field Performance, revealed that candidates in their final student teaching internship received relatively lower ratings from cooperating teachers and university supervisors on standards related to working with families and communities. At our program advisory meetings, we discussed this finding and possible additions/assignments to one course, BRFV Family and Community Relations in Birth Through Five. Candidate's 2012-2013 ratings on these standards is improved over the 2011-2012 assessment. In fact, some of the highest mean ratings are in this cluster of three standards, ranging from 2.75 - 2.81/3.0. This outcome could be influenced by the course changes or a function of the candidates or school contexts for the reporting year. We will continue to monitor candidate performance on this cluster of professional standards focused on family/community relations during the final field evaluation.

Assessment Data by Section
2012-2013 Early Childhood Education MEd

As of: 12/12/2016 05:59 PM EST
(Includes those Action Plans with Budget Amounts marked One-Time, Recurring, No Request)

**Mission / Purpose**

The Collaborative Master's Program (CMP) provides a unique approach to educational graduate studies, unparalleled in the nation. Educational equity and student-focused teaching are guiding tenets of the program. We believe students from all backgrounds should have equal access to quality instruction, resources, and other educational opportunities. Each year we invite teachers from the metropolitan Atlanta area to explore the practices, ideas, and beliefs which guide and direct their teaching. In line with our focus on educational equity, teachers consider questions such as, How do my lived experiences impact how I view my students, how my students learn, and their families? What does teaching for educational equity look like? Why is there an achievement gap? Are the interests of my students reflected in my instruction? Our focus on student-centered teaching asks teachers to consider questions such as, Why do I teach the way that I do? When are my students engaged in learning? Does my instruction meet the needs of all of my students? During the year-long program, teachers engage in rigorous study, debate, and research focused on improving their teaching and their students' learning. The teachers' classrooms are the contexts for their work. Their classrooms are their laboratories. The teachers are guided by faculty who are educators and researchers.

**Goals**

**G 1: Students will become empowered**
Students will become empowered as instructional decision makers.

**G 2: Students will advocate for their classroom students' instructional needs**
Students will advocate for instruction that addresses the needs of their classroom students.

**G 3: Students will advocate for educational justice**
Students will advocate for educational justice for all their classroom students.

**Student Learning Outcomes/Objectives**

**SLO 1: Educators manage and monitor student learning. (M: 3)**
The Teacher Development Rubric assesses the students content knowledge, pedagogical knowledge, planning, and effects on student learning through their performance on two program activities that focus directly on the teacher's in-classroom practice: faculty classroom visits and teacher video clubs.

Relevant Associations: This objective is from National Board Performance Teaching Standard

**SLO 2: Educators demonstrate subject matter knowledge. (M: 2, 3, 4)**
Educators have mastery over the subject(s) they teach and the skill and experience in teaching the subject(s).

Relevant Associations: This outcome is from National Board Teaching Performance Standards

**Other Outcomes/Objectives**

**O/O 3: Educators reflect on their practice. (M: 1, 2)**
Educators critically examine their practice on a regular basis to deepen knowledge, expand their repertoire of skills, and incorporate new findings into their practice.

Relevant Associations: This objective is from NBPTS

**O/O 4: Educator will collaborate with peers and others. (M: 2, 4)**
Educators collaborate with others to improve student learning and they know how to work collaboratively with parents.

Relevant Associations: This objective is from NBPTS

**O/O 5: Educator will show commitment to student learning. (M: 2)**
Educators are dedicated to making knowledge accessible to all students. They believe all students can learn and they understand how students develop and learn. They respect the cultural and family differences students bring to their classroom.

Relevant Associations: This objective is from NBPTS

**Measures, Targets, and Findings**

**M 1: Benchmark (O: 3)**
The "Impact of Program Rubric" assesses the candidate's perception of how the CMP program impacted his/her views of teaching and learning. Assessment of candidate's occurs twice during the program—end of Spring semester, via Benchmark assignment, and then at the end of the second summer semester, via a Capstone assignment. The rubric is aligned with the PEF Conceptual Framework and the NBPTS graduate teaching standards. Specifically, the rubric assesses the candidate's: (a) knowledge of child-centered pedagogy (Conceptual Framework standard: 1.1, 1.2 and NBPTS Standard: 1, 2, 3) (b) knowledge of the content (Conceptual Framework standard: CF.1.1, 1.2 and NBPTS Standard: 2, 4) (c) ability to monitor and manage student learning; (Conceptual Framework standard: 1.3, 2.2, 3.1, 3.2; NBPTS Standard: 3) (d) to think systematically about their practice and learn
from performance (Conceptual Framework standard: 1.2, 1.3, 2.3 and NBPTS Standard: 4) (e) participation in a learning community (Conceptual Framework standard: 2.2, 2.3, 3.1, 3.2, 3.3, and NBPTS Standard: 5).

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Educators demonstrate subject matter knowledge.

The Capstone is similar to a Showcase Portfolio in that it includes written reflections, samples of educator’s work while in the program as well as sample of their students’ work. All are included to demonstrate the educator’s growth while in the CMP program. The rubric has the following four proficiency categories: Not Demonstrated, Novice/Independent; Intermediate, and Advanced. Scores were assigned on a 1-4, with 4 representing the Advanced category. Educators who have a total score between 2.0 – 4.0 are considered to have met the target performance. Mid-program Target: 2 (1-4 scale)

Findings 2012-2013 - Target: Not Reported This Cycle

Note: Two changes have occurred in the CMP that affect the reporting of the findings. 1. Typically the students began the CMP in the summer and then were graduated the next summer. (Note in the CMP, the students progress through the program as a cohort.) With this structure, all program requirements were completed by the next summer and all measures had been administered by the September WEAVE due date. This structure changed with the 2012-2013 CMP cohort. This cohort began the program Fall of 2012 and will graduate Fall 2013. Therefore all measures have not been administered by the September Weave due date. To accommodate this program structure change, the decision was made to report Midpoint data for the 2012-2013 assessment cycle and then report the final findings in the 2013-2014 assessment cycle. 2. The CMP will end with the 2013 cohort, so the scores reported during the 2013-2014 will be last scores reported. The CMP has been replaced with an ECE M.Ed. Mid-program Analysis: Ten candidates were assessed with the Mid-program Impact of Program Rubric I Benchmark. For the six dimensions evaluated, the 10 candidates scored either in the Novice/Independent (NI) or Intermediate (I), category. As such, all candidates met target. (See Table) Based on these results the candidates are performing on target and are poised to continue their development as they participate: in a variety of activities that promote reflection, in-class discussions about democratic practice, and in designing learner-centered experiences. 1. Candidate critically analyzes program experiences to identify program impact on his/her classroom practice. N: 3 I: 7 A: 0 2. Candidate critically analyzes program experiences to identify program impact on his/her classroom practice. N: 3 I: 7 A: 0 3. Candidate uses the professional literature to support his/her view of teaching and learning. N: 5 I: 5 A: 0 4. Candidate uses knowledge of students’ cultures, experiences, & communities to create & sustain culturally responsive classrooms & schools. N: 5 I: 5 A: 0 5. Candidate includes all required components in Benchmark. N: 10 A: 0 6. Candidate uses technology and other media to augment instruction. N: 7 I: 3 A: 0

The Impact of Program Rubric II will be administered at the end of Fall 2013 and will be reported during the 2013-2014 assessment cycle.

Target for O3: Educators reflect on their practice.

The Capstone is similar to a Showcase Portfolio in that it includes written reflections, samples of educator’s work while in the program as well as sample of their students’ work. All are included to demonstrate the educator’s growth while in the CMP program. The rubric has the following four proficiency categories: Not Demonstrated, Novice/Independent; Intermediate, and Advanced. Scores were assigned on a 1-4, with 4 representing the Advanced category. Educators who have a total score 3.0 – 4.0 are considered to have met the target performance. Findings will be completed at the end of Summer Semester 2012 once the candidates turn in their Capstones. Target: 3 (1-4 scale)

Findings 2012-2013 - Target: Not Reported This Cycle

Note: Two changes have occurred in the CMP that affect the reporting of the findings. 1. Typically the students began the CMP in the summer and then were graduated the next summer. (Note in the CMP, the students progress through the program as a cohort.) With this structure, all program requirements were completed by the next summer and all measures had been administered by the September WEAVE due date. This structure changed with the 2012-2013 CMP cohort. This cohort began the program Fall of 2012 and will graduate Fall 2013. Therefore all measures have not been administered by the September
Weave due date. To accommodate this program structure change, the decision was made to report Midpoint data for the 2012-2013 assessment cycle and then report the final findings in the 2013-2014 assessment cycle. 2. The CMP will end with the 2013 cohort, so the scores reported during the 2013-2014 will be last scores reported. The CMP has been replaced with an ECE M.Ed. Capstone The Impact of Program Rubric II will be administered at the end of Fall 2013 and will be reported during the 2013-2014 assessment cycle.

**Target for O4: Educator will collaborate with peers and others.**

The Capstone is similar to a Showcase Portfolio in that it includes written reflections, samples of educator's work while in the program as well as sample of their students’ work. All are included to demonstrate the educator’s growth while in the CMP program. The rubric has the following four proficiency categories: Not Demonstrated, Novice/Independent; Intermediate, and Advanced. Scores were assigned on a 1-4, with 4 representing the Advanced category. Educators who have a total score 3.0 – 4.0 are considered to have met the target performance. Target: 3 (1-4 scale)

**Findings 2012-2013 - Target: Not Reported This Cycle**

Note: Two changes have occurred in the CMP that affect the reporting of the findings. 1. Typically the students began the CMP in the summer and then were graduated the next summer. (Note in the CMP, the students progress through the program as a cohort.) With this structure, all program requirements were completed by the next summer and all measures had been administered by the September WEAVE due date. This structure changed with the 2012-2013 CMP cohort. This cohort began the program Fall of 2012 and will graduate Fall 2013. Therefore all measures have not been administered by the September Weave due date. The CMP will end with the 2013 cohort, so the scores reported during the 2013-2014 will be last scores reported. The CMP has been replaced with an ECE M.Ed. Capstone The Impact of Program Rubric II will be administered at the end of Fall 2013 and will be reported during the 2013-2014 assessment cycle.

**M 3: Teacher Development (O: 1, 2)**

This project enables teacher candidates to improve their classroom practice. Two program activities focus directly on the teacher's in-classroom practice: faculty classroom visits and teacher video clubs. Faculty Classroom Visits: Program faculty visit each teacher two times during the Fall semester and two times during Spring semester. The visits include an observation of the educator and a follow-up debriefing. After the visit, the educator submits a written reflection describing what was learned and how future work will be influenced by this new information. Teacher Video Clubs: Teachers meet in small groups three times Fall semester and three times Spring semester. At each meeting, one to three teachers share a 5 to 10 minute video clip of a lesson. Teachers prepare to share their clips by completing the protocol.

Source of Evidence: Performance (recital, exhibit, science project)

**Target for O1: Educators manage and monitor student learning.**

The rubric has the following four proficiency categories: Not Demonstrated, Novice/Independent; Intermediate, and Advanced. Scores were assigned on a 1-4, with 4 representing the Advanced category. For the mid-program assessment cycle, educators who have a total score between 2.0 -3.0 for every item on the ten item rubric. Therefore 100% of the candidates met target. Mid-program Target: 2 (1-4 scale)

End of Program Target: 3 (1-4 scale)

**Findings 2012-2013 - Target: Met**

Note: Two changes have occurred in the CMP that affect the reporting of the findings. 1. Typically the students began the CMP in the summer and then were graduated the next summer. (Note in the CMP, the students progress through the program as a cohort.) With this structure, all program requirements were completed by the next summer and all measures had been administered by the September WEAVE due date. Capstone The Impact of Program Rubric II will be administered at the end of Fall 2013 and will be reported during the 2013-2014 assessment cycle.
3.1 Candidates use knowledge of students' cultures, experiences, & communities to create & sustain culturally responsive classrooms & schools. N 8 12 A 0 1.2 Candidates coordinate time, space, activities, technology & other resources to provide active & equitable engagement of diverse learners in real world experiences. N 4 16 A 0 1.3 Candidates implement appropriate communication techniques to provide for learner interaction within local & global communities. N 6 I 4 A 0 The scores fell in two categories Novice or Intermediate. For four items: (1.1, 2.2, 3.1, 3.3) the scores fell into Novice or Intermediate. For four items (1, 2, 3, 4; 5, 2) more candidates scored in the Intermediate category than the Novice. For two items (2, 3, 4; 2, 3) all candidates scored in the Intermediate category. Based on these data the candidates are performing on target and are poised to continue their improvement as they participate in the variety of teacher development activities.

Target for O2: Educators demonstrate subject matter knowledge.

The rubric has the following four proficiency categories: Not Demonstrated, Novice/Independent; Intermediate, and Advanced. Scores were assigned on a 1-4, with 4 representing the Advanced category. For the mid-program assessment cycle, educators who have a total score between 2.0 – 4.0 are considered to have met the target performance. Mid Program Target: 2 (1-4 scale)

End of Program Target: 3 (1-4 scale)

Findings 2012-2013 - Target: Met

Mid-program Target: 2 (1-4 scale) Mid-program analysis: Ten candidates were assessed. All ten candidates scored between 2.0 -3.0 for every item on the ten item rubric. Therefore 100% of the candidates met target. 1.1 Candidates use knowledge of child development & theories of learning to design meaningful educational opportunities for all learners. N 6 I 4 A 0 1.2 Candidates possess & use research-based, discipline-specific knowledge & pedagogy to facilitate learning for all. N 4 16 A 0 1.3 Candidates reflect critically upon data as part of a recursive process when planning, implementing & assessing teaching, learning, & development. N 4 16 A 0 1.4 Candidates critically analyze educational policies and/or practices that affect learners in metro contexts. N 4 I 6 A 0 2.1 Candidates know & respect individual differences, establish productive & ethical relationships with students, & modify the learning environment to positively impact student learning. N 1 10 A 0 2.2 Candidates create engaging learning communities where the diverse perspectives, opinions, & beliefs of others are acknowledged & respected. N 6 I 4 A 0 2.3 Candidates commit to continuing personal & professional development. N 1 0 A 0 3.1 Candidates use knowledge of students' cultures, experiences, & communities to create & sustain culturally responsive classrooms & schools. N 8 12 A 0 1.2 Candidates coordinate time, space, activities, technology & other resources to provide active & equitable engagement of diverse learners in real world experiences. N 4 16 A 0 1.3 Candidates reflect critically upon data as part of a recursive process when planning, implementing & assessing teaching, learning, & development. N 4 16 A 0 1.4 Candidates critically analyze educational policies and/or practices that affect learners in metro contexts. N 6 I 4 A 0 The scores fell in two categories Novice or Intermediate. For four items: (1.1, 2.2, 3.1, 3.3) the scores fell into Novice or Intermediate. For four items (1.2, 1.3, 1.4; 3.2) more candidates scored in the Intermediate category than the Novice. For two items (2.1, 2.3) all candidates scored in the Intermediate category. Based on these data the candidates are performing on target and are poised to continue their improvement as they participate in the variety of teacher development activities.

M 4: Content Knowledge Summative Assessment (O: 2, 4)

This assessment includes the combined end of program GPA for the two content courses: ECE 7390 Curriculum in Early Childhood Education (Mathematics) and ECE 7400 Curriculum in Early Childhood Education (Literacy). Grades for these two courses derive from multiple projects as well as in-class experiences and participation.

Source of Evidence: Written assignment(s), usually scored by a rubric

Target for O2: Educators demonstrate subject matter knowledge.

The target is 3 on a 4 point scale: 4 (Advanced), 3 (Intermediate), 2 (Novice), 1 (Not evident).

Findings 2012-2013 - Target: Met

Mid-program Target: 2 (1-4 scale) Mid-program analysis: Ten candidates were assessed. All ten candidates scored between 2.0 -3.0 for every item on the ten item rubric. Therefore 100% of the candidates met target. 1.1 Candidates use knowledge of child development & theories of learning to design meaningful educational opportunities for all learners. N 6 I 4 A 0 1.2 Candidates possess & use research-based, discipline-specific knowledge & pedagogy to facilitate learning for all. **Details of Action Plans for This Cycle (by Established cycle, then alpha)**

**Examine literature on achievement gap between majority and minority students.**

During the Glue classes attention will be directed toward examining reasons behind the achievement gap between majority and minority students. Students will read a variety of texts and hold classroom discussions.

- **Established in Cycle:** 2008-2009
- **Implementation Status:** Planned
- **Priority:** High
- **Implementation Description:** Students will be given their first reading related to the achievement gap at the first glue class in August.
- **Projected Completion Date:** 07/2009
- **Responsible Person/Group:** The two program directors will be responsible for selecting readings and for leading the discussions.

**Action Plans**

Although target was met as a group, the following action plans have been identified to ensure that more students score at least at the 80% mark. An analysis of the Capstones identified two areas that need to be addressed. These are: writing using the professional literature and writing to illustrate reflective thinking. To address these areas of need, the program will intensify its focus on writing. Specifically, 1. The literacy course will include a more intensive focus on writing. A literature review will be assigned during the summer. To help with organization, the students will be provided a template for organizing a literature review. Also a Writing Workshop structure will be used in class to included mini lessons and in-class revision sessions. 2. The Benchmark assignment will be used to focus on reflective writing. Again a Writing Workshop structure will be used in class to included mini lessons and in-class revision sessions.

- **Established in Cycle:** 2010-2011
- **Implementation Status:** Planned
- **Priority:** High
- **Relationships (Measure | Outcome/Objective):**
  - **Measure:** Capstone | **Outcome/Objective:** Educator will show commitment to student learning.

Analysis Questions and Analysis Answers

ACADEMIC PROGRAM QUESTION 1:  What changes in the assessment process has your degree program made since last year's assessment report? (e.g. revised learning outcomes, measures, targets, etc.) Why were these changes made? What changes and improvements in the assessment process will you make in the coming academic year?

Note: Two changes have occurred in the CMP that affect the reporting of the findings. 1. Typically the students began the CMP in the summer and then were graduated the next summer. (Note in the CMP, the students progress through the program as a cohort.) With this structure, all program requirements were completed by the next summer and all measures had been administered by the September WEAVE due date. This structure changed with the 2012-2013 CMP cohort. This cohort began the program Fall of 2012 and will graduate Fall 2013. Therefore all measures have not been administered by the September Weave due date. To accommodate this program structure change, the decision was made to report Midpoint data for the 2012-2013 assessment cycle and then report the final findings in the 2013-2014 assessment cycle. 2. The CMP will end with the 2013 cohort, so the scores reported during the 2013-2014 will be last scores reported. The CMP has been replaced with an ECE M.Ed.

ACADEMIC PROGRAM QUESTION 2:  What is the impact of the data obtained from assessment findings on your educational degree program? What changes and improvements to your educational program will be made based on this year's assessment data? (e.g., revised curriculum, courses, sequence, etc.) If changes to curriculum or courses are made for other reasons, please explain.

Note: Two changes have occurred in the CMP that affect the reporting of the findings. 1. Typically the students began the CMP in the summer and then were graduated the next summer. (Note in the CMP, the students progress through the program as a cohort.) With this structure, all program requirements were completed by the next summer and all measures had been administered by the September WEAVE due date. This structure changed with the 2012-2013 CMP cohort. This cohort began the program Fall of 2012 and will graduate Fall 2013. Therefore all measures have not been administered by the September Weave due date. To accommodate this program structure change, the decision was made to report Midpoint data for the 2012-2013 assessment cycle and then report the final findings in the 2013-2014 assessment cycle. 2. The CMP will end with the 2013 cohort, so the scores reported during the 2013-2014 will be last scores reported. The CMP has been replaced with an ECE M.Ed.
### Mission / Purpose

The Ph.D. major in Early Childhood and Elementary Education prepares scholars who serve as researchers and educators in a variety of roles including basic and applied research, curriculum development, and teacher education. As most of our graduates become educational researchers and teacher educators in universities and colleges, we strive to create thoughtful scholars who have deep theoretical understanding of their fields and strong knowledge about how to conduct research in educational and learning contexts.

### Goals

**G 1: Writers and speakers**
Candidates are thoughtful writers and speakers.

**G 2: Active seekers of knowledge**
Candidates are active seekers of knowledge.

**G 3: Ethical researchers**
Candidates are ethical researchers.

**G 4: Knowledgeable teachers**
Candidates are knowledgeable teachers.

### Student Learning Outcomes/Objectives

**SLO 1: Thoughtful writers and speakers (M: 1, 3)**
Candidates write and speak clearly. They demonstrate appropriate genre and audience awareness in their scholarly work. They are able to write and speak about research-related topics in ways that are accessible yet demonstrate deep knowledge about the field of early childhood and elementary education.

Relevant Associations: NAEYC graduate standards

#### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

#### Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

3.1 Enhance a research culture.

3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

**SLO 2: Active seeker of knowledge (M: 1, 2, 3, 4)**
Candidates demonstrate active seeking of knowledge and remain current on theory and research. They are able to critique, synthesize and implement these ideas in their practice.

Relevant Associations: NAEYC graduate standards

#### Standard Associations

1. Outcomes of educational programs, including student learning outcomes (3.3.1.1)

4. Outcomes of research (3.3.1.4)

#### Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

3.1 Enhance a research culture.

3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 3: Ethical researcher (M: 1, 3)**
Candidates will conduct quality, valid, and socially responsible inquiry related to early childhood and/or elementary education.

Relevant Associations: NAEYC graduate standards

#### Strategic Plan Associations

2.2 Leverage our national reputation in professional degree programs for the development of societal leaders.

2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).

3.1 Enhance a research culture.

3.4 Enhance supporting infrastructure for the conduct of research.

3.5 Enhance Georgia State’s contributions to the sciences, and health and medical research and education.

3.6 Other efforts in support of Goal 3 (Leading Public Research University).

**SLO 4: Knowledgeable teachers (M: 2)**
Candidates will be knowledgeable teachers who are capable of challenging their students’ thinking and constructing knowledge relative to early childhood and elementary education.
Relevant Associations: NAEYC graduate standards

Strategic Plan Associations
2.3 Other efforts in support of Goal 2 (Graduate and Professional Programs).
3.1 Enhance a research culture.
3.6 Other efforts in support of Goal 3 (Leading Public Research University).

Measures, Targets, and Findings

M 1: Comprehensive examination (O: 1, 2, 3)
Comprehensive Exams The comprehensive exam is used to evaluate PhD candidates progression to becoming thoughtful writers and speakers. Comprehensive exams involve three main parts: Part A: Written essays (2-3) that provide opportunity for the synthesis of theory and research about early childhood and elementary education. Part B: Written analysis of a research article OR comprehensive course syllabus planning document. Part C: Oral defense of parts A and B. Comprehensive examinations are evaluated using a rubric based on the following dimensions: (1) thoroughness of research synthesis; (2) demonstration of "fit" (i.e., validity, credibility) of research methods to the nature of the problem or research question (3) clarity of writing and speaking; (4) convergence of theoretical and methodological approaches; and (5) social responsibility and/or critique. The rubric uses four levels of achievement ranging from "surpassed" to "not met". Based upon the ratings of the comprehensive exam committee, each of the five items combine to provide a holistic evaluation of the comprehensive examinations and result in a pass/fail decision. Students must meet expectations in all areas of the rubric to pass comprehensive exams. In other words, a student who writes clearly but does not fulfill the other areas will fail the exams. The rubric is completed by the major adviser and the students PhD advisory committee at the end of her/his comprehensive exams. Table 1. PhD Candidates Comprehensive Examination Evaluation Rubric Goal 1: Candidates are thoughtful writers and speakers. Measure: Comprehensive exams Surpassed Met Partially met Not met Demonstrates thoroughness of research synthesis for the defined topic Demonstrates "fit" (e.g., validity, credibility, etc.) of research methods to the nature of the problem and/or research questions Effectively communicates developing understandings in written and spoken form. On the indicator, Demonstrates appropriate convergence/consistency/fit among theories and methodological approaches Demonstrates social responsibility/critique of existing research COMMENTS Source of Evidence: Comprehensive/end-of-program subject matter exam

Target for O1: Thoughtful writers and speakers
80% will pass their comprehensive exams (Parts A, B, and C) on the first attempt; all will pass by the second attempt.

Findings 2012-2013 - Target: Met
A total of seven (N = 7) students completed comprehensive exams during the 2012-2013 academic year. According to faculty evaluations of students' performance on the rubric above (see Table 1. PhD Candidates Comprehensive Examination Evaluation Rubric), all students "met" the criteria of being thoughtful writers and speakers. On the indicator Demonstrates thoroughness of research synthesis for the defined topic, three students "surpassed" expectations while four students "met" expectations. All seven students were evaluated as having "Met" criteria for the indicators: Demonstrates "fit" (e.g., validity, credibility, etc.) of research methods to the nature of the problem and/or research questions and Effectively communicates developing understandings in written and spoken form. On the indicator, Demonstrates appropriate convergence/consistency/fit among theories and methodological approaches, one student was evaluated as having "surpassed", and 6 students were evaluated as having "met" the criteria. Finally, for the indicator Demonstrates social responsibility/critique of existing research, two students were rated as having "surpassed" the indicator, while 5 students were evaluated as having "met" the indicator. These findings indicate a 100% pass rate for this indicator.

Target for O2: Active seeker of knowledge
80% of eligible students will pass comprehensive exams (Parts A, B, and C) in first attempt; all within second attempt.

Target for O3: Ethical researcher
80% of eligible students will pass comprehensive exams (Parts A, B, and C) in first attempt; all within second attempt.

M 2: Teaching apprenticeship (O: 2, 4)
Residency Teaching Experiences PhD students residency teaching experience is designed to assist them in becoming knowledgeable teachers. PhD residency teaching experiences generally involved the students in the following activities: 1. Prepare a comprehensive course syllabus including objectives, schedule of class topics, reading list, and evaluative procedures. 2. Have responsibility for actual teaching, which will include the development of subject matter, content, and method of presentation (specific guidelines for this requirement must be developed with the faculty supervisor in order to provide a consistent experience for students in the course), 3. Establish methods for evaluating him or herself (e.g., teaching portfolio, journals, student surveys, and faculty evaluation) and the course, 4. Use and interpret data gathered from all course evaluations. PhD residency teaching experiences are evaluated with a rubric that assess the following 5 domains on a 4 point scale (e.g., surpassed, met, partially met, and not met). 1. 1. Demonstrates thorough knowledge of content that is relevant, up-to-date, and comprehensive. Syllabus is organized for planning and instruction. Readings and assignments are relevant to the course topics. 2. 2. Demonstrates engaging instruction through enthusiasm and by supporting caring teacher/student and peer relationships. Promotes respect for different and diverse perspectives. Promotes collaboration. 3. 3. Adapts instruction for learners by being responsive, offering timely feedback, and presenting materials in different ways, and encouraging various means for students to express what they have learned. Offers content that is relevant to students' contexts and needs. 4. 4. Uses a variety of high-quality formative and summative assessments to inform teaching. Grades fairly. 5. 5. Course evaluations demonstrate that course goals are met. Instructor is responsive to feedback from students and peers.
Source of Evidence: Field work, internship, or teaching evaluation

Target for O2: Active seeker of knowledge
All eligible students will successfully complete a university teaching apprenticeship.

Target for O4: Knowledgeable teachers
All eligible students will successfully complete a university teaching apprenticeship.

**Findings 2012-2013 - Target: Met**

A total of eight (N=7) students were evaluated on the quality of their teaching experiences during the 2012-2013 period. According to faculty evaluations of their teaching skills, four of the students "surpassed", while 3 students "met" the criteria of: Demonstrates thorough knowledge of content that is relevant, up-to-date, and comprehensive. Syllabus is organized for planning and instruction. Readings and assignments are relevant to the course topics and Demonstrates engaging instruction through enthusiasm and by supporting caring teacher/student and peer relationships. Promotes respect for different and diverse perspectives. Promotes collaboration. Faculty evaluations of student progress on the third indicator on the rubric, Adapts instruction for learners by being responsive, offering timely feedback, and presenting materials in different ways, and encouraging various means for students to express what they have learned. Offers content that is relevant to students' contexts and needs, one student "surpassed", four students "met", and one student "partially met" the criteria. A similar finding was evident in faculty evaluations of students' progress toward the Uses a variety of high-quality formative and summative assessments to inform teaching. Grades fairly. criteria. One student "surpassed", four students "met", and one student "partially met" the criteria. Finally, for the last indicator, Course evaluations demonstrate that course goals are met. Instructor is responsive to feedback from students and peers, 1 PhD candidate "surpassed", five "met", and one "partially met" the criteria. A summary of student progress on this indicator suggests that PhD candidates "met" the criteria for becoming knowledgeable teachers at a rate of 91% (averaged across all five indicators).

**M 3: Dissertation presentation (O: 1, 2, 3)**

Dissertation Presentation The dissertation presentation is used to evaluate the degree to which PhD candidates are ethical researchers. During the dissertation presentation, PhD candidates present a research project including reviewing the literature, analyzing data, and writing a final report for publication. The rigor of the research presentation is evaluated based on dimensions that evaluate the rigor of the research. The following indicators are evaluated on a 4 point scale ranging from "Surpassed" to "Not Met": 1. Demonstrates a thorough reading and/or synthesis of the literature in a way that frames the philosophical/theoretical paradigm or research field in which the study is situated. Is able to articulate clear alignments between the study and his/her paradigm or field. 2. Demonstrates clear understanding of research methods appropriate to the current study. 3. Demonstrates thoughtful analysis and is able to craft a textual discussion that links analysis to knowledge production (i.e., findings). 4. Creates a final dissertation product that effectively communicates study results and is able to verbally defend the work. The way in which the PhD candidate conducts the research study with regards to ethical and moral responsibility is evaluated on the following dimensions from "Met" to "Not Met": 1. Demonstrates an understanding that scholarship sometimes entails conflicts of commitment, conscience, and interest that must be negotiated according to university protocols and professional standards (when applicable). 2. Demonstrates sensitivity to vulnerable populations and principle of "do no harm". 3. Complies with human subjects protocols including adherence to confidentiality and informed consent (when applicable). 4. Demonstrates academic honesty through original scholarship.

**Target for O1: Thoughtful writers and speakers**

We want 100% of our eligible PhD students to have rigorous dissertations.

**Findings 2012-2013 - Target: Met**

Two students completed their dissertation presentations during the 2012-2013 academic year. Evaluations of these students performance on the their dissertation presentations, as determined by their faculty advisors and dissertation committee, reveal that both students "met" expectations on all criteria as evaluated by the rubric. A closer examination of individual indicators reveals that one PhD student was rated as having "surpassed" the criteria of Demonstrates thoughtful analysis and is able to craft a textual discussion that links analysis to knowledge production (i.e., findings). and that both students were rated as having "surpassed" the indicator that reads: Demonstrates a thorough reading and/or synthesis of the literature in a way that frames the philosophical/theoretical paradigm or research field in which the study is situated. Is able to articulate clear alignments between the study and his/her paradigm or field. Given these findings, 100% of PhD candidates demonstrated that they were thoughtful writers and speakers by successfully defending their dissertations.

**Target for O2: Active seeker of knowledge**

One (out of 1) or 100% of our eligible PhD students successfully defended a rigorous dissertation.

**Target for O3: Ethical researcher**

One (out of 1) or 100% of our eligible PhD students successfully defended a rigorous dissertation.

**M 4: Residency Research and Service Requirement (O: 2)**
